Notes to Unaudited Condensed Consolidated Financial Statements

Note 1 - Basis of Presentation

The accompanying condensed (a) consolidated balance sheet as of December 31, 2013, which has been derived from audited consolidated financial statements, and (b) the unaudited interim condensed consolidated financial statements have been prepared and, in the opinion of management, contain all the adjustments (consisting of those of a normal recurring nature) considered necessary to present fairly the consolidated financial position and the consolidated statements of comprehensive income and consolidated cash flows for the periods presented in conformity with generally accepted accounting principles for interim consolidated financial information and the instructions to Form 10-Q and Article 8 of Regulation S-X. Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America. Operating results for the three and nine months ended September 30, 2014 are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2014. It is suggested that these condensed consolidated financial statements be read in conjunction with the consolidated financial statements and notes thereto included in the Company's annual report on Form 10-K for the fiscal year ended December 31, 2013.

Principles of consolidation and nature of operations:

The condensed consolidated financial statements include the accounts of CTI Industries Corporation and its wholly-owned subsidiaries, CTI Balloons Limited, CTI Helium, Inc. and CTF International S.A. de C.V., its majority-owned subsidiaries CTI Mexico S.A. de C.V., Flexo Universal, S.A. de C.V. and CTI Europe gmbH, as well as the accounts of Venture Leasing S. A. de R. L., Venture Leasing L.L.C and Clever Container Company, L.L.C. (the "Company"). The last three entities have been consolidated as variable interest entities. Clever Container Company, L.L.C. has been consolidated since the beginning of the fourth quarter of 2013. All significant intercompany transactions and accounts have been eliminated in consolidation. The Company (i) designs, manufactures and distributes balloon products throughout the world and (ii) operates systems for the production, lamination, coating and printing of films used for food packaging and other commercial uses and for conversion of films to flexible packaging containers and other products.

Variable Interest Entities ("VIE's"):

The determination of whether or not to consolidate a variable interest entity under U.S. GAAP requires a significant amount of judgment concerning the degree of control over an entity by its holders of variable interest. To make these

judgments, management has conducted an analysis of the relationship of the holders of variable interest to each other, the design of the entity, the expected operations of the entity, which holder of variable interests is most “closely associated” to the entity and which holder of variable interests is the primary beneficiary required to consolidate the entity. Upon the occurrence of certain events, management reviews and reconsiders its previous conclusion regarding the status of an entity as a variable interest entity. There are three entities that have been consolidated as variable interest entities.

Use of estimates:

In preparing condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amount of revenue and expenses during the reporting period in the condensed consolidated financial statements and accompanying notes. Actual results may differ from those estimates. The Company's significant estimates include reserves for doubtful accounts, reserves for the lower of cost or market of inventory, reserves for deferred tax assets and recovery value of goodwill.

Earnings per share:

Basic earnings per share is computed by dividing net income by the weighted average number of shares of common stock outstanding during each period.

Diluted earnings per share is computed by dividing the net income by the weighted average number of shares of common stock and equivalents (stock options and warrants), unless anti-dilutive, during each period.

As of September 30, 2014 and 2013, shares to be issued upon the exercise of options and warrants aggregated 368,548 and 358,648, respectively. The number of anti-dilutive shares (not included in the determination of earnings on a diluted basis) for the three months ended September 30, 2014 and 2013, were 199,000 and 189,000, respectively, all of which were represented by options. The number of anti-dilutive shares for the nine months ended September 30, 2014 and 2013, were 199,000 and 80,000, respectively, all of which were represented by options.

Significant Accounting Policies:

The Company's significant accounting policies are summarized in Note 2 of the Company's consolidated financial statements for the year ended December 31, 2013. There were no significant changes to these accounting policies during the three and nine months ended September 30, 2014.

Recent Accounting Pronouncements:

In May 2014, the Financial Accounting Standards Board (FASB) issued guidance on the recognition of revenue from contracts with customers. Revenue recognition will depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance also requires disclosures regarding the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. The guidance permits two methods of adoption: retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying the guidance recognized at the date of initial application. The guidance is effective January 1, 2017 and early adoption is not permitted. The company is currently evaluating the impact of the new guidance and the method of adoption in the consolidated financial results.

In August 2014, the FASB issued Accounting Standards Update (“ASU”) No. 2014-15, “Presentation of Financial Statements-Going Concern (Topic 205-40)” (“ASU 2014-15”). Under the standard, management is required to evaluate for each annual and interim reporting period whether it is probable that the entity will not be able to meet its obligations as they become due within one year after the date that financial statements are issued, or are available to be issued, where applicable. ASU 2014-15 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016, and early adoption is permitted. Accordingly, the standard is effective for the Company on January 1, 2017. The Company does not believe that the pronouncement will have an impact on the Company's financial statements.

Note 2 - Stock-Based Compensation; Changes in Equity

The Company has adopted Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 718 which requires all share-based payments to employees, including grants of employee stock options, to be recognized in the condensed consolidated financial statements based on their grant-date fair values.

The Company has applied the Black-Scholes model to value stock-based awards and issued warrants related to notes payable. That model incorporates various assumptions in the valuation of stock-based awards relating to the risk-free rate of interest to be applied, the estimated dividend yield and expected volatility of our common stock. The risk-free rate of interest is the related U.S. Treasury yield curve for periods within the expected term of the option at the time of grant. The dividend yield on our common stock is estimated to be 0%, as the Company did not issue dividends during 2014 and 2013. The expected volatility is based on historical volatility of the Company’s common stock.

The Company’s net income for the three months ended September 30, 2014 and 2013 includes approximately \$17,000 and \$24,000, respectively of compensation costs related to share based payments. The Company’s net income for the nine months ended September 30, 2014 and 2013 includes approximately \$60,000 and \$94,000, respectively of compensation costs related to share based payments. As of September 30, 2014 there is \$60,000 of unrecognized compensation expense related to non-vested stock option grants and stock grants. We expect approximately \$17,000 of additional stock-based compensation expense to be recognized over the remainder of 2014, \$29,000 to be recognized during 2015, \$11,000 to be recognized during 2016, and \$3,000 to be recognized during 2017.

As of September 30, 2014, the Company had three stock-based compensation plans pursuant to which stock options were, or may be, granted. The Plans provide for the award of options, which may either be incentive stock options (“ISOs”) within the meaning of Section 422A of the Internal Revenue Code of 1986, as amended (the “Code”) or non-qualified options (“NQOs”) which are not subject to special tax treatment under the Code, as well as for stock grants.

On April 12, 2001, the Board of Directors approved for adoption, effective December 27, 2001, the 2001 Stock Option Plan (“2001 Plan”). The 2001 Plan authorizes the grant of options to purchase up to an aggregate of 119,050, shares of the Company’s Common Stock. As of September 30, 2014, options for 139,958 shares (including cancelled shares re-issued under the Plan) have been granted and were fully vested at the time of grant and options for 2,000 shares remain outstanding.

On April 24, 2002, the Board of Directors approved for adoption, effective October 12, 2002, the 2002 Stock Option Plan (“2002 Plan”). The 2002 Plan authorizes the grant of options to purchase up to an aggregate of 142,860 shares of the Company’s Common Stock. As of September 30, 2014, options for 123,430 shares have been granted and were

fully vested at the time of grant and options for 27,500 shares remain outstanding.

On April 10, 2009, the Board of Directors approved for adoption, and on June 5, 2009, the shareholders of the Corporation approved, a 2009 Stock Incentive Plan (“2009 Plan”). The 2009 Plan authorizes the issuance of up to 250,000 shares of stock or options to purchase stock of the Company. As of September 30, 2014, options for 201,000 shares had been granted and options for 199,000 shares remain outstanding.

On July 17, 2012, the Company entered into a Note and Warrant Purchase Agreement with BMO Equity pursuant to which (i) BMO Equity advanced to the Company the sum of \$5 million and (ii) the Company issued to BMO Equity a warrant to purchase up to Four Percent (4%) of the outstanding shares of common stock of the Company on a fully-diluted basis (140,048 shares of common stock of the Company) at the price of One Cent (\$0.01) per share. The term of the loan provided for in this Agreement is five and a half years. Interest is payable on the outstanding balance of the loan at the rate of 11.5% per annum.

On April 12, 2013, the Company entered into Amendment No. 1 to the Note and Warrant Purchase Agreement among the Company and BMO Equity. In the Amendment, non-compliance with financial covenants prior to the date of the Amendment were waived and the Note and Warrant Purchase Agreement was amended (i) to modify the Senior Leverage Ratio and Total Leverage Ratio requirements for the fiscal quarter ending June 30, 2013 and each quarter thereafter during the term of the Note and Warrant Purchase Agreement and (ii) to modify the definitions of EBITDA and Total Funded Debt.

On September 30, 2014, the Company received waivers from each of BMO Harris and BMO Equity for non-compliance with all the financial covenants under the Credit Agreement and the Note and Warrant Purchase Agreement.

Management of the Company is currently engaged in negotiations with BMO Harris and BMO Equity, and in financing efforts, for a long-term restructuring of the agreements with those entities under which financial covenants would be modified, additional financing provided and reduction of certain loan balances achieved. Management believes that a restructuring of these agreements will be completed during the fourth quarter 2014.

The Company has not yet responded to the complaint but intends vigorously to defend against all of the claims made. An estimate of the possible loss or range of loss with respect to this claim cannot be made.

In addition to the foregoing, the Company is party to certain claims or actions arising in the normal course of business. The ultimate outcome of these matters is unknown but, in the opinion of management, the resolution of these matters is not expected to have a significant effect on the future financial position or results of operations of the Company.

Note 7 - Concentration of Credit Risk

Concentration of credit risk with respect to trade accounts receivable is generally limited due to the large number of entities comprising the Company's customer base. The Company performs ongoing credit evaluations and provides an allowance for potential credit losses against the portion of accounts receivable which is estimated to be uncollectible. Such losses have historically been within management's expectations. During the three months ended September 30, 2014 and 2013, there were two and three customers whose purchases represented more than 10% of the Company's consolidated net sales, respectively. During the nine months ended September 30, 2014 and 2013, there were two customers whose purchases represented more than 10% of the Company's consolidated net sales, respectively. Note 9 - Derivative Instruments; Fair Value

The following tables represents information about the Company’s assets and liabilities measured at fair value on a recurring basis as of September 30, 2014 and December 30, 2013, and indicate the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value:

The Company is exposed to certain market risks including the effect of changes in interest rates. The Company uses derivative instruments to manage financial exposures that occur in the normal course of business. It does not hold or issue derivatives for speculative trading purposes. The Company is exposed to non-performance risk from the counterparties in its derivative instruments. This risk would be limited to any unrealized gains on current positions. To help mitigate this risk, the Company transacts only with counterparties that are rated as investment grade or higher and all counterparties are monitored on a continuous basis. The fair value of the Company's derivatives reflects this credit risk.

On July 1, 2011, the Company entered into a swap agreement with BMO Capital Markets with respect to \$6,780,000 of our loan balances with BMO Harris Bank N.A. This swap agreement limits the Company's exposure to interest rate fluctuations on the Company's floating rate loans. The swap agreement has the effect of fixing the interest rate on the loan balances covered by the swap at 4.65% per annum. The swap agreement is a derivative financial instrument and we determine and record the fair market value of the swap agreement each quarter. The value is recorded on the balance sheet of the Company and the amount of the unrealized gain or loss for each period is recorded as interest income or expense. The swap agreement has expired as of September 30, 2014.

Foil Balloons. During the three months ended September 30, 2014 revenues from the sale of foil balloons increased by 20.9% compared to the prior year period from \$4,679,000 to \$5,657,000. During the nine months ended September 30, 2014 revenues from the sale of foil balloons increased by 11.9% compared to the prior year period from \$17,021,000 to \$19,045,000. During the nine months ended September 30, 2014, foil balloon sales to our largest customer increased to \$10,982,000 from \$10,613,000 in the nine months ended 2013. Sales of foil balloons to other customers increased to \$8,063,000 from \$6,408,000 for the same period last year. These included sales to various customers in the United States, Mexico, the United Kingdom and Europe, including increases in sales to existing customers and new customers in each of those markets. Most of the increased sales constitute sales to four chain stores in the U.S., the United Kingdom and Germany.

Latex Balloons. During the three months ended September 30, 2014 revenues from the sale of latex balloons decreased by 5.6% compared to the prior year period from \$3,178,000 to \$3,001,000. During the nine months ended September 30, 2014 revenues from the sale of latex balloons decreased by 2.0% compared to the prior year period from \$9,174,000 to \$8,986,000. The decrease during the nine months ended September 30, 2014 was attributable to decreased sales of latex to a principal customer in the U.S. to \$317,000 from \$799,000 in the nine months ended 2013.

Vacuum Sealing Products. During the three months ended September 30, 2014 revenues from the sale of pouches and vacuum sealing machines increased by 5.4% compared to the prior year from \$3,585,000 to \$3,777,000. During the nine months ended September 30, 2014 revenues from the sale of pouches and vacuum sealing machines decreased slightly by 0.1% compared to the prior year from \$8,606,000 to \$8,599,000. Our sales in this product line in 2014 and 2013 have been in two product categories: (i) zippered pouches and (ii) vacuum sealing systems incorporating vacuum sealing machines and associated pouches and rolls of film. For the three and nine months ended 2014 and 2013, sales of pouch products (and vacuum sealing machines) in these categories have been as follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Zippered Pouches	\$734,000	\$628,000	\$1,915,000	\$2,152,000
Vacuum Sealing Systems	3,043,000	2,957,000	6,684,000	6,454,000
Total	\$3,777,000	\$3,585,000	\$8,599,000	\$8,606,000

Zippered Pouches. Most of our sales of zippered pouches have been of branded products to a principal customer, although we have had limited sales of our ZipVac® pouch line as well. Sales of the zippered pouch products declined during the nine months ended September 30, 2014 from \$2.2 million in the first nine months of 2013 to \$1.9 million during the same period in 2014.

Vacuum Sealing Systems. Since 2012, we have offered a line of vacuum sealing systems which include vacuum sealing machines and associated pouches and rolls of film.

In December, 2011, we entered into a Trademark License Agreement with S. C. Johnson & Son, Inc. pursuant to which we received a license to market and sell vacuum sealing machines as well as pouches and rolls of film for use with those machines, under the Ziploc brand name. In the first quarter 2012, we introduced and began to market and sell that branded line of vacuum sealing machines and associated open-top bags and rolls. Since that time, we have offered our branded vacuum sealing system lines of product principally to chain stores in the United States, including several major chains.

Our sales of our branded vacuum sealing systems increased from \$6.5 million during the nine months ended September 30, 2013 to \$6.7 million during the same period this year, principally as the result of sales to several of retail chain stores.

Films. During the three months ended September 30, 2014 revenues from the sale of laminated film products decreased by 25.2% compared to the prior year period from \$1,919,000 to \$1,435,000. During the nine months ended September 30, 2014 revenues from the sale of laminated film products decreased by 18% compared to the prior year period from \$4,103,000 to \$3,364,000. The decrease is attributable to a decrease in sales to a principal customer. Approximately 98.5% of the sales of laminated film products during the nine months ended September 30, 2014 were to a principal customer.

Other Revenues. During the three months ended September 30, 2014, we had revenues from the sale of various other products totaling \$699,000 compared to revenues from other products in the same period during 2013 of \$1,119,000. During the nine months ended September 30, 2014, we had revenues from the sale of various other products totaling \$2,655,000 compared to revenues from other products in the same period during 2013 of \$1,955,000. The revenues from the sale of such other products during 2014 include (i) sales of home container products by a variable interest entity which we now consolidate with our financial results in the amount of \$1,612,000, (ii) sales of a line of “Candy Blossoms” and “Candy Loons” consisting of candy and small inflated balloons sold in small containers, and (iii) the sale of accessories and supply items related to balloon products.

Sales to a limited number of customers continue to represent a large percentage of our net sales. The table below illustrates the impact on sales of our top three and ten customers for the three and nine months ended September 30, 2014 and 2013.

	Three Months Ended September 30, 2014		Nine Months Ended September 30, 2014

Investing Activity. During the nine months ended September 30, 2014, cash used in investing activity was \$839,000, compared to \$1,477,000 in the same period of 2013. Substantially all of this expense is related to equipment acquisitions and capitalized maintenance, leasehold improvements, tooling and related expense.

Liquidity and Capital Resources. At September 30, 2014, the Company had cash balances of \$172,000 compared to cash balances of \$332,000 for the same period in 2013 and there was \$731,000 available to advance under the Company's revolving line of credit.

At September 30, 2014, the Company had a working capital balance of \$11,285,000 compared to a working capital balance of \$11,738,000 at December 31, 2013.

The Company's liquidity is dependent significantly on its bank financing and the Company relies on its revolving line of credit to maintain liquidity. On April 29, 2010, the Company entered into a Credit Agreement with BMO Harris Bank N.A. ("BMO Harris"). Under the Credit Agreement, BMO Harris agreed to provide loans and credits to the Company in the aggregate maximum amount of \$14,417,000. The arrangement included:

- i. A revolving credit line up to a maximum amount of \$9,000,000 based upon a borrowing base of 85% of eligible receivables and 60% of eligible inventory (up to a maximum of \$5,000,000);
- ii. A mortgage loan in the principal amount of \$2,333,350, amortized over 25 years;
- iii. A term loan in the principal amount of \$583,333 maturing in monthly principal installments of \$58,333; and
An equipment loan commitment in the amount of up to \$2,500,000 providing for loan advances from time to time
- iv. until April 29, 2012 based upon 100% of the purchase price of equipment purchased, the loans to be amortized on a five year basis commencing April 29, 2012.

The Credit Agreement included various representations, warranties and covenants of the Company, including various financial covenants.

In connection with the Credit Agreement, the Company executed and delivered to BMO Harris, a Term Loan Note, a Mortgage Loan Note, an Equipment Note and a Revolving Note, as well as a form of Mortgage, Security Agreement, Pledge Agreement (pursuant to which shares of capital stock of the Registrant's Mexico subsidiary were pledged as security for the loans), Patent Security Agreement and Trademark Security Agreement. Two officers and principal shareholders of the Company, John H. Schwan and Stephen M. Merrick each executed Limited Guaranties of the loans and also executed Subordination Agreements with respect to obligations of the Company to them.

The Credit Agreement, as amended, provides that the outstanding balance of all loans under the agreement will bear interest with reference to a base rate or, at the option of the Company, with reference to an adjusted LIBOR. At September 30, 2014, the effective rate on the outstanding loan balances was 4.0%.

As of September 30, 2014, the outstanding balances on the loans with BMO Harris were: (i) revolving line of credit, \$11,157,000, (ii) mortgage loan, \$1,921,000, and (iii) equipment loan, \$670,000.

On July 1, 2011, we entered into a swap agreement with BMO Capital Markets with respect to \$6,780,000 of our loan balances with BMO Harris. This swap agreement is designated as a cash flow hedge to hedge the Company's exposure to interest rate fluctuations on the Company's floating rate loans. The swap agreement has the effect of fixing the interest rate on the loan balances covered by the swap at 4.65% per annum. The swap agreement is a derivative financial instrument and we will determine and record the fair market value of the swap agreement each quarter. This value will be recorded on the balance sheet of the Company and the amount of the unrealized gain or loss for each period will be recorded as interest income or expense.

On July 17, 2012, the Company entered into Amendment Number 3 to the Credit Agreement among the Company and BMO Harris pursuant to which (i) the amount of the loan commitment on the revolver loan of BMO Harris was increased from \$9 million to \$12 million, (ii) BMO Harris consented to a transaction among the Company and BMO Private Equity (U.S.), Inc. ("BMO Equity") and (iii) the term of credit and loans to the Company provided in the Credit Agreement and BMO Harris was extended to July 17, 2017.

Also, on July 17, 2012, the Company entered into a Note and Warrant Purchase Agreement with BMO Equity pursuant to which (i) BMO Equity advanced to the Company the sum of \$5 million and (ii) the Company issued to BMO Equity a warrant to purchase up to Four Percent (4%) of the outstanding shares of common stock of the Company on a fully-diluted basis (140,048 shares of common stock of the Company) at the price of One Cent (\$0.01) per share. The term of the loan provided for in this Agreement is five and a half years. Interest is payable on the

outstanding balance of the loan at the rate of 11.5% per annum.

The Note and Warrant Purchase Agreement included provisions for:

- (i) a closing fee of \$100,000

- (ii) payment of the principal amount in five and a half years with optional prepayment subject to certain prepayment premiums;

- (iii) security for the note obligations in all assets of the Company junior to the security interest of BMO Harris;

- (iv) various representations and warranties and covenants of the Company;

- (v) financial covenants including an applicable senior leverage ratio, fixed charge coverage ratio and tangible net worth amount.

On April 12, 2013, the Company entered into Amendment No. 4 to the Credit Agreement among the Company and BMO Harris, and Amendment No. 1 to the Note and Warrant Purchase Agreement among the Company and BMO Equity. In the Amendments, non-compliance with financial covenants prior to the date of the Amendments was waived and both the Credit Agreement and the Note and Warrant Purchase Agreement were amended (i) to modify the Senior Leverage Ratio and Total Leverage Ratio requirements for the fiscal quarter ending June 30, 2013 and each quarter thereafter during the term of the Credit Agreement and the Note and Warrant Purchase Agreement and (ii) to modify the definitions of EBITDA and Total Funded Debt in the Credit Agreement and the Note and Warrant Purchase Agreement.

On September 30, 2014, the Company received waivers from each of BMO Harris and BMO Equity for non-compliance with all the financial covenants under the Credit Agreement and the Note and Warrant Purchase Agreement.

Management of the Company is currently engaged in negotiations with BMO Harris and BMO Equity, and in financing efforts, for a long-term restructuring of the agreements with those entities under which financial covenants would be modified, additional financing provided and reduction of certain loan balances achieved. Management believes that a restructuring of these agreements will be completed during the fourth quarter 2014.
