

Southwest Gas Holdings, Inc.
 Form 10-Q
 August 08, 2018

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
Form 10-Q
QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended June 30, 2018

<i>Commission</i>	<i>Exact name of registrant as specified in its charter and</i>	<i>State of</i>	<i>I.R.S.</i>
<i>File Number</i>	<i>principal office address and telephone number</i>	<i>Incorporation</i>	<i>Employer Identification No.</i>
001-37976	Southwest Gas Holdings, Inc. 5241 Spring Mountain Road Post Office Box 98510 Las Vegas, Nevada 89193-8510 (702) 876-7237	California	81-3881866
1-7850	Southwest Gas Corporation 5241 Spring Mountain Road Post Office Box 98510 Las Vegas, Nevada 89193-8510 (702) 876-7237	California	88-0085720

Indicate by check mark whether each registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether each registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether each registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company, or an emerging growth company. See the definitions of large accelerated filer, accelerated filer, non-accelerated filer, smaller reporting company, and emerging growth company in Rule 12b-2 of the Exchange Act.

Southwest Gas Holdings, Inc.:

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Southwest Gas Corporation:

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether each registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date.

Southwest Gas Holdings, Inc. Common Stock, \$1 Par Value, 49,133,829 shares as of July 31, 2018.

All of the outstanding shares of common stock (\$1 par value) of Southwest Gas Corporation were held by Southwest Gas Holdings, Inc. as of January 1, 2017.

SOUTHWEST GAS CORPORATION MEETS THE CONDITIONS SET FORTH IN GENERAL INSTRUCTION (H)(1)(a) and (b) OF FORM 10-Q AND IS THEREFORE FILING THIS REPORT WITH THE REDUCED DISCLOSURE FORMAT AS PERMITTED BY GENERAL INSTRUCTION H(2).

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

FILING FORMAT

This quarterly report on Form 10-Q is a combined report being filed by two separate registrants: Southwest Gas Holdings, Inc. and Southwest Gas Corporation. Except where the content clearly indicates otherwise, any reference in the report to we, us or our is to the holding company or the consolidated entity of Southwest Gas Holdings, Inc. and all of its subsidiaries, including Southwest Gas Corporation, which is a distinct registrant that is a wholly owned subsidiary of Southwest Gas Holdings, Inc. Information contained herein relating to any individual company is filed by such company on its own behalf. Each company makes representations only as to itself and makes no other representation whatsoever as to any other company.

Part I Financial information in this Quarterly Report on Form 10-Q includes separate financial statements (i.e., balance sheets, statements of income, statements of comprehensive income, and statements of cash flows) for Southwest Gas Holdings, Inc. and Southwest Gas Corporation, in that order. The Notes to Consolidated Financial Statements are presented on a combined basis for both entities. All Items other than Part I Item 1 are combined for the reporting companies.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

Note 1 Nature of Operations and Basis of Presentation

Nature of Operations. Southwest Gas Holdings, Inc., is a holding company, owning all of the shares of common stock of Southwest Gas Corporation and, prior to August 2017, 96.6% of the shares of common stock of Centuri Construction Group, Inc. (Centuri or the construction services segment). During August 2017, Southwest Gas Holdings, Inc. acquired the remaining 3.4% equity interest in Centuri that was held by the previous owners.

Southwest Gas Corporation (Southwest or the natural gas operations segment) is engaged in the business of purchasing, distributing, and transporting natural gas for customers in portions of Arizona, Nevada, and California. Public utility rates, practices, facilities, and service territories of Southwest are subject to regulatory oversight. The timing and amount of rate relief can materially impact results of operations. Natural gas purchases and the timing of related recoveries can materially impact liquidity. Results for the natural gas operations segment are higher during winter periods due to the seasonality incorporated in its regulatory rate structures. Centuri is a comprehensive construction services enterprise dedicated to meeting the growing demands of North American utilities, energy, and industrial markets. Centuri derives revenue from installation, replacement, repair, and maintenance of energy distribution systems, and developing industrial construction solutions. Centuri operations are generally conducted under the business names of NPL Construction Co. (NPL), Canyon Pipeline Construction, Inc. (Canyon), NPL Canada Ltd. (NPL Canada), W.S. Nicholls Construction, Inc. (W.S. Nicholls), and Canyon Special Projects, Inc. (Special Projects, formerly Brigadier Pipelines Inc.). Typically, Centuri revenues are lowest during the first quarter of the year due to unfavorable winter weather conditions. Operating revenues typically improve as more favorable weather conditions occur during the summer and fall months. Centuri acquired New England Utility Constructors, Inc. (Neuco) in November 2017, thereby expanding its core services in the Northeast region of the United States. See **Note 11 Acquisition of Construction Services Business** for more information.

Basis of Presentation. The condensed consolidated financial statements for Southwest Gas Holdings, Inc. and subsidiaries (the Company) and Southwest included herein have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with United States generally accepted accounting principles (U.S. GAAP) have been condensed or omitted pursuant to such rules and regulations. In connection with a holding company reorganization in January 2017, Centuri ceased to be a subsidiary of Southwest and became a subsidiary of Southwest Gas Holdings, Inc. To give effect to this change, the separate condensed consolidated financial statements related to Southwest Gas Corporation, which are included in this Form 10-Q, depict Centuri-related amounts for periods prior to January 1, 2017 as discontinued operations.

No substantive change has occurred with regard to the Company's business segments on the whole, or in the primary businesses comprising those segments as a result of the foregoing organizational changes, or due to the acquisition of Neuco. Following the organizational changes, Centuri operations continue to be part of continuing operations and included in the consolidated financial statements of Southwest Gas Holdings, Inc.

The preparation of the condensed consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. In the opinion of management, all adjustments, consisting of normal recurring items and estimates necessary for a fair statement of results for the interim periods, have been made. It is suggested that these condensed consolidated financial statements be read in conjunction with the consolidated financial statements and the notes thereto included in the 2017 Annual Report to Shareholders, which is incorporated

by reference into the 2017 Form 10-K.

Early Adoption of Accounting Standards Update (ASU) No. 2018-02. In January 2018, the Financial Accounting Standards Board (FASB) issued ASU No. 2018-02 Income Statement Reporting Comprehensive Income (Topic 220) Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income. Early adoption of the amendments in this update is permitted, including adoption in any interim period. Therefore, the Company and Southwest chose to adopt the update early, as permitted, as of January 1, 2018. The adoption of this

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATIONForm 10-Q
June 30, 2018

update is considered a change in accounting principle. The update addresses issues resulting from the December 22, 2017 enactment of the Tax Cuts and Jobs Act (TCJA). Stakeholders raised a narrow-scope financial reporting issue that arose as a consequence of the TCJA related to the fact that when deferred tax balances were remeasured in December 2017, those deferred tax balances were to be reduced, but related amounts historically accumulated in Accumulated other comprehensive income (AOCI) prior to the enactment of the TCJA, were required to be recognized as income tax expense rather than being relieved from AOCI. The amendments in this update allow a reclassification from AOCI to retained earnings for those otherwise stranded tax effects in AOCI following enactment of the TCJA. Accordingly, approximately \$9.3 million of previously stranded tax effects resulting from the TCJA were reclassified to retained earnings from AOCI on the Condensed Consolidated Balance Sheets of Southwest and the Company effective with the early adoption date. Also in association with the adoption, the Company and Southwest elected an accounting policy for releasing income tax effects from AOCI, such that the release of any income tax effects from AOCI will occur as individual items in AOCI are sold or liquidated, to the extent that the related income tax effects are material. See **Note 9 Equity, Other Comprehensive Income, and Accumulated Other Comprehensive Income** for more information.

Prepays and other current assets. Prepays and other current assets includes gas pipe materials and operating supplies of \$55 million at June 30, 2018 and \$33 million at December 31, 2017 (carried at weighted average cost), as well as \$69 million at June 30, 2018 and \$40 million at December 31, 2017 related to a regulatory asset associated with the Arizona decoupling mechanism (an alternative revenue program). In May 2018, El Paso Natural Gas, L.L.C. (EPNG), was ordered to refund approximately \$49 million to Southwest related to transmission services with EPNG. The refund (which was received by Southwest in July 2018) relates to rates authorized by the Federal Energy Regulatory Commission (FERC) to be in effect subject to refund provisions from EPNG 's 2010 rate case. Southwest will disperse the funds received through rate adjustments associated with its purchased gas adjustment (PGA) mechanisms. As the refund was outstanding at June 30, 2018, it did not impact cash flows; however, it is reflected in Prepays and other current assets and a corresponding amount is reflected in a regulatory liability included within Other current liabilities in the balance sheets of both Southwest and the Company as of that date.

Income Taxes. On December 22, 2017, the TCJA legislation was enacted. Substantially all of the provisions of the TCJA are effective for taxable years beginning after December 31, 2017. The TCJA includes extensive changes which significantly impact the taxation of business entities, including specific provisions related to regulated public utilities. The more significant change that impacts the Company includes the reduction in the corporate federal income tax rate from 35% to 21%. The tax rate reduction created excess deferred taxes, resulting in the required remeasurement of deferred tax balances, which when remeasured during the fourth quarter of 2017, reduced income tax expense. The regulated operations of Southwest experienced other impacts due to its rate-regulation and the accounting treatment prescribed by U.S. GAAP to reflect the economics of that regulation. The remeasurement for Southwest reduced the net deferred income tax liability and caused the creation of a regulatory liability with appropriate tax gross-up. Both deferred tax liabilities and excess deferred tax liabilities (included within regulatory liabilities) reduce utility rate base. The TCJA includes provisions that stipulate how these excess deferred taxes are to be passed back to customers, and ultimate facilitation will occur in conjunction with appropriate regulatory commissions. During the six months ended June 30, 2018, tax expense for the Company and Southwest reflects the lower U.S. federal income tax rate now in effect (as applicable to earnings in 2018). Amounts recorded by the Company and Southwest associated with the measurement and accounting for the effects of the TCJA are provisional reasonable estimates. Management is continuing to evaluate and finalize all provisional items during the measurement period permitted by the SEC and the FASB, which is not to exceed one year from the enactment date.

In the first quarter of 2018, management recorded a regulatory liability and reduced utility revenues by approximately \$14 million for potential regulatory rate reductions to customers resulting from the reduced cost-of-service levels during the period. Based on regulatory activity in the second quarter of 2018, management has updated its estimated reserve to approximately \$12.5 million.

In July 2018, the Arizona Corporation Commission (ACC) staff issued a recommended opinion and order that would require Southwest to return to customers amounts related to excess cost-of-service rates as a result of customer rates having been authorized prior to the reduction in federal tax expense from tax reform. Also in July, the ACC issued a decision (the Decision) based on the staff recommendation. The Decision provides for bill credits for excess amounts experienced through July 2018. Additionally, starting in August 2018, surcredits applied to volumes would be implemented in consideration of lower tax rates impacting tax expense on an ongoing basis. Based on these recent

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
 June 30, 2018

actions of the ACC, the \$12.5 million reserve is reflected in Other current liabilities. During the first quarter of 2018, related amounts were included in Other deferred credits and other long-term liabilities pending resolution of regulatory outcome and timing.

Other current liabilities. Other current liabilities for both Southwest and the Company include the \$49 million regulatory liability associated with the EPNG refund (noted previously) and the \$12.5 million reserve associated with tax reform noted above. This caption on Southwest's Condensed Consolidated Balance Sheets also includes \$22 million of dividends declared by Southwest Gas Corporation, but not yet paid to Southwest Gas Holdings, Inc. at June 30, 2018.

Cash and Cash Equivalents. For purposes of reporting consolidated cash flows, cash and cash equivalents include cash on hand and financial instruments with a purchase-date maturity of three months or less. In general, cash and cash equivalents fall within Level 1 (quoted prices for identical financial instruments) of the three-level fair value hierarchy that ranks the inputs, used to measure fair value, by their reliability. However, cash and cash equivalents for Southwest and the Company also includes money market fund investments totaling approximately \$1.9 million and \$13.2 million, respectively, which fall within Level 2 (significant other observable inputs) of the fair value hierarchy, due to the asset valuation methods used by money market funds.

Significant non-cash investing and financing activities included the following: Upon contract expiration, customer advances of approximately \$512,000 and \$1.6 million, during the first six months of 2018 and 2017, respectively, were applied as contributions toward utility construction activity and represent non-cash investing activity.

Goodwill. Goodwill is assessed as of October 1st each year for impairment, or otherwise, if circumstances indicate an impairment to the carrying value of goodwill may have occurred. In consideration of the holding company reorganization, management of the Company considered its reporting units and segments and determined that historic judgments regarding its segments and reporting units continue to apply, and that no change was necessary with regard to the level at which goodwill is assessed for impairment. No impairment was deemed to have occurred in the first six months of 2018.

Goodwill:

(Thousands of dollars)	Natural Gas Operations	Construction Services	Consolidated
December 31, 2017	\$ 10,095	\$ 169,219	\$ 179,314

Centuri - total other income (deductions)	(632)	(6)	(369)	248	(272)	1,441

Corporate and administrative	20	1	26	1	38	1
Consolidated Southwest Gas Holdings, Inc. - total other income (deductions)	\$ (2,706)	\$ (2,810)	\$ (7,040)	\$ (3,800)	\$ (9,270)	\$ (8,401)

Included in the table above is the change in cash surrender values of company-owned life insurance (COLI) policies (including net death benefits recognized). These life insurance policies on members of management and other key employees are used by Southwest to indemnify itself against the loss of talent, expertise, and knowledge, as well as to provide indirect funding for certain nonqualified benefit plans. Current tax regulations provide for tax-free treatment of life insurance (death benefit) proceeds. Therefore, changes in the cash surrender values of COLI policies, as they progress towards the ultimate death benefits, are also recorded without tax consequences. Refer also to **Note 2 Components of Net Periodic Benefit Cost**.

Recently Issued Accounting Standards Updates.

In February 2016, the FASB issued the update Leases (Topic 842). Under the update, lessees will be required to recognize the following for all leases (with the exception of short-term leases) at the commencement date:

A lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and

A right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term.

Under the new guidance, lessor accounting is largely unchanged. Certain targeted improvements were made to align, where necessary, lessor accounting with the lessee accounting model and Topic 606, Revenue from Contracts with Customers. Though companies have historically been required to make disclosures regarding leases and of associated contractual obligations, leases with terms longer than a year will no longer exist off-balance sheet. Lessees (for capital

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATIONForm 10-Q
June 30, 2018

and operating leases) and lessors (for sales-type, direct financing, and operating leases) must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The modified retrospective approach would not require any transition accounting for leases that expired before the earliest comparative period presented. Lessees and lessors may not apply a full retrospective transition approach. Early application is permitted. Management currently plans to adopt the update at the required adoption date, which is for interim and annual reporting periods commencing January 1, 2019. Existing leases have been historically documented under traditional leasing arrangements by both segments. Management is in the process of evaluating other types of arrangements that have the potential to meet the definition of a lease under the new standard. The FASB recently issued guidance that will allow the election of a practical expedient to not apply the new standard to existing easement contracts that were not previously assessed as leases under historic guidance. However, the Company and Southwest would still be required to evaluate any new easements entered into after the effective date of the standard to determine if the arrangements should be accounted for as leases. In July 2018, the FASB issued narrow-scope improvements to the standard, which include, among other things, guidance on lease classification reassessments, that reference index changes, and on their own, do not constitute resolution of a contingency requiring remeasurement of lease payments, and clarification that lessor-controlled options to terminate a lease are considered in the lease term. Management is currently in the process of implementing a new software system to comply with Topic 842 including amendments thereto, and continues to evaluate the guidance in light of its customary leasing arrangements (and other arrangements in association with the new guidance) to determine the effect the new standard, and its amendments, will have on its financial position, results of operations, cash flows, and business processes.

In June 2016, the FASB issued the update *Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*. The update amends guidance on reporting credit losses for financial assets held at amortized cost basis and available for sale debt securities. For assets held at amortized cost basis, the update eliminates the *probable* threshold for initial recognition of credit losses in current U.S. GAAP and, instead, requires an entity to reflect its current estimate of all expected credit losses. The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of the financial asset to present the net amount expected to be collected. For available for sale debt securities, credit losses should be measured in a manner similar to current U.S. GAAP; however, the update will require that credit losses be presented as an allowance rather than as a write-down. This update affects entities holding financial assets and net investment in leases that are not accounted for at fair value through net income. The update affects loans, debt securities, trade receivables, net investments in leases, off-balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. The update is effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. All entities may adopt the amendments in this update earlier as of fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Management is evaluating what impact, if any, this update might have on its consolidated financial statements and disclosures.

Note 2 Components of Net Periodic Benefit Cost

As of January 1, 2018, the Company and Southwest adopted Compensation Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost. The update requires that an employer report the service cost component in the same line item or items as other compensation costs arising from services rendered by the employees during the period. The other components of net benefit cost are required to be presented in the income statement separately from the service cost component and outside a subtotal of income from operations and be appropriately described. The update also allows only the service cost component (and not the other components of periodic benefit costs) to be eligible for capitalization when applicable, making no exception for specialized industries, including rate-regulated industries. This guidance is required to be applied on a retrospective basis for the presentation of the service cost component and the other components of net benefit cost and on a prospective basis for the capitalization of only the service cost component of net benefit cost. Amounts capitalized as part of assets prior to the date of adoption were not adjusted through a cumulative effect adjustment. The guidance allows a practical expedient for the retrospective application that permits use of the amounts disclosed for the various components of net benefit cost in the pension and other postretirement benefit plans footnote as the basis for the retrospective application. This is in lieu of determining how much of the various components of net benefit cost were actually reflected in the income statement each period as a result of capitalization of certain costs into assets and their subsequent amortization. The Company and Southwest have elected to utilize the practical expedient. Therefore, upon adoption, amounts presented in the Condensed Consolidated Statements of Income for operations and maintenance for the three-, six-, and twelve-month periods ended June 30, 2017 were reclassified. The Operations and maintenance line item of the Southwest Gas Holdings, Inc. Condensed Consolidated Statements of Income was revised from \$103.1 million to \$98.2 million for the three months ended June 30, 2017, from \$212.2 million to \$202.5 million for the six months ended June 30, 2017, and from \$414.4 million to \$394.8 million for the twelve months ended June 30, 2017. The Operations and maintenance line item of the Southwest Gas Corporation Condensed Consolidated Statements of Income was revised from \$102.5 million to \$97.6 million for the three months ended June 30, 2017, from \$211.2 million to \$201.5 million for the six months ended June 30, 2017, and from \$413.4 million to \$393.8 million for the twelve months ended June 30, 2017. The Other income (deductions) line item of the Southwest Gas Holdings, Inc. Condensed Consolidated Statements of Income was revised from \$2.1 million to (\$2.8) million for the three months ended June 30, 2017, from \$5.9 million to (\$3.8) million for the six months ended June 30, 2017, and from \$11.2 million to (\$8.4) million for the twelve months ended June 30, 2017. The Other income (deductions) line item of the Southwest Gas Corporation Condensed Consolidated Statements of Income was revised from \$2.1 million to (\$2.8) million for the three months ended June 30, 2017, from \$5.7 million to (\$4.0) million for the six months ended June 30, 2017, and from \$9.8 million to (\$9.8) million for the twelve months ended June 30, 2017. Net income overall was not impacted by this reclassification for either the Company or Southwest.

Southwest has a noncontributory qualified retirement plan with defined benefits covering substantially all employees and a separate unfunded supplemental retirement plan (SERP) which is limited to officers. Southwest also provides postretirement benefits other than pensions (PBOP) to its qualified retirees for health care, dental, and life insurance.

During the first quarter of 2018, qualifying term-vested participants were offered a lump-sum present value payout of their pensions. The offer was primarily intended to reduce insurance and ongoing maintenance costs associated with qualifying participant balances. About one-quarter of the approximate 385 eligible participants accepted the offer, resulting in an approximate \$6.8 million payment from pension assets in July 2018. The lump sum payout will have no impact on net periodic benefit cost or pension funding requirements during 2018.

The service cost component of net periodic benefit costs included in the table below are components of an overhead loading process associated with the cost of labor (refer to discussion above related to the update to Topic 715). The overhead process ultimately results in allocation of that portion of overall net periodic benefit costs to the same accounts to which productive labor is charged. As a result, service costs become components of various accounts, primarily operations and maintenance expense, net utility plant, and deferred charges and other assets for both the Company and Southwest. Refer also to the practical expedient elected related to amounts capitalized as part of assets prior to the adoption date.

Note 3 Revenue

Effective January 2018, the Company and Southwest adopted the FASB Accounting Standards Codification update, Topic 606, *Revenue from Contracts with Customers*, using the modified retrospective transition method. Under the modified retrospective approach, the information for periods prior to the adoption date has not been restated and continues to be reported under the accounting standards in effect for those periods. As permitted under the standard, the Company and Southwest have elected to apply the guidance retrospectively only to those contracts that were not completed at January 1, 2018. Management assessed the effects the new guidance has on the Company's (and Southwest's, in the case of utility operations) financial position, results of operations, and cash flows. Based on these assessments, the adoption of Topic 606 had no material impact on any of the financial statements of Southwest or the Company.

The following information about the Company's revenues is presented by segment. Southwest comprises one segment natural gas operations.

Natural Gas Operations Segment:

Southwest is engaged in the business of purchasing, distributing, and transporting natural gas for customers in portions of Arizona, Nevada, and California. Public utility rates, practices, facilities, and service territories of Southwest are subject to regulatory oversight. Southwest recognizes revenue when it satisfies its performance by transferring gas to the customer. Revenues also include the net impacts of margin tracker/decoupling accruals based on criteria in U.S. GAAP for rate-regulated entities associated with alternative revenue programs. Revenues from customer arrangements and from alternative revenue programs are described below.

Southwest acts as an agent for state and local taxing authorities in the collection and remission of a variety of taxes, including sales and use taxes and surcharges. These taxes are not included in gas operating revenues. Management uses the net classification method to report taxes collected from customers to be remitted to governmental authorities.

Southwest generally has two types of services to its customers: tariff sales and transportation only service. Tariff sales encompass sales to many types of customers (primarily residential) under various rate schedules, subject to cost-of-service ratemaking, which is based on the rate-regulation of state commissions and the FERC. Southwest provides both the commodity and the related distribution service to nearly all of its approximate 2 million customers, and only several hundred customers (who are eligible to secure their own gas) subscribe to transportation-only service. Also, only a few hundred customers have contracts with stated periods. Southwest recognizes revenue when it satisfies its performance requirement by transferring volumes of gas to the customer. Natural gas is delivered and consumed by the customer simultaneously. The provision of service is represented by the turn of the meter dial and is the primary representation of the satisfaction of performance obligations of Southwest. The amount billable via regulated rates (both volumetric and fixed monthly rates as part of rate design) corresponds to the value to the customer, and management believes that the amount billable under the invoice practical expedient (amount Southwest has the right to invoice) is appropriate to utilize for purposes of recognizing revenue. Estimated amounts remaining unbilled since the last meter read date are restricted from being billed due only to the passage of time and therefore are also recognized for service provided through the balance sheet date. While natural gas service is typically recurring, there is generally not a contract term for utility service. Therefore, the contract term is not generally viewed to extend beyond the service provided to date, and customers can generally terminate service at will.

Transportation-only service is also governed by tariff rate provisions. Transportation-only service is generally only available to very large customers under requirements of Southwest's various tariffs. With this service, customers secure their own gas supply and Southwest provides transportation services to move the customer-supplied gas to the intended location. Southwest concluded that transportation/transmission service is suitable to an over time model. Rate structures under Southwest's regulation for transportation customers include a combination of volumetric charges and monthly fixed charges (including charges commonly referred to as capacity charges, demand charges, or reservation charges) as part of the rate design of regulated jurisdictions. These types of fixed charges represent a separate performance obligation associated with standing ready over the period of the month to deliver quantities of gas, regardless of whether the customer takes delivery of any quantity of gas. The performance obligations under these circumstances are satisfied over the course of the month under an output measure of progress based on time, which correlates to the period for which the charges are eligible to be invoiced.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

Under its regulation, Southwest enters into negotiated rate contracts for those customers located in proximity to another pipeline, which pose a threat of bypassing its distribution system. Southwest may also enter into similar contracts for customers otherwise able to satisfy their energy needs by means of alternative fuel to natural gas. Less than two dozen customers are party to contracts with rate components subject to negotiation. Many rate provisions and terms of service for these less common types of contracts are also subject to regulatory oversight and tariff provisions. The performance obligations for these customers are satisfied similar to those for other customers by means of transporting/delivering natural gas to the customer. Many or most of the rate components, and structures, for these types of customers are the same as those for similar customers without negotiated rate components; and the negotiated rates are within the parameters of the tariff guidelines. Management determined that these arrangements qualify for the invoice practical expedient for recognizing revenue. Furthermore, while some of these contracts include contract periods extending over time, including multiple years, as amounts billable under the contract are based on rates in effect for the customer for service provided to date, no significant financing component is deemed to exist.

As indicated above, revenues also include the net impacts of margin tracker/decoupling accruals. All of Southwest's service territories have decoupled rate structures (also referred to as alternative revenue programs) that are designed to eliminate the direct link between volumetric sales and revenue, thereby mitigating the impacts of unusual weather variability and conservation on margin. The primary alternative revenue programs involve permissible adjustments for differences between stated tariff benchmarks and amounts billable through revenue from contracts with customers via existing rates. Such adjustments are recognized monthly in revenue and in the associated regulatory asset/liability in advance of rate adjustments intended to collect or return amounts recognized. Revenues recognized for the adjustment to the benchmarks noted are required to be presented separately from revenues from contracts from customers, and as such, are provided below and identified as alternative revenue program revenue.

Gas operating revenues on the Condensed Consolidated Statements of Income of both the Company and Southwest include revenue from contracts with customers, which is shown below disaggregated by customer type, and various categories of revenue:

	Three Months Ended		Six Months Ended		Twelve Months Ended	
	June 30,		June 30,		June 30,	
(Thousands of dollars)	2018	2017	2018	2017	2018	2017

Other revenues (a)	3,587	1,785	(7,867)	2,979	(6,766)	3,945
Total Gas operating revenues	\$ 275,679	\$ 260,162	\$ 769,992	\$ 722,764	\$ 1,349,536	\$ 1,263,428

- (a) Includes various other revenues, including \$1.6 million during the three months, and an offset of \$12.5 million in both the six months and twelve months ending June 30, 2018 related to tax reform savings adjustments. Refer to *Income Taxes* in **Note 1 Nature of Operations and Basis of Presentation**.

Construction Services Segment:

The majority of Centuri contracts are performed under unit-price contracts. Generally, these contracts state prices per unit of installation. Typical installations are accomplished in a few weeks or less. Revenues are recorded as installations are completed. Revenues are recorded for long-term fixed-price contracts in a pattern that reflects the transfer of control of promised goods and services to the customer over time. The amount of revenue recognized on fixed-price contracts is based on costs expended to date relative to anticipated final contract costs. Some unit-price contracts contain caps that if encroached, trigger revenue and loss recognition similar to a fixed-price contract model.

Centuri is required to collect taxes imposed by various governmental agencies on the work performed by Centuri for its customers. These taxes are not included in construction revenues. Management uses the net classification method to report taxes collected from customers to be remitted to governmental authorities.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATIONForm 10-Q
June 30, 2018

Centuri derives revenue from the installation, replacement, repair, and maintenance of energy distribution systems, and in developing industrial construction solutions. Centuri has operations in the U.S. and Canada. The majority of Centuri's revenues are related to construction contracts for natural gas pipeline replacement and installation work for natural gas utilities. In addition, Centuri performs certain industrial construction activities for various customers and industries. Centuri has two types of agreements with its customers: master services agreements (MSAs) and bid contracts. Most of Centuri's customers supply many of their own materials in order for Centuri to complete its work under the contracts.

An MSA identifies most of the terms describing each party's rights and obligations that will govern future work authorizations. An MSA is often effective for multiple years. A work authorization is issued by the customer to describe the location, timing, and any additional information necessary to complete the work for the customer. The combination of the MSA and the work authorization determines when a contract exists and revenue recognition may begin. Each work authorization is generally a single performance obligation as Centuri is performing a significant integration service. Centuri has elected to use the portfolio method practical expedient at the customer level as the terms and conditions of the work performed under MSAs are similar in nature with each customer but vary significantly between customers.

A bid contract is typically a one-time agreement for a specific project that has all necessary terms defining each party's rights and obligations. Each bid contract is evaluated for revenue recognition individually. Control of assets created under bid contracts generally passes to the customer over time. Bid contracts often have a single performance obligation as Centuri is providing a significant integration service.

Centuri's MSA and bid contracts are characterized as either fixed-price contracts or unit-price contracts for revenue recognition purposes. The cost-to-cost input method is used to measure progress towards the satisfaction of a performance obligation for fixed-price contracts. Input methods result in the recognition of revenue based on the entity's effort to satisfy the performance obligation relative to the total expected effort to satisfy the performance obligation. For unit-price contracts, an output method is used to measure progress towards satisfaction of a performance obligation. Also with regard to unit-price contracts, the output measurement will be the completion of each unit that is required under the contract.

Actual revenues and project costs can vary, sometimes substantially, from previous estimates due to changes in a variety of factors including unforeseen circumstances not originally contemplated. These factors, along with other risks inherent in performing fixed-price contracts may cause actual revenues and gross profit for a project to differ from previous estimates and could result in reduced profitability or losses on projects. Changes in these factors may result in revisions to costs and earnings, the impacts for which are recognized in the period in which the changes are identified. Once identified, these types of conditions continue to be evaluated for each project throughout the project term and ongoing revisions in management's estimates of contract value, contract cost, and contract profit are recognized as necessary in the period determined.

Centuri categorizes work performed under MSAs and bid contracts into three primary service types: replacement gas construction, new gas construction, and other construction. Replacement gas construction includes work involving previously existing gas pipelines. New gas construction involves the installation of new pipelines or service lines to areas that do not already have gas services. Other construction includes all other work and can include industrial construction, water infrastructure construction, electric infrastructure construction, etc.

Contracts can have compensation/consideration that is variable. For MSAs, variable consideration is evaluated at the customer level as the terms creating variability in pricing are included within the MSA and are not specific to a work authorization. For multi-year MSAs, variable consideration items are typically determined for each year of the contract and not for the full contract term. For bid contracts, variable consideration is evaluated at the individual contract level. The expected value method or most likely amount method is used based on the nature of the variable consideration. Types of variable consideration include liquidated damages, delay penalties, performance incentives, safety bonuses, payment discounts, and volume rebates. Centuri will typically estimate variable consideration and adjust financial information, as necessary.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

Change orders involve the modification in scope, price, or both to the current contract, requiring approval by both parties. The existing terms of the contract continue to be accounted for under the current contract until such time as a change order is approved. Once approved, the change order is either treated as a separate contract or as part of the existing contract, as appropriate, under the circumstances. When the scope is agreed upon in the change order but not the price, Centuri estimates the change to the transaction price.

The following tables display Centuri's revenue from contracts with customers disaggregated by service type and contract type:

(Thousands of dollars)	Three Months Ended		Six Months Ended		Twelve Months Ended	
	June 30,		June 30,		June 30,	
	2018	2017	2018	2017	2018	2017

New gas construction	44,276	40,226	80,473	73,305	172,545	197,100
Other construction	94,858	78,569	161,327	117,187	337,181	202,245
Total Construction revenues	\$395,204	\$300,307	\$655,221	\$492,442	\$1,409,263	\$1,133,272

(Thousands of dollars)	Three Months Ended		Six Months Ended		Twelve Months Ended	
	June 30,		June 30,		June 30,	
	2018	2017	2018	2017	2018	2017
Contract Types:						
Master services agreement	\$290,075	\$208,361	\$484,539	\$355,553	\$1,014,517	\$825,980
Bid contract	105,129	91,946	170,682	136,889	394,746	307,292
Total Construction revenues	\$395,204	\$300,307	\$655,221	\$492,442	\$1,409,263	\$1,133,272
Unit priced contracts	\$345,390	\$272,427	\$579,675	\$450,098	\$1,249,602	\$974,107
Fixed priced contracts	49,814	27,880	75,546	42,344	159,661	159,165
Total Construction revenues	\$395,204	\$300,307	\$655,221	\$492,442	\$1,409,263	\$1,133,272

The following table provides information about receivables, revenue earned on contracts in progress in excess of billings, which are included within accounts receivable, net of allowances, and amounts billed in excess of revenue earned on contracts, which is included in other current liabilities as of June 30, 2018 and December 31, 2017 on the Company's Condensed Consolidated Balance Sheets:

(Thousands of dollars)	June 30, 2018	December 31, 2017
Contracts receivable, net	\$ 187,485	\$ 221,859
Revenue earned on contracts in progress in excess of billings	86,750	5,768

Amounts billed in excess of revenue earned on contracts	8,592	9,602
--	-------	-------

The revenue earned on contracts in progress in excess of billings primarily relates to Centuri's rights to consideration for work completed but not billed and/or approved at the reporting date. The revenue earned on contracts in progress in excess of billings are transferred to contracts receivable when the rights become unconditional. The amounts billed in excess of revenue earned on contracts primarily relates to the advance consideration received from customers for which work has not yet been completed. The amount of revenue recognized in 2018 from performance obligations satisfied (or partially satisfied) in previous periods under these contracts is \$34.7 million for the three months ended June 30, 2018 and \$88.7 million for the six months ended June 30, 2018.

For Centuri's contracts that have an original duration of one year or less, Centuri uses the practical expedient applicable to such contracts and does not consider the time value of money. Further, because of the short duration of these contracts, Centuri has not disclosed the transaction price for the remaining performance obligations as of the end of each reporting period or when the Company expects to recognize the revenue.

Centuri has sixteen contracts that had an original duration of more than one year. The aggregate amount of the transaction price allocated to the unsatisfied performance obligations of these contracts as of June 30, 2018 is \$86 million. Centuri expects to recognize the remaining performance obligations over the next four years, however, the timing of that recognition is largely within the control of the customer, including when the necessary equipment and materials required to complete the work are provided by the customer.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

Construction services contracts receivable consists of the following:

(Thousands of dollars)	June 30, 2018
Billed on completed contracts and contracts in progress	\$ 185,911
Other receivables	1,660
Contracts receivable, gross	187,571
Allowance for doubtful accounts	(86)
Contracts receivable, net	\$ 187,485

The balance of contracts receivable above is included in Accounts Receivable, net of allowances in the Southwest Gas Holdings, Inc. Condensed Consolidated Balance Sheet at June 30, 2018.

Management recognizes revenue on contracts in progress in excess of billings (a contract asset) within Accounts receivable, net of allowances in the Company's Condensed Consolidated Balance Sheets, and amounts billed in excess of revenue earned (a contract liability) in Other current liabilities. However, the following shows the significant changes in these asset and liability balances associated with Centuri since January 1, 2018:

(Thousands of dollars)	June 30, 2018	
	Revenue earned on contracts in progress in excess of billings	Amounts billed in excess of revenue earned on contracts
Revenue recognized that was included in the amounts billed in excess of revenue earned on contracts balance at the beginning of the period	\$	\$ (9,602)
Increases due to amounts billed to customers in excess of revenue earned during the period		8,592
Transferred to contracts receivable from revenue earned on contracts in progress in excess of billings recognized at the beginning of the period	(5,768)	
Increases from the reclassification of contract assets due to the adoption of topic 606	51,744	
Increases from contract assets, contingent on a future event occurring	35,006	

In regards to the table above, prior to the adoption of ASC Topic 606, revenue earned on contracts in progress in excess of billings was only used to recognize contract assets related to fixed-price contracts under previous accounting guidance. This balance now includes any conditional contract assets for both fixed-price contracts and unit-price contracts. Centuri considers retention and unbilled amounts to customers to be conditional contract assets, as payment is contingent on the occurrence of a future event. Contracts receivable, net, included in Accounts receivable, net of allowances, includes only amounts that are unconditional in nature, which means only the passage of time remains and Centuri has invoiced the customer. Similarly, amounts billed in excess of revenue earned on contracts, which is included in the Other current liabilities line item on the Company's Condensed Consolidated Balance Sheets, was only used to recognize contract liabilities related to fixed-price contracts under previous accounting guidance. This line item now includes contract liabilities related to both fixed-price contracts and unit-price contracts. In the event a contract asset or contract liability is expected to be recognized for greater than one year from the financial statement date, Centuri classifies those amounts as long-term contract assets or contract liabilities, included in Other deferred credits and other long-term liabilities on the Company's Condensed Consolidated Balance Sheets.

Note 5 Derivatives and Fair Value Measurements

Derivatives. In managing its natural gas supply portfolios, Southwest has historically entered into fixed- and variable-price contracts, which qualify as derivatives. Additionally, Southwest utilizes fixed-for-floating swap contracts (Swaps) to supplement its fixed-price contracts. The fixed-price contracts, firm commitments to purchase a fixed amount of gas in the future at a fixed price, qualify for the normal purchases and normal sales exception that is allowed

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

for contracts that are probable of delivery in the normal course of business, and are exempt from fair value reporting. The variable-price contracts have no significant market value. The Swaps are recorded at fair value.

The fixed-price contracts and Swaps are utilized by Southwest under its volatility mitigation programs to effectively fix the price on a portion (up to 25% in the Arizona and California jurisdictions) of its natural gas supply portfolios. The maturities of the Swaps highly correlate to forecasted purchases of natural gas, during time frames ranging from July 2018 through October 2019. Under such contracts, Southwest pays the counterparty a fixed rate and receives from the counterparty a floating rate per MMBtu (dekatherm) of natural gas. Only the net differential is actually paid or received. The differential is calculated based on the notional amounts under the contracts, which are detailed in the table below (thousands of dekatherms):

	June 30, 2018	December 31, 2017
Contract notional amounts	13,035	10,929

Southwest does not utilize derivative financial instruments for speculative purposes, nor does it have trading operations.

The following table sets forth the gains and (losses) recognized on the Swaps (derivatives) for the three-, six-, and twelve-month periods ended June 30, 2018 and 2017 and their location in the Condensed Consolidated Statements of Income for both the Company and Southwest:

Gains (losses) recognized in income for derivatives not designated as hedging instruments:

(Thousands of dollars)

Instrument	Location of Gain or (Loss)	Three Months Ended		Six Months Ended		Twelve Months Ended	
		June 30		June 30		June 30	
	Recognized in Income on Derivative	2018	2017	2018	2017	2018	2017
Swaps	Net cost of gas sold	\$ 870	\$ (1,168)	\$ (4,326)	\$ (6,305)	\$ (9,593)	\$ (5,624)
Swaps	Net cost of gas sold	(870)*	1,168*	4,326*	6,305*	9,593*	5,624*
Total		\$	\$	\$	\$	\$	\$

* Represents the impact of regulatory deferral accounting treatment under U.S. GAAP for rate-regulated entities. No gains (losses) were recognized in net income or other comprehensive income during the periods presented for derivatives designated as cash flow hedging instruments. Previously, Southwest entered into two forward-starting

interest rate swaps (FSIRS), both of which were designated cash flow hedges, to partially hedge the risk of interest rate variability during the period leading up to the planned issuance of debt. The first FSIRS terminated in December 2010. The second FSIRS terminated in March 2012. Losses on both FSIRS are being amortized over ten-year periods from Accumulated other comprehensive income (loss) into interest expense.

The following table sets forth the fair values of the Swaps and their location in the Condensed Consolidated Balance Sheets for both the Company and Southwest (thousands of dollars):

Fair values of derivatives not designated as hedging instruments:

June 30, 2018

Instrument	Balance Sheet Location	Asset Derivatives	Liability Derivatives	Net Total
Swaps	Other current liabilities	\$ 654	\$ (5,901)	\$ (5,247)
Swaps	Other deferred credits	83	(1,016)	(933)

Total		\$ 30	\$ (5,810)	\$ (5,780)

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
 June 30, 2018

The estimated fair values of the natural gas derivatives were determined using future natural gas index prices (as more fully described below). Master netting arrangements exist with each counterparty that provide for the net settlement (in the settlement month) of all contracts through a single payment. As applicable, management has elected to reflect the net amounts in its balance sheets. There was no outstanding collateral associated with the Swaps during either period shown in the above table.

Pursuant to regulatory deferral accounting treatment for rate-regulated entities, unrealized gains and losses in fair value of the Swaps are recorded as a regulatory asset and/or liability. When the Swaps mature, any prior positions held are reversed and the settled position is recorded as an increase or decrease of purchased gas under the related PGA mechanism in determining its deferred PGA balances. Neither changes in fair value nor settled amounts of Swaps have a direct effect on earnings or other comprehensive income.

The following table shows the amounts Southwest paid to and received from counterparties for settlements of matured Swaps.

	Three Months Ended		Six Months Ended		Twelve Months Ended	
	June 30,		June 30,		June 30, 2018	
(Thousands of dollars)	2018		2018		2018	
Paid to counterparties	\$	1,216	\$	3,931	\$	5,620
Received from counterparties	\$	6	\$	6	\$	6

The following table details the regulatory assets/(liabilities) offsetting the derivatives at fair value in the Condensed Consolidated Balance Sheets for both the Company and Southwest (thousands of dollars).

June 30, 2018

Instrument	Balance Sheet Location	Net Total
Swaps	Prepays and other current assets	\$ 5,247
Swaps	Deferred charges and other assets	933

December 31, 2017

Instrument	Balance Sheet Location	Net Total
Swaps	Prepays and other current assets	\$ 4,457
Swaps	Deferred charges and other assets	1,323

Fair Value Measurements. The estimated fair values of Southwest's Swaps were determined at June 30, 2018 and December 31, 2017 using futures settlement prices, published by the CME Group, for the delivery of natural gas at Henry Hub adjusted by the price of future settlement bases, which reflect the difference between the price of natural gas at a given delivery basin and the Henry Hub pricing points. These Level 2 inputs (inputs, other than quoted prices, for similar assets or liabilities) are observable in the marketplace throughout the full term of the Swaps, but have been credit-risk adjusted with no significant impact to the overall fair value measurement.

The following table sets forth, by level within the three-level fair value hierarchy that ranks the inputs used to measure fair value by their reliability, the financial assets and liabilities that were accounted for at fair value by both the Company and Southwest:

Level 2 - Significant other observable inputs

(Thousands of dollars)	June 30, 2018	December 31, 2017
Liabilities at fair value:		
Other current liabilities - Swaps	\$ (5,247)	\$ (4,457)
Other deferred credits - Swaps	(933)	(1,323)
Net Assets (Liabilities)	\$ (6,180)	\$ (5,780)

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATIONForm 10-Q
June 30, 2018

No financial assets or liabilities associated with the Swaps, which were accounted for at fair value, fell within Level 1 (quoted prices in active markets for identical financial assets) or Level 3 (significant unobservable inputs) of the fair value hierarchy.

With regard to the fair values of assets associated with pension and postretirement benefit plans, asset values were last updated as required as of December 2017. Refer to **Note 11 Pension and Other Post Retirement Benefits** in the 2017 Annual Report to Shareholders on Form 10-K, which is incorporated by reference into the 2017 Form 10-K.

Note 6 Common Stock

On March 29, 2017, the Company filed with the SEC an automatic shelf registration statement on Form S-3 (File No. 333-217018), which became effective upon filing, for the offer and sale of up to \$150 million of common stock from time to time in at-the-market offerings under the prospectus included therein and in accordance with the Sales Agency Agreement, dated March 29, 2017, between the Company and BNY Mellon Capital Markets, LLC (the Equity Shelf Program). During the three months ending June 30, 2018, the Company sold, through the continuous equity offering program with BNY Mellon Capital Markets, LLC as agent, an aggregate of 748,932 shares of the Company's common stock in the open market at a weighted average price of \$74.10 per share, resulting in proceeds to the Company of \$54,940,503 net of \$554,954 in agent commissions. During the six months ending June 30, 2018, the Company sold, through the continuous equity offering program with BNY Mellon Capital Markets, LLC as agent, an aggregate of 886,232 shares of the Company's common stock in the open market at a weighted average price of \$73.00 per share, resulting in proceeds to the Company of \$64,048,167 net of \$646,951 in agent commissions. During the twelve months ended June 30, 2018, the Company sold, through this continuous equity offering program with the same party acting as agent, an aggregate of 1,391,939 shares of the Company's common stock in the open market at a weighted average price of \$76.49 per share, resulting in proceeds to the Company of \$105,407,194, net of \$1,064,719 in agent commissions. As of June 30, 2018, the Company had up to \$43,528,087 of common stock available for sale under the program. Net proceeds from the sale of shares of common stock under the Equity Shelf Program are intended for general corporate purposes, including the acquisition of property for the construction, completion, extension, or improvement of pipeline systems and facilities located in and around the communities served by Southwest.

During the six months ended June 30, 2018, the Company issued approximately 77,000 shares of common stock through the Restricted Stock/Unit Plan and Management Incentive Plan.

Also during the six months ended June 30, 2018, the Company issued 73,000 shares of common stock through the Dividend Reinvestment and Stock Purchase Plan (DRSPP), raising approximately \$5 million.

Note 7 Long-Term Debt

Carrying amounts of long-term debt and related estimated fair values as of June 30, 2018 and December 31, 2017 are disclosed in the following table. Southwest's revolving credit facility (including commercial paper) and the variable-rate Industrial Development Revenue Bonds (IDRBs) approximate their carrying values, as they are repaid quickly (in the case of credit facility borrowings) and have interest rates that reset frequently. These are categorized as Level 1 due to Southwest's ability to access similar debt arrangements at measurement dates with comparable terms, including variable/market rates. The fair values of Southwest's debentures, senior notes, and fixed-rate IDRBs were determined utilizing a market-based valuation approach, where fair values are determined based on evaluated pricing data, such as broker quotes and yields for similar securities adjusted for observable differences. Significant inputs

used in the valuation generally include benchmark yield curves, credit ratings and issuer spreads. The external credit rating, coupon rate, and maturity of each security are considered in the valuation, as applicable. The fair values of debentures and fixed-rate IDRBS are categorized as Level 2 (observable market inputs based on market prices of similar securities). The Centuri secured revolving credit and term loan facility and Centuri other debt obligations (not actively traded) are categorized as Level 3, based on significant unobservable inputs to their fair values. Because Centuri's debt is not publicly traded, fair values for the secured revolving credit and term loan facility and other debt obligations were based on a conventional discounted cash flow methodology and utilized current market pricing yield curves, across Centuri's debt maturity spectrum, of other industrial bonds with an assumed credit rating comparable to the Company's.

Southwest has a \$400 million credit facility that is scheduled to expire in March 2022. Southwest designates \$150 million of capacity related to the facility as long-term debt and has designated the remaining \$250 million for working capital purposes. Interest rates for the credit facility are calculated at either the London Interbank Offered Rate (LIBOR) or an alternate base rate, plus in each case an applicable margin that is determined based on Southwest's senior unsecured debt rating. At June 30, 2018, the applicable margin is 1% for loans bearing interest with reference to LIBOR and 0% for loans bearing interest with reference to the alternative base rate. At June 30, 2018, \$48 million was outstanding on the long-term portion (not including the commercial paper program, discussed below) and no borrowings were outstanding on the short-term portion of this credit facility.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

Southwest has a \$50 million commercial paper program. Any issuance under the commercial paper program is supported by Southwest's current revolving credit facility and, therefore, does not represent additional borrowing capacity. Borrowings under the commercial paper program are designated as long-term debt. Interest rates for the program are calculated at the then current commercial paper rate. At June 30, 2018, no borrowings were outstanding under the commercial paper program.

In March 2018, Southwest issued \$300 million in 3.7% Senior Notes at a discount of 0.185%. The notes will mature in April 2028. A portion of the proceeds were used to repay amounts then outstanding under the revolving portion of the credit facility and the remainder to repay amounts then outstanding under the commercial paper program.

Centuri has a \$450 million senior secured revolving credit and term loan facility that is scheduled to expire in November 2022. This facility includes a revolving credit facility and a term loan facility. The line of credit portion of the facility is \$250 million; amounts borrowed and repaid under the revolving credit facility are available to be re-borrowed. The term loan facility portion has a limit of approximately \$200 million. The limit on the term loan facility was reached in November 2017. No further borrowing is permitted under the term loan facility. The \$450 million revolving credit and term loan facility is secured by substantially all of Centuri's assets except those explicitly excluded under the terms of the agreement (including owned real estate and certain certificated vehicles). Centuri assets securing the facility at June 30, 2018 totaled \$659 million. At June 30, 2018, \$278 million in borrowings were outstanding under the Centuri facility. Additionally, for the quarter ended June 30, 2018, Centuri entered into equipment loans for approximately \$40 million with a maturity date of May 2023 under an existing agreement.

Note 8 Short-Term Debt

The Company has a \$100 million credit facility that is scheduled to expire in March 2022. The Company had \$22.5 million in short-term borrowings outstanding at June 30, 2018 under this facility.

Note 9 Equity, Other Comprehensive Income, and Accumulated Other Comprehensive Income

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

(1) Tax amounts are calculated using a 24% rate following the December 22, 2017 enactment date of the TCJA. For periods prior to the enactment date (and included in specific line items of the tables for the twelve months ended June 30, 2018 and 2017), tax amounts were calculated using a 38% rate. The tax effect of before-tax amounts remaining in the balance of Accumulated other comprehensive income as of June 30, 2018 is effectively computed using a 24% tax rate overall after the reclassification of previously stranded excess deferred taxes existing as a result of the TCJA (see table for Accumulated other comprehensive income, including the balance, below). With regard to foreign currency translation adjustments, the Company has elected to indefinitely reinvest the earnings of Centuri's Canadian subsidiaries in Canada, thus preventing deferred taxes on such earnings. As a result of this assertion, the Company is not recognizing any tax effect or presenting a tax expense or benefit for the currency translation adjustment amount reported in Other Comprehensive Income, as repatriation of earnings is not anticipated.

Approximately \$2.5 million of realized losses (net of tax) related to the FSIRS, reported in Accumulated other comprehensive income at June 30, 2018, will be reclassified into interest expense within the next 12 months as the related interest payments on long-term debt occur.

The following table represents a rollforward of AOCI, presented on the Company's Condensed Consolidated Balance Sheets:

AOCI - Rollforward

(Thousands of dollars)

	Defined Benefit Plans		FSIRS		Foreign Currency		Other	AOCI

Recognized in AOCI	\$ (59,163)	\$ (61,520)

Note 10 Reorganization Impacts Discontinued Operations Solely Related to Southwest Gas Corporation

As a result of a holding company structure in January 2017, no substantive change occurred with regard to the Company's business segments on the whole, or in the primary businesses comprising those segments (Centuri operations continue to be part of continuing operations of the controlled group of companies), and financial information related to Centuri continues to be included in condensed consolidated financial statements of Southwest Gas Holdings, Inc.

However, as part of the holding company reorganization effective January 2017, Centuri is no longer a subsidiary of Southwest; whereas historically, Centuri had been a direct subsidiary of Southwest. To give effect to this change, the condensed consolidated financial statements related to Southwest Gas Corporation, which are separately included in this Form 10-Q, depict Centuri-related amounts as discontinued operations for periods prior to January 2017.

Due to the discontinued operations accounting reflection, the following disclosures provide additional information regarding the revenues and expenses of Centuri which are shown as discontinued operations on the condensed consolidated financial statements of Southwest Gas Corporation for periods prior to the beginning of 2017.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

The following table presents the major income statement components of discontinued operations - construction services reported in the Condensed Consolidated Statements of Income Southwest Gas Corporation:

Results of Construction Services

(Thousands of dollars)	Twelve Months Ended June 30, 2017
Construction revenues	\$ 640,830
Operating expenses:	
Construction expenses	567,115
Depreciation and amortization	25,727
Operating income	47,988
Other income (deductions)	1,193
Net interest deductions	3,512
Income before income taxes	45,669
Income tax expense	16,550
Net income	29,119
Net income attributable to noncontrolling interests	949
Discontinued operations - construction services - net income	\$ 28,170

Note 11 Acquisition of Construction Services Business

In November 2017, the Company, through its subsidiaries, led principally by Centuri, completed the acquisition of a privately held construction business, New England Utility Constructors, Inc. (Neuco) for approximately \$99 million, less assumed debt. See the Company's 2017 Form 10-K for additional information about this acquisition. While refinements were made to the estimated fair values of assets acquired and liabilities assumed when the final purchase accounting was completed during the first quarter of 2018, no subsequent adjustments were made to acquisition-date values, and no acquisition-related costs were incurred during 2018.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Southwest Gas Holdings, Inc. is a holding company that owns all of the shares of common stock of Southwest Gas Corporation (Southwest or the natural gas operations segment) and all of the shares of common stock of Centuri Construction Group Inc. (Centuri or the construction services segment). Prior to August 2017, only 96.6% of Centuri shares were owned. During August 2017, Southwest Gas Holdings, Inc. acquired the remaining 3.4% equity interest in Centuri that was held by the previous owners (and reflected as a redeemable noncontrolling interest). As part of a holding company reorganization effective January 2017, designed to provide further separation between regulated and

unregulated businesses, Centuri and Southwest are now subsidiaries of Southwest Gas Holdings, Inc.; whereas historically, Centuri had been a direct subsidiary of Southwest. To give effect for this change, the separate consolidated financial statements of Southwest Gas Corporation depict Centuri-related amounts for periods prior to January 2017 as discontinued operations of Southwest. Southwest Gas Holdings, Inc. and its subsidiaries (the Company) have two business segments (natural gas operations and construction services), which are discussed below.

Southwest is engaged in the business of purchasing, distributing, and transporting natural gas for customers in portions of Arizona, Nevada, and California. Southwest is the largest distributor of natural gas in Arizona, selling and transporting natural gas in most of central and southern Arizona, including the Phoenix and Tucson metropolitan areas. Southwest is also the largest distributor of natural gas in Nevada, serving the Las Vegas metropolitan area and northern Nevada. In addition, Southwest distributes and transports natural gas for customers in portions of California, including the Lake Tahoe area and the high desert and mountain areas in San Bernardino County.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATIONForm 10-Q
June 30, 2018

As of June 30, 2018, Southwest had 2,027,000 residential, commercial, industrial, and other natural gas customers, of which 1,080,000 customers were located in Arizona, 752,000 in Nevada, and 195,000 in California. Residential and commercial customers represented over 99% of the total customer base. During the twelve months ended June 30, 2018, 54% of operating margin was earned in Arizona, 35% in Nevada, and 11% in California. During this same period, Southwest earned 85% of its operating margin (gas operating revenues less the net cost of gas sold) from residential and small commercial customers, 3% from other sales customers, and 12% from transportation customers. These general patterns are expected to remain materially consistent for the foreseeable future.

Southwest recognizes operating revenues from the distribution and transportation of natural gas (and related services) to customers. Gas cost is a tracked cost, which is passed through to customers without markup under purchased gas adjustment (PGA) mechanisms, impacting revenues and net cost of gas sold on a dollar-for-dollar basis, thereby having no impact on Southwest's profitability. Therefore, management routinely uses operating margin, defined as operating revenues less the net cost of gas sold, in its analysis of Southwest's financial performance. Operating margin also forms a basis for Southwest's various regulatory decoupling mechanisms. Operating margin is not, however, specifically defined in accounting principles generally accepted in the United States (U.S. GAAP) and is considered a non-GAAP measure. Management believes operating margin provides investors and other interested parties with useful and relevant information to analyze Southwest's financial performance in a rate-regulated environment. (Refer to the Summary Operating Results table for a reconciliation of revenues to operating margin.)

The principal factors affecting changes in operating margin are general rate relief (including impacts of infrastructure trackers) and customer growth. The demand for natural gas is seasonal, with greater demand in the colder winter months and decreased demand in the warmer summer months. All of Southwest's service territories have decoupled rate structures (alternative revenue programs), which are designed to eliminate the direct link between volumetric sales and revenue, thereby mitigating the impacts of weather variability and conservation on operating margin, allowing Southwest to pursue energy efficiency initiatives.

Centuri is a comprehensive construction services enterprise dedicated to meeting the growing demands of North American utilities, energy, and industrial markets. Centuri derives revenue from installation, replacement, repair, and maintenance of energy distribution systems, and developing industrial construction solutions. Centuri operates in 23 major markets in the United States (primarily as NPL) and in 2 major markets in Canada (as NPL Canada and W.S. Nicholls).

Construction activity is cyclical and can be significantly impacted by changes in weather, general and local economic conditions (including the housing market), interest rates, employment levels, job growth, pipe replacement programs of utilities, and local and federal regulation (including tax rates and incentives). During the past few years, utilities have implemented or modified pipeline integrity management programs to enhance safety pursuant to federal and state mandates. These programs have resulted in a significant increase in multi-year pipeline replacement projects throughout the U.S. Centuri has focused its efforts on obtaining pipe replacement work under both blanket contracts and incremental bid projects. For both the twelve months ended June 30, 2018 and 2017, revenues from replacement work provided over 65% of total revenues. Generally, Centuri revenues are lowest during the first quarter of the year due to less favorable winter weather conditions. Revenues typically improve as more favorable weather conditions occur during the summer and fall months. This is expected in both the U.S. and Canadian markets. In certain circumstances, such as with large bid contracts (especially those of a longer duration), or unit-price contracts with revenue caps, results may be impacted by differences between costs incurred and those anticipated when the work was originally bid. Work awarded or not awarded by individual large customers can significantly impact operating results.

This Management's Discussion and Analysis (MD&A) of Financial Condition and Results of Operations should be read in conjunction with the consolidated financial statements and the notes thereto, as well as MD&A included in the 2017 Annual Report to Shareholders, which is incorporated by reference into the 2017 Form 10-K.

Executive Summary

The items discussed in this Executive Summary are intended to provide an overview of the results of the Company's operations. As needed, certain items are covered in greater detail in later sections of management's discussion and analysis. As reflected in the table below, the natural gas operations segment accounted for an average of 80% of twelve-month-to-date consolidated net income over the past two years. As such, management's discussion

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

and analysis is primarily focused on that segment. Natural gas sales are seasonal, peaking during the winter months; therefore, results of operations for interim periods are not necessarily indicative of results for a full year.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

2nd Quarter 2018 Overview

Natural gas operations highlights:

33,000 net new customers (1.6% growth rate)

Filed Nevada general rate case, requesting approximately \$33 million

Filed Gas Infrastructure Replacement (GIR) Advance Application with annualized revenue requirement of \$22 million

Received order from PUCN approving expansion into Mesquite, Nevada

Operating margin reflects estimated regulatory impacts of tax reform and associated Arizona Corporation Commission decision

Construction services highlights:

Revenues increased \$94.9 million compared to the prior-year quarter; twelve-month revenues surpassed \$1.4 billion

Construction expenses increased \$80.7 million compared to the prior-year quarter

Depreciation and amortization expense increased \$1.8 million compared to the prior-year quarter

Net interest deductions increased \$1.7 million compared to the prior-year quarter

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
 June 30, 2018

Results of Natural Gas Operations

Quarterly Analysis

	Three Months Ended	
	June 30,	
	2018	2017
	(Thousands of dollars)	
Gas operating revenues	\$ 275,679	\$ 260,162
Net cost of gas sold	83,466	69,421
Operating margin	192,213	190,741
Operations and maintenance expense	105,208	97,644
Depreciation and amortization	47,664	46,254
Taxes other than income taxes	14,666	14,497
Operating income	24,675	32,346
Other income (deductions)	(2,094)	(2,805)
Net interest deductions	20,149	16,991
Income before income taxes	2,432	12,550
Income tax expense (benefit)	(190)	3,028
Contribution to consolidated net income	\$ 2,622	\$ 9,522

Contribution to consolidated net income from natural gas operations decreased \$6.9 million between the second quarters of 2018 and 2017. The decline was primarily due to higher operating expenses and net interest deductions, partially offset by a decrease in income tax expense. U.S. federal tax reform impacted both revenue and tax expense. The amounts above reflect a reclassification of \$4.9 million for 2017 from Operations and maintenance expense to Other income (deductions) related to the non-service cost components of net periodic benefit costs, as a result of the adoption of the update to FASB Topic 715 (refer to Note 2 to the condensed consolidated financial statements in this Form 10-Q), with no impact to net income overall. The reclassification in the 2017 period is intended to make that information comparable to the current period presentation.

Operating margin increased \$1.5 million between quarters, due in part to a net \$1.6 million decrease in the reserve related to U.S. tax reform, based on expectations in the rate jurisdictions in which Southwest and its subsidiaries operate. Refer to discussion of *Income Taxes* in **Note 1 Nature of Operations and Basis of Presentation** of this Form 10-Q and **Rates and Regulatory Proceedings** below. Approximately \$2 million in increased operating margin was attributable to customer growth, as 33,000 net new customers were added during the last twelve months, with another \$500,000 attributable to rate relief in California. These increases were offset by an approximate \$2.6 million reduction in miscellaneous revenues (including a \$2 million reduction in surcharge recoveries associated with Nevada Conservation and Energy Efficiency (CEE) programs, offset in Depreciation and amortization expense).

Operations and maintenance expense increased \$7.6 million between quarters. Approximately \$2 million of the increase was due to higher pension and employee medical costs. The remaining increase was primarily due to higher injuries and damages expense, incremental expenditures for pipeline integrity management and damage prevention programs, and general cost increases.

Depreciation and amortization expense increased \$1.4 million between quarters primarily due to an increase of \$448 million, or 7%, increase in average gas plant in service for the current quarter as compared to the corresponding quarter a year ago. The increase in gas plant was attributable to pipeline capacity reinforcement work, franchise requirements, scheduled and accelerated pipe replacement activities, and new infrastructure. See also discussion above regarding surcharge recoveries (including Nevada CEE programs), which provide offsetting impacts in this category.

Other income (deductions) improved \$711,000 between quarters primarily due to an increase in interest income related to the GIR mechanism in Nevada. See the **Rates and Regulatory Proceedings** section for more information about the GIR. Amounts in both periods reflect the non-service cost components of employee pension and other post-retirement benefits.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

Net interest deductions increased \$3.2 million in the second quarter of 2018, as compared to the prior-year quarter, primarily due to higher interest associated with credit facility borrowings during the current-year quarter and the issuance of \$300 million of senior notes in March 2018.

Income taxes were impacted in 2018 by the pre-tax earnings impacts discussed above as well as by the December 2017 enactment of tax reform. Among other things, tax reform reduced the corporate federal income tax rate from 35% to 21%, effective January 2018.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

Results of Natural Gas Operations

Six-Month Analysis

	Six Months Ended	
	June 30,	
	2018	2017
	(Thousands of dollars)	
Gas operating revenues	\$ 769,992	\$ 722,764
Net cost of gas sold	269,198	216,300
Operating margin	500,794	506,464
Operations and maintenance expense	207,398	201,468
Depreciation and amortization	97,625	107,449
Taxes other than income taxes	29,923	29,279
Operating income	165,848	168,268
Other income (deductions)	(6,697)	(4,049)
Net interest deductions	39,404	34,201
Income before income taxes	119,747	130,018
Income tax expense	26,776	43,558
Contribution to consolidated net income	\$ 92,971	\$ 86,460

Contribution to consolidated net income from natural gas operations increased \$6.5 million between the first six months of 2018 and 2017. The improvement was primarily due to rate relief and customer growth, lower depreciation expense, and the combined impacts of tax reform, partially offset by increases in Operations and maintenance expense, and Net interest deductions. The amounts above for Operations and maintenance expense and Other income (deductions) for the 2017 period reflect a \$9.7 million reclassification related to the non-service cost components of employee pensions and other post-retirement benefits, as a result of the adoption of the update to FASB Topic 715. The reclassification is intended to make the prior period comparable to the current period, but did not impact net income overall.

Operating margin decreased \$5.7 million between the comparative six-month periods, due to a \$12.5 million reserve recognized due to the enactment of U.S. tax reform in December 2017. The reserve contemplates a pending reduction in rates to reflect the reduced cost of service during 2018, resulting from tax reform (see **Rates and Regulatory Proceedings** below). However, the decline in applicable U.S. income tax rates also significantly reduced income tax expense (see discussion below). Operating margin was favorably impacted by rate relief in the Arizona and California jurisdictions, which collectively provided \$5.6 million in operating margin. Approximately \$6 million in increased operating margin was attributable to customer growth. An approximate \$5.5 million reduction in surcharge recoveries associated with Nevada CEE programs (offset in Depreciation and amortization expense below), as well as other surcharge variances and variability in other miscellaneous revenues and customers outside the decoupling mechanisms, comprise the residual variance.

Operations and maintenance expense increased \$5.9 million between periods due primarily to higher pension service-cost related and other employee benefit expenses, higher injuries and damages expenses, incremental expenditures for pipeline integrity management and damage prevention programs, and other general cost increases, partially offset by lower expense for incentive compensation programs.

Depreciation and amortization expense decreased \$9.8 million between periods primarily due to reduced depreciation rates in Arizona, a result of the April 2017 Arizona general rate case decision, and to the impacts of surcharge recoveries for regulatory mechanisms, as discussed above. Partially offsetting the decline was additional depreciation associated with a \$444 million, or 7%, increase in average gas plant in service for the current period as compared to the prior period. The increase was attributable to pipeline capacity reinforcement work, franchise requirements, scheduled and accelerated pipe replacement activities, and new infrastructure.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

Taxes other than income taxes increased \$644,000 between periods primarily due to higher property taxes in Arizona, including the impacts of the Arizona property tax tracking mechanism.

Other income decreased \$2.6 million between periods primarily due to a decline in income from company-owned life insurance (COLI) policies. The current period reflects a \$1.3 million increase in COLI policy cash surrender values, while the prior-year period reflected \$4.7 million of COLI-related income. Additionally, amounts in both periods reflect the non-service cost components of employee pension and post-retirement benefits.

Net interest deductions increased \$5.2 million between periods, primarily due to higher interest associated with credit facility borrowings during the current period and the issuance of \$300 million of senior notes in the first quarter of 2018. The increase was partially offset by reductions in interest expense associated with deferred purchased gas adjustments (PGA) balances as compared to the prior-year period.

Income taxes were favorably impacted in 2018 due to the December 2017 enactment of tax reform.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
 June 30, 2018

Results of Natural Gas Operations

Twelve-Month Analysis

	Twelve Months Ended June 30,	
	2018	2017
	(Thousands of dollars)	
Gas operating revenues	\$ 1,349,536	\$ 1,263,428
Net cost of gas sold	407,943	328,405
Operating margin	941,593	935,023
Operations and maintenance expense	397,251	393,772
Depreciation and amortization	192,098	222,935
Taxes other than income taxes	58,590	54,655
Operating income	293,654	263,661
Other income (deductions)	(9,036)	(9,843)
Net interest deductions	74,936	68,407
Income before income taxes	209,682	185,411
Income tax expense	46,353	59,469
Contribution to consolidated net income	\$ 163,329	\$ 125,942

Contribution to consolidated net income from natural gas operations increased by \$37.4 million between the twelve-month periods of 2018 and 2017. The improvement was primarily due to higher operating margin, lower Depreciation and amortization expense, and lower Income tax expense, partially offset by an increase in Taxes other than income taxes and higher Net interest deductions. The amounts above for Operations and maintenance expense and Other income (deductions) for the 2017 period reflect a \$19.6 million reclassification related to the non-service cost components of employee pensions and other post-retirement benefits, as a result of the adoption of the update to FASB Topic 715. The reclassification is intended to make the prior period comparable to the current period, but did not impact net income overall.

Operating margin increased \$7 million between periods including a combined \$15 million of rate relief in the Arizona and California jurisdictions. Customer growth provided \$10 million in operating margin, while operating margin associated with recoveries of regulatory assets, infrastructure replacement mechanisms, customers outside the decoupling mechanisms, and other miscellaneous revenues decreased \$6 million. The \$12.5 million reserve, described earlier, associated with tax reform, decreased operating margin in the current period. However, net income overall was not unfavorably impacted, as favorable impacts from tax reform are reflected in income tax expense.

Operations and maintenance expenses in the 2018 period were within 1% of the prior year period. The overall increase of \$3.5 million primarily relates to higher service-cost-related pension expense and expenditures for pipeline damage prevention programs.

Depreciation and amortization expense decreased \$30.8 million between periods primarily due to reduced depreciation rates in Arizona, a result of the April 2017 Arizona general rate case decision. Partially offsetting the decline was depreciation associated with a \$391 million, or 6%, increase in average gas plant in service for the current period as compared to the prior period. The increase in gas plant was attributable to pipeline capacity reinforcement work, franchise requirements, scheduled and accelerated pipe replacement activities, and new infrastructure.

Taxes other than income taxes increased \$3.9 million between periods primarily due to higher property taxes associated with net plant additions and increased property taxes in Arizona, including the impact of the property tax regulatory tracking mechanism.

Other income (deductions) improved \$807,000 between the twelve-month periods of 2018 and 2017. The current period reflects a \$6.9 million increase in COLI policy cash surrender values, while the prior-year period included \$9 million of COLI-related income. Interest income increased \$2.1 million including interest related to the GIR mechanism in Nevada. See the **Rates and Regulatory Proceedings** section for more information about the GIR

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

mechanism. Amounts in both periods reflect the non-service cost components of employee pension and post-retirement benefits, which increased between periods.

Net interest deductions increased \$6.5 million between the current and prior-year period, primarily due to the issuance of \$300 million of senior notes in September 2016, higher interest associated with credit facility borrowings during late 2017 and early 2018, and the issuance of the \$300 million senior notes in the first quarter of 2018. The increase was substantially offset by reductions in interest expense associated with deferred PGA balances and debt redemptions during the second half of 2016.

Income taxes were favorably impacted during the twelve months ending June 30, 2018 due to the December 2017 enactment of tax reform, which reduced the corporate federal income tax rate from 35% to 21%, effective January 2018. Approximately \$8 million of one-time tax benefits, related to the remeasurement of deferred tax liabilities, were recorded in the fourth quarter of 2017 in addition to the lower rate utilized in the first half of 2018.

SOUTHWEST GAS HOLDINGS, INC.

Form 10-Q
 June 30, 2018

Results of Construction Services

Quarterly Analysis

	Three Months Ended	
	June 30,	
	2018	2017
	(Thousands of dollars)	
Construction revenues	\$ 395,204	\$ 300,307
Operating expenses:		
Construction expenses	352,671	272,001
Depreciation and amortization	13,643	11,828
Operating income	28,890	16,478
Other income (deductions)	(632)	(6)
Net interest deductions	3,308	1,629
Income before income taxes	24,950	14,843
Income tax expense	5,714	5,870
Net income	19,236	8,973
Net income attributable to noncontrolling interest		257
Contribution to consolidated net income attributable to Centuri	\$ 19,236	\$ 8,716

In November 2017, Centuri acquired New England Utility Constructors, Inc. (Neuco). Line items in the table above reflect the results of Neuco only for the 2018 period as the acquisition occurred in November 2017.

Revenues increased \$94.9 million in the second quarter of 2018 when compared to the prior-year quarter, primarily due to a higher volume of pipe replacement work under blanket and bid contracts, and \$34 million of revenues contributed by Neuco. In addition, revenues reflect a \$9 million negotiated settlement of an outstanding contract dispute from 2017 associated with a water pipe replacement project.

Construction expenses increased \$80.7 million between quarters. The increase in Construction expenses is due to additional pipe replacement work and greater operating expenses to support increased growth in operations. Approximately \$30 million of construction expenses associated with Neuco are included in the three months ended June 30, 2018. Gains on sale of equipment (reflected as an offset to construction expenses) were approximately \$20,000 and \$1.1 million for the second quarters of 2018 and 2017, respectively.

Depreciation and amortization expense increased \$1.8 million between quarters, primarily due to incremental amortization of finite-lived intangible assets recognized from the Neuco acquisition and to depreciation on additional equipment purchased to support the growing volume of work being performed, partially offset by a \$1.9 million reduction in depreciation associated with the extension of the estimated useful lives of certain depreciable equipment.

Net interest deductions increased by \$1.7 million between quarters. The increase was due primarily to higher average debt outstanding under the existing \$450 million secured revolving credit and term loan facility in 2018.

Income taxes were relatively flat between periods; however, 2018 tax expense reflects lower U.S. federal income tax rates following tax reform applied to an increased level of earnings.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

Results of Construction Services

Six-Month Analysis

	Six Months Ended June 30,	
	2018	2017
	(Thousands of dollars)	
Construction revenues	\$ 655,221	\$ 492,442
Operating expenses:		
Construction expenses	611,623	463,957
Depreciation and amortization	26,160	23,111
Operating income	17,438	5,374
Other income (deductions)	(369)	248
Net interest deductions	6,504	3,133
Income before income taxes	10,565	2,489
Income tax expense	3,127	1,153
Net income	7,438	1,336
Net income (loss) attributable to noncontrolling interest	(797)	(46)
Contribution to consolidated net income attributable to Centuri	\$ 8,235	\$ 1,382

Line items in the table above reflect the results of Neuco only for the 2018 period as the acquisition occurred in November 2017.

Revenues increased \$162.8 million during the first six months of 2018 when compared to the same period in the prior year due to an increased volume of replacement work for many natural gas distribution customers, the contribution of \$48 million in revenue from Neuco in 2018, the absence of a customer's temporary work stoppage that impacted prior-year performance, and the settlement of an outstanding contract dispute associated with a water pipe replacement project.

Construction expenses increased \$147.7 million between periods. The increase in Construction expenses is due to additional pipe replacement work and higher labor costs incurred to complete work during inclement weather conditions during the first quarter. Approximately \$44 million of construction expenses associated with Neuco are included in the six months ended June 30, 2018. Gains on sale of equipment (reflected as an offset to construction expenses) were approximately \$250,000 and \$1.4 million for the first six months of 2018 and 2017, respectively.

Depreciation and amortization increased \$3 million between periods, primarily due to incremental amortization of finite-lived intangible assets recognized from the Neuco acquisition and to depreciation on additional equipment purchased to support the growing volume of work being performed, partially offset by a \$3.9 million reduction in

depreciation associated with the extension of the estimated useful lives of certain depreciable equipment.

Net interest deductions increased by \$3.4 million between periods. The increase was due primarily to higher average debt outstanding under the existing \$450 million secured revolving credit and term loan facility in 2018.

Income tax expense reflects both the impacts of lower income tax rates in 2018 following U.S. federal tax reform and the changes in earnings, discussed above, on which new rates are applied.

Form 10-Q
June 30, 2018

Results of Construction Services

Twelve-Month Analysis

	Twelve Months Ended June 30,	
	2018	2017
	(Thousands of dollars)	
Construction revenues	\$ 1,409,263	\$ 1,133,272
Operating expenses:		
Construction expenses	1,296,629	1,031,072
Depreciation and amortization	52,078	48,838
Operating income	60,556	53,362
Other income (deductions)	(272)	1,441
Net interest deductions	11,357	6,645
Income before income taxes	48,927	48,158
Income tax expense	4,364	17,703
Net income	44,563	30,455
Net income (loss) attributable to noncontrolling interest	(650)	903
Contribution to consolidated net income attributable to Centuri	\$ 45,213	\$ 29,552

Line items in the table above reflect the results of Neuco only since the November 2017 acquisition date.

Revenues increased \$276 million in the current twelve-month period compared to the same period of 2017, primarily due to a higher volume of pipe replacement work under blanket contracts and the contribution of approximately \$65 million in revenue from Neuco since the November 2017 acquisition date. In addition, Centuri performed work on a multi-year water pipe replacement program, which began in late 2016, that contributed incremental revenues of \$55.3 million and \$30.8 million during the twelve-month periods ended June 30, 2018 and 2017, respectively.

Construction expenses increased \$265.6 million between periods, primarily due to higher labor costs experienced due to changes in the mix of work with existing customers, lower relative productivity resulting from inclement weather, and greater operating expenses to support increased growth in operations. In addition, results were negatively impacted by higher construction costs and an unfavorable mix of work performed during the period related to the water pipe replacement program noted above. Approximately \$57 million of construction expenses from Neuco are included in the twelve months ended June 30, 2018. Gains on sale of equipment (reflected as an offset to construction expenses) were \$3 million and \$5.8 million for the twelve-month periods of 2018 and 2017, respectively.

Depreciation and amortization expense increased \$3.2 million between the current and prior-year periods primarily due to incremental amortization of finite-lived intangible assets recognized from the Neuco acquisition and to

depreciation on additional equipment purchased to support the growing volume of work being performed, partially offset by a \$5.9 million reduction in depreciation associated with the extension of the estimated useful lives of certain depreciable equipment.

Net interest deductions increased \$4.7 million between periods. The increase was due primarily to higher average debt outstanding under the existing \$450 million secured revolving credit and term loan facility in the current twelve-month period.

Income tax expense decreased \$13.3 million between periods, primarily due to approximately \$12 million of one-time tax benefits related to the remeasurement of Centuri s deferred tax liabilities that were recorded in the fourth quarter of 2017, and to lower income tax rates in effect in 2018 (collectively, the result of U.S. tax reform).

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

Rates and Regulatory Proceedings

Arizona Jurisdiction

Arizona General Rate Case. In May 2016, Southwest filed a general rate application with the Arizona Corporation Commission (ACC). Following undertakings associated with the filing, a settlement hearing was held in February 2017, and the ACC approved the settlement in April 2017 (with new rates effective the same month), providing for, among other things, rate changes that would result in a combined net annual operating income increase of \$60.7 million (including \$16 million in additional operating revenue and a \$44.7 million decrease in depreciation expense). The decision included a 7.82% rate of return on original cost rate base of \$1.336 billion, a 9.5% return on common equity, and a capital structure utilizing 52% common equity. Other key elements included the approval of the continuation of the Customer-Owned Yard Line (COYL) program, the implementation of a vintage steel pipe (VSP) replacement program, and a continuation of the current decoupled rate design, excluding the previous winter-period adjustment to rates, making the mechanism fundamentally similar to that which exists in Nevada. The settlement also included a property tax tracking mechanism, which will defer changes in related expense for recovery in the next general rate case. It also included a three-year moratorium on filing another general rate application prior to May 2019.

Tax Reform. In January 2018, the ACC held a workshop specifically to address U.S. tax reform with all jurisdictional public service corporations and directed ACC staff (the Staff) to prepare a recommended order for consideration at an open meeting. The Staff-recommended order provided that all utilities apply regulatory accounting treatment to address impacts from the enactment of tax reform beginning January 1, 2018. Additionally, the Staff recommended that all jurisdictional utilities file an application to address savings associated with tax reform within 60 days of the open meeting through a tax expense adjustor mechanism, a notice of intent to file a rate case within 90 days, or to file an application to address the impacts of tax reform. At the referenced open meeting in February, the ACC issued an order adopting the Staff s recommendations. In April 2018, Southwest filed an application with the ACC, requesting approval for a tax refund process or, in the alternative, the authority to file a general rate case to reflect tax reform. The tax refund process was designed to ensure customers receive the benefits from tax reform through an ACC-approved earnings test whereby a tax refund application will be made annually to refund to customers any margin contributing to earnings above the ACC-authorized rate of return. The Staff drafted another order (the subsequent draft order), recommending that Southwest refund customers a one-time credit to reflect the tax savings from January through July 2018, effective with Southwest s August 2018 billing cycles and that, effective August 2018, surcredits be established on a per-therm basis until new cost-of-service rates become effective following the Company s next general rate case. Other recommendations included supplemental compliance reports related to excess deferred income taxes and an annual true-up to account for differences between the actual tax savings and the amount authorized by the ACC. In July 2018 the ACC issued a decision (the Decision) approving the Staff s subsequent draft order. While the ACC Decision addressed current tax reductions due to tax reform, it did not direct refunding to commence with regard to excess amounts from the remeasurement of deferred tax balances, which continue to be recognized in a regulatory liability since the enactment date of tax reform in December 2017.

LNG (Liquefied Natural Gas) Facility. In January 2014, Southwest filed an application with the ACC seeking preapproval to construct, operate and maintain a 233,000 dekatherm LNG facility in southern Arizona. This facility is intended to enhance service reliability and flexibility in natural gas deliveries in the southern Arizona area by providing a local storage option, to be operated by Southwest and connected directly to its distribution system. In December 2014, Southwest received an order from the ACC granting pre-approval of Southwest s application to construct the LNG facility and the deferral of costs, up to \$50 million, which was later approved (December 2016) to

be modified not to exceed \$80 million, following land purchase and bid solicitation for the engineering, procurement and construction of the facility. Construction commenced during the third quarter of 2017 and is expected to be completed by the end of 2019. Through June 2018, Southwest has incurred approximately \$45 million in capital expenditures toward the project (including land acquisition costs).

COYL Program. Southwest received approval, in connection with an earlier Arizona general rate case, to implement a program to conduct leak surveys, and if leaks were present, to replace and relocate service lines and meters for Arizona customers whose meters were set off from the customer's home, which is not a traditional configuration. Phase II of the COYL program included the replacement of non-leaking COYLs. The surcharge is revised annually as the program progresses. In the annual COYL filing made in February 2017, Southwest requested to establish an annual surcharge to collect \$1.8 million related to the revenue requirement associated with \$12.1 million in capital

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATIONForm 10-Q
June 30, 2018

projects completed under both phases during 2016. In June 2017, the ACC issued a decision approving the surcharge application. All capital work completed in earlier years was incorporated in Southwest's Arizona rate base in connection with the recently completed general rate case proceeding, as discussed above. In the annual COYL filing made in February 2018, Southwest requested surcharge revenue of \$4.2 million (an increase of \$2.4 million from \$1.8 million) related to 2017 expenditures of \$18 million. ACC Staff issued a recommended order approving the proposed surcharge application, while modifying the surcharge revenue to \$3.5 million (an increase of \$1.7 million) to reflect the impact of tax reform on the revenue requirement calculation. ACC consideration is expected during the third quarter of 2018.

VSP Program. Southwest received approval, in connection with its most recent Arizona general rate case, to implement a VSP replacement program. Southwest currently has approximately 6,000 miles of pre-1970s vintage steel pipe in Arizona. Southwest proposed to start replacing the pipe on an accelerated basis and to recover the costs through an annual surcharge filing that will be made in February of each year. The surcharge is designed to be revised annually as the program progresses. Southwest replaced approximately 40 miles of VSP during 2017 totaling approximately \$27 million and is targeting replacement projects during 2018 of approximately \$100 million. In the annual VSP filing made in February 2018, Southwest requested an increase in surcharge revenue to collect \$3.1 million related to 2017 expenditures. ACC Staff issued a recommended order approving the proposal surcharge application, while modifying the surcharge revenue to \$2.4 million to reflect the impact of tax reform on the revenue requirement calculation. ACC consideration is expected during the third quarter of 2018.

California Jurisdiction

California General Rate Case. In December 2016, Southwest filed to modify the most recent general rate case decision to extend the current rate case cycle by two years, including extension of the annual post-test year (PTY) attrition adjustments through 2020 from 2018. That latest rate case decision would have otherwise required Southwest to file its next general rate application by September 2017. Expedited consideration was requested and in June 2017, the California Public Utilities Commission (CPUC) approved the request, thereby extending the rate case filing deadline to September 2019. Southwest believes this extension is in the public interest as it provides rate stability to customers for two additional years consistent with the current reasonable rates approved as part of the last general rate case, and the continuation of the currently approved 2.75% PTY attrition adjustment for the two additional years. Also see *Attrition Filing* below.

Tax Reform. In its 2017 decision approving Southwest's request to extend the filing date of its next general rate case, the CPUC directed Southwest to track income tax expenses resulting from mandatory or elective changes in tax law, procedure or policy. The purpose is to identify differences between Southwest's authorized income tax expenses and its actual incurred income tax expenses, the result of which would be reviewed in Southwest's next general rate case. Southwest does not currently anticipate making an ad hoc filing in advance of the next general rate case filing to implement any changes resulting from tax reform.

Attrition Filing. In November 2017, Southwest made its latest annual PTY attrition filing, requesting annual revenue increases of \$2 million in southern California, \$527,000 in northern California, and \$263,000 for South Lake Tahoe. This filing was approved in December 2017 and rates were made effective in January 2018. At the same time, rates were updated to recover the regulatory asset associated with the revenue decoupling mechanism, or margin tracker.

Greenhouse Gas (GHG) Compliance. California Assembly Bill Number 32 and the regulations promulgated by the California Air Resources Board, require Southwest, as a covered entity, to comply with all applicable requirements

associated with California GHG emissions reporting and the California Cap and Trade Program. The CPUC issued a decision in March 2018 adopting an allocation methodology to distribute the net revenues or costs for years 2015-2017 beginning in the second quarter of 2018. Southwest has a net cost balance, which will be amortized over a 12-month period in rates for all applicable rate schedules, effective July 2018. In addition, for years 2019-2020, the decision adopted an allocation methodology to distribute the revenue proceeds through a California Climate Credit to active residential customers in April of each year. GHG compliance costs will be recovered through rates (including transportation rates) as prescribed by Decision D.15-10-032. There is no impact on earnings.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

Nevada Jurisdiction

Nevada General Rate Case. The currently effective general rate case decision was received from the Public Utilities Commission of Nevada (PUCN) in November 2012 as amended in a Rehearing Decision in April 2013. Southwest filed its most recent general rate case with the PUCN in May 2018. The filing requests a statewide overall general rate increase of approximately \$32.5 million to account for changes in the cost of service (\$14.4 million) since the last general rate case, including those resulting from the TCJA, and another \$18.1 million associated with the inclusion in rate base of GIR projects previously approved by the PUCN under the ongoing program. The application also requests a return on common equity of 10.30%, and a capital structure utilizing a 49.3% equity ratio. In association with the proposed changes, depreciation expense is expected to increase by approximately \$4 million, for a net operating income impact of approximately \$28 million. Southwest also seeks to adjust the GIR rate as part of the rate case process in lieu of filing a separate GIR rate application later this year. That adjustment would result in estimated incremental margin of \$6.5 million for southern Nevada and \$136,000 for northern Nevada.

In addition to the foregoing, Southwest is requesting to implement a pension tracker to account for the changes in pension expense between rate cases. Southwest also proposes to include two new tariff schedules (1) compression service and (2) biogas and renewable natural gas service. There are no changes to rate design overall, and a request to continue the general revenues adjustment (GRA) mechanism (revenue decoupling mechanism) is included. Management currently expects that an order will be received during the fourth quarter of 2018 and that new rates will become effective no later than January 1, 2019. See also *Tax Reform* and *Infrastructure Replacement Mechanisms* below.

Tax Reform. The PUCN opened an investigation into the TCJA, requiring comments to be filed by April 2018. Southwest filed comments, whereby it described its plan to address the tax changes in its upcoming general rate case that was filed in May 2018. In addition, PUCN Staff and the Bureau of Consumer Protection (BCP) filed reply comments, whereby both the PUCN Staff and the BCP agreed that the pending Nevada rate case is the appropriate forum for addressing the impact of the TCJA on ratepayers, and recommended that the Company refrain from amortizing any excess accumulated deferred tax balances until the rate case is resolved.

General Revenues Adjustment. As part of the Annual Rate Adjustment (ARA) filing in 2016, the PUCN authorized rate adjustments associated with the GRA. The rate adjustment collected \$13.6 million from customers during 2017, a decrease in collections of \$11.8 million, as compared to 2016. For the 2017 filing, with rates effective January 2018, the PUCN authorized rate adjustments that are expected to result in a decrease in collections from customers of \$15.4 million, as compared to the 2017 levels. In association with the most recent annual submission in June 2018, Southwest filed to adjust the GRA surcharge effective January 2019, to result in an increase in collections from customers of \$5.6 million. While there is no impact to net income overall from this rate adjustment, operating cash flows will be increased as the associated regulatory balance is reduced.

Infrastructure Replacement Mechanism. In January 2014, the PUCN approved final rules for a mechanism to defer and recover certain costs associated with accelerated replacement of infrastructure that would not otherwise currently provide incremental revenues. Associated with the replacement of various types of pipe infrastructure under the mechanism (Early Vintage Plastic Pipe, COYL and VSP), each year Southwest files a GIR Advance Application requesting authorization to replace qualifying infrastructure. Approximately \$57.3 million of replacement work was approved for 2017 with an annualized revenue requirement estimated at approximately \$5.3 million. In May 2017, Southwest filed its Advance Application for projects totaling approximately \$66 million that are expected to be completed during 2018. The PUCN issued an order on that Advance Application in September 2017, approving

approximately \$66 million of replacement work with an annualized revenue requirement estimated at \$6 million.

In June 2018, Southwest filed its Advance Application with projects totaling \$228 million to be completed over a three-year period, with a total annualized revenue requirement (following the three-year replacement period) of approximately \$21.7 million. Historically, Southwest has requested approval of projects on an annual basis; however, it is requesting to move to a multi-year approval process for projects to improve operational flexibility and enhance coordination with contractors and governmental agencies. A final decision is expected during the fourth quarter of 2018.

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATIONForm 10-Q
June 30, 2018

Filed separately, as part of each GIR filing, Southwest requests authorization to reset the GIR recovery surcharge related to previously approved and completed projects, with new rates becoming effective each January. In November 2017, for projects approved in 2016 and completed by July 2017, a deferred annualized revenue requirement of \$8.7 million was approved to be recovered from customers through updated rates effective January 2018. The updated surcharge is expected to result in incremental annual margin of \$4.2 million. If the above noted transition to a three-year project plan is approved as requested, management would continue to update surcharges annually under the GIR program.

Conservation and Energy Efficiency(CEE). In June 2015, Southwest requested recovery of energy efficiency and conservation development and implementation costs, including promotions and incentives for various programs, as originally approved for deferral by the PUCN effective November 2009. While recovery of initial program costs was approved as part of the most recent general rate case, amounts incurred subsequent to May 2012 (the certification period) continued to be deferred. Approved rates for the post-May 2012 costs deferred (including previously expected program expenditures for 2016) became effective January 2016. The 2017 ARA filing approved in November 2017, with modified rates effective January 2018, is expected to result in annualized margin decreases of \$8.2 million in southern Nevada and \$1.4 million in northern Nevada to return over-collected balances. As part of the 2018 ARA filing, Southwest requested modified rates, effective January 2019, authorizing an annualized margin decrease of \$4 million in southern Nevada and \$100,000 increase in northern Nevada. There is, however, no anticipated impact to net income overall from these decreases as amortization expense will also be reduced.

Expansion and Economic Development Legislation. In January 2016, final regulations were approved by the PUCN associated with legislation (SB 151) previously introduced and signed into law in Nevada. The legislation authorized natural gas utilities to expand their infrastructure. This includes providing gas service to unserved and underserved areas in Nevada.

In November 2017, Southwest filed for preapproval of a project to extend service to Mesquite, Nevada, in accordance with the SB 151 regulations. Hearings took place in April 2018, and in May, the PUCN issued an order approving the Southwest proposal to expand natural gas infrastructure to Mesquite. The order approves a capital investment of approximately \$28 million and the construction of approximately 37 miles of distribution pipeline (including the approach main). The cost is expected to be recovered through volumetric rates from all southern Nevada customers (including new customers in Mesquite). The annual revenue requirement associated with the project is \$2.8 million.

Federal Energy Regulatory Commission (FERC) Jurisdiction

General Rate Case. Paiute Pipeline Company (Paiute), a wholly owned subsidiary of Southwest, filed its most recent general rate case with the FERC in February 2014, and following settlement proceedings, tariff changes were filed in March 2015. The settlement implied an 11.5% pre-tax rate of return, and as part of the agreement, Paiute agreed to file a rate case no later than May 2019. See *Tax Reform* below.

2018 Expansion. In response to growing demand in the Carson City and South Lake Tahoe areas of northern California and northern Nevada, Paiute evaluated shipper interest in acquiring additional transportation capacity and executed precedent agreements for incremental transportation capacity with Southwest during the third quarter of 2016. In October 2016, Paiute initiated a pre-filing review process with the FERC for an expansion project, which was approved during the same month. In July 2017, a certificate application was filed, which included an applicant environmental assessment. In May 2018, the FERC issued a Certificate of Public Convenience and Necessity authorizing Paiute to construct the project. Construction work began in July 2018 and will consist of 8.5 miles of

additional transmission pipeline infrastructure. The project is expected to be completed by the end of 2018 at a cost of approximately \$22 million.

Tax Reform. The FERC issued a Notice of Proposed Rulemaking (NOPR) on whether the federal income tax changes of the TCJA cause pipeline rates to no longer be just and reasonable. The NOPR provided for pipelines to file a FERC Form No. 501-G to evaluate the impact of tax reform on their revenue requirement. In addition to filing the form, pipelines would select one of the following four options: 1) make a limited Section 4 filing to reduce its rates by the percentage reduction in its cost of service shown in its FERC Form No. 501-G; 2) commit to file either a prepackaged uncontested rate settlement or a general Section 4 rate case; 3) file a statement explaining why no change in rates is necessary; or 4) file the new FERC form without taking any other action. The FERC would also ultimately consider whether to initiate an investigation of any pipeline that would not have submitted a limited Section 4 rate

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATIONForm 10-Q
June 30, 2018

reduction filing or committed to file a general rate case. In July 2018, the FERC issued a final rule (Order No. 849) adopting procedures for determining which jurisdictional pipelines may be collecting unjust and unreasonable rates in light of tax reform. The rule becomes effective 45 days after publication in the Federal Register. Paiute Pipeline Company and Southwest Gas Transmission Company, the Company's FERC-regulated subsidiaries are each expected to file a Form No. 501-G during the fourth quarter of 2018.

PGA Filings

The rate schedules in all of Southwest's service territories contain provisions that permit adjustments to rates as the cost of purchased gas changes. These deferred energy provisions and purchased gas adjustment clauses are collectively referred to as PGA clauses. Differences between gas costs recovered from customers and amounts paid for gas by Southwest result in over- or under-collections. At June 30, 2018, over-collections in all jurisdictions resulted in a liability of \$26.4 million on the Company's and Southwest's Condensed Consolidated Balance Sheets. Filings to change rates in accordance with PGA clauses are subject to audit by state regulatory commission staffs. PGA changes impact cash flows but have no direct impact on profit margin. However, gas cost deferrals and recoveries can impact comparisons between periods of individual consolidated income statement components. These include Gas operating revenues, Net cost of gas sold, Net interest deductions, and Other income (deductions).

The following table presents Southwest's outstanding PGA balances receivable/(payable) (in thousands):

	June 30, 2018	December 31, 2017	June 30, 2017
Arizona	\$ (9,167)	\$ 5,069	\$ 4,822
Northern Nevada	(4,555)	8,189	1,134
Southern Nevada	(7,364)	(6,841)	(17,741)
California	(5,279)	1,323	(2,887)
	\$ (26,365)	\$ 7,740	\$ (14,672)

As discussed in **Note 1 Nature of Operations and Basis of Presentation** in this Form 10-Q, in July 2018, a refund of approximately \$49 million was received by Southwest from El Paso Natural Gas, L.L.C. (EPNG), related to transmission services with EPNG. The refund (including applicable interest) relates to rates authorized by the FERC to have been in effect, and which were in effect, subject to refund provisions, from EPNG's 2010 rate case, including subsequent procedural waivers thereto since 2011. Pursuant to Opinion No. 528-B issued by the FERC in May 2018, refunds were determined for the period April 2011 through May 2018. As a result of these actions having taken place prior to the end of the second quarter of 2018, Southwest recorded its applicable refund in its records as of June 30, 2018. The amount is reflected in Prepaids and other current assets and as a regulatory liability included within Other current liabilities on the balance sheets of both Southwest and the Company. As Southwest expects to return to its customers all amounts that it received in July 2018, the June entry will be reversed, and the amount will then be reflected as part of the PGA balances associated with the respective jurisdictions to which the refund from EPNG relates. Refunding to Southwest's customers will be subject to requirements of the individual states; however, management anticipates that amounts will be returned within twelve months or less. As the refund from EPNG was received after June 30, 2018, it did not impact Southwest's, or the Company's, cash balances as of that date.

Capital Resources and Liquidity

Cash on hand and cash flows from operations in the past twelve months have generally provided the majority of cash used in investing activities (primarily for construction expenditures and property additions). In recent years, certain pipe replacement has been accelerated to fortify system integrity and reliability, notably in association with gas infrastructure replacement programs as discussed above. During this same time, benefits were derived from new borrowings and strategic debt redemptions. The Company's capitalization strategy is to maintain an appropriate balance of equity and debt to maintain strong investment-grade credit ratings, which should minimize interest costs.

Cash Flows

Southwest Gas Holdings, Inc.:

Operating Cash Flows. Cash flows provided by consolidated operating activities increased \$49 million in the first six months of 2018 as compared to the same period of 2017. Changes in operating cash flows are typically influenced

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATIONForm 10-Q
June 30, 2018

significantly by the change in purchased gas costs, including amounts incurred and deferred, as well as when amounts are incorporated in customer bills to recover the deferred balances. Refer to **Results of Natural Gas Operations and Rates and Regulatory Proceedings**.

Investing Cash Flows. Cash used in consolidated investing activities increased \$76 million in the first six months of 2018 as compared to the same period of 2017. The change was primarily due to increased construction expenditures in the natural gas operations segment, including scheduled and accelerated replacement activity.

Financing Cash Flows. Net cash provided by consolidated financing activities increased \$17 million in the first six months of 2018 as compared to the same period of 2017. The increase was primarily due to the issuance of \$300 million in senior notes in March 2018, offset by the repayment of credit facility and commercial paper program borrowings in the current six-month period. The Company also issued approximately \$63 million during the first six months of 2018 in stock under its Equity Shelf Program. See also **Note 6 Common Stock**, and the discussion below. Dividends paid increased in the first six months of 2018 as compared to the same period of 2017 as a result of an increase in the quarterly dividend rate and an increase in the number of shares outstanding.

The Company issued approximately 77,000 additional shares of common stock collectively through the Restricted Stock/Unit Plan and the Management Incentive Plan. Also during the six months ended June 30, 2018, the Company issued 73,000 shares of common stock through the Dividend Reinvestment and Stock Purchase Plan (*DRSPP*), raising approximately \$5 million.

Southwest Gas Corporation:

Operating Cash Flows. Cash flows provided by operating activities increased \$36.5 million in the first six months of 2018 as compared to the same period of 2017. The increase in operating cash flows was primarily attributable to the change in deferred purchased gas costs as discussed above, and other changes in working capital. Refer to **Results of Natural Gas Operations and Rates and Regulatory Proceedings**.

Investing Cash Flows. Cash used in investing activities increased \$53 million in the first six months of 2018 as compared to the same period of 2017. The change was primarily due to additional construction expenditures, as indicated above.

Financing Cash Flows. Net cash provided by financing activities decreased \$4 million in the first six months of 2018 as compared to the same period of 2017. The decrease was primarily due to the issuance of \$300 million in senior notes in March 2018 offset by the repayment of the credit facility and commercial paper program borrowings then outstanding.

The capital requirements and resources of the Company generally are determined independently for the natural gas operations and construction services segments. Each business activity is generally responsible for securing its own external financing sources.

Gas Segment Construction Expenditures and Financing

During the twelve-month period ended June 30, 2018, construction expenditures for the natural gas operations segment were \$622 million. The majority of these expenditures represented costs associated with scheduled and accelerated replacement of existing transmission, distribution, and general plant. Cash flows from operating activities

of Southwest were \$346 million during this time and provided approximately 49% of construction expenditures and dividend requirements.

Management estimates natural gas segment construction expenditures during the three-year period ending December 31, 2020 will be approximately \$2 billion. Of this amount, approximately \$670 million is expected to be incurred in 2018. Southwest plans to continue to request regulatory support to accelerate projects that improve system flexibility and reliability. See also **Rates and Regulatory Proceedings** for discussion of Nevada infrastructure (including the recent filing to move to a multi-year approval program), Arizona COYL, and an LNG facility. During the three-year period, cash flows from operating activities of Southwest are expected to provide approximately 50% to 60% of the funding for gas operations total construction expenditures and dividend requirements. Any additional cash requirements are expected to be provided by existing credit facilities, equity contributions from Southwest Gas Holdings, Inc. and/or other external financing sources. The timing, types, and amounts of any additional external

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATIONForm 10-Q
June 30, 2018

financings will be dependent on a number of factors, including the cost of gas purchases, conditions in the capital markets, timing and amounts of rate relief, timing differences between U.S. federal taxes embedded in customer rates and amounts implemented under tax reform of 2017, growth levels in Southwest's service areas, and earnings. External financings could include the issuance of debt securities, bank and other short-term borrowings, and other forms of financing. See additional discussion in the Notes to financial statements (specifically, **Note 6 Common Stock** and **Note 7 Long-Term Debt**).

In March 2018, Southwest issued \$300 million in 3.7% Senior Notes at a discount of 0.185%. The notes will mature in April 2028. The proceeds were used to repay amounts then outstanding under the revolving portion of its credit facility and under the commercial paper program.

In March 2017, the Company filed with the Securities and Exchange Commission (SEC) an automatic shelf registration statement for the offer and sale of up to \$150 million of common stock from time to time in at-the-market offerings under the prospectus included therein and in accordance with the Sales Agency Agreement, dated March 29, 2017, between the Company and BNY Mellon Capital Markets, LLC (the Equity Shelf Program). Sales of the shares will continue to be made at market prices prevailing at the time of sale. Net proceeds from the sale of shares of common stock under the Equity Shelf Program are intended for general corporate purposes, including the acquisition of property for the construction, completion, extension or improvement of pipeline systems and facilities located in and around the communities Southwest serves.

During the six months ended June 30, 2018, 870,132 shares were issued in at-the-market offerings at an average price of \$72.94 per share with gross proceeds of \$63.5 million, agent commissions of \$635,000, and net proceeds of \$62.8 million. See **Note 6 Common Stock** for more information. See also discussion above regarding the Company's issuances under the DRSP.

Bonus Depreciation

In 2017, with the enactment of the Tax Cuts and Jobs Act, the bonus depreciation deduction percentage changed from 50% to 100% for qualified property placed in service after September 27, 2017 and before 2023. The bonus depreciation tax deduction phases out starting in 2023, by 20% for each of the five following years. Qualified property excludes public utility property. The Company estimates bonus depreciation will defer the payment of approximately \$14 million (none of which relates to utility operations) of federal income taxes for 2018.

Dividend Policy

Dividends are payable on the Company's common stock at the discretion of the Board of Directors (Board). In setting the dividend rate, the Board currently targets a payout ratio of 55% to 65% of consolidated earnings per share and considers, among other factors, current and expected future earnings levels, our ongoing capital expenditure plans and expected external funding needs, and our ability to maintain strong credit ratings and liquidity. The Company has paid dividends on its common stock since 1956 and has increased that dividend each year since 2007. In February 2018, the Board elected to increase the quarterly dividend from \$0.495 to \$0.52 per share, representing a 5% increase, effective with the June 2018 payment.

Liquidity

Liquidity refers to the ability of an enterprise to generate sufficient amounts of cash through its operating activities and external financing to meet its cash requirements. Several general factors (some of which are out of the control of the Company) that could significantly affect liquidity in future years include: variability of natural gas prices, changes in the ratemaking policies of regulatory commissions, regulatory lag, customer growth in the natural gas segment's service territories, the ability to access and obtain capital from external sources, interest rates, changes in income tax laws, pension funding requirements, inflation, and the level of earnings. Natural gas prices and related gas cost recovery rates have historically had the most significant impact on liquidity.

On an interim basis, Southwest defers over- or under-collections of gas costs to PGA balancing accounts. In addition, Southwest uses this mechanism to either refund amounts over-collected or recoup amounts under-collected as compared to the price paid for natural gas during the period since the last PGA rate change went into effect. At June 30, 2018, the combined balance in the PGA accounts totaled an over-collection of \$26.4 million. See **PGA Filings** for

Form 10-Q
 June 30, 2018

more information.

The Company has a credit facility with a borrowing capacity of \$100 million that expires in March 2022. The Company intends to utilize this facility for short-term financing needs. At June 30, 2018, \$22.5 million was outstanding on this facility.

Southwest has a credit facility, with borrowing capacity of \$400 million, that expires in March 2022. Southwest designates \$150 million of the facility for long-term borrowing needs and the remaining \$250 million for working capital purposes. The maximum amount outstanding on the credit facility (including a commercial paper program, as noted below) during the first six months of 2018 was \$150 million. At June 30, 2018, \$48 million was outstanding on the long-term portion and no borrowings were outstanding on the short-term portion of this credit facility. Commercial paper borrowings are discussed below. The credit facility can be used as necessary to meet liquidity requirements, including temporarily financing under-collected PGA balances, if any, or meeting the refund needs of over-collected balances. This credit facility has been adequate for Southwest's working capital needs outside of funds raised through operations and other types of external financing.

Southwest has a \$50 million commercial paper program. Any issuance under the commercial paper program is supported by Southwest's current revolving credit facility and, therefore, does not represent additional borrowing capacity. Any borrowing under the commercial paper program will be designated as long-term debt. Interest rates for the commercial paper program are calculated at the current commercial paper rate during the borrowing term. At June 30, 2018, there were no borrowings outstanding under this program.

Centuri has a senior secured revolving credit and term loan facility with borrowing capacity of \$450 million. The line of credit portion of the facility is \$250 million; amounts borrowed and repaid under the revolving credit facility are available to be re-borrowed. The term loan facility portion, has a limit of approximately \$200 million. The limit on the term loan facility was reached in November 2017. No further borrowing is permitted under the term loan facility. The \$450 million credit and term loan facility expires in November 2022. The \$450 million revolving credit and term loan facility is secured by substantially all of Centuri's assets except those explicitly excluded under the terms of the agreement (including owned real estate and certain certificated vehicles). Centuri assets securing the facility at June 30, 2018 totaled \$659 million. The maximum amount outstanding on the credit facility during the first six months of 2018 was \$293 million. At June 30, 2018, \$88 million was outstanding on the secured revolving credit facility. Also at June 30, 2018, there was approximately \$144 million, net of letters of credit, available under the line of credit.

The following table sets forth the ratios of earnings to fixed charges for the Company. Due to the seasonal nature of the Company's business, these ratios are computed on a twelve-month basis:

	For the Twelve Months Ended	
	June 30, 2018	December 31, 2017
Ratio of earnings to fixed charges	3.28	3.54

Earnings are defined as the sum of pretax income plus fixed charges. Fixed charges consist of all interest expense including capitalized interest, one-third of rent expense (that approximates the interest component of such expense), and net amortized debt costs.

Edgar Filing: Southwest Gas Holdings, Inc. - Form 10-Q

The following table sets forth the ratios of earnings to fixed charges for Southwest. Due to the seasonal nature of Southwest's business, these ratios are computed on a twelve-month basis:

	For the Twelve Months Ended	
	June 30, 2018	December 31, 2017
Ratio of earnings to fixed charges	3.65	4.01

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATIONForm 10-Q
June 30, 2018

Earnings are defined as the sum of pretax income plus fixed charges. Fixed charges consist of all interest expense including capitalized interest, one-third of rent expense (that approximates the interest component of such expense), and net amortized debt costs.

Forward-Looking Statements

This quarterly report contains statements which constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (Reform Act). All statements other than statements of historical fact included or incorporated by reference in this quarterly report are forward-looking statements, including, without limitation, statements regarding the Company's plans, objectives, goals, intentions, projections, strategies, future events or performance, negotiations, and underlying assumptions. The words may, if, will, should, could, expect, anticipate, believe, estimate, predict, project, continue, forecast, intend, promote, seek, and other similar expressions are generally used and intended to identify forward-looking statements. For example, statements regarding operating margin patterns, customer growth, the composition of our customer base, price volatility, seasonal patterns, payment of debt, interest savings, the Company's COLI strategy, replacement market and new construction market, the impacts of the Tax Cuts and Jobs Act legislation including disposition as to both timing and amounts in regulatory proceedings, bonus depreciation tax deductions, amount and timing for completion of estimated future construction expenditures, including the LNG facility in southern Arizona, the Mesquite expansion in Nevada, and the Paiute 2018 expansion project in northern Nevada and northern California, forecasted operating cash flows and results of operations, impacts from gas infrastructure replacement programs and surcharges, funding sources of cash requirements, amounts generally expected to be reflected in 2018 or future period revenues from regulatory rate proceedings including amounts resulting from the settled Arizona general rate case, the recently filed Nevada general rate case, rates and surcharges, PGA, and other rate adjustments, sufficiency of working capital and current credit facilities, bank lending practices, the Company's views regarding its liquidity position, ability to raise funds and receive external financing capacity and the intent and ability to issue common stock under the Equity Shelf Program, the intent and ability to issue various financing instruments and stock under the December 2017 shelf registration statement, future dividend increases and the Board's current target dividend payout ratio, pension and post-retirement benefits, certain impacts of tax acts, contract or construction change order negotiations, impacts of accounting standard updates, infrastructure replacement mechanisms and COYL programs, future gas prices, gas purchase contracts and derivative financial instruments, recoverability of regulatory assets, the time period and means for returning to customers proceeds from the recent EPNG refund, the impact of certain legal proceedings, and the timing and results of future rate hearings and approvals are forward-looking statements. All forward-looking statements are intended to be subject to the safe harbor protection provided by the Reform Act.

A number of important factors affecting the business and financial results of the Company could cause actual results to differ materially from those stated in the forward-looking statements. These factors include, but are not limited to, customer growth rates, conditions in the housing market, the ability to recover costs through the PGA mechanisms or other regulatory assets, the effects of regulation/deregulation, the impacts of alternative energy sources to natural gas, the timing and amount of rate relief, the timing, amount, and methods determined by regulators to refund amounts to customers resulting from tax reform, changes in rate design, variability in volume of gas or transportation service sold to customers, changes in gas procurement practices, changes in capital requirements and funding, the impact of conditions in the capital markets on financing costs, changes in construction expenditures and financing, changes in operations and maintenance expenses, effects of pension expense forecasts, accounting changes and regulatory treatment related thereto, currently unresolved and future liability claims, changes in pipeline capacity for the transportation of gas and related costs, results of Centuri bid work, results of Neuco (including the ability to be accretive to earnings over the first twelve months), Centuri construction expenses, differences between actual and

originally expected outcomes of Centuri bid or other fixed-price construction agreements, outcomes from contract and change order negotiations, ability to successfully procure new work, impacts from work awarded or failing to be awarded from significant customers, the mix of work awarded, the amount of work awarded to Centuri, acquisitions and management's plans related thereto, competition, our ability to raise capital in external financings, our ability to continue to remain within the ratios and other limits subject to our debt covenants, and ongoing evaluations in regard to goodwill and other intangible assets. In addition, the Company can provide no assurance that its discussions regarding certain trends relating to its financing and operating expenses will continue or cease to continue in future periods. For additional information on the risks associated with the Company's business, see **Item 1A. Risk Factors**

SOUTHWEST GAS HOLDINGS, INC.
SOUTHWEST GAS CORPORATION

Form 10-Q
June 30, 2018

and Item 7A. Quantitative and Qualitative Disclosures About Market Risk in the Annual Report on Form 10-K for the year ended December 31, 2017.

All forward-looking statements in this quarterly report are made as of the date hereof, based on information available to the Company as of the date hereof, and the Company assumes no obligation to update or revise any of its forward-looking statements even if experience or future changes show that the indicated results or events will not be realized. **We caution you not to unduly rely on any forward-looking statement(s).**

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

See **Item 7A. Quantitative and Qualitative Disclosures about Market Risk** in the 2017 Annual Report on Form 10-K filed with the SEC. No material changes have occurred related to the disclosures about market risk.

ITEM 4. CONTROLS AND PROCEDURES

Management of Southwest Gas Holdings, Inc. and Southwest Gas Corporation has established disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) that are designed to provide reasonable assurance that information required to be disclosed in their respective reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms and to provide reasonable assurance that such information is accumulated and communicated to management of each company, including each respective Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and benefits of controls must be considered relative to their costs. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or management override of the control. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and may not be detected.

Based on the most recent evaluation, as of June 30, 2018, management of Southwest Gas Holdings, Inc., including the Chief Executive Officer and Chief Financial Officer, believe the Company's disclosure controls and procedures are effective at attaining the level of reasonable assurance noted above.

There have been no changes in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) during the second quarter of 2018 that have materially affected, or are likely to materially affect, the Company's internal control over financial reporting.

Based on the most recent evaluation, as of June 30, 2018, management of Southwest Gas Corporation, including the Chief Executive Officer and Chief Financial Officer, believe Southwest's disclosure controls and procedures are effective at attaining the level of reasonable assurance noted above.

There have been no changes in Southwest's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) during the second quarter of 2018 that have materially affected, or are likely to materially affect Southwest's internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company is named as a defendant in various legal proceedings. The ultimate dispositions of these proceedings are not presently determinable; however, it is the opinion of management that none of this litigation individually or in the aggregate will have a material adverse impact on the Company's financial position or results of operations.

ITEMS 1A through 3. None.

ITEM 4. MINE SAFETY DISCLOSURES Not applicable.

ITEM 5. OTHER INFORMATION None.

ITEM 6. EXHIBITS

The following documents are filed, or furnished, as applicable, as part of this report on Form 10-Q:
