Digital Ally, Inc.
Notes to Condensed Financial Statements
(unaudited)

NOTE 1. NATURE OF BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Business:

Digital Ally, Inc. produces digital video imaging, audio recording and related storage products for use in law enforcement and security applications. Its current products are an in-car digital video/audio recorder contained in a rear-view mirror and a digital video/audio recorder contained in a flashlight sold to law enforcement agencies and other security organizations. The Company has active research and development programs to adapt its technologies to other applications. The Company has the ability to integrate electronic, radio, computer, mechanical, and multi-media technologies to create unique solutions to address needs in a variety of other industries and markets, including mass transit, school bus, taxi cab and the military.

The Company was originally incorporated in Nevada on December 13, 2000 as Vegas Petra, Inc. and had no operations until 2004. On November 30, 2004 the Company entered into a Plan of Merger with Digital Ally, Inc., at which time the merged entity was renamed Digital Ally, Inc. Since inception through early 2006, the Company was considered a development stage company, with its activities focused on organizational activities, including design and development of product lines, implementing a business plan, establishing sales channels, and development of business strategies. In late March 2006, the Company shipped its first completed product, and became an operating company for financial accounting and reporting purposes.

The following is a summary of the Company's Significant Accounting Policies:

Fair Value of Financial Instruments:

The carrying amounts of financial instruments, including cash and cash equivalents, accounts receivable, accounts payable and line of credit, approximate fair value because of the short-term nature of these items.

Revenue Recognition:

Revenues from the sale of products are recorded when the product is shipped, title and risk of loss have transferred to the purchaser, payment terms are fixed or determinable and payment is reasonably assured. Sales taxes collected on products sold are excluded from revenues and are reported as an accrued expense in the accompanying balance sheet until payments are remitted.

Use of Estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and cash equivalents:

Cash and cash equivalents include funds on hand, in bank and short-term investments with original maturities of 90 days or less. Included in the Company's cash and cash equivalents as of September 30, 2008 are short-term investments in repurchase agreements with its bank of approximately \$3,326,373, which is collateralized 105% by the pledge of government agency securities.

Accounts Receivable:

Accounts receivable are carried at original invoice amount less an estimate made for doubtful receivables based on a review of all outstanding amounts on a weekly basis. The Company determines the allowance for doubtful accounts by regularly evaluating individual customer receivables and considering a customer's financial condition, credit history, and current economic conditions. Trade receivables are written off when deemed uncollectible. Recoveries of trade receivables previously written off are recorded when received.

A trade receivable is considered to be past due if any portion of the receivable balance is outstanding for more than thirty (30) days beyond terms. No interest is charged on overdue trade receivables.

7

Inventories:

Inventories consist of electronic parts, circuitry boards, camera parts and ancillary parts (collectively “components”), work-in-process and finished goods, and are carried at the lower of cost (First-in, First-out Method) or market value. The Company determines the estimate for the reserve for slow moving or obsolete inventories by regularly evaluating individual inventory levels, projected sales and current economic conditions.

Furniture, fixtures and equipment:

Furniture, fixtures and equipment is stated at cost net of accumulated depreciation. Additions and improvements are capitalized while ordinary maintenance and repair expenditures are charged to expense as incurred. Depreciation is recorded by the straight-line method over the estimated useful life of the asset, which ranges from 3 to 10 years.

Intangible assets:

Intangible assets include deferred patent costs and website development costs. Legal expenses incurred in preparation of patent application have been deferred and will be amortized over the useful life of granted patents. Costs incurred in preparation of applications that are not granted will be charged to expense at that time.

Long-Lived Assets:

Long-lived assets are reviewed for impairment annually or whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Impairment is measured by comparing the carrying value of long-lived assets to the estimated undiscounted future cash flows expected to result from the use of the assets and their eventual disposition. As of September 30, 2008, there has been no impairment in the carrying value of long-lived assets.

Warranties:

The Company’s products carry explicit product warranties that extend two years from the date of shipment. The Company records a provision for estimated warranty costs based upon historical warranty loss experience and periodically adjusts these provisions to reflect actual experience. Accrued warranty costs are included in accrued expenses.

Customer deposits:

The Company requires deposits in advance of shipment for certain customer sales orders, in particular when accepting orders from foreign customers. Customer deposits are reflected as a current liability in the accompanying balance sheet.

Shipping and Handling Costs:

Shipping and handling costs for outbound sales orders totaled \$110,746 and \$53,498 for the nine months ended September 30, 2008 and 2007, and \$37,136 and \$8,310 for the three months ended September 30, 2008 and 2007, respectively. Such costs are included in cost of sales in the statements of income.

Advertising Costs:

Advertising expense includes costs related to trade shows and conventions, promotional material and supplies, and media costs. Advertising costs are expensed in the year in which they are incurred. The Company incurred total advertising expense of approximately \$338,109 and \$423,355 for the nine months ended September 30, 2008 and

2007, and \$146,909 and \$255,518 for the three months ended September 30, 2008 and 2007, respectively. Such costs are included in operating expenses in the Statements of Income.

Income Taxes:

Deferred taxes are provided for by the liability method wherein deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carryforwards and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax basis. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

On July 13, 2006, the FASB issued FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes, and Related Implementation Issues" ("FIN 48"). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements in accordance with Statement of Financial Accounting Standard No. 109, "Accounting for Income Taxes" ("SFAS No. 109"). FIN 48 prescribes a recognition threshold and measurement attribute for a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The Company adopted the provisions of FIN 48 on January 1, 2007. As a result of the implementation of FIN 48, the Company had no changes in the carrying value of its tax assets or liabilities for any unrecognized tax benefits.

The Company's policy is to record estimated interest and penalties related to the underpayment of income taxes as income tax expense in the statements of income. Interest expense related to the underpayment of estimated taxes aggregated \$652 for the three and nine months ended September 30, 2008. There were no penalties in 2008 and there was no interest or penalties in 2007.

Research and Development Expenses:

The Company expenses all research and development costs as incurred. Research and development expenses incurred for the nine months ended September 30, 2008 and 2007 were approximately \$1,893,318 and \$1,061,673, respectively. Research and development expenses incurred for the three months ended September 30, 2008 and 2007 were approximately \$785,428 and \$631,067, respectively.

Stock-Based Compensation:

Prior to January 1, 2006 the Company accounted for its stock-based compensation plans under the recognition and measurement provisions of APB Opinion No. 25 "Accounting for Stock Options" and related interpretative guidance ("APB 25"). APB 25 generally did not require the recognition of stock-based compensation when options granted under stock-based compensation plans had exercise prices at least equal to or greater than the market value of the underlying common stock on the date of grant.

Effective January 1, 2006, the Company adopted the fair value recognition provisions of Statement of Financial Accounting Standards No. 123 (Revised 2004), "Share-Based Payment" ("SFAS No. 123R"), using the modified prospective transition method. Under this transition method, stock-based compensation expense for 2006 and 2007 includes: (a) compensation expense for all stock-based compensation awards granted prior to January 1, 2006, but not yet vested as of January 1, 2006, based on the original provisions of SFAS No. 123, and (b) stock based compensation expense for all stock-based compensation granted after January 1, 2006 based on the grant-date fair value calculated in accordance with the provisions of SFAS No. 123R. The Company recognizes these compensation costs on a straight-line basis over the requisite service period of the award.

The Company estimates the grant-date fair value of stock-based compensation using the Black-Scholes valuation model. Assumptions used to estimate compensation expense are determined as follows:

- Expected term is determined using the contractual term and vesting period of the award;
- Expected volatility of award grants made in the Company's plan is measured using the weighted average of historical daily changes in the market price of the Company's common stock over the expected term of the award;
- Expected dividend rate is determined based on expected dividends to be declared;

Risk-free interest rate is equivalent to the implied yield on zero-coupon U.S. Treasury bonds with a maturity equal to the expected term of the awards; and

Forfeitures are based on the history of cancellations of awards granted and management's analysis of potential forfeitures.

The stock warrants issued to investors in 2006 are not accounted for under SFAS No. 150, "Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity" as the warrant agreements contain no provision for the Company to use any of its cash or other assets to settle the warrants. The stock warrants are not considered derivatives under SFAS No. 133 "Accounting for Derivative Instruments and Hedging Activities" (SFAS No. 133) as the warrant agreements meet the scope exception in paragraph 11.a. of SFAS No. 133, as the stock warrants are indexed to the Company's common stock and are classified in stockholder's equity under Emerging Issues

Task Force (EITF) 00-19 “Accounting Recognition for Certain Transactions involving Equity Instruments Granted to Other Than Employees.”

Income per Share:

The Company accounts for income (loss) per share in accordance with SFAS No. 128, “Earnings per Share.” Basic income per share is computed by dividing net income (loss) by the weighted average number of common shares outstanding during the periods presented. Diluted income per share reflects the potential dilution that could occur if outstanding stock options and warrants were exercised utilizing the treasury stock method.

Segments of Business:

Management has determined that its operations are comprised of one reportable segment: the sale of portable digital video and audio recording devices. For the three and nine months ended September 30, 2008 and 2007, sales by geographic area were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Sales by geographic area:				
United States of America	\$ 5,268,088	\$ 4,851,705	\$ 17,999,882	\$ 11,957,223
Foreign	3,183,182	248,820	7,941,114	402,371
	\$ 8,451,270	\$ 5,100,525	\$ 25,940,996	\$ 12,359,594

Sales to customers outside of the United States are denominated in US dollars. All Company assets are physically located within the United States.

Reclassifications:

Management has reviewed the classification of expenses as cost of sales or operating expenses as reported in the statement of income. As a result of this review, certain direct and indirect manufacturing- related expenses aggregating \$246,272 and \$597,187, previously reported as operating expenses in the statement of income for the three and nine months ended September 30, 2007, respectively, have been reclassified to cost of sales to be consistent with their classification adopted for the three and nine months ended September 30, 2008. There was no effect on net income or income per share as a result of such expense reclassifications.

NOTE 2. BASIS OF PRESENTATION

The condensed financial statements have been prepared in accordance with generally accepted accounting principles in the United States for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles in the United States for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the nine-month period ended September 30, 2008 are not necessarily indicative of the results that may be expected for the year ending December 31, 2008.

The balance sheet at December 31, 2007 has been derived from the audited financial statements at that date, but does not include all of the information and footnotes required by generally accepted accounting principles in the United States for complete financial statements.

For further information, refer to the financial statements and footnotes included in the Company's annual report on Form 10-KSB for the year ended December 31, 2007.

NOTE 3. CONCENTRATION OF CREDIT RISK AND MAJOR CUSTOMERS

Financial instruments that potentially subject the Company to concentrations of credit risk consist of accounts receivable. Sales are typically made on credit and the Company generally does not require collateral. The Company performs ongoing credit evaluations of its customers' financial condition and maintains an allowance for estimated losses. Uncollectible accounts are written off when deemed uncollectible and accounts receivable are presented net of an allowance for doubtful accounts. The allowance for doubtful accounts totaled \$30,000 and \$28,224 as of September 30, 2008 and December 31, 2007, respectively.

The Company sells primarily through a network of unaffiliated distributors/sales agents. In 2008, two distributor/agents exceeded 10% of total revenues during the nine months ended September 30, 2008. No other distributor/agent exceeded 10% in 2008 and no individual distributor/agent exceeded 10% in 2007. In addition, three individual customer receivable balances exceeded 10% of total accounts receivable as of September 30, 2008. These

three customers represented an aggregate balance of \$3,943,372 or 67% of our total accounts receivable balance as of September 30, 2008.

The Company currently purchases finished circuit boards and other proprietary component parts from suppliers located in the United States. Although the Company currently obtains certain of these components from single source suppliers, management believes it could obtain alternate suppliers in most cases without incurring significant production delays. The Company also purchases a proprietary audio component from a foreign vendor that could be more difficult to obtain alternate sources if there was a supply interruption. The Company has not experienced any significant supply disruptions from this foreign vendor historically, and does not anticipate future supply disruptions, although no assurances can be offered in this regard. The Company acquires most of its components on a purchase order basis and does not have long-term contracts with suppliers.

NOTE 4. INVENTORIES

Inventories consisted of the following at September 30, 2008 and December 31, 2007:

10

Edgar Filing: DIGITAL ALLY INC - Form 10-Q

	September 30, 2008	December 31, 2007
Raw material and component parts	\$ 4,737,764	\$ 2,919,979
Work-in-process	58,241	25,762
Finished goods	2,355,499	214,685
Reserve for excess and obsolete inventory	(371,903)	(196,328)
	\$ 6,779,601	\$ 2,964,098

Finished goods inventory includes units held by potential customers for test and evaluation purposes. Test and evaluation units totaled \$136,528 and \$77,868 as of September 30, 2008 and December 31, 2007, respectively.

NOTE 5. PLEDGED ASSETS AND BANK LINE OF CREDIT

On February 13, 2008, the Company entered into a new credit facility with a bank that provides for borrowings on a revolving basis of up to \$1,500,000. The line of credit is secured by eligible trade receivables, inventory and equipment and bears variable interest at the bank's prime rate (5.00% at September 30, 2008) minus 0.50%, adjusted daily. The line of credit matures on February 13, 2009. As of September 30, 2008 and December 31, 2007, there were no amounts outstanding and there were no borrowings under the credit facility during the nine months ended September 30, 2008.

NOTE 6. ACCRUED EXPENSES

Accrued expenses consisted of the following at September 30, 2008 and December 31, 2007:

	September 30, 2008	December 31, 2007
Accrued warranty expense	\$ 211,337	\$ 213,428
Accrued sales commissions	221,122	145,858
Accrued payroll and related fringes	442,946	—
Other	41,320	148,409
	\$ 916,725	\$ 507,695

Accrued warranty expense was comprised of the following for the nine months ended September 30, 2008:

Beginning balance	\$ 213,428
Provision for warranty expense	494,849
Charges applied to warranty reserve	(497,060)
Ending balance	\$ 211,217

NOTE 7. INCOME TAXES

The Company received total proceeds of \$2,914,538 and \$165,000 during the nine months ended September 30, 2008 and 2007, respectively, from the exercise of stock purchase options and warrants. During 2008, the Company realized an aggregate tax deduction approximating \$6,989,813 relative to the exercise of such stock options and warrants. The related excess tax benefits aggregated \$2,345,000, which has been allocated directly to additional paid in capital during the nine months ended September 30, 2008.

During the nine months ended September 30, 2007 the Company reduced the deferred tax valuation allowance by \$2,153,143 and recognized a corresponding tax benefit in the statement of income. This reduction in the valuation allowance was recorded based upon management's expectation that the Company would be able to generate sufficient

taxable income in the future in order to utilize the remaining net operating loss carryforwards.

The valuation allowance for deferred tax assets as of September 30, 2008 was \$165,000, which remained unchanged from December 31, 2007.

At December 31, 2007, the Company had available approximately \$667,000 of net operating loss carryforwards available to offset future taxable income generated by the Company. Such tax net operating loss carryforwards expire between 2024 and 2025. In addition, the Company had research and development tax credit carryforwards totaling \$249,527 available as of December 31, 2007 which expire between 2023 and 2027. Management will continue to evaluate the likelihood of realizing the benefits of the net deferred tax assets (including the net operating tax loss and research and development credit carryforwards), and will adjust the valuation allowance accordingly.

The Internal Revenue Code contains provisions under Section 382 which limit the Company's ability to utilize net operating loss carry-forwards in the event that the Company has experienced a more than 50% change in ownership over a three-year period. Current estimates prepared by the Company indicate that due to ownership changes which have occurred, all of its net operating loss and research and development tax credit carryforwards are currently subject to an annual limitation of approximately \$1,151,000, but may be further limited by additional ownership changes which may occur in the future. As stated above, the net operating loss and research and development credit carryforwards expire between 2023 and 2027, allowing the Company to utilize all of the limited net operating loss carry-forwards during the carryforward period.

The Company's federal and state income tax returns are closed by relevant statute for all tax years prior to 2004.

NOTE 8. COMMITMENTS AND CONTINGENCIES

The Company has several non-cancelable operating lease agreements for equipment, office space and warehouse space. The agreements expire from October 2008 to October 2012. Rent expense for the nine months ended September 30, 2008 and 2007 was \$251,221 and \$137,522, respectively, related to these leases. Rent expense for the three months ended September 30, 2008 and 2007 was \$79,711 and \$65,904, respectively, related to these leases. The future minimum amounts due under the leases are as follows:

Year ending December 31:	
2008 (October 1, 2008 through December 31, 2008)	\$ 99,163
2009	397,332
2010	265,561
2011	169,086
2012	140,905
	\$ 1,072,047

The Company has two license agreements under which it has been assigned the rights to certain licensed materials used in its products. Upfront license payments of \$75,000 in March 2004 and \$75,000 in May 2005 were made and expensed immediately. The terms of the agreements were for three years from the dates of such agreements, with automatic one year extensions thereafter, unless both parties agree otherwise in writing prior to the expiration dates of said agreements. The first license was automatically renewed in March 2007 under the applicable terms of the agreement. These license agreements require the Company to pay ongoing royalties based on the number of products shipped containing the licensed material on a quarterly basis. The Company prepaid \$42,500 as ongoing royalty fees during April 2006 and again in July 2008 which was capitalized and included in prepaid expenses. The Company amortized the prepaid royalties based on the number of units shipped during the period. Amortization aggregated \$28,645 and \$12,920 during the nine months ended September 30, 2008 and 2007, and \$9,656 and \$5,334 during the three months ended September 30, 2008 and 2007, respectively, which is included in cost of sales in the accompanying statement of income.

The Company has entered into a sublicense agreement whereby it has been assigned the rights to certain licensed materials used in its products. The effective date of the sublicense was October 12, 2007, with an original term expiring in October 2010, with automatic one-year renewals unless either party notifies the other in writing not less than 60 days prior to expiration. The Company paid an upfront license fee of \$60,000 during January 2008, which was capitalized and will be amortized ratably over the term of the agreement. The sublicense also requires an ongoing royalty fee based on the number of units shipped on a quarterly basis. Shipments of product containing the licensed material are expected to commence in late 2008. Accordingly, there were no royalties paid during the nine months ended September 30, 2008 and 2007.

On April 9, 2008, Thomas DeHuff filed suit against the Company and Charles A. Ross in the Chancery Court of Lincoln County, Mississippi. Charles A. Ross, Jr., ("Ross") is the son of Charles A. Ross and was a former officer and

director of the Company. The complaint alleges that on or about April 8, 2005 the plaintiff entered into a verbal agreement with Ross, whom the plaintiff maintains was acting for and on behalf of the Company, under which he purportedly was to receive 150,000 shares of the Company's common stock to resolve certain claims to compensation the plaintiff maintains was due from the Company. The lawsuit also claims that the plaintiff advanced funds to Ross, believing that he was purchasing Company stock which was never issued. Plaintiff is seeking unspecified damages and punitive damages and attorney fees in addition to requiring the Company to issue the common shares. The Company has successfully removed the case from the Chancery Court of Lincoln County, Mississippi to the United States District Court located in Jackson Mississippi. The Company has filed a motion to dismiss the case which is currently pending in the United States District Court. The Company believes that the lawsuit is without merit and will vigorously defend itself.

On July 11, 2008, L-3 Communications Mobile-Vision, Inc. filed suit against the Company and Trisquare Communications, Inc., a vender of the Company that supplies wireless microphones included in the Company's products, in the U.S. District Court in the District of New Jersey. The complaint alleged that the Company infringed on a patent issued to the Plaintiff that covered certain elements of the wireless microphone component of in-car video systems. The lawsuit sought a permanent injunction regarding the use of this technology, including damages, treble damages and attorney fees. On October 8, 2008, The Company and L-3 Communications Mobile-Vision, Inc. entered into a settlement agreement that resolved all litigation pertaining to Mobile-Vision's allegations that Digital Ally's current DVM-500 products infringe Mobile-Vision's patent. Based on technical disclosures and representations provided by Digital Ally to Mobile-Vision, the parties agreed that the current DVM-500 products do not infringe Mobile-Vision's patent and that no damages are payable based on those technical disclosures and representations. Each party agreed to bear its own costs and attorney's fees. The terms of the resolution are otherwise confidential.

On July 11, 2008, L-3 Communications Mobile-Vision, Inc. also filed a complaint against the Company, Trisquare Communications, Inc., and eight other parties requesting that the United States International Trade Commission (“ITC”) commence an investigation pursuant to Section 337 of the Tariff Act of 1930. The Plaintiff sought to have the ITC issue a permanent cease and desist order prohibiting the importation into the United States of all articles that infringe on its patent that allegedly covers certain elements of the wireless microphone component of in-car video systems. This complaint was also resolved and dismissed under the same terms described previously.

In July 2008, the Company amended and restated its 401(k) retirement savings plan. The amended plan requires the Company to provide a 100% matching contribution for employees who elect to contribute up to 3% of their compensation to the plan and a 50% matching contribution for employee’s elective deferrals between 4% and 5%. The Company has made matching contributions totaling \$26,045 for the three and nine months ended September 30, 2008. Each participant is 100% vested at all times in employee and employer matching contributions.

During June 2008, the Board of Directors approved a program that authorizes the repurchase of up to \$10 million of the Company’s common stock in the open market, or in privately negotiated transactions, through July 1, 2010. The repurchases, if and when made, will be subject to market conditions, applicable rules of the Securities and Exchange Commission and other factors. The repurchase program will be funded using a portion of cash and cash equivalents, along with cash flow from operations. Purchases may be commenced, suspended or discontinued at any time. The Company has repurchased 210,360 shares at a total cost of \$1,624,353 (average cost of \$7.72 per share) under this program as of September 30, 2008.

NOTE 9. STOCK-BASED COMPENSATION

The Company recorded pretax compensation expense related to the grant of stock options and warrants issued of \$1,106,258 and \$1,294,278 for the nine months ended September 30, 2008 and 2007, and \$531,947 and \$385,756 for the three months ended September 30, 2008 and 2007, respectively.

As of September 30, 2008, the Company had adopted four separate stock-based option plans: (i) the 2005 Stock Option and Restricted Stock Plan (the “2005 Plan”), (ii) the 2006 Stock Option and Restricted Stock Plan (the “2006 Plan”), (iii) the 2007 Stock Option and Restricted Stock Plan (the “2007 Plan”), and (iv) the 2008 Stock Option and Restricted Stock Plan (the “2008 Plan”). These Plans permit the grant of share options to its employees, non-employee directors and others for up to an aggregate total of 6,500,000 shares of common stock. The Company believes that such awards better align the interests of its employees with those of its shareholders. Option awards have been granted with an exercise price equal to the market price of the Company’s stock at the date of grant; those option awards generally vest based on the completion of continuous service and have 10-year contractual terms. These option awards provide for accelerated vesting if there is a change in control (as defined in the Plans).

On January 2, 2008, the Board of Directors approved the 2008 Plan, which reserved 1,000,000 shares to be granted under such Plan. In addition, the Board of Directors approved the grant of options to purchase 900,000 shares to executive officers and directors at an exercise price of \$6.80 per share subject to a graduated four-year vesting period. The 2008 Plan was approved by the shareholders at the 2008 Annual Meeting of Stockholders held in May 2008. The Company granted a total of 45,000 options outside of the 2008 Stock Option Plan during the nine months ended September 30, 2008. In July 2008, the Company registered all 6,500,000 shares of common stock that are issuable under its 2005 Plan, 2006 Plan, 2007 Plan and 2008 Plan.

In addition to the Stock Option and Restricted Stock Plans described above the Company has issued an aggregate of 430,000 stock options to non-employees for services rendered that are subject to the same general terms in the years before 2008.

The fair value of each option award is estimated on the date of grant using a Black-Scholes option valuation model. The assumptions used for the determining the grant-date fair value of options during each period and is reflected in the

following table:

13

Edgar Filing: DIGITAL ALLY INC - Form 10-Q

	Years ended December 31,			
	Nine months ended September 30, 2008	2007	2006	2005
Expected term of the options in years	2-6 years	3 years	3 years	3-10 years
Expected volatility of market price of Company stock	50% - 55%	42.17% - 61.49%	49.58% - 66.11%	39.41%
Expected dividends	None	None	None	None
Risk-free interest rate	2.37%-3.06%	4.07% - 4.92%	4.57% - 4.66%	2.78% - 4.19%
Expected forfeiture rate	5.00%	0.0% - 5.00%	0%	0%

A summary of stock options outstanding follows:

	For the Nine months Ended September 30, 2008	
	Shares	Weighted Average Exercise Price
Options		
Outstanding at beginning of period	5,728,767	\$ 1.63
Granted	945,000	6.89
Exercised	(1,250,567)	1.52
Surrendered/cancelled (cashless exercise)	(76,140)	1.17
Forfeited	(35,433)	1.70
Outstanding at end of period	5,311,627	\$ 2.61
Exercisable at end of the period	3,932,469	\$ 1.68
Weighted-average fair value for options granted during the period at fair value	945,000	\$ 4.03

During the nine months ended September 30, 2008, the Board of Directors approved an amendment to the Company's 2005 Plan, 2006 Plan, 2007 Plan and 2008 Plan that allows for cashless exercise of stock options. This provision allows the option holder to surrender/cancel options with an intrinsic value equivalent to the aggregate purchase/exercise price of other options exercised. During the nine months ended September 30, 2008, a total of 76,140 options with an intrinsic value of \$450,547 were surrendered and cancelled as consideration for the cashless exercise price of 356,200 shares issued upon the exercise of stock options.

At September 30, 2008, the aggregate intrinsic value of options outstanding was approximately \$22,617,717, the aggregate intrinsic value of options exercisable was approximately \$20,414,994, and the aggregate intrinsic value of options exercised during the period was \$8,676,733. At September 30, 2007, the aggregate intrinsic value of options outstanding was approximately \$10,372,080, the aggregate intrinsic value of options exercisable was approximately \$8,112,455, and the aggregate intrinsic value of options exercised during the period was \$90,000.

As of September 30, 2008, the unamortized portion of stock compensation expense on all existing stock options was \$3,074,618 and will be recognized over the next thirty-nine months.

The following table summarizes the range of exercise prices and weighted average remaining contractual life for outstanding and exercisable options under the Company's option plans as of September 30, 2008:

Exercise price range	Outstanding options		Exercisable options	
	Number	Weighted average remaining contractual life	Number	Weighted average remaining contractual life
\$1.00 to \$1.99	2,829,706	7.5 years	2,461,381	7.6 years

Edgar Filing: DIGITAL ALLY INC - Form 10-Q

\$2.00 to \$2.99	1,269,921	3.0 years	1,269,921	3.0 years
\$3.00 to \$3.99	—		—	—
\$4.00 to \$4.99	267,000	9.0 years	179,500	9.0 years
\$5.00 to \$5.99	—		—	—
\$6.00 to \$6.99	905,000	9.3 years	5,000	9.3 years
\$7.00 to \$7.99	—		—	—
\$8.00 to \$8.99	30,000	7.9 years	10,000	4.6 years
\$9.00 to \$9.99	10,000	4.8 years	6,667	4.8 years
	5,311,627	6.8 years	3,932,469	6.0 years

Edgar Filing: DIGITAL ALLY INC - Form 10-Q

As part of raising additional equity in 2005 and 2006, the Company agreed to provide further compensation to the placement agents in the form of warrants (the “Broker Warrants”) and also issued warrants to the investors in conjunction with their purchase of common stock in a private placement.

The following provides additional information related to the warrants issued:

	For the Nine months Ended September 30, 2008	
	Shares	Weighted Average Exercise Price
Warrants		
Outstanding at beginning of year	583,250	\$ 1.73
Granted	—	—
Exercised	(583,250)	1.73
Forfeited	—	—
Outstanding at end of the period	—	—
Exercisable at end of the period	—	—
Weighted average fair value of warrant grants during the period	—	—

At September 30, 2008, all warrants have been exercised and none remain outstanding. The aggregate intrinsic value of warrants exercised during the nine months ended September 30, 2008 was \$2,899,413. At September 30, 2007, the aggregate intrinsic value of the warrants outstanding was approximately \$409,113.

All shares of common stock issued under these warrants were registered in conjunction with a Registration Statement on Form SB-2, which was declared effective by the Securities and Exchange Commission on May 3, 2007 and expired on May 3, 2008.

NOTE 10. NET INCOME PER SHARE

The calculation of the weighted average number of shares outstanding and earnings per share outstanding and income per share for the nine months ended September 30, 2008 and 2007 are as follows:

	Three Months Ended		Nine months Ended	
	2008	2007	2008	2007
Numerator for basic and diluted income per share – Net income	\$ 881,509	\$ 2,973,562	\$ 3,970,576	\$ 3,500,000
Numerator for basic income per share – weighted average shares outstanding	15,736,559	13,963,820	15,181,662	13,600,000
Effect of shares issuable under stock options and warrants outstanding	1,898,018	2,806,398	2,443,699	1,500,000
Numerator for diluted income per share – adjusted weighted average shares outstanding	17,634,577	16,087,850	17,625,361	15,100,000
Income per share:				
	\$ 0.06	\$ 0.21	\$ 0.26	\$ 0.26
	\$ 0.05	\$ 0.18	\$ 0.23	\$ 0.23

Basic income per share is based upon the weighted average number of common shares outstanding during the three and nine months ended September 30, 2008, weighted-average outstanding stock options and warrants totaling 15,000 and 30,000 shares of common stock were antidilutive and, therefore, not included in the computation of diluted earnings per share for the three and nine months ended September 30, 2008, respectively. For the three and nine months ended September 30, 2007, a total of 379,750 of stock options and warrants was not included in the computation of diluted earnings per share because their effect was antidilutive for 2007.

NOTE 11. RELATED PARTY TRANSACTIONS

On September 1, 2004, the Company borrowed \$500,000 from a limited liability company controlled by one of the Company's shareholders. None of the members or managers of such shareholder is or was an employee, officer or director of the Company. The note carried interest at 7%, was due on May 15, 2007 and was convertible into 500,000 shares of common stock at the option of the holder. The note was guaranteed by one of the Company's previous officers and directors, who also pledged Company stock he owned as collateral. On May 15, 2007, the note holder exercised its option to convert the note into 500,000 shares of the Company's common stock. Interest expense related to this note totaled \$12,945 for the nine months ended September 30, 2007.

On September 25, 2006, the Company granted options to purchase 10,000 shares of its common stock to a law firm for services rendered. The options had a term of five years and are exercisable at \$2.15 per share. One of the Company's outside directors was also a partner in such law firm. During 2007, the law firm was dissolved and the options were returned to the Company for cancellation.

The Company sells primarily through a network of unaffiliated distributors/sales agents. An entity that served as an independent sales agent is owned by the spouse of one of the Company's executive officers. The Company paid commissions on sales generated by this sales agent aggregating \$52,789 and \$143,561 for the nine months ended September 30, 2008 and 2007, respectively. As of September 30, 2008 there were no accrued and unpaid commissions due to this entity. Subsequent to December 31, 2007, this entity was dissolved and no longer serves as an independent sales agent for the Company.

NOTE 12. RECENTLY ISSUED ACCOUNTING STANDARDS

In December 2007, the FASB issued FAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements-an amendment of ARB No. 51" ("FAS No. 160"). FAS No. 160 establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. FAS No. 160 is effective for the Company in its fiscal year beginning January 1, 2010. The Company does not believe this statement will have a material impact on its financial position and results of operations upon adoption.

In December 2007, the FASB issued FAS No. 141 R "Business Combinations" ("FAS No. 141R"). FAS No. 141R establishes principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree. FAS No. 141R also provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. FAS No. 141R is effective for the Company's fiscal year beginning January 1, 2009. The Company does not believe this statement will have a material impact on its financial position and results of operations upon adoption.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

As used in this Report, "Digital Ally," the "Company," "we," "us," or "our" refer to Digital Ally, Inc., unless otherwise indicated.

This Report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. The words “believe,” “expect,” “anticipate,” “intend,” “estimate,” “may,” “should,” “could,” “will,” “plan,” “future,” “continue,” and other expressions that are predictions of or indicate future events and trends and that do not relate to historical matters identify forward-looking statements. These forward-looking statements are based largely on our expectations or forecasts of future events, can be affected by inaccurate assumptions, and are subject to various business risks and known and unknown uncertainties, a number of which are beyond our control. Therefore, actual results could differ materially from the forward-looking statements contained in this document, and readers are cautioned not to place undue reliance on such forward-looking statements. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. A wide variety of factors could cause or contribute to such differences and could adversely impact revenues, profitability, cash flows and capital needs. There can be no assurance that the forward-looking statements contained in this document will, in fact, transpire or prove to be accurate.

Factors that could cause or contribute to our actual results differing materially from those discussed herein or for our stock price to be adversely affected include, but are not limited to: (i) our relatively short operating history; (ii) our ability to increase revenues and profits in 2008, including the achievement of approximately \$34 to \$38 million in revenues and operating margin of approximately 22% to 26% through greater market penetration within and outside of the United States and operating and other efficiencies and to otherwise manage our rapid business expansion; (iii) whether there will be a commercial market, domestically and internationally, for one or more of our new products; (iv) risks related to dealing with governmental entities as customers; (v) our lengthy sales cycle and the potential to receive no revenue in return for our marketing expenses; (vi) characterization of our market by new products and rapid technological change and our ability to adapt to the same; (vii) our dependence on sales of our in-car digital video rear view mirror (“DVM-500”); (viii) our ability to compete against other companies that have greater economic and human resources than we do; (ix) failure of digital video to yet be widely accepted as admissible scientific evidence in court; (x) defects in our products that could impair our ability to sell our products or could result in litigation and other significant costs; (xi) our

dependence on key personnel; (xii) our ability to attract and retain quality employees; (xiii) our reliance on third party distributors and representatives for our marketing capability; (xiv) our dependence on manufacturers and suppliers; (xv) our ability to protect our technology through patents and successfully defend patent infringement actions brought by third parties; (xvi) our ability to protect our proprietary technology and information as trade secrets and through other similar means; (xvii) risks related to our license arrangements; (xviii) our revenues and operating results may fluctuate unexpectedly from quarter to quarter; (xix) sufficient voting power by coalitions of a few of our larger stockholders to make corporate governance decisions that could have significant effect on us and the other stockholders; (xx) sale of substantial amounts of our common stock that may have a depressive effect on the market price of the outstanding shares of our common stock; (xxi) possible issuance of common stock subject to options and warrants that may dilute the interest of stockholders; (xxii) our ability to comply with Section 404 of the Sarbanes-Oxley Act of 2002 in 2008; (xxiii) our nonpayment of dividends and lack of plans to pay dividends in the future; (xxiv) future sale of a substantial number of shares of our common stock that could depress the trading price of our common stock, lower our value and make it more difficult for us to raise capital; (xxv) our additional securities available for issuance, which, if issued, could adversely affect the rights of the holders of our common stock; (xxvi) our stock price which is likely to be highly volatile because of several factors, including a relatively limited public float; and (xxvii) indemnification of our officers and directors. See our annual report on Form 10-KSB for the year ended December 31, 2007 filed with the Securities and Exchange Commission (“SEC”) for additional information on these and other risks.

Recent Developments for the Company

Overview

We produce digital video imaging, audio recording and related storage products for use in law enforcement and security applications. Our current products are a low cost, easy-to-install, in-car digital video rear view mirror and a digital video flashlight, each of which uses the core competency of our technology in digital video compression, recording and storage. These products make self-contained video and audio recordings onto flash memory cards that are incorporated into the body of the digital video rear view mirror and the flashlight. We sell our products to law enforcement agencies and other security organizations and for consumer and commercial applications through direct sales and third-party distributors.

We intend to produce and sell other digital video devices in the future. Our products incorporate our standards-based digital compression capability that allows the recording of significant time periods on a chip and circuit board designed for small form products.

Since our inception in 2003 through the second quarter of 2006, we had been considered a development stage company, with our activities focused on organizational activities, including design and development of product lines, implementation of a business plan, establishment of sales channels, and development of business strategies. In late March 2006, we sold and shipped our first completed product, thereby becoming an operating company.

We became a reporting company under the Securities Exchange Act of 1934, as amended, on May 3, 2007. Our common stock commenced trading on the NASDAQ Capital Market under the symbol DGLY on January 2, 2008.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet debt nor did we have any transactions, arrangements, obligations (including contingent obligations) or other relationships with any unconsolidated entities or other persons that may have material current or future effect on financial conditions, changes in the financial conditions, results of operations, liquidity, capital expenditures, capital resources, or significant components of revenue or expenses. We are a party to operating leases and license agreements that represent commitments for future payments (described in Note 8 to the condensed financial statements). In addition, we have issued purchase orders in the ordinary course of business that represent

commitments to future payments for goods and services.

For the Three Months Ended September 30, 2008 and 2007

Results of Operations

Summarized immediately below and discussed in more detail in the subsequent sub-sections is an analysis of our operating results for the three months ended September 30, 2008 and 2007 represented as a percentage of total revenues for each respective period:

17

	Three Months Ended September 30,	
	2008	2007
Revenue	100%	100%
Cost of revenue	39%	35%
Gross profit	61%	65%
Operating expenses	45%	49%
Operating income	16%	16%
Financial income (expense)	—%	—%
Income before income tax provision	16%	16%
Income tax (provision) benefit	(6%)	42%
Net income	10%	58%
Net income per share information:		
Basic	\$ 0.06	\$ 0.21
Diluted	\$ 0.05	\$ 0.18

Revenue

Sales for the three months ended September 30, 2008 and 2007 were \$8,451,270 and \$5,100,525, respectively, an increase of \$3,350,745 (66%), due to increased market penetration and significant growth in international orders. Many of our existing customers are making follow-on orders with larger quantities and we have enjoyed growth in orders from international customers. Our international sales were \$3,183,182 for the three months ended September 30, 2008, representing an increase of \$2,934,362 (1,179%), compared to \$248,820 for the three months ended September 30, 2007. Furthermore, we are converting a high percentage of opportunities with new customers to our product. We are experiencing slow but continued growth in the sales of our digital video flashlight product during 2008. We expect that our full year 2008 revenue will approximate \$34 to \$38 million due to continued market penetration on a domestic and international basis.

Cost of Revenue

Cost of sales on units sold for the three months ended September 30, 2008 and 2007 were \$3,283,446 and \$1,789,765, respectively, an increase of \$1,493,681 (83%). The significant increase is due to the large increase in units sold, as well as an increase in our reserve for slow moving and obsolete inventory of \$88,240 during the three months ended September 30, 2008. We believe such reserves are appropriate given the rapid growth in revenues we have experienced, as well as increases in inventory levels.

Gross Margin

Gross margin for the three months ended September 30, 2008 and 2007 was \$5,167,824 and \$3,310,760, respectively, an increase of \$1,857,064 (56%). The significant increase is commensurate with the growth in revenues (66%) we have experienced during 2008 compared to 2007. The gross margin percentages were 61% and 65%, respectively, for the three months ended September 30, 2008 and 2007. The slight decrease in margin was attributable to the fact that 38% of total revenues during the three months ended September 30, 2008 were comprised of international sales compared to 5% during the three months ended September 30, 2007. International sales are generally made through international distributors at discounted prices yielding lower gross margins compared to sales to domestic customers. The international distributor typically marks up the product to the end customer and retains the retail margin. However, lower gross margins on international shipments are partially offset by lower operating expenses because we benefit from reduced commissions paid to sales agents on such international sales compared to domestic sales. We believe that we have continued to improve productivity and efficiencies over 2007 as we have significantly increased production rates and made improvements in our component costs related to our supply chain. We primarily order finished component parts, including electronics boards, chips and camera parts, from outside suppliers. Our

internal work consists of assembly, testing and burn-in of the finished units. If our revenue and production rates continue to increase as we anticipate, we expect to be able to improve our gross margins over 2007 by reducing our component and supply chain costs by ordering in larger quantities at better prices and by implementing further efficiencies in our production/assembly processes. We have not experienced significant retail pricing pressures from our domestic customers during 2008. Competition for larger contracts and larger customers may cause us to provide some pricing discounts to such customers for our product during 2008. We believe that we will continue to experience growth in our international orders and compete for larger customers under competitive bids during 2008 that may offset some of the expected efficiencies in our cost of product sold.

Operating Expenses

Operating expenses were \$3,798,436 and \$2,496,197 for the three months ended September 30, 2008 and 2007, respectively, an increase of \$1,302,239 (52%). Overall operating expenses as a percentage of sales declined to 45% in 2008 compared to 49% in 2007. A summary of the significant components of operating expenses are as follows:

	Three Months Ended	
	September 30, 2008	September 30, 2007
Research and development expenses	\$ 785,428	\$ 631,067
Stock-based compensation	531,947	385,756
Sales commissions	742,587	407,706
Professional fees and expenses	237,191	102,587
General and administrative salaries	558,630	537,337
Other	942,653	431,744
Total	\$ 3,798,436	\$ 2,496,197

Research and Development Expenses. We continue to focus on bringing new products and updates/revisions to current products to market with these expenses totaling \$785,428 and \$631,067 for the three months ended September 30, 2008 and 2007, respectively, an increase of \$154,361 (24%). The increase in 2008 was attributable to our continued efforts to develop new products and line extensions for our current products that we plan to bring to market during 2008 and 2009, as well as additional internal staff additions related to the same activities. Research and development expenses as a percentage of total revenues have been 9% in 2008 and 12% in 2007. We have active research and development projects on several new products designed for the school bus, mass transit, taxi cab and other markets, as well as upgrades to our existing product lines. In addition, we have been and are currently attempting to hire additional engineers to focus on these development projects. Therefore, we believe that such expense will continue to increase during 2008, although we expect that such expense as a percentage of total revenues will likely remain steady or decline as our revenues increase. We consider our research and development capabilities and new product focus to be a competitive advantage and will continue to invest in this area.

Stock based Compensation Expenses. Stock based compensation expenses totaled \$531,947 and \$385,756 for the three months ended September 30, 2008 and 2007, respectively, an increase of \$146,191 (38%). The increase in 2008 was primarily attributable to the timing of shareholder approval of the 2008 Stock Option and Restricted Stock Plan (the "2008 Plan") offset by the higher number of options issued in 2007 which had shorter vesting periods.

On January 2, 2008, our Board of Directors approved the 2008 Plan, which reserved 1,000,000 shares to be granted under it. In addition, the Board of Directors approved the grant of options to purchase 900,000 shares to executive officers and directors at an exercise price of \$6.80 per share, subject to a graduated four-year vesting period and to approval of the 2008 Plan by the shareholders. The 2008 Plan was approved by the shareholders at the 2008 Annual Meeting of Stockholders which was held on May 1, 2008. No expense related to the 2008 Plan was recorded prior to approval by the shareholders. As a result of the ratification by shareholders, we began amortization of stock compensation related to the 2008 Plan during the three months ended June 30, 2008. We expect that total stock compensation expense for the full year 2008 to be similar to 2007.

Sales Commissions. Sales commissions totaled \$742,587 and \$407,706 for the three months ended September 30, 2008 and 2007, respectively, an increase of \$334,881 (82%). The increase in 2008 was commensurate with the 66% increase in revenue experienced during the three months ended September 30, 2008 compared to 2007. Sales commissions as a percentage of total revenues were 9% during the three months ended September 30, 2008, a slight increase from the 8% experienced in 2007.

Professional fees and expenses. Professional fees and expenses totaled \$237,191 and \$102,587 for the three months ended September 30, 2008 and 2007, respectively, an increase of \$134,604 (131%). Professional fees and expenses, which primarily include legal and accounting expenses, increased because of our increased needs after becoming a public reporting company in May 2007. In addition, we incurred substantial legal expenses related to the L-3 Communications Mobile-Vision, Inc. and Dehuff litigation during the three months ended September 30, 2008. The L-3 Communications Mobile-Vision, Inc. litigation has been settled; however, the Dehuff litigation is still pending.

General and Administrative Salaries. General and administrative salaries totaled \$558,630 and \$537,337 for the three months ended September 30, 2008 and 2007, respectively, an increase of \$21,293 (4%). The increase in 2008 was substantially less than the 63% increase in revenue experienced during the three months ended September 30, 2008 compared to 2007. We have added administrative personnel during early 2008 in order to build the proper infrastructure for our current and planned growth in overall business activities during 2008 and beyond, but only added two administrative personnel during the three months ended September 30, 2008. General and administrative salaries as a percentage of total revenues declined to 7% during the three months ended September 30, 2008 compared to 11% during 2007.

Other Operating Expenses. Other operating expenses totaled \$942,653 and \$431,744 for the three months ended September 30, 2008 and 2007, respectively, an increase of \$510,909 (118%). The increase in 2008 was commensurate with the 66% increase in revenue experienced during the three months ended September 30, 2008 compared to 2007. In order to support our significant increase in revenue, we incurred greater facility-related expenses, depreciation, general and administrative, and travel during 2008. During late 2007, we combined our corporate offices with our sales and marketing offices into one facility. The Company has incurred increased travel costs for our executives to attend investor conferences and to meet with potential institutional investors during the three months ended September 30, 2008, which did not occur in 2007. Other operating expenses as a percentage of total revenues were 11% during the three months ended September 30, 2008 compared to 9% during 2007.

Operating Income

For the reasons previously stated, our operating income was \$1,369,388 for the three months ended September 30, 2008, an improvement of \$554,825 (66%) compared to our operating income of \$814,563 during the three months ended September 30, 2007. Operating income as a percentage of revenues, or operating margins, remained constant at 17% in 2008 compared to 2007. We believe that operating income will continue to grow in 2008 if revenues and gross margins increase as we expect and that our operating margins should approximate 22% - 26% for 2008.

Financial Income (Expense)

Financial income (expense) improved to \$22,221 in 2008 from \$5,856 in 2007. Financial income (expense) is primarily composed of interest income and expense. Changes in these items are described as follows:

Interest Income. We earned interest income of \$22,221 and \$6,445 during the three months ended September 30, 2008 and 2007, respectively, an increase of \$15,776 (245%). The increase in interest income was a result of our accumulation of cash and cash equivalents during the fourth quarter of 2007 and first nine months of 2008, which resulted in higher levels of interest-earning cash balances during the three months ended September 30, 2008 compared to 2007.

Interest Expense. Interest expense was \$-0- and \$589 for the three months ended September 30, 2008 and 2007, respectively, a decrease of \$589. With improved cash flow from business growth, we paid off our line of credit during early 2007 and the holder of a \$500,000 convertible promissory note exercised its right to exchange such promissory note for 500,000 shares of common stock during May 2007. We had no interest bearing debt outstanding as of September 30, 2008.

Income Before Income Tax Provision

As a result of the above, we reported income before income tax provision of \$1,391,609 and \$820,419 for the three months ended September 30, 2008 and 2007, respectively, an improvement of \$571,190 (68%).

Income Tax Provision

Income tax provision was \$518,000 for the three months ended September 30, 2008, with a tax benefit of \$2,153,143 reported in 2007. We reduced the deferred tax valuation allowance related to net operating loss carryforwards during the third quarter of 2007, which resulted in the substantial income tax benefit reported for the quarter. This reduction in the deferred tax valuation allowance was recorded due to the anticipated usage of the remaining net operating loss carryforward based upon our projected profitability and the reversal of other deferred tax assets. Prior to the third quarter of 2007, we recorded a 100% valuation allowance offsetting this tax benefit from prior net operating loss carryforwards and timing differences due to uncertainty regarding our likelihood of realizing a material portion of the benefit.

During the three months ended September 30, 2008, we recorded a provision for income taxes at an effective tax rate of 37%. This effective tax rate is consistent with the annual rate anticipated for 2008.

Net Income

As a result of the above, for the three months ended September 30, 2008 and 2007, we reported net income of \$873,609 and \$2,973,562, respectively, a decrease of \$2,099,953 (71%). The decrease is directly the result of the substantial income tax benefit of \$2,153,143 recorded in 2007 which did not reoccur in 2008.

Basic and Diluted Income per Share

The basic income per share was \$0.06 and \$0.21 for the three months ended September 30, 2008 and 2007, respectively, for the reasons previously noted. The diluted income per share was \$0.05 and \$0.18, respectively, for the same periods. The difference between basic and dilutive income per share is attributable to the dilutive effect of shares issuable under stock options and warrants.

For the Nine months Ended September 30, 2008 and 2007

Results of Operations

Summarized immediately below and discussed in more detail in the subsequent sub-sections is an analysis of our operating results for the nine months ended September 30, 2008 and 2007 represented as a percentage of total revenues for each respective period:

20

	Nine Months Ended September 30,	
	2008	2007
Revenue	100%	100%
Cost of revenue	38%	38%
Gross profit	62%	62%
Operating expenses	38%	51%
Operating income	24%	11%
Financial income (expense)	—%	—%
Income before income tax provision	24%	11%
Income tax provision	(9%)	18%
Net income	15%	29%
Net income per share information:		
Basic	\$ 0.26	\$ 0.26
Diluted	\$ 0.22	\$ 0.23

Revenue

Sales for the nine months ended September 30, 2008 and 2007 were \$25,940,996 and \$12,359,594, respectively, an increase of \$13,581,402 (110%), due to increased market penetration, especially in the international market. Many of our existing domestic customers are making follow-on orders with larger quantities. Furthermore, we are converting a high percentage of opportunities with new customers to our product. Our international sales were \$7,941,114 for the nine months ended September 30, 2008, representing an increase of \$7,538,743 (1,874%), compared to \$402,371 for the nine months ended September 30, 2007. We are experiencing slow but continued growth in the sales of our digital video flashlight product during 2008. We expect that our 2008 revenue will approximate \$34 to \$38 million due to continued market penetration on a domestic and international basis.

Cost of Revenue

Cost of sales on units sold for the nine months ended September 30, 2008 and 2007 were \$9,914,682 and \$4,685,163, respectively, an increase of \$5,229,519 (112%). The significant increase is due to the large increase in units sold, as well as an increase in our reserve for slow moving and obsolete inventory of \$175,575 during the nine months ended September 30, 2008. We believe such reserves are appropriate given the rapid growth in revenues we have experienced, as well as increases in inventory levels.

Gross Margin

Gross margin for the nine months ended September 30, 2008 and 2007 was \$16,026,314 and \$7,674,431, respectively, an increase of \$8,351,883 (109%). The significant increase is commensurate with the 110% growth in revenues we have experienced during 2008 compared to 2007. The gross margin percentage remained constant at 62% for the nine months ended September 30, 2008 and 2007. We believe the gross margin of 62% is indicative of improved margins in 2008 because of the significant percentage of international sales during 2008 compared to 2007. International sales generally yield less gross margins compared to domestic sales. The improved margin is attributable to improved productivity and efficiencies as we have significantly increased production rates during 2008 and improved costs related to our supply chain. We primarily order finished component parts, including electronics boards, chips and camera parts, from outside suppliers. Our internal work consists of assembly, testing and burn-in of the finished units. If our revenue and production rates continue to increase as we anticipate, we expect to be able to improve our gross margins by reducing our component and supply chain costs by ordering in larger quantities at better prices and by implementing further efficiencies in our production processes. We have not experienced significant retail pricing pressures from our domestic customers during 2008. Our international sales have tended to be priced at discounted rates yielding lower gross margins because we are not required to provide certain follow-on technical

support. However, lower gross margins on international shipments are partially offset by lower operating expenses because we benefit from reduced commissions paid to sales agents on such international sales compared to domestic sales. Competition for larger contracts and larger customers may cause us to provide some pricing discounts to such customers for our product during 2008. We believe that we will experience growth in our international orders and compete for larger customers under competitive bids during 2008 that may offset some of the expected efficiencies in our cost of product sold.

Operating Expenses

Operating expenses were \$9,882,156 and \$6,275,917 for the nine months ended September 30, 2008 and 2007, respectively, an increase of \$3,606,239 (55%). Overall operating expenses as a percentage of sales declined from 51% during the nine months ended September 30, 2007 to 38% in 2008. A summary of the components of operating expenses are as follows:

21

	Nine Months Ended	
	September 30, 2008	September 30, 2007
Research and development expenses	\$ 1,893,318	\$ 1,061,673
Stock-based compensation	1,106,258	1,294,277
Sales commissions	2,162,680	1,026,216
Professional fees and expenses	720,464	457,812
General and administrative salaries	1,594,819	1,256,723
Other	2,404,617	1,179,216
Total	\$ 9,882,156	\$ 6,275,917

Research and Development Expenses. We continue to focus on bringing new products and updates/revisions to current products to market with these expenses totaling \$1,893,318 and \$1,061,673 for the nine months ended September 30, 2008 and 2007, respectively, an increase of \$831,645 (78%). The increase in 2008 was attributable to our continued efforts to develop new products and line extensions for our current products that we plan to bring to market during 2008 and 2009, as well as additional internal staff additions related to the same activities. Research and development expenses as a percentage of total revenues have been 7% in 2008 and 9% in 2007. We have active research and development projects on several new products designed for the school bus, mass transit, taxi cab and other markets, as well as upgrades to our existing product lines. In addition, we have been and are currently attempting to hire additional engineers to focus on these development projects. Therefore, we believe that such expense will continue to increase during 2008, although we expect that such expense as a percentage of total revenues will likely remain steady or decline as our revenues increase. We consider our research and development capabilities and new product focus to be a competitive advantage and will continue to invest in this area.

Stock based Compensation Expenses. Stock based compensation expenses totaled \$1,106,258 and \$1,294,277 for the nine months ended September 30, 2008 and 2007, respectively, a decrease of \$188,019 (15%). The decrease in 2008 was primarily attributable to the timing of shareholder approval of the 2008 Plan and the four-year graduated vesting on the 2008 awards under the 2008 Plan. In 2007, the majority of the 2007 option plan awards was subject to an eighteen-month vesting period.

On January 2, 2008, our Board of Directors approved the 2008 Plan, which reserved 1,000,000 shares to be granted under such plan. In addition, the Board of Directors approved the grant of options to purchase 900,000 shares to executive officers and directors at an exercise price of \$6.80 per share, subject to a graduated four-year vesting period and to the approval of the Plan by the shareholders. The 2008 Plan was approved by the shareholders at the 2008 Annual Meeting of Stockholders, which was held on May 1, 2008. No expense related to the 2008 Plan was recorded prior to ratification by the shareholders. As a result of the approval by shareholders, we began amortization of stock compensation related to the 2008 Plan during the three months ended September 30, 2008. We expect that total stock compensation expense for the full year 2008 to be similar to 2007.

Sales Commissions. Sales commissions totaled \$2,162,680 and \$1,026,216 for the nine months ended September 30, 2008 and 2007, respectively, an increase of \$1,136,464 (111%). The increase in 2008 was commensurate with the 110% increase in revenue experienced during the nine months ended September 30, 2008 compared to 2007. Sales commissions as a percentage of total revenues remained constant at 8% during the nine months ended September 30, 2008 compared to 2007.

Professional fees and expenses. Professional fees and expenses totaled \$720,464 and \$457,812 for the nine months ended September 30, 2008 and 2007, respectively, an increase of \$262,652 (57%). Professional fees and expenses, which primarily include legal and accounting expenses, increased because of our increased needs after becoming a public reporting company in May 2007. In addition, we incurred substantial legal expenses related to the L-3 Communications Mobile-Vision, Inc. and Dehuff litigation during the nine months ended September 30, 2008. The L-3 Communications Mobile-Vision, Inc. litigation has been settled; however, the Dehuff litigation is still pending.

We also held our 2008 Annual Shareholders Meeting on May 1, 2008, which also contributed to the increased professional fees and expenses for the nine months ended September 30, 2008 compared to 2007, when no stockholders' meeting was held.

General and Administrative Salaries. General and administrative salaries totaled \$1,594,819 and \$1,256,723 for the nine months ended September 30, 2008 and 2007, respectively, an increase of \$338,096 (27%). The increase in 2008 was substantially less than the 110% increase in revenue experienced during the nine months ended September 30, 2008 compared to 2007. We have added administrative personnel in order to build the proper infrastructure for our current and planned growth in overall business activities. General and administrative salaries as a percentage of total revenues declined to 6% during the nine months ended September 30, 2008 compared to 10% during 2007.

Other Operating Expenses. Other operating expenses totaled \$2,404,617 and \$1,179,216 for the nine months ended September 30, 2008 and 2007, respectively, an increase of \$1,225,401 (104%). The increase in 2008 was commensurate with the 110% increase in revenue experienced during the nine months ended September 30, 2008 compared to 2007. In order to support our significant increase in revenue, we incurred greater facility-related expenses, depreciation, general and administrative, and travel during 2008. The Company has incurred increased travel costs for our executives to attend investor conferences and to meet with potential institutional investors during the three months ended September 30, 2008 which did not occur in 2007. During late 2007, we combined our corporate offices with our sales and marketing offices into one facility. Other operating expenses as a percentage of total revenues declined to 9% during the nine months ended September 30, 2008 compared to 10% during 2007.

Operating Income

For the reasons previously stated, our operating income was \$6,144,158 for the nine months ended September 30, 2008, an improvement of \$4,745,644 (340%), compared to our operating income of \$1,398,514 during the nine months ended September 30, 2007. Operating income as a percentage of revenues, or operating margins, improved to 24% in 2008 compared to 11% in 2007. We believe that operating income will continue to grow in 2008 if revenues and gross margins increase as we expect and that our operating margins should approximate 22% - 26% in 2008.

Financial Income (Expense)

Financial income (expense) improved to \$71,518 in 2008 from (\$12,073) in 2007. Financial income (expense) is primarily composed of interest income and expense. Changes in these items are described as follows:

Interest Income. We earned interest income of \$71,518 and \$15,630 during the nine months ended September 30, 2008 and 2007, respectively, an increase of \$55,888 (358%). The increase in interest income was a result of our accumulation of cash and cash equivalents during the fourth quarter of 2007 and first nine months of 2008, which resulted in higher levels of interest-earning cash balances during the nine months ended September 30, 2008 compared to 2007.

Interest Expense. Interest expense was \$-0- and \$27,703 for the nine months ended September 30, 2008 and 2007, respectively, a decrease of \$27,703. With improved cash flow from business growth, we paid off our line of credit during early 2007 and the holder of a \$500,000 convertible promissory note exercised its right to convert the promissory note into 500,000 shares of common stock in May 2007. We had no interest bearing debt outstanding as of September 30, 2008.

Income Before Income Tax Provision

As a result of the above, we reported income before income tax provision of \$6,215,676 and \$1,386,441 for the nine months ended September 30, 2008 and 2007, respectively, an improvement of \$4,829,235 (348%).

Income Tax Provision

Income tax provision was \$2,253,000 for the nine months ended September 30, 2008, as compared to a tax benefit of \$2,153,143 reported in 2007. We reduced the deferred tax valuation allowance related to net operating loss carryforwards during the third quarter of 2007, which resulted in the substantial income tax benefit reported for the quarter. This reduction in the deferred tax valuation allowance was recorded due to the anticipated usage of the remaining net operating loss carryforward based upon our projected profitability and the reversal of other deferred tax assets. Prior to the third quarter of 2007, we recorded a 100% valuation allowance offsetting this tax benefit from prior net operating loss carryforwards and timing differences due to uncertainty regarding our likelihood of realizing a material portion of the benefit.

During the nine months ended September 30, 2008, we recorded a provision for income taxes at an effective tax rate of 36%. This effective tax rate is consistent with the annual rate anticipated for 2008.

Net Income

As a result of the above, for the nine months ended September 30, 2008 and 2007, we reported net income of \$3,962,676 and \$3,539,584, respectively, an improvement of \$423,092 (12%).

Basic and Diluted Income per Share The basic income per share was \$0.26 for the nine months ended September 30, 2008 and 2007. The diluted income per share was \$0.22 for the same periods. The difference between basic and

dilutive income per share is attributable to the dilutive effect of shares issuable under stock options and warrants.

Liquidity and Capital Resources

Overall: We have historically provided for our cash requirements through private placements of our common stock. In 2005, we raised a net of \$4.1 million from the sale of our common stock and during the third quarter of 2006, we completed a private placement of our common stock and common stock purchase warrants, which raised a net of \$1.6 million. During March 2006, we began shipment of our products and commenced the generation of revenue and operating cash flows to help support our activities. During the fourth quarter of 2006, we established a \$500,000 revolving line of credit with a bank which we utilized to support our activities. In April 2007, we paid off the line of credit in full, and the bank expanded our line of credit to \$1.5 million. We have not had any borrowings outstanding under the line of credit since April 2007. The holder of a \$500,000 note payable exercised its right to convert the note to 500,000 shares of common stock, which was completed during the second quarter of 2007. As of September 30, 2008, we had working capital of \$14,417,919 and we had no long-term or short-term debt outstanding.

Cash and cash equivalents balances: As of September 30, 2008, we had cash and cash equivalents with an aggregate balance of \$3,217,070, a decrease from a balance of \$4,255,039 at December 31, 2007. Summarized immediately below and discussed in more detail in the subsequent sub-sections are the main elements of the \$1,037,969 net decrease in cash during the nine months ended September 30, 2008:

- **Operating activities:** \$2,951,153 of net cash used in operating activities, primarily from a substantial increase in accounts receivable and inventories offset by positive cash provided by net income, increase in accounts payable and accrued expenses together with non-cash charges such as stock based compensation expense and depreciation.
- **Investing activities:** \$1,182,435 of net cash used in investing activities, primarily to acquire equipment to expand our research and development and production capabilities.
- **Financing activities:** \$3,095,619 of net cash provided by financing activities, primarily from proceeds and excess tax benefits related to stock option and warrants exercised offset by the repurchase of our common stock under our 2008 Common Stock Repurchase Program (the "Stock Repurchase Program").

Operating activities: Net cash used in operating activities was \$2,951,153 for the nine months ended September 30, 2008 compared to net cash provided by operating activities of \$848,294 for the nine months ended September 30, 2007. Cash flows from operating activities were impacted significantly by the \$5,371,199 increase in accounts receivable during 2008. The accounts receivable balance at December 31, 2007 was abnormally low because of the \$5,100,000 international order shipped in December 2007, which was paid in advance of shipment. During the nine months ended September 30, 2008, accounts receivable returned to more normal levels, which resulted in negative cash flows from operations. In addition, cash flows were negatively impacted by our \$3,991,078 increase in inventory levels, which is the result of our planned increase in production rates to meet expected demand during the fourth of 2008. In addition, we are building inventory for the introduction of our new products during late 2008 and early 2009. Other items affecting cash flows during the nine months ended September 30, 2008 were increases in accounts payable, accrued expenses offset by a reduction in customer deposits, which is attributable to the higher level of sales and general activities during 2008.

Investing activities: Cash used in investing activities was \$1,182,435 and \$371,159 for the nine months ended September 30, 2008 and 2007, respectively. In both 2008 and 2007, we purchased production, research, development, test equipment, office furniture, fixtures and equipment to support our activities. In addition, during 2008 we incurred legal costs related to our filing for patent protection in countries outside of the United States in anticipation of our international growth. These patent expenditures have been capitalized as intangible assets.

Financing activities: During the nine months ended September 30, 2008, net cash provided by financing activities was \$3,095,619. This was due to the proceeds and related excess tax benefits from the exercise of stock options and warrants during 2008. We expended \$1,624,353 to acquire 210,360 treasury shares during 2008 pursuant to the Stock Repurchase Program approved by our Board of Directors that authorized the repurchase of up to \$10 million of company stock over a two-year period.

The net result of these activities was a decrease in cash of \$1,037,969 to \$3,217,070 for the nine months ended September 30, 2008 compared to an increase in cash of \$142,135 to \$199,295 for the nine months ended September 30, 2007.

Commitments: We had no material commitments for capital expenditures as of September 30, 2008. In addition, we had a revolving line of credit providing for maximum borrowings of \$1,500,000 available as of September 30, 2008. We believe we have adequate cash balances and available borrowings under our line of credit to support our

anticipated cash needs and related business activities during 2008.

During September 2008, the Board of Directors approved the Stock Repurchase Program that authorizes the repurchase of up to \$10 million of the Company's common stock in the open market, or in privately negotiated transactions, through July 1, 2010. The repurchases, if and when made, will be subject to market conditions, applicable rules of the Securities and Exchange Commission and other factors. Purchases may be commenced, suspended or discontinued at any time. A total of 210,360 shares have been repurchased under this program as of September 30, 2008 at a total cost of \$1,624,353 (\$7.72 per share average). We used cash available to make such purchases. In the future we plan to use available cash and cash equivalent balances together with cash generated by future operations to fund the purchase of the shares. Management believes that the prudent repurchase of our common stock from time-to-time represents an efficient way to improve shareholder value as compared to the current 1.0% - 1.5% interest earned on our cash balances and will not inhibit our ability to fund current and anticipated future product line expansions.

Critical Accounting Estimates

Certain accounting estimates used in the preparation of our financial statements require us to make judgments and estimates and the financial results we report may vary depending on how we make these judgments and estimates. Our critical accounting estimates are set forth below and have not changed during the nine months ended September 30, 2008.

Revenue Recognition/Allowance for Doubtful Accounts

Nature of estimates required. The allowance for doubtful accounts represents our estimate of uncollectible accounts receivable at the balance sheet date. We monitor our credit exposure on a regular basis and assess the adequacy of our allowance for doubtful accounts on a quarterly basis.

Assumptions and approach used. We estimate our required allowance for doubtful accounts using the following key assumptions:

- Historical collections – Represented as the amount of historical uncollectible accounts as a percent of total accounts receivable.
- Specific credit exposure on certain accounts – Identified based on management’s review of the accounts receivable portfolio and taking into account the financial condition of customers that management may deem to be higher risk of collection.

Sensitivity Analysis. We have considered the need for an allowance for doubtful accounts. With continued monitoring we determined the need to establish an allowance was necessary given our rapid growth. Even though we do not anticipate bad debt losses based on our excellent customer payment history, we have established a reserve and will monitor it regularly.

Inventories

Nature of estimates required. In our second year of production, we have carried large quantities of component inventory in order to meet our customers’ demands. This inventory consisted of electronic circuitry, boards and camera parts. Given the nature of potential obsolescence in this ever-changing environment, there is a risk of impairment in inventory that is unsalable, non-refundable, slow moving or obsolete. The use of estimates is required in determining the salvage value of this inventory.

Assumptions and approach used. We estimate our inventory obsolescence reserve at each balance sheet date based on the following assumptions:

- Slow moving products – Items identified as slow moving are evaluated on a case by case basis for impairment.
- Obsolete/discontinued inventory – Products identified that are near or beyond their expiration, or new models are now available. Should this occur, we estimate the market value of this inventory as if it were to be liquidated.
- Estimated salvage value/sales price – Salvage value is estimated using management’s evaluation of remaining value of this inventory and the ability to liquidate this inventory.

Sensitivity analysis. At this point in our products’ early life cycles, coupled with prudent levels of purchasing activity to support the growing demands for our products, we have developed a methodology to determine slow moving or obsolete inventory. We will continue to assess the condition of our inventory and take necessary measures to adjust these values as deemed appropriate.

Warranties

Nature of estimate required. In the second year of sales and as the volume of our sales continues to increase at a rapid pace, we have established a warranty accrual for future warranty costs related to current sales. We monitor our warranty costs on a regular basis and assess the adequacy of our warranty accrued on a quarterly basis.

Assumptions and approach used. We estimate our required accrual for warranty costs using the following key assumptions:

- Historical costs - Represented as the amount of historical warranty costs as a percent of sales.

Specific exposure on certain products or customers - Identified by management's review of warranty costs and customer responses.

Sensitivity analysis. Previously, we did not consider the need for a warranty accrual based upon actual warranty costs due to the limited amount of sales. As sales volume has continued to grow at a rapid pace, there is a greater risk for increased warranty costs. We will continue to assess the warranty accrual on a quarterly basis and take the necessary measures to adjust the accrual as deemed appropriate.

Research and Development Costs

Nature of estimates required. We expense all research and development costs as incurred. We incurred substantial costs related to research and development as we prepared our products for market, and will continue to incur these costs as we develop new products and enhance our existing products.

Assumptions and approach used. As we moved to production, many of these costs shifted to expenses related to the production of this product (cost of sales), thus reducing our research and development expense. However, we continue to provide support to the development of enhancements to our existing products, as well as to invest resources in the development of new products.

Sensitivity analysis. We continually evaluate our efforts in new product development so that we properly classify costs to either production of existing product or research and development costs related to bringing new and enhanced products to market.

Stock Based Compensation

Nature of estimates required. The estimates and assumptions pertaining to stock based compensation pertain to the Black-Scholes valuation model, and are noted above under Critical Accounting Policies.

Assumption and approach used. For our stock option plans, the assumptions for term, volatility, interest rate and forfeitures have all been addressed specifically to the particulars of each option plan in calculating the associated expense.

The expected term of each plan has been projected based on the estimated term (expected time to exercise said options) in relation to the vesting period and expiration of the options. The expected volatility of award grants is properly measured using historical stock prices over the expected term of the award. The risk-free interest rate used is in relation to the expected term of awards. Finally, forfeitures are based on the history of cancellation of awards granted.

Sensitivity analysis. We will continually monitor costs related to stock based compensation, and adjust analyses for changes in estimates and assumptions, such as: shifts in expected term caused by shifts in the exercising of options; expected volatility shifts caused by changes in our historical stock prices; interest rate shifts in relation to expected term of awards; and, shifts in forfeitures as we experience potential cancellations of awards caused by loss of personnel holding such awards.

The common stock purchase warrants issued to investors in our 2006 private placement are not accounted for under SFAS No. 150 "Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity" because the warrant agreements contain no provision for us to use any of our cash or other assets to settle the warrants. The stock warrants are not considered derivatives under SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" (SFAS No. 133) as the warrant agreements meet the scope exception in paragraph 11.a. of SFAS No. 133 as the stock warrants are indexed to our common stock and are classified in stockholder's equity under Emerging Issues Task Force (EITF) 00-19, "Accounting Recognition for Certain Transactions Involving Equity Instruments Granted to Other Than Employees." The stock warrants are included with the proceeds from the issuance of common stock. Warrants issued to non-employees who are not investors purchasing common stock are accounted for under SFAS No. 123. The fair value is determined using the Black-Scholes pricing model and that amount is recognized in the statement of operations.

Income Taxes

Nature of estimates required. We have substantial net operating loss carryforwards and other deferred tax items for which deferred tax assets are recognized for financial accounting and reporting purposes. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Management must consider the likelihood that such deferred tax assets will be realized based on our current and projected future operating results.

Assumptions and approach used. Historically, management has provided a 100% valuation allowance against all deferred tax assets because of our history of operating losses and unproven marketability and profitability of our products. During 2006 we began shipping products which has resulted in substantial revenue growth whereby we have generated significant taxable income in 2007 and 2008. Management has evaluated the likelihood of our ability to realize our deferred tax assets through principally the current and anticipated generation of taxable income. Based on that evaluation, management has determined that the valuation allowance could be substantially reduced as of December 31, 2007. The valuation allowance remained unchanged as of September 30, 2008.

Sensitivity analysis. Management will continually monitor, evaluate and adjust our evaluation/analyses of the likelihood of our ability to realize our deferred tax assets based upon projected future financial results. This evaluation may require changes in the valuation allowance when and if conditions change that could affect our current and future operations.

Inflation and Seasonality

Inflation has not materially affected us during the past fiscal year. Our business is not seasonal in nature.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

(Not Applicable)

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures, as such terms are defined in Rules 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act"). The Company, under the supervision and with the participation of its management, including its Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of such disclosure controls and procedures for this Report. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were effective as of September 30, 2008 to provide reasonable assurance that material information required to be disclosed by the Company in this Report was recorded, processed, summarized and communicated to the Company's management as appropriate and within the time periods specified in SEC rules and forms.

Changes in Internal Control over Financial Reporting

There have not been any changes in the Company's internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, during its last fiscal quarter that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings.

On April 9, 2008, Thomas DeHuff filed suit against the Company and Charles A. Ross in the Chancery Court of Lincoln County, Mississippi. Charles A. Ross, Jr., ("Ross") is the son of Charles A. Ross and was a former officer and director of the Company. The complaint alleges that on or about April 8, 2005 the plaintiff entered into a verbal agreement with Ross, whom the plaintiff maintains was acting for and on behalf of the Company, under which he purportedly was to receive 150,000 shares of the Company's common stock to resolve certain claims to compensation the plaintiff maintains was due from the Company. The lawsuit also claims that the plaintiff advanced funds to Ross, believing that he was purchasing Company stock which was never issued. Plaintiff is seeking unspecified damages and punitive damages and attorney fees in addition to requiring the Company to issue the common shares. The Company has removed the case from the Chancery Court of Lincoln County, Mississippi to the United States District Court located in Jackson, Mississippi. The Company has filed a motion to dismiss the case which is currently pending in the United States District Court. The Company believes that the lawsuit is without merit and will vigorously defend itself.

On July 11, 2008, L-3 Communications Mobile-Vision, Inc. filed suit against the Company and Trisquare Communications, Inc., a vendor of the Company that supplies wireless microphones included in the Company's products, in the U.S. District Court in the District of New Jersey. The complaint alleged that the Company infringed on a patent issued to the plaintiff that covered certain elements of the wireless microphone component of in-car video systems. The lawsuit sought a permanent injunction regarding the use of this technology, including damages, treble damages and attorney fees. On October 8, 2008, the Company and L-3 Communications Mobile-Vision, Inc. entered into a settlement agreement that resolved all litigation pertaining to Mobile-Vision's allegations that Digital Ally's

current DVM-500 products infringe Mobile-Vision's patent. Based on technical disclosures and representations provided by Digital Ally to Mobile-Vision, the parties agreed that the current DVM-500 products do not infringe Mobile-Vision's patent and that no damages are payable based on those technical disclosures and representations. Each party agreed to bear its own costs and attorney's fees. The terms of the resolution are otherwise confidential.

On July 11, 2008, L-3 Communications Mobile-Vision, Inc. also filed a complaint against the Company, Trisquare Communications, Inc., and eight other parties that requests that the United States International Trade Commission ("ITC") commence an investigation pursuant to Section 337 of the Tariff Act of 1930. The plaintiff sought to have the ITC issue a permanent cease and desist order prohibiting the importation into the United States of all articles that infringed on its patent that allegedly covers certain elements of the wireless microphone component of in-car video systems. This complaint was also resolved and dismissed under the same terms described previously.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(c) Issuer Purchases of Equity Securities

Period	Total Number of Shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs
July 1, 2008 through September 30, 2008	210,360	\$7.72	210,360 [1]	\$8,375,647 [2]

[1] During September 2008, the Board of Directors approved the Stock Repurchase Program that authorized the repurchase of up to \$10 million of the Company's common stock in the open market, or in privately negotiated transactions, through July 1, 2010. The repurchases, if and when made, will be subject to market conditions, applicable rules of the Securities and Exchange Commission and other factors. Purchases may be commenced, suspended or discontinued at any time.

[2] The Stock Repurchase Program authorizes the repurchase of up to \$10 million of common stock. A total of 210,360 shares have been repurchased under this program as of September 30, 2008, at a total cost of \$1,624,353 (\$7.72 per share average). As a result, \$8,375,647 is the maximum remaining dollar amount of common shares that may be purchased under the Program. The number of shares yet to be purchased is variable based upon the purchase price of the shares at the time.
