UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934
For the quarterly period ended March 31, 2016
OR
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission File Number	Registrant; State of Incorporation; Address; and Telephone Number	IRS Employer Identification No.
1-9513	CMS ENERGY CORPORATION (A Michigan Corporation) One Energy Plaza, Jackson, Michigan 49201 (517) 788-0550	38-2726431
1-5611	CONSUMERS ENERGY COMPANY (A Michigan Corporation) One Energy Plaza, Jackson, Michigan 49201 (517) 788-0550	38-0442310

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

CMS Energy Corporation: Yes No **Consumers Energy Company:** Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data file required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

CMS Energy Corporation: Yes No **Consumers Energy Company:** Yes No

Edgar Filing: CMS ENERGY CORP - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

CMS Energy Corporation:

Large accelerated filer Accelerated filer

Non-Accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Consumers Energy Company:

Large accelerated filer Accelerated filer

Non-Accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

CMS Energy Corporation: Yes No **Consumers Energy Company:** Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock at April 11, 2016:

CMS Energy Corporation:

CMS Energy Common Stock, \$0.01 par value
(including 803,551 shares owned by Consumers Energy Company) 279,961,710

Consumers Energy Company:
Consumers Common Stock, \$10 par value, privately held by CMS Energy Corporation 84,108,789

FILING FORMAT

This combined Form 10-Q is separately filed by CMS Energy and Consumers. Information in this combined Form 10-Q relating to each individual registrant is filed by such registrant on its own behalf. Consumers makes no representation regarding information relating to any other companies affiliated with CMS Energy other than its own subsidiaries. None of CMS Energy, CMS Enterprises, nor any of CMS Energy's other subsidiaries (other than Consumers) has any obligation in respect of Consumers' debt securities and holders of such debt securities should not consider the financial resources or results of operations of CMS Energy, CMS Enterprises, nor any of CMS Energy's other subsidiaries (other than Consumers and its own subsidiaries (in relevant circumstances)) in making a decision with respect to Consumers' debt securities. Similarly, neither Consumers nor any other subsidiary of CMS Energy has any obligation in respect of debt securities of CMS Energy.

This report should be read in its entirety. No one section of this report deals with all aspects of the subject matter of this report. This report should be read in conjunction with the consolidated financial statements and related notes and with MD&A included in the 2015 Form 10-K.

AVAILABLE INFORMATION

CMS Energy's internet address is www.cmsenergy.com. CMS Energy routinely posts important information on its website and considers the Investor Relations section, www.cmsenergy.com/investor-relations, a channel of distribution. Information contained on CMS Energy's website is not incorporated herein.

FORWARD-LOOKING STATEMENTS AND INFORMATION

This Form 10-Q and other CMS Energy and Consumers disclosures may contain forward-looking statements as defined by the Private Securities Litigation Reform Act of 1995. The use of might, may, could, should, anticipates, believes, estimates, expects, intends, plans, predicts, assumes, and other similar words is intended to identify forward-looking statements that involve risk and uncertainty. This discussion of potential risks and uncertainties is designed to highlight important factors that may impact CMS Energy's and Consumers' businesses and financial outlook. CMS Energy and Consumers have no obligation to update or revise forward-looking statements regardless of whether new information, future events, or any other factors affect the information contained in the statements. These forward-looking statements are subject to various factors that could cause CMS Energy's and Consumers' actual results to differ materially from the results anticipated in these statements. These factors include, but are not limited to, the following, all of which are potentially significant:

- the impact of new regulation by the MPSC, FERC, and other applicable governmental proceedings and regulations, including any associated impact on electric or gas rates or rate structures
- potentially adverse regulatory treatment or failure to receive timely regulatory orders affecting Consumers that are or could come before the MPSC, FERC, or other governmental authorities

- changes in the performance of or regulations applicable to MISO, METC, pipelines, railroads, vessels, or other service providers that CMS Energy, Consumers, or any of their affiliates rely on to serve their customers

- the adoption of federal or state laws or regulations or changes in applicable laws, rules, regulations, principles, or practices, or in their interpretation, such as those related to energy

Table of Contents

policy and ROA, gas pipeline safety, gas pipeline capacity, energy efficiency, the environment, regulation or deregulation, reliability, health care reforms (including the Health Care Acts), taxes, accounting matters, climate change, air emissions, renewable energy, potential effects of the Dodd-Frank Act, and other business issues that could have an impact on CMS Energy s, Consumers , or any of their affiliates' businesses or financial results

- factors affecting operations, such as costs and availability of personnel, equipment, and materials; weather conditions; natural disasters; catastrophic weather-related damage; scheduled or unscheduled equipment outages; maintenance or repairs; environmental incidents; equipment failures; and electric transmission and distribution or gas pipeline system constraints
- increases in demand for renewables by customers seeking to meet sustainability goals
- the ability of Consumers to execute its cost-reduction strategies
- potentially adverse regulatory or legal interpretations or decisions regarding environmental matters, or delayed regulatory treatment or permitting decisions that are or could come before the MDEQ, EPA, and/or U.S. Army Corps of Engineers, and potential environmental remediation costs associated with these interpretations or decisions, including those that may affect Bay Harbor or Consumers' RMRR classification under NSR regulations
- changes in energy markets, including availability and price of electric capacity and the timing and extent of changes in commodity prices and availability and deliverability of coal, natural gas, natural gas liquids, electricity, oil, and certain related products
- the price of CMS Energy common stock, the credit ratings of CMS Energy and Consumers, capital and financial market conditions, and the effect of these market conditions on CMS Energy s and Consumers' interest costs and access to the capital markets, including availability of financing to CMS Energy, Consumers, or any of their affiliates
- the investment performance of the assets of CMS Energy s and Consumers' pension and benefit plans, the discount rates used in calculating the plans' obligations, and the resulting impact on future funding requirements
- the impact of the economy, particularly in Michigan, and potential future volatility in the financial and credit markets on CMS Energy s, Consumers , or any of their affiliates' revenues, ability to collect accounts receivable from customers, or cost and availability of capital

Edgar Filing: CMS ENERGY CORP - Form 10-Q

- changes in the economic and financial viability of CMS Energy's and Consumers' suppliers, customers, and other counterparties and the continued ability of these third parties, including those in bankruptcy, to meet their obligations to CMS Energy and Consumers
- population changes in the geographic areas where CMS Energy and Consumers conduct business
- national, regional, and local economic, competitive, and regulatory policies, conditions, and developments
- loss of customer demand for electric generation supply to alternative energy suppliers, increased use of distributed generation, or energy efficiency
- federal regulation of electric sales and transmission of electricity, including periodic re-examination by federal regulators of CMS Energy's and Consumers' market-based sales authorizations

Table of Contents

- the impact of credit markets, economic conditions, and any new banking regulations on EnerBank
- the availability, cost, coverage, and terms of insurance, the stability of insurance providers, and the ability of Consumers to recover the costs of any insurance from customers
- the effectiveness of CMS Energy's and Consumers' risk management policies, procedures, and strategies, including strategies to hedge risk related to future prices of electricity, natural gas, and other energy-related commodities
- factors affecting development of electric generation projects and gas and electric transmission and distribution infrastructure replacement, conversion, and expansion projects, including factors related to project site identification, construction material pricing, schedule delays, availability of qualified construction personnel, permitting, and government approvals
- potential disruption to, interruption of, or other impacts on facilities, utility infrastructure, or operations due to accidents, explosions, physical disasters, cyber incidents, vandalism, war, or terrorism, and the ability to obtain or maintain insurance coverage for these events
- changes or disruption in fuel supply, including but not limited to supplier bankruptcy and delivery disruptions
- potential costs, lost revenues, or other consequences resulting from misappropriation of assets or sensitive information, corruption of data, or operational disruption in connection with a cyber attack or other cyber incident
- technological developments in energy production, storage, delivery, usage, and metering
- the ability to implement technology, including Smart Energy, successfully
- the impact of CMS Energy's and Consumers' integrated business software system and its effects on their operations, including utility customer billing and collections
- adverse consequences resulting from any past, present, or future assertion of indemnity or warranty claims associated with assets and businesses previously owned by CMS Energy or Consumers, including claims resulting from attempts by foreign or domestic governments to assess taxes on or to impose environmental liability associated with past operations or transactions

Edgar Filing: CMS ENERGY CORP - Form 10-Q

- the outcome, cost, and other effects of any legal or administrative claims, proceedings, investigations, or settlements
- the reputational impact on CMS Energy and Consumers of operational incidents, violations of corporate policies, regulatory violations, inappropriate use of social media, and other events
- restrictions imposed by various financing arrangements and regulatory requirements on the ability of Consumers and other subsidiaries of CMS Energy to transfer funds to CMS Energy in the form of cash dividends, loans, or advances
- earnings volatility resulting from the application of fair value accounting to certain energy commodity contracts or interest rate contracts
- changes in financial or regulatory accounting principles or policies

Table of Contents

- other matters that may be disclosed from time to time in CMS Energy's and Consumers' SEC filings, or in other public documents

All forward-looking statements should be considered in the context of the risk and other factors described above and as detailed from time to time in CMS Energy's and Consumers' SEC filings. For additional details regarding these and other uncertainties, see Part I Item 1. Financial Statements MD&A Outlook and Notes to the Unaudited Consolidated Financial Statements Note 2, Regulatory Matters and Note 3, Contingencies and Commitments; and Part II Item 1A. Risk Factors.

CMS Energy Corporation

Consumers Energy Company

Management's Discussion and Analysis of Financial Condition and Results of Operations

This MD&A is a combined report of CMS Energy and Consumers.

EXECUTIVE OVERVIEW

CMS Energy is an energy company operating primarily in Michigan. It is the parent holding company of several subsidiaries, including Consumers, an electric and gas utility, and CMS Enterprises, primarily a domestic independent power producer. Consumers' electric utility operations include the generation, purchase, transmission, distribution, and sale of electricity, and Consumers' gas utility operations include the purchase, transmission, storage, distribution, and sale of natural gas. Consumers' customer base consists of a mix of residential, commercial, and diversified industrial customers. CMS Enterprises, through its subsidiaries and equity investments, owns and operates power generation facilities.

CMS Energy and Consumers manage their businesses by the nature of services each provides. CMS Energy operates principally in three business segments: electric utility; gas utility; and enterprises, its non-utility operations and investments. Consumers operates principally in two business segments: electric utility and gas utility.

CMS Energy and Consumers earn revenue and generate cash from operations by providing electric and natural gas utility services; electric distribution, transmission, and generation; gas transmission, storage, and distribution; and other energy-related services. Their businesses are affected primarily by:

- regulation and regulatory matters
- economic conditions
- weather
- energy commodity prices
- interest rates

- CMS Energy's and Consumers' securities credit ratings

CMS Energy's and Consumers' business strategy emphasizes the key elements depicted below:

Table of Contents

Accountability is part of CMS Energy's and Consumers' corporate culture. CMS Energy and Consumers are committed to making the right choices to serve their customers safely and affordably and to acting responsibly as corporate citizens. CMS Energy and Consumers hold themselves accountable to the highest standards of safety, operational performance, and ethical behavior, and work diligently to comply with all laws, rules, and regulations that govern the electric and gas industry. Consumers' 2015 Accountability Report, which is available to the public, provides an overview of Consumers' efforts to continue meeting Michigan's energy needs safely and efficiently, and highlights Consumers' commitment to Michigan businesses, its corporate citizenship, and its role in reducing the state's air emissions.

Safe, Excellent Operations

The safety of employees, customers, and the general public remains a priority of CMS Energy and Consumers. Accordingly, CMS Energy and Consumers have worked to integrate a set of safety principles into their business operations and culture. These principles include complying with applicable safety, health, and security regulations and implementing programs and processes aimed at continually improving safety and security conditions. In 2015, Consumers reduced recordable safety incidents by 29 percent compared with 2014. The number of recordable safety incidents in 2015 was the lowest in Consumers' history.

Customer Value

Consumers is undertaking a number of initiatives that reflect its intensified customer focus. Consumers' planned investments in reliability are aimed at improving safety, reducing customer outage frequency, reducing repetitive outages, and increasing customer satisfaction. In 2015, Consumers attained reductions in the duration of electric customer outages and in the frequency of forced outages of its electric generation facilities. Consumers' intensified customer focus has led to measureable improvements in customer satisfaction.

Also, in order to minimize increases in customer base rates, Consumers has undertaken several additional initiatives to reduce costs. These include accelerated pension funding, employee and retiree health care cost sharing, replacement of coal-fueled generation with more efficient gas-fueled generation, targeted infrastructure investment, including the installation of smart meters, negotiated labor agreements, information and control system efficiencies, and productivity improvements. In addition, Consumers' gas commodity costs have declined by 64 percent over the last ten years, due in part to Consumers' improvements to its gas infrastructure and optimization of its gas purchasing and storage strategy. These savings are all passed on to customers.

Utility Investment

Consumers expects to make capital investments of about \$17 billion from 2016 through 2025. While Consumers has substantially more investment opportunities that would add customer value, Consumers has limited its capital investment program to those investments it believes are needed to provide safe, reliable, and efficient service to its customers. Consumers' capital investment program is expected to result in annual rate-base growth of five to seven percent while allowing Consumers to maintain sustainable customer base rate increases (excluding PSCR and GCR charges) at or below the rate of inflation.

Table of Contents

Over the next five years, Consumers expects to make capital investments of about \$8.4 billion. Presented in the following illustration are Consumers' planned capital investments through 2020:

Electric base (\$2.5 billion)
Gas base (\$1.6 billion)
Gas reliability enhancements (\$1.6 billion)
Electric reliability enhancements (\$1.1 billion)
Environmental (\$0.7 billion)
Smart Energy (\$0.3 billion)
Other (\$0.6 billion)

Consumers' planned base capital investments of \$4.1 billion represent projects to maintain Consumers' system and comprise \$2.5 billion at the electric utility to preserve reliability and capacity and \$1.6 billion at the gas utility to sustain deliverability and enhance pipeline integrity. An additional \$2.7 billion of planned reliability investments at Consumers are aimed at reducing outages and improving customer satisfaction; these investments comprise \$1.6 billion at the gas utility to replace mains and enhance transmission and storage systems and \$1.1 billion at the electric utility to strengthen circuits and substations and replace poles. Consumers also expects to spend \$0.7 billion on environmental investments needed to comply with state and federal laws and regulations.

Consumers' Smart Energy program also represents a major capital investment. The full-scale deployment of advanced metering infrastructure began in 2012 and is planned to continue through 2017. Consumers has spent \$0.5 billion through 2015 on its Smart Energy program, and expects to spend an additional \$0.3 billion, following a phased approach, through 2017.

Regulation

Regulatory matters are a key aspect of CMS Energy's and Consumers' businesses, particularly Consumers' rate cases and regulatory proceedings before the MPSC. In March 2016, MPSC Commissioner John Quackenbush resigned, and a new commissioner has not yet been appointed. The MPSC still has the authority to issue orders with only two members instead of the normal three members. Other important regulatory events and

developments are summarized below.

- **Electric Rate Case:** In March 2016, Consumers filed an application with the MPSC seeking an annual rate increase of \$225 million, based on a 10.7 percent authorized return on equity. The filing also seeks approval of an investment recovery mechanism that would allow recovery of an additional \$222 million in total for incremental investments that Consumers plans to make from 2017 through 2019, subject to reconciliation.

Table of Contents

- **Gas Rate Case:** In July 2015, Consumers filed an application with the MPSC seeking an annual rate increase of \$85 million, based on a 10.7 percent authorized return on equity. In January 2016, Consumers self-implemented an annual rate increase of \$60 million, subject to refund with interest. In April 2016, the MPSC approved a settlement agreement authorizing a \$40 million annual rate increase.

In 2015, Michigan's governor outlined several key goals for the state's energy policy, with a focus on increasing the use of clean energy sources, reducing Michigan's reliance on coal, deploying smart meters, investing in the power grid and pipeline system, eliminating energy waste, and ensuring affordable, reliable, and adaptable energy while protecting the environment. Presently, the Michigan Senate and House of Representatives are considering two separate but similar pieces of legislation to address energy policy. Consumers is unable to predict the form and timing of any final legislation.

Environmental regulation is another area of importance for CMS Energy and Consumers, and they are monitoring numerous legislative and regulatory initiatives, including initiatives to regulate greenhouse gases, and related litigation. CMS Energy and Consumers believe that environmental laws and regulations related to their operations will continue to become more stringent and require them to make additional substantial capital expenditures for emissions control equipment, CCR disposal and storage, cooling water intake equipment, effluent treatment, and PCB remediation. Present and reasonably anticipated state and federal environmental statutes and regulations, including but not limited to the Clean Air Act, including the Clean Power Plan, as well as the Clean Water Act, the Resource Conservation and Recovery Act, and CERCLA, will continue to have a material effect on CMS Energy and Consumers.

Financial Performance

For the three months ended March 31, 2016, CMS Energy's net income available to common stockholders was \$164 million and diluted EPS were \$0.59. This compares with net income available to common stockholders of \$202 million and diluted EPS of \$0.73 for the three months ended March 31, 2015. Among the primary factors contributing to CMS Energy's decreased earnings in 2016 were lower electric and gas deliveries, reflecting the second-warmest winter in Consumers' history, offset partially by benefits from electric and gas rate increases.

Consumers' utility operations are seasonal. The consumption of electric energy typically increases in the summer months, due primarily to the use of air conditioners and other cooling equipment, while peak demand for natural gas occurs in the winter due to colder temperatures and the resulting use of natural gas as heating fuel. In addition, Consumers' electric rates, which follow a seasonal rate design, are higher in the summer months than in the remaining months of the year. A more detailed discussion of the factors affecting CMS Energy's and Consumers' performance can be found in the Results of Operations section that follows this Executive Overview.

In recent years, Michigan has benefited from strong economic growth; it ranked third among states in GDP growth from 2009 through 2014. Consumers expects that the continued rise in industrial production will drive its electric deliveries to increase annually by about 0.5 to 1.0 percent on average through 2020. Excluding the impacts of energy efficiency programs, Consumers expects its electric deliveries to increase by about 1.0 to 1.5 percent annually through 2020. Consumers is projecting that its gas deliveries will remain stable through 2020. This outlook reflects growth in gas demand offset by energy efficiency and conservation.

Edgar Filing: CMS ENERGY CORP - Form 10-Q

As Consumers seeks to continue to receive fair and timely regulatory treatment, delivering customer value will remain a key strategic priority. In order to minimize increases in customer base rates, Consumers has set goals to achieve further annual productivity improvements. Additionally, Consumers will strive to give priority to capital investments that increase customer value or lower costs.

Table of Contents

Consumers expects to continue to have sufficient borrowing capacity to fund its investment-based growth plans. CMS Energy also expects its sources of liquidity to remain sufficient to meet its cash requirements. To identify potential implications for CMS Energy's and Consumers businesses and future financial needs, the companies will continue to monitor developments in the financial and credit markets, as well as government policy responses to those developments.

Net Income Available to Common Stockholders	\$ 91	\$ 94	\$ (3)
<i>Reasons for the change</i>			
Electric deliveries and rate increases			\$ 18
Maintenance and other operating expenses			(7)
Depreciation and amortization			(6)
General taxes			(4)
Other income, net of expenses			(6)
Interest charges			(2)
Income taxes			4
Total change			\$ (3)

Following is a discussion of significant changes to net income available to common stockholders.

Electric Deliveries and Rate Increases: For the three months ended March 31, 2016, electric delivery revenues increased \$18 million compared with 2015. This change reflected \$48 million from a December 2015 rate increase and a \$7 million increase associated with energy efficiency programs. These increases were offset partially by a \$27 million decrease in sales, reflecting the second-warmest winter in Consumers history. Additionally, revenue associated with securitization bonds decreased \$10 million, due primarily to the retirement in October 2015 of securitization bonds issued by Consumers in 2001. Deliveries to end-use customers were 9.1 billion kWh in 2016 and 9.5 billion kWh in 2015.

Maintenance and Other Operating Expenses: For the three months ended March 31, 2016, maintenance and other operating expenses increased \$7 million compared with 2015. This change was due to a \$9 million increase in storm restoration costs, a \$7 million increase associated with energy efficiency programs, and a \$3 million increase in forestry spending. These increases were offset partially by a \$6 million decrease in postretirement benefit costs attributable primarily to the change to a full-yield-curve approach to calculate the service cost and interest expense components of net periodic benefit costs for the DB Pension and OPEB Plans. The increases were also offset partially by a \$3 million reduction in uncollectible accounts expense and a \$3 million reduction in other operating and maintenance expenses.

Depreciation and Amortization: For the three months ended March 31, 2016, depreciation and amortization expense increased \$6 million compared with 2015. This increase was due primarily to increased plant in service and an increase in depreciation rates authorized in a June 2015 rate order that became effective in December 2015. These increases were offset partially by lower amortization of securitized assets, reflecting the conclusion in October 2015 of Consumers 2001 securitization program.

General Taxes: For the three months ended March 31, 2016, general taxes increased \$4 million compared with 2015, due to increased property taxes, reflecting higher capital spending.

Other Income, Net of Expenses: For the three months ended March 31, 2016, other income, net of expenses, decreased \$6 million compared with 2015. This decrease reflected the absence, in 2016, of a \$6 million gain related to a donation of CMS Energy stock by Consumers. The gain

was eliminated on CMS Energy's consolidated statements of income.

Income Taxes: For the three months ended March 31, 2016, income taxes decreased \$4 million compared with 2015, due primarily to a change in the treatment of excess tax benefits on restricted stock awards as a result of the early adoption of a new accounting standard. For further details on the implementation of this standard, see Note 1, New Accounting Standards.

Table of Contents

Consumers Gas Utility Results of Operations

Three Months Ended March 31	2016	2015	<i>In Millions</i> Change
Net Income Available to Common Stockholders	\$ 81	\$ 121	\$ (40)
<i>Reasons for the change</i>			
Gas deliveries and rate increases			\$ (53)
Maintenance and other operating expenses			3
Depreciation and amortization			(10)
General taxes			(3)
Other income, net of expenses			(2)
Income taxes			25
Total change			\$ (40)

Following is a discussion of significant changes to net income available to common stockholders.

Gas Deliveries and Rate Increases: For the three months ended March 31, 2016, gas delivery revenues decreased \$53 million compared with 2015. This change was attributable to \$68 million in decreased sales, reflecting the second-warmest winter in Consumers history. The decrease was offset partially by \$13 million from a January 2016 rate increase and \$2 million in other revenue. Deliveries to end-use customers were 121 bcf in 2016 and 152 bcf in 2015.

Maintenance and Other Operating Expenses: For the three months ended March 31, 2016, maintenance and other operating expenses decreased \$3 million compared with 2015. This change was due primarily to a decrease in postretirement benefit costs attributable to the change to a full-yield-curve approach to calculate the service cost and interest expense components of net periodic benefit costs for the DB Pension and OPEB Plans.

Depreciation and Amortization: For the three months ended March 31, 2016, depreciation and amortization expense increased \$10 million compared with 2015, due primarily to increased plant in service.

General Taxes: For the three months ended March 31, 2016, general taxes increased \$3 million compared with 2015, due primarily to increased property taxes, reflecting higher capital spending.

Income Taxes: For the three months ended March 31, 2016, income taxes decreased \$25 million compared with 2015. Of this decrease, \$23 million was attributable to lower gas utility earnings and \$2 million to a change in the treatment of excess tax benefits on restricted stock awards as a result of the early adoption of a new accounting standard. For further details on the implementation of this standard, see Note 1, New Accounting Standards.

Enterprises Results of Operations

Three Months Ended March 31	2016	2015	<i>In Millions</i> Change
Net Income Available to Common Stockholders	\$ 6	\$ 7	\$ (1)

For the three months ended March 31, 2016, net income of the enterprises segment decreased \$1 million compared with 2015, due primarily to higher maintenance expenses.

Table of Contents

Corporate Interest and Other Results of Operations

Three Months Ended March 31	2016	2015	<i>In Millions</i> Change
Net Income (Loss) Available to Common Stockholders	\$ (14)	\$ (20)	\$ 6

For the three months ended March 31, 2016, corporate interest and other net expenses decreased \$6 million compared with 2015, due primarily to a \$4 million reduction in miscellaneous corporate costs and \$2 million of higher earnings at EnerBank.

CASH POSITION, INVESTING, AND FINANCING

At March 31, 2016, CMS Energy had \$205 million of consolidated cash and cash equivalents, which included \$28 million of restricted cash and cash equivalents. At March 31, 2016, Consumers had \$55 million of consolidated cash and cash equivalents, which included \$28 million of restricted cash and cash equivalents.

Operating Activities

Presented in the following table are specific components of net cash provided by operating activities for the three months ended March 31, 2016 and 2015:

Three Months Ended March 31	2016	2015	<i>In Millions</i> Change
CMS Energy, including Consumers			
Net income	\$ 164	\$ 202	\$ (38)
Non-cash transactions ¹	327	363	(36)
	491	565	(74)
Changes in core working capital ²	242	294	(52)
Postretirement benefits contributions	(2)	(31)	29
Changes in other assets and liabilities, net	(99)	(68)	(31)
Net cash provided by operating activities	\$ 632	\$ 760	\$ (128)
Consumers			
Net income	\$ 172	\$ 215	\$ (43)
Non-cash transactions ¹	316	299	17
	488	514	(26)
Changes in core working capital ²	261	299	(38)
Postretirement benefits contributions	(1)	(30)	29
Changes in other assets and liabilities, net	(83)	3	(86)
Net cash provided by operating activities	\$ 665	\$ 786	\$ (121)

1 Non-cash transactions comprise depreciation and amortization, changes in deferred income taxes, postretirement benefits expense, and other non-cash operating activities.

2 Core working capital comprises accounts receivable, notes receivable, accrued revenue, inventories, accounts payable, and accrued rate refunds.

For the three months ended March 31, 2016, net cash provided by operating activities at CMS Energy decreased \$128 million compared with 2015 and net cash provided by operating activities at Consumers decreased \$121 million compared with 2015. These changes were due primarily to lower net income, net of non-cash transactions, and lower collections of GCR underrecoveries, offset partially by a decrease in

Table of Contents

postretirement benefit contributions. Higher income tax payments to CMS Energy also contributed to the decrease in net cash provided by operating activities at Consumers.

Investing Activities

Presented in the following table are specific components of net cash used in investing activities for the three months ended March 31, 2016 and 2015:

Three Months Ended March 31	2016	2015	<i>In Millions</i> Change
CMS Energy, including Consumers			
Capital expenditures	\$ (407)	\$ (348)	\$ (59)
Increase in EnerBank notes receivable	(16)	(29)	13
DB SERP fund contributions	-	(25)	25
Costs to retire property and other	(28)	(20)	(8)
Net cash used in investing activities	\$ (451)	\$ (422)	\$ (29)
Consumers			
Capital expenditures	\$ (406)	\$ (345)	\$ (61)
DB SERP fund contributions	-	(17)	17
Costs to retire property and other	(27)	(21)	(6)
Net cash used in investing activities	\$ (433)	\$ (383)	\$ (50)

For the three months ended March 31, 2016, net cash used in investing activities at CMS Energy increased \$29 million compared with 2015 and net cash used in investing activities at Consumers increased \$50 million compared with 2015. At CMS Energy, the change was due primarily to higher capital expenditures at Consumers, offset partially by slower growth in EnerBank consumer lending and the absence, in 2016, of DB SERP fund contributions. The change at Consumers was due primarily to higher capital expenditures, offset partially by the absence, in 2016, of DB SERP fund contributions.

Table of Contents

Financing Activities

Presented in the following table are specific components of net cash used in financing activities for the three months ended March 31, 2016 and 2015:

Three Months Ended March 31	2016	2015	<i>In Millions</i> Change
CMS Energy, including Consumers			
Payment of dividends on common stock	\$ (86)	\$ (80)	\$ (6)
Retirement of debt	(30)	(11)	(19)
Issuance of common stock	63	4	59
Proceeds from EnerBank certificates of deposit, net	14	40	(26)
Issuance of debt	30	100	(70)
Decrease in notes payable	(249)	(60)	(189)
Other financing activities	(12)	(16)	4
Net cash used in financing activities	\$ (270)	\$ (23)	\$ (247)
Consumers			
Payment of dividends on common stock	\$ (155)	\$ (122)	\$ (33)
Retirement of debt	-	(11)	11
Stockholder contribution from CMS Energy	150	150	-
Decrease in notes payable	(249)	(60)	(189)
Other financing activities	(1)	(6)	5
Net cash used in financing activities	\$ (255)	\$ (49)	\$ (206)

For the three months ended March 31, 2016, net cash used in financing activities at CMS Energy increased \$247 million compared with 2015 and net cash used in financing activities at Consumers increased \$206 million compared with 2015. At CMS Energy, the change was due primarily to higher repayments under Consumers' commercial paper program and a decrease in debt issuances, offset partially by increased common stock issuances under the continuous equity offering program. At Consumers, the change was due primarily to higher repayments under the commercial paper program and higher dividend payments to CMS Energy.

CAPITAL RESOURCES AND LIQUIDITY

CMS Energy uses dividends and tax-sharing payments from its subsidiaries and external financing and capital transactions to invest in its utility and non-utility businesses, retire debt, pay dividends, and fund its other obligations. The ability of CMS Energy's subsidiaries, including Consumers, to pay dividends to CMS Energy depends upon each subsidiary's revenues, earnings, cash needs, and other factors. In addition, Consumers' ability to pay dividends is restricted by certain terms included in its debt covenants and articles of incorporation and potentially by FERC requirements and provisions under the Federal Power Act and the Natural Gas Act. For additional details on Consumers' dividend restrictions, see Note 4, *Financings and Capitalization - Dividend Restrictions*. For the three months ended March 31, 2016, Consumers paid \$155 million in dividends on its common stock to CMS Energy.

Edgar Filing: CMS ENERGY CORP - Form 10-Q

As a result of federal tax legislation passed in December 2015 that extends bonus depreciation, CMS Energy expects to be able to extend the use of federal net operating loss carryforwards by two years and, accordingly, defer its federal income tax payments through 2019. As a consequence, however, CMS Energy expects to receive lower tax-sharing payments from Consumers during that period. This may require CMS Energy to maintain higher levels of debt in order to invest in its businesses, pay dividends, and fund its general obligations. Despite this, CMS Energy does not anticipate a need for a block equity offering.

Table of Contents

In April 2015, CMS Energy entered into an updated continuous equity offering program. Under this program, CMS Energy may sell, from time to time in at the market offerings, common stock having an aggregate sales price of up to \$100 million. CMS Energy issued common stock under the program and received net proceeds of \$60 million in March 2016 and \$30 million in 2015.

Consumers uses cash flows generated from operations and external financing transactions, as well as stockholder contributions from CMS Energy, to fund capital expenditures, retire debt, pay dividends, contribute to its employee benefit plans, and fund its other obligations. As a result of accelerated pension funding in recent years and several initiatives to reduce costs, Consumers anticipates continued strong cash flows from operating activities for the remainder of 2016.

Access to the financial and capital markets depends on CMS Energy's and Consumers' credit ratings and on market conditions. As evidenced by past financing transactions, CMS Energy and Consumers have had ready access to these markets. Barring major market dislocations or disruptions, CMS Energy and Consumers expect to continue to have ready access to the financial and capital markets. If access to these markets were to diminish or otherwise become restricted, CMS Energy and Consumers would implement contingency plans to address debt maturities, which could include reduced capital spending.

At March 31, 2016, CMS Energy had \$549 million of its secured revolving credit facility available and Consumers had \$893 million available. CMS Energy and Consumers use these credit facilities for general working capital purposes and to issue letters of credit. An additional source of liquidity is Consumers' commercial paper program, which allows Consumers to issue, in one or more placements, up to \$500 million in the aggregate in commercial paper notes with maturities of up to 365 days and that bear interest at fixed or floating rates. These issuances are supported by one of Consumers' revolving credit facilities. While the amount of outstanding commercial paper does not reduce the revolving credit facility's available capacity, Consumers would not issue commercial paper in an amount exceeding the available facility capacity. At March 31, 2016, no commercial paper notes were outstanding under this program. For additional details on CMS Energy's and Consumers' secured revolving credit facilities and commercial paper program, see Note 4, Financings and Capitalization.

Certain of CMS Energy's and Consumers' credit agreements, debt indentures, and other facilities contain covenants that require CMS Energy and Consumers to maintain certain financial ratios, as defined therein. At March 31, 2016, no default had occurred with respect to any financial covenants contained in CMS Energy's and Consumers' credit agreements, debt indentures, or other facilities. CMS Energy and Consumers were each in compliance with these covenants as of March 31, 2016, as presented in the following table:

Credit Agreement, Indenture, or Facility		March 31, 2016 Limit	Actual
CMS Energy parent			
Debt to EBITDA ¹	≤	6.0 to 1.0	4.5 to 1.0
Consumers			
Debt to Capital ²	≤	0.65 to 1.0	0.47 to 1.0

1 Applies to CMS Energy's \$550 million revolving and \$180 million term loan credit agreements.

2 Applies to Consumers' \$650 million, \$250 million, and \$30 million revolving credit agreements, and \$35 million and \$68 million reimbursement agreements.

Components of CMS Energy's and Consumers' cash management plan include controlling operating expenses and capital expenditures and evaluating market conditions for financing and refinancing opportunities. CMS Energy's and Consumers' present level of cash and expected cash flows from

Table of Contents

operating activities, together with access to sources of liquidity, are anticipated to be sufficient to fund the companies' contractual obligations for 2016 and beyond.

Off-Balance-Sheet Arrangements

CMS Energy, Consumers, and certain of their subsidiaries enter into various arrangements in the normal course of business to facilitate commercial transactions with third parties. These arrangements include indemnities, surety bonds, letters of credit, and financial and performance guarantees. Indemnities are usually agreements to reimburse a counterparty that may incur losses due to outside claims or breach of contract terms. The maximum payment that could be required under a number of these indemnity obligations is not estimable; the maximum obligation under indemnities for which such amounts were estimable was \$153 million at March 31, 2016. While CMS Energy and Consumers believe it is unlikely that they will incur any material losses related to indemnities they have not recorded as liabilities, they cannot predict the impact of these contingent obligations on their liquidity and financial condition. For additional details on these and other guarantee arrangements, see Note 3, Contingencies and Commitments - Guarantees.

OUTLOOK

Several business trends and uncertainties may affect CMS Energy's and Consumers' financial condition and results of operations. These trends and uncertainties could have a material impact on CMS Energy's and Consumers' consolidated income, cash flows, or financial position. For additional details regarding these and other uncertainties, see Forward-Looking Statements and Information; Note 2, Regulatory Matters; Note 3, Contingencies and Commitments; and Part II - Item 1A. Risk Factors.

Consumers Electric Utility and Gas Utility Outlook and Uncertainties

Smart Energy: Consumers began the full-scale deployment of smart meters in 2012 and expects to complete it in 2017. Smart meters allow customers to monitor and manage their energy usage, which Consumers expects will help reduce demand during critical peak times, resulting in lower peak electric capacity requirements. In addition, Consumers is able to disconnect and reconnect service, read, and bill from smart meters remotely. Consumers will continue to add further functionality to its smart meters. Consumers is also installing communication modules on gas meters in areas where it provides both electricity and natural gas to customers. The communication modules allow Consumers to read and bill from gas meters remotely.

By the end of 2017, Consumers expects that it will have installed a total of 1.8 million smart meters and 600,000 communication modules throughout its service territory. As of March 31, 2016, Consumers had upgraded 889,000 electric customers to smart meters and had installed 116,000 communication modules on gas meters.

In areas where it provides only natural gas to customers, Consumers plans to deploy automated meter reading technology on gas meters beginning in 2018. Under this program, communication modules will be installed on 1.2 million gas meters, allowing Consumers to conduct drive-by meter reading.

Consumers Electric Utility Outlook and Uncertainties

Clean Energy Plan: Consumers continues to experience increasing demand for electricity due to Michigan's recovering economy and increased use of air conditioning, consumer electronics, and other electric devices, offset partially by the predicted effects of energy efficiency and conservation. In order to address future capacity requirements and growing electric demand in Michigan, Consumers has a

Table of Contents

comprehensive clean energy plan designed to meet the short-term and long-term electricity needs of its customers through:

- energy efficiency
- demand management
- expanded use of renewable energy
- construction or purchase of electric generating units
- continued operation or upgrade of existing units
- purchases of short-term market capacity

In April 2016, Consumers retired seven of its coal-fueled electric generating units, representing 950 MW of generating capacity. Even with these retirements, Consumers expects to meet the capacity requirements of its full-service customers for 2016 through 2020 through the use of a 540-MW natural gas-fueled electric generating plant purchased in December 2015, upgrades at Ludington, expanded use of renewable energy, energy efficiency programs, and demand management programs. As demand forecasts become more certain, Consumers may take additional actions to cover any remaining capacity requirements for its full-service customers, including participation in the annual MISO planning resource auction.

In 2014, Consumers deferred the development of a proposed 700-MW natural gas-fueled electric generating plant at its Thetford complex in Genesee County, Michigan. The MDEQ granted an extension of the project's air permit in January 2015, which will be void if Consumers does not start construction or obtain a further extension before July 2016.

Renewable Energy Plan: Consumers' renewable energy plan details how Consumers expects to meet REC and capacity standards prescribed by the 2008 Energy Law. This law requires Consumers to submit RECs, which represent proof that the associated electricity was generated from a renewable energy resource, in an amount equal to at least ten percent of Consumers' electric sales volume each year. Under its renewable energy plan, Consumers expects to meet its renewable energy requirement each year with a combination of newly generated RECs and previously generated RECs carried over from prior years.

In conjunction with its renewable energy plan, Consumers signed a 15-year agreement in September 2015 to purchase renewable capacity, energy, and RECs from a 100-MW wind park to be constructed in Huron County, Michigan. The wind park is expected to be operational in 2017. Consumers also completed construction of a community solar project in April 2016 and expects to complete construction of another later in the year. Together, these solar projects will provide a combined four MW of nameplate capacity.

Electric Customer Deliveries and Revenue: Consumers' electric customer deliveries are largely dependent on Michigan's economy. Consumers expects weather-adjusted electric deliveries to increase in 2016 by 1.5 to 2.0 percent compared with 2015.

Over the next five years, Consumers plans conservatively for average electric delivery growth of about 0.5 to 1.0 percent annually. This increase reflects growth in electric demand, offset partially by the predicted effects of energy efficiency programs and appliance efficiency standards. Actual delivery levels will depend on:

- energy conservation measures and results of energy efficiency programs
- weather fluctuations
- Michigan's economic conditions, including utilization, expansion, or contraction of manufacturing facilities, population trends, and housing activity

Electric ROA: The 2008 Energy Law allows electric customers in Consumers' service territory to buy electric generation service from alternative electric suppliers in an aggregate amount up to ten percent of Consumers' weather-adjusted retail sales for the preceding calendar year. At March 31, 2016, electric

Table of Contents

deliveries under the ROA program were at the ten-percent limit and alternative electric suppliers were providing 749 MW of generation service to ROA customers. Of Consumers' 1.8 million electric customers, 304 customers, or 0.02 percent, purchased electric generation service under the ROA program.

Michigan Energy Legislation: In 2015, Michigan's governor outlined several key goals for the state's energy policy, with a focus on increasing the use of clean energy sources, reducing Michigan's reliance on coal, deploying smart meters, investing in the power grid and pipeline system, eliminating energy waste, and ensuring affordable, reliable, and adaptable energy while protecting the environment. Presently, the Michigan Senate and House of Representatives are considering two separate but similar pieces of legislation to address energy policy. Consumers is unable to predict the form and timing of any final legislation.

Electric Transmission: In 2012, ReliabilityFirst Corporation informed Consumers that Consumers may not have been properly registered to meet certain NERC electric reliability standards. Consumers assessed its registration status, taking into consideration FERC's December 2012 order on the definition of a bulk electric system, and became registered under NERC standards as a transmission owner, transmission planner, and transmission operator in October 2015. In March 2016, Consumers received FERC approval to begin collecting transmission revenues under MISO's transmission tariff effective April 2016. Consumers had previously received approval from the MPSC in 2014 and FERC in 2015 to reclassify \$34 million of net plant assets from distribution to transmission. Consumers completed the reclassification in April 2016.

In a separate matter, METC notified Consumers that the reclassified assets need to be conveyed by Consumers to METC under the terms of the DTIA. Consumers disagrees with METC's interpretation of the provisions of the DTIA. The parties remain in dispute resolution.

Electric Rate Matters: Rate matters are critical to Consumers' electric utility business. For additional details on rate matters, see Note 2, Regulatory Matters.

Electric Rate Case: In March 2016, Consumers filed an application with the MPSC seeking an annual rate increase of \$225 million, based on a 10.7 percent authorized return on equity. The filing requested authority to recover new investment in system reliability, environmental compliance, and technology enhancements. Presented in the following table are the components of the requested increase in revenue:

	<i>In Millions</i>
Components of the rate increase	
Investment in rate base	\$ 161
Operating and maintenance costs	21
Gross margin	17
Cost of capital	15
Working capital	11
Total	\$ 225

The filing also seeks approval of an investment recovery mechanism that would allow recovery of \$38 million in 2017, \$92 million in 2018, and \$92 million in 2019 for incremental investments that Consumers plans to make in those years, subject to reconciliation.

Electric Environmental Outlook: Consumers' operations are subject to various state and federal environmental laws and regulations. Consumers estimates that it will incur capital expenditures of \$0.7 billion from 2016 through 2020 to continue to comply with the Clean Air Act, Clean Water Act, and numerous state and federal environmental regulations. Consumers expects to recover these costs in customer rates, but cannot guarantee this result. Consumers' primary environmental compliance focus includes, but is not limited to, the following matters:

Table of Contents

Air Quality: CSAPR, which became effective in January 2015, requires Michigan and 27 other states to improve air quality by reducing power plant emissions that, according to EPA computer models, contribute to ground-level ozone and fine particle pollution in other downwind states. In December 2015, the EPA proposed new ozone-season standards for CSAPR, which would begin in 2017. Consumers expects its emissions to be within the CSAPR allowance allocations.

In 2012, the EPA published emission standards for electric generating units, based on Section 112 of the Clean Air Act, calling the final rule MATS. Under MATS, all of Consumers' existing coal-fueled electric generating units are required to add additional controls for hazardous air pollutants. Consumers met the extended deadline of April 2016 for five coal-fueled units and two oil/gas-fueled units it continues to operate and retired its seven remaining coal-fueled units. MATS is presently being litigated, but any decision is not presently expected to impact Consumers' MATS compliance strategy. In addition, Consumers must still comply with the Michigan Mercury Rule and with its settlement agreement with the EPA entered into in November 2014 concerning opacity and NSR.

In October 2015, the EPA released its new rule to lower the NAAQS for ozone. The new ozone NAAQS will make it more difficult to construct or modify power plants in many areas of the country, including some parts of Michigan, if the areas are designated to be in nonattainment of the new standard. Consumers is evaluating this rule to determine what, if any, effect it will have on its electric generating units.

Presently, Consumers' strategy to comply with air quality regulations, including CSAPR, NAAQS, and MATS, involves the installation of emission control equipment at some facilities and the suspension of operations at others; however, Consumers continues to evaluate these rules in conjunction with other EPA rulemakings, litigation, and congressional action. This evaluation could result in:

- changes in environmental compliance costs related to Consumers' coal-fueled power units
- a change in the fuel mix at coal-fueled and oil-fueled power units
- changes in how certain units are used
- the retirement, mothballing, or repowering with an alternative fuel of some of Consumers' generating units

Greenhouse Gases: There have been numerous legislative and regulatory initiatives at the state, regional, national, and international levels that involve the potential regulation of greenhouse gases. Consumers continues to monitor and comment on these initiatives and to follow litigation involving greenhouse gases. Consumers believes Congress may eventually pass greenhouse gas legislation, but is unable to predict the form and timing of any final legislation.

In August 2015, the EPA finalized new rules pursuant to Section 111(b) of the Clean Air Act to limit carbon dioxide emissions from new electric generating units. New coal-fueled units will not be able to meet this limit without installing carbon dioxide control equipment using such methods as carbon capture and sequestration. Also in August 2015, the EPA finalized new rules pursuant to Section 111(b) of the Clean Air Act to limit carbon dioxide emissions from modified or reconstructed electric generating units. Both of these rules are being litigated.

Edgar Filing: CMS ENERGY CORP - Form 10-Q

In October 2015, the EPA published final rules pursuant to Section 111(d) of the Clean Air Act to limit carbon dioxide emissions from existing electric generating units, calling the rules the Clean Power Plan. The rules would require a 32 percent nationwide reduction in carbon emissions from existing power plants by 2030 (based on 2005 levels). Initial state implementation plans would be due September 2016 with extensions available until 2018. States choosing not to develop their own implementation plans would be subject to the federal plan.

Table of Contents

Certain states, corporations, and industry groups have initiated litigation opposing the proposed Clean Power Plan. In February 2016, the U.S. Supreme Court stayed the Clean Power Plan while the litigation proceeds. While Michigan's Attorney General has joined the litigation, the governor had indicated that Michigan plans to file a state carbon implementation plan. In light of the stay of the Clean Power Plan, the State of Michigan has ceased additional work pending outcome of the litigation.

In December 2015, a group of 195 countries finalized the Paris Agreement, which governs carbon dioxide reduction measures beginning in 2020. As part of this agreement, the United States pledged a 26 percent reduction in greenhouse-gas-emissions by 2025 (with aspirations to achieve a 28 percent reduction) compared with 2005 levels. These targets are in line with the now-stayed Clean Power Plan targets. While these emission reduction commitments are non-binding, they will be governed by the Clean Power Plan should it survive judicial scrutiny.

Consumers believes that it is favorably positioned to deal with the impact of carbon regulation through its clean energy plan, its present carbon reduction target, and its emphasis on supply diversity. Consumers cannot, however, predict the outcome of these EPA rules in court, or of Michigan's implementation plan, which was to be submitted for EPA review and approval in 2018, but now will likely be delayed. Consumers will continue to monitor regulatory activity regarding greenhouse gas emissions standards that may affect electric generating units.

Litigation, as well as federal laws, EPA regulations regarding greenhouse gases, or similar treaties, state laws, or rules, if enacted or ratified, could require Consumers to replace equipment, install additional emission control equipment, purchase emission allowances, curtail operations, arrange for alternative sources of supply, or take other steps to manage or lower the emission of greenhouse gases. Although associated capital or operating costs relating to greenhouse gas regulation or legislation could be material and cost recovery cannot be assured, Consumers expects to recover these costs and capital expenditures in rates consistent with the recovery of other reasonable costs of complying with environmental laws and regulations.

CCRs: In April 2015, the EPA published a final rule regulating CCRs, such as coal ash, under the Resource Conservation and Recovery Act. The final rule adopts minimum standards for beneficially reusing and disposing of non-hazardous CCRs. The rule establishes new minimum requirements for site location, groundwater monitoring, flood protection, storm water design, fugitive dust control, and public disclosure of information. The rule also sets out conditions under which CCR units would be forced to cease receiving CCR and non-CCR waste and initiate closure based on the inability to achieve minimum safety standards, meet a location standard, or meet minimum groundwater standards.

Water: The EPA's rule to regulate existing electric generating plant cooling water intake systems under Section 316(b) of the Clean Water Act became effective in October 2014. The rule is aimed at reducing alleged harmful impacts on fish and shellfish. Consumers believes its environmental strategy will allow it to achieve compliance with the final rule. In November 2015, the EPA released its final effluent limitation guidelines, which set stringent new requirements for the discharge of arsenic, mercury, selenium, and nitrogen from electric generating units into wastewater streams.

In June 2015, the EPA and the U.S. Army Corps of Engineers published a final rule redefining waters of the United States, which designates the EPA's jurisdiction under the Clean Water Act. Numerous states and other interested parties, including Michigan's Attorney General, have filed suits in federal courts to block the rule, which was stayed in October 2015, and that litigation remains pending. Consumers does not expect any adverse changes to its environmental strategy as a result of the final rule.

Table of Contents

Many of Consumers' facilities maintain NPDES permits, which are valid for five years and vital to the facilities' operations. Failure of the MDEQ to renew any NPDES permit, a successful appeal against a permit, or onerous terms contained in a permit could have a significant detrimental effect on the operations of a facility.

PCBs: In 2010, the EPA issued an Advance Notice of Proposed Rulemaking, indicating that it is considering a variety of regulatory actions with respect to PCBs. One approach would aim to phase out equipment containing PCBs by 2025. Another approach would eliminate an exemption for small equipment containing PCBs. To comply with any such regulatory actions, Consumers could incur substantial costs associated with existing electrical equipment potentially containing PCBs. A proposed rule is expected in 2016.

Other electric environmental matters could have a material impact on Consumers' outlook. For additional details on other electric environmental matters, see Note 3, Contingencies and Commitments - Consumers Electric Utility Contingencies - Electric Environmental Matters.

Consumers Gas Utility Outlook and Uncertainties

Gas Deliveries: Consumers expects weather-adjusted gas deliveries in 2016 to increase by 1.0 percent compared with 2015. Over the next five years, Consumers plans conservatively for stable deliveries. This outlook reflects modest growth in gas demand offset by the predicted effects of energy efficiency and conservation. Actual delivery levels from year to year may vary from this expectation due to:

- weather fluctuations
- use by power producers
- availability and development of renewable energy sources
- gas price changes
- Michigan economic conditions, including population trends and housing activity
- the price of competing energy sources or fuels
- energy efficiency and conservation impacts

Gas Rate Matters: Rate matters are critical to Consumers' gas utility business. For details on rate matters, see Note 2, Regulatory Matters.

Gas Environmental Outlook: Consumers expects to incur response activity costs at a number of sites, including 23 former MGP sites. For additional details, see Note 3, Contingencies and Commitments Consumers Gas Utility Contingencies Gas Environmental Matters.

Enterprises Outlook and Uncertainties

The primary focus with respect to CMS Energy's non-utility businesses is to optimize cash flow and maximize the value of their generating assets, which represent 1,077 MW of capacity.

Trends, uncertainties, and other matters that could have a material impact on CMS Energy's consolidated income, cash flows, or financial position include:

- changes in energy and capacity prices
- changes in commodity prices and interest rates on certain derivative contracts that do not qualify for hedge accounting and must be marked to market through earnings
- changes in various environmental laws, regulations, principles, or practices, or in their interpretation
- the outcome of certain legal proceedings

Table of Contents

- indemnity and environmental remediation obligations at Bay Harbor
- obligations related to a tax claim from the government of Equatorial Guinea
- representations, warranties, and indemnities provided by CMS Energy in connection with previous sales of assets

For additional details regarding the enterprises segment's uncertainties, see Note 3, Contingencies and Commitments.

Other Outlook and Uncertainties

EnerBank: EnerBank is a Utah state-chartered, FDIC-insured industrial bank providing unsecured consumer installment loans for financing home improvements. EnerBank represented three percent of CMS Energy's net assets at March 31, 2016 and five percent of CMS Energy's net income available to common stockholders for the three months ended March 31, 2016. The carrying value of EnerBank's loan portfolio was \$1.2 billion at March 31, 2016. Its loan portfolio was funded primarily by certificates of deposit of \$1.1 billion. The twelve-month rolling average net default rate on loans held by EnerBank was 0.7 percent at March 31, 2016. CMS Energy is required both by law and by contract to provide financial support, including infusing additional capital, to ensure that EnerBank satisfies mandated capital requirements and has sufficient liquidity to operate. With its self-funding plan, EnerBank has exceeded these requirements historically and exceeded them as of March 31, 2016.

Litigation: CMS Energy, Consumers, and certain of their subsidiaries are named as parties in various litigation matters, as well as in administrative proceedings before various courts and governmental agencies, arising in the ordinary course of business. For additional details regarding these and other legal matters, see Note 2, Regulatory Matters and Note 3, Contingencies and Commitments.

NEW ACCOUNTING STANDARDS

For details regarding new accounting standards issued but not yet effective, see Note 1, New Accounting Standards.

Notes to the Unaudited Consolidated Financial Statements

These interim consolidated financial statements have been prepared by CMS Energy and Consumers in accordance with GAAP for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. As a result, CMS Energy and Consumers have condensed or omitted certain information and note disclosures normally included in consolidated financial statements prepared in accordance with GAAP. CMS Energy and Consumers have reclassified certain prior period amounts to conform to the presentation in the current period. In management's opinion, the unaudited information contained in this report reflects all adjustments of a normal recurring nature necessary to ensure the fair presentation of financial position, results of operations, and cash flows for the periods presented. The notes to the unaudited consolidated financial statements and the related unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes contained in the 2015 Form 10-K. Due to the seasonal nature of CMS Energy's and Consumers' operations, the results presented for this interim period are not necessarily indicative of results to be achieved for the fiscal year.

1: NEW ACCOUNTING STANDARDS

Implementation of New Accounting Standards

ASU 2014-12, Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period: This standard, which was effective on January 1, 2016 for CMS Energy and Consumers, addresses stock awards with performance targets that can be met after an employee has completed the required service period. The standard was issued to resolve diversity in practice regarding the accounting treatment for this type of award. Under the new guidance, the probability of the performance target being met should be factored into compensation expense each period. This guidance is consistent with the accounting that CMS Energy and Consumers already applied to awards of this type. Therefore, the standard had no impact on CMS Energy's or Consumers' consolidated financial statements.

ASU 2015-02, Amendments to the Consolidation Analysis: This standard, which was effective on January 1, 2016 for CMS Energy and Consumers, provides amended guidance on whether reporting entities should consolidate certain legal entities, including limited partnerships. CMS Energy and Consumers determined that the standard does not change any of their consolidation conclusions or have any impact on their consolidated income, cash flows, or financial position.

ASU 2015-03, Simplifying the Presentation of Debt Issuance Costs: This standard, which was effective on January 1, 2016 for CMS Energy and Consumers, requires that debt issuance costs be presented as a direct deduction from the carrying amount of long-term debt on the balance sheet. Previously, debt issuance costs were reported as an asset. The new guidance aligns the presentation of debt issuance costs with debt discounts

Edgar Filing: CMS ENERGY CORP - Form 10-Q

and premiums. In accordance with the standard, CMS Energy included \$40 million and Consumers included \$22 million of unamortized debt issuance costs in long-term debt on their consolidated balance sheets at March 31, 2016. In addition, this standard requires that companies apply the new guidance retrospectively to all prior periods presented. Accordingly, CMS Energy reclassified \$41 million and Consumers reclassified \$23 million of unamortized debt issuance costs from other non-current assets to long-term debt on their consolidated balance sheets at December 31, 2015.

Table of Contents

ASU 2016-09, Improvements to Employee Share-Based Payment Accounting: This standard was issued to simplify and improve the accounting for employee share-based payment awards. The standard will be effective on January 1, 2017 for CMS Energy and Consumers, but early adoption is permitted. CMS Energy and Consumers elected to adopt the standard as of January 1, 2016. The standard requires all excess tax benefits and deficiencies that occur upon vesting of employee stock awards to be recognized in net income. Previously, CMS Energy and Consumers did not record excess tax benefits on restricted stock awards in net income but, under this standard, CMS Energy and Consumers recorded \$6 million of excess tax benefits in net income for the three months ended March 31, 2016. Also, in accordance with the standard, CMS Energy recorded a \$33 million cumulative adjustment to its accumulated deficit at January 1, 2016. This amount represented excess federal tax benefits that CMS Energy had not recognized in prior periods due to the use of tax loss carryforwards. The implementation of this standard had no other material impacts on CMS Energy's or Consumers' consolidated financial statements.

New Accounting Standards Not Yet Effective

ASU 2014-09, Revenue from Contracts with Customers: This standard, which will become effective January 1, 2018 for CMS Energy and Consumers, provides new guidance for recognizing revenue from contracts with customers. A primary objective of the standard is to provide a single, comprehensive revenue recognition model that will be applied across entities, industries, and capital markets. The new guidance will replace most of the existing revenue recognition requirements in GAAP, although certain guidance specific to rate-regulated utilities will be retained. Entities will have the option to apply the standard retrospectively to all prior periods presented, or to apply it retrospectively only to contracts existing at the effective date, with the cumulative effect of the standard recorded as an adjustment to beginning retained earnings. CMS Energy and Consumers are evaluating the impact of the standard on their consolidated financial statements.

ASU 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities: This standard, which will be effective January 1, 2018 for CMS Energy and Consumers, is intended to improve the accounting for financial instruments. The standard will require investments in equity securities to be measured at fair value, with changes in fair value recognized in net income, except for certain investments such as those that qualify for equity-method accounting. The standard will no longer permit unrealized gains and losses for certain equity investments to be recorded in AOCI. CMS Energy and Consumers presently record unrealized gains and losses on certain equity investments, including the mutual funds in the DB SERP and Consumers' investment in CMS Energy common stock, in AOCI. For further details on these investments, see Note 6, Financial Instruments. Entities will apply the standard using a modified retrospective approach, with a cumulative-effect adjustment recorded to beginning retained earnings on the effective date. CMS Energy and Consumers are evaluating whether there may be further impacts of the standard on their consolidated financial statements.

ASU 2016-02, Leases: This standard, which will be effective January 1, 2019 for CMS Energy and Consumers, establishes a new accounting model for leases. The standard will require companies to recognize lease assets and liabilities on the balance sheet for all leases with a term of more than one year, including operating leases, which are not recorded on the balance sheet under existing standards. The new guidance will also amend the definition of a lease to require that a lessee control the use of a specified asset, and not simply control or take the output of the asset. On the income statement, leases that meet existing capital lease criteria will generally be accounted for under a financing model, while operating leases will generally be accounted for under a straight-line expense model. CMS Energy and Consumers are evaluating the impact of the standard on their consolidated financial statements.

Table of Contents

2: REGULATORY MATTERS

Regulatory matters are critical to Consumers. The Michigan Attorney General, ABATE, the MPSC Staff, and certain other parties typically participate in MPSC proceedings concerning Consumers, such as Consumers' rate cases and PSCR and GCR processes. These parties often challenge various aspects of those proceedings, including the prudence of Consumers' policies and practices, and seek cost disallowances and other relief. The parties also have appealed significant MPSC orders. Depending upon the specific issues, the outcomes of rate cases and proceedings, including judicial proceedings challenging MPSC orders or other actions, could negatively affect CMS Energy's and Consumers' liquidity, financial condition, and results of operations. Consumers cannot predict the outcome of these proceedings.

There are multiple appeals pending that involve various issues concerning cost allocation among customers, the adequacy of the record evidence supporting the recovery of Smart Energy investments, and other matters. Consumers is unable to predict the outcome of these appeals.

Electric Rate Case: In December 2014, Consumers filed an application with the MPSC seeking an annual rate increase of \$163 million, based on a 10.7 percent authorized return on equity. In June 2015, Consumers self-implemented an annual rate increase of \$110 million, subject to refund with interest. The MPSC issued an order in November 2015, authorizing an annual rate increase of \$165 million, based on a 10.3 percent authorized rate of return on equity. In April 2016, upon the retirement of seven coal-fueled electric generating units, the annual rate increase was reduced to \$126 million.

In February 2016, Consumers filed a reconciliation of total revenues collected during self-implementation to those that would have collected under final rates. Consumers' reconciliation indicated that no refund would be required.

Gas Rate Case: In July 2015, Consumers filed an application with the MPSC seeking an annual rate increase of \$85 million, based on a 10.7 percent authorized return on equity. In January 2016, Consumers self-implemented an annual rate increase of \$60 million, subject to refund with interest. In April 2016, the MPSC approved a settlement agreement authorizing a \$40 million annual rate increase. Consumers had a recorded reserve for customer refunds at March 31, 2016 that it believes is adequate.

Energy Optimization Plan Incentive: Consumers will file its 2015 energy optimization reconciliation in 2016, requesting the MPSC's approval to collect the maximum performance incentive of \$18 million from customers for exceeding its statutory savings targets in 2015 and for achieving certain other goals.

3: CONTINGENCIES AND COMMITMENTS

CMS Energy and Consumers are involved in various matters that give rise to contingent liabilities. Depending on the specific issues, the resolution of these contingencies could negatively affect CMS Energy's and Consumers' liquidity, financial condition, and results of operations. In their disclosures of these matters, CMS Energy and Consumers provide an estimate of the possible loss or range of loss when such an estimate can be made. Disclosures that state that CMS Energy or Consumers cannot predict the outcome of a matter indicate that they are unable to

estimate a possible loss or range of loss for the matter.

CMS Energy Contingencies

Gas Index Price Reporting Litigation: CMS Energy, along with CMS MST, CMS Field Services, Cantera Natural Gas, Inc., and Cantera Gas Company, have been named as defendants in four class action lawsuits and one individual lawsuit arising as a result of alleged inaccurate natural gas price reporting to publications that report trade information. Allegations include price-fixing conspiracies, restraint of trade, and artificial inflation of natural gas retail prices in Kansas, Missouri, and Wisconsin. Plaintiffs are

Table of Contents

making claims for the following: treble damages, full consideration damages, exemplary damages, costs, interest, and/or attorneys' fees.

After removal to federal court, all of the cases were transferred to a single federal district court pursuant to the multidistrict litigation process. In 2010 and 2011, all claims against CMS Energy defendants were dismissed by the district court based on FERC preemption. Plaintiffs filed appeals in all of the cases. The issues on appeal were whether the district court erred in dismissing the cases based on FERC preemption and denying the plaintiffs' motions for leave to amend their complaints to add a federal Sherman Act antitrust claim. The plaintiffs did not appeal the dismissal of CMS Energy as a defendant in these cases, but other CMS Energy entities remain as defendants.

In 2013, the U.S. Court of Appeals for the Ninth Circuit reversed the district court decision. The appellate court found that FERC preemption does not apply under the facts of these cases. The appellate court affirmed the district court's denial of leave to amend to add federal antitrust claims. The matter was appealed to the U.S. Supreme Court, which in 2015 upheld the Ninth Circuit's decision. The cases have been remanded back to the federal district court.

These cases involve complex facts, a large number of similarly situated defendants with different factual positions, and multiple jurisdictions. Presently, any estimate of liability would be highly speculative; the amount of CMS Energy's reasonably possible loss would be based on widely varying models previously untested in this context. If the outcome after appeals is unfavorable, these cases could negatively affect CMS Energy's liquidity, financial condition, and results of operations.

Bay Harbor: CMS Land retained environmental remediation obligations for the collection and treatment of leachate, a liquid consisting of water and other substances, at Bay Harbor after selling its interests in the development in 2002. Leachate is produced when water enters into cement kiln dust piles left over from former cement plant operations at the site. In 2012, CMS Land and the MDEQ finalized an agreement that established the final remedies and the future water quality criteria at the site. CMS Land completed all construction necessary to implement the remedies required by the agreement and will continue to maintain and operate a system to discharge treated leachate into Little Traverse Bay under an NPDES permit issued in 2010. CMS Land is presently working with the MDEQ to renew this permit, which requires renewal every five years. Until a new permit is issued, CMS Land is authorized to continue operating under the existing permit.

Various claims have been brought against CMS Land or its affiliates, including CMS Energy, alleging environmental damage to property, loss of property value, insufficient disclosure of environmental matters, breach of agreement relating to access, or other matters. CMS Land and other parties have received a demand for payment from the EPA in the amount of \$8 million, plus interest. The EPA is seeking recovery under CERCLA of response costs allegedly incurred at Bay Harbor. These costs exceed what was agreed to in a 2005 order between CMS Land and the EPA, and CMS Land has communicated to the EPA that it does not believe that this is a valid claim. The EPA has filed a lawsuit to collect these costs.

Table of Contents

At March 31, 2016, CMS Energy had a recorded liability of \$54 million for its remaining obligations. CMS Energy calculated this liability based on discounted projected costs, using a discount rate of 4.34 percent and an inflation rate of one percent on annual operating and maintenance costs. The undiscounted amount of the remaining obligation is \$69 million. CMS Energy expects to pay the following amounts for long-term liquid disposal and operating and maintenance costs in 2016 and in each of the next four years:

	2016	2017	2018	2019	<i>In Millions</i> 2020
CMS Energy					
Long-term liquid disposal and operating and maintenance costs	\$ 6	\$ 5	\$ 4	\$ 4	\$ 4

CMS Energy's estimate of response activity costs and the timing of expenditures could change if there are changes in circumstances or assumptions used in calculating the liability. Although a liability for its present estimate of remaining response activity costs has been recorded, CMS Energy cannot predict the ultimate financial impact or outcome of this matter.

Equatorial Guinea Tax Claim: In 2002, CMS Energy sold its oil, gas, and methanol investments in Equatorial Guinea. The government of Equatorial Guinea claims that CMS Energy owes \$152 million in taxes, plus significant penalties and interest, in connection with the sale. The matter is proceeding to formal arbitration. CMS Energy has concluded that the government's tax claim is without merit and is contesting the claim, but cannot predict the financial impact or outcome of the matter. An unfavorable outcome could have a material adverse effect on CMS Energy's liquidity, financial condition, and results of operations.

Consumers Electric Utility Contingencies

Electric Environmental Matters: Consumers' operations are subject to environmental laws and regulations. Historically, Consumers has generally been able to recover, in customer rates, the costs to operate its facilities in compliance with these laws and regulations.

Cleanup and Solid Waste: Consumers expects to incur remediation and other response activity costs at a number of sites under the NREPA. Consumers believes that these costs should be recoverable in rates, but cannot guarantee that outcome. Consumers estimates that its liability for NREPA sites for which it can estimate a range of loss will be between \$3 million and \$5 million. At March 31, 2016, Consumers had a recorded liability of \$3 million, the minimum amount in the range of its estimated probable NREPA liability.

Consumers is a potentially responsible party at a number of contaminated sites administered under CERCLA. CERCLA liability is joint and several. In 2010, Consumers received official notification from the EPA that identified Consumers as a potentially responsible party for cleanup of PCBs at the Kalamazoo River CERCLA site. The notification claimed that the EPA has reason to believe that Consumers disposed of PCBs and arranged for the disposal and treatment of PCB-containing materials at portions of the site. In 2011, Consumers received a follow-up letter from the EPA requesting that Consumers agree to participate in a removal action plan along with several other companies for an area of lower Portage Creek, which is connected to the Kalamazoo River. All parties, including Consumers, that were asked to participate in the removal action plan declined to accept liability. Until further information is received from the EPA, Consumers is unable to estimate a range of potential liability for cleanup of the river.

Based on its experience, Consumers estimates that its share of the total liability for known CERCLA sites will be between \$3 million and \$8 million. Various factors, including the number of potentially responsible parties involved with each site, affect Consumers share of the total liability. At

Table of Contents

March 31, 2016, Consumers had a recorded liability of \$3 million for its share of the total liability at these sites, the minimum amount in the range of its estimated probable CERCLA liability.

The timing of payments related to Consumers' remediation and other response activities at its CERCLA and NREPA sites is uncertain. Consumers periodically reviews these cost estimates. A change in the underlying assumptions, such as an increase in the number of sites, different remediation techniques, the nature and extent of contamination, and legal and regulatory requirements, could affect its estimates of NREPA and CERCLA liability.

Ludington PCB: In 1998, during routine maintenance activities, Consumers identified PCB as a component in certain paint, grout, and sealant materials at Ludington. Consumers removed part of the PCB material and replaced it with non-PCB material. Consumers has had several communications with the EPA regarding this matter. Consumers cannot predict the financial impact or outcome of this matter.

Consumers Gas Utility Contingencies

Gas Environmental Matters: Consumers expects to incur remediation and other response activity costs at a number of sites under the NREPA. These sites include 23 former MGP facilities. Consumers operated the facilities on these sites for some part of their operating lives. For some of these sites, Consumers has no present ownership interest or may own only a portion of the original site.

At March 31, 2016, Consumers had a recorded liability of \$114 million for its remaining obligations for these sites. This amount represents the present value of long-term projected costs, using a discount rate of 2.57 percent and an inflation rate of 2.5 percent. The undiscounted amount of the remaining obligation is \$130 million. Consumers expects to pay the following amounts for remediation and other response activity costs in 2016 and in each of the next four years:

	2016	2017	2018	2019	<i>In Millions</i> 2020
Consumers					
Remediation and other response activity costs	\$ 15	\$ 20	\$ 11	\$ 14	\$ 19

Consumers periodically reviews these cost estimates. Any significant change in the underlying assumptions, such as an increase in the number of sites, changes in remediation techniques, or legal and regulatory requirements, could affect Consumers' estimates of annual response activity costs and the MGP liability. At one of the MGP sites, Consumers is evaluating the timing and approach of its remediation strategy, which could result in a change to its cost estimates in 2016.

Pursuant to orders issued by the MPSC, Consumers defers its MGP-related remediation costs and recovers them from its customers over a ten-year period. At March 31, 2016, Consumers had a regulatory asset of \$145 million related to the MGP sites.

Edgar Filing: CMS ENERGY CORP - Form 10-Q

Consumers estimates that its liability to perform remediation and other response activities at NREPA sites other than the MGP sites could reach \$3 million. At March 31, 2016, Consumers had a recorded liability of less than \$1 million, the minimum amount in the range of its estimated probable liability.

Table of Contents

Guarantees

Presented in the following table are CMS Energy's and Consumers' guarantees at March 31, 2016:

Guarantee Description	Issue Date	Expiration Date	Maximum Obligation	<i>In Millions</i> Carrying Amount
CMS Energy, including Consumers				
Indemnity obligations from asset sales and other agreements ¹	Various	Indefinite	\$ 153	\$ 7
Guarantees ²	Various	Indefinite	49	-
Consumers				
Guarantee ²	July 2011	Indefinite	\$ 30	\$ -

¹ These obligations arose from stock and asset sale agreements under which CMS Energy or a subsidiary of CMS Energy indemnified the purchaser for losses resulting from various matters, primarily claims related to taxes. CMS Energy believes the likelihood of material loss to be remote for the indemnity obligations not recorded as liabilities.

² At Consumers, this obligation comprises a guarantee provided to the DOE in connection with a settlement agreement regarding damages resulting from the DOE's failure to accept spent nuclear fuel from nuclear power plants formerly owned by Consumers. At CMS Energy, the guarantee obligations comprise Consumers' guarantee to the DOE and CMS Energy's 1994 guarantee of non-recourse revenue bonds issued by Genesee.

Additionally, in the normal course of business, CMS Energy, Consumers, and certain other subsidiaries of CMS Energy have entered into various agreements containing tax and other indemnity provisions for which they are unable to estimate the maximum potential obligation. The current carrying value of these indemnity obligations is less than \$1 million. CMS Energy and Consumers consider the likelihood that they would be required to perform or incur substantial losses related to these indemnities to be remote.

Other Contingencies

Michigan Sales and Use Tax Litigation: In 2010, the Michigan Department of Treasury finalized a sales and use tax audit of Consumers for the period from October 1997 to December 2004. It determined that Consumers' electric and natural gas distribution equipment was not eligible for an industrial-processing exemption and therefore was subject to the use tax. Consumers paid the tax for the period from 1997 through 2004 and filed a claim in the Michigan Court of Claims disputing the tax determination. Consumers has continued to apply the industrial-processing exemption for the years subsequent to 2004.

Edgar Filing: CMS ENERGY CORP - Form 10-Q

In December 2015, Consumers and the Michigan Department of Treasury reached a settlement agreement under which the Michigan Department of Treasury will refund to Consumers the majority of use tax that Consumers paid on electric distribution equipment for the period from October 1997 through December 2004. Accordingly, Consumers will receive \$37 million, which comprises a \$19 million refund of taxes paid, a \$12 million refund of interest paid, and \$6 million of interest owed to Consumers. Consumers recognized the effects of this settlement agreement in its consolidated financial statements in December 2015.

The parties continue to meet to reach agreement on a reasonable method of apportionment relating to Consumers' natural gas system for the period from October 1997 to December 2004 and to Consumers' electric and natural gas distribution equipment for the period from January 2005 to December 2014.

Other: In addition to the matters disclosed in this Note and Note 2, Regulatory Matters, there are certain other lawsuits and administrative proceedings before various courts and governmental agencies arising in

Table of Contents

the ordinary course of business to which CMS Energy, Consumers, and certain other subsidiaries of CMS Energy are parties. These other lawsuits and proceedings may involve personal injury, property damage, contracts, environmental matters, federal and state taxes, rates, licensing, employment, and other matters. Further, CMS Energy and Consumers occasionally self-report certain regulatory non-compliance matters that may or may not eventually result in administrative proceedings. CMS Energy and Consumers believe that the outcome of any one of these proceedings will not have a material negative effect on their consolidated results of operations, financial condition, or liquidity.

4: FINANCINGS AND CAPITALIZATION

Term Loan: In April 2016, CMS Energy reached an agreement to extend the maturity date of its \$180 million term loan by one year, through April 2018.

Revolving Credit Facilities: The following secured revolving credit facilities with banks were available at March 31, 2016:

Expiration Date	Amount of Facility	Amount Borrowed	Letters of Credit Outstanding	<i>In Millions</i>	
				Amount Available	
CMS Energy parent					
May 27, 2020 ¹	\$ 550	\$ -	\$ 1	\$ 549	
Consumers					
May 27, 2020 ²	\$ 650	\$ -	\$ 7	\$ 643	
November 23, 2017 ²	250	-	-	250	
May 9, 2018 ²	30	-	30	-	

¹ During the three months ended March 31, 2016, CMS Energy's average borrowings totaled \$10 million with a weighted-average interest rate of 1.68 percent. Obligations under this facility are secured by Consumers common stock.

² Obligations under this facility are secured by first mortgage bonds of Consumers.

Short-term Borrowings: Under Consumers' commercial paper program, Consumers may issue, in one or more placements, commercial paper notes with maturities of up to 365 days and that bear interest at fixed or floating rates. These issuances are supported by Consumers' \$650 million revolving credit facility and may have an aggregate principal amount outstanding of up to \$500 million. While the amount of outstanding commercial paper does not reduce the revolver's available capacity, Consumers would not issue commercial paper in an amount exceeding the available revolver capacity. At March 31, 2016, no commercial paper notes were outstanding under this program.

Dividend Restrictions: At March 31, 2016, payment of dividends by CMS Energy on its common stock was limited to \$4.1 billion under provisions of the Michigan Business Corporation Act of 1972.

Under the provisions of its articles of incorporation, at March 31, 2016, Consumers had \$902 million of unrestricted retained earnings available to pay dividends on its common stock to CMS Energy. Provisions of the Federal Power Act and the Natural Gas Act appear to restrict dividends payable by Consumers to the amount of Consumers' retained earnings. Several decisions from FERC suggest that under a variety of circumstances dividends from Consumers on its common stock would not be limited to amounts in Consumers' retained earnings. Any decision by Consumers to pay dividends on its common stock in excess of retained earnings would be based on specific facts and circumstances and would be subject to a formal regulatory filing process.

Table of Contents

For the three months ended March 31, 2016, Consumers paid \$155 million in dividends on its common stock to CMS Energy.

Issuance of Common Stock: In April 2015, CMS Energy entered into an updated continuous equity offering program permitting it to sell, from time to time in at the market offerings, common stock having an aggregate sales price of up to \$100 million. Presented in the following table are the transactions that CMS Energy entered into under the program:

	Number of Shares Issued	Average Price per Share	Proceeds (In Millions)
April July 2015	888,610	\$ 33.76	\$ 30
March 2016	1,449,171	41.40	60
Total	2,337,781	\$ 38.50	\$ 90

5: FAIR VALUE MEASUREMENTS

Accounting standards define fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. When measuring fair value, CMS Energy and Consumers are required to incorporate all assumptions that market participants would use in pricing an asset or liability, including assumptions about risk. A fair value hierarchy prioritizes inputs used to measure fair value according to their observability in the market. The three levels of the fair value hierarchy are as follows:

- Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2 inputs are observable, market-based inputs, other than Level 1 prices. Level 2 inputs may include quoted prices for similar assets or liabilities in active markets, quoted prices in inactive markets, and inputs derived from or corroborated by observable market data.
- Level 3 inputs are unobservable inputs that reflect CMS Energy's or Consumers' own assumptions about how market participants would value their assets and liabilities.

CMS Energy and Consumers classify fair value measurements within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement in its entirety.

Table of Contents**Assets and Liabilities Measured at Fair Value on a Recurring Basis**

Presented in the following table are CMS Energy's and Consumers' assets and liabilities recorded at fair value on a recurring basis:

	CMS Energy, including Consumers		Consumers		<i>In Millions</i>
	March 31	December 31	March 31	December 31	
	2016	2015	2016	2015	
<i>Assets¹</i>					
Cash equivalents	\$ 85	\$ 158	\$ -	\$ -	
Restricted cash equivalents	28	19	28	19	
CMS Energy common stock	-	-	34	29	
Nonqualified deferred compensation plan assets	10	10	7	7	
<i>DB SERP</i>					
Cash equivalents	1	2	1	2	
Mutual funds	145	146	104	104	
<i>Derivative instruments</i>					
Commodity contracts	1	1	1	1	
Total	\$ 270	\$ 336	\$ 175	\$ 162	
<i>Liabilities¹</i>					
Nonqualified deferred compensation plan liabilities	\$ 10	\$ 10	\$ 7	\$ 7	
Total	\$ 10	\$ 10	\$ 7	\$ 7	

¹ All assets and liabilities were classified as Level 1 with the exception of commodity contracts, which were classified as Level 3 and which were insignificant at March 31, 2016 and December 31, 2015.

Cash Equivalents: Cash equivalents and restricted cash equivalents consist of money market funds with daily liquidity.

Nonqualified Deferred Compensation Plan Assets and Liabilities: The nonqualified deferred compensation plan assets consist of mutual funds, which are valued using daily quoted NAVs. CMS Energy and Consumers value their nonqualified deferred compensation plan liabilities based on the fair values of the plan assets, as they reflect what is owed to the plan participants in accordance with their investment elections. CMS Energy and Consumers report the assets in other non-current assets and the liabilities in other non-current liabilities on their consolidated balance sheets.

DB SERP Assets: The DB SERP cash equivalents consist of a money market fund with daily liquidity. The DB SERP invests in mutual funds that hold primarily fixed-income instruments of varying maturities. In order to meet their investment objectives, the funds hold investment-grade debt securities and may invest a portion of their assets in high-yield securities, foreign debt, and derivative instruments. CMS Energy and Consumers value these funds using daily quoted NAVs. CMS Energy and Consumers report their DB SERP assets in other non-current assets on their consolidated balance sheets. For additional details about DB SERP securities, see Note 6, Financial Instruments.

Derivative Instruments: CMS Energy and Consumers value their derivative instruments using either a market approach that incorporates information from market transactions, or an income approach that discounts future expected cash flows to a present value amount. CMS Energy's and Consumers' derivatives are classified as Level 3.

Table of Contents

The majority of these derivatives are FTRs held by Consumers. Consumers uses FTRs to manage price risk related to electricity transmission congestion. An FTR is a financial instrument that entitles its holder to receive compensation or requires its holder to remit payment for congestion-related transmission charges. Under regulatory accounting, all changes in fair value associated with FTRs are deferred as regulatory assets and liabilities until the instruments are settled. Due to the lack of quoted pricing information, Consumers determines the fair value of its FTRs based on Consumers' average historical settlements.

6: FINANCIAL INSTRUMENTS

Presented in the following table are the carrying amounts and fair values, by level within the fair value hierarchy, of CMS Energy's and Consumers' financial instruments that are not recorded at fair value. The table does not include information on cash, cash equivalents, short-term accounts and notes receivable, short-term investments, and current liabilities since the carrying amounts of these items approximate their fair values because of their short-term nature. For information about assets and liabilities recorded at fair value and for additional details regarding the fair value hierarchy, see Note 5, Fair Value Measurements.

	<i>In Millions</i>										
	Carrying Amount	March 31, 2016			December 31, 2015			Carrying Amount	Fair Value		
		Total	Level 1	Level 2	Level 3	Total	Level 1		Level 2	Level 3	
CMS Energy, including Consumers											
Securities held to maturity	\$ 13	\$ 13	\$ -	\$ 13	\$ -	\$ 11	\$ 11	\$ -	\$ 11	\$ -	\$ -
Long-term payable ¹	14	15	-	-	15	14	14	-	-	-	14
Notes receivable ²	1,175	1,256	-	-	1,256	1,161	1,228	-	-	-	1,228
Long-term debt ³	9,099	9,841	-	8,856	985	9,084	9,599	-	8,648	-	951
Consumers											
Long-term debt ⁴	\$ 5,382	\$ 5,853	\$ -	\$ 4,868	\$ 985	\$ 5,381	\$ 5,684	\$ -	\$ 4,733	\$ -	\$ 951

¹ Includes current portion of long-term payable of \$1 million at March 31, 2016 and December 31, 2015.

² Includes current portion of notes receivable of \$151 million at March 31, 2016 and \$144 million at December 31, 2015.

³ Includes current portion of long-term debt of \$929 million at March 31, 2016 and \$684 million at December 31, 2015.

⁴ Includes current portion of long-term debt of \$448 million at March 31, 2016 and \$198 million at December 31, 2015.

Notes receivable consist of EnerBank's fixed-rate installment loans. EnerBank estimates the fair value of these loans using a discounted cash flows technique that incorporates market interest rates as well as assumptions about the remaining life of the loans and credit risk.

CMS Energy and Consumers estimate the fair value of their long-term debt using quoted prices from market trades of the debt, if available. In the absence of quoted prices, CMS Energy and Consumers calculate market yields and prices for the debt using a matrix method that incorporates market data for

Table of Contents

similarly rated debt. Depending on the information available, other valuation techniques and models may be used that rely on assumptions that cannot be observed or confirmed through market transactions.

The effects of third-party credit enhancements are excluded from the fair value measurements of long-term debt. At March 31, 2016 and December 31, 2015, CMS Energy's long-term debt included \$103 million principal amount that was supported by third-party credit enhancements. This entire principal amount was at Consumers.

Presented in the following table are CMS Energy's and Consumers' investment securities classified as available for sale or held to maturity:

	March 31, 2016				December 31, 2015				<i>In Millions</i>
	Cost	Unrealized Gains	Unrealized Losses	Fair Value	Cost	Unrealized Gains	Unrealized Losses	Fair Value	
CMS Energy, including Consumers									
<i>Available for sale</i>									
<i>DB SERP</i>									
Mutual funds	\$ 152	\$ -	\$ 7	\$ 145	\$ 152	\$ -	\$ 6	\$ 146	
<i>Held to maturity</i>									
Debt securities	13	-	-	13	11	-	-	11	
Consumers									
<i>Available for sale</i>									
<i>DB SERP</i>									
Mutual funds	\$ 109	\$ -	\$ 5	\$ 104	\$ 108	\$ -	\$ 4	\$ 104	
CMS Energy common stock	4	30	-	34	4	25	-	29	

The mutual funds classified as available for sale hold primarily fixed-income instruments of varying maturities. Debt securities classified as held to maturity consist primarily of mortgage-backed securities and Utah Housing Corporation bonds held by EnerBank.

7: NOTES RECEIVABLE

Presented in the following table are details of CMS Energy's current and non-current notes receivable:

	<i>In Millions</i>	
	March 31, 2016	December 31, 2015
CMS Energy, including Consumers		
<i>Current</i>		
EnerBank notes receivable, net of allowance for loan losses	\$ 135	\$ 128
EnerBank notes receivable held for sale	16	16
<i>Non-current</i>		

Edgar Filing: CMS ENERGY CORP - Form 10-Q

EnerBank notes receivable	1,024	1,017
Total notes receivable	\$ 1,175	\$ 1,161

EnerBank notes receivable are unsecured consumer installment loans for financing home improvements. EnerBank records its notes receivable at cost, less allowance for loan losses. At March 31, 2016, \$16 million of notes receivable were classified as held for sale; the fair value of notes receivable held for sale exceeded their carrying value. These notes are expected to be sold in 2016.

Authorized contractors pay fees to EnerBank to provide borrowers with same-as-cash, zero interest, or reduced interest loans. Unearned income associated with the loan fees, which is recorded as a reduction to

Table of Contents

notes receivable on CMS Energy's consolidated balance sheets, was \$83 million at March 31, 2016 and \$82 million at December 31, 2015.

The allowance for loan losses is a valuation allowance to reflect estimated credit losses. The allowance is increased by the provision for loan losses and decreased by loan charge-offs net of recoveries. Management estimates the allowance balance required by taking into consideration historical loan loss experience, the nature and volume of the portfolio, economic conditions, and other factors. Loan losses are charged against the allowance when the loss is confirmed, but no later than the point at which a loan becomes 120 days past due.

Loans that are 30 days or more past due are considered delinquent. The balance of EnerBank's delinquent consumer loans was \$8 million at March 31, 2016 and at December 31, 2015.

At March 31, 2016 and December 31, 2015, \$1 million of EnerBank's loans had been modified as troubled debt restructurings.

8: RETIREMENT BENEFITS

CMS Energy and Consumers provide pension, OPEB, and other retirement benefits to employees under a number of different plans.

In January 2016, CMS Energy and Consumers changed the method they use to determine the discount rate used to calculate the service cost and interest expense components of net periodic benefit costs for the DB Pension and OPEB Plans. Historically, the discount rate used for this purpose represented a single weighted-average rate derived from the yield curve used to determine the benefit obligation. CMS Energy and Consumers have elected to use instead a full-yield-curve approach in the estimation of service cost and interest expense; this approach is more accurate in that it applies individual spot rates along the yield curve to future projected benefit payments based on the time of payment. For the three months ended March 31, 2016, the service cost and interest expense components of net periodic benefit costs were reduced by \$6 million for the DB Pension Plan and by \$3 million for the OPEB Plan for both CMS Energy and Consumers as a result of changing to the full-yield-curve approach to determine the discount rate.

Table of Contents

Presented in the following table are the costs (credits) and other changes in plan assets and benefit obligations incurred in CMS Energy's and Consumers' retirement benefits plans:

Three Months Ended March 31	DB Pension Plan		OPEB Plan	
	2016	2015	2016	2015
<i>In Millions</i>				
CMS Energy, including Consumers				
<i>Net periodic cost (credit)</i>				
Service cost	\$ 11	\$ 12	\$ 5	\$ 6
Interest expense	21	25	12	15
Expected return on plan assets	(37)	(34)	(22)	(23)
<i>Amortization of:</i>				
Net loss	17	23	5	5
Prior service cost (credit)	1	-	(10)	(10)
Net periodic cost (credit)	\$ 13	\$ 26	\$ (10)	\$ (7)
Consumers				
<i>Net periodic cost (credit)</i>				
Service cost	\$ 10	\$ 12	\$ 4	\$ 6
Interest expense	21	25	11	14
Expected return on plan assets	(36)	(33)	(20)	(22)
<i>Amortization of:</i>				
Net loss	17	22	6	6
Prior service cost (credit)	1	-	(10)	(10)
Net periodic cost (credit)	\$ 13	\$ 26	\$ (9)	\$ (6)

9: INCOME TAXES

Presented in the following table is a reconciliation of the statutory U.S. federal income tax rate to the effective income tax rate from continuing operations:

Three Months Ended March 31	2016	2015
CMS Energy, including Consumers		
U.S. federal income tax rate	35.0 %	35.0 %
<i>Increase (decrease) in income taxes from:</i>		
State and local income taxes, net of federal effect	4.1	4.8
Accelerated flow-through of regulatory tax benefits	(4.7)	(4.9)
Employee share-based awards ¹	(2.2)	-
Other, net	(1.1)	(1.8)
Effective tax rate	31.1 %	33.1 %
Consumers		
U.S. federal income tax rate	35.0 %	35.0 %
<i>Increase (decrease) in income taxes from:</i>		
State and local income taxes, net of federal effect	4.4	4.7
Accelerated flow-through of regulatory tax benefits	(4.2)	(4.4)
Employee share-based awards ¹	(2.0)	-
Other, net	(0.9)	(1.5)
Effective tax rate	32.3 %	33.8 %

¹ CMS Energy and Consumers elected to adopt ASU 2016-09, *Improvements to Employee Share-Based Payment Accounting*, as of January 1, 2016. For further details on the implementation of this standard, see Note 1, New Accounting Standards.

Table of Contents**10: EARNINGS PER SHARE CMS ENERGY**

Presented in the following table are CMS Energy's basic and diluted EPS computations based on net income:

Three Months Ended March 31	<i>In Millions, Except Per Share Amounts</i>	
	2016	2015
<i>Income available to common stockholders</i>		
Net income available to common stockholders - basic and diluted	\$ 164	\$ 202
<i>Average common shares outstanding</i>		
Weighted-average shares - basic	276.7	274.8
Add dilutive nonvested stock awards	1.2	0.9
Weighted-average shares - diluted	277.9	275.7
<i>Net income per average common share available to common stockholders</i>		
Basic	\$ 0.59	\$ 0.73
Diluted	0.59	0.73

Nonvested Stock Awards

CMS Energy's nonvested stock awards are composed of participating and non-participating securities. The participating securities accrue cash dividends when common stockholders receive dividends. Since the recipient is not required to return the dividends to CMS Energy if the recipient forfeits the award, the nonvested stock awards are considered participating securities. As such, the participating nonvested stock awards were included in the computation of basic EPS. The non-participating securities accrue stock dividends that vest concurrently with the stock award. If the recipient forfeits the award, the stock dividends accrued on the non-participating securities are also forfeited. Accordingly, the non-participating awards and stock dividends were included in the computation of diluted EPS, but not basic EPS.

11: REPORTABLE SEGMENTS

Reportable segments consist of business units defined by the products and services they offer. CMS Energy and Consumers evaluate the performance of each segment based on its contribution to net income available to CMS Energy's common stockholders.

CMS Energy

The reportable segments for CMS Energy are:

- electric utility, consisting of regulated activities associated with the generation, transmission, and distribution of electricity in Michigan
- gas utility, consisting of regulated activities associated with the transportation, storage, and distribution of natural gas in Michigan
- enterprises, consisting of various subsidiaries engaging primarily in domestic independent power production

CMS Energy presents EnerBank and corporate interest and other expenses within other reconciling items.

Table of Contents

Consumers

The reportable segments for Consumers are:

- electric utility, consisting of regulated activities associated with the generation, transmission, and distribution of electricity in Michigan
- gas utility, consisting of regulated activities associated with the transportation, storage, and distribution of natural gas in Michigan

Consumers other consolidated entities are presented within other reconciling items.

Presented in the following tables is financial information by reportable segment:

Three Months Ended March 31	2016	<i>In Millions</i> 2015
CMS Energy, including Consumers		
<i>Operating revenue</i>		
Electric utility	\$ 1,013	\$ 1,033
Gas utility	710	995

¹ Amounts include a portion of Consumers other common assets attributable to both the electric and gas utility businesses.

² CMS Energy and Consumers changed the reporting of debt issuance costs on their consolidated balance sheets in accordance with ASU 2015-03, *Simplifying the Presentation of Debt Issuance Costs*, as of January 1, 2016, and retrospectively adjusted prior-period amounts for comparability. For further details on the implementation of this standard, see Note 1, New Accounting Standards.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's discussion and analysis of financial condition and results of operations for CMS Energy and Consumers is contained in Part I Item 1. Financial Statements MD&A, which is incorporated by reference herein.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes to market risk as previously disclosed in Part II Item 7A. Quantitative and Qualitative Disclosures About Market Risk, in the 2015 Form 10-K.

Item 4. Controls and Procedures

CMS ENERGY

Disclosure Controls and Procedures: CMS Energy's management, with the participation of its CEO and CFO, has evaluated the effectiveness of its disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based on such evaluation, CMS Energy's CEO and CFO have concluded that, as of the end of such period, its disclosure controls and procedures are effective.

Internal Control Over Financial Reporting: There have not been any changes in CMS Energy's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

CONSUMERS

Disclosure Controls and Procedures: Consumers' management, with the participation of its CEO and CFO, has evaluated the effectiveness of its disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based on such evaluation, Consumers' CEO and CFO have concluded that, as of the end of such period, its disclosure controls and procedures are effective.

Internal Control Over Financial Reporting: There have not been any changes in Consumers' internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

Table of Contents

Part II Other Information

Item 1. Legal Proceedings

CMS Energy, Consumers, and certain of their affiliates are parties to various lawsuits and regulatory matters in the ordinary course of business. For information regarding material legal proceedings, including updates to information reported under Part I Item 3. Legal Proceedings, of the 2015 Form 10-K, see Part I Item 1. Financial Statements Notes to the Unaudited Consolidated Financial Statements Note 2, Regulatory Matters and Note 3, Contingencies and Commitments.

Item 1A. Risk Factors

There have been no material changes to the Risk Factors as previously disclosed in Part I Item 1A. Risk Factors, in the 2015 Form 10-K, which Risk Factors are incorporated herein by reference.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

UNREGISTERED SALES OF EQUITY SECURITIES

None.

ISSUER REPURCHASES OF EQUITY SECURITIES

Presented in the following table are CMS Energy's repurchases of equity securities for the three months ended March 31, 2016:

Total Number of Shares Purchased as	Maximum Number of Shares That May Yet Be
--	---

Edgar Filing: CMS ENERGY CORP - Form 10-Q

Period	Total Number of Shares Purchased ¹	Average Price Paid per Share	Part of Publicly Announced Plans or Programs	Purchased Under Publicly Announced Plans or Programs
January 1, 2016 to January 31, 2016	268,378	\$ 36.55	-	-
February 1, 2016 to February 29, 2016	459	39.19	-	-
March 1, 2016 to March 31, 2016	728	40.99	-	-
Total	269,565	\$ 36.57	-	-

¹ All of the common shares were repurchased to satisfy the minimum statutory income tax withholding obligation for common shares that have vested under the Performance Incentive Stock Plan. The value of shares repurchased is based on the market price on the vesting date.

Table of Contents

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

On April 25, 2016, CMS Energy and JPMorgan Chase Bank, N A., in its capacity as agent (the Agent) for itself and the other financial institutions (the Banks) named in the \$180 million unsecured Term Loan Credit Agreement dated June 11, 2015 between CMS Energy, the Banks and the Agent (the Agreement), agreed to extend the maturity date of the term loans made thereunder. The Agreement was previously filed as Exhibit 10.1 to the Form 8-K filed June 16, 2015 and is incorporated herein by reference. Subject to the terms of the Agreement, effective as of April 25, 2016, the maturity date will extend for a period of one year to April 25, 2018.

The Banks have provided banking and underwriting services to CMS Energy in the ordinary course of business.

Item 6. Exhibits

See CMS Energy s and Consumers Exhibit Index included as the last part of this report, which is incorporated herein by reference.

EXHIBITS

Table of Contents**CMS ENERGY S AND CONSUMERS EXHIBIT INDEX**

The agreements included as exhibits to this Form 10-Q filing are included solely to provide information regarding the terms of the agreements and are not intended to provide any other factual or disclosure information about CMS Energy, Consumers, or other parties to the agreements. The agreements may contain representations and warranties made by each of the parties to each of the agreements that were made exclusively for the benefit of the parties involved in each of the agreements and should not be treated as statements of fact. The representations and warranties were made as a way to allocate risk if one or more of those statements prove to be incorrect. The statements were qualified by disclosures of the parties to each of the agreements that may not be reflected in each of the agreements. The agreements may apply standards of materiality that are different than standards applied to other investors. Additionally, the statements were made as of the date of the agreements or as specified in the agreements and have not been updated. The representations and warranties may not describe the actual state of affairs of the parties to each agreement.

Additional information about CMS Energy and Consumers may be found in this filing, at www.cmsenergy.com, at www.consumersenergy.com, and through the SEC's website at www.sec.gov.

<u>Exhibits</u>	<u>Description</u>
