Cautionary Statement Pursuant to Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 (the "Exchange Act"). From time to time, we may also provide oral or written forward-looking statements in other materials we release to the public. Such forward-looking statements are subject to the safe harbor created by the Private Securities Litigation Reform Act of 1995.

Statements that refer to projections of our future financial performance, our anticipated growth and trends in our businesses, and other characterizations of future events or circumstances are forward-looking statements, and include, but are not limited to, statements in Part II—Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations in this report, and under the heading "Outlook for 2016" therein, relating to timing, benefits and expectations regarding the pending acquisition of the remaining 58% of MillerCoors and Miller brand portfolio outside of the U.S. and Puerto Rico, overall volume trends, consumer preferences, pricing trends, industry forces, cost reduction strategies, anticipated results, anticipated synergies, expectations for funding future capital expenditures and operations, debt service capabilities, shipment levels and profitability, market share and the sufficiency of capital resources. In addition, statements that we make in this report that are not statements of historical fact may also be forward-looking statements. Words such as "expects," "goals," "plans," "believes," "continues," "may," "anticipate," "seek," "estimate," "outlook," "trends," "future benefits," "potential," "projects," "strategies," and variations of such words and similar expressions are intended to identify forward-looking statements.

Forward-looking statements are subject to risks and uncertainties that could cause actual results to be materially different from those indicated (both favorably and unfavorably). These risks and uncertainties include, but are not limited to those described in Part I—Item 1A "Risk Factors", elsewhere throughout this report, and those described from time to time in our past and future reports filed with the Securities and Exchange Commission ("SEC"). Caution should be taken not to place undue reliance on any such forward-looking statements. Forward-looking statements speak only as of the date when made and we undertake no obligation to update any forward-looking statement, whether as a result of new information, future events or otherwise.

Market and Industry Data

The market and industry data used in this Annual Report on Form 10-K are based on independent industry publications, customers, trade or business organizations, reports by market research firms and other published statistical information from third parties, as well as information based on management's good faith estimates, which we derive from our review of internal information and independent sources. Although we believe these sources to be reliable, we have not independently verified the accuracy or completeness of the information.

Table of Contents

PART I

ITEM 1. BUSINESS

Unless otherwise noted in this report, any description of "we", "us" or "our" includes Molson Coors Brewing Company ("MCBC" or the "Company"), principally a holding company, and its operating and non-operating subsidiaries included within our reporting segments and Corporate. Our reporting segments include: Molson Coors Canada ("MCC" or Canada segment), operating in Canada; MillerCoors LLC ("MillerCoors" or U.S. segment), which is accounted for by us under the equity method of accounting, operating in the United States ("U.S."); Molson Coors Europe (Europe segment), operating in Bosnia-Herzegovina, Bulgaria, Croatia, Czech Republic, Hungary, Montenegro, Republic of Ireland, Romania, Serbia, Slovakia and the United Kingdom ("U.K."); and Molson Coors International ("MCI"), operating in various other countries. Any reference to "Coors" means the Adolph Coors Company prior to the 2005 merger with Molson Inc. (the "Merger"). Any reference to Molson Inc. or Molson means MCC prior to the Merger. Any reference to "Molson Coors" means MCBC after the Merger.

Unless otherwise indicated, information in this report is presented in U.S. dollars ("USD" or "\$").

Background

We are one of the world's largest brewers and have a diverse portfolio of owned and partner brands, including core brands Carling, Coors Light, Molson Canadian and Staropramen, as well as craft and specialty beers such as Blue Moon, Creemore Springs, Cobra and Doom Bar. With centuries of brewing heritage, we have been crafting high-quality, innovative products with the purpose of delighting the world's beer drinkers. Our success depends on our ability to make our products available to meet a wide range of consumer segments and occasions.

Molson and Coors were founded in 1786 and 1873, respectively. Our commitment to producing the highest quality beers is a key part of our heritage and remains so to this day. Our brands are designed to appeal to a wide range of consumer tastes, styles and price preferences. Our largest markets are the U.S., Canada and Europe.

Coors was incorporated in June 1913 under the laws of the state of Colorado. In October 2003, Coors merged with and into Adolph Coors Company, a Delaware corporation. In February 2005, upon completion of the Merger, Adolph Coors Company (the Delaware corporation) changed its name to Molson Coors Brewing Company.

Industry Overview

The brewing industry has significantly evolved over the years, becoming an increasingly global beer market. The industry was previously founded on local presence with modest international expansion achieved through export, license and partnership arrangements. More recently, it has become increasingly complex, as the consolidation of brewers has occurred globally, resulting in fewer major global market participants. In addition to the acquisitive element of this industry consolidation, the market continues to utilize export, license and partnership arrangements; however, these are often with the same global competitors that make up the majority of the market. This industry consolidation has resulted in a small number of large global brewers representing the majority of the worldwide beer market. At the same time, smaller local brewers within certain established markets are experiencing accelerated growth as consumers increasingly place value on locally-produced, regionally-sourced products. As the beer industry continues its evolution of consolidation and diversification of its products to meet consumer demand with broadening preferences, large global brewers are uniquely positioned to leverage the scale, depth of product portfolio and industry knowledge to continue to lead the market forward.

Pending Acquisition

During 2015, Anheuser-Busch InBev SA/NV's ("ABI") announced it had entered into a definitive agreement to acquire SABMiller plc ("SABMiller"). The resulting transaction ("ABI/SABMiller transaction") is expected to be finalized in the second half of 2016 subject to ABI and SABMiller shareholder approval and various global regulatory approvals. Concurrently, on November 11, 2015, we entered into a purchase agreement (the "Purchase Agreement") with ABI to acquire, contingent upon the closing of the acquisition of SABMiller by ABI pursuant to the ABI/SABMiller transaction, all of SABMiller's 58% economic interest and 50% voting interest in MillerCoors and all trademarks, contracts and other assets primarily related to the Miller brand portfolio outside of the U.S. and Puerto Rico for \$12.0 billion in cash, subject to downward adjustment as described in the Purchase Agreement (the "Acquisition"). Following the closing of the pending Acquisition, the Company will own 100% of the outstanding equity and voting interests of

MillerCoors.

3

Table of Contents

Global Competitors' Market Capitalization

We evaluate ourselves in relation to other global brewers using various metrics, including overall market capitalization, volume, net sales revenue, gross margins and net profits, as well as our position within each of our core markets, with the goal to be the first choice for our consumers and customers. To provide a perspective of the relative size of the major participants in the global brewing market, the market capitalizations of our primary global competitors, based on foreign exchange rates at December 31, 2015, were as follows:

	Market Capitalization (In billions)
Anheuser-Busch InBev SA/NV ("ABI")	\$201.0
SABMiller plc ("SABMiller")	\$97.2
Heineken N.V. ("Heineken")	\$49.3
MCBC	\$17.3
Carlsberg Group ("Carlsberg")	\$13.7

Our Products

We have a diverse portfolio of owned and partner brands which are positioned to meet a wide range of consumer segments and occasions in a variety of markets, including core brands Carling, Coors Light, Molson Canadian, and Staropramen. We consider these our core global brands for which we continue to invest in and focus on growing globally. We believe our portfolio encompasses all segments of the beer industry with the purpose of delighting the world's beer drinkers, including premium and premium lights, economy, above premium and craft, as well as adjacencies such as ciders and other malt beverages.

Our core brands sold in Canada include Coors Light and Molson Canadian. We also sell Belgian Moon, Carling, Carling Black Label, Coors Altitude, Coors Banquet, Creemore Springs, the Granville Island brands, Keystone, Mad Jack, Molson Canadian 67, Molson Canadian Cider, Molson Dry, Molson Export, Pilsner, the Rickard's family of brands and a number of other regional brands. Under license from Heineken, we also brew or distribute Amstel Light, Heineken, Murphy's, Newcastle Brown Ale and Strongbow cider. In January 2015, we also began selling premium import brands owned by Heineken, including Desperados, Dos Equis, Moretti, Sol and Tecate. During the fourth quarter of 2014, we entered into an agreement with Miller Brewing Company ("Miller"), a wholly owned subsidiary of SABMiller, for the accelerated termination of the Miller license agreement, effective March 2015, under which we had exclusive rights to distribute certain Miller brands in Canada. See Part II—Item 8 Financial Statements and Supplementary Data, Note 11, "Goodwill and Intangible Assets" of the Notes to the Consolidated Financial Statements ("Notes"). We also have contract brewing agreements to produce for the U.S. market Asahi Select and Asahi Super Dry for Asahi Breweries, Ltd. and Labatt Blue and Labatt Blue Light for North American Breweries, Inc. MillerCoors sells a wide variety of brands throughout the U.S. and Puerto Rico. In the formation of the MillerCoors joint venture, MCBC and SABMiller each assigned the U.S. and Puerto Rico ownership rights to its respective legacy brands to MillerCoors, but retained all ownership of these brands outside the U.S. and Puerto Rico. MillerCoors' core domestic brands are Coors Light and Miller Lite. MillerCoors also sells additional domestic beer brands including Coors Banquet, Coors Peak, Hamm's, Keystone Light, Icehouse, Mickey's, Miller 64, Miller Fortune, Miller Genuine Draft, Miller High Life, Milwaukee's Best, Old English 800 and Steel Reserve. Craft and import brands are marketed and sold through Tenth and Blake Beer Company ("Tenth and Blake"). These include the Blue Moon brands, Jacob Leinenkugel Brewing Company brands and, imported under license, Grolsch, Peroni Nastro Azzurro and Pilsner Urquell. MillerCoors hard cider brands are Crispin and Smith & Forge and its flavored malt beverages include the Henry's hard sodas and Steel Reserve Alloy Series. MillerCoors also brews or distributes under license George Killian's Irish Red and the Redd's brands, as well as certain of the Foster's and Molson brands.

Our core brands sold in Europe include Carling and Staropramen. We also sell Apatinsko, Astika, Bergenbier, Blue Moon, Borsodi, Branik, Coors Light, Jelen, Kamenitza, Niksicko, Noroc, Ostravar, Ozujsko, Sharp's Doom Bar and Worthington's, as well as a number of smaller regional ale brands in the U.K., Republic of Ireland and Central Europe. The European business has licensing agreements with various other brewers through which it also brews or distributes Beck's, Belle-Vue Kriek brands, Hoegaarden, Leffe, Lowenbrau, Löwenweisse, Spaten and Stella Artois in certain Central European countries. Starting in January 2015, we acquired the rights to distribute Corona Extra and other

Modelo brands throughout the Central European countries in which we operate. In 2015, we purchased the Rekorderlig cider brand distribution rights in the U.K. and Republic of Ireland and terminated our distribution agreement with Carlsberg whereby it held the exclusive distribution rights for the

Table of Contents

Staropramen brand in the U.K., which gave us the exclusive distribution rights for the Staropramen brand in the U.K. by the end of 2015. In the U.K., we also sell the Cobra brands through the Cobra Beer Partnership Ltd. joint venture and the Grolsch brands through a joint venture with Royal Grolsch N.V., and are the exclusive distributor for several brands including Singha. Additionally, in order to be able to provide a full line of beer and other beverages to our U.K. on-premise customers, we sell "factored" brands, which are third-party beverage brands for which we provide distribution to retail, typically on a non-exclusive basis.

Our core brands sold in our international markets as part of our MCI segment include Carling, Coors Light and Staropramen. Other brands sold in our international markets, including brands sold under export and license agreements, include Blue Moon, Cobra, Corona and Molson Canadian. We also market and sell brands unique to these international markets which include Carling Strong, Coors, Coors 1873, Coors Extra, Coors Gold, Iceberg 9000, King Cobra, Royal Brew, Thunderbolt and Zima.

Our Segments

In 2015, we operated the following segments: Canada, the U.S., Europe and MCI. A separate operating team manages each segment and each segment manufactures, markets, and sells beer and other beverage products.

See Part II—Item 8 Financial Statements and Supplementary Data, Note 3, "Segment Reporting" of the Notes for information relating to our segments and operations, including financial and geographic information. For certain risks attendant to our operations, refer to Part I—Item 1A Risk Factors.

Canada Segment

We are Canada's second-largest brewer by volume and North America's oldest beer company. Our market share of the Canada beer market in 2015 was approximately 34%. We brew, market, sell and distribute a wide variety of beer brands nationally. Our portfolio has leading brands in all major product and price segments. Our focus and investment is on Canada core brands, primarily Coors Light and Molson Canadian, as well as other key owned brands, including Coors Banquet, Creemore Springs, Granville Island, Molson Dry, Molson Export, Pilsner and Rickard's and strategic distribution partnerships, including those with Heineken. In 2015, Coors Light had an approximate 12% market share and was the second largest selling beer brand in Canada, and Molson Canadian had an approximate 6% market share and was the third largest selling beer in Canada.

The Canada segment also includes our partnership arrangements related to the distribution of beer in Ontario, Brewers' Retail Inc. ("BRI"), and in the Western provinces, Brewers' Distributor Ltd. ("BDL"). BRI and BDL are accounted for under the equity method of accounting. The majority of ownership in BRI resides with MCC, Labatt Breweries of Canada LP (a subsidiary of ABI) and Sleeman Breweries Ltd. (a subsidiary of Sapporo International). BDL is jointly owned by MCC and Labatt Breweries of Canada LP.

Sales and Distribution

In Canada, provincial governments regulate the beer industry, particularly with regard to the pricing, mark-up, container management, sale, distribution and advertising of beer. Distribution and the retail sale of alcohol products involve a wide range and varied degree of Canadian government control through their respective provincial liquor boards. In 2015, approximately 19% of our Canada segment beer volume was sold on-premise in bars and restaurants, and the other 81% was sold off-premise in convenience stores, grocery stores, liquor stores and other retail outlets.

Province of Ontario

In Ontario, beer is primarily purchased at retail outlets operated by BRI, at government-regulated retail outlets operated by the Liquor Control Board of Ontario, at approved agents of the Liquor Control Board of Ontario, or at any bar, restaurant, or tavern licensed by the Liquor Control Board of Ontario to sell alcohol for on-premise consumption. The BRI retail outlets operate under The Beer Store name. Brewers may deliver directly to BRI's outlets or may choose to use BRI's distribution centers to access retail stores in Ontario, the Liquor Control Board of Ontario system and licensed establishments.

We, together with certain other brewers, have historically participated in the ownership of BRI in proportion to provincial market share relative to other brewers in the ownership group. Effective January 1, 2016, we, along with the other owners of BRI and the Province of Ontario, agreed to revise the ownership structure of BRI. The new BRI shareholder agreement ("New Shareholder Agreement") adjusted the existing BRI ownership structure to allow all other small and large Ontario based brewers the ability to participate in the ownership of BRI. As part of this change, the

board of directors of BRI has been expanded to include representation for these new ownership groups, as well as independent director representation. The new owners are subject to the same fee structure as the current owners, with the exception of smaller brewers, who have discounted

Table of Contents

fees, as they are not required to fund certain costs associated with pension obligations. BRI will continue to operate on a break-even basis under the new ownership structure. BRI also converted all existing capital stock into a new share class, as well as created a separate new share class to facilitate new and existing brewer participation and governance. While governance and board of director participation continues to have the ability to fluctuate based on market share relative to the other owners, our equity interest has become fixed under the New Shareholder Agreement.

Province of Québec

In Québec, the distribution and sale of beer is governed by the Quebec Alcohol Corporation ("SAQ"). Beer is distributed to retail outlets directly by each brewer or through approved independent agents. We are the agent for the licensed brands we distribute. The brewer or agent distributes the products to permit holders for retail sales for on-premise consumption. Québec retail sales for off-premise consumption are made through grocery and convenience stores, as well as government operated outlets.

Province of British Columbia

In British Columbia, the government's Liquor Distribution Branch controls the regulatory elements of distribution of all alcohol products in the province. BDL, which we co-own with ABI, manages the distribution of our products throughout British Columbia. Consumers can purchase beer at any Liquor Distribution Branch retail outlet, at any independently owned and licensed retail store or at any licensed establishment for on-premise consumption.

Establishments licensed primarily for on-premise alcohol sales may also be licensed for off-premise consumption.

Province of Alberta

In Alberta, the distribution of beer is managed by independent private warehousing and shipping companies or by a government sponsored system in the case of U.S. sourced products. All sales of liquor in Alberta are made through retail outlets licensed by the Alberta Gaming and Liquor Commission or licensees, such as bars, hotels and restaurants. BDL manages the distribution of our products in Alberta.

Other Provinces

Our products are distributed in the provinces of Manitoba and Saskatchewan through local liquor boards. Manitoba and Saskatchewan also have licensed private retailers. BDL manages the distribution of our products in Manitoba and Saskatchewan. In the Maritime Provinces (other than Newfoundland), local liquor boards distribute and sell our products. In Yukon, Northwest Territories and Nunavut, government liquor commissioners manage the distribution and sale of our products.

Manufacturing, Production and Packaging

Brewing Raw Materials

We select global suppliers in order to procure the highest quality materials and services at the lowest prices available. We also use hedging instruments to mitigate the risk of volatility in certain commodities and foreign exchange markets.

We source barley malt from one primary provider, from which we have a committed supply through 2016. Hops are purchased from a variety of global suppliers in the U.S. and Europe through contracts that vary in length based on market conditions and cover our supply requirements through at least 2018. Other starch brewing adjuncts are sourced from two main suppliers, both in North America. Water used in the brewing process is from local sources in the communities where our breweries operate. We do not currently anticipate future difficulties in accessing water or agricultural products used in our brewing process in the near term.

Brewing and Packaging Facilities

We operate seven breweries, strategically located throughout Canada. These locations brew and package all owned and certain licensed brands sold in, and exported from, Canada. See Item 2, "Properties" for further detail.

Packaging Materials

We single source glass bottles and have a committed supply through December 2019. We source lids and cans from two primary providers with contracts ending December 2016 and February 2017, respectively. We are currently finalizing negotiations for a contract extension through December 2023 related to the contract expiring at the end of 2016. We currently utilize a hedging program for aluminum requirements and related transportation and storage costs in Canada. The distribution systems in each province generally provide the collection network for returnable bottles and aluminum cans. The standard bottle for beer brewed in Canada is the 341 ml returnable bottle and represents the

vast majority of our bottle sales. Bottle sales continue to decline as we have experienced a shift in consumers' preference toward aluminum cans. This standard returnable

6

Table of Contents

bottle requires significant investment behind our returnable bottle inventory and bottling equipment. Therefore, the trend away from returnable bottles could result in higher fixed cost leverage related to these assets and an ultimate decreased need for the assets that support this packaging, which could adversely impact profitability. A limited number of kegs are purchased every year, and we have no long-term supply commitment. Crowns are currently sourced from two suppliers with contracts through February 2016 and December 2018, respectively. We are currently finalizing negotiations for a contract extension through February 2017 related to the contract expiring in February 2016. Labels, corrugate, and paperboard are purchased from a small number of sources unique to each product under contracts ending between January 2016 and December 2018. We do not currently anticipate future difficulties in accessing any of our required packaging materials in the near term. The following table reflects the percentage of total sales volumes (excluding imports) for each of the last five years by type of packaging material.

	2015	2014	2013	2012	2011	
Aluminum cans	53	% 49	% 46	% 42	% 39	%
Bottles	37	% 40	% 43	% 47	% 51	%
Stainless steel kegs	10	% 11	% 11	% 11	% 10	%

Contract Manufacturing

We have an agreement with North American Breweries, Inc. ("NAB") to brew, package and ship certain Labatt brands to the U.S. market through 2020. We also have an agreement with Asahi Breweries, Ltd. to brew and package Asahi Super Dry and Asahi Select to the U.S. market through early 2017.

Seasonality of Business

Total industry volume in Canada is sensitive to factors such as weather, changes in demographics, consumer preferences and drinking occasions. Weather conditions consisting of high temperatures and extended periods of warm weather favor increased consumption of our products, while unseasonably cool or wet weather, especially during the summer months, adversely affects our sales volumes and net sales. Accordingly, consumption of beer in Canada is seasonal, with approximately 40% of industry sales volume typically occurring during the warmer months from May through August.

Known Trends and Competitive Conditions**2015 Canada Beer Industry Overview**

The Canadian brewing industry is a mature market. It is characterized by aggressive competition for volume and market share from regional brewers, microbrewers and certain foreign brewers, as well as our main domestic competitor. These competitive pressures require significant annual investment in marketing and selling activities. In 2015, the Ontario and Québec markets accounted for approximately 60% of the total beer market in Canada.

There are three major beer price segments: above premium, which includes craft and most imports; premium, which includes the majority of domestic brands and the light sub-segment; and value (below premium). Since 2001, the premium beer segment in Canada has gradually lost volume to the above premium and value segments.

Recently, the beer industry has been weak, with declines in three of the last five years. Aging population, a stalled economy and strong competition from other alcohol beverages have been the main contributors to the declining state of the beer industry.

The following table summarizes the estimated percentage market share by volume of beer (including adjacencies, such as cider) and other alcohol beverages as a component of the overall Canadian alcohol market over the last five years, for which data is currently available. We anticipate that 2015 data, when available, will reflect a continuation of the recent consumer trends. Note that percentages reflect estimates based on market data currently available.

	2014	2013	2012	2011	2010	
Beer	48	% 48	% 49	% 50	% 51	%
Other alcohol beverages	52	% 52	% 51	% 50	% 49	%

Our Competitive Position

Our brands compete with competitor beer brands and other alcohol beverages, including wine and spirits, and thus our competitive position is affected by consumer preferences among these other categories. Our brand portfolio gives us strong representation in all major beer segments.

Table of Contents

The Canada brewing industry is composed principally of two major brewers, MCBC and ABI. The following table summarizes the estimated percentage share of the Canadian beer market represented by MCBC, ABI and all other brewers over the last five years. Note that the sum of the percentages below may not equal 100% due to rounding. Current year percentages reflect estimates based on market data currently available.

	2015	2014	2013	2012	2011	
MCBC share ⁽¹⁾	34	% 37	% 39	% 40	% 41	%
ABI share ⁽¹⁾	43	% 43	% 40	% 41	% 41	%
Others' share	23	% 21	% 20	% 19	% 18	%

The decrease in MCBC share in 2015 is largely driven by the loss of the Miller contract, under which we had exclusive rights to distribute certain Miller brands in Canada and was terminated effective March 2015. The decrease in MCBC share and increase in ABI share from 2013 to 2014 is primarily the result of ABI's acquisition (1) of Grupo Modelo S.A.B. de C.V. ("Modelo") in 2013. Subsequent to the termination of Modelo Molson Imports, L.P. ("MMI"), our joint venture with Modelo in Canada, in the first quarter of 2014, the Modelo brands are now distributed by ABI in Canada.

Regulation

In Canada, provincial governments regulate the production, marketing, distribution, selling and pricing of beer (including the establishment of minimum prices), and impose commodity taxes and license fees in relation to the production, distribution and sale of beer. In addition, the federal government regulates the advertising, labeling, quality control, and international trade of beer, and also imposes commodity taxes on both domestically produced and imported beer. In 2015, our Canada segment excise taxes were approximately \$63 per hectoliter sold on a reported basis. Further, certain bilateral and multilateral treaties entered into by the federal government, provincial governments and certain foreign governments, especially with the United States, affect the Canadian beer industry. In April 2014, the Ontario Premier's Advisory Council on Government Assets (the "Council") began a review that included evaluating the beer retailing and distribution system in Ontario, for which BRI is the primary beer retail and distribution channel. In April 2015, as a result of this review and our negotiations with the Council, we, along with the other owners of BRI, agreed, in principle and subject to entry into definitive binding documents, to enter into a new beer framework agreement (the "New Framework") with the Province of Ontario. The associated Master Framework Agreement was subsequently executed by all parties on September 22, 2015, and became effective as of January 1, 2016. Refer to Part I—Item 1A, Risk Factors for risks associated with the regulatory environment in Canada.

United States Segment

MillerCoors is the second largest brewer by volume in the U.S., selling approximately 26% of the total 2015 U.S. brewing industry shipments (excluding exports). MillerCoors was formed on July 1, 2008, as a joint venture between MCBC and SABMiller. Each party contributed its U.S. and Puerto Rico businesses and related operating assets and certain liabilities. The percentage interests in the profits of MillerCoors are 58% for SABMiller and 42% for MCBC. Voting interests are shared 50% - 50%, and MCBC and SABMiller have equal board representation within MillerCoors. Both parties to the MillerCoors joint venture are currently able to transfer their economic and voting interest, however, certain rights of first refusal will apply to any assignment of such interests. Our interest in MillerCoors is accounted for under the equity method of accounting.

As noted above, during 2015, MCBC entered into a Purchase Agreement with ABI to acquire, contingent upon the closing of the acquisition of SABMiller by ABI pursuant to the ABI/SABMiller transaction, all of SABMiller's 58% economic interest and 50% voting interest in MillerCoors and all trademarks, contracts and other assets primarily related to the Miller brand portfolio outside of the U.S. and Puerto Rico for \$12.0 billion in cash, subject to downward adjustment as described in the Purchase Agreement. Following the closing of the pending Acquisition, the Company will own 100% of the outstanding equity and voting interests of MillerCoors.

Prior to the formation of MillerCoors, MCBC produced, marketed, and sold the MCBC portfolio of brands in the U.S. and its territories, and its U.S. operating segment included the results of the Rocky Mountain Metal Container ("RMMC") and Rocky Mountain Bottle Company ("RMBC") joint ventures. Effective July 1, 2008, MCBC's equity investment in MillerCoors represents our U.S. operating segment.

Sales and Distribution

In the United States, beer is generally distributed through a three-tier system consisting of manufacturers, distributors and retailers. A national network of approximately 425 independent distributors purchases MillerCoors' products and distributes

8

Table of Contents

them to retail accounts. In 2015, approximately 17% of MillerCoors' beer volume was sold on-premise in bars and restaurants, and the other 83% was sold off-premise in convenience stores, grocery stores, liquor stores and other retail outlets. MillerCoors wholly owns one distributorship, which handled less than 1% of its total volume in 2015.

Manufacturing, Production and Packaging

Brewing Raw Materials

MillerCoors uses the highest quality ingredients to brew its products. MillerCoors malts a portion of its production requirements, using barley purchased under yearly contracts from independent farmers located in the western United States. Other barley, malt, and cereal grains are purchased from suppliers primarily in the U.S. Hops are purchased from suppliers in the U.S., New Zealand and certain European countries. MillerCoors leases water rights, including leasing from MCBC for water usage in Colorado, to provide for and to sustain brewing operations in case of a prolonged drought in the regions for which it has operations. MillerCoors does not currently anticipate future difficulties in accessing water or agricultural products used in its brewing process in the near term.

Brewing and Container Facilities

MillerCoors currently operates ten breweries, two container operations and one cidery, which produce MillerCoors' products. In the third quarter of 2015, MillerCoors announced the planned closure of the Eden, North Carolina brewery with the closure expected to occur in the third quarter of 2016. MillerCoors imports Molson brands from MCBC and Peroni Nastro Azzurro, Pilsner Urquell, Grolsch and other import brands from SABMiller.

Packaging Materials

Approximately 66% of U.S. products sold were packaged in aluminum cans or bottles in 2015. A portion of the aluminum containers were purchased from RMMC, a joint venture between MillerCoors and Ball Corporation ("Ball"), whose production facilities are located near MillerCoors' brewery in Golden, Colorado. In addition to the supply agreement with RMMC, MillerCoors has a supply agreement with Ball to purchase cans and ends in excess of what is supplied through RMMC. In 2011, MillerCoors signed a 10-year contract extension with Ball to extend the RMMC joint venture agreement along with the can and end purchase agreements, both of which will expire December 31, 2021. Approximately 24% of U.S. products sold in 2015 were packaged in glass bottles, of which a portion was provided by RMBC, a joint venture between MillerCoors and Owens-Brockway Glass Container, Inc. ("Owens"). In 2015, MillerCoors signed a 10-year contract extension with Owens to extend the RMBC joint venture agreement which expires July 31, 2025. MillerCoors and Owens entered into a supply agreement effective January 1, 2015, for requirements in excess of RMBC's production. Approximately 8% of U.S. production volume sold in 2015 was packaged in half, quarter, and one-sixth barrel stainless steel kegs. A limited number of kegs are purchased each year, and there is no long-term supply agreement. Approximately 2% of U.S. products sold in 2015 were in plastic bottles. Crowns, labels, corrugate and paperboard are purchased from a small number of sources unique to each product. In recent years, we have experienced a slight shift in the allocation among different packaging types toward aluminum cans and bottles and away from glass bottles. In general, aluminum cans allow for lower packaging costs compared to other types of packaging materials. MillerCoors does not currently anticipate difficulties in accessing packaging products in the near term.

Contract Manufacturing

MillerCoors has an agreement to brew, package and ship products for Pabst Brewing Company through June 2020. Additionally, MillerCoors produces beer under contract for our Canada and MCI segments and for SABMiller.

Seasonality of the Business

Total industry volume in the U.S. is sensitive to factors such as weather, changes in demographics, consumer preferences and drinking occasions. Weather conditions consisting of high temperatures and extended periods of warm weather favor increased consumption of our products, while unseasonably cool or wet weather, especially during the summer months, adversely affects our sales volumes and net sales. Accordingly, consumption of beer in the U.S. is seasonal, with approximately 37% of industry sales volume typically occurring during the warmer months from May through August.

Known Trends and Competitive Conditions

2015 U.S. Beer Industry Overview

The beer industry in the United States is highly competitive, and the two largest brewers, ABI and MillerCoors together represented the majority of the market in 2015. The formation of MillerCoors in 2008 created a stronger U.S. presence for MCBC with the scale, operational efficiency and distribution platform to compete more effectively in the U.S. marketplace. Growing or even maintaining market share has required significant investments in marketing. From 1998 to 2008, the U.S. beer

Table of Contents

industry shipments annual growth rate approximated 1%, compared with declines ranging from 1% to 2% in each of the years 2009, 2010 and 2011. With ideal weather conditions, industry volumes improved slightly in 2012, growing approximately 1%. However, in 2013 the industry saw a decline of less than 1%, and in 2014, the industry grew slightly, by less than 1%. In 2015, the industry slightly declined by approximately 1%.

The overall declines in the U.S. beer industry volumes since 2009 have been partially attributed to relatively poor economic conditions. High rates of unemployment, declining labor participation rates, and lower consumer confidence have negatively affected the legal age key beer drinkers' purchasing behaviors. In addition, per capita beer consumption has declined as consumer preference shifts to higher alcohol, full calorie beers, as well as wine, spirits and other alcohol beverages. Competition from outside of the beer category continues to be a challenge for the industry.

The following table summarizes the estimated percentage market share by volume of beer (including adjacencies, such as cider) and other alcohol beverages as a component of the overall U.S. alcohol market over the last five years, for which data is currently available. We anticipate that 2015 data, when available, will reflect a continuation of the recent consumer trends. Note that percentages reflect estimates based on market data currently available.

	2014	2013	2012	2011	2010	
Beer	51	% 52	% 53	% 53	% 54	%
Other alcohol beverages	49	% 48	% 47	% 47	% 46	%

Our Competitive Position

The MillerCoors portfolio of beers competes with numerous above-premium, premium, and economy brands. These competing brands are produced by international, national, regional and local brewers. MillerCoors competes most directly with ABI brands, but also competes with imported and craft beer brands. The following table summarizes the estimated percentage share of the U.S. beer market represented by MillerCoors, ABI and all other brewers over the last five years. Note that current year percentages reflect estimates based on market data currently available.

	2015	2014	2013	2012	2011	
MillerCoors share	26	% 27	% 28	% 29	% 29	%
ABI share	45	% 46	% 47	% 48	% 48	%
Others' share	29	% 27	% 25	% 23	% 23	%

MillerCoors' products also compete with other alcohol beverages, including wine and spirits, and thus their competitive position is affected by consumer preferences between and among these other categories. Driven by increased spirits advertising along with increased wine and spirits sales execution, sales of wine and spirits have grown faster than sales of beer in recent years, resulting in a reduction in the beer segment's lead in the overall alcohol beverage market.

Regulation

The U.S. beer business is regulated by federal, state, and local governments. These regulations govern many parts of MillerCoors' operations, including brewing, marketing and advertising, transportation, distributor relationships, sales, and environmental issues. To operate their facilities, MillerCoors must obtain and maintain numerous permits, licenses and approvals from various governmental agencies, including the U.S. Treasury Department; Alcohol and Tobacco Tax and Trade Bureau; the U.S. Department of Agriculture; the U.S. Food and Drug Administration; state alcohol regulatory agencies; and state and federal environmental agencies.

Governmental entities also levy taxes and may require bonds to ensure compliance with applicable laws and regulations. In 2015, excise taxes on malt beverages were approximately \$16 per hectoliter sold on a reported basis. State excise taxes are levied in specific states at varying rates. Refer to Part I—Item 1A, Risk Factors for risks associated with the regulatory environment in the U.S.

Europe Segment

We are the second largest brewer by volume, on a combined basis, within the European countries in which we operate, with an approximate aggregate 20% market share (excluding factored products) in 2015. The majority of our European segment sales are in the U.K., Croatia, Czech Republic and Romania. Our portfolio includes beers that have the largest share in their respective countries, such as Carling in the U.K., Jelen in Serbia, Ozujsko in Croatia, Kamenitza in Bulgaria and Niksicko in Montenegro. We have beers that rank in the top three in market share in their

respective segments throughout the region,

10

Table of Contents

including Staropramen in Czech Republic, Bergenbier in Romania and Borsodi in Hungary. We also brew and distribute Beck's, Lowenbrau, Spaten and Stella Artois under license agreements with ABI companies, and beginning in January 2015, we distribute certain of the Modelo brands throughout the Central European countries in which we operate. Additionally, our Europe segment includes our consolidated joint venture arrangements for the production and distribution of Grolsch and Cobra brands in the U.K. and Republic of Ireland and factored brand sales (beverage brands owned by other companies, but sold and delivered to retail by us). In the third quarter of 2015, we purchased the Rekorderlig cider brand distribution rights in the U.K. and Ireland and also sold our U.K. malting facility. In the second quarter of 2015, we closed a brewery in the U.K. and terminated our distribution agreement with Carlsberg whereby it held the exclusive distribution rights for the Staropramen brand in the U.K. As a result, we repatriated the Staropramen brand back to the U.K. at the end of 2015.

Sales and Distribution

In Europe, beer is generally distributed through either a two-tier system consisting of manufacturers and retailers, or a three-tier system consisting of manufacturers, distributors and retailers. Most of our beer in the U.K. is sold directly to retailers. We have an agreement with Tradeteam Ltd. ("Tradeteam", a subsidiary of DHL) to provide the distribution of our products throughout the U.K. through 2023. It is also common in the U.K. for brewers to distribute beer, wine, spirits, and other products owned and produced by other companies, which we refer to as factored brands, to the on-premise channel (bars and restaurants). Approximately 20% of our Europe segment net sales in 2015 represented factored brands. Factored brand sales are included in our net sales and cost of goods sold, but not included in our reported volumes.

Generally, over the years, volumes in Europe have shifted from the higher margin on-premise channel, where products are consumed in pubs and restaurants, to the lower margin off-premise channel, also referred to as the "take-home" market.

Off-Premise Channel

In Europe, the off-premise channel includes sales to supermarkets, convenience stores, liquor stores, distributors, and wholesalers. The off-premise channel accounted for approximately 60% of our Europe sales volume in 2015. The off-premise channel has become increasingly concentrated among a small number of super-store chains, placing increasing downward pressure on beer pricing.

On-Premise Channel

The on-premise channel includes sales to pubs and restaurants. The on-premise channel accounted for approximately 40% of our Europe sales volume in 2015. The installation and maintenance of draught beer dispensing equipment in the on-premise channel is generally the responsibility of the brewer. Accordingly, we own refrigeration units and other equipment used to dispense beer from kegs to consumers that are used in on-premise outlets. This includes beer lines, cooling equipment, taps, and counter mounts.

Similar to other brewers, we utilize loans in securing supply relationships with customers in the on-premise market in the U.K. These loans can be granted at below-market rates of interest, with the outlet purchasing beer at lower-than-average discount levels to compensate. We reclassify a portion of sales revenue to interest income to reflect the economic substance of these loans. See Part II—Item 8 Financial Statements and Supplementary Data, Note 1, "Basis of Presentation and Summary of Significant Accounting Policies" of the Notes for additional information.

Distribution

Distribution activities for both the on-premise and off-premise channels are conducted primarily by third-party logistics providers. We utilize Tradeteam for these activities in the U.K. and several hundred third-party logistics providers across our Central European operations. We also conduct a small amount of secondary distribution in Czech Republic utilizing our own fleet of vehicles.

Manufacturing, Production and Packaging

Brewing Raw Materials

We use the highest quality water, barley, malt and hops to brew our products. During 2015, our malt requirements were sourced from both third party suppliers and owned production, using our malt-house in the U.K. In 2015, we entered into an agreement to sell our malting facility in the U.K. and, concurrent with the sale, entered into a 10-year contract with the purchaser of the facility to replace the malt that we previously produced covering 38% of our total

required malt. We also have multiple agreements with various suppliers in the region to cover the remaining requirements, most of which are valid for the next 3-5 years. Hops are purchased under various contracts with suppliers in Germany, the U.S. and the U.K., which cover our requirements through 2016. Adjuncts are purchased under various contracts with local producers, which are typically crop year contracts commencing in October of each year. Water used in the brewing process is sourced from various wells and through

Table of Contents

water rights and supply contracts. We do not currently anticipate future difficulties in accessing required water or agricultural products used in our brewing process in the near term.

Brewing and Packaging Facilities

We operate twelve breweries in Europe, which brew and package brands sold in Europe. As part of the continued strategic review of our European supply chain network, in the first quarter of 2015 we closed our brewing facility in Alton, Hampshire, U.K. and in the fourth quarter of 2015 we closed our brewery in Plovdiv, Bulgaria. Additionally, in the fourth quarter of 2015, we announced the proposal and entered into a consultation process to close our Burton South brewery in the U.K. in which we will consolidate production within our recently modernized Burton North brewery. This closure is expected to be completed in 2017. See Item 2, "Properties" for additional information.

Packaging Materials

Approximately 27% of our Europe volumes sold in 2015 were packaged in bottles, with a significant majority in returnable bottles sourced under various agreements with third party suppliers. Kegs and casks comprised approximately 29% of volume sold in Europe in 2015. Cans represent approximately 25% of our Europe volumes sold in 2015. We have long term contracts with four providers for our required supply of cans. Approximately 19% of our Europe volume sold in 2015 consisted of products packaged in recyclable plastic containers for which we are currently negotiating agreements for our 2016 requirements with various manufacturers in the region. Crowns, labels and corrugate are purchased from sources unique to each category. We do not currently foresee future difficulties in accessing these or other packaging materials in the near term.

Contract Manufacturing

In December 2013, we entered into an agreement with Heineken to early terminate our contract brewing and kegging agreement with the transition period ending April 30, 2015, under which we produced and packaged the Foster's and Kronenbourg brands in the U.K. Our existing agreement with Heineken, whereby they sell, market and distribute Coors Light in Republic of Ireland, continues through December 2019. The agreement to contract brew ales for Carlsberg terminated at the end of 2015 and was not renewed.

Seasonality of Business

In Europe, the beer industry is subject to seasonal sales fluctuations primarily influenced by holidays, weather and by certain major televised sporting events. Weather conditions consisting of high temperatures and extended periods of warm weather favor increased consumption of our products, while unseasonably cool or wet weather, especially during the summer months, adversely affects our sales volumes and net sales. Accordingly, the peak selling seasons typically occur during the summer and during the Christmas and New Year holiday season.

Known Trends and Competitive Conditions**2015 Europe Beer Industry Overview**

We estimate that the Europe beer market increased by approximately 1% in 2015, driven by increased beer consumption versus last year primarily during the summer season which had especially favorable weather. Since 2010, the off-premise market share has increased in our European markets from 55% to nearly 60% of total volume, and the on-premise market share has declined from 45% to 40%. Europe beer industry retail shipments have declined by approximately 1% to 2% yearly since 2011. These market fluctuations are consistent with the fluctuations within the overall alcohol market in each of the respective years.

The following table summarizes the estimated percentage market share by volume of beer (including adjacencies, such as cider) and other alcohol beverages as a component of the overall European alcohol market, within the countries in which we have production facilities, over the last five years, for which data is currently available. We anticipate that 2015 data, when available, will reflect a continuation of the recent consumer trends. Note that percentages reflect estimates based on market data currently available.

	2014	2013	2012	2011	2010	
Beer	36	% 36	% 36	% 36	% 36	%
Other alcohol beverages	64	% 64	% 64	% 64	% 64	%

Table of Contents

Our Competitive Position

Our beers compete not only with similar products from competitors, but also with other alcohol beverages, including wines, spirits, and ciders. We believe our brand portfolio gives us strong representation in all major beer categories. In European countries where we operate, our primary competitors are Heineken, SABMiller, Carlsberg and ABI. The following table summarizes our estimated percentage share of the beer market within the European countries where we operate and our primary competitors over the last five years. Note that current year percentages reflect estimates based on market data currently available.

	2015	2014	2013	2012	2011	
MCBC share	20	% 20	% 20	% 20	% 20	%
Primary competitors' share	59	% 59	% 59	% 60	% 60	%
Others' share	21	% 21	% 21	% 20	% 20	%

Regulation

Each country that is part of our Europe segment is either a member of the European Union ("EU") or a current candidate to join, with the exception of Bosnia, which is a potential candidate, and, as such, there are similarities in the regulations that apply to many parts of our Europe segment's operations and products, including brewing, food safety, labeling and packaging, marketing and advertising, environmental, health and safety, employment and data protection regulations. To operate breweries and conduct our business in Europe, we must obtain and maintain numerous permits and licenses from various governmental agencies.

Each country's government levies excise taxes on all alcohol beverages. With the exception of Serbia, Montenegro and Bosnia, all countries' laws on excise taxes are consistent with the directives of the EU. With the exception of Serbia, where a flat excise per hectoliter is used, all European countries use similar measurements based on either alcohol by volume or Plato degrees. In 2015, the excise taxes for our Europe segment were approximately \$50 per hectoliter on a reported basis. Refer to Part I—Item 1A, Risk Factors for risks associated with the regulatory environment in Europe.

Molson Coors International Segment

The objective of MCI is to grow and expand our business and brand portfolio in new and existing markets, including emerging markets, outside the Canada, U.S. and Europe segments. The focus of MCI includes Latin America (including Mexico, Central America, the Caribbean and South America and excluding Puerto Rico, as it is part of the U.S. segment) Asia, Europe (excluding U.K., Ireland and Central Europe, as they are a part of the Europe segment) and Australia. The MCI portfolio of beers competes within the above-premium category in most of our markets. Our principal competitors include large global brewers, as well as local brewers. As MCI's objective is to grow and expand our business, we are developing scale and building market share in the countries where we operate. Many of the markets in which we operate are considered emerging beer markets, with other brewers controlling the majority of the market share. Our beers compete not only with similar products from competitors, but also with other alcohol beverages, including wines, spirits, and ciders, and thus our competitive position is affected by consumer preferences between and among these other categories.

Standalone Business

Our standalone operations are in the Asia region and are based in India, Japan and China.

Our business in India consists of our joint venture which gives us a majority share and operational control of Molson Coors Cobra India as well as Mount Shivalik Breweries Ltd., which we acquired during the second quarter of 2015. Our consolidated India business produces, markets and sells a beer portfolio consisting of Thunderbolt, Iceberg 9000, Carling Strong, Cobra, King Cobra and Royal Brew in select Indian states. We own and operate three breweries in India, where we use the highest quality ingredients to brew our products, which are sourced through various contracts with local suppliers. We do not foresee any risk of significant disruption in the supply of these raw materials or brewing inputs in the near term.

In Japan our focus is on the marketing and selling of the Blue Moon, Coors Light, Coors 1873 and Zima brands. We also have a contract with ABI to sell and distribute the Modelo brands. These brands are imported into Japan and are

sold through independent wholesalers to both the on-premise and off-premise channels.

Our China business sells the Coors family of brands. During the second quarter of 2015, we announced our decision to substantially restructure our China business which we have transitioned to a distribution model.

Table of Contents

Export Business

Our export business focuses on expanding the reach of our international brands which are exported from our breweries in the U.S., U.K. and Czech Republic. The brands sold include Blue Moon, Carling, Cobra, Coors 1873, Coors Light and Staropramen.

In Latin America, our products, primarily Coors Light, Coors 1873 and Blue Moon, are sold through agreements with independent distributors. We also sell our brands, primarily Staropramen, Coors Light and Carling in several countries in Europe.

License Business

Our license business builds long term partnerships with leading global brewers to market and grow our international brands in markets which typically have a greater barrier to entry. This business includes licensing arrangements with ABI to brew and distribute Staropramen in Russia and Ukraine and an exclusive licensing agreement with Heineken to brew and distribute Coors Light in Mexico. We also have various licensing agreements for the manufacturing and distribution of Carling primarily in Spain, Russia and Ukraine. Finally, we also have licensing agreements for the manufacturing and distribution of Coors and Blue Moon in Australia and Coors Light and Coors 1873 in Chile, Colombia and Paraguay.

Corporate

Corporate includes interest and certain other general and administrative costs that are not allocated to any of the operating segments. The majority of these corporate costs relate to worldwide administrative functions, such as corporate affairs, legal, human resources, finance and accounting, treasury, tax, internal audit, management of intellectual property, insurance and risk management. Additionally, the results of our water resources and energy operations in Colorado are included in Corporate.

Other Information

Global Intellectual Property

We own trademarks on the majority of the brands we produce and have licenses for the remainder. We also hold several patent and design registrations with expiration dates through 2038 relating to beer dispensing systems, packaging and certain other innovations. We are not reliant on patent royalties for our financial success. Therefore, these expirations are not expected to have a significant impact on our business.

Corporate Responsibility

Corporate responsibility, or Our Beer Print, is integral to our business strategy. We are committed to growing our business the right way while improving the impact we have on our communities, our people and the environment. Since 2012 we have been listed on the Dow Jones Sustainability World Index, and were named Beverage Sector Leader in 2012 and 2013. We have retained a position on the World Index since 2012, for 4 consecutive years. In 2012, Molson Coors built on long-standing efforts to reduce harmful drinking by becoming a signatory of the Beer, Wine and Spirits Producers' Commitments to Reduce Harmful Drinking (www.producerscommitments.org). In support of the Commitments we have a robust plan to ensure support across the business, with particular emphasis on our commercial activity through a Commercial Integrity Policy incorporating the recently launched International Alliance for Responsible Drinking Digital Guiding Principles.

Our approach to improving Our Beer Print within our brewing operations is outlined in our 2020 Sustainability Strategy found on our website at www.molsoncoors.com. Launched in 2013, our 2020 Sustainability Strategy integrates how we manage energy, greenhouse gas emissions, water and solid waste and sets out how we intend to meet our 2020 ambitions. The cornerstone of our 2020 Sustainability Strategy is a commitment to invest in waste water treatment and generate clean energy from this waste stream. These investments will alleviate the impact of our operations on municipal water treatment resources, reduce our reliance on fossil fuels and save greenhouse gas emissions.

Environmental Matters

Our operations are subject to a variety of extensive and changing federal, state and local environmental laws, regulations and ordinances that govern activities or operations that may have adverse effects on human health or the environment. Such laws, regulations or ordinances may impose liability for the cost of remediation, and for certain

damages resulting from sites of past releases of hazardous materials. Our policy is to comply with all such legal requirements. While we cannot predict our eventual aggregate cost for the environmental and related matters in which we may be or are currently involved, we believe that any payments, if required, for these matters would be made over a period of time in amounts that would not be material in any

14

Table of Contents

one year to our operating results, cash flows, or our financial or competitive position. We believe adequate reserves have been provided for losses that are probable and estimable. However, there can be no assurance that environmental laws will not become more stringent in the future or that we will not incur material costs in the future in order to comply with such laws. See Part II—Item 8 Financial Statements and Supplementary Data, Note 18, "Commitments and Contingencies" of the Notes under the caption "Environmental" for additional information regarding environmental matters.

Employees

As of the end of 2015, we had approximately 9,100 full-time employees within MCBC globally, including 6,000 within our Europe segment, 2,400 within our Canada segment, 500 within our MCI segment, and 200 within our Corporate headquarters in Colorado. Additionally, as of December 31, 2015, MillerCoors had approximately 8,400 full-time employees. There have been no significant changes in our number of employees since December 31, 2015.

Financial Information about Foreign and Domestic Operations and Export Sales

See Part II—Item 8 Financial Statements and Supplementary Data, Note 3, "Segment Reporting" of the Notes for discussion of sales, operating income and identifiable assets attributable to our country of domicile, the United States, and all foreign countries.

Available Information

We file with, or furnish to, the SEC reports, including our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports pursuant to Section 13(a) or 15(d) of the Exchange Act. These reports are available free of charge on our corporate website (www.molsoncoors.com) as soon as reasonably practicable after they are electronically filed with or furnished to the SEC. Copies of any materials we file with the SEC can be obtained at www.sec.gov or at the SEC's public reference room at 100 F Street, N.E., Washington, D.C. 20549. Information on the operation of the public reference room is available by calling the SEC at 1-800-SEC-0330. The foregoing website addresses are provided as inactive textual references only. The information provided on our website (or any other website referred to in this report) is not part of this report and is not incorporated by reference as part of this report.

Executive Officers

The following tables set forth certain information regarding our executive officers as of February 11, 2016:

Name	Age	Position
Peter H. Coors	69	Vice Chairman of the Board, Chairman of Coors Brewing Company and Chairman of the Board of MillerCoors LLC
Mark R. Hunter	53	President, Chief Executive Officer and a Director of MillerCoors LLC
David A. Heede	54	Interim Chief Financial Officer and a Director of MillerCoors LLC
Krishnan Anand	58	President and Chief Executive Officer, Molson Coors International
Simon J. Cox	48	President and Chief Executive Officer, Molson Coors Europe
Stewart F. Glendinning	50	President and Chief Executive Officer, Molson Coors Canada
Samuel D. Walker	57	Chief People and Legal Officer and a Director of MillerCoors LLC
Celso L. White	54	Chief Supply Chain Officer and a Director of MillerCoors LLC
Brenda Davis	56	Chief Integration Officer

ITEM 1A. RISK FACTORS

The reader should carefully consider the following risk factors and the other information contained within this document. The risks set forth below are those that management believes are most likely to have a material adverse effect on us. We may also be subject to other risks or uncertainties not presently known to us. If any of the following risks or uncertainties actually occurs, it may have a material adverse effect on our business, results of operations and prospects.

Risks Specific to the Pending Acquisition

We cannot predict when or if the pending Acquisition will close. The acquisition of the 58% equity interest and 50% voting interest of MillerCoors that we do not already own and the Miller brand portfolio outside of the U.S. and Puerto Rico is contingent upon a number of conditions beyond our control, including the closing of the ABI-SABMiller Transaction. The closing of the ABI-SABMiller Transaction is subject to conditions beyond our

control, including, among other things, receipt of international and U.S. regulatory approvals. The Acquisition will also require us to obtain regulatory approvals in the U.S. and

15

Table of Contents

certain other jurisdictions. We are, therefore, unable to accurately predict when or if the pending Acquisition will close. If we are unable to close the Acquisition for any reason, we will not realize the potential benefits of the Acquisition, which may have a material adverse effect on our business prospects.

We may not be able to realize anticipated cost synergies from the pending Acquisition. The success of the pending Acquisition will depend, in part, on our ability to realize anticipated cost synergies. Our success in realizing these cost synergies, and the timing of this realization, depends on the successful integration of our business and operations with the acquired business and operations. Even if we are able to integrate the acquired businesses and operations successfully, this integration may not result in the realization of the full benefits of the cost synergies of the pending Acquisition that we currently expect within the anticipated time frame or at all.

The pending Acquisition will subject us to significant additional liabilities and other risks. Following the pending Acquisition, we will be subject to substantially all the liabilities of MillerCoors, including, among others, significant pension liabilities. We will also be subject to the risks of the U.S. beer market to a much greater extent, and a significant majority of our overall business will be in mature, low growth beer markets, such as the U.S., Canada and the U.K. The pending Acquisition and subsequent integration process will be complex, costly, time-consuming and divert management's time and attention, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We may be unable to obtain the regulatory approvals required to complete the pending Acquisition or, in order to do so, we may be required to satisfy material conditions or comply with material restrictions. In addition to the international and U.S. regulatory approvals needed to close the ABI-SABMiller Transaction, the consummation of the pending Acquisition is also subject to review and approval by regulatory authorities, including by the United States Department of Justice. We can provide no assurance that all required regulatory approvals will be obtained in order to consummate the pending Acquisition. We have agreed to take all actions necessary, and assist and cooperate in doing all things necessary, to avoid or eliminate any legal impediments to the pending Acquisition, including divesting of up to \$4 billion in assets. There can be no assurance as to the cost, scope or impact on our business, results of operations, financial condition or prospects of the actions that may be required to obtain regulatory approvals. Any such divestitures or other actions could have a material adverse effect on the business of both us and MillerCoors and substantially diminish the synergies and other advantages which we expect from the pending Acquisition. In addition, we may not be able to affect any divestitures at an acceptable price or at all.

The pending Acquisition will impact our financial position. We will need to raise significant capital to fund the pending Acquisition and such capital may not be available to us on acceptable terms. We expect to incur a substantial amount of additional indebtedness in connection with the pending Acquisition in addition to our Class B common stock offering completed in February 2016. If we are unable to raise significant additional capital on acceptable terms we may need to rely on our bridge loan agreement, which may result in substantially higher borrowing costs and a shorter maturity than those from other anticipated financing alternatives. In addition, ratings agencies may downgrade our credit ratings below their current investment grade levels as the results of additional indebtedness related to the pending Acquisition. A ratings downgrade could increase our costs of borrowing and harm our ability to finance the pending Acquisition on acceptable terms or refinance our debt in the future.

As a result of the need to raise significant financing to fund the pending Acquisition, we currently intend to hold per share dividends constant and have suspended both our dividend target of 18% to 22% of trailing annualized EBITDA and our share repurchase program. We also intend to use cash from operations to fund the Acquisition and service and reduce our debt level, which will reduce funds available for other operational or strategic needs and may increase our vulnerability to adverse economic or industry conditions.

The incurrence of future indebtedness to fund the pending Acquisition may subject us to additional financial and operating restrictions. Future indebtedness may subject us to additional financial and operating covenants, which may

limit our flexibility in responding to our business needs. If we are not able to maintain compliance with stated financial covenants or if we breach other covenants in any debt agreement, we could be in default under such agreement. Such a default may allow our creditors to accelerate the related indebtedness and may result in the acceleration of any other indebtedness to which a cross-acceleration or cross-default provision applies.

Our overall leverage and terms of our financing could, among other things:

- limit our ability to obtain additional financing in the future for working capital, capital expenditures and acquisitions;
- make it more difficult to satisfy our obligations under the terms of our indebtedness;
- limit our ability to refinance our indebtedness on terms acceptable to us or at all;

Table of Contents

• limit our flexibility to plan for and adjust to changing business and market conditions and increase our vulnerability to general adverse economic and industry conditions;

• require us to dedicate a substantial portion of our cash flow to make interest and principal payments on our debt, thereby limiting the availability of our cash flow to fund future acquisitions, working capital, business activities, and other general corporate requirements; and

• limit our ability to obtain additional financing for working capital, to fund growth or for general corporate purposes, even when necessary to maintain adequate liquidity, particularly if any ratings assigned to our debt securities by rating organizations were revised downward.

We face numerous risks associated with the pending Acquisition and integration of the Miller brand portfolio outside the U.S. and Puerto Rico. The pending acquisition of the Miller brand portfolio outside of the U.S. and Puerto Rico may subject us to unknown expenses and liabilities due to our limited due diligence of the business, including among other things, the absence of historical financial statements for this part of the business. The success of our acquisition of the Miller brand portfolio outside of the U.S. and Puerto Rico will depend, in part, on our ability to realize all or some of the anticipated synergies and other benefits from integrating its business with our existing businesses and operations. The integration process may be complex, costly and time-consuming as the Miller brand portfolio assets are in over 50 foreign countries. The difficulties of integrating the operations include, among others:

- failure to implement our business plan for the combined business;
- unanticipated issues in integrating manufacturing, logistics, information, communications and other systems;
- possible inconsistencies in standards, controls, contracts, procedures and policies;
- impacts of change in control provisions in contracts and agreements;
- failure to retain key customers and suppliers;
- unanticipated changes in applicable laws and regulations;
- failure to recruit and retain key employees to operate the combined business;
- inherent operating risks in the business;
- unanticipated issues, expenses and liabilities;
- unfamiliarity with operating in many of the countries in which the international Miller brand portfolio operates;
- reliance on a competitor, ABI, to provide transition services for this business;
- failure to develop sustainable routes to market upon the expiration of ABI's transition services;
- difficulty in fully separating the Miller brand portfolio from SABMiller's current brand portfolio; and
- inability to perform satisfactory due diligence on the business prior to closing of the Acquisition.

We may not be able to maintain the levels of revenue, earnings or operating efficiency that each of the Company and the international Miller brand portfolio had achieved or might achieve separately. Although we have a downward purchase price adjustment if the unaudited U.S. GAAP EBITDA for the international Miller brand portfolio for the four quarters prior to closing is below \$70 million, such adjustment may not be adequate to protect us from the future harm of acquiring an underperforming or declining brand portfolio. In addition, we may not accomplish the integration of the international Miller brand portfolio smoothly, successfully or within the anticipated costs or timeframe. Moreover, the markets in which the international Miller brand portfolio operates may not experience the growth rates expected and any economic downturn affecting those markets could negatively impact the international Miller brand portfolio. These markets are in differing stages of development and may experience more volatility than expected or face more operating risks than in the more mature markets in which we have historically operated. If we experience difficulties with the integration process or if the international Miller brand portfolio or the markets in which it operates deteriorate, the potential cost savings, growth opportunities and other synergies of the acquisition of the Miller brand portfolio outside the U.S. and Puerto Rico may not be realized fully, or at all, or may take longer to realize than expected. In such case, our business, financial condition, results of operations and cash flows may be negatively impacted.

If we are unable to consummate the pending Acquisition, our stock price may be adversely affected and our financial condition may materially suffer. If the pending Acquisition is not completed for any reason, the trading price of our Class A

Table of Contents

common stock or Class B common stock may decline to the extent that the market price of our Class A common stock or Class B common stock reflects positive market assumptions that the pending Acquisition will be completed and the related benefits will be realized. In addition, if the Acquisition is not completed our financial condition could materially suffer, including:

subject to certain reimbursement rights under the Purchase Agreement, the incurrence of significant costs related to the Acquisition without the associated benefits of completing the Acquisition, such as legal, accounting, filing, financial advisory, bridge and term loan financing and integration costs that have already been incurred or will continue up to the closing of the Acquisition. The amount of such operating expenses, fees and capital expenditures we incur in connection with the Acquisition will be based on a variety of factors but may be material;

increased dividend costs as a result additional capital stock issued without the associated benefits of completing the pending Acquisition;

if we complete a financing of debt securities prior to closing the pending Acquisition, the incurrence of significant interest expense and potential redemption premiums with respect to such debt securities without the associated benefits of completing the pending Acquisition; and

potential disruption to our business and distraction of our workforce and management team.

We will incur substantial transaction fees and costs in connection with the pending Acquisition. We expect to incur a significant amount of non-recurring expenses in connection with the pending Acquisition, including legal, accounting, financial advisory and other expenses. Subject to certain reimbursement rights under the Purchase Agreement, many of these expenses are payable by us whether or not the pending Acquisition is completed. Additional unanticipated costs may be incurred following consummation of the pending Acquisition in the course of the integration of our businesses with that of MillerCoors and the international Miller brand portfolio. We cannot be certain that the elimination of duplicative costs or the realization of other efficiencies related to the integration of the businesses will offset the transaction and integration costs in the near term, or at all.

The pending Acquisition will significantly increase our goodwill and other intangible assets. We have a significant amount, and following the pending Acquisition will have an additional amount, of goodwill and other intangible assets on our consolidated financial statements that are subject to impairment based upon future adverse changes in our business or prospects. The impairment of any goodwill and other intangible assets may have a negative impact on our consolidated results of operations.

Risks Specific to Our Company

The global beer industry is constantly evolving, and our position within the global beer industry and our markets in which we operate may fundamentally change. If we do not successfully transform along with the evolving industry and market dynamics, then the result could have a material adverse effect on our business and financial results. The brewing industry has significantly evolved over the years becoming an increasingly global beer market. For many years, the industry operated primarily on local presence with modest international expansion achieved through export, license and partnership arrangements, whereas it has now become increasingly complex as the consolidation of brewers has occurred globally resulting in fewer major global market participants. At the same time, smaller local brewers within certain geographies are seeing accelerated growth as consumers increasingly place value on locally-produced, regionally-sourced products. As a result of the increased global consolidation of brewers and the dynamic of an expanding new segment within the industry with new market entrants, the markets in which we operate, particularly the more mature markets, may evolve at a disadvantage to our current market position and local governments may intervene, which may fundamentally accelerate transformational changes to such markets. For example, U.S. and Canada beer markets have long consisted of a select number of significant market participants with government-regulated routes to market. However, recent evolution in these markets and emerging changes to

consumer preferences have introduced a significant expansion of market entrants and resulted in increased consumer choice and market competition, as well as increased government scrutiny. Specifically, in Canada changes to the existing historical framework of regulations, distribution models, and packaging requirements, such as government-owned retail outlets and industry standard returnable bottles may be disadvantageous to us. Currently, in Ontario and other provinces, provincial governments are reviewing this historical foundation as a result of this market evolution and increased demand by some for government intervention to enhance competition and choice. As further described below, in addition to these risks related to growing competition and market evolution, the existing Ontario distribution models may be changed in ways that are unfavorable to us and the industry standard returnable bottle agreement may change in ways that adversely impact our operating model across Canada. If we are unsuccessful in evolving with, and navigating through, the changes to the markets in which we operate, the above risk could result in a material adverse effect on our business and financial results.

Table of Contents

Competition in our markets could require us to reduce prices or increase capital and other expenditures or cause us to lose sales volume, any of which could have a material adverse effect on our business and financial results. In most of our markets, our primary competitors have substantially greater financial, marketing, production and distribution resources than we do, and are more diverse in terms of their geographies and brand portfolios. In all of the markets in which we operate, aggressive marketing strategies, such as reduced pricing, brand positioning, and increased capital investments by these competitors could have a material adverse effect on our business and financial results. In addition, continuing consolidation among major global brewers may lead to stronger or new competitors, loss of partner brands, negative impacts on our distributor networks and predatory marketing and pricing tactics by competitors. Further, distributor consolidation could reduce our ability to promote our brands in the market in a manner that enhances rather than diminishes their value, as well as reducing our ability to manage our pricing effectively. These factors could result in lower margins or loss of market share, due to increased pressures for reduced pricing or difficulties in increasing prices while remaining competitive within our markets, as well as the need for increased capital investment, marketing and other expenditures. Moreover, several of our major markets are mature, so growth opportunities may be more limited to us than to our competitors. The above risk, if realized, could result in a material adverse effect on our business and financial results.

Our success as an enterprise depends largely on the success of relatively few products in several mature markets specific to the beer industry; if consumer preferences shift away from our products or consumption of our products decline, our business and financial results could be materially adversely affected. Our Coors Light and Molson Canadian brands in Canada, Coors Light and Miller Lite brands in the U.S., and Carling, Staropramen, Jelen, Ozujsko and Coors Light brands in Europe represented half of each respective segment's sales volumes in 2015. Additionally, several of our brands represent a significant share of their respective market, therefore volatility in these markets could disproportionately impact the performance of these brands. Consequently, any material shift in consumer preferences away from these brands, or from the categories in which they compete, could have a material adverse effect on our business and financial results. Consumer preferences and tastes may shift away from our brands or beer generally due to, among others, changing taste preferences, demographics, downturn in economic conditions or perceived value, as well as changes in consumers' perception of our brands due to negative publicity, regulatory actions or litigation. Additionally, in some of our major markets, specifically Canada and the U.S., there has been a recent shift in consumer preferences within the total beer market away from premium brands to "craft beer" produced by small, regional microbreweries, as well as a shift within the total alcohol beverage market from beer to wine and spirits. Moreover, several of our major markets are mature and we have significant share, therefore small movements in consumer preference can disproportionately impact our results. As a result, a shift in consumer preferences away from our products or beer could result in a material adverse effect on our business and financial results.

Continued weak, or further weakening of, economic conditions in the markets in which we do business could have a material adverse effect on our business and financial results. Beer consumption in many of our markets is closely tied to general economic conditions and a significant portion of our portfolio consists of premium and above premium brands. Difficult macroeconomic conditions in our markets, such as decreases in per capita income and level of disposable income driven by increases to inflation, income taxes, the cost of living, unemployment levels, political or economic instability or other country specific factors could have an adverse effect on the demand for our products. For example, we have continued to experience economic pressures in certain European markets through 2015, resulting in an increased consumer trend toward value brands within the impacted markets. This trend, along with other contributing factors, negatively impacted sales, as well as impairments of certain European brands, including Jelen, which were recorded in the third quarter of 2015. A continuation of this trend or further deterioration of the current economic conditions could result in a material adverse effect on our business and financial results.

We may incur impairments of the carrying value of our goodwill and other intangible assets. In connection with various business combinations, we have historically allocated material amounts of the related purchase prices to goodwill and other intangible assets that are considered to have indefinite useful lives. These assets are tested for impairment at least annually, using estimates and assumptions affected by factors such as economic and industry conditions and changes in operating performance. Additionally, in conjunction with the brand impairment tests, we also reassess each brand's indefinite-life classification. Potential resulting charges from an impairment of goodwill or

brand intangible, as well as reclassification of an indefinite-lived to a definite-lived brand intangible, could have a material adverse effect on our results of operations. For example, the results of our interim brand impairment review completed in the third quarter of 2015, indicated that the fair value of certain European indefinite-lived brand intangible assets were below their respective carrying values. As a result, we recorded an aggregate impairment charge of \$275.0 million recorded within special items in our consolidated statements of operations during the third quarter of 2015. Additionally, during this review, we also reassessed each brand's indefinite-life classification and determined that these impaired brands have characteristics that have evolved which now indicate a definite-life is more appropriate. These brands have therefore been reclassified as definite-lived intangible assets to be amortized over useful lives ranging from 30 to 50 years.

Table of Contents

Our most recent impairment analysis, conducted as of October 1, 2015, the first day of our fiscal fourth quarter, indicated that while our Canada reporting unit improved from the prior year, our Europe reporting unit declined and was determined to be at risk of failing step one of the goodwill impairment test. Specifically, the fair value of the Europe and Canada reporting units were estimated at approximately 9% and 20% in excess of their carrying values, respectively. Additionally, the fair value of the Molson core brands in Canada, were also at risk of failing the quantitative analysis of the indefinite-lived intangible asset impairment test as of October 1, 2015. The Europe reporting unit, and Molson core brands in Canada, are therefore at risk of a future impairment in the event of significant unfavorable changes in the forecasted cash flows (including prolonged, or further weakening of, adverse economic conditions or significant unfavorable changes in tax, environmental or other regulations, including interpretations thereof), terminal growth rates, market transaction multiples and/or weighted-average cost of capital utilized in the discounted cash flow analysis. Although the fair value in excess the of carrying value has increased for the Canada reporting unit from the October 1, 2014 testing date, the fair value is sensitive to potential unfavorable changes in forecasted cash flows, macroeconomic conditions, market multiples or discount rates that could have an adverse impact. Any future impairment of the Europe or Canada reporting units or Molson or other brands, or reclassification of indefinite-lived brands to definite-lived, may result in material charges that could have a material adverse effect on our business and financial results. Additionally, the testing of our goodwill for impairment is predicated upon our determination of our reporting units. Any change to the conclusion of our reporting units or the aggregation of components within our reporting units could result in a different outcome to our annual impairment test. See Part II—Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations, Critical Accounting Estimates and Part II—Item 8 Financial Statements and Supplementary Data, Note 11, "Goodwill and Intangible Assets" of the Notes for additional information related to the results of our annual impairment testing. Termination of one or more manufacturer/distribution agreements could have a material adverse effect on our business and financial results. We manufacture and/or distribute products of other beverage companies through various joint venture, licensing, distribution, contract brewing or other similar arrangements. The loss of one or more of these arrangements, as a result of industry consolidation or otherwise, could have a material adverse effect on our business and financial results. For example, our 2015 Europe results were adversely impacted by the termination of our brewing and kegging agreement with Heineken under which we produced and packaged the Foster's and Kronenbourg brands in the U.K. Additionally, Canada volumes were also adversely impacted by the termination of our license agreement with Miller Brewing Company ("Miller") in 2015. Further, subsequent to ABI's acquisition of Grupo Modelo in 2013, we entered into an agreement to accelerate the termination of our MMI joint venture that imported, distributed and marketed the Modelo beer brand portfolio across all Canadian provinces and territories, which resulted in an adverse impact on our 2015 and 2014 Canadian volumes upon final termination in the first quarter of 2014. Changes in various supply chain standards or agreements could have a material adverse effect on our business and financial results. Our business includes various joint venture and industry agreements which standardize parts of the supply chain system. An example includes our warehousing and customer delivery systems organized under joint venture agreements with other brewers. Any negative change in these agreements or material terms within these agreements could have a material adverse effect on our business and financial results. We rely on a small number of suppliers to obtain the packaging materials we need to operate our business. The inability to obtain materials could unfavorably affect our ability to produce our products. We purchase certain types of packaging materials including aluminum cans and bottles, glass bottles and paperboard from a small number of suppliers. Consolidation of packaging materials suppliers has reduced local supply alternatives and increased risks of supply disruptions. The inability of any of these suppliers to meet our production requirements without sufficient time to develop an alternative source could have a material adverse effect on our business and financial results. Risks associated with operating our joint ventures may materially adversely affect our business and financial results. We have entered into several joint ventures, including our MillerCoors joint venture in the United States and Puerto Rico with SABMiller. We may enter into additional joint ventures in the future. Our joint venture partners may at any time have economic, business or legal interests or goals that are inconsistent with our goals or with the goals of the joint venture. In addition, we compete against our joint venture partners in certain of our other markets. Disagreements with our business partners may impede our ability to maximize the benefits of our partnerships. Our

joint venture arrangements may require us, among other matters, to pay certain costs or to make certain capital investments or to seek our joint venture partner's consent to take certain actions. In addition, our joint venture partners may be unable or unwilling to meet their economic or other obligations under the operative documents, and we may be required to either fulfill those obligations alone to ensure the ongoing success of a joint venture or to dissolve and liquidate a joint venture. For example, we terminated our MMI joint venture that imported, distributed and marketed the Modelo beer brand portfolio across all Canadian provinces and territories, which, since termination in the first quarter of 2014, has had an adverse effect on our Canadian volumes and financial results. The above risk, if realized, could result in a material adverse effect on our business and financial results.

Table of Contents

Our operations in developing and emerging markets expose us to additional risks which could harm our business and financial results. We expect our operations in developing and emerging markets to become more significant to our operating results as we continue to further expand internationally including in connection with our proposed acquisition of the Miller brand portfolio outside the U.S. and Puerto Rico. In certain of these markets, we have limited operating experience and may not succeed. In addition to risks described elsewhere in this section, our operations in these markets expose us to additional risks, including: changes in local political, economic, social and labor conditions; restrictions on foreign ownership and investments; repatriation of cash earned in countries outside the U.S.; import and export requirements; increased costs to ensure compliance with complex foreign laws and regulations; currency exchange rate fluctuations; a less developed and less certain legal and regulatory environment, which among other things can create uncertainty with regard to liability issues; longer payment cycles, increased credit risk and higher levels of payment fraud; and other challenges caused by distance, language, and cultural differences.

In addition, as a global company, we are subject to foreign and U.S. laws and regulations designed to combat governmental corruption, including the U.S. Foreign Corrupt Practices Act and the U.K. Bribery Act. Violations of these laws and regulations could result in fines and penalties, criminal sanctions against us, our officers, or our employees, prohibitions on the conduct of our business and on our ability to offer our products and services in one or more countries and a materially negative effect on our brands and our operating results. Although we have implemented policies and procedures designed to ensure compliance with these foreign and U.S. laws and regulations, including the U.S. Foreign Corrupt Practices Act and the U.K. Bribery Act, there can be no assurance that our employees, business partners or agents will not violate our policies.

Changes to the regulation of the distribution systems for our products could adversely affect our business and financial results. In our U.S. market, there is a three-tier distribution system that has historically applied to the distribution of products sold through MillerCoors (including our non-U.S. products). That system, consisting of required separation of manufacturers, distributors and retailers, is increasingly subject to legal challenges on the basis that it allegedly interferes with interstate commerce. To the extent that such challenges are successful and require changes to the three-tier system, such changes could have a materially adverse effect on MillerCoors and, consequently, on us. Further, in Canada, our products are required to be distributed through each province's respective provincial liquor board. Additionally, in certain provinces, we rely on our joint venture arrangements, such as BRI and BDL, to distribute our products via retail outlets that are mandated and regulated by provincial government regulators. BRI owns and operates commercial retail outlets, known as The Beer Store, in Ontario, and BDL facilitates the distribution of our products in the Western provinces. Recent review of government assets in Ontario has included an evaluation of the BRI distribution model which was finalized in second half of 2015. We continue to evaluate and are beginning to implement actions to mitigate any adverse impacts to our Canada segment that may result from these changes. See additional risks specific to BRI under the "Risks Specific to the Canada Segment" heading below. If provincial regulation should change, the costs to adjust our distribution methods could have a material adverse effect on our business and financial results.

Changes in tax, environmental or other regulations or failure to comply with existing licensing, trade and other regulations could have a material adverse effect on our business and financial results. Our business is highly regulated by federal, state, provincial and local laws and regulations in various jurisdictions regarding such matters as licensing requirements, trade and pricing practices, labeling, advertising, promotion and marketing practices, relationships with distributors, environmental matters, smoking bans at on-premise locations and other matters. These laws and regulations are subject to frequent re-evaluation, varying interpretations and political debate and inquiries from government regulators charged with their enforcement. Examples of this are the recent changes in the Canadian tax legislation and regulatory assessments received in Europe in the first quarter of 2015 and fourth quarter of 2014 related to the interpretation of the application of tax on the production and sale of our products. Failure to comply with existing laws and regulations or changes in these laws, regulations, or interpretations thereof, or in tax, environmental, excise tax levels imposed or any other laws or regulations could result in the loss, revocation or suspension of our licenses, permits or approvals and could have a material adverse effect on our business, financial condition and results of operations. Additionally, uncertainties exist with respect to adding new tax laws, the interpretation of, and potential

future developments in, complex domestic and international tax laws and regulations and the amount and timing of future taxable income. Given the wide range of international business relationships and the long-term nature and complexity of existing contractual agreements, differences arising between the actual results and assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. Finally, advocates of prohibition and other severe restrictions on the marketing and sales of alcohol are becoming increasingly organized and coordinated on a global basis, seeking to impose laws or regulations or to bring actions against us, to curtail substantially the consumption of alcohol, including beer, in developed and developing markets. To the extent such views gain traction in regulations of jurisdictions in which we do or plan to do business, they could have a material adverse effect on our business and financial results. For example, during the fourth quarter of 2015, in Bihar, India, the largest state in India in which MCI operates, it was announced that regulatory changes could impact the sale and distribution of alcohol, which could have a material adverse effect on our business and financial results.

Table of Contents

Our consolidated financial statements are subject to fluctuations in foreign exchange rates, most significantly the Canadian dollar and the European operating currencies such as, but not limited to, Euro, British Pound, Czech Koruna, Croatian Kuna, Serbian Dinar, New Romanian Leu, Bulgarian Lev and Hungarian Forint. We hold assets and incur liabilities, earn revenues and pay expenses in different currencies, most significantly in Canada and throughout Europe. Because our financial statements are presented in U.S. Dollars ("USD"), we must translate our assets, liabilities, income and expenses into USD. Increases and decreases in the value of the USD will affect, perhaps adversely, the value of these items in our financial statements, even if their local currency value has not changed. Additionally, we are exposed to currency transaction risks related to transactions denominated in currencies other than one of the functional currencies of our operating entities, such as the purchase of certain raw material inputs or capital expenditures, as well as sales transactions and debt issuances or other incurred obligations. Further, certain actions by the government of any of the jurisdictions in which we operate could adversely affect our results and financial position. To the extent that we fail to adequately manage these risks through our risk management policies intended to protect our exposure to currency movements, which may affect our operations, including if our hedging arrangements do not effectively or completely hedge changes in foreign currency rates, our results of operations may be materially and adversely affected. Additionally, the recent strengthening of the USD against the Canadian dollar, European currencies and various other global currencies, if continued, would adversely impact our USD reported results due to the impact on foreign currency translation.

Our operations face significant exposure to changes in commodity prices, which could materially and adversely affect our business and financial results. We use a large volume of agricultural and other raw materials, some of which are purchased through supply contracts with third parties, to produce our products, including barley, malted barley, hops, corn, other various starches, water and packaging materials, including aluminum cans and bottles, glass and polyethylene terephthalate ("PET") containers, as well as, cardboard and other paper products. We also use a significant amount of diesel fuel, natural gas and electricity in our operations. The supply and price of these raw materials and commodities can be affected by a number of factors beyond our control, including market demand, alternative sources for suppliers, global geopolitical events (especially as to their impact on crude oil prices and the resulting impact on diesel fuel prices), frosts, droughts and other weather conditions, economic factors affecting growth decisions, inflation, plant diseases and theft. To the extent any of the foregoing factors affect the prices of ingredients or packaging or our hedging arrangements do not effectively or completely hedge changes in commodity price risks and we are not able to pass these increased costs along to customers, our financial results could be materially adversely impacted.

Climate change and water availability may negatively affect our business and financial results. There is concern that a gradual increase in global average temperatures could cause significant changes in global weather patterns and an increase in the frequency and severity of natural disasters. While warmer weather has historically been associated with increased sales of beer, changing weather patterns could result in decreased agricultural productivity in certain regions which may limit availability or increase the cost of key agricultural commodities, such as hops, barley and other cereal grains, which are important ingredients for our products. Increased frequency or duration of extreme weather conditions could also impair production capabilities, disrupt our supply chain or impact demand for our products. In addition, public expectations for reductions in greenhouse gas emissions could result in increased energy, transportation and raw material costs and may require us to make additional investments in facilities and equipment. Clean water is a limited resource in many parts of the world and climate change may increase water scarcity and cause a deterioration of water quality in areas where we maintain brewing operations. The competition for water among domestic, agricultural and manufacturing users is increasing in some of our brewing communities. Even where water is widely available, water purification and waste treatment infrastructure limitations could increase costs or constrain our operations. The above risks, if realized, could result in a material adverse effect on our business and financial results.

Loss or closure of a major brewery or other key facility, due to unforeseen or catastrophic events or otherwise, could have a material adverse effect on our business and financial results. Our business and financial results could be materially adversely impacted by physical risks such as earthquakes, hurricanes, floods, other natural disasters or catastrophic events that damage or destroy one of our breweries or key facilities or the key facilities of our significant

suppliers. Additionally, certain catastrophes are not covered by our general insurance policies, which could result in significant unrecoverable losses. In addition, our business and results of operations could be adversely impacted by under-investment in physical assets or production capacity, including contract brewing and effect on priority of our brands if production capacity is limited. Further, significant excess capacity at any of our breweries as a result of increased efficiencies in our supply chain process or continued volume declines, could result in under-utilization of our assets, which could lead to excess overhead expenses or additional costs incurred associated with the closure of one or more of our facilities. For example, as part of a strategic review of our supply chain network, certain breweries and bottling lines were closed during 2015 in which we incurred costs during the year and for which we may incur additional costs during 2016. There may be further brewery closures as part of our ongoing assessment to ensure that our supply chain capacity is aligned with the needs of the business.

Table of Contents

Failure to successfully identify, complete or integrate attractive acquisitions and joint ventures into our existing operations could have an adverse effect on our business and financial results. We have made a number of acquisitions and entered into several joint ventures. In order to compete in the consolidating global brewing industry, we anticipate that we may, from time to time, in the future acquire additional businesses or enter into additional joint ventures that we believe would provide a strategic fit with our business such as the pending Acquisition. See above "Risks Specific to the Pending Acquisition" for further details. Potential risks associated with acquisitions and joint ventures could include, among other things: our ability to identify attractive acquisitions and joint ventures; our ability to offer potential acquisition targets and joint venture partners' competitive transaction terms; our ability to raise capital on reasonable terms to finance attractive acquisitions and joint ventures; our ability to realize the benefits or cost savings that we expect to realize as a result of the acquisition or joint venture; diversion of management's attention; our ability to successfully integrate our businesses with the business of the acquired company; motivating, recruiting and retaining key employees; conforming standards, controls, procedures and policies, business cultures and compensation structures among our company and the acquired company; consolidating and streamlining sales, marketing and corporate operations; potential exposure to unknown liabilities of acquired companies; loss of key employees and customers of the acquired business; and managing tax costs or inefficiencies associated with integrating our operations following completion of an acquisition or entry into a joint venture. If an acquisition or joint venture is not successfully completed or integrated into our existing operations, our business and financial results could be materially adversely impacted.

Poor investment performance of pension plan holdings and other factors impacting pension plan costs could unfavorably affect our business, liquidity and our financial results. Our costs of providing defined benefit pension plans are dependent upon a number of factors, such as the rates of return on the plans' assets, discount rates, the level of interest rates used to measure the required minimum funding levels of the plans, exchange rate fluctuations, future government regulation, global equity prices, and our required and/or voluntary contributions to the plans. While we comply with the minimum funding requirements, we have certain qualified pension plans with obligations which exceed the value of the plans' assets. These funding requirements may also require contributions even when there is no reported deficit. Without sustained growth in the pension investments over time to increase the value of the plans' assets, and depending upon the other factors as listed above, we could be required to fund the plans with significant amounts of cash. Such cash funding obligations (or the timing of such contributions) could have a material adverse effect on our cash flows, credit rating and cost of borrowing, financial position and/or results of operations. For example, following the completion of the triennial review of the U.K. pension plan with the plan's trustees in 2014, we made a GBP 150 million contribution to our U.K. pension plan in January 2015, based on the underfunded status of the plan and the evaluation of the plan's performance and long-term obligations.

Failure to comply with our debt covenants or a deterioration in our credit rating could have an adverse effect on our ability to obtain future financing at competitive rates and/or our ability to refinance our existing indebtedness. Under the terms of each of our debt facilities, we must comply with certain restrictions. These include restrictions on priority indebtedness (certain threshold percentages of secured consolidated net tangible assets), leverage thresholds, liens, and restrictions on certain types of sale lease-back transactions and transfers of assets. Failure to comply with these restrictions or maintain our credit rating may result in issues with our current financing structure and potential future financing requirements. A deterioration in our credit rating could also affect our ability to obtain future financing or refinance our current debt, as well as increase our borrowing rates, which could have an adverse effect on our business and financial results.

We depend on key personnel, the loss of whom would harm our business. The loss of the services and expertise of any key employee could harm our business. Our future success depends on our ability to identify, attract and retain qualified personnel on a timely basis. Turnover of senior management can adversely impact our stock price, our results of operations and our client relationships and may make recruiting for future management positions more difficult. In addition, we must successfully integrate any new management personnel that we hire within our organization, or who join our organization as a result of an acquisition, in order to achieve our operating objectives, and changes in other key management positions may temporarily affect our financial performance and results of operations as new management becomes familiar with our business.

Due to a high concentration of workers represented by unions or trade councils in Canada, Europe, and at MillerCoors in the U.S., we could be significantly affected by labor strikes, work stoppages or other employee-related issues. Approximately 59%, 31% and 36% of our Canadian, MillerCoors and European workforces, respectively, are represented by trade unions. Stringent labor laws in the U.K. expose us to a greater risk of loss should we experience labor disruptions in that market. A labor strike, work stoppage or other employee-related issue could have a material adverse effect on our business and financial results.

The success of our business relies heavily on brand image, reputation, product quality and protection of intellectual property. It is important that we maintain and increase the image and reputation of our existing products. Concerns about product quality, even when unsubstantiated, could be harmful to our image and reputation of our products. Deterioration to our brand equity may be difficult to combat or reverse and could have a material effect on our business and financial results. In

Table of Contents

addition, because our brands carry family names, personal activities by certain members of the Molson or Coors families that harm their public image or reputation could have an adverse effect on our brands. Further, the success of our Company is dependent on our ability to protect our intellectual property rights, including trademarks, patents, domain names, trade secrets and know-how. We cannot be certain that the steps we have taken to protect our intellectual property rights will be sufficient or that third parties will not infringe upon or misappropriate these rights. If we are unable to protect our intellectual property rights, it could have a material adverse effect on our business and financial results.

Because of our reliance on third-party service providers and internal and outsourced systems for our information technology and certain other administrative functions, we could experience a disruption to our business. We rely exclusively on information services providers worldwide for our information technology functions including network, help desk, hardware and software configuration. Additionally, we rely on internal networks and information systems and other technology, including the internet and third-party hosted services, to support a variety of business processes and activities, including procurement and supply chain, manufacturing, distribution, invoicing and collection of payments. We use information systems for certain human resource activities and to process our employee benefits, as well as to process financial information for internal and external reporting purposes and to comply with various reporting, legal and tax requirements. We also have outsourced a significant portion of work associated with our finance and accounting, human resources and other information technology functions to third-party service providers. As information systems are critical to many of our operating activities, our business may be impacted by system shutdowns, service disruptions or security breaches. Additionally, if one of our service providers was to fail and we were unable to find a suitable replacement in a timely manner, we could be unable to properly administer our outsourced functions. Further, our internal and outsourced systems may also be the target of a breach to our security, which, if successful, could expose us to the loss of key business, employee, customer or vendor information and disruption of our operations. If our information systems suffer severe damage, disruption or shutdown and our remediation plans do not effectively resolve the issues in a timely manner, we could experience delays in reporting our financial results and we may lose revenue and profits as a result of our inability to timely manufacture, distribute, invoice and collect payments from our customers. Misuse, leakage or falsification of information could result in a violation of data privacy laws and regulations, damage our reputation and credibility. In addition, we may suffer financial and reputational damage because of lost or misappropriated confidential information and may become subject to legal action and increased regulatory oversight. We could also be required to spend significant financial and other resources to remedy the damage caused by a security breach or to repair or replace networks and information systems.

If the Pentland Trust and the Coors Trust do not agree on a matter submitted to stockholders or if a super-majority of our board of directors do not agree on certain actions, generally the matter will not be approved, even if beneficial to us or favored by other stockholders or a majority of our board of directors. Pentland Securities (1981) Inc. (the "Pentland Trust") (a company controlled by the Molson family and related parties) and the Adolph Coors, Jr. Trust (the "Coors Trust"), which together control more than 90% of our Class A common stock and Class A exchangeable shares, have a voting trust agreement through which they have combined their voting power over the shares of our Class A common stock and the Class A exchangeable shares that they own. In the event that these two stockholders do not agree to vote in favor of a matter submitted to a stockholder vote (other than the election of directors), the voting trustees are required to vote all of the Class A common stock and Class A exchangeable shares deposited in the voting trust against the matter. There is no other mechanism in the voting trust agreement to resolve a potential deadlock between these stockholders. Therefore, if either the Pentland Trust or the Coors Trust is unwilling to vote in favor of a proposal that is subject to a stockholder vote, we would be unable to implement the proposal even if our board of directors, management or other stockholders believe the proposal is beneficial to us. Similarly, our bylaws require the authorization of a super-majority (two-thirds) of the board of directors to take certain transformational actions. Thus, it is possible that the Company will not be authorized to take action even if it is supported by a simple majority of the board of directors.

The interests of the controlling stockholders may differ from those of other stockholders and could prevent the Company from making certain decisions or taking certain actions that would be in the best interest of the other

stockholders. Our Class B common stock has fewer voting rights than our Class A common stock and holders of our Class A common stock have the ability to effectively control or have a significant influence over certain company actions requiring stockholder approval, which could have a material adverse effect on Class B stockholders. See Part II—Item 8 Financial Statements and Supplementary Data, Note 8, "Stockholders' Equity" of the Notes for additional information regarding voting rights of Class A and Class B stockholders.

Risks Specific to the Canada Segment

Government mandated changes to the retail distribution model resulting from new regulations may have a material adverse effect on our Canada business. Beer sales are highly regulated by the Canadian government. For example, in Ontario, off-premise beer may only be purchased at retail outlets operated by BRI, government-regulated retail outlets operated by the Liquor Control Board of Ontario ("LCBO"), or approved agents of the LCBO. In April 2014, the Ontario Premier's

Table of Contents

Advisory Council on Government Assets (the "Council") began a review that included evaluating the beer retailing and distribution system in Ontario, for which BRI is the primary beer retail and distribution channel. In April 2015, as a result of this review and our negotiations with the Council, we, along with the other owners of BRI, agreed, in principle and subject to entry into definitive binding documents, to enter into a new beer framework agreement (the "New Framework") with the Province of Ontario. The associated Master Framework Agreement was subsequently executed by all parties on September 22, 2015, and became effective as of January 1, 2016. Additionally, as a result of the above review, certain other legal matters could arise that could have a negative impact on our business, such as the litigation related to our ownership of BRI discussed in Part I—Item 3. Legal Proceedings. If the implementation of the provisions under the New Framework differ from our current expectations, it could result in a material adverse effect on our business and financial results.

We may experience adverse effects on our Canada business and financial results due to declines in the overall Canadian beer industry, continued price discounting, increased cost of goods sold and higher taxes. If the Canadian beer market continues to decline, the impact to our financial results could be exacerbated due to our significant share of the overall market. Additionally, continuation, acceleration or the increase of price discounting, in Ontario, Québec, Alberta or other provinces, as well as increases in our cost of goods sold, could adversely impact our business. Further, changes in the Canadian tax legislation, such as the recent increase in beer excise taxes and the implementation of equalization and standardization of excise tax regulations in Quebec, could decrease our net sales. Moreover, the future success and earnings growth of the Canada business depends, in part, on our ability to efficiently conduct our operations. Failure to generate significant cost savings and margin improvement through our ongoing initiatives could adversely affect our profitability.

In the event that we are required to move away from the industry standard returnable bottle we use today, we may incur unexpected losses. Along with ABI and other brewers in Canada, we currently use an industry standard returnable bottle which represents approximately 37% of total volume sales (excluding imports) in Canada. Changes to the Industry Standard Bottle Agreement could impact our use of the industry standard returnable bottle. If we cease to use the industry standard returnable bottle, our current bottle inventory and a portion of our bottle packaging equipment could become obsolete and could result in a material write-off of these assets.

Risks Specific to the United States Segment and MillerCoors

We do not fully control the operations and administration of MillerCoors, which represents our interests in the U.S. beer business. Pending our proposed Acquisition of 100% of MillerCoors, we jointly control MillerCoors with SABMiller and hold a 42% economic interest in the joint venture. While we direct the MillerCoors business through our equal representation on its board of directors (along with SABMiller) and otherwise impact its business activities through our ongoing communication and oversight, MillerCoors' management is responsible for the day-to-day operation of the business. As a result, we do not have full control over MillerCoors' activities. Our results of operations are dependent upon the efforts of MillerCoors' management, our ability to govern the joint venture effectively with SABMiller and factors beyond our control that may affect SABMiller. For example, the loss of the services and expertise of any key MillerCoors employee could harm our business. Additionally, our disclosure controls and procedures with respect to MillerCoors are necessarily substantially more limited than those we maintain with respect to our consolidated subsidiaries. Certain rights of first refusal apply to any assignment of the joint venture interests. Any transfer of ownership interest could have a significant effect on our results of operations and financial position, as well as our ongoing internal and external business relationships. See risk factors related to the pending Acquisition of MillerCoors above.

MillerCoors is highly dependent on independent distributors in the United States to sell its products, with no assurance that these distributors will effectively sell its and our products. MillerCoors sells all of its products and many of our non-U.S. products in the United States to distributors for resale to retail outlets and the regulatory environment of many states makes it very difficult to change distributors. Consequently, if MillerCoors is not allowed or is unable to replace unproductive or inefficient distributors, its business, financial position and results of operation may be adversely affected, which could have a material adverse effect on our business and financial results.

Risks Specific to the Europe Segment

Economic trends and intense competition in European markets could unfavorably affect our profitability. Our European businesses have been, and may continue to be, adversely affected by conditions in the global financial markets and general economic and political conditions, as well as a continued weakening of their respective currencies versus the U.S. dollar. Our interim brand impairment review completed in the third quarter of 2015, indicated that the fair value of certain European indefinite-lived brand intangible assets were below their respective carrying values and we therefore recorded an aggregate impairment charge of \$275.0 million. Additionally, during this review, we also reassessed each brand's indefinite-life classification and determined that these impaired brands have characteristics that have evolved which now indicate a definite-life is more appropriate. These brands have therefore been reclassified as definite-lived intangible assets to be amortized over useful lives ranging from 30 to 50 years. The decline in fair value of these brands was due, in part, to key changes to our

Table of Contents

underlying assumptions supporting the value of the brands. Specific changes include underperformance through the 2015 peak season driving a downward shift in management's forecasts, along with challenging macroeconomic and competitive conditions that we no longer expect to subside in the near term. Additionally, we face intense competition in certain of our European markets, particularly with respect to price, which could lead to reduced sales or profitability. In particular, the on-going focus by large competitors in Europe to drive increased market share through aggressive pricing strategies could adversely affect our sales and results of operations. In addition, in recent years, beer volume sales in Europe have been shifting from pubs and restaurants (on-premise) to retail stores (off-premise), for the industry in general. Margins on sales to off-premise customers tend to be lower than margins on sales to on-premise customers, and, as a result, continuation or acceleration of these trends would further adversely affect our profitability.

In the event that a significant pub chain declared bankruptcy, or experience similar financial difficulties, our business and financial results could be materially adversely affected. We extend credit to pub chains in the U.K., and in some cases the amounts are significant. Business at on-premise outlets has decreased since late 2008 as a result of a continued challenging economic environment in the U.K. While the economic environment in the U.K. has seen an upturn in 2015, some pub chains may continue to face increasing financial difficulty, if economic conditions do not stabilize. In the event that one or more significant pub chains were to be unable to pay amounts owed to us as a result of bankruptcy or similar financial difficulties, our business and financial results could be materially adversely affected.

Risks Specific to the Molson Coors International Segment

An inability to expand our operations in emerging markets could adversely affect our growth prospects. Our ability to grow our MCI segment in emerging markets depends on social, economic and political conditions in those markets, on our ability to create effective product distribution networks and consumer brand awareness in new markets and in many cases our ability to find appropriate local partners. Due to product price, local regulatory changes, local competition from competitors that are larger and have more resources than we do and cultural differences, or absence of effective routes to market, there is no assurance that our products will be accepted in any particular emerging market. If we are unable to expand our businesses in emerging markets, our growth prospects could be adversely affected.

Risks Specific to Our Discontinued Operations

Indemnities provided to the purchaser of 83% of the Cervejarias Kaiser Brasil S.A. ("Kaiser") business in Brazil could result in future cash outflows and statement of operations charges. In 2006, we sold our 83% ownership interest in Kaiser to FEMSA Cerveza S.A. de C.V. ("FEMSA"). The terms of the sale agreement require us to indemnify FEMSA for exposures related to certain tax, civil and labor contingencies and certain purchased tax credits. The ultimate resolution of these claims is not under our control. These indemnity obligations are recorded as liabilities on our consolidated balance sheets, however, we could incur future statement of operations charges as facts further develop resulting in changes to our estimates or changes in our assessment of probability of loss on these items as well as due to fluctuations in foreign exchange rates. Due to the uncertainty involved in the ultimate outcome and timing of these contingencies, significant adjustments to the carrying value of our indemnity liabilities and corresponding statement of operations charges/credits could result in the future.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

Table of Contents

ITEM 2. PROPERTIES

As of February 11, 2016, our major facilities were owned (unless otherwise indicated) and are as follows:

Facility	Location	Character
Canada Segment		
Administrative offices	Montréal, Québec	Corporate Headquarters
	Toronto, Ontario	Canada Segment Headquarters
Brewery/packaging plants	Creemore, Ontario	Brewing and packaging
	Moncton, New Brunswick	Brewing and packaging
	Montréal, Québec ⁽¹⁾	Brewing and packaging
	St John's, Newfoundland	Brewing and packaging
	Toronto, Ontario ⁽¹⁾	Brewing and packaging
	Vancouver, British Columbia ⁽²⁾	Brewing and packaging
Distribution warehouses	Québec Province ⁽³⁾	Distribution centers
	Rest of Canada ⁽⁴⁾	Distribution centers
Europe Segment		
Administrative offices	Prague, Czech Republic	Europe Segment Headquarters
Brewery/packaging plants	Apatin, Serbia ⁽¹⁾	Brewing and packaging
	Bőcs, Hungary	Brewing and packaging
	Burton-on-Trent, Staffordshire, U.K. ^{(1),(5)}	Brewing and packaging
	Haskovo, Bulgaria	Brewing and packaging
	Niksic, Montenegro	Brewing and packaging
	Ostrava, Czech Republic	Brewing and packaging
	Ploiesti, Romania ⁽¹⁾	Brewing and packaging
	Prague, Czech Republic ⁽¹⁾	Brewing and packaging
	Sharp's Brewery, Cornwall, U.K.	Brewing and packaging
	Tadcaster Brewery, Yorkshire, U.K. ⁽¹⁾	Brewing and packaging
Distribution warehouses	Burtonwood Brewery, Warrington, U.K.	Brewing and packaging
	Zagreb, Croatia	Brewing and packaging
	Europe ⁽⁶⁾	Distribution centers
MCI Segment		
Brewery/packaging plants	Patna, Bihar, India	Brewing and packaging
Brewery/packaging plants	Saha, Haryana, India	Brewing and packaging
Brewery/packaging plants	Bhankharpur, Punjab, India	Brewing and packaging

Montréal and Toronto breweries collectively account for approximately 79% of our Canada production. The Burton-on-Trent, Prague, Ploiesti, Apatin and Tadcaster breweries collectively account for approximately 74% of (1) our Europe production. Note that while we closed the Alton brewery in the U.K., the Plovdiv brewery in Bulgaria and are in the consultation process of closing the Burton South brewery in the U.K., we continue to own these breweries as of December 31, 2015.

We own one and lease one brewing and packaging facility in Vancouver, British Columbia. In the fourth quarter of 2015, as a result of our strategic review of our supply chain network, we entered into an agreement to sell our (2) owned Vancouver brewery with the intent to use the proceeds from the sale to help fund the construction of an efficient and flexible brewery in British Columbia. The sale is anticipated to be completed in the first quarter of 2016. In conjunction with the sale, we also agreed to leaseback the existing property to continue operations on an uninterrupted basis while the new brewery is being constructed.

Table of Contents

(3) We own ten distribution centers, lease four additional distribution centers, lease seven cross docks, lease one warehouse and lease one parking facility in the Québec Province.

(4) We own one and lease six warehouses throughout Canada, excluding the Québec Province.

As part of our ongoing strategic review of our European supply chain network in the fourth quarter of 2015, we (5) have entered into a consultation process to close our Burton South brewery in the U.K. and consolidate production within our recently modernized Burton North brewery.

(6) We own fourteen distribution centers, lease sixteen additional distribution centers, own four warehouses and lease five additional warehouses throughout Europe.

We also lease offices in Colorado, the location of our Corporate headquarters, as well as within various international countries in which our MCI segment operates. We believe our facilities are well maintained and suitable for their respective operations. In 2015, our operating facilities were not capacity constrained.

ITEM 3. LEGAL PROCEEDINGS

Litigation and other disputes

On December 12, 2014, a notice of action captioned David Hughes and 631992 Ontario Inc. v. Liquor Control Board of Ontario, Brewers Retail Inc., Labatt Breweries of Canada LP, Molson Coors Canada and Sleeman Breweries Ltd. No. CV-14-518059-00CP was filed in Ontario, Canada in the Ontario Superior Court of Justice. Brewers' Retail Inc. ("BRI") and its owners, including Molson Coors Canada, as well as the Liquor Control Board of Ontario ("LCBO") are named as defendants in the action. The plaintiffs allege that The Beer Store (retail outlets owned and operated by BRI) and LCBO improperly entered into an agreement to fix prices and market allocation within the Ontario beer market to the detriment of licensees and consumers. The plaintiffs seek to have the claim certified as a class action on behalf of all Ontario beer consumers and licensees and, among other things, damages in the amount of Canadian Dollar ("CAD") 1.4 billion. We note that The Beer Store operates according to the rules established by the Government of Ontario for regulation, sale and distribution of beer in the province. Additionally, prices at The Beer Store are independently set by each brewer and are approved by the LCBO on a weekly basis. Accordingly, we intend to vigorously assert and defend our rights in this lawsuit. See Part II—Item 8 Financial Statements and Supplementary Data, Note 18, "Commitments and Contingencies" of the Notes for additional information.

For additional information regarding environmental proceedings see Part II—Item 8 Financial Statements and Supplementary Data, Note 18, "Commitments and Contingencies" of the Notes.

We are involved in other disputes and legal actions arising in the ordinary course of our business. While it is not feasible to predict or determine the outcome of these proceedings, in our opinion, based on a review with legal counsel, none of these disputes and legal actions is expected to have a material impact on our consolidated financial position, results of operations or cash flows. However, litigation is subject to inherent uncertainties and an adverse result in these or other matters may arise from time to time that may harm our business.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Table of Contents

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our Class A common stock and Class B common stock trade on the New York Stock Exchange under the symbols "TAP.A" and "TAP," respectively. In addition, the Class A exchangeable shares and Class B exchangeable shares of our indirect subsidiary, Molson Coors Canada Inc., trade on the Toronto Stock Exchange under the symbols "TPX.A" and "TPX.B," respectively. The Class A and B exchangeable shares are a means for shareholders to defer tax in Canada and have substantially the same economic and voting rights as the respective common shares. The exchangeable shares can be exchanged for our Class A or B common stock at any time and at the exchange ratios described in the Merger documents, and receive the same dividends. At the time of exchange, shareholders' taxes are due. The exchangeable shares have voting rights through special voting shares held by a trustee.

The approximate number of record security holders by class of stock at February 5, 2016, is as follows:

Title of class	Number of record security holders
Class A common stock, \$0.01 par value	25
Class B common stock, \$0.01 par value	2,822
Class A exchangeable shares, no par value	234
Class B exchangeable shares, no par value	2,487

The following table sets forth the high and low sales prices per share of our Class A common stock for each quarter of 2015 and 2014 as reported by the New York Stock Exchange, as well as dividends paid in such quarter.

	High	Low	Dividends
2015			
First quarter	\$94.50	\$78.75	\$0.41
Second quarter	\$88.26	\$71.00	\$0.41
Third quarter	\$83.84	\$65.50	\$0.41
Fourth quarter	\$96.00	\$78.50	\$0.41
2014			
First quarter	\$58.25	\$51.64	\$0.37
Second quarter	\$75.32	\$57.68	\$0.37
Third quarter	\$77.16	\$67.69	\$0.37
Fourth quarter	\$102.40	\$68.56	\$0.37

The following table sets forth the high and low sales prices per share of our Class B common stock for each quarter of 2015 and 2014 as reported by the New York Stock Exchange, as well as dividends paid in such quarter.

	High	Low	Dividends
2015			
First quarter	\$78.92	\$71.49	\$0.41
Second quarter	\$79.14	\$69.70	\$0.41
Third quarter	\$85.29	\$64.40	\$0.41
Fourth quarter	\$95.74	\$78.17	\$0.41
2014			
First quarter	\$59.15	\$50.95	\$0.37
Second quarter	\$75.54	\$56.60	\$0.37
Third quarter	\$77.68	\$66.95	\$0.37
Fourth quarter	\$77.93	\$66.46	\$0.37

Table of Contents

The following table sets forth the high and low sales prices per share of our Class A exchangeable shares for each quarter of 2015 and 2014 as reported by the Toronto Stock Exchange, as well as dividends paid in such quarter.

	High	Low	Dividends
2015			
First quarter	CAD94.75	CAD85.01	\$0.41
Second quarter	CAD99.08	CAD88.85	\$0.41
Third quarter	CAD110.60	CAD88.20	\$0.41
Fourth quarter	CAD125.64	CAD113.03	\$0.41
2014			
First quarter	CAD64.05	CAD60.99	\$0.37
Second quarter	CAD82.11	CAD66.00	\$0.37
Third quarter	CAD86.00	CAD75.02	\$0.37
Fourth quarter	CAD88.88	CAD81.00	\$0.37

The following table sets forth the high and low sales prices per share of our Class B exchangeable shares for each quarter of 2015 and 2014 as reported by the Toronto Stock Exchange, as well as dividends paid in such quarter.

	High	Low	Dividends
2015			
First quarter	CAD98.25	CAD84.95	\$0.41

Third quarter	CAD87.00	CAD75.76	\$0.37
Fourth quarter	CAD90.48	CAD77.00	\$0.37

Table of Contents

PERFORMANCE GRAPH

The following graph compares our cumulative total stockholder return over the last five fiscal years with the Standard and Poor's 500 Index® ("S&P 500") and a customized index including MCBC, SABMiller, ABI, Carlsberg, Heineken and Asahi (the "Peer Group"). We have used a weighted-average based on market capitalization to determine the return for the Peer Group. The graph assumes \$100 was invested on December 25, 2010 (the last trading day of our 2010 fiscal year) in our Class B common stock, the S&P 500 and the Peer Group, and assumes reinvestment of all dividends.

	2010	2011	2012	2013	2014	2015
Molson Coors	\$100.00	\$88.01	\$89.01	\$117.83	\$159.89	\$205.84
S&P 500	\$100.00	\$102.20	\$116.58	\$150.51	\$171.10	\$173.44
Peer Group ⁽¹⁾	\$100.00	\$103.13	\$139.75	\$160.95	\$192.95	\$242.18

The Peer Group represents the weighted-average based on market capitalization of the common stock of MCBC, (1)SABMiller, ABI, Carlsberg, Heineken and Asahi. These securities are traded on various exchanges throughout the world.

Dividends

As a result of the pending Acquisition, we plan to maintain our current quarterly dividend of \$0.41 per share as we pay down debt, and we will revisit our dividend policy once deleveraging is well underway.

Table of Contents

Issuer Purchases of Equity Securities

In February 2015, our Board of Directors approved and authorized a new program to repurchase up to \$1.0 billion of our Class A and Class B common stock with a program term of four years. Under the program, shares may be repurchased in privately negotiated and/or open market transactions, including under plans complying with Rule 10b5-1 under the Exchange Act. The number, price and timing of the repurchases will be at the Company's sole discretion and will be evaluated depending on market conditions, liquidity needs or other factors. The Company's Board of Directors may suspend, modify or terminate the program at any time without prior notice. This repurchase program replaces and supersedes any repurchase programs previously approved by the Board of Directors. Beginning in April 2015, under this program, we entered into accelerated share repurchase agreements ("ASRs") with a financial institution. In exchange for up-front payments, the financial institution delivered shares of our common stock during the purchase periods of each ASR. The total number of shares ultimately delivered, and therefore the average repurchase price paid per share, was determined at the end of the applicable purchase period of each ASR based on the volume weighted-average price of our common stock during that period.

Additionally, as a result of our pending Acquisition, we have suspended the share repurchase program. As we pay down debt we will revisit our share repurchase program once deleveraging is well underway.

Issuer Purchases of Equity Securities for the Quarter Ended December 31, 2015

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs ⁽¹⁾
October 1, 2015 - October 31, 2015	597,338	(1)	597,338	
November 1, 2015 - November 30, 2015	—		—	
December 1, 2015 - December 31, 2015	75,404	(1)	75,404	
Total	672,742	\$89.94	672,742	\$850,000,000

Beginning in the second quarter of 2015 and through the fourth quarter of 2015, we purchased approximately 2 million shares of our Class B common stock under three separate ASRs for an aggregate of approximately \$150 million. The average repurchase price paid per share for the fourth quarter 2015 transactions was \$89.94 based on the total number of shares ultimately delivered and the up-front purchase price of \$50.0 million under this ASR.

On November 14, 2013, our Board of Directors approved a resolution to change MCBC's fiscal year from a 52/53 week fiscal year to a calendar year. As such, our 2013 fiscal year end was extended from December 28, 2013, to

(1) December 31, 2013, with subsequent fiscal years beginning on January 1 and ending on December 31 of each year.

The impact of the three additional days in fiscal year 2013 is immaterial to the consolidated financial statements.

Fiscal year 2011 contained 53 weeks whereas fiscal year 2012 contained 52 weeks. Fiscal year 2013 included three additional days beyond 52 weeks due to the above mentioned fiscal year change.

(2) Reflects activity as a result of our acquisition of StarBev Holdings S.a.r.l. on June 15, 2012.

Historical consolidated balance sheet figures have been adjusted for the adoption of ASU 2015-03: Interest -

(3) Imputation of Interest (ASC 835-30) - Simplifying the Presentation of Debt Issuance Costs ("ASU 2015-03"). The adjustment is not material for any period. See Note 2, "New Accounting Pronouncements" for details.

Table of Contents

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is provided to assist in understanding our company, operations and current business environment and should be considered a supplement to, and read in conjunction with, the accompanying consolidated financial statements and notes included within Part II—Item 8 Financial Statements and Supplementary Data, as well as the discussion of our business and related risk factors in Part I—Item 1 Business and Part I—Item 1A Risk Factors, respectively.

Our Fiscal Year

Unless otherwise indicated, (a) all \$ amounts are in U.S. Dollars ("USD"), (b) comparisons are to comparable prior periods, and (c) 2015 refers to the 12 months ended December 31, 2015, 2014 refers to the 12 months ended December 31, 2014, and 2013 refers to the period from December 30, 2012 through December 31, 2013. The impact of the three additional days in fiscal year 2013 is immaterial to the consolidated financial statements and is a result of changing our fiscal year from a 52/53 week fiscal year to a calendar year in 2013.

Use of Non-GAAP Measures

In addition to financial measures presented on the basis of accounting principles generally accepted in the United States of America ("U.S. GAAP"), we also present pretax and after-tax "underlying income," "underlying income per diluted share," "underlying effective tax rate," and "underlying free cash flow," which are non-GAAP measures and should be viewed as supplements to (not substitutes for) our results of operations presented under U.S. GAAP. We also present underlying earnings before interest, taxes, depreciation and amortization ("underlying EBITDA") as a non-GAAP measure. Our management uses underlying income, underlying income per diluted share, underlying EBITDA, underlying effective tax rate and underlying free cash flow as measures of operating performance to assist in comparing performance from period to period on a consistent basis; as a measure for planning and forecasting overall expectations and for evaluating actual results against such expectations; in communications with the board of directors, stockholders, analysts and investors concerning our financial performance; as useful comparisons to the performance of our competitors; and as metrics of certain management incentive compensation calculations. We believe that underlying income, underlying income per diluted share, underlying EBITDA, underlying effective tax rate and underlying free cash flow performance are used by and are useful to investors and other users of our financial statements in evaluating our operating performance because they provide an additional tool to evaluate our performance without regard to special and non-core items, which can vary substantially from company to company depending upon accounting methods and book value of assets and capital structure. We have provided reconciliations of all non-GAAP measures to their nearest U.S. GAAP measure and have consistently applied the adjustments within our reconciliations in arriving at each non-GAAP measure. These adjustments consist of special items from our U.S. GAAP financial statements (see Part II-Item 8 Financial Statements and Supplementary Data, Note 1, "Basis of Presentation and Summary of Significant Accounting Policies" of the Notes to the Consolidated Financial Statements ("Notes") for additional disclosure) as well as other non-core items, such as acquisition and integration related costs, unrealized mark-to-market gains and losses, and gains and losses on sales of non-operating assets, included in our U.S. GAAP results that warrant adjustment to arrive at non-GAAP results. We consider these items to be necessary adjustments for purposes of evaluating our ongoing business performance and are often considered non-recurring. Such adjustments are subjective and involve significant management judgment.

In addition to the non-GAAP measures noted above, we have certain operational measures, such as sales-to-wholesalers ("STWs") and sales-to-retailers ("STRs"), which we believe are useful metrics to management and investors in evaluating our operations. STW is a metric that we use in our U.S. business to reflect the sales from our operations to our direct customers, generally wholesalers. We believe the STW metric is important because it gives an indication of the amount of beer and adjacent products that we have produced and shipped to customers. STR is a metric that we use in our Canada and U.S. businesses to refer to sales closer to the end consumer than STWs, which generally means sales from our wholesalers or our company to retailers, who in turn sell to consumers. We believe the STR metric is important because, unlike STWs, it provides the closest indication of the performance of our brands in relation to market and competitor sales trends.

Pending Acquisition

On November 11, 2015, Anheuser-Busch InBev SA/NV's ("ABI") announced it had entered into a definitive agreement to acquire SABMiller plc ("SABMiller"). The resulting transaction ("ABI/SABMiller transaction") is expected to be finalized in the second half of 2016 subject to ABI and SABMiller shareholder approval and various global regulatory approvals. Concurrently, on November 11, 2015, we entered into a purchase agreement (the "Purchase Agreement") with ABI to acquire, contingent upon the closing of the ABI/SABMiller transaction, all of SABMiller's 58% economic interest and 50% voting interest in MillerCoors and all trademarks, contracts and other assets primarily related to the Miller brand portfolio outside of the U.S. and Puerto Rico for \$12.0 billion in cash, subject to downward adjustment as described in the Purchase Agreement (the "Acquisition"). Following the closing of the pending Acquisition, we will own 100% of the outstanding equity and voting interests of MillerCoors. The pending Acquisition is based on the terms and subject to the conditions set forth in the Purchase Agreement, as incorporated herein by reference as Exhibit 2.4 of Part IV Item 15.

Under the agreement, we will retain the rights to all of the brands currently in the MillerCoors portfolio for the U.S. and Puerto Rican markets, including import brands such as Peroni and Pilsner Urquell, as well as full ownership of the Miller brand portfolio outside of the U.S. and Puerto Rico. Additionally, in consolidating control of MillerCoors, we will further improve our scale and agility, benefit from significantly enhanced cash flows, and capture substantial operational synergies. The purchase of the Miller brand trademarks outside of the U.S. and Puerto Rico provides a strategic opportunity to leverage the iconic Miller trademark globally alongside Molson Coors' trademarks for Coors and Staropramen and presents volume and profit growth opportunities for Molson Coors in both core markets, as well as emerging markets.

The pending Acquisition is expected to be funded through cash on hand and financed through a combination of debt and equity security issuances. Further, as we plan to elect to treat the Acquisition as an asset acquisition for U.S. tax purposes, we expect to receive substantial cash tax benefits for the first 15 years after completion. At this time, we anticipate this acquisition will close in the second half of 2016, subject to necessary regulatory approvals and contingent on the successful closing of the ABI/SABMiller transaction.

Executive Summary

We are one of the world's largest brewers and have a diverse portfolio of owned and partner brands, including core brands Carling, Coors Light, Molson Canadian and Staropramen, as well as craft and specialty beers such as Blue Moon, Creemore Springs, Cobra and Doom Bar. With centuries of brewing heritage, we have been crafting high-quality, innovative products with the purpose of delighting the world's beer drinkers and goal to be the first choice for our consumers and customers. Our success depends on our ability to make our products available to meet a wide range of consumer segments and occasions.

In 2015, our net income from continuing operations attributable to MCBC, underlying after-tax earnings and EBITDA declined versus 2014 due to a number of challenges; however, we exceeded our targets for cost savings and cash generation and achieved positive net pricing in most of our major markets, excluding the impacts of changes in foreign currency exchange rates. Competitive challenges and weak consumer demand continued across some of our largest markets, but we continued to focus on building a stronger brand portfolio, delivering value-added innovation and strengthening our core brand positions through incremental marketing investments. Our focus on growing our above-premium segment continued this year as we completed the acquisitions of Saint Archer Brewing Company in the U.S. and the rights to the Rekorderlig cider brand in the U.K. and repatriated the rights to Staropramen in the U.K. We also expanded our global footprint within MCI through the acquisition of Mount Shivalik Breweries Ltd. ("Mount Shivalik") in India and our recent entrance into the Colombian market. We continued to improve our sales execution and revenue management capabilities, increase the efficiency of our operations, implement common systems and focus on generating higher returns for our invested capital, managing our working capital and delivering a greater return on investment for our shareholders. We grew our global above-premium volume, net pricing and sales mix. Our craft portfolio drove growth from Doom Bar in the U.K., Grandville Island in Canada and Blue Moon in the U.S. and U.K. Our emerging cider portfolio delivered strong growth, led by Molson Canadian Cider and Strongbow in Canada and Smith & Forge Hard Cider in the U.S. Volume challenges included Coors Light performance in Canada and the U.S., however, we continued to see strong performance of Coors Light in Europe and MCI.

2015 Financial Highlights:

Net income from continuing operations attributable to MCBC of \$355.6 million, or \$1.91 per diluted share, decreased 30.7% and underlying after-tax income of \$700.4 million, or \$3.76 per diluted share, decreased 8.9% from a year ago, primarily due to the impact of unfavorable movements in foreign currency rates and the loss of major business contracts this year. Additionally, net income from continuing operations attributable to MCBC was unfavorably impacted by incremental special charges in 2015 driven primarily by our initiatives focused on improving our supply chain network and building efficiencies across the business evidenced by our closure of two bottling lines in Canada, as well as the closure of our Alton and Plovdiv breweries in Europe and announced closures of the Eden brewery in

Table of Contents

the U.S. and the Vancouver brewery in Canada and we entered into a consultation process regarding our proposal to close the Burton South brewery in Europe. Underlying EBITDA decreased 9.5% compared to 2014, primarily due to a decrease in underlying income in Canada and Europe. Our underlying income excludes special and other non-core gains, losses and expenses that net to a \$420.9 million pretax charge, as explained below.

Worldwide beer volume for MCBC in 2015 decreased 1.5% compared to 2014, primarily due to lower volumes in the U.S. and Canada, partially offset by increased volumes from MCI. Additionally, consolidated net sales decreased 14.0% compared to 2014, driven by negative impacts of changes in foreign currency exchange rates and lower volumes in Canada and the loss of the Heineken and Modelo contracts in Europe, partially offset by positive pricing in Europe.

We generated cash flow from operating activities of \$696.4 million, representing a 45.3% decrease from \$1,272.6 million in 2014 and a 40.4% decrease from \$1,168.2 million in 2013. Underlying free cash flow in 2015 was \$704.3 million, compared to \$956.7 million in 2014, representing a decrease of 26.4%. The decreases in operating cash flow and underlying free cash flow are driven by unfavorable changes in foreign currency exchange rates, increased capital investments, higher cash paid for taxes and decreased distributions from our investment in MillerCoors, along with lower underlying income, after considering non-cash impairments and other non-cash add-backs. These increases were partially offset by a lower cash paid for interest and favorable impact of changes in net working capital.

Regional financial highlights:

In our Canada segment, we drove positive pricing, achieved significant cost savings and invested significantly behind our brands. Our income from continuing operations before income taxes in Canada decreased in 2015 compared to 2014 by 31.8% to \$277.3 million, due to special charges recognized as a result of accelerated depreciation of two of our bottling lines, the impact of the loss of our Miller brands agreements, as well as cycling the income received from the termination of our MMI joint venture in 2014. Our 2015 underlying pretax income decreased by 16.6% to \$304.5 million, primarily due to unfavorable foreign currency movements and incremental brand investments, as well as lower volumes.

In the U.S., MillerCoors grew net sales per hectoliter with positive pricing and mix, while also working to restore growth to Coors Light and Miller Lite, which both grew share of segment versus 2014. We increased our percentage of volume in the above premium segment and experienced continued growth of higher-margin brands like Redd's, Blue Moon and Leinenkugel's Shandy portfolio. Our 2015 equity income in MillerCoors decreased 8.1% to \$516.3 million, driven by special charges recognized in 2015 related to the decision to close the Eden brewery, as well as the early settlement of a portion of MillerCoors' defined benefit pension plan liability. Underlying equity income in MillerCoors of \$562.5 million for 2015 remained relatively flat to 2014, as positive pricing and mix and cost savings offset lower volumes and higher marketing investments.

In our Europe segment, we reported a loss from continuing operations before income taxes of \$109.7 million, versus a loss of \$111.9 million in 2014. The losses are attributable to an impairment charge of \$275.0 million recognized related to indefinite-lived intangible brand assets, along with charges related to our supply chain initiatives and net termination charges in 2015, compared to an impairment charge of \$360.0 million in 2014. Underlying income of \$203.4 million decreased by 16.2%, compared to \$242.7 million in 2014. The decrease in underlying income is entirely attributable to the negative impacts of unfavorable changes in foreign currency rates and the loss of the Heineken and Modelo contracts in 2015. Excluding these factors, our Europe segment grew volume, sales mix and gross margins. Further, lower supply chain costs and lower spending driven by efficiency in marketing investments partially offset by higher brand amortization expense contributed to positive underlying results. In addition to the core brand performances mentioned below, our above-premium brands performed well, with Coors Light, Doom Bar and our wider craft portfolio, including Franciscan Well, achieving strong growth in the year, as did Staropramen outside Czech Republic.

In our MCI segment, we drove significant growth in terms of volume, particularly in our Latin American markets including our entrance into the Colombian market at the end of 2015. We also significantly grew our volume in India and increased our presence in the Indian beer market through our acquisition of Mount Shivalik. Our 2015 loss from continuing operations before income taxes increased by 86.5% to \$24.8 million driven by special charges and expenses associated with our decision to restructure our China business. Underlying pretax loss increased by 38.3% to

\$18.4 million primarily driven by unfavorable changes in foreign currency exchange rates and expenses related to our China business, partially offset by higher volume and lower marketing investment and general and administrative costs.

36

Table of Contents

Core brand highlights:

Carling, the number one beer brand in the U.K. and the largest brand in our Europe segment, declined 3.6% in terms of volume in the year, primarily due to overall industry softness in the U.K., but gained share within its segment.

Coors Light global volume (including our proportional percentage of MillerCoors' Coors Light volumes) increased 0.3% in 2015 versus 2014, driven by strong performance in Europe and MCI, partially offset by declines in Canada and the U.S. due to continued competitive and industry pressures. In the U.S., Coors Light increased its share of the premium light segment and gained momentum in 2015 versus 2014, continued to show strong volume growth in the U.K., where it is our second largest brand, and is growing even faster in our Latin American markets, with double digit growth in 2015 versus 2014. Coors Light volume increased 0.8% in the fourth quarter of 2015 resulting from improved packing and advertising and incremental marketing investment.

Molson Canadian in Canada decreased in terms of volume and market share in 2015 due to continued competitive pressures in the segment.

Staropramen volume increased overall in 2015 versus 2014, mainly driven by strong growth in almost all countries outside of Czech Republic, Staropramen's primary market, and the international markets of Ukraine and Russia due to industry declines in these markets.

The following table highlights summarized components of our consolidated statements of operations for the years ended December 31, 2015, December 31, 2014, and December 31, 2013, and provides a reconciliation of "underlying income", a non-GAAP measure, to its nearest U.S. GAAP measure. See Part II-Item 8 Financial Statements and Supplementary Data, "Consolidated Statements of Operations" for additional details of our U.S. GAAP results.

(1)

See Part II—Item 8 Financial Statements and Supplementary Data, Note 7, "Special Items" of the Notes to the Consolidated Financial Statements ("Notes") for additional information. Special items for the year ended December 31, 2015 includes accelerated depreciation expense of \$49.4 million, and for the year ended December 31,

Table of Contents

2014, includes accelerated amortization expense of \$4.9 million and accelerated depreciation expense of \$4.0 million, which are included in our adjustments to arrive at underlying EBITDA in the table below.

See "Results of Operations", "United States Segment" under the sub-heading "Special Items" in this section for (2) additional information. The tax effect related to our share of MillerCoors special items in 2015 was immaterial and there was no tax effect related to our share of these charges in 2014 or 2013.

In connection with the pending Acquisition, we recognized transaction related fees of \$6.9 million within marketing, general and administrative expenses in 2015. Additionally, on December 16, 2015 we entered into a Bridge Loan Agreement which provides for a 364-day bridge loan facility of up to \$9.3 billion. In connection with the bridge loan, during the year ended December 31, 2015, we paid commitment fees of \$49.2 million, which have been deferred within other current assets on the consolidated balance sheet as of December 31, 2015, and will be amortized to other income (expense) within the consolidated statement of operations over the 364-day term. For (3) the year ended December 31, 2015, \$6.9 million was amortized to other expense. Further, on December 16, 2015, we also entered into a Term Loan Agreement which provides for a 3-year and 5-year tranche of \$1.5 billion for each loan, for an aggregate principal amount of \$3.0 billion. In connection with the term loan, during the year ended December 31, 2015, we paid issuance fees of \$8.3 million, which have been deferred within other assets on the consolidated balance sheet as of December 31, 2015, and will be amortized to interest expense within the consolidated statement of operations over the respective 3-year and 5-year term of each loan. For the year ended December 31, 2015, \$0.1 million was amortized to interest expense. See Part II—Item 8 Financial Statements and Supplementary Data, Note 12, "Debt" of the Notes for additional information.

In connection with the our acquisition of StarBev Holdings S.a.r.l. ("StarBev") in 2012 (the "StarBev Acquisition"), we recognized fees in marketing, general and administrative expenses of \$10.7 million in 2013, of which \$2.3 million was recorded as depreciation expense in 2013.

The unrealized changes in fair value on our commodity swaps not designated in hedging relationships are recorded as cost of goods sold within our Corporate business activities. As the exposure we are managing is realized, we (4) reclassify the gain or loss to the segment in which the underlying exposure resides, allowing our segments to realize the economic effects of the derivative without the resulting unrealized mark-to-market volatility. Related to these derivatives, we recorded unrealized losses of \$14.1 million, \$4.2 million and \$2.7 million in 2015, 2014 and 2013, respectively.

Additionally, we issued a €500 million Zero Coupon Senior Unsecured Convertible Note ("Convertible Note") to StarBev L.P. (the "Seller") in conjunction with the closing of the StarBev Acquisition. The Convertible Note's embedded conversion feature was determined to meet the definition of a derivative required to be bifurcated and separately accounted for at fair value with changes in fair value recorded in earnings. In 2013, we recognized an unrealized loss of \$5.4 million recorded as interest expense related to changes in the fair value of the conversion feature. On August 13, 2013, the Seller exercised the conversion feature at an agreed upon value of \$14.4 million incremental to the Convertible Note's principal. Upon settlement, \$0.8 million was recognized as the realized gain on settlement of the conversion feature, which was initially recorded as a liability of \$15.2 million when issued in the second quarter of 2012. Additionally, within other income (expense), we recorded unrealized gains of \$0.5 million and unrealized losses of \$2.4 million during 2014 and 2013, respectively, related to foreign currency movements on this Convertible Note. We additionally recorded a net loss within other income (expense) of \$4.9 million during 2013 related to foreign exchange contracts and cash positions entered into to hedge our risk associated with the payment of this foreign denominated debt. See Part II—Item 8 Financial Statements and Supplementary Data, Note 16, "Derivative Instruments and Hedging Activities" of the Notes for additional information.

In 2014, we recognized a gain of \$11.3 million within marketing, general and administrative expenses related to (5) the release of an indirect tax reserve recorded in conjunction with the initial purchase accounting for the StarBev Acquisition and is related to the settlement of certain local country regulatory matters associated with pre-acquisition periods.

In 2013, we recognized a net gain of \$23.5 million within other income related to the sales of non-core investment assets. See Part II—Item 8 Financial Statements and Supplementary Data, Note 5, "Other Income and Expense" of the Notes for additional information.

The effect of taxes on the adjustments used to arrive at underlying net income, a non-GAAP measure, is calculated based on applying the underlying full-year effective tax rate to underlying earnings, excluding special and non-core items. The effect of taxes on special and non-core items is calculated based on the statutory tax rate applicable to (6) the item being adjusted for in the jurisdiction from which each adjustment arises. Additionally, the adjustment for 2014 includes an income tax benefit of \$16.2 million recognized in the first quarter of 2014 related to the release of an

Table of Contents

income tax reserve recorded in conjunction with the initial purchase accounting for the StarBev Acquisition and is related to the settlement of certain local country regulatory matters associated with pre-acquisition periods.

The following table highlights summarized components of our consolidated statements of operations for the years ended December 31, 2015, December 31, 2014, and December 31, 2013, and provides a reconciliation of "underlying EBITDA", a non-GAAP measure, to its nearest U.S. GAAP measure. See Part II-Item 8 Financial Statements and Supplementary Data, "Consolidated Statements of Operations" for additional details of our U.S. GAAP results.

N/M = Not meaningful

(1) Includes adjustments to non-GAAP underlying income within the table above related to MCBC special and non-core items.

(2) Represents adjustments to remove amounts related to interest, depreciation and amortization included in the adjustments to non-GAAP underlying income above, as these items are added back as adjustments to net income attributable to MCBC from continuing operations.

(3) Adjustments to our equity income from MillerCoors, which include our proportionate share of MillerCoors' interest, income tax, depreciation and amortization, special items, and amortization of the difference between the MCBC contributed cost basis and proportionate share of the underlying equity in net assets of MillerCoors.

Worldwide Beer Volume

Worldwide beer volume (including adjacencies, such as cider) is composed of our financial volume, royalty volume and proportionate share of equity investment STRs. Financial volume represents owned beer brands sold to unrelated external customers within our geographical markets, net of returns and allowances. Royalty beer volume consists of our brands produced and sold by third parties under various license and contract-brewing agreements. Equity investment STR brand volume represents our ownership percentage share of volume in our subsidiaries accounted for under the equity method, including MillerCoors, and for 2014 and 2013 also includes Modelo Molson Imports, L.P. ("MMI"), our joint venture in Canada with Grupo Modelo S.A.B. de C.V. ("Modelo"). We finalized the termination of our MMI joint venture relationship in the first quarter of 2014. As such, our worldwide beer volume for the year ended December 31, 2014, includes our percentage share of volume in MMI through the transition period ended February 28, 2014. See Part II—Item 8 Financial Statements and Supplementary Data, Note 4, "Investments" of the Notes for further discussion.

Table of Contents

The following table highlights summarized components of our sales volume for the years ended December 31, 2015, December 31, 2014, and December 31, 2013:

	For the years ended						
	December 31, 2015	Change		December 31, 2014	Change	December 31, 2013	
	(In millions, except percentages)						
Volume in hectoliters:							
Financial volume	30.263	(0.6)%	30.445	(0.2)%	30.521
Royalty volume ⁽¹⁾	1.631	3.2	%	1.580	16.8	%	1.353
Owned volume	31.894	(0.4)%	32.025	0.5	%	31.874
Proportionate share of equity investment STR	26.211	(2.7)%	26.939	(3.3)%	27.864
Total worldwide beer volume	58.105	(1.5)%	58.964	(1.3)%	59.738

⁽¹⁾ Includes MCI segment royalty volume that is primarily in Russia, Ukraine and Mexico, and Europe segment royalty volume in Republic of Ireland.

Our worldwide beer volume decreased in 2015 compared to 2014, primarily due to lower volumes in Canada and the U.S., partially offset by increased volumes from MCI. Worldwide beer volume decreased in 2014 compared to 2013, primarily due to lower volumes in the U.S. and Canada, partially offset by increased volumes from MCI.

Net Sales

The following table highlights the drivers of change in net sales for the year ended December 31, 2015, versus December 31, 2014 by segment (in percentages) and excludes Corporate net sales revenue for our water resources and energy operations in the state of Colorado:

	Sales Volume		Price, Product and Geography Mix		Currency	Other	Total			
Consolidated	(0.6)%	(1.6)%	(11.8)%	—	% (14.0)%	
Canada	(4.7)%	2.5	%	(13.4)%	(0.1)%	(15.7)%
Europe	(0.3)%	(2.0)%	(10.7)%	—	% (13.0)%	
MCI	20.0	%	(18.0)%	(9.5)%	—	% (7.5)%	

The following table highlights the drivers of change in net sales for the year ended December 31, 2014, versus December 31, 2013 by segment (in percentages) and excludes Corporate net sales revenue for our water resources and energy operations in the state of Colorado:

	Sales Volume		Price, Product and Geography Mix		Currency	Other	Total		
Consolidated	(0.2)%	0.5	%	(1.7)%	—	% (1.4)%
Canada	(3.1)%	1.9	%	(6.5)%	—	% (7.7)%
Europe	(0.3)%	1.0	%	2.7	%	—	% 3.4	%
MCI	21.2	%	(3.7)%	(3.9)%	—	% 13.6	%

Cost Savings Initiatives

Cost reductions across our company in 2015 exceeded our targets and totaled more than \$60 million, driven by our Canada and Europe segments. MillerCoors delivered incremental cost savings in 2015 of approximately \$88 million, of which our 42% share is approximately \$37 million.

Depreciation and Amortization

Depreciation and amortization expense was \$314.4 million in 2015, a slight increase of \$1.4 million compared to 2014, primarily due to increased amortization of our intangible assets as a result of reclassifying certain brands in our Europe segment to definite-lived as well as accelerated depreciation related to bottling line and announced brewery closures, partially offset by the impact of changes in foreign currency rates. Depreciation and amortization expense was \$313.0 million in 2014, a decrease

Table of Contents

of \$7.5 million compared to 2013, primarily due to decreased amortization of our intangible assets, as well as the impact of changes in foreign currency rates.

Income Taxes

Our effective tax rate was approximately 13% in 2015, 12% in 2014 and 13% in 2013. Our effective tax rates were significantly lower than the federal statutory rate of 35% primarily due to lower effective income tax rates applicable to our foreign businesses, driven by lower statutory income tax rates and tax planning impacts on statutory taxable income, and favorable resolution of unrecognized tax benefits. The 2015 effective tax rate slightly increased versus 2014 due to a lower amount of unrecognized tax benefits released during 2015, as well as increased valuation allowances against net operating losses recognized in 2015. These increases were partially offset by the tax benefits associated with the renewal application of our bilateral advanced pricing agreement ("BAPA") between the U.S. and Canada tax authorities, which was formally submitted during the first quarter of 2015. Our 2015 underlying effective tax rate, a non-GAAP measure, remained consistent with 2014 and 2013. See table below for the reconciliation of our underlying effective tax rate to its nearest U.S. GAAP measure.

	For the years ended				
	December 31, 2015	December 31, 2014	December 31, 2013		
Effective tax rate	13	% 12	% 13		%
Adjustments:					
Tax impact of special and non-core items	2	% 3	% 2		%
Non-GAAP: Underlying effective tax rate	15	% 15	% 15		%

Additionally, our unrecognized tax benefits decreased by \$20.3 million in 2015, primarily driven by the expiration of certain statutes of limitations and foreign exchange rate movements. See Part II—Item 8 Financial Statements and Supplementary Data, Note 6, "Income Tax" of the Notes for further discussion.

Discontinued Operations

Discontinued operations are associated with the formerly-owned Cervejarias Kaiser Brasil S.A. ("Kaiser") business in Brazil and the related indemnity obligations to FEMSA Cerveza S.A. de C.V. ("FEMSA") related to purchased tax credits and other tax, civil and labor issues. See Part II—Item 8 Financial Statements and Supplementary Data, Note 18, "Commitments and Contingencies" of the Notes for further discussion.

Significant events

During 2015, we continued our ongoing assessment of our supply chain strategies in order to align with our cost saving objectives. As part of this process, in October 2015, we entered into an agreement to sell the Vancouver brewery, with the intent to use the proceeds from the sale to help fund the construction of an efficient and flexible brewery in British Columbia. The sale has not yet closed and is anticipated to be completed by the end of the first quarter of 2016. In conjunction with the sale, we agreed to lease back the existing property to continue operations on an uninterrupted basis while the new brewery is being constructed. We believe the decision to sell the brewery will help optimize the western Canada brewery network and allow for greater flexibility and future cost savings. We incurred accelerated depreciation charges in excess of normal depreciation associated with the planned brewery closure of \$1.2 million during the fourth quarter of 2015. We expect to incur additional charges, including estimated accelerated depreciation charges of approximately Canadian Dollar ("CAD") 20 million, through final closure of the brewery which is currently anticipated to occur near the end of 2018. These ongoing charges, along with the estimated future gain on the sale of the property of approximately CAD 144 million, will be recorded as special items. We also expect to incur significant capital expenditures associated with the construction of the new brewery, most of which we expect to be funded with the proceeds from the sale of the Vancouver brewery.

Also as a result of the ongoing strategic review of our Canadian supply chain network and the overall shift in consumer preference toward can package consumption in Canada, in the third quarter of 2015 we concluded that a bottling line in the Vancouver brewery could no longer be utilized, and in the second quarter of 2015 we concluded that a bottling line in our Toronto brewery could no longer be utilized. We accordingly recorded charges within special items related to the abandonment of these assets. See below "Special items, net" for further details. We will continue to evaluate our supply chain network and seek opportunities for further efficiencies and cost savings, and we therefore may incur additional restructuring related charges in the future.

In April 2014, the Ontario Premier's Advisory Council on Government Assets (the "Council") began a review that included evaluating the beer retailing and distribution system in Ontario, for which BRI is the primary beer retail and distribution channel. In April 2015, as a result of this review and our negotiations with the Council, we, along with the other

42

Table of Contents

owners of BRI, agreed, in principle and subject to entry into definitive binding documents, to enter into a new beer framework agreement (the "New Framework") with the Province of Ontario. The associated Master Framework Agreement was subsequently executed by all parties on September 22, 2015, and became effective as of January 1, 2016. The New Framework is designed to further enhance the overall beer retail and distribution system within Ontario, as well as provide easier access to market for small brewers. The New Framework includes the implementation of an additional CAD 100.0 million annual tax on all beer volume sold in Ontario, which will be phased in over four years beginning January 1, 2016. Additionally, with the exception of adjustments for increases in annual inflation, we, along with the other largest brewer in Ontario, will have restrictions on price increases for certain packaging types of the largest Ontario brands until the second quarter of 2017. The New Framework is also intended to increase convenience and choice available for consumers by increasing the number and types of outlets where beer is sold (including introducing beer sales to a specified number of grocery stores and standalone outlets), increasing the required level of shelf space allocated to small brewers in retail outlets, as well as allowing for incremental packaging options at the Liquor Control Board of Ontario ("LCBO") and agents of the LCBO. The New Framework also provides qualifying licensees (restaurants and bars) the ability to purchase beer at BRI retail outlets at the same price as retail consumers. Further, BRI has committed to invest CAD 100.0 million of capital spending through 2018, 80% of which will be directed toward enhancements to the purchasing experience for consumers. The New Framework also incorporates many of the proposed changes to the BRI ownership structure that were announced in January 2015, allowing all other Ontario brewers, regardless of size, to participate in the ownership and governance of BRI (see Note 4, "Investments"). We continue to evaluate and are beginning to implement actions to mitigate any adverse impacts to our Canada segment that may result from the adoption of the New Framework. Additionally, in the fourth quarter of 2014, we became aware of a legal dispute related to BRI which could result in an adverse impact to our future results. See Part II—Item 8 Financial Statements and Supplementary Data, Note 18, "Commitments and Contingencies" of the Notes for further discussion.

In the fourth quarter of 2014, we entered into an agreement with Miller Brewing Company ("Miller") for the accelerated termination of our license agreement, effective March 2015, under which we had exclusive rights to distribute certain Miller products in Canada. As a result, beginning in the second quarter of 2015 we no longer distribute the Miller brands in Canada, which has adversely impacted our volume and sales prospectively. We recognized net sales related to the License Agreement of \$11.5 million, \$79.5 million and, \$92.3 million for 2015, 2014 and 2013, respectively.

Further, we finalized the termination of our MMI joint venture relationship in the first quarter of 2014. As such, our results for the year ended December 31, 2014, include our percentage share of the MMI results through the transition period ended February 28, 2014. See Part II—Item 8 Financial Statements and Supplementary Data, Note 4, "Investments" and Note 11, "Goodwill and Intangible Assets" of the Notes for further discussion of these matters impacting our Canada business.

Foreign currency impact on results

During 2015, the Canadian Dollar ("CAD") depreciated versus the USD on an average basis, resulting in a decrease of \$34.3 million and \$39.3 million to our 2015 USD earnings before income taxes and USD underlying pretax income, respectively. During 2014, the CAD depreciated against the USD on an average basis, resulting in a decrease of \$22.9 million and \$18.0 million to our 2014 USD earnings before income taxes and USD underlying pretax income, respectively. Included in these amounts are both translational and transactional impacts of changes in foreign exchange rates. The impact of transaction gains and losses is recorded within other income (expense).

Volume and net sales

STRs decreased 6.0% in 2015 compared to 2014, driven by the impact of the loss of the Miller brand agreement, a weak economy and increased competitor promotional activity. Canadian beer industry STRs increased slightly in 2015 compared to 2014; however, our market share declined on a full-year basis. Sales volume decreased in 2015 compared to 2014, due to the termination of the Miller brand agreement and increased competitive pressure on our core brands. Net sales per hectoliter increased 2.5% in local currency in 2015 compared to 2014, driven by favorable pricing. STRs decreased 4.7% in 2014 compared to 2013, driven by the termination of the MMI joint venture, decline in the overall industry, weak economic factors, increased competitor promotional activity and unfavorable weather across

key regions in 2014. The Canadian beer industry STRs decreased in 2014 compared to calendar year 2013. Our market share also declined on a full-year basis. Sales volume decreased in 2014 compared to 2013, due to continued industry softness and increased competitive pressure on our core brands. Net sales per hectoliter increased 1.8% in local currency in 2014 compared to 2013, driven by favorable pricing and mix shift to higher priced brands and packages.

Cost of goods sold

Cost of goods sold per hectoliter increased 2.5% in local currency in 2015 compared to 2014, driven by input inflation, negative foreign currency impacts, fixed-cost deleverage and sales mix shift toward higher-cost brands and packages. These factors were partially offset by cost savings.

Table of Contents

Cost of goods sold per hectoliter increased 2.3% in local currency in 2014 compared to 2013, driven by input inflation and fixed-cost deleverage, the termination of the Modelo joint venture, sales mix shift toward higher-cost brands and packages, and increased promotional packaging expense. These factors were partially offset by cost savings. Under the MMI arrangement, we recognized equity earnings within cost of goods sold of \$0.7 million and \$11.7 million during the years ended 2014 and 2013, respectively.

Marketing, general and administrative expenses

Marketing, general and administrative expenses decreased slightly in local currency in 2015 compared to 2014, driven by cost savings, partially offset by higher marketing spending.

Marketing, general and administrative expenses decreased 1.4% in local currency in 2014 compared to 2013, driven by cost savings, partially offset by higher marketing spending and incentive compensation, as well as cycling administrative cost recoveries from MMI. During the years ended 2014 and 2013, MCC recognized administrative cost recoveries under our agency and services agreement with MMI of \$0.7 million and \$6.8 million, respectively.

Marketing spend and related recoveries under this agreement had zero impact on our results for all periods presented.

Special items, net

During 2015, we incurred \$15.7 million of charges related to the closure of a bottling line within our Vancouver brewery, including \$15.4 million of accelerated depreciation associated with this bottling line. Additionally, we incurred \$8.2 million of charges related to the closure of a bottling line within our Toronto brewery, including \$7.9 million of accelerated depreciation associated with this bottling line. The decisions to close these bottling lines were made as part of an ongoing strategic review of our Canadian supply chain network and the overall shift in consumer preference toward can package consumption in Canada. Separately, we recorded \$1.2 million of accelerated depreciation in excess of normal depreciation associated with the planned closure of the Vancouver brewery. Results also include special charges related to restructuring activities of \$2.1 million incurred during 2015.

During the third quarter of 2014 and fourth quarter of 2013, we recognized impairment charges related to our definite-lived intangible asset associated with our license agreement with Miller in Canada. See Part II—Item 8 Financial Statements and Supplementary Data, Note 11, "Goodwill and Intangible Assets" of the Notes for further discussion.

During the first quarter of 2014, we finalized the termination of our MMI joint venture and concurrently recognized a charge of \$4.9 million for the accelerated amortization of the remaining carrying value of our definite-lived intangible asset associated with the agreement, as well as recorded income of \$63.2 million for the payment received upon termination. See Part II—Item 8 Financial Statements and Supplementary Data, Note 4, "Investments" of the Notes for further discussion.

N/M = Not meaningful

(1) See Part II—Item 8 Financial Statements and Supplementary Data, Note 4, "Investments" of the Notes, for a detailed discussion of these equity method adjustments.

The discussion below highlights the MillerCoors results of operations for the year ended December 31, 2015, versus the year ended December 31, 2014, and for the year ended December 31, 2014, versus the year ended December 31, 2013.

Significant events

During the third quarter of 2015, MillerCoors announced plans to close its brewery in Eden, North Carolina, in an effort to optimize the brewery footprint and streamline operations for greater efficiency. Products currently produced in Eden will be transitioned to other breweries in the MillerCoors network, and the Eden brewery is anticipated to be closed in September 2016. As a result of the announcement of the planned brewery closure, MillerCoors recognized \$67.7 million of charges during the second half of 2015 as special items, of which \$61.3 million related to accelerated depreciation of brewery assets. MillerCoors will continue to incur special charges during each reporting period through the planned closure of the brewery in September 2016. Total special charges associated with the planned Eden closure are expected to be approximately \$150 million to \$200 million, consisting primarily of accelerated depreciation and asset write-offs. However, this estimated range contains significant uncertainty, and actual results could differ materially from these estimates due to uncertainty regarding the ultimate net cost associated with the disposition of assets, restructuring charges, contract termination costs, and other costs associated with the planned closure. Additionally, during the third quarter of 2015, MillerCoors announced the acquisition of Saint Archer Brewing Company, a craft brewery, which was completed in the fourth quarter of 2015.

Volume and net sales

Domestic STRs declined 2.6% in 2015 compared to 2014, driven by declines in both the economy and premium light portfolios, partially offset by growth in Redd's, Blue Moon, Leinenkugel's and Coors Banquet.

Total STWs volume declined 2.9% in 2015 compared to 2014. Domestic STWs decreased 2.9% versus 2014, driven by the decline in STRs, and contract brewing volume decreased 2.5%.

Domestic net sales per hectoliter increased 1.5% in 2015 compared to 2014, driven by favorable net pricing and positive sales mix. Total net sales per hectoliter, including contract brewing and company-owned distributor sales, increased 1.4% in 2015 compared to 2014.

Domestic STRs declined 2.5% in 2014 compared to 2013, driven by declines in both the premium light and economy portfolios, partially offset by growth in Redd's, Blue Moon, Leinenkugel's and Coors Banquet.

Total STWs volume declined 2.1% in 2014 compared to 2013. Domestic STWs decreased 2.5% versus 2013, driven by the decline in STRs, while contract brewing volume increased slightly.

Table of Contents

Domestic net sales per hectoliter increased 2.9% in 2014 compared to 2013, driven by favorable net pricing and positive brand mix. Total net sales per hectoliter, including contract brewing and company-owned distributor sales, increased 2.8% in 2014 compared to 2013.

Cost of goods sold

Cost of goods sold per hectoliter decreased 1.3% in 2015 compared to 2014, driven by lower aluminum, malt, corn and fuel pricing, along with supply chain cost savings. These factors were partially offset by brewery and freight inflation and fixed-cost absorption due to lower volumes.

Cost of goods sold per hectoliter increased 2.6% in 2014 compared to 2013, driven by commodity and brewery inflation, lower fixed-cost absorption, and higher costs associated with brand innovation.

Marketing, general and administrative expenses

Marketing, general and administrative expenses increased 4.1% in 2015 compared to 2014, driven by higher brand and information technology investments.

Marketing, general and administrative expenses decreased slightly in 2014 compared to 2013, driven primarily by cost reductions, lower pension expenses and promotional spending, partially offset by increased brand investments.

Special items, net

During 2015, MillerCoors recognized \$61.3 million of accelerated depreciation charges and \$6.4 million of severance and other charges resulting from the planned closure of the Eden brewery. Additionally, MillerCoors also recorded special charges of \$42.4 million related to an early settlement of a portion of its defined benefit pension plan liability. During 2014, MillerCoors recognized special charges of \$1.4 million related to restructuring activities.

During 2013, MillerCoors recognized special charges of \$17.2 million related to restructuring activities and \$2.6 million related to asset write-offs associated with a business transformation project.

Other information

MillerCoors distributes its excess cash to its owners, SABMiller and MCBC, on a 58% - 42% basis, respectively. As of December 31, 2015, and December 31, 2014, MillerCoors had cash of \$15.6 million and \$9.3 million, respectively. As of December 31, 2015, and December 31, 2014, MillerCoors had total debt of \$2.0 million and \$1.7 million, respectively. There are no restrictions from external sources on its ability to make cash distributions to its owners. MillerCoors recognized \$358.4 million, \$311.1 million and \$291.5 million of depreciation and amortization during 2015, 2014 and 2013, respectively. A total of \$61.3 million of the 2015 depreciation charges represent accelerated depreciation due to the planned closure of the Eden brewery.

MillerCoors contributed \$110.4 million (our 42% share was \$46.4 million) to its defined benefit pension plans in 2015. For 2016, MillerCoors' contributions to its defined benefit pension plans are expected to be approximately \$90 million to \$110 million (our 42% share is approximately \$38 million to \$46 million), which are not included in our contractual cash obligations.

Reflects gross segment sales and for 2015, 2014 and 2013 includes intercompany sales to MCI of 0.056 million hectoliters, 0.057 million hectoliters and 0.066 million hectoliters, respectively, and \$4.4 million, \$5.3 million and \$4.8 million of net sales, respectively. The offset is included within MCI cost of goods sold. These amounts are eliminated in the consolidated totals.

(2) See Part II—Item 8 Financial Statements and Supplementary Data, Note 7, "Special Items" of the Notes for detail of special items.

(3) Interest income is earned on trade loans to on-premise customers exclusively in the U.K. and is typically driven by note receivable balances outstanding from period to period.

Significant events

During 2015, we continued our ongoing assessment of our European supply chain strategies in order to align with our cost saving objectives. As part of this continued strategic review of our European supply chain network, in the fourth quarter of 2015, management announced that we entered into a consultation process regarding our proposal to close of our Burton South brewery in the U.K. to consolidate production within our recently modernized Burton North brewery. Additionally, during the fourth quarter of 2015, we closed our Plovdiv brewery in Bulgaria. These announcements follow the closure of the Alton brewery in the U.K., which was completed during the second quarter of 2015. As a result of these closures, we incurred charges which were recorded within special items, including accelerated depreciation, and expect to incur additional charges as discussed further below. We will continue to evaluate our supply chain network and seek opportunities for further efficiencies and cost savings, and we therefore may incur additional restructuring related charges in the future related to these activities.

In the third quarter of 2015, we purchased the Rekorderlig cider brand distribution rights in the U.K. and Ireland and also sold our U.K. malting facility. In the second quarter of 2015, we terminated our distribution agreement with Carlsberg whereby it held the exclusive distribution rights for the Staropramen brand in the U.K., which gave us the

exclusive distribution rights for the Staropramen brand in the U.K. at the end of 2015. We believe these transactions will play a key role in transforming our portfolio, give us high-potential to grow our business in key markets and mitigate the impact of contract losses related to the

48

Table of Contents

distribution of the Modelo brands in the U.K. which expired as of December 31, 2014, and the termination of our contract brewing arrangement with Heineken in the U.K. which became effective at the end of April 2015.

Additionally, during the first quarter of 2015 and fourth quarter of 2014, we received assessments from a local country regulatory authority in Europe. While we intend to vigorously challenge the validity of the assessments and defend our position, if the assessments, as issued, are ultimately upheld, they could materially affect our results of operations. See Part II—Item 8 Financial Statements and Supplementary Data, Note 18, "Commitments and Contingencies" of the Notes for further discussion.

Further, in 2015, 2014 and 2013 we recorded impairment charges for certain indefinite-lived intangible brands primarily driven by continued macroeconomic challenges, and have reclassified these brands to definite-lived. See "Special items, net" below for more details.

Foreign currency impact on results

Our Europe segment operates in numerous countries within Europe, and each country's operations utilize distinct currencies. During 2015, foreign currency movements increased our Europe USD loss from continuing operations before income taxes by \$24.0 million, and reduced USD underlying pretax income by \$25.4 million. During 2014, foreign currency movements reduced our Europe USD loss from continuing operations before income taxes by \$8.8 million, and increased USD underlying pretax income by \$7.7 million. Included in these amounts are both translational and transactional impacts of changes in foreign exchange rates. The impact of transactional gains and losses is recorded within other income (expense).

Volume and net sales

Sales volume decreased slightly in 2015 compared to 2014, due to the loss of the Modelo brands in the U.K. in 2015, offset by strong growth in Romania and Croatia.

Net sales per hectoliter decreased 2.0% in local currency in 2015 compared to 2014, primarily due to the loss of contract brewing revenue and the Modelo brands in the U.K.

Sales volume decreased slightly in 2014 compared to 2013, due to weak consumer demand, as well as the impacts of significant flooding in the Balkans region in the second quarter of 2014. These factors were partially offset by improved performance in Hungary, Romania, Czech Republic and the U.K.

Net sales per hectoliter increased 1.0% in local currency in 2014 compared to 2013, due to positive mix.

Cost of goods sold

Cost of goods sold per hectoliter decreased 2.9% in local currency in 2015 compared to 2014, primarily driven by the elimination of Modelo brand costs and lower contract brewing volume in the U.K., along with positive supply chain performance.

Cost of goods sold per hectoliter decreased 1.1% in local currency in 2014 compared to 2013, primarily driven by lower supply chain and distribution costs offsetting negative mix impact.

Marketing, general and administrative expenses

Marketing, general and administrative expenses increased 2.8% in local currency in 2015 compared to 2014, driven by the release of a regulatory reserve in the third quarter of 2014 and an \$11.3 million non-core gain recognized in the first quarter of 2014 related to the favorable resolution of an indirect-tax audit, along with severance costs and higher brand amortization expense in 2015.

Marketing, general and administrative expenses decreased 1.4% in local currency in 2014 compared to 2013, driven by cost savings, the release of a regulatory reserve in the third quarter of 2014 and a non-core gain related to the favorable resolution of an indirect-tax reserve during the fourth quarter 2014, partially offset by higher investment behind core brands and innovation.

Special items, net

During the third quarter of 2015, we identified impairment indicators as it pertains to indefinite-lived intangible assets related to certain European brands driven by key changes to our underlying assumptions supporting the value of the brands. Specific changes include underperformance through the 2015 peak season driving a downward shift in management's forecasts, along with challenging macroeconomic and competitive conditions that we no longer expect to subside in the near term. As a result, we recorded an aggregate impairment charge of \$275.0 million within special items in the third quarter of 2015 and

Table of Contents

reclassified the brands to definite-lived intangible assets. This followed impairment charges of indefinite-lived brand assets of \$360.0 million and \$150.9 million in 2014 and 2013, respectively. See Part II—Item 8 Financial Statements and Supplementary Data, Note 11, "Goodwill and Intangible Assets" of the Notes for further discussion.

As part of our continued strategic review of our European supply chain network, in the fourth quarter of 2015, we entered into a consultation process regarding the proposal to close our Burton South brewery in the U.K. to consolidate production within our recently modernized Burton North brewery. As a result, we incurred accelerated depreciation charges related to the announced proposed Burton South brewery closure in excess of our normal depreciation associated with this brewery of \$1.4 million. We expect to incur future accelerated depreciation in excess of our normal depreciation of approximately GBP 9 million related to the Burton South brewery from the first quarter of 2016 through the third quarter of 2017. Also, in the fourth quarter of 2015, we closed our Plovdiv brewery in Bulgaria resulting in \$2.1 million of asset abandonment related special charges, including accelerated depreciation in excess of our normal depreciation of \$1.0 million as it pertains to this brewery.

Additionally, as part of this review, during the second quarter of 2015, we completed the closure of the Alton brewery in the U.K. which closing process began in the fourth quarter for 2014. As a result, in 2015 we incurred asset abandonment related special charges associated with this closure of \$24.0 million, including accelerated depreciation in excess of our normal depreciation associated with this brewery of \$21.8 million. In 2014, we incurred accelerated depreciation in excess of our normal depreciation associated with this brewery of \$4.0 million.

We do not expect to incur future accelerated depreciation on the Alton and Plovdiv breweries. We may recognize other asset-related charges or benefits related to these breweries, which cannot currently be estimated and will be recorded within special items. See Part II—Item 8 Financial Statements and Supplementary Data, Note 7, "Special Items" of the Notes for further discussion.

⁽¹⁾ Excludes royalty volume of 1.458 million hectoliters, 1.351 million hectoliters and 1.141 million hectoliters in 2015, 2014 and 2013, respectively.

⁽²⁾ Reflects gross segment amounts and for 2015, 2014 and 2013 includes intercompany cost of goods sold from Europe of \$4.4 million, \$5.3 million and \$4.8 million, respectively. The offset is included within Europe net sales. These amounts are eliminated in the consolidated totals.

Table of Contents

(3) See Part II—Item 8 Financial Statements and Supplementary Data, Note 7, "Special Items" of the Notes for detail of special items.

Significant events

In accordance with our strategy to increase our international portfolio and deepen our reach into the rapidly growing India beer market, MCI acquired Mount Shivalik, a regional brewer, during the second quarter of 2015. As part of the transaction, MCI acquired Mount Shivalik's entire brand portfolio, including the leading strong-beer brand Thunderbolt, and assumed direct control over brewing operations. The acquisition of Mount Shivalik added two breweries and more than doubled our brewing capacity in India, which is in line with our strategy to grow our regional brand portfolio in India. We believe this acquisition will result in a powerful combination of industry leading brewing expertise, brand reach and operational efficiency that will allow us to accelerate the growth of our brands within the India market. Additionally, during the second quarter of 2015, we announced our decision to substantially restructure our business in China and consequently recognized employee-related and asset write-off charges.

Foreign currency impact on results

Our MCI segment operates in numerous countries around the world and each country's operations utilize distinct currencies. Foreign currency movements unfavorably impacted both MCI's USD loss before income taxes and USD underlying pretax loss by \$4.3 million for 2015. MCI's results were insignificantly impacted by foreign currency movements in 2014. The impact of transactional foreign currency gains and losses is recorded within other income (expense).

Volume and net sales

Total sales volume including royalty volumes increased 14.0% and sales volume excluding royalty volume increased by 20.0% in 2015 compared to 2014, due to volume growth in India from strong performance of our existing business and our acquisition of Mount Shivalik during the second quarter of 2015, along with Coors Light growth in Latin America including our latest launch in Colombia.

Net sales per hectoliter decreased 23.0% in 2015 compared to 2014, primarily due to sales mix changes and foreign currency movements.

Total sales volume including royalty volumes increased 19.8%, and sales volume excluding royalty volume increased by 21.2% in 2014 compared to 2013, due to strong Coors Light growth in Latin America and volume growth in India. Net sales per hectoliter decreased 6.3% in 2014 compared to 2013, driven by geographic mix and foreign currency movements.

Cost of goods sold

Cost of goods sold per hectoliter decreased 14.9% in 2015 compared to 2014, due to sales mix changes and foreign currency movements.

Cost of goods sold per hectoliter decreased 6.3% in 2014 compared to 2013, due to sales mix changes, foreign currency movement and geography mix.

Marketing, general and administrative expenses

Marketing, general and administrative expenses decreased 12.6% in 2015 compared to 2014, driven by the substantial restructure of our business in China, as well as foreign currency movements.

Marketing, general and administrative expenses increased 6.1% in 2014 compared to 2013, due to increases in marketing investments, partially offset by lower overhead expenses and foreign currency movements.

(1) See Part II—Item 8 Financial Statements and Supplementary Data, Note 7, "Special Items" of the Notes for detail of special items.

Marketing, general and administrative expenses

Marketing, general and administrative expenses increased in 2015 compared to 2014, due to costs incurred in 2015 associated with the pending Acquisition of MillerCoors.

Marketing, general and administrative expenses decreased slightly in 2014 compared to 2013, due to Starbev acquisition and related integration costs recognized in 2013.

Interest expense, net

Net interest expense decreased 2015 compared to 2014, driven primarily by lower interest expense recorded on our \$300 million 2.0% notes due 2017 ("300 million notes") and our \$500 million 3.5% notes due 2022 ("500 million notes") as a result of our interest rate swap hedges on these notes.

Net interest expense decreased 2014 compared to 2013, driven by our ongoing efforts focused on deleveraging over the last year, which resulted in lower interest incurred on our outstanding borrowings, as well as an additional loss of \$5.4 million included in 2013, related to the change in fair value on the conversion feature associated with the €500 million convertible note.

Other income (expense), net

The impact of transactional gains and losses is recorded within other income (expense). Other income includes \$6.9 million of amortization expense related to commitment fees on the bridge loan for the year ended December 31, 2015.

Table of Contents

Additionally, other income includes gains of \$3.3 million and \$22.3 million in 2015 and 2013, respectively, resulting from the sale of non-operating assets.

See Part II—Item 8 Financial Statements and Supplementary Data, Note 5, "Other Income and Expense" of the Notes for further discussion of other income (expense) amounts.

Liquidity and Capital Resources

Our primary sources of liquidity include cash provided by operating activities, access to external borrowings and monetization of assets. We believe that cash flows from operations, including distributions from MillerCoors, and cash provided by short-term and long-term borrowings, when necessary, will be more than adequate to meet our ongoing operating requirements, scheduled principal and interest payments on debt, anticipated dividend payments and capital expenditures for the next twelve months, and our long-term liquidity requirements. We expect to issue additional long-term debt to fund a portion of the \$12.0 billion pending Acquisition, as well as the related transaction costs. See below for additional information on the pending Acquisition. A significant portion of our trade receivables are concentrated in Europe. While these receivables are not concentrated with any specific customer and our allowance on these receivables factors in collectibility, our ability to collect may be impacted by any further economic downturn within Europe.

A significant portion of our cash flows from operating activities is generated outside the U.S., in currencies other than USD. As of December 31, 2015, approximately 66% of our cash and cash equivalents were located outside the U.S., largely denominated in foreign currencies. Most of the amounts held outside of the U.S. could be repatriated to the U.S., but under current law, would be subject to U.S. federal and state income taxes, less applicable foreign tax credits. We accrue for U.S. federal and state tax consequences on the earnings of our foreign subsidiaries upon repatriation. When the earnings are considered indefinitely reinvested outside of the U.S., we do not accrue U.S. federal and state tax consequences. We utilize a variety of tax planning and financing strategies in an effort to ensure that our worldwide cash is available in the locations in which it is needed. We periodically review and evaluate these strategies, including external committed and non-committed credit agreements accessible by MCBC and each of our operating subsidiaries. These financing arrangements, along with the distributions received from MillerCoors, are sufficient to fund our current cash needs in the U.S.

Net Working Capital

As of December 31, 2015, and December 31, 2014, we had debt-free net working capital of positive \$70.3 million and positive \$101.2 million, respectively. Short-term borrowings and the current portion of long-term debt are excluded from net working capital as they are not reflective of the ongoing operational requirements of the business. The levels of working capital required to run our business fluctuate with the seasonality in our business. Our working capital is also sensitive to foreign exchange rates, as a significant majority of current assets and current liabilities are denominated in either CAD or our European operating currencies such as, but not limited to, GBP, Euro, Czech Koruna, Croatian Kuna, Serbian Dinar, New Romanian Leu, Bulgarian Lev and Hungarian Forint, while financial results are reported in USD. Below is a table outlining our current and historical net working capital levels:

	As of December 31, 2015	December 31, 2014 ⁽¹⁾
	(In millions)	
Current assets	\$1,258.8	\$1,577.1
Less: Current liabilities	(1,217.2) (2,324.9
Add back: Current portion of long-term debt and short-term borrowings	28.7	849.0
Net working capital	\$70.3	\$101.2

(1) Amounts have been adjusted to reflect the adoption of the authoritative guidance requiring debt issuance costs to be presented as a direct reduction from the carrying value of the related debt. See Note 2, "New Accounting Pronouncements" for further discussion. Separately, during the fourth quarter of 2015, we prospectively adopted authoritative guidance requiring all deferred tax assets and deferred tax liabilities to be presented as non-current on the consolidated balance sheet. As a result, all current deferred tax assets and liabilities were reclassified to

non-current in our consolidated balance sheet as of December 31, 2015. Because we adopted this guidance prospectively, the prior period balances have not been retrospectively adjusted and continue to reflect current and non-current classification as historically presented. As such, comparability issues are present within the current and prior year balances in the table above. See Part II—Item 8 Financial Statements, Note 6, "Income Tax" of the Notes for further details.

Table of Contents

The decrease in net working capital from \$101.2 million at December 31, 2014, to \$70.3 million at December 31, 2015, is primarily related to an overall decrease in cash balances due to additional cash used in the current year to pay our discretionary cash contribution of \$227.1 million made to our U.K. pension plan, to repurchase shares of our Class B common stock, and to acquire Mount Shivalik in India and the Rekorderlig distribution rights in the U.K., as well as a decrease in our payables balance, partially offset by lower cash repayments on our commercial paper program during 2015. See additional discussion below under subheading "Cash and Cash Equivalents" and Part II—Item 8 Financial Statements, Note 12, "Debt" of the Notes for further details of the current portion of long-term debt and short-term borrowings.

Cash Flows

Our business generates positive operating cash flows each year, and our debt maturities are of a longer-term nature. However, our liquidity could be impacted significantly by the risk factors described in Part I, Item 1A. Risk Factors.

Cash Flows from Operating activities

Net cash provided by operating activities of \$696.4 million in 2015, decreased by \$576.2 million compared to 2014. This decrease was primarily due to lower net income, adjusted for lower non-cash add-backs, along with unfavorable foreign currency movements, higher cash paid for pension contributions, including our \$227.1 million discretionary payment to our U.K. pension plan, and taxes.

Net cash provided by operating activities of \$1,272.6 million in 2014 increased by \$104.4 million compared to 2013. This increase was primarily due to higher net income, adjusted for increased non-cash add-backs, along with lower cash paid for pension contributions, interest, taxes and restructuring.

Cash Flows from Investing activities

Net cash used in investing activities of \$334.7 million in 2015, increased by \$95.3 million compared to 2014 driven primarily by the cash paid in 2015 for the acquisition of Mount Shivalik in India and the Rekorderlig distribution rights in the U.K.

Net cash used in investing activities of \$239.4 million in 2014, decreased by \$37.6 million compared to 2013.

This decrease was primarily driven by lower net investments in MillerCoors, lower capital expenditures and higher return of capital from unconsolidated affiliates.

Further, proceeds from sales of properties and other assets decreased by \$44.8 million primarily due to the sale of our interest in our Tradeteam joint venture to DHL as well as the sale of other non-core investment assets in 2013. See Part II—Item 8 Financial Statements and Supplementary Data, Note 4, "Investments" and Note 5, "Other Income and Expense" of the Notes for further discussion.

Cash Flows from Financing activities

Net cash used in financing activities of \$512.0 million in 2015, decreased by \$290.0 million compared to 2014.

This decrease is primarily driven by proceeds on our commercial paper program and other revolving credit facilities in 2015 compared to repayments in 2014. Specifically, we had proceeds of \$3.9 million in 2015 versus repayments of \$513.9 million in 2014.

This decrease is partially offset by our Class B common stock share repurchase of approximately \$150 million in 2015 as well as increased repayments on our overdraft facilities, payments for debt issuance costs and dividend payments during 2015.

Net cash used in financing activities of \$802.0 million in 2014, decreased by \$257.2 million compared to 2013.

The decrease in cash used in financing activities is primarily related to additional 2013 payments of long-term debt partially offset by additional 2014 net payments on revolving credit facilities and commercial paper. During 2013 we repaid the \$575 million convertible bonds, the €500 million convertible note (less the €44.9 million initially withheld) for \$614.7 million, and the balance of our Euro denominated term loan for \$123.8 million.

Comparatively, during 2014, we released \$61.4 million (€44.9 million) of the €500 million convertible note to the Seller. Additionally during 2014, we made net payments of \$513.9 million on our revolving credit facilities and commercial paper program compared to proceeds of \$507.4 million in 2013. These payments in the current year were primarily driven by reducing the outstanding balances on our commercial paper borrowings and Euro-denominated revolving credit facility to zero. Additionally, we had net borrowings on

Table of Contents

our European notional cross-border, cross currency cash pool within our Europe business of \$74.1 million for 2014. Comparatively, we were not in an overdraft position as of December 31, 2013, or as of December 29, 2012, and thus the net overdraft borrowings was zero in 2013.

• During 2014 we repaid \$65.2 million on our remaining cross currency swaps, which were extended and designated as a net investment hedge in the fourth quarter of 2011, compared to \$119.4 million in 2013. The decrease in cash used in financing activities during 2014, was also offset by a \$43.9 million decrease in the proceeds from exercise of stock options, including the related tax impact, as well as a \$39.0 million increase in dividends paid.

See Part II—Item 8 Financial Statements and Supplementary Data, Note 12, "Debt" of the Notes for a summary of our financing activities and debt position at December 31, 2015, and December 31, 2014.

Underlying Free Cash Flow

We generated \$704.3 million of underlying free cash flow in 2015. This represents a 26.4% decrease in underlying free cash flow compared to \$956.7 million in 2014, primarily driven by unfavorable foreign currency movements, lower underlying net income, after considering non-cash adjustments, lower net distributions from MillerCoors, higher capital expenditures and higher cash paid for taxes, partially offset by favorable impact from working capital changes.

The following table provides a reconciliation of Underlying Free Cash Flow, a non-GAAP measure, to the nearest U.S. GAAP measure (Net Cash Provided by Operating Activities).

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013

(1) Included in net cash used in investing activities.

(2) Included in net cash provided by operating activities. See Part II—Item 8 Financial Statements and Supplementary Data, Note 7, "Special Items" of the Notes for further discussion.

(3) Included in net cash provided by operating activities and reflects acquisition and financing costs paid associated with the pending Acquisition of MillerCoors, LLC, as well as the Miller global brand portfolio in 2015, and integration related costs associated with the acquisition of StarBev L.P. for 2013.

(4) Discretionary cash contribution of \$227.1 million made to our U.K. pension plan included in net cash provided by (used in) operating activities.

(5) Cash paid for settlement of forward starting interest rate swaps of \$29.5 million related to the issuance of our CAD 500 million 2.75% notes due September 2020, and CAD 400 million 2.25% notes due September 2018, included in net cash provided by (used in) operating activities. Also includes the receipt of \$18.8 million related to the early settlement of our fixed to float interest rate swaps associated with our \$300 million 2% notes due on May 1, 2017, and \$500 million 3.5% notes due on May 1, 2022, included in net cash provided by (used in) operating activities.

(6) Amounts represent our proportionate 42% share of the cash flow impacts to MillerCoors.

Table of Contents

Pending Acquisition

The pending Acquisition is expected to be funded through cash on hand and financed through a combination of incremental debt and equity. Specifically, in connection with the pending Acquisition, we entered into a Bridge Loan Agreement which provides for a 364-day bridge loan facility of up to \$9.3 billion. In connection with the bridge loan, during the year ended December 31, 2015, we paid commitment fees of \$49.2 million. Additionally, on December 16, 2015, we also entered into a Term Loan Agreement by and among us the lenders party thereto, and Citibank, N.A., as Administrative Agent. The Term Loan Agreement provides for total term loan commitments of \$1.5 billion in a 3-year tranche and \$1.5 billion in a 5-year tranche, for an aggregate principal amount of \$3.0 billion. In connection with the term loan, during the year ended December 31, 2015, we paid issuance fees of \$8.3 million. As of December 31, 2015, there are no borrowings on the bridge loan or term loan. We do not expect to draw on the bridge loan and we do not expect to have borrowings on the term loan until or near the completion of the pending Acquisition. On February 3, 2016, we received proceeds of \$2.5 billion, net of issuance and other fees from our January 26, 2016, equity offering of 29.9 million shares of our Class B common stock, inclusive of the underwriters' option to purchase additional shares, which reduced the commitment on our bridge loan to \$6.8 billion, representing the amount MCBC expects to replace with permanent long-term financing between now and the consummation of the pending Acquisition. Related to this expected long-term financing, we entered into swaptions in January 2016 with a total notional of \$855.0 million to hedge a portion of our anticipated long-term debt issuance. We intend to terminate and settle these swaptions upon maturity or immediately prior to the completion of the associated pending debt issuance in the event that occurs prior to maturity. Additionally, in order to maximize the yield on the cash received from the equity issuance, while maintaining liquidity, MCBC has strategically invested the proceeds in various fixed rate deposit and money market accounts with terms of three months or less.

At this time, we anticipate this acquisition will close in the second half of 2016, subject to necessary regulatory approvals and contingent on the successful closing of the ABI/SABMiller transaction.

Capital Resources

Cash and Cash Equivalents

As of December 31, 2015, we had total cash and cash equivalents of \$430.9 million, compared to \$624.6 million at December 31, 2014. The decrease in cash and cash equivalents at December 31, 2015, from December 31, 2014, was primarily driven by our discretionary cash contribution of \$227.1 million made to our U.K. pension plan in the first quarter of 2015 as well as our share repurchases of approximately \$150 million. Our cash and cash equivalents are invested in a variety of highly liquid investments with original maturities of three months or less. These investments are viewed by management as low-risk investments and on which there are little to no restrictions regarding our ability to access the underlying cash to fund our operations as necessary. We also utilize a cash pooling arrangement to facilitate the access to cash.

Borrowings

The majority of our outstanding borrowings as of December 31, 2015, consisted of fixed-rate senior notes, with maturities ranging from 2017 to 2042. The CAD 900 million 5.0% notes due 2015 were repaid during the third quarter of 2015 using the proceeds from the issuance of the CAD 500 million 2.75% notes due 2020 and CAD 400 million 2.25% notes due 2018, which were both issued in September 2015 (collectively the "2015 Notes"). Beginning in the second quarter of 2014, we entered into forward starting interest rate swap agreements to manage our exposure to the volatility of the interest rates associated with future interest payments on the forecasted debt issuance. Under the agreements, we were required to early terminate these swaps at the approximate time we issued the previously forecasted debt. At the time of issuance of the 2015 Notes, the government of Canada bond rates were trading at a yield lower than that locked in by the interest rate swaps, resulting in an aggregate loss of CAD 39.2 million (\$29.5 million at settlement), which was recorded in other comprehensive income. During 2014, we also entered into interest rate swaps to economically convert our fixed rate \$500 million 3.5% notes due 2022 to floating rate debt.

Additionally, in the first quarter of 2015, we entered into interest rate swaps with an aggregate notional amount of \$300 million and a cross currency swap with a notional amount of EUR 265 million (\$300 million upon execution) to economically convert our fixed rate \$300 million 2.0% notes due in 2017 to floating rate, Euro denominated debt. During the fourth quarter of 2015, we voluntarily cash settled all of our interest rate swaps which resulted in cash

receipts of \$18.8 million as well as our cross currency swap which resulted in cash receipts of \$16.0 million. We also hold short-term borrowings primarily related to overdrafts on our cross-border cash pool arrangement and revolving credit facilities. See Part II—Item 8 Financial Statements, Note 12, "Debt" of the Notes for further details.

Based on the credit profile of our lenders that are party to our credit facilities, we are confident in our ability to draw on such credit facilities if the need arises. There were no outstanding borrowings under our \$750 million revolving credit facility or under our commercial paper program as of December 31, 2015, and thus we had \$750 million available to draw on under this revolving credit facility as of December 31, 2015, as the borrowing capacity is reduced by borrowings under our

Table of Contents

commercial paper program. We also have Japanese Yen ("JPY") and Euro ("EUR") uncommitted lines of credit, and CAD and British Pound ("GBP") overdraft facilities with several banks should we need additional short-term liquidity.

Under the terms of each of our debt facilities, we must comply with certain restrictions. These include restrictions on priority indebtedness (certain threshold percentages of secured consolidated net tangible assets), leverage thresholds, liens, and restrictions on certain types of sale lease-back transactions. The covenants specify that our leverage ratio cannot exceed 3.5x debt to EBITDA, as defined in our credit agreement. As of December 31, 2015, and December 31, 2014, we were in compliance with all of these restrictions and have met all debt payment obligations. As part of the pending Acquisition, we have amended our \$750 million revolving multi-currency credit facility due in 2019 to increase the maximum leverage ratio to 5.75x debt to EBITDA effective following the completion of the acquisition, with a decline to 3.75x debt to EBITDA in the fourth year following the closing of transaction.

See Part II—Item 8 Financial Statements and Supplementary Data, Note 12, "Debt" of the Notes for a complete discussion and presentation of all borrowings and available sources of borrowing, including lines of credit.

Use of Cash

During 2015, we made contributions to our defined benefit pension plans of \$256.1 million, which includes our discretionary cash contribution of \$227.1 million made to our U.K. pension plan.

On February 10, 2015, we announced that our Board of Directors approved and authorized a new program to repurchase up to \$1.0 billion of our Class A and Class B common stock. During 2015, we purchased a total of approximately 2 million shares of our Class B common stock under the new program for approximately \$150 million. As a result of the pending Acquisition, we have suspended the share repurchase program. As we pay down debt we will revisit our share repurchase program once deleveraging is well underway.

During 2015, we paid quarterly dividends of \$0.41 per share, totaling \$303.4 million payments during 2015. As a result of the pending Acquisition, we plan to maintain our current quarterly dividend of \$0.41 per share as we pay down debt, and we will revisit our dividend policy once deleveraging is well underway.

Credit Rating

Our current long-term credit ratings are BBB-/Stable Outlook, Baa2/Negative Outlook, BBB/Negative Outlook and BBB/Negative Outlook with Standard and Poor's, Moody's Investor Services, Fitch Ratings and DBRS, respectively. Similarly, our short-term credit ratings are A-2, Prime-2, F2 and R-2, respectively. A securities rating is not a recommendation to buy, sell or hold securities, and it may be revised or withdrawn at any time by the rating agency.

Foreign Exchange

Foreign exchange risk is inherent in our operations primarily due to the significant operating results that are denominated in currencies other than USD. Our approach is to reduce the volatility of cash flows and reported earnings which result from currency fluctuations rather than business related factors. Therefore, we closely monitor our operations in each country and seek to adopt appropriate strategies that are responsive to foreign currency fluctuations. Our financial risk management policy is intended to offset a portion of the potentially unfavorable impact of exchange rate changes on net income and earnings per share. See Part II—Item 8 Financial Statements and Supplementary Data, Note 16, "Derivative Instruments and Hedging Activities" of the Notes for additional information on our financial risk management strategies.

Our consolidated financial statements are presented in USD, which is our reporting currency. Assets and liabilities recorded in foreign currencies that are the functional currencies for the respective operations are translated at the prevailing exchange rate at the balance sheet date. Translation adjustments resulting from this process are reported as a separate component of other comprehensive income. Revenue and expenses are translated at the average exchange rates during the period. Gains and losses from foreign currency transactions are included in earnings for the period. The significant exchange rates to the USD used in the preparation of our consolidated financial results for the primary foreign currencies used in our foreign operations (functional currency) are as follows:

Table of Contents

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
Weighted-Average Exchange Rate (1 USD equals)			
Canadian dollar (CAD)	1.27	1.11	1.03
Euro (EUR)	0.89	0.75	0.77
British pound (GBP)	0.65	0.60	0.64
Czech Koruna (CZK)	24.48	20.67	19.60
Croatian Kuna (HRK)	6.85	5.58	5.70
Serbian Dinar (RSD)	107.46	84.82	85.24
New Romanian Leu (RON)	3.99	3.33	3.31
Bulgarian Lev (BGN)	1.75	1.46	1.48
Hungarian Forint (HUF)	278.85	228.63	223.91
		As of	
		December 31, 2015	December 31, 2014
Closing Exchange Rate (1 USD equals)			
Canadian dollar (CAD)		1.38	1.16
Euro (EUR)		0.92	0.83
British pound (GBP)		0.68	0.64
Czech Koruna (CZK)		24.88	22.86
Croatian Kuna (HRK)		7.04	6.33
Serbian Dinar (RSD)		111.86	100.30
New Romanian Leu (RON)		4.16	3.70
Bulgarian Lev (BGN)		1.80	1.62
Hungarian Forint (HUF)		290.44	261.64

The exchange rates for the years ended December 31, 2015, December 31, 2014, and December 31, 2013, have been calculated based on the average of the foreign exchange rates during the relevant period and have been weighted according to the foreign denominated earnings before interest and taxes of the USD equivalent.

Foreign currencies in the countries in which we operate, specifically the CAD, EUR, GBP, CZK, HRK and RSD, devalued significantly over the last year which had a significant impact on our 2015 USD reported earnings. If these rates continue to devalue in 2016, then the impact on USD reported earnings may be material.

Capital Expenditures

In 2015, we incurred \$269.1 million, and paid \$275.0 million, on capital improvement projects worldwide, which excludes capital spending by MillerCoors and other equity method joint ventures, representing an approximate 8% decrease versus 2014 capital expenditures incurred of \$291.3 million, primarily driven by the strengthening of the USD in 2015 compared to 2014. We expect to incur capital expenditures in 2016 of approximately \$300 million, based on foreign exchange rates as of December 31, 2015, excluding MillerCoors and other equity method joint ventures or consideration of the potential implications of the pending Acquisition. The increase in planned expenditures for 2016 from 2015 is primarily due to planned supply chain capital projects in Canada, including the costs of construction of an efficient and flexible brewery in British Columbia following the sale of our Vancouver brewery in early 2016, the proceeds from which will help fund the new brewery construction.

We have increased our focus on where and how we employ our planned capital expenditures, specifically strengthening our focus on required returns on invested capital as we determine how to best allocate cash within the business.

Table of Contents

Contractual Obligations and Commercial Commitments

Contractual Obligations

A summary of our consolidated contractual obligations as of December 31, 2015, based on foreign exchange rates at December 31, 2015, is as follows:

	Payments due by period				
	Total	Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years
	(In millions)				
Debt obligations	\$2,940.3	\$28.7	\$950.3	\$361.3	\$1,600.0
Interest payments on debt obligations	1,656.7	109.2	188.8	162.0	1,196.7
Retirement plan expenditures ⁽¹⁾	81.8	17.5	14.1	14.4	35.8
Operating leases	118.5	30.7	43.3	24.9	19.6
Other long-term obligations ⁽²⁾	2,861.5	664.1	757.9	603.6	835.9
Total obligations	\$7,658.8	\$850.2	\$1,954.4	\$1,166.2	\$3,688.0

See Part II - Item 8 Financial Statements and Supplementary Data, Note 12, "Debt", Note 15, "Employee Retirement Plans and Postretirement Benefits", Note 16, "Derivative Instruments and Hedging Activities" and Note 18, "Commitments and Contingencies" of the Notes for additional information.

Represents expected contributions under our defined benefit pension plans in the next twelve months and our benefit payments under postretirement benefit plans for all periods presented. The net underfunded liability at December 31, 2015, of our defined benefit pension plans (excluding our overfunded plans) and postretirement benefit plans is \$74.0 million and \$136.1 million, respectively. Defined benefit pension plan contributions in future years will vary based on a number of factors, including actual plan asset returns and interest rates, and as such, (1) have been excluded from the above table. We fund pension plans to meet the requirements set forth in applicable employee benefits laws. We may also voluntarily increase funding levels to meet financial goals. Pension contributions and postretirement benefit payments on a consolidated basis (excluding MillerCoors, BRI and BDL) were \$262.2 million in 2015. Excluding MillerCoors, BRI and BDL, we expect to make contributions to our defined benefit pension plans in 2016 up to approximately \$20 million and benefit payments for our other postretirement benefit plans of approximately \$10 million in 2016.

Our U.K. pension plan is subject to a statutory valuation for funding purposes every three years. The most recent valuation as of June 30, 2013, was completed during the first quarter of 2014 and resulted in a long-term funding commitment plan consisting of an MCBC guarantee of a GBP 150 million lump-sum contribution (\$227.1 million at payment date) which was paid in January 2015, and annual contributions of GBP 24 million to be made from January 2017 through December 2026, which are excluded from the table above.

We have taken numerous steps in recent years to reduce our exposure to these long-term pension obligations, including the closure of the U.K. pension plan in early 2009 to future earning of service credit and benefit modifications in several of our Canada plans. However, given the net liability of these plans and their dependence upon the global financial markets for their financial health, the plans may continue to periodically require potentially significant amounts of cash funding.

(2) The "other long-term obligations" line primarily includes non-cancellable purchase commitments as of December 31, 2015, that are enforceable and legally binding. Approximately \$1,233 million of the total other long-term obligations relate to long-term supply contracts with third parties to purchase raw material, packaging material and energy used in production. Approximately \$962 million relates to commitments associated with Tradeteam in the U.K. Our aggregate commitments for advertising and promotions, including sports sponsorship, total approximately \$406 million. The remaining amounts relate to derivative payments, sales and marketing, distribution, information technology services, open purchase orders and other commitments. Included in other long-term obligations are \$8.4 million of unrecognized tax benefits, excluding positions we would expect to settle using deferred tax assets, and \$10.3 million of indemnities provided to FEMSA for which we cannot reasonably estimate the timing of future cash flows, and we have therefore included these amounts in the more than 5 years

column.

59

Table of Contents

Guarantees

We guarantee indebtedness and other obligations to banks and other third parties for some of our equity investments and consolidated subsidiaries. See Part II—Item 8 Financial Statements and Supplementary Data, Note 18, "Commitments and Contingencies" of the Notes for further discussion.

Other Commercial Commitments as of December 31, 2015

	Amount of commitment expiration per period				
	Total amounts committed (In millions)	Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years
Standby letters of credit	\$44.4	\$43.2	\$1.2	\$—	\$—

Contingencies

We are party to various legal proceedings arising in the ordinary course of business, environmental litigation and indemnities associated with our sale of Kaiser to FEMSA. Additionally, during the first quarter of 2015 and fourth quarter of 2014, we received assessments from a local country regulatory authority related to our Europe operations. While we intend to vigorously challenge the validity of the assessment and defend our position, if the assessments, as issued, are ultimately upheld, they could materially affect our results of operations. See Part II—Item 8 Financial Statements and Supplementary Data, Note 18, "Commitments and Contingencies" of the Notes for further discussion.

Off-Balance Sheet Arrangements

In accordance with generally accepted accounting principles, our operating leases are not reflected in our consolidated balance sheets. See Part II—Item 8 Financial Statements, Note 18, "Commitments and Contingencies" of the Notes for further discussion of these off-balance sheet arrangements (as defined in Item 303(a)(4)(ii) of Regulation S-K). As of December 31, 2015, we did not have any other material off-balance sheet arrangements.

Outlook for 2016

In 2016, we will continue our relentless focus on delighting our consumers and our customers to ensure we are the first choice brewer in the geographies and segments in which we operate. We will also continue to drive our strategy of building a stronger brand portfolio that is delivering value-added innovation, strengthening our core brand positions and increasing our share in above premium, flavored malt beverages, craft and cider. We will do this while ensuring that we have a meaningful cost base and a deeply embedded focus on our approach to generating higher returns for our invested capital, managing our working capital and delivering a greater return on investment for our shareholders. In Canada, we recently launched our newest chapter on our Molson Canadian "Anything for Hockey" campaign generating 80 million media impressions in the first week. For Coors Light we expect to significantly increase programming and further evolve our communications with a new campaign building on learnings from 2015. In above premium, consumer demand remains strong for Coors Banquet, Belgian Moon, Molson Canadian Cider, and Mad Jack Lager. Building on that momentum, we will continue to introduce new variants on the successful and rapidly growing Mad Jack brand and also our ciders, which have been exceeding growth expectations. Finally, in addition to Heineken, Strongbow and Heineken's other top-end import brands, such as Dos Equis and Sol, we picked up the distribution of all Heineken trading brands in Canada at the start of the new year. In 2016, we will also continue to restructure our business to ensure we are fit for the future, including the sale of our Vancouver brewery, which will allow us to build a more efficient and flexible brewery over the next few years.

We expect our 2016 Canada cost of goods sold per hectoliter to increase at a low-single-digit rate in local currency. In the U.S., MillerCoors began to drive substantial changes to the business in the latter half of 2015 that were necessary to create the foundation for volume growth we aim to achieve by 2019. In American light lagers, the revitalization of our two largest brands is progressing well, and we are seeing segment share growth in both Coors Light and Miller Lite for the first time since MillerCoors was formed nearly 8 years ago. In above premium, MillerCoors continue to focus on higher-margin offerings that can scale and stick, including further extensions from Leinenkugel's and Blue Moon. In hard cider, MillerCoors is continuing to broaden the appeal of Smith & Forge Hard Cider by adding a bottle package to our line-up. In early January, to strengthen our flavored malt beverage portfolio,

we launched Henry's Hard Soda, which has been met with great enthusiasm from our distributors and retail partners. MillerCoors is also continuing to develop new strategies to improve the performance

60

Table of Contents

of our economy brands, which have presented challenges on our volume trends. MillerCoors will continue to build first choice customer partnerships, working with our distributors to bring more resources to the on-premise with our Building with Beer retail strategy, which leverages the higher velocity and broad appeal of American light lagers. We expect MillerCoors cost of goods sold per hectoliter to increase at a low-single-digit rate in 2016. In Europe, the terminated Heineken contract in the U.K. will continue to present a headwind in the first quarter of 2016, as will the new amortization expense for the brands that we impaired and moved to definite lived during the third quarter of 2015. We will continue to invest in our core brand portfolio across Europe to grow share of segment. We also intend to continue to invest in our above premium portfolio. Starting in 2016, we expect Rekorderlig cider and Staropramen in the U.K. and Republic of Ireland to contribute with more than 350,000 hectoliters of above premium volume annually to our Europe business and to provide attractive growth potential for the future. In combination with the integration of the Franciscan Well craft brands in Republic of Ireland and the acquisition of the brewing and kegging operation of Thomas Hardy's Burtonwood brewery in England, we now have a broad range of consumer and customer offerings in the above premium, craft and cider segments across the U.K. and Republic of Ireland. Additionally, we are implementing significant new initiatives to further improve the efficiency and effectiveness of our European operations and to provide more resources to invest in driving top-line and bottom-line growth. As the two most recent examples, we closed one of our breweries in Bulgaria in November 2015, and we have entered into a consultation process in the U.K. regarding our proposal to close our Burton South brewery and consolidate production within our recently modernized Burton North brewery by the end of 2017. We expect our 2016 Europe cost of goods sold per hectoliter to increase at a low-single-digit rate versus 2015 in local currency.

MCI is focused on attaining profitability in 2016 on a constant-currency basis versus 2013, when we made this commitment, and continuing to accelerate our overall growth and expansion in new and existing markets. Upon closing on the pending Acquisition, we are planning to integrate the Miller brands into our international portfolio and leverage a footprint that complements our growth strategy and allows us to gain entrance into high-priority markets, while increasing our business scale in current markets. We will also continue to drive rapid growth for Coors Light in Latin America, including the high-potential Colombia market, where we launched in the fourth quarter of 2015. In the future, we expect Coors, Miller and Staropramen to form the foundation of our international brand portfolio. We expect our 2016 MCI cost of goods sold per hectoliter to increase at a low-single-digit rate in local currency. We expect 2016 marketing, general and administrative expense in Corporate to be approximately \$120 million. We currently anticipate up to approximately \$20 million of cash contributions to our defined benefit pension plans in 2016 and pension expense of approximately \$8 million, based on foreign exchange rates as of December 31, 2015. MillerCoors, BRI and BDL pension expense and contributions to their respective defined benefit pension plans are excluded here, as they are not consolidated in our financial statements.

Pending Acquisition

The most important strategic development of 2015, which we expect to significantly advance our ambition to be the first choice for consumers and customers, is our definitive agreement to purchase the remaining 58% of SABMiller's economic interest and 50% voting interest in MillerCoors as well as all trademarks, contracts and other assets primarily related to the Miller brand portfolio outside of the U.S. and Puerto Rico. We anticipate the pending Acquisition to close in the second half of 2016, subject to necessary regulatory approvals and contingent on the successful closing of the ABI/SABMiller transaction. We expect to replace the outstanding commitment on our bridge loan with long-term financing to partially fund the pending Acquisition. We expect to incur increased general and administrative expenses, as well as non-operating expenses as a result of the pending Acquisition including transactional costs, current temporary financing costs, as well as costs associated with our anticipated long-term financing.

Interest

We anticipate 2016 consolidated net interest expense of approximately \$110 million, excluding interest related to the pending Acquisition, based on foreign exchange rates as of December 31, 2015.

Tax

Our tax rate is volatile and may move up or down with changes in, among other things, the amount and source of income or loss, our ability to utilize foreign tax credits, changes in tax laws, and the movement of liabilities established pursuant to accounting guidance for uncertain tax positions as statutes of limitations expire, positions are effectively settled or when additional information becomes available. Excluding any effects of the pending Acquisition, we expect our 2016 underlying

Table of Contents

effective tax rate to be in the range of 18% to 22%. After 2016, we expect our underlying effective tax rate to be near the low end of our long term range of 20% to 24%, assuming no further changes in tax laws, settlement of tax audits, adjustments to our uncertain tax positions, or significant acquisitions or divestitures. There are proposed or pending tax law changes in various jurisdictions in which we do business that, if enacted, may have an impact on our underlying effective tax rate. Additionally, the completion of the pending Acquisition is expected to increase our effective tax rate if consummated.

Dividends

As a result of the pending Acquisition, we plan to maintain our current quarterly dividend of \$0.41 per share as we pay down debt, and we will revisit our dividend policy once deleveraging is well underway.

Critical Accounting Estimates

Our consolidated financial statements are prepared in accordance with U.S. GAAP. In connection with the preparation of our consolidated financial statements, we are required to make judgments and estimates that significantly affect the reported amounts of assets, liabilities, revenues and expenses and related disclosures. Our estimates are based on historical experience, current trends and various other assumptions we believe to be relevant under the circumstances. We review the underlying factors used in our estimates regularly, including reviewing the significant accounting policies impacting the estimates, to ensure compliance with U.S. GAAP. However, due to the uncertainty inherent in our estimates, actual results may be materially different. We have identified the accounting estimates below as critical to understanding and evaluating the financial results reported in our consolidated financial statements.

For a complete description of our significant accounting policies, see Part II—Item 8 Financial Statements and Supplementary Data, Note 1, "Basis of Presentation and Summary of Significant Accounting Policies" of the Notes.

Pension and Other Postretirement Benefits

Our defined benefit pension plans cover certain current and former employees in Canada, the U.K. (within our Europe segment) and Japan (within our MCI segment). Our other postretirement benefit ("OPEB") plans provide medical benefits for retirees and their eligible dependents as well as life insurance for certain retirees in Canada, the U.S., and Europe. The Canada and U.K. defined benefit pension plans are primarily funded, but the Japan plan and all OPEB plans are unfunded. We also offer defined contribution plans in each of our segments.

Accounting for pension and OPEB plans requires that we make assumptions that involve considerable judgment which are significant inputs in the actuarial models that measure our net pension and OPEB obligations and ultimately impact our earnings. These include the discount rate, long-term expected rate of return on assets, compensation trends, inflation considerations, health care cost trends and other assumptions, as well as determining the fair value of assets in our funded plans.

Specifically, the discount rates, as well as the expected rates of return on assets and plan asset fair value determination, are important assumptions used in determining the plans' funded status and annual net periodic pension and OPEB benefit costs. We evaluate these critical assumptions at least annually on a plan and country-specific basis. We also, with the help of actuaries, periodically evaluate other assumptions involving demographic factors, such as retirement age, mortality and turnover, and update them to reflect our experience and expectations for the future. While we believe that our assumptions are appropriate, significant differences in our actual experience or significant changes in our assumptions may materially affect our net pension and postretirement benefit obligations and related expense.

Discount Rates

The assumed discount rates are used to present-value future benefit obligations based on each plan's respective duration. The Canada pension and postretirement discount rates are based on our annual evaluation of high quality corporate bonds in the Canada market based on appropriate indices and actuarial guidance. The U.K. pension discount rate is based on information obtained from our actuary and reviewed in comparison with a published bond index reflective of the duration of our defined benefit pension obligations. We believe that our discount rate assumptions are appropriate; however, significant changes in our assumptions may materially affect our pension and OPEB obligations and related expense.

At December 31, 2015, on a weighted-average basis, the discount rates used were 3.82% for our defined benefit pension plans and 4.05% for our OPEB plans. This is a minimal change from the weighted-average discount rates of 3.70% for our defined benefit pension plans and 4.15% for our postretirement plans at December 31, 2014, resulting from a challenging global economic environment.

Table of Contents

A 50 basis point change in our discount rate assumptions would have had the following effects on the projected benefit obligation balances as of December 31, 2015, for our pension and OPEB plans:

	Impact to projected benefit obligation as of December 31, 2015 - 50 basis points	
	Decrease	Increase
	(In millions)	
Projected benefit obligation - unfavorable (favorable)		
Pension obligation	\$263.3	\$(284.4)
OPEB obligation	9.1	(9.3)
Total impact to the projected benefit obligation	\$272.4	\$(293.7)

Our U.K. pension plan includes benefits linked to inflation. The above sensitivity analysis does not consider the implications to inflation resulting from the above contemplated discount rate changes. This sensitivity holds all other assumptions constant.

Long Term Expected Rates of Return on Assets

The assumed long-term expected return on assets ("EROA") is used to estimate the actual return that will occur on each individual funded plan's respective plan assets in the upcoming year. We determine each plan's EROA with substantial input from independent investment specialists, including our actuaries and other consultants. In developing each plan's EROA, we consider current and expected asset allocations, historical market rates as well as historical and expected returns on each plan's individual asset classes. In developing future return expectations for each of our plan's assets, we evaluate general market trends as well as key elements of asset class returns such as expected earnings growth, yields and spreads. The calculation includes inputs for interest, inflation, credit, and risk premium (active investment management) rates and fees paid to service providers. Based on the above factors and expected asset allocations, we have assumed, on a weighted-average basis, an EROA of 5.09% for our defined benefit pension plan assets for cost recognition in 2016. This is a decrease from the weighted-average rate of 5.46% we had assumed in 2015. We believe that our EROA assumptions are appropriate; however, significant changes in our assumptions or actual returns that differ significantly from estimated returns may materially affect our net periodic pension costs.

Our EROA assumptions are applied to each of our plan's assets using the "market-related value", which utilizes a delayed approach to recognition of asset-related gains and losses to reduce volatility resulting from significant market movements. Specifically, while employer contributions and realized gains and losses (such as dividends received or gains and losses on sales of assets) are reflected immediately in the market-related value of assets, each year's unrealized gains and losses are amortized into the market-related value over five years. Therefore, significant divergences of actual returns from expected returns may not have an immediate impact on each of our plan's future net periodic pension costs; rather, such differences will be amortized over the five years following the event. Therefore, future years' pension expense will continue to be impacted by the gains and losses experienced in prior years.

A 50 basis point change in our discount rate and expected return on assets assumptions made at the beginning of 2015 would have had the following effects on 2015 net periodic pension and postretirement benefit costs:

	Impact to 2015 pension and postretirement benefit costs - 50 basis points (unfavorable) favorable	
	Decrease	Increase
	(In millions)	
Description of pension and postretirement plan sensitivity item		
Expected return on pension plan assets	\$(16.5)) \$16.4
Discount rate on pension plans	\$(16.4)) \$12.7
Discount rate on postretirement plans	\$(0.3)) \$0.1

Fair Value of Plan Assets

We recognize our defined benefit pension plans as assets or liabilities in the consolidated balance sheets based on their underfunded or overfunded status as of our year end and recognize changes in the funded status in the year in which

the changes occur within other comprehensive income. Our funded status of our defined benefit pension plans is measured as the

63

Table of Contents

difference between each plan's projected benefit obligation ("PBO") and its assets' fair values. The fair value of plan assets is determined by us using available market information and appropriate valuation methodologies. However, considerable judgment is required in selecting an appropriate methodology and interpreting market data to develop the estimates of fair value, especially in the absence of quoted market values in an active market. Changes in these assumptions or the use of different market inputs may have a material impact on the estimated fair values or the ultimate amount at which the plan assets are available to satisfy our plan obligations.

Equity assets are diversified between domestic and other international investments. Relative allocations reflect the demographics of the respective plan participants. See Part II—Item 8 Financial Statements and Supplementary Data, Note 15, "Employee Retirement Plans and Postretirement Benefits" of the Notes for a comparison of target asset allocation percentages to actual asset allocations at December 31, 2015.

Other Considerations

Our net periodic pension and postretirement benefit costs are also influenced by the potential amortization (or non-amortization) from accumulated other comprehensive income of deferred gains and losses, which occur when actual experience differs from estimates. We employ the corridor approach for determining each plan's amortization. This approach defines the "corridor" as the greater of 10% of the PBO or 10% of the market-related value of plan assets (as discussed above) and requires amortization of the excess net gain or loss that exceeds the corridor over the average remaining service periods of active plan participants in Canada. As our U.K. plan is closed, the average remaining life expectancy of all plan participants (including retirees) is used. If our actuarial losses significantly exceed this corridor in the future, significant incremental pension and postretirement costs could result. As of year end 2015, the deferred losses of several of our Canadian plans, as well as those in our U.K. plan, exceeded the 10% corridor.

The assumed health care cost trend rates represent the rates at which health care costs are assumed to increase and are based on actuarial input and consideration of historical and expected experience. We use these trends as a significant assumption in determining our postretirement benefit obligation and related costs. Changes in our projections of future health care costs due to general economic conditions and those specific to health care will impact this trend rate. An increase in the trend rate would increase our obligation and expense of our postretirement health care plan. We believe that our health care cost trend rate assumptions are appropriate; however, significant changes in our assumptions may materially affect our postretirement benefit obligations and related costs. At December 31, 2015, the health care trend rates used were ranging ratably from 7.7% in 2016 to 4.5% in 2028, consistent with rates used at December 31, 2014. See Part II—Item 8 Financial Statements and Supplementary Data, Note 15, "Employee Retirement Plans and Postretirement Benefits" of the Notes for the impact of a one-percentage point change in assumed health care cost trend rates on total service and interest cost components and postretirement benefit obligation at December 31, 2015.

Contingencies, Environmental and Litigation Reserves

Contingencies, environmental and litigation reserves are recorded, when probable, using our best estimate of loss. This estimate, involving significant judgment, is based on an evaluation of the range of loss related to such matters and where the amount and range can be reasonably estimated. These matters are generally resolved over a number of years and only when one or more future events occur or fail to occur. Following our initial determination, we regularly reassess and revise the potential liability related to any pending matters as new information becomes available. Unless capitalization is allowed or required by U.S. GAAP, environmental and legal costs are expensed when incurred. We disclose pending loss contingencies when the loss is deemed reasonably possible, which requires significant judgment. As a result of the inherent uncertainty of these matters, the ultimate conclusion and actual cost of settlement may materially differ from our estimates. We recognize contingent gains upon the determination that realization is assured beyond a reasonable doubt, regardless of the perceived probability of a favorable outcome prior to achieving that assurance. In the instance of gain contingencies resulting from favorable litigation, due to the numerous uncertainties inherent in a legal proceeding, gain contingencies resulting from legal settlements are not recognized in income until cash or other forms of payment are received. If significant and probable, we disclose as appropriate.

See Part I—Item 3 Legal Proceedings and Part II—Item 8 Financial Statements and Supplementary Data, Note 18, "Commitments and Contingencies" of the Notes for a discussion of our contingencies, environmental and litigation reserves as of December 31, 2015.

Goodwill and Intangible Asset Valuation

Goodwill is allocated to the reporting unit in which the business that created the goodwill resides. A reporting unit is an operating segment, or a business unit one level below that operating segment, for which discrete financial information is prepared and regularly reviewed by segment management. The operations in each of the specific regions within our Canada, Europe and MCI segments are components based on the availability of discrete financial information and the regular review by segment management. Therefore, the components within each respective segment must be evaluated for aggregation to

Table of Contents

determine if the components have similar economic characteristics. As a result, in certain cases, we have aggregated business units, within an operating segment, into one reporting unit if the specific aggregation criteria under U.S. GAAP is met. Specifically, we have concluded that the components within the Canada and Europe segment each meet the criteria as having similar economic characteristics and therefore have aggregated these components into the Canada and Europe reporting units, respectively. Therefore, the Canada and Europe reporting units are consistent with our operating segments. However, for our India business, the reporting unit is one level below the MCI operating segment. Any change to the conclusion of our reporting units or the aggregation of components within our reporting units could result in a different outcome to our annual impairment test. Our significant indefinite-lived intangible assets include the Molson core brands and the Coors Light distribution rights in Canada, and the Carling and Staropramen brands in Europe.

We evaluate the carrying value of our goodwill and indefinite-lived intangible assets for impairment at least annually or when an interim triggering event occurs that would indicate that impairment may have taken place. Consistent with 2014, our annual impairment test was performed as of October 1, the first day of the last fiscal quarter. We evaluate our other definite-lived intangible assets for impairment when evidence exists that certain events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable. Significant judgments and assumptions are required in such impairment evaluations.

Our annual evaluation involves comparing each reporting unit's fair value to its respective carrying value, including goodwill. If the fair value exceeds carrying value, then we conclude that no goodwill impairment has occurred. If a reporting unit's carrying value exceeds its fair value, a second step is required to measure possible goodwill impairment loss. This step, if required, would include valuing all tangible and intangible assets and liabilities of the reporting unit, excluding goodwill. Then, the implied fair value of the reporting unit's goodwill derived from this step would be compared to the carrying value of that goodwill. If the carrying value of the reporting unit's goodwill were to exceed the implied fair value of the goodwill, we would recognize an impairment loss in an amount equal to the excess.

We use a combination of discounted cash flow analyses and market approaches to determine the fair value of each of our reporting units, and an excess earnings approach to determine the fair values of our indefinite-lived intangible assets. Our discounted cash flow projections include assumptions for growth rates for sales, costs and profits, which are based on various long-range financial and operational plans of each reporting unit or each indefinite-lived intangible asset. Additionally, discount rates used in our goodwill analysis are based on weighted-average cost of capital, driven by the prevailing interest rates in geographies where these businesses operate, as well as the credit ratings, financing abilities and opportunities of each reporting unit, among other factors. Discount rates for the indefinite-lived intangible analysis by brand largely reflect the rates supporting the overall reporting unit valuation but may differ slightly to adjust for country or market specific risk associated with a particular brand. Our market-based valuations utilize earnings multiples of comparable public companies, which are reflective of the market in which each respective reporting unit operates, and recent comparable market transactions.

Changes in the factors used in our fair value estimates, including declines in industry or company-specific beer volume sales, margin erosion, termination of brewing and/or distribution agreements with other brewers, and discount rates used, could have a significant impact on the fair values of the reporting units.

Reporting Units and Goodwill

Our 2015 annual goodwill impairment testing determined that while our Canada reporting unit improved from the prior year, our Europe reporting unit declined and was determined to be at risk of failing step one of the goodwill impairment test. Specifically, the fair value of the Europe and Canada reporting units were estimated at approximately 9% and 20% in excess of carrying value, respectively, as of the October 1, 2015, testing date. The excess of the fair value over the carrying value of the Europe reporting unit declined from the prior year. The decrease was driven by continued challenging macroeconomic conditions in Europe negatively impacting our business, as well as declines in the forecasts of certain European brands, which have been adversely impacted by competitive pressures and a continued shift in consumer trends towards value brands. These impacts were partially offset by a lower discount rate. The Canada reporting unit had an increase to the fair value in excess of the carrying value from the prior year primarily due to a lower discount rate, an improved forecast primarily driven by cost savings initiatives and improved

market multiples. Although the fair value in excess of the carrying value has increased for the Canada reporting unit from the October 1, 2014, testing date, the fair value is sensitive to potential unfavorable changes in forecasted cash flows, macroeconomic conditions, market multiples or discount rates that could have an adverse impact. The fair value of the India reporting unit was deemed to approximate the carrying value due to purchase price accounting performed as of April 1, 2015, for the Mount Shivalik acquisition, which comprises the majority of the India reporting unit.

Intangible Assets

Prior to the annual impairment testing date of October 1, 2015, and during the third quarter of 2015, we identified impairment indicators as it pertains to certain European indefinite-lived brands driven by key changes to our underlying

Table of Contents

assumptions supporting the value of the brands. Specific changes included under-performance through the 2015 peak season which drove a downward shift in management's forecasts, a challenging macroeconomic environment and competitive conditions not expected to subside in the near-term, as well as higher discount rates associated with these brands. As a result, we recorded an aggregate impairment charge across various European brands, including Jelen, of \$275.0 million within special items in the third quarter of 2015. Compared to previously made assumptions, these lower projected cash flows and higher discount rates resulted in lower brand valuations following impairments of \$360.0 million in 2014 and \$150.9 million in 2013 related to European indefinite-lived brands as a result of our 2014 and 2013 annual impairment testing, respectively. The remaining Europe indefinite-lived intangibles' fair values, including Staropramen and Carling brands, while they faced similar macroeconomic challenges, were sufficiently in excess of their respective carrying values as of the testing date.

In conjunction with the interim brand impairment review performed during the third quarter, we also reassessed each brand's indefinite-life classification and determined that those brands which had been impaired had characteristics that indicated a definite-life assignment was more appropriate including continued pressure on these brands given the geographical markets and price segments in which they participate. Specifically, significant competition from the value segment, which has challenged the segment in which these brands operate with continued stress on these brands driven by on-going macroeconomic conditions. These brands were therefore reclassified as definite-lived intangible assets as of September 30, 2015, and will be amortized over their useful lives ranging from 30 to 50 years. No additional triggering events were identified in 2015 associated with the brands reclassified to definite-lived intangible assets.

Separately, our Molson core brand intangible continues to be at risk of future impairment with a fair value estimated at approximately 3% in excess of its carrying value as of the impairment testing date. The fair value of the Molson core brands in excess of carrying value decreased marginally from the prior year, as they continue to face significant competitive pressures and challenging macroeconomic conditions in the Canada market. These challenges continue to be offset by anticipated cost savings initiatives. As of December 31, 2015, the Molson core brand intangible had a carrying value of approximately \$2.2 billion. The fair value of the Coors Light brand distribution rights and our other indefinite-lived intangibles in Canada continue to be sufficiently in excess of their carrying values.

We utilized Level 3 fair value measurements in our impairment analysis of our indefinite-lived intangible assets, which utilizes an excess earnings approach to determine the fair values of the assets as of the testing date. The future cash flows used in the analysis are based on internal cash flow projections based on our long range plans and include significant assumptions by management as noted below.

Key Assumptions

The Europe reporting unit goodwill and the Molson core brand intangible asset are at risk of future impairment in the event of significant unfavorable changes in the forecasted cash flows (including prolonged, or further weakening of, adverse economic conditions or significant unfavorable changes in tax, environmental or other regulations, including interpretations thereof), terminal growth rates, market transaction multiples and/or weighted-average cost of capital utilized in the discounted cash flow analyses. For testing purposes, management's best estimates of the expected future results are the primary driver in determining the fair value. Current projections used for our Europe reporting unit testing reflect continued challenging environments in the future followed by growth resulting from a longer term recovery of the macroeconomic environment, as well as the benefit of anticipated cost savings and specific brand-building and innovation activities. Our Molson core brand projections also reflect a continued challenging environment that has been adversely impacted by a weak economy across all industries, as well as weakened consumer demand driven by increased competitive pressures, partially offset by anticipated cost savings and specific brand-building and innovation activities. Fair value determinations require considerable judgment and are sensitive to changes in underlying assumptions and factors. As a result, there can be no assurance that the estimates and assumptions made for purposes of the annual goodwill and indefinite-lived intangible impairment tests will prove to be an accurate prediction of the future. Examples of events or circumstances that could reasonably be expected to negatively affect the underlying key assumptions and ultimately impact the estimated fair value of our reporting units and indefinite-lived intangibles may include such items as: (i) a decrease in expected future cash flows, specifically, a decrease in sales volume and increase in costs that could significantly impact our immediate and long-range results, a

decrease in sales volume driven by a prolonged weakness in consumer demand or other competitive pressures adversely affecting our long term volume trends, a continuation of the trend away from core brands in certain of our markets, especially in markets where our core brands represent a significant portion of the market, unfavorable working capital changes and an inability to successfully achieve our cost savings targets, (ii) adverse changes in macroeconomic conditions or an economic recovery that significantly differs from our assumptions in timing and/or degree (such as a recession or worsening of the overall European economy), (iii) volatility in the equity and debt markets or other country specific factors which could result in a higher weighted-average cost of capital, (iv) sensitivity to market multiples; and (v) regulation limiting or banning the manufacturing, distribution or sale of alcoholic beverages.

Table of Contents

Our analysis of the Canada reporting unit and related indefinite-lived intangible brand assets included consideration of the New Framework with the Province of Ontario, which became effective as of January 1, 2016, and includes the forecasted implications to MCBC of an additional CAD 100.0 million annual tax on all beer volume sold in Ontario (which will be phased in over four years beginning January 1, 2016), restrictions on price increases for certain packaging types of the largest Ontario brands until the second quarter of 2017, BRI committing to invest CAD 100.0 million of capital spending through 2018, increasing the number and types of outlets where beer is sold, increasing the required level of shelf space allocated to small brewers in retail outlets, as well as allowing for incremental packaging options at the Liquor Control Board of Ontario ("LCBO") and agents of the LCBO.

Based on known facts and circumstances, we evaluate and consider other recent events and uncertain items, as well as related potential implications, as part of our annual assessment and incorporate into the analyses as appropriate. These facts and circumstances are subject to change and may impact future analyses.

In 2015, the discount rates used in developing our fair value estimates for each of our reporting units were 8.0% and 9.0% and for our Canada and Europe reporting units, respectively. These compared to discount rates used in our 2014 testing of 8.5% and 9.5% for our Canada and Europe reporting units, respectively. In 2015, discount rates used for testing of indefinite-lived intangibles ranged from 8.0% to 14.5% considering the country specific risk premium for each geography in which our brands are based. The decrease in the discount rates is primarily due to a reduction in the unsystematic risk premium as we refined inputs compared to those used in our historical discounted cash flow analyses as well as reduction in risk free rates between testing dates. Consistent with the prior year testing, we assessed qualitative factors to determine whether it was more likely than not that the fair value of our water rights, an indefinite-lived intangible, was greater than its carrying amount and determined that a full quantitative analysis was not necessary.

While historical performance and current expectations have resulted in fair values of our reporting units in excess of carrying values, if our assumptions are not realized, it is possible that an impairment charge may need to be recorded in the future. For example, a 50 basis point increase in our discount rate assumptions, which is within a reasonable range of historical discount rate fluctuations between test dates, would have had the following effects on the fair value cushion in excess of carrying value for the Europe and Canada reporting units and Molson core brands as of the October 1, 2015, test date:

	Impact to the fair value cushion as of October 1, 2015 - 50 basis points increase	
	Cushion (pre-sensitivity) % of fair value in excess of carrying value	Cushion (post-sensitivity)
Reporting units:		
Europe	9%	1%
Canada	20%	11%
Indefinite-lived intangibles:		
Molson core brands	3%	-5%

Post sensitivity, the fair values of the Europe and Canada reporting units remain in excess of their carrying values. The negative cushion associated with the Molson core brands would imply impairment if the discount rate assumptions used in the October 1, 2015, test increased by 50 basis points. The discount rate sensitivity holds all other assumptions and inputs constant.

Regarding definite-lived intangibles, we continuously monitor the performance of the underlying asset for potential triggering events suggesting an impairment review should be performed. No such triggering events were identified in 2015. In addition, no such triggering events were identified in 2014 or 2013, with the exception of the license agreement settlement and preceding litigation with Miller in Canada, which resulted in \$8.9 million and \$17.9 million of impairment charges of our definite-lived intangible asset in 2014 and 2013, respectively. We utilized Level 3 fair value measurements in our impairment analysis of this definite-lived intangible asset, which included cash flow assumptions by management related to the transition period. See Part II—Item 8 Financial Statements and

Supplementary Data, Note 11, "Goodwill and Intangible Assets" of the Notes for further discussion.

As of December 31, 2015, the carrying values of goodwill and indefinite-lived intangible assets were \$2.0 billion and \$4.7 billion, respectively. If actual performance results differ significantly from our projections or we experience significant fluctuations in our other assumptions, a material impairment charge may occur in the future. See Part II—Item 8 Financial Statements and Supplementary Data, Note 11, "Goodwill and Intangible Assets" of the Notes for further discussion and presentation of these amounts.

Table of Contents

Income Taxes

Income taxes are accounted for in accordance with U.S. GAAP. Judgment is required in determining our worldwide provision for income taxes. In the ordinary course of our global business, there are many transactions for which the ultimate tax outcome is uncertain. Additionally, our income tax provision is based on calculations and assumptions that are subject to examination by many different tax authorities. We adjust our income tax provision in the period it is probable that actual results will differ from our estimates. Tax law and rate changes are reflected in the income tax provision in the period in which such changes are enacted.

We are periodically subject to tax return audits by both foreign and domestic tax authorities, which can involve questions regarding our tax positions. Settlement of any challenge resulting from these audits can result in no change, a complete disallowance, or some partial adjustment reached through negotiations or litigation. We recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained based on its technical merits. We measure and record the tax benefits from such a position based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. Our estimated liabilities related to these matters are adjusted in the period in which the uncertain tax position is effectively settled, the statute of limitations for examination expires or when additional information becomes available. Our liability for unrecognized tax benefits requires the use of assumptions and significant judgment to estimate the exposures associated with our various filing positions. Although we believe that the judgments and estimates made are reasonable, actual results could differ and resulting adjustments could materially affect our effective income tax rate and income tax provision.

We annually receive cash from our foreign subsidiaries' current year earnings. Separately, we treat all accumulated foreign subsidiary earnings through December 31, 2015, as indefinitely reinvested under the accounting guidance and accordingly have not provided for any U.S. or foreign tax thereon. In order to arrive at this conclusion, we considered factors including, but not limited to, past experience, domestic cash requirements and distributions from MillerCoors, as well as cash requirements to satisfy the ongoing operations, capital expenditures and other financial obligations of our foreign subsidiaries. As of December 31, 2015, approximately \$20 million of undistributed earnings and profits attributable to foreign subsidiaries was considered to be indefinitely invested. Our intention is to permanently reinvest the earnings outside of the U.S. It is not practicable to determine the amount of incremental taxes that might arise were these earnings to be remitted. The amount of tax payable could be impacted by the jurisdiction in which a distribution was made, the amount of the distribution, foreign withholding taxes under applicable tax laws when distributed, relevant tax treaties and foreign tax credits. While it is not practical to determine the amount of tax, we believe that U.S. foreign tax credits and tax planning strategies would allow us to make remittances in a tax efficient manner.

We record a valuation allowance to reduce our deferred tax assets to the amount that is more likely than not to be realized. We evaluate our ability to realize the tax benefits associated with deferred tax assets by assessing the adequacy of future expected taxable income, including the reversal of existing temporary differences, historical and projected operating results, and the availability of prudent and feasible tax planning strategies. The realization of tax benefits is evaluated by jurisdiction and the realizability of these assets can vary based on the character of the tax attribute and the carryforward periods specific to each jurisdiction. In the event we were to determine that we would be able to realize our deferred tax assets in the future in excess of its net recorded amount, an adjustment to the deferred tax asset would decrease income tax expense in the period a determination was made. Likewise, should we determine that we would not be able to realize all or part of our net deferred tax asset in the future, an adjustment to the deferred tax asset would be recorded to income tax expense in the period such determination was made.

New Accounting Pronouncements Not Yet Adopted

Revenue Recognition

In May 2014, the FASB issued authoritative guidance related to new accounting requirements for the recognition of revenue from contracts with customers. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled to in exchange for the goods or services. In August 2015, the FASB affirmed its proposal to defer the effective date of the new revenue recognition standard for all entities by one year. As a result, the requirements of the new standard are effective for annual reporting periods beginning after December 15, 2017, and

interim periods within those annual periods. In conjunction with the deferral, the FASB will permit all entities to apply the new revenue recognition standard early, but not before the original effective date. The use of either a full retrospective or cumulative effect transition method is permitted. We have not yet selected a transition method and are currently evaluating the potential impact on our financial position and results of operations upon adoption of this guidance.

See Part II-Item 8 Financial Statements and Supplementary Data, Note 2, "New Accounting Pronouncements" of the Notes for a description of new accounting pronouncements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of business, we actively manage our exposure to various market risks by entering into various supplier-based and market-based hedging transactions, authorized under established risk management policies that place clear controls on these activities. Our objective in managing these exposures is to decrease the volatility of our earnings and cash flows due to changes in underlying rates and costs.

The counterparties to our market-based transactions are generally highly rated institutions. We perform assessments of their credit risk regularly. Our market-based transactions include a variety of derivative financial instruments, none of which are used for trading or speculative purposes.

Interest Rate Risk

We are exposed to volatility in interest rates with regard to current and future debt offerings. Primary exposures include U.S. Treasury rates, Canadian government rates and LIBOR. To mitigate this exposure as it pertains to future debt offerings and to achieve our desired fixed-to-floating rate debt profile, we may enter into interest rate swaps from time to time.

Foreign Exchange Risk

Foreign currency fluctuations affect our net investments in foreign subsidiaries and foreign currency-denominated cash flows. We manage our foreign currency exposures through foreign currency forward contracts and foreign-denominated debt. We may also enter into cross currency swaps from time to time.

Commodity Price Risk

We use commodities in the production and distribution of our products. To manage the related price risk for these costs, we utilize market-based derivatives and long-term supplier-based contracts. Our primary objective when entering into these transactions is to achieve price certainty for commodities used in our supply chain. We manage our exposures through a combination of purchase orders, long-term supply contracts and over-the-counter swaps. Details of market-risk sensitive debt, derivative and other financial instruments are included in the table below. Notional amounts and fair values are presented in USD based on the applicable exchange rate as of December 31, 2015, and December 31, 2014, respectively. See Part II—Item 8 Financial Statements and Supplementary Data, Note 16, "Derivative Instruments and Hedging Activities" of the Notes for further discussion.

Sensitivity Analysis

Our market sensitive derivative and other financial instruments, as defined by the Securities and Exchange Commission, are debt, foreign currency forward contracts, interest rate swaps and commodity swaps. We monitor foreign exchange risk, interest rate risk, commodity risk and related derivatives using a sensitivity analysis. The following table presents the results of the sensitivity analysis, which reflects the impact of a hypothetical 10% adverse change in each of these risks to our derivative and debt portfolios, with the exception of interest rate risk to our interest rate swaps in which we have applied an absolute 1% adverse change to the respective instrument's interest rate. The volatility of the applicable rates and prices are dependent on many factors that cannot be forecast with reliable accuracy. Therefore, actual changes in fair values could differ significantly from the results presented in the table below.

	As of	
	December 31, 2015	December 31, 2014
	(In millions)	
Estimated fair value volatility		
Foreign currency risk:		
Forwards	\$(29.7) \$(35.8
Swaps	\$—) \$(5.7

MANAGEMENT'S REPORT

The preparation, integrity and objectivity of the financial statements and all other financial information included in this annual report are the responsibility of the management of Molson Coors Brewing Company. The financial statements have been prepared in accordance with generally accepted accounting principles in the United States, applying estimates based on management's best judgment where necessary. Management believes that all material uncertainties have been appropriately accounted for and disclosed.

The Company's management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2015. In making this assessment, the Company's management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework (the "2013 Framework"). Based upon its assessment, management concluded that, as of December 31, 2015, the Company's internal control over financial reporting was effective.

PricewaterhouseCoopers LLP, the Company's independent registered public accounting firm, provides an objective, independent audit of the consolidated financial statements and internal control over financial reporting. Their accompanying report is based upon an examination conducted in accordance with standards of the Public Company Accounting Oversight Board (United States), including tests of accounting procedures, records and internal control. The Board of Directors, operating through its Audit Committee composed of independent, outside directors, monitors the Company's accounting control systems and reviews the results of the Company's auditing activities. The Audit Committee meets at least quarterly, either separately or jointly, with representatives of management, PricewaterhouseCoopers LLP, and internal auditors. To ensure complete independence, PricewaterhouseCoopers LLP and the Company's internal auditors have full and free access to the Audit Committee and may meet with or without the presence of management.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders

of Molson Coors Brewing Company:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Molson Coors Brewing Company and its subsidiaries at December 31, 2015 and December 31, 2014, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2015 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015 based on criteria established in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 2 to the consolidated financial statements, the Company changed the manner in which it accounts for deferred tax assets and liabilities based upon the early adoption of Accounting Standards Update 2015-17, Balance Sheet Classification of Deferred Taxes in 2015.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

MOLSON COORS BREWING COMPANY AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation and Summary of Significant Accounting Policies

Unless otherwise noted in this report, any description of "we", "us" or "our" includes Molson Coors Brewing Company ("MCBC" or the "Company"), principally a holding company, and its operating and non-operating subsidiaries included within our reporting segments and Corporate. Our reporting segments include: Molson Coors Canada ("MCC" or Canada segment), operating in Canada; MillerCoors LLC ("MillerCoors" or U.S. segment), which is accounted for by us under the equity method of accounting, operating in the United States ("U.S."); Molson Coors Europe (Europe segment), operating in Bosnia-Herzegovina, Bulgaria, Croatia, Czech Republic, Hungary, Montenegro, Republic of Ireland, Romania, Serbia, Slovakia and the United Kingdom ("U.K."); and Molson Coors International ("MCI"), operating in various other countries. Any reference to "Coors" means the Adolph Coors Company prior to the 2005 merger with Molson Inc. (the "Merger"). Any reference to Molson Inc. or Molson means MCC prior to the Merger. Any reference to "Molson Coors" means MCBC after the Merger.

Unless otherwise indicated, information in this report is presented in U.S. dollars ("USD" or "\$").

Our Fiscal Year

On November 14, 2013, our Board of Directors approved a resolution to change MCBC's fiscal year from a 52/53 week fiscal year to a calendar year. As such, our 2013 fiscal year end was extended from December 28, 2013, to December 31, 2013, with subsequent fiscal years beginning on January 1 and ending on December 31 of each year. Beginning January 1, 2014, quarterly results reflect the three month periods ending March 31, June 30, September 30, and December 31. This change aligned our fiscal year and interim reporting periods with our Central Europe business and MillerCoors, which were already following a monthly fiscal reporting calendar. Unless otherwise indicated, fiscal year 2015 refers to the 12 months ended December 31, 2015, fiscal year 2014 refers to the 12 months ended December 31, 2014, and fiscal year 2013 refers to the period from December 30, 2012, through December 31, 2013. The impact of the three additional days in fiscal year 2013 is immaterial to the consolidated financial statements.

Principles of Consolidation

Our consolidated financial statements include our accounts and our majority-owned and controlled domestic and foreign subsidiaries, as well as certain variable interest entities ("VIEs") for which we are the primary beneficiary. All intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). These accounting principles require us to make certain estimates, judgments and assumptions. We believe that the estimates, judgments and assumptions used to determine certain amounts that affect the financial statements are reasonable, based on information available at the time they are made. To the extent there are differences between these estimates and actual results, our consolidated financial statements may be materially affected.

Revenue Recognition

Our net sales represent the sale of beer and other malt beverages (including adjacencies, such as cider) net of excise taxes, the vast majority of which are brands that we own and brew ourselves. We import or brew and sell certain non-owned partner brands under licensing and related arrangements. In addition, we contract manufacture for other brewers in some of our markets.

Revenue is recognized when the significant risks and rewards of ownership, including the risk of loss, are transferred to the customer or distributor depending upon the method of distribution and shipping terms. The cost of various programs, such as price promotions, rebates and coupon programs are treated as a reduction of sales. In certain of our markets, slotting or listing fees are paid to customers and are also treated as a reduction of sales. Sales of products are for cash or otherwise agreed upon credit terms. Sales are stated net of incentives, discounts and returns.

We do not have standard terms that permit return of product; however, in certain markets where returns occur we estimate the amount of returns based on historical return experience and adjust our revenue accordingly. Products that do not meet our high quality standards are returned by the customer or recalled and destroyed and are recorded as a reduction of revenue. The reversal of revenue is recorded upon determination that the product will be recalled and

destroyed. We estimate the costs required to facilitate product returns and record them in cost of goods sold as required.

81

In addition to supplying our own brands, the U.K. business (within our Europe segment) sells other beverage companies' products to on-premise customers to provide them with a full range of products for their retail outlets. We refer to this as the "factored brand business." Sales from this business are included in our net sales and cost of goods sold when ultimately sold, but the related volume is not included in our reported sales volumes. In the factored brand business, we normally purchase inventory, which includes excise taxes charged by the vendor, take orders from customers for such brands, and invoice customers for the product and related costs of delivery. In accordance with guidance pertaining to reporting revenue gross as a principal versus net as an agent, sales under the factored brands are reported on a gross basis.

Payments made to customers are conditional on the achievement of volume targets, marketing commitments, or both. If paid in advance, we record such payments as prepayments and amortize them in the consolidated statements of operations over the relevant period to which the customer commitment is made (up to five years). Where there is no sufficiently separate identifiable benefit, and the payment is linked to volumes, or fair value cannot be established, the amortization of the prepayment or the cost as incurred is included in sales discounts as a reduction to sales and where there are specific marketing activities/commitments, the cost is included as marketing, general and administrative expenses. The amounts capitalized are reassessed regularly for recoverability over the contract period and are impaired where there is objective evidence that the benefits will not be realized or the asset is otherwise not recoverable.

In the U.K., loans are extended to a portion of the retail outlets that sell our brands. We reclassify a portion of beer revenue to interest income to reflect a market rate of interest on these loans. In fiscal years 2015, 2014 and 2013, these amounts were \$3.9 million, \$4.4 million, and \$4.9 million, respectively, included in the Europe segment.

Excise Taxes

Excise taxes collected from customers and remitted to tax authorities are government-imposed excise taxes on beer shipments. Excise taxes on beer shipments are shown in a separate line item in the consolidated statements of operations as a reduction of sales. Taxes collected from customers are recognized as a liability, with the liability subsequently reduced when the taxes are remitted to the tax authority.

Cost of Goods Sold

Our cost of goods sold includes costs we incur to make and ship beer. These costs include brewing materials, such as barley, hops and various grains. Packaging materials, including glass bottles, aluminum and steel cans, cardboard and paperboard are also included in our cost of goods sold. Additionally, our cost of goods sold include both direct and indirect labor, shipping and handling including freight costs, utilities, maintenance costs, depreciation, promotional packaging, other manufacturing overheads and costs to purchase factored brands from suppliers, as well as the estimated cost to facilitate product returns.

Marketing, General and Administrative Expenses

Our marketing, general and administrative expenses include media advertising (television, radio, print), tactical advertising (signs, banners, point-of-sale materials) and promotion costs on both local and national levels within our operating segments. The creative portion of our advertising activities is expensed as incurred. Production costs of advertising and promotional materials are expensed when the advertising is first run. Advertising expense was \$401.6 million, \$473.9 million and \$447.0 million for 2015, 2014 and 2013, respectively. Prepaid advertising costs of \$10.6 million and \$16.1 million, were included in other current assets in the consolidated balance sheets at December 31, 2015, and December 31, 2014, respectively.

This classification includes general and administrative costs for functions such as finance, legal, human resources and information technology, along with acquisition and integration costs, which consist primarily of labor and outside services, as well as bad debt expense related to our allowance for doubtful accounts. Unless capitalization is allowed or required by U.S. GAAP, legal costs are expensed when incurred. These costs also include our marketing and sales organizations, including labor and other overheads. This line item additionally includes amortization costs associated with intangible assets, as well as certain depreciation costs related to non-production equipment and share-based compensation.

Share-based compensation is recognized using a straight-line method over the vesting period of the awards. Certain share-based compensation plans contain provisions that accelerate vesting of awards upon change in control, retirement, disability or death of eligible employees and directors. Our share-based awards are considered vested when

the employee's retention of the award is no longer contingent on providing service, which for certain awards can result in immediate recognition for awards granted to retirement-eligible individuals or accelerated recognition for awards granted to individuals that will become retirement eligible within the stated vesting period. Also, if less than the stated vesting period, we recognize these costs over the period from the grant date to the date retirement eligibility is achieved. We report the benefits of tax deductions in excess of recognized compensation cost as a financing cash flow, thereby reducing net operating cash flows and increasing net financing cash flows.

Special Items

Our special items represent charges incurred or benefits realized that either we do not believe to be indicative of our core operations, or we believe are significant to our current operating results warranting separate classification; specifically, such items are considered to be one of the following:

- infrequent or unusual items,
- impairment or asset abandonment-related losses,
- restructuring charges and other atypical employee-related costs, or
- fees on termination of significant operating agreements and gains (losses) on disposal of investments.

The items classified as special items are not necessarily non-recurring, however, they are deemed to be incremental to income earned or costs incurred by the company in conducting normal operations, and therefore are presented separately from other components of operating income.

Equity Income in MillerCoors

Our equity income in MillerCoors represents our proportionate share for the period of the net income of our investment in MillerCoors accounted for under the equity method. This amount reflects adjustments to eliminate intercompany gains and losses, and to amortize, if appropriate, any difference between cost and underlying equity in net assets upon the formation of MillerCoors.

Interest Expense, net

Our interest costs are associated with borrowings to finance our operations. In addition to interest earned on our cash and cash equivalents across our business, interest income in the Europe segment is associated with trade loans receivable from customers, primarily in the U.K. As noted above, this includes a portion of beer revenue which is reclassified to interest income to reflect a market rate of interest on these loans. We capitalize interest cost as a part of the original cost of acquiring certain fixed assets if the cost of the capital expenditure and the expected time to complete the project are considered significant.

Other Income (Expense)

Our other income (expense) classification primarily includes gains and losses associated with activities not directly related to brewing and selling beer. For instance, aggregate unrealized and realized foreign exchange gains and losses resulting from remeasurement and settlement of foreign-denominated monetary assets and liabilities, as well as certain gains or losses on sales of non-operating assets are classified in this line item. These gains and losses are reported in the operating segment in which they occur; however, foreign exchange gains and losses on intercompany balances are reported within the Corporate segment. The initial recording of foreign-denominated transactions are classified based on the nature of the transaction, with the unrealized or realized foreign exchange gains or losses resulting from the subsequent remeasurement of the monetary asset or liability, and its ultimate settlement, classified in other income (expense).

Income Taxes

Deferred income taxes are provided for the temporary differences between the financial reporting basis and the tax basis of our assets, liabilities, and certain unrecognized gains and losses recorded in accumulated other comprehensive income (loss). Intraperiod tax allocation rules require that we allocate our provision for income taxes between continuing operations and other categories of earnings, such as discontinued operations and other comprehensive income (loss). The application of these rules indicated that no additional tax expense should be allocated outside of continuing operations for all years presented. We provide for taxes that may be payable if undistributed earnings of overseas subsidiaries were to be remitted to the U.S., except for those earnings that we consider to be permanently reinvested. Interest, penalties and offsetting positions related to unrecognized tax benefits are recognized as a component of income tax expense. Our deferred tax valuation allowances are primarily the result of uncertainties regarding the future realization of recorded tax benefits on tax loss carryforwards from operations in various jurisdictions. These valuation allowances are primarily related to deferred tax assets generated from net operating losses.

Other Comprehensive Income (Loss)

Other comprehensive income (loss) ("OCI") represents income and losses for the reporting period which are excluded from net income (loss) and recognized directly within accumulated other comprehensive income (loss) ("AOCI") as a component of equity. These amounts are expected to be reclassified out of AOCI in the future, at which point they

will be recognized within the consolidated statement of operations as a component of net income (loss). We recognize OCI related to the translation of assets and liabilities of our foreign subsidiaries which are denominated in currencies other than USD, unrealized gains and losses on the effective portion of our derivatives designated in cash flow and net investment hedging relationships, actuarial gains and losses and prior service costs related to our pension and other post-retirement benefit plans, as

83

well as our proportionate share of our equity method investments' OCI. Additionally, we do not have the expectation or intent to cash settle certain of our intercompany note receivable and note payable positions in the foreseeable future; therefore, the remeasurement of these obligations is recorded as a component of foreign currency translation adjustments within OCI.

Cash and Cash Equivalents

Cash consists of cash on hand and bank deposits. Cash equivalents represent highly liquid investments with original maturities of three months or less. Our cash deposits may be redeemed upon demand and are maintained with multiple, reputable financial institutions.

Supplementary cash flow includes non-cash issuances of share-based awards. We also have non-cash investing activities related to movements in our guarantee of indebtedness of certain equity method investments, as well as \$15.1 million related to the receipt of a note upon the sale of our U.K. malting facility. See Note 13, "Share-Based Payments", Note 4, "Investments" and Note 11, "Goodwill and Intangible Assets" for further discussion. There was no other non-cash activity in 2015, 2014 and 2013.

Accounts Receivable and Notes Receivable

We record accounts and notes receivable at net realizable value. This carrying value includes an appropriate allowance for estimated uncollectible amounts to reflect any loss anticipated on the accounts and notes receivable balances. We calculate this allowance based on our country-specific history of write-offs, level of past-due accounts based on the contractual terms of the receivables and our relationships with and the economic status of our customers, which may be impacted by current macroeconomic and regulatory factors specific to the country of origin.

In the U.K., loans are extended to a portion of the retail outlets that sell our brands. At December 31, 2015, and December 31, 2014, total loans outstanding, net of allowances, were \$25.7 million and \$28.4 million, respectively, and are classified as either current or non-current notes receivable in our consolidated balance sheets. An allowance for credit losses is maintained to provide for loan losses deemed to be probable related to specifically identified loans and for losses in the loan portfolio that have been incurred at the balance sheet date. We establish our allowance through a provision for loan losses charged against earnings and recorded in marketing, general and administrative expenses. Loan balances that are written off are recorded against the allowance as a write-off. Activity within the allowance is immaterial for fiscal years 2015, 2014 and 2013.

Inventories

Inventories are stated at the lower of cost or market. Cost is determined by the first-in, first-out ("FIFO") method. We regularly assess the shelf-life of our inventories and reserve for those inventories when it becomes apparent the product will not be sold within our freshness specifications. The allowance for obsolete finished goods and packaging materials was \$3.4 million and \$3.0 million at December 31, 2015, and December 31, 2014, respectively.

Maintenance and operating supplies

Maintenance and operating supplies include our inventories of spare parts, which are kept on hand for repairs and maintenance of machinery and equipment. The majority of spare parts within our business include motors, fillers and other components that are required to maintain a normal level of production in the event that expected maintenance and/or repairs are required. These parts are inventoried within current assets as they are reasonably expected to be used during the normal operating cycle of the business and are reserved for excess and obsolescence, as appropriate.

Properties

Properties are stated at original cost less accumulated depreciation. Depreciation is recorded using the straight-line method over the estimated useful lives of the assets, which are reviewed periodically and have the following ranges: buildings and improvements: 20-40 years; machinery and equipment: 3-25 years; furniture and fixtures: 3-10 years; returnable containers: 2-15 years; and software: 3-5 years. Land is not depreciated, and construction in progress is not depreciated until ready for service. Costs of enhancements or modifications that substantially extend the capacity or useful life of an asset are capitalized and depreciated accordingly. Ordinary repairs and maintenance are expensed as incurred. When property is retired or otherwise disposed of, the cost and accumulated depreciation are removed from our consolidated balance sheets and the resulting gain or loss, if any, is reflected in our consolidated statements of operations. Long-lived assets are evaluated for impairment whenever events or changes in circumstances indicate the carrying value of an asset (or asset group) may not be recoverable.

Returnable containers are recorded at acquisition cost and consist of returnable bottles, kegs, pallets and crates that are both in our direct control within our breweries, warehouses and distribution facilities and those that we indirectly control in the market through our agreements with our customers and other brewers and for which a deposit is received. The deposits

84

received on our returnable containers in the market are recorded as deposit liabilities, included as current liabilities within accounts payable and other current liabilities in the consolidated balance sheets. We estimate that the loss, breakage and deterioration of our returnable containers is comparable to the depreciation calculated on an estimated useful life of approximately 2 years for pallets, 4 years for bottles, 7 years for crates, and 15 years for returnable kegs. We also own and maintain other equipment in the market related to delivery of our products to end consumers, for example on-premise dispense equipment and refrigeration units. This equipment is recorded at acquisition cost and depreciated over lives of up to 7 years, depending on the market, reflecting the use of the equipment, as well as the loss and deterioration of the asset.

The costs of acquiring or developing internal-use computer software, including directly-related payroll costs for internal resources, are capitalized and classified within properties. Software maintenance and training costs are expensed in the period incurred.

Properties held under capital lease are depreciated using the straight-line method over the estimated useful life or the lease term, whichever is shorter, and the related depreciation is included in depreciation expense.

Goodwill and Other Intangible Assets

Goodwill is allocated to the reporting unit in which the business that created the goodwill resides. A reporting unit is an operating segment, or a business unit one level below that operating segment, for which discrete financial information is prepared and regularly reviewed by segment management. The operations in each of the specific regions within our Canada, Europe and MCI segments are considered components based on the availability of discrete financial information and the regular review by segment management. We have concluded that the components within the Canada and Europe segments each meet the criteria as having similar economic characteristics and therefore have aggregated these components into the Canada and Europe reporting units, respectively. Additionally, we determined that the components within our MCI segment do not meet the criteria for aggregation with the exception of the operations of our India businesses, which constitute a separate reporting unit. As required, we evaluate the carrying value of our goodwill and indefinite-lived intangible assets for impairment at the reporting unit level at least annually or when an interim triggering event occurs that would indicate that impairment may have taken place. Our annual test is performed as of the first day of our fiscal fourth quarter. We continuously monitor the performance of our other definite-lived intangible assets and evaluate for impairment when evidence exists that certain events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable. Significant judgments and assumptions are required in such impairment evaluations. Definite-lived intangible assets are stated at cost less accumulated amortization. Amortization is recorded using the straight-line method over the estimated lives of the assets as this approximates the pattern in which the assets economic benefits are consumed.

Equity Method Investments

We apply the equity method of accounting to 20% to 50% owned investments where we exercise significant influence or VIEs for which we are not the primary beneficiary. Equity method investments include our equity ownership in MillerCoors in the U.S., along with Brewers' Retail, Inc. ("BRI") and Brewers' Distributor Ltd. ("BDL") in Canada. The Molson Modelo Imports, L.P. ("MMI") joint venture was terminated effective February 2014. Additionally, in December 2013, we sold our interest in Tradeteam Ltd ("Tradeteam") (a transportation and logistics joint venture) to DHL, our previous joint venture partner. See Note 4, "Investments" for further discussion.

There are no related parties that own interests in our equity method investments as of December 31, 2015.

Derivative Hedging Instruments

We use derivatives as part of our normal business operations to manage our exposure to fluctuations in interest, foreign currency exchange, commodity, production and packaging material costs and for other strategic purposes related to our core business. We enter into derivatives for risk management purposes only, including derivatives designated in hedge accounting relationships as well as those derivatives utilized as economic hedges. We do not enter into derivatives for trading or speculative purposes. We recognize our derivatives on the consolidated balance sheets as assets or liabilities at fair value and are classified in either current or non-current assets or liabilities based on each contract's respective unrealized gain or loss position and each contract's respective maturity. Our policy is to present all derivative balances on a gross basis, without regard to counterparty master netting agreements or similar arrangements. Further, our current derivative agreements do not allow us to net positions with the same counterparty and therefore, we present our derivative positions gross in our consolidated balance sheets.

Changes in fair values (to the extent of hedge effectiveness) of outstanding cash flow and net investment hedges are recorded in OCI, until earnings are affected by the variability of cash flows of the underlying hedged item or the sale of the underlying net investment, respectively. Effective cash flow hedges offset the gains or losses recognized on the underlying exposure in the consolidated statements of operations, or for net investment hedges, the foreign exchange translation gain or

85

loss recognized in AOCI. Changes in fair value of outstanding fair value hedges and the offsetting changes in fair value of the hedged item are recognized in earnings. Any ineffectiveness is recorded directly into earnings.

We record realized gains and losses from derivative instruments in the same financial statement line item as the hedged item/forecasted transaction. Changes in unrealized gains and losses for derivatives not designated in a hedge accounting relationship are recorded directly in earnings each period and are also recorded in the same financial statement line item as the hedged item/forecasted transaction. Cash flows from the settlement of derivatives, including both economic hedges and those designated in hedge accounting relationships, appear in the consolidated statements of cash flows in the same categories as the cash flows of the hedged item.

In accordance with authoritative accounting guidance, we do not record the fair value of derivatives for which we have elected the Normal Purchase Normal Sale ("NPNS") exemption. We account for these contracts on an accrual basis, recording realized settlements related to these contracts in the same financial statement line items as the corresponding transaction.

Pension and Postretirement Benefits

We maintain retirement plans for the majority of our employees. We offer different types of plans within each segment, including defined benefit plans, defined contribution plans and other postretirement benefit plans ("OPEB"). Each plan is managed locally and in accordance with respective local laws and regulations. Our equity investments, MillerCoors, BRI and BDL maintain defined benefit, defined contribution and postretirement benefit plans as well. We recognize the underfunded or overfunded status of a defined benefit postretirement plan as an asset or liability in the consolidated balance sheets and recognize changes in the funded status in the year in which the changes occur within OCI. The funded status of a plan, measured as the difference between the fair value of plan assets and the projected benefit obligation, and the related net periodic pension cost are calculated using a number of significant actuarial assumptions. Changes in net periodic pension cost and funding status may occur in the future due to changes in these assumptions.

Projected benefit obligation is the actuarial present value as of the measurement date of all benefits attributed by the plan benefit formula to employee service rendered before the measurement date using assumptions as to future compensation levels if the plan benefit formula is based on those future compensation levels. Accumulated benefit obligation is the actuarial present value of benefits (whether vested or unvested) attributed by the plan benefit formula to employee service rendered before the measurement date and based on employee service and compensation, if applicable, prior to that date. Accumulated benefit obligation differs from projected benefit obligation in that it includes no assumption about future compensation levels and years of service.

We employ the corridor approach for determining each plan's potential amortization from AOCI of deferred gains and losses, which occur when actual experience differs from estimates, into our net periodic pension and postretirement benefit cost. This approach defines the "corridor" as the greater of 10% of the projected benefit obligation or 10% of the market-related value of plan assets and requires amortization of the excess net gain or loss that exceeds the corridor over the average remaining service periods of active plan participants. As our U.K. plan is closed to new entrants and the future accrual of benefits, the average remaining life expectancy of all plan participants (including retirees) is used.

Fair Value Measurements

The carrying amounts of our cash and cash equivalents, accounts receivable, accounts payable and other current liabilities approximate fair value as recorded due to the short-term nature of these instruments. In addition, the carrying amounts of our trade loan receivables, net of allowances, approximate fair value. The fair value of derivatives is estimated by discounting the estimated future cash flows utilizing observable market interest, foreign exchange and commodity rates adjusted for non-performance credit risk associated with our counterparties (assets) or with MCBC (liabilities). See Note 16, "Derivative Instruments and Hedging Activities" for additional information. Based on current market rates for similar instruments, the fair value of long-term debt is presented in Note 12, "Debt".

U.S. GAAP guidance for fair value includes a hierarchy that prioritizes fair value measurements based on the types of inputs used for the various valuation techniques (market approach, income approach and cost approach). Our financial assets and liabilities are measured using inputs from the three levels of the fair value hierarchy.

The three levels of the hierarchy are as follows:

Level 1—Inputs are unadjusted quoted prices in active markets for identical assets or liabilities that we have the ability to access at the measurement date.

Level 2—Inputs include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are less active, inputs other than quoted prices that are observable for the asset or

liability (i.e., interest rates, yield curves, etc.), and inputs that are derived principally from, or corroborated by, observable market data by correlation or other means (market corroborated inputs).

Level 3—Unobservable inputs that reflect the assumptions that we believe market participants would use in pricing the asset or liability. We develop these inputs based on the best information available, including our own data.

Foreign Currency

Assets and liabilities recorded in foreign currencies that are the functional currencies for the respective operations are translated at the prevailing exchange rate at the balance sheet date. Translation adjustments resulting from this process are reported as a separate component of OCI. Gains and losses from foreign currency transactions are included in earnings for the period. Revenue and expenses are translated at the average exchange rates during the period. Our primary operating currencies, other than USD, include the Canadian Dollar ("CAD"), the British Pound ("GBP"), and our Central European operating currencies such as the Euro ("EUR"), Czech Koruna ("CZK"), Croatian Kuna ("HRK") and Serbian Dinar ("RSD").

2. New Accounting Pronouncements

Adoption of New Accounting Pronouncements

Deferred Tax Assets and Liabilities

In November 2015, the Financial Accounting Standards Board ("FASB") issued authoritative guidance simplifying the presentation of deferred taxes by requiring all deferred tax assets and liabilities to be classified as non-current on the balance sheet. We have early adopted this guidance on a prospective basis, effective December 31, 2015. Adoption of this guidance resulted in the reclassification of our current deferred tax assets and liabilities to non-current in our consolidated balance sheet as of December 31, 2015. No prior periods were retrospectively adjusted. See Note 6, "Income Tax" for further information related to the early adoption of this guidance.

Net Asset Value Practical Expedient

In May 2015, the FASB issued an amendment to the fair value measurement guidance that applies to reporting entities that elect to measure the fair value of an investment using the net asset value ("NAV") per share (or its equivalent) practical expedient. Under the new guidance, investments for which fair value is measured, or are eligible to be measured, using the NAV per share practical expedient are excluded from the fair value hierarchy. The amendment also removes certain disclosure requirements for these investments. We have early adopted this guidance on a retrospective basis effective for our year ended December 31, 2015. The adoption of this guidance resulted in revisions to the presentation of the fair value hierarchy within Note 15, "Employee Retirement Plans and Postretirement Benefits". The adoption of this guidance did not impact our financial position or results of operations. See Note 15, "Employee Retirement Plans and Postretirement Benefits" for further information related to the early adoption of this guidance.

Debt Issuance Costs

In April 2015, the FASB issued authoritative guidance intended to simplify the presentation of debt issuance costs. These amendments require that debt issuance costs be presented as a direct deduction from the carrying amount of the related debt liabilities, consistent with the presentation of debt discounts. This results in the elimination of debt issuance costs as an asset and reduces the carrying value of our debt liabilities. As this guidance did not specifically address the presentation or subsequent measurement of debt issuance costs related to line-of-credit arrangements, the FASB issued an announcement in August 2015, stating that they would not object to an entity deferring and presenting debt issuance costs related to line-of-credit arrangements as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. We early adopted this guidance effective for our quarter ended September 30, 2015, and have elected to continue to present our debt issuance costs associated with our line-of-credit arrangements as assets. The adoption of this guidance had an immaterial impact on our financial position and has resulted in the following retrospective adjustments to our consolidated balance sheet:

	December 31, 2014	
	As Reported	As Adjusted
	(In millions)	
Other current assets	\$79.2	\$77.4
Other assets	\$203.6	\$189.2
Current portion of long-term debt and short-term borrowings	\$849.4	\$849.0
Long-term debt	\$2,337.1	\$2,321.3

New Accounting Pronouncements Not Yet Adopted

Business Combinations

In September 2015, the FASB issued authoritative guidance related to business combinations, which is intended to simplify the accounting for measurement-period adjustments. The new standard eliminates the requirement to retrospectively account for changes to provisional amounts initially recorded in a business combination. Under the new guidance, an acquirer will be required to recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. This guidance is effective for fiscal years beginning after December 15, 2015, including interim periods within those fiscal years. We do not expect the adoption of this guidance to have a material impact on our financial position or results of operations.

Inventory Measurement

In July 2015, FASB issued authoritative guidance intended to simplify the measurement of inventory. The amendment requires entities to measure in-scope inventory at the lower of cost and net realizable value, and replaces the current requirement to measure in-scope inventory at the lower of cost or market, which considers replacement cost, net realizable value, and net realizable value less an approximate normal profit margin. This guidance is effective for annual reporting periods, and interim periods within those annual periods, beginning after December 15, 2016. The amendment should be applied prospectively with early adoption permitted. We are currently evaluating the potential impact on our financial position and results of operations upon adoption of this guidance, but anticipate that such impact would be minimal.

Revenue Recognition

In May 2014, the FASB issued authoritative guidance related to new accounting requirements for the recognition of revenue from contracts with customers. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled to in exchange for the goods or services. In August 2015, the FASB affirmed its proposal to defer the effective date of the new revenue recognition standard for all entities by one year. As a result, the requirements of the new standard are effective for annual reporting periods beginning after December 15, 2017, and interim periods within those annual periods. In conjunction with the deferral, the FASB will permit all entities to apply the new revenue recognition standard early, but not before the original effective date. The use of either a full retrospective or cumulative effect transition method is permitted. We have not yet selected a transition method and are currently evaluating the potential impact on our financial position and results of operations upon adoption of this guidance.

Other than the items noted above, there have been no new accounting pronouncements not yet effective or adopted in the current year that we believe have a significant impact, or potential significant impact, to our consolidated financial statements.

88

3. Segment Reporting

Our reporting segments are based on the key geographic regions in which we operate, which are the basis on which our chief operating decision maker evaluates the performance of the business.

Reporting Segments

Canada

The Canada segment consists of our production, marketing and sales of our brands, including core brands Coors Light and the Molson brand family, as well as Carling, Coors Banquet, Rickard's and other owned and licensed brands in Canada. The Canada segment also includes BRI, our joint venture arrangement related to the distribution and retail sale of beer in Ontario, and BDL, our joint venture arrangement related to the distribution of beer in the western provinces. Both BRI and BDL are accounted for as equity method investments. Also included in the Canada segment historically was MMI, our joint venture with Grupo Modelo S.A.B. de C.V. ("Modelo"), established to import, distribute, and market the Modelo beer brand portfolio across all Canadian provinces and territories. MMI was accounted for under the equity method. In November 2013, subsequent to Anheuser-Busch InBev's ("ABI") acquisition of Modelo, ABI and MCBC entered into an agreement providing for the accelerated termination of the MMI joint venture, effective February 2014. See Note 4, "Investments" for further discussion.

We have an agreement with Heineken N.V. ("Heineken") that grants us the right to import, market, distribute and sell Heineken products. Additionally, we had an agreement with SABMiller plc ("SABMiller") that granted us the right to brew or import, market, distribute and sell several SABMiller brands. In 2014, Miller Brewing Company ("Miller"), a wholly owned subsidiary of SABMiller, and MCBC entered into an agreement providing for the accelerated termination of the Miller license agreement, effective March 2015, under which we had exclusive rights to distribute certain Miller brands in Canada. As a result, beginning in the second quarter of 2015, we no longer distribute the Miller brands in Canada. We also contract brew and package certain Labatt and Asahi brands for the U.S. market.

United States (U.S.)

The U.S. segment consists of our interest, and results from our interest, in MillerCoors, our joint venture with SABMiller for all U.S. operations. MillerCoors produces, markets, and sells beer brands in the U.S. and Puerto Rico. MillerCoors' core brands sold in the U.S. include Coors Light and Miller Lite, as well as Blue Moon, Coors Banquet, Keystone Light, Leinenkugel's, Miller Genuine Draft and Miller High Life. Our interest in MillerCoors is accounted for under the equity method of accounting. See Note 4, "Investments" for further discussion.

Europe

The Europe segment consists of our production, marketing and sales of our brands, including major core brands Carling and Staropramen, as well as Apatinsko, Astika, Bergenbier, Blue Moon, Borsodi, Branik, Coors Light, Jelen, Kamenitza, Niksicko, Noroc, Ostravar, Ozujsko, Sharp's Doom Bar and Worthington's, as well as a number of smaller regional ale brands in the U.K., Republic of Ireland and Central Europe. Our European business has licensing agreements with various other brewers through which it also brews or distributes Beck's, Belle-Vue Kriek brands, Hoegaarden, Leffe, Lowenbrau, Löwenweisse, Spaten and Stella Artois in certain Central European countries. Our contract for the distribution of the Modelo brands in the U.K. expired as of December 31, 2014, however, beginning in January 2015, we acquired the rights to distribute Corona Extra other Modelo brands throughout the Central European countries in which we operate. In the third quarter of 2015, we purchased the Rekorderlig cider brand distribution rights in the U.K. and Republic of Ireland. In the U.K., we also sell the Cobra brands through the Cobra Beer Partnership Ltd. joint venture and the Grolsch brands through a joint venture with Royal Grolsch N.V., and are the exclusive distributor for several brands including Singha. Additionally, in order to be able to provide a full line of beer and other beverages to our U.K. on-premise customers, we sell "factored" brands, which are third-party beverage brands for which we provide distribution to retail, typically on a non-exclusive basis. We have distribution agreements with Tradeteam (a subsidiary of DHL) for the distribution of our products in the U.K. through 2023. In June 2015, we terminated our agreement with Carlsberg whereby it held the exclusive distribution rights for the Staropramen brand in the U.K. As a result of this termination, we agreed to pay Carlsberg an early termination payment of GBP 19.0 million (\$29.4 million at payment date). The transition period concluded on December 27, 2015, at which time we have the exclusive distribution rights of the Staropramen brand in the U.K. Separately, in December 2013, we entered into an agreement with Heineken to early terminate our contract brewing and kegging agreement with Heineken under which we produced and packaged the Foster's and Kronenbourg brands in the U.K. As a result of the termination,

Heineken agreed to pay us an aggregate early termination payment of GBP 13.0 million, of which we received GBP 5.0 million in 2014 and the remaining GBP 8.0 million on April 30, 2015. The full amount of the termination payment (\$19.4 million upon recognition) is included as income within special items during the year ended December 31, 2015.

Molson Coors International (MCI)

The objective of MCI is to grow and expand our business and brand portfolio in new and existing markets, including emerging markets, outside the U.S., Canada, and Europe segments. The focus of MCI includes Latin America (including Mexico, Central America, the Caribbean and South America, excluding Puerto Rico, as it is part of the U.S. segment), Asia, Europe (excluding U.K, Ireland and Central Europe, as they are a part of the Europe segment), and Australia.

MCI is comprised of our standalone businesses, our export business, and our license business. Our standalone businesses include India, which includes both our joint venture with majority share and operational control of Molson Coors Cobra India as well as Mount Shivalik Breweries, Ltd, ("Mount Shivalik") which we acquired in the second quarter of 2015, along with our businesses in Japan and China. During the second quarter of 2015, we announced our decision to substantially restructure our China business, which we have now moved to a distribution model. Our export business expands the reach of our international brands into Latin America and Western Europe. Our license business builds long term licensing partnerships with leading global brewers to market and grow our international brands in markets which typically have a greater barrier to entry, such as Mexico, Ukraine, Russia, Spain and Australia.

The brands we sell include Blue Moon, Carling, Cobra, Coors Light, Corona, Molson Canadian and Staropramen, as well as brands unique to our international markets including Coors, Coors 1873, Coors Extra, Coors Gold, Iceberg 9000, King Cobra, Royal Brew, Thunderbolt and Zima.

Corporate

Corporate is not a segment and includes interest and certain other general and administrative costs that are not allocated to any of the operating segments. The majority of these corporate costs relate to worldwide administrative functions, such as corporate affairs, legal, human resources, finance and accounting, treasury, tax, internal audit, insurance and risk management. Additionally, the results of our water resources and energy operations in the state of Colorado are included in Corporate.

Summarized Financial Information

No single customer accounted for more than 10% of our consolidated sales in 2015, 2014 or 2013. Net sales represent sales to third-party external customers. Inter-segment transactions impacting sales revenues and income (loss) from continuing operations before income taxes are insignificant (other than those with MillerCoors, see Note 4, "Investments" for additional details) and eliminated in consolidation.

The following tables represent consolidated net sales, interest expense, interest income, and reconciliations of amount shown as income (loss) from continuing operations before income taxes to income (loss) from continuing operations attributable to MCBC:

	Year ended December 31, 2015						
	Canada	U.S.	Europe	MCI	Corporate	Eliminations	Consolidated
	(In millions)						
Net sales	\$1,511.5	\$—	\$1,914.9	\$144.5	\$1.0	\$(4.4)	\$3,567.5
Interest expense	—	—	—	—	(120.3)	—	(120.3)
Interest income	—	—	3.9	—	4.4	—	8.3
Income (loss) from continuing operations before income taxes	\$277.3	\$516.3	\$(109.7)	\$(24.8)	\$(248.4)	\$—	\$410.7
Income tax benefit (expense)							(51.8)
Net income (loss) from continuing operations							358.9
Net (income) loss attributable to noncontrolling interests							(3.3)
Net income (loss) from continuing operations attributable to MCBC							\$355.6

Eliminations reflect inter-segment sales from the Europe segment to the MCI segment. Income (loss) from continuing operations before income taxes includes the impact of special items. Refer to Note 7, "Special Items" for further

discussion.

90

Edgar Filing: MOLSON COORS BREWING CO - Form 10-K

	Year ended December 31, 2014						Consolidated
	Canada	U.S.	Europe	MCI	Corporate	Eliminations	
	(In millions)						
Net sales	\$1,793.9	\$—	\$2,200.3	\$156.3	\$1.1	\$(5.3)	\$4,146.3

Income tax benefit (expense)							(84.0)
Net income (loss) from continuing operations							570.5
Net (income) loss attributable to noncontrolling interests							(5.2)
Net income (loss) from continuing operations attributable to MCBC							\$565.3

Eliminations reflect inter-segment sales from the Europe segment to the MCI segment. Income (loss) from continuing operations before income taxes includes the impact of special items. Refer to Note 7, "Special Items" for further discussion.

The following table presents total assets by segment:

	As of December 31, 2015	December 31, 2014 ⁽¹⁾
	(In millions)	
Canada	\$4,560.6	\$5,537.2
U.S.	2,441.0	2,388.6

Edgar Filing: MOLSON COORS BREWING CO - Form 10-K

Europe	4,807.5	5,773.3
MCI	133.7	75.2
Corporate	333.5	205.8
Consolidated total assets	\$12,276.3	\$13,980.1

Amounts have been adjusted to reflect the adoption of the authoritative guidance requiring debt issuance costs to (1) be presented as a direct reduction from the carrying value of the related debt. See Note 2, "New Accounting Pronouncements" for further discussion.

91

The following table presents select cash flow information by segment:

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
		(In millions)	
Depreciation and amortization ⁽¹⁾ :			
Canada	\$117.3	\$117.6	\$122.8
Europe	186.5	184.1	185.0
MCI	3.9	2.7	2.9
Corporate	6.7	8.6	9.8
Consolidated depreciation and amortization	\$314.4	\$313.0	\$320.5
Capital expenditures:			
Canada	\$77.3	\$77.8	\$75.7
Europe	173.7	168.6	204.6
MCI	10.0	0.9	1.6
Corporate	14.0	12.2	12.0
Consolidated capital expenditures	\$275.0	\$259.5	\$293.9

(1) Depreciation and amortization amounts do not reflect amortization of bond discounts, fees, or other debt-related items.

The following table presents net sales by geography, based on the location of the customer:

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
		(In millions)	
Net sales to unaffiliated customers:			
Canada	\$1,421.1	\$1,699.9	\$1,839.8
United States and its territories	94.1	98.1	105.2
United Kingdom	1,224.6	1,391.5	1,261.6
Other foreign countries ⁽¹⁾	827.7	956.8	999.5
Consolidated net sales	\$3,567.5	\$4,146.3	\$4,206.1

Reflects net sales from the individual countries within our Central European operations (included in our Europe (1) segment), as well as our MCI segment, for which no individual country has total net sales exceeding 10% of the total consolidated net sales.

The following table presents net properties by geographic location:

	As of	
	December 31, 2015	December 31, 2014
		(In millions)
Net properties:		
Canada	\$598.1	\$736.1
United States and its territories	28.4	35.2
United Kingdom	422.5	465.7
Other foreign countries ⁽¹⁾	541.8	561.0
Consolidated net properties	\$1,590.8	\$1,798.0

Reflects net properties within the individual countries included in our Central European operations (included in our (1) Europe segment), as well as our MCI segment, for which no individual country has total net properties exceeding 10% of the total consolidated net properties.

4. Investments

Our investments include both equity method and consolidated investments. Those entities identified as VIEs have been evaluated to determine whether we are the primary beneficiary. The VIEs included under "Consolidated VIEs" below are those for which we have concluded that we are the primary beneficiary and accordingly, consolidate these entities. None of our consolidated VIEs held debt as of December 31, 2015, or December 31, 2014. With the exception of the BRI debt guarantee further discussed below under "Other Equity Investments", we have not provided any financial support to any of our VIEs during 2015 that we were not previously contractually obligated to provide. Amounts due to and due from our equity method investments are recorded as affiliate accounts payable and affiliate accounts receivable. See below under "Affiliate Transactions" for further details.

Authoritative guidance related to the consolidation of VIEs requires that we continually reassess whether we are the primary beneficiary of VIEs in which we have an interest. As such, the conclusion regarding the primary beneficiary status is subject to change and we continually evaluate circumstances that could require consolidation or deconsolidation. As of December 31, 2015, and December 31, 2014, our consolidated VIEs are Cobra Beer Partnership, Ltd. ("Cobra U.K.") and Grolsch U.K. Ltd ("Grolsch"). Our unconsolidated VIEs are BRI and BDL. The MMI operations were terminated in the first quarter of 2014 and the joint venture was subsequently dissolved in the third quarter of 2014. See further discussion below.

Equity Investments

Investment in MillerCoors

MillerCoors has a Board of Directors consisting of five MCBC appointed and five SABMiller appointed directors. The percentage interests in the profits of MillerCoors are 58% for SABMiller and 42% for MCBC, and voting interests are shared 50% - 50%. Both parties to the MillerCoors joint venture are currently able to transfer their economic and voting interest, however, certain rights of first refusal will apply to any assignment of such interests. Our interest in MillerCoors is accounted for under the equity method of accounting. Accordingly, we consider MillerCoors an affiliate. See "Affiliate Transactions" section below summarizing our transactions and balances with affiliates, including MillerCoors.

As discussed in Note 21, "Pending Acquisition", on November 11, 2015, we entered into a purchase agreement to acquire all of SABMiller's 58% economic interest and 50% voting interest in MillerCoors and all trademarks, contracts and other assets primarily related to the Miller brand portfolio outside of the U.S. and Puerto Rico. Following the closing of the pending Acquisition, the Company will own 100% of the outstanding equity and voting interests of MillerCoors. See further details regarding the pending Acquisition in Note 21, "Pending Acquisition".

Summarized financial information for MillerCoors is as follows:

Condensed Balance Sheets

	As of December 31, 2015 (In millions)	December 31, 2014
Current assets	\$800.5	\$795.3
Non-current assets	9,099.5	9,047.4
Total assets	\$9,900.0	\$9,842.7
Current liabilities	\$1,180.1	\$1,061.3
Non-current liabilities	1,407.0	1,578.8
Total liabilities	2,587.1	2,640.1
Noncontrolling interests	20.1	23.5
Owners' equity	7,292.8	7,179.1
Total liabilities and equity	\$9,900.0	\$9,842.7

The following represents our proportionate share in MillerCoors' equity and reconciliation to our investment in MillerCoors:

	As of December 31, 2015 (In millions, except percentages)	December 31, 2014		
MillerCoors owners' equity	\$7,292.8	\$7,179.1		
MCBC economic interest	42	% 42	%	%
MCBC proportionate share in MillerCoors' equity	3,063.0	3,015.2		
Difference between MCBC contributed cost basis and proportionate share of the underlying equity in net assets of MillerCoors ⁽¹⁾	(657.0) (661.6))
Accounting policy elections	35.0	35.0		
Investment in MillerCoors	\$2,441.0	\$2,388.6		

Our net investment in MillerCoors is based on the carrying values of the net assets contributed to the joint venture which is less than our proportionate share of underlying equity (42%) of MillerCoors (contributed by both Coors (1)Brewing Company ("CBC") and Miller). This basis difference, with the exception of certain non-amortizing items (goodwill, land, etc.), is being amortized as additional equity income over the remaining useful lives of the contributed long-lived amortizing assets.

Results of Operations

	For the years ended		
	December 31, 2015 (In millions)	December 31, 2014	December 31, 2013
Net sales	\$7,725.5	\$7,848.4	\$7,800.8
Cost of goods sold	(4,547.5) (4,743.8) (4,723.7
Gross profit	\$3,178.0	\$3,104.6	\$3,077.1
Operating income ⁽¹⁾	\$1,239.2	\$1,347.3	\$1,287.4
Net income attributable to MillerCoors ⁽¹⁾	\$1,217.8	\$1,326.2	\$1,270.5

Results for 2015 include special charges related to the planned closure of the Eden, North Carolina, brewery, including \$61.3 million of accelerated depreciation in excess of normal depreciation associated with the brewery, and \$6.4 million of severance and other charges. MillerCoors also recorded special charges in 2015 of \$42.4 million related to an early settlement of a portion of its defined benefit pension plan liability. Results for 2014 include special charges related to restructuring activities of \$1.4 million. Results for 2013 include special charges related to restructuring activities and asset write-offs of \$17.2 million and \$2.6 million, respectively.

The following represents our proportionate share in net income attributable to MillerCoors reported under the equity method:

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
	(In millions, except percentages)		
Net income attributable to MillerCoors	\$1,217.8	\$1,326.2	\$1,270.5
MCBC economic interest	42	% 42	% 42
MCBC proportionate share of MillerCoors net income	511.5	557.0	533.6
Amortization of the difference between MCBC contributed cost basis and proportionate share of the underlying equity in net assets of MillerCoors	4.6	4.6	4.6
Share-based compensation adjustment ⁽¹⁾	0.2	0.2	0.8
Equity income in MillerCoors	\$516.3	\$561.8	\$539.0

The net adjustment is to eliminate all share-based compensation impacts related to pre-existing SABMiller plc equity awards held by former Miller employees employed by MillerCoors as well as to add back all share-based compensation impacts related to pre-existing MCBC equity awards held by former MCBC employees that have transferred to MillerCoors.

We assigned the United States and Puerto Rican rights to the legacy Coors brands, including Coors Light, Coors Banquet, Keystone Light and the Blue Moon brands, to MillerCoors. We retained all ownership rights of these brands outside of the United States and Puerto Rico. In addition, we retained numerous water rights in Colorado. We lease these water rights to MillerCoors at no cost for use at its Golden, Colorado brewery.

There were no undistributed earnings in MillerCoors as of December 31, 2015, or December 31, 2014.

Other Equity Investments

Brewers' Retail Inc.

BRI, a VIE, is a beer distribution and retail network for the Ontario region of Canada, with majority of the ownership residing with MCC, Labatt Breweries of Canada LP (a subsidiary of ABI) and Sleeman Breweries Ltd. (a subsidiary of Sapporo International). BRI charges its owners administrative fees that are designed so the entity operates on a break-even basis. This administrative fee is based on costs incurred, net of other revenues earned, and is allocated in accordance with the operating agreement to its owners based on volume of products. Contractual provisions cause participation in governance and other interests to fluctuate based on this calculated market share requiring frequent primary beneficiary evaluations. However, based on the existing structure, control is shared, and remains shared through such changes, and therefore we do not anticipate becoming the primary beneficiary in the foreseeable future. We consider BRI an affiliate. See "Affiliate Transactions" section below summarizing our transactions and balances with affiliates, including BRI.

In 2015, we, along with the other owners of BRI and the Province of Ontario, agreed to revise the ownership structure of BRI. The new BRI shareholder agreement ("New Shareholder Agreement") incorporating these changes, as further discussed below, became effective at the beginning of 2016. The New Shareholder Agreement adjusted the existing BRI ownership structure to allow all other small and large Ontario based brewers the ability to participate in the ownership of BRI. As part of this change, the board of directors of BRI has been expanded to include representation for these new ownership groups, as well as independent director representation. The new owners are subject to the same fee structure as the current owners, with the exception of smaller brewers, who have discounted fees, as they are not required to fund certain costs associated with pension obligations. BRI will continue to operate on a break-even basis under the new ownership structure. BRI also converted all existing capital stock into a new share class, as well as created a separate new share class to facilitate new and existing brewer participation and governance. While governance and board of director participation continues to have the ability to fluctuate based on market share relative to the other owners, our equity interest has become fixed under the New Shareholder Agreement. We have evaluated these changes from a primary beneficiary perspective and concluded that we will continue to account for BRI as an equity method investment as control of BRI continues to be shared under the New Shareholder Agreement.

During the second quarter of 2015, BRI entered into a Canadian Dollar ("CAD") 150.0 million revolving credit facility with Canadian Imperial Bank of Commerce ("CIBC"), maturing one year after issuance, with one year renewal options subject to approval by CIBC. In conjunction with the issuance of the revolving credit facility, we, along with two additional shareholders of BRI, were each required to guarantee BRI's obligations under the facility, with our proportionate share of the guarantee totaling 45.9%. As a result of this guarantee, we have a current liability of \$16.9 million as of December 31, 2015.

The carrying value of the guarantee equals its fair value, which considers an adjustment for our own non-performance risk and is considered a level 2 measurement. The offset to the guarantee liability was recorded as an adjustment to our equity method investment balance. The guarantee liability was calculated based on our proportionate, 45.9% share of BRI's total revolving credit facility outstanding balance at December 31, 2015. The resulting change in equity investment balance during the year due to movements in the guarantee represents a non-cash investing activity. We have an obligation to proportionately fund BRI's operations. As a result of this obligation, we continue to record our proportional share of BRI's net income or loss and OCI activity, including when we have a negative equity method balance. As of December 31, 2015, we had a positive equity method investment balance of \$7.3 million and as of December 31, 2014, we had a negative equity method balance of \$21.7 million. The increase to our net investment balance was primarily driven by a decrease to BRI's employee retirement plan obligations (resulting from the annual actuarial valuation) favorably impacting the net assets of BRI, as well as our guarantee of the BRI revolving credit facility discussed above. See "Affiliate Transactions" below for BRI affiliate transactions including administrative fees charged to Molson Coors under the agreement with BRI which are recorded in cost of goods sold, as well as for BRI affiliate due to and due from balances as of December 31, 2015, and December 31, 2014, respectively, related to trade receivables and payables for sales to external customers and costs incurred by BRI offset by administrative fees charged and paid by MCBC (which may be in a payable or receivable position depending on the amount under or over charged).

Brewers' Distributor Ltd.

BDL, a VIE, is a distribution operation owned by MCC and Labatt Breweries of Canada LP (a subsidiary of ABI) that, pursuant to an operating agreement, acts as an agent for the distribution of their products in the western provinces of Canada. The two owners share 50% - 50% voting control of this business. We consider BDL an affiliate. See "Affiliate Transactions" section below summarizing our transactions and balances with affiliates, including BDL. BDL charges the owners administrative fees that are designed so the entity operates at break-even profit levels. This administrative fee is based on costs incurred, net of other revenues earned, and is allocated in accordance with the operating agreement to the owners based on volume of products. No other parties are allowed to sell beer through BDL, which does not take legal title to the beer distributed for the owners. As of December 31, 2015, and December 31, 2014, our investment in BDL was \$15.7 million and \$13.7 million, respectively. The increase in our investment was primarily related to a decrease in BDL's employee retirement plan obligation (resulting from the annual actuarial valuation) favorably impacting the net assets of BDL. See "Affiliate Transactions" section below for BDL affiliate transactions including administrative fees charged to Molson Coors under the agreement with BDL which are recorded in cost of goods sold, as well as for BDL affiliate due to and due from balances as of December 31, 2015, and December 31, 2014, respectively, related to trade receivables and payables for sales to external customers and costs incurred by BDL offset by administrative fees charged and paid by MCBC (which may be in a payable or receivable position depending on the amount under or over charged).

Our other equity method investments are not considered significant for disclosure of financial information on either an individual or aggregated basis and there were no significant undistributed earnings as of December 31, 2015, or December 31, 2014, for any of these companies.

Affiliate Transactions

All transactions with our equity method investments are considered related party transactions and recorded within our affiliate accounts. The following table summarizes transactions with affiliates:

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
	(In millions)		
Beer sales to MillerCoors	\$11.7	\$13.1	\$16.6
Beer purchases from MillerCoors	\$43.2	\$37.3	\$19.2
Service agreement costs and other charges to MillerCoors	\$2.6	\$2.4	\$2.5
Service agreement costs and other charges from MillerCoors	\$0.9	\$1.0	\$1.1
Administrative fees, net charged from BRI	\$88.8	\$103.4	\$118.1
Administrative fees, net charged from BDL	\$36.4	\$50.8	\$59.6

Amounts due to and due from affiliates as of December 31, 2015, and December 31, 2014, respectively, are as follows:

	Amounts due from affiliates		Amounts due to affiliates	
	December 31, 2015	December 31, 2014	December 31, 2015	December 31, 2014
	(In millions)			
MillerCoors	\$1.6	\$3.2	\$9.2	\$11.5
BRI	4.5	28.0	—	0.4
BDL	10.1	6.4	—	8.6
Other	0.6	1.2	1.4	0.9
Total	\$16.8	\$38.8	\$10.6	\$21.4

Consolidated VIEs

Grolsch

Grolsch is a joint venture between us and Royal Grolsch N.V. (a member of the SABMiller group) in which we hold a 49% interest. The Grolsch joint venture markets Grolsch brands in the U.K. and Republic of Ireland. The majority of the Grolsch brands are produced by us under a contract brewing arrangement with the joint venture. MCBC and Royal Grolsch N.V. sell beer to the joint venture, which sells the beer back to MCBC (for onward sale to customers) for a price equal to what it paid, plus a marketing and overhead charge and a profit margin. Grolsch is a taxable entity in Europe. Accordingly, income tax expense in our consolidated statements of operations includes taxes related to the entire income of the joint venture. We consolidate the results and financial position of Grolsch and it is reported within our Europe operating segment.

Cobra Beer Partnership, Ltd

We hold a 50.1% interest in Cobra U.K., which owns the worldwide rights to the Cobra beer brand (with the exception of the Indian sub-continent, owned by Cobra India). The noncontrolling interest is held by the founder of the Cobra beer brand. We consolidate the results and financial position of Cobra U.K., and it is reported within our Europe operating segment.

The following summarizes the assets and liabilities of our consolidated VIEs (including noncontrolling interests):

	As of December 31, 2015		December 31, 2014	
	Total Assets (In millions)	Total Liabilities	Total Assets	Total Liabilities
Grolsch	\$6.9	\$3.3	\$6.8	\$2.9
Cobra U.K.	\$30.2	\$0.9	\$31.0	\$0.8

Termination and Sale of Investments

Modelo Molson Imports, L.P.

On February 28, 2014, ABI and MCBC finalized the accelerated termination of MMI, a 50% - 50% joint venture with Grupo Modelo S.A.B. de C.V. ("Modelo"), which provided for the import, distribution, and marketing of the Modelo beer brand portfolio across all Canadian provinces and territories. The joint venture was accounted for under the equity method of accounting.

Following the successful completion of the transition in the first quarter of 2014, we recognized income of \$63.2 million (CAD 70.0 million) within special items, reflective of the agreed upon payment received from Modelo. Additionally, in the first quarter of 2014, we recorded a charge of \$4.9 million representing the accelerated amortization of the remaining carrying value of our definite-lived intangible asset associated with the agreement. In accordance with the termination agreement, MMI continued to operate in its historical capacity through the end of the transition period. Effective end of day on February 28, 2014, MMI ceased all operations and was dissolved during the third quarter of 2014 upon final agreement with ABI on the distribution amount of the joint venture's remaining net assets. Our results for 2014, reflect our proportionate ownership interest of the MMI activity during the first quarter of 2014 through end of day February 28, 2014. Under the MMI arrangement, we recognized equity earnings within cost of goods sold of \$0.7 million and \$11.7 million during 2014 and 2013, respectively. In addition, during 2014 and 2013, MCC recognized marketing and administrative cost recoveries related to the promotion, sale and distribution of Modelo products under our agency and services agreement with MMI of \$1.1 million and \$11.3 million, respectively. These cost recoveries are recorded within marketing, general and administrative expenses.

In accordance with the early termination agreement, the book value of the joint venture's net assets was required to be distributed to the respective joint venture partners for the owners' proportionate ownership interest at the end of the transition period. This distribution was finalized in the third quarter of 2014. Concurrently, we derecognized our equity investment within other non-current assets upon full recovery of our investment carrying value.

Tradeteam Ltd.

On December 23, 2013, we early terminated our existing distribution agreements with Tradeteam, our joint venture with DHL (formerly Exel Logistics), and varied or terminated certain other agreements with Tradeteam and DHL, which had collectively provided Tradeteam the exclusive rights to provide our transportation and logistics services in the U.K. We made an early termination payment of approximately \$40 million upon exiting and varying these agreements. Concurrently, we entered into new distribution agreements with Tradeteam resulting in future distribution cost savings achieved through market competitive pricing and improved payment terms through the agreements' new 10 year term.

Subsequently, on December 30, 2013, we executed a sale and purchase agreement for the termination of the joint venture and sale of our 49.9% interest in Tradeteam to DHL for proceeds of \$29.5 million.

As a result of the continuing involvement with Tradeteam following the termination and sale through the new distribution agreements, \$19.8 million was considered an upfront payment for the benefits to be provided under the new agreement. As a result of the effective modification to our agreements, we have concluded that the upfront payment should be recorded as an asset and amortized over the 10 year term of the new distribution agreements. The remaining net proceeds of \$9.7 million were used in determining the loss on sale of the investment based on its carrying value at sale, resulting in a loss of \$13.2 million recognized as a special item.

The financial commitments on early termination of the new secondary distribution agreement are to essentially assume and settle liabilities related to the various assets and infrastructure required to deliver the service to us, and to compensate Tradeteam, depending on the circumstances of such early termination. These early termination commitments decline over the term of the new agreement, and are calculable by reference to the circumstances of

termination. Services provided under the Tradet team contracts were approximately \$126.9 million during 2013 and are included in cost of goods sold. Services provided by Tradet team in 2015 and 2014 under the new third party arrangements are included within total purchases under our supply

and distribution contracts further discussed within Note 18, "Commitments and Contingencies". During 2013, we recognized equity earnings from our Tradet team investment of \$4.6 million which are recorded within cost of goods sold.

MC Si'hai

Since its inception, the performance of the MC Si'hai joint venture did not meet our expectations due to delays in executing its business plans as well as significant difficulties in working with our business partner. Through the on-going arbitration process, which began in 2012, we began discussions with the joint venture partner and concluded upon a price that we would accept to exit the relationship through the sale of our interest in the joint venture. As a result, in December 2013, we sold our interest in the joint venture and, upon finalizing the sale, we recognized a gain of \$6.0 million, recorded as a special item. The gain consists of the non-cash release of the \$5.4 million liability remaining upon deconsolidation in 2012, as well as \$0.6 million of proceeds received upon closing of the sale. We also recognized legal and related fees in relation to the sale of \$1.2 million during 2013.

5. Other Income and Expense

The table below summarizes other income and (expense):

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
	(In millions)		
Bridge loan commitment fees ⁽¹⁾	\$ (6.9) \$—	\$—
Gain on sale of non-operating asset ⁽²⁾	0.8	—	23.5
Gain (loss) from other foreign exchange and derivative activity	6.2	(6.6) (7.8
Other, net	0.8	0.1	3.2
Other income (expense), net	\$0.9	\$(6.5) \$18.9

During the fourth quarter of 2015, we recognized amortization of commitment costs incurred in connection with (1) our bridge loan agreement entered into subsequent to the announcement of the pending Acquisition of MillerCoors. See Note 21, "Pending Acquisition" for further discussion.

In 2015, we recorded gains on the sale of non-operating assets. In 1991, we became a limited partner in the Colorado Rockies Baseball Club, Ltd. ("the Partnership"), treated as a cost method investment. Effective (2) November 8, 2013, we sold our 14.6% interest in the Partnership and recognized a gain of \$22.3 million. We did not make any cash contributions in 2013, and cash distributions, recognized within other income, from the Partnership were immaterial in 2013.

Additionally, during the first quarter of 2013, we realized a \$1.2 million gain for proceeds received related to a non-income-related tax settlement resulting from historical activity within our former investment in the Montreal Canadiens.

6. Income Tax

Our income (loss) from continuing operations before income taxes on which the provision for income taxes was computed is as follows:

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
	(In millions)		
Domestic	\$746.1	\$736.2	\$809.7
Foreign	(335.4) (149.9) (155.2
Total	\$410.7	\$586.3	\$654.5

Income tax expense (benefit) includes the following current and deferred provisions:

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
	(In millions)		
Current:			
Federal	\$116.1	\$78.4	\$39.1
State	11.8	12.9	11.8
Foreign	25.2	(22.5) 50.7
Total current tax expense (benefit)	\$153.1	\$68.8	\$101.6
Deferred:			
Federal	\$(26.1) \$27.6	\$59.6
State	(5.8) 2.0	5.1
Foreign	(69.4) (29.4) (82.3
Total deferred tax expense (benefit)	\$(101.3) \$0.2	\$(17.6
Total income tax expense (benefit) from continuing operations	\$51.8	\$69.0	\$84.0

The decrease in income tax expense in 2015 was primarily due to lower pretax income versus the prior year. The decrease in pretax income was due to an increased foreign pretax loss, driven by unfavorable movements in foreign currency rates, increased special charges versus the prior year and the impact from the loss of major business contracts in 2015. The decrease in income tax expense in 2014 versus 2013 was primarily driven by lower pretax income due to an increase in special charges versus 2013, as well as the release of unrecognized tax benefits and an approximate \$21 million income tax benefit related to the finalization of the bilateral advanced pricing agreement ("BAPA") between the U.S. and Canada tax authorities in 2014.

Our effective tax rate varies from the U.S. federal statutory income tax rate as follows:

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
Statutory Federal income tax rate	35.0	% 35.0	% 35.0
State income taxes, net of federal benefits	1.6	% 2.5	% 1.3
Effect of foreign tax rates and tax planning	(29.2)% (24.3)% (27.4
Effect of unrecognized tax benefits	(3.5)% (3.9)% 3.3
Change in valuation allowance	8.2	% 0.4	% (1.5
Other, net	0.5	% 2.1	% 2.1
Effective tax rate	12.6	% 11.8	% 12.8

Our effective tax rates were significantly lower than the federal statutory rate of 35% primarily due to the impact of lower effective income tax rates applicable to our foreign businesses, driven by lower local statutory income tax rates and tax planning impacts on statutory taxable income. The statutory tax rates in the countries in Europe which we operate range from 9% in Montenegro to 20% in the U.K. Canada has a statutory tax rate of approximately 26%. In addition to these lower effective foreign tax rates, during 2015 and 2014, our effective tax rate was also positively impacted by the favorable resolution of unrecognized tax benefits in various taxing jurisdictions as further discussed

below. Our effective tax rates were also

100

positively impacted by the above mentioned finalization of the BAPA between the U.S. and Canada tax authorities in 2014, and the related BAPA renewal application which was formally submitted during the first quarter of 2015. The BAPA renewal submission covers both historical and future tax years and is subject to approval by both taxing authorities.

The table below summarizes our deferred tax assets and liabilities:

	As of December 31, 2015 (In millions)	December 31, 2014
Current deferred tax assets:		
Compensation related obligations	\$—	\$2.8
Accrued liabilities and other	—	15.8
Valuation allowance	—	(4.9
Balance sheet reserves and accruals	—	10.7
Other	—	7.8
Total current deferred tax assets	\$—	\$32.2
Current deferred tax liabilities:		
Partnership investments	—	169.8
Total current deferred tax liabilities	\$—	\$169.8
Net current deferred tax assets	—	—
Net current deferred tax liabilities	\$—	\$137.6
	As of December 31, 2015 (In millions)	December 31, 2014
Non-current deferred tax assets:		
Compensation related obligations	\$19.3	\$8.0
Pension and postretirement benefits	61.2	118.7
Tax credit carryforwards	1.5	1.5
Tax loss carryforwards	897.9	166.8
Intercompany financing	3.2	6.8
Partnership investments	—	27.2
Accrued liabilities and other	32.3	1.0
Other	6.8	10.4
Valuation allowance	(824.9) (100.5
Total non-current deferred tax assets	\$197.3	\$239.9
Non-current deferred tax liabilities:		
Fixed assets	69.7	107.3
Partnership investments	169.7	—
Foreign exchange gain/loss	48.7	13.7
Intangible assets	644.0	789.1
Hedging	4.0	12.5
Other	9.9	5.5
Total non-current deferred tax liabilities	\$946.0	\$928.1
Net non-current deferred tax assets	—	—
Net non-current deferred tax liabilities	\$748.7	\$688.2

As discussed in Note 2, "New Accounting Pronouncements", during the fourth quarter of 2015, we elected to early adopt the FASB's recently issued guidance requiring all deferred tax assets and deferred tax liabilities to be presented as non-current on the consolidated balance sheet. Adoption of this guidance resulted in the reclassification of our current deferred tax assets and liabilities to non-current in our consolidated balance sheet as of December 31, 2015. This guidance has been adopted on a prospective basis, and therefore, prior periods have not been retrospectively adjusted and continue to reflect current and non-current classification as historically presented.

Additionally, during 2015, we recorded tax loss carryforwards in certain European jurisdictions in the aggregate of \$713.7 million, primarily driven by investment losses recognized based on local statutory accounting requirements. As the carryforwards were generated in jurisdictions where we do not have operations, we concluded that it was more likely than not that the net operating losses will not be realized, and thus recorded a full valuation allowance on the associated deferred tax assets. The recognition of these deferred tax assets and fully offsetting valuation allowance resulted in a zero net impact to the consolidated statement of operations, balance sheet and statement of cash flows. The measurement of deferred tax assets is reduced by a valuation allowance if, based upon available evidence, it is more likely than not that the deferred tax assets will not be realized. We have evaluated the realizability of our deferred tax assets in each jurisdiction by assessing the adequacy of expected taxable income, including the reversal of existing temporary differences, historical and projected operating results and the availability of prudent and feasible tax planning strategies. Based on this analysis, we have determined that the valuation allowances recorded in each period presented are appropriate.

We have deferred tax assets for U.S. tax carryforwards that expire between 2016 and 2032 of \$4.5 million and \$8.6 million at December 31, 2015, and December 31, 2014, respectively. We have foreign tax loss carryforwards that expire between 2016 and 2035 of \$160.5 million and \$142.1 million as of December 31, 2015, and December 31, 2014, respectively. We have foreign tax loss carryforwards that do not expire of \$734.4 million and \$17.6 million as of December 31, 2015, and December 31, 2014, respectively. The significant increase in foreign tax loss carryforwards that do not expire is primarily driven by the tax loss carryforwards related to certain European jurisdictions specifically mentioned above.

The following table presents our deferred tax assets and liabilities on a net basis:

	As of December 31, 2015	December 31, 2014
	(In millions)	
Domestic net current deferred tax liabilities	\$—	\$ 164.6
Foreign net current deferred tax liabilities	—	0.2
Foreign net current deferred tax assets	—	27.2
Net current deferred tax liabilities	\$—	\$ 137.6
Domestic net non-current deferred tax assets	\$—	\$ 23.1
Domestic net non-current deferred tax liabilities	195.0	—
Foreign net non-current deferred tax assets	20.2	35.1
Foreign net non-current deferred tax liabilities	573.9	746.4
Net non-current deferred tax liabilities	\$ 748.7	\$ 688.2

The 2015 and 2014 amounts above exclude \$30.9 million and \$37.9 million, respectively, of unrecognized tax benefits that have been recorded as a reduction of non-current deferred tax assets, which is presented within non-current deferred tax liabilities due to jurisdictional netting on the consolidated balance sheets, as a result of the FASB's recently issued guidance related to the presentation of these items which was adopted in 2014.

A reconciliation of the beginning and ending amount of unrecognized tax benefits, excluding interest and penalties, is as follows:

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
	(In millions)		
Balance at beginning of year	\$59.8	\$137.9	\$109.2
Additions for tax positions related to the current year	1.8	2.2	3.7
Additions for tax positions of prior years	2.2	20.4	59.2
Reductions for tax positions of prior years	(5.5)	(19.4)	(3.2)
Settlements	(0.9)	(55.4)	(2.6)
Release due to statute expiration and legislative changes	(9.6)	(18.4)	(24.9)
Foreign currency adjustment	(8.3)	(7.5)	(3.5)
Balance at end of year	\$39.5	\$59.8	\$137.9

During 2015, we had a net reduction in unrecognized tax benefits of \$20.3 million. This reduction was primarily driven by the release of the remaining \$8.1 million unrecognized tax benefit that was established during the second quarter of 2014 as further discussed below, as well as the release of other unrecognized tax benefits in domestic and foreign jurisdictions, and foreign exchange rate movements.

During the second quarter of 2014, we identified that we had incorrectly omitted recognizing a liability for uncertain tax positions related to fiscal year 2010 that resulted in an immaterial misstatement of income tax expense within the consolidated statement of operations for the year ended December 25, 2010, as well as the liability for unrecognized tax benefits and retained earnings within the consolidated balance sheets at December 31, 2013, December 29, 2012, December 31, 2011, and December 25, 2010. Accordingly, during 2014, we revised our presentation of these amounts to correct for this error, which resulted in an increase in current unrecognized tax benefits of \$19.3 million and non-current unrecognized tax benefits of \$14.4 million as of December 31, 2013. During the third quarter of 2014, we filed an amendment to certain historical U.S. tax returns and concurrently fully settled the current \$19.3 million unrecognized tax benefit resulting from this adjustment. This settlement amount is included in the table above but did not impact our 2014 effective tax rate as it was settled for the amount of the liability. Additionally, upon expiration of certain statutes of limitations during the third quarter of 2014, we released a portion of the non-current unrecognized tax benefit adjustment, which resulted in a \$6.3 million benefit to our 2014 income tax expense. As discussed above, the remainder of this unrecognized tax benefit adjustment was released in the third quarter of 2015 upon expiration of the statute of limitations, resulting in an \$8.1 million benefit to 2015 income tax expense.

In addition to the \$25.6 million decrease in 2014 unrecognized tax benefits discussed above, the overall decrease in unrecognized tax positions during 2014 was further driven by the \$34.9 million settlement of a tax audit and the impact of the resolution of the BAPA in Canada that were offset by the intended utilization of deferred tax assets and therefore did not impact our effective tax rate, the favorable resolution of tax audits resolved in Europe resulting in the release of \$16.2 million of unrecognized tax positions and the release of unrecognized tax benefits due to expiration of the statute of limitations in Europe and Canada.

Our remaining unrecognized tax benefits as of December 31, 2015, relate to tax years that are currently open, and amounts may differ from those to be determined upon closing of the positions. Annual tax provisions include amounts considered sufficient to pay assessments that may result from examination of prior year tax returns; however, the amount ultimately paid upon resolution of issues may differ materially from the amount accrued.

During 2016, we anticipate that approximately \$1 million to \$4 million of unrecognized tax benefits will be released due to settlements as well as the closing of statutes of limitation in the U.S., Canada and Europe.

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
Reconciliation of unrecognized tax benefits balance	(In millions)		
Estimated interest and penalties	\$5.3	\$7.2	\$15.5
Offsetting positions	(3.7) (3.7) (3.8
Unrecognized tax positions	39.5	59.8	137.9
Total unrecognized tax benefits	\$41.1	\$63.3	\$149.6
Presented net against non-current deferred tax assets	\$30.9	\$37.9	\$—
Current (included in accounts payable and other current liabilities)	1.8	—	42.5
Non-current	8.4	25.4	107.1
Total unrecognized tax benefits	\$41.1	\$63.3	\$149.6
Amount of unrecognized tax benefits that would impact the effective tax rate ⁽¹⁾	\$39.5	\$59.8	\$137.9

(1) Amounts exclude the potential effects of valuation allowances, which may fully or partially offset the impact to the effective tax rate.

We file income tax returns in most of the federal, state and provincial jurisdictions in the U.S., Canada and various countries in Europe. Tax years through 2011 are closed in the U.S. In Canada, tax years through the year ended 2010 are closed or have been effectively settled through examination except for issues relating to intercompany cross-border transactions. The statute of limitations for intercompany cross-border transactions is closed through tax year 2007. Tax years through 2007 are closed for most countries in European jurisdictions with statutes of limitations varying from 3-7 years.

We annually receive cash from our foreign subsidiaries' current year earnings. Separately, we treat all accumulated foreign subsidiary earnings through December 31, 2015, as indefinitely reinvested under the accounting guidance and accordingly, have not provided for any U.S. or foreign tax thereon. In order to arrive at this conclusion, we considered factors including, but not limited to, past experience, domestic cash requirements and distributions from MillerCoors, as well as cash requirements to satisfy the ongoing operations, capital expenditures and other financial obligations of our foreign subsidiaries. As of December 31, 2015, approximately \$20 million of undistributed earnings and profits attributable to foreign subsidiaries was considered to be indefinitely invested. Our intention is to permanently reinvest the earnings outside of the U.S. It is not practicable to determine the amount of incremental taxes that might arise were these earnings to be remitted. The amount of tax payable could be impacted by the jurisdiction in which a distribution was made, the amount of the distribution, foreign withholding taxes under applicable tax laws when distributed, relevant tax treaties and foreign tax credits. While it is not practical to determine the amount of tax, we believe that U.S. foreign tax credits and tax planning strategies would allow us to make remittances in a tax efficient manner.

7. Special Items

We have incurred charges or realized benefits that either we do not believe to be indicative of our core operations, or we believe are significant to our current operating results warranting separate classification. As such, we have separately classified these charges (benefits) as special items. The table below summarizes special items recorded by segment:

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
	(In millions)		
Employee-related charges			
Restructuring			
Canada	\$2.1	\$7.6	\$10.6
Europe	3.0	3.7	14.5
MCI	3.2	—	0.4
Corporate	—	0.3	1.3
Special termination benefits			
Canada	—	—	2.2
Impairments or asset abandonment charges			
Canada - Intangible asset write-off and impairment ⁽¹⁾	—	13.8	17.9
Canada - Asset abandonment ⁽²⁾	25.1	—	—
Europe - Intangible asset impairment ⁽³⁾	275.0	360.0	150.9
Europe - Asset abandonment ⁽⁴⁾	27.5	4.0	—
MCI - Asset write-off ⁽⁵⁾	3.2	—	—
Unusual or infrequent items			
Europe - Release of non-income-related tax reserve ⁽⁶⁾	—	—	(4.2)
Europe - Flood loss (insurance reimbursement), net ⁽⁷⁾	(2.4)	(1.8)	(2.0)
Termination fees and other (gains) losses			
Canada - Termination fee income ⁽¹⁾	—	(63.2)	—
Europe - Termination fee expense, net ⁽⁸⁾	10.0	—	—
Europe - Tradeteam transactions ⁽⁹⁾	—	—	13.2
MCI - Sale of China joint venture ⁽⁵⁾	—	—	(4.8)
Total Special items, net	\$346.7	\$324.4	\$200.0

Upon termination of our MMI operations in 2014, we recognized termination fee income and charges associated (1) with the write-off of the definite-lived intangible asset associated with the joint venture. See Note 4, "Investments" for further discussion.

Additionally, in the third quarter of 2014 and fourth quarter of 2013, we recognized impairment charges related to our definite-lived intangible asset associated with our license agreement with Miller in Canada. See Note 11, "Goodwill and Intangible Assets" for further discussion.

(2) During the third quarter of 2015, we incurred \$15.7 million of charges related to the closure of a bottling line within our Vancouver brewery, including \$15.4 million of accelerated depreciation normally recorded in cost of goods sold associated with this bottling line. Additionally, during the second quarter of 2015, we incurred \$8.2 million of charges related to the closure of a bottling line within our Toronto brewery, including \$7.9 million of accelerated depreciation normally recorded in cost of goods sold associated with this bottling line. The decisions to close these bottling lines were made as part of an ongoing strategic review of our Canadian supply chain network and the overall shift in consumer preference toward can package consumption in Canada. Additionally, in October 2015, as a result of the continuation of this strategic review, we entered into an agreement to sell the Vancouver brewery, with the intent to use the proceeds from the sale to help fund the construction of an efficient and flexible brewery in British Columbia. The sale has not yet closed, and is anticipated to be completed by the end of the first quarter of 2016. In conjunction with the sale, we agreed to leaseback the existing property to continue operations on an uninterrupted basis while the new brewery is being constructed. We incurred accelerated depreciation

charges in excess of normal depreciation recorded in cost of goods sold associated with the planned brewery closure of \$1.2 million during the fourth quarter of 2015. We

expect to incur additional charges, including estimated accelerated depreciation charges of approximately CAD 20 million, through final closure of the brewery which is currently anticipated to occur at the end of 2018. These ongoing charges, along with the estimated future gain on the sale of the property of approximately CAD 144 million, will be recorded as special items.

(3) During the third quarters of 2015, 2014 and 2013, we recognized impairment charges related to indefinite-lived intangible assets in Europe. See Note 11, "Goodwill and Intangible Assets" for further discussion.

As part of our continued strategic review of our European supply chain network, in the fourth quarter of 2015, we announced the proposal and entered into a consultation process to close our Burton South brewery in the U.K. in which we will consolidate production within our recently modernized Burton North brewery. As a result, we incurred accelerated depreciation charges in excess of our normal depreciation recorded in cost of goods sold

(4) associated with this brewery of \$1.4 million. We expect to incur future accelerated depreciation in excess of our normal depreciation of approximately GBP 9 million related to the Burton South brewery from the first quarter of 2016 through the third quarter of 2017. Also, in the fourth quarter of 2015, we closed our Plovdiv brewery in Bulgaria resulting in \$2.1 million of asset abandonment related special charges, including accelerated depreciation in excess of our normal depreciation recorded in cost of goods sold of \$1.0 million as it pertains to this brewery.

Additionally, as part of this review, during the second quarter of 2015, we completed the closure of the Alton brewery in the U.K. which began in the fourth quarter for 2014. As a result, in 2015 we incurred charges associated with the closure of \$24.0 million, including accelerated depreciation in excess of our normal depreciation recorded in cost of goods sold associated with this brewery of \$21.8 million. In 2014, we incurred accelerated depreciation in excess of our normal depreciation recorded in cost of goods sold associated with this brewery of \$4.0 million.

We do not expect to incur future accelerated depreciation on the Alton and Plovdiv breweries. We may recognize other asset-related charges or benefits related to these brewery closures, which cannot currently be estimated and will be recorded within special items.

During the second quarter of 2015, we announced our decision to substantially restructure our business in China (5) and consequently, recognized employee-related and asset write-off charges, including \$0.7 million of accelerated depreciation normally recorded in cost of goods sold.

In December of 2013, we sold our interest in the MC Si'hai joint venture in China and recognized a gain of \$6.0 million. The gain consists of the non-cash release of the \$5.4 million liability representing the fair value of our remaining investment upon deconsolidation of the joint venture in 2012, as well as \$0.6 million of proceeds received for our interest in the joint venture. We also recognized legal and related fees in relation to the sale of \$1.2 million during 2013.

During 2009, we established a non-income-related tax reserve of \$10.4 million that was recorded as a special item. (6) The amount recorded in 2013 represents the release of this reserve as a result of a change in estimate. As a result, the remaining amount of this non-income-related tax reserve was fully released in 2013.

(7) During 2015, we recorded \$2.4 million of income for insurance proceeds received related to significant flooding in Czech Republic that occurred during the second quarter of 2013.

During 2014, we recorded losses and related costs of \$2.1 million in our Europe business associated with significant flooding in Serbia, Bosnia and Croatia that occurred in the second quarter of 2014. These losses were offset by insurance proceeds of \$3.9 million received related to the flooding that occurred in the second quarter of 2014.

During 2013, we recorded losses and related net costs of \$5.4 million in our Europe business related to significant flooding in Czech Republic in the second quarter of 2013. These losses were offset by \$7.4 million insurance proceeds received in 2013.

In June 2015, we terminated our agreement with Carlsberg whereby it held the exclusive distribution rights for the Staropramen brand in the U.K. As a result of this termination, we agreed to pay Carlsberg an early termination (8) payment of GBP 19.0 million (\$29.4 million at payment date), which was recognized as a special charge during the second quarter of 2015. The transition period concluded on December 27, 2015, and we now have the exclusive distribution rights of the Staropramen brand in the U.K.

In December 2013, we entered into an agreement with Heineken to early terminate our contract brewing and kegging agreement with Heineken under which we produced and packaged the Foster's and Kronenbourg brands in the U.K. As a result of the termination, Heineken agreed to pay us an aggregate early termination payment of GBP 13.0

million, of which we received GBP 5.0 million in 2014 and the remaining GBP 8.0 million on April 30, 2015. The full amount

106

of the termination payment received (\$19.4 million upon recognition) is included as income within special items during the year ended December 31, 2015.

Upon termination of our Tradeteam distribution agreements and subsequent termination of the joint venture and (9) sale of our 49.9% interest in Tradeteam to DHL, we recognized a loss of \$13.2 million in December 2013. See Note 4, "Investments" for further discussion.

Restructuring Activities

In 2012, we introduced several initiatives focused on increasing our efficiencies and reducing costs across all functions of the business in order to develop a more competitive supply chain and global cost structure. Included in these initiatives is a long-term focus on reducing labor and general overhead costs through restructuring activities. We view these restructuring activities as actions to allow us to meet our long-term growth targets by generating future cost savings within cost of goods sold and general and administrative expenses and include organizational changes that strengthen our business and accelerate efficiencies within our operational structure. As a result of these restructuring activities, we have reduced employment levels by approximately 1,070 employees since 2012, of which approximately 160, 310 and 600 relate to 2014, 2013 and 2012 activities, respectively. Consequently, we recognized severance and other employee related charges during 2014 and 2013, which we have recorded as special items within our consolidated statements of operations. During 2014, we finalized our restructuring initiatives that began in 2012. During 2014 and 2015, we continued our ongoing assessment of our supply chain strategies across our segments in order to align with our cost saving objectives. As part of this strategic review, we began closing certain breweries including the Alton and Plovdiv breweries and the planned closures of the Vancouver and Burton South breweries. As a result of these restructuring activities, we have reduced employment levels by approximately 358 employees, of which approximately 286 and 72 relate to 2015 and 2014 activities, respectively. Consequently, we recognized severance and other employee related charges during 2015 and 2014, which we have recorded as special items within our consolidated statements of operations. We will continue to evaluate our supply chain network and seek opportunities for further efficiencies and cost savings, and we therefore may incur additional restructuring related charges in the future.

In 2015, we also recognized employee-related charges within our MCI segment following the decision to substantially restructure our business in China as stated above. As a result of this action, employment levels were reduced by approximately 125 full-time employees.

The accrued restructuring balances represent expected future cash payments required to satisfy the remaining severance obligations to terminated employees, the majority of which we expect to be paid in the next 12-36 months.

The table below summarizes the activity in the restructuring accruals by segment:

	Canada	Europe	MCI	Corporate	Total
	(In millions)				
Balance at December 29, 2012	\$7.1	\$13.4	\$2.8	\$1.5	\$24.8
Charges incurred	10.6	14.5	0.4	1.3	26.8
Payments made	(7.7)	(14.6)	(2.7)	(1.9)	(26.9)
Foreign currency and other adjustments	(0.3)	0.3	—	—	—
Balance at December 31, 2013	\$9.7	\$13.6	\$0.5	\$0.9	\$24.7
Charges incurred	7.6	6.3	—	0.3	14.2
Payments made	(13.0)	(5.2)	(0.5)	(1.0)	(19.7)
Changes in estimates	—	(2.6)	—	—	(2.6)
Foreign currency and other adjustments	(0.5)	(0.6)	—	—	(1.1)
Balance at December 31, 2014	\$3.8	\$11.5	\$—	\$0.2	\$15.5
Charges incurred	2.1	4.2	3.2	—	9.5
Payments made	(3.1)	(8.5)	(1.9)	(0.2)	(13.7)
Changes in estimates	—	(1.2)	—	—	(1.2)
Foreign currency and other adjustments	(0.5)	(0.4)	—	—	(0.9)
Balance at December 31, 2015	\$2.3	\$5.6	\$1.3	\$—	\$9.2

8. Stockholders' Equity

Changes to the number of shares of capital stock issued were as follows:

	Common stock issued		Exchangeable shares issued	
	Class A	Class B ⁽¹⁾	Class A	Class B
	(Share amounts in millions)			
Balance at December 29, 2012	2.6	164.2	2.9	19.3
Shares issued under equity compensation plans	—	2.7	—	—
Shares exchanged for common stock	—	0.3	—	(0.3)
Balance at December 31, 2013	2.6	167.2	2.9	19.0
Shares issued under equity compensation plans	—	1.3	—	—
Shares exchanged for common stock	—	1.4	—	(1.4)
Balance at December 31, 2014	2.6	169.9	2.9	17.6
Shares issued under equity compensation plans	—	1.0	—	—
Shares exchanged for common stock	—	1.6	—	(1.6)
Balance at December 31, 2015	2.6	172.5	2.9	16.0

During 2015, we repurchased Class B common shares which results in a lower number of outstanding shares (1) compared to issued shares. See "Share Repurchase Program" below for further discussion. For all other classes, issued shares equal outstanding shares.

Exchangeable Shares

The Class A exchangeable shares and Class B exchangeable shares were issued by Molson Coors Canada Inc. ("MCCI") a wholly-owned subsidiary of the Company. The exchangeable shares are substantially the economic equivalent of the corresponding shares of Class A and Class B common stock that a Molson shareholder would have received in the Merger if the holder had elected to receive shares of Molson Coors common stock. Holders of exchangeable shares also receive, through a voting trust, the benefit of Molson Coors voting rights, entitling the holder to one vote on the same basis and in the same circumstances as one corresponding share of Molson Coors common stock.

Voting Rights

Each holder of record of Class A common stock, Class B common stock, Class A exchangeable shares and Class B exchangeable shares is entitled to one vote for each share held, without the ability to cumulate votes on the election of directors. Our Class B common stock has fewer voting rights than our Class A common stock and holders of our Class A common stock have the ability to effectively control or have a significant influence over company actions requiring stockholder approval. Specifically, holders of Class B common stock voting together as a single class have the right to elect three directors of the Molson Coors Board of Directors, as well as the right to vote on certain additional matters as outlined in the our Restated Certificate of Incorporation (as amended, the "Certificate"), such as merger agreements that require approval under applicable law, sales of all or substantially all of the our assets to unaffiliated third parties, proposals to dissolve MCBC, and certain amendments to the Certificate that require approval under applicable law, each as further described and limited by the Certificate. The Certificate also provides that holders of Class A common stock and Class B common stock shall vote together as a single class, on an advisory basis, on any proposal to approve the compensation of MCBC's named executive officers.

Conversion Rights

The Certificate provides for the right of holders of Class A common stock to convert their stock into Class B common stock on a one-for-one basis at any time. The exchangeable shares are exchangeable at any time, at the option of the holder on a one-for-one basis for corresponding shares of Molson Coors common stock.

Share Repurchase Program

On February 10, 2015, we announced that our Board of Directors approved and authorized a new program to repurchase up to \$1.0 billion of our Class A and Class B common stock. The number, price and timing of the repurchases will be at the Company's sole discretion and will be evaluated depending on market conditions, liquidity needs or other factors. The Company's Board of Directors may suspend, modify or terminate the program at any time without prior notice. This repurchase program replaces and supersedes any repurchase programs previously approved

by the Board of Directors. Under Delaware

108

state law, these shares are not retired, and the issuer has the right to resell any of the shares repurchased. Beginning in April 2015, under this program, we entered into accelerated share repurchase agreements (“ASRs”) with a financial institution. In exchange for up-front payments, the financial institution delivers shares of our common stock during the purchase periods of each ASR. The total number of shares ultimately delivered, and therefore the average repurchase price paid per share, was determined at the end of the applicable purchase period of each ASR based on the volume weighted-average price of our common stock during that period. The up-front payments for the treasury stock were accounted for as a reduction to shareholders’ equity in the consolidated balance sheet in the periods the payments are made. We reflected each ASR as a repurchase of common stock in the period delivered for purposes of calculating earnings per share and as forward contracts indexed to our own common stock. Each ASR met all of the applicable criteria for equity classification, and therefore, was not accounted for as a derivative instrument.

During 2015 we purchased a total of approximately 2 million shares of our Class B common stock under the new program for approximately \$150 million. As a result of the pending Acquisition, we have suspended the new share repurchase program. As we pay down debt we will revisit our share repurchase program once deleveraging is well underway. There were no repurchases in 2014 or 2013.

Class B Common Stock Equity Issuance

In the first quarter of 2016, we completed an underwritten public offering of our Class B common stock, which increased the number of Class B common shares issued and outstanding. See Note 21, "Pending Acquisition" for further details.

9. Earnings Per Share

Basic earnings per share ("EPS") was computed using the weighted-average number of shares of common stock outstanding during the period. Diluted EPS includes the additional dilutive effect of our potentially dilutive securities, which includes restricted stock units ("RSUs"), deferred stock units ("DSUs"), performance units ("PUs"), performance share units ("PSUs"), stock options and stock-only stock appreciation rights ("SOSARs"). The dilutive effects of our potentially dilutive securities are calculated using the treasury stock method. The following summarizes the effect of dilutive securities on diluted EPS:

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
	(In millions, except per share amounts)		
Amounts attributable to Molson Coors Brewing Company:			
Net income (loss) from continuing operations	\$355.6	\$513.5	\$565.3
Income (loss) from discontinued operations, net of tax	3.9	0.5	2.0
Net income (loss) attributable to Molson Coors Brewing Company	\$359.5	\$514.0	\$567.3
Weighted-average shares for basic EPS	185.3	184.9	183.0
Effect of dilutive securities:			
RSUs, DSUs, PUs and PSUs	0.7	0.5	0.5
Stock options and SOSARs	0.4	0.7	0.7
Weighted-average shares for diluted EPS	186.4	186.1	184.2
Basic net income (loss) attributable to Molson Coors Brewing Company per share:			
From continuing operations	\$1.92	\$2.78	\$3.09
From discontinued operations	0.02	—	0.01
Basic net income (loss) attributable to Molson Coors Brewing Company per share	\$1.94	\$2.78	\$3.10
Diluted net income (loss) attributable to Molson Coors Brewing Company per share:			
From continuing operations	\$1.91	\$2.76	\$3.07
From discontinued operations	0.02	—	0.01
Diluted net income (loss) attributable to Molson Coors Brewing Company per share	\$1.93	\$2.76	\$3.08
Dividends declared and paid per share	\$1.64	\$1.48	\$1.28

Our calculation of weighted-average shares includes Class A common stock and Class B common stock, and Class A exchangeable shares and Class B exchangeable shares. All classes of stock have in effect the same dividend rights and share equitably in undistributed earnings. Holders of Class A common stock receive dividends only to the extent dividends are declared and paid to holders of Class B common stock. See Note 8, "Stockholders' Equity" for further discussion of the Class A common stock and Class B common stock and Class A exchangeable shares and Class B exchangeable shares. We have no unvested outstanding equity share awards that contain non-forfeitable rights to dividends.

The following anti-dilutive securities were excluded from the computation of the effect of dilutive securities on diluted earnings per share:

	For the years ended		
	December 31, 2015 (In millions)	December 31, 2014	December 31, 2013
RSUs, stock options and SOSARs	0.1	—	0.1

Convertible Notes

In June 2007, we issued \$575 million Convertible Senior Notes ("575 million convertible bonds") due July 2013. On July 30, 2013, these notes matured and were repaid for their face value of \$575 million. The required premium payment was settled in cash and entirely offset by the cash proceeds received from the settlement of the call options we purchased in 2007 related to these notes. As a result, these notes and related call options did not impact our shares outstanding. Additionally, the potential impacts of these notes and related call options had no impact on diluted income per share for any period in which they were outstanding. Simultaneously with the issuance of these notes, we issued warrants which began expiring in December 2013 and the final warrants expired February 6, 2014, all of which were out-of-the-money upon settlement. The potential impacts of these warrants had no impact on diluted income per share and were excluded from the computation of the effect of dilutive securities on diluted earnings per share for all periods during which they were outstanding.

In June 2012, we issued a €500 million Zero Coupon Senior Unsecured Convertible Note ("€500 million convertible note"). On August 13, 2013, the embedded put option was exercised and we subsequently settled the note using cash. As a result, the €500 million convertible note did not impact our shares outstanding and was excluded from the computation of the effect of diluted securities on diluted earnings per share for all periods during which they were outstanding.

Share Repurchase Program

See Note 8, "Stockholders' Equity" for details around our share repurchase program. During 2015, we purchased a total of approximately 2 million shares of our Class B common stock under the new program for approximately \$150 million. As a result of the pending Acquisition, we have suspended the share repurchase program. As we pay down debt we will revisit our share repurchase program once deleveraging is well underway. There were no share repurchases in 2014 or 2013.

10. Properties

The cost of properties and related accumulated depreciation consists of the following:

	As of	
	December 31, 2015 (In millions)	December 31, 2014
Land and improvements	\$173.1	\$175.3
Buildings and improvements	457.3	475.0
Machinery and equipment	1,654.8	1,756.8
Returnable containers	228.0	241.5
Furniture and fixtures	224.5	205.9
Software	116.2	128.3
Natural resource properties	3.8	3.8
Construction in progress	123.2	154.6
Total properties cost	2,980.9	3,141.2
Less: accumulated depreciation	(1,390.1)	(1,343.2)
Net properties	\$1,590.8	\$1,798.0

Depreciation expense was \$284.5 million, \$268.4 million and \$272.5 million in 2015, 2014 and 2013, respectively.

Loss and breakage expense related to our returnable containers, included in the depreciation expense amounts noted above, was \$33.3 million, \$43.1 million and \$51.8 million in 2015, 2014 and 2013, respectively, and is classified within cost of goods sold in the consolidated statements of operations. Additionally, the previously mentioned

depreciation expense for 2015 and 2014 includes accelerated depreciation of \$49.4 million and \$4.0 million, respectively, associated with brewery and bottling line

111

closures, and is classified within special items in the consolidated statements of operations. See Note 7, "Special Items" for further discussion as well as details around facility closures.

11. Goodwill and Intangible Assets

The following summarizes the changes in goodwill:

	Canada (In millions)	Europe	MCI	Consolidated
Balance at December 31, 2013	\$718.2	\$1,693.2	\$7.3	\$2,418.7
Foreign currency translation	(61.7)) (165.2)) (0.2)) (227.1)
Balance at December 31, 2014	\$656.5	\$1,528.0	\$7.1	\$2,191.6
Business acquisition and disposition ⁽¹⁾	—	(6.7)) 16.9	10.2
Foreign currency translation	(105.1)) (112.6)) (0.8)) (218.5)
Balance at December 31, 2015	\$551.4	\$1,408.7	\$23.2	\$1,983.3

In July 2015, we sold our U.K. malting facility resulting in an adjustment to the goodwill in our Europe reporting unit based on the proportionate fair value of the disposed business relative to the reporting unit. In addition, on April 1, 2015, we completed the acquisition of Mount Shivalik, a regional brewer in India. As part of the purchase price accounting, goodwill generated in conjunction with this acquisition has been recorded within our MCI segment beginning in the second quarter of 2015, subject to normal purchase accounting adjustments, and included within the India reporting unit of our MCI segment for purposes of our annual goodwill impairment testing.

The following table presents details of our intangible assets, other than goodwill, as of December 31, 2015:

	Useful life (Years)	Gross (In millions)	Accumulated amortization	Net
Intangible assets subject to amortization:				
Brands	3 - 50	\$1,121.8	\$(226.1)) \$895.7
License agreements and distribution rights	3 - 28	135.1	(87.1)) 48.0
Other	2 - 8	29.9	(28.6)) 1.3
Intangible assets not subject to amortization:				
Brands	Indefinite	3,052.2	—	3,052.2
Distribution networks	Indefinite	731.0	—	731.0
Other	Indefinite	17.5	—	17.5
Total		\$5,087.5	\$(341.8)) \$4,745.7

The following table presents details of our intangible assets, other than goodwill, as of December 31, 2014:

	Useful life (Years)	Gross (In millions)	Accumulated amortization	Net
Intangible assets subject to amortization:				
Brands	3 - 40	\$483.5	\$(229.1)) \$254.4
License agreements and distribution rights	3 - 28	122.0	(101.1)) 20.9
Other	2 - 8	31.7	(29.4)) 2.3
Intangible assets not subject to amortization:				
Brands	Indefinite	4,590.2	—	4,590.2
Distribution networks	Indefinite	870.5	—	870.5
Other	Indefinite	17.5	—	17.5
Total		\$6,115.4	\$(359.6)) \$5,755.8

The changes in the gross carrying amounts of intangibles from December 31, 2014, to December 31, 2015, are primarily driven by the impact of foreign exchange rates, as a significant amount of intangibles are denominated in foreign currencies,

the indefinite-lived brand intangible impairments recorded in the third quarter of 2015 and the change in classification of certain European brands from indefinite-lived to definite-lived, subject to amortization as noted below.

Additionally, we wrote-off the gross value and accumulated amortization associated with our licensing agreement with Miller in Canada upon finalizing the termination in the first quarter of 2015, and we acquired definite-lived distribution rights as part of our Rekorderlig acquisition in the third quarter of 2015, as well as a definite-lived brand as part of our acquisition in India in the second quarter of 2015.

Based on foreign exchange rates as of December 31, 2015, the estimated future amortization expense of intangible assets is as follows:

Year	Amount (In millions)
2016	\$38.6
2017	\$28.3
2018	\$26.8
2019	\$26.8
2020	\$26.7

Amortization expense of intangible assets was \$29.9 million, \$44.6 million, and \$48.0 million for the years ended December 31, 2015, December 31, 2014, and December 31, 2013, respectively. This expense is presented within marketing, general and administrative expenses and includes the \$4.9 million of accelerated amortization recognized for the write-off of the intangible asset associated with the termination of MMI operations in the first quarter of 2014. See Note 4, "Investments" for further discussion.

We completed our required annual goodwill and indefinite-lived intangible impairment testing as of October 1, 2015, the first day of our fiscal fourth quarter, and concluded there were no impairments of goodwill within our Europe, Canada or India reporting units or impairments of our indefinite-lived intangible assets. However, due to triggering events, an impairment charge was recorded across various European brands during the third quarter due to the results of an interim impairment review as discussed further below.

Reporting Units and Goodwill

Our 2015 annual goodwill impairment testing determined that while our Canada reporting unit improved from the prior year, our Europe reporting unit declined and was determined to be at risk of failing step one of the goodwill impairment test. Specifically, the fair value of the Europe and Canada reporting units were estimated at approximately 9% and 20% in excess of carrying value, respectively, as of the October 1, 2015 testing date. The excess of the fair value over the carrying value of the Europe reporting unit declined from the prior year. The decrease was driven by continued challenging macroeconomic conditions in Europe negatively impacting our business, as well as declines in the forecasts of certain European brands, which have been adversely impacted by competitive pressures and a continued shift in consumer trends towards value brands. These impacts were partially offset by a lower discount rate. The Canada reporting unit had an increase in the fair value in excess of the carrying value from the prior year primarily due to a lower discount rate, an improved forecast primarily driven by cost savings initiatives and improved market multiples. Although the fair value in excess of the carrying value has increased for the Canada reporting unit from the October 1, 2014 testing date, the fair value is sensitive to potential unfavorable changes in forecasted cash flows, macroeconomic conditions, market multiples or discount rates that could have an adverse impact. The fair value of the India reporting unit was deemed to approximate the carrying value of the reporting unit due to purchase price accounting performed as of April 1, 2015 for the Mount Shivalik acquisition, which comprises the majority of the India reporting unit. See Note 1, "Basis of Presentation and Summary of Significant Accounting Policies" for further discussion of our determination of reporting units for purposes of goodwill impairment testing.

Indefinite-Lived Intangibles

Prior to the annual impairment testing date of October 1, 2015 and during the third quarter of 2015, we identified impairment indicators as it pertains to certain European indefinite-lived brands driven by key changes to our underlying assumptions supporting the value of the brands. Specific changes included under-performance through the 2015 peak season which drove a downward shift in management's forecasts, a challenging macroeconomic environment and competitive conditions not expected to subside in the near-term, as well as higher discount rates associated with these brands. As a result, we recorded an aggregate impairment charge across various European

brands, including Jelen, of \$275.0 million within special items in the third quarter of 2015. Compared to previously made assumptions, these lower projected cash flows and higher discount rates resulted in lower brand valuations following impairments of \$360.0 million in 2014 and \$150.9 million in 2013

related to European indefinite-lived brands as a result of our 2014 and 2013 annual impairment testing, respectively. The remaining Europe indefinite-lived intangibles' fair values, including Staropramen and Carling brands, while they faced similar macroeconomic challenges, were sufficiently in excess of their respective carrying values as of the testing date.

In conjunction with the interim brand impairment review performed during the third quarter, we also reassessed each brand's indefinite-life classification and determined that those brands which had been impaired had characteristics that indicated a definite-life assignment was more appropriate including continued pressure on these brands given the geographical markets and price segments in which they participate. Specifically, significant competition from the value segment, which has challenged the segment in which these brands operate with continued stress on these brands driven by on-going macroeconomic conditions. These brands were therefore reclassified as definite-lived intangible assets as of September 30, 2015, and will be amortized over their remaining useful lives ranging from 30 to 50 years. No additional triggering events were identified in 2015 associated with the brands reclassified to definite-lived intangible assets.

Separately, our Molson core brand intangible continues to be at risk of future impairment with a fair value estimated at approximately 3% in excess of its carrying value as of the impairment testing date. The fair value of the Molson core brands in excess of carrying value decreased from the prior year, as they continue to face significant competitive pressures and challenging macroeconomic conditions in the Canada market. These challenges continue to be offset by anticipated cost savings initiatives. As of December 31, 2015, the Molson core brand intangible had a carrying value of \$2,193.7 million. The fair value of the Coors Light brand distribution rights and our other indefinite-lived intangibles in Canada continue to be sufficiently in excess of their carrying values.

We utilized Level 3 fair value measurements in our impairment analysis of our indefinite-lived intangible assets, which utilizes an excess earnings approach to determine the fair values of the assets as of the testing date, inclusive of the intangible assets mentioned above valued during the third quarter of 2015. The future cash flows used in the analysis are based on internal cash flow projections based on our long range plans and include significant assumptions by management as noted below.

Key Assumptions

The Europe reporting unit goodwill and the Molson core brand intangible asset are at risk of future impairment in the event of significant unfavorable changes in the forecasted cash flows (including prolonged, or further weakening of, adverse economic conditions or significant unfavorable changes in tax, environmental or other regulations, including interpretations thereof), terminal growth rates, market multiples and/or weighted-average cost of capital utilized in the discounted cash flow analyses. For testing purposes, management's best estimates of the expected future results are the primary driver in determining the fair value. Current projections used for our Europe reporting unit testing reflect continued challenging environments in the future followed by growth resulting from a longer term recovery of the macroeconomic environment, as well as the benefit of anticipated cost savings and specific brand-building and innovation activities. Our Molson core brand projections also reflect a continued challenging environment that has been adversely impacted by a weak economy across all industries, as well as weakened consumer demand driven by increased competitive pressures, partially offset by anticipated cost savings and specific brand-building and innovation activities. Fair value determinations require considerable judgment and are sensitive to changes in underlying assumptions and factors. As a result, there can be no assurance that the estimates and assumptions made for purposes of the annual goodwill and indefinite-lived intangible impairment tests will prove to be an accurate prediction of the future. Examples of events or circumstances that could reasonably be expected to negatively affect the underlying key assumptions and ultimately impact the estimated fair value of our reporting units and indefinite-lived intangibles may include such items as: (i) a decrease in expected future cash flows, specifically, a decrease in sales volume and increase in costs that could significantly impact our immediate and long-range results, a decrease in sales volume driven by a prolonged weakness in consumer demand or other competitive pressures adversely affecting our long term volume trends, a continuation of the trend away from core brands in certain of our markets, especially in markets where our core brands represent a significant portion of the market, unfavorable working capital changes and an inability to successfully achieve our cost savings targets, (ii) adverse changes in macroeconomic conditions or an economic recovery that significantly differs from our assumptions in timing and/or degree (such as a recession or worsening of the overall European economy), (iii) volatility in the equity and debt

markets or other country specific factors which could result in a higher weighted-average cost of capital, (iv) sensitivity to market multiples; and (v) regulation limiting or banning the manufacturing, distribution or sale of alcoholic beverages.

In April 2014, the Ontario Premier's Advisory Council on Government Assets (the "Council") began a review that included evaluating the beer retailing and distribution system in Ontario, for which BRI is the primary beer retail and distribution channel. In April 2015, as a result of this review and our negotiations with the Council, we, along with the other owners of BRI, agreed, in principle and subject to entry into definitive binding documents, to enter into a new beer framework agreement (the "New Framework") with the Province of Ontario. The associated Master Framework Agreement was subsequently executed by all parties on September 22, 2015, and became effective as of January 1, 2016.

Our analysis of the Canada reporting unit and related indefinite-lived intangible brand assets included consideration of the New Framework with the Province of Ontario, which includes the forecasted implications to MCBC of an additional CAD 100.0 million annual tax on all beer volume sold in Ontario (which will be phased in over four years beginning January 1, 2016), restrictions on price increases for certain packaging types of the largest Ontario brands until the second quarter of 2017, BRI committing to invest CAD 100.0 million of capital spending through 2018, increasing the number and types of outlets where beer is sold, increasing the required level of shelf space allocated to small brewers in retail outlets, as well as allowing for incremental packaging options at the Liquor Control Board of Ontario ("LCBO") and agents of the LCBO.

Based on known facts and circumstances, we evaluate and consider other recent events and uncertain items, as well as related potential implications, as part of our annual assessment and incorporate into the analyses as appropriate. These facts and circumstances are subject to change and may impact future analyses.

While historical performance and current expectations have resulted in fair values of our reporting units in excess of carrying values, if our assumptions are not realized, it is possible that an impairment charge may need to be recorded in the future.

Definite-Lived Intangibles

Regarding definite-lived intangibles, we continuously monitor the performance of the underlying asset for potential triggering events suggesting an impairment review should be performed. No such triggering events were identified in 2015.

During the fourth quarter of 2013, we recorded an impairment charge of \$17.9 million related to our license agreement with Miller in Canada. In the third quarter of 2014, as a result of the settlement with Miller in Canada, we updated our assessment of the definite-lived intangible asset related to the Miller license agreement for impairment resulting in an additional \$8.9 million impairment charge. The valuation of the asset at that time was primarily indicative of the settlement amount, as well as the remaining future cash flows expected to be generated under the license agreement through March 31, 2015. We received half of the mutually agreed upon settlement payment following the execution of the settlement and received the remainder upon finalization of transition at the end of the first quarter of 2015. The intangible asset was fully amortized as of the end of the first quarter of 2015 and the associated gross value and accumulated amortization balances were written off. We utilized Level 3 fair value measurements in our impairment analysis of this definite-lived intangible asset, which included cash flow assumptions by management related to the transition period.

12. Debt

Debt Obligations

Our total long-term borrowings as of December 31, 2015, and December 31, 2014, were composed of the following:

	As of December 31, 2015	December 31, 2014 ⁽¹⁾
	(In millions)	
Senior notes:		
CAD 900 million 5.0% notes due 2015 ⁽²⁾⁽³⁾	\$—	\$774.5
CAD 500 million 3.95% Series A notes due 2017 ⁽³⁾	361.3	430.3
CAD 400 million 2.25% notes due 2018 ⁽²⁾	289.0	—
CAD 500 million 2.75% notes due 2020 ⁽²⁾	361.3	—
\$300 million 2.0% notes due 2017 ⁽⁴⁾	300.6	300.0
\$500 million 3.5% notes due 2022 ⁽⁴⁾	517.8	510.8
\$1.1 billion 5.0% notes due 2042 ⁽⁴⁾	1,100.0	1,100.0
Long-term credit facilities ⁽⁵⁾	—	—
Less: unamortized debt discounts and debt issuance costs	(21.3) (20.4
Total long-term debt (including current portion)	2,908.7	3,095.2
Less: current portion of long-term debt	—	(773.9
Total long-term debt	\$2,908.7	\$2,321.3
Short-term borrowings:		
Cash pool overdrafts ⁽⁶⁾	\$18.7	\$64.6
Short-term facilities ⁽⁷⁾	7.5	4.9
Other short-term borrowings ⁽⁸⁾	2.5	5.6
Current portion of long-term debt	—	773.9
Current portion of long-term debt and short-term borrowings	\$28.7	\$849.0

Amounts have been adjusted to reflect the adoption of the authoritative guidance requiring debt issuance costs to (1) be presented as a direct reduction from the carrying value of the related debt. See Note 2, "New Accounting Pronouncements" for further discussion.

On September 18, 2015, Molson Coors International, LP, a Delaware limited partnership and a wholly-owned subsidiary of MCBC, issued CAD 500 million 2.75% notes due September 18, 2020 ("CAD 500 million notes"), (2) and CAD 400 million 2.25% notes due September 18, 2018 ("CAD 400 million notes", and together with the CAD 500 million notes, the "2015 Notes"). Our previously issued CAD 900 million 5.0% notes matured on September 22, 2015, and were repaid using the proceeds from these new note offerings.

Prior to issuing the 2015 Notes, we entered into forward starting interest rate swap agreements to hedge the interest rate volatility on CAD 600 million of the 2015 Notes beginning in the second quarter of 2014. At the time of the issuance of the 2015 Notes, the government of Canada bond rates were trading at a yield lower than that locked in by the interest rate swaps, resulting in an aggregate realized loss of CAD 39.2 million (\$29.5 million at settlement), which was recorded in other comprehensive income. A portion of this loss is being amortized into interest expense over the 5-year and 3-year terms of the respective 2015 Notes and will increase our effective cost of borrowing compared to the stated coupon rates by 0.65% on the CAD 500 million notes and 0.16% on the CAD 400 million notes. The remaining portion of the loss will be amortized on future debt issuances covering the full 10-year term of the interest rate swap agreements. The cash payment associated with the settlement of the forward starting interest rate swap agreements was recorded as an operating outflow within the other assets and liabilities line item on the consolidated statement of cash flows. See Note 16, "Derivative Instruments and Hedging Activities" for further details on the forward starting interest rate swaps.

(3) During the third quarter of 2005, Molson Coors Capital Finance ULC completed a CAD 900 million private placement in Canada, which matured September 22, 2015, and was repaid. Additionally, during the fourth quarter

2010, Molson Coors International LP completed a CAD 500 million private placement in Canada due October 6, 2017. Prior to issuing the bonds, we entered into forward starting interest rate transactions for a portion of each Canadian offering. The bond forward transactions effectively established, in advance, the yield of the government of Canada bond rate over which the Company's private placement was priced. At the time of the private placement offerings and pricings, the government of Canada bond rates were trading at a yield lower than that locked in with the Company's interest rate locks. This resulted in a loss on the bond forward transactions of \$4.0 million related to the CAD 900 million bonds, and \$7.8 million on the CAD 500 million bonds. The losses are amortized over the term of each respective Canadian issued private placement and increase our effective cost of borrowing compared to the stated coupon rates by 0.05% and 0.23% on the CAD 900 million and CAD 500 million bonds, respectively.

On May 3, 2012, we issued \$1.9 billion of senior notes with portions maturing in 2017, 2022 and 2042. The 2017 senior notes were issued in an initial aggregate principal amount of \$300 million at 2.0% interest and will mature on May 1, 2017 ("300 million notes"). The 2022 senior notes were issued in an initial aggregate principal amount of \$500 million at 3.5% interest and will mature on May 1, 2022 ("500 million notes"). The 2042 senior notes (4) were issued in an initial aggregate principal amount of \$1.1 billion at 5.0% interest and will mature on May 1, 2042. The issuance resulted in total proceeds to us, before expenses, of \$1,880.7 million, net of underwriting fees and discounts of \$14.7 million and \$4.6 million, respectively. Total debt issuance costs capitalized in connection with these senior notes, including the underwriting fees and discounts, are approximately \$18.0 million and will be amortized over the term of the notes.

In the first quarter of 2015, we entered into interest rate swaps to economically convert our fixed rate \$300 million notes to floating rate debt consistent with the interest rate swaps on our \$500 million notes entered into during 2014. As a result of these hedge programs, the changes in fair value of the interest rate swaps and the offsetting changes in the fair value of our \$300 million and \$500 million notes attributable to the benchmark interest rate were recorded as unrealized positions in interest expense in our consolidated statement of operations. As a result of fair value hedge accounting, the carrying value of the \$300 million and \$500 million notes include an adjustment for the change in fair value. During the fourth quarter of 2015, we voluntarily cash settled these interest rate swaps, at which time we ceased adjusting the carrying value of the related \$300 million and \$500 million notes for the fair value movements of these swaps. At the time of termination, cumulative adjustments to the carrying value of the notes were \$0.7 million and \$18.1 million representing the cash inflows upon termination related to the \$300 million and \$500 million notes, respectively. Beginning in the fourth quarter of 2015, these cumulative adjustments will be amortized to interest expense over the expected remaining term of each respective note and will accordingly decrease the annual effective interest rate for the \$300 million and \$500 million notes for the remaining term of the notes by 0.16% and 0.56%, respectively. The impact of these swaps including amortization resulted in an effective interest rate on the \$300 million and \$500 million notes of 0.95% and 1.57%, respectively, for 2015. The fair value adjustments and subsequent amortization have been excluded from the aggregate principal debt maturities table presented below. In the first quarter of 2015, we also entered into a cross currency swap with a total notional of EUR 265 million (\$300 million upon execution) in order to hedge a portion of the foreign currency translational impacts of our European investment. As a result of this cross currency swap and the above mentioned interest rate swaps, we economically converted the \$300 million notes and associated interest to a floating rate EUR denomination. During the fourth quarter of 2015, we voluntarily cash settled the EUR 265 million notional cross currency swap associated with the \$300 million notes simultaneously with the voluntary settlement of the interest rate swaps discussed previously resulting in a separate cash inflow of \$16.0 million. See Note 16, "Derivative Instruments and Hedging Activities" for further details.

(5) During the second quarter of 2014, we entered into a five-year, \$750 million revolving multi-currency credit facility, which provides a \$100 million sub-facility available for the issuance of letters of credit. This revolving facility supports our \$750 million commercial paper program. Concurrent with the transaction, we incurred \$1.8 million of issuance costs related to this revolving credit facility which are being amortized over the term of the agreement and recognized \$1.3 million of accelerated amortization related to the termination of the pre-existing facilities during 2014. As of December 31, 2015, and December 31, 2014, we had \$750 million available to draw on under this revolving credit facility as there were no outstanding borrowings on the revolving credit facility nor was there any outstanding commercial paper. As part of our anticipated financing for the pending Acquisition, we

amended this facility during the fourth quarter of 2015 to increase the maximum leverage ratio to 5.75x debt to EBITDA effective following the completion of the pending Acquisition, with a decline to 3.75x debt to EBITDA in the fourth year following the closing of transaction.

As of December 31, 2015, we had \$18.7 million in bank overdrafts and \$39.6 million in bank cash related to our (6) cross-border, cross-currency cash pool for a net positive position of \$20.9 million. As of December 31, 2014, we had

117

\$64.6 million in bank overdrafts and \$80.0 million in bank cash related to our cross-border, cross-currency cash pool for a net positive position of \$15.4 million.

We had total outstanding borrowings of \$7.5 million and \$4.9 million under our two JPY overdraft facilities as of December 31, 2015, and December 31, 2014, respectively. We had no outstanding borrowings under our CAD or (7) GBP facilities as of December 31, 2015, or December 31, 2014. A summary of our borrowing availability is presented below. See Note 18, "Commitments and Contingencies" for further discussion related to letters of credit.

- JPY 900 million overdraft facility at Japan base rate + 0.45%
- JPY 500 million overdraft facility at Japan base rate + 0.35%
- CAD 30.0 million line of credit at USD Prime or CAD Prime depending on the borrowing currency
- GBP 20.0 million line of credit consisting of a GBP 10 million overdraft facility at GBP LIBOR +1.5% and GBP 10 million uncommitted money market facility

Additionally, during the third quarter of 2015, we did not extend our revolving credit facility supporting the operations of our Europe segment which provided €100 million on an uncommitted basis through September 2015. We had no outstanding borrowings under this revolving credit facility at the time of expiration or as of December 31, 2014.

(8) Included in short-term borrowings is \$2.5 million and \$5.6 million related to other short-term borrowings within our Europe business as of December 31, 2015, and December 31, 2014, respectively.

Debt Fair Value Measurements

We utilize market approaches to estimate the fair value of certain outstanding borrowings by discounting anticipated future cash flows derived from the contractual terms of the obligations and observable market interest and foreign exchange rates. As of December 31, 2015, and December 31, 2014, the fair value of our outstanding long-term debt (including current portion) was \$2,883.4 million and \$3,240.6 million, respectively. All senior notes are valued based on significant observable inputs and would be classified as Level 2 in the fair value hierarchy. The carrying values of all other outstanding long-term borrowings and our short-term borrowings approximate their fair values and are also classified as Level 2.

Financing of Pending Acquisition

In connection with the pending Acquisition, on December 16, 2015, we entered into a 364-day bridge loan agreement by and among the Company, the lenders party thereto, and Citibank, N.A., as Administrative Agent. The bridge loan agreement provides for a 364-day bridge loan facility of up to \$9.3 billion. In connection with the bridge loan, during the year ended December 31, 2015, we paid commitment fees of \$49.2 million, which have been deferred within other current assets on the consolidated balance sheet as of December 31, 2015, and are being amortized to other income (expense) within the consolidated statement of operations over the 364-day term. For the year ended December 31, 2015, \$6.9 million was amortized to other expense. Additionally, on December 16, 2015, we also entered into a term loan agreement by and among the Company, the lenders party thereto, and Citibank, N.A., as Administrative Agent. The term loan agreement provides for total term loan commitments of \$1.5 billion in a 3-year tranche and \$1.5 billion in a 5-year tranche, for an aggregate principal amount of \$3.0 billion. In connection with the term loan, during the year ended December 31, 2015, we paid issuance fees of \$8.3 million, which have been deferred within other assets on the consolidated balance sheet as of December 31, 2015, and is being amortized to interest expense within the consolidated statement of operations over the respective 3-year and 5-year term of each loan. For the year ended December 31, 2015, \$0.1 million of the issuance fees was amortized to interest expense. As of December 31, 2015, there were no outstanding borrowings on the bridge loan or the term loan. See Note 21, "Pending Acquisition" for further details regarding the pending Acquisition.

Other

Under the terms of each of our debt facilities, we must comply with certain restrictions. These include restrictions on priority indebtedness (certain threshold percentages of secured consolidated net tangible assets), leverage thresholds, liens, and restrictions on certain types of sale lease-back transactions and transfers of assets. As of December 31, 2015, and December 31, 2014, we were in compliance with all of these restrictions and have met all debt payment obligations.

As of December 31, 2015, the aggregate principal debt maturities of long-term debt and short-term borrowings, based on foreign exchange rates at December 31, 2015, for the next five years are as follows:

Year	Amount (In millions)
2016	\$28.7
2017	661.3
2018	289.0
2019	—
2020	361.3
Thereafter	1,600.0
Total	\$2,940.3

Interest

Interest incurred, capitalized and expensed were as follows:

	For the years ended		
	December 31, 2015 (In millions)	December 31, 2014	December 31, 2013
Interest incurred ⁽¹⁾	\$121.1	\$147.7	\$185.2
Interest capitalized	(0.8) (2.7) (1.4
Interest expensed	\$120.3	\$145.0	\$183.8

Interest incurred includes total non-cash interest of \$11.2 million in 2013, related to the €500 million convertible note and the \$575 million convertible note, which matured in 2013. Interest incurred also includes expense for the (1) change in fair value of the embedded conversion feature related to €500 million convertible note of \$5.4 million for 2013, as well as amortization of debt discounts and issuance costs for each period presented. See Note 16, "Derivative Instruments and Hedging Activities" for further discussion.

13. Share-Based Payments

The MCBC Incentive Compensation Plan (the "Incentive Compensation Plan") was amended and restated effective February 19, 2015, to reaffirm the ability to grant awards that are intended to qualify as performance-based compensation, to extend the term of the Incentive Compensation Plan for ten years and to incorporate certain corporate governance practices. We continue to have only one share-based compensation plan as of December 31, 2015, and all outstanding awards fall under this plan.

Molson Coors Brewing Company Incentive Compensation Plan

We issue the following types of awards related to shares of Class B common stock to certain directors, officers, and other eligible employees, pursuant to the Incentive Compensation Plan: RSUs, DSUs, PUs, PSUs, stock options and SOSARs.

RSU awards are issued at the market value equal to the price of our stock at the date of the grant and vest over a period of three years. In 2015, 2014 and 2013, we granted 0.2 million, 0.3 million and 0.3 million RSUs, respectively, with a weighted-average market value of \$71.45, \$57.84 and \$42.74 each, respectively. Prior to vesting, RSUs have no voting rights.

DSU awards, under the Directors' Stock Plan pursuant to the Incentive Compensation Plan, are elections made by non-employee directors of MCBC that enable them to receive all or one-half of their annual cash retainer payments in our stock. The deferred stock unit awards are issued at the market value equal to the closing price on the date of the grant. The DSUs are paid in shares of stock upon termination of service. Prior to vesting, DSUs have no voting rights. In 2015, 2014 and 2013, we granted a small number of DSUs with a weighted-average market value of \$79.34, \$69.78 and \$50.56 per share, respectively.

PUs were previously granted based on a target value established at the date of grant and vest upon completion of a service requirement. The payout value can range from zero to two times the target value based on achievement of specified adjusted earnings per share targets. The PU award value can be settled in cash or shares, or partly in cash and partly in shares, at the discretion of the Company. If settled in shares, it will be based on the closing Class B

common stock price on the date of

119

vesting. Prior to vesting, no shares are issued and PUs have no voting or dividend rights. We account for the PUs as liabilities, resulting in variable compensation expense until settled. The variability of compensation expense arises primarily from changing estimates of adjusted earnings per share. Changes in the price of Class B common stock during the vesting period do not impact compensation expense but will impact the number of shares ultimately issued if the awards are settled in stock. Compensation expense is determined based upon the estimated fair value and recognized over the requisite service period of the grant once we have determined that achievement of the performance condition is probable. If in the future it becomes improbable that the performance condition will be met, previously recognized compensation cost will be reversed, and no compensation cost will be recognized. The service condition vesting period is three years. In 2015 and 2014, there were no PUs granted and in 2013 there were a small number of PUs granted. As of December 31, 2015, there are no PUs outstanding.

As part of our annual grant in the first quarter of 2015, 2014 and 2013 we granted PSUs, rather than PUs that we had historically granted, for performance awards. PSUs are granted with a target value established at the date of grant and vest upon completion of a service requirement. The settlement amount of the PSUs is determined based on market and performance metrics, which include our total shareholder return performance relative to the S&P 500 and specified internal performance metrics designed to drive greater shareholder return. PSU compensation expense is based on a fair value assigned to the market metric using a Monte Carlo model, which will remain constant throughout the vesting period of three years, and a performance multiplier, which will vary due to changing estimates of the performance metric condition. In 2015 we granted 0.1 million PSU's with a weighted-average fair value of \$74.42 and in each of 2014 and 2013 we granted 0.2 million PSUs, with a weighted-average fair value of \$58.69 and \$43.10 each, respectively.

Stock options are granted with an exercise price equal to the market value of a share of Class B common stock on the date of grant. Stock options have a term of ten years and generally vest over three years. During 2015, 2014 and 2013, we granted 0.1 million, 0.2 million and 0.2 million options, respectively, each with a weighted-average fair value of \$13.98, \$12.78 and \$8.39, respectively.

SOSARs were previously granted with an exercise price equal to the market value of a share of Class B common stock on the date of grant. The SOSARs entitle the award recipient to receive shares of the Company's stock with a fair value equal to the excess of the trading price over the exercise price of such shares on the date of the exercise. SOSARs have a term of ten years and generally vest over three years. No SOSARs were granted in 2015, 2014 or 2013.

The following table summarizes share-based compensation expense and includes share-based compensation related to pre-existing MCBC equity awards held by former MCBC employees that have transferred to MillerCoors:

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
	(In millions)		
Pretax compensation expense	\$20.7	\$23.5	\$19.5
Tax benefit	(5.6) (7.0) (5.6
After-tax compensation expense	\$15.1	\$16.5	\$13.9

As of December 31, 2015, there was \$30.9 million of total unrecognized compensation cost from all share-based compensation arrangements granted under the Incentive Compensation Plan, related to unvested awards. This compensation expense is expected to be recognized over a weighted-average period of 1.8 years.

The following table represents non-vested RSUs, DSUs, PUs and PSUs as of December 31, 2015, and the activity during 2015:

	RSUs and DSUs		PUs		PSUs	
	Units	Weighted-average grant date fair value per unit	Units	Weighted-average fair value per unit	Units	Weighted-average grant date fair value per unit
	(In millions, except per share amounts)					
Non-vested as of December 31, 2014	0.7	\$47.75	0.5	\$3.22	0.4	\$50.49

Edgar Filing: MOLSON COORS BREWING CO - Form 10-K

Granted	0.2	\$70.95	—	\$—	0.1	\$74.42
Vested	(0.2)	\$42.71	(0.5)	\$2.89	—	\$—
Forfeited	(0.1)	\$53.14	—	\$—	—	\$—
Non-vested as of December 31, 2015	0.6	\$56.23	—	\$—	0.5	\$57.01

The weighted-average fair value per unit for the non-vested PSUs is \$71.66 as of December 31, 2015.

120

The total intrinsic values of RSUs and DSUs vested during 2015, 2014 and 2013 were \$17.5 million, \$12.9 million and \$10.2 million, respectively. The total share based liabilities paid for PUs vested during 2015, 2014, and 2013 were \$1.5 million, \$2.8 million and \$6.9 million, respectively. The aggregate intrinsic value of PUs outstanding at December 31, 2015, and December 31, 2014, was zero and \$1.7 million, respectively.

The following table represents the summary of options and SOSARs outstanding as of December 31, 2015, and the activity during 2015:

	Shares outstanding			Shares exercisable at year end				
	Shares	Weighted-average exercise price	Weighted-average remaining contractual life (years)	Aggregate intrinsic value	Shares	Weighted-average exercise price	Weighted-average remaining contractual life (years)	Aggregate intrinsic value
(In millions, except per share amounts and years)								
Outstanding as of December 31, 2014	2.2	\$45.33	5.0	\$64.6	1.8	\$44.36	4.3	\$54.9
Granted	0.1	\$74.81						
Exercised	(1.0)	\$43.96						
Forfeited	—	\$—						
Outstanding as of December 31, 2015	1.3	\$49.49	4.8	\$58.0	1.1	\$46.02	4.0	\$51.2

The total intrinsic values of options exercised during 2015, 2014 and 2013 were \$34.1 million, \$30.9 million and \$36.0 million, respectively. During 2015, 2014 and 2013, cash received from stock options exercises was \$34.6 million, \$44.4 million and \$88.8 million, respectively, and the excess tax benefit to be realized for the tax deductions from these option exercises and other awards was \$10.0 million, \$8.2 million and \$7.7 million, respectively.

The shares of common stock to be issued under the stock option plans are made available from authorized and unissued MCBC common stock. As of December 31, 2015, there were 6.8 million shares of MCBC common stock available for the issuance under the Incentive Compensation Plan.

The fair value of each option granted in 2015, 2014 and 2013 was determined on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
Risk-free interest rate	1.70%	2.29%	1.43%
Dividend yield	2.20%	2.57%	2.88%
Volatility range	21.65% - 29.90%	22.66% - 26.57%	22.39% - 25.90%
Weighted-average volatility	23.71%	25.59%	25.02%
Expected term (years)	5.7	7.5	7.7
Weighted-average fair value	\$13.98	\$12.78	\$8.39

The risk-free interest rates utilized for periods throughout the contractual life of the stock options are based on a zero-coupon U.S. Treasury security yield at the time of grant. Expected volatility is based on a combination of historical and implied volatility of our stock. The expected term of stock options is estimated based upon observations of historical employee option exercise patterns and trends of those employees granted options in the respective year.

The fair value of the market metric for each PSU granted in 2015, 2014 and 2013 was determined on the date of grant using a Monte Carlo model to simulate total stockholder return for MCBC and peer companies with the following weighted-average assumptions:

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
Risk-free interest rate	1.06%	0.72%	0.33%
Dividend yield	2.20%	2.57%	2.88%
Volatility range	12.73% - 62.28%	12.45% - 72.41%	12.18% - 69.37%
Weighted-average volatility	21.53%	21.72%	21.13%
Expected term (years)	2.8	2.8	2.8
Weighted-average fair market value	\$74.42	\$58.69	\$43.10

The risk-free interest rates utilized for periods throughout the expected term of the PSUs are based on a zero-coupon U.S. Treasury security yield at the time of grant. Expected volatility is based on historical volatility of our stock as well as the stock of our peer firms, as shown within the volatility range above, for a period from the grant date consistent with the expected term. The expected term of PSUs is calculated based on the grant date to the end of the performance period.

14. Accumulated Other Comprehensive Income (Loss)

	MCBC shareholders				
	Foreign currency translation adjustments	Gain (loss) on derivative instruments	Pension and Postretirement Benefit adjustments	Equity Method Investments	Accumulated other comprehensive income (loss)

(1) During the first quarter of 2013, we recorded a tax adjustment related to the reclassification of amounts from the investment in MillerCoors to AOCI that was recorded in the fourth quarter of 2012 to reflect our proportionate share of MillerCoors AOCI at formation. We made this reclassification in 2012 as we believe the new presentation provides improved transparency of our share of MillerCoors AOCI. This tax adjustment, which should have been

made in 2012 with the reclassification, was not material to either the current or prior period financial statements taken as a whole and therefore the adjustment was recorded in 2013 and prior periods do not reflect the adjustment. We have significant levels of net assets denominated in currencies other than the USD due to our operations in foreign countries, and therefore we recognize OCI gains and/or losses when those items are translated to USD. The foreign currency translation losses recognized during 2015 and 2014 are due to the weakening of the CAD, GBP and other currencies of our Europe operations versus the USD. The foreign currency translation losses recognized in 2013 are primarily due to the weakening of the CAD slightly offset by the strengthening of the GBP and certain other currencies of our European operations. OCI gains/losses related to our pension and OPEB plans are due to changes in our plan obligations, driven by actuarial gains/losses related to fluctuations in discount rate and other actuarial assumptions. OCI associated with our equity method investments is related to our 42% share of the MillerCoors OCI activity (unrealized gains and losses on derivative instruments and pension obligations) and changes to BRI and BDL pension obligations.

(1) These components of AOCI are included in the computation of net periodic pension and other postretirement benefit cost. See Note 15, "Employee Retirement Plans and Postretirement Benefits" for additional details.

15. Employee Retirement Plans and Postretirement Benefits

We maintain retirement plans for the majority of our employees. Depending on the benefit program, we provide either defined benefit pension or defined contribution plans to our employees in each of our segments. Each plan is managed locally and in accordance with respective local laws and regulations. We have defined benefit pension plans in the U.K., Canada and Japan. All retirement plans for MCBC employees in the U.S. are defined contribution pension plans. Additionally, we offer OPEB plans to the majority of our Canadian, U.S. and Central European employees; these plans are not funded. MillerCoors, BRI and BDL maintain defined benefit pension and postretirement benefit plans as well; however, those plans are excluded from this disclosure as they are equity method investments and not consolidated.

Defined Benefit and OPEB Plans

Net Periodic Pension and OPEB Cost

	For the years ended								
	December 31, 2015			December 31, 2014			December 31, 2013

Curtailment	(1.0)	—	(1.0)	—	—	—
Foreign currency exchange rate change	(355.5)	(25.1)	(380.6)	(286.8)	(14.8)	(301.6)
Benefit obligation at end of year	\$3,500.0	\$136.1	\$3,636.1	\$3,979.3	\$162.2	\$4,141.5
Change in plan assets:						
Prior year fair value of assets	\$3,667.6	\$—	\$3,667.6	\$3,596.2	\$—	\$3,596.2
Actual return on plan assets	142.9	—	142.9	516.5	—	516.5
Employer contributions	256.1	6.1	262.2	33.6	7.6	41.2
Actual employee contributions	0.5	—	0.5	0.7	—	0.7
Benefits and plan expenses paid	(195.6)	(6.1)	(201.7)	(211.9)	(7.6)	(219.5)
Foreign currency exchange rate change	(348.3)	—	(348.3)	(267.5)	—	(267.5)
Fair value of plan assets at end of year	\$3,523.2	\$—	\$3,523.2	\$3,667.6	\$—	\$3,667.6
Funded status:	\$23.2	\$(136.1)	\$(112.9)	\$(311.7)	\$(162.2)	\$(473.9)
Amounts recognized in the Consolidated Balance Sheets:						
Other non-current assets	\$97.2	\$—	\$97.2	\$79.1	\$—	\$79.1
Accounts payable and other current liabilities	(1.6)	(6.6)	(8.2)	(2.8)	(7.3)	(10.1)
Pension and postretirement benefits	(72.4)	(129.5)	(201.9)	(388.0)	(154.9)	(542.9)
Net amounts recognized	\$23.2	\$(136.1)	\$(112.9)	\$(311.7)	\$(162.2)	\$(473.9)

The accumulated benefit obligation for our defined benefit pension plans was \$3,497.9 million and \$3,978.5 million at December 31, 2015, and December 31, 2014, respectively. The \$361.0 million decrease in the net underfunded status of our aggregate pension and OPEB plans from December 31, 2014, to December 31, 2015, was primarily driven by increased employer contributions, predominantly related to the GBP 150 million (\$227.1 million at payment date) contribution made during the first quarter of 2015, and the increase in the discount rates used, discussed below.

Edgar Filing: MOLSON COORS BREWING CO - Form 10-K

All defined benefit pension and OPEB plans with the exception of our U.K. defined benefit plan as of December 31, 2015, had aggregate accumulated benefit obligations and projected benefit obligations in excess of plan assets. The change in the U.K. defined benefit plan projected benefit obligation is primarily due to 2015 funding and an increased discount rate. Information for these plans with aggregate accumulated benefit obligations and projected benefit obligations in excess of plan assets is as follows:

	As of December 31, 2015			As of December 31, 2014		
	Pension	OPEB	Consolidated	Pension	OPEB	Consolidated
	(In millions)					
Accumulated benefit obligation	\$566.5	\$5.8	\$572.3	\$3,272.9	\$162.2	\$3,435.1
Projected benefit obligation	\$567.3	\$136.1	\$703.4	\$3,273.4	\$162.2	\$3,435.6
Fair value of plan assets	\$493.3	\$—	\$493.3	\$2,882.6	\$—	\$2,882.6

Accumulated Other Comprehensive Income

Amounts recognized in AOCI not yet recognized as components of net periodic pension and OPEB cost, pretax were as follows:

	As of December 31, 2015			As of December 31, 2014		
	Pension	OPEB	Consolidated	Pension	OPEB	Consolidated
	(In millions)					
Net actuarial loss (gain)	\$839.2	\$(10.3)	\$828.9	\$924.6	\$(7.0)	\$917.6
Net prior service cost	3.5	(0.1)	3.4	2.4	(0.5)	1.9
Total not yet recognized	\$842.7	\$(10.4)	\$832.3	\$927.0	\$(7.5)	\$919.5

Changes in plan assets and benefit obligations recognized in OCI, pretax, were as follows:

	As of December 31, 2015			As of December 31, 2014		
	Pension	OPEB	Consolidated	Pension	OPEB	Consolidated
	(In millions)					
Accumulated other comprehensive loss (income) as of December 31, 2013	\$814.2	\$(25.6)	\$788.6			
Amortization of prior service costs (benefit)	(0.6)	3.0	2.4			
Amortization of net actuarial loss (gain)	(36.3)	0.9	(35.4)			
Current year actuarial loss (gain)	159.7	12.6	172.3			
Foreign currency exchange rate change	(10.0)	1.6	(8.4)			
Accumulated other comprehensive loss (income) as of December 31, 2014	\$927.0	\$(7.5)	\$919.5			
Amortization of prior service costs (benefit)	(0.6)	0.3	(0.3)			
Amortization of net actuarial loss (gain)	(46.9)	0.3	(46.6)			
Current year actuarial loss (gain)	(39.3)	(2.7)	(42.0)			
Foreign currency exchange rate change	2.5	(0.8)	1.7			
Accumulated other comprehensive loss (income) as of December 31, 2015	\$842.7	\$(10.4)	\$832.3			

Amortization of AOCI expected to be recognized in net periodic pension and OPEB cost during fiscal year 2016 pretax is as follows:

	Pension	OPEB	Consolidated
	(In millions)		
Amortization of net prior service cost (gain)	\$0.8	\$—	\$0.8
Amortization of actuarial net loss (gain)	\$(11.1)	\$(0.1)	\$(11.2)

Assumptions

Periodic pension and OPEB cost is actuarially calculated annually for each individual plan based on data available at the beginning of each year. Assumptions used in the calculation include the settlement discount rate selected and disclosed at the end of the previous year as well as other assumptions detailed in the table below. The weighted-average rates used in determining the periodic pension and OPEB cost for the fiscal years 2015, 2014 and 2013 were as follows:

	For the years ended		December 31, 2014		December 31, 2013	
	Pension	OPEB	Pension	OPEB	Pension	OPEB
Weighted-average assumptions:						
Settlement discount rate ⁽¹⁾	3.70%	4.15%	4.57%	4.79%	4.18%	4.12%
Rate of compensation increase	2.50%	N/A	2.50%	N/A	2.50%	N/A
Expected return on plan assets ⁽²⁾	5.46%	N/A	6.16%	N/A	5.83%	N/A
Health care cost trend rate	N/A	Ranging ratably from 7.7% in 2015 to 4.5% in 2028	N/A	Ranging ratably from 7.7% in 2014 to 4.5% in 2028	N/A	Ranging ratably from 7.9% in 2013 to 4.5% in 2028

The decrease in the weighted-average discount rates used for our defined benefit pension plans and postretirement (1) plans at December 31, 2015, from December 31, 2014, largely resulted from expectations for global GDP growth at a slower rate than prior years, along with global deflationary factors.

We develop our long term expected return on assets ("EROA") assumptions annually with input from independent investment specialists including our actuaries, investment consultants and other specialists. Each EROA assumption is based on historical data, including historical returns, historical market rates and is calculated for each (2) plan's individual asset class. The calculation includes inputs for interest, inflation, credit, and risk premium (active investment management) rates and fees paid to service providers. We consider our EROA to be a significant management estimate. Any material changes in the inputs to our methodology used in calculating our EROA could have a significant impact on our reported defined benefit pension plans' expense.

Benefit obligations are actuarially calculated annually at the end of each year based on the assumptions detailed in the table below. Obligations under the OPEB plans are determined by the application of the terms of medical and life insurance plans, together with relevant actuarial assumptions and health care cost trend rates. The weighted-average rates used in determining the projected benefit obligation for defined pension plans and the accumulated postretirement benefit obligation for OPEB plans, as of December 31, 2015, and December 31, 2014, were as follows:

	As of December 31, 2015		As of December 31, 2014	
	Pension	OPEB	Pension	OPEB
Weighted-average assumptions:				
Settlement discount rate	3.82%	4.05%	3.70%	4.15%
Rate of compensation increase	2.00%	N/A	2.50%	N/A
Health care cost trend rate	N/A	Ranging ratably from 7.7% in 2016 to 4.5% in 2028	N/A	Ranging ratably from 7.7% in 2015 to 4.5% in 2028

The change to the weighted-average discount rates used for our defined benefit pension plans and postretirement plans at December 31, 2015, from December 31, 2014, was a result of the continued volatile nature of the global economic environment.

Assumed health care cost trend rates have a significant effect on the amounts reported for OPEB health care plans. A one-percentage point change in assumed health care cost trend rates would have the following effects on related OPEB plans:

	1% point increase (unfavorable) (In millions)	1% point decrease favorable
Effect on total of service and interest cost components	\$(1.3)) \$1.0
Effect on postretirement benefit obligations	\$(19.5)) \$16.7

Investment Strategy

The obligations of our defined benefit pension plans in Canada and the U.K. are supported by assets held in trusts for the payment of future benefits. The business segments are obligated to adequately fund these asset trusts. The underlying investments within our defined benefit pension plans include: cash and short term instruments, debt securities, equity securities, investment funds, and other investments including hedge fund of funds and real estate. Investment allocations reflect the customized strategies of the respective plans.

The plans use liability driven investment strategies in managing defined pension benefits. For all defined benefit pension plan assets the plans have the following primary investment objectives:

- (1) optimize the long-term return on plan assets at an acceptable level of risk and manage projected future cash contributions;
- (2) maintain a broad diversification across asset classes and among investment managers;
- (3) manage the risk level of the plan's assets in relation to the plans' liabilities

Each plan's respective allocation targets promote optimal expected return and volatility characteristics given a focus on a long-term time horizon for fulfilling the plans' obligations. All assets are managed by external investment

managers with a

128

mandate to either match or outperform their benchmark. The plans use different asset managers in the U.K. and Canada and each plan's respective asset allocation could be impacted by a change in asset managers. The U.K. plan committed to investing with certain investment managers in 2015 resulting in a change in asset allocation during the year.

Our investment strategies for our defined benefit pension plans also consider the funding status for each plan. For defined benefit pension plans that are highly funded, assets are invested primarily in fixed income holdings that have a similar duration to the associated liabilities. For plans with lower funding levels, the fixed income component is managed in a similar manner to the highly funded plans. In addition to this liability-matching fixed income allocation, these plans also contain exposure to return generating assets including: equities, real estate, debt, and other investments held with the goal of producing higher returns, which may also have a higher risk profile. These investments are diversified by investing globally with limitations placed on issuer concentration.

Both our U.K. and Canadian plans hedge a portion of the foreign exchange exposure between plan assets which are not denominated in the local plan currency and the local currency as the Canadian and U.K. pension liabilities will be settled in CAD and GBP, respectively.

Target Allocations

The following compares target asset allocation percentages with actual asset allocations on a weighted-average asset basis at December 31, 2015:

	Target allocations	Actual allocations
Equities	27.8%	29.8%
Fixed income	53.3%	51.7%
Hedge funds	6.1%	6.3%
Real estate	3.7%	3.7%
Other	9.1%	8.5%

Significant Concentration Risks

We periodically evaluate our defined benefit pension plan assets for concentration risks. As of December 31, 2015, we did not have any individual underlying asset position that composed a significant concentration of each plan's overall assets. However, we currently have significant plan assets invested in U.K., U.S. and Canadian government fixed income holdings. A provisional credit rating downgrade for any of these governments could negatively impact the asset values.

Further, as our benefit plans maintain exposure to non-government investments, a significant system-wide increase in credit spreads would also negatively impact the reported plan asset values. In general, equity and fixed income risks have been mitigated by company-specific concentration limits and by utilizing multiple equity managers. We do have significant amounts of assets invested with individual fixed income and hedge fund managers, and so the plans use outside investment consultants to aid in the oversight of these managers and fund performance.

Valuation Techniques

We use a variety of industry accepted valuation techniques to value our plan assets. The techniques vary depending upon instrument type. Whenever possible, we prioritize the use of observable market data in our valuation processes. We use market, income and cost approaches to value our plan assets as of period end. See Note 1, "Basis of Presentation and Summary of Significant Accounting Policies" for additional information on our fair value methodologies and accounting policies. We have not changed our fair value techniques used to value plan assets this year.

Major Categories of Plan Assets

As of December 31, 2015, our major categories of plan assets included the following:

Cash and short-term instruments—Includes cash, trades awaiting settlement, bank deposits, short-term bills and short-term notes. Our "trades awaiting settlement" category includes payables and receivables associated with asset purchases and sales that are awaiting final cash settlement as of year end due to the use of trade date accounting for our pension plans assets. These payables normally settle within a few business days of the purchase or sale of the respective asset. The respective assets are included in or removed from our year end plan assets and categorized in their respective asset categories in the fair value hierarchy below. We include these items in Level 1 of this hierarchy,

as the values are derived from quoted prices in active markets. Short-

129

term instruments are included in Level 2 of the fair value hierarchy as these are highly liquid instruments that are valued using observable inputs, but their asset values are not publicly quoted.

Debt securities—Includes various government and corporate fixed income securities, interest and inflation-linked assets such as bonds and swaps, collateralized securities, and other debt securities. The majority of the plans' fixed income assets trade on "over the counter" exchanges, which provides observable inputs that are the primary data used to determine each individual investment's fair value. We also use independent pricing vendors, as well as matrix pricing techniques. Matrix pricing uses observable data from other similar investments as the primary input to determine the individual security's fair value. Government and corporate fixed income securities are generally classified as Level 2 in the fair value hierarchy as they are valued using observable inputs. Assets included in our collateralized securities include mortgage backed securities and collateralized mortgage obligations, which are considered Level 3 due to the use of the significant unobservable inputs used in deriving these assets' fair values.

Equities—Includes publicly traded common and other equity-like holdings, primarily publicly traded common stock and real estate investment trusts. Equity assets are well diversified between international and domestic investments. We consider equities quoted on public exchanges as Level 1 while other assets that are not quoted on public exchanges but valued using significant observable inputs as Level 2 depending on the individual asset's characteristics.

NAV per share practical expedient—Includes our debt funds, equity funds, hedge fund of funds, real estate fund holdings and private equity funds. The market values for these funds are based on the net asset values multiplied by the number of shares owned.

Other—Includes repurchase agreements, recoverable taxes for taxes paid and awaiting reclaim due to the tax exempt nature of the pension plan, venture capital, and private equity. Repurchase agreements are agreements where our plan has created an asset exposure using borrowed assets, creating a repurchase agreement liability, to facilitate the trade. The assets associated with the repurchase agreement are included in the other category in the fair value hierarchy, and the repurchase agreement liability is classified as Level 1 in the hierarchy, as the liability is valued using quoted prices in active markets. When determining the presentation of our target and asset allocations for repurchase agreements, we are viewing the asset type, as opposed to the investment vehicle, and accordingly include the associated assets within fixed income, specifically interest and inflation linked assets. We include recoverable tax items in Level 1 of this hierarchy, as these are cash receivables and the values are derived from quoted prices in active markets. Private equity is included in Level 3 as the values are based upon the use of unobservable inputs.

Fair Value Hierarchy

The following presents our fair value hierarchy for our defined benefit pension plan assets excluding investments using the NAV per share practical expedient (in millions):

	Total at December 31, 2015	Fair value measurements as of December 31, 2015		
		Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Cash and cash equivalents

Total gain or loss (realized/unrealized):	
Realized gain (loss)	—
Unrealized gain (loss) included in AOCI	(2.4)
Purchases, issuances, settlements	141.2
Transfers in/(out) of Level 3	—
Foreign exchange translation (loss)/gain	(11.5)
Balance at December 31, 2015	\$247.2

Amounts have been adjusted to reflect the change in presentation for investments using the NAV per share (1)practical expedient and are excluded from the fair value hierarchy and level 3 rollforward. See reconciliation above and Note 2, "New Accounting Pronouncements" for further discussion.

Expected Cash Flows

In 2016, we expect to make contributions to our defined benefit pension plans of up to approximately \$20 million and benefit payments under our OPEB plans of approximately \$10 million based on foreign exchange rates as of December 31, 2015. MillerCoors, BRI and BDL contributions to their respective defined benefit pension plans are excluded here, as they are not consolidated in our financial statements. Plan funding strategies are influenced by employee benefits, tax laws and plan governance documents.

Expected future benefit payments for defined benefit pension and OPEB plans, based on foreign exchange rates at December 31, 2015, are as follows:

Expected benefit payments	Pension (In millions)	OPEB
2016	\$189.9	\$6.6
2017	\$193.4	\$6.8
2018	\$196.6	\$7.0
2019	\$199.4	\$7.1
2020	\$202.1	\$7.2
2021-2025	\$1,113.7	\$42.6

Defined Contribution Plans

We offer defined contribution pension plans for the majority of our Canadian, U.S. and U.K. employees. The investment strategy for defined contribution plans are determined by each individual participant. The employer contributions to the U.K. and Canadian plans range from 3% to 8.5% of employee compensation. U.S. employees are eligible to participate in the Molson Coors Savings and Investment Plan, a qualified defined contribution plan, which provides for employer contributions ranging from 5% to 9% of our hourly and salaried employees' compensation (certain employees are also eligible for additional employer contributions). Both employee and employer contributions were made in cash in accordance with participant investment elections.

We recognized costs associated with defined contribution plans of \$17.6 million, \$19.0 million and \$20.5 million in 2015, 2014 and 2013, respectively.

We have a nonqualified defined contribution plan for certain U.S. employees. MCBC has voluntarily funded these liabilities through a Rabbi Trust. These are company assets which are invested in publicly traded mutual funds whose performance is expected to closely match changes in the plan liabilities. As of December 31, 2015, and December 31, 2014, the plan liabilities were equal to the plan assets noted in the table below and were included in other assets and other liabilities on our consolidated balance sheets, respectively.

Fair Value Hierarchy

The following presents our fair value hierarchy for our corporate invested plan assets used in the aforementioned "Rabbi Trust" arrangements.

	Total at December 31, 2015	Fair value measurements as of December 31, 2015

16. Derivative Instruments and Hedging Activities

Overview and Risk Management Policies

We use derivatives as part of our normal business operations to manage our exposure to fluctuations in interest rates, foreign currency and commodity price risk and for other strategic purposes related to our core business. We have established policies and procedures that govern the risk management of these exposures. Our primary objective in managing these exposures is to decrease the volatility of cash flows affected by changes in the underlying rates and prices.

To achieve our objectives, we enter into a variety of financial derivatives, including foreign currency exchange, commodity, interest rate and cross currency swaps. We also enter into physical hedging agreements directly with our suppliers to manage our exposure to certain commodities.

Counterparty Risk

While, by policy, the counterparties to any of the financial derivatives we enter into are major institutions with investment grade credit ratings of at least A- by Standard & Poor's (or the equivalent) or A3 by Moody's, we are exposed to credit-related losses in the event of non-performance by counterparties. This credit risk is generally limited to the unrealized gains in such contracts, should any of these counterparties fail to perform as contracted.

We have established a counterparty credit policy and guidelines that are monitored and reported to management according to prescribed guidelines to assist in managing this risk. As an additional measure, we utilize a portfolio of institutions either headquartered or operating in the same countries that we conduct our business. In calculating the fair value of our derivative balances, we also record an adjustment to recognize the risk of counterparty credit and our non-performance risk.

Price and Liquidity Risks

We base the fair value of our derivative instruments upon market rates and prices. The volatility of these rates and prices are dependent on many factors that cannot be forecasted with reliable accuracy. The current fair values of our contracts could differ significantly from the cash settled values with our counterparties. As such, we are exposed to price risk related to unfavorable changes in the fair value of our derivative contracts.

We may be forced to cash settle all or a portion of our derivative contracts before the expected settlement date upon the occurrence of certain contractual triggers including a change of control, termination event or other breach of agreement. This could have a negative impact on our liquidity. For derivative contracts that we have designated as hedging instruments, early cash settlement would result in the timing of our hedge settlement not being matched to the cash settlement of the forecasted transaction or firm commitment. We may also decide to cash settle all or a portion of our derivative contracts before the expected settlement date through negotiations with our counterparties, which could also impact our cash position.

Due to the nature of our counterparty agreements, we are not able to net positions with the same counterparty across business units. Thus, in the event of default, we may be required to early settle all out-of-the-money contracts, without the benefit of netting the fair value of any in-the-money positions against this exposure.

Collateral

We do not receive and are not required to post collateral unless a change of control event occurs. This termination event would give either party the right to early terminate all outstanding swap transactions in the event that the other party consolidates, merges with, or transfers all or substantially all its assets to, another entity, and the creditworthiness of the surviving entity that has assumed such party's obligations is materially weaker than that of such party. As of December 31, 2015, we did not have any collateral posted with any of our counterparties.

Derivative Accounting Policies

Overview

Our foreign currency forwards are designated in hedging relationships as cash flow hedges. Prior to settlements discussed below, our forward starting interest rate swaps were designated as cash flow hedges, our interest rate swaps were designated as fair value hedges and our cross currency swaps were designated as net investment hedges. In certain situations, we may execute derivatives that do not qualify for, or we do not otherwise seek, hedge accounting but are determined to be important for managing risk. For example, our commodity swaps as well as swaptions that have been entered into subsequent to December 31, 2015, and discussed in Note 21, "Pending Acquisition" are not designated in a hedge accounting relationship. These economic hedges are measured at fair value on our consolidated

balance sheets with changes in fair value recorded in earnings. We have historically elected to apply the NPNS exemption to certain contracts, as applicable. These contracts are typically

135

transacted with our suppliers and include risk management features that allow us to fix the price on specific volumes of purchases for specified delivery periods. We also consider whether any provisions in our contracts represent embedded derivative instruments as defined in authoritative accounting guidance. As of December 31, 2015, we have concluded that no embedded derivative instruments warrant separate fair value accounting.

Hedge Accounting Policies

We formally document all relationships receiving hedge accounting treatment between hedging instruments and hedged items, as well as the risk-management objective and strategy for undertaking hedge transactions pursuant to prescribed guidance. We also formally assess effectiveness both at the hedge's inception and on an ongoing basis, specifically whether the derivatives that are used in hedging transactions have been highly effective in mitigating the risk designated as being hedged and whether those hedges may be expected to remain highly effective in future periods.

We discontinue hedge accounting prospectively when (1) the derivative is no longer highly effective in offsetting changes in the cash flows of a forecasted future transaction; (2) the derivative expires or is sold, terminated, or exercised; (3) it is no longer probable that the forecasted transaction will occur; (4) management determines that designating the derivative as a hedging instrument is no longer appropriate; or (5) management decides to cease hedge accounting.

When we discontinue hedge accounting prospectively, but it continues to be probable that the forecasted transaction will occur in the originally expected period, the existing gain or loss on the derivative remains in AOCI for cash flow hedges and net investment hedges or in the carrying value of the hedged item for fair value hedges and is reclassified into earnings when the forecasted transaction affects earnings. However, if it is no longer probable that a forecasted transaction will occur by the end of the originally specified time period or within an additional two-month period of time thereafter, the gains and losses in AOCI are recognized immediately in earnings. In all situations in which hedge accounting is discontinued and the derivative remains outstanding, we carry the derivative at its fair value on the consolidated balance sheets until maturity, recognizing future changes in the fair value in current period earnings.

Significant Derivative/Hedge Positions

Derivative Activity Related to the Euro 500 Million Convertible Note

In June 2012, we issued a Euro-denominated 500 million Convertible Note to StarBev L.P. simultaneous with the closing of the StarBev acquisition. The Convertible Note's embedded conversion feature was determined to meet the definition of a derivative required to be bifurcated and separately accounted for at fair value with changes in fair value recorded in earnings. In the first quarter of 2013, we began executing a series of financial foreign exchange forward contracts to hedge our risk associated with payments on this Convertible Note. In 2013, the Convertible Note was put to us and settled in full at a premium of \$14.4 million. The related conversion feature was settled in full during 2013 and as a result, all existing foreign exchange forward contracts related to the Convertible Note were settled in the third quarter of 2013. These contracts were not designated in hedge accounting relationships. As such, changes in fair value of these swaps were recorded in other income (expense) in our consolidated statement of operations.

Interest Rate Swaps

In the first quarter of 2015, we entered into interest rate swaps with an aggregate notional amount of \$300 million to economically convert our fixed rate \$300 million notes to floating rate debt consistent with the interest rate swaps on our \$500 million notes entered into during 2014. We received fixed interest payments semi-annually at a rate of 2.0% per annum on our \$300 million hedges and a rate of 3.5% per annum on our \$500 million hedges and paid a rate to our counterparties based on a credit spread plus the three month LIBOR rate, thereby effectively exchanging a fixed interest obligation for a floating interest obligation on both our \$300 million and \$500 million notes.

We entered into these interest rate swap agreements to minimize exposure to changes in the fair value of our \$300 million and \$500 million notes that results from fluctuations in the benchmark interest rate, specifically LIBOR, and designated these swaps as fair value hedges and determined that there is zero ineffectiveness. The changes in fair value of derivatives designated as fair value hedges and the offsetting changes in fair value of the hedged item are recognized in earnings. For the year ended December 31, 2015, the changes in fair value of the interest rate swaps resulted in unrealized gains of \$0.7 million and \$7.3 million on the \$300 million notes and \$500 million notes, respectively, and recorded in interest expense in our consolidated statement of operations, which is fully offset by the changes in fair value of the \$300 million notes and \$500 million notes attributable to the benchmark interest rate, also

recorded in interest expense. For the year ended December 31, 2014, the changes in fair value of the interest rate swaps resulted in an unrealized gain of \$10.8 million on the \$500 million notes recorded in interest expense in our condensed consolidated statement of operations, which is fully offset by the changes in fair value of the \$500 million notes attributable to the benchmark interest rate, also recorded in interest expense.

136

During the fourth quarter of 2015, we voluntarily cash settled our notional of \$300 million as well as our notional of \$500 million which resulted in cash receipts of \$0.7 million and \$18.1 million, respectively, representing the cumulative adjustments to the carrying value of the notes from inception through termination. At the time of settlement we ceased adjusting the carrying value of our \$300 million and \$500 million notes for the fair value movements and these cumulative adjustments are now being amortized to interest expense over the expected remaining term of the respective note. The associated amortization recorded as a benefit to interest expense in 2015 was \$0.4 million. See Note 12, "Debt" for additional details.

Forward Starting Interest Rate Swaps

Prior to the September 2015 issuance of our CAD 500 million notes and CAD 400 million notes, we entered into forward starting interest rate swaps with a notional of CAD 600 million in order to manage our exposure to the volatility of the interest rates associated with the future interest payments on the forecasted debt issuances. The swaps had an effective date of September 2015 and a termination date of September 2025 mirroring the terms of the initially forecasted debt issuance. Under these agreements we were required to early terminate these swaps at the approximate time we issued the previously forecasted debt. We had designated these contracts as cash flow hedges and accordingly, a portion of the CAD 39.2 million (\$29.5 million at settlement) loss on the forward starting interest rate swaps is being reclassified from AOCI and amortized to interest expense over the 5-year and 3-year terms of the CAD 500 million and CAD 400 million notes, respectively, and the remaining portion of the loss will be amortized on future debt issuances covering the 10-year term of the interest rate swap agreements.

Additionally, prior to the 2005 and 2010 issuance of our CAD 900 million and CAD 500 million private placements notes in Canada, we entered into forward starting interest rate swaps in order to manage our exposure to the volatility of the interest rates associated with the future interest payments on the forecasted debt issuances. These swaps had effective dates mirroring the terms of the forecasted debt issuances. Under these agreements we were required to early terminate these swaps at the approximate time we issued the previously forecasted debt. We had designated these contracts as cash flow hedges of a portion of the interest payments on a future forecasted debt issuance. As a result, the realization of the forward starting interest rate swap upon debt issuance, which were originally recorded to AOCI, is currently being reclassified from AOCI and amortized to interest expense over the respective term of the hedged debt. See Note 12, "Debt", for further discussion of our senior notes and the impact of the forward starting interest rates swaps on the effective interest rate of each issuance.

Cross Currency Swaps

In the first quarter of 2015, we entered into a cross currency swap agreement having a total notional of EUR 265 million (\$300 million upon execution) in order to hedge a portion of the foreign currency translational impacts of our European investment. We received floating interest payments quarterly based on a credit spread plus the three month LIBOR (USD coupon) and paid a floating rate to our counterparty based on a credit spread plus EURIBOR (EUR coupon). As a result of this cross currency swap and the above mentioned interest rate swaps, we economically converted the \$300 million notes and associated interest to a floating rate EUR denomination. We designated this cross currency swap as a net investment hedge and accordingly, recorded changes in fair value due to fluctuations in the spot rate to AOCI. During the fourth quarter 2015, we voluntarily cash settled the EUR 265 million (\$300 million) notional cross currency swap and received cash inflows of \$16.0 million which was recorded as a gain within AOCI. During 2013, we cash settled CAD 361 million notional, of our cross currency swaps designated as a net investment hedge of our Canadian operations for \$113.9 million and in January 2014, we early settled the final remaining CAD 241 million notional of our outstanding currency swaps designated as a net investment hedge of our Canadian operations for \$65.2 million.

As of December 31, 2015, and December 31, 2014, we did not have any cross currency swap positions outstanding.

Foreign Currency Forwards

As of year end, we have financial foreign exchange forward contracts in place to manage our exposure to foreign currency fluctuations. We hedge foreign currency exposure related to certain royalty agreements, exposure associated with the purchase of production inputs and imports that are denominated in currencies other than the functional entity's local currency, and other foreign exchanges exposures. These contracts have been designated as cash flow hedges of forecasted foreign currency transactions. We use foreign currency forward contracts to hedge these future forecasted transactions up to a 60 month horizon.

Commodity Swaps

As of year end, we had financial commodity swap contracts in place to hedge changes in the prices of natural gas, aluminum, including surcharges relating to our aluminum exposures, corn and diesel. These contracts allow us to swap our floating exposure to changes in these commodity prices for a fixed rate. These contracts are not designated in hedge accounting

137

relationships. As such, changes in fair value of these swaps are recorded in cost of goods sold in the consolidated statements of operations. We hedge forecasted purchases of natural gas up to 48 months, aluminum up to 60 months, corn up to 60 months and diesel up to 24 months out in the future for use in our supply chain, in line with our risk management policy. For purposes of measuring segment operating performance, the unrealized changes in fair value of the swaps not designated in hedge accounting relationships are reported in Corporate outside of the segment specific operating results until such time that the exposure we are managing is realized. At that time we reclassify the gain or loss from Corporate to the operating segment, allowing our operating segments to realize the economic effects of the derivative without the resulting unrealized mark-to-market volatility.

Derivative Fair Value Measurements

We utilize market approaches to estimate the fair value of our derivative instruments by discounting anticipated future cash flows derived from the derivative's contractual terms and observable market interest, foreign exchange and commodity rates. The fair values of our derivatives also include credit risk adjustments to account for our counterparties' credit risk, as well as our own non-performance risk.

The table below summarizes our derivative assets and liabilities that were measured at fair value as of December 31, 2015, and December 31, 2014. See Note 1, "Basis of Presentation and Summary of Significant Accounting Policies" for further discussion related to measuring fair value derivative instruments.

	Total at December 31, 2015	Fair Value Measurements at December 31, 2015		
		Quoted prices in active markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	(In millions)

	As of December 31, 2015	December 31, 2014
	(In millions)	
Accounts payable and accrued trade payables	\$559.6	\$618.0
Accrued compensation	82.3	106.1
Accrued excise and other non-income related taxes	201.6	215.0
Accrued interest	21.3	27.9
Accrued selling and marketing costs	100.3	126.6
Container liability	70.2	82.5
Other ⁽¹⁾	149.1	128.9
Accounts payable and other current liabilities	\$1,184.4	\$1,305.0

(1) Includes current liabilities related to derivatives, income taxes, pensions and other postretirement benefits and other accrued expenses.

18. Commitments and Contingencies

Letters of Credit

As of December 31, 2015, we had \$44.4 million outstanding in letters of credit with financial institutions. These letters expire throughout 2016 and 2017 and \$16.5 million of the letters contain a feature that automatically renews the letter for an additional year if no cancellation notice is submitted. These letters of credit are being maintained as security for deferred compensation payments, reimbursements to insurance companies, reimbursements to the trustee for pension payments, deductibles or retention payments made on our behalf, various payments due to governmental agencies, operations of underground storage tanks and other general business purposes, and are not included on our consolidated balance sheets.

Guarantees

We guarantee indebtedness and other obligations to banks and other third parties for some of our equity investments and consolidated subsidiaries. As of December 31, 2015, accounts payable and other current liabilities in the

accompanying

142

consolidated balance sheets includes \$16.9 million related to the guarantee of the indebtedness of our equity method investments. See Note 4, "Investments" for more details. Additionally, related to our previous ownership in the Montréal Canadiens, we guarantee its obligations under a ground lease for the Bell Centre Arena (the "Ground Lease Guarantee"). Upon sale of our interest, the new owners agreed to indemnify us in connection with the liabilities we may incur under the Ground Lease Guarantee and provided us with a CAD 10 million letter of credit to guarantee such indemnity. This transaction did not materially affect our risk exposure related to the Ground Lease Guarantee, which continues to be recognized as a liability on our consolidated balance sheets. Other liabilities in the accompanying consolidated balance sheets include \$4.4 million as of December 31, 2015, and \$5.3 million as of December 31, 2014, related to the Ground Lease Guarantee, both of which are classified as non-current.

Supply and Distribution Contracts

We have various long-term supply contracts with unaffiliated third parties and our joint venture partners to purchase materials used in production and packaging. The supply contracts provide that we purchase certain minimum levels of materials throughout the terms of the contracts. Additionally, Tradeteam has distribution agreements with us to provide for transportation and logistics services in the U.K. See Note 4, "Investments" for further discussion. The future aggregate minimum required commitments under these supply and distribution contracts are shown in the table below based on foreign exchange rates as of December 31, 2015. The amounts in the table do not represent all anticipated payments under long-term contracts. Rather, they represent unconditional and legally enforceable committed expenditures:

Year	Amount (In millions)
2016	\$413.3
2017	286.6
2018	267.6
2019	272.0
2020	254.1
Thereafter	701.3
Total	\$2,194.9

Total purchases under our supply and distribution contracts in 2015, 2014 and 2013 were \$918.7 million, \$1,209.2 million and \$1,042.7 million, respectively.

Advertising and Promotions

We have various long-term non-cancelable commitments for advertising, sponsorships and promotions, including marketing at sports arenas, stadiums and other venues and events. Based on foreign exchange rates as of December 31, 2015, these future commitments are as follows:

Year	Amount (In millions)
2016	\$70.2
2017	72.8
2018	72.5
2019	49.0
2020	26.4
Thereafter	115.3
Total	\$406.2

Total advertising expense was \$401.6 million, \$473.9 million and \$447.0 million in 2015, 2014 and 2013, respectively.

Operating Leases

We lease certain office facilities and operating equipment under cancelable and non-cancelable agreements accounted for as operating leases. Based on foreign exchange rates as of December 31, 2015, future minimum lease payments under operating leases that have initial or remaining non-cancelable terms in excess of one year are as follows:

Year	Amount (In millions)
2016	\$30.7
2017	24.6
2018	18.7
2019	14.9
2020	10.0
Thereafter	19.6
Total	\$118.5

Total rent expense was \$30.6 million, \$35.0 million and \$34.3 million in 2015, 2014 and 2013, respectively.

Discontinued Operations

Kaiser

In 2006, we sold our entire equity interest in Kaiser to FEMSA. The terms of the sale agreement require us to indemnify FEMSA for certain exposures related to tax, civil and labor contingencies arising prior to FEMSA's purchase of Kaiser. In addition, we provided an indemnity to FEMSA for losses Kaiser may incur with respect to tax claims associated with certain previously utilized purchased tax credits. We settled a portion of our tax credit indemnity obligation during 2010. The maximum potential claims amount for the remainder of the purchased tax credits (which we believe present less risk than those previously settled), was \$88.4 million as of December 31, 2015. Our total estimate of the indemnity liability as of December 31, 2015, was \$10.1 million, \$4.1 million of which was classified as a current liability and \$6.0 million of which was classified as non-current.

Our estimates consider a number of scenarios for the ultimate resolution of these issues, the probabilities of which are influenced not only by legal developments in Brazil but also by management's intentions with regard to various alternatives that could present themselves leading to the ultimate resolution of these issues. The liabilities are impacted by changes in estimates regarding amounts that could be paid, the timing of such payments, adjustments to the probabilities assigned to various scenarios and foreign currency exchange rates. Our indemnity also covers fees and expenses that Kaiser incurs to manage the cases through the administrative and judicial systems.

Additionally, we also provided FEMSA with indemnity related to all other tax, civil, and labor contingencies existing as of the date of sale. In this regard, however, FEMSA assumed their full share of all of these contingent liabilities that had been previously recorded and disclosed by us prior to the sale on January 13, 2006. However, we may have to provide indemnity to FEMSA if those contingencies settle at amounts greater than those amounts previously recorded or disclosed by us. We will be able to offset any indemnity exposures in these circumstances with amounts that settle favorably to amounts previously recorded. Our exposure related to these indemnity claims is capped at the amount of the sales price of the 68% equity interest of Kaiser, which was \$68.0 million. As a result of these contract provisions, our estimates include not only probability-weighted potential cash outflows associated with indemnity provisions, but also probability-weighted cash inflows that could result from favorable settlements, which could occur through negotiation or settlement programs arising from the federal or any of the various state governments in Brazil. The recorded value of the tax, civil, and labor indemnity liability was \$4.3 million as of December 31, 2015, which is classified as non-current. For the remaining portion of our indemnity obligations, not deemed probable, we continue to utilize probability-weighted scenarios in determining the value of the indemnity obligations.

Future settlement procedures and related negotiation activities associated with these contingencies are largely outside of our control. The sale agreement requires annual cash settlements relating to the tax, civil, and labor indemnities. Indemnity obligations related to purchased tax credits must be settled upon notification of FEMSA's settlement. Due to the uncertainty involved with the ultimate outcome and timing of these contingencies, significant adjustments to the carrying values of the indemnity obligations have been recorded to date, and additional future adjustments may be required. These liabilities are denominated in Brazilian Reais and are therefore, subject to foreign exchange gains or losses, which are recognized in the discontinued operations section of the consolidated statements of operations.

The table below provides a summary of reserves associated with the Kaiser indemnity obligations from December 29, 2012, through December 31, 2015:

	Total indemnity reserves (In millions)
Balance at December 29, 2012	\$27.9
Changes in estimates	—
Foreign exchange impacts	(3.8)
Balance at December 31, 2013	\$24.1
Changes in estimates	—
Foreign exchange impacts	(2.5)
Balance at December 31, 2014	\$21.6
Changes in estimates	—
Foreign exchange impacts	(7.2)
Balance at December 31, 2015	\$14.4

Distribution Litigation

The gains (losses) recorded for the Kaiser indemnities and the distribution litigation are presented within discontinued operations. The table below summarizes the income (loss) from discontinued operations, net of tax, presented on our consolidated statements of operations:

	For the years ended		
	December 31, 2015	December 31, 2014	December 31, 2013
	(In millions)		
Adjustments to Kaiser indemnity liabilities due to foreign exchange gains and losses	\$3.9	\$0.5	\$2.0
Income (loss) from discontinued operations, net of tax	\$3.9	\$0.5	\$2.0

Litigation and Other Disputes and Environmental

Related to litigation, other disputes and environmental issues, we have accrued an aggregate of \$13.1 million as of December 31, 2015, and \$16.6 million as of December 31, 2014. We believe that any reasonably possible losses in excess of the amounts accrued are immaterial to our consolidated financial statements, except as noted below.

In addition to the specific cases discussed below, we are involved in other disputes and legal actions arising in the ordinary course of our business. While it is not feasible to predict or determine the outcome of these proceedings, in our opinion, based on a review with legal counsel, none of these disputes and legal actions is expected to have a material impact on our business, consolidated financial position, results of operations or cash flows. However, litigation is subject to inherent uncertainties and an adverse result in these or other matters may arise from time to time that may harm our business.

During the fourth quarter of 2014 and the first quarter of 2015, we received assessments from a local country regulatory authority related to indirect tax calculations in our Europe operations during the 29 month period prior to receipt of the most recent assessment. The aggregate amount of the assessments received is approximately \$76 million, based on foreign exchange rates at December 31, 2015. While we intend to vigorously challenge the validity of these assessments and defend our position regarding the method of calculation, if the assessments, as issued, are ultimately upheld, they could materially affect our results of operations. Specifically, if fully upheld, we would be required to record a charge at the high-end of the below range of loss, and this charge and on-going implications to our calculations would negatively impact our current and future operating income, respectively. Based on the assessments received and related impacts, we estimate a current range of loss of zero to \$114.7 million, based on foreign exchange rates at December 31, 2015. We continue to apply the methodology challenged in the assessments while the regulatory appeal process remains ongoing, and, as a result, the related range of loss is expected to increase until ultimately resolved. We continue to follow the required regulatory procedures in order to proceed with our appeal of the assessments. We currently believe this appeal process will take several months to reach a formal conclusion. No provision is currently recorded for these assessments or the related range of loss.

In 2013 we became aware of potential liabilities in several European countries primarily related to local country regulatory matters associated with StarBev Holdings S.a.r.l. ("StarBev") pre-acquisition periods. We recorded liabilities related

145

to these matters in the second quarter of 2013 as we finalized purchase price accounting related to the acquisition of StarBev. During the first quarter of 2014, these matters were favorably resolved and we released the associated indirect-tax and income-tax-related reserves, inclusive of post-acquisition accrued interest, resulting in a gain of \$13.0 million recorded within marketing, general and administrative expenses and an income tax benefit of \$18.5 million. As a result of the resolution, in the first quarter of 2014, we released amounts previously withheld with regard to these matters.

While we cannot predict the eventual aggregate cost for environmental and related matters in which we are currently involved, we believe that any payments, if required, for these matters would be made over a period of time in amounts that would not be material in any one year to our results from operations, cash flows or our financial or competitive position. We believe adequate reserves have been provided for losses that are probable and estimable.

Litigation and Other Disputes

On December 12, 2014, a notice of action captioned David Hughes and 631992 Ontario Inc. v. Liquor Control Board of Ontario, Brewers Retail Inc., Labatt Breweries of Canada LP, Molson Coors Canada and Sleeman Breweries Ltd. No. CV-14-518059-00CP was filed in Ontario, Canada. Brewers' Retail Inc. ("BRI") and its owners, including Molson Coors Canada, as well as the Liquor Control Board of Ontario ("LCBO") are named as defendants in the action. The plaintiffs allege that The Beer Store (retail outlets owned and operated by BRI) and LCBO improperly entered into an agreement to fix prices and market allocation within the Ontario beer market to the detriment of licensees and consumers. The plaintiffs seek to have the claim certified as a class action on behalf of all Ontario beer consumers and licensees and, among other things, damages in the amount of CAD 1.4 billion. We note that The Beer Store operates according to the rules established by the Government of Ontario for regulation, sale and distribution of beer in the province. Additionally, prices at The Beer Store are independently set by each brewer and are approved by the LCBO on a weekly basis. As such, we currently believe the claim has been made without merit and we intend to vigorously assert and defend our rights in this lawsuit.

Environmental

When we determine it is probable that a liability for environmental matters or other legal actions exists and the amount of the loss is reasonably estimable, an estimate of the future costs is recorded as a liability in the financial statements. Costs that extend the life, increase the capacity or improve the safety or efficiency of our assets or are incurred to mitigate or prevent future environmental contamination may be capitalized. Other environmental costs are expensed when incurred. Total environmental expenditures recognized as other expense for 2015 were \$0.4 million, partially offset by a release to our reserves of \$0.1 million. Total environmental expenditures for 2014 were \$1.0 million offset by a release to our reserves of \$1.3 million. Total environmental expenditures for 2013 were zero.

Canada

Our Canada brewing operations are subject to provincial environmental regulations and local permit requirements. Our Montréal and Toronto breweries have water treatment facilities to pre-treat waste water before it goes to the respective local governmental facility for final treatment. We have environmental programs in Canada including organization, monitoring and verification, regulatory compliance, reporting, education and training, and corrective action.

We sold a chemical specialties business in 1996. We are still responsible for certain aspects of environmental remediation, undertaken or planned, at those chemical specialties business locations. We have established provisions for the costs of these remediation programs.

United States

We were previously notified that we are or may be a potentially responsible party ("PRP") under the Comprehensive Environmental Response, Compensation and Liability Act or similar state laws for the cleanup of sites where hazardous substances have allegedly been released into the environment. We cannot predict with certainty the total costs of cleanup, our share of the total cost, the extent to which contributions will be available from other parties, the amount of time necessary to complete the cleanups or insurance coverage.

Lowry

We are one of a number of entities named by the Environmental Protection Agency ("EPA") as a PRP at the Lowry Superfund site. This landfill is owned by the City and County of Denver ("Denver") and is managed by Waste Management of Colorado, Inc. ("Waste Management"). In 1990, we recorded a pretax charge of \$30 million, a portion

of which was put into a trust in 1993 as part of a settlement with Denver and Waste Management regarding the then-outstanding litigation. Our settlement was based on an assumed remediation cost of \$120 million (in 1992 adjusted dollars). We are obligated to pay a portion of future costs, if any, in excess of that amount.

146

Waste Management provides us with updated annual cost estimates through 2032. We review these cost estimates in the assessment of our accrual related to this issue. We use certain assumptions that differ from Waste Management's estimates to assess our expected liability. Our expected liability (based on the \$120 million threshold being met) is based on our best estimates available.

The assumptions used are as follows:

- trust management costs are included in projections with regard to the \$120 million threshold, but are expensed only as incurred;

- income taxes, which we believe are not an included cost, are excluded from projections with regard to the \$120 million threshold;

- a 2.5% inflation rate for future costs; and

- certain operations and maintenance costs were discounted using a 2.64% risk-free rate of return.

Based on these assumptions, the present value and gross amount of the costs at December 31, 2015, are approximately \$3.2 million and \$6.2 million, respectively. We did not assume any future recoveries from insurance companies in the estimate of our liability, and none are expected.

Considering the estimates extend through the year 2032 and the related uncertainties at the site, including what additional remedial actions may be required by the EPA, new technologies and what costs are included in the determination of when the \$120 million is reached, the estimate of our liability may change as further facts develop.

We cannot predict the amount of any such change, but additional accruals in the future are possible.

Other

In prior years, we have been notified by the EPA and certain state environmental divisions that we are a PRP, along with other parties, at the Cooper Drum site in southern California, the East Rutherford and Berry's Creek sites in New Jersey and the Chamblee and Smyrna sites in Georgia. Certain former non-beer business operations, which we discontinued use of and sold in the mid-1990s, were involved at these sites. Potential losses associated with these sites could increase as remediation planning progresses.

We are aware of groundwater contamination at some of our properties in Colorado resulting from historical, ongoing, or nearby activities. There may also be other contamination of which we are currently unaware.

Europe and MCI

We are subject to the requirements of governmental and local environmental and occupational health and safety laws and regulations within each of the countries in which we operate. Compliance with these laws and regulations did not materially affect our 2015 capital expenditures, results of operations or our financial or competitive position, and we do not anticipate that they will do so in 2016.

In September 2015, the Environment Agency ("EA") in the U.K. charged one of our subsidiaries with causing or contributing to a sewage fungus problem in a freshwater drain near the Alton brewery, which we closed in the second quarter of 2015. A hearing at the Basingstoke Magistrate's Court (Environment Agency v Molson Coors Brewer (U.K.) Limited) is scheduled for the first quarter of 2016. We believe the matter will be resolved at that time based on prior discussions between such subsidiary and the EA. The estimated likely maximum exposure is not material and has been included in the aggregate accrual noted above. Should this matter not be resolved in the anticipated manner, potential losses associated with this site could increase beyond the amount accrued.

19. Supplemental Guarantor Information

For purposes of this Note 19, including the tables, "Parent Guarantor and 2012 Issuer" shall mean MCBC and "Subsidiary Guarantors" shall mean certain Canadian, U.S. and European subsidiaries reflecting the substantial operations of each of our Canada and U.S. segments, as well as our U.K. operations of our Europe segment.

SEC Registered Securities

On May 3, 2012, MCBC issued \$1.9 billion of senior notes, in a registered public offering, consisting of \$300 million 2.0% senior notes due 2017, \$500 million 3.5% senior notes due 2022, and \$1.1 billion 5.0% senior notes due 2042. These senior notes are guaranteed on a senior unsecured basis by the Subsidiary Guarantors. Each of the Subsidiary Guarantors is

100% owned by the Parent Guarantor. The guarantees are full and unconditional and joint and several. See Note 12, "Debt" for further discussion.

Other Debt

On September 22, 2005, Molson Coors Capital Finance ULC ("MC Capital Finance") issued \$1.1 billion of senior notes consisting of \$300 million 4.85% U.S. publicly registered notes due 2010 and CAD 900 million 5.0% privately placed notes maturing on September 22, 2015. These CAD 900 million senior notes were subsequently exchanged for substantially identical CAD 900 million senior notes which were quantified by way of a prospectus in Canada. In connection with an internal corporate reorganization, Molson Coors International LP ("MCI LP") was subsequently added as a co-issuer of the CAD 900 million senior notes in 2007. The \$300 million senior notes were repaid in 2010. The CAD 900 million notes due September 22, 2015 were fully repaid using the proceeds from the issuance on September 18, 2015 of privately placed CAD 500 million 2.75% notes due 2020, and privately placed CAD 400 million 2.25% notes due 2018. Both offerings are guaranteed by MCBC, and certain of our U.S. and Canadian subsidiaries. Subsequent to settlement of the notes due on September 22, 2015, and local regulatory approval, MC Capital Finance ceased to be a reporting issuer in all the applicable provinces of Canada.

None of our other outstanding debt is publicly registered, and it is all guaranteed on a senior and unsecured basis by the Parent Guarantor and certain Subsidiary Guarantors. These guarantees are full and unconditional and joint and several. See Note 12, "Debt" for details of all debt issued and outstanding as of December 31, 2015.

Presentation

The following information sets forth the condensed consolidating statements of operations for the years ended December 31, 2015, December 31, 2014, and December 31, 2013, condensed consolidating balance sheets as of December 31, 2015, and December 31, 2014, and condensed consolidating statements of cash flows for the years ended December 31, 2015, December 31, 2014, and December 31, 2013. Investments in subsidiaries are accounted for under the equity method; accordingly, entries necessary to consolidate the Parent Guarantor and all of our guarantor and non-guarantor subsidiaries are reflected in the eliminations column. In the opinion of management, separate complete financial statements of MCBC and the Subsidiary Guarantors would not provide additional material information that would be useful in assessing their financial composition.

Historical balance sheet amounts have been adjusted to reflect the adoption of the authoritative guidance requiring debt issuance costs to be presented as a direct reduction from the carrying value of the related debt. See Note 2, "New Accounting Pronouncements" for further discussion.

(1) The sum of the quarterly net income per share amounts may not agree to the full year net income per share amounts. We calculate net income per share based on the weighted average number of outstanding shares during the reporting period. The average number of shares fluctuates throughout the year and can therefore produce a full year result that does not agree to the sum of the individual quarters.

21. Pending Acquisition

On November 11, 2015, Anheuser-Busch InBev SA/NV's ("ABI") announced it had entered into a definitive agreement to acquire SABMiller plc ("SABMiller"). The resulting transaction ("ABI/SABMiller transaction") is currently expected to be finalized in the second half of 2016 subject to ABI and SABMiller shareholder approval and various global regulatory approvals. Concurrently, on November 11, 2015, we entered into a purchase agreement (the "Purchase Agreement") with ABI to acquire, contingent upon the closing of the acquisition of SABMiller by ABI pursuant to the ABI/SABMiller transaction, all of SABMiller's 58% economic interest and 50% voting interest in MillerCoors and all trademarks, contracts and other assets primarily related to the Miller brand portfolio outside of the U.S. and Puerto Rico for \$12.0 billion in cash, subject to downward adjustment as described in the Purchase Agreement (the "Acquisition"). Following the closing of the pending Acquisition, the Company will own 100% of the outstanding equity and voting interests of MillerCoors. Further, as we plan to elect to treat the Acquisition as an asset acquisition for U.S. tax purposes, we expect to receive substantial cash tax benefits for the first 15 years after completion. The pending Acquisition is based on the terms and subject to the conditions set forth in the Purchase Agreement, as incorporated herein by reference as Exhibit 2.4 of Part IV Item 15. The pending Acquisition is expected to be financed through a combination of incremental debt and equity, along with cash on hand. Specifically, in connection with the pending Acquisition, on December 16, 2015, MCBC entered into a \$9.3 billion, 364-day bridge loan agreement by and among the Company, the lenders party thereto, and Citibank, N.A., as Administrative Agent. Additionally, on December 16, 2015, MCBC also entered into a \$3.0 billion term loan agreement by and among the Company, the lenders party thereto, and Citibank, N.A., as Administrative Agent. See Note 12, "Debt" for details regarding the financing entered into during 2015.

On February 3, 2016, we received proceeds of \$2.5 billion, net of issuance and other fees from our January 26, 2016, equity offering of 29.9 million shares of our Class B common stock, inclusive of the underwriters' option to purchase additional shares, which reduced the commitment on our bridge loan to \$6.8 billion, representing the amount MCBC expects to replace with permanent long-term financing between now and the consummation of the pending Acquisition. Related to this expected long-term financing, we entered into swaptions in January 2016 with a total notional of \$855 million to hedge a portion of our anticipated long-term debt issuance. We intend to terminate and settle these swaptions upon maturity or immediately prior to the completion of the associated pending debt issuance in the event that occurs prior to maturity. Additionally, in order to maximize the yield on the cash received from the equity issuance, while maintaining liquidity, MCBC has strategically invested the proceeds in various fixed rate deposit and money market accounts with terms of three months or less.

At this time, we anticipate this acquisition will close in the second half of 2016, subject to necessary regulatory approvals and contingent on the successful closing of the ABI/SABMiller transaction.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer and Interim Chief Financial Officer, we conducted an evaluation of our disclosure controls and procedures as such item is defined under Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended ("Exchange Act"). Based on this evaluation, our Chief Executive Officer and Interim Chief Financial Officer concluded that our disclosure controls and procedures were effective as of December 31, 2015, to provide reasonable assurance that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Interim Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Management necessarily applies its judgment in assessing the costs and benefits of such controls and procedures that, by their nature, can only provide reasonable assurance regarding management's control objectives. Also, we have investments in certain unconsolidated entities that we do not control or manage.

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining effective internal control over financial reporting as such term is defined in Exchange Act Rule 13a-15(f). Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external

159

Table of Contents

purposes in accordance with U.S. generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become ineffective due to changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our Chief Executive Officer and Interim Chief Financial Officer, with assistance from other members of management, assessed the effectiveness of our internal control over financial reporting as of December 31, 2015, based on the framework and criteria established in Internal Control—Integrated Framework (the "2013 Framework"), issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on its evaluation, management has concluded that our internal control over financial reporting was effective as of December 31, 2015.

Our independent registered public accounting firm has audited the effectiveness of our internal control over financial reporting as of December 31, 2015, as stated in the report which appears in Part II—Item 8 Financial Statements and Supplementary Data.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)) during the quarter ended December 31, 2015, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

All of Molson Coors' directors and employees, including its Chief Executive Officer, Interim Chief Financial Officer, and other senior financial officers, are bound by Molson Coors' Code of Business Conduct, which complies with the requirements of the New York Stock Exchange and the SEC to ensure that the business of Molson Coors is conducted in a legal and ethical manner. The Code of Business Conduct covers all areas of professional conduct, including employment policies, conflicts of interest, fair dealing, and the protection of confidential information, as well as strict adherence to all laws and regulations applicable to the conduct of our business. A copy of the Code of Business Conduct is available on the Molson Coors website, www.molsoncoors.com. Molson Coors intends to disclose amendments to, or waivers from, certain provisions of the Code of Business Conduct for executive officers and directors on its website within four business days following the date of such amendment or waiver.

Stockholders and other interested parties may communicate directly with the Chairman of the Board, Chairman of the Audit Committee, the independent Directors as a group or the non-employee Directors as a group by writing to those individuals or the group at the following address: Molson Coors Brewing Company, c/o Corporate Secretary, 1801 California Street, Suite 4600, Denver, Colorado 80202. Correspondence received by the Corporate Secretary will be forwarded to the appropriate person or persons in accordance with the procedures adopted by a majority of the independent directors of the Board.

Additional information concerning our executive officers, directors and corporate governance is incorporated herein by reference to our definitive proxy statement for our 2016 annual meeting of stockholders, which will be filed no later than 120 days after December 31, 2015.

ITEM 11. EXECUTIVE COMPENSATION

Incorporated by reference to our definitive proxy statement for our 2016 annual meeting of stockholders, which will be filed no later than 120 days after December 31, 2015.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Incorporated by reference to our definitive proxy statement for our 2016 annual meeting of stockholders, which will be filed no later than 120 days after December 31, 2015.

Equity Compensation Plan Information

The following table summarizes information about the Molson Coors Brewing Company Incentive Compensation Plan (the "Incentive Compensation Plan") as of December 31, 2015. All outstanding awards shown in the table below relate to our Class B common stock.

Plan category	A Number of securities to be issued upon exercise of outstanding options, warrants and rights	B Weighted-average exercise price of outstanding options, warrants and rights	C Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column A)
Equity compensation plans approved by security holders ⁽¹⁾	2,498,494	\$49.49	6,790,099
Equity compensation plans not approved by security holders	—	N/A	—
Total	2,498,494	\$49.49	6,790,099

(1) Under the Incentive Compensation Plan, we may issue restricted stock units ("RSUs"), deferred stock units ("DSUs"), performance share units ("PSUs") and stock options. Amount in column A includes 730,009 RSUs and DSUs, 463,859 PSUs (assuming the target award is met) and 1,304,626 options, respectively, outstanding as of

December 31, 2015. See Part II—Item 8 Financial Statements and Supplementary Data, Note 13, "Share-Based Payments" of the Notes to

Table of Contents

the Consolidated Financial Statements for further discussion. Outstanding RSUs, DSUs and PSUs do not have exercise prices and therefore have been disregarded for purposes of calculating the weighted-average exercise price.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Incorporated by reference to our definitive proxy statement for our 2016 annual meeting of stockholders, which will be filed no later than 120 days after December 31, 2015.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Incorporated by reference to our definitive proxy statement for our 2016 annual meeting of stockholders, which will be filed no later than 120 days after December 31, 2015.

(IN MILLIONS)

	Balance at beginning of year	Additions charged to costs and expenses	Deductions ⁽¹⁾	Foreign exchange impact	Balance at end of year
Allowance for doubtful accounts—trade accounts receivable					
Year ended:					
December 31, 2015	\$11.5	\$2.2	\$ (4.0)	\$ (1.0)	\$8.7
December 31, 2014	\$13.6	\$3.3	\$ (4.1)	\$ (1.3)	\$11.5
December 31, 2013	\$13.4	\$7.6	\$ (7.5)	\$0.1	\$13.6
Allowance for doubtful accounts—current trade loans					
Year ended:					
December 31, 2015	\$0.8	\$0.9	\$ (0.7)	\$ (0.2)	\$0.8
December 31, 2014	\$1.1	\$0.6	\$ (0.9)	\$—	\$0.8
December 31, 2013	\$1.6	\$0.6	\$ (1.1)	\$—	\$1.1
Allowance for doubtful accounts—long-term trade loans					
Year ended:					
December 31, 2015	\$1.6	\$1.3	\$ (0.9)	\$ (0.1)	\$1.9
December 31, 2014	\$2.8	\$1.1	\$ (2.2)	\$ (0.1)	\$1.6
December 31, 2013	\$4.0	\$1.4	\$ (2.6)	\$—	\$2.8
Allowance for obsolete supplies and inventory					
Year ended:					
December 31, 2015	\$8.0	\$4.1	\$ (2.6)	\$ (1.0)	\$8.5
December 31, 2014	\$6.8	\$6.5	\$ (4.7)	\$ (0.6)	\$8.0
December 31, 2013	\$7.2	\$9.3	\$ (9.8)	\$0.1	\$6.8
Deferred tax valuation account ⁽²⁾					
Year ended:					
December 31, 2015	\$105.4	\$737.7	\$ (8.2)	\$ (10.0)	\$824.9
December 31, 2014	\$107.0	\$22.7	\$ (15.6)	\$ (8.7)	\$105.4
December 31, 2013	\$166.7	\$31.8	\$ (91.2)	\$ (0.3)	\$107.0

Amounts related to write-offs of uncollectible accounts, claims or obsolete inventories and supplies. Amounts (1)related to the deferred tax asset valuation allowance are primarily due to the utilization of capital loss and operating loss carryforwards and re-evaluations of deferred tax assets.

See Part II—Item 8 Financial Statements and Supplementary Data, Note 6, "Income Tax" of the Notes to the (2)Consolidated Financial Statements for discussion regarding the significant increase in the deferred tax valuation account in 2015.
