					\$ (6,864)

(a) The Fund receives monthly payments based on any positive monthly return of the Reference Obligation. The Fund makes payments on any negative monthly return of such Reference Obligation.

(b) The floating short-term rate paid by the Fund (on the notional amount of all total return swap contracts) at March 31, 2014, was 1.484% (3 month Libor +1.25%)

All Reference Obligations shown above for Total Return Swap Contracts are floating rate secured bank loans.

See Notes to Quarterly Portfolio of Investments.

Blackstone / GSO Long-Short Credit Income Fund

Notes to Quarterly Portfolio of Investments

March 31, 2014 (Unaudited)

NOTE 1. ORGANIZATION

Blackstone / GSO Long-Short Credit Income Fund (the Fund or BGX) is a non-diversified, closed-end management investment company. BGX was organized as a Delaware statutory trust on October 22, 2010. BGX was registered under the Investment Company Act of 1940, as amended (the 1940 Act), on October 26, 2010. BGX commenced operations on January 27, 2011. Prior to that date, BGX had no operations other than matters relating to its organization and the sale and issuance of 5,236 common shares of beneficial interest in BGX to GSO / Blackstone Debt Funds Management LLC (the Adviser) at a price of \$19.10 per share. The Adviser serves as the investment adviser for BGX. BGX 's common shares are listed on the New York Stock Exchange (the Exchange) and trade under the ticker symbol BGX.

BGX 's primary investment objective is to provide current income, with a secondary objective of capital appreciation. BGX seeks to achieve its investment objectives by employing a dynamic long-short strategy in a diversified portfolio of loans and fixed-income instruments of predominantly U.S. corporate issuers, including first- and second-lien secured loans (Secured Loans or Loans) and high-yield corporate debt securities of varying maturities. BGX 's long positions in loans and fixed-income instruments will typically be rated below investment grade at the time of purchase. BGX 's long positions, either directly or through the use of derivatives, may total up to 130% of the Fund 's net assets. BGX 's short positions, either directly or through the use of derivatives, may total up to 30% of the BGX 's net assets.

BGX is classified as non-diversified under the 1940 Act. As a result, BGX can invest a greater portion of its assets in obligations of a single issuer than a diversified fund. BGX may therefore be more susceptible than a diversified fund to being adversely affected by any single corporate, economic, political, or regulatory occurrence.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements. The preparation of its financial statements is in accordance with accounting principles generally accepted in the United States of America (GAAP), which requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates and these differences could be material.

Portfolio Valuation: BGX 's net asset value (NAV) is determined daily on each day that the Exchange is open for business, as of the close of the regular trading session on the Exchange. The Fund calculates NAV per share by subtracting liabilities (including accrued expenses or dividends) from the total assets (the value of the securities plus cash or other assets, including interest accrued but not yet received) and dividing the result by the total number of outstanding common shares of the Fund.

Loans are primarily valued by using a composite loan price from a nationally recognized loan pricing service. The methodology used by BGX 's nationally recognized loan pricing provider for composite loan prices is to value loans at the mean of the bid and ask prices from one or more brokers or dealers. Collateralized Loan Obligations (CLOs) are valued at the price provided by a nationally recognized service. The prices provided by the nationally recognized service are typically based on the evaluated mid-price of each of the CLOs. Corporate bonds, other than short-term investments, are valued at the price provided by a nationally recognized pricing service. The prices provided by the

nationally recognized service are typically based on the mean of bid and ask prices for each corporate bond security. In determining the value of a particular investment, pricing services may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrices, market transactions in comparable investments, various relationships observed in the market between investments and calculated yield measures based on valuation technology commonly employed in the market for such investments. Short-term debt investments, if any, having a remaining maturity of 60 days or less when purchased would be valued at cost adjusted for amortization of premiums and accretion of discounts. Any investments and other assets for which such current market quotations are not readily available are valued at fair value (Fair Valued Assets) as determined in good faith by a committee of the Adviser under procedures established by, and under the general supervision and responsibility of, the Fund's Board of Trustees.

Various inputs are used to determine the value of BGX's investments. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own

assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

Level 1 Unadjusted quoted prices in active markets for identical investments at the measurement date.

Level 2 Significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.).

Level 3 Significant unobservable inputs (including the Fund's own assumption in determining the fair value of investments).

The valuation techniques used by the Fund to measure fair value during the period ended March 31, 2014 maximized the use of observable inputs and minimized the use of unobservable inputs. The categorization of a value determined for investments and other financial instruments is based on the pricing transparency of the investment and other financial instruments and does not necessarily correspond to BGX's perceived risk of investing in those securities.

The following table summarizes the valuation of the BGX's investments under the fair value hierarchy levels as of March 31, 2014:

Investments in Securities at Value*	Level 2 - Significant		Level 3 - Significant	Total
	Level 1 - Quoted Prices	Observable Inputs	Unobservable Inputs	
Floating Rate Loan Interests				
Aerospace and Defense	\$	\$ 5,336,857	\$ 1,893,691	\$ 7,230,548

**Refer to the Fund's Portfolio of Investments for a listing of securities by type.*

The changes of the fair value of investments for which BGX has used Level 3 inputs to determine the fair value are as follows:

Investments in Securities	Floating Rate Loan Interests	Collateralized Loan Obligations	Total Return Swap Contracts	Total
Balance as of December 31, 2013	\$ 26,070,812	\$ 1,096,278	\$ 9,950	\$ 27,177,040
Accrued discount/ premium	6,535	1,463		7,998
Realized Gain/(Loss)	28,022	-	-	28,022
Change in Unrealized Appreciation/(Depreciation)	66,690	17,852	(4,987)	79,555
Purchases	10,790,853	-	-	10,790,853
Sales Proceeds	(2,347,018)	-	-	(2,347,018)
Transfer into Level 3	6,232,129	-	-	6,232,129
Transfer out of Level 3	(3,552,376)	-	(4,963)	(3,557,339)
Balance as of March 31, 2014	\$ 37,295,647	\$ 1,115,593	\$ -	\$ 38,411,240

Net change in unrealized appreciation/(depreciation) attributable to Level 3 investments held at

March 31, 2014 \$ 173,067 \$ 17,852 \$ - \$ 190,919

Information about Level 3 fair value measurements as of March 31, 2014:

	Fair Value at 3/31/14	Valuation Technique(s)	Unobservable Input(s)
Floating Rate Loan Interests	\$37,295,647	Third-party vendor pricing service	Vendor quotes
Collateralized Loan Obligations	\$1,115,593	Third-party vendor pricing service	Vendor quotes

The Fund evaluates transfers into or out of Level 1, 2 and 3 as of the end of the reporting period. There were no transfers between Level 1 and 2 during the period. Securities were transferred from Level 2 to Level 3 because of a lack of observable market data due to decrease in market activity and information for these securities. Other securities were moved from Level 3 to Level 2 as observable inputs were available for purposes of valuing those assets.

Securities Transactions and Investment Income: Securities transactions are recorded on trade date for financial reporting purposes. Interest income, including accretion of discount and amortization of premium, is recorded on the accrual basis. Realized gains and losses from securities transactions and foreign currency transactions, if any, are recorded on the basis of identified cost.

NOTE 3. SECURED LOANS

BGX includes first and second lien secured, floating rate loans that are made to U.S. and, to a limited extent, non-U.S. corporations, partnerships, and other business entities (Borrowers), in its definition of Secured Loans . Under normal market conditions, at least 70% of BGX 's managed assets will be invested in Secured Loans. BGX defines its managed assets as net assets plus leverage obtained through securities lending, swap contract arrangements, and short selling or other derivative transactions (Managed Assets). At March 31, 2014, 71.96% of BGX 's Managed Assets were held in Secured Loans.

First lien secured loans hold a senior position in the capital structure of a business entity, are typically secured with specific collateral and typically have a claim on the assets and/or stock of the Borrower that is senior to that held by unsecured creditors, subordinated debt holders and stockholders of the Borrower.

Loans often require prepayments from Borrowers' excess cash flows or permit the Borrowers to repay at their election. The degree to which Borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, floating rate loans typically have an expected average life of two to four years. Floating rate loans typically have rates of interest which are re-determined periodically, either daily, monthly, quarterly or semi-annually by reference to a floating base lending rate, primarily London Interbank Offered Rate (LIBOR), plus a premium or credit spread.

Loans are subject to the risk of payment defaults of scheduled interest or principal. Such non-payment could result in a reduction of income, a reduction in the value of the investment and a potential decrease in the net asset value of the Fund. Risk of loss of income is generally higher for unsecured loans or debt, which are not backed by a security interest in any specific collateral. There can be no assurance that the liquidation of any collateral securing a Loan would satisfy the Borrower's obligation to the Fund in the event of non-payment of scheduled interest or principal payments, or that such collateral could be readily liquidated.

Second lien loans generally are subject to similar risks as those associated with investments in first lien loans except that such loans are subordinated in payment and/or lower in lien priority to first lien holders. In the event of default on a second lien loan, the first priority lien holder has first claim to the underlying collateral of the loan. Second lien loans are subject to the additional risk that the cash flow of the Borrower and property securing the loan or debt, if any, may be insufficient to meet scheduled payments after giving effect to the senior obligations of the Borrower. At March 31, 2014, BGX had invested \$7,580,129 in second lien secured loans.

Loans can be rated below investment grade or may also be unrated. As a result, the risks associated with Loans may be similar to the risks of other below investment grade securities, although they are senior and secured in contrast to other below investment grade securities, which are often subordinated or unsecured. BGX typically invests in Loans rated below investment grade, which are considered speculative because of the credit risk of their issuers. Such companies are more likely than investment grade issuers to default on their payments of interest and principal owed to BGX, and such defaults could reduce net asset value and income distributions. The amount of public information available with respect to below investment grade loans will generally be less extensive than that available for registered or exchange-listed securities. In evaluating the creditworthiness of Borrowers, the Adviser will consider, and may rely in part, on analyses performed by others. The Adviser's established best execution procedures and guidelines require trades to be placed for execution only with broker-dealer counterparties approved by the Counterparty and Liquidity Sub-Committee of the Adviser. The factors considered by the Counterparty and Liquidity Sub-Committee when selecting and approving brokers and dealers include, but are not limited to: (i) quality, accuracy, and timeliness of execution, (ii) review of the reputation, financial strength and stability of the financial institution, (iii) willingness and ability of the counterparty to commit capital, (iv) ongoing reliability and (v) access to underwritten offerings and secondary markets. The Counterparty and Liquidity Sub-Committee regularly reviews each broker-dealer counterparty based on the foregoing factors.

BGX may acquire Loans through assignments or participations. BGX typically acquires these Loans through assignment, and if BGX acquires a Loan through participation, will seek to elevate a participation interest into an assignment as soon as practicably possible. The purchaser of an assignment typically succeeds to all the rights and obligations of the assigning institution and becomes a lender under the credit agreement with respect to the debt obligation; however, the purchaser's rights can be more restricted than those of the assigning institution, and BGX may not be able to unilaterally enforce all rights and remedies under the Loan and with regard to any associated collateral. A participation typically results in a contractual relationship only with the institution participating out the interest, not

with the Borrower. Sellers of participations typically include banks, broker-dealers, other financial institutions and lending institutions. The Adviser has adopted best execution procedures and guidelines to mitigate credit and counterparty risk in the atypical situation when BGX must acquire a Loan through a participation. BGX had no outstanding participations as of March 31, 2014.

NOTE 4. TOTAL RETURN SWAPS

BGX has entered into total return swaps as of March 31, 2014 in an aggregate notional amount equal to \$16,235,294. In a total return swap, BGX pays another party a fixed or floating short-term fee and receives in exchange the total return of underlying loans or debt securities. If the other party to a total return swap defaults, BGX's risk of loss consists of the net amount of total return payments that BGX is contractually entitled to receive. BGX bears the risk of default on the underlying loans or debt securities, based on the notional amount of the swap. BGX is required to post collateral to cover this potential obligation. BGX may use total return swaps for financing, hedging or investment purposes. For the purposes of Managed Assets, BGX will treat the value of a total return swap as the notional amount of the swap.

The periodic swap payments received or made by BGX are recorded as realized gains or losses, respectively. Any upfront fees paid are recorded as assets and any upfront fees received are recorded as liabilities and amortized over the term of the swap. Swaps are marked-to-market daily and changes in value, including the accrual of periodic amounts of interest, are recorded as unrealized appreciation (depreciation). When the swap is terminated, BGX will record a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and BGX's basis in the contract, if any. Generally, the basis of the contracts is the unamortized premium received or paid.

International Swaps and Derivatives Association, Inc. Master Agreements (ISDA Master Agreements) govern OTC financial derivative transactions entered into by a Fund and those counterparties. The ISDA Master Agreements maintain provisions for general obligations, representations, agreements, collateral and events of default or termination. Events of termination include conditions that may entitle counterparties to elect to terminate early and cause settlement of all outstanding transactions under the applicable ISDA Master Agreement. Any election to terminate early could be material to the financial statements.

Swap transactions involve, to varying degrees, elements of interest rate, credit and market risk. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreements, and that there may be unfavorable changes in interest rates and/or market values associated with these transactions. The Adviser selects only those counterparties that they believe are credit worthy. BGX segregates sufficient assets as collateral to satisfy the current obligation with respect to total return and credit default swaps.

NOTE 5. COLLATERALIZED LOAN OBLIGATIONS

BGX has invested in Collateralized Loan Obligations (CLOs). A CLO is a financing company (generally called a Special Purpose Vehicle (SPV)), created to reapportion the risk and return characteristics of a pool of assets. While the assets underlying CLOs are typically Secured Loans, the assets may also include (i) unsecured loans, (ii) debt securities that are rated below investment grade, (iii) debt tranches of other CLOs and (iv) equity securities incidental to investments in Secured Loans. When investing in CLOs, BGX will not invest in equity tranches, which are the lowest tranche. However, BGX may invest in lower tranches of CLOs, which typically experience a lower recovery, greater risk of loss or deferral or nonpayment of interest than more senior tranches of the CLO. In addition, BGX intends to invest in CLOs consisting primarily of individual Secured Loans of Borrowers and not repackaged CLO obligations from other high risk pools. The underlying Secured Loans purchased by CLOs are generally performing at the time of purchase but may become non-performing, distressed or defaulted. CLOs with underlying assets of non-performing, distressed or defaulted loans are not contemplated to comprise a significant portion of the BGX's investments in CLOs. The key feature of the CLO structure is the prioritization of the cash flows from a pool of debt securities among the several classes of the CLO. The SPV is a company founded solely for the purpose of securitizing payment claims arising out of this diversified asset pool. On this basis, marketable securities are issued by the SPV which, due to the diversification of the underlying risk, generally represent a lower level of risk than the original assets. The redemption of the securities issued by the SPV typically takes place at maturity out of the cash flow generated by the collected claims.

NOTE 6. SECURITIES LENDING

BGX may make secured loans of its marginable securities to brokers, dealers and other financial institutions amounting to no more than 30% of its net assets. The risks in lending portfolio securities, as with other extensions of credit, consist of possible delay in recovery of the securities or possible loss of rights in the collateral should the borrower fail financially. However, such loans will be made only to broker-dealers and other financial institutions that are believed by the Adviser to be of relatively high credit standing.

Loans of securities are made to broker-dealers pursuant to agreements requiring that loans be continuously secured by collateral consisting of U.S. Government securities, cash or cash equivalents (negotiable certificates of deposit, bankers' acceptances or letters of credit) maintained on a daily mark-to-market basis in an amount at least equal at all times to the market value of the securities lent. The borrower pays to BGX, as the lender, an amount equal to any dividends or interest received on the securities lent. The collateral must have a market value at least equal to 100% of the market value of the loaned securities at all times during the duration of the loan.

BGX invests the cash collateral received in accordance with its investment objectives, subject to the BGX's agreement with the borrower of the securities. In the case of cash collateral, BGX typically pays a rebate to the borrower. The reinvestment of cash collateral will result in a form of effective leverage for BGX.

Although voting rights or rights to consent with respect to the loaned securities pass to the borrower, BGX, as the lender, retains the right to call the loans and obtain the return of the securities loaned at any time on reasonable notice, and it will do

so in order that the securities may be voted by BGX if the holders of such securities are asked to vote upon or consent to matters materially affecting the investment. BGX may also call such loans in order to sell the securities involved. When engaged in securities lending, BGX's performance will continue to reflect changes in the value of the securities loaned and will also reflect the receipt of interest through investment of cash collateral by BGX in permissible investments.

As of March 31, 2014, BGX had securities on loan valued at \$36,550,770 and received cash collateral with a value of \$37,640,960, representing 15.09% and 15.54% of net assets, respectively.

NOTE 7. UNREALIZED APPRECIATION/(DEPRECIATION)

On March 31, 2014, based on cost of \$275,383,250 for federal income tax purposes, aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$6,364,518 and aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value was \$3,814,006, resulting in net unrealized appreciation of \$2,550,512.

Item 2. Controls and Procedures.

- (a) The Registrant's principal executive officer and principal financial officer have concluded that the Registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended) are effective based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this Report.
- (b) There was no change in the Registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940, as amended) that occurred during the Registrant's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting.

Item 3. Exhibits.

Separate certifications for the Registrant's principal executive officer and principal financial officer, as required by Section 302 of the Sarbanes-Oxley Act of 2002 and Rule 30a-2(a) under the Investment Company Act of 1940, as amended, are attached as Exhibit 99.CERT.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Blackstone / GSO Long-Short Credit Income
Fund
