Table of Contents

**PATTERSON-UTI ENERGY, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS**

1. Basis of Consolidation and Presentation

The unaudited interim consolidated financial statements include the accounts of Patterson-UTI Energy, Inc. (the Company) and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated. Except for wholly-owned subsidiaries, the Company has no controlling financial interests in any entity which would require consolidation.

The unaudited interim consolidated financial statements have been prepared by management of the Company pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted pursuant to such rules and regulations, although the Company believes the disclosures included either on the face of the financial statements or herein are sufficient to make the information presented not misleading. In the opinion of management, all adjustments which are of a normal recurring nature considered necessary for a fair statement of the information in conformity with accounting principles generally accepted in the United States have been included. The Unaudited Consolidated Balance Sheet as of December 31, 2008, as presented herein, was derived from the audited consolidated balance sheet of the Company, but does not include all disclosures required by accounting principles generally accepted in the United States of America. These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2008. The results of operations for the three and nine months ended September 30, 2009 are not necessarily indicative of the results to be expected for the full year.

The U.S. dollar is the functional currency for all of the Company's operations except for its Canadian operations, which uses the Canadian dollar as its functional currency. The effects of exchange rate changes are reflected in accumulated other comprehensive income, which is a separate component of stockholders' equity.

Certain reclassifications have been made to the 2008 consolidated financial statements in order for them to conform with the 2009 presentation.

The carrying values of cash and cash equivalents, trade receivables and accounts payable approximate fair value.

The Company has performed an evaluation of subsequent events through November 2, 2009 at the time of issuance of the unaudited consolidated financial statements.

The Company provides a dual presentation of its net income (loss) per common share in its Unaudited Consolidated Statements of Income: Basic net income (loss) per common share (Basic EPS) and diluted net income (loss) per common share (Diluted EPS). The Company adopted a new accounting standard in the quarter ended March 31, 2009, which clarifies that share-based payment awards that entitle their holders to receive non-forfeitable dividends before vesting should be considered participating securities and, as such, should be included in the calculation of earnings-per-share using the two-class method. All earnings per share data presented for the three and nine months ended September 30, 2008 has been adjusted retrospectively to conform with this accounting standard. The impact of this retrospective application was to reduce Diluted EPS for the three months ended September 30, 2008 by \$0.01 and to reduce Basic EPS and Diluted EPS for the nine months ended September 30, 2008 by \$0.01.

Basic EPS excludes dilution and is computed by first allocating earnings between common stockholders and holders of non-vested shares of restricted stock. Basic EPS is then determined by dividing the earnings attributable to common stockholders by the weighted average number of common shares outstanding during the period, excluding non-vested shares of restricted stock.

Diluted EPS is based on the weighted average number of common shares outstanding plus the dilutive effect of potential common shares, including stock options, non-vested shares of restricted stock and restricted stock units. The dilutive effect of stock options and restricted stock units is determined based on the treasury stock method. The dilutive effect of non-vested shares of restricted stock is based on the more dilutive of the treasury stock method or the two-class method, assuming a reallocation of undistributed earnings to common stockholders after considering the dilutive effect of potential common shares other than non-vested shares of restricted stock.

Table of Contents

The following table presents information necessary to calculate net income (loss) per share for the three and nine months ended September 30, 2009 and 2008 as well as potentially dilutive securities excluded from the weighted average number of diluted common shares outstanding, as their inclusion would have been anti-dilutive during the three and nine months ended September 30, 2009 and 2008 (in thousands, except per share amounts):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
BASIC EPS:				
Net income (loss)	\$ (18,580)	\$ 108,746	\$ (20,120)	\$ 267,577
Less (earnings) loss attributed to holders of non-vested restricted stock	174	(1,023)	190	(2,484)
Earnings (loss) attributed to common stockholders	\$ (18,406)	\$ 107,723	\$ (19,930)	\$ 265,093
Weighted average number of common shares outstanding, excluding non-vested shares of restricted stock	152,242	154,266	151,975	153,617
Basic net income (loss) per common share	\$ (0.12)	\$ 0.70	\$ (0.13)	\$ 1.73
DILUTED EPS:				
Earnings (loss) attributed to common stockholders	\$ (18,406)	\$ 107,723	\$ (19,930)	\$ 265,093
Add incremental earnings related to potential common shares		5		19
Adjusted earnings attributed to common stockholders	\$ (18,406)	\$ 107,728	\$ (19,930)	\$ 265,112
Weighted average number of common shares outstanding, excluding non-vested shares of restricted stock	152,242	154,266	151,975	153,617
Add dilutive effect of potential common shares		1,042		1,598
Weighted average number of diluted common shares outstanding	152,242	155,308	151,975	155,215
Diluted net income (loss) per common share	\$ (0.12)	\$ 0.69	\$ (0.13)	\$ 1.71
Potentially dilutive securities excluded as anti-dilutive	8,204	1,455	8,204	2,380

2. Stock-based Compensation

The Company recognizes the cost of share-based awards under the fair-value-based method. The Company uses share-based awards to compensate employees and non-employee directors. Prior to 2009, share-based awards

consisted of equity instruments in the form of stock options, restricted stock or restricted stock units and have included service and, in certain cases, performance conditions. Beginning in 2009, share-based awards also include cash settled performance unit awards which are accounted for as a liability. The Company issues shares of common stock when vested stock options are exercised, when restricted stock is granted and when restricted stock units vest.

Stock Options. The Company estimates the grant date fair values of stock options using the Black-Scholes-Merton valuation model (Black-Scholes). Volatility assumptions are based on the historic volatility of the Company's common stock over the most recent period equal to the expected term of the options as of the date the options are granted. The expected term assumptions are based on the Company's experience with respect to employee stock option activity. Dividend yield assumptions are based on the expected dividends at the time the options are granted. The risk-free interest rate assumptions are determined by reference to United States Treasury yields. Weighted-average assumptions used to estimate the grant date fair values for stock options granted in the three and nine month periods ended September 30, 2009 and 2008 follow:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2009	2008	2009	2008
Volatility	49.53%	N/A	49.90%	35.73%
Expected term (in years)	4.00	N/A	4.00	4.00
Dividend yield	1.39%	N/A	1.67%	1.68%
Risk-free interest rate	2.27%	N/A	1.67%	2.94%

7

Table of Contents

Stock option activity from January 1, 2009 to September 30, 2009 follows:

	Underlying Shares	Weighted Average Exercise Price
Outstanding at January 1, 2009	5,933,572	\$ 21.20
Granted	1,037,500	\$ 13.12
Exercised	(61,268)	\$ 6.19
Expired	(3,400)	\$ 14.64
Outstanding at September 30, 2009	6,906,404	\$ 20.13
Exercisable at September 30, 2009	5,184,862	\$ 20.98

Restricted Stock. For all restricted stock awards to date, shares of common stock were issued when the awards were made. Non-vested shares are subject to forfeiture for failure to fulfill service conditions and, in certain cases, performance conditions. Non-forfeitable dividends are paid on non-vested shares of restricted stock. For restricted stock awards made prior to 2008, the Company uses the graded-vesting attribution method to recognize periodic compensation cost over the vesting period. For restricted stock awards made in 2008 and thereafter, the Company uses the straight-line method to recognize periodic compensation cost over the vesting period.

Restricted stock activity from January 1, 2009 to September 30, 2009 follows:

	Shares	Weighted Average Grant Date Fair Value
Non-vested restricted stock outstanding at January 1, 2009	1,429,571	\$ 28.49
Granted	603,600	\$ 13.75
Vested	(711,452)	\$ 27.99
Forfeited	(40,599)	\$ 27.54
Non-vested restricted stock outstanding at September 30, 2009	1,281,120	\$ 21.85

Restricted Stock Units. For all restricted stock unit awards made to date, shares of common stock are not issued until the units vest. Restricted stock units are subject to forfeiture for failure to fulfill service conditions. Non-forfeitable cash dividend equivalents are paid on non-vested restricted stock units.

Restricted stock unit activity from January 1, 2009 to September 30, 2009 follows:

	Shares	Weighted Average Grant Date Fair Value
Non-vested restricted stock units outstanding at January 1, 2009	17,500	\$ 31.60
Granted	6,500	\$ 14.39
Vested	(5,833)	\$ 31.60
Forfeited	(2,000)	\$ 14.39

Non-vested restricted stock units outstanding at September 30, 2009	16,167	\$	26.81
---	--------	----	-------

Performance Unit Awards. On April, 28, 2009, the Company granted performance unit awards to certain executive officers (the 2009 Performance Units). The 2009 Performance Units provide for those executive officers to receive a cash payment upon the achievement of certain performance goals established by the Company during a specified period. The performance period for the 2009 Performance Units is the period from April 1, 2009 through March 31, 2012. The performance metrics for the 2009 Performance Units are tied to the Company s total shareholder return for the performance period as compared to total shareholder return for a peer group determined by the Compensation Committee. Generally, the recipients will receive a base payment if the Company s total shareholder return is positive and, when compared to the peer group, is at or above the 25th percentile but less than the 50th percentile, two times the base if at or above the 50th percentile but less than the 75th percentile and four times the base if at the 75th percentile or higher. The total base amount with respect to the 2009 Performance Units is approximately \$1.7 million. As the 2009 Performance Units are to be settled in cash at the end of

Table of Contents

the performance period, the Company's obligation is measured at estimated fair value at the end of each reporting period and as of September 30, 2009 this obligation was approximately \$595,000.

3. Property and Equipment

Property and equipment consisted of the following at September 30, 2009 and December 31, 2008 (in thousands):

	September 30, 2009	December 31, 2008
Equipment	\$ 3,220,688	\$ 2,896,992
Oil and natural gas properties	89,967	89,809
Buildings	63,004	62,340
Land	9,698	9,824
	3,383,357	3,058,965
Less accumulated depreciation and depletion	(1,268,225)	(1,121,853)
Property and equipment, net	\$ 2,115,132	\$ 1,937,112

4. Business Segments

The Company's revenues, operating profits and identifiable assets are primarily attributable to four business segments: (i) contract drilling of oil and natural gas wells, (ii) pressure pumping services, (iii) drilling and completion fluid services and (iv) the investment, on a working interest basis, in oil and natural gas properties. Each of these segments represents a distinct type of business. These segments have separate management teams which report to the Company's chief operating decision maker. The results of operations in these segments are regularly reviewed by the chief operating decision maker for purposes of determining resource allocation and assessing performance. Separate financial data for each of our four business segments is provided in the table below (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Revenues:				
Contract drilling (a)	\$ 112,620	\$ 500,030	\$ 440,359	\$ 1,338,856
Pressure pumping	41,687	60,618	113,408	160,576
Drilling and completion fluids (b)	16,527	35,861	64,624	107,207
Oil and natural gas	5,690	13,670	15,255	36,270
Total segment revenues	176,524	610,179	633,646	1,642,909
Elimination of intercompany revenues (a)(b)	(365)	(1,647)	(684)	(3,540)
Total revenues	\$ 176,159	\$ 608,532	\$ 632,962	\$ 1,639,369
Income (loss) before income taxes:				
Contract drilling	\$ (19,911)	\$ 157,243	\$ 6,215	\$ 382,424
Pressure pumping	1,211	12,860	(562)	31,589
Drilling and completion fluids	(2,281)	(924)	(2,858)	3,798
Oil and natural gas	1,854	4,554	(1,144)	16,024
	(19,127)	173,733	1,651	433,835

Edgar Filing: PATTERSON UTI ENERGY INC - Form 10-Q

Corporate and other	(9,056)	(8,956)	(30,917)	(25,300)

	September 30, 2009	December 31, 2008
Identifiable assets:		
Contract drilling	\$ 2,130,657	\$ 2,255,421
Pressure pumping	209,928	210,805
Drilling and completion fluids	57,129	99,433
Oil and natural gas	24,833	31,760
Corporate and other (d)	222,424	115,398
Total assets	\$ 2,644,971	\$ 2,712,817

Table of Contents

- (a) Includes contract drilling intercompany revenues of approximately \$326,000 and \$1.5 million for the three months ended September 30, 2009 and 2008, respectively. Includes contract drilling intercompany revenues of approximately \$645,000 and \$3.4 million for the nine months ended September 30, 2009 and 2008, respectively.
- (b) Includes drilling and completion fluids intercompany revenues of approximately \$39,000 and \$126,000 for the three months ended September 30, 2009 and 2008, respectively. Includes drilling and completion fluids intercompany revenues of approximately \$39,000 and \$177,000 for the nine months ended

September 30, 2009 and 2008, respectively.

(c) Net gains associated with the disposal or retirement of assets relate to decisions of the executive management group regarding corporate strategy. Accordingly, the related gains have been separately presented and excluded from the results of specific segments.

(d) Corporate and other assets primarily include cash on hand managed by the parent corporation and certain deferred Federal income tax assets.

5. Goodwill

Goodwill is evaluated at least annually to determine if the fair value of recorded goodwill has decreased below its carrying value. For purposes of impairment testing, goodwill is evaluated at the reporting unit level. The Company's reporting units for impairment testing have been determined to be its operating segments.

As of September 30, 2009 and December 31, 2008 the Company had goodwill of \$86.2 million, all in its contract drilling reporting unit. In the event that market conditions remain weak, the Company may be required to record an impairment of goodwill in its contract drilling reporting unit in the future, and such impairment could be material.

6. Accrued Expenses

Accrued expenses consisted of the following at September 30, 2009 and December 31, 2008 (in thousands):

	September 30, 2009	December 31, 2008
Salaries, wages, payroll taxes and benefits	\$ 13,959	\$ 30,334
Workers' compensation liability	65,535	70,439
Sales, use and other taxes	14,519	12,015

Insurance, other than workers' compensation	10,764	14,209
Other	4,156	5,658
	\$ 108,933	\$ 132,655

7. Asset Retirement Obligation

The Company records a liability for the estimated costs to be incurred in connection with the abandonment of oil and natural gas properties in the future. This liability is included in the caption "Other" in the liabilities section of the Company's consolidated balance sheet. The following table describes the changes to the Company's asset retirement obligations during the nine months ended September 30, 2009 and 2008 (in thousands):

	2009	2008
Balance at beginning of year	\$ 3,047	\$ 1,593
Liabilities incurred	125	427
Liabilities settled	(304)	(265)
Accretion expense	89	44
Revision in estimated costs of plugging oil and natural gas wells	(14)	1,303
Asset retirement obligation at end of period	\$ 2,943	\$ 3,102

Table of Contents**8. Borrowings Under Line of Credit**

The Company has an unsecured revolving line of credit (LOC) with a maximum borrowing capacity of \$240 million, including a letter of credit sublimit of \$150 million and a swing line sublimit of \$40 million. In addition, the aggregate borrowing and letter of credit capacity under the LOC may, subject to the terms and conditions set forth therein including the receipt of additional commitments from lenders, be increased up to a maximum amount not to exceed \$450 million.

Interest is paid on the outstanding principal amount of LOC borrowings at a floating rate based on, at the Company's election, LIBOR or a base rate. The margin on LIBOR loans ranges from 3.00% to 4.00% and the margin on base rate loans ranges from 2.00% to 3.00%, based on the Company's debt to capitalization ratio. At September 30, 2009, the margin on LIBOR loans would have been 3.00% and the margin on base rate loans would have been 2.00%. Any outstanding borrowings must be repaid at maturity on January 31, 2012 and letters of credit may remain in effect up to six months after such maturity date. This LOC facility includes various fees, including a commitment fee on the actual daily unused commitment (the commitment fee rate was 1.00% at September 30, 2009).

The Company incurred line of credit issuance costs of approximately \$6.2 million during the nine months ended September 30, 2009 in connection with the LOC. These costs are being amortized to interest expense over the contractual term of the LOC.

There are customary representations, warranties, restrictions and covenants associated with the LOC. Financial covenants provide for a maximum debt to capitalization ratio and a minimum interest coverage ratio. The Company does not expect that the restrictions and covenants will impact its ability to operate or react to opportunities that might arise. As of September 30, 2009, the Company had no borrowings outstanding under the LOC. The Company had \$46.3 million in letters of credit outstanding at September 30, 2009 and, as a result, had available borrowing capacity of approximately \$194 million at that date. Each domestic subsidiary of the Company has unconditionally guaranteed the existing and future obligations of the Company and each other guarantor under the LOC and related loan documents, as well as obligations of the Company and its subsidiaries under any interest rate swap contracts that may be entered into with lenders party to the LOC.

9. Commitments, Contingencies and Other Matters

Commitments As of September 30, 2009, the Company maintained letters of credit in the aggregate amount of \$46.3 million for the benefit of various insurance companies as collateral for retrospective premiums and retained losses which could become payable under the terms of the underlying insurance contracts. These letters of credit expire at various times during the calendar year and are typically renewed annually. As of September 30, 2009, no amounts had been drawn under the letters of credit.

As of September 30, 2009, the Company had commitments to purchase approximately \$128 million of major equipment.

The Company is party to various legal proceedings arising in the normal course of its business. The Company does not believe that the outcome of these proceedings, either individually or in the aggregate, will have a material adverse effect on its financial condition, results of operations or cash flows.

10. Stockholders Equity

Cash Dividends The Company paid cash dividends during the nine months ended September 30, 2008 and 2009 as follows:

	Per Share	Total (in thousands)
2008:		
Paid on March 28, 2008	\$ 0.12	\$ 18,493
Paid on June 27, 2008	0.16	25,011
Paid on September 29, 2008	0.16	24,803

Total cash dividends	\$ 0.44	\$ 68,307
	Per Share	Total (in thousands)
2009:		
Paid on March 31, 2009	\$ 0.05	\$ 7,655
Paid on June 30, 2009	0.05	7,675
Paid on September 30, 2009	0.05	7,675
Total cash dividends	\$ 0.15	\$ 23,005

Table of Contents

On October 28, 2009, the Company's Board of Directors approved a cash dividend on its common stock in the amount of \$0.05 per share to be paid on December 30, 2009 to holders of record as of December 15, 2009. The amount and timing of all future dividend payments, if any, is subject to the discretion of the Board of Directors and will depend upon business conditions, results of operations, financial condition, terms of the Company's credit facilities and other factors.

On August 1, 2007, the Company's Board of Directors approved a stock buyback program (Program), authorizing purchases of up to \$250 million of the Company's common stock in open market or privately negotiated transactions. During the nine months ended September 30, 2009, the Company purchased 5,715 shares of its common stock under the Program at a cost of approximately \$79,000. As of September 30, 2009, the Company is authorized to purchase approximately \$113 million of the Company's outstanding common stock under the Program. Shares purchased under the Program are accounted for as treasury stock.

The Company purchased 114,983 shares of stock from employees during the nine months ended September 30, 2009 on dates that corresponded with the vesting of restricted stock. These shares were purchased at fair market value to provide employees with the funds necessary to satisfy payroll tax withholding obligations and have been accounted for as treasury stock. The total purchase price for these shares was approximately \$1.5 million. These purchases were made pursuant to the terms of the Patterson-UTI Energy, Inc. 2005 Long-Term Incentive Plan and not pursuant to the Program.

11. Recently Issued Accounting Standards

In September 2006, the Financial Accounting Standards Board (FASB) issued an accounting standard that defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurement. The initial application of this standard was limited to financial assets and liabilities and became effective on January 1, 2008 for the Company. The impact of the initial application of this standard was not material. On January 1, 2009, the Company adopted this standard on a prospective basis for non-financial assets and liabilities that are not measured at fair value on a recurring basis. The application of this standard to the Company's non-financial assets and liabilities is primarily limited to assets acquired and liabilities assumed in a business combination, asset retirement obligations and asset impairments, including goodwill and long-lived assets and has not had a material impact on the Company.

In December 2007, the FASB issued a new accounting standard that calls for significant changes from then current practice in accounting for business combinations. The new standard is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008 and became effective for the Company on January 1, 2009. The application of this new standard did not have a material impact on the Company.

In June 2008, the FASB issued a new accounting standard which clarifies that share-based payment awards that entitle their holders to receive non-forfeitable dividends before vesting should be considered participating securities and, as such, should be included in the calculation of basic earnings-per-share using the two-class method. Certain of the Company's share-based payment awards entitle the holders to receive non-forfeitable dividends. This standard is effective for financial statements issued for fiscal years beginning after December 15, 2008, as well as interim periods within those years and became effective for the Company on January 1, 2009. The impact of the adoption of this standard is discussed in Note 1.

In December 2008, the SEC issued a Final Rule, *Modernization of Oil and Gas Reporting* (Final Rule). The Final Rule revises certain oil and gas reporting disclosures in Regulation S-K and Regulation S-X under the Securities Act of 1933, as amended (the Securities Act), and the Securities Exchange Act of 1934, as amended (the Exchange Act), as well as Industry Guide 2. The amendments are designed to modernize and update oil and gas disclosure requirements to align them with current practices and changes in technology. The disclosure requirements are effective for registration statements filed on or after January 1, 2010 and for annual financial statements filed on or after December 31, 2009. The application of the Final Rule is not expected to have a material impact on the Company.

In April 2009, the FASB issued a staff position to provide additional guidance for determining whether a market for a financial asset is not active and a transaction is not distressed for fair value measurements under generally accepted accounting principles. The provisions of this staff position are effective for financial statements issued for

interim and annual periods ending after June 15, 2009 and became effective for the Company in the quarter ended June 30, 2009. The adoption of this staff position did not have a material impact on the Company.

Table of Contents

In April 2009, the FASB issued a staff position which increases the frequency of fair value disclosures for financial instruments from annual only to quarterly reporting periods. The provisions of this staff position are effective for financial statements issued for interim and annual periods ending after June 15, 2009 and became effective for the Company in the quarter ended June 30, 2009. The adoption of this staff position did not have a material impact on the Company.

In June 2009, the FASB issued a new accounting standard that amends the accounting and disclosure requirements for the consolidation of variable interest entities. This new standard removes the previously existing exception from applying consolidation guidance to qualifying special-purpose entities and requires ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity. Before this Statement, generally accepted accounting principles required reconsideration of whether an enterprise is the primary beneficiary of a variable interest entity only when specific events occurred. This new standard is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period, and for interim and annual reporting periods thereafter and will become effective for the Company on January 1, 2010. The adoption of this standard is not expected to have a material impact on the Company.

In June 2009, the FASB issued the FASB Accounting Standards Codification (Codification). Effective for financial statements issued for interim and annual periods ending after September 15, 2009, the Codification became the source of authoritative U.S. generally accepted accounting principles. The FASB will no longer issue new standards in the form of Statements, FASB Staff Positions or EITF Abstracts. Instead, it will issue Accounting Standards Updates to update the Codification. The adoption of the Codification did not have a material impact on the Company.

Table of Contents

**FORWARD LOOKING STATEMENTS AND CAUTIONARY STATEMENTS FOR PURPOSES OF
THE SAFE HARBOR PROVISIONS OF THE PRIVATE SECURITIES
LITIGATION REFORM ACT OF 1995**

Forward-looking statements may be made by management orally or in writing, including, but not limited to our filings with the SEC under the Securities Act of 1933, as amended (the Securities Act), and the Securities Exchange Act of 1934, as amended (the Exchange Act). Management's Discussion and Analysis of Financial Condition and Results of Operations included in Item 2 of Part I of this Quarterly Report on Form 10-Q contains forward-looking statements which are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements include, without limitation, statements relating to: liquidity; financing of operations; continued volatility of oil and natural gas prices; source and sufficiency of funds required for immediate capital needs and additional rig acquisitions (if further opportunities arise); demand for our services; and other matters. Our forward-looking statements can be identified by the fact that they do not relate strictly to historic or current facts and often use words such as believes, budgeted, expects, estimates, project, will, could, may, plans, anticipates, and other words and expressions of similar meaning. The forward-looking statements are based on certain assumptions and analyses we make in light of our experience and our perception of historical trends, current conditions, expected future developments and other factors we believe are appropriate in the circumstances. Although we believe that the expectations reflected in such forward-looking statements are reasonable, we can give no assurance that such expectations will prove to have been correct.

Forward-looking statements are not guarantees of future performance and a variety of factors could cause actual results to differ materially from the anticipated or expected results expressed in or suggested by these forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to, deterioration of global economic conditions, declines in oil and natural gas prices that could adversely affect demand for our services and their associated effect on day rates, rig utilization and planned capital expenditures, excess availability of land drilling rigs, including as a result of the reactivation or construction of new land drilling rigs, adverse industry conditions, adverse credit and equity market conditions, difficulty in integrating acquisitions, demand for oil and natural gas, shortages of rig equipment and ability to retain management and field personnel. Refer to Risk Factors contained in Part 1 of our Annual Report on Form 10-K for the year ended December 31, 2008 for a more complete discussion of these and other factors that might affect our performance and financial results. These forward-looking statements are intended to relay our expectations about the future, and speak only as of the date they are made. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

You are cautioned not to place undue reliance on any of our forward-looking statements, which speak only as of the date such forward looking statement was made.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management Overview We are a leading provider of contract services to the North American oil and natural gas industry. Our services primarily involve the drilling, on a contract basis, of land-based oil and natural gas wells and, to a lesser extent, we provide pressure pumping services and drilling and completion fluid services. In addition to the aforementioned contract services, we also invest, on a working interest basis, in oil and natural gas properties. For the three and nine months ended September 30, 2009 and 2008, our operating revenues consisted of the following (dollars in thousands):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2009		2008		2009		2008	
Contract drilling	\$ 112,294	64%	\$ 498,510	82%	\$ 439,714	70%	\$ 1,335,494	81%
Pressure pumping	41,687	24	60,618	10	113,408	18	160,576	10
Drilling and completion fluids	16,488	9	35,734	6	64,585	10	107,029	7
Oil and natural gas	5,690	3	13,670	2	15,255	2	36,270	2

Edgar Filing: PATTERSON UTI ENERGY INC - Form 10-Q

\$ 176,159 100% \$ 608,532 100% \$ 632,962 100% \$ 1,639,369 100%

We provide our contract services to oil and natural gas operators in many of the oil and natural gas producing regions of North America. Our contract drilling operations are focused in various regions of Texas, New Mexico, Oklahoma, Arkansas, Louisiana, Mississippi, Alabama, Colorado, Arizona, Utah, Wyoming, Montana, North Dakota, South Dakota, Pennsylvania, West Virginia and western Canada, while our pressure pumping services are focused primarily in the Appalachian Basin. Our drilling and completion fluids services are provided to operators offshore in the Gulf of Mexico and on land in Texas, New Mexico, Oklahoma and Louisiana. The oil and natural gas properties in which we hold interests are primarily located in Texas, New Mexico and Louisiana.

Table of Contents

Typically, the profitability of our business is most readily assessed by two primary indicators in our contract drilling segment: our average number of rigs operating and our average revenue per operating day. During the third quarter of 2009, our average number of rigs operating was 73 compared to 276 in the third quarter of 2008. Our average number of rigs operating during the third quarter of 2009 included approximately four rigs under term contracts that earned standby revenues of \$3.4 million. Rigs on standby earn a discounted dayrate since they do not have crews and have lower costs. Our average revenue per operating day was \$16,800 in the third quarter of 2009 compared to \$19,620 in the third quarter of 2008. We had a consolidated net loss of \$18.6 million for the third quarter of 2009 compared to consolidated net income of \$109 million for the third quarter of 2008. This decrease was primarily due to our contract drilling segment experiencing a significant decrease in the average number of rigs operating as compared to the third quarter of 2008.

Our revenues, profitability and cash flows are highly dependent upon prevailing prices for natural gas and, to a lesser extent, oil. During periods of improved commodity prices, the capital spending budgets of oil and natural gas operators tend to expand, which generally results in increased demand for our contract services. Conversely, in periods when these commodity prices deteriorate, the demand for our contract services generally weakens and we experience downward pressure on pricing for our services. Since reaching a peak in 2008, there has been a significant decline in oil and natural gas prices. During this time there has also been a substantial deterioration in the global economic environment. As part of this deterioration, there has been substantial uncertainty in the capital markets and access to financing has been reduced. Due to these conditions, our customers reduced or curtailed their drilling programs, which resulted in a decrease in demand for our services, as evidenced by the decline in our monthly average of rigs operating from a high of 283 in October 2008 to a low of 60 in June 2009 before recovering slightly to 81 in September 2009. Furthermore, these factors have resulted in, and could continue to result in, certain of our customers experiencing an inability to pay suppliers, including us, if they are not able to access capital to fund their operations. We are also highly impacted by competition, the availability of excess equipment, labor issues and various other factors that could materially adversely affect our business, financial condition, cash flows and results of operations. Please see *Risk Factors* included as Item 1A in our Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

We believe that the liquidity shown on our balance sheet as of September 30, 2009, which includes approximately \$237 million in working capital (including \$119 million in cash and cash equivalents) and approximately \$194 million available under our \$240 million LOC, together with cash expected to be generated from operations (including expected income tax refunds resulting from the carry-back of net operating losses), should provide us with sufficient ability to fund our current plans to build new equipment, make improvements to our existing equipment, expand into new regions, pay cash dividends and survive the current downturn in our industry.

Commitments and Contingencies As of September 30, 2009, we maintained letters of credit in the aggregate amount of \$46.3 million for the benefit of various insurance companies as collateral for retrospective premiums and retained losses which could become payable under the terms of the underlying insurance contracts. These letters of credit expire at various times during each calendar year and are typically renewed annually. As of September 30, 2009, no amounts had been drawn under the letters of credit.

As of September 30, 2009, we had commitments to purchase approximately \$128 million of major equipment.

Trading and Investing We have not engaged in trading activities that include high-risk securities, such as derivatives and non-exchange traded contracts. We invest cash primarily in highly liquid, short-term investments such as overnight deposits and money market accounts.

Description of Business We conduct our contract drilling operations in Texas, New Mexico, Oklahoma, Arkansas, Louisiana, Mississippi, Alabama, Colorado, Arizona, Utah, Wyoming, Montana, North Dakota, South Dakota, Pennsylvania, West Virginia and western Canada. As of September 30, 2009, we had approximately 350 marketable land-based drilling rigs. We provide pressure pumping services to oil and natural gas operators primarily in the Appalachian Basin. These services consist primarily of well stimulation and cementing for completion of new wells and remedial work on existing wells. We provide drilling fluids, completion fluids and related services to oil and natural gas operators offshore in the Gulf of Mexico and on land in Texas, New Mexico, Oklahoma and Louisiana. Drilling and completion fluids are used by oil and natural gas operators during the drilling process to control pressure

when drilling oil and natural gas wells. We also invest, on a working interest basis, in oil and natural gas properties.

The North American land drilling industry has experienced periods of downturn in demand during the last decade. During these periods, there have been substantially more drilling rigs available than necessary to meet demand. As a result, drilling contractors have had difficulty sustaining profit margins and, at times, have incurred losses during the downturn periods.

In addition to adverse effects that declines in demand have had or could have on us, ongoing factors which could continue to adversely affect utilization rates and pricing, even in an environment of high oil and natural gas prices and increased drilling activity, include:

Table of Contents

movement of drilling rigs from region to region,
 reactivation of land-based drilling rigs, or
 construction of new drilling rigs.

As a result of an increase in drilling activity and increased prices for drilling services in recent years prior to the current downturn, construction of new drilling rigs increased significantly. The addition of new drilling rigs to the market and the decrease in demand has resulted in excess capacity. We cannot predict either the future level of demand for our contract drilling services or future conditions in the oil and natural gas contract drilling business.

Critical Accounting Policies

In addition to established accounting policies, our consolidated financial statements are impacted by certain estimates and assumptions made by management. No changes in our critical accounting policies have occurred since the filing of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

Liquidity and Capital Resources

As of September 30, 2009, we had working capital of \$237 million, including cash and cash equivalents of \$119 million. For the nine months ended September 30, 2009, our sources of cash flow included \$416 million from operating activities.

During the nine months ended September 30, 2009, we used \$23.0 million to pay dividends on our common stock, \$6.2 million to pay issuance costs related to our LOC and \$351 million:

- to build new drilling rigs,
- to make capital expenditures for the betterment and refurbishment of our drilling rigs,
- to acquire and procure drilling equipment and facilities to support our drilling operations,
- to fund capital expenditures for our pressure pumping and drilling and completion fluids segments, and
- to fund investments in oil and natural gas properties on a working interest basis.

We paid cash dividends during the nine months ended September 30, 2009 as follows:

	Per Share	Total (in thousands)
Paid on March 31, 2009	\$ 0.05	\$ 7,655
Paid on June 30, 2009	0.05	7,675
Paid on September 30, 2009	0.05	7,675
Total cash dividends	\$ 0.15	\$ 23,005

On October 28, 2009, our Board of Directors approved a cash dividend on our common stock in the amount of \$0.05 per share to be paid on December 30, 2009 to holders of record as of December 15, 2009. The amount and timing of all future dividend payments, if any, is subject to the discretion of the Board of Directors and will depend upon business conditions, results of operations, financial condition, terms of our credit facilities and other factors.

On August 1, 2007, our Board of Directors approved a stock buyback program (Program), authorizing purchases of up to \$250 million of our common stock in open market or privately negotiated transactions. During the nine months ended September 30, 2009, we purchased 5,715 shares of our common stock under the Program at a cost of approximately \$79,000. As of September 30, 2009, we are authorized to purchase approximately \$113 million of our outstanding common stock under the Program. Shares purchased under the Program have been accounted for as treasury stock.

We have an unsecured LOC with a maximum borrowing and letter of credit capacity of \$240 million. Interest is paid on the outstanding principal amount of borrowings under the LOC at a floating rate based on, at our election, LIBOR or a base rate. The

Table of Contents

margin on LIBOR loans ranges from 3.00% to 4.00% and the margin on base rate loans ranges from 2.00% to 3.00%, based on our debt to capitalization ratio. Any outstanding borrowings must be repaid at maturity on January 31, 2012 and letters of credit may remain in effect up to six months after such maturity date. As of September 30, 2009, we had no borrowings outstanding under the LOC. We had \$46.3 million in letters of credit outstanding at September 30, 2009 and, as a result, had available borrowing capacity of approximately \$194 million at such date.

We believe that the current level of cash, short-term investments and borrowing capacity available under our LOC, together with cash expected to be generated from operations (including expected income tax refunds resulting from the carry-back of net operating losses), should be sufficient to meet our current capital needs. From time to time, acquisition opportunities are evaluated. The timing, size or success of any acquisition and the associated capital commitments are unpredictable. Should opportunities for growth requiring capital arise, we believe we would be able to satisfy these needs through a combination of working capital, cash generated from operations, borrowing capacity under our LOC or additional debt or equity financing. However, there can be no assurance that such capital will be available on reasonable terms, if at all.

Results of Operations

The following tables summarize operations by business segment for the three months ended September 30, 2009 and 2008:

Contract Drilling	2009	2008	% Change
	(Dollars in thousands)		
Revenues	\$ 112,294	\$ 498,510	(77.5)%
Direct operating costs	\$ 71,035	\$ 282,698	(74.9)%
Selling, general and administrative	\$ 1,087	\$ 1,382	(21.3)%
Depreciation	\$ 60,083	\$ 57,187	5.1%
Operating income (loss)	\$ (19,911)	\$ 157,243	N/M
Operating days	6,685	25,403	(73.7)%
Average revenue per operating day	\$ 16.80	\$ 19.62	(14.4)%
Average direct operating costs per operating day	\$ 10.63	\$ 11.13	(4.5)%
Average rigs operating	73	276	(73.6)%
Capital expenditures	\$ 93,340	\$ 125,892	(25.9)%

Revenues and direct operating costs decreased in the third quarter of 2009 compared to the third quarter of 2008 primarily as a result of a decrease in the number of operating days. The decrease in operating days was due to decreased demand largely caused by lower commodity prices for natural gas and oil. Our average number of rigs operating during the third quarter of 2009 included an average of approximately four rigs that earned standby revenues of \$3.4 million. Rigs on standby earn a discounted dayrate as they do not have crews and have lower costs. Average revenue per operating day decreased in the third quarter of 2009 compared to the third quarter of 2008 primarily due to decreases in dayrates for rigs that were operating in the spot market and the expiration of term contracts that were entered into at higher rates. Average direct operating costs per operating day decreased in the third quarter of 2009 compared to the third quarter of 2008 primarily due to decreases in labor and repair costs. Significant capital expenditures have been incurred to build new drilling rigs, to modify and upgrade our drilling rigs and to acquire additional related equipment such as drill pipe, drill collars, engines, fluid circulating systems, rig hoisting systems and safety enhancement equipment.

Pressure Pumping	2009	2008	% Change
	(Dollars in thousands)		
Revenues	\$ 41,687	\$ 60,618	(31.2)%
Direct operating costs	\$ 28,219	\$ 36,576	(22.8)%
Selling, general and administrative	\$ 5,041	\$ 6,109	(17.5)%
Depreciation	\$ 7,216	\$ 5,073	42.2%
Operating income	\$ 1,211	\$ 12,860	(90.6)%

Edgar Filing: PATTERSON UTI ENERGY INC - Form 10-Q

Total jobs	1,990	3,732	(46.7)%
Average revenue per job	\$ 20.95	\$ 16.24	29.0%
Average direct operating costs per job	\$ 14.18	\$ 9.80	44.7%
Capital expenditures	\$ 3,582	\$17,607	(79.7)%

Our customers have increased their focus on the emerging development of unconventional reservoirs in the Appalachian Basin and the larger jobs associated therewith. As a result of this focus on unconventional reservoirs and lower commodity prices, we have experienced a decrease in the number of smaller traditional pressure pumping jobs, which has contributed to the overall decrease in the number of total jobs. Revenues and direct operating costs decreased as a result of a decrease in the number of total jobs. Increased average revenue per job was due to an increase in the proportion of larger jobs to total jobs, which was driven by demand

Table of Contents

for services associated with unconventional reservoirs partially offset by the impact of reduced pricing. Average direct operating costs per job increased due to the increase in larger jobs and as a result of fixed costs being spread over a significantly reduced number of total jobs. In anticipation of increased activity associated with the unconventional reservoirs in the Appalachian Basin, we have added facilities, equipment and personnel in recent years. Delays in the development of these reservoirs and lower commodity prices have caused less demand for our pressure pumping services, negatively impacting the profitability of this business. Selling, general and administrative expenses decreased in the third quarter of 2009 compared to the third quarter of 2008 primarily due to headcount reductions. Significant capital expenditures were incurred in 2008 to add capacity and modify and upgrade existing equipment. The increase in depreciation expense is a result of capital expenditures.

Drilling and Completion Fluids	2009	2008	% Change
	(Dollars in thousands)		
Revenues	\$16,488	\$35,734	(53.9)%
Direct operating costs	\$16,606	\$33,426	(50.3)%
Selling, general and administrative	\$ 1,614	\$ 2,478	(34.9)%
Depreciation	\$ 549	\$ 754	(27.2)%
Operating loss	\$ (2,281)	\$ (924)	146.9%
Capital expenditures	\$ 179	\$ 1,398	(87.2)%

Revenues and direct operating costs decreased in the third quarter of 2009 compared to the third quarter of 2008 due to decreased sales volume both on land and offshore in the Gulf of Mexico. Selling, general and administrative expenses decreased in the third quarter of 2009 compared to the third quarter of 2008 primarily due to a decrease in compensation costs for sales and support personnel due to headcount reductions. Capital expenditures decreased in the third quarter of 2009 compared to the third quarter of 2008 due to the slowdown in activity.

Oil and Natural Gas Production and Exploration	2009	2008	% Change
	(Dollars in thousands, except sales prices)		
Revenues	\$5,690	\$13,670	(58.4)%
Direct operating costs	\$1,780	\$ 4,338	(59.0)%
Depreciation, depletion and impairment	\$2,056	\$ 4,778	(57.0)%
Operating income	\$1,854	\$ 4,554	(59.3)%
Capital expenditures	\$2,214	\$ 7,852	(71.8)%
Average net daily oil production (Bbls)	735	894	(17.8)%
Average net daily natural gas production (Mcf)	3,172	3,946	(19.6)%
Average oil sales price (per Bbl)	\$66.01	\$116.86	(43.5)%
Average natural gas sales price (per Mcf)	\$ 4.20	\$ 11.19	(62.5)%

Revenues decreased due to lower average sales prices and net daily production of oil and natural gas. Average net daily oil and natural gas production decreased primarily due to production declines on existing wells. Depreciation, depletion and impairment expense in the third quarter of 2009 includes approximately \$249,000 incurred to impair certain oil and natural gas properties compared to approximately \$1.6 million incurred to impair certain oil and natural gas properties in the third quarter of 2008. Depletion expense decreased approximately \$1.3 million primarily due to lower production and the impact of decreases in carrying value of properties resulting from impairment charges recognized prior to the third quarter of 2009. Capital expenditures decreased in the third quarter of 2009 compared to the third quarter of 2008 due to the decline in commodity prices.

Corporate and Other	2009	2008	% Change
	(Dollars in thousands)		
Selling, general and administrative	\$8,129	\$7,500	8.4%
Depreciation	\$ 227	\$ 206	10.2%

Edgar Filing: PATTERSON UTI ENERGY INC - Form 10-Q

Other operating expenses	\$ 700	\$1,250	(44.0)%
Net gain on asset disposals/retirements	\$ (898)	\$ (505)	77.8%
Interest income	\$ 53	\$ 601	(91.1)%
Interest expense	\$1,448	\$ 125	1,058.4%
Other income	\$ 228	\$ 44	418.2%
Capital expenditures	\$4,762	\$ 351	1,256.7%

Selling, general and administrative expenses increased in the third quarter of 2009 compared to the third quarter of 2008 primarily as a result of increased professional fees. Other operating expenses decreased due to a decrease in bad debt expense of \$550,000 in the third quarter of 2009 compared to the third quarter of 2008. Gains on the disposal and retirement of assets are treated as part of

Table of Contents

our corporate activities because such transactions relate to corporate strategy decisions of the Company's executive management group. Interest expense increased in the third quarter of 2009 compared to the third quarter of 2008 due to amortization of LOC issuance costs and increased fees associated with outstanding letters of credit and the unused portion of the LOC. Capital expenditures increased in the third quarter of 2009 compared to the third quarter of 2008 due to the purchase and ongoing implementation of a new enterprise resource planning system.

The following tables summarize operations by business segment for the nine months ended September 30, 2009 and 2008:

Contract Drilling	2009	2008	% Change
	(Dollars in thousands)		
Revenues	\$439,714	\$1,335,494	(67.1)%
Direct operating costs	\$254,306	\$ 778,446	(67.3)%
Selling, general and administrative	\$ 3,169	\$ 4,203	(24.6)%
Depreciation	\$176,024	\$ 170,421	3.3%
Operating income	\$ 6,215	\$ 382,424	(98.4)%
Operating days	23,878	69,881	(65.8)%
Average revenue per operating day	\$ 18.42	\$ 19.11	(3.6)%
Average direct operating costs per operating day	\$ 10.65	\$ 11.14	(4.4)%
Average rigs operating	87	255	(65.9)%
Capital expenditures	\$308,789	\$ 260,918	18.3%

Revenues and direct operating costs decreased in the first nine months of 2009 compared to the first nine months of 2008 primarily as a result of a decrease in the number of operating days. The decrease in operating days was due to decreased demand largely caused by lower commodity prices for natural gas and oil. Our average number of rigs operating during the first nine months of 2009 included an average of approximately seven rigs that earned standby revenues of \$21.5 million. Rigs on standby earn a discounted dayrate as they do not have crews and have lower costs. Additionally, we recognized \$7.5 million of revenues during the first nine months of 2009 from the early termination of drilling contracts. Significant capital expenditures have been incurred to build new drilling rigs, to modify and upgrade our drilling rigs and to acquire additional related equipment such as drill pipe, drill collars, engines, fluid circulating systems, rig hoisting systems and safety enhancement equipment.

Pressure Pumping	2009	2008	% Change
	(Dollars in thousands)		
Revenues	\$113,408	\$160,576	(29.4)%
Direct operating costs	\$ 78,087	\$ 97,587	(20.0)%
Selling, general and administrative	\$ 15,840	\$ 17,550	(9.7)%
Depreciation	\$ 20,043	\$ 13,850	44.7%
Operating income (loss)	\$ (562)	\$ 31,589	N/M
Total jobs	5,582	10,043	(44.4)%
Average revenue per job	\$ 20.32	\$ 15.99	27.1%
Average direct operating costs per job	\$ 13.99	\$ 9.72	43.9%
Capital expenditures	\$ 32,155	\$ 48,255	(33.4)%

Our customers have increased their focus on the emerging development of unconventional reservoirs in the Appalachian Basin and the larger jobs associated therewith. As a result of this focus on unconventional reservoirs and declining commodity prices, we have experienced a decrease in the number of smaller traditional pressure pumping jobs, which has contributed to the overall decrease in the number of total jobs. Revenues and direct operating costs decreased as a result of a decrease in the number of total jobs. Increased average revenue per job was due to an increase in the proportion of larger jobs to total jobs, which was driven by demand for services associated with unconventional reservoirs partially offset by the impact of reduced pricing. Average direct operating costs per job increased due to the increase in larger jobs and as a result of fixed costs being spread over a significantly reduced

number of jobs. In anticipation of increased activity associated with the unconventional reservoirs in the Appalachian Basin, we have added facilities, equipment and personnel in recent years. Delays in the development of these reservoirs and lower commodity prices have caused less demand for our pressure pumping services, negatively impacting the profitability of this business. Selling, general and administrative expenses decreased in the first nine months of 2009 compared to the first nine months of 2008 primarily due to headcount reductions. Significant capital expenditures have been incurred to add capacity, expand our areas of operation and modify and upgrade existing equipment. The increase in depreciation expense is a result of these capital expenditures.

Table of Contents

Drilling and Completion Fluids	2009	2008	% Change
	(Dollars in thousands)		
Revenues	\$64,585	\$107,029	(39.7)%
Direct operating costs	\$60,133	\$93,408	(35.6)%
Selling, general and administrative	\$5,546	\$7,621	(27.2)%
Depreciation	\$1,764	\$2,202	(19.9)%
Operating income (loss)	\$(2,858)	\$3,798	N/M
Capital expenditures	\$185	\$2,931	(93.7)%

Revenues and direct operating costs decreased in the first nine months of 2009 compared to the first nine months of 2008 due to decreased sales volume both on land and offshore in the Gulf of Mexico. Selling, general and administrative expenses decreased in the first nine months of 2009 compared to the first nine months of 2008 primarily due to a decrease in compensation costs for sales and support personnel due to headcount reductions. Capital expenditures decreased in the first nine months of 2009 compared to the first nine months of 2008 due to the slowdown in activity.

Oil and Natural Gas Production and Exploration	2009	2008	% Change
	(Dollars in thousands, except sales prices)		
Revenues	\$15,255	\$36,270	(57.9)%
Direct operating costs	\$5,576	\$9,934	(43.9)%
Depreciation, depletion and impairment	\$10,823	\$10,312	5.0%
Operating income (loss)	\$(1,144)	\$16,024	N/M
Capital expenditures	\$4,735	\$16,807	(71.8)%
Average net daily oil production (Bbls)	790	803	(1.6)%
Average net daily natural gas production (Mcf)	3,385	3,833	(11.7)%
Average oil sales price (per Bbl)	\$53.47	\$113.33	(52.8)%
Average natural gas sales price (per Mcf)	\$4.04	\$10.78	(62.5)%

Revenues decreased primarily due to lower average sales prices and net daily production of oil and natural gas. Average net daily natural gas production decreased primarily due to production declines on existing wells. Depreciation, depletion and impairment expense in the first nine months of 2009 includes approximately \$3.3 million incurred to impair certain oil and natural gas properties compared to approximately \$1.9 million incurred to impair certain oil and natural gas properties in the first nine months of 2008. The increase in impairment charges in 2009 was due to a reduction in commodity price expectations and a decline in production of certain wells. Capital expenditures decreased in the first nine months of 2009 compared to the first nine months of 2008 due to the decline in commodity prices.

Corporate and Other	2009	2008	% Change
	(Dollars in thousands)		
Selling, general and administrative	\$23,536	\$22,838	3.1%
Depreciation	\$681	\$612	11.3%
Other operating expenses	\$6,700	\$1,850	262.2%
Net gain on asset disposals/retirements	\$(548)	\$(3,040)	(82.0)%
Interest income	\$318	\$1,437	(77.9)%
Interest expense	\$2,734	\$465	488.0%
Other income	\$263	\$781	(66.3)%
Capital expenditures	\$4,762	\$351	1,256.7%

Other operating expenses increased due to an increase in bad debt expense of \$4.9 million in the first nine months of 2009 compared to the first nine months of 2008. Gains and losses on the disposal and retirement of assets are

treated as part of our corporate activities because such transactions relate to corporate strategy decisions of the Company's executive management group. In the first nine months of 2008 we recognized a net gain on the disposal of assets of approximately \$3.0 million primarily due to the sale of certain assets in our contract drilling segment. Interest expense increased in the first nine months of 2009 compared to the first nine months of 2008 due to amortization of LOC issuance costs and increased fees associated with outstanding letters of credit and the unused portion of the LOC. Capital expenditures increased in the first nine months of 2009 compared to the first nine months of 2008 due to the purchase and ongoing implementation of a new enterprise resource planning system.

Table of Contents**Recently Issued Accounting Standards**

In September 2006, the Financial Accounting Standards Board (FASB) issued an accounting standard that defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurement. The initial application of this standard was limited to financial assets and liabilities and became effective on January 1, 2008 for us. The impact of the initial application of this standard was not material. On January 1, 2009, we adopted this standard on a prospective basis for non-financial assets and liabilities that are not measured at fair value on a recurring basis. The application of this standard to our non-financial assets and liabilities is primarily limited to assets acquired and liabilities assumed in a business combination, asset retirement obligations and asset impairments, including goodwill and long-lived assets and has not had a material impact on us.

In December 2007, the FASB issued a new accounting standard that calls for significant changes from then current practice in accounting for business combinations. The new standard is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008 and became effective for us on January 1, 2009. The application of this new standard did not have a material impact on us.

In June 2008, the FASB issued a new accounting standard which clarifies that share-based payment awards that entitle their holders to receive non-forfeitable dividends before vesting should be considered participating securities and, as such, should be included in the calculation of basic earnings-per-share using the two-class method. Certain of our share-based payment awards entitle the holders to receive non-forfeitable dividends. This standard is effective for financial statements issued for fiscal years beginning after December 15, 2008, as well as interim periods within those years and became effective for us on January 1, 2009. The impact of the adoption of this standard is discussed in Note 1 to our unaudited consolidated financial statements included in this Report.

In December 2008, the SEC issued a Final Rule, *Modernization of Oil and Gas Reporting* (Final Rule). The Final Rule revises certain oil and gas reporting disclosures in Regulation S-K and Regulation S-X under the Securities Act and the Exchange Act, as well as Industry Guide 2. The amendments are designed to modernize and update oil and gas disclosure requirements to align them with current practices and changes in technology. The disclosure requirements are effective for registration statements filed on or after January 1, 2010 and for annual financial statements filed on or after December 31, 2009. that the application of the Final Rule is not expected to have a material impact on us.

In April 2009, the FASB issued a staff position to provide additional guidance for determining whether a market for a financial asset is not active and a transaction is not distressed for fair value measurements under generally accepted accounting principles. The provisions of this staff position are effective for financial statements issued for interim and annual periods ending after June 15, 2009 and became effective for us in the quarter ended June 30, 2009. The adoption of this staff position did not have a material impact on us.

In April 2009, the FASB issued a staff position which increases the frequency of fair value disclosures for financial instruments from annual only to quarterly reporting periods. The provisions of this staff position are effective for financial statements issued for interim and annual periods ending after June 15, 2009 and became effective for us in the quarter ended June 30, 2009. The adoption of this staff position did not have a material impact on us.

In June 2009, the FASB issued a new accounting standard that amends the accounting and disclosure requirements for the consolidation of variable interest entities. This new standard removes the previously existing exception from applying consolidation guidance to qualifying special-purpose entities and requires ongoing reassessments of whether an enterprise is the primary beneficiary of a variable interest entity. Before this Statement, generally accepted accounting principles required reconsideration of whether an enterprise is the primary beneficiary of a variable interest entity only when specific events occurred. This new standard is effective as of the beginning of each reporting entity's first annual reporting period that begins after November 15, 2009, for interim periods within that first annual reporting period, and for interim and annual reporting periods thereafter and will become effective for us on January 1, 2010. The adoption of this standard is not expected to have a material impact on us.

In June 2009, the FASB issued the FASB Accounting Standards Codification (Codification). Effective for financial statements issued for interim and annual periods ending after September 15, 2009, the Codification became the source of authoritative U.S. generally accepted accounting principles. The FASB will no longer issue new standards in the

form of Statements, FASB Staff Positions or EITF Abstracts. Instead, it will issue Accounting Standards Updates to update the Codification. The adoption of the Codification did not have a material impact on us.

Table of Contents**Volatility of Oil and Natural Gas Prices and its Impact on Operations and Financial Condition**

Our revenue, profitability, financial condition and rate of growth are substantially dependent upon prevailing prices for natural gas and, to a lesser extent, oil. For many years, oil and natural gas prices and markets have been extremely volatile. Prices are affected by market supply and demand factors as well as international military, political and economic conditions, and the ability of OPEC to set and maintain production and price targets. All of these factors are beyond our control. During 2008, the monthly average market price of natural gas (monthly average Henry Hub price as reported by the Energy Information Administration) peaked in June at \$13.06 per Mcf before rapidly declining to an average of \$5.99 per Mcf in December. In 2009, the average market price of natural gas declined further and averaged \$3.06 per Mcf in the month of September. This has resulted in our customers significantly reducing their drilling activities beginning in the fourth quarter of 2008 and continuing into 2009. This reduction in demand combined with the reactivation and construction of new land drilling rigs in the United States during the last several years has resulted in excess capacity compared to demand. As a result of these factors, our average number of rigs operating has declined significantly. We expect oil and natural gas prices to continue to be volatile and to affect our financial condition, operations and ability to access sources of capital. Continued low market prices for natural gas will likely result in demand for our drilling rigs remaining low and adversely affect our operating results, financial condition and cash flows.

The North American land drilling industry has experienced downturns in demand during the last decade. During these periods, there have been substantially more drilling rigs available than necessary to meet demand. As a result, drilling contractors have had difficulty sustaining profit margins and, at times, have incurred losses during the downturn periods.

ITEM 3. *Quantitative and Qualitative Disclosures About Market Risk*

We currently have exposure to interest rate market risk associated with any borrowings that we have under our LOC. The LOC calls for periodic interest payments at a floating rate ranging from LIBOR plus 3.00% to 4.00% or at a base rate plus 2.00% to 3.00%. The applicable rate above LIBOR or the prime rate is based upon our debt to capitalization ratio. As of September 30, 2009, we had no borrowings outstanding under our LOC.

We conduct a portion of our business in Canadian dollars through our Canadian land-based drilling operations. The exchange rate between Canadian dollars and U.S. dollars has fluctuated during the last several years. If the value of the Canadian dollar against the U.S. dollar weakens, revenues and earnings of our Canadian operations will be reduced and the value of our Canadian net assets will decline when they are translated to U.S. dollars. This currency rate risk is not material to our results of operations or financial condition.

The carrying values of cash and cash equivalents, trade receivables and accounts payable approximate fair value.

ITEM 4. *Controls and Procedures*

Disclosure Controls and Procedures We maintain disclosure controls and procedures (as such terms are defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Exchange Act), designed to ensure that the information required to be disclosed in the reports that we file with the SEC under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), as appropriate, to allow timely decisions regarding required disclosure.

Under the supervision and with the participation of our management, including our CEO and CFO, we conducted an evaluation of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on that evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective as of September 30, 2009.

Changes in Internal Control Over Financial Reporting There were no changes in our internal control over financial reporting during our most recently completed fiscal quarter that have materially affected or are reasonably likely to materially affect our internal control over financial reporting, as defined in Rule 13a-15(f) under the Exchange Act.

Table of Contents**PART II OTHER INFORMATION****ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds**

The table below sets forth the information with respect to purchases of our common stock made by us during the quarter ended September 30, 2009.

Period Covered	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May yet be Purchased Under the Plans or Programs (in thousands)(1)
July 1-31, 2009		\$		\$ 113,280
August 1-31, 2009 (2)	31,557	\$ 14.08	2,391	\$ 113,247
September 1-30, 2009		\$		\$ 113,247
Total	31,557	\$ 14.08	2,391	\$ 113,247

(1) On August 2, 2007, we announced that our Board of Directors approved a stock buyback program authorizing purchases of up to \$250 million of our common stock in open market or privately negotiated transactions.

(2) We purchased 29,166 shares from employees to provide the respective employees with

the funds necessary to satisfy their tax withholding obligations with respect to the vesting of restricted shares. The price paid was the closing price of our common stock on the last business day prior to the date the shares vested. These purchases were made pursuant to the terms of the Patterson-UTI Energy, Inc. 2005 Long-Term Incentive Plan and not pursuant to the stock buyback program.

ITEM 6. Exhibits

The following exhibits are filed herewith or incorporated by reference, as indicated:

- 3.1 Restated Certificate of Incorporation, as amended (filed August 9, 2004 as Exhibit 3.1 to the Company's Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2004 and incorporated herein by reference).
