QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2011

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

Commission file number: 001-34533

CELADON GROUP, INC.
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

13-3361050
(IRS Employer
Identification No.)

9503 East 33rd Street
One Celadon Drive
Indianapolis, IN
(Address of principal executive offices)

46235-4207
(Zip Code)

(317) 972-7000
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Edgar Filing: CELADON GROUP INC - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12-b2 of the Exchange Act).

Yes No

As of April 27, 2011 (the latest practicable date), 22,516,735 shares of the registrant's common stock, par value \$0.033 per share, were outstanding.

CELADON GROUP, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
March 31, 2011
(Unaudited)

1. Basis of Presentation

References in this Report on Form 10-Q to "we," "us," "our," "Celadon," or the "Company" or similar terms refer to Celadon Group, Inc. and its consolidated subsidiaries. All inter-company balances and transactions have been eliminated in consolidation.

The accompanying condensed consolidated unaudited financial statements of Celadon Group, Inc. and its subsidiaries have been prepared in accordance with accounting principles generally accepted in the United States of America and Regulation S-X, instructions to Form 10-Q, and other relevant rules and regulations of the Securities and Exchange Commission (the "SEC"), as applicable to the preparation and presentation of interim financial information. Certain information and footnote disclosures have been omitted or condensed pursuant to such rules and regulations. We believe all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Results of operations in interim periods are not necessarily indicative of results for a full year. These condensed consolidated unaudited financial statements and notes thereto should be read in conjunction with our consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended June 30, 2010.

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

2. Earnings Per Share (in thousands, except per share data)

A reconciliation of the basic and diluted earnings per share is as follows:

	Three months ended March 31,		Nine months ended March 31,	
	2011	2010	2011	2010
Weighted average common shares outstanding – basic	22,124	21,916	22,077	21,877
Dilutive effect of stock options and unvested restricted stock units	575	587	531	426
Weighted average common shares outstanding – diluted	22,699	22,503	22,608	22,303
Net income	\$1,967	\$366	\$9,247	\$1,952
Earnings per common share				
Diluted	\$0.09	\$0.02	\$0.41	\$0.09
Basic	\$0.09	\$0.02	\$0.42	\$0.09

(Unaudited)

3. Stock Based Compensation

The following table summarizes the components of our share based compensation program expense (in thousands):

	Three months ended March 31,		Nine months ended March 31,	
	2011	2010	2011	2010
Stock compensation expense for options, net of forfeitures	\$171	\$220	\$599	\$812
Stock compensation for restricted stock, net of forfeitures	308	374	1,124	1,065
Stock compensation expense for stock appreciation rights, net of forfeitures	209	446	302	766
Total stock compensation expense	\$688	\$1,040	\$2,025	\$2,643

As of March 31, 2011, we have approximately \$1.7 million of unrecognized compensation cost related to unvested options granted under the 2006 Plan. This cost is expected to be recognized over a weighted-average period of 1.4 years and a total period of 4.0 years.

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option valuation model that uses the following assumptions:

- Dividend yield – the dividend yield is based on our historical experience and future expectation of dividend payouts.
- Expected volatility – we analyzed the volatility of our stock using historical data for three or four years through the end of the most recent period to estimate the expected volatility, as the historical data mirrors the vesting terms of the respective option.
- Risk-free interest rate – the risk-free interest rate assumption is based on U.S. Treasury securities at a constant maturity with a maturity period that most closely resembles the expected term of the stock option award.
- Expected terms – the expected terms of employee stock options represents the weighted-average period the stock options are expected to remain outstanding and has been determined based on an analysis of historical exercise behavior from 1995 through the end of the most recent period.

Stock option grants that were issued in the three months and nine months ended March 31, 2011, had a weighted average grant date fair value of \$7.83, a weighted average expected volatility of 59.5%, a weighted average risk free interest rate of 1.53%, and a weighted average vesting period of 4 years. There was no option grants issued in the three or nine months ended March 31, 2010.

A summary of the award activity of the Company's stock option plans as of March 31, 2011, and changes during the period then ended is presented below:

Options	Option Totals	Weighted-Average Exercise Price per Share
Outstanding at July 1, 2010	1,506,967	\$ 9.91

Edgar Filing: CELADON GROUP INC - Form 10-Q

Granted	87,500	\$	14.42
Exercised	(102,967)	\$	4.81
Forfeited or expired	(51,750)	\$	9.63
Outstanding at March 31, 2011	1,439,750	\$	10.56
Exercisable at March 31, 2011	1,054,460	\$	10.61

7

Table of Contents

CELADON GROUP, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
March 31, 2011
(Unaudited)

A summary of the restricted stock award activity under the 2006 Plan as of March 31, 2011, and changes during the nine-month period is presented below:

	Number of Restricted Stock Awards	Weighted-Average Grant Date Fair Value
Unvested at July 1, 2010	340,692	\$ 10.80
Granted	187,417	\$ 13.93
Vested and Issued	(130,395)	\$ 11.40
Forfeited	(41,669)	\$ 10.41
Unvested at March 31, 2011	356,045	\$ 12.27

The fair value of each restricted stock award is based on the closing market price on the date of grant. We also have approximately \$3.6 million of unrecognized compensation expense related to restricted stock awards, which is anticipated to be recognized over a weighted-average period of 3.2 years and a total period of 3.8 years.

The company had 144,000 outstanding stock appreciation rights as of June 30, 2010 and March 31, 2011, respectively. These stock appreciation rights were granted at a fair value market price of \$8.64 based on the closing market price on the date of the grant and are marked to market at the end of each quarter.

4. Segment Information

We have two reportable segments comprised of our two operating segments, an asset-based segment and an asset-light segment. Our asset-based segment includes our asset-based dry van carrier and rail services, which are geographically diversified but have similar economic and other relevant characteristics, as they all provide truckload carrier services of general commodities to a similar class of customers. Our asset-light segment consists of our TruckersB2B, warehousing, brokerage, and less-than-load ("LTL") operations, which we have determined qualifies as a reportable segment under ASC 280-10 Segment Reporting. Prior to July 1, 2010, we had two reportable segments comprised of a transportation segment, consisting of revenue from all truckload-hauling services, and an e-commerce segment, consisting of revenues from our subsidiary TruckersB2B.

	Operating Revenues			
	Three Months Ended March 31, 2011		Nine Months Ended March 31, 2011	
Asset-based	\$ 126,110	\$ 120,037	\$ 378,064	\$ 356,803
Asset-light	9,467	9,398	30,933	27,703
Total	\$ 135,577	\$ 129,435	\$ 408,997	\$ 384,506

Table of Contents

CELADON GROUP, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
March 31, 2011
(Unaudited)

Information as to the Company's operating revenue by geographic area is summarized below (in thousands). The Company allocates operating revenue based on country of origin of the tractor hauling the freight:

	Operating Revenues			
	Three Months Ended		Nine Months Ended	
	March 31,		March 31,	
	2011	2010	2011	2010
United States	\$ 117,994	\$ 113,417	\$ 356,670	\$ 336,155
Canada	10,214	9,474	30,465	28,664
Mexico	7,369	6,544	21,862	19,687
Consolidated	\$ 135,577	\$ 129,435	\$ 408,997	\$ 384,506

5. Comprehensive Income

Comprehensive income includes changes in fair value on foreign currency and fuel derivatives, which qualify for hedge accounting. A reconciliation of net income and comprehensive income follows (in thousands):

	Three months ended		Nine months ended	
	March 31,		December 31,	
	2011	2010	2011	2010
Net income	\$ 1,967	\$ 366	\$ 9,247	\$ 1,952
Unrealized gain on fuel derivative instruments	468	---	1,645	---
Unrealized gain on currency derivative instruments	32	272	357	301
Foreign currency translation adjustments	891	846	1,989	2,173
Comprehensive income	\$ 3,359	\$ 1,484	\$ 13,237	\$ 4,426

6. Income Taxes

Our effective income tax rate was 54.1% and 46.1% for the three and nine month periods ended March 31, 2011, compared with 75.9% and 66.3% for the three and nine month periods ended March 31, 2010. In determining our provision for income taxes, we use an estimated annual effective tax rate, which is based on our expected annual income, statutory tax rates, best estimate of nontaxable and nondeductible items of income and expense and the ultimate outcome of tax audits. The fiscal 2011 effective income tax rate reflects changes in estimates of state income taxes and nontaxable and nondeductible items as they relate to expected annual income.

The Company follows ASC Topic 740-10-25 in Accounting for Uncertainty in Income Taxes. Topic 740 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. As of March 31, 2011, the Company recorded a \$0.5 million liability for unrecognized tax benefits, a portion of which represents penalties and interest.

As of March 31, 2011, we are subject to U.S. Federal income tax examinations for the tax years 2007 through 2009. We file tax returns in numerous state jurisdictions with varying statutes of limitations.

Table of Contents

CELADON GROUP, INC.
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 March 31, 2011
 (Unaudited)

7. Commitments and Contingencies

We are involved in certain claims and pending litigation arising from the normal conduct of business. Based on our present knowledge of the facts and, in certain cases, opinions of outside counsel, we believe the resolution of these claims and pending litigation will not have a material adverse effect on our financial condition, results of operations or our liquidity.

8. Fair Value Measurements

Effective January 1, 2009, we adopted ASC 820-10 Fair Value Measurements and Disclosure for non-recurring fair value measurements of non-financial assets and liabilities. This standard defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. This standard establishes a three-level hierarchy for fair value measurements based upon the significant inputs used to determine fair value. Observable inputs are those which are obtained from market participants external to the Company while unobservable inputs are generally developed internally, utilizing management's estimates assumptions, and specific knowledge of the nature of the assets or liabilities and related markets. The three levels are defined as follows:

Level 1 – Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date. An active market is defined as a market in which transactions for the assets or liabilities occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 – Inputs include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active (markets with few transactions), inputs other than quoted prices that are observable for the asset or liability (i.e., interest rates, yield curves, etc), and inputs that are derived principally from or corroborated by observable market data correlation or other means (market corroborated inputs).

Level 3 – Unobservable inputs, only used to the extent that observable inputs are not available, reflect the Company's assumptions about the pricing of an asset or liability.

In accordance with the fair value hierarchy described above, the following table shows the fair value of the Company's financial assets and liabilities that are required to be measured at fair value as of March 31, 2011 and June 30, 2010.

	Level 1		Level 2		Level 3		
Balance	Balance	Balance	Balance	Balance	Balance	Balance	
at	at	at	at	at	At	at	
March	June	March	June	March	June	March	
31,	30,	31,	30,	31,	30,	31,	
2011	2010	2011	2010	2011	2010	2011	
Foreign currency derivatives	317	(192)	---	---	317	(192)	---

F u e l									
derivatives	2,642	---	---	---	2,642	---	---	---	---

9. Company Share Repurchase Programs

On August 25, 2010, our Board of Directors unanimously authorized the repurchase of up to 2,000,000 shares of our common stock. The repurchase authorization is intended to afford us the flexibility to acquire shares opportunistically in future periods and does not indicate any intention to repurchase any particular number of shares within a definite timeframe. Any repurchases would be effected based upon share prices and market conditions. Under our share repurchase program, repurchased shares are constructively retired and returned to unissued status. As of March 31, 2011, we have not made any repurchases under this authorization.

Table of Contents

10. Fuel Derivatives

In the Company's day to day business activities we are exposed to certain market risks, including the effects of changes in fuel prices. The Company continually reviews new ways to reduce the potentially adverse effects that the volatility of fuel markets may have on operating results. In an effort to reduce the variability of the ultimate cash flows associated with fluctuations in diesel fuel prices, the company has begun to enter into futures contracts. These instruments will be heating oil futures contracts as the related index, New York Mercantile Exchange ("NYMEX"), generally exhibits high correlation with the changes in the dollars of the forecasted purchase of diesel fuel. The Company does not engage in speculative transactions, nor does it hold or issue financial instruments for trading purposes.

In July 2010, we entered into futures contracts, which pertain to 4.5 million gallons (350,000 gallons per month) or approximately 10% of our monthly projected fuel requirements through July 2011. Additionally, in August 2010 the Company entered into additional contracts to hedge approximately 3.2 million gallons (276,000 gallons per month) thru September 2011 or approximately 8% of our monthly projected 2011 fuel requirements. Under these contracts, we pay a fixed rate per gallon of heating oil and receive the monthly average price of New York heating oil per the NYMEX. The Company has done retrospective and prospective regression analyses that showed the changes in the prices of diesel fuel and heating oil were deemed to be highly effective based on the relevant authoritative guidance. Accordingly, we have designated the respective hedges as cash flow hedges.

We perform both a prospective and retrospective assessment of the effectiveness of our hedge contracts at inception and quarterly. If our analysis shows that the derivatives are not highly effective as hedges, we will discontinue hedge accounting for the period and prospectively recognize changes in the fair value of the derivative being recognized through earnings. As a result of our effectiveness assessment at inception and at March 31, 2011, we believe our hedge contracts have been and will continue to be highly effective in offsetting changes in cash flows attributable to the hedged risk.

We recognize all derivative instruments at fair value on our consolidated condensed balance sheets in other assets or other accrued expenses. The Company's derivative instruments are designated as cash flow hedges, thus the effective portion of the gain or loss on the derivative is reported as a component of accumulated other comprehensive income and will be reclassified into earnings in the same period during which the hedged transactions affect earnings. The effective portion of the derivative represents the change in fair value of the hedge that offsets the change in fair value of the hedged item. To the extent the change in the fair value of the hedge does not perfectly offset the change in the fair value of the hedged item, the ineffective portion of the hedge is immediately recognized in other income or expense on our consolidated condensed statements of operations. The ineffective portion of the hedge was immaterial.

Based on the amounts in accumulated other comprehensive income as of March 31, 2011 and the expected timing of the purchases of the diesel hedged, we expect to reclassify \$2.6 million of gains on derivative instruments from accumulated other comprehensive income to the statement of income, as an offset to fuel expense, during the next six months due to the actual diesel fuel purchases. The amounts actually realized will be dependent on the fair values as of the date of settlement.

Outstanding financial derivative instruments expose us to credit loss in the event of nonperformance by the companies with which we have these agreements. Our credit exposure related to these financial instruments is represented by the fair value of contracts reported as assets. To evaluate credit risk, we review each counterparty's audited financial statements and credit ratings and obtain references. Any credit valuation adjustments deemed necessary have been reflected in the fair value of the instrument.

11. Disposition of majority interest in subsidiary

In February 2011, the Company entered into a joint venture, whereby the Company sold a 65% majority interest, in its TruckersB2B subsidiary to an unrelated third party. TruckersB2B will continue normal daily operations with an expanding sales and marketing team to develop growth. TruckersB2B is controlled by a five person executive committee, of which the Company has two committee seats. In conjunction with the transaction, the Company recognized a pre-tax gain of \$4.1 million. Approximately \$2.6 million of the gain related to the fair market valuation of the Company's continuing 35% ownership. The company has de-consolidated the subsidiary, including the write-off of approximately \$2.4 million of goodwill.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Disclosure Regarding Forward-Looking Statements

This Quarterly Report contains certain statements that may be considered forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements involve known and unknown risks, uncertainties, and other factors which may cause the actual results, events, performance, or achievements of the Company to be materially different from any future results, events, performance, or achievements expressed in or implied by such forward-looking statements. Such statements may be identified by the fact that they do not relate strictly to historical or current facts. These statements generally use words such as "believe," "expect," "anticipate," "project," "forecast," "should," "estimate," "plan," "intend," "outlook," "goal," "will," "may," and similar expressions. While it is impossible to identify all factors that may cause actual results to differ from those expressed in or implied by forward-looking statements, the risks and uncertainties that may affect the Company's business, include, but are not limited to, those discussed in the section entitled Item 1A. Risk Factors set forth below.

All such forward-looking statements speak only as of the date of this Form 10-Q. You are cautioned not to place undue reliance on such forward-looking statements. The Company expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in the Company's expectations with regard thereto or any change in the events, conditions, or circumstances on which any such statement is based.

References to the "Company," "we," "us," "our," and words of similar import refer to Celadon Group, Inc. and its consolidated subsidiaries.

Business Overview

We are one of North America's twenty largest truckload carriers as measured by revenue. We generated \$523.5 million in operating revenue during our fiscal year ended June 30, 2010. We provide asset-based dry van truckload carrier, rail services and asset-light services including brokerage services, less-than-truckload (LTL), and warehousing services. Through our asset and asset-light services, we are able to transport or arrange for transportation throughout the United States, Canada, and Mexico.

We generated approximately one-half of our revenue in fiscal 2010 from international movements, and we believe our annual border crossings make us the largest provider of international truckload movements in North America. We believe that our strategically located terminals and experience with the language, culture, and border crossing requirements of each North American country provide a competitive advantage in the international trucking marketplace.

We believe our international operations, particularly those involving Mexico, offer an attractive business niche. The additional complexity of and need to establish cross-border business partners and to develop strong organization and adequate infrastructure in Mexico affords some barriers to competition that are not present in traditional U.S. truckload services.

Recent Results of Operations

Our results of operations for the three months ended March 31, 2011, compared to the same period in 2010 are:

Revenue, before fuel surcharge, decreased 0.7% to \$109.1 million from \$109.9 million;

- Net income increased to \$2.0 million from \$0.4 million; and
- Net income per diluted share increased to \$0.09 from \$0.02.

For our key performance indicators in the March 2011 quarter, average revenue per seated tractor per week remained flat at \$2,796 from the March 2010 quarter. The average rate per loaded mile increased 6.5% and average miles per seated tractor decreased 5.5% from the March 2010 quarter. The average length of haul increased 1.6% to 905 miles from 891 miles in the same period last year. We believe that we are making progress improving our freight mix and contract pricing.

Our seated tractor count decreased slightly to 2,653 tractors in the quarter ended March 31, 2011, compared to 2,694 tractors for the same period a year ago. The net change of 41 units is comprised of a 79-unit increase in independent contractor tractors, offset by an 120-unit decrease in company tractors. The number of tractors operated by independent contractors increased 22.1% from a year ago, and now represents 16.4% of our seated fleet.

Table of Contents

Revenue and Expenses

We primarily generate revenue by transporting freight for our customers. Generally, we are paid a predetermined rate per mile or per load for our services. We enhance our revenue by charging for tractor and trailer detention, loading and unloading activities, brokerage operations, and other specialized services, as well as through the collection of fuel surcharges to mitigate the impact of increases in the cost of fuel. The main factors that affect our revenue are the revenue per mile we receive from our customers, the percentage of miles for which we are compensated, and the number of miles we generate with our equipment. These factors relate to, among other things, the general level of economic activity in the United States, inventory levels, specific customer demand, the level of capacity in the trucking industry, and driver availability.

The main factors that impact our profitability in terms of expenses are the variable costs of transporting freight for our customers. These costs include fuel expense, driver-related expenses, such as wages, benefits, training and recruitment, and independent contractor and third party carrier costs, which are recorded on the "Purchased Transportation" line of our consolidated statements of income. Expenses that have both fixed and variable components include maintenance, insurance, and claims. These expenses generally vary with the miles we travel, but also have a controllable component based on safety, fleet age, efficiency, and other factors. Our main fixed costs are the acquisition and depreciation of long-term assets, such as revenue equipment and the compensation of non-driver personnel. Effectively controlling our expenses and managing our net cost of revenue equipment acquisitions and dispositions, including any related gains or losses, are important elements of assuring our profitability. We evaluate our profitability using operating ratio, excluding the impact of fuel surcharge revenue (operating expenses, net of fuel surcharge, expressed as a percentage of revenue, before fuel surcharge), and income before income taxes, which eliminates shifting operating lease expenses "above the line" from interest expense on owned or capital leased equipment.

Results of Operations

The following table sets forth the percentage relationship of expense items to revenue before fuel surcharge for the periods indicated:

	Three months ended March 31,		Nine months ended March 31,	
	2011	2010	2011	2010
Revenue before fuel surcharge(1)	100.0 %	100.0 %	100.0 %	100.0 %
Operating expenses:				
Salaries, wages, and employee benefits	33.5 %	34.9 %	33.0 %	35.5 %
Fuel(1)	8.4 %	11.1 %	8.8 %	11.2 %
Purchased transportation	23.3 %	18.7 %	22.5 %	17.8 %
Revenue equipment rentals	5.0 %	8.3 %	5.8 %	8.2 %
Operations and maintenance	9.5 %	8.5 %	9.0 %	8.2 %
Insurance and claims	6.6 %	3.6 %	4.4 %	3.4 %
Depreciation and amortization	7.7 %	6.9 %	6.7 %	7.0 %
Cost of products and services sold	0.7 %	1.2 %	1.0 %	1.4 %

Edgar Filing: CELADON GROUP INC - Form 10-Q

Communications and utilities	1.0	%	1.1	%	1.0	%	1.1	%
Operating taxes and licenses	2.3	%	2.3	%	2.2	%	2.2	%
General and other operating	1.6	%	1.4	%	1.4	%	1.7	%
Total operating expenses	99.6	%	98.0	%	95.8	%	97.6	%
Operating income	0.4	%	2.0	%	4.2	%	2.4	%
Other expense:								
Interest expense	0.4	%	0.6	%	0.4	%	0.6	%
Income from sale of majority interest in subsidiary	3.9	%	---		1.2	%	---	
Income before income taxes	3.9	%	1.4	%	5.0	%	1.8	%
Provision for income taxes	2.1	%	1.0	%	2.3	%	1.2	%
Net income	1.8	%	0.4	%	2.7	%	0.6	%

(1) Revenue before fuel surcharge is total revenue less fuel surcharges. In this table, fuel surcharges are eliminated from revenue and subtracted from fuel expense. Fuel surcharges were \$26.5 million and \$19.5 million for the third quarter of fiscal 2011 and 2010, respectively, and \$68.9 million and \$54.8 million for the nine months ended March 31, 2011 and 2010, respectively.

Table of Contents

Comparison of Three Months Ended March 31, 2011 to Three Months Ended March 31, 2010

Total revenue increased by \$6.2 million, or 4.8%, to \$135.6 million for the third quarter of fiscal 2011, from \$129.4 million for the third quarter of fiscal 2010. Revenue before fuel surcharge decreased slightly by \$0.8 million, or 0.7%, to \$109.1 million for the third quarter of fiscal 2011, from \$109.9 million for the third quarter of fiscal 2010. This decrease was attributable to a decrease in loaded miles to 59.9 million for the third quarter of fiscal 2011 from 65.0 million in the third quarter of fiscal 2010 offset by revenue per loaded mile increasing to \$1.489 for the third quarter of fiscal 2011 from \$1.398 for the third quarter of fiscal 2010. This decrease in revenue was the result of severe inclement weather throughout the quarter and a slight reduction in fleet size offset by the rate increases we were able to implement over the last year and improving freight selection. This combination of factors resulted in average revenue per seated tractor per week, which is our primary measure of asset productivity, being flat at \$2,796 in the third quarter of fiscal 2011 as compared to the third quarter of fiscal 2010.

Fuel surcharge revenue increased to \$26.5 million in the third quarter of fiscal 2011 from \$19.5 million for the third quarter of fiscal 2010.

In discussing our results of operations, we use revenue before fuel surcharge ("revenue") and fuel, net of fuel surcharge, because we believe that eliminating the impact of the sometimes volatile source of revenue affords more consistent basis for comparing our results of operations from period to period.

Salaries, wages, and employee benefits were \$36.6 million, or 33.5% of revenue, for the third quarter of fiscal 2011, compared to \$38.3 million, or 34.9% of revenue, for the third quarter of fiscal 2010. These decreases were the result of a decrease in driver payroll related to a decrease in company miles and a decrease in medical claims expense for the quarter, offset by slight increases in salaries and wages expense and increases in recruiting expenses.

Fuel expenses, net of fuel surcharge, decreased to \$9.2 million, or 8.4% of revenue, for the third quarter of fiscal 2011, compared to \$12.1 million, or 11.1% of revenue, for the third quarter of fiscal 2010. This cost decrease was attributable to a decrease in total miles and our continued improvement in our average miles per gallon, which were partially offset by the average Department of Energy fuel price increasing \$0.79 per gallon in the third quarter of fiscal 2011, compared to the third quarter of fiscal 2010 and the lag in surcharge collection when fuel prices are rapidly increasing. We expect that our continued efforts to reduce idling, operate more fuel-efficient tractors, and implement locking in fuel hedges when appropriate will continue to have a positive impact on our miles per gallon; however, we expect this positive impact to be partially offset by increasing fuel costs per gallon, lower fuel economy on EPA-mandated new engines, and the use of more costly ultra-low sulfur diesel fuel.

Purchased transportation increased to \$25.4 million, or 23.3% of revenue, for the third quarter of fiscal 2011, from \$20.6 million, or 18.7% of revenue, for the third quarter of fiscal 2010. These increases are primarily related to an increase in independent contractor miles to 12.5 million in the third quarter of fiscal 2011 compared to 10.0 million miles in the third quarter of fiscal 2010. Independent contractors are drivers who cover all their operating expenses (fuel, driver salaries, maintenance, and equipment costs) for a fixed payment per mile. In addition, third party logistic expenses for LTL and intermodal transportation have increased as we continue to increase the use of those providers. We expect purchased transportation to increase as we increase the number of independent contractors in our fleet and continue to increase our purchased transportation for brokerage and intermodal transportation.

Revenue equipment rentals decreased to \$5.5 million, or 5.0% of revenue, for the third quarter of fiscal 2011, compared to \$9.1 million, or 8.3% of revenue, for the third quarter of fiscal 2010. These decreases were partially attributable to a decrease in the number of tractors and trailers financed under operating leases. At March 31, 2011, 1,474 tractors were held under operating leases, compared to 1,934 tractors at March 31, 2010. These decreases were

also related to the increase in the number of leases from our Quality Equipment Leasing division (which relates to drivers who lease tractors from us and drive for other companies). We expect our revenue equipment rental to decrease as a percentage of freight revenue going forward.

Operations and maintenance increased to \$10.4 million, or 9.5% of revenue, for the third quarter of fiscal 2011, from \$9.3 million, or 8.5% of revenue, for the third quarter of fiscal 2010. Operations and maintenance consist of direct operating expense, maintenance, and tire expense. These increases in the third quarter of fiscal 2011 are primarily related to increases in costs associated with tractor maintenance from the new CSA 2010 implementation and as tractors under warranty have declined, tire expense and net maintenance expense for our Quality Equipment Leasing division increased. We expect our operations and maintenance expense to be similar to the current level going forward, subject to implementation of CSA 2010 that may impact these expenses.

Table of Contents

Insurance and claims expense increased to \$7.3 million, or 6.6% of revenue for the third quarter of fiscal 2011, from \$3.9 million, or 3.6% for the third quarter of fiscal 2010. Insurance consists of premiums for liability, physical damage, cargo damage, and workers' compensation insurance, in addition to claims expense. Insurance expense was affected by a significant increase related to a workers' compensation case being reserved to full exposure prior to reinsurance for a total in the quarter of \$1.0 million. We also expensed a liability accident to full exposure prior to reinsurance for a total of \$1.5 million. We do not expect these significant claims to be reoccurring in nature. Our insurance program involves self-insurance at various risk retention levels. Claims in excess of these risk levels are covered by insurance in amounts we consider to be adequate. We accrue for the uninsured portion of claims based on known claims and historical experience. We continually revise and change our insurance program to maintain a balance between premium expense and the risk retention we are willing to assume. Insurance and claims expense will vary based primarily on the frequency and severity of claims, the level of self-retention, and the premium expense.

Depreciation and amortization, consisting primarily of depreciation of revenue equipment, increased to \$8.4 million, or 7.7% of revenue, for the third quarter of fiscal 2011, compared to \$7.6 million, or 6.9% of revenue, for the third quarter of fiscal 2010. This increase was related to higher tractor depreciation related to more owned tractors in the fiscal 2011 quarter. Revenue equipment held under operating leases is not reflected on our balance sheet and the expenses related to such equipment are reflected on our statements of income in revenue equipment rentals, rather than in depreciation and amortization and interest expense, as is the case for revenue equipment that is bought with cash or financed with borrowings or capital leases.

All of our other operating expenses are relatively minor in amount, and there were no significant changes in such expenses. Accordingly, we have not provided a detailed discussion of such expenses.

Income from the sale of a majority interest in a subsidiary was \$4.1 million in the third quarter of fiscal 2011. In February 2011, we entered into a joint venture by selling 65% of TruckersB2B to an unrelated third party. Approximately \$2.6 million of the gain related to the fair market valuation of Celadon's continuing 35% ownership, and this asset is recognized as investment in joint venture on the balance sheet.

Income taxes increased to \$2.3 million, with an effective tax rate of 54.1%, for the third quarter of fiscal 2011, from \$1.2 million, with an effective tax rate of 75.9%, for the third quarter of fiscal 2010. As pre-tax net income increases, our non-deductible expenses, such as per diem expense, have a lesser impact on our effective rate. In such event, we would expect our effective tax rate to decrease.

Comparison of Nine Months Ended March 31, 2011 to Nine Months Ended March 31, 2010

Total revenue increased by \$24.5 million, or 6.4%, to \$409.0 million for the nine months ended March 31, 2011, from \$384.5 million for the nine months ended March 31, 2010. Revenue before fuel surcharge increased by \$10.4 million, or 3.2%, to \$340.1 million for the nine months ended March 31, 2011, from \$329.7 million for the nine months ended March 31, 2010. This increase was primarily attributable to revenue per loaded mile increasing to \$1.479 for the nine months ended March 31, 2011, from \$1.397 for the nine months ended March 31, 2010 offset by a decrease in loaded miles to 186.4 million for the nine months ended March 31, 2011, from 196.2 million in the nine months ended March 31, 2010. This increase in revenue was the result of rate increases we were able to implement given the favorable switch in capacity and demand in the industry. This combination of factors resulted in a market increase in average revenue per seated tractor per week, which is our primary measure of asset productivity, to \$2,852 for the nine months ended March 31, 2011, from \$2,785 for the nine months ended March 31, 2010.

Fuel surcharge revenue increased to \$68.9 million for the nine months ended March 31, 2011 from \$54.8 million for the nine months ended March 31, 2010.

In discussing our results of operations, we use revenue before fuel surcharge ("revenue") and fuel, net of fuel surcharge, because we believe that eliminating the impact of the sometimes volatile source of revenue affords more consistent basis for comparing our results of operations from period to period.

Salaries, wages, and employee benefits were \$112.3 million, or 33.0% of revenue, for the nine months ended March 31, 2011, compared to \$116.9 million, or 35.5% of revenue, for the nine months ended March 31, 2010. These decreases were the result of a decrease in driver payroll related to a decrease in company miles and a decrease in medical claims expense, offset by slight increases in salaries and wages expense and increases in recruiting expenses.

Fuel expenses, net of fuel surcharge, decreased to \$30.0 million, or 8.8% of revenue, for the nine months ended March 31, 2011, compared to \$37.0 million, or 11.2% of revenue, for the nine months ended March 31, 2010. This cost decrease was attributable to a decrease in total miles and our continued improvement in our average miles per gallon, which were partially offset by the average Department of Energy fuel price increasing \$0.51 per gallon for the nine months ended March 31, 2011 and the lag in surcharge collection when fuel prices are rapidly increasing. We expect that our continued efforts to reduce idling, operate more fuel-efficient tractors, and implement locking in fuel hedges when appropriate will continue to have a positive impact on our miles per gallon; however, we expect this positive impact to be partially offset by increasing costs per gallon, lower fuel economy on EPA-mandated new engines, and the use of more costly ultra-low sulfur diesel fuel.

Table of Contents

Purchased transportation increased to \$76.7 million, or 22.5% of revenue, for the nine months ended March 31, 2011, from \$58.8 million, or 17.8% of revenue, for the nine months ended March 31, 2010. These increases are primarily related to an increase in independent contractor miles to 38.4 million for the nine months ended March 31, 2011 compared to 28.5 million miles for the nine months ended March 31, 2010. Independent contractors are drivers who cover all their operating expenses (fuel, driver salaries, maintenance, and equipment costs) for a fixed payment per mile. In addition, third party logistic expenses for LTL and intermodal transportation have increased as we continue to increase the use of those providers. We expect purchased transportation to increase as we increase the number of independent contractors in our fleet and continue to increase our purchased transportation for brokerage and intermodal transportation.

Revenue equipment rentals decreased to \$19.8 million, or 5.8% of revenue, for the nine months ended March 31, 2011, compared to \$27.2 million, or 8.2% of revenue, for the nine months ended March 31, 2010. At March 31, 2011, 1,474 tractors were held under operating leases, compared to 1,934 tractors at March 31, 2010. These decreases were also related to the increase in leases from our Quality Equipment Leasing division (which relates to drivers who lease tractors from us and drive for other companies). We expect our revenue equipment rental to decrease as a percentage of freight revenue going forward.

Operations and maintenance increased to \$30.5 million, or 9.0% of revenue, for the nine months ended March 31, 2011, from \$27.0 million, or 8.2% of revenue, for the nine months ended March 31, 2010. Operations and maintenance consist of direct operating expense, maintenance, and tire expense. These increases in the nine months ended March 31, 2011 are primarily related to increases in costs associated with tractor maintenance from the new CSA 2010 implementation and as tractors under warranty have declined, tire expense and net maintenance expense for our Quality Equipment Leasing division increased. We expect our operations and maintenance expense to be similar to the current level going forward, subject to implementation of CSA 2010 that may impact these expenses.

Insurance and claims expense increased to \$14.8 million, or 4.4% of revenue for the nine months ended March 31, 2011, compared to \$11.3 million, or 3.4% of revenue for the nine months ended March 31, 2010. These increases relate to a workers' compensation case being reserved to full exposure prior to reinsurance for a total in the period of \$1.0 million. We also expensed a liability accident to full exposure prior to reinsurance for a total of \$1.5 million. Insurance consists of premiums for liability, physical damage, cargo damage, and workers' compensation insurance, in addition to claims expense. Our insurance program involves self-insurance at various risk retention levels. Claims in excess of these risk levels are covered by insurance in amounts we consider to be adequate. We accrue for the uninsured portion of claims based on known claims and historical experience. We continually revise and change our insurance program to maintain a balance between premium expense and the risk retention we are willing to assume. Insurance and claims expense will vary based primarily on the frequency and severity of claims, the level of self-retention, and the premium expense.

Depreciation and amortization, consisting primarily of depreciation of revenue equipment, decreased to \$22.7 million, or 6.7% of revenue, for the nine months ended March 31, 2011, compared to \$23.0 million, or 7.0% of revenue, for the nine months ended March 31, 2010. These decreases were primarily attributable to a gain on the sale of equipment, which include expenses to prepare the equipment for sale, whereas there was a loss in the nine months ended March 31, 2010. In addition, depreciation on the owned revenue equipment has increased in the nine months ended March 31, 2011 compared to the previous comparable period. Revenue equipment held under operating leases is not reflected on our balance sheet and the expenses related to such equipment are reflected on our statements of income in revenue equipment rentals, rather than in depreciation and amortization and interest expense, as is the case for revenue equipment that is financed with borrowings or capital leases.

All of our other operating expenses are relatively minor in amount, and there were no significant changes in such expenses. Accordingly, we have not provided a detailed discussion of such expenses.

Income from the sale of a majority interest in a subsidiary was \$4.1 million in the nine months ended March 31, 2011. In February 2011, we entered into a joint venture by selling 65% of TruckersB2B to an unrelated third party. Approximately \$2.6 million of the gain related to the fair market valuation of Celadon's continuing 35% ownership, and this asset is recognized as investment in joint venture on the balance sheet.

Income taxes increased to \$7.9 million, with an effective tax rate of 46.1%, for the nine months ended March 31, 2011, from \$3.8 million, with an effective tax rate of 66.3%, for the nine months ended March 31, 2010. As pre-tax net income increases, our non-deductible expenses, such as per diem expense, have a lesser impact on our effective rate. In such event, we would expect our effective tax rate to decrease.

Table of Contents

Liquidity and Capital Resources

Trucking is a capital-intensive business. We require cash to fund our operating expenses (other than depreciation and amortization), to make capital expenditures and acquisitions, and to repay debt, including principal and interest payments. Other than ordinary operating expenses, we anticipate that capital expenditures for the acquisition of revenue equipment will constitute our primary cash requirement over the next twelve months. We frequently consider potential acquisitions, and if we were to consummate an acquisition, our cash requirements would increase and we may have to modify our expected financing sources for the purchase of tractors. Subject to any required lender approval, we may make acquisitions in the future. Our principal sources of liquidity are cash generated from operations, bank borrowings, capital and operating lease financing of revenue equipment, and proceeds from the sale of used revenue equipment.

On December 7, 2010, the Company entered into a new \$50 million five-year revolving credit facility agented by Bank of America, N.A. The facility refinanced the Company's existing credit facility and provides for ongoing working capital needs and general corporate purposes. Bank of America, N.A. served as the lead arranger in the facility and Wells Fargo Bank, N.A. also participated in the new facility. At March 31, 2011, we were authorized to borrow up to \$50.0 million under this revolving line of credit, which expires December 7, 2015. The applicable interest rate under this agreement is based on either a base rate equal to the greater of the Bank of America, N.A.'s prime rate or LIBOR plus an applicable margin between 0.75% and 1.125% that is adjusted quarterly based on the Company's lease adjusted total debt to EBITDAR ratio. At March 31, 2011, we had no outstanding borrowings related to our credit facility and \$0.4 million utilized for letters of credit. We are obligated to comply with certain financial covenants under our credit agreement and we were in compliance with these covenants at March 31, 2011.

We believe we will be able to fund our operating expenses, as well as our current commitments for the acquisition of revenue equipment over the next twelve months, with a combination of cash generated from operations, borrowings available under our primary credit facility, and lease financing arrangements. We will continue to have significant capital requirements over the long term, and the availability of the needed capital will depend upon our financial condition and operating results and numerous other factors over which we have limited or no control, including prevailing market conditions and the market price of our common stock. However, based on our operating results, anticipated future cash flows, current availability under our credit facility, and sources of equipment lease financing that we expect will be available to us, we do not expect to experience significant liquidity constraints in the foreseeable future.

Cash Flows

Net cash provided by operations for the nine months ended March 31, 2011 was \$31.2 million, relatively consistent compared to cash provided by operations of \$32.6 million for the nine months ended March 31, 2010. Cash provided by operations was relatively unchanged due to an increase in net income and an increase in prepaid expenses and other assets offset by a decrease in trade receivables.

Net cash used in investing activities was \$8.1 million for the nine months ended March 31, 2011, compared to net cash used in investing activities of \$13.4 million for the nine months ended March 31, 2010. Cash used in investing activities includes the net cash effect of acquisitions and dispositions of revenue equipment during each period in addition to proceeds from the sale of a majority interest in a subsidiary. Capital expenditures for equipment totaled \$45.2 million for the nine months ended March 31, 2011, and \$43.3 million for the nine months ended March 31, 2010. We generated proceeds from the sale of property and equipment of \$32.0 million and \$29.8 million for the nine months ended March 31, 2011, and March 31, 2010, respectively.

Net cash used in financing activities was \$22.2 million for the nine months ended March 31, 2011, compared to \$11.4 million for the nine months ended March 31, 2010. The increase in cash used for financing activities was primarily due to an increase in payments of capital lease obligations. Financing activity represents borrowings (new borrowings, net of repayment) and payments of the principal component of capital lease obligations.

Table of Contents

Contractual Obligations

As of March 31, 2011, our operating leases, capitalized leases, other debts, and future commitments have stated maturities or minimum annual payments as follows:

	Annual Cash Requirements As of March 31, 2011 (in thousands)				
	Payments Due by Period				
	Total	Less than 1 year	1-3 years	3-5 Years	More than 5 years
Operating leases	\$ 64,769	\$ 30,207	\$ 23,560	\$ 5,606	\$ 5,396
Lease residual value guarantees	76,349	22,950	43,572	8,004	1,823
Capital leases(1)	12,981	11,075	1,906		
Long-term debt(1)	114	114			
Sub total	\$ 154,213	\$ 64,346	\$ 69,038	\$ 13,610	\$ 7,219
Future purchase of revenue equipment	\$ 50,946	\$ 2,652	\$ 10,609	\$ 20,040	\$ 17,645
Employment and c o n s u l t i n g agreements(2)	700	700			
Standby letters of credit	438	438			
Total	\$ 206,297	\$ 68,136	\$ 79,647	\$ 33,650	\$ 24,864

(1) Includes interest

(2) The amounts reflected in the table do not include amounts that could become payable to our Chief Executive Officer and Chief Operating Officer under certain circumstances if their employment by the Company is terminated.

Off-Balance Sheet Arrangements

Operating leases have been an important source of financing for our revenue equipment. Our operating leases include some under which we do not guarantee the value of the asset at the end of the lease term ("walk-away leases") and some under which we do guarantee the value of the asset at the end of the lease term ("residual value"). Therefore, we are subject to the risk that equipment values may decline, in which case we would suffer a loss upon disposition and be required to make cash payments because of the residual value guarantees. We were obligated for residual value guarantees related to operating leases of \$76.3 million at March 31, 2011, compared to \$92.5 million at March 31, 2010. We believe that any residual payment obligations will be satisfied by the value of the related equipment at the end of the lease. To the extent the expected value at the lease termination date is lower than the residual value guarantee, we would accrue for the difference over the remaining lease term. We anticipate that going forward we will use a combination of cash generated from operations and operating leases to finance tractor purchases and operating leases to finance trailer purchases.

Critical Accounting Policies

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America require that management make a number of assumptions and estimates that affect the reported amounts of assets, liabilities, revenue, and expenses in our consolidated financial statements and accompanying notes. Management bases its estimates on historical experience and various other assumptions believed to be reasonable. Although these estimates are based on management's best knowledge of current events and actions that affect, or could affect our financial statements materially and involve a significant level of judgment by management. The accounting policies we deem most critical to use include revenue recognition, allowance for doubtful accounts, depreciation, claims accrual, and accounting for income taxes. There have been no significant changes to our critical accounting policies and estimates during the three months ended March 31, 2011, compared to those disclosed in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operation," included in our 2010 Annual Report on Form 10-K.

Seasonality

In the trucking industry, revenue generally decreases as customers reduce shipments during the winter holiday season and as inclement weather impedes operations. At the same time, operating expenses generally increase, with fuel efficiency declining because of engine idling and inclement weather. We have substantial operations in the Midwestern and Eastern United States and Canada. For the reasons stated, in those geographic regions in particular, third quarter net income historically has been lower than net income in each of the other three quarters of the year excluding charges. Our equipment utilization typically improves substantially between May and October of each year because of seasonal increased shipping and better weather. Also, during September and October, business generally increases as a result of increased retail merchandise shipped in anticipation of the holidays.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We experience various market risks, including fluctuations in interest rates, variability in currency exchange rates, and fuel prices. We have established policies, procedures and internal processes governing our management of market risks and the use of financial instruments to manage our exposure to such risks.

Interest Rate Risk. We are exposed to interest rate risk principally from our primary credit facility. At March 31, 2011, we did not have any debt outstanding related to our credit facility and therefore had no market risk related to debt.

Currency Exchange Rate Risk. We are subject to variability in foreign currency exchange rates in our international operations. Exposure to this variability is periodically managed primarily through the use of natural hedges, whereby funding obligations and assets are both managed in the local currency. We, from time-to-time, enter into currency exchange agreements to manage our exposure arising from fluctuating exchange rates related to specific and forecasted transactions. We operate this program pursuant to documented corporate risk management policies and do not enter into derivative transactions for speculative purposes.

Our currency risk consists primarily of foreign currency denominated firm commitments and forecasted foreign currency denominated intercompany and third party transactions. At March 31, 2011, we had outstanding foreign exchange derivative contracts in notional amounts of \$4.5 million with a fair value of these contracts approximately \$0.3 million more than the original contract value. Derivative gains/(losses), initially reported as a component of other comprehensive income, are reclassified to earnings in the period when the forecasted transaction affects earnings.

Assuming revenue and expenses for our Canadian operations identical to that in the third quarter of fiscal 2011 (both in terms of amount and currency mix), we estimate that a \$0.01 decrease in the Canadian dollar exchange rate would reduce our annual net income by approximately \$121,000. Also, we estimate that a \$0.01 decrease in the Mexican peso exchange rate would reduce our annual net income by approximately \$113,000.

Commodity Price Risk. Shortages of fuel, increases in prices, or rationing of petroleum products can have a materially adverse effect on our operations and profitability. Fuel is subject to economic, political, and market factors that are outside of our control. We believe fuel surcharges are effective at mitigating most, but not all, of the risk of high fuel price because we do not recover the full amount of fuel price increases. In July 2010, we entered into contracts to hedge up to 0.6 million gallons per month for up to one year. At March 31, 2011, we had outstanding contracts in place for a notional amount of \$5.7 million with a fair value of these contracts approximately \$2.6 million more than the original contract value. Derivative gains/(losses), initially reported as a component of other comprehensive income, are reclassified to earnings in the period when the forecasted transaction affects earnings.

Item 4. Controls and Procedures

As required by Rules 13a-15 and 15d-15 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the Company has carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q. This evaluation was carried out under the supervision and with the participation of the Company's management, including our principal executive officer and our principal financial officer. Based upon that evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this Quarterly Report on Form 10-Q. There were no changes in the Company's internal control over financial reporting that occurred during the third quarter of fiscal 2011 that have materially affected, or that are reasonably likely to materially affect, the Company's internal control over financial reporting.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. Disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed in Company reports filed under the Exchange Act is accumulated and communicated to management, including the Company's principal executive and principal financial officer as appropriate, to allow timely decisions regarding disclosures.

The Company has confidence in its disclosure controls and procedures. Nevertheless, the Company's management, including the principal executive officer and principal financial officer, does not expect that our disclosure controls and procedures will prevent all errors or intentional fraud. An internal control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of such internal controls are met. Further, the design of an internal control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all internal control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

Part II. Other Information

Item 1. Legal Proceedings

There are various claims, lawsuits, and pending actions against the Company and its subsidiaries which arose in the normal course of the operations of its business. The Company believes many of these proceedings are covered in whole or in part by insurance and that none of these matters will have a material adverse effect on its consolidated financial position or results of operations in any given period.

On August 8, 2007, the 384th District Court of the State of Texas situated in El Paso, Texas, rendered a judgment against CTSI, for approximately \$3.4 million in the case of *Martinez v. Celadon Trucking Services, Inc.*, which was originally filed on September 4, 2002. The case involves a workers' compensation claim of a former employee of CTSI who suffered a back injury as a result of a traffic accident. CTSI and the Company believe all actions taken were proper and legal and contend that the proper and exclusive place for resolution of this dispute was before the Indiana Workers' Compensation Board. In October 2007, CTSI posted an appeal bond and filed an appeal of this decision to the Texas Court of Appeals. The ATA Litigation Center filed an amicus brief in support of our position with the Texas Court of Appeals. Oral arguments on this case were held February 18, 2010. Celadon argued its case before the Texas Court of Appeals and on March 24, 2010, the Texas Court of Appeals reversed the judgment and dismissed Martinez' suit in its entirety finding that the Indiana Workers Compensation Board had exclusive jurisdiction over this dispute. The Plaintiff filed a petition to appeal with the Texas Supreme Court in an attempt to reverse the Texas Court of Appeals' decision by the extended deadline to file granted to them of October 15, 2010. On December 17, 2010, the Texas Supreme Court denied Martinez' petition for a review of the Texas Court of Appeals decision. Martinez had until January 31, 2011, to request a rehearing of the Texas Supreme Court's decision. There will be no rehearing and the matter has been concluded.

Item 1A. Risk Factors

While we attempt to identify, manage, and mitigate risks and uncertainties associated with our business, some level of risk and uncertainty will always be present. Our Annual Report on Form 10-K for the year ended June 30, 2010, in the section entitled Item 1A. Risk Factors, describes some of the risks and uncertainties associated with our business. These risks and uncertainties have the potential to materially affect our business, financial condition, results of operations, cash flows, projected results, and future prospects.

Proposed hours of service rules applicable to our drivers could decrease driver capacity and adversely affect our profitability and ability to grow.

On December 29, 2010, the FMCSA issued a formal Notice of Proposed Rulemaking for the hours of service rules. The proposal includes, among other things, that there be two periods between midnight and six a.m. to qualify for a 34 hour restart that would permit driving to commence. In addition, the proposal leaves open whether to reduce the permitted driving time each day from 11 hours to 10 hours or keep it at the existing 11 hours. If adopted, the proposals could decrease driver capacity in the industry and cause an increase in driver wages and make it more difficult to recruit qualified drivers. If we are unable to continue to attract and retain a sufficient number of drivers and independent contractors, we could be required to adjust our compensation packages, let trucks sit idle, or operate with fewer trucks and face difficulty meeting shipper demands, all of which would adversely affect our growth and profitability.
