RELEVANT FACT

**BRASKEM AND PETROQUISA ANNOUNCE A US\$ 240 MILLION JOINT VENTURE
FOR THE PRODUCTION OF POLYPROPYLENE IN SÃO PAULO**

BRASKEM S.A. (Braskem) and PETROBRAS QUÍMICA S.A. (Petroquisa) in compliance with the provisions of CVM Instruction 358/02, inform their shareholders and the market as follows:

The Boards of Directors of Braskem and Petroquisa, in meetings held on the present date, approved an association between the companies to invest in a modern and competitive unit for the production and sale of polypropylene (the Joint Venture).

The Joint Venture aims to meet the growing demand for polypropylene in domestic and international markets, focused on production cost competitiveness and value creation to shareholders. The Joint Venture will be formalized through the creation of a new company, the voting capital of which will be held by Braskem (60%) and Petroquisa (40%). The new company will be jointly managed by both shareholders.

The new industrial unit will be built in the city of Paulínia, State of São Paulo, and will use polymer-grade propylene, to be supplied by Petrobras, as raw material. Operations are scheduled to begin by the end of 2007, with initial production of 300,000 tons/year, using Braskem's state-of-the-art technology. The new unit will operate under the most strict safety and environmental standards, consistent with sustainable development concepts.

The Joint Venture will benefit from Braskem's and Petroquisa's expertise in developing and managing petrochemical ventures, as well as the support of Braskem's and Petrobras' research centers. Braskem will be responsible for the development, technical support and sale of products of the Joint Venture.

Investments in the new industrial unit are estimated at US\$ 240 million, to be made up by approximately 30% equity and 70% of funds raised from long term financing specifically for this project.

The Brazilian Administrative Council for Economic Defense - CADE and other regulatory bodies will be notified of the Joint Venture in the near future.
