OF 1934

For the transition period from _____ to _____

Commission File Number 001-06605

EQUIFAX INC.

Edgar Filing: EQUIFAX INC - Form 10-K

(Exact name of registrant as specified in its charter)

Georgia	58-0401110
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)
1550 Peachtree Street, N.W.	
Atlanta, Georgia	30309
(Address of principal executive offices)	(Zip Code)

Registrant's telephone number, including area code: 404-885-8000

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, \$1.25 par value per share	New York Stock Exchange
Common Stock Purchase Rights	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None.

Indicate by check mark if Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Exchange Act ("Act"). ☒ YES ☐ NO

Indicate by check mark if Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. ☐ YES ☒ NO

Indicate by check mark whether Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. ☒ YES ☐ NO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ☒

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files).

YES ☒ NO ☐

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

S Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act). ☐ YES ☒ NO

As of June 30, 2011, the aggregate market value of Registrant’s common stock held by non-affiliates of Registrant was approximately \$4,249,886,427 based on the closing sale price as reported on the New York Stock Exchange. At January 31, 2012, there were 119,845,979 shares of Registrant’s common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of Registrant’s definitive proxy statement for its 2012 annual meeting of shareholders are incorporated by reference in Part III of this Form 10-K.

PART I

ITEM 1. BUSINESS

OVERVIEW

Equifax Inc. is a leading global provider of information solutions for businesses and consumers. We have a large and diversified group of clients and customers, including financial institutions, corporations, governments and individuals. Our products and services are based on comprehensive databases of consumer and business information derived from numerous types of credit, financial, employment, income, public record, demographic and marketing data. We use proprietary tools to analyze all available data to create customized insights, decision-making solutions and processing services for our clients. We help consumers understand, manage and protect their personal information and make more informed financial decisions. Additionally, we are a leading provider of payroll-related and human resources business process outsourcing services in the United States of America, or U.S.

We currently operate in three global regions: North America (U.S. and Canada), Europe (the United Kingdom, or U.K., Spain and Portugal) and Latin America (Argentina, Chile, Costa Rica, Ecuador, El Salvador, Honduras, Paraguay, Peru and Uruguay). We also maintain support operations in the Republic of Ireland, Chile and Costa Rica. We have an investment in the second largest consumer and commercial credit information company in Brazil and offer credit services in Russia and India through joint ventures.

Equifax was originally incorporated under the laws of the State of Georgia in 1913, and its predecessor company dates back to 1899. As used herein, the terms Equifax, the Company, we, our and us refer to Equifax Inc., a Georgia corporation, and its consolidated subsidiaries as a combined entity, except where it is clear that the terms mean only Equifax Inc.

We are organized and report our business results in five operating segments, as follows:

U.S. Consumer Information Solutions (USCIS) — provides consumer information solutions to businesses in the U.S. including online consumer information, decisioning technology solutions, fraud and identity management services, and portfolio management services (OCIS), mortgage reporting and settlement solutions, and consumer financial marketing services (CFMS).

International — includes our Canada Consumer, Europe and Latin America business units. Products and services offered are similar to those available in the USCIS, North America Commercial Solutions and North America Personal Solutions operating segments but vary by geographic region.

- **TALX Workforce Solutions** — provides services enabling clients to verify income and employment (Verification Services) and outsource and automate the performance of certain payroll-related and human resources management and business processes, including social security number verification, employment-related tax management and talent management services (TALX Employer Services).

North America Personal Solutions — provides products to consumers enabling them to monitor, manage and protect their credit, credit score and identity information and make more informed financial decisions.

North America Commercial Solutions — provides credit, financial, marketing and other information regarding businesses in the U.S. and Canada.

Our revenue base and business mix are diversified among our five segments as depicted in the chart below.

PRODUCTS AND SERVICES

The following chart summarizes the key products and services offered by each of the business units within our segments:

	USCIS		Mortgage	North America Personal Solutions	North America Commercial Solutions	International Canada Consumer		Latin America	TALX Verification Services	Employer Services
	OCIS	CFMS	Services				Europe			
Online consumer information	X		X	X		X	X	X	X	
Business credit & demographic information		X			X		X	X		
Scores and analytical services	X	X	X	X	X	X	X	X	X	X
Enabling technology services (i.e., decisioning platforms)	X		X		X	X	X	X		
Identity authentication/fraud	X				X	X	X	X	X	
Consumer financial marketing services		X	X			X	X	X		
Business marketing services and database management					X		X	X		
Direct to consumer credit monitoring				X		X	X			
Identity protection				X		X	X			
Employment, income and identity verification services									X	

Business process outsourcing (BPO)	X	X	X
------------------------------------	---	---	---

Each of our operating segments is described more fully below.

USCIS

USCIS provides consumer information solutions to businesses in the U.S. through three product lines, as follows:

Online Consumer Information Solutions (OCIS). OCIS products are derived from multiple large databases of consumer information that we maintain about individual consumers, including credit history, current credit status, payment history and consumer address information. Our customers utilize the information we provide to make decisions for a wide range of financial and business purposes, such as whether, and on what terms, to approve auto loans or credit card applications, whether to allow a consumer to open a new utility or telephone account, cross-selling additional products to existing customers, improving their underwriting and risk management decisions and many other business uses. We also offer analytical and predictive services based on the information in the consumer databases to help further mitigate the risk of granting credit by verifying the identity of consumers, predicting the risk of bankruptcy, or indicating the applicant's risk potential for account delinquency. These risk management services, as well as fraud detection and prevention services, enable our customers to monitor risks and opportunities and proactively manage their existing consumer accounts.

OCIS customers access products through a full range of electronic distribution mechanisms, including direct real-time access, which facilitates instant decisions. We also develop and host customized applications that enhance the decision-making process for our customers. These decisioning technology applications assist with pre-approved offers, cross-selling of various products, determining deposit amounts for telephone and utility companies, and verifying the identity of consumer customers.

Mortgage Solutions. Our Mortgage Solutions products, offered in the U.S., consist of specialized credit reports that combine information from the three major consumer credit reporting agencies (Equifax, Experian Group and TransUnion LLC) into a single “merged” credit report in an online format, commonly referred to as a tri-merge report. Mortgage lenders use these tri-merge reports in making their mortgage underwriting decisions. Additionally, we offer various “triggering” services designed to alert lenders to changes in a consumer’s credit status during the underwriting period and securitized portfolio risk assessment services for evaluating inherent portfolio risk. We also offer certain mortgage settlement services, such as appraisal, title and closing documentation, with certain of these services provided through agreements with third parties.

Consumer Financial Marketing Services (CFMS). Our CFMS products utilize consumer financial information enabling our customers to more effectively manage their marketing efforts, including targeting and segmentation; identify and acquire new customers for their products and services; and realize additional revenue from existing customers through more effective cross-selling and up-selling of additional products and services. These products utilize information derived from consumer information, including credit, income, asset, liquidity, net worth and spending activity, which also support many of our OCIS products. These data assets broaden the understanding of customer financial potential and opportunity which can further drive high value decisioning and targeting solutions for our customers. We also provide account review services which assist our customers in managing their existing customers and prescreen services that help our clients identify new opportunities with their customers. Customers for these products primarily include institutions in the banking, brokerage, retail, insurance, and mortgage industries as well as companies primarily focused on digital and interactive marketing.

International

The International operating segment includes our Canada Consumer, Europe and Latin America business units. These business units offer products that are similar to those available in the USCIS operating segment, and to a lesser extent our North America Commercial and Personal Solutions segments, although data sources tend to rely more heavily on government agencies than in the U.S. These products generate revenue in Argentina, Canada, Chile, Costa Rica, Ecuador, El Salvador, Honduras, Paraguay, Peru, Portugal, Spain, the U.K. and Uruguay. We also maintain support operations in the Republic of Ireland, Chile and Costa Rica. We have an investment in the second largest consumer and commercial credit information company in Brazil and offer consumer credit services in Russia and India through joint ventures.

Canada Consumer. Similar to our OCIS, Mortgage Solutions and CFMS business units, Canada Consumer offers products derived from the credit information that we maintain about individual consumers. We offer many products in Canada, including credit reporting and scoring, consumer marketing, risk management, fraud detection and modeling services, together with certain of our decisioning products that facilitate pre-approved offers of credit and automate a variety of credit decisions.

Europe. Our European operation provides information solutions, marketing and personal solutions products. Information solutions and personal solutions products are generated from information that we maintain and include credit reporting and scoring, asset information, risk management, fraud detection and modeling services. Most of these products are sold in the U.K. with a more limited set of information solutions products sold in Portugal and Spain. Our commercial products, such as business credit reporting and commercial risk management services, are only available in the U.K. Marketing products, which are similar to those offered in our CFMS business unit, are primarily available in the U.K. and, to a lesser extent, in Spain.

Latin America. Our Latin American operation provides consumer and commercial information solutions products and marketing products. We offer a full range of products, generated from credit records that we maintain, including credit reporting and scoring, decisioning technology, risk management, identity verification and fraud detection services. Our consumer products are the primary source of revenue in each of the countries in which we operate. We also offer various commercial products, which include credit reporting, decisioning tools and risk management services, in the countries we serve. Additionally, we provide a variety of consumer and commercial marketing products generated from our credit information databases, including business profile analysis, business prospect lists and database management. The countries in which we operate include Argentina, Chile, Costa Rica, Ecuador, El Salvador, Honduras, Paraguay, Peru and Uruguay.

TALX Workforce Solutions

TALX Workforce Solutions operates in the U.S. through two business units, as follows:

Verification Services. Verification Services include employment, income and social security number verification services. Our online verification services enable employers to direct third-party verifiers to our work number database to verify the employee's employment status and income information. We also offer an offline research verification service which expands employment verification to locate data outside our existing work number database. In 2009, we increased our services to provide IRS income verifications using the *IncomeChek*® product as well as identity verification through a secure, web-based portal using the *DirectChek*® product.

We rely on payroll data received from over 2,250 organizations, including almost three quarters of Fortune 500 companies, to regularly update the database. This data is updated as employers transmit data electronically directly to us from their payroll systems. Employers contract to provide this data to us for specified periods under the terms of contracts which range from one to five years. We use this data to provide employment and income verifications to third-party verifiers; the fees we charge for these services are generally per transaction. After the expiration of the applicable contract, absent renewal by mutual agreement of the parties, we generally do not have any further right to use the employment data we obtained pursuant to the contract. We have not experienced significant turnover in the employer contributors to the database because we generally do not charge them to add their employment data to the database and the verification service we offer relieves them of the administrative burden and expense of responding to third party employment verification requests. The database contained approximately 210 million current and historic employment records at December 31, 2011.

Employer Services. These services are aimed at reducing the cost to the human resources function of businesses through a broad suite of services including assisting with employment tax matters designed to reduce the cost of unemployment claims through effective claims representation and management and efficient processing and to better manage the tax rate that employers are assessed for unemployment taxes; comprehensive services designed to research the availability of employment-related tax credits (e.g., the federal work opportunity and welfare to work tax credits and state tax credits), process the necessary filings and assist the customer in obtaining the tax credit; W-2 management services (which include initial distribution, reissue and correction of W-2 forms); paperless pay services that enable employees to electronically receive pay statement information as well as review and change direct deposit account or W-4 information; integrated electronic time capture and reporting services; paperless new-hire services to bring new workers on board using electronic forms; I-9 management services designed to help clients electronically comply with the immigration laws that require employers to complete an I-9 form for each new hire; and planning and improving the cost effectiveness of talent recruitment and management through secure, electronic-based psychometric testing and assessments, as well as onboarding services using online forms to complete the new hire process for employees of corporate and government agencies.

North America Personal Solutions

Our Personal Solutions products give consumers information to make financial decisions and monitor and protect credit, credit score and identity information through our Equifax Complete, ID Patrol, Credit Watch and Score Watch monitoring products. Consumers can obtain a copy of credit file information about them and their credit score. We offer monitoring products for consumers who are concerned about identity theft and data breaches, including the Credit Report Control service that allows consumers subscribing to our credit monitoring products to restrict access to their credit report to mitigate unauthorized use of Equifax credit file information by third parties. Our products are available to consumers directly and through relationships with business partners who distribute our products or provide these services to their employees or customers.

North America Commercial Solutions

Our Commercial Solutions products are derived from databases of credit, financial and marketing information regarding businesses in the U.S. and Canada. Databases we have compiled include loan; credit card; public records and leasing history data; trade accounts receivable performance; and Secretary of State and Securities and Exchange Commission registration information. We also offer scoring and analytical services that provide additional information to help mitigate the credit risk assumed by our customers. We also have a marketing database which hosts approximately 50 million commercial demographic data records from around the world helping companies to identify corporate family structures for enterprise visibility of customers and suppliers. In addition, we are integrating information from other databases, such as asset information, that will make our marketing services offerings more valuable.

A portion of the business records included in the U.S. credit database has been developed in part from the Small Business Financial Exchange, Inc., or SBFE. SBFE members, including a number of commercial lending financial institutions, contribute their data to the member-owned SBFE database which we exclusively manage and market the data. Our contract with the SBFE is scheduled to expire at the end of 2012, unless renewed by mutual agreement of the parties. While we have successfully maintained our access to the data at prior renewal dates, the information comprising the database is generally not owned by us, and the SBFE could decide that we no longer have exclusive marketing rights to the information in the database, the SBFE could elect to have another party manage the database, or the participating organizations could discontinue contributing information to the database.

OUR BUSINESS STRATEGY

Our strategic objective is to be the trusted provider of information driven solutions that empower our customers with the ability to make critical decisions with greater confidence. Data is at the core of our value proposition. Leveraging our extensive resources, we deliver differentiated decisions through a broad and diverse set of data assets, sophisticated analytics and proprietary decisioning technology. Our comprehensive set of data assets can provide an in-depth view of the consumer's financial potential and opportunity including their propensity, ability and capacity to pay. Our long-term corporate growth strategy is driven by the following initiatives:

Increase penetration of our customers' information solutions needs. We seek to increase our share of customers' spending on information-related services through the development and introduction of new products, pricing our services in accordance with the value they create, increasing the range of current services utilized by our customers, and improving the quality and effectiveness of our sales organization and customer support interactions with consumers. We are also helping customers address increased compliance.

-

Deploy decisioning technologies and analytics globally. We continue to invest in and develop new technology to enhance the functionality, cost-effectiveness and security of the services we offer and further differentiate our products from those offered by our competitors. In addition to custom products for large customers, we develop off-the-shelf, decisioning technology platforms that are more cost-effective for medium- and smaller-sized customers. We also develop predictive scores and analytics, some of which leverage multiple data assets, to help customers acquire new customers and manage their existing customer relationships. We develop a broad array of industry, risk management, cross-sell and account acquisition models to enhance the precision of our customers' decisioning activities.

Invest in unique data sources. We continue to invest in and acquire unique sources of credit and non-credit information to enhance the variety and quality of our services while increasing customers' confidence in information-based business decisions. Areas of focus for investment in new sources of data include, among others, positive payment data, real estate data and new commercial business data.

- **Pursue new vertical markets and expand into emerging markets.** We believe there are many opportunities to expand into emerging markets both in the U.S. and internationally. In the U.S., our Capital Markets area offers unique products which enable investors and underwriters to have a more current and relevant understanding of the inherent risk in a portfolio of loans. Our Mortgage Services business continues to expand its presence in the mortgage value chain with a broader offering of mortgage underwriting services. Also, we will continue to invest in growing our ventures in Russia, India and Brazil.

COMPETITION

The market for our products and services is highly competitive and is subject to constant change. Our competitors vary widely in size and the nature of the products and services they offer. Sources of competition are numerous and include the following:

Competition for our consumer information solutions and personal solutions products varies by both application and industry, but generally includes two global consumer credit reporting companies, Experian, and TransUnion, both of which offer a product suite similar to our credit reporting solutions, and LifeLock, a national provider of personal identity theft protection products. There are also a large number of smaller competitors who offer competing products in specialized areas (such as fraud prevention, risk management and application processing and decisioning solutions) and software companies offering credit modeling services or analytical tools. We believe that our products offer our customers an advantage over those of our competitors because of the depth and breadth of our consumer information files, which we believe to be superior in terms of accuracy, coverage and availability. Other differentiators include our decisioning technology and the features and functionality of our analytical services. Our competitive strategy is to emphasize improved decision-making and product quality while remaining competitive on price. Our marketing services products also compete with the foregoing companies and others who offer demographic information products, including Acxiom Corporation, Harte-Hanks, Inc. and infoGROUP, Inc. We also compete with Fair Isaac Corporation with respect to certain of our analytical tools.

Competition for our commercial solutions products primarily includes Experian, The Dun & Bradstreet Corporation, and Cortera, Inc., and providers of these services in the international markets we serve. We believe our U.S. small business loan information from financial institutions is a unique database and enables more efficient and effective decision-making for the small business segment of that market.

Competition for our employment and income verification services includes large employers who serve their own needs through in-house systems to manage verification as well as regional online verification companies, such as Verify Jobs and First Advantage, who offer verification services along with other human resources and tax services. Competition for TALX Employer Services includes payroll processors such as Automatic Data Processing, Inc., or ADP, Paychex, Inc. and Ceridian Corporation. Competitors of our Tax Management Services include in-house management of this function primarily by large employers; ADP; and a number of smaller regional firms that offer tax management services (including Barnett Associates, Thomas & Thorngren, UC Advantage). Talent Management Services competitors include assessment service providers that offer proprietary content (Previsor, Inc., Development Dimensions International, Brainbench, Inc.), human resources consulting firms (AON Corporation, Towers Watson, Right Management Consulting) and assessment or test publishers that have proprietary delivery platforms (Devine Group, Inc., Hogan Assessments Systems, Inc., SHL Group plc).

While we believe that none of our competitors offers the same mix of products and services as we do, certain competitors may have a larger share of particular geographic or product markets or operate in geographic areas where

we do not currently have a presence.

We assess the principal competitive factors affecting our markets to include: product attributes such as quality, depth, coverage, adaptability, scalability, interoperability, functionality and ease-of-use; product price; technical performance; access to unique proprietary databases; availability in application service provider, or ASP, format; quickness of response, flexibility and customer services and support; effectiveness of sales and marketing efforts; existing market penetration; new product innovation; and our reputation as a trusted steward of information.

MARKETS AND CUSTOMERS

Our products and services serve clients across a wide range of industries, including financial services, mortgage, human resources, consumer, commercial, telecommunications, retail, automotive, utilities, brokerage, healthcare and insurance industries, as well as state and federal governments. We also serve consumers directly. Our revenue stream is highly diversified with our largest customer providing only 3% of total revenue. The following table summarizes the various end-user markets we serve:

	Percentage of Consolidated Revenue			
	2011		2010	
Financial	26	%	26	%
Mortgage	15	%	15	%
Consumer	11	%	10	%
Employers	10	%	11	%
Commercial	7	%	8	%
Telecommunications	7	%	7	%
Retail	5	%	5	%
Automotive	4	%	4	%
Other ⁽¹⁾	15	%	14	%
	100	%	100	%

(1) Other includes revenue from marketing services, government, insurance and health care end-users.

We market our products and services primarily through our own direct sales organization that is organized around sales teams that focus on customer segments typically aligned by vertical markets and geography. Sales groups are based in our headquarters in Atlanta, Georgia, and field offices located in the U.S. and in the countries where we have operations. We also market our products and services through indirect channels, including alliance partners, joint ventures and other resellers. In addition, we sell through direct mail and various websites, such as *www.equifax.com*.

Our largest geographic market segments are North America (the U.S. and Canada); Europe (the U.K., Spain and Portugal); and Latin America (Argentina, Chile, Costa Rica, Ecuador, El Salvador, Honduras, Paraguay, Peru and Uruguay). We also maintain support operations in the Republic of Ireland, Chile and Costa Rica. We have an investment in the second largest consumer and commercial credit information company in Brazil and offer consumer credit services in Russia and India through joint ventures.

Revenue from international customers, including end-users and resellers, amounted to 26% of our total revenue in 2011 and 27% of our total revenue in 2010 and 2009.

TECHNOLOGY AND INTELLECTUAL PROPERTY

We generally seek protection under federal, state and foreign laws for strategic or financially important intellectual property developed in connection with our business. Certain intellectual property, where appropriate, is protected by registration under applicable trademark laws or by prosecution of patent applications. We own several patents registered in the U.S. and certain foreign countries. We also have certain registered trademarks in the U.S. and in many foreign countries. The most important of these are “Equifax,” “TALX”, “The Work Number” and many variations thereof. These trademarks are used in connection with most of our product lines and services. The Company believes that, in the aggregate, the rights under these patents and trademarks are generally important to its operations and competitive position, but does not regard any of its businesses as being dependent upon any single patent or group of patents or trademark. However, certain Company trademarks, which contribute to the Company’s identity and the recognition of its products and services, including but not limited to the “Equifax” trademark, are an integral part of our business, and their loss could have a material adverse effect on the Company.

We license other companies to use certain data, technology and other intellectual property rights we own or control, primarily as core components of our products and services, on terms that are consistent with customary industry standards and that are designed to protect our interest in our intellectual property. Other companies license us to use certain data, technology and other intellectual property rights they own or control, none of which is material to our business except for a license from Fair Isaac Corporation, relating to certain credit-scoring algorithms and the right to sell credit scores derived from them. This license has a five-year term expiring in June 2013 and provides for usage-based fees. Additionally, the licenses do not contain early termination provisions except for standard provisions providing the right to terminate in the event of breach by the other party. We do not hold any franchises or concessions that are material to our business or results of operations.

INFORMATION SECURITY AND GOVERNMENT REGULATION

Safeguarding the privacy and security of consumer credit information, whether delivered online or in an offline format, is a top priority. We recognize the importance of secure online transactions and we maintain physical, administrative, and technical safeguards reasonably designed to protect personal and business identifiable information. We have security protocols and measures in place to protect information from unauthorized access or alteration. These measures include internal and external firewalls, physical security and technological security measures, and encryption of certain data.

Our databases are regularly updated by information provided by financial institutions, telecommunications companies, other trade credit providers, employers, public records vendors and government agencies. Various laws and regulations govern the collection and use of this information. These laws and existing and proposed regulations impact how we are able to provide information to our customers and may significantly increase our compliance costs. We are subject to differing laws and regulations depending on where we operate.

U.S. Data and Privacy Protection

Our U.S. operations are subject to various federal and state laws and regulations governing the collection, protection and use of consumer credit and other information, and imposing sanctions for the misuse of such information or unauthorized access to data. Many of these provisions also affect our customers' use of consumer credit or other data we furnish. The information underlying our North America Commercial Services business is less regulated than the other portions of our business.

Examples include:

The Fair Credit Reporting Act, or FCRA, which governs among other things the reporting of information to consumer reporting agencies that engage in the practice of assembling or evaluating certain information relating to consumers, including our credit reporting business and employment verification; making prescreened offers of credit; the sharing of consumer report information among affiliated and unaffiliated third parties; access to credit scores; and requirements for data furnishers and users of consumer report information. Violation of the FCRA, or of similar state laws, can result in an award of actual damages, as well as statutory and/or punitive damages in the event of a willful violation.

The Fair and Accurate Credit Transactions Act (2003), or FACT Act, which amended the FCRA and requires, among other things, nationwide consumer credit reporting agencies, such as us, upon the request of a consumer, to place a fraud alert in the consumer's credit file stating that the consumer may be the victim of identity theft or other fraud, and furnish a free annual credit file disclosure to consumers through a centralized request facility we have established with the other nationwide credit reporting agencies. FACT Act regulations also require financial institutions to develop policies and procedures to identify potential identity theft, and consumer credit report notice requirements for lenders that use consumer report information in connection with risk-based credit pricing actions. Entities that furnish information to consumer reporting agencies are required to implement procedures and policies regarding the accuracy and integrity of the furnished information and regarding the correction of previously furnished information that is later determined to be inaccurate. Mortgage lenders are required to disclose credit scores to consumers. Additionally, the FACT Act prohibits a business that receives consumer information from an affiliate from using that information for marketing purposes unless the consumer is first provided a notice and an opportunity to direct the business not to use the information for such marketing purposes ("opt-out"), subject to certain exceptions.

The Financial Services Modernization Act (1999), or Gramm-Leach-Bliley Act, or GLB, which, among other things, regulates the use of non-public personal financial information of consumers that is held by financial institutions. Equifax is subject to various GLB provisions, including rules relating to the physical, administrative and technological protection of non-public personal financial information. Breach of the GLB can result in civil and/or criminal liability and sanctions by regulatory authorities, such as fines of up to \$100,000 per violation and up to five years imprisonment for individuals.

The Health Insurance Portability and Accountability Act (1996), or HIPAA, which requires reasonable safeguards to prevent intentional or unintentional use or disclosure of protected health information.

Most states in the U.S. have passed versions of security breach notification and credit file freeze legislation. A file freeze enables consumers to place and lift a freeze on access to their credit files. File freeze laws impose differing requirements on credit reporting agencies with respect to how and when to respond to such credit file freeze requests and in the fees, if any, the agencies may charge for freeze-related actions.

- Federal and state laws governing the use of the Internet and regulating telemarketing, including the federal Controlling the Assault of Non-Solicited Pornography and Marketing Act (2003), or CAN-SPAM, which regulates commercial email, prohibits false or misleading header information, requires that a commercial email be identified as an advertisement, and requires that commercial emails give recipients an opt-out method. Senate Bill 3386, enacted into federal law, seeks to protect online consumers from unfair and deceptive sales tactics on the Internet. Other Internet privacy laws and regulations have been proposed from time to time to address digital marketing, i.e., how personal information is collected and distributed online, including behavioral advertising.

Fannie Mae and Freddie Mac regulations applicable to our credit reporting and mortgage solutions products, the Real Estate Settlement Procedures Act and HUD's Regulation X, which requires the disclosure of certain basic information to borrowers concerning settlement costs and prohibits the charging of unearned fees and certain "kickbacks" or other fees for referrals in connection with a residential mortgage settlement service.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (2010), or Dodd-Frank Act, represents a comprehensive overhaul of the financial services industry within the U.S. The Dodd-Frank Act will allow consumers free access to their credit score if their score negatively affects them in a financial transaction or a hiring decision, and also gives consumers access to credit score disclosures as part of an adverse action and risk-based pricing notice. Title X of the Dodd-Frank Act establishes the Bureau of Consumer Financial Protection, or CFPB, within the Federal Reserve Board, and will require the CFPB and other federal agencies to implement many new and significant rules and regulations. Significant portions of the Dodd-Frank Act related to the CFPB became effective on July 21, 2011. The CFPB has broad powers to promulgate, administer and enforce consumer financial regulations, including those applicable to use and our customers.

Under the Dodd-Frank Act, the CFPB is the principal supervisor and enforcer of federal consumer financial protection laws with respect to non-depository institutions, or “nonbanks”, including, without limitation, any “covered person” who is a “larger participant” in a market for other consumer financial products or services.

With the appointment of a CFPB Director by the President on January 4, 2012, the CFPB has begun to exercise authority to define unfair, deceptive or abusive acts and practices and to require reports and conduct examinations of these entities for purposes of assessing compliance with federal consumer financial protections laws; obtaining information about the activities and compliance systems or procedures of such entities; and detecting and assessing risks to consumers and to markets for consumer financial products and services. The exercise of this supervisory authority must be risk-based, meaning that the CFPB will identify nonbanks for examination based on the risk they pose to consumers, including consideration of the entity's asset size, transaction volume, risk to consumers, existing oversight by state authorities, and any other factors that the CFPB determines to be relevant. On February 16, 2012, the CFPB issued a proposed rule designating certain consumer reporting agencies, including the Company, as within its nonbank supervision program for "larger participants." The CFPB must issue its final rule by July 21, 2012.

As a "larger market participant," we are subject to CFPB supervisory, examination and enforcement authority. Such examination may include the filing of reports, reviewing materials we use to offer products and services and our compliance management systems and procedures. When a nonbank is in violation of federal consumer financial laws, including the CFPB's own rules, the CFPB may pursue administrative proceedings or litigation to enforce these laws and rules. In these proceedings, the CFPB can obtain cease and desist orders, which can include orders for restitution or rescission of contracts, as well as other kinds of affirmative relief, and monetary penalties ranging from \$5,000 per day for ordinary violations of federal consumer financial laws to \$25,000 per day for reckless violations and \$1 million per day for knowing violations. Also, where a company has violated Title X of the Dodd-Frank Act or CFPB regulations under Title X, the Dodd-Frank Act empowers state attorneys general and state regulators to bring civil actions for the kind of cease and desist orders available to the CFPB (but not for civil penalties). If the CFPB or one or more state officials believe that we have committed a violation of the foregoing laws, they could exercise their enforcement powers in a manner that would have a material adverse effect on us.

At this time, we cannot predict the extent to which the Dodd-Frank Act or the resulting rules and regulations, including those of the CFPB, will impact the U.S. economy or our business.

Compliance with these new laws and regulations may require changes in the way we conduct our business and may result in additional compliance costs, which could be significant and could adversely impact our results of operations, financial condition or liquidity.

International Data and Privacy Protection

We are subject to data protection, privacy and consumer credit laws and regulations in the various foreign countries where we do business, including, without limitation, the following:

In Canada, the federal and provincial privacy and provincial credit reporting laws apply to organizations with respect to personal information that they collect, use or disclose in the course of commercial activities. The laws are based on the National Standard of Canada Model Code for the Protection of Personal Information, covering accountability and identifying purposes, consent, collection, use, disclosure, retention, accuracy, safeguards, individual access and compliance. The federal and provincial privacy regulators have powers of investigation and intervention, and provisions of Canadian law regarding civil liability apply in the event of unlawful processing which is prejudicial to the persons concerned. The European Union, or EU, recognizes Canada as having adequate levels of protection for personal data transfers and processing.

In Europe, Equifax is subject to the EU data protection regulations, including the comprehensive EU Directive on Data Protection (1995), which imposes a number of obligations on Equifax with respect to use of personal data, and includes a prohibition on the transfer of personal information from the EU to other countries that do not provide consumers with an “adequate” level of privacy or security. The EU standard for adequacy is generally stricter and more comprehensive than that of the U.S. and most other countries. In the U.K., in addition to the EU Directive on Data Protection, the Data Protection Act of 1998 regulates the manner in which we can use third-party data. In addition, regulatory limitations affect our use of the Electoral Roll, one of our key data sources in the U.K. Generally, the data underlying the products offered by our U.K. Information Services and Personal Solutions product lines, excluding our Commercial Services products, are subject to these regulations. In Spain and Portugal, the privacy laws which are subject to the EU Directive on Data Protection regulate all credit bureau and personal solutions activities.

In Latin America, consumer data protection and privacy laws and regulations exist in Argentina, Chile, Peru and Uruguay. Uruguay generally follows the EU data protection model. There are also constitutional provisions in Argentina, Chile, Peru and certain other countries which declare the right to seek judicial protection regarding the use of personal data, and in many of those countries grant individuals the right to access and correction of information in the possession of data controllers. Chile is in the process of revising its credit reporting provisions to promote more transparency about data use, and will consider new data protection legislation later this year. The EU recognizes Argentina as having adequate levels of protection for personal data transfers and processing.

In India, several pieces of legislation, including the Information Technology Act 2000 and the Credit Information Companies Regulation Act 2005 establish a federal data protection framework. Entities that collect and maintain personal credit information to ensure that it is complete, accurate and safeguarded, and must adopt certain privacy principles with respect to collecting, processing, preserving, sharing and using such credit information.

Tax Management Services

The Tax Management Services business within our TALX Workforce Solutions segment is potentially impacted by changes in U.S. tax laws or interpretations, for example, those pertaining to work opportunity tax credits and unemployment compensation claims. A subsidiary of TALX Workforce Solutions, Talent Management, provides employee testing, assessment and talent management services to the federal government through a number of primary contracts and subcontracts with federal agencies, including the Transportation Security Administration. These contracts may be adversely affected by changes in U.S. federal government programs or contractor requirements, including the adoption of new laws or regulations.

Environmental Regulation

We are subject to federal, state and local laws and regulations in the areas of safety, health and environmental protection. Compliance with these laws and regulations has not in the past had any material effect on our earnings, capital expenditures or competitive position. However, the effect of such compliance in the future cannot be predicted. We believe that we are in material compliance with applicable federal, state and local safety, health and environmental regulations.

PERSONNEL

Equifax employed approximately 6,500 employees in 15 countries as of December 31, 2011. None of our U.S. employees are subject to a collective bargaining agreement and no work stoppages have been experienced. Pursuant to local laws, certain of our employees in Argentina and Spain are covered under government-mandated collective bargaining regulations that govern general salary and compensation matters, basic benefits and hours of work.

EXECUTIVE OFFICERS OF EQUIFAX

The executive officers of Equifax and their ages and titles are set forth below. Business experience and other information is provided in accordance with SEC rules.

Richard F. Smith (52) has been Chairman and Chief Executive Officer since December 15, 2005. He was named Chairman-Elect and Chief Executive Officer effective September 19, 2005 and was elected as a Director on September 22, 2005. Prior to that, Mr. Smith served as Chief Operating Officer, GE Insurance Solutions, from 2004 to September 2005 and President and Chief Executive Officer of GE Property and Casualty Reinsurance from 2003 to 2004.

Lee Adrean (60) has been Corporate Vice President and Chief Financial Officer since October 2006. Prior to joining Equifax, he served as Executive Vice President and Chief Financial Officer of NDCHealth Corporation from 2004 to 2006. Prior thereto, he served as Executive Vice President and Chief Financial Officer of EarthLink, Inc. from 2000 until 2004.

Kent E. Mast (68) has served as Corporate Vice President and Chief Legal Officer since 2000. His responsibilities include legal services, global sourcing, security and compliance, government and legislative relations, corporate governance and privacy functions.

Coretha M. Rushing (55) has been Corporate Vice President and Chief Human Resources Officer since 2006. Prior to joining Equifax, she served as an executive coach and HR Consultant with Atlanta-based Cameron Wesley LLC. Prior thereto, she was Senior Vice President of Human Resources at The Coca-Cola Company, where she was employed from 1996 until 2004.

Edgar Filing: EQUIFAX INC - Form 10-K

Paul J. Springman (66) has served as Corporate Vice President and Chief Marketing Officer since February 2004. Prior thereto, he was head of the Predictive Sciences unit from August 2002 until February 2004.

David C. Webb (56) became Chief Information Officer on January 19, 2010. Prior thereto, he served as Chief Operations Officer for SVB Financial Corp. from 2008, and from 2004 to 2008 was Chief Information Officer. Mr. Webb was Vice President, Investment Banking Division at Goldman Sachs, a leading global investment banking, securities and investment management firm, from 1999 to 2004. He was Chief Information Officer at Bank One from 1997 to 1999.

Rodolfo M. Ploder (51) has been President, U.S. Consumer Information Solutions since July 2010. Prior thereto, he served as President, International from January 2007 until June 2010. Prior thereto, he was Group Executive, Latin America from February 2004 to January 2007.

J. Dann Adams (54) has been President of Equifax's TALX subsidiary since July 2010. Prior thereto, he served as President, U.S. Consumer Information Solutions from 2007 to June 2010. Prior thereto, he served as Group Executive, North America Information Services from November 2003 until December 2006.

Paulino R. Barros (55) has been President, International since July 2010. Prior thereto, he served as President of PB&C Global Investments, LLC, an international consulting and investment firm. Prior thereto, he was President of Global Operations for AT&T.

Joseph M. Loughran, III (44) has been President, North America Personal Solutions since January 4, 2010. Prior thereto, he was Senior Vice President — Corporate Development from April 2006 to December 2009. Prior to joining Equifax he held various executive roles at BellSouth Corporation from May 2001 to April 2006, including most recently Managing Director-Corporate Strategy and Planning from May 2005 to April 2006. Prior to joining BellSouth, Mr. Loughran held various roles with McKinsey & Company, King & Spalding, and Lazard Frères & Co.

Alejandro (“Alex”) Gonzalez (42) has been President, North America Commercial Solutions since January 4, 2010. Prior thereto, he was Senior Vice President of Strategic Marketing from January 2006 to December 2009, and Customer Experience Leader for GE Insurance Solutions from January 2005 to December 2005.

Nuala M. King (58) has been Senior Vice President and Controller since May 2006. Prior thereto, she was Vice President and Corporate Controller from March 2004 to April 2006. Prior to joining Equifax, Ms. King served as Corporate Controller for UPS Capital from March 2001 until March 2004.

FORWARD-LOOKING STATEMENTS

This report contains information that may constitute “forward-looking statements.” Generally, the words “believe,” “expect,” “intend,” “estimate,” “anticipate,” “project,” “will” and similar expressions identify forward-looking statements, which generally are not historical in nature. All statements that address operating performance, events or developments that we expect or anticipate will occur in the future are forward-looking statements. Management believes that these forward-looking statements are reasonable as and when made. However, forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from our Company’s historical experience and our present expectations or projections, including without limitation our expectations regarding the Company’s outlook, long-term organic and inorganic growth, and customer acceptance of our business solutions referenced below under “Business Environment, Company Outlook and Strategy.” These risks and uncertainties include, but are not limited to, those described below in Item 1A. Risk Factors, and elsewhere in this report and those described from time to time in our future reports filed with the United States Securities and Exchange Commission, or SEC. As a result of such risks and uncertainties, we urge you not to place undue reliance on any such forward-looking statements. Forward-looking statements speak only as of the date when made. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

AVAILABLE INFORMATION

Detailed information about us is contained in our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements and other reports, and amendments to those reports, that we file with, or furnish to, the SEC. These reports are available free of charge at our website, www.equifax.com, as soon as reasonably practicable after we electronically file such reports with or furnish such reports to the SEC. However, our website and any contents thereof should not be considered to be incorporated by reference into this document. We will furnish copies of such reports free of charge upon written request to Corporate Secretary, Equifax Inc., P.O. Box 4081, Atlanta, Georgia, 30302.

ITEM 1A. RISK FACTORS

Our business faces a variety of risks and uncertainties, including those described below, and may include additional risks and uncertainties not presently known to us or that we currently deem immaterial. If any of the events or circumstances described below occurs, our business, financial results or results of operations may be adversely impacted. These risk factors should be read in conjunction with the other information in this Form 10-K.

Weakness in consumer lending activity could materially adversely affect us.

Business customers use our credit information and related analytical services and data to process applications for new credit cards, automobile loans, home and equity loans and other consumer loans, and to manage their existing credit relationships. Bank and other lenders' willingness to extend credit is adversely affected by elevated consumer delinquency and loan losses in a weak economy. Consumer demand for credit (i.e., rates of spending and levels of indebtedness) also tends to grow more slowly or decline during periods of economic contraction or slow economic growth. High or rising rates of unemployment and interest, declines in income, home prices, or investment values, lower consumer confidence and reduced access to credit adversely affect demand for our products and services, and consequently our revenue, as consumers may continue to postpone or reduce their spending and use of credit, and lenders may reduce the amount of credit offered or available.

The loss of access to credit and other data from external sources could harm our ability to provide our products and services.

We rely extensively upon data from external sources to maintain our proprietary and non-proprietary databases, including data received from customers, strategic partners and various government and public record sources. This includes the widespread and voluntary contribution of credit data from most lenders in the U.S and many other markets as well as the contribution of data under proprietary contractual agreements, such as employers' contribution of employment and income data to The Work Number, financial institutions' contribution of individual financial data to IXI, telecommunications, cable and utility companies' contribution of payment and fraud data to the National Cable, Telecommunications and Utility Exchange, and financial institutions' contribution of small business borrowing information to the Small Business Financial Exchange. Our data sources could withdraw their data from us for a variety of reasons, including legislatively or judicially imposed restrictions on use. Where we currently have exclusive use of data, the providers of the data sources could elect to make the information available to competitors. We also compete with several of our third-party data suppliers. If a substantial number of data sources or certain key data sources were to withdraw or be unable to provide their data, if we were to lose access to data due to government regulation, if we lose exclusive right to the use of data, or if the collection of data becomes uneconomical, our ability to provide products and services to our clients could be materially adversely impacted, which could result in decreased revenue, net income and earnings per share.

Our markets are highly competitive and new product introductions and pricing strategies being offered by our competitors could decrease our sales and market share or require us to reduce our prices in a manner that reduces our operating margins.

We operate in a number of geographic, product and service markets that are highly competitive. Competitors may develop products and services that are superior to or that achieve greater market acceptance than our products and services. The size of our competitors varies across market segments, as do the resources we have allocated to the segments we target. Therefore, some of our competitors may have significantly greater financial, technical, marketing or other resources than we do in one or more of our market segments, or overall. As a result, our competitors may be in a position to respond more quickly than we can to new or emerging technologies and changes in customer requirements, or may devote greater resources than we can to the development, promotion, sale and support of products and services. Moreover, new competitors or alliances among our competitors may emerge and potentially reduce our market share, revenue or margins.

We also sell our information to competing firms, and buy information from certain of our competitors, in order to sell "tri-bureau" and other products, most notably into the mortgage and direct to consumer markets. Changes in prices between competitors for this information and/or changes in the design or sale of tri-bureau versus single bureau product offerings may affect our revenue or profitability.

Some of our competitors may choose to sell products competitive to ours at lower prices by accepting lower margins and profitability, or may be able to sell products competitive to ours at lower prices given proprietary ownership of data, technological superiority or economies of scale. Price reductions by our competitors could negatively impact our margins and results of operations and could also harm our ability to obtain new customers on favorable terms. Historically, certain of our key products have experienced declines in per unit pricing due to competitive factors and customer demand. Since a significant portion of our operating expenses is relatively fixed in nature due to sales, information technology and development and other costs, if we were unable to respond quickly enough to changes in competition or customer demand, we could experience further reductions in our operating margins.

If we do not introduce successful new products and services in a timely manner, our products and services will become obsolete and our operating results will suffer.

We generally sell our products in industries that are characterized by rapid technological changes, frequent new product and service introductions and changing industry standards. In addition, certain of the markets in which we operate are seasonal and cyclical. Without the timely introduction of new products, services and enhancements, our products and services will become technologically or commercially obsolete over time, in which case our revenue and operating results would suffer. The success of our new products and services will depend on several factors, including our ability to properly identify customer needs; innovate and develop new technologies, services and applications; successfully commercialize new technologies in a timely manner; produce and deliver our products in sufficient volumes on time; differentiate our offerings from competitor offerings; price our products competitively; anticipate our competitors' development of new products, services or technological innovations; and control product quality in our product development process.

The impact of consolidation in the financial services, mortgage, retail, telecommunications and other markets is difficult to predict and may harm our business.

The financial services, mortgage, retail and telecommunications industries are intensely competitive and have been subject to increasing consolidation. Continuation of the consolidation trends in these and other industries could result in lower average prices for the larger combined entities, lower combined purchases of our services than were purchased cumulatively by separate entities prior to consolidation, or existing competitors increasing their market share in newly consolidated entities, which could have a material adverse effect on our business, financial condition and results of operations if we are not retained or chosen as a service provider. We may not be able to compete successfully in an increasingly consolidated industry and cannot predict with certainty how industry consolidation will affect our competitors or us.

Security breaches and other disruptions to our information technology infrastructure could interfere with our operations, and could compromise Company, customer and consumer information, exposing us to liability which could cause our business and reputation to suffer.

In the ordinary course of business, we rely upon information technology networks and systems, some of which are managed by third parties, to process, transmit and store electronic information, and to manage or support a variety of business processes and activities, including business-to-business and business-to-consumer electronic commerce and internal accounting and financial reporting systems. Additionally, we collect and store sensitive data, including intellectual property, proprietary business information, the proprietary business information and personally identifiable information of our customers, employees, consumers and suppliers, in data centers and on information technology networks. The secure operation of these networks and systems, and of the processing and maintenance of this information, is critical to our business operations and strategy.

Despite our substantial investment in security measures and business continuity plans, our information technology networks and infrastructure may be vulnerable to damage, disruptions or shutdowns due to attacks by hackers or breaches due to employee error or malfeasance, or other disruptions during the process of upgrading or replacing computer software or hardware, power outages, computer viruses, telecommunication or utility failures or natural disasters or other catastrophic events. The occurrence of any of these events could compromise our networks and the information stored there could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure or other loss of information could result in legal claims or proceedings, liability or regulatory penalties under laws protecting the privacy of personal information, disrupt operations, and damage our reputation, which could adversely affect our business in lost sales, fines or lawsuits. Our property and business interruption insurance may not be adequate to compensate us for all losses or failures that may occur. Also, our third party insurance coverage will vary from time to time in both type and amount depending on availability, cost and our decisions with respect to risk retention.

Dependence on outsourcing certain portions of our supply and distribution chain may adversely affect our ability to bring products to market and damage our reputation. Dependence on outsourced information technology and other administrative functions may impair our ability to operate effectively.

As part of our efforts to streamline operations and to reduce operating costs, we have outsourced various components of our application development, information technology, operational support and administrative functions and will continue to evaluate additional outsourcing. Although we have implemented service level agreements and have established monitoring controls, if our outsourcing vendors fail to perform their obligations in a timely manner or at satisfactory quality levels, our ability to bring products to market and support our customers, and our reputation could suffer. Any failure to perform on the part of these third party providers could impair our ability to operate effectively and could result in lower future revenue, unexecuted efficiencies and adversely impact our results of operations and our stock price. Much of our outsourcing takes place in developing countries and, as a result, may be subject to geopolitical uncertainty.

Interest rates and credit ratings could adversely affect our cost of capital and net income.

Rising interest rates, credit market dislocations and decisions and actions by credit rating agencies can affect the availability and cost of our funding. Credit rating downgrades or negative changes to ratings outlooks can increase our cost of capital and hurt our competitive position. Guidance from rating agencies as to acceptable leverage can affect our returns as well.

Our retirement and post retirement pension plans are subject to financial market risks that could adversely affect our future results of operations and cash flows.

We have significant retirement and post retirement pension plan assets and obligations. The performance of the financial markets and interest rates impact our plan expenses and funding obligations. Significant decreases in market interest rates, decreases in the fair value of plan assets and investment losses on plan assets will increase our funding obligations, and adversely impact our results of operations and cash flows.

Concerns regarding the European debt crisis and market perception concerning the instability of the euro, the potential reintroduction of individual currencies with the Eurozone, or the potential dissolution of the euro entirely, could adversely affect the Company's business, results of operations and financing.

As a result of the debt crisis with respect to countries in Europe, in particular most recently in Greece, Italy, Ireland, Portugal and Spain, concerns have been raised regarding the debt burden of certain countries using the euro as their currency and their ability to meet future financial obligations, the overall stability of the euro and the suitability of the euro as a single currency given the diverse economic and political circumstances in individual Eurozone countries. These concerns could lead to the re-introduction of individual currencies in one or more Eurozone countries, or, in more extreme circumstances, the possible dissolution of the euro currency entirely. Should the euro be dissolved entirely, the legal and contractual consequences for holders of euro-denominated obligations would be determined by laws in effect at such time. These potential developments, or market perceptions concerning these and related issues, could adversely affect the value of the Company's euro-denominated assets and obligations, particularly in Portugal, Spain and Ireland, and the future profitability or even viability of our operations in those countries. In addition, concerns over the effect of this financial crisis on financial institutions in Europe and globally could have an adverse impact on global economies and capital markets generally, and more specifically on the Company's business in Europe and the ability of the Company and its customers, suppliers and lenders to finance their respective businesses, to access liquidity at acceptable financing costs, if at all, and on the demand for our products and services.

We may suffer adverse financial consequences if Computer Sciences Corporation requires us to purchase its credit reporting business at a time when the public equity or debt markets or other financing conditions are unfavorable to us.

In 1988, we entered into an agreement with Computer Sciences Corporation, or CSC, and certain of its affiliates under which CSC's credit reporting agencies utilize our computerized credit database services. Under this agreement, CSC has an option, exercisable at any time, to sell its credit reporting business to us. The option expires in August 2013. The option exercise price will be determined by an appraisal process and would be due in cash within 180 days after the exercise of the option. We estimate that if CSC were to exercise the option at December 31, 2011, the option price would have been approximately \$650 million to \$750 million. This estimate is based solely on our internal analysis of the value of the business, current market conditions and other factors, all of which are subject to constant change.

Therefore, the actual option exercise price could be materially higher or lower than the estimated amount. If CSC were to exercise its option, we would have to obtain additional sources of funding. We believe that this funding would be available from sources such as additional bank lines of credit and the issuance of public debt and/or equity. However, the availability and terms of any such capital financing would be subject to a number of factors, including credit or equity market conditions, general economic conditions and our financial performance and condition. Because we do not control the timing of the exercise, if any, by CSC of its option, we could be required to seek such financing and increase our debt levels at a time when market or other conditions are unfavorable.

The acquisition, integration or divestiture of businesses by us may not produce the desired financial or operating results.

During 2011, we completed the acquisition of various businesses in separate transactions, including DataVision Resources and several smaller domestic and international acquisitions, and merged our Brazilian business with and into Boa Vista Servicos in exchange for an equity interest in Boa Vista Servicos. Expected benefits, synergies and growth from these initiatives may not materialize as planned. We may have difficulty assimilating new businesses and their products, services, technologies, and personnel into our operations. These difficulties could disrupt our ongoing business, distract our management and workforce, increase our expenses and materially adversely affect our operating results and financial condition. Also, we may not be able to retain key management and other critical employees after an acquisition.

Our customers and we are subject to various current governmental regulations, and could be affected by new laws or regulations, compliance with which may cause us to incur significant expenses, and if we fail to maintain satisfactory compliance with certain regulations, we could be subject to civil or criminal penalties.

Our businesses are subject to various significant international, federal, state and local regulations, including but not limited to privacy and consumer data protection, health and safety, tax, labor and environmental regulations. These regulations are complex, change frequently and have tended to become more stringent over time. We may be required to incur significant expenses to comply with these regulations or to remedy violations of these regulations. Any failure by us to comply with applicable government regulations could also result in cessation of our operations or portions of our operations or impositions of fines and restrictions on our ability to carry on or expand our operations. In addition, because many of our products are regulated or sold into regulated industries, we must comply with additional regulations in marketing our products.

The Dodd-Frank Wall Street Reform and Consumer Protection Act, or Dodd-Frank Act, was enacted in 2010 to broadly reform practices in the financial services industry. Title X of the Dodd-Frank Act established a new Bureau of Consumer Financial Protection, or CFPB, to protect consumers from abusive financial services practices. The CFPB will have authority to write rules impacting the business of credit reporting companies, including the Company, and also to supervise, conduct examinations of, and enforce compliance as to federal consumer financial protections laws and regulations, with respect to certain “non-depository covered persons” determined by the CFPB to be “larger participants” that offer consumer financial products and services. On February 16, 2012, the CFPB issued a proposed rule that would include our credit reporting agency under the CFPB nonbank supervision program. These laws and regulations (as well as actions that may be taken by legislatures and regulatory bodies in other countries) could limit our ability to pursue business opportunities we might otherwise consider engaging in, impose additional costs on us, result in significant loss of revenue, impact the value of assets we hold, or otherwise significantly adversely affect our business.

As in the United States, legislation regarding the availability or use of consumer and commercial data has been, and continues to be, proposed from time to time in various foreign countries in which we have operations, most notably in certain Latin American countries. These proposals have in some cases had the potential to expand the availability or uses of information and in other cases had the potential to restrict the availability or use of information we currently maintain. Accordingly, such possible regulatory action could either increase or decrease our potential revenue and profits.

We derive a portion of our revenue from direct and indirect sales to U.S., state, local and foreign governments and their respective agencies. Such contracts are subject to various procurement laws and regulations, and contract provisions relating to their formation, administration and performance. Failure to comply with these laws, regulations or provisions in our government contracts could result in the imposition of various civil and criminal penalties, termination of contracts, forfeiture of profits, suspension of payments, or suspension of future government contracting. If our government contracts are terminated, if we are suspended from government work, or if our ability to compete for new contracts is adversely affected, our business could suffer.

Third parties may claim that we are infringing their intellectual property and we could suffer significant litigation or licensing expenses or be prevented from selling products or services.

From time to time, third parties may claim that one or more of our products or services infringe their intellectual property rights. We analyze and take action in response to such claims on a case by case basis. Any dispute or litigation regarding patents or other intellectual property could be costly and time-consuming due to the complexity of our technology and the uncertainty of intellectual property litigation and could divert our management and key personnel from our business operations. A claim of intellectual property infringement could force us to enter into a costly or restrictive license agreement, which might not be available under acceptable terms or at all, or could subject us to significant damages or to an injunction against development and sale of certain of our products or services. Our intellectual property portfolio may not be useful in asserting a counterclaim, or negotiating a license, in response to a claim of intellectual property infringement. In certain of our businesses we rely on third party intellectual property licenses and we cannot ensure that these licenses will be available to us in the future on favorable terms or at all.

Third parties may infringe our intellectual property and we may suffer competitive injury or expend significant resources enforcing our rights.

Our success increasingly depends on our proprietary technology. We rely on various intellectual property rights, including patents, copyrights, database rights, trademarks and trade secrets, as well as confidentiality provisions and licensing arrangements, to establish our proprietary rights. The extent to which such rights can be protected varies in different jurisdictions. If we do not enforce our intellectual property rights successfully our competitive position may suffer which could harm our operating results. Our pending patent applications, and our pending copyright and trademark registration applications, may not be allowed or competitors may challenge the validity or scope of our patents, copyrights or trademarks. In addition, our patents, copyrights, trademarks and other intellectual property rights may not provide us a significant competitive advantage.

We may need to spend significant resources monitoring our intellectual property rights and we may or may not be able to detect infringement by third parties. Our competitive position may be harmed if we cannot detect infringement and enforce our intellectual property rights quickly or at all. In some circumstances, enforcement may not be available to us because an infringer has a dominant intellectual property position or for other business reasons. In addition, competitors might avoid infringement by designing around our intellectual property rights or by developing non-infringing competing technologies. Intellectual property rights and our ability to enforce them may be unavailable or limited in some countries which could make it easier for competitors to capture market share and could result in lost revenue.

Economic, political and other risks associated with international sales and operations could adversely affect our results of operations.

Sales outside the U.S. comprise 26% of our net operating revenue and, as a result, our business is subject to various risks associated with doing business internationally. We anticipate that revenue from international operations will continue to represent an increasing portion of our total revenue. In addition, many of our employees, suppliers, job functions and facilities are increasingly located outside the U.S. Accordingly, our future results could be harmed by a variety of factors including changes in specific country or region political, economic or other conditions; trade protection measures; data privacy and consumer protection regulations; difficulty in staffing and managing widespread operations; differing labor, intellectual property protection and technology standards and regulations; business licensing requirements or other requirements relating to making foreign direct investments, which could increase our cost of doing business in certain jurisdictions, prevent us from entering certain markets, increase our operating costs or lead to penalties or restrictions; difficulties associated with repatriating cash generated or held abroad in a tax-efficient manner; and geopolitical instability, including terrorism and war.

We earn revenue, pay expenses, own assets and incur liabilities in countries using currencies other than the U.S. dollar, including among others the British pound, the Canadian dollar, the Brazilian real, the Chilean peso and the

Euro. Because our consolidated financial statements are presented in U.S. dollars, we must translate revenue, income and expenses, as well as assets and liabilities, into U.S. dollars at exchange rates in effect during or at the end of each reporting period. Therefore, increases or decreases in the value of the U.S. dollar against other major currencies will affect our net operating revenues, operating income and the value of balance sheet items denominated in foreign currencies. Because of the geographic diversity of our operations, weaknesses in some currencies might be offset by strengths in others over time. We generally do not mitigate the risks associated with fluctuating exchange rates, although we may from time to time through forward contracts or other derivative instruments hedge a portion of our translational foreign currency exposure or exchange rate risks associated with material transactions which are denominated in a foreign currency. The use of such hedging activities may not offset any or more than a portion of the adverse financial effects of unfavorable movements in foreign exchange rates over the limited time the hedges are in place. Accordingly, fluctuations in foreign currency exchange rates, particularly the strengthening of the U.S. dollar against major currencies, may materially affect our consolidated financial results.

Additionally, we must comply with complex foreign and U.S. laws and regulations, such as the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act and other local laws prohibiting corrupt payments to government officials, and anti-competition regulations. Violations of these laws and regulations could result in fines and penalties, criminal sanctions, restrictions on our business conduct and on our ability to offer products in one or more countries, and could adversely affect our brand, our ability to attract and retain employees, our international operations, our business and operating results. Although we have implemented policies and procedures designed to ensure compliance with these laws and regulations, there can be no assurance that our employees, contractors or agents, as well as those companies to which we outsource certain of our business operations, will not violate our policies.

Our business will suffer if we are not able to retain and hire key personnel.

Our future success depends partly on the continued service of our key development, sales, marketing, executive and administrative personnel. Additionally, increased retention risk exists in certain key areas of our operations that require specialized skills, such as maintenance of certain legacy computer systems, data security experts and analytical modelers. If we fail to retain and hire a sufficient number of these personnel, we will not be able to maintain or expand our business. We believe our pay levels are competitive within the regions that we operate. However, there is intense competition for certain highly technical specialties in geographic areas where we continue to recruit, and it may become more difficult to retain our key employees.

Unfavorable results of legal proceedings could materially affect us.

We are subject to various legal proceedings and claims, including putative class action claims, that have arisen out of the ordinary conduct of our business and are not yet resolved and additional claims may arise in the future. Results of legal proceedings cannot be predicted with certainty. We may be faced with significant monetary damages or injunctive relief against us that would materially adversely affect a portion of our business and might materially affect our financial condition and operating results.

Changes in income tax laws can significantly impact our net income.

Federal and state governments in the U.S. as well as a number of other governments around the world are currently facing significant fiscal pressures and have considered or may consider changes to their tax laws for revenue raising or economic competitiveness reasons. Changes to tax laws can have immediate impacts, either favorable or unfavorable, on our results of operations and cash flows, and may impact our competitive position versus certain competitors who are domiciled in other jurisdictions and subject to different tax laws.

We are subject to a variety of other general risks and uncertainties inherent in doing business.

In addition to the specific factors discussed above, we are subject to risks that are inherent to doing business. These include growth rates, general economic and political conditions, customer satisfaction with the quality of our services, costs of obtaining insurance, changes in unemployment rates, and other events that can impact revenue and the cost of doing business.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

Our executive offices are located at 1550 Peachtree Street, N.W., Atlanta, Georgia. Our other properties are geographically distributed to meet sales and operating requirements worldwide. We consider these properties to be both suitable and adequate to meet our current operating requirements, and most of the space is being utilized. We ordinarily lease office space for conducting our business and are obligated under approximately 80 leases and other rental arrangements for our field locations. We owned six office buildings at December 31, 2011, including our executive offices, two buildings which house our Atlanta, Georgia data center, two buildings utilized by our TALX Workforce Solutions operations located in St. Louis, Missouri and Charleston, South Carolina, as well as a building utilized by our Latin America operations located in Sao Paulo, Brazil. We also own 23.5 acres adjacent to the Atlanta, Georgia data center.

For additional information regarding our obligations under leases, see Note 7 of the Notes to Consolidated Financial Statements in this report. We believe that suitable additional space will be available to accommodate our future needs.

ITEM 3. LEGAL PROCEEDINGS

Equifax, certain of its subsidiaries, and other persons have been named as parties in various legal actions and administrative proceedings arising in connection with the operation of Equifax's businesses. In most cases, plaintiffs seek unspecified damages and other relief. These actions include the following:

California Bankruptcy Litigation. In consolidated actions filed in the U.S. District Court for the Central District of California, captioned *Terri N. White, et al. v. Equifax Information Services LLC*, *Jose Hernandez v. Equifax Information Services LLC*, *Kathryn L. Pike v. Equifax Information Services LLC*, and *Jose L. Acosta, Jr., et al. v. Trans Union LLC, et al.*, plaintiffs asserted that Equifax violated federal and state law (the FCRA, the California Credit Reporting Act and the California Unfair Competition Law) by failing to follow reasonable procedures to determine whether credit accounts are discharged in bankruptcy, including the method for updating the status of an account following a bankruptcy discharge. On August 20, 2008, the District Court approved a Settlement Agreement and Release providing for certain changes in the procedures used by defendants to record discharges in bankruptcy on consumer credit files. That settlement resolved claims for injunctive relief, but not plaintiffs' claims for damages. On May 7, 2009, the District Court issued an order preliminarily approving an agreement to settle remaining class claims. The District Court subsequently deferred final approval of the settlement and required the settling parties to send a supplemental notice to those class members who filed a claim and objected to the settlement or opted out, with the cost for the re-notice to be deducted from the plaintiffs' counsel fee award. Mailing of the supplemental notice was completed on February 15, 2011. The deadline for this group of settling plaintiffs to provide additional documentation to support their damage claims or to opt-out of the settlement was March 31, 2011. On July 15, 2011, following another approval hearing, the District Court approved the settlement. Several objecting plaintiffs subsequently filed notices of appeal to the U.S. Court of Appeals for the Ninth Circuit.

Other. Equifax has been named as a defendant in various other legal actions, including administrative claims, class actions and other litigation arising in connection with our business. Some of the legal actions include claims for substantial compensatory or punitive damages or claims for indeterminate amounts of damages. We believe we have strong defenses to and, where appropriate, will vigorously contest, many of these matters. Given the number of these matters, some are likely to result in adverse judgments, penalties, injunctions, fines or other relief. However, we do not believe that these litigation matters will be individually material to our financial condition or results of operations. We may explore potential settlements before a case is taken through trial because of the uncertainty and risks inherent in the litigation process.

For information regarding contingent tax claims raised by the Canada Revenue Agency, and our accounting for legal contingencies, see Note 7 of the Notes to Consolidated Financial Statements in this report.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II**ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Equifax's common stock is traded on the New York Stock Exchange under the symbol "EFX." As of January 31, 2012, Equifax had approximately 5,433 holders of record; however, Equifax believes the number of beneficial owners of common stock exceeds this number.

The table below sets forth the high and low sales prices per share of Equifax common stock, as reported on the New York Stock Exchange, for each quarter in the last two fiscal years and dividends declared per share:

	High Sales Price (In dollars)	Low Sales Price	<u>Dividends (1)</u>
2011			
First Quarter	\$38.88	\$ 34.48	\$ 0.16
Second Quarter	\$39.90	\$ 33.44	\$ 0.16
Third Quarter	\$35.75	\$ 28.59	\$ 0.16
Fourth Quarter	\$39.26	\$ 29.07	\$ 0.16
2010			
First Quarter	\$36.63	\$ 30.93	\$ 0.04
Second Quarter	\$36.22	\$ 27.98	\$ 0.04
Third Quarter	\$32.29	\$ 27.64	\$ 0.04
Fourth Quarter	\$36.13	\$ 30.53	\$ 0.16

(1) Equifax's Senior Credit Facility restricts our ability to pay cash dividends on our capital stock or repurchase capital stock if a default exists or would result according to the terms of the credit agreement.

Shareholder Return Performance Graph

The following graph compares Equifax's five-year cumulative total shareholder return with that of the Standard & Poor's Composite Stock Index (S&P 500) and a peer group index, the Dow Jones U.S. General Financial Index. The graph assumes that value of the investment in our Common Stock and each index was \$100 on the last trading day of 2006 and that all quarterly dividends were reinvested without commissions. Our past performance may not be indicative of future performance.

COMPARATIVE FIVE-YEAR CUMULATIVE TOTAL RETURN AMONG EQUIFAX INC., S&P 500, AND DOW JONES U.S. GENERAL FINANCIAL INDICES

COMPARISON OF 5-YEAR CUMULATIVE TOTAL RETURN

AMONG EQUIFAX INC., S&P 500 INDEX, AND DJ US GENERAL FINANCE INDEX

	Fiscal Year Ended December 31,					
	Initial	2007	2008	2009	2010	2011
Equifax, Inc.	100.00	89.92	65.94	77.27	89.82	99.58
S&P 500 Index	100.00	105.49	66.46	84.05	96.71	98.75
DJ US General Financial Index	100.00	84.66	32.42	49.11	50.87	44.96

The table below contains information with respect to purchases made by or on behalf of Equifax of its common stock during the fourth quarter ended December 31, 2011:

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased (1)	Average Price Paid Per Share (2)	Total Number of Shares Purchased as Part of Publicly-Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs (3)
September 30, 2011				\$ 179,268,333
October 1 - October 31, 2011	155,802	\$ 35.50	154,503	\$ 173,783,477
November 1 - November 30, 2011	1,453,819	\$ 35.15	1,452,781	\$ 122,718,224
December 1 - December 31, 2011	282,500	\$ 37.49	282,500	\$ 112,127,299
Total	1,892,121	\$ 35.53	1,889,784	\$ 112,127,299

The total number of shares purchased includes: (a) shares purchased pursuant to our publicly-announced share repurchase program, or Program; and (b) shares surrendered, or deemed surrendered, in satisfaction of the exercise (1) price and/or to satisfy tax withholding obligations in connection with the exercise of employee stock options and vesting of restricted stock, totaling 1,299 shares for the month of October 2011, 1,038 shares for the month of November 2011, and none for the month of December 2011.

(2) Average price paid per share for shares purchased as part of our publicly-announced plan (includes brokerage commissions).

Under the share repurchase program authorized by our Board of Directors, we purchased 4.2 million common (3) shares on the open market during the twelve months ended December 31, 2011 for \$142.3 million. At December 31, 2011, the amount authorized for future share repurchases under the Program was \$112.1 million.

Information relating to compensation plans under which the Company's equity securities are authorized for issuance is included in the section captioned "Equity Compensation Plan Information" in our 2012 Proxy Statement and is incorporated herein by reference.

ITEM 6. SELECTED FINANCIAL DATA

The table below summarizes our selected historical financial information for each of the last five years. The summary of operations data for the years ended December 31, 2011, 2010 and 2009, and the balance sheet data as of December 31, 2011 and 2010, have been derived from our audited Consolidated Financial Statements included in this report. The summary of operations data for the years ended December 31, 2008 and 2007, and the balance sheet data as of December 31, 2009, 2008 and 2007, have been derived from our audited Consolidated Financial Statements not included in this report. The historical selected financial information may not be indicative of our future performance and should be read in conjunction with the information contained in Management's Discussion and Analysis of Financial Condition and Results of Operations, and the Consolidated Financial Statements and the accompanying Notes to the Consolidated Financial Statements in this report.

	Twelve Months Ended December 31,

Balance Sheet Data:					
	As of December 31,				
	2011	2010	2009 ⁽¹⁾	2008	2007 ⁽⁴⁾
(In millions)					
Total assets	\$3,508.6	\$3,437.5	\$3,550.5	\$3,260.3	\$3,523.9
Short-term debt and current maturities	\$47.2	\$20.7	\$183.2	\$31.9	\$222.1
Long-term debt, net of current portion	\$966.0	\$978.9	\$990.9	\$1,187.4	\$1,165.2
Total debt, net	\$1,013.2	\$999.6	\$1,174.1	\$1,219.3	\$1,387.3
Total equity	\$1,722.1	\$1,708.4	\$1,615.0	\$1,323.5	\$1,408.0

On October 27, 2009, we acquired IXI Corporation for \$124.0 million. On November 2, 2009, we acquired Rapid Reporting Verification Company for \$72.5 million. The results of these acquisitions are included in our
(1) Consolidated Financial Statements subsequent to the acquisition dates. For additional information about these acquisitions, see Note 4 of the Notes to Consolidated Financial Statements in this report.

During 2009 and 2008, we recorded restructuring and asset write-down charges of \$24.8 million and \$16.8 million,
(2) respectively (\$15.8 million and \$10.5 million, respectively, net of tax). For additional information about the 2009 charges, see Note 12 of the Notes to the Consolidated Financial Statements in this report.

During 2009, we recorded a \$7.3 million income tax benefit related to our ability to utilize foreign tax credits
(3) beyond 2009. In 2008 and 2006, we recorded income tax benefits of \$14.6 million and \$9.5 million, respectively, related to uncertain tax positions for which the statute of limitations expired.

On May 15, 2007 we acquired all of the outstanding shares of TALX. Under the terms of the transaction, we issued 20.6 million shares of Equifax common stock and 1.9 million fully-vested options to purchase Equifax common
(4) stock, and paid approximately \$288.1 million in cash, net of cash acquired. We also assumed TALX's outstanding debt, which had a fair value totaling \$177.6 million at May 15, 2007. The results of TALX's operations are included in our Consolidated Financial Statements beginning on the date of acquisition.

On April 23, 2010, we sold our APPRO product line (“APPRO”) for approximately \$72 million. On July 1, 2010, we sold the assets of our Direct Marketing Services division (“DMS”) for approximately \$117 million. Both of these (5) were previously reported in our U.S. Consumer Information Solutions segment. We have presented the APPRO and DMS operations as discontinued operations for all periods presented. For additional information about these divestitures, see Note 3 of the Notes to Consolidated Financial Statements in this report.

On May 31, 2011, we completed the merger of our Brazilian business with Boa Vista Serviços S.A. (“BVS”) in exchange for a 15% equity interest in BVS, which was accounted for as a sale and was deconsolidated. BVS, an (6) unrelated third party whose results we do not consolidate, is the second largest consumer and commercial credit information company in Brazil.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

As used herein, the terms Equifax, the Company, we, our and us refer to Equifax Inc., a Georgia corporation, and its consolidated subsidiaries as a combined entity, except where it is clear that the terms mean only Equifax Inc.

All references to earnings per share data in Management's Discussion and Analysis, or MD&A, are to diluted earnings per share, or EPS, unless otherwise noted. Diluted EPS is calculated to reflect the potential dilution that would occur if stock options or other contracts to issue common stock were exercised and resulted in additional common shares outstanding.

BUSINESS OVERVIEW

We are a leading global provider of information solutions, employment, income and identity verifications and human resources business process outsourcing services. We leverage some of the largest sources of consumer and commercial data, along with advanced analytics and proprietary technology, to create customized insights which enable our business customers to grow faster, more efficiently, and more profitably, and to inform and empower consumers.

Businesses rely on us for consumer and business credit intelligence, credit portfolio management, fraud detection, decisioning technology, marketing tools, and human resources and payroll services. We also offer a portfolio of products that enable individual consumers to manage their financial affairs and protect their identity. Our revenue stream is diversified among individual consumers and among businesses across a wide range of industries and international geographies.

Segment and Geographic Information

Segments. The U.S. Consumer Information Solutions, or USCIS, segment, the largest of our five segments, consists of three product and service lines: Online Consumer Information Solutions, or OCIS; Mortgage Solutions; and Consumer Financial Marketing Services. OCIS and Mortgage Solutions revenue is principally transaction-based and is derived from our sales of products such as consumer credit reporting and scoring, mortgage settlement services, identity management, fraud detection and modeling services. USCIS also markets certain of our decisioning products which facilitate and automate a variety of consumer credit-oriented decisions. Consumer Financial Marketing Services revenue is principally project- and subscription-based and is derived from our sales of batch credit, consumer wealth

or demographic information such as those that assist clients in acquiring new customers, cross-selling to existing customers and managing portfolio risk.

The International segment consists of Latin America, Europe and Canada Consumer. Canada Consumer's products and services are similar to our USCIS offerings, while Europe and Latin America are made up of varying mixes of product lines that are in our USCIS, North America Commercial Solutions and North America Personal Solutions reportable segments.

The TALX Workforce Solutions segment consists of the Verification Services and Employer Services business units. Verification Services revenue is transaction based and is derived primarily from employment, income and social security number verifications. Employer Services revenues are derived from our provision of certain human resources business process outsourcing services that include both transaction- and subscription-based product offerings. These services assist our customers with the administration of unemployment claims and employer-based tax credits, the handling of certain payroll-related transaction processing, and the management of the assessment of new hires.

North America Personal Solutions revenue is both transaction- and subscription-based and is derived from the sale of credit monitoring, debt management and identity theft protection products, which we deliver to consumers through the mail and electronically via the internet.

North America Commercial Solutions revenue is principally transaction based, with the remainder project based, and is derived from the sale of business information, credit scores and portfolio analytics that enable customers to utilize our reports to make financial, marketing and purchasing decisions related to businesses.

Geographic Information. We currently operate in the following countries: Argentina, Brazil, Canada, Chile, Costa Rica, Ecuador, El Salvador, Honduras, Paraguay, Peru, Portugal, the Republic of Ireland, Spain, the U.K., Uruguay, and the U.S. Our operations in the Republic of Ireland focus on data handling and customer support activities. We have an investment in the second largest consumer and commercial credit information company in Brazil and offer consumer credit services in India and Russia through joint ventures. Of the countries we operate in, 74% of our revenue was generated in the U.S. during the twelve months ended December 31, 2011.

Key Performance Indicators. Management focuses on a variety of key indicators to monitor operating and financial performance. These performance indicators include measurements of operating revenue, change in operating revenue, operating income, operating margin, net income, diluted earnings per share, cash provided by operating activities and capital expenditures. Key performance indicators for the twelve months ended December 31, 2011, 2010 and 2009, include the following:

Key Performance Indicators Twelve Months Ended December 31,						
	2011		2010		2009	
	(Dollars in millions, except per share data)					
Operating revenue	\$ 1,959.8		\$ 1,859.5		\$ 1,716.0	
Operating revenue change	5	%	8	%	-5	%
Operating income	\$ 471.0		\$ 430.0		\$ 381.8	
Operating margin	24.0	%	23.1	%	22.2	%
Net income attributable to Equifax	\$ 232.9		\$ 266.7		\$ 233.9	
Diluted earnings per share from continuing operations	\$ 1.87		\$ 1.86		\$ 1.70	
Cash provided by operating activities	\$ 408.7		\$ 352.6		\$ 418.4	
Capital expenditures	\$ 75.0		\$ 99.8		\$ 70.7	

Operational and Financial Highlights.

On May 31, 2011, we completed the merger of our Brazilian business with Boa Vista Serviços S.A. (“BVS”) in exchange for a 15% equity interest in BVS, which was accounted for as a sale and was deconsolidated (the “Brazilian Transaction”). BVS, an unrelated third party whose results we do not consolidate, is the second largest consumer and commercial credit information company in Brazil.

On August 2, 2011, we acquired DataVision Resources, which provides data and business solutions to the mortgage, insurance and financial services industries, for \$50.0 million. DataVision Resources is part of our TALX Workforce Solutions segment.

- We repurchased 4.2 million shares of our common stock on the open market for \$142.3 million during 2011.

Business Environment, Company Outlook and Strategy

Consumer and small business lending activity, is one of the key drivers of demand for our services. Lending activity is now growing at a moderate rate in most loan categories and markets around the world, but lenders continue to demonstrate caution in loan decisions due to continuing concerns about consumer and small business credit quality and about home values. Mortgage lending activity, which is an important lending category for our company, is cyclical, based on fluctuations in both home sales and refinancing activity; and mortgage activity is currently below long term average activity levels, in part due to reduced home values. In addition, new financial regulations are increasing the compliance requirements for many of our customers and introduce new challenges as well as opportunities in the marketing of our product and service offerings to our customers. Real time decision-making for many of our customers has become more complex and reliant on quality data assets with broad market coverage. Our proprietary technology is efficient and sufficiently flexible to adapt to a broad array of decisioning applications. By linking data assets, we are able to develop high value solutions that improve the effectiveness of our customers' decision-making activities. In an effort to respond to these market conditions, we have focused on the following activities:

Further diversification of our revenues by pursuing and investing in key strategic initiatives including new product •innovation, differentiated decisioning solutions and analytics, leveraging and broadening our diverse data assets and enhancing our technology platforms.

- Reorganizing our sales force with key customer teams dedicated to our largest accounts and broadening our product offerings to address the needs of our medium-to-smaller customers.
- Acquiring new data assets and technologies both domestically and internationally.
- Expanding and investing in attractive international markets, including Russia, India and Brazil.
- Continuing our focus on managing expenses through the use of LEAN and other process improvement initiatives.

In 2012, we do not expect measurable improvement in the overall business environment. The environment will continue to be challenging as various countries deal with their particular political, budgetary, and economic issues. However, we currently expect that with our ongoing investments in new product innovation, technology infrastructure, strategic acquisitions, enterprise growth initiatives, and continuous process improvement will enable us to deliver long term average organic revenue growth between 6% and 8% with additional growth of 1% to 2% derived from strategic acquisitions, and we expect to grow earnings per share at a somewhat faster rate than revenue as a result of operating and financial leverage. The diversity of our data assets, the strength of our analytical capabilities, and our proprietary decisioning technology has enabled us to consistently deliver high value solutions that our clients integrate into their business operations. As our clients' business environment becomes more difficult and competitive, these high value solutions will enable them to operate their businesses more efficiently and effectively.

RESULTS OF OPERATIONS —

TWELVE MONTHS ENDED DECEMBER 31, 2011, 2010 AND 2009

Consolidated Financial Results

Operating Revenue

	Twelve Months Ended December			Change			
	2011	2010	2009	2011 vs. 2010	2010 vs. 2009		
Operating Revenue				\$	%	\$	%
	(Dollars in millions)						
U.S. Consumer Information Solutions	\$792.6	\$743.0	\$712.2	\$49.6	7 %	\$30.8	4 %
International	492.9	482.8	438.6	10.1	2 %	44.2	10 %
TALX Workforce Solutions	404.3	395.6	346.4	8.7	2 %	49.2	14 %
North America Personal Solutions	180.7	157.6	149.0	23.1	15 %	8.6	6 %
North America Commercial Solutions	89.3	80.5	69.8	8.8	11 %	10.7	15 %
Consolidated operating revenue	\$1,959.8	\$1,859.5	\$1,716.0	\$100.3	5 %	\$143.5	8 %

Revenue from continuing operations increased by 5% in 2011 compared to 2010. The deconsolidation of our Brazilian business, which resulted from the merger of our business into BVS during the second quarter of 2011, negatively impacted revenue by \$48.7 million, compared to the prior year, while all other revenue increased by 8% compared to 2010, primarily driven by strong execution of key strategic initiatives across each of our businesses. The favorable effect of foreign exchange rates, in locations other than Brazil, did not have a material impact on revenue.

Revenue from continuing operations increased by 8% in 2010 compared to 2009. The favorable effect of foreign exchange rates increased revenue by \$24.1 million, or 1.4%, in 2010 compared to the prior year period. Revenue grew over the prior year in each of our operating segments, primarily driven by strong execution of key strategic initiatives as well as growth contributed by 2009 acquisitions in USCIS and TALX Workforce Solutions.

Operating Expenses

	Twelve Months Ended December			Change			
	2011	2010	2009	2011 vs. 2010	2010 vs. 2009		
Operating Expenses	(Dollars in millions)			\$	%	\$	%
Consolidated cost of services	\$768.5	\$759.9	\$718.8	\$8.6	1 %	\$41.1	6 %
Consolidated selling, general and administrative expenses	554.8	507.4	470.2	47.4	9 %	37.2	8 %
Consolidated depreciation and amortization expense	165.5	162.2	145.2	3.3	2 %	17.0	12 %
Consolidated operating expenses	\$1,488.8	\$1,429.5	\$1,334.2	\$59.3	4 %	\$95.3	7 %

Cost of Services. The slight increase in cost of services from continuing operations, when compared to 2010, was due primarily to the impact of increased salary and benefits expense and contract services expenses of \$31.1 million, and by the impact of changes in foreign currency exchange rates which increased our cost of services by \$7.2 million, largely offset by decreases related to the deconsolidation of our Brazilian business.

The increase in cost of services from continuing operations in 2010, when compared to 2009, was due primarily to the impact of increased salary and incentive expense of \$6.3 million; the impact of changes in foreign currency exchange rates which increased our cost of services by \$11.4 million; and the impact of our fourth quarter 2009 acquisitions of IXI Corporation and Rapid Reporting Verification Company.

Selling, General and Administrative Expenses. Selling, general and administrative expense from continuing operations increased \$47.4 million compared to 2010. The increase was primarily due to increased salary and incentive expense of \$33.3 million, higher advertising expenses of \$9.1 million and higher severance costs offset by decreases in expenses related to the deconsolidation of our Brazilian business. The impact of changes in foreign currency exchange rates increased our selling, general and administrative expense by \$5.2 million in 2011.

The increase in selling, general and administrative expenses from continuing operations of \$37.2 million in 2010 when compared to 2009, was due to changes in foreign exchange rates, which increased 2010 expense by \$5.2 million, and increased salary, incentive and benefits expenses of \$32.3 million, offset by \$24.8 million in restructuring charges that were incurred during 2009 that did not recur in 2010. The remaining increase was primarily due to the impact of the inclusion of businesses acquired in the fourth quarter of 2009.

Depreciation and Amortization. Depreciation and amortization expense from continuing operations increased in 2011 as compared to 2010 due to \$6.6 million of incremental depreciation and amortization expense related to our

fourth quarter 2010 acquisition of Anakam and our 2011 acquisitions partially offset by the decline in amortization of certain purchased intangibles acquired as part of TALX in 2007 which fully amortized at the end of the second quarter of 2011 and the amortization and depreciation decrease resulting from the deconsolidation of our Brazilian business.

Depreciation and amortization expense from continuing operations in 2010 increased \$17.0 million as compared to 2009 primarily due to our fourth quarter 2009 acquisitions which contributed \$9.0 million of incremental depreciation and amortization expense, as well as the effect of recent investments in new products and technology infrastructure.

Operating Income and Operating Margin

Operating Income and Operating Margin	Twelve Months Ended December 31,			Change					
	2011	2010	2009	2011 vs. 2010		2010 vs. 2009			
	(Dollars in millions)			\$	%	\$	%		
Consolidated operating revenue	\$1,959.8	\$1,859.5	\$1,716.0	\$100.3	5 %	\$143.5	8 %		
Consolidated operating expenses	(1,488.8)	(1,429.5)	(1,334.2)	(59.3)	4 %	(95.3)	7 %		
Consolidated operating income	\$471.0	\$430.0	\$381.8	\$41.0	10 %	\$48.2	13 %		
Consolidated operating margin	24.0 %	23.1 %	22.2 %		0.9pts		0.9 pts		

Operating income from continuing operations for 2011 increased faster than revenue due to better operating leverage from revenue growth and business mix as well as the deconsolidation of Brazil, which reduced reported revenue, but which had little impact on operating profit because it had been operating near break-even. These factors resulted in operating margin improvement of 90 basis points to 24.0% compared to 2010.

The increase in operating income from continuing operations and operating margin for 2010, as compared to 2009, is primarily attributed to the 8% increase in revenue and \$24.8 million of restructuring charges in 2009 that did not recur in 2010.

Other Expense, Net

Other Expense, Net	Twelve Months Ended December 31,			Change					
	2011	2010	2009	2011 vs. 2010		2010 vs. 2009			
	(Dollars in millions)			\$	%	\$	%		
Consolidated interest expense	\$55.1	\$56.1	\$57.0	\$(1.0)	-2 %	\$(0.9)	-2 %		
Consolidated other expense (income), net	7.7	(1.3)	(6.2)	9.0	nm	4.9	-79 %		
Consolidated other expense, net	\$62.8	\$54.8	\$50.8	\$8.0	15 %	\$4.0	8 %		
Average cost of debt	5.5 %	5.2 %	4.8 %						
Total consolidated debt, net, at year end	\$1,013.2	\$999.6	\$1,174.1	\$13.6	1 %	\$(174.5)	-15 %		

nm - not meaningful

Interest expense decreased slightly in 2011, when compared to the same period in 2010, due to lower average debt balances outstanding for 2011 as compared to 2010. Our consolidated debt balance has increased at December 31, 2011, as a result of additional borrowings in the form of commercial paper, on which interest rates and accordingly interest expense are currently very low. The increase in the average cost of debt for 2011 is due to less low rate commercial paper outstanding on average year to date which caused the average cost of debt to increase as compared to the prior year period.

Interest expense decreased slightly for 2010, when compared to 2009, as a decrease in our average debt balance from \$1.18 billion to \$1.07 billion more than offset an increase in the average interest rate on our total debt from 4.8% in 2009 to 5.2% in 2010. The increase in our average interest rate paid was caused by a reduction in short term, floating rate commercial paper, while longer term fixed rate debt outstanding remained essentially unchanged.

Other expense (income), net, from continuing operations for 2011 increased \$9.0 million as compared to the prior year. The increase is primarily due to the merger of our Brazilian business during the second quarter of 2011. On May 31, 2011, we completed the merger of our Brazilian business with BVS, which was accounted for as a sale and was deconsolidated, in exchange for a 15% equity interest in BVS. We recorded a \$10.3 million pre-tax loss on the Brazilian Transaction in other expense (income), net.

Other expense (income), net, for 2010 as compared to 2009, declined, as 2009 included a \$2.2 million mark-to-market adjustment on certain insurance policies, a \$1.1 million gain on our repurchase of \$7.5 million principal amount of our ten-year senior notes due 2017 and a \$1.3 million gain related to a litigation settlement.

Income Taxes

	Twelve Months Ended December 31, 2011			Change			
	2011	2010	2009	2011 vs. 2010		2010 vs. 2009	
Provision for Income Taxes	(Dollars in millions)			\$	%	\$	%
Consolidated provision for income taxes	\$ 168.0	\$ 131.9	\$ 106.6	\$ 36.1	27 %	\$ 25.3	24 %
Effective income tax rate	41.2 %	35.1 %	32.2 %				

Our effective rate was 41.2% for 2011, up from 35.1% for the same period in 2010. The 2011 rate was higher primarily due to the impact of the Brazilian Transaction which increased our effective rate by 5.2%. In addition, the 2010 rate benefited from certain state benefits that did not recur in 2011. This is partially offset by a cumulative income tax benefit resulting from the recognition of an income tax deduction related to several prior years. We expect our effective tax rate in 2012 to be in the range of 36% to 38%.

Our effective tax rate was 35.1% for 2010, up from 32.2% for the same period in 2009. The 2010 rate was higher due primarily to the prior year recognition of a \$7.3 million income tax benefit related to our ability to utilize foreign tax credits beyond 2009, more favorable discrete items in 2009 related to foreign and state taxes and a 2009 investment loss in subsidiary, partially offset by a permanent federal deduction realized in 2010.

Net Income

	Twelve Months Ended December 31, 2011			Change			
	2011	2010	2009	2011 vs. 2010		2010 vs. 2009	
Net Income	(In millions, except per share amounts)			\$	%	\$	%
Consolidated operating income	\$471.0	\$430.0	\$381.8	\$41.0	10 %	\$48.2	13 %
Consolidated other expense, net	(62.8)	(54.8)	(50.8)	(8.0)	15 %	(4.0)	8 %
Consolidated provision for income taxes	(168.0)	(131.9)	(106.6)	(36.1)	27 %	(25.3)	24 %
Consolidated net income from continuing operations	\$240.2	\$243.3	\$224.4	\$(3.1)	-1 %	\$18.9	8 %
Discontinued operations, net of tax	1.5	31.5	16.1	(30.0)	-95 %	15.4	94 %
Net income attributable to noncontrolling interests	(8.8)	(8.1)	(6.6)	(0.7)	9 %	(1.5)	22 %
Net income attributable to Equifax	\$232.9	\$266.7	\$233.9	\$(33.8)	-13 %	\$32.8	14 %
Diluted earnings per common share							
Net income from continuing operations attributable to Equifax	\$1.87	\$1.86	\$1.70	\$0.01	1 %	\$0.16	9 %
Discontinued operations attributable to Equifax	0.01	0.25	0.13	\$(0.24)	-95 %	\$0.12	92 %

Edgar Filing: EQUIFAX INC - Form 10-K

Net income attributable to Equifax	\$1.88	\$2.11	\$1.83	\$(0.23)	-11 %	\$0.28	15 %
Weighted-average shares used in computing diluted earnings per share	123.7	126.5	127.9				

Consolidated income from continuing operations decreased by \$3.1 million, or 1%, in 2011, compared to the same period in 2010, due to the \$27.8 million loss recorded on the Brazilian Transaction (reflected in other expense and income tax expense), partially offset by operating income growth of \$41.0 million due to revenue growth, net of associated income taxes. Consolidated income attributable to Equifax decreased \$33.8 million in 2011. In addition to improved operating results and the loss on the Brazilian Transaction described above, 2010 consolidated income from continuing operations included transaction gains from discontinued operations of \$27.2 million which did not recur in 2011.

The increase in net income attributable to Equifax for 2010, as compared to 2009, was primarily due to increased income from discontinued operations, driven by a \$14.9 million gain, net of tax, on the sale of DMS recorded in the third quarter of 2010 and a \$12.3 million gain, net of tax, on the sale of the APPRO product line recorded in the second quarter of 2010. Net income attributed to Equifax for 2010 also benefited from higher operating income, which grew generally in line with higher revenue.

Segment Financial Results

U.S. Consumer Information Solutions

	Twelve Months Ended December 31			Change					
	2011	2010	2009	2011 vs. 2010		2010 vs. 2009			
U.S. Consumer Information Solutions				\$	%	\$	%		
	(Dollars in millions)								
Operating revenue:									
Online Consumer Information Solutions	\$519.8	\$485.2	\$501.4	\$34.6	7 %	\$(16.2)	-3 %		
Mortgage Solutions	119.5	113.5	99.5	6.0	5 %	14.0	14 %		
Consumer Financial Marketing Services	153.3	144.3	111.3	9.0	6 %	33.0	30 %		
Total operating revenue	\$792.6	\$743.0	\$712.2	\$49.6	7 %	\$30.8	4 %		
% of consolidated revenue	40 %	40 %	41 %						
Total operating income	\$287.3	\$269.8	\$259.4	\$17.5	6 %	\$10.4	4 %		
Operating margin	36.2 %	36.3 %	36.4 %		-0.1 pts		-0.1 pts		

U.S. Consumer Information Solutions revenue increased 7% in 2011 as compared to 2010 as a result of growth across all of our USCIS business lines. The increase in revenue for 2010, as compared to 2009, was due to growth in Mortgage Solutions along with growth due to our acquisition of IXI Corporation in the fourth quarter of 2009 partially offset by a small decline in online credit reporting revenue.

OCIS. The increase in revenue for 2011, as compared to 2010, was driven by increased market volume, particularly in the credit card and auto markets; new customer wins; new service introductions; and select pricing actions in subscription and wholesale arrangements. An 11% increase in core credit decision transaction volumes was partially offset by lower average price per transaction for our transaction based revenue. Revenue for 2010, as compared to 2009, declined primarily due to a reduction of online credit decision transaction volume of 5% caused by weakness in the U.S. consumer credit markets while pricing remained relatively flat year over year.

Mortgage Solutions. Revenue has increased in 2011 primarily due to increased sales of settlement services as a result of increased market share from existing customers partially offset by the declines in core mortgage reporting services due to lower refinancing activity as compared to the comparable periods of 2010. Revenue for 2010 increased, as compared to the prior year, due to favorable long-term interest rates that resulted in higher consumer refinancing activity and increased home sales activity attributable to U.S. government incentives for housing purchases which expired on May 31, 2010.

Consumer Financial Marketing Services. 2011 revenue increased, as compared to 2010, due to continued growth in credit-based pre-screen and portfolio management revenue as well as strong market penetration of wealth-based consumer information services. The increase in revenue in 2010, as compared to 2009, was primarily due to our acquisition of IXI Corporation during the fourth quarter of 2009.

U.S. Consumer Information Solutions Operating Margin. In 2011, improved margins in online credit services and CFMS resulting from solid revenue growth were offset by lower margins in mortgage solutions due to less favorable product mix and by expense investment and increased acquisition-related amortization associated with our fourth quarter 2010 acquisition of Anakam.

Operating margin remained relatively consistent in 2010, as compared to 2009. The margin impact of amortization expense associated with the IXI acquisition was offset by expense leveraging resulting from revenue growth and expense reductions due to certain process streamlining activities.

International

	Twelve Months Ended December 31, 2011			Change					
	2011	2010	2009	2011 vs. 2010	2010 vs. 2009

% of consolidated revenue	25%	26%	26%						
Total operating income	\$132.2	\$119.4	\$118.9	\$12.8	11%	\$0.5	0%		
Operating margin	26.8%	24.7%	27.1%		2.1 pts		-2.4 pts		

International revenue increased by 2% in 2011 as compared to 2010. While the deconsolidation of Brazil negatively impacted revenue by \$48.7 in 2011, revenue in our other geographies increased by 15% as compared to 2010. Local currency revenue, excluding Brazil, increased 12% due to solid growth in Europe, Canada and other Latin American countries. Local currency fluctuations against the U.S. dollar, excluding Brazil, favorably impacted our International revenue by \$12.0 million, or 3%.

International revenue increased in 2010, as compared to 2009, primarily due to strong growth in Latin America and the favorable impact of changes in foreign exchange rates. Local currency fluctuations against the U.S. dollar favorably impacted our International revenue by \$21.8 million, or 5%. In local currency, International revenue was up 5% in 2010.

Latin America. Revenue decreased by 10% in 2011 as compared to 2010. While the deconsolidation of Brazil negatively impacted revenue by \$48.7 million in 2011, revenue in our other Latin American countries increased 18% in 2011 as compared to 2010. Local currency revenue, excluding Brazil, increased by 17% due to broad-based growth across other Latin American countries. The favorable impact of changes in foreign exchange rates, excluding Brazil, added \$1.0 million, or 1%, to revenue in 2011.

Revenue increased for 2010, as compared to the prior year by \$30.9 million, or 15%, partially due to the favorable foreign currency impact of \$14.3 million, or 7%. In local currency, revenue increased 8% from 2009. Local currency revenue increased in most of our Latin American geographies, resulting from broad-based growth across all product segments, partially offset by a modest decline in Brazil.

Europe. Revenue increased 15% in 2011 compared to the same period in 2010 due to increased sales in most product segments and the impact of a first quarter 2011 acquisition, as well as the favorable impact of changes in foreign exchange rates. In local currency, revenue was up 11% in 2011. Local currency fluctuations against the U.S. dollar favorably impacted revenue by \$6.0 million, or 4%.

The slight decrease in revenue for 2010, as compared to 2009, was due to an unfavorable foreign currency impact of \$3.2 million, or 3%. In local currency, revenue increased 2%, as compared to the same period in 2009. The increase was due to growth in online transactions and a higher volume of subscriptions in the U.K. as well as higher registries usage in Spain and Portugal offset by declines in some of our other product segments.

Canada Consumer. Revenue increased 10% compared to the same period in 2010 due to increased volumes for our technology and analytical services products, primarily due to growth in the customer base for a fraud mitigation product, and the favorable impact of changes in foreign exchange rates. In local currency, revenue was up 6% in 2010. Local currency fluctuations against the U.S. dollar favorably impacted revenue by \$5.1 million, or 4%. The \$14.1 million increase in revenue for 2010, as compared to the prior year, was primarily due to favorable foreign currency impact of \$10.6 million, or 11%. In local currency, revenue increased 3% when compared to 2009. The increase in local currency was due to increased volumes for our technology and analytical services products primarily due to growth in the customer base for a new fraud mitigation product.

International Operating Margin. Operating margin increased in 2011 as compared to the prior year period primarily due to the deconsolidation of our Brazilian business, whose margins had declined in recent periods. The 2011 operating margins were also impacted by increased investments in new product development and increased sales force, particularly in Brazil prior to the deconsolidation of the business. Operating margin decreased for 2010, as compared to 2009, primarily due to a shift in product mix and increased operating expenses. Operating expenses increased 8% for 2010, in local currency, when compared to 2009, due to increased revenue and expense investments in new product development and increased sales force, particularly in Brazil.

TALX Workforce Solutions

	Twelve Months Ended December 31			Change					
	2011	2010	2009	2011 vs. 2010		2010 vs. 2009			
TALX Workforce Solutions				\$	%	\$	%		
	(Dollars in millions)								
Operating Revenue:									
Verification Services	\$192.5	\$183.4	\$134.6	\$9.1	5 %	\$48.8	36 %		
Employer Services	211.8	212.2	211.8	(0.4)	0 %	0.4	0 %		
Total operating revenue	\$404.3	\$395.6	\$346.4	\$8.7	2 %	\$49.2	14 %		
% of consolidated revenue	21 %	21 %	20 %						
Total operating income	\$90.7	\$92.1	\$75.4	\$(1.4)	-2 %	\$16.7	22 %		
Operating margin	22.4 %	23.3 %	21.8 %		-0.9 pts		1.5 pts		

Verification Services. Revenue from Verification Services increased in 2011, compared to the prior year period, as high single digit percentage revenue growth in verifications provided to non-mortgage customers and the benefit of our third quarter 2011 acquisition of DataVision Resources were partially offset by high single digit declines in verification revenue from mortgage customers due to reduced mortgage activity. Revenue increased in 2010 compared to 2009 due to mid-double digit growth from traditional employment based verification, with strong demand across each of the mortgage, pre-employment screening, social services and collections sectors; and due to the impact of our acquisition of Rapid Reporting Verification Company in the fourth quarter of 2009.

Employer Services. Revenue for 2011 as compared to 2010 slightly decreased. Declines in our talent recruitment and management services business due to decreased government hiring activity at the U.S. Transportation Security Administration and reduced licensing revenue were offset by revenue growth in our complementary services business. The slight increase in revenue during 2010, as compared to the prior year, resulted from growth in our complementary services and as well as growth in our talent recruitment and management services business due to increased government hiring activity at the U.S. Transportation and Security Administration and other large government customers. This was partially offset by expected declines in our Tax Management Services business driven primarily by decreases in unemployment compensation claims activity.

TALX Workforce Solutions Operating Margin. Operating margin for 2011, when compared to the prior year period, decreased due to revenue and associated margin declines in government-based tax transcript verification services and talent recruitment and management services as a result of a slowdown in mortgage-related activity and decreased license revenue, respectively. There was also increased acquisition-related amortization associated with our two acquisitions in the latter half of 2011. Operating margin increased in 2010, as compared to 2009, due to continued revenue growth, while operating expenses grew at a slower rate due to the leveraging of certain fixed operational and overhead costs and certain operating process efficiencies for both periods.

North America Personal Solutions

	Twelve Months Ended December			Change					
	2011	2010	2009	2011 vs. 2010	2010 vs. 2009				
North America Personal Solutions				\$	%	\$	%		
	(Dollars in millions)								
Total operating revenue	\$180.7	\$157.6	\$149.0	\$23.1	15 %	\$ 8.6	6 %		
% of consolidated revenue	9 %	9 %	9 %						
Total operating income	\$54.1	\$44.6	\$34.3	\$9.5	21 %	\$ 10.3	30 %		
Operating margin	29.9 %	28.3 %	23.0 %		1.6pts		5.3 pts		

Revenue increased 15% in 2011 as compared to the prior year primarily due to increased direct to consumer, Equifax-branded subscription service revenue. Equifax-branded subscription revenue was up 17% from the prior year, driven by both higher subscription sales and higher average revenue per subscriber due to new product offerings and better market segmentation. Revenue from wholesalers, which benefited from more favorable pricing, and from Canada also contributed to growth, while data breach services and transaction-based services each declined modestly. The operating margin increase in 2011, as compared to 2010, was primarily due to the increased revenue along with a shift in product mix to higher margin products.

The increase in revenue for 2010, as compared to 2009, was primarily due to increased direct to customer, Equifax-branded subscription service revenue, which was up 11% from 2009, driven by higher average revenue per subscriber due to new product offerings and better market segmentation. The increase in subscription revenue was partially offset by lower transaction sales and lower corporate breach revenues. The operating margin increase was primarily due to the revenue growth and operating efficiencies.

North America Commercial Solutions

	Twelve Months Ended December 31,			Change			
	2011	2010	2009	2011 vs. 2010	2010 vs. 2009		
North America Commercial Solutions	\$	\$	\$	%	%		
	(Dollars in millions)						
Total operating revenue	\$89.3	\$80.5	\$69.8	\$8.8	11 %	\$10.7	15 %
% of consolidated revenue	5 %	4 %	4 %				
Total operating income	\$23.6	\$19.5	\$15.1	\$4.1	21 %	\$4.4	29 %
Operating margin	26.5 %	24.2 %	21.7 %		2.3 pts		2.5 pts

2011 revenue increased \$8.8 million, or 11%, as compared to 2010. In local currency, revenue increased 10% compared 2010 primarily due to increases in U.S. risk and marketing service revenue and revenue from our data management products. The favorable impact of changes in the U.S.—Canadian foreign exchange rate impacted revenue by \$1.0 million, or 1%, as compared to the prior year. Operating margin also increased for 2011, as compared 2010, due to strong revenue growth and the margin leverage which results from a partially fixed cost business.

Revenue increased for 2010, as compared to 2009, \$10.7 million, or 15%. The favorable impact of changes in the U.S. – Canadian foreign exchange rate increased revenue by \$2.3 million, or 3%. In local currency, revenue increased 12% in 2010 compared to the prior year. The local currency increase was primarily due to increases in U.S. risk and marketing service revenue and revenue from our data management products. Online transaction volume for U.S. commercial credit information products for 2010 increased when compared to the prior year. Operating margin increased for 2010, as compared to 2009, as the rapid rate of revenue growth exceeded growth in operating expenses.

General Corporate Expense

Twelve Months Ended December 31,				Change			
				2011 vs. 2010		2010 vs. 2009	
General Corporate Expense	2011	2010	2009	\$	%	\$	%
(Dollars in millions)							
General corporate expense	\$116.9	\$115.4	\$121.3	\$1.5	1%	\$ (5.9)	-5 %

Our general corporate expenses are costs that are incurred at the corporate level and include those expenses impacted by corporate direction, such as shared services, administrative, legal, equity compensation costs and restructuring expenses. General corporate expenses increased by \$1.5 million in 2011, compared to 2010, primarily due to higher salary and incentive costs partially offset by lower technology costs and professional fees.

General corporate expenses decreased for 2010, as compared to 2009, primarily as a result of \$24.8 million of restructuring charges recorded in 2009 that did not recur in 2010. This was partially offset by increased salary, benefit and incentive costs, upgrades in shared corporate technology, and acquisition-related expenses.

LIQUIDITY AND FINANCIAL CONDITION

Management assesses liquidity in terms of our ability to generate cash to fund operating, investing and financing activities. We continue to generate substantial cash from operating activities and remain in a strong financial position, with resources available for reinvestment in existing businesses, strategic acquisitions and managing our capital structure to meet short- and long-term objectives.

Sources and Uses of Cash

Funds generated by operating activities and our credit facilities continue to be our most significant sources of liquidity. We expect that funds generated from results of operations will be sufficient to finance our anticipated working capital and other cash requirements (such as capital expenditures, interest payments, potential pension funding contributions and dividend payments) for the foreseeable future. In the event that credit market conditions were to deteriorate, we would rely more heavily on borrowings from the Senior Credit Facility as described below. During the first quarter, we extended the maturity date of our Senior Credit Facility from July 2011 to February 2015 and reduced the borrowing limits from \$850.0 million to \$500.0 million. At December 31, 2011, \$468.6 million was available to borrow under our Senior Credit Facility. Our Senior Credit Facility does not include a provision under which lenders could refuse to allow us to borrow under this facility in the event of a material adverse change in our financial condition, as long as we are in compliance with the covenants contained in the lending agreement.

Information about our cash flows, by category, is presented in the Consolidated Statements of Cash Flows. The following table summarizes our cash flows for the twelve months ended December 31, 2011, 2010 and 2009:

	Twelve Months Ended December 31				Change	
Net cash provided by (used in):	2011	2010	2009	2011 vs. 2010	2010 vs. 2009	
	(Dollars in millions)					
Operating activities	\$408.7	\$352.6	\$418.4	\$56.1	\$ (65.8))
Investing activities	\$(204.1)	\$1.0	\$(270.1)	\$(205.1)	\$ 271.1	
Financing activities	\$(195.9)	\$(335.3)	\$(108.3)	\$ 139.4	\$ (227.0))

Operating Activities

Cash provided by operating activities for 2011 increased by \$56.1 million over the prior year. Cash provided from net income, adjusted for the impact of divestitures, increased by \$20.3 million. The remaining increase in cash from

operations was primarily driven by changes in net working capital and other balance sheet changes, most notably from a \$10.0 million decrease in pension contributions in 2011 and other lesser changes in liabilities, partially offset by an increase in accounts receivable due to revenue growth.

The decrease in operating cash flow for 2010 was primarily driven by \$35.0 million of additional pension contributions; a \$16.4 million net impact on use of funds as accounts receivable, which had been reduced in 2009, grew in 2010 as revenue grew; and \$42.0 million in taxes paid on the sale of DMS and the APPRO product line. These, and other lesser changes in assets and liabilities, more than offset increased net income and the contribution from higher depreciation and amortization.

Fund Transfer Limitations. The ability of certain of our subsidiaries and associated companies to transfer funds to us is limited, in some cases, by certain restrictions imposed by foreign governments; these restrictions do not, individually or in the aggregate, materially limit our ability to service our indebtedness, meet our current obligations or pay dividends. We currently hold \$106.0 million of cash in our foreign subsidiaries.

Investing Activities

	Twelve Months Ended December 31,				
Net cash used in:	2011	2010	2009	2011 vs. 2010	2010 vs. 2009
	(Dollars in millions)				

Capital expenditures	\$75.0	\$99.8	\$70.7	\$(24.8)	\$ 29.1
----------------------	--------	--------	--------	----------	---------

Our capital expenditures are used for developing, enhancing and deploying new and existing software in support of our expanding product set, replacing or adding equipment, updating systems for regulatory compliance, the licensing of software applications and investing in system reliability, security and disaster recovery enhancements.

Capital expenditures in 2011 were lower than 2010 primarily due to the purchase of our headquarters building in Atlanta, Georgia during the first quarter of 2010 for cash consideration of \$29.0 million, partially offset by an increase in investments in new products and technology infrastructure in 2011.

Capital expenditures in 2010 were higher than 2009 due to the purchase of our headquarters building in Atlanta, as noted above. On February 27, 2009, we notified the lessor of our headquarters building that we intended to exercise our purchase option in accordance with the lease terms. We purchased the building for \$29.0 million on February 26, 2010. The notice of our intent to exercise our purchase option caused us to account for this lease obligation as a capital lease. We recorded the building and the related obligation on our Consolidated Balance Sheets at December 31, 2009.

Acquisitions, Divestitures and Investments

Proceeds received from divestitures	\$2.5	\$181.7	\$-	\$(179.2))	\$	181.7	
Investment in unconsolidated affiliates, net	\$(4.2))	\$1.7	\$(3.4))	\$(5.9))	\$ 5.1

2011 Acquisitions and Investments. On August 1, 2011, to further enhance our market position, we acquired DataVision Resources, which provides data and business solutions to the mortgage, insurance and financial services, for \$50.0 million. The results of this acquisition have been included in our TALX Workforce Solutions segment.

To further broaden our product offerings, during the twelve months ended December 31, 2011, we completed a number of smaller acquisitions of information services businesses in the European and Latin American regions of our International segment as well as our U.S. Consumer Information Solutions and TALX Workforce Solutions segments. The results of these acquisitions are not material.

During the second quarter of 2010, we sold our APPRO product line, generating cash proceeds of approximately \$67 million. Approximately \$5 million of the purchase price was paid by the acquirer into an escrow account that will release to us, upon the satisfaction of certain conditions, over the two year period following the sale. We received \$2.5 million from the escrow account during the second quarter of 2011. During 2011, we also invested \$4.2 million in our joint ventures in India and Russia.

2010 Acquisitions, Divestitures and Investments. On October 1, 2010, we acquired Anakam, Inc., a provider of large-scale, software-based, multi-factor identity authentication solutions for \$64.3 million. The results of this acquisition are included in our U.S. Consumer Information Solutions segment.

To further enhance our market share, during the twelve months ended December 31, 2010, we completed four acquisitions totaling \$12.3 million, net of cash acquired. These transactions were in our International segment and the results of these acquisitions are not material.

During 2010, we resolved a contingent earn-out associated with a 2008 acquisition included in our TALX segment. The earn-out of \$6 million was measured on the completion of 2009 revenue targets and was accrued at

December 31, 2009.

On April 23, 2010, we sold our Equifax Enabling Technologies LLC legal entity, consisting of our APPRO loan origination software business (“APPRO”) for approximately \$72 million. On July 1, 2010, we sold the assets of our Direct Marketing Services division (“DMS”) for approximately \$117 million. Both of these were previously reported in our U.S. Consumer Information Solutions segment. We have presented the APPRO and DMS operations as discontinued operations for all periods presented. The discontinued operations are further described in Note 3 of the Notes to the Consolidated Financial Statements in this report.

2009 Acquisitions, Divestitures and Investments. On December 23, 2009, as a part of our long-term growth strategy of expanding into emerging markets, we formed a joint venture, Equifax Credit Information Services Private Limited, or ECIS, to provide a broad range of credit data and information solutions in India. We paid cash consideration of \$5.2 million for our 49 percent equity interest in ECIS.

On November 2, 2009, to further enhance our income and identity verification service offerings, we acquired Rapid Reporting Verification Company, a provider of IRS tax transcript information and social security number authentication services, for \$72.5 million. The results of this acquisition have been included in our TALX Workforce Solutions operating segment subsequent to the acquisition.

On October 27, 2009, we acquired IXI Corporation, a provider of consumer wealth and asset data, for \$124.0 million. This acquisition enables us to offer more differentiated and in-depth consumer income, wealth and other data to help our clients improve their marketing, collections, portfolio management and customer management efforts across different product segments. The results of this acquisition have been included in our USCIS operating segment subsequent to the acquisition date.

We financed these purchases through borrowings under our Senior Credit Facility, which were subsequently refinanced through the issuance in November 2009 of our 4.45%, five-year unsecured Senior Notes. The 4.45% Senior Notes are further described in Note 6 of the Notes to the Consolidated Financial Statements in this report.

On August 12, 2009, in order to enhance our Mortgage Solutions business market share, we acquired certain assets and specified liabilities of a small mortgage credit reporting reseller for cash consideration of \$3.8 million. The results of this acquisition have been included in our USCIS segment subsequent to the acquisition date.

For additional information about our acquisitions, see Note 4 of the Notes to Consolidated Financial Statements in this report.

Financing Activities

Net cash provided by (used in):	Twelve Months Ended December 31, 2011 vs. 2010 vs. 2009				
	(Dollars in millions)				
Net short-term borrowings (repayments)	\$24.4	\$(134.0)	\$101.8	\$158.4	\$ (235.8)
Net borrowings (repayments) under long-term revolving credit facilities	\$-	\$(5.0)	\$(415.2)	\$5.0	\$ 410.2
Payments on long-term debt	\$(16.7)	\$(20.8)	\$(31.8)	\$4.1	\$ 11.0
Proceeds from issuance of long-term debt	\$-	\$-	\$274.4	\$-	\$ (274.4)

Credit Facility Availability. Our principal unsecured revolving credit facility with a group of banks, which we refer to as the Senior Credit Facility, permits us to borrow up to \$500.0 million through February 2015. The Senior Credit Facility may be used for general corporate purposes. Availability of the Senior Credit Facility for borrowings is reduced by the outstanding face amount of any letters of credit issued under the facility and, pursuant to our existing Board of Directors authorization, by the outstanding principal amount of our commercial paper (CP) notes.

Our \$500.0 million CP program has been established to allow for borrowing through the private placement of CP with maturities ranging from overnight to 397 days. We may use the proceeds of CP for general corporate purposes. The CP program is supported by our Senior Credit Facility and, pursuant to our existing Board of Directors authorization, the total amount of CP which may be issued is reduced by the amount of any outstanding borrowings under our Senior Credit Facility.

We had a 364-day revolving credit agreement with a Canadian bank (our Canadian Credit Facility) which permitted us to borrow up to C\$10.0 million (denominated in Canadian dollars). The Canadian Credit Facility was scheduled to terminate in June 2011. We cancelled this agreement at the end of the first quarter 2011 and there were no outstanding borrowings under this agreement at the time of cancellation.

At December 31, 2011, there were no borrowings outstanding under our Senior Credit Facility and \$30.0 million outstanding under our CP program. At December 31, 2011, a total of \$468.6 million was available under our Senior Credit Facility.

At December 31, 2011, approximately 68% of our debt was fixed rate and 32% was effectively variable rate. Our variable-rate debt, consisting of our five-year senior notes due 2014 (against which we have executed interest rate swaps to convert interest expense from fixed rates to floating rates), generally bears interest based on a specified margin plus a base rate (LIBOR) or on CP rates for investment grade issuers. The interest rates reset periodically, depending on the terms of the respective financing arrangements. At December 31, 2011, interest rates on our variable-rate debt ranged from 0.48% to 2.5%.

Borrowing and Repayment Activity. Net short-term borrowings (repayments) primarily represent activity under our CP program, as well as activity under our Canadian short-term revolving credit agreement. Net (repayments) borrowings under long-term revolving credit facilities relates to activity on our Senior Credit Facility. We primarily borrow under our CP program, when available.

The increase in net short-term borrowings (repayments) primarily reflects the outstanding borrowings of CP notes at December 31, 2011 as compared to a net repayment of \$134.0 million of CP notes during 2010 as we decreased our use of CP to fund our capital needs. The change in net short-term (repayments) borrowings in 2010 primarily reflects the net repayment of \$134.0 million of CP notes since December 31, 2009.

The decrease in net repayments under long-term revolving credit facilities represents the 2010 repayment of borrowings outstanding at December 31, 2009, under our Senior Credit Facility. The change in net repayments for 2010 under long-term revolving credit facilities represents the 2009 repayment of borrowings outstanding at December 31, 2008, under our Senior Credit Facility as we decreased our use of CP to fund our capital needs in 2009 and 2010. The 2009 repayment of these borrowing drove the increase in net (repayments) borrowings for 2009. In 2009, we purchased \$7.5 million principal amount of our outstanding ten-year senior notes due 2017 for \$6.3 million and \$25.0 million principal amount of our outstanding debentures due 2028 for \$25.1 million.

On November 4, 2009, we issued \$275.0 million principal amount of 4.45%, five-year senior notes in an underwritten public offering. We used the net proceeds from the sale of the senior notes to repay amounts outstanding under our CP program, a portion of which was used to finance our fourth quarter 2009 acquisitions. In conjunction with our 2009 sale of five-year senior notes, we entered into five-year interest rate swaps, designated as fair value hedges, which convert the debt's fixed interest rate to a variable rate.

Debt Covenants. Our outstanding indentures and comparable instruments contain customary covenants including for example limits on secured debt and sale/leaseback transactions. In addition, our Senior Credit Facility requires us to maintain a maximum leverage ratio of not more than 3.5 to 1.0, and limit the amount of subsidiary debt. Our leverage ratio was 1.61 at December 31, 2011. None of these covenants are considered restrictive to our operations and, as of December 31, 2011, we were in compliance with all of our debt covenants.

We do not have any credit rating triggers that would accelerate the maturity of a material amount of our outstanding debt; however, our senior notes, discussed above, contain change in control provisions. If we experience a change of control or publicly announce our intention to effect a change of control and the rating on the senior notes is lowered by Standard & Poor's, or S&P, and Moody's Investors Service, or Moody's, below an investment grade rating within 60 days of such change of control or notice thereof, then we will be required to offer to repurchase the senior notes at a price equal to 101% of the aggregate principal amount of the senior notes plus accrued and unpaid interest.

Credit Ratings. Credit ratings reflect an independent agency's judgment on the likelihood that a borrower will repay a debt obligation at maturity. The ratings reflect many considerations, such as the nature of the borrower's industry and its competitive position, the size of the company, its liquidity and access to capital and the sensitivity of a company's cash flows to changes in the economy. The two largest rating agencies, S&P and Moody's, use alphanumeric codes to designate their ratings. The highest quality rating for long-term credit obligations is AAA and Aaa for S&P and Moody's, respectively. A security rating is not a recommendation to buy, sell or hold securities and may be subject to

revision or withdrawal at any time by the assigning rating agency.

Long-term ratings of BBB- and Baa3 or better by S&P and Moody's, respectively, reflect ratings on debt obligations that fall within a band of credit quality considered to be "investment grade". At December 31, 2011, the long-term ratings for our obligations were BBB+ and Baa1, which are consistent with the ratings and outlooks which existed at December 31, 2010. A downgrade in our credit rating would increase the cost of borrowings under our CP program and credit facilities, and could limit, or in the case of a significant downgrade, preclude our ability to issue CP. If our credit ratings were to decline to lower levels, we could experience increases in the interest cost for any new debt. In addition, the market's demand for, and thus our ability to readily issue, new debt could become further influenced by the economic and credit market environment.

For additional information about our debt, including the terms of our financing arrangements, basis for variable interest rates and debt covenants, see Note 6 of the Notes to Consolidated Financial Statements in this report.

Equity Transactions

Net cash provided by (used in):	Twelve Months Ended December 31, 2011 vs. 2010 vs. 2009				
	2011	2010	2009	2011 vs. 2010	2011 vs. 2009
	(Dollars in millions)				
Treasury stock purchases	\$(142.3)	\$(167.5)	\$(23.8)	\$25.2	\$ (143.7)
Dividends paid to Equifax shareholders	\$(78.1)	\$(35.2)	\$(20.2)	\$(42.9)	\$ (15.0)
Dividends paid to noncontrolling interests	\$(5.6)	\$(5.1)	\$(4.0)	\$(0.5)	\$ (1.1)
Proceeds from exercise of stock options	\$23.7	\$29.3	\$10.2	\$(5.6)	\$ 19.1
Excess tax benefits from stock-based compensation plans	\$1.2	\$3.5	\$1.3	\$(2.3)	\$ 2.2

Sources and uses of cash related to equity during the twelve months ended December 31, 2011, 2010 and 2009 were as follows:

Under share repurchase programs authorized by our Board of Directors, we purchased 4.2 million, 5.2 million, and 0.9 million common shares on the open market during the twelve months ended December 31, 2011, 2010 and 2009, respectively, for \$142.3 million, \$167.5 million and \$23.8 million, respectively, at an average price per common share of \$34.19, \$32.28 and \$26.41, respectively. At December 31, 2011, the Company had \$112.1 million remaining for stock repurchases under the existing Board authorization.

During the twelve months ended December 31, 2011, 2010 and 2009, we paid cash dividends to Equifax shareholders of \$78.1 million, \$35.2 million and \$20.2 million, respectively, at \$0.64 per share for 2011, \$0.28 per share for 2010 and \$0.16 per share for 2008.

Contractual Obligations and Commercial Commitments

The following table summarizes our significant contractual obligations and commitments as of December 31, 2011. The table excludes commitments that are contingent based on events or factors uncertain at this time. Some of the excluded commitments are discussed below the footnotes to the table.

Payments due by

Edgar Filing: EQUIFAX INC - Form 10-K

	Total (In millions)	Less than 1 year	1 to 3 years	3 to 5 years	Thereafter
Debt (including capitalized lease obligation) ⁽¹⁾	\$999.2	\$ 46.6	\$ 305.1	\$ -	\$ 647.5
Operating leases ⁽²⁾	92.2	18.6	24.8	13.9	34.9
Data processing, outsourcing agreements and other purchase obligations ⁽³⁾	153.3	77.6	69.6	3.8	2.3
Other long-term liabilities ^{(4) (6)}	102.4	6.0	12.8	9.6	74.0
Interest payments ⁽⁵⁾	685.7	52.8	102.3	86.6	444.0
	\$2,032.8	\$ 201.6	\$ 514.6	\$ 113.9	\$ 1,202.7

The amounts are gross of unamortized discounts totaling \$1.8 million and fair value adjustments of \$15.8 million ⁽¹⁾at December 31, 2011. Total debt on our Consolidated Balance Sheets is net of the unamortized discounts and fair value adjustments.

- (2) Our operating lease obligations principally involve office space and equipment, which include the ground lease associated with our headquarters building that expires in 2048.

These agreements primarily represent our minimum contractual obligations for services that we outsource ⁽³⁾associated with our computer data processing operations and related functions, and certain administrative functions. These agreements expire between 2011 and 2018.

These long-term liabilities primarily relate to obligations associated with certain pension, postretirement and other compensation-related plans, some of which are discounted in accordance with U.S. generally accepted accounting (4) principles, or GAAP. We made certain assumptions about the timing of such future payments. In the table above, we have not included amounts related to future pension plan obligations, as such required funding amounts beyond 2011 have not been deemed necessary due to our current expectations regarding future plan asset performance.

For future interest payments on variable-rate debt, which are generally based on a specified margin plus a base rate (LIBOR) or on CP rates for investment grade issuers, we used the variable rate in effect at December 31, 2011 to calculate these payments. Our variable rate debt at December 31, 2011, consisted of CP, borrowings under our credit facilities and our five-year senior notes due 2014 (against which we have executed interest rate swaps to (5) convert interest expense from fixed rates to floating rates). Future interest payments related to our Senior Credit Facility and our CP program are based on the borrowings outstanding at December 31, 2011 through their respective maturity dates, assuming such borrowings are outstanding until that time. The variable portion of the rate at December 31, 2011 ranged from 0.48% to 2.5% for all of our variable-rate debt. Future interest payments may be different depending on future borrowing activity and interest rates.

(6) This table excludes \$25.1 million of unrecognized tax benefits, including interest and penalties, as we cannot make a reasonably reliable estimate of the period of cash settlement with the respective taxing authorities.

A potential significant future use of cash would be the payment to Computer Sciences Corporation, or CSC, if it were to exercise its option to sell its credit reporting business to us at any time prior to August 2013. The option exercise price would be determined by agreement or by an appraisal process and would be due in cash within 180 days after the exercise of the option. We estimate that if the option had been exercised at December 31, 2011, the price would have been in the range of approximately \$650 million to \$750 million. This estimate is based solely on our internal analysis of the value of the business (based on limited information available to us), current market conditions and other factors, all of which are subject to constant change. Therefore, the actual option exercise price could be materially higher or lower than our estimate. Our agreement with CSC, which expires on July 31, 2018, also provides us with an option to purchase its credit reporting business if it does not elect to renew the agreement or if there is a change in control of CSC while the agreement is in effect. If CSC were to exercise its option, or if we were able to and decided to exercise our option, then we would have to obtain additional sources of funding. We believe that this funding would be available from sources such as additional bank lines of credit and the capital markets for debt and/or equity financing. However, the availability and terms of any such capital financing would be subject to a number of factors, including credit market conditions, the state of the equity markets, general economic conditions, our credit ratings and our financial performance and condition.

Off-Balance Sheet Transactions

We do not engage in off-balance sheet financing activities.

Pursuant to the terms of certain industrial revenue bonds, we transferred title to certain of our fixed assets with costs of \$65.3 million and \$47.9 million, as of December 31, 2011 and 2010, respectively, to a local governmental authority in the U.S. to receive a property tax abatement related to economic development. The title to these assets will revert back to us upon retirement or cancellation of the applicable bonds. These fixed assets are still recognized on the Company's Consolidated Balance Sheets as all risks and rewards remain with the Company.

Letters of Credit and Guarantees

We will from time to time issue standby letters of credit, performance bonds or other guarantees in the normal course of business. The aggregate notional amount of all performance bonds and standby letters of credit was not material at December 31, 2011, and all have a remaining maturity of one year or less. Guarantees are issued from time to time to support the needs of our operating units. The maximum potential future payments we could be required to make under the guarantees is not material at December 31, 2011.

Benefit Plans

Prior to December 31, 2009, we had one non-contributory qualified retirement plan covering most U.S. salaried employees (the Equifax Inc. Pension Plan, or EIPP), a qualified retirement plan that covered U.S. salaried employees (the U.S. Retirement Income Plan, or USRIP) who terminated or retired before January 1, 2005 and a defined benefit plan for most salaried and hourly employees in Canada (the Canadian Retirement Income Plan, or CRIP). On December 31, 2009, the plan assets and obligations of the EIPP were merged with the USRIP. The USRIP remained as the sole U.S. qualified retirement plan.

At December 31, 2011, the USRIP met or exceeded ERISA's minimum funding requirements. During the twelve months ended December 31, 2011 and 2010, we made contributions of \$40.0 million and \$50.0 million, respectively, to the USRIP. We also contributed \$2.6 and \$1.6 million to the CRIP during the twelve months ended December 31, 2011 and 2010, respectively. In the future, we will make minimum funding contributions as required and may make discretionary contributions, depending on certain circumstances, including market conditions and liquidity needs. We believe additional funding contributions, if any, would not prevent us from continuing to meet our liquidity needs, which are primarily funded from cash flows generated by operating activities, available cash and cash equivalents, and

our credit facilities.

For our non-U.S., tax-qualified retirement plans, we fund an amount sufficient to meet minimum funding requirements but no more than allowed as a tax deduction pursuant to applicable tax regulations. For the non-qualified supplementary retirement plans, we fund the benefits as they are paid to retired participants, but accrue the associated expense and liabilities in accordance with GAAP.

For additional information about our benefit plans, see Note 11 of the Notes to Consolidated Financial Statements in this report.

Seasonality

We experience seasonality in certain of our revenue streams. Revenue generated from the Employer Services business unit within the TALX Workforce Solutions operating segment is generally higher in the first quarter due primarily to the provision of Form W-2 preparation services which occur in the first quarter each year. Revenue from our OCIS and Mortgage Solutions business units tends to increase in periods of the year in which our customers have higher volumes of credit granting decisions, most commonly the second and third calendar quarters. Revenues in our North America Commercial business and the Consumer Financial Marketing Services business line within USCIS are typically highest in the fourth quarter each year due to the timing of certain significant annual renewals of project-based agreements. On a consolidated basis, combining all of these businesses, and assuming normal economic conditions, first quarter revenue is normally the lowest quarterly revenue of the year, and the fourth quarter is the highest.

Effects of Inflation and Changes in Foreign Currency Exchange Rates

Equifax's operating results are not materially affected by inflation, although inflation may result in increases in the Company's expenses, which may not be readily recoverable in the price of services offered. To the extent inflation results in rising interest rates and has other adverse effects upon the securities markets and upon the value of financial instruments, it may adversely affect the Company's financial position and profitability.

A significant portion of the Company's business is conducted in currencies other than the U.S. dollar, and changes in foreign exchange rates relative to the U.S. dollar can therefore affect the value of non-U.S. dollar net assets, revenues and expenses. Potential exposures as a result of these fluctuations in currencies are closely monitored. We generally do not mitigate the risks associated with fluctuating exchange rates, although we may from time to time through forward contracts or other derivative instruments hedge a portion of our translational foreign currency exposure or exchange rate risks associated with material transactions which are denominated in a foreign currency.

RECENT ACCOUNTING PRONOUNCEMENTS

For information about new accounting pronouncements and the potential impact on our Consolidated Financial Statements, see Note 1 of the Notes to Consolidated Financial Statements in this report.

APPLICATION OF CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The Company's Consolidated Financial Statements are prepared in conformity with U.S. generally accepted accounting principles, or GAAP. This requires our management to make estimates and assumptions that affect the reported amounts of assets and liabilities, revenues and expenses and related disclosures of contingent assets and liabilities in our Consolidated Financial Statements and the Notes to Consolidated Financial Statements. The following accounting policies involve critical accounting estimates because they are particularly dependent on estimates and assumptions made by management about matters that are uncertain at the time the accounting estimates are made. In addition, while we have used our best estimates based on facts and circumstances available to us at the time, different estimates reasonably could have been used in the current period, or changes in the accounting estimates that we used are reasonably likely to occur from period to period, either of which may have a material impact on the presentation of our Consolidated Balance Sheets and Statements of Income. We also have other significant accounting policies which involve the use of estimates, judgments and assumptions that are relevant to understanding our results. For additional information about these policies, see Note 1 of the Notes to Consolidated Financial Statements in this report. Although we believe that our estimates, assumptions and judgments are reasonable, they are based upon information available at the time. Actual results may differ significantly from these estimates under different assumptions, judgments or conditions.

Revenue Recognition

Revenue is recognized when persuasive evidence of an arrangement exists, collectibility of arrangement consideration is reasonably assured, the arrangement fees are fixed or determinable and delivery of the product or service has been completed. A significant portion of our revenue is derived from the provision of information services to our customers on a transaction basis, in which case revenue is recognized, assuming all other revenue recognition criteria are met, when the services are provided. A smaller portion of our revenues relate to subscription-based contracts under which a customer pays a preset fee for a predetermined or unlimited number of transactions or services provided during the subscription period, generally one year. Revenue related to subscription-based contracts having a preset number of transactions is recognized as the services are provided, using an effective transaction rate as the actual transactions are completed. Any remaining revenue related to unfulfilled units is not recognized until the end of the related contract's subscription period. Revenue related to subscription-based contracts having an unlimited volume is recognized ratably during the contract term. Revenue is recorded net of sales taxes.

If at the outset of an arrangement, we determine that collectibility is not reasonably assured, revenue is deferred until the earlier of when collectibility becomes probable or the receipt of payment. If there is uncertainty as to the customer's acceptance of our deliverables, revenue is not recognized until the earlier of receipt of customer acceptance or expiration of the acceptance period. If at the outset of an arrangement, we determine that the arrangement fee is not fixed or determinable, revenue is deferred until the arrangement fee becomes estimable, assuming all other revenue recognition criteria have been met.

The determination of certain of our tax management services revenue requires the use of estimates, principally related to transaction volumes in instances where these volumes are reported to us by our clients on a monthly basis in arrears. In these instances, we estimate transaction volumes based on average actual volumes reported in the past. Differences between our estimates and actual final volumes reported are recorded in the period in which actual volumes are reported. We have not experienced significant variances between our estimates and actual reported volumes in the past. We monitor actual volumes to ensure that we will continue to make reasonable estimates in the future. If we determine that we are unable to make reasonable future estimates, revenue may be deferred until actual customer data is obtained. Also within our TALX Workforce Solutions operating segment, the fees for certain of our tax credits and incentives revenue are based on a percentage of the credit delivered to our clients. Revenue for these arrangements is recognized based on the achievement of milestones, upon calculation of the credit, or when the credit is utilized by our client, depending on the provisions of the client contract.

We have certain offerings that are sold as multiple element arrangements. The multiple elements may include consumer or commercial information, file updates for certain solutions, services provided by our decisioning technologies personnel, training services, statistical models and other services. To account for each of these elements separately, the delivered elements must have stand-alone value to our customer, and there must exist objective and reliable evidence of the fair value for any undelivered elements. If we are unable to unbundle the arrangement into separate units of accounting, we apply one of the accounting policies described above. This may lead to the arrangement consideration being recognized as the final contract element is delivered to our customer or ratably over the contract.

Many of our multiple element arrangements involve the delivery of services generated by a combination of services provided by one or more of our operating segments. No individual information service impacts the value or usage of other information services included in an arrangement and each service can be sold alone or, in most cases, purchased from another vendor without affecting the quality of use or value to the customer of the other information services included in the arrangement. Some of our products require the development of interfaces or platforms by our decisioning technologies personnel that allow our customers to interact with our proprietary information databases. These development services do not meet the requirement for having stand-alone value, thus any related development fees are deferred when billed and are recognized over the expected period that the customer will benefit from the related decisioning technologies service. Revenue from the provision of statistical models is recognized as the service is provided and accepted, assuming all other revenue recognition criteria are met. The direct costs of set up of a customer are capitalized and amortized as a cost of service during the term of the related customer contract.

We have some multiple element arrangements that include software. We recognize the elements for which we have established vendor specific objective evidence at fair value upon delivery, in accordance with the applicable guidance.

We record revenue on a net basis for those sales in which we have in substance acted as an agent or broker in the transaction.

Deferred revenue consists of amounts billed in excess of revenue recognized on sales relating generally to the deferral of subscription fees and arrangement consideration from elements not meeting the criteria for having stand-alone value discussed above. Deferred revenues are subsequently recognized as revenue in accordance with our revenue recognition policies.

Judgments and uncertainties — Each element of a multiple element arrangement must be considered separately to ensure that appropriate accounting is performed for these deliverables. These considerations include assessing the price at which the element is sold compared to its relative fair value; concluding when the element will be delivered; evaluating collectability; and determining whether any contingencies exist in the related customer contract that impact the prices paid to us for the services.

In addition, the determination of certain of our marketing information services and tax management services revenue requires the use of estimates, principally related to transaction volumes in instances where these volumes are reported to us by our clients on a monthly basis in arrears. In these instances, we estimate transaction volumes based on average actual volumes reported in the past. Differences between our estimates and actual final volumes reported are recorded in the period in which actual volumes are reported.

Effects if actual results differ from assumptions — We have not experienced significant variances between our estimates of marketing information services and tax management services revenues reported to us by our customers and actual reported volumes in the past. We monitor actual volumes to ensure that we will continue to make reasonable estimates in the future. If we determine that we are unable to make reasonable future estimates, revenue may be deferred until actual customer data is obtained. However, if actual results are not consistent with our estimates and assumptions, or if our customer arrangements become more complex or include more bundled offerings in the future, we may be required to recognize revenue differently in the future to account for these changes. We do not believe there is a reasonable likelihood that there will be a material change in the future estimates or assumptions we use to recognize revenue.

Goodwill and Indefinite-Lived Intangible Assets

We review goodwill and indefinite lived intangible assets for impairment annually (as of September 30) and whenever events or changes in circumstances indicate the carrying value of an asset may not be recoverable. These events or circumstances could include a significant change in the business climate, legal factors, operating performance or trends, competition, or sale or disposition of a significant portion of a reporting unit. We have ten reporting units comprised of Consumer Information Solutions (which includes part of Online Consumer Information Solutions, Mortgage Solutions and Consumer Financial Marketing Services), Identity Management (part of Online Consumer Information Solutions), Europe, Latin America, Canada Consumer, North America Personal Solutions, North America Commercial Solutions, Verification Services, Tax Management Services (part of Employer Services) and Talent Management Services (part of Employer Services).

The goodwill balance at December 31, 2011, for our ten reporting units was as follows:

	December 31, 2011 (In millions)
Consumer Information Solutions	\$ 583.9
ID Management	54.5
Europe	114.3
Latin America	204.0
Canada Consumer	30.2
North America Personal Solutions	1.8
North America Commercial Solutions	37.4
Verification Services	740.1
Tax Management Services	168.9
Talent Management Services	26.1
Total goodwill	\$ 1,961.2

As permitted by applicable accounting rules, the fair values of Consumer Information Solutions, Latin America, Europe, Canada Consumer, North America Personal Solutions, and North America Commercial Solutions were not calculated at September 30, 2011 as (a) the assets and liabilities that make up the reporting unit have not changed significantly since their most recent fair value determination, (b) the most recent fair value determination resulted in an amount that exceeded the carrying amount of the reporting unit by a substantial margin and (c) based on an analysis of events that have occurred and circumstances that have changed since the most recent fair value determination, the likelihood that a current fair value determination would be less than the current carrying amount of the reporting unit is remote.

Judgments and Uncertainties — In determining the fair value of our reporting units, we used a combination of the income and market approaches to estimate the reporting unit's business enterprise value.

Under the income approach, we calculate the fair value of a reporting unit based on estimated future discounted cash flows which require assumptions about short and long-term revenue growth rates, operating margins for each reporting unit, discount rates, foreign currency exchange rates and estimates of capital charges. The assumptions we use are based on what we believe a hypothetical marketplace participant would use in estimating fair value. Under the market approach, we estimate the fair value based on market multiples of revenue or earnings before income taxes, depreciation and amortization, for benchmark companies. We believe the benchmark companies used for each of the reporting units serve as an appropriate input for calculating a fair value for the reporting unit as those benchmark companies have similar risks, participate in similar markets, provide similar services for their customers and compete with us directly. The companies we use as benchmarks are principally outlined in our “Competition” discussion in Item 1 of our 2011 Annual Report on Form 10-K. Data for the benchmark companies was obtained from publicly available information. ID Management has benchmark companies that conduct operations of businesses of a similar type, such as Experian Group Limited and The Dun & Bradstreet Corporation. Verification Services, Tax Management Services and Talent Management Services share a different set of benchmark companies, notably ADP and Paychex Inc., as the markets they serve are different than those served by our other reporting units. Valuation multiples were selected based on a financial benchmarking analysis that compared the reporting unit’s operating result with the comparable companies’ information. In addition to these financial considerations, qualitative factors such as variations in growth opportunities and overall risk among the benchmark companies were considered in the ultimate selection of the multiple.

The values separately derived from each of the income and market approach valuation techniques were used to develop an overall estimate of a reporting unit’s fair value. We use a consistent approach across all reporting units when considering the weight of the income and market approaches for calculating the fair value of each of our reporting units. This approach relies more heavily on the calculated fair value derived from the income approach, with 70% of the value coming from the income approach. We believe this approach is consistent with that of a market participant in valuing prospective purchase business combinations. The selection and weighting of the various fair value techniques may result in a higher or lower fair value. Judgment is applied in determining the weightings that are most representative of fair value.

We have not made any material changes to the valuation methodology we use to assess goodwill impairment since the date of the last annual impairment test.

Growth Assumptions

The assumptions for our future cash flows begin with our historical operating performance, the details of which are described in our Management’s Discussion & Analysis of operating performance. Additionally, we consider the impact that known economic, industry and market trends will have on our future forecasts, as well as the impact that we expect from planned business initiatives including new product initiatives, client service and retention standards, and cost management programs. At the end of the forecast period, the long-term growth rate we used to determine the terminal value of each reporting unit was generally 3% to 5% based on management’s assessment of the minimum expected terminal growth rate of each reporting unit, as well as broader economic considerations such as GDP,

inflation and the maturity of the markets we serve.

As a result of the slow rate of economic recovery, we projected only modest revenue growth in 2012 for our reporting units in completing our 2011 impairment testing based on planned business initiatives and prevailing trends exhibited by these units, such as continued demand for employment verification services and government hiring activity at the U.S. Transportation and Security Administration in the Verification Services and Talent Management Services reporting units. The anticipated revenue growth, however, is partially offset by assumed increases in expenses for a majority of our reporting units which reflect the additional level of investment needed in order to achieve the planned revenue growth. Our 2011 long-term forecast is not dependent upon strong recovery of the global economy in the near term and we continue to take cost containment actions to help maintain operating margins for our reporting units.

Discount Rate Assumptions

We utilize a weighted average cost of capital, or WACC, in our impairment analysis that makes assumptions about the capital structure that we believe a market participant would make and include a risk premium based on an assessment of risks related to the projected cash flows of each reporting unit. We believe this approach yields a discount rate that is consistent with an implied rate of return that a market participant would require for an investment in a company having similar risks and business characteristics to the reporting unit being assessed. To calculate the WACC, the cost of equity and cost of debt are multiplied by the assumed capital structure of the reporting unit as compared to industry trends and relevant benchmark company structures. The cost of equity was computed using the Capital Asset Pricing Model which considers the risk-free interest rate, beta, equity risk premium and specific company risk premium related to a particular reporting unit. The cost of debt was computed using a benchmark rate and the Company's tax rate. For the 2011 annual goodwill impairment evaluation, the discount rates used to develop the estimated fair value of the reporting units evaluated ranged from 9% to 10%. Because of assigned market premiums, discount rates are lowest for reporting units, whose cash flows are expected to be less volatile due to such factors as the maturity of the market they serve, their position in that market or other macroeconomic factors. Where there is the greatest volatility of cash flows due to competition, the discount rate selected is in the higher portion of the range as there is more inherent risk in the expected cash flows of that reporting unit.

Estimated Fair Value and Sensitivities

The estimated fair value of the reporting units whose fair value was calculated for purposes of the 2011 impairment testing is derived from the valuation techniques described above, incorporating the related projections and assumptions. An indication of possible impairment occurs when the estimated fair value of the reporting unit is below the carrying value of its equity. The estimated fair value for all reporting units exceeded the carrying value of these units as of September 30, 2011. As a result, no goodwill impairment was recorded.

The estimated fair value of the reporting unit is highly sensitive to changes in these projections and assumptions; therefore, in some instances changes in these assumptions could impact whether the fair value of a reporting unit is greater than its carrying value. For example, an increase in the discount rate and decline in the projected cumulative cash flow of a reporting unit could cause the fair value of certain reporting units to be below its carrying value. We perform sensitivity analyses around these assumptions in order to assess the reasonableness of the assumptions and the resulting estimated fair values. Ultimately, future potential changes in these assumptions may impact the estimated fair value of a reporting unit and cause the fair value of the reporting unit to be below its carrying value. The excess of fair value over carrying value for the Company's reporting units that were valued as of September 30, 2011, ranged from approximately 19% to 86%.

The reporting unit having the lowest absolute dollar excess of fair value over carrying value is our Talent Management Services business which has a goodwill balance of \$26.1 million as of September 30, 2011. This reporting unit has been impacted by uncertainty in government hiring activity. While no impairment was noted in our impairment test as of September 30, 2011, if customer hiring activity does not increase in the near to medium term as forecast or if other events adversely impact the business drivers and corresponding assumptions used to value this reporting unit, there could be a change in the valuation of our goodwill in future periods and may possibly result in the recognition of an impairment loss.

No new indications of impairment existed during the fourth quarter of 2011, thus no impairment testing was updated as of December 31, 2011.

Effect if actual results differ from assumptions — We believe that our estimates are consistent with assumptions that marketplace participants would use in their estimates of fair value. However, if actual results are not consistent with our estimates and assumptions, we may be exposed to an impairment charge that could be material.

Loss Contingencies

We are subject to various proceedings, lawsuits and claims arising in the normal course of our business. We determine whether to disclose and/or accrue for loss contingencies based on our assessment of whether the potential loss is probable, reasonably possible or remote.

Judgments and uncertainties — We periodically review claims and legal proceedings and assess whether we have potential financial exposure based on consultation with internal and outside legal counsel and other advisors. If the likelihood of an adverse outcome from any claim or legal proceeding is probable and the amount can be reasonably estimated, we record a liability on our Consolidated Balance Sheets for the estimated settlement costs. If the likelihood of an adverse outcome is reasonably possible, but not probable, we provide disclosures related to the potential loss contingency. Our assumptions related to loss contingencies are inherently subjective.

Effect if actual results differ from assumptions — We do not believe there is a reasonable likelihood that there will be a material change in the future estimates or assumptions we use to determine loss contingencies. However, if facts and circumstances change in the future that change our belief regarding assumptions used to determine our estimates, we may be exposed to a loss that could be material.

Income Taxes

We record deferred income taxes using enacted tax laws and rates for the years in which the taxes are expected to be paid. We assess the likelihood that our net deferred tax assets will be recovered from future taxable income or other tax planning strategies. To the extent that we believe that recovery is not likely, we must establish a valuation allowance to reduce the deferred tax asset to the amount we estimate will be recoverable.

Our income tax provisions are based on assumptions and calculations which will be subject to examination by various tax authorities. We record tax benefits for positions in which we believe are more likely than not of being sustained under such examinations. We assess the potential outcome of such examinations to determine the adequacy of our income tax accruals.

Judgments and uncertainties — We consider accounting for income taxes critical because management is required to make significant judgments in determining our provision for income taxes, our deferred tax assets and liabilities, and our future taxable income for purposes of assessing our ability to realize any future benefit from our deferred tax assets. These judgments and estimates are affected by our expectations of future taxable income, mix of earnings

among different taxing jurisdictions, and timing of the reversal of deferred tax assets and liabilities.

We also use our judgment to determine whether it is more likely than not that we will sustain positions that we have taken on tax returns and, if so, the amount of benefit to initially recognize within our financial statements. We review our uncertain tax positions and adjust our unrecognized tax benefits in light of changes in facts and circumstances, such as changes in tax law, interactions with taxing authorities and developments in case law. These adjustments to our unrecognized tax benefits may affect our income tax expense. Settlement of uncertain tax positions may require use of our cash. At December 31, 2011, \$25.1 million was recorded for uncertain tax benefits, including interest and penalties, of which it is reasonably possible that up to \$4.6 million of our unrecognized tax benefit may change within the next twelve months.

Effect if actual results differ from assumptions — Although management believes that the judgments and estimates discussed herein are reasonable, actual results could differ, and we may be exposed to increases or decreases in income tax expense that could be material.

Pension and Other Postretirement Plans

We consider accounting for our U.S. and Canadian pension and other postretirement plans critical because management is required to make significant subjective judgments about a number of actuarial assumptions, which include discount rates, salary growth, expected return on plan assets, interest cost and mortality and retirement rates. Actuarial valuations are used in determining our benefit obligation and net periodic benefit cost.

Judgments and uncertainties — We believe that the most significant assumptions related to our net periodic benefit cost are (1) the discount rate and (2) the expected return on plan assets, in each case as it relates to our U.S. pension plan. Our Canadian plan is small, and the impact of changes in assumptions for that plan is not material.

We determine our discount rates primarily based on high-quality, fixed-income investments and yield-to-maturity analysis specific to our estimated future benefit payments available as of the measurement date. Discount rates are updated annually on the measurement date to reflect current market conditions. We use a third party yield curve to develop our discount rates. The yield curve provides discount rates related to a dedicated high-quality bond portfolio whose cash flows extend beyond the current period, from which we choose a rate matched to the expected benefit payments required for each plan.

The expected rate of return on plan assets is based on both our historical returns and forecasted future investment returns by asset class, as provided by our external investment advisor. In setting the long-term expected rate of return, management considers capital markets' future expectations and the asset mix of the plan investments. Prior to 2008, the U.S. Pension Plan compound annual investment returns were 10.9%, 13.0% and 7.5% over three, five and ten years, respectively. The returns exceeded the S&P 500 returns for similar periods of time primarily due to an asset allocation strategy where large allocations to alternative asset classes (hedge fund of funds, private equity, real estate and real assets) provided consistently higher returns with a low correlation to equity market returns. These returns historically demonstrate a long-term record of producing returns at or above the expected rate of return. However, the dramatic adverse market conditions in 2008 skewed the traditional measures of long-term performance, such as the ten-year average return. The severity of the 2008 losses, approximately negative 20%, makes the historical ten-year average return a less accurate predictor of future return expectations. Our weighted-average expected rate of return for 2012 is 7.73% which is the same as the 2011 and 2010 expected rate.

Annual differences, if any, between the expected and actual returns on plan assets are included in unrecognized net actuarial gain, a component of other comprehensive income. In calculating the annual amortization of the unrecognized net actuarial gain or loss, we use a market-related value of assets that smoothes actual investment gains and losses on plan assets over a period up to five years. The resulting unrecognized net actuarial gain or loss amount is recognized in net periodic pension expense over the average remaining life expectancy of the participant group since almost all participants are inactive. The market-related value of our assets was \$625.7 million at December 31, 2011. We do not expect our 2012 net periodic benefit cost, which includes the effect of the market-related value of assets, to be materially different than our 2011 cost. See Note 11 of the Notes to the Consolidated Financial Statements for details on changes in the pension benefit obligation and the fair value of plan assets.

Effect if actual results differ from assumptions — We do not believe there is a reasonable likelihood that there will be a material change in the future estimates or assumptions that are used in our actuarial valuations. Adjusting our weighted-average expected long-term rate of return (7.73% at December 31, 2011) by 50 basis points would change our estimated pension expense in 2012 by approximately \$3.1 million. Adjusting our weighted-average discount rate (4.60% at December 31, 2011) by 50 basis points would change our estimated pension expense in 2012 by approximately \$1.4 million. However, if actual results are not consistent with our estimates or assumptions, we may be exposed to changes in pension expense that could be material.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of our business, we are exposed to market risk, primarily from changes in foreign currency exchange rates and interest rates that could impact our results of operations and financial position. We manage our exposure to these market risks through our regular operating and financing activities, and, when deemed appropriate, through the use of derivative financial instruments, such as interest rate swaps, to hedge certain of these exposures. We use derivative financial instruments as risk management tools and not for speculative or trading purposes.

Foreign Currency Exchange Rate Risk

A substantial majority of our revenue, expense and capital expenditure activities are transacted in U.S. dollars. However, we do transact business in other currencies, primarily the British pound, the Canadian dollar, the Chilean peso, the Argentine peso and the Euro. For most of these foreign currencies, we are a net recipient, and, therefore, benefit from a weaker U.S. dollar and are adversely affected by a stronger U.S. dollar relative to the foreign currencies in which we transact significant amounts of business.

We are required to translate, or express in U.S. dollars, the assets and liabilities of our foreign subsidiaries that are denominated or measured in foreign currencies at the applicable year-end rate of exchange on our Consolidated Balance Sheets and income statement items of our foreign subsidiaries at the average rates prevailing during the year. We record the resulting translation adjustment, and gains and losses resulting from the translation of intercompany balances of a long-term investment nature within other comprehensive income, as a component of our shareholders' equity. Foreign currency transaction gains and losses, which have historically been immaterial, are recorded on our Consolidated Statements of Income. We generally do not mitigate the risks associated with fluctuating exchange rates, although we may from time to time through forward contracts or other derivative instruments hedge a portion of our translational foreign currency exposure or exchange rate risks associated with material transactions which are denominated in a foreign currency.

For the year ended December 31, 2011, a 10% weaker U.S. dollar against the currencies of all foreign countries in which we had operations during 2011 would have increased our revenue by \$50.2 million and our pre-tax operating profit by \$15.2 million. For the year ended December 31, 2010, a 10% weaker U.S. dollar against the currencies of all foreign countries in which we had operations during 2010 would have increased our revenue by \$49.6 million and our pre-tax operating profit by \$13.7 million. A 10% stronger U.S. dollar would have resulted in similar decreases to our revenue and pre-tax operating profit for 2011 and 2010.

Interest Rate Risk

Our exposure to market risk for changes in interest rates relates to our variable-rate, long-term Senior Credit Facility and commercial paper borrowings, as well as our interest rate swaps which economically convert our 2014 fixed rate bonds from a fixed rate of interest to a floating rate. We attempt to achieve the lowest all-in weighted-average cost of debt while simultaneously taking into account the mix of our fixed- and floating-rate debt, and the average life and scheduled maturities of our debt. At December 31, 2011, our weighted average cost of debt was 5.3% and weighted-average life of debt was 10.8 years. At December 31, 2011, 68% of our debt was fixed rate, and the remaining 32% was variable rate after giving effect to the interest rate swaps on our 2014 bonds. Occasionally we use derivatives to manage our exposure to changes in interest rates by entering into interest rate swaps. A 100 basis point increase in the weighted-average interest rate on our variable-rate debt would have increased our 2011 interest expense by \$2.8 million.

Based on the amount of outstanding variable-rate debt, we have material exposure to interest rate risk. In the future, if our mix of fixed-rate and variable-rate debt were to change due to additional borrowings under existing or new variable-rate debt, we could have additional exposure to interest rate risk. The nature and amount of our long-term and short-term debt, as well as the proportionate amount of fixed-rate and variable-rate debt, can be expected to vary as a result of future business requirements, market conditions and other factors.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management of Equifax is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934. Equifax's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. Internal control over financial reporting includes those written policies and procedures that:

- Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of Equifax;

- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles;

- Provide reasonable assurance that receipts and expenditures of Equifax are being made only in accordance with authorization of management and the Board of Directors of Equifax; and

- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of assets that could have a material effect on the consolidated financial statements.

Internal control over financial reporting includes the controls themselves, monitoring and internal auditing practices, and actions taken to correct deficiencies as identified.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of Equifax's internal control over financial reporting as of December 31, 2011. Management based this assessment on criteria for effective internal control over financial reporting described in "Internal Control — Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Management's assessment included an evaluation of the design of Equifax's internal control over financial reporting and testing of the operational effectiveness of its internal control over financial reporting. Management reviewed the results of its assessment with the Audit Committee of its Board of Directors.

Based on this assessment, management determined that, as of December 31, 2011, Equifax maintained effective internal control over financial reporting. Ernst & Young LLP, the Company's independent registered public accounting firm, has issued an audit report on the Company's internal control over financial reporting as of December 31, 2011.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

The Board of Directors and Shareholders of Equifax Inc.:

We have audited Equifax Inc.'s ("Equifax " or "the Company ") internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Equifax's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Equifax Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets as of December 31, 2011 and 2010, and the related consolidated statements of income, shareholders' equity and comprehensive income, and cash flows for each of the three years in the period ended December 31, 2011 of Equifax Inc. and our report dated February 23, 2012 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP

Atlanta, Georgia

February 23, 2012

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of Equifax Inc.:

We have audited the accompanying consolidated balance sheets of Equifax Inc. as of December 31, 2011 and 2010, and the related consolidated statements of income, shareholders' equity and comprehensive income, and cash flows for each of the three years in the period ended December 31, 2011. Our audits also included the financial statement schedule listed in the Index at Item 15(a)(2). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Equifax Inc. at December 31, 2011 and 2010, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles. Also, in our opinion the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Equifax Inc.'s internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 23, 2012 expressed an unqualified opinion thereon.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

As used herein, the terms Equifax, the Company, we, our and us refer to Equifax Inc., a Georgia corporation, and its consolidated subsidiaries as a combined entity, except where it is clear that the terms mean only Equifax Inc.

Nature of Operations. We collect, organize and manage various types of financial, demographic, employment and marketing information. Our products and services enable businesses to make credit and service decisions, manage their portfolio risk, automate or outsource certain payroll-related, tax and human resources business processes, and develop marketing strategies concerning consumers and commercial enterprises. We serve customers across a wide range of industries, including the financial services, mortgage, retail, telecommunications, utilities, automotive, brokerage, healthcare and insurance industries, as well as government agencies. We also enable consumers to manage and protect their financial health through a portfolio of products offered directly to consumers. As of December 31, 2011, we operated in the following countries: Argentina, Canada, Chile, Costa Rica, Ecuador, El Salvador, Honduras, Paraguay, Peru, Portugal, Spain, the United Kingdom, or U.K., Uruguay, and the United States of America, or U.S. We also maintain support operations in the Republic of Ireland. We have an investment in a consumer and commercial credit information company in Brazil and offer consumer credit services in India and Russia through joint ventures.

We develop, maintain and enhance secured proprietary information databases through the compilation of actual consumer data, including credit, employment, asset, liquidity, net worth and spending activity, and business data, including credit and business demographics, that we obtain from a variety of sources, such as credit granting institutions, public record information (including bankruptcies, liens and judgments), income and tax information primarily from large to mid-sized companies in the U.S., and survey-based marketing information. We process this information utilizing our proprietary information management systems.

Basis of Consolidation. Our Consolidated Financial Statements and the accompanying notes, which are prepared in accordance with U.S. generally accepted accounting principles, or GAAP, include Equifax and all its subsidiaries. We consolidate all majority-owned and controlled subsidiaries as well as variable interest entities in which we are the primary beneficiary. Other parties' interests in consolidated entities are reported as noncontrolling interests. We use the equity method of accounting for investments in which we are able to exercise significant influence and use the cost method for all other investments. All significant intercompany transactions and balances are eliminated.

Our Consolidated Financial Statements reflect all adjustments which are, in the opinion of management, necessary for a fair presentation of the periods presented therein. Certain prior year amounts have been reclassified to conform to

current year presentation. The effect of these reclassifications is not material.

Segments. We manage our business and report our financial results through the following five reportable segments, which are the same as operating segments:

- U.S. Consumer Information Solutions, or USCIS
 - International
 - TALX Workforce Solutions
 - North America Personal Solutions
 - North America Commercial Solutions

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

USCIS is our largest reportable segment, with 40% of total operating revenue for 2011. Our most significant foreign operations are located in Canada and the U.K.

Use of Estimates. The preparation of our Consolidated Financial Statements requires us to make estimates and assumptions in accordance with GAAP. Accordingly, we make these estimates and assumptions after exercising judgment. We believe that the estimates and assumptions inherent in our Consolidated Financial Statements are reasonable, based upon information available to us at the time they are made including the consideration of events that have occurred up until the point these Consolidated Financial Statements have been filed. These estimates and assumptions affect the reported amounts of assets, liabilities, revenues and expenses, and disclosure of contingent assets and liabilities at the date of the financial statements, as well as reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from these estimates.

Revenue Recognition and Deferred Revenue. Revenue is recognized when persuasive evidence of an arrangement exists, collectibility of arrangement consideration is reasonably assured, the arrangement fees are fixed or determinable and delivery of the product or service has been completed. A significant portion of our revenue is derived from the provision of information services to our customers on a transaction basis, in which case revenue is recognized, assuming all other revenue recognition criteria are met, when the services are provided. A smaller portion of our revenues relates to subscription-based contracts under which a customer pays a preset fee for a predetermined or unlimited number of transactions or services provided during the subscription period, generally one year. Revenue related to subscription-based contracts having a preset number of transactions is recognized as the services are provided, using an effective transaction rate as the actual transactions are completed. Any remaining revenue related to unfulfilled units is not recognized until the end of the related contract's subscription period. Revenue related to subscription-based contracts having an unlimited volume is recognized ratably during the contract term. Revenue is recorded net of sales taxes.

If at the outset of an arrangement, we determine that collectibility is not reasonably assured, revenue is deferred until the earlier of when collectibility becomes probable or the receipt of payment. If there is uncertainty as to the customer's acceptance of our deliverables, revenue is not recognized until the earlier of receipt of customer acceptance or expiration of the acceptance period. If at the outset of an arrangement, we determine that the arrangement fee is not fixed or determinable, revenue is deferred until the arrangement fee becomes estimable, assuming all other revenue recognition criteria have been met.

The determination of certain of our tax management services revenue requires the use of estimates, principally related to transaction volumes in instances where these volumes are reported to us by our clients on a monthly basis in arrears. In these instances, we estimate transaction volumes based on average actual volumes reported in the past. Differences between our estimates and actual final volumes reported are recorded in the period in which actual

volumes are reported. We have not experienced significant variances between our estimates and actual reported volumes in the past. We monitor actual volumes to ensure that we will continue to make reasonable estimates in the future. If we determine that we are unable to make reasonable future estimates, revenue may be deferred until actual customer data is obtained. Also within our TALX Workforce Solutions operating segment, the fees for certain of our tax credits and incentives revenue are based on a portion of the credit delivered to our clients. Revenue for these arrangements is recognized based on the achievement of milestones, upon calculation of the credit, or when the credit is utilized by our client, depending on the provisions of the client contract.

We have certain offerings that are sold as multiple element arrangements. The multiple elements may include consumer or commercial information, file updates for certain solutions, services provided by our decisioning technologies personnel, training services, statistical models and other services. To account for each of these elements separately, the delivered elements must have stand-alone value to our customer, and there must exist objective and reliable evidence of the fair value for any undelivered elements. For certain customer contracts, the total arrangement fee is allocated to the undelivered elements. If we are unable to unbundle the arrangement into separate units of accounting, we apply one of the accounting policies described above. This may lead to the arrangement consideration being recognized as the final contract element is delivered to our customer or ratably over the contract.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Many of our multiple element arrangements involve the delivery of services generated by a combination of services provided by one or more of our operating segments. No individual information service impacts the value or usage of other information services included in an arrangement and each service can be sold alone or, in most cases, purchased from another vendor without affecting the quality of use or value to the customer of the other information services included in the arrangement. Some of our products require the development of interfaces or platforms by our decisioning technologies personnel that allow our customers to interact with our proprietary information databases. These development services do not meet the requirement for having stand-alone value, thus any related development fees are deferred when billed and are recognized over the expected period that the customer will benefit from the related decisioning technologies service. Revenue from the provision of statistical models is recognized as the service is provided and accepted, assuming all other revenue recognition criteria are met. The direct costs of set up of a customer are capitalized and amortized as a cost of service during the term of the related customer contract.

We have some multiple element arrangements that include software. We recognize the elements for which we have established vendor specific objective evidence at fair value upon delivery, in accordance with the applicable guidance.

We record revenue on a net basis for those sales in which we have in substance acted as an agent or broker in the transaction.

Deferred revenue consists of amounts billed in excess of revenue recognized on sales of our information services relating generally to the deferral of subscription fees and arrangement consideration from elements not meeting the criteria for having stand-alone value discussed above. Deferred revenues are subsequently recognized as revenue in accordance with our revenue recognition policies.

Cost of Services. Cost of services consist primarily of (1) data acquisition and royalty fees; (2) customer service costs, which include: personnel costs to collect, maintain and update our proprietary databases, to develop and maintain software application platforms and to provide consumer and customer call center support; (3) hardware and software expense associated with transaction processing systems; (4) telecommunication and computer network expense; and (5) occupancy costs associated with facilities where these functions are performed by Equifax employees.

Selling, General and Administrative Expenses. Selling, general and administrative expenses consist primarily of personnel-related costs, restructuring costs, corporate costs, fees for professional and consulting services, advertising costs, and other costs of administration.

Advertising. Advertising costs from continuing operations, which are expensed as incurred, totaled \$42.0 million, \$32.6 million and \$31.9 million during 2011, 2010 and 2009, respectively.

Stock-Based Compensation. We recognize the cost of stock-based payment transactions in the financial statements over the period services are rendered according to the fair value of the stock-based awards issued. All of our stock-based awards, which are stock options and nonvested stock, are classified as equity instruments.

Income Taxes. We account for income taxes under the liability method. Deferred income tax assets and liabilities are determined based on the estimated future tax effects of temporary differences between the financial statement and tax bases of assets and liabilities, as measured by current enacted tax rates. We assess whether it is more likely than not that we will generate sufficient taxable income to realize our deferred tax assets. We record a valuation allowance, as necessary, to reduce our deferred tax assets to the amount of future tax benefit that we estimate is more likely than not to be realized.

We record tax benefits for positions that we believe are more likely than not of being sustained under audit examinations. We assess the potential outcome of such examinations to determine the adequacy of our income tax accruals. We recognize interest and penalties accrued related to unrecognized tax benefits in the provision for income taxes on our Consolidated Statements of Income. We adjust our income tax provision during the period in which we determine that the actual results of the examinations may differ from our estimates or when statutory terms expire. Changes in tax laws and rates are reflected in our income tax provision in the period in which they occur.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Earnings Per Share. Our basic earnings per share, or EPS, is calculated as net income divided by the weighted-average number of common shares outstanding during the reporting period. Diluted EPS is calculated to reflect the potential dilution that would occur if stock options or other contracts to issue common stock were exercised and resulted in additional common shares outstanding. The net income amounts used in both our basic and diluted EPS calculations are the same. A reconciliation of the weighted-average outstanding shares used in the two calculations is as follows:

	Twelve Months Ended December 31,		
	2011	2010	2009
	(In millions)		
Weighted-average shares outstanding (basic)	121.9	124.8	126.3
Effect of dilutive securities:			
Stock options and restricted stock units	1.8	1.7	1.6
Weighted-average shares outstanding (diluted)	123.7	126.5	127.9

For the twelve months ended December 31, 2011, 2010 and 2009, 2.3 million, 3.3 million and 3.3 million stock options, respectively, were anti-dilutive and therefore excluded from this calculation.

Cash Equivalents. We consider all highly liquid investments with an original maturity of three months or less to be cash equivalents.

Trade Accounts Receivable and Allowance for Doubtful Accounts. We do not recognize interest income on our trade accounts receivable. Additionally, we generally do not require collateral from our customers related to our trade accounts receivable.

The allowance for doubtful accounts for estimated losses on trade accounts receivable is based on historical write-off experience, an analysis of the aging of outstanding receivables, customer payment patterns and the establishment of specific reserves for customers in an adverse financial condition. We reassess the adequacy of the allowance for doubtful accounts each reporting period. Increases to the allowance for doubtful accounts are recorded as bad debt expense, which are included in selling, general and administrative expenses on the accompanying Consolidated Statements of Income. Bad debt expense from continuing operations was \$2.8 million, \$0.8 million and \$6.6 million during the twelve months ended December 31, 2011, 2010, and 2009, respectively.

Long-Lived Assets. Property and equipment are stated at cost less accumulated depreciation and amortization. The cost of additions is capitalized. Property and equipment are depreciated primarily on a straight-line basis over the assets' estimated useful lives, which are generally three to five years for data processing equipment and capitalized internal-use software and systems costs. Leasehold improvements are depreciated over the shorter of their estimated useful lives or lease terms that are reasonably assured. Buildings are depreciated over a forty-year period. Other fixed assets are depreciated over three to seven years. Upon sale or retirement of an asset, the related costs and accumulated depreciation are removed from the accounts and any gain or loss is recognized and included in income from operations on the Consolidated Statements of Income, with the classification of any gain or loss dependent on the characteristics of the asset sold or retired.

Certain internal-use software and system development costs are deferred and capitalized. Accordingly, the specifically identified costs incurred to develop or obtain software which is intended for internal use are not capitalized until the determination is made as to the availability of a technically feasible solution to solve the predefined user and operating performance requirements as established during the preliminary stage of an internal-use software development project. Costs incurred during a software development project's preliminary stage and post-implementation stage are expensed. Application development activities which are eligible for capitalization include software design and configuration, development of interfaces, coding, testing, and installation. Capitalized internal-use software and systems costs are subsequently amortized on a straight-line basis over a three- to ten-year period after project completion and when the related software or system is ready for its intended use.
