Notes to Unaudited Condensed Consolidated Financial Statements

Note 1 - Basis of Presentation

The accompanying condensed (a) consolidated balance sheet as of December 31, 2014, which has been derived from audited consolidated financial statements, and (b) the unaudited interim condensed consolidated financial statements have been prepared and, in the opinion of management, contain all the adjustments (consisting of those of a normal recurring nature) considered necessary to present fairly the consolidated financial position and the consolidated statements of comprehensive income and consolidated cash flows for the periods presented in conformity with generally accepted accounting principles for interim consolidated financial information and the instructions to Form 10-Q and Article 8 of Regulation S-X. Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America. Operating results for the three and nine months ended September 30, 2015 are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2015. It is suggested that these condensed consolidated financial statements be read in conjunction with the consolidated financial statements and notes thereto included in the Company's annual report on Form 10-K for the fiscal year ended December 31, 2014.

Principles of consolidation and nature of operations:

The condensed consolidated financial statements include the accounts of CTI Industries Corporation and its wholly-owned subsidiaries, CTI Balloons Limited, CTI Supply, Inc. and CTF International S.A. de C.V., its majority-owned subsidiaries CTI Mexico S.A. de C.V., Flexo Universal, S.R.L. de C.V. and CTI Europe gmbH, as well as the accounts of Venture Leasing S. A. de R. L., Venture Leasing L.L.C and Clever Container Company, L.L.C. (the "Company"). The last three entities have been consolidated as variable interest entities. All significant intercompany transactions and accounts have been eliminated in consolidation. The Company (i) designs, manufactures and distributes balloon products throughout the world and (ii) operates systems for the production, lamination, coating and printing of films used for food packaging and other commercial uses and for conversion of films to flexible packaging containers and other products.

Variable Interest Entities ("VIE's"):

The determination of whether or not to consolidate a variable interest entity under U.S. GAAP requires a significant amount of judgment concerning the degree of control over an entity by its holders of variable interest. To make these judgments, management has conducted an analysis of the relationship of the holders of variable interest to each other,

the design of the entity, the expected operations of the entity, which holder of variable interests is most “closely associated” to the entity and which holder of variable interests is the primary beneficiary required to consolidate the entity. Upon the occurrence of certain events, management reviews and reconsiders its previous conclusion regarding the status of an entity as a variable interest entity. There are three entities that have been consolidated as variable interest entities.

Use of estimates:

In preparing condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amount of revenue and expenses during the reporting period in the condensed consolidated financial statements and accompanying notes. Actual results may differ from those estimates. The Company's significant estimates include reserves for doubtful accounts, reserves for the lower of cost or market of inventory, reserves for deferred tax assets and recovery value of goodwill.

Earnings per share:

Basic earnings per share is computed by dividing net income by the weighted average number of shares of common stock outstanding during each period.

Diluted earnings per share is computed by dividing the net income by the weighted average number of shares of common stock and equivalents (stock options and warrants), unless anti-dilutive, during each period.

As of September 30, 2015 and 2014, shares to be issued upon the exercise of options and warrants aggregated 343,548 and 368,548, respectively. The number of anti-dilutive shares (not included in the determination of earnings on a diluted basis) for the three and nine months ended September 30, 2015 were 174,000, all of which were represented by options.

Significant Accounting Policies:

The Company's significant accounting policies are summarized in Note 2 of the Company's consolidated financial statements for the year ended December 31, 2014. There were no significant changes to these accounting policies during the three and nine months ended September 30, 2015.

Recent Accounting Pronouncements:

In July 2015, FASB issued Accounting Standards Update (“ASU”) No. 2015-11, “Inventory (Topic 330): Simplifying the Measurement of Inventory.” The amendments in this ASU more closely align the measurement of inventory in GAAP with the measurement of inventory in International Financial Reporting Standards (IFRS). As such, an entity will measure inventory that is within the scope of this ASU at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. Subsequent measurement is unchanged for inventory measured using LIFO or the retail inventory method. For public business entities, the amendments of this ASU are effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The Company is evaluating the impact that this pronouncement may have on the Company’s financial statements.

In May 2014, the FASB issued ASU No. 2014-09, (“ASU 2014-09”), “Revenue from Contracts with Customers”. The objective of ASU 2014-09 is to establish a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and will supersede most of the existing revenue recognition guidance, including industry-specific guidance. The core principle of ASU 2014-09 is that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In applying the new guidance, an entity will (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the contract’s performance obligations; and (5) recognize revenue when (or as) the entity satisfies a performance obligation. ASU 2014-09 applies to all contracts with customers except those that are within the scope of other topics in the FASB Accounting Standards Codification. In August 2015, the FASB issued ASU 2015-14, (“ASU 2015-14”), “Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date”. The amendments in ASU 2015-14 defer the effective date of ASU 2014-09 for all entities by one year. Accordingly, public business entities should apply the guidance in ASU 2014-09 to annual reporting periods (including interim periods within those periods) beginning after December 15, 2017. Early adoption is permitted but not before annual periods beginning after December 15, 2016. Entities have the option of using either a full retrospective or modified approach to adopt ASU 2014-09. The Corporation is currently evaluating the new guidance and has not determined the impact this standard may have on its financial statements nor decided upon the method of adoption.

Note 2 - Stock-Based Compensation; Changes in Equity

The Company has adopted Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 718 which requires all share-based payments to employees, including grants of employee stock options, to be recognized in the condensed consolidated financial statements based on their grant-date fair values.

The Company has applied the Black-Scholes model to value stock-based awards and issued warrants related to notes payable. That model incorporates various assumptions in the valuation of stock-based awards relating to the risk-free rate of interest to be applied, the estimated dividend yield and expected volatility of our common stock. The risk-free rate of interest is the related U.S. Treasury yield curve for periods within the expected term of the option at the time of grant. The dividend yield on our common stock is estimated to be 0%, as the Company did not issue dividends during 2015 and 2014. The expected volatility is based on historical volatility of the Company’s common stock.

The Company’s net income for the three months ended September 30, 2015 and 2014 includes approximately \$7,000 and \$17,000, respectively of compensation costs related to share based payments. The Company’s net income for the nine months ended September 30, 2015 and 2014 includes approximately \$25,000 and \$60,000, respectively of compensation costs related to share based payments. As of September 30, 2015 there is \$18,000 of unrecognized compensation expense related to non-vested stock option grants and stock grants. We expect approximately \$4,000 of additional stock-based compensation expense to be recognized over the remainder of 2015, \$11,000 to be recognized during 2016, and \$3,000 to be recognized during 2017.

As of September 30, 2015, the Company had three stock-based compensation plans pursuant to which stock options were, or may be, granted. The Plans provide for the award of options, which may either be incentive stock options (“ISOs”) within the meaning of Section 422A of the Internal Revenue Code of 1986, as amended (the “Code”) or non-qualified options (“NQOs”) which are not subject to special tax treatment under the Code, as well as for stock grants.

On April 12, 2001, the Board of Directors approved for adoption, effective December 27, 2001, the 2001 Stock Option Plan (“2001 Plan”). The 2001 Plan authorizes the grant of options to purchase up to an aggregate of 119,050, shares of the Company’s Common Stock. As of September 30, 2015, options for 139,958 shares (including cancelled shares re-issued under the Plan) have been granted and were fully vested at the time of grant and options for 2,000 shares remain outstanding.

On April 24, 2002, the Board of Directors approved for adoption, effective October 12, 2002, the 2002 Stock Option Plan (“2002 Plan”). The 2002 Plan authorizes the grant of options to purchase up to an aggregate of 142,860 shares of the Company’s Common Stock. As of September 30, 2015, options for 123,430 shares have been granted and were fully vested at the time of grant and options for 27,500 shares remain outstanding.

On April 10, 2009, the Board of Directors approved for adoption, and on June 5, 2009, the shareholders of the Corporation approved, a 2009 Stock Incentive Plan (“2009 Plan”). The 2009 Plan authorizes the issuance of up to 250,000 shares of stock or options to purchase stock of the Company. As of September 30, 2015, options for 201,000 shares had been granted and options for 174,000 shares remain outstanding.

Note 7 - Concentration of Credit Risk

Concentration of credit risk with respect to trade accounts receivable is generally limited due to the large number of entities comprising the Company's customer base. The Company performs ongoing credit evaluations and provides an allowance for potential credit losses against the portion of accounts receivable which is estimated to be uncollectible. Such losses have historically been within management's expectations. During the three and nine months ended September 30, 2015 and 2014, there were two customers whose purchases represented more than 10% of the Company's consolidated net sales, respectively. Sales to these customers for the three and nine months ended September 30, 2015 and 2014 are as follows:

Customer	Three Months Ended September 30, 2015			Three Months Ended September 30, 2014

Customer A	\$ 3,256,000	21.9	%	\$ 3,369,000	23.1	%

Customer B	\$ 6,091,000	14.0	%	\$ 5,583,000	13.1	%

As of September 30, 2015, the total amounts owed to the Company by these customers were approximately \$1,957,000 or 19.3%, and \$1,972,000 or 19.5%, of the Company's consolidated net accounts receivable, respectively. The amounts owed at September 30, 2014 by these customers were approximately \$2,089,000 or 18.8%, and \$2,430,000 or 21.9% of the Company's consolidated net accounts receivable, respectively.

The following tables represents information about the Company’s assets and liabilities measured at fair value on a recurring basis as of September 30, 2015 and December 31, 2014, and indicate the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value:

The Company is exposed to certain market risks including the effect of changes in interest rates. The Company uses derivative instruments to manage financial exposures that occur in the normal course of business. It does not hold or issue derivatives for speculative trading purposes. The Company is exposed to non-performance risk from the counterparties in its derivative instruments. This risk would be limited to any unrealized gains on current positions. To help mitigate this risk, the Company transacts only with counterparties that are rated as investment grade or higher and all counterparties are monitored on a continuous basis. The fair value of the Company's derivatives reflects this credit risk.

On July 1, 2011, the Company entered into a swap agreement with BMO Capital Markets with respect to \$6,780,000 of our loan balances with BMO Harris Bank N.A. This swap agreement limits the Company's exposure to interest rate fluctuations on the Company's floating rate loans. The swap agreement has the effect of fixing the interest rate on the loan balances covered by the swap at 4.65% per annum. The swap agreement is a derivative financial instrument and we determine and record the fair market value of the swap agreement each quarter. The value is recorded on the balance sheet of the Company and the amount of the unrealized gain or loss for each period is recorded as interest income or expense. The swap agreement has expired as of September 30, 2014.

Foil Balloons. During the three months ended September 30, 2015 revenues from the sale of foil balloons decreased by 7.1% compared to the prior year period from \$5,657,000 to \$5,253,000. During the nine months ended September 30, 2015 revenues from the sale of foil balloons decreased by 2.3% compared to the prior year period from \$19,045,000 to \$18,607,000. During the nine months ended September 30, 2015, foil balloon sales to our largest customer increased to \$11,335,000 from \$10,982,000 in the nine months ended September 30, 2014. For the nine month period, sales of foil balloons to other customers decreased to \$7,272,000 from \$8,063,000 for the same period last year. These sales to other customers include sales in the United States, Mexico, the United Kingdom and Europe. The decrease in sales to other customers is attributable to several customers in the United Kingdom and the United States and also to the lower dollar value of Euro and Peso denominated sales in Europe and Mexico.

Latex Balloons. During the three months ended September 30, 2015 revenues from the sale of latex balloons decreased by 12.9% compared to the prior year period from \$3,001,000 to \$2,613,000. During the nine months ended September 30, 2015 revenues from the sale of latex balloons decreased by 19.6% compared to the prior year period from \$8,986,000 to \$7,221,000. The difference reflects (i) a single large sale in the first quarter of 2014 in excess of \$465,000, (ii) a decline in sales of \$300,000 to a customer of Flexo Universal, our Mexico subsidiary, and (iii) the lower Dollar value of Peso denominated sales by Flexo Universal for 2015 compared to 2014 due to the decline in the value of the Peso.

Vacuum Sealing Products. During the three months ended September 30, 2015 revenues from the sale of pouches and vacuum sealing machines increased by 5.4% compared to the prior year from \$3,777,000 to \$3,982,000. During the nine months ended September 30, 2015 revenues from the sale of pouches and vacuum sealing machines increased by 9.9% compared to the prior year from \$8,599,000 to \$9,446,000. Our sales in this product line in 2015 and 2014 have been in two product categories: (i) zippered pouches and (ii) vacuum sealing systems incorporating vacuum sealing machines and associated pouches and rolls of film. For the three and nine months ended 2015 and 2014, sales of pouch products (and vacuum sealing machines) in these categories have been as follows:

	Three Months Ended September 30,		Nine Months Ended	
	2015	2014	September 30, 2015	2014
Zippered Pouches	\$845,000	\$734,000	\$2,060,000	\$1,915,000
Vacuum Sealing Systems	3,137,000	3,043,000	7,386,000	6,684,000
Total	\$3,982,000	\$3,777,000	\$9,446,000	\$8,599,000

Zippered Pouches. Most of our sales of zippered pouches have been of branded products to a principal customer, although we have had limited sales of our ZipVac® pouch line as well. Sales of zippered pouch products increased from \$1,915,000 during the nine months ended September 30, 2014 to \$2,060,000 during the same period in 2015.

Vacuum Sealing Systems. Since 2012, we have offered a line of vacuum sealing systems which include vacuum sealing machines and associated pouches and rolls of film.

In December 2011, we entered into a Trademark License Agreement with S. C. Johnson & Son, Inc. pursuant to which we received a license to market and sell vacuum sealing machines as well as pouches and rolls of film for use with those machines, under the Ziploc brand name. In the first quarter 2012, we introduced and began to market and sell that branded line of vacuum sealing machines and associated open-top bags and rolls. Since that time, we have offered our branded vacuum sealing system lines of product principally to chain stores in the United States, including several major chains.

Our sales of our branded vacuum sealing systems increased from \$6,684,000 during the nine months ended September 30, 2014 to \$7,386,000 during the same period this year, principally as the result of increased sales to several retail chain stores.

Films. During the three months ended September 30, 2015 revenues from the sale of laminated film products decreased by 1.8% compared to the prior year period from \$1,435,000 to \$1,409,000. During the nine months ended September 30, 2015 revenues from the sale of laminated film products decreased by 2.2% compared to the prior year period from \$3,364,000 to \$3,289,000. The decrease is attributable to a decrease in sales to a principal customer. All of the sales of laminated film products during the nine months ended September 30, 2015 were to one principal customer.

Other Revenues. During the three months ended September 30, 2015, we had revenues from the sale of various other products totaling \$1,623,000 compared to revenues from other products in the same period in 2014 of \$699,000. During the nine months ended September 30, 2015, we had revenues from the sale of various other products totaling \$4,914,000 compared to revenues from other products in the same period during 2014 of \$2,655,000. The revenues from the sale of other products during 2015 include (i) sales of home container products by a variable interest entity which we now consolidate with our financial results in the amount of \$2,690,000, (ii) \$1,173,000 in sales of a line of “Candy Blossoms” and “Candy Loons” consisting of candy and small inflated balloons sold in small containers, and (iii) the sale of accessories and supply items related to balloon products.

Sales to a limited number of customers continue to represent a large percentage of our net sales. The table below illustrates the impact on sales of our top three and ten customers for the three and nine months ended September 30, 2015 and 2014.

	Three Months Ended September 30, % of Sales			Nine Months Ended September 30, % of Sales				
	2015		2014	2015		2014		
Top 3 Customers	46.5	%	49.4	%	48.3	%	47.4	%
Top 10 Customers	68.6	%	70.8	%	67.2	%	65.4	%

During the three and nine months ended September 30, 2015, there were two customers whose purchases represented more than 10% of the Company's consolidated net sales. Sales to these customers for the three months ended September 30, 2015 were \$3,256,000 or 21.9%, and \$2,282,000 or 15.3%, of consolidated net sales, respectively. Sales to these customers for the three months ended September 30, 2014, were \$3,369,000 or 23.1%, and \$2,420,000 or 16.6% of consolidated net sales, respectively. Sales to these customers for the nine months ended September 30, 2015 were \$11,660,000 or 26.8%, and \$6,091,000 or 14.0%, of consolidated net sales, respectively. Sales to these customers for the nine months ended September 30, 2014, were \$11,299,000 or 26.5% and \$5,583,000 or 13.1% of consolidated net sales, respectively. The amount owed at September 30, 2015 by these customers were \$1,957,000 or 19.3%, and \$1,972,000 or 19.5%, of the Company's consolidated net accounts receivable, respectively. As of September 30, 2014, the total amounts owed to the Company by these customers were \$2,089,000 or 18.8% and \$2,430,000 or 21.9% of the Company's consolidated net accounts receivable, respectively.

Cost of Sales. During the three months ended September 30, 2015, the cost of sales represented 72.4% of net sales compared to 74.3% for the three months ended September 30, 2014. During the nine months ended September 30, 2015, the cost of sales represented 73.3% of net sales compared to 75.9% for the nine months ended September 30, 2014. The improvement in gross margins is attributable principally to an increase in the gross margins at our Mexico subsidiary, an increase in sales of higher margin products, and higher margins achieved on the sales of home container products. The improvement in gross margins at our Mexico subsidiary is attributable principally to (i) a decline in the price of natural latex, and (ii) improvement in manufacturing efficiencies.

General and Administrative.
