Message to All Employees

Dear fellow employees,

Today we announced the signing of a definitive agreement for ON Semiconductor to acquire Catalyst Semiconductor. Although we do not expect the transaction to close until the fourth quarter of 2008, we are very excited about the potential benefits of this announcement.

Benefits of the deal

With the combination of ON Semiconductor's global footprint, effective channels of distribution, and top-tier customer relationships, ON Semiconductor expects to be able to support a broader and deeper penetration of Catalyst's overall product portfolio. Catalyst employees will be a positive addition to the 14,000 ON Semiconductor employees.

The acquisition of Catalyst Semiconductor will add to our high gross margin analog and mixed signal products offerings. Catalyst's EEPROM technology will strengthen ON Semiconductor's ASIC and power products capabilities expanding ON Semiconductor's ability to more comprehensively address its customers' needs.

The EEPROM segment provides a new total available market (TAM) opportunity for ON Semiconductor of approximately \$800 million to \$1 billion.

Catalyst Semiconductor's strong portfolio offering should benefit from ON Semiconductor's integrated manufacturing capabilities. This acquisition also further enhances the utilization of the Gresham facility.
