NATURAL RESOURCE PARTNERS L.P.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Basis of Presentation

Nature of Business

Natural Resource Partners L.P. (the Partnership) engages principally in the business of owning, operating, managing and leasing a diversified portfolio of mineral properties in the United States, including interests in coal, iron and soda ash, oil and gas, construction aggregates, frac sand and other natural resources. As used in these Notes to Consolidated Financial Statements, the terms NRP, we, us and our refer to Natural Resource Partners L.P. and its subsidiaries, unless otherwise stated or indicated by context.

Principles of Consolidation and Reporting

The accompanying unaudited Consolidated Financial Statements of the Partnership have been prepared in accordance with generally accepted accounting principles in the United States of America (GAAP) for interim financial information and with Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. Certain prior period amounts have been reclassified to conform to the current period presentation. The reclassifications had no effect on the Partnership's overall consolidated financial position, income or cash flows. In our opinion, all adjustments, consisting only of normal recurring adjustments necessary for a fair presentation, have been included. The interim financial statements should be read in conjunction with the audited financial statements and related notes included in the Partnership's Annual Report on Form 10-K for the year ended December 31, 2014. Interim results are not necessarily indicative of the results for a full year.

In March 2015, the Partnership recorded an out-of-period adjustment to correct an error in depletion expense related to its oil and gas royalty interests owned by BRP LLC, a joint venture with International Paper Company in which the Partnership owns a 51% interest. Depletion expense for the three months ended March 31, 2015 included a credit of \$3.8 million to adjust the impact of depletion expense recorded in prior periods. After evaluating the quantitative and qualitative aspects of the error and the out-of-period adjustment to the Partnership's financial results, management has determined that the misstatement and the out-of-period adjustment are not material to the prior period financial statements.

Recently Issued Accounting Standards

In May 2014, the Financial Accounting Standards Board (FASB) amended its guidance on revenue recognition. The core principle of this amendment is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This guidance is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period, with earlier adoption not permitted. This guidance can be adopted either retrospectively to each prior reporting period presented or as a cumulative-effect adjustment as of the date of adoption. We are currently evaluating the impact of the provisions of this guidance on our consolidated financial position, results of operations and cash flows.

In April 2015, the FASB issued authoritative guidance which changes the presentation of debt issuance costs in financial statements. This guidance requires an entity to present such costs in the balance sheet as a direct deduction from the related debt liability rather than as an asset. Amortization of the costs will continue to be reported as interest expense. This guidance is effective for annual reporting periods beginning after December 15, 2016. Early adoption is permitted. This guidance will be applied retrospectively to each prior period presented. We are currently evaluating the impact of the provisions of this guidance on our consolidated balance sheets.

2. Acquisitions

VantaCore Acquisition

On October 1, 2014, the Partnership completed its acquisition of VantaCore Partners LLC (VantaCore), a privately held company specializing in the construction materials industry, for \$201.1 million in cash and common units. Headquartered in Philadelphia, Pennsylvania, VantaCore operates three hard rock quarries, five sand and gravel plants, two asphalt plants and a marine terminal. VantaCore's current operations are located in Pennsylvania, West Virginia, Tennessee, Kentucky and Louisiana.

Table of Contents

NATURAL RESOURCE PARTNERS L.P.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

The Partnership accounted for the transaction under the acquisition method of accounting. Accordingly, the Partnership conducted assessments of net assets acquired and recognized amounts for identifiable assets acquired and liabilities assumed at their estimated fair values on the acquisition date, while transaction and integration costs associated with the acquisitions were expensed as incurred. The accounting for the VantaCore acquisition is not complete and adjustments to provisional amounts, or recognition of additional assets acquired or liabilities assumed may occur as more detailed analyses are completed and additional information is obtained about the facts and circumstances that existed as of the acquisition date. The results of operations of the acquisition have been included in our consolidated financial statements since the acquisition date.

In the first quarter 2015, the purchase price allocation was adjusted as more detailed analysis was completed and additional information was obtained about the facts and circumstances for various items of VantaCore's plant and equipment that existed as of acquisition date. As a result of this adjustment, plant and equipment was increased by \$22.5 million with a corresponding decrease to goodwill.

Sanish Field Acquisition

On November 12, 2014, the Partnership acquired non-operated oil and gas working interests in the Sanish Field of the Williston Basin from an affiliate of Kaiser-Francis Oil Company for \$339.1 million.

The Partnership accounted for the transaction under the acquisition method of accounting. Accordingly, the Partnership conducted assessments of net assets acquired and recognized amounts for identifiable assets acquired and liabilities assumed at their estimated fair values on the acquisition date, while transaction and integration costs associated with the acquisitions were expensed as incurred. The accounting for the Sanish Field acquisition is not complete and adjustments to provisional amounts, or recognition of additional assets acquired or liabilities assumed, may occur as more detailed analyses are completed and additional information is obtained about the facts and circumstances that existed as of the acquisition date. The results of operations of the acquisition have been included in our consolidated financial statements since the acquisition date.

Pro Forma Financial Information

The following unaudited pro forma financial information presents a summary of the Partnership's consolidated results of operations for the three months ended March 31, 2014, assuming the VantaCore and Sanish Field acquisitions had been completed as of January 1, 2014, including adjustments to reflect the values assigned to the net assets acquired:

**Three Months

Basic and diluted net income per common unit	\$	0.30

Table of Contents**NATURAL RESOURCE PARTNERS L.P.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****3. Equity Investment**

We account for our 49% investment in OCI Wyoming LLC (OCI Wyoming) using the equity method of accounting. In the three months ended March 31, 2015 and 2014, OCI Wyoming distributed \$10.9 million and \$11.6 million to us, respectively. The income allocated to NRP's equity interests and amortization of fair value adjustments are summarized as follows (in thousands):

	Three Months Ended March 31, 2015 2014 (Unaudited)	
Income allocation to NRP's equity interests	\$ 13,727	\$ 11,276
Amortization of basis difference	\$ (1,204)	\$ (1,497)
Equity in earnings of unconsolidated investment	\$ 12,523	\$ 9,779

The financial position of OCI Wyoming at March 31, 2015 and December 31, 2014 and the results of OCI Wyoming's operations for the three months ended March 31, 2015 and 2014 are summarized as follows (in thousands):

	Three Months Ended March 31, 2015 2014 (Unaudited)	
Sales	\$ 120,430	\$ 116,240
Gross profit	\$ 32,724	\$ 27,119
Net income	\$ 28,014	\$ 23,012

	March 31, 2015 (Unaudited)	December 31, 2014
Current assets	\$ 203,953	\$ 200,622
Noncurrent assets	\$ 201,746	\$ 202,282
Current liabilities	\$ 46,656	\$ 47,704
Noncurrent liabilities	\$ 149,262	\$ 149,192

The difference between the amount at which our investment in OCI Wyoming is carried and the amount of underlying equity in OCI Wyoming's net assets was \$160.5 million and \$162.7 million as of March 31, 2015 and December 31, 2014, respectively. The excess that relates to property, plant and equipment is being amortized into income over a weighted average of 28 years. The excess that relates to a right to mine asset is being amortized into income using the

units of production method.

The purchase agreement for the acquisition of our interest in OCI Wyoming requires us to pay additional contingent consideration to Anadarko to the extent certain performance criteria described in the purchase agreement are met at OCI Wyoming in any of the years 2013, 2014 or 2015. During the first quarter of 2015, the Partnership paid \$3.8 million in contingent consideration to Anadarko, and during the first quarter of 2014 the Partnership paid \$0.5 million in contingent consideration. As of March 31, 2015, the Partnership has estimated and recorded \$8.8 million as an accrued liability payable in the first quarter of 2016 with respect to 2015. The Partnership has no obligation to pay contingent consideration with respect to any period after 2015.

Table of Contents**NATURAL RESOURCE PARTNERS L.P.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****4. Plant and Equipment**

The Partnership's plant and equipment consist of the following (in thousands):

	March 31, 2015 (Unaudited)	December 31, 2014
Plant and equipment at cost	\$ 111,266	\$ 89,759
Construction in process	141	457
Less accumulated depreciation	(32,823)	(30,123)
Total plant and equipment, net	\$ 78,584	\$ 60,093

Depreciation and amortization expense related to our plant and equipment totaled \$4.5 million and \$1.3 million for the three months ended March 31, 2015 and 2014, respectively.

5. Mineral Rights

The Partnership's mineral rights consist of the following (in thousands):

	March 31, 2015 (Unaudited)	December 31, 2014
Coal	\$ 1,541,343	\$ 1,541,572
Oil and Gas	570,195	560,395
Aggregates	212,690	211,490
Other	15,014	15,014
Less accumulated depletion and amortization	(565,793)	(546,619)
Total mineral rights, net	\$ 1,773,449	\$ 1,781,852

Depletion and amortization expense related to our mineral rights totaled \$19.9 million and \$12.5 million for the three months ended March 31, 2015 and 2014, respectively.

6. Intangible Assets

Amounts recorded as intangible assets along with the balances and accumulated amortization are reflected in the table below (in thousands):

	March 31, 2015 (Unaudited)	December 31, 2014
Contract intangibles	\$ 82,972	\$ 82,972
Other intangibles	3,004	3,004
Less accumulated amortization	(26,263)	(25,243)
Total intangible assets, net	\$ 59,713	\$ 60,733

Amortization expense related to our intangible assets totaled \$1.0 million and \$0.8 million for the three months ended March 31, 2015 and 2014, respectively.

Table of Contents**NATURAL RESOURCE PARTNERS L.P.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****7. Debt and Debt Affiliate**

As used in this Note 7, references to NRP LP refer to Natural Resource Partners L.P. only, and not to NRP (Operating) LLC, a wholly owned subsidiary of NRP LP, or any of Natural Resource Partners L.P.'s subsidiaries. (Unaudited)

NRP LP Debt

Senior Notes

In September 2013, NRP LP, together with NRP Finance as co-issuer, issued \$300 million of 9.125% Senior Notes due 2018 at an offering price of 99.007% of par. Net proceeds after expenses from the issuance of the senior notes were approximately \$289.0 million. The senior notes call for semi-annual interest payments on April 1 and October 1 of each year, and will mature on October 1, 2018.

In October 2014, NRP LP, together with NRP Finance as co-issuer, issued an additional \$125 million of its 9.125% Senior Notes due 2018 at an offering price of 99.5% of par. The notes constitute the same series of securities as the existing \$300.0 million 9.125% senior notes due 2018 issued in September 2013. Net proceeds of \$122.6 million from the additional issuance of the Senior Notes were used to fund a portion of the purchase price of NRP's acquisition of non-operated working interests in oil and gas assets located in the Williston Basin in North Dakota. The notes call for semi-annual interest payments on April 1 and October 1 of each year and will mature on October 1, 2018.

The indenture for the senior notes contains covenants that, among other things, limit the ability of NRP LP and certain of its subsidiaries to incur or guarantee additional indebtedness. Under the indenture, NRP LP and certain of its subsidiaries generally are not permitted to incur additional indebtedness unless, on a consolidated basis, the fixed charge coverage ratio (as defined in the indenture) is at least 2.0 to 1.0 for the four preceding full fiscal quarters. The ability of NRP LP and certain of its subsidiaries to incur additional indebtedness is further limited in the event the amount of indebtedness of NRP LP and certain of its subsidiaries that is senior to NRP LP's unsecured indebtedness exceeds certain thresholds.

Opco Debt

All of Opco's debt is guaranteed by its wholly owned subsidiaries. As of March 31, 2015 and December 31, 2014, Opco was in compliance with the terms of the financial covenants contained in its debt agreements.

Senior Notes

Opco made principal payments of \$41.0 million on its senior notes during each of the three months ended March 31, 2015 and 2014. The Opco senior note purchase agreement contains covenants requiring Opco to:

maintain a ratio of consolidated indebtedness to consolidated EBITDDA (as defined in the note purchase agreement) of no more than 4.0 to 1.0 for the four most recent quarters;

not permit debt secured by certain liens and debt of subsidiaries to exceed 10% of consolidated net tangible assets (as defined in the note purchase agreement); and

maintain the ratio of consolidated EBITDDA (as defined in the note purchase agreement) to consolidated fixed charges (consisting of consolidated interest expense and consolidated operating lease expense) at not less than 3.5 to 1.0.

The 8.38% and 8.92% senior notes also provide that in the event that Opco's leverage ratio of consolidated indebtedness to consolidated EBITDDA (as defined in the note purchase agreement) exceeds 3.75 to 1.00 at the end of any fiscal quarter, then in addition to all other interest accruing on these notes, additional interest in the amount of 2.00% per annum shall accrue on the notes for the two succeeding quarters and for as long thereafter as the leverage ratio remains above 3.75 to 1.00.

Revolving Credit Facility

The weighted average interest rates for the debt outstanding under Opco's revolving credit facility for the three months ended March 31, 2015 and 2014 were 1.94% and 1.98%, respectively. Opco incurs a commitment fee on the undrawn portion of the revolving credit facility at rates ranging from 0.18% to 0.40% per annum. The facility includes an accordion feature whereby Opco may request its lenders to increase their aggregate commitment to a maximum of \$500 million on the same terms.

Table of Contents

NATURAL RESOURCE PARTNERS L.P.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Opco's revolving credit facility contains covenants requiring Opco to maintain:

a ratio of consolidated indebtedness to consolidated EBITDDA (as defined in the credit agreement) not to exceed 4.0 to 1.0 and,

a ratio of consolidated EBITDDA (as defined in the credit agreement) to consolidated fixed charges (consisting of consolidated interest expense and consolidated lease operating expense) of not less than 3.5 to 1.0 for the four most recent quarters.

Term Loan Facility

During 2013, Opco issued \$200 million in term debt. The weighted average interest rates for the debt outstanding under the term loan for the three months ended March 31, 2015 and 2014 were 2.19% and 2.25% respectively. Opco repaid \$101.0 million in principal under the term loan during the third quarter of 2013 and an additional \$24.0 million during the fourth quarter of 2014. Repayment terms call for the remaining outstanding balance of \$75.0 million to be paid on January 23, 2016.

Opco's term loan contains covenants requiring Opco to maintain:

a ratio of consolidated indebtedness to consolidated EBITDDA (as defined in the credit agreement) not to exceed 4.0 to 1.0 and,

a ratio of consolidated EBITDDA to consolidated fixed charges (consisting of consolidated interest expense and consolidated lease operating expense) of not less than 3.5 to 1.0 for the four most recent quarters.

NRP Oil and Gas Debt

Revolving Credit Facility

In August 2013, NRP Oil and Gas entered into a 5-year, \$100 million senior secured, reserve-based revolving credit facility in order to fund capital expenditure requirements related to the development of the oil and gas assets in which it owns non-operated working interests. In connection with the closing of the Sanish Field acquisition in November 2014, the credit facility was amended to increase its size to \$500 million with an initial borrowing base of \$137 million. The maturity date of the credit facility is November 12, 2019. The credit facility is secured by a first priority lien and security interest in substantially all of the assets of NRP Oil and Gas. NRP Oil and Gas is the sole obligor under its revolving credit facility, and neither the Partnership nor any of its other subsidiaries is a guarantor of such

facility. At both March 31, 2015 and December 31, 2014, there was \$110.0 million outstanding under the credit facility. The weighted average interest rate for the debt outstanding under the credit facility for each of the three months ended March 31, 2015 and 2014 was 2.43% and 1.91%, respectively.

Indebtedness under the NRP Oil and Gas credit facility bears interest, at the option of NRP Oil and Gas, at either:

the higher of (i) the prime rate as announced by the agent bank; (ii) the federal funds rate plus 0.50%; or (iii) LIBOR plus 1%, in each case plus an applicable margin ranging from 0.50% to 1.50%; or

a rate equal to LIBOR, plus an applicable margin ranging from 1.50% to 2.50%.

NRP Oil and Gas incurs a commitment fee on the unused portion of the borrowing base under the credit facility at a rate ranging from 0.375% to 0.50% per annum.

The NRP Oil and Gas credit facility contains certain covenants, which, among other things, require the maintenance of:

a total leverage ratio (defined as the ratio of the total debt of NRP Oil and Gas to its EBITDAX) of not more than 3.5 to 1.0; and

a minimum current ratio of 1.0 to 1.0.

As of March 31, 2015 and December 31, 2014, NRP Oil and Gas was in compliance with the terms of the financial covenants contained in its credit facility.

Table of Contents**NATURAL RESOURCE PARTNERS L.P.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

The maximum amount available under the credit facility is subject to semi-annual redeterminations of the borrowing base in May and November of each year, based on the value of the proved oil and natural gas reserves of NRP Oil and Gas, in accordance with the lenders' customary procedures and practices. NRP Oil and Gas and the lenders each have a right to one additional redetermination each year.

8. Fair Value Measurements

The Partnership's financial instruments consist of cash and cash equivalents, accounts receivable, accounts payable and long-term debt. The carrying amounts reported on our Consolidated Balance Sheets for cash and cash equivalents, accounts receivable and accounts payable approximate fair value due to their short-term nature. The following table (in thousands) shows the carrying amount and estimated fair value of our other financial instruments:

	March 31, 2015		December 31, 2014	
	Carrying	Estimated	Carrying	Estimated
	Amount	Fair	Amount	Fair
	(Unaudited)			
Assets				
Contracts receivable – affiliate, current and long-term ⁽³⁾	\$ 4,646	\$ 5,041	\$ 4,870	\$ 5,162
Debt and debt – affiliate				
NRP LP senior notes ⁽¹⁾	\$ 422,356	\$ 416,957	\$ 422,167	\$ 423,780
Opco revolving credit facility and term loan facility ⁽²⁾	\$ 300,000	\$ 300,000	\$ 275,000	\$ 275,000
Opco senior notes and utility local improvement obligation ⁽³⁾	\$ 626,890	\$ 629,521	\$ 668,056	\$ 672,740
NRP Oil and Gas revolving credit facility ⁽²⁾	\$ 110,000	\$ 110,000	\$ 110,000	\$ 110,000

- (1) The Level 2 estimated fair value was based upon quotations obtained for similar instruments on the closing trading prices near quarter end.
- (2) The Level 3 estimated fair value approximates the carrying amount because the interest rates are variable and reflective of market rates and the Partnership has the ability to repay this debt at any time without penalty.
- (3) The Level 3 estimated fair value was based on comparable term risk-free treasury issues with a market rate component determined by current financial instruments with similar characteristics.

9. Related Party Transactions

Reimbursements to Affiliates of our General Partner

The Partnership's general partner does not receive any management fee or other compensation for its management of Natural Resource Partners L.P. However, in accordance with the partnership agreement, the general partner and its affiliates are reimbursed for expenses incurred on the Partnership's behalf. All direct general and administrative expenses are charged to the Partnership as incurred. The Partnership also reimburses indirect general and administrative costs, including certain legal, accounting, treasury, information technology, insurance, administration of employee benefits and other corporate services incurred by our general partner and its affiliates, Quintana Minerals Corporation and Western Pocahontas Properties Limited Partnership. The Partnership had accounts payable affiliate to Quintana Minerals Corporation of \$0.6 million at both March 31, 2015 and December 31, 2014, for services provided by Quintana to the Partnership. The Partnership had accounts payable affiliate to Western Pocahontas of \$0.3 million and \$0.4 million at March 31, 2015 and December 31, 2015, respectively.

Table of Contents**NATURAL RESOURCE PARTNERS L.P.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

The reimbursements to affiliates of the Partnership's general partner for services performed by Western Pocahontas Properties and Quintana Minerals Corporation are as follows (in thousands):

	Three Months Ended	
	March 31,	
	2015	2014
	(Unaudited)	
General and administrative affiliate	\$ 3,786	\$ 3,094

The Partnership also leases an office building in Huntington, West Virginia from Western Pocahontas Properties and recorded \$0.2 million in general and administrative affiliate in each of the three months ended March 31, 2015 and 2014.

Cline Affiliates

Various companies controlled by Chris Cline, including Foresight Energy LP, lease coal reserves from the Partnership, and the Partnership provides coal transportation services to them for a fee. Mr. Cline, both individually and through another affiliate, Adena Minerals, LLC, owns a 31% interest in NRP's general partner, as well as approximately 4.9 million of NRP's common units. Coal related revenues from Cline affiliates totaled \$18.3 million and \$17.9 million for the three months ended March 31, 2015 and 2014, respectively. As of March 31, 2015 and December 31, 2014 the Partnership had accounts receivable-affiliates from Cline affiliates of \$5.6 million and \$9.2 million, respectively. As of March 31, 2015, the Partnership had recorded \$86.1 million in minimum royalty payments to date that have not been recouped by Foresight Energy.

The Partnership entered into a lease agreement related to the rail loadout and associated facilities at Foresight Energy's Sugar Camp mine that has been accounted for as a direct financing lease. Total projected remaining payments under the lease at March 31, 2015 are \$85.0 million with unearned income of \$38.1 million, and the net amount receivable was \$46.9 million, of which \$1.8 million is included in Accounts receivable affiliates while the remaining is included in Long-term contracts receivable affiliate. Total projected remaining payments under the lease at December 31, 2014 were \$86.3 million with unearned income of \$39.0 million and the net amount receivable was \$47.3 million, of which \$1.8 million is included in Accounts receivable affiliates while the remaining is included in Long-term contracts receivable affiliate on the accompanying Consolidated Balance Sheets.

In a separate transaction, the Partnership acquired a contractual overriding royalty interest from a subsidiary of Foresight Energy that will provide for payments based upon production from specific tons at the Sugar Camp operations. This overriding royalty was accounted for as a financing arrangement and is reflected as an affiliate receivable. The net amount receivable under the agreement as of March 31, 2015 was \$4.6 million, of which \$0.2 million is included in Accounts receivable affiliates while the remaining is included in Long-term contracts

receivable affiliate. The net amount receivable under the agreement as of December 31, 2014 was \$5.6 million, of which \$1.1 million is included in Accounts receivable affiliates while the remaining is included in Long-term contracts receivable affiliate on the accompanying Consolidated Balance Sheets.

Long-Term Debt Affiliate

Donald R. Holcomb, one of the Partnership's directors, is a manager of Cline Trust Company, LLC, which owns approximately 5.35 million of the Partnership's common units and \$20.0 million in principal amount of the Partnership's 9.125% Senior Notes due 2018. The members of the Cline Trust Company are four trusts for the benefit of the children of Christopher Cline, each of which owns an approximately equal membership interest in the Cline Trust Company. Mr. Holcomb also serves as trustee of each of the four trusts. Cline Trust Company, LLC purchased the \$20.0 million of the Partnership's 9.125% Senior Notes due 2018 in the Partnership's offering of \$125.0 million additional principal amount of such notes in October 2014 at the same price as the other purchasers in that offering. The balance on this portion of the Partnership's 9.125% Senior Notes due 2018 was \$19.9 million as of March 31, 2015 and is included in Long-term debt affiliate.

Quintana Capital Group GP, Ltd.

Corbin J. Robertson, Jr. is a principal in Quintana Capital Group GP, Ltd., which controls several private equity funds focused on investments in the energy business. In connection with the formation of Quintana Capital, the Partnership adopted a formal conflicts policy that establishes the opportunities that will be pursued by the Partnership and those that will be pursued by Quintana Capital. The governance documents of Quintana Capital's affiliated investment funds reflect the guidelines set forth in the Partnership's conflicts policy.

Table of Contents**NATURAL RESOURCE PARTNERS L.P.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

At March 31, 2015, a fund controlled by Quintana Capital owned a majority interest in Corsa Coal Corp. (Corsa), a coal mining company traded on the TSX Venture Exchange that is one of the Partnership's lessees in Tennessee. Corbin J. Robertson III, one of the Partnership's directors, is Chairman of the Board of Corsa. Coal related revenues from Corsa totaled \$0.8 million and \$0.9 million for the three months ended March 31, 2015 and 2014, respectively.

As of March 31, 2015, the Partnership had recorded \$0.2 million in minimum royalty payments to date that have not been recouped by Corsa. The Partnership also had accounts receivable affiliate totaling \$0.2 million and \$0.3 million from Corsa at March 31, 2015 and December 31, 2014, respectively.

10. Major Lessees

Revenues from lessees that exceeded ten percent of total revenues and other income for the periods are presented below (in thousands except for percentages):

	Three Months Ended			
	March 31,			
	2015		2014	
	(Unaudited)			
	Revenues	Percent	Revenues	Percent
Foresight Energy and affiliates	\$ 18,298	17%	\$ 17,882	22%
Alpha Natural Resources	\$ 8,829	8%	\$ 11,642	14%

For the three months ended March 31, 2015, the Partnership derived over 25% of its total revenues and other income from the two companies listed above. The Partnership has a significant concentration of revenues with Foresight Energy and Alpha, although in most cases, with the exception of Foresight Energy's Williamson mine, the exposure is spread out over a number of different mining operations and leases. Foresight Energy's Williamson mine was responsible for approximately 5% and 11% of the Partnership's total revenues and other income for the three months ended March 31, 2015 and 2014, respectively.

11. Long-Term Incentive Plans

GP Natural Resource Partners LLC adopted the Natural Resource Partners Long-Term Incentive Plan (the Long-Term Incentive Plan) for directors of GP Natural Resource Partners LLC and employees of its affiliates who perform services for the Partnership. Under the plan a grantee will receive the market value of a common unit in cash upon vesting. A summary of activity in the outstanding grants during 2015 is as follows:

	(Unaudited)
Outstanding grants at January 1, 2015	1,153,393
Grants during the year	468,486
Grants vested and paid during the year	(290,430)
Forfeitures during the year	
Outstanding grants at March 31, 2015	1,331,449

Grants typically vest at the end of a four-year period and are paid in cash upon vesting. The liability fluctuates with the market value of the Partnership units and because of changes in estimated fair value determined each quarter using the Black-Scholes option valuation model. Risk free interest rates and volatility are reset at each calculation based on current rates corresponding to the remaining vesting term for each outstanding grant and ranged from 0.26% to 1.17% and 36.36% to 46.99%, respectively at March 31, 2015. The Partnership's average distribution rate of 7.65% and historical forfeiture rate of 4.29% were used in the calculation at March 31, 2015. The Partnership recorded a reversal of expenses related to its plan to be reimbursed to its general partner of \$0.1 million for the three months ended March 31, 2015 and reversal of expenses of \$1.1 million for the three months ended March 31, 2014 due to the decline in the market price of the Partnership's common units. In connection with the Long-Term Incentive Plan, payments are typically made during the first quarter of the year. Payments of \$4.4 million and \$5.3 million were made during the three month period ended March 31, 2015 and 2014, respectively.

Table of Contents

NATURAL RESOURCE PARTNERS L.P.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

In connection with the phantom unit awards, the Compensation, Nominating and Governance Committee also granted tandem Distribution Equivalent Rights, or DERs, which entitle the holders to receive distributions equal to the distributions paid on the Partnership's common units. The DERs are payable in cash upon vesting but may be subject to forfeiture if the grantee ceases employment prior to vesting.

The unaccrued cost, associated with the unvested outstanding grants and related DERs at March 31, 2015 and March 31, 2014 was \$6.6 million and \$11.3 million, respectively.

12. Distributions Paid

On February 13, 2015, the Partnership paid a quarterly distribution of \$0.35 per unit to all holders of common units on February 5, 2015.

13. Subsequent Events

The following represents material events that have occurred subsequent to March 31, 2015 through the time of the Partnership's filing of this Quarterly Report on Form 10-Q with the Securities and Exchange Commission:

Distributions Declared

On April 21, 2015, the Board of Directors of GP Natural Resource Partners LLC declared a distribution of \$0.09 per unit to be paid by the Partnership on May 14, 2015 to unitholders of record on May 5, 2015.

NRP Oil and Gas Revolving Credit Facility

In April 2015, the Partnership's lenders completed their semi-annual redetermination of its borrowing base under the NRP Oil and Gas revolving credit facility and the \$137.0 million borrowing base under that facility was redetermined to \$105.0 million. In connection with this reduction, the Partnership repaid \$5.0 million of outstanding borrowings under the NRP Oil and Gas revolving credit facility.

Equity Investment

In March 2014, Anadarko gave the Partnership written notice that it believed certain reorganization transactions conducted in 2013 within the OCI organization triggered an acceleration of the Partnership's obligation under the purchase agreement with Anadarko to pay the additional contingent consideration in full and demanded immediate payment of such amount. The Partnership disagreed with Anadarko's position in a written response provided to them in April 2014. In April 2015, Anadarko sent a written request for additional information regarding the OCI reorganization and indicated that they are still considering this claim against the Partnership. The Partnership does not

believe the reorganization transactions triggered an obligation to pay the additional contingent consideration and will continue to engage in discussions with Anadarko to resolve the issue. However, if Anadarko were to pursue and prevail on such a claim, the Partnership would be required to pay an amount to Anadarko in excess of the amounts already paid, together with the \$8.8 million accrual described above, up to the maximum amount of the additional contingent consideration, minus a deductible. Under the purchase agreement, the maximum cumulative amount of additional contingent consideration is an amount equal to the net present value of \$50 million. Any additional amount paid by the Partnership would be considered to be additional acquisition consideration and added to Equity and other unconsolidated investments.

Information Regarding Forward-Looking Statements**

Statements included in this Form 10-Q may constitute forward-looking statements. In addition, we and our representatives may from time to time make other oral or written statements which are also forward-looking statements.

Such forward-looking statements include, among other things, statements regarding:

our business strategy;

our financial strategy;

prices of and demand for coal, oil, natural gas, aggregates and industrial minerals;

estimated revenues, expenses and results of operations;

the amount, nature and timing of capital expenditures;

our ability to make acquisitions and integrate the acquisitions we do make;

our liquidity and access to capital and financing sources;

projected production levels by our lessees, VantaCore Partners LLC, and the operators of our oil and gas working interests;

OCI Wyoming LLC's trona mining and soda ash refinery operations;

the impact of governmental policies, laws and regulations, as well as regulatory and legal proceedings involving us, and of scheduled or potential regulatory or legal changes; and

global and U.S. economic conditions.

These forward-looking statements speak only as of the date hereof and are made based upon management's current plans, expectations, estimates, assumptions and beliefs concerning future events impacting us and therefore involve a number of risks and uncertainties. We caution that forward-looking statements are not guarantees and that actual results could differ materially from those expressed or implied in the forward-looking statements.

You should not put undue reliance on any forward-looking statements. See Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2014 for important factors that could cause our actual results of operations or our actual financial condition to differ.

As used herein, unless the context otherwise requires: we, our and us refer to Natural Resource Partners L.P. and, where the context requires, our subsidiaries. References to NRP and Natural Resource Partners refer to Natural Resource Partners L.P. only, and not to NRP (Operating) LLC or any of Natural Resource Partners L.P.'s subsidiaries. References to Opco refer to NRP (Operating) LLC and its subsidiaries. References to NRP Oil and Gas refer to NRP Oil and Gas LLC, a wholly owned subsidiary of NRP. NRP Finance Corporation (NRP Finance) is a wholly owned subsidiary of NRP and a co-issuer with NRP on the 9.125% senior notes.

Introduction

The following discussion and analysis presents management's view of our business, financial condition and overall performance and should be read in conjunction with our consolidated financial statements and footnotes included elsewhere in this filing. Our discussion and analysis consists of the following subjects:

Executive Overview

Results of Operations

Liquidity and Capital Resources

Off-Balance Sheet Arrangements

Related Party Transactions

Recent Accounting Standards

Table of Contents

Executive Overview

We are a diversified natural resource company engaged principally in the business of owning, managing and leasing a diversified portfolio of mineral properties in the United States, including interests in coal, trona and soda ash, crude oil and natural gas, construction aggregates, frac sand and other natural resources. For the three months ended March 31, 2015, we recorded revenues and other income of \$109.7 million and Adjusted EBITDA of \$64.2 million. Adjusted EBITDA is a non-GAAP financial measure. For a reconciliation of Adjusted EBITDA to net income, see Results of Operations Three Months Ended March 31, 2015 compared to Three Months Ended March 31, 2014 Adjusted EBITDA(Non-GAAP Financial Measure).

Our coal reserves are located in the three major U.S. coal-producing regions: Appalachia, the Illinois Basin and the Western United States, as well as lignite reserves in the Gulf Coast region. We do not operate any coal mines, but lease our coal reserves to experienced mine operators under long-term leases that grant the operators the right to mine and sell our reserves in exchange for royalty payments. We also own and manage infrastructure assets that generate additional revenues, primarily in the Illinois Basin.

We own or lease aggregates and industrial minerals located in a number of states across the country. We derive a small percentage of our aggregates and industrial minerals revenues by leasing our owned reserves to third party operators who mine and sell the reserves in exchange for royalty payments. However, the majority of our aggregates and industrial minerals revenues come through our ownership of VantaCore Partners LLC (VantaCore), which we acquired in October 2014. VantaCore specializes in the construction materials industry and operates three hard rock quarries, five sand and gravel plants, two asphalt plants and a marine terminal. VantaCore s current operations are located in Pennsylvania, West Virginia, Tennessee, Kentucky and Louisiana.

We own a 49% non-controlling equity interest in a trona ore mining operation and soda ash refinery in the Green River Basin, Wyoming. OCI Resources LP, our operating partner, mines the trona, processes it into soda ash, and distributes the soda ash both domestically and internationally into the glass and chemicals industries. We receive regular quarterly distributions from this business.

We own various interests in oil and gas properties that are located in the Williston Basin, the Appalachian Basin, Louisiana and Oklahoma. Our interests in the Appalachian Basin, Louisiana and Oklahoma are minerals and royalty interests, while in the Williston Basin we own non-operated working interests. Our Williston Basin non-operated working interest properties generate the majority of our oil and gas revenues and include the properties acquired in the Sanish Field from an affiliate of Kaiser-Francis Oil Company in November 2014.

Current Liquidity Position

At March 31, 2015, our liquidity consisted of \$33.3 million in cash and \$102 million in combined borrowing capacity under our revolving credit facilities. Subsequent to the end of the quarter, the borrowing base on the NRP Oil and Gas revolving credit facility was reduced to \$105.0 million, reducing our combined borrowing capacity to \$75.0 million. In April 2015, we announced a long-term plan to strengthen our balance sheet, reduce debt and enhance liquidity in order to reposition the partnership for future growth. As part of that plan, our Board of Directors declared a distribution with respect to the first quarter of 2015 of \$0.09 per common unit, a 75% decrease from the distribution paid with respect to the prior quarter. We intend to use the annual cash savings from the distribution reduction to pay down Opco s debt and improve our consolidated credit metrics. We have \$80.9 million in principal payments due on Opco s senior notes each year through 2018, and Opco s revolving credit facility and term loan facility both mature in 2016. While we believe we have sufficient liquidity to meet our current financial needs, we will be required to repay or refinance the amounts outstanding under Opco s credit facilities.

Current Results/Market Outlook

Our revenues and other income from sources other than coal represented 55% of our total revenues and other income in the first quarter of 2015, as compared to 35% of total revenues and other income first quarter of 2014. This increase is due primarily to our diversification efforts, including our acquisition of VantaCore in the fourth quarter of 2014. As an operating construction aggregates business, VantaCore generates higher revenues but experiences lower profit margins than our royalty businesses. Accordingly, we experienced a significant increase in revenues during the first quarter of 2015 as compared to the first quarter of 2014, while our Adjusted EBITDA declined approximately 7% from the same period. Coal-related revenues were down 6% for the first quarter of 2015 compared to the first quarter of 2014, due primarily to lower coal royalty revenues, which were down approximately 17% in Appalachia and 16% in the Illinois Basin from the prior period. During the first quarter of 2015, our investment in OCI Wyoming's trona mining and soda ash production operations contributed \$12.5 million in other income, up \$2.7 million from the first quarter of 2014, and our oil and gas revenues increased to \$15.2 million, up \$5.2 million from the first quarter of 2014, due primarily to our acquisition of the Sanish Field assets.

Table of Contents

The thermal coal market remains challenged and does not currently show any signs of recovery. We expect the markets for thermal coal to remain weak during 2015, and we anticipate that producers of Central Appalachian thermal coal will continue to struggle in the current market due to the high cost nature of their operations. In contrast, despite decreased production and coal royalty revenues from our properties in the Illinois Basin during the first quarter of 2015 as compared to the first quarter of 2014, we expect revenues from our properties in the basin to increase over the long-term, as production from the basin becomes a larger portion of overall U.S. thermal coal production due to the low cost nature of operations in that basin.

We continue to have substantial exposure to metallurgical coal, from which we derived approximately 40% of our coal royalty revenues and 33% of the related production during the first quarter of 2015. The global metallurgical coal market continues to suffer from oversupply in addition to reduced demand from China and a relatively strong U.S. dollar. The second quarter 2015 benchmark settled at a new multi-year low, and we do not anticipate that metallurgical coal prices will recover in 2015. Mine idlings resulting in reductions of production of metallurgical coal from our properties may occur during the year if prices remain at current levels. In addition, if coal prices continue to remain depressed for an extended period of time, the lessees on our coal properties may close some of their mines causing those coal properties to be impaired.

Our trona mining and soda ash refinery investment performed in line with our expectations during the first quarter of 2015. The international market for soda ash continues to grow, as global production capacity for high-cost synthetic soda ash continues to be reduced, and OCI Wyoming's sales through ANSAC were better than expected. Domestic sales volumes, which are typically sold at higher prices than soda ash sold internationally, have remained relatively stable.

VantaCore's construction aggregates mining and production business is largely dependent on the strength of the local markets that it serves and is also seasonal. Production and sales during the first quarter of each year are typically lower than the rest of the year and are also more difficult to forecast due to winter weather. VantaCore's operations were significantly impacted by winter weather conditions. In addition, we expect that the Laurel Aggregates operation in southwestern Pennsylvania, which serves producers and oilfield service companies operating in the Marcellus and Utica Shales, will be impacted in 2015 by the slowing pace of exploration and development of natural gas in those areas due to low natural gas prices. VantaCore's operations based in Clarksville, Tennessee and Baton Rouge, Louisiana depend on the pace of commercial and residential construction in those areas, each of which is typically slow in the first quarter of the year.

Global oil prices remain depressed in the first quarter as a result of continued supply growth from prior period development activity in the U.S., coupled with reduced global demand and a strong U.S. dollar. Natural gas prices are also low due to record levels of production and high storage inventories. As of the date of this filing, we have not hedged any of our future oil or natural gas production and, as a result, our oil and gas revenues will continue to be impacted by the current price environment. However, we are able to manage the capital expenditures associated with our Williston Basin non-operated working interest properties by evaluating well proposals on a well-by-well basis. We monitor the development programs of the operators of these properties and manage the capital expenditures associated with those properties by only participating in wells that are expected to provide acceptable economic returns.

Results of Operations

Three Months Ended March 31, 2015 Compared to Three Months Ended March 31, 2014

Adjusted EBITDA (Non-GAAP Financial Measure)

Adjusted EBITDA declined 7% in 2015 to \$64.2 million from \$69.0 million generated in 2014. This decrease in Adjusted EBITDA is mainly related to decreased coal related revenues.

Adjusted EBITDA is a non-GAAP financial measure that we define as net income less equity earnings in unconsolidated investment; plus distributions from equity earnings in unconsolidated investment, interest expense, gross, depreciation, depletion and amortization, and asset impairments. Adjusted EBITDA, as used and defined by us, may not be comparable to similarly titled measures employed by other companies and is not a measure of performance calculated in accordance with GAAP. Adjusted EBITDA should not be considered in isolation or as a substitute for operating income, net income or loss, cash flows provided by operating, investing and financial activities, or other income or cash flow statement data prepared in accordance with GAAP. Adjusted EBITDA provides no information regarding a partnership's capital structure, borrowings, interest costs, capital expenditures, and working

Table of Contents

capital movement or tax positions. Adjusted EBITDA does not represent funds available for discretionary use because those funds may be required for debt service, capital expenditures, working capital and other commitments and obligations. Our management team believes Adjusted EBITDA is useful in evaluating our financial performance because this measure is widely used by financial analysts, investors and rating agencies for comparative purposes. Adjusted EBITDA is also a financial measure widely used by investors in the high-yield bond market. There are significant limitations to using Adjusted EBITDA as a measure of performance, including the inability to analyze the effect of certain recurring items that materially affect our net income or loss, the lack of comparability of results of operations of different companies and the different methods of calculating Adjusted EBITDA reported by different companies. The following table (in thousands) reconciles net income to Adjusted EBITDA.

	Three Months Ended	
	March 31,	
	2015	2014
	(unaudited)	
Net income	\$ 17,489	\$ 32,605
Less equity earnings in unconsolidated investment	(12,523)	(9,779)
Add distributions from equity earnings in unconsolidated investment	10,903	11,645
Add depreciation, depletion and amortization	25,392	14,647
Add interest expense, gross	22,943	19,860
Adjusted EBITDA	\$ 64,204	\$ 68,978

Adjusted EBITDA presented in the table above differs from the EBITDDA definitions contained in Opco's debt agreement covenants. In calculating EBITDDA for purposes of Opco's debt covenant compliance, pro forma effect may be given to acquisitions and dispositions made during the relevant period. See Note 7 for a description of Opco's debt agreements.

Distributable Cash Flow (Non-GAAP Financial Measure)

Distributable cash flow increased by 37%, or \$14.4 million, to \$53.3 million in the first quarter 2015, mainly due to timing of cash payments received by our aggregates related business and approximately \$5.2 million related to the sale of some minerals rights and assets. In addition, for the first time, NRP has reduced distributable cash flow for maintenance capital expenditures. Maintenance capital expenditures for the three months ended March 31, 2015 were \$8.5 million. A portion of the capital expenditures associated with both our oil and gas working interest business and VantaCore are maintenance capital expenditures, which are capital expenditures made to maintain the long-term production capacity of those businesses. We expect the majority of our 2015 maintenance capital expenditures will be incurred during the first half of the year.

Our distributable cash flow represents net cash provided by operating activities, plus returns on unconsolidated equity investments, proceeds from sales of assets, and returns on direct financing lease and contractual overrides less maintenance capital expenditures. Although distributable cash flow is a non-GAAP financial measure, we believe it is a useful adjunct to net cash provided by operating activities under GAAP. Distributable cash flow is not a measure of financial performance under GAAP and should not be considered as an alternative to cash flows from operating, investing or financing activities. Distributable cash flow may not be calculated the same for us as for other companies. The following table (in thousands) reconciles net cash provided by operating activities to distributable cash flow:

	Three Months Ended March 31, 2015 2014 (Unaudited)	
Net cash provided by operating activities	\$ 55,472	\$ 38,630
Return on direct financing lease and contractual overrides	1,137	297
Proceeds from sale of mineral rights	4,261	
Proceeds from sale of plant and equipment	905	
Maintenance capital expenditures	(8,486)	
Distributable cash flow	\$ 53,289	\$ 38,927

Table of Contents**Diversified Natural Resource Revenues and Other Income**

Table of Contents

Appalachia

Appalachian coal production decreased 0.9 million tons, or 11%, and coal royalty revenues decreased \$4.8 million, or 17%, in the three-months ended March 31, 2015 as compared to the same period of 2014.

Production from our properties in the Central Appalachian region was essentially flat for the three months ended March 31, 2015 compared to the same quarter for 2014, but pricing realized by our lessees for both steam and metallurgical coal in Central Appalachia was generally lower. As a result, coal royalty revenue from Central Appalachian properties decreased \$2.5 million, or 13%, for the three months ended March 31, 2015 compared to the three months ended March 31, 2014.

The Southern Appalachian region also had decreased production and coal royalty revenues, primarily due to one of our lessees curtailing production during a process to sell its business and the timing of sales by some other lessees coupled with lower realized prices for metallurgical coal.

With respect to Northern Appalachia, during the three months ended March 31, 2015 there was also a decrease in coal royalty revenue and production. These decreases were primarily due to certain lessees having a greater proportion of their production on adjacent properties. Our revenue per ton in the region was also lower primarily due to one of our leases, which has a very low royalty per ton, being a larger proportion of production in the region.

Illinois Basin

Illinois Basin coal production decreased 0.5 million tons, or 17%, and coal royalty revenues decreased \$2.0 million, or 16%, in the three-months ended March 31, 2015 as compared to the same period of 2014. Increased production from Foresight Energy's Williamson and Hillsboro mines was offset by lower sales from Foresight Energy's Macoupin mine and another property in Indiana where a lessee not related to Foresight Energy had a greater proportion of production from adjacent properties. Prices received by our lessees were at or below those received in the same period in 2014.

Northern Powder River Basin

Northern Powder River Basin coal production increased 0.4 million tons, or 48%, and coal royalty revenues increased \$0.9 million, or 34%, in the three months ended March 31, 2015 as compared to the same period of 2014. Coal royalty revenues and production increased on our Western Energy property due to the normal variations that occur due to the checkerboard nature of ownership.

Gulf Coast

Gulf Coast coal production decreased 0.1 million tons, or 51%, and coal royalty revenues decreased \$0.4 million, or 49%, in the three months ended March 31, 2015 as compared to the same period of 2014. The decrease was due primarily to a lessee having a greater portion of its production on adjacent properties.

Other Coal Related Revenues

Other coal related revenues for the three months ended March 31, 2015 increased \$3.4 million, or 39% compared to the same period in 2014. Override revenue for the three months ended March 31, 2015 decreased by 49% compared to the same period in 2014 primarily due to one lessee moving its mining operations from an area on which we receive an overriding royalty onto property on which we receive coal royalty revenue. Minimums recognized as revenue increased \$3.1 million, or 209% for the three months ended March 31, 2015 when compared to the same period in

2014, primarily due to the recoupment period under our lease relating to Foresight Energy's Macoupin mine expiring in 2015. Transportation and processing fees decreased \$0.5 million or 10%. This reduction was due primarily to less tonnage being transported from our Illinois properties. Wheelage revenue decreased by \$0.2 million, or 16%, for the three months ended March 31, 2015 compared to the same period in 2014. This slight decrease was due to the normal fluctuations of tonnage that are subject to wheelage charges. Also included in other coal related revenues for the three months ended March 31, 2015 was a \$1.7 million public roadway condemnation payment.

Table of Contents**Aggregates Related Revenues and Industrial Minerals Other Income**

Total aggregates related revenues and total industrial minerals other income represented approximately 38% and 16% of our total revenues and other income for the three months ended March 31, 2015 and 2014, respectively. The table below presents the major categories of our aggregates related revenues and industrial minerals other income:

	Three Months Ended March 31,		Increase (Decrease)	Percentage Change
	2015	2014		
(In thousands, except percent and per ton data)				
(Unaudited)				
VantaCore:				
Tonnage sold	1,486	N/A	N/A	N/A
Revenues	\$ 26,773	N/A	N/A	N/A
Operating expenses	\$ 22,407	N/A	N/A	N/A
Aggregates related royalty revenues	\$ 2,173	\$ 3,396	(1,223)	(36)%
Total aggregates related revenues	\$ 28,946	\$ 3,396	25,550	752%
Industrial minerals other income and cash distributions:				
Equity in earnings of unconsolidated investment	\$ 12,523	\$ 9,779	2,744	(28)%
Cash distributions from equity earnings in unconsolidated investment	\$ 10,903	\$ 11,645	(742)	(6)%

VantaCore

VantaCore operates hard rock quarries, sand and gravel plants, asphalt plants and a marine terminal in Pennsylvania, West Virginia, Tennessee, Kentucky and Louisiana. We recognized \$26.8 million of aggregates related revenues from VantaCore's operations in the three months ended March 31, 2015.

Aggregates Related Royalty Revenues

Aggregates related royalty revenues decreased \$1.2 million, or 36%, in the three-months ended March 31, 2015 as compared to the same period of 2014. This decrease is primarily due to a lessee moving from property we own to property we collect an override on, which is at a lower royalty rate resulting in a decrease of \$0.7 million for the three months ended March 31, 2015 when compared to the first quarter of 2014. Also contributing to the decline was a mine idling by one of the aggregates lessees in Kentucky during 2014.

Industrial Minerals Other Income and Cash Distributions

For the three months ended March 31, 2015 equity in the earnings of our investment in the OCI Wyoming trona mining and soda ash production business was \$12.5 million, and we received \$10.9 million in cash distributions from OCI Wyoming. For the three months ended March 31, 2014, we recorded equity in the earnings of OCI Wyoming of \$9.8 million and received \$11.6 million in cash distributions.

Oil and Gas Related Revenues

Total oil and gas related revenues comprised approximately 14% and 13% of our total revenues and other income for the three months ended March 31, 2015 and 2014, respectively. The table below presents oil and gas production and revenues derived from our major oil and gas producing regions and the significant categories of oil and gas related revenues:

Table of Contents

	Three Months Ended March 31,		Increase (Decrease)	Percentage Change
	2015	2014		
(Dollars in thousands, except per unit data)				
(Unaudited)				
<i>Williston Basin non-operated working interests:</i>				
<i>Production volumes:</i>				
Oil (MBbl)	307	68	239	351%
Natural gas (Mcf)	221	15	206	1,373%
NGL (MBoe)	40	3	37	1,233%
<i>Average sales price per unit:</i>				
Oil (Bbl)	\$ 39.34	\$ 105.53	\$ (66.19)	(63)%
Natural gas (Mcf)	\$ 2.71	\$ 5.73	\$ (3.02)	(53)%
NGL (Boe)	\$ 12.28	\$ 39.00	\$ (26.72)	(69)%
<i>Revenues:</i>				
Oil	\$ 12,076	\$ 7,176	\$ 4,900	68%
Natural gas	598	86	512	595%
NGL	491	117	374	320%
Non-production revenue	450		450	100%
Total	\$ 13,615	\$ 7,379	\$ 6,236	85%
Royalty and overriding revenues	\$ 1,615	\$ 2,679	\$ (1,064)	(40)%
Total oil and gas related revenues	\$ 15,230	\$ 10,058	\$ 5,172	51%

Oil and gas revenues increased \$5.2 million, or 51%, for the three months ended March 31, 2015 when compared to the same period ended for 2014. The increase in revenues is due to our Sanish Field properties acquired on November 12, 2014.

Other Revenues

Other revenues primarily include reimbursements of property taxes from our lessees, rentals, metal revenues and timber royalties. Other revenues decreased \$1.2 million, or 26%, for the three months ended March 31, 2015 when compared to the same period ended for 2014 primarily as a result of lower property tax revenues due to lower assessments on our coal properties.

Operating Expenses*Depreciation, depletion and amortization*

Depreciation, depletion and amortization increased \$10.7 million, or 73%, for the three months ended March 31, 2015 when compared to the same period ended for 2014 primarily as a result of assets acquired during the fourth quarter of 2014. This increase was partially offset by a \$3.8 million credit to adjust the impact of depletion expense recorded in prior periods as discussed in Note 1 to our consolidated financial statements incorporated herein by reference.

General and administrative expenses

General and administrative expenses increased \$5.5 million, or 94%, for the three months ended March 31, 2015 when compared to the same period ended for 2014, primarily as a result of increased expenses associated with the VantaCore business. General and administrative expenses were also lower in the three month period ending March 31, 2014 due to decreased long term incentive plan expenses resulting from a lower market price of our common units.

Table of Contents

Interest Expense

Interest expense increased \$3.1 million, or 16%, for the three months ended March 31, 2015 when compared to the same period ended for 2014 primarily as a result of additional debt incurred to complete acquisitions in the fourth quarter of 2014.

Liquidity and Capital Resources

Overview

In April 2015, we announced a long-term plan to strengthen our balance sheet, reduce debt and enhance liquidity in order to reposition the company for future growth. As part of that plan, our Board of Directors declared a distribution with respect to the first quarter of 2015 of \$0.09 per common unit, a 75% decrease from the distribution paid with respect to the prior quarter. We intend to use the annual cash savings from the distribution reduction to pay down Opco's debt and improve our consolidated credit metrics. As of March 31, 2015, we were in compliance with all of our debt covenant ratios. Opco's revolving credit facility and term loan facility both mature during 2016. In addition, we are required to make approximately \$81 million of principal payments in connection with Opco's senior notes each year through 2018. We also have \$425 million principal amount of 9.125% senior notes issued by NRP and NRP Finance, as co-issuers, that mature in 2018. We will be required to repay or refinance these amounts. While we believe we will be able to refinance these amounts, we may not be able to do so on terms acceptable to us, if at all. Our ability to comply with the financial and other restrictive covenants in our debt agreements will be affected by the levels of cash flow from our operations and future events and circumstances beyond our control. In addition, our ability to refinance our debt may depend in part on our ability to access the debt or equity capital markets, which are challenging in the current market environment.

As of March 31, 2015, we had \$75 million in available borrowing capacity under Opco's revolving credit facility and \$27 million of available borrowing capacity under the NRP Oil and Gas revolving credit facility. Subsequent to the end of the quarter, the borrowing base on the NRP Oil and Gas revolving credit facility was redetermined to \$105.0 million, reducing our combined borrowing capacity to \$75.0 million. In addition to the amounts available under our revolving credit facilities, we had \$33.3 million in cash at March 31, 2015. Generally, we satisfy our working capital requirements with cash generated from operations. We finance our acquisitions with available cash, borrowings under our revolving credit facilities, and the issuance of debt securities and common units. We typically access the capital markets to refinance amounts outstanding under our revolving credit facilities as we approach the limits under those facilities. Our current liabilities exceeded our current assets by approximately \$123 million as of March 31, 2015, primarily as a result of the reclassification of \$75 million of long-term debt to current debt due in January 2016 and the use of cash to repay part of the principal on Opco's notes.

Capital Expenditures

Our capital expenditures, other than for acquisitions, have historically been minimal. However, as a result of our Sanish Field oil and gas and VantaCore aggregates acquisitions in the fourth quarter of 2014, we anticipate higher operating capital expenditures in 2015. A portion of the capital expenditures associated with both our oil and gas working interest business and VantaCore are maintenance capital expenditures, which are capital expenditures made to maintain the long-term production capacity of those businesses. These maintenance capital expenditures reduce our cash available for distribution to our unitholders. We finance the capital expenditures associated with our Williston Basin non-operated working interest oil and gas assets through a combination of cash flow from operations and are able to control the level of these capital expenditures by evaluating well proposals on a well-by-well basis. Total capital expenditures for NRP Oil and Gas for the three months ended March 31, 2015 were \$16.8 million. We

continue to monitor the development programs of the operators of these properties and manage the capital expenditures associated with those properties by only participating in wells that are expected to provide acceptable economic returns. The capital expenditures in connection with VantaCore's construction aggregates mining and production operations are generally funded through cash flow from operations. VantaCore's capital expenditures for the three months ended March 31, 2015 were \$1.2 million.

Cash Flows

Net cash provided by operating activities for the quarters ended March 31, 2015 and 2014 was \$55.5 million and \$38.6 million, respectively. The majority of our cash provided by operations is generated from coal royalty revenues, our equity interest in OCI Wyoming and oil and gas revenues.

Table of Contents

Net cash used in investing activities for the quarters ended March 31, 2015 and 2014 was \$11.9 million and \$1.5 million, respectively.

Net cash used in financing activities for the quarters ended March 31, 2015 and 2014 was \$60.4 million and \$74.8, respectively. During the three months ended March 31, 2015 and 2014, we had proceeds from loans of \$25.0 million and \$2.0 million, respectively. During the three months ended March 31, 2015 and 2014, these proceeds were offset by repayment of debt of \$41.2 million in each of the three month periods. Also during the three months ended March 31, 2015 and 2014, we paid cash distributions to our unitholders of \$43.7 million and \$39.2 million, respectively.

Capital Resources and Obligations

As of March 31, 2015 and December 31, 2014, we were and continue to be in compliance with the terms of all of the financial covenants contained in our debt agreements.

NRP Debt

As of the date of this filing, NRP debt consisted of \$425.0 million in principal amount of 9.125% senior notes due October 2018 (the NRP Senior Notes). Interest on the NRP Senior Notes is payable semiannually in arrears on April 1 and October 1 of each year. The NRP Senior Notes are the senior unsecured obligations of NRP and NRP Finance. The notes rank equal in right of payment to all existing and future senior unsecured debt of NRP and NRP Finance and senior in right of payment to any subordinated debt of NRP and NRP Finance. The NRP Senior Notes are effectively subordinated in right of payment to all future secured debt of NRP and NRP Finance to the extent of the value of the collateral securing such indebtedness and are structurally subordinated in right of payment to all existing and future debt and other liabilities of NRP's subsidiaries, including Opco's revolving credit facility and term loan facility, each series of Opco's existing senior notes, and NRP Oil and Gas's revolving credit facility, all of which are described below. None of NRP's subsidiaries guarantee the NRP Senior Notes.

NRP and NRP Finance have the option to redeem the NRP Senior Notes, in whole or in part, at any time on or after April 1, 2016, at fixed redemption prices specified in the indenture governing the NRP Senior Notes (the NRP Senior Notes Indenture). Before April 1, 2016, NRP and NRP Finance may redeem all or part of the NRP Senior Notes at a redemption price equal to the sum of the principal plus a make whole premium at the redemption date, plus accrued and unpaid interest, if any, to the redemption date. Furthermore, before April 1, 2016, NRP and NRP Finance may on any one or more occasions redeem up to 35% of the aggregate principal amount of the notes with the net proceeds of certain public or private equity offerings at a redemption price of 109.125% of the principal amount of notes, plus any accrued and unpaid interest, if any, to the date of redemption, if at least 65% of the aggregate principal amount of the notes issued under the indenture remains outstanding immediately after such redemption and the redemption occurs within 180 days of the closing date of such equity offering. In the event of a change of control, as defined in the indenture, the holders of the notes may require NRP and NRP Finance to purchase their notes at a purchase price equal to 101% of the principal amount of the notes, plus accrued and unpaid interest, if any.

The NRP Senior Notes Indenture contains covenants that limit the ability of NRP and certain of its subsidiaries to incur or guarantee additional indebtedness. Under this indenture, NRP and certain of its subsidiaries generally are not permitted to incur additional indebtedness unless, on a consolidated basis, the fixed charge coverage ratio (as defined in the indenture) is at least 2.0 to 1.0 for the four preceding full fiscal quarters. The ability of NRP and certain of its subsidiaries to incur additional indebtedness is further limited in the event the amount of indebtedness of NRP and its subsidiaries that is senior to NRP's unsecured indebtedness exceeds certain thresholds. The indenture contains additional covenants that, among other things, limit NRP's ability and the ability of certain of its subsidiaries to declare

or pay any dividend or distribution on, purchase or redeem units or purchase or redeem subordinated debt; make investments; create certain liens; enter into agreements that restrict distributions or other payments from NRP's restricted subsidiaries as defined in the indenture to NRP; sell assets; consolidate, merge or transfer all or substantially all of the assets of NRP and its restricted subsidiaries; engage in transactions with affiliates; create unrestricted subsidiaries; and enter into certain sale and leaseback transactions.

Table of Contents

Opco Debt

As of the date of this filing, Opco's debt consisted of the following:

\$225.0 million under a floating rate revolving credit facility, due August 2016;

\$75.0 million under a floating rate term loan, due January 2016;

\$18.5 million of 4.91% senior notes due 2018;

\$85.7 million of 8.38% senior notes due 2019;

\$46.2 million of 5.05% senior notes due 2020;

\$1.2 million of 5.31% utility local improvement obligation due 2021;

\$24.3 million of 5.55% senior notes due 2023;

\$67.5 million of 4.73% senior notes due 2023;

\$135.0 million of 5.82% senior notes due 2024;

\$40.9 million of 8.92% senior notes due 2024;

\$161.5 million of 5.03% senior notes due 2026; and

\$46.2 million of 5.18% senior notes due 2026.

Opco Revolving Credit Facility

As of the date of this report, Opco had \$75.0 million in available borrowing capacity under its \$300 million revolving credit facility (the Opco Revolving Credit Facility), which matures on August 9, 2016. Opco's obligations under the Opco Revolving Credit Facility are unsecured but are guaranteed by its subsidiaries. Opco may prepay all amounts outstanding under the Opco Revolving Credit Facility at any time without penalty. Indebtedness under the Opco Revolving Credit Facility bears interest, at our option, at either:

the Alternate Base Rate (as defined in the credit agreement) plus an applicable margin ranging from 0% to 1%; or

the Adjusted LIBO Rate (as defined in the credit agreement) plus an applicable margin ranging from 1.00% to 2.25%.

Opco incurs a commitment fee on the unused portion of the Opco Revolving Credit Facility at a rate ranging from 0.18% to 0.40% per annum.

The Opco Revolving Credit Facility contains covenants requiring Opco to maintain:

a ratio of consolidated indebtedness to consolidated EBITDDA (as defined in the credit agreement) not to exceed 4.0 to 1.0; and

a ratio of consolidated EBITDDA to consolidated fixed charges (consisting of consolidated interest expense and consolidated lease operating expense) not less than 3.5 to 1.0.

Under an accordion feature in the Opco Revolving Credit Facility, Opco may request its lenders to increase their aggregate commitment to a maximum of \$500 million on the same terms. However, Opco cannot be certain that its lenders will elect to participate in the accordion feature. To the extent the lenders decline to participate, Opco may elect to bring new lenders into the facility, but cannot make any assurance that the additional credit capacity will be available on existing or comparable terms.

Opco Term Loan

In connection with the OCI Wyoming soda ash business acquisition in January 2013, Opco entered into a 3-year, \$200 million term loan facility (the *Opco Term Loan*). The *Opco Term Loan* is guaranteed by Opco's operating subsidiaries. We repaid \$101.0 million of the *Opco Term Loan* during 2013 and an additional \$24.0 million in the fourth quarter of 2014. The remaining balance of \$75.0 million is due on January 23, 2016. The term loan facility contains financial covenants and other terms that are identical to those of Opco's revolving credit facility.

Opco Senior Notes

Opco issued the senior notes listed above (collectively the *Opco Senior Notes*) under a note purchase agreement as supplemented from time to time. The senior notes are unsecured but are guaranteed by Opco's subsidiaries. Opco may prepay the

Table of Contents

senior notes at any time together with a make-whole amount (as defined in the note purchase agreement). If any event of default exists under the note purchase agreement, the noteholders will be able to accelerate the maturity of the senior notes and exercise other rights and remedies.

The senior note purchase agreement contains covenants requiring Opco to:

Maintain a ratio of consolidated indebtedness to consolidated EBITDDA (as defined in the note purchase agreement) of no more than 4.0 to 1.0 for the four most recent quarters;

not permit debt secured by certain liens and debt of subsidiaries to exceed 10% of consolidated net tangible assets (as defined in the note purchase agreement); and

maintain the ratio of consolidated EBITDDA to consolidated fixed charges (consisting of consolidated interest expense and consolidated operating lease expense) at not less than 3.5 to 1.0.

All of Opco's senior notes require annual principal payments in addition to semi-annual interest payments. Opco also makes annual principal and interest payments on the utility local improvement obligation.

NRP Oil and Gas Debt

NRP Oil and Gas Revolving Credit Facility.

NRP Oil and Gas has a senior secured, reserve-based revolving credit facility (the NRP Oil and Gas Revolving Credit Facility) in order to fund its non-operated working interests in oil and gas assets. The NRP Oil and Gas Revolving Credit Facility will mature on November 12, 2019 and is secured by a first priority lien and security interest in substantially all of the assets of NRP Oil and Gas. NRP Oil and Gas is the sole obligor under the NRP Oil and Gas Revolving Credit Facility, and neither NRP nor any of its other subsidiaries is a guarantor of such facility. As of March 31, 2015, the borrowing base under this facility was \$137.0 million, and NRP Oil and Gas had \$110.0 million outstanding thereunder. Effective April 21, 2015, the borrowing base was reduced to \$105.0 million in connection with the regular, semi-annual redetermination thereof. As of the date of this report, NRP had \$105.0 million outstanding under this facility.

Indebtedness under the NRP Oil and Gas Revolving Credit Facility bears interest, at the option of NRP Oil and Gas, at either:

the higher of (i) the prime rate as announced by the agent bank; (ii) the federal funds rate plus 0.50%; or (iii) LIBOR plus 1%, in each case plus an applicable margin ranging from 0.50% to 1.50%; or

a rate equal to LIBOR, plus an applicable margin ranging from 1.50% to 2.50%.

NRP Oil and Gas incurs a commitment fee on the unused portion of the borrowing base under the NRP Oil and Gas Revolving Credit Facility at a rate ranging from 0.375% to 0.50% per annum.

The NRP Oil and Gas Revolving Credit Facility contains certain covenants, which, among other things, require the maintenance of (i) a total leverage ratio (defined as the ratio of the total debt of NRP Oil and Gas to its EBITDAX) of not more than 3.5 to 1.0 and (ii) a current ratio of at least 1.0 to 1.0. The NRP Oil and Gas Revolving Credit Facility also contains other customary covenants, subject to certain agreed exceptions, including covenants restricting the ability of NRP Oil and Gas to, among other items, incur indebtedness; create, assume or permit to exist liens; be a party to or be liable on any hedging contract; engage in mergers or consolidations; transfer, lease, exchange, alienate or dispose of material assets or properties; pay distributions; make any acquisitions of, capital contributions to or other investments in any entity or property; extend credit or make advances or loans; or engage in transactions with affiliates. Events of default under the NRP Oil and Gas Revolving Credit Facility include payment defaults, misrepresentations and breaches of covenants by NRP Oil and Gas. The NRP Oil and Gas Revolving Credit Facility also contains a cross-default provision with respect to any indebtedness of NRP s.

The maximum amount available under the credit facility is subject to semi-annual redeterminations of the borrowing base in May and November of each year, based on the value of the proved oil and natural gas reserves of NRP Oil and Gas, in accordance with the lenders' customary procedures and practices. NRP Oil and Gas and the lenders each have a right to one additional redetermination each year.

Anadarko Contingent Consideration Payment Claim

The purchase agreement for the acquisition of our interest in OCI Wyoming requires us to pay additional contingent consideration to Anadarko to the extent certain performance criteria described in the purchase agreement are met at OCI Wyoming in any of the years 2013, 2014 or 2015. We paid \$0.5 million and \$3.8 million of consideration in the first quarter of 2014 and 2015, respectively, in satisfaction of our obligations under this agreement with respect to 2013 and 2014. As of March 31, 2015, we estimate, and have recorded \$8.8 million as the amount that will be payable in the first quarter of 2016 with respect to 2015. We have no obligation to pay contingent consideration with respect to any period after 2015.

In March 2014, Anadarko gave us written notice that it believed certain reorganization transactions conducted in 2013 within the OCI organization triggered an acceleration of our obligation to pay the additional contingent consideration in full and demanded immediate payment of such amount. We disagreed with Anadarko's position in a written response provided to Anadarko in April 2014. In April 2015, Anadarko sent a written request for additional information regarding the OCI reorganization and indicated that they are still considering this claim against us. We do not believe the reorganization transactions triggered an obligation to pay the additional contingent consideration, and we will continue to engage in discussions with Anadarko to resolve the issue. However, if Anadarko were to pursue and prevail on such a claim, we would be required to pay an amount to Anadarko in excess of the amounts already paid, together with the \$8.8 million accrual described above, up to the maximum amount of the additional contingent consideration, minus a deductible. Under the purchase agreement, the maximum cumulative amount of additional contingent consideration is an amount equal to the net present value of \$50 million. Any additional amount paid by us would be considered to be additional acquisition consideration and added to Equity and other unconsolidated investments and would reduce our liquidity.

Shelf Registration Statement and At-the-Market Program

In April 2015, we filed an automatically effective shelf registration statement on Form S-3 with the SEC that is available for registered offerings of common units and debt securities.

In November 2013, we initiated an at-the market program to sell common units for an aggregate offering price of \$75.0 million. As of December 31, 2014, we sold 1,559,914 common units for an average price of \$16.05 for gross proceeds of \$25.0 million. During the three months ended March 31, 2015, we did not sell any common units nor pay any commissions under this at-the-market program.

Off-Balance Sheet Transactions

We do not have any off-balance sheet arrangements with unconsolidated entities or related parties and accordingly, there are no off-balance sheet risks to our liquidity and capital resources from unconsolidated entities.

Related Party Transactions

The information set forth under Note 9 to the consolidated financial statements under the caption "Related Party Transactions" is incorporated herein by reference.

Summary of Critical Accounting Estimates

The preparation of consolidated financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make certain estimates and assumptions that affect the amounts

reported in the consolidated financial statements and the accompanying notes. There have been no significant changes to our critical accounting estimates from those disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014.

Recent Accounting Standards

The information set forth under Note 1 to the consolidated financial statements under the caption Basis of Presentation is incorporated herein by reference.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risk, which includes adverse changes in commodity prices and interest rates as discussed below:

Commodity Price Risk

We are dependent upon the effective marketing of the coal mined by our lessees. Our lessees sell the coal under various long-term and short-term contracts as well as on the spot market. We estimate that over 65% of our coal is currently sold by our lessees under coal supply contracts that have terms of one year or more. Current conditions in the coal industry may make it difficult for our lessees to extend existing contracts or enter into supply contracts with terms of one year or more. Our lessees' failure to negotiate long-term contracts could adversely affect the stability and profitability of our lessees' operations and adversely affect our coal royalty revenues. If more coal is sold on the spot market, coal royalty revenues may become more volatile due to fluctuations in spot coal prices.

The market price of soda ash directly affects the profitability of OCI Wyoming's operations. If the market price for soda ash declines, OCI Wyoming's sales will decrease. Historically, the global market and, to a lesser extent, the domestic market for soda ash have been volatile, and those markets are likely to remain volatile in the future. In addition, crude oil and natural gas prices are subject to wide fluctuations in response to relatively minor changes in supply and demand. These markets will likely continue to be volatile in the future.

Interest Rate Risk

Our exposure to changes in interest rates results from our borrowings under our revolving credit facility and term loan, which are subject to variable interest rates based upon LIBOR. At March 31, 2015, we had \$410.0 million in variable interest rate debt. If interest rates were to increase by 1%, annual interest expense would increase approximately \$4.1 million, assuming the same principal amount remained outstanding during the year.

Item 4. Controls and Procedures

NRP carried out an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act) as of the end of the period covered by this report. This evaluation was performed under the supervision and with the participation of NRP management, including the Chief Executive Officer and Chief Financial Officer of the general partner of the general partner of NRP. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that these disclosure controls and procedures are effective in providing reasonable assurance that (a) the information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and (b) such information is accumulated and communicated to our management, including our CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

No changes were made to our internal control over financial reporting during the last fiscal quarter that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

We are involved, from time to time, in various legal proceedings arising in the ordinary course of business. While the ultimate results of these proceedings cannot be predicted with certainty, our management believes these claims will not have a material effect on our financial position, liquidity or operations.

Item 1A. Risk Factors

During the period covered by this report, there were no material changes from the risk factors previously disclosed in Natural Resource Partners L.P.'s Annual Report on Form 10-K for the year ended December 31, 2014.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

The information concerning mine safety violations or other regulatory matters required by SEC regulations is included in Exhibit 95.1 to this Quarterly Report on Form 10-Q.

Item 5. Other Information

None.
