Form 10-Q
August 07, 2009

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the
Securities Exchange Act of 1934

For the Quarterly Period Ended
June 30, 2009

Commission File

No. 1-13653

AMERICAN FINANCIAL GROUP, INC.

Incorporated under
the Laws of Ohio

IRS Employer I.D.
No. 31-1544320

One East Fourth Street, Cincinnati, Ohio 45202
(513) 579-2121

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes No

Edgar Filing: AMERICAN FINANCIAL GROUP INC - Form 10-Q

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company:

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer Smaller Reporting Company

Indicate by check mark whether the Registrant is a shell company. Yes No

As of August 1, 2009, there were 116,058,037 shares of the Registrant's Common Stock outstanding, excluding 14.9 million shares owned by subsidiaries.

C. <u>Fair Value Measurements</u>	H. <u>Shareholders' Equity</u>
D. <u>Investments</u>	I. <u>Contingencies</u>
E. <u>Derivatives</u>	J. <u>Condensed Consolidating Information</u>

A. Accounting Policies**Basis of Presentation**

The accompanying consolidated financial statements for American Financial Group, Inc. ("AFG") and subsidiaries are unaudited; however, management believes that all adjustments (consisting only of normal recurring accruals unless otherwise disclosed herein) necessary for fair presentation have been made. The results of operations for interim periods are not necessarily indicative of results to be expected for the year. The financial statements have been prepared in accordance with the instructions to Form 10-Q and therefore do not include all information and footnotes necessary to be in conformity with U.S. generally accepted accounting principles.

AFG adopted Statement of Financial Accounting Standards ("SFAS") No. 160, "Noncontrolling Interests in Consolidated Financial Statements," on January 1, 2009. As a result, noncontrolling interests in subsidiaries (formerly referred to as minority interest) is reported in the Balance Sheet as a separate component of equity and in the Statement of Earnings as a deduction from net income (instead of as an expense) in deriving net earnings attributable to AFG's shareholders. SFAS No. 160 requires that purchases and sales of equity interests in less than 100%-owned

subsidiaries that do not result in a change of control be accounted for as equity transactions and, upon loss of control, requires any interest retained to be recorded at fair value with a gain or loss recognized in earnings. SFAS No. 160 is required to be applied prospectively, except for the provisions related to financial statement presentation of noncontrolling interests, which have been applied retrospectively.

Certain reclassifications have been made to prior years to conform to the current year's presentation. All significant intercompany balances and transactions have been eliminated. The results of operations of companies since their formation or acquisition are included in the consolidated financial statements. Events or transactions occurring subsequent to June 30, 2009, and prior to August 7, 2009 (the filing date of this Form 10-Q), have been evaluated for potential recognition or disclosure herein.

The preparation of the financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Changes in circumstances could cause actual results to differ materially from those estimates.

Fair Value Measurements

Effective January 1, 2008, AFG adopted SFAS No. 157, "Fair Value Measurements," with the exception of the application of the statement to nonrecurring fair value measurements of nonfinancial assets and liabilities that was adopted as of January 1, 2009 in accordance with FSP FAS No. 157-2. SFAS No. 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants on the measurement date. The standard establishes a hierarchy of valuation techniques based on whether the assumptions that market participants would use in pricing the asset or liability ("inputs") are observable or unobservable. Observable inputs reflect market

AMERICAN FINANCIAL GROUP, INC. 10-Q

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

data obtained from independent sources, while unobservable inputs reflect AFG's assumptions about the assumptions market participants would use in pricing the asset or liability. In the first six months of 2009, AFG did not have any significant nonrecurring fair value measurements of nonfinancial assets and liabilities. AFG adopted FSP FAS No. 157-4 as of January 1, 2009. This standard provides guidance on estimating the fair value of an asset or liability when there is no active market and on identifying transactions that are not orderly. The standard did not change the objective of fair value measurements. Adoption of SFAS No. 157 and the FSPs did not have a significant impact on AFG's financial condition or results of operations.

In the second quarter of 2009, AFG adopted FSP FAS No. 107-1 and APB Opinion No. 28-1, "Interim Disclosures about Fair Value of Financial Instruments," which requires fair value disclosures in interim financial statements for financial instruments, including those that are not reflected in the balance sheet at fair value. Formerly, these disclosures were only required annually. Disclosures required by the FSP are contained in *Note C - "Fair Value Measurements."*

Investments

Fixed maturity and equity securities classified as "available for sale" are reported at fair value with unrealized gains and losses included in a separate component of shareholders' equity. Fixed maturity and equity securities classified as "trading" are reported at fair value with

Edgar Filing: AMERICAN FINANCIAL GROUP INC - Form 10-Q

changes in unrealized holding gains or losses during the period included in investment income. Mortgage and policy loans are carried primarily at the aggregate unpaid balance.

Premiums and discounts on fixed maturity securities are amortized using the interest method; mortgage-backed securities ("MBS") are amortized over a period based on estimated future principal payments, including prepayments. Prepayment assumptions are reviewed periodically and adjusted to reflect actual prepayments and changes in expectations.

Gains or losses on securities are determined on the specific identification basis. When a decline in the value of a specific investment is considered to be other than temporary at the balance sheet date, a provision for impairment is charged to earnings (included in realized gains (losses)) and the cost basis of that investment is reduced.

In April 2009, the Financial Accounting Standards Board ("FASB") issued FSP FAS No. 115-2, "Recognition and Presentation of Other-Than-Temporary Impairments." Under the guidance, if management can assert that it does not intend to sell an impaired fixed maturity security and it is not more likely than not that it will have to sell the security before recovery of its amortized cost basis, then an entity may separate other than temporary impairments into two components: 1) the amount related to credit losses (recorded in earnings) and 2) the amount related to all other factors (recorded in other comprehensive income (loss)). The credit-related portion of an other than temporary impairment is measured by comparing a security's amortized cost to the present value of its current expected cash flows discounted at its effective yield prior to the impairment charge. Both components are required to be shown in the Statement of Earnings. If management intends to sell an impaired security, or it is more likely than not that it will be required to sell the security before recovery, an impairment charge is required to reduce the amortized cost of that security to fair value. AFG adopted this FSP effective January 1, 2009, and recorded a cumulative effect adjustment of \$17.5 million to reclassify the non-credit component of previously recognized impairments from retained earnings to accumulated other comprehensive income (loss). Additional disclosures required by this FSP are contained in *Note D - Investments.*

7

AMERICAN FINANCIAL GROUP, INC. 10-Q

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

Certain AFG subsidiaries loan fixed maturity and equity securities to other institutions for short periods of time. The borrower is required to provide collateral on which AFG earns investment income, net of a fee to the lending agent. AFG records the collateral held (included in other assets) in its Balance Sheet at fair value. The obligation to return the collateral is included in other liabilities. The securities loaned remain a recorded asset on AFG's Balance Sheet.

Derivatives

Derivatives included in AFG's Balance Sheet are recorded at fair value and consist primarily of (i) components of certain fixed maturity securities (primarily interest-only MBS) and (ii) the equity-based component of certain annuity products (included in annuity benefits accumulated) and related call options (included in other investments) designed to be consistent with the characteristics of the liabilities and used to mitigate the risk embedded in those annuity products. Changes in the fair value of derivatives are included in earnings.

AFG adopted SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities" on January 1, 2009. SFAS No. 161 requires enhanced disclosures about objectives and strategies for using derivatives, how they are accounted for and how the instruments affect the entity's financial statements. See Note E "*Derivatives*" for the related

disclosures. Adoption of SFAS No. 161 had no impact on AFG's financial position or results of operations.

Goodwill

Goodwill represents the excess of cost of subsidiaries over AFG's equity in their underlying net assets. Goodwill is not amortized, but is subject to an impairment test at least annually.

Reinsurance

Amounts recoverable from reinsurers are estimated in a manner consistent with the claim liability associated with the reinsured policies. AFG's property and casualty insurance subsidiaries report as assets (a) the estimated reinsurance recoverable on paid and unpaid losses, including an estimate for losses incurred but not reported, and (b) amounts paid to reinsurers applicable to the unexpired terms of policies in force. Payable to reinsurers includes ceded premiums due to reinsurers as well as ceded premiums retained by AFG's property and casualty insurance subsidiaries under contracts to fund ceded losses as they become due. AFG's insurance subsidiaries also assume reinsurance from other companies. Earnings on reinsurance assumed is recognized based on information received from ceding companies.

Certain annuity and supplemental insurance subsidiaries cede life insurance policies to a third party on a funds withheld basis whereby the subsidiaries retain the assets (securities) associated with the reinsurance contracts. Interest is credited to the reinsurer based on the actual investment performance of the retained assets. These reinsurance contracts are considered to contain embedded derivatives (that must be adjusted to fair value) because the yield on the payables is based on specific blocks of the ceding companies' assets, rather than the overall creditworthiness of the ceding company. AFG determined that changes in the fair value of the underlying portfolios of fixed maturity securities is an appropriate measure of the value of the embedded derivative. The securities related to these transactions are classified as "trading." The adjustment to fair value on the embedded derivatives offsets the investment income recorded on the adjustment to fair value of the related trading portfolios.

Deferred Policy Acquisition Costs ("DPAC")

Policy acquisition costs (principally commissions, premium taxes and other marketing and underwriting expenses) related to the production of new business are deferred. For the property and

casualty companies, DPAC is limited based upon recoverability without any consideration for anticipated investment income and is charged against income ratably over the terms of the related policies. A premium deficiency is recognized if the sum of expected claims costs, claims adjustment expenses, unamortized acquisition costs and policy maintenance costs exceed the related unearned premiums. A premium deficiency is first recognized by charging any unamortized acquisition costs to expense to the extent required to eliminate the deficiency. If the premium deficiency is greater than unamortized acquisition costs, a liability is accrued for the excess deficiency and reported with unpaid losses and loss adjustment expenses.

DPAC related to annuities and universal life insurance products is deferred to the extent deemed recoverable and amortized, with interest, in relation to the present value of actual and expected gross profits on the policies. To the

extent that realized gains and losses result in adjustments to the amortization of DPAC related to annuities, such adjustments are reflected as components of realized gains (losses).

DPAC related to annuities is also adjusted, net of tax, for the change in amortization that would have been recorded if the unrealized gains (losses) from securities had actually been realized. This adjustment is included in unrealized gains (losses) on marketable securities, a component of "Accumulated Other Comprehensive Income (Loss), net of tax" in the Shareholders' Equity section of the Balance Sheet.

DPAC related to traditional life and health insurance is amortized over the expected premium paying period of the related policies, in proportion to the ratio of annual premium revenues to total anticipated premium revenues.

DPAC includes the present value of future profits on business in force of annuity and supplemental insurance companies acquired ("PVFP"). PVFP represents the portion of the costs to acquire companies that is allocated to the value of the right to receive future cash flows from insurance contracts existing at the date of acquisition. PVFP is amortized with interest in relation to expected gross profits of the acquired policies for annuities and universal life products and in relation to the premium paying period for traditional life and health insurance products.

Unpaid Losses and Loss Adjustment Expenses

The net liabilities stated for unpaid claims and for expenses of investigation and adjustment of unpaid claims are based upon (a) the accumulation of case estimates for losses reported prior to the close of the accounting period on direct business written; (b) estimates received from ceding reinsurers and insurance pools and associations; (c) estimates of unreported losses (including possible development on known claims) based on past experience; (d) estimates based on experience of expenses for investigating and adjusting claims; and (e) the current state of the law and coverage litigation. Establishing reserves for asbestos, environmental and other mass tort claims involves considerably more judgment than other types of claims due to, among other things, inconsistent court decisions, an increase in bankruptcy filings as a result of asbestos-related liabilities, novel theories of coverage, and judicial interpretations that often expand theories of recovery and broaden the scope of coverage.

Loss reserve liabilities are subject to the impact of changes in claim amounts and frequency and other factors. Changes in estimates of the liabilities for losses and loss adjustment expenses are reflected in the Statement of Earnings in the period in which determined. Despite the variability inherent in such estimates, management believes that the liabilities for unpaid losses and loss adjustment expenses are adequate.

Annuity Benefits Accumulated

Annuity receipts and benefit payments are recorded as increases or decreases in "annuity benefits accumulated" rather than as revenue and expense. Increases in this liability for interest credited are charged to expense and decreases for surrender charges are credited to other income.

Life, Accident and Health Reserves

Edgar Filing: AMERICAN FINANCIAL GROUP INC - Form 10-Q

Liabilities for future policy benefits under traditional life, accident and health policies are computed using the net level premium method. Computations are based on the original projections of investment yields, mortality, morbidity and surrenders and include provisions for unfavorable deviations. Reserves established for accident and health claims are modified as necessary to reflect actual experience and developing trends.

Variable Annuity Assets and Liabilities

Separate accounts related to variable annuities represent the fair value of deposits invested in underlying investment funds on which AFG earns a fee. Investment funds are selected and may be changed only by the policyholder, who retains all investment risk.

Premium Recognition

Property and casualty premiums are earned generally over the terms of the policies on a pro rata basis. Unearned premiums represent that portion of premiums written which is applicable to the unexpired terms of policies in force. On reinsurance assumed from other insurance companies or written through various underwriting organizations, unearned premiums are based on information received from such companies and organizations. For traditional life, accident and health products, premiums are recognized as revenue when legally collectible from policyholders. For interest-sensitive life and universal life products, premiums are recorded in a policyholder account, which is reflected as a liability. Revenue is recognized as amounts are assessed against the policyholder account for mortality coverage and contract expenses.

Noncontrolling Interests

For Balance Sheet purposes, noncontrolling interests represents the interests of shareholders other than AFG in consolidated entities. In the Statement of Earnings, net earnings attributable to noncontrolling interests represents such shareholders' interest in the earnings of those entities.

Income Taxes

Deferred income taxes are calculated using the liability method. Under this method, deferred income tax assets and liabilities are determined based on differences between financial reporting and tax bases and are measured using enacted tax rates. Deferred tax assets are recognized if it is more likely than not that a benefit will be realized.

AFG records a liability for the inherent uncertainty in quantifying its income tax provisions. Related interest and penalties are recognized as a component of tax expense.

Stock-Based Compensation

All share-based grants are recognized as compensation expense over their vesting periods based on their calculated "fair value" at the date of grant. AFG uses the Black-Scholes pricing model to measure the fair value of employee stock options. See Note H - "Shareholders' Equity" for further information on stock options.

Benefit Plans

AFG provides retirement benefits to qualified employees of participating companies through the AFG Retirement and Savings Plan, a defined contribution plan. AFG makes all contributions to the retirement fund portion of the plan and matches a percentage of employee contributions to the savings fund. Company contributions are expensed in the year for which they are declared. AFG

AMERICAN FINANCIAL GROUP, INC. 10-Q

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

and many of its subsidiaries provide health care and life insurance benefits to eligible retirees. AFG also provides postemployment benefits to former or inactive employees (primarily those on disability) who were not deemed retired under other company plans. The projected future cost of providing these benefits is expensed over the period employees earn such benefits.

Earnings Per Share

Basic earnings per share is calculated using the weighted average number of shares of common stock outstanding during the period. The calculation of diluted earnings per share includes the following adjustments to weighted average common shares (in millions):

	Three months ended <u>June 30.</u>		Six months ended <u>June 30.</u>	
	<u>2009</u>	<u>2008</u>	<u>2009</u>	<u>2008</u>
Stock-based compensation plans	.7	1.7	.8	1.9
Convertible notes	-	1.3	-	1.6

AFG's weighted average diluted shares outstanding excludes the following anti-dilutive potential common shares related to stock compensation plans: second quarter of 2009 and 2008 - 6.8 million and 4.4 million; six months of 2009 and 2008 - 7.7 million and 4.1 million, respectively. Adjustments to net earnings attributable to shareholders in the calculation of diluted earnings per share were nominal in the 2009 or 2008 periods.

Statement of Cash Flows

For cash flow purposes, "investing activities" are defined as making and collecting loans and acquiring and disposing of debt or equity instruments and property and equipment. "Financing activities" include obtaining resources from owners and providing them with a return on their investments, borrowing money and repaying amounts borrowed. Annuity receipts, benefits and withdrawals are also reflected as financing activities. All other activities are considered "operating." Short-term investments having original maturities of three months or less when purchased are considered to be cash equivalents for purposes of the financial statements.

B. Segments of Operations AFG manages its business as three segments: (i) property and casualty insurance, (ii) annuity and supplemental insurance and (iii) other, which includes holding company costs.

AFG reports its property and casualty insurance business in the following Specialty sub-segments:

- (i) Property and transportation, which includes physical damage and liability coverage for buses, trucks and recreational vehicles, inland and ocean marine, agricultural-related products and other property coverages,
- (ii) Specialty casualty, which includes primarily excess and surplus, general liability, executive liability, umbrella and excess liability and customized programs for small to mid-sized businesses,
- (iii) Specialty

financial, which includes risk management insurance programs for lending and leasing institutions (including collateral and mortgage protection insurance), surety and fidelity products and trade credit insurance, and (iv) California workers' compensation. AFG's annuity and supplemental insurance business markets traditional fixed, indexed and variable annuities and a variety of supplemental insurance products. AFG's reportable segments and their components were determined based primarily upon similar economic characteristics, products and services.

C.

Fair Value Measurements The framework established in SFAS No. 157 for measuring fair value is based on inputs used in estimating fair value. The three levels of the hierarchy are as follows:

Level 1 - Quoted prices for identical assets or liabilities in active markets (markets in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis).

Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar assets or liabilities in inactive markets (markets in which there are few transactions, the prices are not current, price quotations vary substantially over time or among market makers, or in which little information is released publicly); and valuations based on other significant inputs that are observable in active markets.

Level 3 - Valuations derived from valuation techniques in which one or more significant inputs are unobservable. The unobservable inputs may include management's own assumptions about the assumptions market participants would use based on the best information available in the circumstances.

AFG's Level 1 financial instruments consist primarily of publicly traded equity securities and highly liquid government bonds for which quoted market prices in active markets are available. AFG's Level 2 financial instruments include separate account assets and liabilities, corporate and municipal fixed maturity securities and mortgage-backed securities ("MBS") priced using observable inputs. Level 2 inputs include benchmark yields, reported trades, corroborated broker/dealer quotes, issuer spreads and benchmark securities. When non-binding broker quotes can be corroborated by comparison to similar securities priced using observable inputs, they are classified as Level 2. AFG's Level 3 is comprised of financial instruments whose fair value is estimated based on non-binding broker quotes or internally developed using significant inputs not based on, or corroborated by, readily available market information.

AFG's management is responsible for the valuation process and uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value. This data is reviewed by internal investment professionals who ensure the fair value is representative of an exit price (consistent with SFAS No. 157).

Assets and liabilities measured at fair value on June 30, 2009, are summarized below (in millions):

Edgar Filing: AMERICAN FINANCIAL GROUP INC - Form 10-Q

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Assets:				
Fixed maturities:				
Available for sale ("AFS")	\$302	\$13,879	\$712	\$14,893
Trading	-	320	5	325
Equity securities:

benefits accumulated	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 93</u>	<u>\$ 93</u>

(a) Variable annuity liabilities equal the fair value of variable annuity assets.

13

AMERICAN FINANCIAL GROUP, INC. 10-Q

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

Approximately 4-1/2% of the total assets measured at fair value were Level 3 assets. Approximately 50% of these assets were MBS whose fair values were determined primarily using non-binding broker quotes; the balance was primarily private placement debt and equity securities whose fair values were determined internally using significant unobservable inputs, including the evaluation of underlying collateral and issuer creditworthiness, as well as certain Level 2 inputs such as comparable yields and multiples on similar publicly traded issues.

Changes in balances of Level 3 financial assets and liabilities during the second quarter and first six months of 2009 and 2008 are presented below (in millions). Transfers into (out of) Level 3 are due to a change in the availability of market observable inputs for individual securities and are reflected in the table at fair value as of the date of transfer.

Fair Value of Financial Instruments

The following table presents (in millions) the carrying value and estimated fair value of AFG's financial instruments at June 30, 2009 and December 31, 2008.

	<u>June 30, 2009</u>		<u>December 31, 2008</u>	
	<u>Carrying</u>	<u>Fair</u>	<u>Carrying</u>	<u>Fair</u>
	<u>Value</u>	<u>Value</u>	<u>Value</u>	<u>Value</u>

Assets:

Edgar Filing: AMERICAN FINANCIAL GROUP INC - Form 10-Q

Cash and cash equivalents	\$ 1,451	\$ 1,451	\$ 1,264	\$ 1,264
Fixed maturities	15,218	15,218	14,360	14,360
Equity securities	354	354	354	354
Mortgage loans	308	303	309	303
Policy loans	278	278	284	284
Variable annuity assets (separate accounts)	458	458	416	416
Liabilities:				
Annuity benefits accumulated(*)	\$10,657	\$10,018	\$10,436	\$ 9,536
Long-term debt	915	830	1,030	916
Variable annuity liabilities (separate accounts)	458	458	416	416

(*) Excludes life contingent annuities in the payout phase.

The carrying amount of cash and cash equivalents approximates fair value. Fair values for mortgage loans are estimated by discounting the future contractual cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings. The fair value of policy loans is estimated to approximate carrying value; policy loans have no defined maturity dates and are inseparable from insurance contracts. The fair value of annuity benefits was estimated based on expected cash flows discounted using forward interest rates adjusted for the Company's credit risk and includes the impact of maintenance expenses and capital costs. Fair values of long-term debt are based primarily on quoted market prices.

D. Investments

Available for sale fixed maturities and equity securities at June 30, 2009, and December 31, 2008, consisted of the following (in millions):

Perpetual Preferred Stocks	<u>(\$ 19)</u>	<u>\$ 61</u>	76%	<u>(\$ 24)</u>	<u>\$ 35</u>	59%

At June 30, 2009, the gross unrealized losses of \$1.4 billion relate to approximately 1,770 fixed maturity securities. Investment grade securities (as determined by nationally recognized rating agencies) represented approximately 76% of the gross unrealized loss and 89% of the fair value. MBS and corporate bonds comprised approximately 87% of the fair value of the available for sale fixed maturity portfolio at June 30, 2009, and 99% of the gross unrealized losses. Gross unrealized losses on these two groups increased significantly during 2008 as widespread deterioration in economic conditions resulted in significantly wider spreads. Approximately 77% of the gross unrealized losses on these two groups at June 30, 2009, included securities that were in an unrealized loss position for more than 12 months.

Gross Unrealized Losses on MBS

At June 30, 2009, gross unrealized losses on AFG's MBS represented 63% of the total gross unrealized loss on fixed maturity securities. All of AFG's commercial MBS are investment grade rated. Of the residential MBS that have been in an unrealized loss position ("impaired") for 12 months or more (435 securities), approximately 76% of the unrealized losses and 92% of the fair value relate to investment grade rated securities. AFG analyzes its MBS securities for impairment each quarter based upon expected future cash flows. Management estimates expected future cash flows based upon its knowledge of the MBS market, cash flow projections (which reflect loan to collateral values, subordination, vintage and geographic concentration) received

16

AMERICAN FINANCIAL GROUP, INC. 10-Q

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

from independent sources, implied cash flows inherent in security ratings and analysis of historical payment data. For the second quarter and first six months of 2009, AFG recorded in earnings \$13.7 million and \$50.4 million, respectively, in other than temporary impairment charges related to its residential MBS. For the same periods AFG recorded \$25.4 million and \$185.5 million, respectively, in other comprehensive income (loss) for the non-credit portion of these impairment charges.

Gross Unrealized Losses on All Other Corporates

Regarding the "all other corporate" securities that were impaired for 12 months or more at June 30, 2009 (521 securities), \$187 million (41%) of the gross unrealized loss related to investments in debt securities of banks, credit and lending institutions. Investment grade rated securities represented 82% of the unrealized loss and 93% of the fair value. Approximately \$100 million of the unrealized loss (44 securities) relates to securities that were more than 20% impaired. Of these, 44% had been more than 20% impaired for less than six consecutive months and 53% for more than six months but less than one year.

An additional \$85 million (19%) of the unrealized loss on "all other corporate" securities with unrealized losses for more than one year related to investments in insurance companies. Investment grade rated securities represented 88% of the unrealized loss and 94% of the fair value. Approximately \$53 million of the unrealized loss (17 securities) relates to securities that were more than 20% impaired. Of these, 59% had been more than 20% impaired for less than six consecutive months and 41% for more than six months but less than one year.

The remaining \$182 million in unrealized losses for "all other corporate" securities that have been in a loss position for more than one year relates to 319 securities spread across a wide variety of industries and issuers. Approximately 45% of the unrealized loss (57 securities) relates to securities that were more than 20% impaired. Of these, 44% had been more than 20% impaired for less than six months and 53% had been more than 20% impaired for more than six months but less than one year. Management intends to hold these securities and has concluded that the unrealized losses were temporary and due primarily to widened credit spreads and sector-related issues.

AFG recognized in earnings approximately \$42.9 million and \$95.5 million in other than temporary impairment charges on "all other corporate" securities during the three and six months ended June 30, 2009, respectively. Management concluded that no additional charges for other than temporary impairment were required based on many factors, including AFG's ability and intent to hold the investments for a period of time sufficient to allow for anticipated recovery of its amortized cost, the length of time and the extent to which fair value has been below cost,

analysis of historical and projected company-specific financial data, the outlook for industry sectors, credit ratings, and credit enhancement of certain issues by monoline insurers.

Gross Unrealized Losses on Perpetual Preferred Stocks

AFG recognized in earnings \$4.6 million and \$11.3 million in other than temporary impairment charges on its perpetual preferred stocks for the three and six months ended June 30, 2009, respectively. Approximately 67% of the gross unrealized losses on AFG's perpetual preferred stocks relate to investments in banks and credit institutions, all of which were investment grade rated. AFG believes these unrealized losses are due primarily to temporary market and sector-related factors and does not consider these securities to be other than temporarily impaired. AFG has the ability and intent to hold these securities until they recover in value.

AMERICAN FINANCIAL GROUP, INC. 10-Q

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - CONTINUED

The following tables progress the credit portion of other than temporary impairments on fixed maturity securities for which the non-credit portion of an impairment has been recognized in other comprehensive income (loss) (in millions).

Balance at March 31, 2009	\$60.5
Additional credit impairments on:	
Previously impaired securities	9.9
Securities without prior impairments	4.0
Reductions - disposals	<u>(7.3)</u>

)

Balance at June 30, 2009	<u>\$67.1</u>
--------------------------	---------------

Balance at January 1, 2009	\$13.7
Additional credit impairments on:	
Previously impaired securities	9.9
Securities without prior impairments	50.8
Reductions - disposals	<u>(7.3)</u>

)

Balance at June 30, 2009	<u>\$67.1</u>
--------------------------	---------------

Edgar Filing: AMERICAN FINANCIAL GROUP INC - Form 10-Q

The table below sets forth the scheduled maturities of available for sale fixed maturities as of June 30, 2009 (in millions). Asset-backed securities and other securities with sinking funds are reported at average maturity. Actual maturities may differ from contractual maturities because certain securities may be called or prepaid by the issuers. MBS had an average life of approximately five years at June 30, 2009.

<u>Maturity</u>	Amortized		<u>Fair Value</u>
	<u>Cost</u>	<u>Amount</u>	<u>%</u>
One year or less	\$ 569	\$ 572	4%
After one year through five years	4,666	4,590	31
After five years through ten years	4,437	4,237	28
After ten years	<u>708</u>	<u>682</u>	<u>5</u>
	10,380	10,081	68
MBS	<u>5,630</u>	<u>4,812</u>	<u>32</u>
Total	<u>\$16,010</u>	<u>\$14,893</u>	<u>100</u>

%

Certain risks are inherent in connection with fixed maturity securities, including loss upon default, price volatility in reaction to changes in interest rates, and general market factors and risks associated with reinvestment of proceeds due to prepayments or redemptions in a period of declining interest rates.

Investments in fixed maturity securities of banks and credit institutions represent approximately 12% of AFG's available for sale fixed maturities. There were no investments in individual issuers (other than U.S. Treasury Notes) that exceeded 10% of Shareholders' Equity at June 30, 2009 or December 31, 2008. AFG subsidiaries held collateral for securities on loan of less than \$1 million at June 30, 2009 and approximately \$85 million at December 31, 2008. Fair value of securities loaned (plus accrued interest) was approximately \$94 million at December 31, 2008.

Net Unrealized Loss on Marketable Securities

In addition to adjusting equity securities and fixed maturity securities classified as "available for sale" to fair value, GAAP requires that deferred policy acquisition costs related to annuities and certain other balance sheet amounts be adjusted to the extent that unrealized gains and losses from securities would result in adjustments to those balances had the unrealized gains or losses actually been realized. The following table shows the components of the net unrealized loss on securities that is included in Accumulated Other Comprehensive Income

Edgar Filing: AMERICAN FINANCIAL GROUP INC - Form 10-Q

(Loss) in AFG's Balance Sheet.

Realized - impairments	(61.1)	(109.3)	12.9	55.1	-	(102.4)
Change in Unrealized	(424.2)	(10.7)	(2.7)	151.4	4.3	(281.9)

(*) Primarily adjustments to deferred policy acquisition costs related to annuities.

Realized gains includes net gains of \$61.2 million and \$97.3 million in the second quarter and first six months of 2009, respectively, from the mark-to-market of derivative MBS, primarily interest-only securities with interest rates

that float inversely with short-term rates. In the 2008 periods, realized gains included \$12.1 million in the second quarter and \$48.6 million for the first six months from the mark-to-market of these securities. Gross gains and losses

(excluding impairment writedowns and mark-to-market of derivatives) on available for sale fixed maturity investment transactions included in the Statement of Cash Flows consisted of the following (in millions):

	<u>Six months ended</u> <u>June 30,</u>	
	<u>2009</u>	<u>2008</u>
Gross Gains	\$44.4	\$24.1
Gross Losses	(8.6)	(9.9)

- E. **Derivatives** As discussed under "*Derivatives*" in Note A, AFG has derivatives in certain areas of its operations. AFG's derivatives do not qualify for hedge accounting under GAAP; changes in the fair value of derivatives are included in earnings.

Certain securities held in AFG's investment portfolio, primarily interest-only MBS with interest rates that float inversely with short-term rates, are considered to contain embedded derivatives. AFG has elected to measure these securities (in their entirety) at fair value in its financial statements. These investments are part of AFG's overall investment strategy and represent a small component of AFG's overall investment portfolio.

AFG's indexed annuities, which represented 24% of annuity benefits accumulated at June 30, 2009, provide policyholders with a crediting rate tied, in part, to the performance of an existing stock market index. AFG attempts to mitigate the risk in the index-based component of these products through the purchase of call options on the appropriate index. AFG's strategy is designed so that an increase in the liabilities, due to an increase in the market index, will be generally offset by unrealized and realized gains on the call options purchased by AFG. Both the index-based component of the annuities and the related call options are considered derivatives.

As discussed under "*Reinsurance*" in Note A, certain reinsurance contracts in AFG's annuity and supplemental insurance business are considered to contain embedded derivatives.

The following derivatives are included in AFG's Balance Sheet at June 30, 2009 (in millions):

<u>Derivative</u>	<u>Balance Sheet Line</u>	<u>Fair Value</u>	
		<u>Asset</u>	<u>Liability</u>
Derivative MBS	Fixed maturities	\$210	\$ -
Indexed annuities (embedded derivative)	Annuity benefits accumulated	-	93

		<u>\$42</u>	<u>\$82</u>

F. **Amortizable Intangible Assets** Included in deferred policy acquisition costs in AFG's Balance Sheet are \$241.1 million and \$247.0 million at June 30, 2009, and December 31, 2008, respectively, representing the present value of future profits ("PVFP") related to acquisitions by AFG's annuity and supplemental insurance business. The PVFP amounts include adjustments related to unrealized gains and losses on securities and are net of \$134.0 million and \$118.5 million of accumulated amortization. Amortization of the PVFP

Edgar Filing: AMERICAN FINANCIAL GROUP INC - Form 10-Q

was \$7.5 million in the second quarter and \$15.5 million during the first six months of 2009 and \$7.6 million in the second quarter and \$16.3 million during the first six months of 2008, respectively.

Included in other assets in AFG's Balance Sheet is \$69.0 million at June 30, 2009 and \$76.4 million at December 31, 2008, in amortizable intangible assets related to property and casualty insurance acquisitions, primarily the 2008 acquisitions of Marketform and Strategic Comp. These amounts are net of accumulated amortization of \$50.5 million and \$38.0 million, respectively. Amortization of these intangibles was \$6.3 million in the second quarter and \$12.5 million during the first six months of 2009 compared to \$6.9 million in the second quarter and \$12.1 million during the first six months of 2008.

G. Long-Term Debt

The carrying value of long-term debt consisted of the following (in millions):

	June 30, <u>2009</u>	December 31, <u>2008</u>
Direct obligations of AFG:		
9-7/8% Senior Notes due June 2019	\$350.0	\$ -
7-1/8% Senior Debentures due February 2034	115.0	115.0
7-1/8% Senior Debentures due April 2009	-	136.1
Borrowings under bank credit facility	100.0	465.0
Other	<u>2.9</u>	<u>2.9</u>
	<u>567.9</u>	<u>719.0</u>
 Subsidiaries		
:		
Obligations of AAG Holding (guaranteed by AFG):		
7-1/2% Senior Debentures due November 2033	112.5	112.5
7-1/4% Senior Debentures due January 2034	86.3	86.3
Notes payable secured by real estate		
due 2009 through 2016	66.3	66.9
Secured borrowings	37.3	-
National Interstate bank credit facility	15.0	15.0
American Premier Underwriters 10-7/8% Subordinated		
Notes due May 2011	7.9	7.9
Other	<u>2.1</u>	<u>2.1</u>

	<u>327.4</u>	<u>290.7</u>
Payable to Subsidiary Trusts:		
AAG Holding Variable Rate Subordinated Debentures due May 2033	<u>20.0</u>	<u>20.0</u>
	<u>\$915.3</u>	<u>\$1,029.7</u>

Scheduled principal payments on debt for the balance of 2009 and the subsequent five years were as follows: 2009 - \$2.6 million; 2010 - \$12.5 million; 2011 - \$119.9 million; 2012 - \$26.8 million; 2013 - \$4.3 million; and 2014 - \$1.6 million.

As shown below (in millions), the majority of AFG's long-term debt is unsecured obligations of the holding company and its subsidiaries:

	June 30, <u>2009</u>	December 31, -
		2008
Unsecured obligations	\$811.7	\$ 962.8
Obligations secured by real estate	66.3	66.9
	<u>37.3</u>	<u>-</u>
Other secured borrowings	<u>\$915.3</u>	<u>\$1,029.7</u>

AFG can borrow up to \$500 million under its revolving credit facility, which expires in March 2011. Amounts borrowed bear interest at rates ranging from .5% to 1.25% (currently .75%) over LIBOR based on AFG's credit rating. At June 30, 2009, AFG had \$100 million in borrowings outstanding under the credit facility (interest rate of 1.1% at June 30, 2009).

In April 2009, AFG paid \$136.1 million to redeem its outstanding 7-1/8% Senior Notes at maturity. In June 2009, AFG issued \$350 million of 9-7/8% Senior Notes due 2019 and used the proceeds to repay borrowings under the credit facility. As a result of this issuance, AFG terminated its 364 day credit facility under which it could borrow up to \$120 million.

In March and April 2009, an AFG subsidiary borrowed a total of \$40.3 million at an interest rate of 4.25% over LIBOR (interest rate of 4.6% at June 30, 2009). The loan requires principal payments over the next four years.

H.

Shareholders' Equity AFG is authorized to issue 12.5 million shares of Voting Preferred Stock and 12.5 million shares of Nonvoting Preferred Stock, each without par value.

Accumulated Other Comprehensive Income (Loss), Net of Tax

Comprehensive income (loss) is defined as all changes in Shareholders' Equity except those arising from transactions with shareholders. Comprehensive income (loss) includes net earnings and other comprehensive income (loss), which consists primarily of changes in net unrealized gains or losses on available for sale securities and foreign currency translation. The progression of the components of accumulated other comprehensive income (loss) follows (in millions):

	Pretax Net Unrealized Gains (Losses) <u>on Securities</u>	Foreign Currency Translation <u>Adjustment</u>	<u>Other (a)</u>	Tax Effects	Noncon- trolling Interests	Accumulated Other Comprehensive Income (Loss)

Balance at June 30, 2008	(\$ 468.5)	\$26.1	\$4.9	\$159.7	\$6.7	(\$271.1)
--------------------------	------------	--------	-------	---------	-------	-----------

- (a) Net unrealized pension and other postretirement plan benefits.
 (b) Includes \$123.3 million in pretax unrealized losses (\$79.2 million net of tax) related to securities for which only the credit portion of an other than temporary impairment has been recorded in earnings.

Stock Incentive Plans

Under AFG's Stock Incentive Plan, employees of AFG and its subsidiaries are eligible to receive equity awards in the form of stock options, stock appreciation rights, restricted stock awards, restricted stock units and stock awards. In the first six months of 2009, AFG issued 79,801 shares of restricted Common Stock and granted stock options for 1.2 million shares of Common Stock (at an average exercise price of \$19.10) under the Stock Incentive Plan.

AFG uses the Black-Scholes option pricing model to calculate the "fair value" of its option grants. Expected volatility is based on historical volatility over a period equal to the expected term. The expected term was estimated based on historical exercise patterns and post vesting cancellations. The fair value of options granted during 2009 was \$5.85 per share based on the following assumptions: expected dividend yield - 2.7%; expected volatility - 37%; expected term - 7.5 years; risk-free rate - 2.1%.

Total compensation expense related to stock incentive plans of AFG and its subsidiaries was as follows: second quarter of 2009 and 2008 - \$3.3 million and \$3.4 million, respectively; six months of 2009 and 2008 - \$6.7 million and \$8.5 million, respectively. Stock-based compensation expense for the first six months of 2008 includes \$2.0 million in first quarter non-deductible stock awards.

Contingencies There have been no significant changes to the matters discussed and referred to in Note L - "Contingencies" of AFG's 2008 Annual Report on Form 10-K covering property and casualty insurance reserves for claims related to

AMERICAN FINANCIAL GROUP, INC. 10-Q

FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. Some of the forward-looking statements can be identified by the use of words such as "anticipates", "believes", "expects", "estimates", "intends", "plans", "seeks", "could", "may", "should", "will" or the negative version of those words or other comparable terminology. Such forward-looking statements include statements relating to: expectations concerning market and other conditions and their effect on future premiums, revenues, earnings and investment activities; recoverability of asset values; expected losses and the adequacy of reserves for asbestos, environmental pollution and mass tort claims; rate changes; and improved loss experience.

Actual results or financial condition could differ materially from those contained in or implied by such forward-looking statements for a variety of factors including:

Edgar Filing: AMERICAN FINANCIAL GROUP INC - Form 10-Q

- ◆ changes in financial, political and economic conditions, including changes in interest rates and extended economic recessions or expansions;
- ◆ performance of securities markets;
- ◆ our ability to estimate accurately the likelihood, magnitude and timing of any losses in connection with investments in the non-agency residential mortgage market, especially in the subprime and Alt-A sectors;
- ◆ new legislation or declines in credit quality or credit ratings that could have a material impact on the valuation of securities in our investment portfolio, including mortgage-backed securities;
- ◆ the availability of capital;
- ◆ regulatory actions;
- ◆ changes in legal environment affecting AFG or its customers;
- ◆ tax law and accounting changes;
- ◆ levels of natural catastrophes, terrorist activities (including any nuclear, biological, chemical or radiological events), incidents of war and other major losses;
- ◆ development of insurance loss reserves and establishment of other reserves, particularly with respect to amounts associated with asbestos and environmental claims;
- ◆ availability of reinsurance and ability of reinsurers to pay their obligations;
- ◆ the unpredictability of possible future litigation if certain settlements of current litigation do not become effective;
- ◆ trends in persistency, mortality and morbidity;
- ◆ competitive pressures, including the ability to obtain adequate rates; and
- ◆ changes in AFG's credit ratings or the financial strength ratings assigned by major ratings agencies to our operating subsidiaries.

The forward-looking statements herein are made only as of the date of this report. The Company assumes no obligation to publicly update any forward-looking statements.

AMERICAN FINANCIAL GROUP, INC. 10-Q

Management's Discussion and Analysis

of Financial Condition and Results of Operations - Continued

OVERVIEW

Financial Condition

AFG is organized as a holding company with almost all of its operations being conducted by subsidiaries. AFG, however, has continuing cash needs for administrative expenses, the payment of principal and interest on borrowings, shareholder dividends, and taxes. Therefore, certain analyses are best done on a parent only basis while others are best done on a total enterprise basis. In addition, because most of its businesses are financial in nature, AFG does not prepare its consolidated financial statements using a current-noncurrent format. Consequently, certain traditional ratios and financial analysis tests are not meaningful.

Results of Operations

Through the operations of its subsidiaries, AFG is engaged primarily in property and casualty insurance, focusing on specialized commercial products for businesses and in the sale of traditional fixed, indexed and variable annuities and a variety of supplemental insurance products.

Net earnings attributable to AFG's shareholders for the second quarter and first six months of 2009 were \$127 million (\$1.09 per share, diluted) and \$231 million (\$1.98 per share, diluted), respectively compared to \$60 million (\$.52 per

share, diluted) and \$136 million (\$1.16 per share, diluted) reported in the same periods of 2008. The improved results reflect lower realized losses on investments (including other than temporary impairments), higher investment income and improved underwriting results in the property and casualty insurance operations.

CRITICAL ACCOUNTING POLICIES

Significant accounting policies are summarized in Note A to the financial statements. The preparation of financial statements requires management to make estimates and assumptions that can have a significant effect on amounts reported in the financial statements. As more information becomes known, these estimates and assumptions change and thus impact amounts reported in the future. The areas where management believes the degree of judgment required to determine amounts recorded in the financial statements make accounting policies critical are as follows:

- ◆ the establishment of insurance reserves, especially asbestos and environmental-related reserves,
- ◆ the recoverability of reinsurance,
- ◆ the recoverability of deferred acquisition costs,
- ◆ the establishment of asbestos and environmental reserves of former railroad and manufacturing operations, and
- ◆ the valuation of investments, including the determination of "other-than-temporary" impairments.

For a discussion of these policies, see *Management's Discussion and Analysis - "Critical Accounting Policies" in AFG's 2008 Form 10-K*.

Management's Discussion and Analysis

of Financial Condition and Results of Operations - Continued

LIQUIDITY AND CAPITAL RESOURCES

Ratios

AFG's debt to total capital ratio on a consolidated basis is shown below (dollars in millions).

	June 30,	<u>December 31,</u>	
	<u>2009</u>	<u>2008</u>	<u>2007</u>
Long-term debt	\$ 915	\$1,030	\$ 937
Total capital (*)	4,529	4,351	4,108
Ratio of debt to total capital:			
Including debt secured by real estate	20.2%	23.7%	22.8%
Excluding debt secured by real estate	19.0%	22.5%	21.5%

(*) Includes long-term debt, noncontrolling interests and shareholders' equity (excluding unrealized gains (losses) related to fixed maturity investments).

AFG's ratio of earnings to fixed charges, including annuity benefits as a fixed charge, was 2.51 for the six months ended June 30, 2009 and 1.63 for the entire year of 2008. Excluding annuity benefits, this ratio was 11.25 and 4.75, respectively. Although the ratio excluding interest on annuities is not required or encouraged to be disclosed under Securities and Exchange Commission rules, it is presented because interest credited to annuity policyholder accounts is not always considered a borrowing cost for an insurance company.

Sources of Funds

Parent Holding Company Liquidity

Management believes AFG has sufficient resources to meet its liquidity requirements. If funds generated from operations, including dividends, tax payments and borrowings from subsidiaries, are insufficient to meet fixed charges in any period, AFG would be required to utilize parent company cash and marketable securities or to generate cash through borrowings, sales of other assets, or similar transactions.

AFG retired the \$136 million of 7-1/8% Senior Debentures at maturity in April 2009, using cash on hand.

In June 2009, AFG issued \$350 million of 9-7/8% Senior Notes due 2019. As a result of this issuance, AFG terminated its 364 day credit facility under which it could borrow up to \$120 million and voided its intercompany credit facility with a subsidiary under which it could borrow up to \$50 million.

AFG can borrow up to \$500 million under its revolving credit facility, which expires in 2011. AFG had \$100 million in borrowings outstanding under this agreement at June 30, 2009, bearing interest at a rate of 1.1%.

Under tax allocation agreements with AFG, its 80%-owned U.S. subsidiaries generally pay taxes to (or recover taxes from) AFG based on each subsidiary's contribution to amounts due under AFG's consolidated tax return.

Subsidiary Liquidity

In December 2007, National Interstate, a 53%-owned property and casualty insurance subsidiary, entered into a five-year unsecured credit agreement under which it can borrow up to \$75 million, subject to certain conditions. Amounts borrowed bear interest at rates ranging from .45% to .9% (currently .65%) over LIBOR based on National Interstate's credit rating.

In July 2009, Great American Life Insurance Company ("GALIC"), a wholly-owned annuity and supplemental insurance subsidiary, was approved for membership in the Federal Home Loan Bank of Cincinnati ("FHLB"). The FHLB makes loans and provides other banking services to member institutions.

Members are required to purchase stock in the FHLB in addition to maintaining collateral deposits that back any funds borrowed. Upon purchase, GALIC's \$14.5 million of FHLB capital stock will be included in investment in equity securities. Membership in the FHLB will provide the annuity and supplemental insurance operations with a substantial additional source of liquidity.

The liquidity requirements of AFG's insurance subsidiaries relate primarily to the liabilities associated with their products as well as operating costs and expenses, payments of dividends and taxes to AFG and contributions of capital to their subsidiaries. Historically, cash flows from premiums and investment income have provided more than sufficient funds to meet these requirements without requiring a sale of investments or contributions from AFG. Funds received in excess of cash requirements are generally invested in additional marketable securities. In addition, the insurance subsidiaries generally hold a significant amount of highly liquid, short-term investments.

The excess cash flow of AFG's property and casualty group allows it to extend the duration of its investment portfolio somewhat beyond that of its claim reserves.

In the annuity business, where profitability is largely dependent on earning a "spread" between invested assets and annuity liabilities, the duration of investments is generally maintained close to that of liabilities. With declining rates, AFG receives some protection (from spread compression) due to the ability to lower crediting rates, subject to guaranteed minimums. In a rising interest rate environment, significant protection from withdrawals exists in the form of temporary and permanent surrender charges on AFG's annuity products.

AFG believes its insurance subsidiaries maintain sufficient liquidity to pay claims and benefits and operating expenses. In addition, these subsidiaries have sufficient capital to meet commitments in the event of unforeseen events such as reserve deficiencies, inadequate premium rates or reinsurer insolvencies. Nonetheless, changes in statutory accounting rules, significant declines in the fair value of the insurance subsidiaries' investment portfolios or significant ratings downgrades on these investments, could create a need for additional capital.

Investments

AFG's investment portfolio at June 30, 2009, contained \$14.9 billion in "Fixed maturities" classified as available for sale and \$354 million in "Equity securities," all carried at fair value with unrealized gains and losses included in a separate component of shareholders' equity on an after-tax basis.

Fair values for AFG's portfolio are determined by AFG's internal investment professionals using data from nationally recognized pricing services as well as non-binding broker quotes. Fair values of equity securities are generally based on closing prices obtained from the pricing services. For mortgage-backed securities ("MBS"), which comprise approximately one-third of AFG's fixed maturities, prices for each security are generally obtained from both pricing services and broker quotes. For the other two-thirds, approximately 95% are priced using a pricing service and the balance is priced internally or by using non-binding broker quotes. When prices obtained for the same security vary, AFG's investment professionals select the price they believe is most indicative of an exit price.

The pricing services use a variety of observable inputs to estimate fair value of fixed maturities that do not trade on a daily basis. Based upon information provided by the pricing services, these inputs include, but are not limited to, recent reported trades, benchmark yields, issuer spreads, bids or offers, reference data, and measures of volatility. Included in the pricing of MBS are estimates of the rate of future prepayments and defaults of principal over the remaining life of the underlying collateral. Due to the lack of transparency in the process that brokers use to develop prices, valuations that are based on brokers' prices are classified as Level 3 in the GAAP hierarchy unless the price can be corroborated, for example, by comparison to similar securities priced using observable inputs.

Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by AFG's internal investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price (consistent with SFAS No. 157). To validate the appropriateness of the prices obtained, these investment managers consider widely published indices (as benchmarks), changes in interest rates, general economic conditions and the credit quality of the specific issuers. Prices obtained from a broker or pricing service are adjusted only in cases where they are deemed not to be representative of an appropriate exit price (fewer than 1% of the securities).

Increasing turmoil in the global financial markets caused credit spreads (the difference in rates between U.S. government bonds and other fixed maturities) to widen significantly during 2008. These wider spreads, as well as a lack of liquidity and the collapse of several financial institutions, were the primary cause of AFG's pretax net unrealized loss on fixed maturities rising from \$47 million at December 31, 2007, to \$2.0 billion at March 31, 2009. The impact of improving market conditions on the fair value of AFG's portfolio subsequent to March 31, 2009, reduced the pretax net unrealized loss to \$1.1 billion at June 30, 2009, and approximately \$650 million at July 31, 2009.

In general, the fair value of AFG's fixed maturity investments is inversely correlated to changes in interest rates. The following table demonstrates the sensitivity of such fair values to reasonably likely changes in interest rates by illustrating the estimated effect on AFG's fixed maturity portfolio that an immediate increase of 100 basis points in the interest rate yield curve would have at June 30, 2009 (dollars in millions). Increases or decreases from the 100 basis points illustrated would be approximately proportional.

Fair value of fixed maturity portfolio	\$15,218
Pretax impact on fair value of 100 bps increase in interest rates	\$ 720
Pretax impact as % of total fixed maturity portfolio	4.7%

Approximately 92% of the fixed maturities held by AFG at June 30, 2009, were rated "investment grade" (credit rating of AAA to BBB) by nationally recognized rating agencies. Investment grade securities generally bear lower yields and lower degrees of risk than those that are unrated and noninvestment grade. Management believes that the high quality investment portfolio should generate a stable and predictable investment return.

AFG's \$4.9 billion investment in MBS represented approximately one-third of its fixed maturities at June 30, 2009. MBS are subject to significant prepayment risk due to the fact that, in periods of declining interest rates, mortgages may be repaid more rapidly than scheduled as borrowers refinance higher rate mortgages to take advantage of lower rates.

AMERICAN FINANCIAL GROUP, INC. 10-Q

Management's Discussion and Analysis

of Financial Condition and Results of Operations - Continued

Summarized information for AFG's MBS (including those classified as trading) at June 30, 2009, is shown (in millions) in the table below. Agency-backed securities are those issued by a U.S. government-backed agency; Alt-A mortgages are those with risk profiles between prime and subprime. The Alt-A securities, the majority of which are backed by fixed-rate mortgages, have an average life of approximately five years. The subprime securities have an average life of approximately four years; substantially all are collateralized by fixed-rate mortgages.

<u>Collateral type</u>	<u>Amortized Cost</u>	<u>Fair Value</u>	<u>Fair Value as % of Cost</u>	<u>Unrealized Gain (Loss)</u>	<u>% Rated Investment Grade</u>
Residential:

)		
	<u>\$5,722</u>	<u>\$4,904</u>	86%	<u>(\$ 818)</u>	92%

Issuers will sometimes purchase monoline insurance to "wrap" or enhance the credit of a security issuance in order to benefit from better market execution. At June 30, 2009, AFG owned approximately \$926 million of fixed maturity securities wrapped by monoline insurers. Since many of these issuers have ratings equal or superior to the insurer, credit was enhanced in only \$195 million of the securities insured. FSA International provided 79% of the \$195 million in credit enhancement, and MBIA Inc. provided 17%. AFG's direct investment in monoline credit insurers was less than \$12 million at June 30, 2009. None of the insured subprime securities carry an explicit underlying rating. Management does not believe the risk of loss on the securities without underlying credit ratings is material to AFG's financial condition.

The table below summarizes (in millions) AFG's investments where credit was enhanced by monoline insurers at June 30, 2009.

When a decline in the value of a specific investment is considered to be "other than temporary," a provision for impairment is charged to earnings (accounted for as a realized loss) and the cost basis of that investment is reduced. The determination of whether unrealized losses are "other than temporary" requires judgment based on subjective as well as objective factors. See Note D to the financial statements.

36

AMERICAN FINANCIAL GROUP, INC. 10-Q

Management's Discussion and Analysis

of Financial Condition and Results of Operations - Continued

Based on its analysis, management believes (i) AFG will recover its cost basis in the securities with unrealized losses and (ii) that AFG has the ability and intent to hold the securities until they recover in value. Although AFG has the ability to continue holding its investments with unrealized losses, its intent to hold them may change due to deterioration in the issuers' creditworthiness, decisions to lessen exposure to a particular issuer or industry, asset/liability management decisions, market movements, changes in views about appropriate asset allocation or the desire to offset taxable realized gains. Should AFG's ability or intent change with regard to a particular security, a charge for impairment would likely be required. While it is not possible to accurately predict if or when a specific security will become impaired, charges for other than temporary impairment could be material to results of operations in future periods. Further significant declines in the fair value of AFG's investment portfolio could have a significant adverse effect on AFG's liquidity.

Uncertainties

Management believes that the areas posing the greatest risk of material loss are the adequacy of its insurance reserves and contingencies arising out of its former railroad and manufacturing operations. See *Management's Discussion and Analysis - "Uncertainties"* in AFG's 2008 Form 10-K.

Asbestos and Environmental Reserve Study

During the second quarter of 2009, AFG completed the previously announced comprehensive study of its asbestos and environmental ("A&E") exposures relating to the run-off operations of its property and casualty group and exposures related to former railroad and manufacturing operations and sites. The 2009 study relied on a comprehensive exposure analysis. It considered products and non-products exposures, paid claims history, the pattern of new claims, settlements and projected development. Similar studies have been completed with the assistance of outside actuarial and engineering firms and specialty outside counsel every two years with an in-depth internal review during the intervening years. This year's study resulted in minor adjustments to A&E reserves. During the course of this year's study, there were no newly identified emerging trends or issues that management believes significantly impact the overall adequacy of AFG's A&E reserves.

At June 30, 2009, the property and casualty group's A&E insurance reserves were \$397 million, net of reinsurance recoverables of \$84 million. At that date, AFG's three year survival ratios were 10.7 times paid losses for asbestos reserves and 9.9 times paid losses for total A&E reserves. These ratios compare favorably with data published by Conning Research and Consulting, Inc. in June 2009, which indicate that industry survival ratios were 8.1 for asbestos reserves and 7.6 for total A&E reserves at December 31, 2008. The survival ratio, which is often used by industry analysts to compare A&E reserves strength across companies, is a measure of the number of years that it would take to pay the amount of the current reserves based on the average paid losses over the preceding three years.

RESULTS OF OPERATIONS

General

Results of operations as shown in the accompanying financial statements are prepared in accordance with U.S. generally accepted accounting principles ("GAAP").

AFG reported operating earnings before income taxes of \$206 million for the second quarter of 2009 compared to \$100 million for the 2008 second quarter. Results for the second quarter of 2009 include (i) \$15 million in realized gains on securities, compared to realized losses of \$63 million in the second quarter

37

AMERICAN FINANCIAL GROUP, INC. 10-Q

Management's Discussion and Analysis

of Financial Condition and Results of Operations - Continued

of 2008, (ii) a \$37 million improvement in Specialty property and casualty underwriting results, and (iii) a \$28 million increase in investment income.

Six month pretax operating earnings increased \$148 million in 2009 compared to 2008 reflecting (i) a \$118 million decrease in realized losses on securities, (ii) an increase of \$62 million in investment income, and (iii) a \$22 million improvement in Specialty property and casualty underwriting results.

Property and Casualty Insurance - Underwriting

Edgar Filing: AMERICAN FINANCIAL GROUP INC - Form 10-Q

AFG reports its Specialty insurance business in the following sub-segments: (i) Property and transportation, (ii) Specialty casualty, (iii) Specialty financial and (iv) California workers' compensation.

Performance measures such as underwriting profit or loss and related combined ratios are often used by property and casualty insurers to help users of their financial statements better understand the company's performance. See *Note B - "Segments of Operations"* for the detail of AFG's operating profit by significant business segment.

Underwriting profitability is measured by the combined ratio, which is a sum of the ratios of losses, loss adjustment expenses, underwriting expenses and policyholder dividends to premiums. A combined ratio under 100% indicates an underwriting profit. The combined ratio does not reflect investment income, other income or federal income taxes.

))))
	<u>\$77</u>	<u>\$59</u>	<u>\$140</u>	<u>\$126</u>

The overall decreases in gross and net written premiums in the second quarter and first six months of 2009 were the result of soft market conditions, decreases in commodity prices in the crop operations and planned volume reductions in certain product lines. In addition, higher premium cessions under a crop reinsurance agreement contributed to lower net written premiums. Excluding crop, net written premiums decreased approximately 9% in both the second quarter and first six months of 2009 compared to the same periods of 2008. Overall average renewal rates in the first six months of 2009 were flat when compared with the same period of last year.

The specialty insurance operations generated underwriting profits of \$112 million and \$217 million in the second quarter and first six months of 2009, respectively, compared to \$76 million and \$196 million for the same periods of 2008. Results for the second quarter of 2009 include an increase of \$39 million in favorable reserve development from the run-off automobile residual value

39

AMERICAN FINANCIAL GROUP, INC. 10-Q

Management's Discussion and Analysis

of Financial Condition and Results of Operations - Continued

insurance ("RVI") operations, which resulted from a significant improvement in used car values during the first half of the year, partially offset by lower favorable development in other lines. In addition, catastrophe losses in the second quarter and first six months of 2009 were \$11 million and \$13 million, respectively, compared to \$25 million and \$27 million in the same prior year periods.

Property and transportation

gross and net written premiums for the 2009 second quarter and first six months reflect volume reductions and soft market conditions in the property and inland marine and transportation operations as well as lower commodity prices in the crop operations. Net written premiums were also impacted by an increase in crop business ceded under a reinsurance agreement. Excluding crop, 2009 net written premiums for this group decreased 10% for both the quarter and first six months when compared to the prior year periods. This group reported combined ratios of 88% and 83%, respectively, for the second quarter and first half of 2009. The improvement in the combined ratios compared to the same 2008 periods was due primarily to lower catastrophe losses. Results for the second quarter and first half of 2009 included \$8 million (4 points) and \$9 million (2 points), respectively, of catastrophe losses compared to \$21 million (10 points) and \$24 million (5 points) for the same 2008 periods. Favorable reserve development in the Property and transportation group in the first six months of 2009 and 2008 is due primarily to lower than expected loss frequency in crop and ocean marine products and lower severity in farm losses.

Specialty casualty

gross and net written premiums declined for the second quarter and first half of 2009 due primarily to lower general liability premiums resulting from the softening in the homebuilders market and excess and surplus lines. These declines were partially offset by additional premium growth from Marketform, a majority-owned Lloyds insurer that was acquired in January 2008 and has served as a platform to expand overseas distribution in several product lines. This group's combined ratios for the second quarter and first half of 2009 were 81% and 79%, respectively, compared to 78% and 77% in the comparable 2008 periods. Many of the businesses in this group continued to generate excellent underwriting

profitability but at a lower level due to significantly reduced premiums. Favorable reserve development in the Specialty casualty group in both the 2009 and 2008 periods reflects lower severity on claims in general liability and directors and officers liability as well as lower than expected frequency in the program (leisure camps, fairs and festivals, and sports and leisure) business.

Specialty financial

gross and net written premiums were down in the three and six month periods, as a decision to exit certain automotive-related lines of business dampened volumes. Growth in the fidelity and crime and financial institutions businesses partially offset these declines. This group reported underwriting income of \$54 million in the second quarter of 2009, compared to \$5 million in the 2008 second quarter. Favorable trends in used car sales prices benefited results in the RVI operations. The remaining RVI reserves relate to domestic and Canadian RVI contracts. The majority of the domestic leases will terminate by the end of the third quarter. The remaining \$52 million of Canadian RVI reserves relate to leases that terminate through the end of 2010. Year to date underwriting income for the Specialty financial group was \$67 million, up from \$22 million in the comparable 2008 period. The favorable reserve development in Specialty financial in the first half of 2009 relates to lower than expected frequency and severity in the RVI operations and

40

AMERICAN FINANCIAL GROUP, INC. 10-Q

Management's Discussion and Analysis

of Financial Condition and Results of Operations - Continued

lower loss severity in AFG's fidelity and crime products. The favorable development during the first half of 2008 relates primarily to lower loss severity in fidelity and crime products.

California workers' compensation

gross and net written premiums decreased due primarily to rate reductions in traditional workers' compensation business in California and reductions in employer payrolls. An AFG subsidiary filed for rate increases that resulted in a blended premium rate increase of 8%, effective July 1, 2009. Renewal rates for the California workers' compensation business decreased approximately 1% through the first half of 2009. This business posted small underwriting losses in both the second quarter and first six months of 2009, compared to underwriting profits of \$13 million and \$23 million in the comparable periods in 2008. Combined ratios were 101% and 100%, for the second quarter and first six months of 2009, respectively, compared to 75% and 78% in the comparable 2008 periods. These increases were driven primarily by a competitive pricing environment, the potential adverse impact of a disability claim ruling and lower favorable development. Favorable reserve development in California workers' compensation reflects the continued impact of the reform legislation passed in 2003 and 2004, although at lower levels in the 2009 periods than in 2008.

Statutory Annuity Premiums

The following table summarizes AFG's annuity sales (in millions):

Three months ended

Six months ended

	<u>June 30,</u>		<u>June 30,</u>	
	<u>2009</u>	<u>2008</u>	<u>2009</u>	<u>2008</u>
403(b) Fixed and Indexed Annuities:				
First Year	\$ 19	\$ 12	\$ 35	\$ 24
Renewal	39	45	75	85
Single Sum	<u>35</u>	<u>35</u>	<u>72</u>	<u>60</u>
Subtotal	93	92	182	169
Non-403(b) Indexed Annuities	82	159	174	299
Non-403(b) Fixed Annuities	70	105	111	152
Bank Fixed Annuities	133	153	151	153
Variable Annuities	<u>25</u>	<u>21</u>	<u>51</u>	<u>44</u>
Total Annuity Premiums	<u>\$403</u>	<u>\$530</u>	<u>\$669</u>	<u>\$817</u>

The decrease in annuity premiums for the second quarter and first six months of 2009 compared to the same periods in 2008 reflects lower sales of indexed and traditional fixed annuities in the non-403(b) single premium market. This reduction in premium is consistent with management's expectations and reflects AFG's disciplined pricing in this difficult economy.

41

AMERICAN FINANCIAL GROUP, INC. 10-Q

Management's Discussion and Analysis

of Financial Condition and Results of Operations - ContinuedLife, Accident and Health Premiums and Benefits

The following table summarizes AFG's life, accident and health premiums and benefits as shown in the Consolidated Statement of Earnings (in millions):

Three months ended

Six months ended

Edgar Filing: AMERICAN FINANCIAL GROUP INC - Form 10-Q

	<u>June 30,</u>		<u>June 30,</u>	
	<u>2009</u>	<u>2008</u>	<u>2009</u>	<u>2008</u>
<u>Premiums</u>				
Supplemental insurance operations				
First year	\$ 21	\$ 20	\$ 40	\$ 40
Renewal	83	80	165	161
Life operations (in run-off)	<u>6</u>	<u>8</u>	<u>14</u>	<u>16</u>
	<u>\$110</u>	<u>\$108</u>	<u>\$219</u>	<u>\$217</u>
<u>Benefits</u>				
Supplemental insurance operations				
	\$ 81	\$ 72	\$159	\$147
Life operations (in run-off)	<u>9</u>	<u>14</u>	<u>22</u>	<u>26</u>
	<u>\$ 90</u>	<u>\$ 86</u>	<u>\$181</u>	<u>\$173</u>

Investment Income

The \$28 million and \$62 million increase in investment income for the second quarter and first six months of 2009, respectively, compared to the same periods in 2008 was due primarily to higher yields on certain fixed maturity investments. Investment income includes \$32 million and \$68 million in the second quarter and first six months of 2009 and \$14 million and \$30 million in the second quarter and first six months of 2008 of interest income earned on derivative MBS, primarily non-agency interest-only securities with interest rates that float inversely with short-term rates.

The amortized cost of AFG's portfolio of non-agency residential MBS decreased \$287 million during the first six months of 2009 due primarily to paydowns. As these securities continue to pay down, management expects to reinvest the proceeds in high quality corporate bonds placing downward pressure on AFG's investment portfolio yield.

Realized Gains (Losses) on Securities

Net realized gains (losses) on securities consisted of the following (in millions):

	Three months ended	Six months ended
--	--------------------	------------------

	<u>June 30,</u>		<u>June 30,</u>	
	<u>2009</u>	<u>2008</u>	<u>2009</u>	<u>2008</u>
Realized gains (losses) before impairments:

Adjustments to annuity deferred policy acquisition costs and related items	<u>(8)</u>	<u>(1)</u>	<u>(16)</u>	<u>(2)</u>
))))
	<u>66</u>	<u>(8)</u>	<u>101</u>	<u>14</u>
)			
Impairment charges:				
Securities	(70)	(61)	(173)	(170)
Adjustments to annuity deferred policy acquisition costs and related items	<u>19</u>	<u>6</u>	<u>46</u>	<u>13</u>
	<u>(51)</u>	<u>(55)</u>	<u>(127)</u>	<u>(157)</u>
))))
	<u>\$15</u>	<u>(\$63)</u>	<u>(\$ 26)</u>	<u>(\$143)</u>

The change in fair value of derivatives includes net gains of \$61 million and \$97 million in the second quarter and first six months of 2009 and \$12 million and \$49 million in the second quarter and first six months of 2008 from the mark-to-market of derivative MBS, primarily interest-only securities with interest rates that float inversely with short-term rates. See Note E "Derivatives."

Approximately \$153 million of the impairment charges in the first half of 2009 related to fixed maturity investments, primarily corporate bonds and MBS. In the first half of 2008, \$109 million of the impairment charges were attributable to equity investments, primarily in financial institutions including \$43 million for National City Corporation.

Real Estate Operations

AFG's subsidiaries are engaged in a variety of real estate operations including hotels, marinas, apartments and office buildings; they also own several parcels of land. Revenues and expenses of these operations, including gains and losses on disposal, are included in AFG's Statement of Earnings as shown below (in millions).

	<u>Three months ended</u> <u>June 30,</u>		<u>Six months ended</u> <u>June 30,</u>	
	<u>2009</u>	<u>2008</u>	<u>2009</u>	<u>2008</u>
Other income	\$16	\$24	\$30	\$41
Other operating and general expenses	15	16	29	32

Income from real estate operations includes net pretax gains on the sale of real estate assets of \$6 million in the second quarter of 2008.

Other Income

The \$24 million and \$33 million decreases in other income for the second quarter and first six months of 2009, respectively, compared to the 2008 periods reflect the real estate gains discussed above, a decline in income from AFG's warranty business and lower fee income in certain other businesses.

Annuity Benefits

Annuity benefits reflect amounts accrued on annuity policyholders' funds accumulated. On deferred annuities (annuities in the accumulation phase), interest is generally credited to policyholders' accounts at their current stated interest rates. Furthermore, for "two-tier" deferred annuities (annuities under which a higher interest amount can be earned if a policy is annuitized rather than surrendered), additional reserves are accrued for (i) persistency and premium bonuses and (ii) excess benefits expected to be paid for future deaths and annuitizations. The \$22 million increase in annuity benefits in the second quarter of 2009 compared to the 2008 quarter reflects the impact of changes in interest rates on the fair value of the embedded derivatives related to the indexed annuity business, as well as growth in the annuity business.

Changes in investment yields, crediting rates, actual surrender, death and annuitization experience or modifications in actuarial assumptions can affect these additional reserves and could result in charges (or credits) to earnings in the period the projections are modified.

Annuity and Supplemental Insurance Acquisition Expenses

Annuity and supplemental insurance acquisition expenses include amortization of annuity, supplemental insurance and life business deferred policy acquisition costs ("DPAC") as well as a portion of commissions on sales of insurance products. Annuity and supplemental insurance acquisition expenses also include amortization of the present value of future profits of businesses acquired ("PVFP"). The \$9 million decrease in annuity and supplemental insurance expenses for the second quarter

of Financial Condition and Results of Operations - Continued

of 2009 compared to the 2008 quarter reflects the impact of improved stock market performance on variable annuities and lower interest rates on the indexed annuity business. For the six month period, these items were more than offset by the impact of growth as well as overall improved profitability (particularly in the first quarter) in the annuity and supplemental insurance business.

The vast majority of the annuity and supplemental insurance group's DPAC asset relates to its fixed annuity, variable annuity and life insurance lines of business. Unanticipated spread compression, decreases in the stock market, adverse mortality experience and higher than expected lapse rates could lead to write-offs of DPAC or PVFP in the future.

Interest Charges on Borrowed Money

Interest expense decreased \$4 million (23%) during the second quarter and \$7 million (18%) during the first six months of 2009 compared to the same periods in 2008 reflecting the retirement of fixed rate debt during the second quarter of both years using cash on hand and funds borrowed under AFG's revolving bank line.

In June 2009, AFG issued \$350 million in ten-year 9-7/8% senior notes and used the proceeds to pay down its floating rate (1.1% at June 30, 2009) bank line that matures in 2011. This offering provides AFG with additional financial flexibility and liquidity, although at a higher rate of interest.

Recent Accounting Standards

New accounting standards implemented in the first half of 2009, are discussed in *Note A - Accounting Policies* under the following subheadings.

<u>Accounting Standard</u>	<u>Title</u>	<u>Note A Reference</u>
FSP FAS 107-1	Interim Disclosures about Fair Value	Fair Value Measurements

of Financial Instruments

FSP FAS 115-2	Recognition and Presentation of Other-Than-Temporary Impairments	Investments
FSP FAS 157-2	Effective Date of FASB Statement No. 157	Fair Value Measurements
FSP FAS 157-4	Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly	Fair Value Measurements
SFAS No. 160	Noncontrolling Interests in Consolidated Financial Statements	Basis of Presentation
SFAS No. 161	Disclosures about Derivative Instruments and Hedging Activities	Derivatives
SFAS No. 165	Subsequent Events	Basis of Presentation

ITEM 3

Quantitative and Qualitative Disclosure of Market Risk

As of June 30, 2009, there were no material changes to the information provided in Item 7A - "Quantitative and Qualitative Disclosure of Market Risk" of AFG's 2008 Form 10-K.

ITEM 4

Controls and Procedures

AFG's management, with participation of its Co-Chief Executive Officers and its principal financial officer, has evaluated AFG's disclosure controls and procedures (as defined in Exchange Act Rule 13a-15) as of the end of the period covered by this report. Based on that evaluation, AFG's Co-CEOs and principal financial officer concluded that the controls and procedures are effective. There have been no changes in AFG's internal control over financial reporting during the second fiscal quarter of 2009 that materially affected, or are reasonably likely to materially affect, AFG's internal control over financial reporting.

In the ordinary course of business, AFG and its subsidiaries routinely enhance their information systems by either upgrading current systems or implementing new systems. There has been no change in AFG's business processes and procedures during the second fiscal quarter of 2009 that has materially affected, or is reasonably likely to materially affect, AFG's internal controls over financial reporting.

PART II

OTHER INFORMATION

ITEM 1

Legal Proceedings

On January 4, 2008, the Commonwealth of Massachusetts filed suit in the Superior Court of Suffolk County against AFG subsidiaries Great American Insurance Company and Professional Risk Brokers, Inc. The suite alleged improper conduct in issuance of one quotation in 2004 for insurance coverage for a Massachusetts company. The suit sought injunctive relief, monetary amounts for restitution, disgorgement, civil penalties and the Commonwealth's costs of investigation (including attorneys' fees) in amounts unspecified in the Company. On May 14, 2009, the Massachusetts Attorney General filed an agreement to settle the litigation that required Great American Insurance Company to pay \$60,000 to its insured and \$116,000 to the State of Massachusetts, comply with Massachusetts statutes and retain copies of quotes for three years.

ITEM 4

Submission of Matters to a Vote of Security Holders

AFG's Annual Meeting of Shareholders was held on May 14, 2009; there were three matters voted upon: (Item 1) election of ten directors, (Item 2) ratifying Ernst & Young LLP as independent registered public accounting firm and (Item 3) proposal to approve the annual Co-CEO equity bonus plan.

The votes cast for, against, withheld and the number of abstentions and broker non-votes as to each matter voted on at the 2009 Annual Meeting is set forth below:
