LOGITECH INTERNATIONAL S.A.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 Basis of Presentation

The consolidated financial statements include the accounts of Logitech International S.A. and its subsidiaries (Logitech or the Company). All intercompany balances and transactions have been eliminated. The consolidated financial statements are presented in accordance with U.S. GAAP (accounting principles generally accepted in the United States of America) for interim financial information and therefore do not include all the information required by U.S. GAAP for complete financial statements. They should be read in conjunction with the Company's audited consolidated financial statements for the fiscal year ended March 31, 2012 included in its Annual Report on Form 10-K.

In the quarter ended June 30, 2012, the Company recorded a reduction in deferred tax assets and a decrease to retained earnings of \$6.3 million, related to vested unexercised non-qualified stock options for former employees who terminated in fiscal year 2012 and prior. The Company reviewed this accounting error utilizing SEC Staff Accounting Bulletin No. 99, *Materiality*, and SEC Staff Accounting Bulletin No. 108, *Effects of Prior Year Misstatements on Current Year Financial Statements*, and determined the impact of the error to be immaterial to any period presented.

Certain prior period financial statement amounts have been reclassified to conform to the current period presentation with no impact on previously reported net income (loss).

In the opinion of management, these consolidated financial statements include all adjustments, consisting of normal recurring adjustments, necessary for a fair statement of the results for the periods presented. Operating results for the three and nine months ended December 31, 2012 are not necessarily indicative of the results that may be expected for the year ending March 31, 2013, or any future periods.

Fiscal Year

The Company's fiscal year ends on March 31. Interim quarters are thirteen-week periods, each ending on a Friday. For purposes of presentation, the Company has indicated its quarterly periods as ending on the month end.

Changes in Significant Accounting Policies

There have been no significant changes to the nature of the critical accounting policies, and no significant changes in the critical accounting estimates that were disclosed in the Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

Annual Report on Form 10-K for the fiscal year ended March 31, 2012, except for Valuation of Long-Lived Assets described in the Management's Discussion and Analysis of Financial Condition and Results of Operations section of this Form 10-Q.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make judgments, estimates and assumptions that affect reported amounts of assets, liabilities, net sales and expenses, and the disclosure of contingent assets and liabilities. Although these estimates are based on management's best knowledge of current events and actions that may impact the Company in the future, actual results could differ from those estimates.

Table of Contents**Note 2 Net Income (Loss) per Share**

The computations of basic and diluted net income (loss) per share were as follows (in thousands, except per share amounts):

	Three months ended December 31,		Nine months ended December 31,	
	2012	2011	2012	2011
Net income (loss)	\$ (194,943)	\$ 55,333	\$ (192,223)	\$ 43,172
Weighted average shares - basic	157,706	173,003	158,383	176,414
Effect of potentially dilutive share equivalents		653		787
Weighted average shares - diluted	157,706	173,656	158,383	177,201
Net income (loss) per share - basic	\$ (1.24)	\$ 0.32	\$ (1.21)	\$ 0.24
Net income (loss) per share - diluted	\$ (1.24)	\$ 0.32	\$ (1.21)	\$ 0.24

Employee stock options, restricted stock units and similar share-based compensation awards granted by the Company are treated as potential shares in computing diluted net income per share. Diluted shares outstanding include the dilutive effect of in-the-money share-based awards which is calculated based on the average share price for each fiscal period using the treasury stock method. Under the treasury stock method, the amount that the employee must pay for exercising share-based awards, the amount of compensation cost for future service that the Company has not yet recognized, and the amount of tax impact that would be recorded in additional paid-in capital when the award becomes deductible are assumed to be used to repurchase shares.

Share equivalents attributable to outstanding stock options and RSUs (restricted stock units) of 15,951,244 for the three months ended December 31, 2011, and 17,505,162 for the nine months ended December 31, 2011, respectively, were excluded from the calculation of diluted net income per share because their inclusion would have been anti-dilutive.

Note 3 Employee Benefit Plans***Employee Share Purchase Plans and Stock Incentive Plans***

As of December 31, 2012, the Company offers the 2006 ESPP (2006 Employee Share Purchase Plan (Non-U.S.)), the 1996 ESPP (1996 Employee Share Purchase Plan (U.S.)), the 2006 Plan (2006 Stock Incentive Plan) and the 2012 Plan (2012 Stock Inducement Equity Plan). The 2012 Plan was approved by the Board of Directors in April 2012. On April 13, 2012, the Company filed Registration Statements to register 5.0 million additional shares to be issued pursuant to the 2006 ESPP, and 1.8 million shares under the 2012 Plan. On September 5, 2012, at the fiscal year 2012 Annual General Meeting of Shareholders, Logitech shareholders approved amendments to and restatement of the 2006 Stock Incentive Plan, which included the increase of 7.3 million additional shares to be issued under this plan and to prohibit the repricing of options or stock appreciation rights. On October 25, 2012, the Company filed a registration statement to register the 7.3 million additional shares under the 2006 Stock Incentive Plan. Shares issued to employees as a result of purchases or exercises under these plans are generally issued from shares held in treasury.

Table of Contents

The following table summarizes share-based compensation expense and related tax benefit recognized for the three and nine months ended December 31, 2012 and 2011 (in thousands):

	Three months ended December 31,		Nine months ended December 31,	
	2012	2011	2012	2011
Cost of goods sold	\$ 704	\$ 948	\$ 2,101	\$ 3,058
Share-based compensation expense included in gross profit	704	948	2,101	3,058
Operating expenses:				
Marketing and selling	953	2,380	5,377	9,345
Research and development	2,430	1,802	6,018	5,364
General and administrative	1,135	1,797	5,163	5,613
Share-based compensation expense included in operating expenses	4,518	5,979	16,558	20,322
Total share-based compensation expense	5,222	6,927	18,659	23,380
Income tax provision (benefit)	(1,043)	70	(4,090)	(4,595)
Share-based compensation expense, net of income tax	\$ 4,179	\$ 6,997	\$ 14,569	\$ 18,785

Share-based compensation expense for the three and nine months ended December 31, 2012 includes a reduction of \$0 and \$2.2 million in expense applicable to employees terminated as a result of the restructuring plan announced in April 2012. As of December 31, 2012 and 2011, \$0.2 million and \$0.5 million of share-based compensation cost were capitalized in inventory.

Defined Contribution Plans

Certain of the Company's subsidiaries have defined contribution employee benefit plans covering all or a portion of their employees. Contributions to these plans are discretionary for certain plans and are based on specified or statutory requirements for others. The charges to expense for these plans for the three months ended December 31, 2012 and 2011 were \$2.0 million and \$2.5 million and for the nine months ended December 31, 2012 and 2011 were \$6.6 million and \$8.1 million.

Defined Benefit Plans

Certain of the Company's subsidiaries sponsor defined benefit pension plans or non-retirement post-employment benefits covering substantially all of their employees. Benefits are provided based on employees' years of service and earnings, or in accordance with applicable employee benefit regulations. The Company's practice is to fund amounts sufficient to meet the requirements set forth in the applicable employee benefit and tax regulations.

During the quarter ended September 30, 2012, the Company's Swiss defined benefit pension plan was subject to re-measurement due to the number of plan participants affected by the April 2012 restructuring described in Note 13. The re-measurement resulted in the realization of \$2.2 million in previously unrecognized losses which resided within accumulated other comprehensive loss and which the Company entirely

recognized during the three months ended September 30, 2012.

Table of Contents

The net periodic benefit cost for defined benefit pension plans and non-retirement post-employment benefit obligations for the three and nine months ended December 31, 2012 and 2011 were as follows (in thousands):

	Three months ended December 31,		Nine months ended December 31,	
	2012	2011	2012	2011
Service cost	\$ 1,770	\$ 1,520	\$ 5,371	\$ 4,752
Interest cost	440	531	1,351	1,668
Expected return on plan assets	(378)	(277)	(996)	(930)
Amortization of net transition obligation	1	1	3	3
Amortization of net prior service cost	39	37	115	114
Recognized net actuarial loss	271	210	950	669
Settlement cost			2,254	
Net periodic benefit cost	\$ 2,143	\$ 2,022	\$ 9,048	\$ 6,276

Note 4 Income Taxes

The Company is incorporated in Switzerland but operates in various countries with differing tax laws and rates. Further, a portion of the Company's income before taxes and the provision for income taxes are generated outside of Switzerland.

In determining the annual effective tax rate, both the restructuring described in Note 13 and the goodwill impairment described in Note 7 were treated as discrete events as they were significantly unusual and infrequent in nature. As such, related charges and costs were excluded from ordinary income in determining the annual effective tax rate. The tax benefit associated with the restructuring is approximately \$0.2 million. There was no tax benefit associated with goodwill impairment as the goodwill is not tax-deductible.

The income tax provision for the three months ended December 31, 2012 was \$11.4 million based on an effective income tax rate of 6.2% of pre-tax loss. For the three months ended December 31, 2011, the income tax provision was \$22.1 million based on an effective income tax rate of 28.5% of pre-tax income. The income tax benefit for the nine months ended December 31, 2012 was \$26.6 million based on an effective income tax rate of 12.2% of pre-tax loss. For the nine months ended December 31, 2011, the income tax provision was \$17.4 million based on an effective income tax rate of 28.7% of pre-tax income. The change in the effective income tax rate for the three and nine months ended December 31, 2012 compared with the same periods in fiscal year 2012 is primarily due to the mix of income and losses in the various tax jurisdictions in which the Company operates, and a discrete tax benefit of \$32.1 million and \$3.5 million during the fiscal quarter ended September 30, 2012 and December 31, 2012, respectively, related to the reversal of uncertain tax positions resulting from the closure of federal income tax examinations in the United States.

The American Taxpayer Relief Act of 2012, which was enacted on January 2, 2013, extends the Federal research tax credit retroactively for two years from January 1, 2012 through December 31, 2013. An estimated tax benefit of approximately \$2.5 million from the extension of the Federal research tax credit will be reflected in the income tax provision in the quarter ending March 31, 2013.

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

As of December 31 and March 31, 2012, the total amount of unrecognized tax benefits and related accrued interest and penalties due to uncertain tax positions was \$102.5 million and \$143.3 million, of which \$89.2 million and \$125.4 million would affect the effective income tax rate if recognized. The decline in unrecognized tax benefits associated with uncertain tax positions in the amount of \$40.8 million is primarily due to \$42.8 million from the settlement of income tax examinations in the United States.

The Company continues to recognize interest and penalties related to unrecognized tax positions in income tax expense. As of December 31 and March 31, 2012, the Company had approximately \$6.8 million and \$7.5 million, respectively, of accrued interest and penalties related to uncertain tax positions.

Table of Contents

The Company files Swiss and foreign tax returns. For all these tax returns, the Company is generally not subject to tax examinations for years prior to 2000. In the fiscal quarter ended September 30, 2012, the Company effectively settled the examinations of fiscal years 2006 and 2007 with the IRS (U.S. Internal Revenue Service). The Company reversed \$33.8 million of unrecognized tax benefits associated with uncertain tax positions and recorded a \$1.7 million tax provision from the proposed revised assessments as a result of the closure, resulting in a net tax benefit of \$32.1 million. There was no cash tax liability from the settlement due to utilization of net operating loss carryforwards.

In addition, the IRS completed its field examination of the Company's U.S. subsidiary for fiscal years 2008 and 2009 during the fiscal quarter ended September 30, 2012. The Company received Notices of Proposed Adjustments related to various domestic and international tax issues on August 15, 2012 and subsequently, received final letters dated October 17, 2012 which effectively settled the examinations. As a result of the closure of income tax examinations for fiscal years 2008 and 2009, the Company reversed \$9.0 million of unrecognized tax benefits associated with uncertain tax positions and recorded a \$5.5 million tax provision from the assessments, resulting in a net tax benefit of \$3.5 million. There was no cash tax liability from the settlement due to utilization of net operating loss carryforwards.

The Company is also under examination and has received assessment notices in other tax jurisdictions. At this time, the Company is not able to estimate the potential impact that these examinations may have on income tax expense. If the examinations are resolved unfavorably, there is a possibility they may have a material negative impact on the Company's consolidated operating results.

Although the Company has adequately provided for uncertain tax positions, the provisions on these positions may change as revised estimates are made or the underlying matters are settled or otherwise resolved. It is not possible at this time to reasonably estimate the decrease of the unrecognized tax benefits within the next twelve months.

Table of Contents**Note 5 Balance Sheet Components**

The following table presents the components of certain balance sheet asset amounts as of December 31 and March 31, 2012 (in thousands):

	December 31, 2012	March 31, 2012

Deposits and other	6,961	7,374
	\$ 78,021	\$ 83,033

In the three months ended June 30, 2011, an inventory valuation adjustment of \$34.1 million was charged to cost of goods sold, as the result of management's decision in early July 2011 to reduce the retail price of Logitech Revue. The reduction in construction-in-progress balance from March 31, 2012 to December 31, 2012 was from leasehold improvement costs related to the new Americas headquarters which were placed into service during this period.

Table of Contents

The following table presents the components of certain balance sheet liability amounts as of December 31 and March 31, 2012 (in thousands):

	December 31, 2012	March 31, 2012

	\$ 186,663	\$ 218,462

Assets Held for Sale

During the third quarter of fiscal year 2013, the Company made a strategic decision to divest its remote controls and digital video security product categories by the end of calendar year 2013, both of which are included in the Company's peripherals operating segment. This decision primarily resulted from the Company's belief that these product categories would not make a meaningful contribution to improving either the Company's growth or profitability because they are not critical to the Company's plans for improved future performance. As a result, assets and liabilities of the remote controls and digital video security product categories have been classified as held for sale as of December 31, 2012. The components of assets and liabilities held for sale at December 31, 2012 were as follows:

	December 31, 2012
Assets held for sale:	
Inventory	\$ 12,561
Property, plant and equipment, net	520
Goodwill	4,116
Other intangible assets, net	500
	\$ 17,697

Note 6 Financial Instruments*Fair Value Measurements*

The Company considers fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. The Company utilizes the following three-level fair value hierarchy to establish the priorities of the inputs used to measure fair value:

- Level 1 Quoted prices in active markets for identical assets or liabilities.
- Level 2 Observable inputs other than quoted market prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

The following table presents the Company's financial assets and liabilities that were accounted for at fair value, excluding assets related to the Company's defined benefit pension plans, classified by the level within the fair value hierarchy on a recurring basis (in thousands):

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

	December 31, 2012			March 31, 2012		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3

Available-for-sale securities, ending balance	\$	\$ 1,195	\$	\$ 1,195

Cash and Cash Equivalents

Cash and cash equivalents consist of bank demand deposits and time deposits. The time deposits have original maturities of three months or less. Cash and cash equivalents are carried at cost, which approximates fair value.

Investment Securities

The Company's investment securities portfolio currently consists of marketable securities (money market and mutual funds) related to a deferred compensation plan.

The marketable securities related to the deferred compensation plan are classified as non-current other assets. Since participants in the deferred compensation plan may select the mutual funds in which their compensation deferrals are invested within the confines of the Rabbi Trust which holds the marketable securities, the Company has designated these marketable securities as trading investments, although there is no stated intent to actively buy and sell securities with the objective of generating profits on short-term differences in market prices. Management has classified the investments as non-current assets because final sale of the investments or realization of proceeds by plan participants is not expected within the Company's normal operating cycle of one year. The marketable securities are recorded at a fair value of \$15.1 million and \$14.3 million as of December 31 and March 31, 2012, based on quoted market prices. Quoted market prices are observable inputs that are classified as Level 1 within the fair value hierarchy. Earnings, gains and losses on trading investments are included in other income (expense), net. Unrealized trading gains (losses) of \$(0.1) million and \$0.1 million are included in other income (expense), net for the three and nine months ended December 31, 2012 and relate to trading securities held at December 31, 2012.

Derivative Financial Instruments

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

The following table presents the fair values of the Company's derivative instruments and their locations on its consolidated balance sheets as of December 31 and March 31, 2012 (in thousands):

	Location	Asset Derivatives Fair Value		Location	Liability Derivatives Fair Value

Cash Flow Hedges

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

The Company enters into foreign exchange forward contracts to hedge against exposure to changes in foreign currency exchange rates related to its subsidiaries' forecasted inventory purchases. The Company has one entity with a euro functional currency that purchases inventory in U.S. dollars. The Company is currently hedging against a weaker euro relative to U.S. dollars in that entity. The primary risk managed by using derivative instruments is the foreign currency exchange rate risk. The Company has designated these derivatives as cash flow hedges. Logitech does not use derivative financial instruments for trading or speculative purposes. These hedging contracts mature within four months, and are denominated in the same currency as the underlying transactions. Gains and losses in the fair value of the effective portion of the hedges are deferred as a component of accumulated other comprehensive loss until the hedged inventory purchases are sold, at which time the gains or losses are reclassified to cost of goods sold. The Company assesses the effectiveness of the hedges by comparing changes in the spot rate of the currency underlying the forward contract with changes in the spot rate of the currency in which the forecasted transaction will be consummated. If the underlying transaction being hedged fails to occur or if a portion of the hedge does not generate offsetting changes in the foreign currency exposure of forecasted inventory purchases, the Company immediately recognizes the gain or loss on the associated financial instrument in other income (expense), net. Such gains and losses were immaterial during the three and nine months ended December 31, 2012 and 2011. Cash flows from such hedges are classified as operating activities in the consolidated statements of cash flows. The notional amounts of foreign exchange forward contracts outstanding related to forecasted inventory purchases were \$49.7 million (37.7 million) and \$54.9 million (42.4 million) at December 31, 2012 and 2011. The notional amount represents the future cash flows under contracts to purchase foreign currencies.

Table of Contents

Other Derivatives

The Company also enters into foreign exchange forward contracts to reduce the short-term effects of foreign currency fluctuations on certain foreign currency receivables or payables. These forward contracts generally mature within three months. The Company may also enter into foreign exchange swap contracts to economically extend the terms of its foreign exchange forward contracts. The primary risk managed by using forward and swap contracts is the foreign currency exchange rate risk. The gains or losses on foreign exchange forward contracts are recognized in earnings based on the changes in fair value.

The notional amounts of foreign exchange forward contracts outstanding at December 31, 2012 and March 31, 2012 relating to foreign currency receivables or payables were \$38.6 million and \$18.7 million. Open forward contracts as of December 31, 2012 consisted of contracts in euros to sell British pounds, contracts in Australian dollars to purchase U.S. dollars, contracts in Taiwanese dollars to sell U.S. dollars and contracts in Canadian dollars to purchase U.S. dollars at future dates at pre-determined exchange rates. Open forward contracts as of March 31, 2012 consisted of contracts in euros to sell British pounds and contracts in Australian dollars to purchase U.S. dollars at future dates at pre-determined exchange rates. The notional amounts of foreign exchange swap contracts outstanding at December 31, 2012 and March 31, 2012 were \$14.4 million and \$22.4 million. Swap contracts outstanding at December 31, 2012 consisted of contracts in Mexican pesos and Japanese yen. Swap contracts outstanding at March 31, 2012 consisted of contracts in Taiwanese dollars, Mexican pesos and Japanese yen.

The fair value of all foreign exchange forward contracts and foreign exchange swap contracts is determined based on observable market transactions of spot currency rates and forward rates. Cash flows from these contracts are classified as operating activities in the consolidated statements of cash flows.

Financial Instruments Measured at Fair Value on a Nonrecurring Basis

During the second quarter of fiscal year 2013, the Company invested \$4.0 million in a privately-held company in exchange for convertible preferred stock. The Company accounts for this investment under the cost method of accounting since it has less than a 20% ownership interest and it lacks the ability to exercise significant influence over the operating and financial policies of the investee. The Company will periodically assess the investment for other-than-temporary impairment. If it determines that an other-than-temporary impairment has occurred, it will write down this investment to its fair value. The Company will estimate fair value of this investment considering all available information such as pricing in recent rounds of financing, current cash positions, earnings and cash flow forecasts, recent operational performance and any other readily available market data. During the third quarter of fiscal 2013, the Company performed an impairment assessment of this investment due to significant deterioration of its financial results and financial position, determining that an other-than-temporary impairment had occurred and, consequently recorded a \$3.6 million investment impairment charge during this period.

Note 7 Goodwill and Other Intangible Assets

The Company performs its annual goodwill impairment test of each reporting unit as of December 31 and completes the assessment during its fiscal fourth quarter, or more frequently, if certain events or circumstances warrant. Events or changes in circumstances which might indicate potential impairment in goodwill include the company-specific factors, including, but not limited to, stock price volatility, market capitalization relative to net book value, and projected revenue, market growth and operating results. Determining the number of reporting units and the fair

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

value of a reporting unit requires the Company to make judgments and involves the use of significant estimates and assumptions. The Company has two reporting units: peripherals and video conferencing. The allocation of assets and liabilities to each of its reporting units also involves judgment and assumptions.

Table of Contents

The goodwill impairment assessment involves three tests, Step 0, Step 1 and Step 2. The Step 0 test involves performing an initial qualitative assessment to determine whether it is more likely than not that the asset is impaired and thus whether it is necessary to proceed to Step 1 and calculate the fair value of the respective reporting unit. The Company may proceed directly to the Step 1 test without performing the Step 0 test. The Step 1 test involves measuring the recoverability of goodwill at the reporting unit level by comparing the reporting unit's carrying amount, including goodwill, to the fair value of the reporting unit. The fair value is estimated using an income approach employing both a discounted cash flow (DCF) and a market-based model. The DCF model is based on projected cash flows from the Company's most recent forecast (assessment forecast) developed in connection with each of its reporting units to perform the goodwill impairment assessment. The assessment forecast is based on a number of key assumptions, including, but not limited to, discount rate, compound annual growth rate (CAGR) during the forecast period, and terminal value. The terminal value is based on an exit price at the end of the assessment forecast using an earnings multiple applied to the final year of the assessment forecast. The discount rate is applied to the projected cash flows to reflect the risks inherent in the timing and amount of the projected cash flows, including the terminal value, and is derived from the weighted average cost of capital of market participants in similar businesses. The market approach model is based on applying certain revenue and earnings multiples of comparable companies relevant to each of its reporting units to the respective revenue and earnings metrics of the Company's reporting units. To test the reasonableness of the fair values indicated by the income approach and the market-based approach, the Company also assesses the implied premium of the aggregate fair value over the market capitalization considered attributable to an acquisition control premium, which is the price in excess of a stock market's price that investors would typically pay to gain control of an entity. The discounted cash flow model and the market approach model require the exercise of significant judgment, including assumptions about appropriate discount rates, long-term growth rates for purposes of determining a terminal value at the end of the discrete forecast period, economic expectations, timing of expected future cash flows, and expectations of returns on equity that will be achieved. Such assumptions are subject to change as a result of changing economic and competitive conditions. If the carrying amount of the reporting unit exceeds its fair value as determined by these assessments, goodwill is considered impaired, and the Step 2 test is performed to measure the amount of impairment loss. The Step 2 test measures the impairment loss by allocating the reporting unit's fair value to its assets and liabilities other than goodwill, comparing the resulting implied fair value of goodwill with its carrying amount, and recording an impairment charge for the difference.

The Company performed its annual goodwill impairment analysis of each of its reporting units as of December 31, 2012 using the income approach and market approach described above. The Company chose not to perform the Step 0 test and to proceed directly to the Step 1 test. This assessment resulted in the Company determining that its peripherals reporting unit passed the Step 1 test because the estimated fair value exceeded its carrying value by more than 75%. By contrast, the video conferencing reporting unit failed the Step 1 test because the estimated fair value was less than its carrying value, thus requiring a Step 2 assessment of this reporting unit. This impairment primarily resulted from a decrease in the expected CAGR during the assessment forecast period based on greater evidence of the overall enterprise video conferencing industry experiencing a slowdown in recent quarters, combined with lower demand related to new product launches, increased competition in fiscal year 2013 and other market data. These factors had an adverse effect on the Company's recent video conferencing operating results and are anticipated to have an adverse effect on its future outlook. The Company was unable to fully complete the Step 2 analysis prior to filing of this Form 10-Q due to the complexities of determining the implied fair value of goodwill of its video conferencing reporting unit. Based on the work performed as of this filing date, the Company recorded a non-cash goodwill impairment charge estimate of \$211.0 million related to its video conferencing reporting unit. The accounting write down, which was performed as part of this annual impairment test, was required to reflect the carrying amount of the reporting unit had exceeded its implied fair value due to the slowdown in the enterprise video conferencing industry in recent quarters.

The video conferencing reporting unit encompasses the integrated operations of the Company's acquisitions of SightSpeed Inc., LifeSize Communications, Inc., Paradiat AS and Mirial S.r.l.

Table of Contents

Management continues to evaluate and monitor all key factors impacting the carrying value of the Company's recorded goodwill and long-lived assets. Further adverse changes in the Company's actual or expected operating results, market capitalization, business climate, economic factors or other negative events that may be outside the control of management could result in a material non-cash impairment charge in the future.

The following table summarizes the activity in the Company's goodwill balance during the nine months ended December 31, 2012:

	Peripheral	Video Conferencing	Total
Balance at March 31, 2012	\$ 220,860	\$ 339,663	\$ 560,523
Impairment		(211,000)	(211,000)
Foreign currency movements	78	(172)	(94)
	\$ 220,938	\$ 128,491	\$ 349,429
<i>Reclassified to Assets Held for Sale:</i>			
Goodwill - Digital Video Security and Remote Controls	(4,116)		(4,116)
Balance at December 31, 2012	\$ 216,822	\$ 128,491	\$ 345,313

The Company's acquired other intangible assets subject to amortization were as follows (in thousands):

Amortization expense for other intangible assets was \$5.7 million and \$6.7 million for the three months ended December 31, 2012 and 2011 and \$17.9 million and \$20.2 million for the nine months ended December 31, 2012 and 2011. The Company expects that amortization expense for the remaining three months of fiscal year 2013 will be \$6.3 million, and annual amortization expense for fiscal years 2014, 2015 and 2016 will be \$17.9 million, \$9.1 million, \$1.2 million and \$0.5 million thereafter.

Note 8 Financing Arrangements

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

In December 2011, the Company entered into a Senior Revolving Credit Facility Agreement with a group of primarily Swiss banks that provides for a revolving multicurrency unsecured credit facility in an amount of up to \$250.0 million. The Company may, upon notice to the lenders and subject to certain requirements, arrange with existing or new lenders to provide up to an aggregate of \$150.0 million in additional commitments, for a total of \$400.0 million of unsecured revolving credit. The credit facility may be used for working capital, general corporate purposes, and acquisitions. There were no outstanding borrowings under the credit facility at December 31, 2012.

Table of Contents

The credit facility matures on October 31, 2016. The Company may prepay the loans under the credit facility in whole or in part at any time without premium or penalty. Borrowings under the credit facility will accrue interest at a per annum rate based on LIBOR (London Interbank Offered Rate), or EURIBOR (Euro Interbank Offered Rate) in the case of loans denominated in euros, plus a variable margin determined quarterly based on the ratio of senior debt-to-earnings before interest, taxes, depreciation and amortization for the preceding four-quarter period, plus, if applicable, an additional rate per annum intended to compensate the lenders for the cost of compliance with regulatory reserve requirements and other banking regulations. The Company also pays a quarterly commitment fee of 40% of the applicable margin on the available commitment. In connection with entering into the credit facility, the Company incurred non-recurring fees totaling \$1.5 million, which are amortized on a straight-line basis over the term of the credit facility.

The facility agreement contains representations, covenants, including threshold financial covenants, and events of default customary in Swiss credit markets. Affirmative covenants include covenants regarding reporting requirements, maintenance of insurance, maintenance of properties and compliance with applicable laws and regulations, and financial covenants that require the maintenance of net senior debt, interest cover and adjusted equity ratios determined in accordance with the terms of the facility. Negative covenants limit the ability of the Company and its subsidiaries, among other things, to grant liens, make investments, incur debt, make restricted payments, enter into a merger or acquisition, or sell, transfer or dispose of assets, in each case subject to certain exceptions. As of December 31, 2012, the Company was in compliance with all covenants and conditions of this facility.

This facility stipulates that, upon an uncured event of default under the facility, the lenders may declare all or a portion of the outstanding obligations payable by the Company to be immediately due and payable, terminate their commitments and exercise other rights and remedies provided for under the facility. The events of default under the facility include, among other things, payment defaults, covenant defaults, inaccuracy of representations and warranties, cross defaults with certain other indebtedness, bankruptcy and insolvency events and events that have a material adverse effect (as defined in the facility). Upon a change of control of the Company, lenders whose commitments aggregate more than two-thirds of the total commitments under the facility may terminate the commitments and declare all outstanding obligations to be due and payable.

The Company had several uncommitted, unsecured bank lines of credit aggregating \$76.8 million at December 31, 2012. There are no financial covenants or cross default provisions under these lines of credit with which the Company must comply. At December 31, 2012, the Company had no outstanding borrowings under these lines of credit. The Company also had available credit lines related to corporate credit cards totaling \$30.2 million as of December 31, 2012. The outstanding borrowings under these credit lines are recorded in other current liabilities. There are no financial covenants or cross default provisions under these credit lines.

Note 9 Commitments and Contingencies

Operating Leases

The Company leases facilities under operating leases, certain of which require it to pay property taxes, insurance and maintenance costs. Operating leases for facilities are generally renewable at the Company's option and usually include escalation clauses linked to inflation. Future minimum annual rentals under non-cancelable operating leases at December 31, 2012 amounted to \$102.4 million. In the nine months ended December 31, 2012, the Company recognized additional rent expense of \$3.4 million, representing the fair value of future rent obligations on its former Americas headquarters, which are no longer used by the Company.

Table of Contents

In connection with its leased facilities, the Company has recognized a liability for asset retirement obligations representing the present value of estimated remediation costs to be incurred at lease expiration. The following table describes changes to the Company's asset retirement obligation liability for the three and nine months ended December 31, 2012 and 2011 (in thousands):

	Three months ended December 31,		Nine months ended December 31,	
	2012	2011	2012	2011
Asset retirement obligations, beginning of period	\$ 1,870	\$ 1,679	\$ 1,918	\$ 1,636
Liabilities incurred	63	27	63	65
Liabilities settled	(200)	(27)	(200)	(53)
Accretion expense	5	17	21	56
Foreign currency translation	32	(25)	(32)	(33)
Asset retirement obligations, end of period	\$ 1,770	\$ 1,671	\$ 1,770	\$ 1,671

Product Warranties

Certain of the Company's products are covered by warranty to be free from defects in material and workmanship for periods ranging from one year to five years. At the time of sale, the Company accrues a warranty liability for estimated costs to provide products, parts or services to repair or replace products in satisfaction of the warranty obligation. The Company's estimate of costs to fulfill its warranty obligations is based on historical experience and expectations of future conditions. When the Company experiences changes in warranty claim activity or costs associated with fulfilling those claims, the warranty liability is adjusted accordingly. Changes in the Company's warranty liability for the three and nine months ended December 31, 2012 and 2011 were as follows (in thousands):

	Three months ended December 31,		Nine months ended December 31,	
	2012	2011	2012	2011
Warranty liability, beginning of period	\$ 4,243	\$ 4,832	\$ 5,184	\$ 4,970
Provision for warranties issued during the period	5,251	5,218	13,942	14,630
Settlements made during the period	(5,258)	(4,687)	(14,890)	(14,237)
Less: Amount classified as Liabilities Held for Sale	(839)		(839)	
Warranty liability, end of period	\$ 3,397	\$ 5,363	\$ 3,397	\$ 5,363

During the third quarter of fiscal year 2013, the Company determined that the warranty provision and settlement amounts previously reported for the first and second quarter of fiscal year 2013 were not properly stated. The table below presents revised amounts along with amounts previously reported in its Form 10-Q for the first and second quarter of fiscal year 2013. These revisions have no impact on the previously reported consolidated statements of operations, consolidated balance sheet, or other consolidated financial statements.

Three months ended June 30, 2012		Three months ended September 30, 2012	
As Reported	As Revised	As Reported	As Revised

Warranty liability, beginning of period	\$	5,184	\$	5,184	\$	4,821	\$	4,821
Provision for warranties issued during the period		1,632		4,575		(215)		4,116
Settlements made during the period		(1,995)		(4,938)		(363)		(4,694)
Warranty liability, end of period	\$	4,821	\$	4,821	\$	4,243	\$	4,243

Purchase Commitments

At December 31, 2012, the Company had the following outstanding purchase commitments (in thousands):

	December 31, 2012	
Inventory purchases	\$	131,990
Operating expenses		63,986
Capital expenditures		18,608
Total purchase commitments	\$	214,584

Commitments for inventory purchases are made in the normal course of business to original design manufacturers, contract manufacturers and other suppliers and are expected to be fulfilled by March 2013. Operating expense commitments are for consulting services, marketing arrangements, advertising, outsourced customer services, information technology maintenance and support services, and other services. Fixed purchase commitments for capital expenditures primarily related to commitments for computer hardware and leasehold improvements. Although open purchase orders are considered enforceable and legally binding, the terms generally allow the Company the option to reschedule and adjust its requirements based on the business needs prior to delivery of goods or performance of services.

Table of Contents

Guarantees

Logitech International S.A., the parent holding company, has guaranteed payment of the purchase obligations of various subsidiaries from certain component suppliers. These guarantees generally have an unlimited term. The maximum potential future payment under the guarantee arrangements is limited to \$36.0 million. At December 31, 2012, there were no purchase obligations outstanding for which the parent holding company was required to guarantee payment.

Logitech Europe S.A., a subsidiary of the parent holding company, has guaranteed the purchase obligations of another Logitech subsidiary under three guarantee agreements. Two of these guarantees do not specify a maximum amount. The remaining guarantee has a total limit of \$7.0 million. As of December 31, 2012, \$0.1 million of guaranteed purchase obligations were outstanding under these guarantees. Logitech Europe S.A. has also guaranteed payment of the purchase obligations of a third-party contract manufacturer under three guarantee agreements. The maximum amount of these guarantees was \$5.3 million as of December 31, 2012. As of December 31, 2012, \$0.6 million of guaranteed purchase obligations were outstanding under these agreements.

Logitech International S.A. and Logitech Europe S.A. have guaranteed certain contingent liabilities of various subsidiaries related to transactions occurring in the normal course of business. The maximum amount of the guarantees was \$36.4 million as of December 31, 2012. As of December 31, 2012, \$9.9 million of guaranteed liabilities were subject to these guarantees.

Indemnifications

Logitech indemnifies certain of its suppliers and customers for losses arising from matters such as intellectual property disputes and product safety defects, subject to certain restrictions. The scope of these indemnities varies, but in some instances, includes indemnification for damages and expenses, including reasonable attorneys' fees. No amounts have been accrued for indemnification provisions at December 31, 2012. The Company does not believe, based on historical experience and information currently available, that it is probable that any material amounts will be required to be paid under its indemnification arrangements.

Logitech also indemnifies its current and former directors and certain of its current and former officers. Certain costs incurred for providing such indemnification may be recoverable under various insurance policies. Logitech is unable to reasonably estimate the maximum amount that could be payable under these arrangements because these exposures are not capped, the obligations are conditional in nature, and the facts and circumstances involved in any situation that might arise are variable.

Table of Contents

Legal Proceedings

From time to time the Company is involved in claims and legal proceedings which arise in the ordinary course of its business. The Company is currently subject to several such claims and a small number of legal proceedings. The Company believes that these matters lack merit and intends to vigorously defend against them. Based on currently available information, the Company does not believe that resolution of pending matters will have a material adverse effect on its financial condition, cash flows or results of operations. However, litigation is subject to inherent uncertainties, and there can be no assurances that the Company's defenses will be successful or that any such lawsuit or claim would not have a material adverse impact on the Company's business, financial condition, cash flows and results of operations in a particular period. Any claims or proceedings against us, whether meritorious or not, can have an adverse impact because of defense costs, diversion of management and operational resources, negative publicity and other factors. Any failure to obtain necessary license or other rights, or litigation arising out of intellectual property claims, could adversely affect the Company's business.

Note 10 Shareholders Equity

Shares Outstanding

On September 5, 2012, the Company's shareholders approved the cancellation of the 18.5 million shares repurchased under the September 2008 amended share buyback program. These shares were legally cancelled during the third quarter of fiscal year 2013, which decreased its treasury shares outstanding by this amount but also decreased its shares issued and outstanding from 191.6 million shares to 173.1 million shares.

Dividends

On September 5, 2012, the Company's shareholders approved a cash dividend of CHF 125.7 million out of retained earnings to Logitech shareholders who owned shares on September 17, 2012. Eligible shareholders were paid CHF 0.79 per share (\$0.85 per share in U.S. dollars), totaling \$133.5 million in U.S. dollars on September 18, 2012.

Share Repurchases

During the three and nine months ended December 31, 2012 and 2011, the Company had in place the approved share buyback programs shown in the following table (in thousands, excluding transaction costs). The amended September 2008 share buyback program enables the Company to repurchase shares for cancellation.

Date of Announcement	Approved Share Buyback	Approved Buyback Amount	Expiration Date	Completion Date	Number of Shares Remaining (1)	Amount Remaining
-----------------------------	-------------------------------	--------------------------------	------------------------	------------------------	---------------------------------------	-------------------------

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

Number

September 2008 - amended	28,465	\$	177,030	August 2013	584	\$	4,435
September 2008	8,344		250,000	August 2013			

(1) Represents an estimate of the number of shares remaining to be repurchased, calculated based on the amount of \$4.4 million remaining to repurchase as of December 31, 2012, divided by the per share adjusted closing price on the SIX Swiss Exchange as of the same date.

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

Table of Contents

During the three and nine months ended December 31, 2012 and 2011, the Company repurchased shares under these programs as follows (in thousands):

Date of Announcement	Shares Repurchased Program to date		Three Months ended December 31, (1)				Nine Months ended December 31,			
	Shares	Amount	2012		2011		2012		2011	
			Shares	Amount	Shares	Amount	Shares	Amount	Shares	Amount
September 2008 - amended	18,500	\$ 172,857		\$		\$	8,600	\$ 89,955		\$
September 2008	7,609	73,134							7,609	73,134
	26,109	\$ 245,991		\$		\$	8,600	\$ 89,955	7,609	\$ 73,134

(1) Represents the amount in U.S. dollars, including transaction costs, calculated based on exchange rates on the repurchase dates.

Accumulated Other Comprehensive Income (Loss)

The components of accumulated other comprehensive income (loss) were as follows (in thousands):

	December 31, 2012	March 31, 2012
Foreign currency translation	\$ (68,470)	\$ (66,854)
Pension liability adjustments, net of tax of \$752 and \$752	(20,764)	(29,362)

Total net sales	\$ 614,500	\$ 714,596	\$ 1,630,797	\$ 1,784,241

(*)In the third quarter of fiscal year 2013, the Company changed the product category classification for a number of its retail products in an effort to help investors more clearly track the progress of its various product initiatives. Products within the retail product categories as presented in the three and nine months ended December 31, 2011 have been reclassified to conform to the fiscal year 2013 presentation, with no impact on previously reported total net retail sales.

Table of Contents

The Company has two operating segments, peripherals and video conferencing, based on product markets and internal organizational structure. The peripherals segment encompasses the design, manufacturing and marketing of peripherals for PCs (personal computers), tablets and other digital platforms. The video conferencing segment encompasses the design, manufacturing and marketing of LifeSize video conferencing products, infrastructure and services for the enterprise, public sector and other business markets. The Company's operating segments do not record revenue on sales between segments, as such sales are not material.

Operating performance measures for the peripherals segment and the video conferencing segment are reported separately to Logitech's Chief Executive Officer, who is considered to be the Company's chief operating decision maker. These operating performance measures do not include share-based compensation expense and amortization of intangible assets. Share-based compensation expense and amortization of intangible assets are presented in the following financial information by operating segment as all other. Assets by operating segment are not presented since the Company does not present such data to the chief operating decision maker. Net sales, operating loss and depreciation and amortization for the Company's operating segments were as follows (in thousands):

	Three months ended December 31,		Nine months ended December 31,	
	2012	2011	2012	2011
Net sales by operating segment

Americas	\$ 263,398	\$ 286,661	\$ 683,920	\$ 745,473
EMEA	233,132	291,089	595,188	642,355
Asia Pacific	117,970	136,846	351,689	396,413
Total net sales	\$ 614,500	\$ 714,596	\$ 1,630,797	\$ 1,784,241

Table of Contents

Sales are attributed to countries on the basis of the customers' locations. The United States represented more than 10% of the Company's total consolidated net sales for each of the quarters ended December 31, 2012 and 2011. No other single country represented more than 10% of the Company's total consolidated net sales for the three months ended December 31, 2012 and 2011. One customer group represented 11% and 12% of net sales in each of the quarters ended December 31, 2012 and 2011. The United States represented more than 10% of the Company's total consolidated net sales for each of the nine months ended December 31, 2012 and 2011. No other single country represented more than 10% of the Company's total consolidated net sales for the nine months ended December 31, 2012 and 2011. One customer group represented 12% and 13% of net sales in each of the nine month periods ended December 31, 2012 and 2011.

Long-lived assets, primarily fixed assets, by geographic region were as follows (in thousands):

	December 31, 2012	March 31, 2012
Americas	\$ 44,700	\$ 49,365
EMEA	8,234	9,304
Asia Pacific	41,990	41,576
Total long-lived assets	\$ 94,924	\$ 100,245

Long-lived assets in China and the United States each represented more than 10% of the Company's total consolidated long-lived assets at December 31, 2012 and March 31, 2012.

Note 12 Acquisitions and Divestitures

On July 18, 2011, the Company acquired all of the outstanding shares of Mirial S.r.l., a Milan-based privately-held provider of personal and mobile video conferencing solutions, for a total consideration of \$18.8 million (€ 13.0 million), net of cash acquired of \$1.4 million (€ 1.0 million). In addition, Logitech incurred \$0.4 million in transaction costs, which are included in operating expenses in fiscal year 2012. Mirial has been integrated into the video conferencing reporting unit, and expect that its technology will be used to enhance video connection capabilities on a variety of mobile devices and networks.

The acquisition has been accounted for using the purchase method of accounting. Accordingly, the total consideration was allocated to the tangible and intangible assets acquired and liabilities assumed based on their estimated fair values as of the acquisition date. Fair values were determined by Company management based on information available at the date of acquisition. The results of operations of Mirial were included in Logitech's consolidated financial statements from the date of acquisition, and were not material to the Company's reported results.

Table of Contents

The allocation of total consideration to the assets acquired and liabilities assumed based on the estimated fair value of Mirial were as follows (in thousands):

	July 18, 2011	Estimated Life
Tangible assets acquired	\$ 3,332	
Intangible assets acquired		
Existing technology	4,200	5 years
Customer relationships and other	1,600	3 years
Trademark/trade name	200	4 years
Goodwill	14,068	
	23,400	
Liabilities assumed	(1,358)	
Deferred tax liability, net	(1,821)	
Total consideration	\$ 20,221	

The existing technology of Mirial relates to the software and architecture which provides the ability to engage in high quality video conferencing on mobile phones, tablets and personal computers. The value of the technology was determined based on the present value of estimated expected future cash flows attributable to the technology. Customer relationships and other relates to the ability to sell existing, in-process, and future versions of the technology to Mirial's existing customer base, valued based on projected discounted cash flows generated from customers in place. The intangible assets acquired are amortized on a straight-line basis over their estimated useful lives. The goodwill associated with the acquisition is not subject to amortization and is not expected to be deductible for income tax purposes.

Note 13 Restructuring

On April 25, 2012, Logitech announced a restructuring plan to simplify the Company's organization, to better align costs with its current business, and to free up resources to pursue growth opportunities. A majority of the restructuring activity was completed during the three months ended June 30, 2012. As part of this restructuring plan, the Company reduced its worldwide non-direct-labor workforce by approximately 340 employees. Charges and other costs related to the workforce reduction are presented as restructuring charges in the consolidated statements of operations.

The following table summarizes restructuring related activities during the three and nine months ended December 31, 2012 (in thousands):

	Total	Termination Benefits	Lease Exit Costs	Other
Accrual balance at March 31, 2012	\$	\$	\$	\$
Charges	31,227	28,655	1,472	1,100
Cash payments	(5,195)	(4,766)		(429)
Foreign exchange	63	63		
Accrual balance at June 30, 2012	\$ 26,095	\$ 23,952	\$ 1,472	\$ 671

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

Charges (credits)	(2,671)	(3,816)	48	1,097
Cash payments	(17,652)	(16,642)	(52)	(958)
Foreign exchange	14			14
Accrual balance at September 30, 2012	\$ 5,786	\$ 3,494	\$ 1,468	\$ 824
Charges (credits)	(358)	(188)	(182)	12
Cash payments	(4,511)	(2,633)	(1,104)	(774)
Foreign exchange				
Accrual balance at December 31, 2012	\$ 917	\$ 673	\$ 182	\$ 62

Table of Contents

During the three months ended December 31, 2012, the Company incurred a \$0.2 million credit related to termination benefits to affected employees due to the further refinement of estimates which were previously accrued during the three months ended June 30, 2012. For the nine months ended December 31, 2012, the Company incurred \$24.7 million charge in termination benefits to affected employees under this plan. In addition, the Company incurred legal, consulting, and other costs of \$2.2 million as a result of the terminations during the nine months ended December 31, 2012. The Company also incurred a \$0.2 million credit and a \$1.3 million charge related to lease exit costs associated with the closure of existing facilities during the three and nine months ended December 31, 2012.

During the nine months ended December 31, 2012, charges of approximately \$3.0 million related to discontinuance of certain product development efforts are included in cost of goods sold in the consolidated statements of operations. During the second quarter of fiscal year 2013, the Company also incurred \$2.2 million from the re-measurement of its Swiss defined benefit pension plan caused by the number of plan participants affected by this restructuring. This amount was not included in restructuring charge since it related to prior services.

Termination benefits were calculated based on regional benefit practices and local statutory requirements. Lease exit costs primarily relate to costs associated with the closure of existing facilities. Other charges primarily consist of legal, consulting and other costs related to employee terminations.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion in conjunction with the interim unaudited Consolidated Financial Statements and related notes.

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934. These forward-looking statements include, among other things, statements regarding our business strategy, the impact of investment prioritization decisions, product offerings, sales and marketing initiatives, trends in consumer demand affecting our products and markets, trends in the composition of our customer base, our current or future revenue and revenue mix by product, among our lower- and higher-margin products and by geographic region, our expectations regarding the potential growth opportunities for our products and in emerging markets, our expectations regarding trends in global economic conditions and consumer demand for PCs and mobile, tablet, gaming, audio, video, digital home and other computer devices and the interoperability of our products with such third party platforms, our competitive position and the effect of pricing, product, marketing and other initiatives by us and our competitors, the impact of our restructuring plan on future costs, expenses and financial performance and the timing thereof, our estimates of future charges related to our restructuring plan, our expectations regarding the recoverability of our goodwill, goodwill impairment charge estimates and the potential for future impairment charges, the impact of our current and proposed product divestitures and the timing thereof, significant fluctuations in currency exchange rates, the impact of new product introductions and product innovation on future performance or anticipated costs and expenses and the timing thereof, cash flows, the sufficiency of our cash and cash equivalents, cash generated and available borrowings (including the availability of our uncommitted lines of credit) to fund future cash requirements, our expectations regarding share repurchases and share cancellations, our expectations regarding our future working capital requirements and our anticipated capital expenditures needed to support our product development and expanded operations, our expectations regarding our future tax benefits and the adequacy of our provisions for uncertain tax positions, our expectations regarding our potential indemnification obligations, and the outcome of pending or future legal proceedings and tax audits, and Logitech's ability to achieve renewed growth, profitability and future success. Forward-looking statements also include, among others, those statements including the words anticipate, believe, could, estimate, expect, forecast, intend, may, plan, project, predict, should, will, and similar language. These forward-looking statements involve risks and uncertainties that could cause our actual performance to differ materially from that anticipated in the forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to, those discussed in the section titled Risk Factors in Part II, Item 1A of this quarterly report on Form 10-Q. You are cautioned not to place undue reliance on the forward-looking statements, which speak only as of the date of this Quarterly Report on Form 10-Q. We undertake no obligation to publicly release any revisions to the forward-looking statements or reflect events or circumstances after the date of this document.

Overview of Our Company

Logitech is a world leader in products that connect people to the digital experiences they care about. Spanning multiple computing, communication and entertainment platforms, we develop and market innovative hardware and software products that enable or enhance digital navigation, music and video entertainment, gaming, social networking, audio and video communication over the Internet, video security and home-entertainment control. We have two operating segments, peripherals and video conferencing.

Our peripherals segment encompasses the design, manufacturing and marketing of peripherals for PCs (personal computers), tablets and other digital platforms. Our products for home and business PCs include mice, trackballs, keyboards, interactive gaming controllers, multimedia speakers, headsets and webcams. Our tablet accessories include keyboards, keyboard cases and covers, headsets, wireless speakers, earphones and stands. Our Internet communications products include webcams, headsets, video

Table of Contents

communications services, and digital video security systems. Our digital music products include speakers, earphones, custom in-ear monitors and Smart Radios. For home entertainment systems, we offer the Harmony line of advanced remote controls. Our gaming products include a range of gaming controllers and microphones, as well as other accessories. During the third quarter of fiscal year 2013, we identified a number of product categories that no longer fit with our current strategic direction. As a result, we made a strategic decision to divest our remote controls and digital video security product categories, and we plan to discontinue other non-strategic products, such as speaker docks and console gaming peripherals, by the end of calendar year 2013. This decision primarily resulted from our belief that these categories of products would not make a meaningful contribution to improving our growth or profitability because they are not critical to our plans for improved future performance and in some cases we believe they may no longer be relevant in today's markets.

Our brand, portfolio management, product definition and engineering teams in our peripherals segment are responsible for product strategy, technological innovation, product design and development, and bringing our products to market. Our business groups are organized by product categories. Our global marketing organization is responsible for developing and building the Logitech brand, consumer insight, public relations and social media, customer care and digital marketing. Our regional retail sales and marketing activities are organized into three geographic areas: Americas (including North and South America), EMEA (Europe-Middle East-Africa), and Asia Pacific (including, among other countries, China, Taiwan, Japan, India and Australia).

We sell our peripheral products to a network of distributors, retailers, and OEMs. Our worldwide retail network includes wholesale distributors, consumer electronics retailers, mass merchandisers, specialty electronics stores, computer and telecommunications stores, value-added resellers, and online merchants. Sales of peripherals to our retail channels were 87% and 86% of our net sales for the nine months ended December 31, 2012 and 2011. The large majority of our revenues have historically been derived from sales of our peripheral products for use by consumers. Our OEM customers include the majority of the world's largest PC manufacturers. Sales to OEM customers were 7% and 8% of our net sales for the nine months ended December 31, 2012 and 2011.

Our video conferencing segment encompasses the design, manufacturing and marketing of video conferencing products, infrastructure, and services for the enterprise, public sector, and other business markets. Video conferencing products include scalable HD (high-definition) video communication endpoints, HD video conferencing systems with integrated monitors, video bridges and other infrastructure software and hardware to support large-scale video deployments, and services to support these products. The video conferencing segment maintains a separate marketing and sales organization, which sells LifeSize products and services worldwide. Video conferencing product development and product management organizations are separate, but coordinated with our peripherals business, particularly our Consumer Computing Platforms group. We sell our LifeSize products and services to distributors, value-added resellers, OEMs, and, occasionally, direct enterprise customers. Sales of LifeSize products were 6% of our net sales for the nine months ended December 31, 2012 and 2011. As discussed in Note 7, during the quarter ended December 31, 2012 we recorded a non-cash goodwill impairment charge estimate of \$211.0 million related to our video conferencing segment.

We seek to fulfill the increasing demand for interfaces between people and the expanding digital world across multiple platforms and user environments. The interface evolves as platforms, user models and our target markets evolve. As access to digital information has expanded, we have extended our focus to mobile devices, the digital home, and the enterprise as access points to the Internet and the digital world. All of these platforms require interfaces that are customized according to how the devices are used. We believe that continued investment in product research and development is critical to creating the innovation required to strengthen our competitive advantage and to drive future sales growth. We are committed to identifying and meeting current and future customer trends with new and improved product technologies, partnering with others where our strengths are complementary, as well as leveraging the value of the Logitech and LifeSize brands from a competitive, channel partner and consumer experience perspective. We believe innovation and product quality are important to gaining market acceptance and maintaining market leadership.

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

We are developing new categories of products, such as tablet accessories, expanding in emerging retail markets, such as China, Russia and Latin America, increasing our presence in digital music, and entering new product arenas, such as hosted video conferencing as a service, and peripherals and services for UC (unified communications). As we do so, we are confronting new competitors, many of which have

Table of Contents

more experience in the categories or markets and have greater marketing resources and brand name recognition than we have. In addition, because of the continuing convergence of the markets for computing devices and consumer electronics, we expect greater competition in the future from well-established consumer electronics companies in our new categories as well as future ones we might enter. Many of these companies have greater financial, technical, sales, marketing and other resources than we have.

Our peripherals and video conferencing industries are intensely competitive. The peripherals industry is characterized by platform evolution, short product life cycles, continual performance enhancements, and rapid adoption of technological and product advancements by competitors in our retail markets, and price sensitivity in the OEM market. We experience aggressive price competition and other promotional activities from our primary competitors and from less established brands, including brands owned by some retail customers known as house brands, in response to declining consumer demand in both mature retail markets and OEM markets. We may also encounter more competition if any of our competitors in one or more categories decide to enter other categories in which we currently operate.

As we address the current and future market challenges we face, we are simplifying our current product portfolio and roadmap to align our resources, prioritize our investments, and focus on fewer, more compelling products. From time to time, we may seek to partner with or acquire, when appropriate, companies that have products, personnel, and technologies that complement our strategic direction. We continually review our product offerings and our strategic direction in light of our profitability targets, competitive conditions, changing consumer trends, and the evolving nature of the interface between the consumer and the digital world.

Summary of Financial Results

Our total net sales for the nine months ended December 31, 2012 decreased 9%, compared with the nine months ended December 31, 2011, due to the continued sharp decline in OEM sales, and from declines in retail and video conferencing. The most significant decline was in OEM, with sales decreasing by 25% in the nine months ended December 31, 2012, compared with the same period of the prior fiscal year, and OEM units sold decreasing by 12%, primarily in keyboard/desktops and pointing devices.

Retail sales during the nine months ended December 31, 2012 decreased 7% and retail units decreased 6%, compared with the nine months ended December 31, 2011. We experienced declines in all retail regions, 9% in the Americas region, 7% in the EMEA region, and 6% in the Asia Pacific region. If foreign currency exchange rates had been the same in the nine months ended December 31, 2012 and 2011, the percentage changes in our constant dollar retail sales would have been a decrease of 8% in the Americas, 2% in EMEA, and 6% in the Asia Pacific region. Sales incentive spending (including pricing discounts) during the nine months ended December 31, 2012, compared with the same period of the prior fiscal year, decreased by 5% due to lower sell-through during this period. Sales returns expense during the nine months ended December 31, 2012, compared with the same period of the prior fiscal year, decreased by 2% due to improved channel inventory aging during this period.

Sales of video conferencing products, which were 6% of total net sales in each of the nine months ended December 31, 2012 and 2011, decreased by 3% in the nine months ended December 31, 2012, compared with the same period of the prior fiscal year, due to sales declines in all geographic regions.

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

Our gross margin for the nine months ended December 31, 2012 improved to 33.7% compared with 32.7% in the same period of the prior fiscal year. The gross margin improvement primarily resulted from the absence of a \$34.1 million inventory valuation adjustment related to Logitech Revue and related peripherals which occurred during the nine months ended December 31, 2011, and from improvements to our channel pricing program and global supply chain process, offset in part by an unfavorable change in retail product mix, the negative impact of a weaker euro, \$4.5 million in pricing actions related to the simplification of our product portfolio and \$3.0 million in restructuring-related costs.

Operating expenses for the nine months ended December 31, 2012 were 47% of net sales compared with 30% in the same period of the prior fiscal year. This increase was primarily attributable to an estimated \$211.0 million goodwill impairment charge related to our video conferencing reporting unit and from \$28.2 million in costs related to the restructuring plan initiated in April 2012.

Table of Contents

Net loss for the nine months ended December 31, 2012 was \$192.2 million, compared with net income of \$43.2 million in the nine months ended December 31, 2011. This decline primarily resulted from the estimated \$211.0 million goodwill impairment charge and \$28.2 million in restructuring charges, offset in part by a discrete tax benefit of \$32.1 million from the closure of federal income tax examinations in the United States.

Trends in Our Business

Our sales of PC peripherals for use by consumers in the Americas and Europe have historically made up the large majority of our revenues. In the last two years, the PC market has changed dramatically and there continues to be significant weakness in the global market for new PCs. This weakness has had a negative impact on our net sales in all of our PC-related categories. We believe that this weakness reflects the growing popularity of tablets and smartphones as mobile computing devices. We believe Logitech's future growth will be determined by our ability to rapidly create innovative products across multiple digital platforms, especially accessories for mobility-related products, including tablets, smartphones and other mobile devices, and for digital music, including wireless speakers and wearables such as earphones and headphones, to limit and offset the decline in our PC peripherals and to pursue growth opportunities in emerging markets, mobility-related products, products for digital music and sales to enterprise markets. The following discussion represents key trends specific to each of our two operating segments, peripherals and video conferencing.

Trends Specific to our Peripherals Segment

Emerging Markets. In our traditional, mature markets, such as North America, Western and Northern Europe, Japan, and Australia, although the installed base of PC users is large, consumer demand for PCs has declined in recent months and may potentially continue to decline in future years. As a consequence, consumer demand for PC peripherals is slowing, or in some case declining. While we continue to pursue growth opportunities in selected PC peripheral product lines in mature markets, we believe there are large growth opportunities for our PC peripherals outside the mature markets. We have invested significantly in growing the number of our sales, marketing and administrative personnel in China, our largest target emerging market, with the result that China was our third-largest country in retail sales for the nine months ended December 31, 2012. We are also expanding our presence and our sales in Russia and Latin America.

Enterprise Market. We are increasing our efforts on creating and selling products and services to enterprises. We believe the preferences of employees increasingly drive companies' choices in the information technologies they deploy to their employee base, and this consumerization of information technology has made the enterprise market open to embracing consumer technology and design. We are still in the early stages of our enterprise market team's efforts for our productivity peripherals. Growing our enterprise peripherals business will continue to require investment in selected business-specific products, targeted product marketing, and sales channel development.

Tablets, Smartphones and Other Mobile Devices. The increasing popularity of smaller, mobile computing devices, such as tablets and smartphones with touch interfaces, have created new markets and usage models for peripherals and accessories. Logitech has begun to offer products to enhance the use of mobile devices. For example, we are experiencing strong demand for our tablet keyboards, led by strong initial demand for our Logitech Ultrathin Keyboard Cover.

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

Digital Music. We believe that digital music, the seamless consumption of audio content on home and mobile devices, presents a significant growth opportunity for Logitech, based on our history of successful earphone, headset and speaker products. Many consumers listen to music as a pervasive entertainment activity, fueled by the growth in smartphones, tablets, music services and Internet radio. Logitech has a solid foundation of audio solutions to satisfy consumers' needs for music consumption, including Logitech UE earphones, headphones, and digital music speakers.

OEM business. Sales of our OEM mice and keyboards have historically made up the bulk of our OEM sales. In recent years, there has been a dramatic shift away from desktop PCs and there continues to be significant weakness in the global market for PCs which has adversely affected our sales of OEM mice and keyboards, all of which are sold with name-brand desktop PCs. We expect this trend to continue and for OEM sales to comprise a smaller percentage of our total revenues in the future.

Table of Contents

Trends in Other Peripheral Product Categories. Some of our other peripherals product categories are experiencing significant market challenges. As the quality of PC-embedded webcams improves, we expect future sales of our PC-connected webcams in mature consumer markets to continue declining. We intend to address this market decline by enhancing our webcam product line-up to enable experiences that cannot be easily achieved with an embedded webcam and by targeting webcam applications on non-PC platforms. We believe the recent disappointing sales results for Harmony reflect the aging of our Harmony products at the mid- and high-level price points as we previously directed significant digital home engineering and marketing resources towards our Logitech Revue and related peripherals for Google TV. We have since exited the Google TV product category. We recently released two new products, Logitech TV Cam HD with built-in Skype capability as well as our long-awaited Harmony Touch remote control which features an intuitive, color touch-screen enabling users the ability to personalize their screens. During the third quarter of fiscal year 2013, we identified a number of product categories that no longer fit with our current strategic direction. As a result, we made a strategic decision to divest our remote controls and digital video security product categories, and we plan to discontinue other non-strategic products, such as speaker docks and console gaming peripherals, by the end of calendar year 2013.

Trends Specific to our Video Conferencing Segment

The trend among businesses and institutions to use video conferencing offers a key growth opportunity for Logitech. However, the overall video conferencing industry has experienced a slowdown in recent quarters. In addition, there has been an increase in the competitive environment in fiscal year 2013 and we have experienced lower demand related to our new product launches. This resulted in an estimated \$211.0 million non-cash goodwill impairment charge in the quarter ended December 31, 2012. We believe the growth in our video conferencing segment depends in part on our ability to increase sales to enterprises with existing installed bases of equipment supplied by our competitors, and to enterprises that may purchase such competitor equipment in the future. We believe the ability of our LifeSize products to interoperate with the equipment of other telecommunications, video conferencing or telepresence equipment suppliers to be a key factor in purchasing decisions by current or prospective LifeSize customers. In addition, LifeSize has broadened its product portfolio to include infrastructure, cloud services and other offerings which require different approaches to developing customer solutions. We also are seeking to offer LifeSize products designed to enhance the use of mobile devices in video conferencing applications.

Emerging Market. China also represents a significant targeted emerging market for our video conferencing segment. We have invested significantly in growing the number of our video conferencing sales, marketing and administrative personnel in China.

Critical Accounting Estimates

The preparation of financial statements and related disclosures in conformity with U.S. GAAP (generally accepted accounting principles in the United States of America) requires the Company to make judgments, estimates and assumptions that affect reported amounts of assets, liabilities, net sales and expenses, and the disclosure of contingent assets and liabilities.

We consider an accounting estimate critical if it: (i) requires management to make judgments and estimates about matters that are inherently uncertain; and (ii) is important to an understanding of Logitech's financial condition and operating results.

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

We base our estimates on historical experience and on various other assumptions we believe to be reasonable under the circumstances. Although these estimates are based on management's best knowledge of current events and actions that may impact the Company in the future, actual results could differ from those estimates. Management has discussed the development, selection and disclosure of these critical accounting estimates with the Audit Committee of the Board of Directors.

There have been no significant changes to the nature of the critical accounting policies, and no significant changes to the critical accounting estimates that were disclosed in the Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the fiscal year ended March 31, 2012, except for Valuation of Long-Lived Assets described below, during the nine months ended December 31, 2012.

Valuation of Long-Lived Assets

We perform our annual goodwill impairment test of each reporting unit as of December 31 and complete the assessment during our fiscal fourth quarter, or more frequently, if certain events or circumstances warrant. Events or changes in circumstances which might indicate potential impairment in goodwill include the company-specific factors, including, but not limited to, stock price volatility, market capitalization relative to net book value, and projected revenue, market growth and operating results. Determining the number of reporting units and the fair value of a reporting unit requires us to make judgments and involves the use of significant estimates and assumptions. We have two reporting units: peripherals and video conferencing. The allocation of assets and liabilities to each of our reporting units also involves judgment and assumptions.

Table of Contents

The goodwill impairment assessment involves three tests, Step 0, Step 1 and Step 2. The Step 0 test involves performing an initial qualitative assessment to determine whether it is more likely than not that the asset is impaired and thus whether it is necessary to proceed to Step 1 and calculate the fair value of the respective reporting unit. We may proceed directly to the Step 1 test without performing the Step 0 test. The Step 1 test involves measuring the recoverability of goodwill at the reporting unit level by comparing the reporting unit's carrying amount, including goodwill, to the fair value of the reporting unit. The fair value is estimated using an income approach employing both a discounted cash flow (DCF) and a market-based model. The DCF model is based on projected cash flows from our most recent forecast (assessment forecast) developed in connection with each of our reporting units to perform the goodwill impairment assessment. The assessment forecast is based on a number of key assumptions, including, but not limited to, discount rate, compound annual growth rate (CAGR) during the forecast period, and terminal value. The terminal value is based on an exit price at the end of the assessment forecast using an earnings multiple applied to the final year of the assessment forecast. The discount rate is applied to the projected cash flows to reflect the risks inherent in the timing and amount of the projected cash flows, including the terminal value, and is derived from the weighted average cost of capital of market participants in similar businesses. The market approach model was based on applying certain revenue and earnings multiples of comparable companies relevant to each of our reporting units to the respective revenue and earnings metrics of our reporting units. To test the reasonableness of the fair values indicated by the income approach and the market-based approach, we also assessed the implied premium of the aggregate fair value over the market capitalization considered attributable to an acquisition control premium, which is the price in excess of a stock market's price that investors would typically pay to gain control of an entity. The discounted cash flow model and the market approach require the exercise of significant judgment, including assumptions about appropriate discount rates, long-term growth rates for purposes of determining a terminal value at the end of the discrete forecast period, economic expectations, timing of expected future cash flows, and expectations of returns on equity that will be achieved. Such assumptions are subject to change as a result of changing economic and competitive conditions. If the carrying amount of the reporting unit exceeds its fair value as determined by these assessments, goodwill is considered impaired, and the Step 2 test is performed to measure the amount of impairment loss. The Step 2 test measures the impairment loss by allocating the reporting unit's fair value to its assets and liabilities other than goodwill, comparing the resulting implied fair value of goodwill with its carrying amount, and recording an impairment charge for the difference.

We performed our annual goodwill impairment analysis of each of our reporting units as of December 31, 2012 using the income approach and market approach described above. We chose not to perform the Step 0 test and to proceed directly to the Step 1 test. This assessment resulted in us determining that our peripherals reporting unit passed the Step 1 test because the estimated fair value exceeded its carrying value by more than 75%. By contrast, our video conferencing reporting unit failed the Step 1 test because the estimated fair value was less than its carrying value, thus requiring a Step 2 assessment of this reporting unit. This impairment primarily resulted from a decrease in our expected CAGR during the assessment forecast period based on greater evidence of the overall enterprise video conferencing industry experiencing a slowdown in recent quarters, combined with lower demand related to new product launches, increased competition in fiscal year 2013 and other market data. These factors had an adverse effect on our recent video conferencing operating results and are anticipated to have an adverse effect on its future business.

Peripherals

Key assumptions used in the Step 1 income approach analyses for our peripherals reporting unit included the appropriate discount rates, CAGR during the forecast period, and long-term growth rates for purposes of determining a terminal value at the end of the discrete forecast period. Sensitivity assessment of key assumptions for the peripherals reporting unit Step 1 test is presented below.

- Discount rate assumptions. A hypothetical percentage increase of approximately 108% in the discount rate, holding all other assumptions constant, would not have decreased the fair value of the peripherals reporting unit below its carrying value, and thus it would not result in the reporting unit failing Step 1 of the goodwill impairment test.

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

- CAGR assumptions. A hypothetical percentage decrease of approximately 600% in the CAGR rate, holding all other assumptions constant, would not have decreased the fair value of the peripherals reporting unit below its carrying value.

- Terminal value assumptions. A hypothetical percentage decrease of approximately 110% in the terminal value, holding all other assumptions constant, would not have decreased the fair value of the peripherals reporting unit below its carrying value.

Table of Contents

Video Conferencing

Key assumptions used in the Step 1 income approach analyses for our video conferencing reporting unit also included the appropriate discount rates, CAGR during the forecast period, and long-term growth rates for purposes of determining a terminal value at the end of the discrete forecast period. Both the income and market approaches arrived at estimated fair values within a relatively close range, which supported the reasonableness of each assessment. We proceeded with a Step 2 assessment because the estimated fair value of our video conferencing reporting unit was less than its carrying value. The Step 2 test required us to fair value all assets and liabilities of our video conferencing reporting unit to determine the implied fair value of this reporting unit's goodwill. We were unable to fully complete the Step 2 analysis prior to filing of this Form 10-Q for the quarterly period ended December 31, 2012 due to the complexities of determining the implied fair value of goodwill of our video conferencing reporting unit. Based on the work performed as of this filing date, we recorded an estimated goodwill impairment charge of \$211.0 million. This impairment charge had no cash flow impact. Additional adjustments to this estimated goodwill impairment charge may be required during the fourth quarter of fiscal year 2013 when our Step 2 assessment is finalized.

Applicable to Both Reporting Units

We continue to evaluate and monitor all key factors impacting the carrying value of our recorded goodwill, as well as other long-lived assets. There are a number of uncertainties associated with the key assumptions described above based primarily on the difficulty of predicting our revenues and profitability. Our revenues and profitability are difficult to predict due to the nature of the markets in which we compete, fluctuating end-user demand, the uncertainty of current and future global economic conditions, and for many other reasons, including, but not limited to:

- Our revenues are impacted by end-user consumer demand and future global conditions, which could fluctuate abruptly and significantly during periods of uncertain economic conditions or geographic distress, as well as from shifts in consumer buying patterns.
- We must incur a large portion of our costs in advance of sales orders, because we must plan research and production, order components, buy tooling equipment, and enter into development, sales and marketing, and other operating commitments prior to obtaining firm commitments from our customers. This makes it difficult for us to rapidly adjust our costs in response to a revenue shortfall.
- Fluctuations in currency exchange rates can impact our revenues, expenses and profitability because we report our financial statements in U.S. dollars, whereas a significant portion of our revenues and expenses are in other currencies.
- The peripherals industry is characterized by short product life cycles, frequent new product introductions, rapidly changing technology, dynamic consumer demand and evolving industry standards. As a result, we must continually innovate in our new and existing product categories, introduce new products and technologies, and enhance existing products in order to remain competitive.

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

- The video conferencing industry is characterized by continual performance enhancements and large, well-financed competitors. There is increased participation in the video conferencing market by companies such as Cisco Systems, Inc. and Polycom, Inc., and as a result, we expect competition in the industry to further intensify.

Should the actual outcome of some or all of these assumptions differ significantly from the current assumptions, revisions to current cash flow assumptions could cause the fair value of the reporting units to be significantly different in future periods.

Table of Contents**Results of Operations***Net Sales*

Net sales by channel for the three and nine months ended December 31, 2012 and 2011 were as follows (in thousands):

	Three months ended December 31,			Nine months ended December 31,		
	2012	2011	Change %	2012	2011	Change %
Peripherals						
Retail	\$ 542,388	\$ 630,873	(14)%	\$ 1,413,968	\$ 1,527,385	(7)%
OEM	35,300	45,527	(22)%	108,693	144,966	(25)%
Total Peripherals	577,688	676,400	(15)%	1,522,661	1,672,351	(9)%
Video Conferencing	36,812	38,196	(4)%	108,136	111,890	(3)%
Total net sales	\$ 614,500	\$ 714,596	(14)%	\$ 1,630,797	\$ 1,784,241	(9)%

Although our financial results are reported in U.S. dollars, a portion of our sales for the three and nine months ended December 31, 2012 were made in currencies other than the U.S. dollar, such as the euro, Chinese renminbi, Japanese yen, Canadian dollar and Australian dollar. The following table presents the approximate percentage of our total net sales that were denominated in currencies other than the U.S. dollar in the three and nine months ended December 31, 2012 and 2011:

	Three months ended December 31, 2012	Three months ended December 31, 2011	Nine months ended December 31, 2012	Nine months ended December 31, 2011
Currencies other than USD	48%	49%	47%	44%

If foreign currency exchange rates had been the same in the three and nine months ended December 31, 2012 and 2011, the percentage change in our constant dollar net sales would have been:

	Three Months Ended December 31, 2012	Nine months ended December 31, 2012
Peripherals		
Retail	(13)%	(5)%
OEM	(22)%	(25)%
Video Conferencing	(4)%	(3)%
Total net sales	(13)%	(7)%

Our retail sales in the three and nine months ended December 31, 2012 declined by 14% and 7%, compared with the same periods of the prior fiscal year. We experienced declines in all three regions during these periods. Retail units sold decreased 15% during the three months ended

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

December 31, 2012, and decreased 6% in the nine months ended December 31, 2012, compared with the same periods of the prior fiscal year. Our overall retail average selling price declined 2% in the three and nine months ended December 31, 2012, compared with the same periods in the prior fiscal year. Products priced below \$40 represented 50% and 54% of retail sales in the three and nine months ended December 31, 2012, compared with 53% and 55% of retail sales in the three and nine months ended December 31, 2011. Sales of our retail products priced above \$100 represented 15% and 13% of retail sales in the three and nine months ended December 31, 2012, compared with 16% and 15% of total retail sales in the three and nine months ended December 31, 2011. If foreign currency exchange rates had been the same in the three and nine months ended December 31, 2012 and 2011, our constant dollar retail sales would have been decreases of 13% and 5%.

Table of Contents

OEM net sales decreased 22% and 25% and units sold decreased 13% and 12% in the three and nine months ended December 31, 2012, compared with the same periods in the prior fiscal year. These declines were primarily due to lower sales in the keyboard/desktop category due to product mix changes with a large customer, and lower sales of OEM mice.

Video conferencing net sales decreased 4% and 3% in the three and nine months ended December 31, 2012, compared with the same periods in the prior fiscal year, due to sales declines in all geographic regions, and were impacted by the slowdown in the overall video conferencing industry in recent quarters, together with the competitive environment in fiscal year 2013 and lower demand related to new product launches. Foreign currency exchange rates did not affect video conferencing sales.

We refer to our net sales excluding the impact of foreign currency exchange rates as constant dollar sales. Constant dollar sales are a non-GAAP financial measure, which is information derived from consolidated financial information but not presented in our financial statements prepared in accordance with U.S. GAAP. Our management uses these non-GAAP measures in its financial and operational decision-making, and believes these non-GAAP measures when considered in conjunction with the corresponding GAAP measures, facilitate a better understanding of changes in net sales. Constant dollar sales are calculated by translating current period sales in each local currency at the prior period's average exchange rate for that currency.

Retail Sales by Region

The following table presents the changes in retail units sold, retail sales and constant dollar retail sales by region for the three and nine months ended December 31, 2012 compared with the three and nine months ended December 31, 2011.

	Three months ended December 31, 2012			Nine months ended December 31, 2012		
	Change in Retail Units Sold	Change in Retail Sales	Change in Constant Dollar Retail Sales	Change in Retail Units Sold	Change in Retail Sales	Change in Constant Dollar Retail Sales
EMEA	(22)%	(20)%	(18)%	(7)%	(7)%	(2)%
Asia Pacific	(15)%	(11)%	(11)%	(5)%	(6)%	(6)%
Americas	(7)%	(8)%	(9)%	(5)%	(9)%	(8)%
Total retail sales	(15)%	(14)%	(13)%	(6)%	(7)%	(5)%

Retail sales in our EMEA region experienced a significant decrease during the three months ended December 31, 2012, compared with the same period of the prior fiscal year. This decrease resulted from double-digit percentage sales declines in all of our product categories, except tablet accessories where sales increased by 172% due to continued strong demand for our Logitech Ultrathin Keyboard Cover for the iPad. Retail sales decreased in our EMEA region during the nine months ended December 31, 2012, compared with the same period of the prior fiscal year, resulted from double-digit percentage sales declines in our other, audio-PC and remote categories, single-digit percentage sales declines in pointing devices and video, offset in part by a 275% sales increase in tablet accessories. Sales results varied by country, with significant sales decreases during the three months ended December 31, 2012 in Germany, France, Switzerland, Netherlands, Spain, Poland, United Kingdom and Czech Republic, offset in part by significant increases in Italy, Turkey and Belarus. During the nine months ended December 31, 2012, we experienced significant sales decreases in Germany, France, Poland, Spain, Netherlands, Switzerland, Czech Republic, Russia and Greece, offset in part by significant increases in Italy, Turkey, Belarus, Denmark and Slovakia. Retail sell-through in the EMEA region decreased 14% in the three and nine months ended December 31, 2012, compared with the same periods in the prior fiscal year.

Table of Contents

Asia Pacific region retail sales decreased by 11% during the three months ended December 31, 2012, compared with the same period in the prior fiscal year. This decrease resulted from double-digit percentage declines in retail other, PC gaming, audio-PC and PC keyboards and desktops, offset in part by a 162% increase in tablet accessories and a 81% increase in audio-wearables and wireless categories. Declines by country within the Asia Pacific region during the three months ended December 31, 2012 were from weakness in Australia, Japan, Taiwan, India and South Korea, offset in part by continued growth in China. Asia Pacific region retail sales decreased by 6% during the nine months ended December 31, 2012, compared with the same period of the prior fiscal year. This decrease resulted from double-digit percentage declines in retail other, PC gaming and video, single-digit percentage declines in PC keyboards and desktops, audio-PC and pointing devices, partially offset by a 192% increase in tablet accessories and by a 130% increase in the audio-wearables and wireless categories. Declines by country within the Asia Pacific region during the nine months ended December 31, 2012 were primarily from weakness in Australia, India, Taiwan and South Korea, offset in part by significant sales increases in China, New Zealand, Indonesia, Thailand and Vietnam. Retail sales in China increased by 7% during the three months ended December 31, 2012, with declines in all categories except tablet accessories where sales increased by 486%, audio-wearables and wireless where sales increased by 165%, and PC keyboards and desktops with a 10% increase. For the nine months ended December 31, 2012, retail sales in China increased by 4%, primarily from a 478% increase in tablet accessories, a 528% increase in audio-wearables and wireless, and by a 5% increase in PC keyboards and desktops, offset in part by double-digit declines in audio-PC and video, and by single-digit declines in pointing devices and PC gaming. China was our third-largest country in terms of net revenue during the three and nine months ended December 31, 2012, compared to the same periods of the prior fiscal year. Retail sell-through in China increased 20% and 13% in the three and nine months ended December 31, 2012 compared with the same periods in the prior fiscal year, while retail sell-through in the rest of the Asia Pacific region decreased 5% and 4% during the same periods.

The 8% decline in retail sales in the Americas region for the three months ended December 31, 2012, compared with the same period in the prior fiscal year, was driven by declines in most categories except tablet accessories where sales increased by 85% and PC keyboards and desktops where sales increased by 8%. The Americas region experienced a 9% decline in retail sales during the nine months ended December 31, 2012, compared with the same period in the prior fiscal year, due to declines in most categories except tablet accessories where sales increased by 89%, audio-wearables and wireless where sales increased by 34%, as well as a 6% increase in PC keyboards and desktops. During the three months ended December 31, 2012, compared to the same period of the prior fiscal year, we experienced weakness in the United States and Canada, which was offset in part by improvement in Brazil. During the nine months ended December 31, 2012, we experienced weakness in the United States and Canada, which was offset in part by improvement in Mexico and Brazil. Retail sell-through in the Americas region decreased 7% in the three and nine months ended December 31, 2012, compared with the same periods in the prior fiscal year.

We use retail sell-through data, which represents sales of our products by our retailer customers to consumers, and by our distributor customers to their customers, along with other metrics, to assess consumer demand for our products. Sell-through data is subject to limitations due to collection methods and the third party nature of the data. Although the sell-through data we obtain typically represents a majority of our retail sales, the customers supplying sell-through data vary by geographic region and from period to period. As a result of these limitations, sell-through data may not be an accurate indicator of actual consumer demand for our products.

Table of Contents**Net Retail Sales by Product Category**

Net retail sales by product category during the three and six ended December 31, 2012 and 2011 were as follows (in thousands):

	Three months ended December 31,			Nine months ended December 31,		
	2012	2011	Change %	2012	2011	Change %
Retail - Pointing Devices	\$ 153,921	\$ 171,920	(10)%	\$ 392,274	\$ 427,031	(8)%
Retail - PC Keyboards & Desktops	110,671	117,507	(6)%	302,299	302,840	0%
Retail - Tablet Accessories	39,398	17,976	119%	89,021	36,565	143%
Retail - Audio - PC	75,366	92,766	(19)%	214,158	238,932	(10)%
Retail - Audio - Wearables & Wireless	23,577	23,233	1%	57,284	39,071	47%
Retail - Video	51,664	58,343	(11)%	138,276	166,370	(17)%
Retail - PC Gaming	45,111	56,177	(20)%	118,567	129,839	(9)%
Retail - Remotes	30,094	39,706	(24)%	60,260	74,105	(19)%
Retail - Other	12,586	53,245	(76)%	41,829	112,632	(63)%
Total net retail sales	\$ 542,388	\$ 630,873	(14)%	\$ 1,413,968	\$ 1,527,385	(7)%

In the third quarter of fiscal year 2013, we changed the product category classification for a number of our retail products in an effort to help investors more clearly track the progress of our various product initiatives. Products within the retail product categories as presented in the three and nine months ended December 31, 2011 have been reclassified to conform to the fiscal year 2013 presentation, with no impact on previously reported total net retail sales. During the third quarter of fiscal year 2013, we identified a number of product categories that no longer fit with our current strategic direction. As a result, we made a strategic decision to divest our remote controls, which represents our retail remotes category, and digital video security categories, included within our retail video category, and we plan to discontinue other non-strategic products, such as speaker docks and console gaming peripherals, by the end of calendar year 2013.

Net sales reflect accruals for product returns, cooperative marketing arrangements, customer incentive programs and pricing programs.

Retail Pointing Devices

Our retail pointing device category is comprised of PC-related mice, trackpads, touchpads and presenters. Retail sales of our pointing devices decreased 10% and 8% in the three and nine months ended December 31, 2012, compared with the same period in the prior fiscal year, while retail units sold decreased 12% and 4% during these periods. The continued weakness in the global PC market was a major factor in the sales declines in this category across all regions, particularly EMEA. The primary weakness during the three and nine months ended December 31, 2012, compared to the same periods of the prior fiscal year, was in our low and mid-range product offerings which experienced double-digit declines, offset in part by our high-end product offerings which increased by 90% and 32% during these periods. The high-end sales growth was driven by our TouchMouse T620 and our new Wireless Rechargeable Touchpad T650. Sales of all cordless mice decreased 10% and 7% in the three and nine months ended December 31, 2012, while units sold decreased 10% and 2% during the same period. Corded mice sales decreased 18% and 13% and units sold decreased 16% and 9% in the three and nine months ended December 31, 2012 compared with the same periods in the prior fiscal year.

Retail PC Keyboards and Desktops

Our retail PC keyboard and desktop category is comprised of PC keyboards and keyboard/mice combo products. Retail sales of PC keyboards and desktops decreased 6% and remained constant during the three and nine months ended December 31, 2012, compared with the same periods in the prior fiscal year, while units sold decreased 10% and 1% during these periods. This category also continued to be affected by the global PC market, particularly in the EMEA and APAC regions. Sales of corded and cordless desktops decreased 27% and 10% in sales and 25% and 4% in units during the three months ended December 31, 2012, compared with the same period in the prior fiscal year. During the nine months ended December 31, 2012, compared with the same period in the prior fiscal year, corded and cordless desktops decreased 15% and increased 2% in sales and decreased 10% and increased 7% in units. Sales of corded and cordless keyboards increased 9% and 18% in sales and decreased 16% and increased 29% in units during the three and nine months ended December 31, 2012, compared with the same periods in the prior fiscal year. The primary driver of the increase in sales of corded and cordless keyboards during both periods was from strong sales of Logitech Wireless Touch Keyboard K400.

Table of Contents

Retail Tablet Accessories

Our retail table accessory is comprised of our tablet keyboards and accessories. Retail sales of tablets and accessories increased 119% and 143% during the three and nine months ended December 31, 2012, compared with the same periods in the prior fiscal year, while units sold increased 119% and 116% during these periods. These increases were driven by continued strong demand for the Logitech Ultrathin Keyboard Cover during both the three and nine months ended December 31, 2012, compared to the same periods in the prior fiscal year.

Retail Audio - PC

Our retail audio-PC category is comprised of PC speakers and PC headsets. Retail audio-PC sales decreased 19% and 10% in the three and nine months ended December 31, 2012, compared with the same periods in the prior fiscal year, while retail units sold decreased 22% and 11% during these periods. The decrease during the three months ended December 31, 2012, compared to the same period of the prior fiscal year, was due to a 16% decline in PC speakers and a 25% decline in PC headsets. For the nine months ended December 31, 2012, PC speakers declined by 11% and PC headsets declined by 9%. These declines were primarily due to the overall weakness in PCs and a market shift towards mobile audio devices.

Retail Audio - Wearables & Wireless

Our retail audio-wearables and wireless category is comprised of non-PC audio products, including ear and headphones, and wireless speakers. Retail audio-wearables and wireless sales increased 1% and 47% in the three and nine months ended December 31, 2012, compared with the same periods in the prior fiscal year, while retail units sold decreased 15% and increased 24% during these periods. The increase in sales during the three and nine months ended December 31, 2012, compared to the same period of the prior fiscal year, was driven by 29% and 98% increases in our wireless speakers for smartphones and tablets during these periods. We continued to experience strong sales from our new wireless speakers including Logitech UE Mobile Boombox and Logitech UE Boombox, both of which began shipping late in the second quarter of fiscal year 2013. Our audio wearables product category experienced a 26% decline in sales during the three months ended December 31, 2012, almost entirely due to our participation in an aggressive Black Friday promotion of our UE earphones with a large U.S. online retailer in the same period of the prior fiscal year. This year we chose not to participate in similarly aggressive promotions for our new music products launched under the Logitech UE brand, which caused our sales to decline substantially during the three months ended December 31, 2012, as compared to the same period of the prior fiscal year. For the nine months ended December 31, 2012, compared to the same period of the prior fiscal year, our audio wearables product category experienced a 12% increase in sales, driven in part by the strong initial sales of the new Logitech UE products which were initially available exclusively through Apple stores during the second quarter of fiscal year 2013.

Retail Video

Our retail video category is comprised of webcams, digital video security systems and TV Cams. Retail sales of our video products declined 11% and 17% in the three and nine months ended December 31, 2012, compared with the same periods in the prior fiscal year, while retail units sold decreased 29% and 23% during these periods. The sales decrease was mainly due to weakness in our webcam product line, which declined by 21% and 22% during both periods, and which continued to be negatively impacted by the combination of market trends, including the popularity of embedded webcams in mobile devices, and the overall weakness of the PC market. We expect future sales of our USB cable

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

connected consumer webcams in the consumer market to continue declining, as the embedded webcam experience appears to be sufficient to meet the needs of many retail consumers. We are enhancing our webcam product line-up to enable experiences that cannot be easily achieved with an embedded webcam. For example, we experienced strong growth in the high-end category driven by the Logitech HD Pro Webcam C920, which

Table of Contents

offers full HD 1080p video calls on Skype, and from Logitech BCC950 Conference Cam for the enterprise market during both the three and nine months ended December 31, 2012. The retail video sales decrease was also due to 6% and 3% declines in our digital video security products during both the three and nine months ended December 31, 2012. These decreases were offset in part by 74% and 22% increase in sales of Logitech TV Cam HD during both the three and nine months ended December 31, 2012. We made a strategic decision to divest our digital video security category of products, included within our retail video category by the end of calendar year 2013.

Retail PC Gaming

Our retail PC gaming category is comprised of PC gaming mice, gamepads, headsets, joysticks and steering wheels. Retail sales of our PC gaming peripherals declined 20% and 9% in the three and nine months ended December 31, 2012, compared with the same periods in the prior fiscal year, while retail units sold decreased 10% and increased 5% during these periods. During the three months ended December 31, 2012, we experienced declines across most product categories, with the most significant decline in our steering wheel products, offset in part by strong sales of Logitech G600 MMO Gaming Mouse. For the nine months ended December 31, 2012, we experienced significant sales decline in our steering wheel products, offset in part by increased sales from gaming mice, due primarily to strong sales of Logitech G600 MMO Gaming Mouse, and gaming headsets, due to strong sales of Logitech G35 and G930 Wireless Gaming Headsets. The difference between the decline in PC gaming sales and the increase in units during the nine months ended December 31, 2012 reflects a product mix shift away from steering wheels to lower-priced mice, keyboards and gamepads.

Retail Remotes

Retail sales of our remotes category, comprised of our Harmony remotes, decreased 24% and 19% in the three and nine months ended December 31, 2012, compared with the same periods in the prior fiscal year, while retail units sold decreased 55% and 36% during these periods. Sales decline was concentrated in the low and mid-range remotes during both the three and nine months ended December 31, 2012. The high-end category experienced a modest increase of 4% during the three months ended December 31, 2012 due to the launch of Harmony Touch in October 2012, our first new high-end remote in over four years. The significantly steeper decline in units, relative to sales, primarily reflects our transition over the last several quarters away from selling low to mid-range remotes. We made a strategic decision to divest our remotes category by the end of calendar year 2013.

Retail Other

This category is comprised of a variety of products that we currently intend to transition out of, or have already transitioned out of, as they are no longer strategic to our business. Products currently included in this category include speaker docks, streaming media systems, console gaming peripherals and Logitech Revue for Google TV products. Retail sales of this category decreased by 76% and 63% in the three and nine months ended December 31, 2012, compared with same periods in the prior fiscal year, while retail units sold decreased 68% and 48% during these periods. Speaker docks decreased by 74% and 60%, streaming media systems decreased by 83% and 38%, Logitech Revue for Google TV decreased by 100% and 93%, and console gaming peripherals decreased by 60% and 76%, during the three and nine months ended December 31, 2012, compared to the same periods of the prior fiscal year. We plan to discontinue other non-strategic products, such as speaker docks and console gaming peripherals, by the end of calendar year 2013.

Table of Contents**Gross Profit**

Gross profit for the three and nine months ended December 31, 2012 and 2011 was as follows (in thousands):

	Three months ended December 31,			Nine months ended December 31,		
	2012	2011	Change	2012	2011	Change
Net sales	\$ 614,500	\$ 714,596	(14)%	\$ 1,630,797	\$ 1,784,241	(9)%
Cost of goods sold	404,402	455,922	(11)%	1,080,452	1,201,539	(10)%
Gross profit	\$ 210,098	\$ 258,674	(19)%	\$ 550,345	\$ 582,702	(6)%
Gross margin	34.2%	36.2%		33.7%	32.7%	

Gross profit consists of net sales, less cost of goods sold which includes materials, direct labor and related overhead costs, costs of manufacturing facilities, costs of purchasing components from outside suppliers, distribution costs, write-down of inventories and amortization of intangible assets.

The decline in gross margin for the three months ended December 31, 2012, compared with the same period of the prior fiscal year, was primarily a result of an unfavorable change in retail product mix and the negative impact of a weaker euro, offset in part by tight management of channel pricing programs and a variety of efficiency improvements in our global supply chain process. The improvement in gross margin for the nine months ended December 31, 2012, compared with the same period of the prior fiscal year, primarily resulted from a \$34.1 million valuation adjustment to cost of goods sold which occurred during the three months ended June 30, 2011, and from the improvements to our channel pricing programs and global supply chain process, offset in part by an unfavorable change in retail product mix and the negative impact of a weaker euro. The \$34.1 million valuation adjustment reflected the lower of cost or market on our inventory of Logitech Revue and related peripherals on hand and at our suppliers. The gross margin for the nine months ended December 31, 2012 was also negatively impacted by \$4.5 million in pricing actions related to the simplification of our product portfolio in the Americas and EMEA regions, \$3.0 million in costs related to product development efforts that were discontinued as a result of the restructuring, a provision for a patent dispute, and changes in our product mix.

Operating Expenses

Operating expenses for the three and nine months ended December 31, 2012 and 2011 were as follows (in thousands):

	Three months ended December 31,			Nine months ended December 31,		
	2012	2011	Change	2012	2011	Change
Marketing and selling	\$ 112,698	\$ 116,313	(3)%	\$ 324,117	\$ 323,552	0%
% of net sales	18%	16%		20%	18%	
Research and development	40,393	41,911	(4)%	117,340	121,383	(3)%
% of net sales	7%	6%		7%	7%	

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

General and administrative	26,382	30,673	(14)%	84,842	89,527	(5)%
% of net sales	4%	4%		5%	5%	
Goodwill impairment	211,000		100%	211,000		100%
% of net sales	34%	0%		13%	0%	
Restructuring charges (credits)	(358)		100%	28,198		100%
% of net sales	0%	0%		2%	0%	
Total operating expenses	\$ 390,115	\$ 188,897	107%	\$ 765,497	\$ 534,462	43%

The increase in total operating expenses as a percentage of net sales was primarily attributable to the estimated \$211.0 million goodwill impairment charge related to our video conferencing reporting unit and from \$28.2 million in costs related to the restructuring plan initiated in April 2012.

Our operating expenses are incurred in U.S. dollars, Chinese renminbi, Swiss francs, euros, and, to a lesser extent, 28 other currencies. To the extent that the U.S. dollar significantly increases or decreases in value relative to the currencies in which our operating expenses are denominated, the reported dollar amounts of our sales and expenses may decrease or increase. We refer to our operating expenses excluding the impact of foreign currency exchange rates as constant dollar operating expenses. Constant dollar operating expenses are a non-GAAP financial measure, which is information derived from consolidated financial information but not presented in our financial statements prepared in accordance with U.S.

Table of Contents

GAAP. Our management uses these non-GAAP measures in its financial and operational decision-making, and believes these non-GAAP measures, when considered in conjunction with the corresponding GAAP measures, facilitate a better understanding of changes in operating expenses. Constant dollar operating expenses are calculated by translating current period operating expenses in each local currency at the prior period's average exchange rate for that currency.

Marketing and Selling

Marketing and selling expense consists of personnel and related overhead costs, corporate and product marketing, promotions, advertising, trade shows, customer and technical support and facilities costs.

Marketing and selling expense decreased by 3% in the three months ended December 31, 2012, compared with the same period in the prior fiscal year, primarily due to decreases in personnel-related expenses, share-based compensation expense and facility-related costs from the reduction in worldwide workforce resulting from the restructuring plan initiated in the first quarter of fiscal year 2013. These decreases were offset in part by an increase in product design, consulting and marketing expenses associated with the launch of new products.

Marketing and selling expense remained relatively constant during the nine months ended December 31, 2012, compared with same period of the prior fiscal year. We experienced increased product design, advertising, consulting and marketing expenses associated with the launch of new products, which were offset by decreases in personnel-related expenses and share-based compensation expense from our recent restructuring plan initiated in the first quarter of fiscal year 2013.

Foreign currency exchange rates did not have a material effect on marketing and sales expense during the three months ended December 31, 2012, compared to the same period of the prior fiscal year. If foreign currency exchange rates had been the same in the nine months ended December 31, 2012 and 2011, the percentage change in constant dollar marketing and sales expense would have been an increase of 3% instead of a less than 1% increase.

Research and Development

Research and development expense consists of personnel and related overhead costs, contractors and outside consultants, supplies and materials, equipment depreciation and facilities costs, all associated with the design and development of new products and enhancements of existing products.

Although we continued to make investments in product development, we experienced 4% and 3% decreases in research and development expense during the three and nine months ended December 31, 2012, compared with the same periods of the prior fiscal year, primarily from a decline in personnel-related expenses due to the reduction in worldwide workforce resulting from our recent restructuring plan.

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

Foreign currency exchange rates did not have a material effect on research and development expense during the three months ended December 31, 2012, compared to the same period of the prior fiscal year. For the nine months ended December 31, 2012 and 2011, the percentage change in constant dollar research and development expense would have been a 1% decrease instead of a 3% decrease.

General and Administrative

General and administrative expense consists primarily of personnel and related overhead and facilities costs for the finance, information systems, executive, human resources and legal functions.

General and administrative expense decreased by 14% from the three months ended December 31, 2011 to 2012, primarily from the decline in personnel-related expenses and share-based compensation expense due to the reduction in worldwide workforce from our recent restructuring plan.

Table of Contents

General and administrative expense decreased by 5% from the nine months ended December 31, 2011 to 2012, primarily from the decline in personnel-related expenses and share-based compensation expense due to the reduction in worldwide workforce from our recent restructuring plan, offset in part by the write-off of the remaining lease obligations resulting from the exit of our former corporate headquarters.

Foreign currency exchange rates did not have a material effect on general and administrative expense during the three months ended December 31, 2012, compared to the same period of the prior fiscal year. If foreign currency exchange rates had been the same in the nine months ended December 31, 2012 and 2011, the percentage change in constant dollar general and administrative expense would have been a decrease of 3% instead of a decrease of 5%.

Goodwill Impairment

While performing our annual goodwill impairment analysis of each of our reporting units as of December 31, 2012, we determined that our video conferencing reporting unit's estimated fair value was less than its carrying value, thus requiring a Step 2 assessment of this reporting unit. This impairment primarily resulted from a decrease in our expected CAGR during the assessment forecast period based on greater evidence of the overall enterprise video conferencing industry experiencing a slowdown in recent quarters, combined with lower demand related to new product launches, increased competition in fiscal year 2013 and other market data. The Step 2 test requires us to fair value all assets and liabilities of our video conferencing reporting unit to determine the implied fair value of this reporting unit's goodwill. We were unable to complete the Step 2 analysis prior to filing of this Form 10-Q for the quarterly period ended December 31, 2012 due to the complexities of determining the implied fair value of goodwill of our video conferencing reporting unit. Based on the work performed as of this filing date, we recorded an estimated goodwill impairment charge of \$211.0 million. We will not be required to make any current or future cash payments as a result of this impairment charge. Additional adjustments to this estimated goodwill impairment charge may be required during the fourth quarter of fiscal year 2013 when our Step 2 assessment is finalized.

Restructuring Charges

Restructuring charges consist of termination benefits, lease exit costs and other charges associated with the restructuring plan initiated in April 2012. The restructuring plan reduced our worldwide non-direct-labor workforce by approximately 340 employees. During the current quarter, we incurred a \$0.2 million credit in termination benefits to affected employees due to the further refinement of estimates which were previously accrued during the three months ended June 30, 2012. For the nine months ended December 31, 2012, we incurred a \$24.7 million charge in termination benefits to affected employees under this plan. Termination benefits are calculated based on regional benefit practices and local statutory requirements. In addition, we incurred legal, consulting, and other costs of \$2.2 million as a result of the terminations during the three and nine months ended December 31, 2012. We also incurred \$0.2 million credit and \$1.3 million charge in lease exit costs primarily related to costs associated with the closure of existing facilities during the three and nine months ended December 31, 2012. We believe we will complete the restructuring plan by the end of our fiscal year 2013.

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

Table of Contents

The following table summarizes restructuring-related activities during the three and nine months ended December 31, 2012 (in thousands):

	Total	Termination Benefits	Lease Exit Costs	Other
Accrual balance at March 31, 2012	\$	\$	\$	\$
Charges	31,227	28,655	1,472	1,100
Cash payments	(5,195)	(4,766)		(429)
Foreign exchange	63	63		
Accrual balance at June 30, 2012	\$ 26,095	\$ 23,952	\$ 1,472	\$ 671
Charges (credits)	(2,671)	(3,816)	48	1,097
Cash payments	(17,652)	(16,642)	(52)	(958)
Foreign exchange	14			14
Accrual balance at September 30, 2012	\$ 5,786	\$ 3,494	\$ 1,468	\$ 824
Charges (credits)	(358)	(188)	(182)	12
Cash payments	(4,511)	(2,633)	(1,104)	(774)
Foreign exchange				
Accrual balance at December 31, 2012	\$ 917	\$ 673	\$ 182	\$ 62

Interest Income, Net

Interest income and expense for the three and nine months ended December 31, 2012 and 2011 were as follows (in thousands):

	Three months ended December 31,			Change	Nine months ended December 31,			Change
	2012	2011			2012	2011		
Interest income	\$ 427	\$ 1,020	(58)%	\$ 1,654	\$ 2,312	(28)%		
Interest expense	(313)	(103)	204%	(1,003)	(104)	864%		
Interest income, net	\$ 114	\$ 917	(88)%	\$ 651	\$ 2,208	(71)%		

The changes in interest income for the three and nine months ended December 31, 2012, compared with the same period in the prior fiscal year, primarily resulted from lower invested balances resulting from the \$133.5 million cash dividend payment made on September 18, 2012.

Interest expense for the three and nine months ended December 31, 2012 represents commitment fees and non-recurring fees related to the revolving credit facility entered into in December 2011.

Other Income (Expense), Net

Other income and expense for the three and nine months ended December 31, 2012 and 2011 were as follows (in thousands):

	Three months ended December 31,			Nine months ended December 31,		
	2012	2011	Change	2012	2011	Change
Investment impairment	\$ (3,600)	\$	100%	\$ (3,600)	\$	100%
Foreign currency exchange gain (loss), net	26	32	(19)%	(1,582)	(681)	132%
Gain (loss) on sale of property and plant	(165)		100%	(165)	4,904	(103)%
Investment income (loss) related to deferred compensation plan	261	40	553%	360	(488)	(174)%
Gain on sale of investments		6,118	0%	831	6,118	(86)%
Other, net	(192)	523	(137)%	(182)	288	(163)%
Other income (expense), net	\$ (3,670)	\$ 6,713	(155)%	\$ (4,338)	\$ 10,141	(143)%

The \$3.6 million investment impairment resulted from the write-down of an investment in a privately-held company.

Table of Contents

Foreign currency exchange gains or losses relate to balances denominated in currencies other than the functional currency of a particular subsidiary, to the sale of currencies, and to gains or losses recognized on foreign exchange forward contracts. We do not speculate in currency positions, but we are alert to opportunities to maximize foreign exchange gains.

The \$4.9 million gain on sale of property and plant for the nine months ended December 31, 2011 relates to the sale of an unused manufacturing facility in China.

Investment income (loss) for the three and nine months ended December 31, 2012 and 2011 represents earnings, gains, and losses on trading investments related to a deferred compensation plan offered by one of our subsidiaries.

During the nine months ended December 31, 2012, we sold the remaining two of our available-for-sale securities with a total carrying value of \$0.4 million and a total par value of \$15.2 million for \$0.9 million. This sale resulted in \$0.8 million of gain recognized in other income (expense), net, \$0.3 million of which resulted from the recognition of a temporary increase in fair value previously recorded in accumulated other comprehensive loss.

Provision for (Benefit from) Income Taxes

The provision for (benefit from) income taxes and effective tax rates for the three and nine months ended December 31, 2012 and 2011 were as follows (in thousands):

	Three months ended December 31,		Nine months ended December 31,	
	2012	2011	2012	2011
Provision for (benefit from) income taxes	\$ 11,370	\$ 22,074	\$ (26,616)	\$ 17,417
Effective income tax rate	(6.2)%	28.5%	12.2%	28.7%

The provision for (benefit from) income taxes consists of income and withholding taxes. We operate in multiple jurisdictions and our profits are taxed pursuant to the tax laws of these jurisdictions. Our effective income tax rate may be affected by changes in or interpretations of tax laws in any given jurisdiction, utilization of net operating loss and tax credit carryforwards, changes in geographical mix of income and expense, and changes in management's assessment of matters such as the ability to realize deferred tax assets.

In determining the annual effective tax rate, both the restructuring described in Note 13 and the goodwill impairment described in Note 7 were treated as discrete events as they were significantly unusual and infrequent in nature. As such, related charges and costs were excluded from ordinary income in determining the annual effective tax rate. The tax benefit associated with the restructuring is approximately \$0.2 million. There was no tax benefit associated with goodwill impairment as the goodwill is not tax-deductible.

The income tax provision for the three months ended December 31, 2012 was \$11.4 million based on an effective income tax rate of 6.2% of pre-tax loss. For the three months ended December 31, 2011, the income tax provision was \$22.1 million based on an effective income tax rate of 28.5% of pre-tax income. The income tax benefit for the nine months ended December 31, 2012 was \$26.6 million based on an effective income tax rate of 12.2% of pre-tax loss. For the nine months ended December 31, 2011, the income tax provision was \$17.4 million based on an effective income tax rate of 28.7% of pre-tax income. The change in the effective income tax rate for the three and nine months ended December 31, 2012 compared with the same periods in fiscal year 2012 is primarily due to the mix of income and losses in the various tax jurisdictions in which we operate, and a discrete tax benefit of \$32.1 million and \$3.5 million during the fiscal quarter ended September 30, 2012 and December 31, 2012, respectively, related to the reversal of uncertain tax positions resulting from the closure of federal income tax examinations in the United States.

Table of Contents

The American Taxpayer Relief Act of 2012, which was enacted on January 2, 2013, extends the Federal research tax credit retroactively for two years from January 1, 2012 through December 31, 2013. An estimated tax benefit of approximately \$2.5 million from the extension of the Federal research tax credit will be reflected in our income tax provision in the quarter ending March 31, 2013.

As of December 31 and March 31, 2012, the total amount of unrecognized tax benefits and related accrued interest and penalties due to uncertain tax positions was \$102.5 million and \$143.3 million, of which \$89.2 million and \$125.4 million would affect the effective income tax rate if recognized. The decline in unrecognized tax benefits associated with uncertain tax positions in the amount of \$40.8 million is primarily due to \$42.8 million from the settlement of income tax examinations in the United States.

We continue to recognize interest and penalties related to unrecognized tax positions in income tax expense. As of December 31 and March 31, 2012, we had approximately \$6.8 million and \$7.5 million, respectively, of accrued interest and penalties related to uncertain tax positions.

We file Swiss and foreign tax returns. For all these tax returns, we are generally not subject to tax examinations for years prior to 2000. In the fiscal quarter ended September 30, 2012, we effectively settled the examinations of fiscal years 2006 and 2007 with the IRS (U.S. Internal Revenue Service). We reversed \$33.8 million of unrecognized tax benefits associated with uncertain tax positions and recorded a \$1.7 million tax provision from the proposed revised assessments as a result of the closure, resulting in a net tax benefit of \$32.1 million. There was no cash tax liability from the settlement due to utilization of net operating loss carryforwards.

In addition, the IRS completed its field examination of our U.S. subsidiary for fiscal years 2008 and 2009 during the fiscal quarter ended September 30, 2012. We received Notices of Proposed Adjustments (NOPAs) related to various domestic and international tax issues on August 15, 2012 and subsequently, received final letters dated October 17, 2012 which effectively settled the examinations. As a result of the closure of income tax examinations for fiscal years 2008 and 2009, we reversed \$9.0 million of unrecognized tax benefits associated with uncertain tax positions and recorded a \$5.5 million tax provision from the assessments, resulting in a net tax benefit of \$3.5 million. There was no cash tax liability from the settlement due to utilization of net operating loss carryforwards.

We are also under examination and have received assessment notices in other tax jurisdictions. At this time, we are not able to estimate the potential impact that these examinations may have on income tax expense. If the examinations are resolved unfavorably, there is a possibility they may have a material negative impact on our consolidated operating results.

Although we have adequately provided for uncertain tax positions, the provisions on these positions may change as revised estimates are made or the underlying matters are settled or otherwise resolved. It is not possible at this time to reasonably estimate the decrease of the unrecognized tax benefits within the next twelve months.

Liquidity and Capital Resources

Cash Balances, Available Borrowings, and Capital Resources

At December 31, 2012, our working capital was \$395.7 million, compared with \$576.7 million at March 31, 2012. This decrease in working capital was primarily due to lower cash balances, primarily resulting from the \$133.5 million cash dividend payment paid on September 18, 2012.

During the nine months ended December 31, 2012, we generated \$104.2 million from operating activities. Our main sources of operating cash flows were net loss after adding non-cash expenses of depreciation, amortization, goodwill impairment, investment impairment and share-based compensation expense, and from an increase in accounts payables and accrued liabilities. These sources of operating cash

Table of Contents

flows were offset in part by an increase in accounts receivables and other assets during this period. Net cash used in investing activities was \$42.8 million, primarily from \$39.7 million of investments in leasehold improvements, computer hardware and software, tooling and equipment and from a \$4.0 million investment in a privately-held company. Net cash used by financing activities was \$216.5 million, primarily from the \$133.5 million cash dividend payment and from the \$90.0 million used to repurchase 8.6 million shares under our share buyback program, offset in part by \$8.8 million in proceeds received from sale of shares upon exercise of options and purchase rights.

At December 31, 2012, we had cash and cash equivalents of \$322.0 million. Our cash and cash equivalents are comprised of bank demand deposits and short-term time deposits carried at cost, which is equivalent to fair value. Approximately 52% of our cash and cash equivalents are held by our Swiss-based entities, and approximately 32% is held by our subsidiaries in Hong Kong and China. We do not believe we would be subject to any material adverse tax impact or significantly inhibited by any country in which we do business from the repatriation of funds to Switzerland, our home domicile.

In December 2011, we entered into a Senior Revolving Credit Facility Agreement with a group of primarily Swiss banks that provides for a revolving multicurrency unsecured credit facility in an amount of up to \$250.0 million. We may, upon notice to the lenders and subject to certain requirements, arrange with existing or new lenders to provide up to an aggregate of \$150.0 million in additional commitments, for a total of \$400.0 million of unsecured revolving credit. The credit facility may be used for working capital, general corporate purposes, and acquisitions. There were no outstanding borrowings under the credit facility at December 31, 2012.

The credit facility matures on October 31, 2016. We may prepay the loans under the credit facility in whole or in part at any time without premium or penalty. Borrowings under the credit facility will accrue interest at a per annum rate based on LIBOR (London Interbank Offered Rate), or EURIBOR (Euro Interbank Offered Rate) in the case of loans denominated in euros, plus a variable margin determined quarterly based on the ratio of senior debt to earnings before interest, taxes, depreciation and amortization for the preceding four-quarter period, plus, if applicable, an additional rate per annum intended to compensate the lenders for the cost of compliance with regulatory reserve requirements and other banking regulations. We also pay a quarterly commitment fee of 40% of the applicable margin on the available commitment. In connection with entering into the credit facility, we incurred non-recurring fees totaling \$1.5 million, which are amortized on a straight-line basis over the term of the credit facility.

The facility agreement contains representations, covenants, including threshold financial covenants, and events of default customary in Swiss credit markets. Affirmative covenants include covenants regarding reporting requirements, maintenance of insurance, maintenance of properties and compliance with applicable laws and regulations, and financial covenants that require the maintenance of net senior debt, interest cover and adjusted equity ratios determined in accordance with the terms of the facility. Negative covenants limit the ability of the Company and its subsidiaries, among other things, to grant liens, make investments, incur debt, make restricted payments, enter into a merger or acquisition, or sell, transfer or dispose of assets, in each case subject to certain exceptions. As of December 31, 2012, we were in compliance with all covenants and conditions of this facility.

This facility stipulates that, upon an uncured event of default under the facility, the lenders may declare all or a portion of the outstanding obligations payable by us to be immediately due and payable, terminate their commitments and exercise other rights and remedies provided for under the facility. The events of default under the facility include, among other things, payment defaults, covenant defaults, inaccuracy of representations and warranties, cross defaults with certain other indebtedness, bankruptcy and insolvency events and events that have a material adverse effect (as defined in the facility). Upon a change of control of the Company, lenders whose commitments aggregate more than two-thirds of the total commitments under the facility may terminate the commitments and declare all outstanding obligations to be due and payable.

Table of Contents

We have credit lines with several European and Asian banks totaling \$76.8 million as of December 31, 2012. As is common for businesses in European and Asian countries, these credit lines are uncommitted and unsecured. Despite the lack of formal commitments from the banks, we believe that these lines of credit will continue to be made available because of our long-standing relationships with these banks and our current financial condition. At December 31, 2012, there were no outstanding borrowings under these lines of credit. There are no financial covenants or cross default provisions under these facilities. We also have available credit lines related to corporate credit cards totaling \$30.2 million as of December 31, 2012. The outstanding borrowings under these credit lines are recorded in other current liabilities. There are no financial covenants or cross default provisions under these credit lines.

Cash Flow from Operating Activities

The following table presents selected financial information and statistics as of December 31, 2012 and 2011 (dollars in thousands):

	2012	December 31,	2011
Accounts receivable, net	\$ 264,589	\$	318,678
Inventories	277,477		295,749
Working capital	395,739		621,034
Days sales in accounts receivable (DSO) (1)	39 days		40 days
Inventory turnover (ITO) (2)	5.6x		6.2x
Net cash provided by operating activities	\$ 104,196	\$	154,168

(1) DSO is determined using ending accounts receivable as of the most recent quarter-end and net sales for the most recent quarter.

(2) ITO is determined using ending inventories and annualized cost of goods sold (based on the most recent quarterly cost of goods sold).

During the nine months ended December 31, 2012, we generated net cash of \$104.2 million from operating activities, compared to \$154.2 million for the same period in the prior fiscal year. The primary drivers of this decrease involved a net loss of \$192.2 million generated in the nine months ended December 31, 2012 compared with net income of \$43.2 million in the nine months ended December 31, 2011, and from a \$39.7 million increase in accounts payables, a \$5.2 million increase in accrued liabilities and a \$1.4 million decrease in inventories. These increases to operating activities were offset in part by a \$41.3 million increase in accounts receivables and a \$2.2 million increase in other assets.

DSO for the current quarter decreased by 1 day compared with the same period of the prior fiscal year primarily from increased cash collections. Typical payment terms require customers to pay for product sales generally within 30 to 60 days. However, terms may vary by customer type, by country and by selling season. Extended payment terms are sometimes offered to a limited number of customers during the second and third fiscal quarters. We do not modify payment terms on existing receivables, but may offer discounts for early payment.

Inventory turnover between the nine months ended December 31, 2012 and 2011 decreased due to lower annualized cost of goods sold between the two periods.

Table of Contents***Cash Flow from Investing Activities***

Cash flows from investing activities during the nine months ended December 31, 2012 and 2011 were as follows (in thousands):

	Nine months ended December 31,	
	2012	2011
Purchases of property, plant and equipment	\$ (39,737)	\$ (31,417)
Acquisition, net of cash acquired		(18,814)
Investment in privately-held company	(3,970)	
Proceeds from sale of property and plant		4,904
Proceeds from sale of available-for-sale securities	917	6,550
Purchases of trading investments	(2,294)	(5,577)
Proceeds from sale of trading investments	2,309	5,520
Net cash used in investing activities	\$ (42,775)	\$ (38,834)

Our expenditures for property, plant and equipment during the nine months ended December 31, 2012 and 2011 were principally normal expenditures for leasehold improvements, computer hardware and software, tooling and equipment.

During the second quarter of fiscal year 2013, we invested \$4.0 million in a privately-held company in exchange for convertible preferred stock. We account for this investment under the cost method of accounting since we have less than a 20% ownership interest and we lack the ability to exercise significant influence over the operating and financial policies of the investee.

Proceeds from the sale of property and plant were related to the sale of an unused manufacturing facility in China in the three months ended June 30, 2011.

During the nine months ended December 31, 2012, we sold our two remaining available-for-sale securities with a total carrying value of \$0.4 million and a total par value of \$15.2 million for \$0.9 million. This sale resulted in \$0.8 million of gain recognized in other income (expense), net, \$0.3 million of which resulted from the recognition of a temporary increase in fair value previously recorded in accumulated other comprehensive income.

The purchases and sales of trading investments in the nine months ended December 31, 2012 and 2011 represent mutual fund activity directed by participants in a deferred compensation plan offered by one of the Company's subsidiaries. The mutual funds are held by a Rabbi Trust.

Cash Flow from Financing Activities

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

The following table presents information on our cash flows from financing activities during the nine months ended December 31, 2012 and 2011 (in thousands):

	Nine months ended December 31,	
	2012	2011
Cash dividend payment	\$ (133,462)	\$
Purchase of treasury shares	(89,955)	(73,134)
Proceeds from sale of shares upon exercise of options and purchase rights	8,843	9,852
Tax withholdings related to net share settlements of RSUs	(1,995)	(890)
Excess tax benefits from share-based compensation	26	33
Net cash used in financing activities	\$ (216,543)	\$ (64,139)

	Nine months ended December 31,	
	2012	2011
Number of shares repurchased	8,600	7,609
Value of shares repurchased	\$ 89,955	\$ 73,134
Average price per share	\$ 10.46	\$ 9.61

Table of Contents

On September 5, 2012, our shareholders approved a cash dividend payment of CHF 125.7 million out of retained earnings to Logitech shareholders who owned shares on September 17, 2012. Eligible shareholders were paid CHF 0.79 per share (\$0.85 per share in U.S. dollars), totaling \$133.5 million in U.S. dollars on September 18, 2012.

During the nine months ended December 31, 2012, we repurchased 8.6 million shares for \$90.0 million under the Company's amended September 2008 buyback program, compared with the nine months ended December 31, 2011, during which we repurchased 7.6 million shares for \$73.1 million. There were no repurchases during the three months ended December 31, 2012. The amounts of the repurchases include transaction costs incurred as part of the repurchase.

Cash of \$8.8 million and \$9.9 million was provided during the nine months ended December 31, 2012 and 2011 from the sale of shares upon exercise of options and purchase rights pursuant to the Company's stock plans. The payment of tax withholdings related to net share settlements of RSUs (restricted stock units) required the use of \$2.0 million and \$0.9 million in cash in the nine month periods ended December 31, 2012 and 2011.

Cash Outlook

Our principal sources of liquidity are our cash and cash equivalents, cash flow generated from operations and, to a lesser extent, capital markets and borrowings. Our future working capital requirements and capital expenditures may increase to support investment in product innovations and growth opportunities, or to acquire or invest in complementary businesses, products, services, and technologies.

In December 2011, the Company entered into a Senior Revolving Credit Facility Agreement with a group of primarily Swiss banks that provides for a revolving multicurrency unsecured credit facility in an amount of up to \$250.0 million. The Company may, upon notice to the lenders and subject to certain requirements, arrange with existing or new lenders to provide up to an aggregate of \$150.0 million in additional commitments, for a total of \$400.0 million of unsecured revolving credit. The credit facility may be used for working capital, general corporate purposes, and acquisitions. The credit facility matures on October 31, 2016. The Company may prepay the loans under the credit facility in whole or in part at any time without premium or penalty. The facility agreement contains representations, covenants, including threshold financial covenants, and events of default customary in Swiss credit markets. There were no outstanding borrowings under the credit facility at December 31, 2012. As of December 31, 2012, we were in compliance with all covenants and conditions related to this facility.

In September 2008, our Board of Directors approved a share buyback program, which authorizes the Company to invest up to \$250 million to purchase its own shares. In November 2011, we received approval from the Swiss regulatory authorities for an amendment to the September 2008 share buyback program to enable future repurchases of shares for cancellation. In fiscal year 2012, we repurchased 7.6 million shares for \$73.1 million under the September 2008 program. Under the amended September 2008 program, we repurchased 9.9 million shares for \$82.9 million in fiscal year 2012 and 8.6 million shares for \$90.0 million in the first quarter of fiscal year 2013. As of December 31, 2012, the approved amount remaining under the amended September 2008 program was \$4.4 million. On September 5, 2012, our shareholders approved the cancellation of 18.5 million shares repurchased under the September 2008 amended share buyback program. These shares were legally cancelled during the third quarter of fiscal year 2013.

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

We file Swiss and foreign tax returns. For all these tax returns, we are generally not subject to tax examinations for years prior to 2000. In the fiscal quarter ended September 30, 2012, we effectively settled the examinations of fiscal years 2006 and 2007 with the IRS (U.S. Internal Revenue Service). We reversed \$33.8 million of unrecognized tax benefits associated with uncertain tax positions and recorded a \$1.7 million tax provision from the proposed revised assessments as a result of the closure, resulting in a net tax benefit of \$32.1 million. There was no cash tax liability from the settlement due to utilization of net operating loss carryforwards.

Table of Contents

In addition, the IRS completed its field examination of our U.S. subsidiary for fiscal years 2008 and 2009 during the fiscal quarter ended September 30, 2012. We received NOPAs related to various domestic and international tax issues on August 15, 2012 and subsequently, received final letters dated October 17, 2012 which effectively settled the examinations. As a result of the closure of income tax examinations for fiscal years 2008 and 2009, we reversed \$9.0 million of unrecognized tax benefits associated with uncertain tax positions and recorded a \$5.5 million tax provision from the assessments, resulting in a net tax benefit of \$3.5 million. There was no cash tax liability from the settlement due to utilization of net operating loss carryforwards.

We are also under examination and have received assessment notices in other tax jurisdictions. At this time, we are not able to estimate the potential impact that these examinations may have on income tax expense. If the examinations are resolved unfavorably, there is a possibility they may have a material negative impact on our consolidated operating results.

Although we have adequately provided for uncertain tax positions, the provisions on these positions may change as revised estimates are made or the underlying matters are settled or otherwise resolved. It is not possible at this time to reasonably estimate the decrease of the unrecognized tax benefits within the next twelve months.

On April 25, 2012, we announced a restructuring plan to reduce operating costs and improve financial results. We believe we will complete the restructuring plan by the end of our fiscal year 2013.

Our other contractual obligations and commitments which require cash are described in the following sections.

For over ten years, we have generated positive cash flows from our operating activities, including cash from operations of \$196.1 million in fiscal year 2012. During the nine months ended December 31, 2012, our normal level of cash and cash equivalents was significantly reduced by the cash dividend payment of CHF 125.7 million (U.S. dollar amount of \$133.5 million at the time it was paid) out of retained earnings, and by share repurchases during this period. If we do not generate sufficient operating cash flows to support our operations and future planned cash requirements, our operations could be harmed and our access to credit facilities could be restricted or eliminated. However, we believe that the trend of our historical cash flow generation, our projections of future operations and reduced expenses, our available cash balances, credit lines and credit facility will provide sufficient liquidity to fund our operations for at least the next 12 months.

Although we believe that we can meet our liquidity needs, if we fail to meet our operating forecast or market conditions negatively affect our cash flows or ability to fund growth opportunities, we may be required to seek additional funding. If we seek additional funding, adequate funds may not be available on favorable terms, or at all. If adequate funds are not available on acceptable terms, or at all, we may be unable to adequately fund our business plans and it could have a negative effect on our business, operating cash flows and financial condition.

Contractual Obligations and Commitments

As of December 31, 2012, our outstanding contractual obligations and commitments included: (i) facilities leased under operating lease commitments, (ii) purchase commitments and obligations, (iii) long-term liabilities for income taxes payable, and (iv) defined benefit pension

plan and non-retirement post-employment benefit obligations.

Table of Contents

The following summarizes our contractual obligations and commitments at December 31, 2012 (in thousands):

	December 31, 2012	
Operating leases	\$	102,406
Purchase commitments - inventory		131,990
Purchase obligations - capital expenditures		18,608
Purchase obligations - operating expenses		63,986
Income taxes payable - non-current		100,358
Obligation for deferred compensation		15,199
Pension and post-employment obligations		38,925
Other long-term liabilities		12,740
Total contractual obligations and commitments	\$	484,212

Operating Leases

We lease facilities under operating leases, certain of which require us to pay property taxes, insurance and maintenance costs. Operating leases for facilities are generally renewable at our option and usually include escalation clauses linked to inflation. The remaining terms on our non-cancelable operating leases expire in various years through 2028. Our asset retirement obligations on these leases as of December 31, 2012 were \$1.8 million.

Purchase Commitments

At December 31, 2012, we have fixed purchase commitments of \$132.0 million for inventory purchases made in the normal course of business to original design manufacturers, contract manufacturers and other suppliers, which are expected to be fulfilled by March 2013. We also had commitments of \$64.0 million for consulting services, marketing arrangements, advertising, outsourced customer services, information technology maintenance and support services, and other services. Fixed purchase commitments for capital expenditures amounted to \$18.6 million at December 31, 2012, and primarily relate to commitments for computer hardware and leasehold improvements. We expect to continue making capital expenditures in the future to support product development activities and ongoing and expanded operations. Although open purchase commitments are considered enforceable and legally binding, the terms generally allow us the option to reschedule and adjust our requirements based on business needs prior to delivery of goods or performance of services.

Income Taxes Payable

At December 31, 2012, we had \$100.4 million in non-current income taxes payable, including interest and penalties, related to our income tax liability for recognized uncertain tax positions, compared with \$137.3 million in non-current taxes payable as of March 31, 2012. The decline in income tax liability associated with uncertain tax positions in the amount of \$36.9 million is primarily due to \$38.9 million from the closure of income tax examinations in the United States.

Obligation for Deferred Compensation

At December 31, 2012, we had \$15.2 million in liabilities related to a deferred compensation plan offered by one of our subsidiaries. For more information, please refer to our Annual Report on Form 10-K for the fiscal year ended March 31, 2012.

Pension and Post-Employment Obligations

At December 31, 2012, we had \$38.9 million in liabilities related to our defined benefit pension plans and non-retirement post-employment benefit obligations. For more information, please refer to our Annual Report on Form 10-K for the fiscal year ended March 31, 2012.

Table of Contents

Other Contractual Obligations and Commitments

For further detail about our contractual obligations and commitments, please refer to our Annual Report on Form 10-K for the fiscal year ended March 31, 2012.

Off-Balance Sheet Arrangements

We have not entered into any transactions with unconsolidated entities whereby we have financial guarantees, subordinated retained interests, derivative instruments or other contingent arrangements that expose us to material continuing risks, contingent liabilities, or any other obligation under a variable interest in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to us.

Guarantees

Logitech International S.A., the parent holding company, has guaranteed payment of the purchase obligations of various subsidiaries from certain component suppliers. These guarantees generally have an unlimited term. The maximum potential future payment under the guarantee arrangements is limited to \$36.0 million. At December 31, 2012, there were no purchase obligations outstanding for which the parent holding company was required to guarantee payment.

Logitech Europe S.A., a subsidiary of the parent holding company, has guaranteed the purchase obligations of another Logitech subsidiary under three guarantee agreements. Two of these guarantees do not specify a maximum amount. The remaining guarantee has a total limit of \$7.0 million. As of December 31, 2012, \$0.1 million of guaranteed purchase obligations were outstanding under these guarantees. Logitech Europe S.A. has also guaranteed payment of the purchase obligations of a third-party contract manufacturer under three guarantee agreements. The maximum amount of these guarantees was \$5.3 million as of December 31, 2012. As of December 31, 2012, \$0.6 million of guaranteed purchase obligations were outstanding under these agreements.

Logitech International S.A. and Logitech Europe S.A. have guaranteed certain contingent liabilities of various subsidiaries related to transactions occurring in the normal course of business. The maximum amount of the guarantees was \$36.4 million as of December 31, 2012. As of December 31, 2012, \$9.9 million of guaranteed liabilities were subject to these guarantees.

Indemnifications

Logitech indemnifies certain of its suppliers and customers for losses arising from matters such as intellectual property disputes and product safety defects, subject to certain restrictions. The scope of these indemnities varies, but in some instances, includes indemnification for damages and expenses, including reasonable attorneys' fees. No amounts have been accrued for indemnification provisions at December 31, 2012. We do

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

not believe, based on historical experience and information currently available, that it is probable that any material amounts will be required to be paid under our indemnification arrangements.

Logitech also indemnifies its current and former directors and certain of its current and former officers. Certain costs incurred for providing such indemnification may be recoverable under various insurance policies. Logitech is unable to reasonably estimate the maximum amount that could be payable under these arrangements because these exposures are not capped, the obligations are conditional in nature, and the facts and circumstances involved in any situation that might arise.

Table of Contents

Legal Proceedings

From time to time the Company is involved in claims and legal proceedings which arise in the ordinary course of its business. The Company is currently subject to several such claims and a small number of legal proceedings. The Company believes that these matters lack merit and intends to vigorously defend against them. Based on currently available information, the Company does not believe that resolution of pending matters will have a material adverse effect on its financial condition, cash flows or results of operations. However, litigation is subject to inherent uncertainties, and there can be no assurances that the Company's defenses will be successful or that any such lawsuit or claim would not have a material adverse impact on the Company's business, financial condition, cash flows and results of operations in a particular period. Any claims or proceedings against us, whether meritorious or not, can have an adverse impact because of defense costs, diversion of management and operational resources, negative publicity and other factors. Any failure to obtain necessary license or other rights, or litigation arising out of intellectual property claims, could adversely affect our business.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk

Market risk represents the potential for loss due to adverse changes in the fair value of financial instruments. As a global concern, the Company faces exposure to adverse movements in foreign currency exchange rates and interest rates. These exposures may change over time as business practices evolve and could have a material adverse impact on our financial results.

Foreign Currency Exchange Rates

We are exposed to foreign currency exchange rate risk as we transact business in multiple foreign currencies, including exposure related to anticipated sales, anticipated purchases and assets and liabilities denominated in currencies other than the U.S. dollar. Logitech transacts business in over 30 currencies worldwide, of which the most significant to operations are the CNY (Chinese renminbi), Australian dollar, Taiwanese dollar, euro, British pound, Canadian dollar, Japanese Yen and Mexican peso. The functional currency of our operations is primarily the U.S. dollar. To a lesser extent, certain operations use the euro, CNY, Swiss franc or the local currency of the country as their functional currencies. Accordingly, unrealized foreign currency gains or losses resulting from the translation of net assets or liabilities denominated in foreign currencies to the U.S. dollar are accumulated in the cumulative translation adjustment component of other comprehensive loss in shareholders' equity.

The table below provides information about our underlying transactions that are sensitive to foreign exchange rate changes, primarily assets and liabilities denominated in currencies other than the functional currency, where the net exposure is greater than \$0.5 million at December 31, 2012. The table also presents

Table of Contents

the U.S. dollar impact on earnings of a 10% appreciation and a 10% depreciation of the functional currency as compared with the transaction currency (in thousands):

Functional Currency	Transaction Currency	Net Exposed Long (Short) Currency Position	FX Gain (Loss) From 10% Appreciation of Functional Currency	FX Gain (Loss) From 10% Depreciation of Functional Currency
U.S. dollar	Chinese renminbi	\$ 63,729	\$ (5,794)	\$ 7,081
U.S. dollar	Australian dollar	12,451	(1,132)	1,383
Taiwanese dollar	U.S. dollar	12,327	(1,121)	1,370
Euro	British pound	9,857	(896)	1,095
U.S. dollar	Canadian dollar	5,529	(503)	614
U.S. dollar	India rupee	3,884	(353)	432
Singapore dollar	U.S. dollar	2,760	(251)	307
Euro	Russian rouble	1,911	(174)	212
Euro	Romanian leu	566	(51)	63
Euro	Hungarian forint	(503)	46	(56)
Euro	Norwegian krone	(510)	46	(57)
Swiss franc	British pound	(856)	78	(95)
Euro	Polish zloty	(910)	83	(101)
Euro	Swedish krona	(1,039)	94	(115)
U.S. dollar	Swiss franc	(1,621)	147	(180)
Japanese yen	U.S. dollar	(8,026)	730	(892)
Mexican peso	U.S. dollar	(9,894)	899	(1,099)
		\$ 89,655	\$ (8,152)	\$ 9,962

Long currency positions represent net assets being held in the transaction currency while short currency positions represent net liabilities being held in the transaction currency.

Our principal manufacturing operations are located in China, with much of our component and raw material costs transacted in CNY. However, the functional currency of our Chinese operating subsidiary is the U.S. dollar as its sales and trade receivables are transacted in U.S. dollars. To hedge against any potential significant appreciation of the CNY, we maintain a portion of our cash investments in CNY-denominated accounts. At December 31, 2012, net assets held in USD totaled \$63.7 million. We continue to evaluate the level of net assets held in USD relative to component and raw material purchases and interest rates on cash equivalents.

Derivatives

We enter into foreign exchange forward contracts to hedge against exposure to changes in foreign currency exchange rates related to its subsidiaries' forecasted inventory purchases. The primary risk managed by using derivative instruments is the foreign currency exchange rate risk. We have designated these derivatives as cash flow hedges. Logitech does not use derivative financial instruments for trading or speculative purposes. These hedging contracts generally mature within four months, and are denominated in the same currency as the underlying transactions. Gains and losses in the fair value of the effective portion of the hedges are deferred as a component of accumulated other comprehensive loss until the hedged inventory purchases are sold, at which time the gains or losses are reclassified to cost of goods sold. We assess the effectiveness of the hedges by comparing changes in the spot rate of the currency underlying the forward contract with changes in the

spot rate of the currency in which the forecasted transaction will be consummated. If the underlying transaction being hedged fails to occur or if a portion of the hedge does

Table of Contents

not generate offsetting changes in the foreign currency exposure of forecasted inventory purchases, we immediately recognize the gain or loss on the associated financial instrument in other income (expense). As of December 31, 2012, the notional amounts of foreign exchange forward contracts outstanding related to forecasted inventory purchases were \$49.7 million (37.7 million). Deferred realized losses of \$1.5 million are recorded in accumulated other comprehensive loss at December 31, 2012, and are expected to be reclassified to cost of goods sold when the related inventory is sold. Deferred unrealized losses of \$1.0 million related to open cash flow hedges are also recorded in accumulated other comprehensive loss as of December 31, 2012 and these forward contracts will be revalued in future periods until the related inventory is sold, at which time the resulting gains or losses will be reclassified to cost of goods sold.

We also enter into foreign exchange forward contracts to reduce the short-term effects of foreign currency fluctuations on certain foreign currency receivables or payables. These forward contracts generally mature within three months. We may also enter into foreign exchange swap contracts to economically extend the terms of its foreign exchange forward contracts. The primary risk managed by using forward and swap contracts is the foreign currency exchange rate risk. The gains or losses on foreign exchange forward contracts are recognized in earnings based on the changes in fair value. Cash flows from these contracts are classified as operating activities in the consolidated statements of cash flows.

The notional amounts of foreign exchange forward contracts outstanding at December 31, 2012 relating to foreign currency receivables or payables were \$38.6 million. Open forward contracts as of December 31, 2012 consisted of contracts in euros to sell British pounds, contracts in Australian dollars to purchase U.S. dollars, contracts in Taiwanese dollars to sell U.S. dollars and contracts in Canadian dollars to purchase U.S. dollars at future dates at a predetermined exchange rate. The notional amounts of foreign exchange swap contracts outstanding at December 31, 2012 were \$14.4 million. Swap contracts outstanding at December 31, 2012 consisted of contracts in Mexican pesos and Japanese Yen. There were no unrealized net losses on the contracts outstanding at December 31, 2012.

If the U.S. dollar had appreciated by 10% at December 31, 2012 compared with the foreign currencies in which we have forward or swap contracts, an unrealized gain of \$7.0 million in our forward foreign exchange contract portfolio would have occurred. If the U.S. dollar had depreciated by 10% compared with the foreign currencies in which we have forward or swap contracts, a \$7.5 million unrealized loss in our forward foreign exchange contract portfolio would have occurred.

Interest Rates

Changes in interest rates could impact our future interest income on our cash equivalents and investment securities. We prepared sensitivity analyses of our interest rate exposures to assess the impact of hypothetical changes in interest rates. Based on the results of these analyses, a 100 basis point decrease or increase in interest rates from the December 31, 2012 period end rates would not have a material effect on our results of operations or cash flows.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Logitech's Chief Executive Officer and Chief Financial Officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)) as of the end of the period covered by this Form 10-Q, have concluded that, as of such date, our disclosure controls and procedures are effective.

Disclosure controls are controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act, such as this Form 10-Q, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls are also designed to ensure that this information is accumulated and communicated to our management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting during the fiscal quarter ended December 31, 2012, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time the Company is involved in claims and legal proceedings which arise in the ordinary course of its business. The Company is currently subject to several such claims and a small number of legal proceedings. The Company believes that these matters lack merit and intends to vigorously defend against them. Based on currently available information, the Company does not believe that resolution of pending matters will have a material adverse effect on its financial condition, cash flows or results of operations. However, litigation is subject to inherent uncertainties, and there can be no assurances that the Company's defenses will be successful or that any such lawsuit or claim would not have a material adverse impact on the Company's business, financial condition, cash flows and results of operations in a particular period. Any claims or proceedings against us, whether meritorious or not, can have an adverse impact because of defense costs, diversion of management and operational resources, negative publicity and other factors. Any failure to obtain necessary license or other rights, or litigation arising out of intellectual property claims, could adversely affect our business.

ITEM 1A. RISK FACTORS

Our operating results are difficult to predict and fluctuations in results may cause volatility in the price of our shares.

Our revenues and profitability are difficult to predict due to the nature of the markets in which we compete, fluctuating end-user demand, the uncertainty of current and future global economic conditions, and for many other reasons, including the following:

- Our operating results are highly dependent on the volume and timing of orders received during the quarter, which are difficult to forecast. Customers generally order on an as-needed basis and we typically do not obtain firm, long-term purchase commitments from our customers. As a result, our revenues in any quarter depend primarily on orders booked and shipped in that quarter.
- A significant portion of our quarterly retail sales typically occurs in the last weeks of each quarter, further increasing the difficulty in predicting quarterly revenues and profitability.
- Our sales are impacted by end-user consumer demand and current and future global economic conditions, and can therefore fluctuate abruptly and significantly during periods of uncertain economic conditions or geographic distress, as well as from shifts in consumer buying patterns.

Table of Contents

- We must incur a large portion of our costs in advance of sales orders, because we must plan research and production, order components, buy tooling equipment, and enter into development, sales and marketing, and other operating commitments prior to obtaining firm commitments from our customers. This makes it difficult for us to rapidly adjust our costs during the quarter in response to a revenue shortfall, which could adversely affect our operating results.
- We may not fully or timely realize the anticipated benefits from the restructuring plan we announced in April 2012. The restructuring plan is intended to simplify the organization, to reduce operating costs through a global workforce reduction and a reduction in the complexity of our product portfolio, and to better align costs with our current business.
- Fluctuations in currency exchange rates can impact our revenues, expenses and profitability because we report our financial statements in U.S. dollars, whereas a significant portion of our revenues and expenses are in other currencies. We attempt to adjust product prices over time to offset the impact of currency movements. However, over short periods of time and during periods of weakness in consumer spending, our ability to increase local currency selling prices to offset the impact of currency fluctuations is limited.

Because our operating results are difficult to predict, our results may be below the expectations of financial analysts and investors, which could cause the price of our shares to decline.

If we fail to innovate and develop new products in a timely and cost-effective manner for our new and existing product categories, our business and operating results could be adversely affected.

The personal peripherals industry is characterized by short product life cycles, frequent new product introductions, rapidly changing technology, dynamic consumer demand and evolving industry standards. As a result, we must continually innovate in our new and existing product categories, introduce new products and technologies, and enhance existing products in order to remain competitive.

The success of our product portfolio depends on several factors, including our ability to:

- identify new features, functionality and opportunities;
- anticipate technology, market trends and consumer preferences;
- develop innovative, high-quality, and reliable new products and enhancements in a cost-effective and timely manner;

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

- distinguish our products from those of our competitors; and
- offer our products at prices and on terms that are attractive to our customers and consumers.

If we do not execute on these factors successfully, products that we introduce or technologies or standards that we adopt may not gain widespread commercial acceptance, and our business and operating results could suffer. In addition, if we do not continue to differentiate our products through distinctive, technologically advanced features, designs, and services that are appealing to our customers and consumers, as well as continue to build and strengthen our brand recognition and our access to distribution channels, our business could be adversely affected.

Table of Contents

The development of new products and services is very difficult and requires high levels of innovation. The development process is also lengthy and costly. There are significant initial expenditures for research and development, tooling, manufacturing processes, inventory and marketing, and we may not be able to recover those investments. If we fail to accurately anticipate technological trends or our end-users' needs or preferences, are unable to complete the development of products and services in a cost-effective and timely fashion or are unable to appropriately increase production to fulfill customer demand, we will be unable to successfully introduce new products and services into the market or compete with other providers. Even if we complete the development of our new products and services in a cost-effective and timely manner, they may be not competitive with products developed by others, they may not achieve acceptance in the market at anticipated levels or at all, they may not be profitable or, even if they are profitable, they may not achieve margins as high as our expectations or as high as the margins we have achieved historically.

As we introduce new or enhanced products, integrate new technology into new or existing products, or reduce the overall number of products offered, we face risks including, among other things, disruption in customers' ordering patterns, excessive levels of existing product inventories, revenue deterioration in our existing product lines, insufficient supplies of new products to meet customers' demand, possible product and technology defects, and a potentially different sales and support environment. Premature announcements or leaks of new products, features or technologies may exacerbate some of these risks by reducing the effectiveness of our product launches, reducing sales volumes of current products due to anticipated future products, making it more difficult to compete, shortening the period of differentiation based on our product innovation, straining relationships with our partners or increasing market expectations for the results of our new products before we have had an opportunity to demonstrate the market viability of the products. Our failure to manage the transition to new products or the integration of new technology into new or existing products could adversely affect our business, results of operations, operating cash flows and financial condition.

We believe sales of our PC (personal computer) peripherals in our mature markets may continue to decline, and that our future growth will depend on our new product categories and sales in emerging market geographies, and if we do not successfully execute on our growth opportunities, or if our sales of PC peripherals in mature markets are less than we expect, our operating results could be adversely affected.

We have historically targeted peripherals for the PC platform. Consumer demand for PCs in our traditional, mature markets such as North America, Western and Nordic Europe, Japan and Australia has been declining and we expect it to continue to decline in the future. As a result, consumer demand for PC peripherals in mature markets is slowing and in some cases declining and this trend may continue. For example, we have experienced weak consumer demand for many of our PC peripherals in each quarter of fiscal year 2013, which adversely affected our financial performance. In our OEM channel, the decline of desktop PCs has adversely impacted our sales of OEM mice, which have historically made up the bulk of our OEM sales. Our OEM sales accounted for 8% and 9% of total revenues in the fiscal years ended March 31, 2012 and 2011 and 7% in the nine months ended December 31, 2012.

In addition, our sales in our mature markets in North America, Western and Nordic Europe, Japan and Australia might be less than we expect due to a decline in business or economic conditions in one or more of the countries or regions, a greater decline than we expect in demand for our products, our inability to successfully execute our sales and marketing plans, or for other reasons. Global economic concerns, such as the varying pace of global economic recovery and the impact of sovereign debt issues in Europe, create unpredictability and add risk to our future outlook.

As a result, we are focusing more of our personnel, financial resources, and management attention on product innovations and growth opportunities in emerging markets, on products for tablets and mobile devices, on products for the consumption of digital music, on sales to enterprise markets, on our LifeSize division, and other potential growth opportunities. Our investments may not result in the growth we expect, or when we expect it, for a variety of reasons including those described below.

Table of Contents

Emerging Markets. We believe that the world's emerging markets, such as China, Russia and Brazil, will, for the next several years, continue to be growth markets for PCs and for our peripherals product lines. We have allocated significant resources to our sales, marketing and administrative personnel in China and, to a lesser extent, other emerging markets. We anticipate that emerging markets will include potentially high growth opportunities, offset by potentially entrenched local competition, higher credit risks, and other factors that affect consumer trends in ways which may be substantially different from our current major markets. PCs may not continue to be a growth category in emerging markets, and consumers in emerging markets may prefer tablets, smartphones, other mobile devices or other technologies. If we do not develop innovative and reliable peripherals and enhancements in a cost-effective and timely manner which are attractive to consumers in these markets, if consumer demand for PCs and our peripherals in emerging markets declines or does not increase as much as we expect, or if we invest resources in products or geographic areas which do not produce the growth or profitability we expect, or when we expect it, our business and results of operations could be adversely affected.

Tablets, Smartphones and Other Mobile Devices. The increasing popularity of smaller, mobile computing devices such as tablets and smartphones with touch interfaces is rapidly changing the consumer PC market. In our retail channels, tablets and smartphones are sold by retailers without peripherals. We believe this creates opportunities to sell products to consumers to help make their devices more productive and comfortable. However, consumer acceptance and demand for peripherals for use with tablets and other mobile computing devices is still uncertain. The increasing popularity of tablets and smartphones has decreased consumer demand for our PC peripherals, which has adversely affected our sales of these products. If we do not successfully innovate and market products designed for tablets and smartphones, if our distributor or retailer customers do not choose to carry or market such peripherals, or if general consumer demand for peripherals for use with these devices does not increase, our business and results of operations could be adversely affected.

Digital Music. We have recently increased our focus on products for the consumption of digital music as a future sales growth area. We are increasing our product development and marketing investment in digital music. However, historically our audio product development and marketing efforts have focused primarily on products for the PC platform and on sound quality. Our past experience is not necessarily transferable to the consumption of music through mobile devices such as tablets and smartphones, where we believe consumers put a greater emphasis on features such as convenience and brand. In addition, competition in the digital music consumption category is intense, and we expect it to increase. If we are not able to identify product development and marketing skill gaps, resolve them, and introduce differentiated product and marketing strategies to separate ourselves from competitors, our digital music efforts will not be successful, and our business and results of operations could be adversely affected.

Enterprise Market. Sales to the enterprise market for our peripherals segment is a relatively new sales channel for us. While we have been able to leverage our indirect distribution channels to sell to the enterprise market, we may not be successful in expanding enterprise sales. Some of our competitors have longer and closer relationships with the senior management of enterprise customers who decide which products and technologies will be deployed in their enterprises. Some competitors have larger and more established sales forces calling on enterprise customers, as well as greater marketing resources, and therefore could contact a greater number of potential customers with more frequency and influence their buying decisions. Consequently, these competitors may have a better competitive position than we do, which could adversely affect our ability grow our revenues through the enterprise sales channel.

LifeSize. Competition in the video conferencing industry is intense and has increased in recent quarters, with large, well-financed competitors, and we expect the number of competitors and the intensity of competition to increase. In addition, the overall video conferencing industry has been experiencing a slowdown in recent quarters and we have experienced lower demand related to new product launches. Although we have maintained the LifeSize enterprise sales organization, Logitech has little experience with selling to enterprise accounts, or in marketing to large enterprises. Additionally, as customers complete video conferencing installations, they may require greater levels of service and support than we have provided in the past. Demand for these types of services and support may increase in the future. There can be no assurance that we can provide products, services and support to effectively compete for these market opportunities. Further, our providing greater levels of services and support may result in a delay in the timing of revenue recognition. We anticipate that the growth of our LifeSize division will require continuing investments in product development and sales and marketing to stimulate and support future growth. If our future investments do not produce the growth that we anticipate, or when we anticipate it, our business and results of operations could be adversely affected.

Table of Contents

As we expand into new markets and product categories, we must comply with a wide variety of laws, standards and other requirements governing, among other things, health and safety, hazardous materials usage, product-related energy consumption, packaging, recycling and environmental matters. Our products may be required to obtain regulatory approvals and satisfy other regulatory concerns in the various jurisdictions where they are manufactured, sold or both. These requirements create procurement and design challenges, which, among other things, require us to incur additional costs identifying suppliers and contract manufacturers who can provide or obtain compliant materials, parts and end products. Failure to comply with such requirements can subject us to liability, additional costs, and reputational harm and, in severe cases, force us to recall products or prevent us from selling our products in certain jurisdictions.

During the third quarter of fiscal year 2013, the declining trends in our PC peripherals accelerated, and we made a strategic decision to divest our remote controls and digital video security categories and to discontinue other non-strategic products. If we are unable to effect such sales on favorable terms or if such realignment is more costly or distracting than we expect or has a negative effect on our organization, employees and retention, then our business and operating results may be adversely affected.

If we do not compete effectively, demand for our products could decline and our business and operating results could be adversely affected.

The peripherals and video conferencing industries are intensely competitive.

The peripherals industry is characterized by short product life cycles, continual performance enhancements, and rapid adoption of technological and product advancements by competitors in our retail markets, and price sensitivity in the OEM market. We experience aggressive price competition and other promotional activities from our primary competitors and from less-established brands, including brands owned by retail customers known as house brands, in both the retail and OEM markets. In addition, our competitors may offer customers terms and conditions which may be more favorable than our terms and conditions and may require us to take actions to increase our customer incentive programs, which could impact our revenues and operating margins.

The video conferencing industry is characterized by continual performance enhancements and large, well-financed competitors. There is increased participation in the video conferencing market by companies such as Cisco Systems, Inc. and Polycom, Inc., and as a result, competition has increased in fiscal year 2013 and we expect competition in the industry to further intensify. In addition, there are an increasing number of PC-based multi-person video conferencing applications, such as those offered by Skype, which could compete at the lower end of the video conferencing market with our LifeSize products and services.

In recent years, we have expanded the categories of products we sell, and entered new markets. We remain alert to opportunities in new categories and markets. As we do so, we are confronting new competitors, many of which have more experience in the categories or markets and have greater marketing resources and brand name recognition than we have. In addition, because of the continuing convergence of the markets for computing devices and consumer electronics, we expect greater competition in the future from well-established consumer electronics companies in our developing categories as well as in future categories we might enter. Many of these companies, such as Microsoft Corporation, Apple Inc., Cisco, Sony Corporation, Polycom and others, have greater financial, technical, sales, marketing and other resources than we have.

Microsoft and Apple are leading producers of operating systems, hardware and applications with which our mice, keyboards and other peripherals are designed to operate. In addition, Microsoft and Apple each has significantly greater financial, technical, sales, marketing and

other resources than Logitech, as well as greater name recognition and a larger customer base. As a result, Microsoft and Apple each may be able to improve the functionality of its own peripherals to correspond with ongoing enhancements to its operating systems, hardware and software applications before we are able to make such improvements. This ability could provide Microsoft and Apple with significant lead-time advantages. In addition, Microsoft and Apple may be able to offer pricing advantages on bundled hardware and software products that we may not be able to offer, and may be financially positioned to exert significant downward pressure on product prices and upward pressure on promotional incentives in order to gain market share.

Table of Contents

Consumer Computing Platforms (Pointing Devices, Keyboards and Desktops). Microsoft is our main competitor in the mice, keyboard and desktop product lines. Our products also compete against those produced by Apple for its computing platforms. In addition, we experience competition and pricing pressure for corded and cordless mice and desktops from less-established brands, including house brands, which we believe have impacted our market share in some sales geographies and which could potentially further impact our market share.

Audio. Competitors in audio devices vary by product line. In the PC, mobile entertainment and communication platform speaker business, competitors include Plantronics, Inc., Altec Lansing LLC., Creative Labs, Inc. and Bose Corporation. In the PC headset and microphone business, our main competitors include Plantronics and Altec Lansing. We have increased our focus, as well as our product development and marketing investment, on products for the consumption of digital music as a future sales growth area. Our competitors for products such as earbuds, earphones and mobile speakers include brands such as Skull Candy, Beats by Dre, and Jawbone, each of which have higher consumer recognition and retailer shelf space in digital music than we do.

Video. Our competitors for PC Web cameras include Microsoft, Creative Labs, Philips, and Hewlett-Packard Company. The market for PC Web cameras has been declining, particularly in our traditional, mature, consumer-developed markets, as the embedded webcam experience appears to be sufficient to meet the needs of many of these customers. As the worldwide market for PC Web cameras has become more competitive, we are encountering increasingly aggressive pricing practices and promotions on a worldwide basis. These factors have adversely affected our revenues and margins in this category.

Gaming. Competitors for our interactive entertainment products include CSG International (formerly Intec), Razer USA Ltd., Performance Designed Products, LLC (Pelican Accessories), Mad Catz Interactive, Inc. and its Saitek brand. Our controllers for PlayStation also compete against controllers offered by Sony.

Digital Home. Our competitors for remotes include, among others, Philips, Universal Remote Control, Inc., Universal Electronics Inc., RCA and Sony. We expect that the growth in consumer demand for peripheral devices for home entertainment systems will likely result in increased competition.

Video Conferencing. We primarily compete in the medium and small business, education, and state and local business sectors of the enterprise video conferencing market. Our primary competitors are Cisco, Polycom and Avaya Inc. There are also a number of smaller competitors that compete with LifeSize. Some of these companies have longer industry experience or substantially greater financial, sales, marketing and engineering resources than we do. Avaya recently acquired Radvision Ltd. and has become a competitor, though it has also been a distributor and OEM partner for LifeSize. In addition, Microsoft's acquisition of Skype has given Microsoft a large user base for future competitive video chat and video-conferencing products, along with integration potential across Microsoft's product portfolio. Microsoft is also a partner for LifeSize. In addition, technology changes are affecting the competitive landscape in this market, and may require interoperability or compatibility with unified communication platforms, Microsoft Lync or other technologies. The developers of those technologies may have an advantage in improving the functionality of their own video conferencing equipment to correspond with these technologies before we can make such improvements, or may restrict the interoperability of their products with ours. In the large enterprise sector of the market, which is dominated by Cisco, interoperability with equipment produced by Cisco and other telecommunications, video conferencing or telepresence equipment suppliers is a key factor in purchasing decisions by current or prospective customers. These factors could adversely affect the sales and growth opportunities of our LifeSize division, and the growth of Logitech as a whole. If we do not compete effectively, demand for our products could decline, our gross margin could decrease, we could lose market share and our revenues could decline.

Table of Contents

If we do not accurately forecast market demand for our products, our business and operating results could be adversely affected.

We use our forecasts of product demand to make decisions regarding investments of our resources and production levels of our products. Although we receive forecasts from our customers, many are not obligated to purchase the forecasted demand. Also, actual sales volumes for individual products in our retail distribution channel can be volatile due to changes in consumer preferences and other reasons. In addition, our retail products have short product life cycles, so a failure to accurately predict high demand for a product can result in lost sales that we may not recover in subsequent periods, or higher product costs if we meet demand by paying higher costs for materials, production and delivery. We could also frustrate our customers and lose shelf space. Our failure to predict low demand for a product can result in excess inventory, lower cash flows and lower margins if we are required to reduce product prices in order to reduce inventories.

Over the past few years, we have expanded the types of products we sell, and the geographic markets in which we sell them. The changes in our product portfolio and the expansion of our sales markets have increased the difficulty of accurately forecasting product demand.

We have experienced large differences between our forecasts and actual demand for our products. We expect other differences between forecasts and actual demand to arise in the future. If we do not accurately predict product demand, our business and operating results could be adversely affected.

Goodwill impairment charge could have an adverse effect on the results of our operations.

The slowdown in the overall video conferencing industry in recent quarters, together with the competitive environment in fiscal 2013 and lower demand related to new product launches resulted in an estimated \$211.0 million non-cash goodwill impairment charge in the quarter ended December 31, 2012, which substantially impacted operating results. We were unable to fully complete the impairment analysis prior to filing this Form 10-Q, and we cannot assure you that additional goodwill impairment charges will not be required when the analysis is completed. An additional impairment charge could have a material adverse effect on our results of operations.

Our gross margins can vary significantly depending on multiple factors, which can result in unanticipated fluctuations in our operating results.

Our gross margins can vary due to consumer demand, competition, product life cycle, new product introductions, unit volumes, commodity and supply chain costs, geographic sales mix, foreign currency exchange rates, and the complexity and functionality of new product innovations. In particular, if we are not able to introduce new products in a timely manner at the product cost we expect, or if consumer demand for our products is less than we anticipate, or if there are product pricing, marketing and other initiatives by our competitors to which we need to react or that are initiated by us to drive sales that lower our margins, then our overall gross margin will be less than we project.

In addition, our gross margins may vary significantly by product line, sales geography and customer type, as well as within product lines. When the mix of products sold shifts from higher margin product lines to lower margin product lines, to lower margin sales geographies, or to lower margin products within product lines, our overall gross margins and our profitability may be adversely affected.

The impact of these factors on gross margins can create unanticipated fluctuations in our operating results, which may cause volatility in the price of our shares.

We may not fully realize the anticipated benefits from the restructuring plan we announced in April, 2012.

We announced a restructuring plan in April 2012, which is intended to simplify the organization, to reduce operating costs through a global workforce reduction and a reduction in the complexity of our product portfolio, and to better align costs with our current business.

Our ability to achieve the anticipated cost savings and other benefits from this restructuring within the expected timeframe are subject to many estimates and assumptions, and the actual savings and timing

Table of Contents

for those savings may vary materially based on factors such as local labor regulations, negotiations with third parties, and operational requirements. These estimates and assumptions are subject to significant economic, competitive and other uncertainties, some of which are beyond our control. There can be no assurance that we will fully realize the anticipated benefits from this restructuring plan. To the extent that we are unable to improve our financial performance, further restructuring measures may be required in the future.

We have conducted intensive reviews of our product portfolio, and have concluded that our product strategy has resulted in an assortment of similar products at similar price points within each product category, which we believe has generated confusion for the consumer. In order to improve our product portfolio, we have reprioritized our fiscal year 2013 new product portfolio. While we are constantly replacing products and dependent on the success of our new products, the current product line simplification effort is substantial, making us even more dependent on the success of the new products that we are introducing.

As we transition to the new product portfolio, we must continue to carefully manage production, monitor channel inventory levels, and judiciously implement incentives for both existing and new products. If we are unable to implement the planned initiatives effectively, if our estimates and assumptions regarding sales of existing and new products are incorrect, if we do not manage the product transitions smoothly and cost-effectively, if we experience delays or if other unforeseen events occur, we may not achieve the sales and cost savings expected for the remainder of fiscal year 2013 and beyond, and our business and results of operations could be adversely affected.

Our success largely depends on our ability to hire, retain, integrate and motivate sufficient numbers of qualified personnel, including senior management. Our strategy and our ability to innovate, design and produce new products, sell products, maintain operating margins and control expenses depend on key personnel that may be difficult to replace.

Our success depends on our ability to attract and retain highly skilled personnel, including senior management and international personnel. From time to time, we experience turnover in some of our senior management positions.

We compensate our employees through a combination of salary, bonuses, benefits and equity compensation. Recruiting and retaining skilled personnel, including software and hardware engineers, is highly competitive. If we fail to provide competitive compensation to our employees, it will be difficult to retain, hire and integrate qualified employees and contractors, and we may not be able to maintain and expand our business. If we do not retain our senior managers or other key employees for any reason, we risk losing institutional knowledge, experience, expertise and other benefits of continuity as well as the ability to attract and retain other key employees. In addition, we must carefully balance the growth of our employee base with our current infrastructure, management resources and anticipated operating cash flows. If we are unable to manage the growth of our employee base, particularly engineers, we may fail to develop and introduce new products successfully and in a cost-effective and timely manner. If our revenue growth or employee levels vary significantly, our operating cash flows and financial condition could be adversely affected. Volatility or lack of positive performance in our stock price, including declines in our stock prices in the past year, may also affect our ability to retain key employees, many of whom have been granted equity incentives. Logitech's practice has been to provide equity incentives to its employees, but the number of shares available for equity grants is limited. We may find it difficult to provide competitive equity incentives, and our ability to hire, retain and motivate key personnel may suffer.

Recently and in past years, we have initiated reductions in our workforce to align our employee base with our anticipated revenue base or with our areas of focus. We have also experienced turnover in our workforce. These reductions and turnover have resulted in reallocations of duties, which could result in employee uncertainty and discontent. Reductions in our workforce could make it difficult to attract, motivate and retain employees, which could adversely affect our business.

Our business depends in part on access to third-party platforms or technologies, and if the access is withdrawn, denied, or is not available on terms acceptable to us, or if the platforms or technologies change without notice to us, our business and operating results could be adversely affected.

Our peripherals business has historically been built largely around the PC platform, which over time became relatively open, and its inputs and operating system standardized. With the growth of mobile, tablet, gaming and other computer devices, the number of platforms has grown, and with it the complexity

Table of Contents

and increased need for us to have business and contractual relationships with the platform owners in order to produce products compatible with these platforms. Our product portfolio includes current and future products designed for use with third-party platforms or software, such as the Apple iPad, iPod and iPhone, Android phones and tablets, Sony PlayStation, and Nintendo Wii. Our business in these categories relies on our access to the platforms of third parties, some of whom are our competitors. Platform owners that are competitors have a competitive advantage in designing products for their platforms and may produce peripherals or other products that work better than our products in connection with those platforms. Our access to these third-party platforms can be withdrawn, denied or not be available on terms acceptable to us. Moreover, as we expand the number of platforms and software applications with which our products are compatible, we may not be successful in launching products for those platforms or software applications, we may not be successful in establishing strong relationships with the new platform or software owners, or we may negatively impact our ability to develop and produce high-quality products on a timely basis for those platforms and software applications or we may otherwise adversely affect our relationships with existing platform or software owners.

Our access to third-party platforms may require paying a royalty, which lowers our product margins, or may otherwise be on terms that are not acceptable to us. In addition, the third-party platforms or technologies used to interact with our product portfolio can be delayed in production or can change without prior notice to us, which can result in our having excess inventory or lower margins.

If we are unable to access third-party platforms or technologies, or if our access is withdrawn, denied, or is not available on terms acceptable to us, or if the platforms or technologies are delayed or change without notice to us, our business and operating results could be adversely affected.

We rely on third parties to sell and distribute our products, and we rely on their information to manage our business. Disruption of our relationship with these channel partners, changes in their business practices, their failure to provide timely and accurate information or conflicts among our channels of distribution could adversely affect our business, results of operations, operating cash flows and financial condition.

Our sales channel partners, the distributors and retailers who distribute and sell our products, also sell products offered by our competitors and, in the case of retailer house brands, may also be our competitors. If product competitors offer our sales channel partners more favorable terms, have more products available to meet their needs, or utilize the leverage of broader product lines sold through the channel, or if our retailer channel partners show preference for their own house brands, our sales channel partners may de-emphasize or decline to carry our products. In addition, certain of our sales channel partners could decide to de-emphasize the product categories that we offer in exchange for other product categories that they believe provide them with higher returns. If we are unable to maintain successful relationships with these sales channel partners or to maintain our distribution channels, our business will suffer.

The impact of economic conditions, evolving consumer preferences, and purchasing patterns on our distribution partners, or competition between our sales channels, could result in sales channel disruption. For example, if sales at large retail stores are displaced as a result of bankruptcy, competition from internet sales channels or otherwise, our product sales could be adversely affected. Any loss of a major partner or distribution channel or other channel disruption could make us more dependent on alternate channels, increase pricing and promotional pressures from other partners and distribution channels, increase our marketing costs, or adversely impact buying and inventory patterns, payment terms or other contractual terms.

We use retail sell-through data, which represents sales of our products by our retailer customers to consumers, and by our distributor customers to their customers, along with other metrics, to assess consumer demand for our products. Sell-through data is subject to limitations due to collection methods and the third party nature of the data and thus may not be an accurate indicator of actual consumer demand for our products. In addition, the customers supplying sell-through data vary by geographic region and from period to period, but typically represent a majority of

our retail sales. If we do not receive this information on a timely and accurate basis, or if we do not properly interpret this information, our results of operations and financial condition may be adversely affected.

Table of Contents

Our principal manufacturing operations and third-party contract manufacturers are located in China and Southeast Asia, which exposes us to risks associated with doing business in that geographic area.

We produce a significant portion of our products at facilities we own in China. The majority of our other production is performed by third-party contract manufacturers in China. We also utilize third-party contract manufacturers in Malaysia and India.

Our manufacturing operations in China could be adversely affected by changes in the interpretation and enforcement of legal standards, by strains on China's available labor pool, communications, trade, and other infrastructures, by natural disasters, by conflicts or disagreements between China and Taiwan or China and the United States, by labor unrest, and by other trade customs and practices that are dissimilar to those in the United States and Europe. Interpretation and enforcement of China's laws and regulations continue to evolve and we expect differences in interpretation and enforcement to continue in the foreseeable future.

Our manufacturing operations at third-party contractors could be adversely affected by contractual disagreements, by labor unrest, by natural disasters, by strains on local communications, trade, and other infrastructures, by competition for the available labor pool or manufacturing capacity, and by other trade customs and practices that are dissimilar to those in the United States and Europe.

Further, we may be exposed to fluctuations in the value of the local currency in the countries in which manufacturing occurs. Future appreciation of these local currencies could increase our component and other raw material costs. In addition, our labor costs could continue to rise as wage rates increase and the available labor pool declines. These conditions could adversely affect our gross margins and financial results.

We purchase key components and products from a limited number of sources, and our business and operating results could be adversely affected if supply were delayed or constrained or if there were shortages of required components.

We purchase certain products and key components from a limited number of sources. If the supply of these products or key components, such as micro-controllers, optical sensors and LifeSize hardware products, were to be delayed or constrained, or if one or more of our single-source suppliers goes out of business as a result of adverse global economic conditions or natural disasters, we might be unable to find a new supplier on acceptable terms, or at all, and our product shipments to our customers could be delayed, which could adversely affect our business, financial condition and operating results.

Lead times for materials, components and products ordered by us or by our contract manufacturers can vary significantly and depend on factors such as contract terms, demand for a component, and supplier capacity. From time to time, we have experienced component shortages and extended lead times on semiconductors, such as micro-controllers and optical sensors, and base metals used in our products. Shortages or interruptions in the supply of components or subcontracted products, or our inability to procure these components or products from alternate sources at acceptable prices in a timely manner, could delay shipment of our products or increase our production costs, which could adversely affect our business and operating results.

If we do not successfully coordinate the worldwide manufacturing and distribution of our products, we could lose sales.

Our business requires us to coordinate the manufacture and distribution of our products over much of the world. We rely on third parties to manufacture many of our products, manage centralized distribution centers, and transport our products. If we do not successfully coordinate the timely manufacturing and distribution of our products, we may have insufficient supply of products to meet customer demand and we could lose sales, or we may experience a build-up in inventory.

Table of Contents

A significant portion of our quarterly retail orders and product deliveries generally occur in the last weeks of the fiscal quarter. This places pressure on our supply chain and could adversely affect our revenues and profitability if we are unable to successfully fulfill customer orders in the quarter.

We conduct operations in a number of countries, and have invested significantly in growing our sales and marketing activities in China, and the effect of business, legal and political risks associated with international operations could adversely affect us.

We conduct operations in a number of countries, and have invested significantly in growing our sales and marketing activities in China. We may also increase our investments to grow sales in other emerging markets, such as Latin America and Eastern Europe. There are risks inherent in doing business in international markets, including:

- difficulties in staffing and managing international operations;

- compliance with laws and regulations, including environmental and tax laws, which vary from country to country and over time, increasing the costs of compliance and potential risks of non-compliance;

- exposure to political and financial instability, especially with the uncertainty associated with the ongoing sovereign debt crisis in certain Euro zone countries, which may lead to currency exchange losses and collection difficulties or other losses;

- lack of infrastructure or services necessary or appropriate to support our products and services;

- exposure to fluctuations in the value of local currencies;

- difficulties and increased costs in establishing sales and distribution channels in unfamiliar markets, with their own market characteristics and competition;

- changes in VAT (value-added tax) or VAT reimbursement;

- imposition of currency exchange controls; and

- delays from customs brokers or government agencies.

Any of these risks could adversely affect our business, financial condition and operating results.

Our sales in China have increased substantially in the last two fiscal years, and continued sales growth in China is an important part of our expectations for our business. As a result, if Chinese economic, political or business conditions deteriorate, or if one or more of the risks described above materializes in China, our overall business and results of operations will be adversely affected.

We may be unable to protect our proprietary rights. Unauthorized use of our technology may result in the development of products that compete with our products.

Our future success depends in part on our proprietary technology, technical know-how and other intellectual property. We rely on a combination of patent, trade secret, copyright, trademark and other intellectual property laws, and confidentiality procedures and contractual provisions such as nondisclosure terms and licenses, to protect our intellectual property.

Table of Contents

We hold various United States patents and pending applications, together with corresponding patents and pending applications from other countries. It is possible that any patent owned by us will be invalidated, deemed unenforceable, circumvented or challenged, that the patent rights granted will not provide competitive advantages to us, or that any of our pending or future patent applications will not be granted. In addition, other intellectual property laws or our confidentiality procedures and contractual provisions may not adequately protect our intellectual property. Also, others may independently develop similar technology, duplicate our products, or design around our patents or other intellectual property rights. Unauthorized parties have copied and may in the future attempt to copy aspects of our products or to obtain and use information that we regard as proprietary. Any of these events could adversely affect our business, financial condition and operating results.

Claims by others that we infringe their proprietary technology could adversely affect our business.

We have been expanding the categories of products we sell, and entering new markets, such as the market for enterprise video conferencing and our introduction of products for tablets and mobile devices. We expect to continue to enter new categories and markets. As we do so, we face an increased risk that claims alleging we infringe the patent or other intellectual property rights of others, regardless of the merit of the claims, may increase in number and significance. Infringement claims against us may also increase as the functionality of video, voice, data and conferencing products begin to overlap. This risk is heightened by the increase in lawsuits brought by holders of patents that do not have an operating business. Intellectual property lawsuits are subject to inherent uncertainties due to the complexity of the technical issues involved, and we cannot be certain that we will be successful in defending ourselves against intellectual property claims. A successful claimant could secure a judgment that requires us to pay substantial damages or prevents us from distributing certain products or performing certain services. We might also be required to seek a license for the use of such intellectual property, which may not be available on commercially acceptable terms or at all. Alternatively, we may be required to develop non-infringing technology, which could require significant effort and expense and may ultimately not be successful. Any claims or proceedings against us, whether meritorious or not, could be time consuming, result in costly litigation or the diversion of significant operational resources, or require us to enter into royalty or licensing agreements, any of which could materially and adversely affect our business and results of operations.

Product quality issues could adversely affect our reputation and could impact our operating results.

The market for our products is characterized by rapidly changing technology and evolving industry standards. To remain competitive, we must continually introduce new products and technologies. The products that we sell could contain defects in design or manufacture. Defects could also occur in the products or components that are supplied to us. There can be no assurance we will be able to detect and remedy all defects in the hardware and software we sell. Failure to do so could result in product recalls, product redesign efforts, lost revenue, loss of reputation, and significant warranty and other expenses to remedy.

The collection, storage, transmission, use and distribution of user data could give rise to liabilities and additional costs of operation as a result of laws and governmental regulation.

In connection with certain of our products, we collect data related to our consumers. This information is increasingly subject to legislation and regulations in numerous jurisdictions around the world, and especially in Europe. Government actions are typically intended to protect the privacy and security of personal information and its collection, storage, transmission, use and distribution in or from the governing jurisdiction. In addition, because various jurisdictions have different laws and regulations concerning the use, storage and transmission of such information, we may face requirements that pose compliance challenges in existing markets as well as new international markets that we seek to enter. Such laws and regulations, and the variation between jurisdictions, could subject us to costs, liabilities or negative publicity that could adversely affect our business.

Table of Contents

Our effective income tax rates may increase in the future, which could adversely affect our net income.

We operate in multiple jurisdictions and our profits are taxed pursuant to the tax laws of these jurisdictions. Our effective income tax rate may be affected by changes in or interpretations of tax laws in any given jurisdiction, utilization of net operating loss and tax credit carryforwards, changes in geographical allocation of income and expense, and changes in management's assessment of matters such as whether we will be able to realize deferred tax assets. In the past, we have experienced fluctuations in our effective income tax rate. Our effective income tax rate in a given fiscal year reflects a variety of factors that may not be present in the succeeding fiscal year or years. There is no assurance that our effective income tax rate will not change in future periods.

We file Swiss and foreign tax returns. We are frequently subject to tax audits, examinations and assessments in various jurisdictions. A material assessment by a governing tax authority could adversely affect our profitability. If our effective income tax rate increases in future periods, our net income could be adversely affected.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**Share Repurchases**

The following table presents certain information related to purchases made by Logitech of its equity securities during the nine months ended December 31, 2012 (in thousands, except per share amounts):

Period	Total Number of Shares Purchased as Part of Publicly Announced Program	Average Price Paid Per Share		Approximate Dollar Value of Shares That May Yet Be Purchased Under the Program
		in USD	in CHF	
April 2012	800	9.90	8.99	\$ 86,332
May 2012	7,425	10.52	9.73	8,245
June 2012	375	10.16	9.73	4,435
July 2012				4,435
August 2012				4,435
September 2012				4,435
October 2012				4,435
November 2012				4,435
December 2012				4,435
Total	8,600			

During the nine months ended December 31, 2012, the following approved share buyback program was in place (in thousands):

Edgar Filing: LOGITECH INTERNATIONAL SA - Form 10-Q

Date of Announcement	Approved Share Buyback Number	Approved Buyback Amount	Expiration Date	Completion Date	Number of Shares Remaining (1)	Amount Remaining
September 2008 - amended	28,465	\$ 177,030	August 2013		584	\$ 4,435
September 2008	8,344	250,000	August 2013			

(1) Represents an estimate of the number of shares remaining to be repurchased, calculated based on the \$4.4 million amount remaining to repurchase as of December 31, 2012, divided by the per share adjusted closing price on the SIX Swiss Exchange as of the same date.

ITEM 5. OTHER INFORMATION

On January 30, 2013, the Compensation Committee of the Company's Board of Directors put in place an incentive in connection with the Company's transformation under new Chief Executive Officer, Bracken P. Darrell. The incentive provides for a \$500,000 cash payment to Erik K. Bardman, the Company's Senior Vice President, Finance and Chief Financial Officer, to be made on January 29, 2015, provided that he is an employee in good standing on that date.
