MANATRON, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

(1) GENERAL INFORMATION

The consolidated condensed financial statements included in this Form 10-Q have been prepared by Manatron, Inc. (the "Company"), without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been omitted pursuant to such rules and regulations, although the Company believes that the disclosures are adequate to make the information presented not misleading. These consolidated condensed financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended April 30, 2001 as filed with the Securities and Exchange Commission on July 27, 2001.

In the opinion of management, the accompanying unaudited consolidated condensed financial statements contain all adjustments, consisting of only a normal and recurring nature, necessary to present fairly (a) the financial position of the Registrant as of July 31, 2001 and April 30, 2001, (b) the results of its operations for the three-months ended July 31, 2001 and 2000, and (c) cash flows for the three-months ended July 31, 2001 and 2000.

(2) BUSINESS REPORTABLE SEGMENTS

Under the provisions of SFAS No. 131, the Company has two reportable segments: Information Software, Systems and Services and Property Mass Appraisal Services. The Company's reportable segments are separately managed, as each segment has unique characteristics.

The following table summarizes information regarding the reportable segments' profit for the three months ended and the reportable segments' assets as of July 31, 2001 and 2000:

	Information Software, Systems and Services (1)	Property Mass Appraisal Services	Total Combined Company
For the Three Months Ended July 31, 2001			
Net revenues	\$ 6,334,283	\$ 3,045,247	\$ 9,379,530
Depreciation and amortization expense	510,405	32,998	543,403
EBITDA	495,992	93,218	589,210
Capital expenditures	84,391	25,094	109,485
Segment assets	16,514,042	7,557,706	24,071,748
For the Three Months Ended July 31, 2000			
Net revenues	\$ 5,951,629	\$ 4,113,877	\$ 10,065,506
Depreciation and amortization expense	543,138	53,426	596,564
EBITDA	(290,313)	390,938	100,625
Capital expenditures	62,854	37,415	100,269
Segment assets	19,156,055	7,467,812	26,623,867

- (1) Information Software Systems and Services includes items that were previously classified as unallocated overhead in prior periods.

MANATRON, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS
(CONTINUED)

(3) NEW ACCOUNTING PRONOUNCEMENTS

In July 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets" ("SFAS 142"). This statement changes the accounting and reporting for goodwill and other intangible assets. Upon adoption of this statement, goodwill will no longer be amortized; however, tests for impairment will be performed annually or when a triggering event occurs. This statement will apply to assets acquired after June 30, 2001, and existing goodwill and other intangible assets upon the adoption of SFAS 142, in fiscal 2003. The Company is evaluating the effect of SFAS 142 on the consolidated financial statements related to the impairment testing of goodwill. Pretax amortization of goodwill for the three months ended July 30, 2001, and 2000 was approximately \$160,000.

(4) EARNINGS (LOSS) PER SHARE

The following table reconciles the numerators and denominators used in the calculation of basic and diluted earnings (loss) per share for the each of the periods presented:

	Three Months Ended July 31,	
	2001	2000
Numerators:		
Net income (loss)	\$ 27,740	\$ (342,107)
Denominators:		
Denominator for basic earnings (loss) per share, weighted average outstanding common shares	3,553,427	3,436,416
Potential dilutive shares	140,933(1)	0(2)

Denominator for diluted earnings (loss) per share	3,694,360	3,436,416
Earnings (loss) Per Share:		
Basic	\$.01	\$ (.10)
Diluted	\$.01	\$ (.10)

- (1) Options to purchase 424,452 shares of common stock at prices ranging from \$4.63 to \$7.00 per share were outstanding, but were not included in the computation of diluted earnings per share because the options' exercise price was greater than the average market price of the common stock.
- (2) All of the options to purchase shares have been excluded due to the loss for this period.

-6-

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Results of Operations

Net revenues of \$9,379,530 for the three months ended July 31, 2001 have decreased by 6.8% in comparison to the \$10,065,506 of net revenues that were reported for the comparable period in the prior fiscal year. These amounts include revenues from computer hardware and software installations, sales of computer forms and supplies and various related services such as mass real estate appraisals (revaluations), software support, training, hardware maintenance and forms processing and printing.

As anticipated, appraisal service revenues for the three months ended July 31, 2001 have decreased by approximately \$1,068,000 versus the comparable period in 2000. In addition, the Company's backlog for appraisal services at July 31, 2001 decreased by approximately \$2.3 million to \$9.4 million compared to approximately \$11.7 million at July 31, 2000 and \$11.4 million at April 30, 2001. These decreases are due primarily to the wind down of the \$24 million Allegheny County (Pittsburgh) Pennsylvania contract as well as the cyclical nature of our Ohio appraisal business. The Company has been actively pursuing new business to replenish the backlog.

As noted in prior years, the Company had reserved 100% of retainage revenue related to the Allegheny County appraisal project and 15% of the retainage revenue on all other appraisal service projects due to the high degree of judgment involved in estimating the percentage of completion on these projects and the uncertainty regarding their ultimate collection. As of July 31, 2001 and 2000, the total reserve against retainage revenue remaining under all appraisal service projects (including Allegheny County) was approximately \$825,000 and \$2,163,000, respectively. As of July 31, 2001 and 2000, the total reserve against retainage revenue remaining under the Allegheny County project was approximately \$303,000 and \$1,968,000, respectively. These decreases are primarily due to the collection and recognition of \$1,850,000 of retention revenue in fiscal 2001.

Software Division revenues have increased by approximately 6.4% for the three months ended July 31, 2001 versus the comparable prior year period. This increase is primarily due to the execution of some significant software contracts primarily related to our MVP Tax and MVP Tax Manager products in the Indiana and Florida regions.

As a result of the decrease in overall net revenues, cost of revenues for the three months ended July 31, 2001 also decreased 15.9% to \$5,967,573 versus the comparable prior year amount of \$7,091,885. Gross margin has increased by approximately 7% to 36.4% versus 29.5% for the three months ended July 31, 2001 and 2000, respectively. This increase in margin is primarily due to a shift in the mix of revenues generated by our two reportable segments. The information software, systems and services segment of the business yields a higher gross margin than the appraisal segment.

-7-

Selling, general and administrative expenses have decreased by 3% to \$3,366,150 for the three months ended July 31, 2001, compared to \$3,469,560 for the same period in the prior fiscal year related to the change in revenues. Overall selling, general and administrative expenses have remained consistent at approximately 35% of revenue for both the three months ended July 31, 2001 and 2000.

As a result of the factors noted above, the Company had a \$541,746 increase in its operating income to \$45,807 for the three months ended July 31, 2001, compared to an operating loss of \$495,939 for the three months ended July 31, 2000. Net interest expense for the period ended July 31, 2001 was approximately \$3,000 compared to net interest expense of approximately \$22,000 for the period ended July 31, 2000. This decline is directly related to the tighter cash flow controls instituted by the Company resulting in a lower net borrowing position compared to the prior year.

As a result of the factors noted above, the Company reported a \$369,847 increase in its bottom line to \$27,740 or \$0.01 per share on a diluted basis for the three months ended July 31, 2001, compared to a net loss of \$342,107 or \$0.10 per share on a diluted basis for the comparable period in the prior fiscal year. Diluted weighted average outstanding common shares increased by approximately 258,000 shares from the quarter ended July 31, 2000 balance of 3,436,416 shares to the July 31, 2001 balance of 3,694,360 shares. This increase was primarily due to the exclusion of potential common shares that would have an antidilutive effect on the net loss per share for the three months ended July 31, 2000.

Financial Condition and Liquidity

At July 31, 2001 the Company had working capital of \$3,151,895 compared to the April 30, 2001 amount of \$2,648,259. These levels reflect current ratios of 1.25 and 1.18, respectively. The increase in working capital is primarily due to increased cash flows from operations resulting in a significant reduction in line of credit borrowings.

Shareholders' equity at July 31, 2001 increased by approximately \$133,000 to \$11,273,916 from the balance reported at April 30, 2001, because of \$15,652 of employee stock purchases, \$89,702 of deferred compensation expense, and \$27,740 of net income for the quarter. As a result, book value per share remained relatively consistent at \$2.97 as of July 31, 2001 compared to \$2.95 at April 30, 2001.

The nature of the Company's business typically is not property or equipment intensive. Net capital expenditures, were

approximately \$110,000 and \$100,000 for the three months ended July 31, 2001 and July 31, 2000, respectively. Current year as well as prior year expenditures relate primarily to the purchase of computer hardware and software for the Company's development and support personnel.

As the Company's revenues are generated from contracts with local governmental entities, it is not uncommon for certain of its accounts receivable to remain outstanding for approximately three to four months, thereby having a negative impact upon cash flow. The Company's current loan agreement with Comerica Bank provides for a secured \$4.5 million line of credit to the

-8-

Company at the prime rate of interest through November 1, 2002, and a \$1.4 million installment note with required monthly payments of \$100,000 commencing January 1, 2001, at the prime rate of interest less .25%. As of July 31, 2001, \$450,095 of borrowings were outstanding under this line of credit and \$700,000 remained outstanding under the installment note payable. The Company anticipates that the revolving line of credit, together with existing cash balances, and cash generated from future operations will be sufficient for the Company to meet its working capital requirements for at least the next 12 months. The Company is, however, having discussions with its bank to explore the possibility of increasing its line of credit.

The Company cannot precisely determine the effect of inflation on its business. The Company continues, however, to experience relatively stable costs for its inventory as the computer hardware market is very competitive. Inflationary price increases related to labor and overhead will have a negative effect on the Company's cash flow and net income to the extent that they cannot be offset through improved productivity and price increases.

"Safe Harbor Statement" Under the Private Securities Litigation Reform Act of 1995

This Form 10-Q contains statements that are not historical facts. These statements are called "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements involve important known and unknown risks, uncertainties and other factors and can be identified by phrases using "estimate," "anticipate," "believe," "project," "expect," "intend," "predict," "potential," "future," "may," "should" and similar expressions or words. The Company's future results, performance or achievements may differ materially from the results, performance or achievements discussed in the forward-looking statements. There are numerous factors that could cause actual results to differ materially from the results discussed in forward-looking statements, including:

The impact that the following factors can have on the Company's business and the computer software and service industry in general:

Changes in competition and pricing environments: if competition increases in the computer software and service industry (particularly the segment of the industry that supplies governmental units), companies with greater capital reserves and greater diversification may have more options at their disposal for handling increased competition than we do.

Potential negative side effects stemming from the Company's expansion into new regional markets, including Canada: as a result of this expansion, the Company may face pitfalls that it is not fully aware of considering its lack of experience.

Pricing and availability of equipment, materials, inventories and programming.

Changes in existing computer software and service industry laws or the introduction of new laws, regulations or policies that could affect the Company's business practices, including, by way of example, intellectual property laws and laws affecting software providers' liability: these laws, regulations or policies could impact the computer software and service industry as a whole, or could impact only those portions of the computer

-9-

software and service industry in which we are currently active, for example, privacy laws regulating how governmental units store and provide access to information; in either case, the Company's profitability could be injured due to an industry-wide market decline or due to the Company's inability to compete with other computer software and service industry companies that are unaffected by these laws, regulations or policies.

Changes in technology that render our products obsolete or incompatible with hardware or other software.

The Company's success in and expense associated with the development, production, testing, marketing and shipping of products, including a failure to ship new products and technologies when anticipated, failure of customers to accept these products and technologies when planned and any defects in products.

The Company's ability to implement successfully its business strategy of developing and licensing client/server decision support applications software designed to address specific industry markets.

The Company's ability to assess future revenue: the Company's expense levels are based, in part, on its expectations as to future revenue and a significant portion of the Company's expenses do not vary with revenue; as a result, if revenue is below expectations, results of operations are likely to be materially adversely affected.

Continued availability of third party software and technology incorporated in the Company's products.

Potential negative impact of the fact that purchase of the Company's products is relatively discretionary and generally involves a significant commitment of capital; in the event of any downturn in any potential customer's business or the economy in general, purchases of the Company's products may be deferred or canceled.

Changes in economic conditions, including changes in interest rates, financial market performance and the computer software and service industry: these types of changes can impact the economy in general, resulting in a downward trend that impacts not only the Company's business, but all computer software and service industry companies; or, the changes can impact only those parts of the economy upon which the Company relies in a unique fashion, including, by way of example:

Economic factors that affect local governmental budgets.

Economic factors that may affect the success of the acquisition strategy that the Company pursued throughout the 1990s.

-10-

Factors that the Company has discussed in previous public reports and other documents filed with the Securities and Exchange Commission.

This list provides examples of factors that could affect the results described by forward-looking statements contained in this Form 10-Q. However, this list is not intended to be exhaustive; many other factors could impact the Company's business and it is impossible to predict with any accuracy which factors could result in which negative impacts. Although the Company believes that the forward-looking statements contained in this Form 10-Q are reasonable, the Company cannot provide any guarantee that the anticipated results will be achieved. All forward-looking statements in this Form 10-Q are expressly qualified in their entirety by the cautionary statements contained in this section and readers are cautioned not to place undue reliance on the forward-looking statements contained in this Form 10-Q. In addition to the risks listed above, other risks may arise in the future, and the Company disclaims any obligation to update information contained in any forward-looking statement.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

The Company's primary market risk exposure is a potential change in interest rates in connection with its loan agreements. As of July 31, 2001, approximately \$1,150,000 of borrowings were outstanding compared to approximately \$3,564,000 as of April 30, 2001. A 1% change in interest rates would not have a material adverse impact on the Company's financial position.
