AMERICAN PUBLIC EDUCATION, INC.  
Notes to Consolidated Financial Statements

1. Nature of the Business

American Public Education, Inc. (“APEI”) together with its subsidiary (the “Company”) is a provider of exclusively online post-secondary education directed primarily at the needs of the military and public service communities that operates in one reportable segment. APEI has one subsidiary, American Public University System, Inc. (the “APUS”), a West Virginia corporation, which is a regionally accredited post-secondary online university that includes American Military University and American Public University.

APUS achieved regional accreditation in May 2006 with The Higher Learning Commission of the North Central Association of Colleges and Schools and became eligible for participation in federal student aid programs under Title IV of the Higher Education Act of 1965, which we refer to as Title IV Programs, for classes beginning in November 2006.

2. Basis of Presentation

The accompanying unaudited interim consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States (“GAAP”). All intercompany transactions have been eliminated in consolidation. The financial statements do not include all of the information and footnotes required by GAAP for complete financial statement presentations. In the opinion of management, these statements include all adjustments (consisting of normal recurring adjustments) considered necessary to present a fair statement of our consolidated results of operations, financial position and cash flows. Operating results for any interim period are not necessarily indicative of the results that may be expected for the year ending December 31, 2012. This Quarterly Report on Form 10-Q should be read in conjunction with the Company’s consolidated financial statements and footnotes in its audited financial statements included in its Annual Report, on Form 10-K, for the year ended December 31, 2011.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Recent Accounting Pronouncements

There have been no applicable pronouncements since our last filing.

Investment

On September 30, 2012, the Company made a \$6.8 million or approximately 19.9% investment in preferred stock of NWHW Holdings, Inc., which in turn acquired New Horizons Worldwide, Inc. (“New Horizons”). New Horizons is a global IT training company operating approximately 260 locations around the world through franchise arrangements in 41 states and 63 countries. In connection with the investment, APEI is entitled to certain rights, including right to representation on the Board of Directors of NWHW Holdings. The Company recorded the investment at cost and will recognize its share of earnings or losses in the investee in the periods for which they are reported with a corresponding adjustment in the carrying amount of the investment.

#### Note Receivable

In connection with the Company's minority investment in NWHW Holdings, Inc., the Company extended \$6.0 million in credit to New Horizons in exchange for a subordinated note. The note matures on September 28, 2018 with monthly interest payments of 5.0% per annum during the first five years of the note and interest payments of 6.0% per annum in the sixth year.

#### Commitments and Contingencies

The Company accrues for costs associated with contingencies including, but not limited to, regulatory compliance and legal matters when such costs are probable and can be reasonably estimated. Liabilities established to provide for contingencies are adjusted as further information develops, circumstances change, or contingencies are resolved. The Company bases these accruals on management's estimate of such costs, which may vary from the ultimate cost and expenses associated with any such contingency.

From time to time, the Company may be involved in litigation in the normal course of its business. The Company is not aware of any pending or threatened litigation matters that, in the opinion of management, will have a material adverse effect on the Company's business, operations, financial condition or cash flows.

### Concentration

Approximately 37% and 39% of the Company's revenues for the three and nine month periods ended September 30, 2012 were derived from students who received tuition assistance from tuition assistance programs sponsored by the United States Department of Defense compared to approximately 39% and 43% of the Company's revenues for the three and nine months ended September 30, 2011, respectively. Approximately 37% and 35% of the Company's revenues for the three and nine months ended September 30, 2012, respectively, were from students using financial aid under the Title IV programs compared to 39% and 34%, respectively, for the three and nine months ended September 30, 2011, respectively. A reduction in either of these programs or the change in maximum benefits allowed to students could have a significant impact on the Company's operations.

### 3. Net Income Per Common Share

Basic net income per common share is based on the weighted average number of shares of common stock outstanding during the period. Diluted net income per common share increases the shares used in the per share calculation by the dilutive effects of options and restricted stock. Stock options and restricted stock are not included in the computation of diluted earnings per share when their effect is anti-dilutive. There were 439,647 and 265,495 anti-dilutive stock options or restricted stock excluded from the calculation for the three and nine months ended September 30, 2012. There were no anti-dilutive stock options or restricted stock excluded from the calculation for the three and nine months ended September 30, 2011, respectively.

### 4. Income Taxes

The Company is subject to U.S. Federal income taxes as well as income taxes of multiple state jurisdictions. For Federal and state tax purposes, tax years 2008-2011 remain open to examination.

### 5. Stock Based Compensation

On March 15, 2011, the Board of Directors adopted the American Public Education, Inc. 2011 Omnibus Incentive Plan (the "2011 Incentive Plan"), and APEI's stockholders approved the 2011 Incentive Plan on May 6, 2011, at which time the 2011 Incentive Plan became effective. Upon effectiveness of the 2011 Incentive Plan, APEI ceased making awards under its 2007 Omnibus Incentive Plan. The 2011 Incentive Plan allows APEI to grant up to 2,000,000 shares plus any shares of common stock that are subject to outstanding awards under the 2002 Stock Plan or the 2007 Omnibus Incentive Plan that terminate due to expiration, forfeiture, cancellation or otherwise without the issuance of such shares. As of September 30, 2012, there were 910,966 shares subject to outstanding awards under the 2002 Stock Plan and the 2007 Omnibus Incentive Plan and 96,139 shares subject to outstanding awards under the 2011 Incentive Plan. Awards under the 2011 Incentive Plan may include the following award types: stock options, which may be either incentive stock options or non-qualified stock options; stock appreciation rights; restricted stock; restricted stock units; dividend equivalent rights; performance shares; performance units; cash-based awards; other stock-based awards, including unrestricted shares; or any combination of the foregoing.

Stock-based compensation expense related to restricted stock grants is expensed over the vesting period using the straight-line method for Company employees and the graded-vesting method for members of the Board of Directors and is measured using APEI's stock price on the date of grant. The fair value of each option award is estimated at the date of grant using a Black-Scholes option-pricing model that uses the assumptions noted in the following table. We

calculate the expected term of stock option awards using the “simplified method” in accordance with Staff Accounting Bulletins (SAB) No. 107 and 110 because we lack sufficient historical data and are unable to make reasonable expectations regarding the future. We also estimate forfeitures of share-based awards at the time of grant and revise such estimates in subsequent periods if actual forfeitures differ from original projections. We make assumptions with respect to expected stock price volatility based on the average historical volatility of peers with similar attributes. In addition, we determine the risk free interest rate by selecting the U.S. Treasury five-year constant maturity, quoted on an investment basis in effect at the time of grant for that business day.

	September 30, 2012	September 30, 2011	
Expected volatility	-	39.04	%
Expected dividends	-	-	
Expected term, in years	-	4.5	
Risk-free interest rate	-	2.01	%
Weighted-average fair value of options granted during the year	\$ -	\$ 13.22	

Options granted through September 30, 2012 vest ratably over periods of three to five years and expire in seven to ten years from the date of grant. Option activity is summarized as follows (unaudited):

	Number of Options	Weighted Average Exercise Price	Weighted-Average Contractual Life (Yrs)	Aggregate Intrinsic Value (In thousands)
Outstanding, December 31, 2011	1,067,511	\$21.22		
Options granted	-	\$-		
Awards exercised	(188,818 )	\$4.95		
Awards forfeited	(7,381 )	\$34.28		
Outstanding, September 30, 2012	871,312	\$24.63	3.79	\$10,536
Exercisable, September 30, 2012	693,563	\$21.56	3.48	\$10,441

The following table summarizes information regarding stock option exercises (unaudited):

	September 30, 2012	September 30, 2011
	(In thousands)	
Proceeds from stock options exercised	\$ 934	\$ 910
Intrinsic value of stock options exercised	\$ 6,204	\$ 4,574
Tax benefit from exercises	\$ 2,122	\$ 1,786

The table below summarizes the restricted stock activity for the nine months ended September 30, 2012 (unaudited):

	Number of Shares	Weighted Average Grant Price at Fair Value
Non-vested, December 31, 2011	79,075	\$ 37.44
Shares granted	97,240	\$ 40.09
Vested shares	(38,821 )	\$ 37.80
Shares forfeited	(1,701 )	\$ 39.66
Non-vested, September 30, 2012	135,793	\$ 39.21

Stock based compensation cost charged against income during the nine month period ended September 30, 2012 and September 30, 2011 is as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012 (Unaudited) (In thousands)	2011	2012 (Unaudited) (In thousands)	2011
Instructional costs and services	\$ 213	\$ 214	\$ 669	\$ 682
Marketing and promotional	96	79	288	244
General and administrative	631	519	1,913	1,494
Stock-based compensation expense in operating income	940	812	2,870	2,420
Tax benefit	(372 )	(321 )	(1,136 )	(949 )
Stock-based compensation expense, net of tax	\$ 568	\$ 491	\$ 1,734	\$ 1,471

As of September 30, 2012, there was \$5.0 million of total unrecognized compensation cost, representing \$1.2 million of unrecognized compensation cost associated with share-based compensation arrangements, and \$3.8 million of unrecognized compensation cost associated with non-vested restricted stock. The total remaining cost is expected to be recognized over a weighted average period of 0.9 years.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our historical results of operations and our liquidity and capital resources should be read in conjunction with the consolidated financial statements and related notes that appear elsewhere in this report.

### Forward-Looking Statements

Some of the statements contained in this Form 10-Q that are not historical facts are forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 (the "Exchange Act"). We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in Section 21E of the Exchange Act. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date this Form 10-Q is filed with the Securities and Exchange Commission ("SEC"). We may, in some cases, use words such as "project," "believe," "anticipate," "plan," "expect," "estimate," "intend," "would," "could," "potentially," "will," or "may," or other words that convey uncertainty of future events or outcomes to identify these forward-looking statements. The forward-looking statements are based on our beliefs, assumptions and expectations of our future performance, taking into account information currently available to us. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to us or are within our control. If a change occurs, our business, financial condition and results of operations may vary materially from those expressed in our forward-looking statements. There are a number of important factors that could cause actual results to differ materially from the results anticipated by these forward-looking statements. These important factors include those that we discuss in this section of this Form 10-Q, in the "Risk Factors" section of this Form 10-Q, in the "Risk Factors" section of our annual report on Form 10-K for the fiscal year ended December 31, 2011 (the "Annual Report") and in our various filings with the SEC. You should read these factors and the other cautionary statements made in this Form 10-Q in combination with the more detailed description of our business in our Annual Report as being applicable to all related forward-looking statements wherever they appear in this quarterly report. If one or more of these factors materialize, or if any underlying assumptions prove incorrect, our actual results,

performance or achievements may vary materially from any future results, performance or achievements expressed or implied by these forward-looking statements. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

#### Overview

#### Background

American Public Education, Inc. is a provider of online post-secondary education directed primarily at the needs of the military and public service communities. We operate through the American Public University System, a regionally accredited online university that includes American Military University, or AMU, and American Public University, or APU.

We were founded as American Military University, Inc. in 1991 and began offering graduate courses in January 1993. In 1995, American Military University began offering undergraduate programs primarily directed to members of the armed forces. Over time, American Military University diversified its educational offerings in response to demand by military students for post-military career preparation. With its expanded program offerings, American Military University extended its outreach to the greater public service community, primarily police, fire, emergency management personnel and national security professionals. In 2002, we reorganized into a holding company structure, with American Public Education, Inc. serving as the holding company of American Public University System, Inc., which operates APUS, which includes AMU and APU. Our university system achieved regional accreditation in May 2006 with The Higher Learning Commission of the North Central Association of Colleges and Schools and became eligible for participation in federal student financial aid programs under Title IV of the Higher Education Act of 1965, which we refer to as Title IV programs, for classes beginning in November 2006. In July 2011, The Higher Learning Commission reaffirmed accreditation of APUS for online courses and programs without any other stipulations on its affiliation status.

Prior to receiving regional accreditation, in 1995 APUS received initial national accreditation by the Accrediting Commission of the Distance Education and Training Council, or DETC. In January 2012, after careful consideration, the APUS Board of Trustees decided to withdraw voluntarily APUS's accreditation by DETC. The Board of Trustees determined that maintenance of two institutional accreditations was becoming increasingly burdensome and challenging in light of APUS's resources and efforts to pursue specialized accreditation. By letter dated April 30, 2012, APUS informed DETC of its voluntary withdrawal, effectively immediately. The Higher Learning Commission is the accrediting agency that APUS has always identified to the Department of Education as its primary accreditor for Title IV purposes.

The university system offers terms beginning on the first Monday of each month in either eight or sixteen-week formats. Semesters and academic years are established to manage requirements for participation in Title IV programs and to assist students who are utilizing Title IV programs in meeting eligibility requirements.

### Summary

Adjusted net course registrations increased 17% and 20% for the three-and-nine month periods ended September 30, 2012 over the three and nine month periods ended September 30, 2011. For the three and nine month periods ended September 30, 2012, our revenue increased from \$65.3 million to \$77.1 million, or by 18%, and from \$184.7 million to \$227.5 million, or by 23%, over the comparable prior year periods. Operating margins decreased to 22.7% from 23.1% and to 20.8% from 23.3% for the three-month and nine-month periods ended September 30, 2012 compared to prior year periods. Our margins were negatively affected in the three-month and nine-month periods ended June 30, 2012 for the reasons discussed in the Results of Operations section below, including because of increases in bad debt expense, financial aid processing, technology spending and civilian marketing expenses.

Our results of operations normally fluctuate as a result of variations in our business, principally due to the level of our selling and promotional expenses and changes in enrollment, and we expect that going forward we will continue to see seasonal fluctuation in new enrollments due to our increasing civilian population. We believe that the long term health of our business is best served by continuing to focus on marketing and promotional activities intended to expand awareness of our brand and increase net registrations from the civilian market. We are also pursuing projects designed to improve operational efficiencies and further improvements in the student experience. For example, we are pursuing Title IV processing automations and anticipate future operational efficiencies from our ePress initiative, which is designed to combat inflation in the prices of textbooks by switching to internally developed electronic textbooks. We anticipate that the ePress initiative will reduce operating expenses by up to approximately \$4 million in the second half of 2012 and up to approximately \$8 million in 2013. These projects, combined with what we expect will be lower bad debt expense in 2013 and the technology fee of \$50 per course that we announced on July 26,

2012, which we estimate will apply to approximately 39% of our net course registrations, could lead to margin improvements in 2013.

As we previously disclosed, we have been the target of fraudulent activity by individuals and groups with respect to student enrollment and the Title IV programs, and given our continued growth and status as an online education provider and our relatively low tuition, we believe that we will continue to be subject to such activities. While we maintain systems and processes to attempt to identify and prevent fraudulent applications for enrollment and Title IV aid, we cannot be certain that our systems and processes will be adequate in the face of increasing and increasingly sophisticated fraud schemes or that we will be able to expand such systems and processes at a pace consistent with our growth. Furthermore, as we previously disclosed, in addition to those who enroll or attempt to enroll solely to obtain Title IV funds, some students who might not otherwise pursue a degree or certificate are attracted to enroll because of the availability of Title IV funds and economic hardships resulting from today's economic climate. We believe these students may be more likely than other students to cease pursuing a degree or certificate due to other factors, such as becoming employed or not having the level of commitment necessary to complete successfully the required coursework. Partially as a result of these factors, the growth in our enrollments has in the past, and may in the future, reflect some students who will not persist as students. While we are not able to estimate the number of students who fall into these categories, and we are not able to estimate the impact on our enrollments over time, we believe that we had a higher number than usual of these students in 2011, beginning in June of that year. We believe that the measures that we have taken have had an effect, principally since the beginning of 2012, on decreasing the number of students who fall into these categories. We cannot be certain, however, that the measures that we have taken will continue to be effective, that any changes in enrollment patterns are as a result of those actions or that those measures will not have the effect of discouraging students who do not fall into these categories. For example, we implemented an additional fraud prevention measure in late March 2012 that we modified in the beginning of May because we believe that it was discouraging students who do not fall into these categories from enrolling.

Because we will be comparing our results on a year over year basis to periods during which we had a higher number of students who are less likely to persist, and as a result of the measures described above, or other changes to our enrollment patterns, including as a result of increased competition, market conditions or other factors, our historical and recent rates of growth over comparable prior year periods may not be sustainable during the remainder of 2012.

### Critical Accounting Policies

Critical accounting policies are disclosed in our consolidated financial statements and footnotes in the audited financial statements for the year ended December 31, 2011 included in our Annual Report for the year ended December 31, 2011. There have been no significant changes in our critical accounting policies from those disclosed in the Annual Report.

### Results of Operations

The following table sets forth statements of income data as a percentage of revenues for each of the periods indicated:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2012	2011	2012	2011
Revenues	100.0 %	100.0 %	100.0 %	100.0 %
Costs and expenses:				
Instructional costs and services	34.2	36.7	35.4	37.4
Selling and promotional	18.7	17.9	19.0	17.5
General and administrative	20.8	18.6	21.2	18.2
Depreciation and amortization	3.6	3.7	3.6	3.6
Total costs and expenses	77.3	76.9	79.2	76.7
Income from operations before interest income and income taxes	22.7	23.1	20.8	23.3
Interest income, net	- %	0.1	-	-
Income before income taxes	22.7	23.2	20.8	23.3
Income tax expense	8.7	6.3	8.0	8.3
Net income	14.0 %	16.9 %	12.8 %	15.0 %

### Three Months Ended September 30, 2012 Compared to Three Months Ended September 30, 2011

Revenues. Our revenues for the three months ended September 30, 2012 were \$77.1 million, an increase of \$11.8 million, or 18%, compared to \$65.3 million for the three months ended September 30, 2011. The increase was primarily a result of an increase in the number of net course registrations from civilian students, as well as an increase in the number of net course registrations from military students.

Costs and expenses. Costs and expenses for the three months ended September 30, 2012 were \$59.6 million, an increase of \$9.4 million, or 19%, compared to \$50.2 million for the three months ended September 30, 2011. Costs and expenses as a percentage of revenues increased to 77.3% for the three months ended September 30, 2012 from 76.9% for the three months ended September 30, 2011.

Instructional costs and services expenses. Our instructional costs and services expenses for the three months ended September 30, 2012 were \$26.4 million, representing an increase of 10% from \$23.9 million for the three months ended September 30, 2011. This increase was directly related to an increase in the number of classes offered due to the increase in net course registrations. Instructional costs and services expenses as a percentage of revenues were 34.2% for the three months ended September 30, 2012, compared to 36.7% for the three months ended September 30, 2011. This decrease was related to lower textbook costs as a result of our ePress initiative and to efficiencies resulting from process improvements in our student support services.

Selling and promotional expenses. Our selling and promotional expenses for the three months ended September 30, 2012 were \$14.4 million, representing an increase of 23% from \$11.7 million for the three months ended September 30, 2011. This increase was primarily due to an increase in civilian outreach, online advertising and media advertising expenses. Selling and promotional expenses as a percentage of revenues increased to 18.7% for the three months ended September 30, 2012 from 17.9% for the three months ended September 30, 2011. This increase as a percent of revenue is a result of increased civilian marketing expense to build greater awareness of the APU brand.

General and administrative expenses. Our general and administrative expenses for the three months ended September 30, 2012 were \$16.0 million representing an increase of 31% from \$12.2 million for the three months ended September 30, 2011. The increase in expense was a result of an increase in expenditures for financial aid processing fees and expenditures for technology required to support the increase in civilian students and regulatory changes. In addition, bad debt expense increased as a percentage of revenue from 1.7% for the three months ended September 30, 2011 to 4.4% for the three months period ended September 30, 2012, a change also attributable to our increase in civilian students. We believe that during the nine month period ended December 31, 2011, we experienced a significant increase in students who enrolled solely for the purpose of obtaining Title IV funds. Because these students typically did not succeed academically, a portion of their funds needed to be returned to the Federal Government resulting in an increase in accounts receivable that is unlikely to be collected and a corresponding increase in our allowance for doubtful accounts. In the most recent quarter ended September 30, 2012, we saw a modest improvement in bad debt that we believe is related to procedures that were implemented to reduce the number of students who were enrolled solely for the purpose of obtaining Title IV funds. General and administrative expenses as a percentage of revenues increased to 20.8% for the three months ended September 30, 2012 from 18.6% for the three months ended September 30, 2011. This increase was primarily due to financial aid processing, bad debt expense and technology spending increases to manage the increase in civilian students and regulatory changes.

Depreciation and amortization. Depreciation and amortization expenses were \$2.8 million for the three months ended September 30, 2012, compared with \$2.4 million for the three months ended September 30, 2011. This represents an increase of 17%. This increase resulted from greater capital expenditures and higher depreciation and amortization on a larger fixed asset base.

Stock-based and other compensation expenses. Stock-based compensation expenses included in instructional costs and services, selling and promotional, and general and administrative expense for the three months ended September 30, 2012 were \$940,000 in the aggregate, representing an increase of 16% from \$812,000 for the three months ended September 30, 2011. The increase in stock-based compensation for the three months ended September 30, 2012 is primarily attributable to new restricted stock grants issued in the first quarter of 2012.

Income tax expense. We recognized income tax expense for the three months ended September 30, 2012 and September 30, 2011 of \$6.7 million and \$4.1 million, respectively, or effective tax rates of 38.3% and 27.4%, respectively. The increase in our effective tax rate in the three months ended September 30, 2012 is primarily due to the state tax study that was completed and research and development credits that were taken during the third quarter of 2011, resulting in a tax savings of \$498,000 related to research and development tax credits and a \$1.4 million state income tax savings related to the state tax study,

Net income. Our net income was \$10.8 million for the three months ended September 30, 2012, compared to net income of \$11.0 million for the three months ended September 30, 2011, a decrease of \$200,000, or 2%. This decrease was related to the factors discussed above, particularly the income tax savings taken in the third quarter of 2011.

#### Nine Months Ended September 30, 2012 Compared to Nine Months Ended September 30, 2011

Revenues. Our revenues for the nine months ended September 30, 2012 were \$227.5 million, an increase of \$42.8 million, or 23%, compared to \$184.7 million for the nine months ended September 30, 2011. The increase was primarily a result of an increase in the number of net course registrations from civilian students, as well as an increase in the number of net course registrations from military students.

**Costs and Expenses.** Costs and expenses for the nine months ended September 30, 2012 were \$180.1 million, an increase of \$38.4 million, or 27%, compared to \$141.7 million for the nine months ended September 30, 2011. Costs and expenses as a percentage of revenues increased to 79.2% for the nine months ended September 30, 2012 from 76.7% for the nine months ended September 30, 2011.

**Instructional costs and services expenses.** Our instructional costs and services expenses for the nine months ended September 30, 2012 were \$80.5 million, representing an increase of 16% from \$69.1 million for the nine months ended September 30, 2011. This increase was directly related to an increase in the number of classes offered due to the increase in net course registrations. Instructional costs and services expenses as a percentage of revenues were 35.4% for the nine months ended September 30, 2012, compared to 37.4% for the nine months ended September 30, 2011. This decrease was related to lower textbook costs as a result of our ePress initiative and to efficiencies resulting from process improvements in our student support services.

**Selling and promotional expenses.** Our selling and promotional expenses for the nine months ended September 30, 2012 were \$43.3 million, representing an increase of 34% from \$32.3 million for the nine months ended September 30, 2011. This increase was primarily due to an increase in civilian outreach, online advertising and media advertising expenses. Selling and promotional expenses as a percentage of revenues increased to 19.0% for the nine months ended September 30, 2012 from 17.5% for the nine months ended September 30, 2011. This increase as a percent of revenue is a result of increased civilian marketing spend to build greater awareness of the APU brand.

**General and administrative expenses.** Our general and administrative expenses for the nine months ended September 30, 2012 were \$48.2 million representing an increase of 43% from \$33.6 million for the nine months ended September 30, 2011. The increase in expense was a result of an increase in expenditures for financial aid processing fees and expenditures for technology required to support the increase in civilian students and regulatory changes. In addition, bad debt expense increased as a percentage of revenue from 1.4% for the nine months ended September 30, 2011 to 4.7% for the nine months ended September 30, 2012, a change also attributable to our increase in civilian students. We believe that during the nine month period ended December 31, 2011, we experienced a significant increase in students who enrolled solely for the purpose of obtaining Title IV funds. Because these students typically did not succeed academically, a portion of their funds needed to be returned to the Federal Government resulting in an increase in accounts receivable that is unlikely to be collected and a corresponding increase in our allowance for doubtful accounts. General and administrative expenses as a percentage of revenues increased to 21.2% for the nine months ended September 30, 2012 from 18.2% for the nine months ended September 30, 2011. This increase was primarily due to financial aid processing, bad debt expense and technology spending increases to manage the increase in civilian students and regulatory changes.

**Depreciation and amortization.** Depreciation and amortization expenses were \$8.1 million for the nine months ended September 30, 2012, compared with \$6.7 million for the nine months ended September 30, 2011. This represents an increase of 21%. This increase resulted from greater capital expenditures and higher depreciation and amortization on a larger fixed asset base.

**Stock-based and other compensation expenses.** Stock-based compensation expenses included in instructional costs and services, selling and promotional, and general and administrative expense for the nine months ended September 30, 2012 were \$2.9 million in the aggregate, representing an increase of 19% from \$2.4 million for the nine months ended September 30, 2011. The increase in stock-based compensation for the nine months ended September 30, 2012 is primarily attributable to new restricted stock grants issued in the first quarter of 2012.

**Income tax expense.** We recognized income tax expense for the nine months ended September 30, 2012 and September 30, 2011 of \$18.2 million and \$15.3 million, respectively, or effective tax rates of 38.5% and 35.6%, respectively. The increase in our effective tax rate in 2012 is primarily due to the state tax study that was completed

and research and development credits that were taken during the third quarter of 2011, resulting in a tax savings of \$498,000 related to research and development tax credits and a \$1.4 million state income tax savings related to the state tax study.

Net income. Our net income was \$29.2 million for the nine months ended September 30, 2012, compared to net income of \$27.8 million for the nine months ended September 30, 2011, an increase of \$1.4 million, or 5%. This increase was related to the factors discussed above.

## Liquidity and Capital Resources

### Liquidity

The Company financed operating activities, capital expenditures, repurchases of our common stock and an investment and note receivable in NWHW Holdings, Inc. during the nine months ended September 30, 2012 and 2011, primarily through cash provided by operating income and proceeds received from the exercise of stock options. Cash and cash equivalents were \$101.6 million and \$107.3 million at September 30, 2012 and September 30, 2011, respectively, representing a decrease of \$5.7 million, or 5.3%.

We derive a significant portion of our revenues from tuition assistance programs from the Department of Defense, or DoD. Generally, these funds are received within 60 days of the start of the classes to which they relate. A growing source of revenue is derived from our participation in Title IV programs, for which disbursements are governed by federal regulations. We have typically received disbursements under Title IV programs within 30 days of the start of the applicable class. These factors, together with the number of classes starting each month, affect our operational cash flow.

Our costs and expenses have increased with the increase in student enrollment, as well as our increased selling and promotional expenses, and we expect to fund these expenses through cash generated from operations. Based on our current level of operations and anticipated growth, we believe that our cash flow from operations and other sources of liquidity, including cash and cash equivalents, will provide adequate funds for ongoing operations and planned capital expenditures for the foreseeable future.

### Operating Activities

Net cash provided by operating activities was \$34.5 million and \$47.5 million for the nine months ended September 30, 2012 and 2011, respectively.

Accounts Receivable increased by \$11.1 million as of September 30, 2012 over June 30, 2012 due to a timing difference in collections of receivables due from the Air Force and Army. Prior to June 30, 2012, APUS billed Air Force bases separately each month for tuition assistance payments due for active duty Air Force students. Those receivables were historically collected within thirty days. During the quarter ended September 30, 2012, the Air Force centralized its payment centers into three locations. As a result of the new process, invoice approvals and payments were delayed, resulting in \$4.2 million in August billings and \$4.0 million in September billings not being collected from the Air Force until the fourth quarter of 2012. Similarly, a billing from the Army in the amount of \$3.6 million from August was not collected until October 2012. These delays until October 2012 in collecting \$11.8 million of receivables are believed to be an isolated timing difference that had no significant impact on the cash flow or operations of the Company.

### Investing Activities

Net cash used in investing activities was \$41.6 million and \$14.0 million for the nine months ended September 30, 2012 and 2011, respectively. Capital expenditures were related to our continued investment in systems and new construction projects due to our ongoing evaluation of space needs. Construction continued on a new 106,000 square foot financial center in Charles Town, West Virginia that was completed in October 2012 and for which we invested \$13.9 million in the nine months ended September 30, 2012. In addition, the Company made a minority investment in NWHW Holdings, Inc. for \$6.8 million and extended \$6.0 million in credit to New Horizons Worldwide, Inc. in exchange for a subordinate note.

## Financing Activities

Net cash used in financing activities was \$10.3 million and \$7.6 million for the nine months ended September 30, 2012 and 2011, respectively. Cash used in financing activities was from the repurchase of our common and restricted stock, net of cash received from the issuance of common stock as a result of stock option exercises, and the excess tax benefit from stock based compensation.

Employees are provided the option to forfeit to the Company shares equivalent to the minimum statutory tax withholding required to be paid when restricted stock vests. During the nine months ended September 30, 2012, the Company accepted for forfeiture of 10,697 shares for \$456,000 under this arrangement.

The Board of Directors has authorized a repurchase program to repurchase up to the cumulative number of shares issued or deemed issued under the Company's equity incentive and stock purchase plans after January 1, 2012. The Company completed its expected repurchases for 2012 on March 20, 2012, repurchasing a total of 87,033 shares of the Company's common stock for \$3.4 million.

On May 14, 2012, the Board of Directors authorized a program to repurchase up to \$20 million of shares of the Company's common stock. Subject to market conditions, applicable legal requirements and other factors, the repurchases may be made in open market transactions or privately negotiated transactions. The authorization does not obligate the Company to acquire any shares, and purchases may be commenced or suspended at any time based on market conditions and other factors that the Company deems appropriate. As of September 30, 2012 the Company had repurchased 322,603 shares under this repurchase program for an aggregate amount of \$9.3 million.

## Regulatory Update

On February 28, 2011 the U.S. Department of Education began an on-site program review of APUS's administration of the Title IV programs. In general, after the Department of Education conducts its site visit and reviews data supplied by the institution, the Department of Education sends the institution a program review report. The institution has the opportunity to respond to the findings in the program review report. The Department of Education then issues a final program review determination letter, which identifies any liabilities. The institution may appeal any monetary liabilities specified in the final program review determination letter.

The site visit for our program review, which covered the 2009-2010 and 2010-2011 award years, took place from February 28, 2011 through March 4, 2011.

APUS received the program review report in April 2011. The report included three findings, two of which involved individual student-specific errors. The third finding was that APUS's policies failed to treat certain students as having unofficially withdrawn from the institution and that the University consequently failed to calculate and return federal student financial aid that APUS was required to return to the Department of Education as the result of these unofficial withdrawals. The Department's position is that students who did not "earn an F grade" in a payment period should be treated as having unofficially withdrawn from the school, even if they had future course registrations in the next payment period. We disagree with this interpretation of Department of Education regulations, and APUS filed a response to the Department of Education in June 2011 and responded to follow-up requests from the Department of Education.

On May 14, 2012 the Department of Education issued a Final Program Review Determination ("FPRD"). The FPRD (1) identified liabilities resulting from the program review report findings, (2) provided instructions for payment of the liabilities to the Department of Education, (3) notified APUS of its right to appeal, and (4) notified APUS that under Department of Education regulations, APUS is required to post an irrevocable letter of credit payable to the U.S. Secretary of Education due to the number of unpaid and late refunds identified as part of the program review. The liabilities and letter of credit requirements are based on the program review report's finding that APUS's policies improperly failed to treat certain students as having unofficially withdrawn from the institution and that APUS consequently failed to calculate and return federal student financial aid to the Department of Education as a result of these unofficial withdrawals. The FPRD stated that APUS's total monetary liability, including interest, is \$1,040,851. Notwithstanding that the Company disagrees with the Department's position, after considering the time, effort, expense and other factors involved in a full appeal, the Company determined to pay the liability. After paying that amount, APUS timely appealed the remaining amount because APUS discovered discrepancies in the Department of Education's records as compared to its records for certain students at issue in the FPRD. In addition, the Company accrued \$56,000 at June 30, 2012 for interest expense related to the FPRD. By letter dated July 24, 2012, the Department of Education withdrew the FPRD without prejudice and indicated its intent to reissue a revised FPRD at a later date. APUS subsequently received a revised FPRD Letter dated August 8, 2012. The August 8 FPRD Letter was substantially similar to the May 14 FPRD Letter but it provided for a reduced liability amount. The total liability amount in the May 14 FPRD Letter was \$1,040,851; the total liability amount in the August 8 FPRD Letter was \$1,033,403. By the time of the August 8 FPRD Letter, APUS had already paid \$909,095 based on the May 14 FPRD. APUS determined that it would not appeal the August 8 FPRD Letter, and in a courtesy letter to Department of Education it undertook to pay the remaining amount due as specified in the FPRD. Because we cannot be assured that we will be able to collect the full amounts from the relevant former students, we have established a partial reserve against these receivables. We will continue to monitor the collection history and the reserve established. In response to the FPRD, we have also posted an irrevocable letter of credit in favor of the Department of Education in the amount of \$163,284.

United States Armed Forces Tuition Assistance

Service members of the United States Armed Forces are eligible to receive tuition assistance from their branch of the armed forces that they may use to pursue postsecondary degrees. Service members of the United States Armed Forces can use tuition assistance at postsecondary schools that are accredited by accrediting agencies recognized by the U.S. Secretary of Education. We rely for a significant portion of our revenues on the tuition assistance programs offered to United States Armed Forces personnel. Our tuition is currently structured so that tuition assistance payments for service members fully cover the service member's per semester credit hour tuition cost of our undergraduate courses and cover more than 75% of the per course tuition cost of our graduate courses.

In October 2011, the Marine Corps announced, and later rescinded, new tuition assistance rules that cut the maximum benefit for its service members from \$4,500 per year to \$875 per year and reduced the tuition assistance from \$250 per credit hour to \$175 per credit hour. Although undergraduate tuition levels have been restored to their prior levels with retroactive benefits to affected service members, the Marine Corps has warned that the current levels of funding are not sustainable. The Marine Corps did reduce graduate level tuitions from \$350 per credit hour to \$250 per credit hour, which is consistent with the current tuition assistance payments from the other services. We anticipate that the other services will also consider potential changes to the tuition assistance program.

The Department of Defense is required to submit a report to the Senate and House Armed Services Committees on how to increase the efficiency of tuition assistance program funding, including the impact of changing the program to require service members to pay 25% of their expenses. The report was has not yet been published. In addition, in October 2011, the Department of Defense announced that while it will maintain the current levels of tuition assistance in the near term, it plans to consider changes as part of a holistic review of the military compensation package. If tuition assistance payments are reduced, we believe that most service members would be eligible and able to finance out-of-pocket tuition costs resulting from this shortfall using their "Top-Up" benefits under the GI Bills, which allow service members to use a portion of their GI Bill benefits while still on active duty. However, we do not know whether in the long-term service members would be willing to use the Top-Up option, or whether the increased administrative process in using the Top-Up option or covering the shortfall through other funding sources would lead to service members deciding not to enroll or enrolling at a slower rate.

We are not able to estimate the effect of future expected changes to the tuition assistance programs, whether the services would impose other criteria in addition to the level of reimbursement, or the response that our competitors would take to reduced tuition assistance payments or the willingness of service members to use their "Top-Up" option available to them under their veterans benefits.

Certain of our students are eligible to receive funds from education assistance programs administered by the Department of Veterans Affairs, including under the GI Bills. Pursuant to federal law related to those programs, we are approved for education of veterans and members of the selective reserve and their dependents by the state approving agencies in Virginia and West Virginia. On April 16, 2012, the Department of Veterans Affairs began an on-site program review of our programs. The on-site review was concluded on April 20, 2012, and we have not yet received a formal report from the Department of Veterans Affairs.

#### Pending Legislation

On April 18, 2012, Senators Kay Hagan and Tom Harkin introduced new legislation in the United States Senate that would prohibit colleges and universities from using funds from Title IV programs, military tuition assistance, veterans education benefits programs, and other federal educational assistance funds to pay for marketing, advertising, and recruiting. The bill, the Protecting Financial Aid for Students and Taxpayers Act, has been referred to the Senate Health, Education, Labor and Pensions Committee. Were the bill to become law, it would significantly affect our ability to identify and attract prospective students. On June 14, 2012, the Senate Appropriations Committee reported a 2013 fiscal year appropriations bill that includes language from the Protecting Financial Aid for Students and Taxpayers Act.

In August 2011, President Obama signed the Budget Control Act of 2011, which provided for both an increase in the federal government's borrowing authority and reductions in spending. The Budget Control Act of 2011 eliminated the in-school interest exemption for graduate student loans beginning July 1, 2012. The cost of borrowing will increase for graduate students who defer payment of interest while enrolled, which could adversely impact our enrollments. Also, under the Budget Control Act of 2011, Congress must develop legislation to achieve further deficit reduction, and the outcome of this process is uncertain. If Congress fails to achieve the required level of deficit

reduction, automatic reductions in spending across-the-board (also known as “sequestration”) will begin in federal fiscal year 2013. Although the Pell Grant program currently is exempt from the sequestration process, other federal programs and services that could impact our business could be included. Any action by Congress that significantly reduces Title IV program funding, whether through across-the-board funding cuts or otherwise, or materially impacts our eligibility or our students eligibility to participate in Title IV programs would have a material adverse effect on our enrollment, financial condition, results of operations, and cash flows.

#### U.S. Department of Education Rulemaking

The Department of Education's gainful employment regulations require an annual assessment to determine whether each of an education institution's gainful employment programs meet at least one of the following metrics, collectively referred to as the “debt measures”: (1) a debt repayment rate of 35% or more, (2) a debt-to-earnings ratio of 12% or less, or (3) a debt-to-discretionary income ratio of 30% or less. On June 21, 2012, the Department of Education released data to institutions showing the calculation of gainful employment metrics for each covered program based on 2011 data. The Department of Education released this information to the public on June 26, 2012. The released rates were for informational purposes only. The informational metrics for 2011 were generally based on data reported for federal fiscal years 2007 and 2008.

On June 30, 2012, the U.S. District Court for the District of Columbia struck down the debt measures and certain related requirements; the court ruled one day before the debt measure regulations would have gone into effect. See *Ass'n of Private Colls. and Univs. v. Duncan*, No. 11-1314, \_\_\_ F.Supp.2d \_\_\_, 2012 WL 2505237 (D.D.C. June 30, 2012). The court held that the Department of Education interpreted reasonably its statutory authority when it promulgated the gainful employment regulations but arbitrarily chose the debt repayment rate percentage. The court's ruling did not affect the gainful employment regulations related to certain disclosures to prospective students, such as on-time graduation rates and tuition and fees. On July 6, 2012, the U.S. Department of Education issued an announcement acknowledging that the Court had vacated the debt measures that would have gone into effect on July 1, 2012. The announcement stated that institutions are not required to comply with related regulations addressing reporting requirements and adding new gainful employment programs. On July 30, 2012, Department of Education filed a motion with the U.S. District Court for the District of Columbia to alter or amend the judgment. The Department of Education argued in its motion that even though it would not be permitted to sanction education institutions for failure to meet the debt measure thresholds, (i) education institutions should disclose information to the Department of Education that will allow the Department of Education to calculate the debt measures and (ii) education institutions should include the results of the debt measure calculations in their disclosures to prospective students. On September 24, 2012, the U.S. District Court for the District of Columbia requested a supplemental briefing by the parties addressing, in brief, (i) the scope of the Department of Education's statutory authorization to maintain a database of information about student borrowers and (ii) the authority on which the Department of Education relied to argue that it could require education institutions to provide information to the Department of Education for purposes of calculating the debt measures and then require education institutions to disclose the results of those debt measure calculations. The U.S. District Court for the District of Columbia is expected to render a decision about whether to alter or amend its June 30, 2012 decision after the final supplemental briefs are filed in November 2012. The Department of Education could impose regulations in the future that would penalize us (including making us ineligible to receive Title IV funds) if our students fail to achieve certain debt repayment, debt-to-income, or debt-to-discretionary income ratios.

Under the final Department of Education regulations published on October 29, 2010, if an institution offers postsecondary education through distance education to students in a state in which the institution is not physically located or in which it is otherwise subject to state jurisdiction as determined by the state, the institution must meet any state requirements for it to offer legally postsecondary distance education in that state. The institution must be able to document state approval for distance education if requested by the Department of Education. In addition, states must have a process to review and take appropriate action on complaints concerning postsecondary institutions. These new rules were to become effective July 1, 2011, although the Department of Education indicated in an April 20, 2011 guidance letter that it would not initiate any action to establish repayment liabilities or limit student eligibility for distance education activities undertaken before July 1, 2014, provided the institution is making a good faith effort to identify and obtain necessary state authorization before that date.

On July 12, 2011, however, a federal judge for the U.S. District Court for the District of Columbia vacated the portion of the Department of Education's state authorization regulation that requires online education providers to obtain any required authorizations from all states in which their students reside, finding that the Department of Education had failed to provide sufficient notice and opportunity for comment on the requirement. On June 5, 2012, the U.S. Court of Appeals for the District of Columbia affirmed the district court's July 12, 2011 ruling. On July 27, 2012, the Department of Education issued a Dear Colleague Letter cautioning education institutions to remain in compliance with all applicable state laws and regulations related to distance education. The Department of Education has not announced its next steps, but it may engage in the future in a negotiated rulemaking to address distance education and state authorization. Should the federal distance education requirements published in October 2010 be enforced in the future, and if we fail to obtain required state authorization to provide postsecondary distance education in a specific state, we could lose our ability to award Title IV aid to students in that state.

In Spring 2012, the Department of Education convened two negotiated rulemaking committees- one on teacher preparation and one on student loans- that each held a series of meetings to discuss proposed changes to applicable regulations. Negotiators reached consensus on proposed regulatory language on 25 student loan issues, which will result in two packages of proposed rules to be published for public comment before final promulgation. Proposed rules relating to various loan repayment issues were issued November 1, 2012, to be effective in July 2013. The Department of Education issued a notice of proposed rulemaking on July 17, 2012 addressing discharges of loans for borrowers who suffer from total and permanent disability. Proposed rules relating to other loan issues are expected by January 2013, to be effective in July 2014. Negotiators failed to reach consensus on proposed regulations related to teacher preparation programs and the awarding of TEACH Grants. The committee disagreed about how, if at all, students' test scores should be used to judge the effectiveness of their teacher's preparation program. Such so-called "value added scores" were promoted by the Department of Education during the negotiations as one way to determine which institutions should be eligible to award TEACH Grants to students in their teacher preparation programs. As the negotiators failed to reach consensus, the Department of Education is now responsible for drafting proposed regulations, to be released at a future date.

On April 25, 2012, the Department of Education announced that it would be publishing a notice regarding its intent to establish a negotiated rulemaking committee to prepare proposed regulations for the Title IV programs. The announcement states that the Department of Education intends to develop proposed regulations designed to prevent fraud and otherwise ensure proper use of Title IV program funds, and to improve and streamline the campus-based Title IV programs. The announcement states that the Department of Education is considering regulatory changes related to the disbursement of Title IV program funds, particularly electronic funds transfers made directly to a student's bank account and available to the student via debit or another bank-provided card. The Department of Education held two public hearings in May 2012. Negotiations were expected to begin in 2012 but now may not begin until 2013.

On September 17, 2012, the Department of Education updated waivers and modifications of provisions governing the Title IV programs for the benefit of individuals who are performing qualifying military service (or individuals who are affected by a disaster, war or other military operation or national emergency) under the authority of the Higher Education Relief Opportunities for Students Act of 2003 ("HEROES Act"). The Department of Education acted to bring provisions into compliance with statutes and regulations enacted and promulgated after these provisions were originally published.

#### Executive Order 13607: Principles of Excellence

On April 27, 2012, President Obama issued an Executive Order ("EO") that directs the Departments of Defense, Veterans Affairs, and Education to establish "Principles of Excellence to strengthen oversight, enforcement, and accountability" ("Principles") in connection with the Post-9/11 Veterans Educational Assistance Act of 2008, as amended ("Post-9/11 GI Bill") and the Department of Defense tuition assistance program. The EO requires the Principles to apply to all education institutions that receive funding from military and veterans education benefits programs, and it does not distinguish among non-profit, public, and for-profit institutions. The Principles include, for example, disclosure obligations related to program costs, student aid eligibility, estimated loan debt, student outcomes, and education plans and a prohibition on "fraudulent and aggressive recruiting techniques" on and off military installations. The agencies must implement the Principles through various actions, and within 90 days after the date of the EO they must report to the President their progress, including in terms of revisions to regulations, guidance documents, memoranda of understanding, and other policies related to the Post-9/11 GI Bill and Department of Defense tuition assistance. In addition, among other action, the Departments of Defense, Veterans Affairs, and Education are directed to develop a comprehensive strategy to establish service member and veteran student outcome measures that are comparable, to the maximum extent practicable, across military and veterans education benefit programs, and the Department of Education must collect from institutions and publish information on the amount of funding institutions receive from the Post-9/11 GI Bill and the Department of Defense tuition assistance program. The EO also contains requirements related to enforcement of and compliance related to the Principles, including, for example, development of complaint systems and establishment of procedures for program reviews. Because a significant portion of our students use funding from military and veterans benefits programs, any actions that these agencies take could have a significant impact on our business.

The Department of Veterans Affairs requested that each education institution state, by electronic mail sent by August 1, 2012, its intent to comply with the Principles. We notified the Department of Veterans Affairs that APUS intends to make a good faith effort to comply with Executive Order 13607, subject to clarifying guidance and interpretation by the Departments of Defense, Education, and Veteran Affairs and/or the Consumer Financial Protection Bureau. On July 13, 2012, the Department of Education issued guidance on each Principle's meaning. The EO requires the Secretaries of Defense and Veterans Affairs, in consultation with the Secretary of Education and the Director of the Consumer Financial Protection Bureau, to submit a plan to strengthen enforcement and compliance related to the Principles before the end of July 2012. Such plan has not been published. We do not know what further actions the Departments of Defense, Veterans Affairs, and Education will take to implement the Principles and whether those

actions will have an adverse effect on our business or results of operations.

U.S. Senate HELP Committee

On August 5, 2010, we were among 30 for-profit schools to receive a letter from Senator Tom Harkin, Chairman of the Senate Health, Education, Labor and Pensions Committee, requesting documents as part of a review of matters related to for-profit post-secondary education institutions whose students receive federal student financial aid. The document request sought information on, for example, loan default rates; institutional spending; program costs; student outcomes, such as completion and placement rates; and recruiting practices, such as use of third-party lead generators. The majority staff of the HELP Committee issued a final report on July 30, 2012 summarizing the results of its investigations.

## Consumer Financial Protection Bureau

On October 18, 2012, the Consumer Financial Protection Bureau released a report entitled “The Next Front? Student Loan Servicing and the Cost to Our Men and Women in Uniform.” The report details the challenges that some service members have encountered when utilizing private and federal student loans. We do not know what steps may be taken by Congress or federal agencies in response to this report, or the report of the majority staff of the HELP Committee, and whether such actions (if any) will have an adverse effect on our business or results of operations.

## Item 3. Quantitative and Qualitative Disclosures about Market Risk

We are subject to risk from adverse changes in interest rates, primarily relating to our investing of excess funds in cash equivalents bearing variable interest rates, which are tied to various market indices. Our future investment income will vary due to changes in interest rates. At September 30, 2012, a 10% increase or decrease in interest rates would not have a material impact on our future earnings or cash flows related to investments in cash equivalents. We have no derivative financial instruments as of September 30, 2012.

## Item 4. Controls and Procedures

### Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of our disclosure controls and procedures as of September 30, 2012 as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Based upon the evaluation, our Chief Executive Officer and Chief Financial Officer concluded that the Company’s disclosure controls and procedures were effective as of September 30, 2012.

Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in reports we file or submit under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

### Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting identified in connection with the evaluation required by Rule 13a-15(f) and 15d-15(f) of the Exchange Act that occurred during the period covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

## PART II – OTHER INFORMATION

### Item 1. Legal Proceedings

We currently have no material legal proceedings pending.

### Item 1A. Risk Factors

An investment in our stock involves a high degree of risk. You should carefully consider the risks set forth in the Risk Factors section of our Annual Report on Form 10-K for the year ended December 31, 2011 and all of the other information set forth in this Form 10-Q and our Form 10-K and the additional information in the other reports we file

with the Securities and Exchange Commission. If any of the risks contained in those reports actually occur, our business, results of operation, financial condition and liquidity could be harmed, the value of our securities could decline and you could lose all or part of your investment.

We do not have experience in making investments in other entities, and any such investments may not result in strategic benefits for us or could expose us to other risks.

We recently made an investment in NWHW Holdings that is intended to result in certain strategic benefits to the Company. As part of our strategy of diversifying our student body, we will continue to evaluate opportunities to invest in other entities where we see a strategic benefit. However, historically we have not made debt or equity investments in other entities, and investing in another entity requires expertise in evaluating another entity's business and identifying strategic benefits of a potential investment in such entity, among other expertise. These types of investments involve significant challenges and risks including that the investment does not advance our business strategy, that it has an adverse effect on our results of operations, that we do not realize a satisfactory return on our investment, that we acquire unknown liabilities, or that management's attention is diverted from our core business. These events could harm our operating results or financial condition. Any investments in other entities may also subject us to the operating and financial risks of such entities, and we rely on the internal controls and financial reporting controls of such entities.

Investments in other entities in which we do not have sole control, such as our investment in NWHW Holdings, present additional risks. In a minority investment, we would not have the ability to control the policies, management or affairs of the entity in which we would be investing. The interests of persons who control these entities may differ from our interests, and they may cause such entities to take actions that are not in our best interest, and we may become involved in disputes with such persons. Our inability to control entities in which we may make investments could negatively affect our ability to realize the strategic benefits of a non-controlling investment.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

### Repurchases

During the nine month period ending September 30, 2012, the Company repurchased 409,636 shares of the Company's common stock, par value \$0.01 per share. The chart below provides further detail as to the Company's repurchases during the period.

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (1)(3)	Maximum Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (2)(3)
January 1, 2012 – January 31, 2012	—	—	—	87,033	
February 1, 2012 – February 29, 2012	—	—	—	87,033	
March 1, 2012 – March 31, 2012	87,033	\$ 39.02	87,033	—	
April 1, 2012 – April 30, 2012	—	\$ —	87,033	—	\$ —
May 14, 2012	—	\$ —	87,033	—	\$ 20,000,000
May 1, 2012 – May 31, 2012	40,000	\$ 28.70	127,033	—	18,851,824
June 1, 2012 – June 30, 2012	113,426	\$ 29.42	240,459	—	15,515,168
July 1, 2012 - July 31, 2012	73,410	\$ 28.69	313,869	—	13,409,230
August 1, 2012 - August 31, 2012	82,467	\$ 27.23	396,336	—	11,163,298
September 1, 2012 - September 30, 2012	13,300	\$ 32.98	409,636	—	10,724,643
<b>Total</b>	<b>409,636</b>	<b>\$ 30.93</b>	<b>409,636</b>	<b>—</b>	<b>\$ 10,724,643</b>

(1) On December 9, 2011, the Company's Board of Directors approved a stock repurchase program for its common stock, under which the Company may purchase up to the cumulative number of shares issued or deemed issued under the Company's equity incentive and stock purchase plans, which the Board of Directors estimated to be up to 87,033 shares of the Company's common stock. Repurchases may be made from time to time in the open market at prevailing market prices or in privately negotiated transactions from time to time based on business and market conditions. The stock repurchase program may be suspended or discontinued at any time, and will be funded using the Company's available cash.

(2)

On May 14, 2012, the Company's Board of Directors authorized a program to repurchase up to \$20 million of shares of the Company's common stock. Subject to market conditions, applicable legal requirements and other factors, the repurchases may be made in open market transactions or privately negotiated transactions. The authorization does not obligate the Company to acquire any shares, and purchases may be commenced or suspended at any time based on market conditions and other factors that the Company deems appropriate.

(3) During the nine months ended September 30, 2012, the Company was deemed to have repurchased 10,697 shares of common stock forfeited by employees to satisfy minimum tax-withholding requirements in connection with the vesting of restricted stock grants. These repurchases were not part of the Board authorized stock repurchase program.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.

Item 6. Exhibits

Exhibit No.	Exhibit Description
31.01	Certification of Chief Executive officer pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934 as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
