Independent Accountants Special Review Report

To the Stockholders and Management of
Companhia Siderúrgica Nacional
Rio de Janeiro RJ

1. We have conducted a special review on the quarterly report (ITRs) of COMPANHIA SIDERÚRGICA NACIONAL (a Brazilian corporation), which includes the individual (Parent Company) and consolidated balance sheets as of March 31, 2004, the related statements of income for the quarter then ended, the performance report and the relevant information, presented in accordance with the accounting principles generally accepted in Brazil, prepared under the responsibility of the Company's management.
2. Except for the issue presented in paragraph (3), our review was conducted in accordance with specific standards established by the Brazilian Institute of Accountants - IBRACON, together with the Federal Accounting Council (CFC), and mainly comprised: (a) inquiries and discussions with the Company's management responsible for the accounting, financial and operating areas as to the principal criteria adopted in the preparation of the quarterly information; and (b) review of the information and subsequent events that had or may have significant effects on the Company's and its subsidiaries financial position and operations.
3. As described in Note 14 to the quarterly financial information, the Company and its affiliate MRS Logística S.A. and its subsidiary Galvasud S.A. elected to defer net losses arising from exchange variations in the year 2001, in conformity with Provisional Measure no.3/2001 and Deliberations no.404/2001 and 409/2001 from the Brazilian Securities Commission - CVM. The accounting practices adopted in Brazil require the recognition in income of the effects of exchange rate variations during the period in which they occurred. As a result, as of March 31, 2004 the stockholders' equity is overstated by approximately R\$55 million (R\$75 million in the year 2003) and the net income for the period ended March 31, 2004, is understated by approximately R\$20 million (R\$23 million for the first quarter of 2003), net of fiscal effects.
4. Based on our special review, except for the effects of the matter mentioned in paragraph (3), we are not aware of any material modification that should be made to the quarterly report referred to in paragraph (1) above for it to be in accordance with the accounting practices adopted in Brazil, applied in compliance with the standards laid down by CVM (Brazilian Securities Commission), specifically applicable to the preparation of the quarterly information.
5. As described in Note 7 to the Quarterly Information, as of March 31, 2004, the Company and its subsidiaries had recorded in current assets, accounts receivable in the amount of R\$77 million, related to the sale of energy in the Wholesale Electric Energy Market - MAE, for the period between September 2000 and September 2002. These amounts are subject to changes, depending on the decision on judicial process under-way filed by electric energy sector, related to the interpretation of market regulation in effect for that period.
6. The individual and consolidated financial statements as of December 31, 2003 presented for comparative purposes, were reviewed by us, and our report, dated February 27, 2004 included a qualification with respect to the deferral of net negative exchange variations for the year 2001 and an emphasis paragraph with respect to the realization of accounts receivable related to the sale of energy on the wholesale Electric Energy Market - MAE for the period September 2000 to September 2002. The individual and consolidated statements of income in the quarter ended March 31, 2003, presented for comparative purposes, were reviewed by us, and our report, dated May 2, 2003, contains a qualification with respect to the deferral of net negative exchange variations in the year 2001 and an emphasis paragraph with respect to the realization of accounts receivable related to the sale of energy on the MAE.
7. Our special review was conducted for the purpose of issuing a report on the Quarterly Information referred to in paragraph (1) above, taken as a whole. The Supplementary Information related to the Value-added Statement, presented in Note 24, the EBTIDA Statement included in Note 25, and the Statements of Changes in Financial Position and of Cash Flows presented in Attachment 16.01 to the Quarterly Information are presented for the purposes of allowing additional analyzes and are not required as part of the basic quarterly report. This information was reviewed according to the review procedures mentioned in paragraph (2) above, and based on our special review, is fairly stated, in all material respects, in relation to the Quarterly Information taken as a whole.

Companhia Siderúrgica Nacional Management Report for The first quarter of 2004

(Convenience Translation into English from the Original Previously Issued in Portuguese)

1. OPERATING CONTEXT

Companhia Siderúrgica Nacional ("CSN") is engaged in the production of flat steel products, its main industrial complexes being the Presidente Vargas Mill in the City of Volta Redonda, State of Rio de Janeiro, and the processing unit in the City of Araucaria, State of Paraná.

CSN is engaged in the mining of iron ore, limestone and dolomite in the State of Minas Gerais, to cater for the needs of the Presidente Vargas mill, and to improve their activities, the Company also maintains strategic investments in railroad, electricity and ports.

For the purpose of establishing a closer approach to its customers and winning additional markets on a global level, the Company has a steel distributor with service and distribution centers extending from the Northeast to the South of Brazil, a two-piece steel can plant geared to the Northeastern beverage industry, and also, a rolling mill in the United States and a 50% participation in another rolling mill in Portugal.

2. PRESENTATION OF THE FINANCIAL STATEMENTS

Hereunder the configuration of the Quarterly Information form, the Parent Company and Consolidated Statements of changes in Financial Position and Cash Flow are presented on table Other Information considered material by the Company .

3. SIGNIFICANT ACCOUNTING POLICIES

The Financial Statements were prepared in conformity with the accounting practices adopted in Brazil, as well as with the accounting standards and pronouncements established by CVM - the Brazilian Securities Commission and IBRACON - Brazilian Institute of Accountants

(a) Income statement

The results of operations are determined on an annual accrual basis. The Company decided to defer the net exchange variation incurred during fiscal year 2001, as detailed in Note 14.

(b) Marketable securities

Securities are recorded at cost plus yields accrued through the balance sheet date, and do not exceed the market value.

(c) Allowance for doubtful accounts

The allowance for doubtful accounts has been set up in an amount which, in the opinion of Management suffices to absorb any losses that might be incurred in realizing accounts receivable.

(d) Inventories

Inventories are stated at the lower of the average production/purchase cost and net realization value or replacement cost, except in the case of imports in process, which are stated at their identified cost.

(e) Other current and long-term assets

Other current and long-term assets are stated at their realization value, including, when applicable, yields accrued to the balance sheet date or, in the case of prepaid expenses, at cost.

(f) Investments

Investments in subsidiaries and jointly owned subsidiary companies are recorded by the equity accounting method, plus any amortizable goodwill and discount negative goodwill, if applicable.

Edgar Filing: NATIONAL STEEL CO - Form 6-K

The other permanent investments are recorded at acquisition cost.

(g) Property, plant and equipment

The property, plant and equipment of the Parent Company is presented at market or replacement values, based on appraisal reports (refer to note 13) conducted by independent expert appraisers firms, as permitted by Deliberation No. 288 issued by the Brazilian Securities Commission ("CVM") on December 3, 1998. Depreciation is computed by the straight-line method at the rates, shown in the same note, based on the remaining economic useful lives of the assets after revaluation. Iron mines Casa de Pedra depletion is calculated on the basis of the quantity of iron ore extracted. Interest charges related to capital funding for construction in progress are capitalized for as long as the projects remain uncompleted.

(h) Deferred charges

The deferred charges are basically comprised of expenses incurred for development and implantation of projects that should generate a payback to the Company in the next few years, being the amortization applied on a straight-line basis will follow the period foreseen for the economic return on the above projects. The charges also include the unamortized net of the foreign exchange variations related to the year 2001.

(i) Current and long-term liabilities

These are stated at their known or estimated values, including, when applicable, accrued charges, monetary and foreign exchange variation incurred through the balance sheet date.

(j) Employees Benefit

In accordance with Deliberation No. 371, issued by the Brazilian Securities Commission (CVM), of December 13, 2000, the Company decided to record the respective actuarial liabilities as from January 1, 2002, in accordance with the above as mentioned in reported deliberation and based on by independent actuarial studies (see note 26 item d).

(k) Income Tax and Social Contribution on Net Income

Income tax and social contribution on net income are calculated based at their effective tax rates and consider the tax loss absorption limited to 30%, to compute the tax liability. Tax credits are set up for deferred taxes on tax losses, negative basis of social contribution on net income and on temporary differences as well as income tax and social contribution on the 2001 deferred exchange variation and other temporary differences.

(l) Derivatives

The derivatives operations are recorded in accordance with the characteristics of the financial instruments.

The swaps operations are recorded based on the operations net results, which are booked monthly as for the contractual conditions.

The Financial Statements prepared in US dollars and in Euros were translated at the exchange rate in effect on March 31, 2004 R\$/US\$2.9086 (R\$/US\$2.8892 on December 31, 2003) and EUR/US\$1.23182 (EUR/US\$1.26353 on December 31, 2003).

The gains/losses originated by this translation were accounted for in the income statements of the related periods, as equity accounting in the parent company and exchange variation in the consolidated. These Financial Statements were prepared applying the same accounting principles as those applied by the Parent Company.

All intercompany balances and transactions have been eliminated in the preparation of the consolidated Financial Statements.

The year-end closing dates for the consolidated subsidiaries and jointly owned subsidiaries coincide with those of the parent company.

Consistent with the Financial Statements for the year ended December 31, 2002, the Company did not consolidate the investee MRS Logística S.A., due to the fact that it does not represent any relevant change to the consolidated economic unit. As of March 31, 2004 and December 31, 2003, the Company holds 32.22% of participation in the total capital stock and 18.72% in the investee voting capital stock.

The participation in Itá Energética S.A. is shown, as investment available for sale in long-term assets, therefore, was not consolidated. (See note 11)

The reconciliation between shareholders' equity and net income for the year of the Parent Company and consolidated is as follows:

(a) Exchange Rate Risk

Although most of the revenues of the Company are in Brazilian Reais, as of March 31, 2004, R\$6.508,688 of the Company's consolidated debt were denominated in foreign currency. As a consequence, the Company is subject to changes in exchange rates and manages the risk of these rates fluctuations, that affects the value in Brazilian Reais that will be necessary to pay the liabilities in foreign currency, using derivative financial instruments, mainly futures contracts, swaps and forward contracts, as well as investing of a great part of its cash and funds available in securities remunerated by exchange variation.

(b) Credit Risk

The credit risk exposure is managed through the restriction of subsidiaries in derivative instruments to large financial institutions with a high quality of credit. Thus, management believes that the risk of non-compliance by the counterparts is insignificant. The Company does not maintain or issue financial instruments with commercial aims. The selection of clients as well as the diversification of its accounts receivable

and the control on sales financing terms by business segment are procedures that the Company adopts to minimize occasioned problems with its commercial partners.

The financial instruments recorded in the Parent Company's balance sheet accounts as of March 31, 2004, in which market value differs from the book value, are as follows:

	Book Value	Market Value
Investment and Goodwill in jointly owned subsidiary - INEPAR	3,727	1,122
Loans and financing (short and long term)	9,835,119	10,534,792

On March 31, 2004 the consolidated position of derivative agreements outstanding was as follows:

Agreement				
	Date	Expiration date	Reference value	Market value
Foreign exchange Swap	Sundry	01/01/2004 a 01/12/2005	US\$1,022,003 thousand	(R\$150,691)

"Cap" Interest Options (semestral Libor)	03/28/2001	12/31/2004	US\$100,000 thousand	

(*) Refers to no cash swap that, at the end of the contract, the counterpart shall remunerate the variation of variable income assets, inasmuch the subsidiary of CSN Overseas undertake to remunerate the same notional updated value at the pre-fixed rate of 11.5% per annum.

Considering the loss position in the exchange and interest derivatives, the Company recorded the respective market values.

(c) Market Value

The amounts presented as market value were calculated according to the conditions that were used in local and foreign markets on March 31, 2004, for financial transactions with identical features, such as: volume and term of the transaction and maturity dates. Mathematical methods are used presuming there is no arbitrage between the markets and the financial assets. Finally, all transactions carried out in non-organized markets (over-the-counter market) are contracted with financial institutions previously approved by the Company's Board of Directors.

The provision for contingencies estimated by the Company's Management was substantially based on the appraisal of its tax and legal advisors. Such provision is only recorded for lawsuits classified as probable

a) Labor litigation dispute:

As of March 31, 2004, CSN was the defendant in 3,018 labor claims (2,930 on December 31, 2003, which required a provision in the amount of R\$64,299 (R\$65,270 on December 31, 2003). Most of the lawsuits are related to subsidiary responsibility, wages equalization, overtime and additional payment for unhealthy and hazardous activities.

The lawsuits related to subsidiary responsibility represent a great portion of the total labor litigations against the Company and are originated from the non payment by the contracted companies of the employees' obligations, which results in CSN inclusion in the lawsuits to honor, at a subsidiary level, the payment of such obligations.

Edgar Filing: NATIONAL STEEL CO - Form 6-K

The most recent lawsuits originated from subsidiary responsibility tend to terminate in relation to CSN due to the procedures adopted by the Company in order to inspect and assure the compliance with the wages and social charges payments, by the creation of the Contract Follow-up Centers since 2000.

b) Civil Actions:

These are, mainly, claims for indemnities among the civil judicial processes in, which the Company is involved. Such processes, in general, are originated from work related accident and occupational diseases related to industrial activities of the Company. For all these disputes, as of March 31, 2004 the Company accrued the amount of R\$45,932 (R\$41,165 on 2003)

c) Tax Litigation Dispute:

Income Tax and Social Contribution

The Company claims recognition of the financial and tax effects on the calculation of the income tax and social contribution on net income, related to computation of the Consumer Price Index - IPC, occurred in 1989, by a percentage of 51.87%.

In February 2003, part of a favorable final decision by the Federal Regional Court of the 1st Region was judged, granted to CSN the right to recognize part of its claim, by the percentage of 42.72%, deducting the monetary stated of 12.51% applied to the calculation of the income tax and social contribution. The Company continues to claim the unfavorable part.

As a consequence, in 2003 CSN recorded the amount of R\$161,789 for reversal of part of the relates provision for contingency and set up R\$207,390 of income tax (IRPJ) and social contribution (CSL) tax credits related to this claim.

As of March 31, 2004, the Company has recorded R\$218,381 as judicial deposit (R\$218,381 on December 31, 2003) and a provision of R\$61,410 (R\$60,573 on December 31, 2003).

In February 2003, the tax authorities assessed the Company for the calculation of prior years IRPJ and CSL. On August 21, 2003 a decision was given by the 2nd Team of the Federal Revenue Agency that cancelled such tax assessment, being the Company assessed again, by the tax authorities, for the same matter, in November 2003. The Company set up the provision for contingencies in the amount of R\$413,437.

PIS/COFINS Law 9,718/99

CSN is questioning the legality of Law 9,718/99, which increases the PIS and COFINS calculation basis, including, the financial revenue of the Company. As provision amounts to R\$256,747 as of March 31, 2004 (R\$224,488 on December 31, 2003), which includes legal charges.

The Company obtained a favorable sentence in the first stage of appeal and the process is going through compulsory re-examination by the 2nd Regional Federal Court of Appeals.

CPMF

The Company is questioning the CPMF (Provisional Contribution on Financial Activities) taxation since the promulgation of the Constitutional Amendment No. 21/99. The amount of this provision as of March 31, 2004 is R\$210,707 (R\$187, 678 on December 31, 2003), which includes legal charges.

The sentence in the court first instance was favorable and the process is being judged by the 2nd Regional Federal Court of Appeals. However, we emphasize that the most recent precedent by the courts has not been favorable to the taxpayers.

CIDE Contribution for Intervention in the economic domain

CSN disputes the legal validity of Law 10,168/00, which established the collection of the intervention contribution in the economic domain over the amounts paid, credited or remitted to beneficiaries that are not permanent residents of the country, as royalties or remuneration of supply contracts, technical assistance, trade mark license agreement and exploration of patents.

The Company recorded judicial deposits in 2002 and its corresponding provision in the amount of R\$21,497 on March 31, 2004 (R\$21,170 on December 31, 2003), includes legal charges.

Edgar Filing: NATIONAL STEEL CO - Form 6-K

The first instance court decision was unfavorable and the process is currently sub judice in the 2nd Regional Federal Court of Appeals. However, there is not a legal precedent, due to the fact that the issue is very recent. According to the Company's lawyers, favorable outcome is considered possible. In any case, the Company decided to set-up the respective provision.

Educational Salary

The Company discusses the unconstitutionality of the Educational-Salary and the possible recovery of the amounts paid in the period from January 5, 1989 to October 16, 1996. The provision as of March 31, 2004 amounts to R\$31,283 (R\$29,468 on December 31, 2003), which include legal charges.

The sentence in the legal court first instance was unfavorable and the process is currently sub judice in the 2nd Regional Federal Court of Appeals. Recently, the Brazilian Supreme Court judged the subject against the taxpayer, which reduces the favorable outcome expectations in this process.

SAT Workers Compensation Insurance

The Company understands that it must pay the SAT at the rate of 1% in all of its establishments, and not 3%, as determined by the current law. The amounts of R\$45,854 (R\$42,563 on December 31, 2003) are being accrued as of March 31, 2004, including legal charges.

The sentence at the first stage of appeal was unfavorable and the process is currently in TRF of the 2nd Region. Although there was so far no judgment in the Brazilian Supreme Court, according to the Company's lawyers, favorable outcome is considered possible. In any case, the Company decided to set-up the respective provision.

Others

The Company also provided for several other lawsuits in respect of FGTS LC 110, Drawback and Freight Surcharge for Renovation of Merchant Marine (AFRMM), whose amount as of March 31, 2004 aggregated R\$10,579 (R\$16,784 on December 31, 2003) including legal additions.

(a) Capital stock

Edgar Filing: NATIONAL STEEL CO - Form 6-K

The Company's capital stock on March 31, 2004 and 2003 is comprised of 71,729,261 thousand common shares, all book shares and without par value. Each common share entitles the owner to one vote at the General Meetings of Stockholders.

(b) Revaluation reserve (Parent Company)

This heading covers revaluations of the Company's fixed assets approved by the Extraordinary General Stockholders' Meeting held December 19, 2002 and April 29, 2003, which were intended for determining adequate amounts for the Company's fixed assets at market value. The objective of such procedure is for the financial statements to reflect assets value at a value closer to their replacement value, in conformity with CVM Deliberation no 288 of December 3, 1998.

Pursuant to the dispositions of CVM liberation No. 273 of August 20, 1998, a provision for social contribution and income tax was set up on the balance of revaluation reserve (except land), classified as a long-term liability.

The realized portion of the revaluation reserve, net of income tax and social contribution, is included for purposes of calculating the mandatory minimum dividend.

(c) Capital composition

On March 31, 2004, the main CSN's stockholders are:

	Number of shares (In thousand)	
	Common	%
Vicunha Siderurgia S.A.	33,337,091	46.48%

26. EMPLOYEES PENSION FUND

(a) Private Pension Administration

The Company is the principal sponsor of the CSN Employees Pension Fund ("CBS"), a private non-profit pension fund established in July 1960, as legal entity of social security end, with no lucrative end and authorized to function by the deliberation nº1964, of December 28, 1979, from the Ministry of Social Security. CBS congregates CSN employees, of CSN related companies and entity itself, and provided they sign the assent agreement and its activities are conducted by the law nº109, of May29, 2001.

(b) Characteristics of the Plans

CBS has three benefit plans:

35% of Average Salary Plan

It is a defined benefit plan, which began on 02/01/1966, with the objective of paying retirements (related to length of service, special, invalidity or old-age) on a life long basis, equivalent to 35% of the participant's salaries for the 12 last salaries. The plan also guarantees the payment of sickness assistance to the licensed by the Oficial Pension Plan (Previdência Oficial). It also guarantees the payment of funeral grant and pension. The participants (active and retired) and the sponsors make 13 contributions per year, being the same number of benefits paid per year. This plan is in process of extinction, becoming inactive on 10/31/1977, when the new benefit plan began.

Supplementary Average Salary Plan

It is a defined benefit plan, which began on 11/01/1977. The purpose of this plan is to complement the difference between the 12 last average salaries and the Oficial Pension Plan (Previdência Oficial) benefit, to the retired, and also on a life long basis. As with the 35% Average Salary Plan, there is sickness assistance, funeral grant and pension coverage. Thirteen contributions and payment of benefits are made per year. It became inactive since 12/26/1995, because of the combined supplementary benefits plan creation.

Combined Supplementary Benefits Plan

This plan began in 12/27/1995. It is a mixed plan, being a defined contribution, related to the retirement and a defined benefit, in relation to other benefits (pension, in activity, invalidity and sickness benefit). In this plan, the retirement benefit is calculated based on the sponsor and participants contributions, totaling 13 per year. Upon retirement of the participant, the plan becomes a defined benefit plan and 13 benefits are paid per year.

As of March 31, 2004 and December 31, 2003, the plans are presented as follow:

	03/31/2004	12/31/2003
Members	18,819	18,929

Edgar Filing: NATIONAL STEEL CO - Form 6-K

(c) Insufficiency of Reserve Equalization

On January 25, 1996, the Supplementary Social Security Secretariat SPC (Secretaria de Previdencia Complementar), through letter no. 55 SPC/CGOF/COJ approved a proposal to equalize the insufficiency of reserves based on value determined on September 30, 1995, monetarily update to December 31, 1995.

Through letter no. 1555/SPC/GAB/COA, of August 22, 2002, confirmed by letter no. 1598/SPC/GAB/COA of August 28, 2002 new proposal was approved for refinancing of reserves to amortize, the sponsors responsibility in 240 monthly and successive installments being the 1st to 12th in the amount of R\$958 and from 13th on R\$3,133, monetarily indexed (INPC + 6% p.y.), starting June 28, 2002. The contract also foresees the installments anticipation in case of cash necessity in defined benefit plan and the transfer of occasioned deficits/superavits for which the sponsors are responsible to the updated debtor balance, so as to preserve the plans balance without exceeding the maximum period of amortization.

(d) Actuarial Liabilities

As provided by CVM Deliberation No. 371, of December 13, 2000, approving the NPC 26 of IBRACON Employee s Benefit Accounting that established new calculation and disclosure accounting practices, the management of the Company, with its external actuaries, in conformity with the report dated January 30, 2004,

Actuarial Liability Recognition

The Administration decided to recognize the actuarial liability adjustment in the results for the period of five years, as from January 1, 2002, being appropriated to the first quarter of 2004 the amount of R\$6,995,(20,393 on 2003) in accordance with paragraphs 83 and 84 of NPC 26 of IBRACON and CVM Deliberation No. 371/2000, which, added to related contribution private pension fund outlay, totaled R\$17,808(23,433 on 2003).

With respect to the recognition of the actuarial liability, the amortizing contribution related to the amount for the participants for determination of the reserve in sufficiency was deduced from the present value of total actuarial obligation of the respective plans. A number of participants are disputing in count this amortizing contribution; The Company, however, based on its legal and actuarial advises understands that such contribution was duly approved by the Complementary Social Security SPC and consequently, is legally due by the participants.

Edgar Filing: NATIONAL STEEL CO - Form 6-K

In addition, in the case of Plano Milênio (Mixed Plan of Supplementary Benefit), of defined contribution, which shows net asset and where the sponsor's contribution corresponds to an equal counterpart of the participants' contribution, the understanding of the actuary is that up to 50% of the net actuarial asset may be used for reduction of the sponsor's contribution. As a result, the sponsor opted for recognizing 50% of such asset on its books, in the amount foreseen of R\$4,770 in 2004 (R\$2,910 in 2003).

Main actuarial assumptions adopted in the actuarial liability calculation

Methodology Used	Unit Methods of Projects Credits
Rate for discount of actuarial obligation	13.4% a.y (8% real and 5% inflation)
Rate of expected yield on plan assets	13.4% a.y (8% real and 5% inflation)
Index for estimated salary increase	INPC + 1% (6.05%)
Index for the increase in estimated benefits	INPC + 0% (5.00%)
Long term estimate rate of inflation	INPC + 0% (5.00%)
Biometrical mortality table	UP84 with 3-year aggravation and segregated by sex
Biometrical invalidity table	Mercer Table for entering invalidity
Rate of expected rotation	1% ao p.y
Probability of entering retirement	The first time the participant qualifies for a benefit
Main actuarial assumptions adopted in the actuarial liability calculation	

CSN do not have obligations on other after-employees benefit.

27.SUBSEQUENT EVENTS

Repurchase of shares

On April 27, 2004, the Council of Administration authorized the purchase of up to 1,176,470 groups of thousand shares issued by the Company to be hold in treasury and subsequent sale and/or cancellation. The period for acquisition is of 3 months starting on April 28, 2004.

Grouping of shares

On April 29, 2004, the Company approved, at an Ordinary and Extraordinary shareholders assembly of March 30, 2004 the Administration Council's proposal for breaking down the capital stock whereby each share would be represented by 4 shares, followed by the grouping of these shares in the proportion of 1000 shares to 1 share, which will result in grouping 250 shares into 1, as well as the change in the relationship by ADR of 1 share to 1 ADR.

Dividends and interest on capital

On April 29, 2004, the shareholders also approved the payment of R\$245,521 for interest on capital and R\$471,779 for dividends, starting June 11, 2004.

OPERATIONAL INVESTMENTS

Production and Production Costs

Production

Output volumes for the first quarter of 2004 reached 1.4 million tons of crude steel and 1.3 million tons of rolled finished products, representing a growth rate of 6.5% and of nearly 20%, respectively, in relation to the same period of the previous year. This growth is the result of improved operating performance of revamped equipment (Blast Furnace #3 and Hot Strip Mill #2).

Production Costs (Parent Company)

Total production costs were 33% higher in relation to 1Q03, following higher consumption of outsourced hot rolled coils (accounting for R\$36 million of the increase) to supply CSN Paraná and fulfill the demand of coated products customers, and higher prices and consumption for outsourced coke (R\$55 million) and scrap (R\$10 million). Another significant issue was the higher depreciation costs (R\$44 million) related to the asset revaluation effected in April 2003 and to the incorporation of CISA's assets, currently CSN Paraná.

In the 1Q04 production costs breakdown, when compared to 4Q03, we highlight the stable coal and coke (included in raw material in the graph) share of 23% of total costs in both periods, as well as the share of dollar denominated or dollar linked costs, which held steady at 36% of cash costs (without depreciation) in the period. For further information see Outlook on page 4.

Net Revenues

Sales volumes of finished products and slabs reached 1.1 million tons in the quarter, up 4.2% in relation to the same period of last year. In the domestic market, sales rose 6.3%, representing 68% of total sales in the quarter. In the same comparison, export sales remained stable. In comparison to 4Q03, seasonal demand and the strategy of increasing inventories, in expectation of better pricing in 2Q04, resulted in a 22% decrease in volumes sold.

Consolidated net revenues grew 17.7%, reaching R\$ 1,865 million, due to higher average prices in both domestic and external markets and to slightly higher volumes. Domestic sales represented 69% of total net revenues in the quarter, in line with the same period of the previous year.

In the parent company, the Asian market, which represented 60% of our exports in 4Q03, decreased 23% in 1Q04, mainly following the increase of sales to the USA due to slabs exports to CSN LLC, increasing NAFTA's share to 27%. Europe's share also rose to 34% due to sales of hot coils to Lusosider. While comparable figures are not yet available on a consolidated basis and as CSN LLC and Lusosider sales are destined to their respective regions, CSN believes that consolidated sales will show substantially the same distribution.

Gross Profit, Operational Income and EBITDA

Gross Profit

Gross profit for 1Q04 increased by R\$19.5 million in relation to 1Q03. Gross margin, however, fell 6.7 percentage points (p.p.), from 51.8% in 1Q03 to 45.1% in 1Q04. This reduction is due to the lower average exchange rate for exports in 2004 and higher production costs on a per ton basis, being partially offset by higher prices. In relation to 4Q03, gross margin rose 5.2 p.p., following improved pricing and sales mix in 1Q04.

Operational Income

In 1Q04, operational income reached R\$658 million compared to R\$672 million in 1Q03, reflecting the increase in operating expenses, mainly due to higher freight costs for exports. In relation to the previous quarter, the R\$330 million increase is mainly due to lower contingencies provisions recorded as other operating expenses and to lower provisions for doubtful accounts in 1Q04, as a result of a non-recurring adjustment in 2003 for CSN Energia's Wholesale Energy Market (MAE) receivables.

EBITDA

EBITDA amounted to R\$833 million, a 5.8% growth in relation to the R\$788 million recorded in the same period of last year. EBITDA margin (EBITDA divided by net revenues) decreased from 49.7% to 44.7%, or 5.0 p.p. due to the impact of the lower average exchange rate for exports and higher production and freight costs. Compared to 4Q03, EBITDA margin grew 8.5 p.p., in line with gross profit and reflecting the lower provisions for doubtful accounts.

Edgar Filing: NATIONAL STEEL CO - Form 6-K

Financial Results

Financial results (which include financial revenues and expenses as well as net exchange and monetary variation, but exclude amortization of deferred exchange losses) totaled an expense of R\$175.6 million in the quarter, compared to an expense of R\$50.1 million in the same period of 2003. The main reason for this result is the extraordinary gains arising from renegotiations of swaps in 1Q03. Deferred Exchange Losses: Total amortization of deferred 2001 exchange losses was of R\$28 million in 1Q04, compared to R\$35 million in 1Q03. The balance to be amortized in 2004 is R\$76 million.

Net Income

As a consequence of the above-mentioned effects, consolidated net income was R\$333.3 million in 1Q04, 16% below the R\$396.5 million net income recorded in the previous year and 5.8% higher than that of 4Q03.

Net Debt/EBITDA = 1.4 times

On March 31, 2004, consolidated net debt was R\$4,729 million, R\$179 million below the R\$4,908 million net debt recorded in the end of 2003. This net debt reduction was limited by the increase in working capital, following the strategic increase in inventories and the payment of income tax and social contribution related to fiscal year 2003, since net income recorded by offshore companies are only charged at the end of the year and paid in the beginning of the following period.

The low nominal cost of gross debt denominated in US Dollars, along with the net exchange variation effect and the result obtained with hedging instruments, resulted in consolidated net debt cost in Reais equivalent to 81% of CDI (interbank deposit rates), an improvement in relation to the 100% of CDI expected by the Company.

Current net debt/annualized EBITDA ratio reached 1.4x, in line with the expectations announced in the 2003 result conference call. The Company expects to keep this ratio between 1.0 and 1.2 times 2004 EBITDA.

Capex

In 1Q04, total capital expenditures were R\$104 million. The highlight, once more, was the capex related to CSN Paraná, besides projects related to maintaining the operating and technological excellence of our facilities.

Recent Events

- On April 27, 2004, the Board of Directors approved a Share Buyback Program, for a 90-day period, starting on April 28, of up to 1,176,470 lots of one thousand shares (4,705,880 shares after giving effect to the share split and regrouping referred to in the next paragraph), pursuant to the limits and provisions set on CVM Instruction # 10/80.
- On April 29, 2004, CSN approved in its General and Extraordinary Shareholders Meetings, the proposal of the Board of Directors of 03/30/2004, to split and regroup the shares representing its capital, after which, each trading lot of 1,000 former shares will be represented by 4 shares. The ADRs will effectively be split 4-for-one, and each ADR will represent one share after giving effect to the split and regrouping.
- At the shareholders meeting also approved:
 - the payment of (i) R\$245,521,000, as interest on equity; and (ii) R\$471,779,000.00, as dividends, to be paid as of June 11, 2004.
 - the reelection of the members of the Board of Directors and the election of 2 additional members, Darc Antonio da Luz Costa and Yoshiaki Nakano.

Independent Accountants Special Review Report

To the Stockholders and Management of
Companhia Siderúrgica Nacional
Rio de Janeiro RJ

1. We have conducted a special review on the quarterly report (ITRs) of COMPANHIA SIDERÚRGICA NACIONAL (a Brazilian corporation), which includes the individual (Parent Company) and consolidated balance sheets as of March 31, 2004, the related statements of income for the quarter then ended, the performance report and the relevant information, presented in accordance with the accounting principles generally accepted in Brazil, prepared under the responsibility of the Company's management.
2. Except for the issue presented in paragraph (3), our review was conducted in accordance with specific standards established by the Brazilian Institute of Accountants - IBRACON, together with the Federal Accounting Council (CFC), and mainly comprised: (a) inquiries and discussions with the Company's management responsible for the accounting, financial and operating areas as to the principal criteria adopted in the preparation of the quarterly information; and (b) review of the information and subsequent events that had or may have significant effects on the Company's and its subsidiaries financial position and operations.
3. As described in Note 14 to the quarterly financial information, the Company and its affiliate MRS Logística S.A. and its subsidiary Galvasud S.A. elected to defer net losses arising from exchange variations in the year 2001, in conformity with Provisional Measure no.3/2001 and Deliberations no.404/2001 and 409/2001 from the Brazilian Securities Commission - CVM. The accounting practices adopted in Brazil require the recognition in income of the effects of exchange rate variations during the period in which they occurred. As a result, as of March 31, 2004 the stockholders' equity is overstated by approximately R\$55 million (R\$75 million in the year 2003) and the net income for the period ended March 31, 2004, is understated by approximately R\$20 million (R\$23 million for the first quarter of 2003), net of fiscal effects.
4. Based on our special review, except for the effects of the matter mentioned in paragraph (3), we are not aware of any material modification that should be made to the quarterly report referred to in paragraph (1) above for it to be in accordance with the accounting practices adopted in Brazil, applied in compliance with the standards laid down by CVM (Brazilian Securities Commission), specifically applicable to the preparation of the quarterly information.
5. As described in Note 7 to the Quarterly Information, as of March 31, 2004, the Company and its subsidiaries had recorded in current assets, accounts receivable in the amount of R\$77 million, related to the sale of energy in the Wholesale Electric Energy Market - MAE, for the period between September 2000 and September 2002. These amounts are subject to changes, depending on the decision on judicial process under-way filed by electric energy sector, related to the interpretation of market regulation in effect for that period.
6. The individual and consolidated financial statements as of December 31, 2003 presented for comparative purposes, were reviewed by us, and our report, dated February 27, 2004 included a qualification with respect to the deferral of net negative exchange variations for the year 2001 and an emphasis paragraph with respect to the realization of accounts receivable related to the sale of energy on the wholesale Electric Energy Market - MAE for the period September 2000 to September 2002. The individual and consolidated statements of income in the quarter ended March 31, 2003, presented for comparative purposes, were reviewed by us, and our report, dated May 2, 2003, contains a qualification with respect to the deferral of net negative exchange variations in the year 2001 and an emphasis paragraph with respect to the realization of accounts receivable related to the sale of energy on the MAE.
7. Our special review was conducted for the purpose of issuing a report on the Quarterly Information referred to in paragraph (1) above, taken as a whole. The Supplementary Information related to the Value-added Statement, presented in Note 24, the EBTIDA Statement included in Note 25, and the Statements of Changes in Financial Position and of Cash Flows presented in Attachment 16.01 to the Quarterly Information are presented for the purposes of allowing additional analyzes and are not required as part of the basic quarterly report. This information was reviewed according to the review procedures mentioned in paragraph (2) above, and based on our special review, is fairly stated, in all material respects, in relation to the Quarterly Information taken as a whole.
