Forward Looking Statements or Information

Certain statements in this Form 10-Q, including information set forth under the caption “Management’s Discussion and Analysis of Financial Condition and Results of Operations”, constitute “Forward-Looking Statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Such statements are typically punctuated by words or phrases such as “anticipates,” “estimate,” “should,” “may,” “management believes,” and words or phrases of similar import. The Company cautions investors that such forward-looking statements included in this Form 10-Q, or hereafter included in other publicly available documents filed with the Securities and Exchange Commission, reports to the Company’s stockholders and other publicly available statements issued or released by the Company involve significant risks, uncertainties, and other factors which could cause the Company’s actual results, performance (financial or operating) or achievements to differ materially from the future results, performance (financial or operating) or achievements expressed or implied by such forward-looking statements. Factors that could cause or contribute to such differences could include, but are not limited to, changes in demand, prices, the raw materials cost of zinc and the cost of natural gas; changes in economic conditions of the various markets the Company serves, as well as the other risks detailed herein and in the Company’s Form 10-K filed on February 20, 2009 with the Securities and Exchange Commission.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
North American Galvanizing & Coatings, Inc.

We have reviewed the accompanying condensed consolidated balance sheet of North American Galvanizing & Coatings, Inc. and subsidiary (the "Company") as of September 30, 2009, and the related condensed consolidated statements of income for the three- and nine-month periods ended September 30, 2009 and 2008, cash flows for the nine-month periods ended September 30, 2009 and 2008 and stockholders' equity for the nine-month period ended September 30, 2009. These interim financial statements are the responsibility of the Company's management

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of North American Galvanizing & Coatings, Inc. and subsidiary as of December 31, 2008, and the related consolidated statements of income, stockholders' equity and cash flows for the year then ended (not presented herein); and in our report dated February 20, 2009, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2008 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

NORTH AMERICAN GALVANIZING & COATINGS, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE- AND NINE-MONTHS ENDED SEPTEMBER 30, 2009 and 2008
UNAUDITED

Note 1. Basis of Presentation

The condensed consolidated financial statements included in this report have been prepared by North American Galvanizing & Coatings, Inc. (the "Company") pursuant to its understanding of the rules and regulations of the Securities and Exchange Commission for interim reporting and include all normal and recurring adjustments which are, in the opinion of management, necessary for a fair presentation. The condensed consolidated financial statements include the accounts of the Company and its subsidiary.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations for interim reporting. The Company believes that the disclosures are adequate to make the information presented not misleading. However, these interim financial statements should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2008. The financial data for the interim periods presented may not necessarily reflect the results to be anticipated for the complete year.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the balance sheet dates and the reported amounts of revenues and expenses for each of the periods. Actual results will be determined based on the outcome of future events and could differ from the estimates. The Company's sole business is hot dip galvanizing and coatings which is conducted through its wholly owned subsidiary, North American Galvanizing Company ("NAGC").

Note 2. Share-based Compensation

On July 29, 2009, the shareholders approved the 2009 Incentive Stock Plan (the "Plan"), which includes the Director Stock Unit Program. The Plan permits the grant of share options and shares to its employees and directors for up to 2,500,000 shares of common stock. Director Stock Unit Program shares are issued under the plan. The Company believes that such awards better align the interests of its employees and directors with those of its shareholders. The Plan combines two former share-based compensation plans, the 2004 Incentive Stock Plan and the Director Stock Unit Program.

Share-based compensation cost, exclusive of the Director Stock Unit Program, was \$280,000 and \$217,000 for the three-months ended September 30, 2009 and 2008, respectively, and \$822,000 and \$487,000 for the nine-months ended September 30, 2009 and 2008, respectively.

Non-vested Shares. During January 2009, the Compensation Committee recommended and the Board of Directors approved a grant totaling 153,168 non-vested shares for management employees and 79,998 non-vested shares for non-management directors. The weighted-average grant price of restricted stock granted in 2009 was \$3.67. During February and March 2008, the Compensation Committee recommended and the Board of Directors approved a grant totaling 126,667 non-vested shares for management employees and 66,667 non-vested shares for non-management directors. During July 2008, the Compensation Committee recommended and the Board of Directors approved a grant totaling 80,000 non-vested shares for non-management directors. The weighted-

average grant price of non-vested shares in 2008 was \$4.70. Non-vested shares granted to management employees, including management directors, vest and become nonforfeitable on the date that is four years after the date of grant; or if the participant is a non-employee director of the Company at the time of the grant, the date that is two years after the date of the grant. The Company is recognizing this compensation expense over the two year or four year vesting period, as applicable, on a ratable basis. Non-vested shares are valued at market value on the grant date. The Company recognized \$200,000 and \$127,000 in amortization expense related to non-vested shares in the three-months ended September 30, 2009 and 2008, respectively, and \$575,000 and \$218,000 for the nine-months ended September 30, 2009 and 2008, respectively.

Stock Options. Option awards are granted with an exercise price equal to the market price of the Company's stock at the date of grant; those option awards usually vest based on 4 years of continuous service and have 10-year contractual terms. No stock options have been issued since February 2007. The Company recognized \$80,000 and \$90,000 in the three-months ended September 30, 2009 and 2008, respectively, and \$248,000 and \$270,000 for the nine-months ended September 30, 2009 and 2008, respectively for amortization expense related to stock options.

Director Stock Unit Program. At the Company's Annual Meeting held July 29, 2009, stockholders approved the 2009 Incentive Stock Plan (the "Plan"), which includes the Director Stock Unit Program (the "Program"). Following the shareholder meeting at which the Plan was approved, the Board of Director's Compensation Committee approved an amendment to the 2009 Incentive Stock Plan. The amendment to the 2009 Incentive Stock Plan changes the percentage that each director is required to defer in fees each calendar year from a minimum of 50% to a minimum of 100%. The deferred fees will be converted into stock unit grants at the average of the fair market value for a share of stock for the 10 trading days before the date the director fees otherwise would have been payable in cash. The Company makes a matching Stock Unit contribution equal to 75% of the amount deferred by the directors as of the same quarterly payments dates.

The Compensation Committee also recommended to the Board of Directors an increase in the annual fee for outside directors from \$35,000 to \$50,000. The last time the fee was increased was in 2006. The Board of Directors approved the recommended increase.

The management director is required to participate in the deferral program and the amendment described above applies to his participation as well. The President and CEO, as a management director, receives no additional cash compensation for his service as a director. The Company reduces the CEO's annual salary by the amount deferred under the Director Stock Unit Program. The Company matches deferrals by the management director with Stock Units at the same rate as it matches deferrals for non-management directors.

Stock under this program is eligible for delivery five calendar years following the year for which the deferral is made subject to acceleration upon the resignation or retirement of the director or a change in control.

All of the Company's non-management directors agreed to defer 100% of the annual board fee for both 2009 and 2008, and the Company's chief executive officer agreed to defer a corresponding amount of his salary in 2009 and 2008. During the first nine months of 2009, fees, salary and Company matching deferred by the directors represented a total of 84,021 stock unit grants valued at \$3.83 per stock unit. During the first nine months of 2008, fees, salary and Company matching deferred by the directors represented a total of 62,353 stock unit grants valued at \$4.91 per stock unit. Company matching contributions under this plan were \$138,000 and \$131,000 in the first nine months of 2009 and 2008 respectively.

Note 3.

Earnings Per Common Share

Basic earnings per common share for the periods presented are computed based upon the weighted average number of shares outstanding. Diluted earnings per common share for the periods presented are based on the weighted average shares outstanding, adjusted for the assumed exercise of stock options, for non-vested shares and warrants issued for the subordinated debt using the treasury stock method.

Three Months Ended September 30	Number of Shares	
	2009	2008
Basic	15,957,053	16,325,579
Diluted	16,593,091	17,034,747

Nine Months Ended September 30	Number of Shares	
	2009	2008
Basic	15,848,121	16,356,193
Diluted	16,455,848	17,023,924

There were no options priced higher than the share market value at September 30, 2009.

Note 4.

Credit Agreement

On July 17, 2009, the Company entered into a new credit agreement between the Company and its subsidiary North American Galvanizing Company as borrowers and Wells Fargo Bank, N.A. as administrative agent, swing line lender and letter of credit issuer. The existing credit agreement with Bank of America, N.A. was canceled.

The new credit agreement provides for a revolving credit facility in the aggregate principal amount of \$25 million with future increases of up to an aggregate principal amount of \$15 million. The purpose of the new facility is to refinance a former credit agreement, provide for issuance of standby letters of credit, provide funding for acquisitions, and for other general corporate purposes. As of September 30, 2009, the Company has not borrowed under the new credit agreement, which has a maturity date of July 17, 2012.

Substantially all of the Company's accounts receivable, inventories, fixed assets and the common stock of its subsidiary are pledged as collateral under the new agreement, and the credit agreement is secured by full and unconditional guaranties from North American Galvanizing Company's subsidiaries. The credit agreement provides for an applicable margin ranging from 1.50% to 2.50% over LIBOR and a commitment fee of .25%. The applicable margin was 1.50% at September 30, 2009.

The credit agreement requires the Company to maintain compliance with certain covenants. At September 30, 2009 the Company was in compliance with the covenants of the new credit agreement. The required covenants of the new agreement are as follows: Funded Debt to EBITDA ratio – maximum allowed of 3.25; Fixed Charge Coverage Ratio – minimum allowed of 1.1 and Asset Coverage Ratio – minimum required of 1.50. The credit agreement also has other restrictions.

At September 30, 2009, the Company had unused borrowing capacity of \$25.0 million, based on no borrowings outstanding under the revolving credit facility.

Note 5.

Commitments and Contingencies

The Company has commitments with domestic and foreign zinc producers and brokers to purchase zinc used in its hot dip galvanizing operations. Commitments for the future delivery of zinc reflect rates then quoted on the London Metals Exchange and are not subject to price adjustment or are based on such quoted prices at the time of delivery. At September 30, 2009 the aggregate commitments for the procurement of zinc at fixed prices were approximately \$0.1 million. The Company reviews these fixed price contracts for losses using the same methodology employed to estimate the market value of its zinc inventory. The Company had no unpriced commitments for zinc purchases at September 30, 2009.

The Company's financial strategy includes evaluating the selective use of derivative financial instruments to manage zinc and interest costs. As part of its inventory management strategy, the Company expects to continue evaluating hedging instruments to minimize the impact of zinc price fluctuations. The Company had no derivative instruments required to be reported at fair value at September 30, 2009 or December 31, 2008, and did not utilize derivatives in the nine-month period ended September 30, 2009 or the year ended December 31, 2008, except for the forward purchase agreements described above, which are accounted for as normal purchases.

The Company's total off-balance sheet contractual obligations at September 30, 2009, consist of approximately \$1.4 million for long-term operating leases for vehicles, office space, office equipment, galvanizing facilities and galvanizing equipment and approximately \$0.1 million for zinc purchase commitments. The various leases for galvanizing facilities, including option renewals, expire from 2009 to 2023. At September 30, 2009 the Company has approximately \$1.0 million in outstanding purchase commitments for various machinery, equipment and building improvements and \$1.3 million in outstanding commitments for other operating obligations.

NAGC was notified in 1997 by the Illinois Environmental Protection Agency ("IEPA") that it was one of approximately 60 potentially responsible parties under the Comprehensive Environmental Response, Compensation, and Liability Information System ("CERCLIS") in connection with cleanup of an abandoned site formerly owned by Sandoval Zinc Co., an entity unrelated to NAGC. The IEPA notice includes NAGC as one of the organizations which arranged for the treatment and disposal of hazardous substances at Sandoval. The estimated timeframe for resolution of the IEPA contingency is unknown. The IEPA has yet to respond to a proposed work plan submitted in August 2000 by a group of the potentially responsible parties or suggest any other course of action, and there has been no activity in regards to this issue since 2001. Until the work plan is approved and completed, the range of potential loss or remediation, if any, is unknown, and in addition, the allocation of potential loss between the 60 potentially responsible parties is unknown and not reasonably estimable. Therefore, the Company has no basis for determining potential exposure and estimated remediation costs at this time and no liability has been accrued.

In September 2008, the United States Environmental Protection Agency (the "EPA") notified the Company of a claim against the Company as a potentially responsible party related to a Superfund site in Texas City, Texas. This matter pertains to galvanizing facilities of a Company subsidiary and its disposal of waste, which was handled by their supplier in the early 1980's. The EPA offered the Company a special de minimis party settlement to resolve potential liability that the Company and its subsidiaries may have under CERCLA at this Site. The Company accrued the \$112,145 de minimis settlement amount during the third quarter of 2008 and accepted the EPA's offer before the deadline of December 30, 2008.

The Company is committed to complying with all federal, state and local environmental laws and regulations and using its best management practices to anticipate and satisfy future requirements. As is typical in the galvanizing business, the Company will have additional environmental compliance costs associated with past, present and future operations. Management is committed to discovering and eliminating environmental issues as they arise. Because of frequent changes in environmental technology, laws and regulations management cannot reasonably quantify the Company's potential future costs in this area.

North American Galvanizing & Coatings, Inc. and its subsidiary are parties to a number of other lawsuits and environmental matters which are not discussed herein. Management of the Company, based upon their analysis of known facts and circumstances and reports from legal counsel, does not believe that any such matter will have a material adverse effect on the results of operations, financial condition or cash flows of the Company.

Note 6. Stockholders' Equity

During the second quarter 2009, the holders of a majority of the outstanding shares of common stock of North American Galvanizing & Coatings, Inc. (the "Company") provided written consent approving an amendment to the Company's Restated Certificate of Incorporation, as amended, pursuant to the Company's consent solicitation authorized by the Company's Board of Directors. Through the written consent, the holders of a majority of the outstanding shares of the Company's common stock approved an increase in the number of authorized shares of the Company's common stock from 18,000,000 shares to 25,000,000 shares.

The Company filed a Certificate of Amendment of the Restated Certificate of Incorporation, as amended, with the Secretary of State of Delaware on April 2, 2009, which provides that the aggregate number of shares of the Company's common stock which the Company shall have authority to issue is 25,000,000 shares.

Shareholders at the Company's Annual Meeting on July 29, 2009 approved a proposal to increase the number of authorized shares of the Company's common stock from 25,000,000 shares to 50,000,000 shares.

Note 7. Subordinated Debt

On August 18, 2009, the Company accepted subscription agreements for \$7.3 million in subordinated debt with stock warrants to purchase 1,095,000 shares of common stock of the Company. The private placement transaction was completed August 21, 2009. \$3.1 million of the proceeds has been allocated to the stock warrants and the resulting discount on subordinated debt is being amortized to interest expense using the effective interest method. The purpose of this additional financing is to facilitate the Company's growth strategy. The private placement was offered to a group of current large shareholders and a limited number of other accredited investors who had expressed an interest in investing in the Company. The 10% subordinated notes have a five year maturity and the warrants are immediately exercisable, for a period of up to seven years. Terms of the warrants permit the holder to purchase shares of the Company's common stock at any time prior to the expiration date, for cash at an Exercise Price of \$5.20 per share (market value of common stock at date subscription was accepted). As of September 30, 2009 no warrants had been exercised.

North American Galvanizing & Coatings, Inc.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

GENERAL

North American Galvanizing is a leading provider of corrosion protection for iron and steel components fabricated by its customers. Hot dip galvanizing is the process of applying a zinc coating to fabricated iron or steel material by immersing the material in a bath consisting primarily of molten zinc. Based on the number of its operating plants, the Company is one of the largest merchant market hot dip galvanizing companies in the United States.

During the nine-month period ended September 30, 2009, there were no significant changes to the Company's critical accounting policies previously disclosed in Form 10-K for the year ended December 31, 2008.

The Company's galvanizing plants offer a broad line of services including centrifuge galvanizing for small threaded products, sandblasting, chromate quenching, polymeric coatings, and proprietary INFRASHIELDSM Coating Application Systems for polyurethane protective linings and coatings over galvanized surfaces. The Company's mechanical and chemical engineers provide customized assistance with initial fabrication design, project estimates and steel chemistry selection.

The Company's galvanizing and coating operations are composed of eleven facilities located in Colorado, Kentucky, Missouri, Ohio, Oklahoma, Tennessee, Texas and West Virginia. The West Virginia facility began operating in the second quarter, 2009. These facilities operate galvanizing kettles ranging in length from 16 feet to 62 feet, and have lifting capacities ranging from 12,000 pounds to 40,000 pounds.

The Company maintains a sales and service network coupled with its galvanizing plants, supplemented by national account business development at the corporate level. In 2008, the Company galvanized steel products for approximately 1,800 customers nationwide.

All of the Company's sales are generated for customers whose end markets are principally in the United States. The Company markets its galvanizing and coating services directly to its customers and does not utilize agents or distributors. Although hot dip galvanizing is considered a mature service industry, the Company is actively engaged in developing new markets through participation in industry trade shows, metals trade associations and presentation of technical seminars by its national marketing service team.

Hot dip galvanizing provides metals corrosion protection for many product applications used in commercial, construction and industrial markets. The Company's galvanizing can be found in almost every major application and industry that requires corrosion protection where iron or steel is used, including the following end user markets:

- highway and transportation
- power transmission and distribution
- wireless and telecommunications
 - utilities
- petrochemical processing
 - industrial grating
- infrastructure including buildings, airports, bridges and power generation
 - wastewater treatment
- fresh water storage and transportation

- pulp and paper
- pipe and tube
- food processing
- agricultural (irrigation systems)
- recreation (boat trailers, marine docks, stadium scaffolds)
 - bridge and pedestrian handrail
 - commercial and residential lighting poles
- original equipment manufactured products, including general fabrication.

As a value-added service provider, the Company's revenues are directly influenced by the level of economic activity in the various end markets that it serves. Economic activity in those markets that results in the expansion and/or upgrading of physical facilities (i.e., construction) may involve a time-lag factor of several months before translating into a demand for galvanizing fabricated components. Despite the inherent seasonality associated with large project construction work, the Company maintains a relatively stable revenue stream throughout the year by offering fabricators, large and small, reliable and rapid turn-around service.

The Company records revenues when the galvanizing processes and inspection utilizing industry-specified standards are completed. The Company generates all of its operating cash from such revenues, and utilizes a line of credit secured by the underlying accounts receivable and zinc inventory to facilitate working capital needs.

Each of the Company's galvanizing plants operate in a highly competitive environment underscored by pricing pressures, primarily from other public and privately-owned galvanizers and alternative forms of corrosion protection, such as paint. The Company's long-term response to these challenges has been a sustained strategy focusing on providing a reliable quality of galvanizing to standard industry technical specifications and rapid turn-around time on every project, large and small. Key to the success of this strategy is the Company's continuing commitment and long-term record of reinvesting earnings to upgrade its galvanizing facilities and provide technical innovations to improve production efficiencies; and to construct new facilities when market conditions present opportunities for growth. The Company is addressing long-term opportunities to expand its galvanizing and coatings business through programs to increase industry awareness of the proven, unique benefits of galvanizing for metals corrosion protection. Each of the Company's galvanizing plants is linked to a centralized system involving sales order entry, facility maintenance and operating procedures, quality assurance, purchasing and credit and accounting that enable the plant to focus on providing galvanizing and coating services in the most cost-effective manner.

The principal raw materials essential to the Company's galvanizing and coating operations are zinc and various chemicals which are normally available for purchase in the open market.

Key Indicators

Key industries which historically have provided the Company some indication of the potential demand for galvanizing in the near-term, (i.e., primarily within a year) include highway and transportation, power transmission and distribution, telecommunications and the level of quoting activity for regional metal fabricators. In general, growth in the commercial/industrial sectors of the economy generates new construction and capital spending which ultimately impacts the demand for galvanizing.

Key operating measures utilized by the Company include new orders, zinc inventory, tons of steel galvanized, revenue, pounds and labor costs per hour, zinc usage related to tonnage galvanized, and lost-time safety performance. These measures are reported and analyzed on various cycles, including daily, weekly and monthly.

The Company utilizes a number of key financial measures to evaluate the operations at each of its galvanizing plants, to identify trends and variables impacting operating productivity and current and future business results,

which include: return on capital employed, sales, gross profit, fixed and variable costs, selling and general administrative expenses, operating cash flows, capital expenditures, interest expense, and a number of ratios such as profit from operations and accounts receivable turnover. These measures are reviewed by the Company's operating and executive management each month, or more frequently, and compared to prior periods, the current business plan and to standard performance criteria, as applicable.

RESULTS OF OPERATIONS

The following table shows the Company's results of operations for the three- and nine-month periods ended September 30, 2009 and 2008:

	(Dollars in thousands)					
	2009		Three Months Ended September 30, 2008			
	Amount	% of Sales		Amount	% of Sales	
Sales	\$ 20,051	100.0 %		\$ 21,845	100.0 %	
Cost of sales excluding depreciation and amortization	12,944	64.6 %		13,879	63.5 %	
Selling, general and administrative expenses	2,182	10.9 %		2,699	12.4 %	
Depreciation and amortization	972	4.8 %		847	3.9 %	
Operating income	3,953	19.7 %		4,420	20.2 %	
Interest expense	(128)	-0.6 %		—	0.0 %	
Interest income	5	0.0 %		70	0.4 %	
Income before income taxes	3,830	19.1 %		4,490	20.6 %	
Income tax expense	1,255	6.3 %		1,453	6.7 %	
Net income	\$ 2,575	12.8 %		\$ 3,037	13.9 %	

	(Dollars in thousands)					
	2009		Nine Months Ended September 30, 2008			
	Amount	% of Sales		Amount	% of Sales	
Sales	\$ 58,803	100.0 %		\$ 64,525	100.0 %	
Cost of sales excluding depreciation and amortization	36,311	61.8 %		39,656	61.4 %	
Selling, general and administrative expenses	7,351	12.5 %		7,548	11.7 %	
Depreciation and amortization	2,743	4.7 %		2,556	4.0 %	
Operating income	12,398	21.0 %		14,765	22.9 %	
Interest expense	(128)	-0.1 %		—	0.0 %	
Interest income	24	0.0 %		217	0.3 %	
Income before income taxes	12,294	20.9 %		14,982	23.2 %	
Income tax expense	4,038	6.9 %		5,447	8.4 %	
Net income	\$ 8,256	14.0 %		\$ 9,535	14.8 %	

2009 COMPARED TO 2008

Sales. Third quarter 2009 volumes were 2.7% higher than volumes in the third quarter of 2008. First nine months' 2009 volumes were 5.6% higher than volumes in the first nine months of 2008. Third quarter 2008 volume was negatively impacted by the nine day shutdown of the Company's Houston, Texas plant due to Hurricane Ike.

Sales for the three-months and nine-months ended September 30, 2009 decreased 8.2% and 8.9%, respectively, over the prior year. The decrease in third quarter and first nine month revenues was due primarily to a lower average sales price compared to the same periods in 2008. Due to the economic downturn and anticipated drop in overall demand for hot-dip galvanizing, the Company focused on gaining larger volume work which resulted in lower priced project work in recent months. For 2009, average selling prices for galvanizing and related coating services were 10.7% lower than the prior year third quarter and 13.7% lower than the first nine months of 2008.

Cost of Goods Sold. Cost of goods sold for the three-months ended September 30, 2009 decreased \$1.0 million over the same prior year period due to a decrease in zinc and utility costs. For the first nine months of 2009, cost of goods sold decreased \$3.4 million over the same period in 2008 due primarily to decreases in zinc and utility costs, offset by increases in repairs and maintenance spending of \$0.4 million.

Selling, General and Administrative (SG&A) Expenses. SG&A decreased \$0.5 million in the third quarter of 2009 compared to the same prior year period due to decreases in legal fees. SG&A expenses for the first nine months of 2009 decreased \$0.2 million over the same prior year period.

Interest Expense. Interest expense of \$0.1 million was recorded in the third quarter of 2009 due to the issuance of \$7.3 million in subordinated notes.

Operating Income. For the quarter ended September 30, 2009, operating income was \$4.0 million compared to \$4.4 million for the third quarter of 2008. The operating income for the nine-months ended September 30, 2009 was \$12.4 million compared to \$14.8 million for the same 2008 period. The decrease in operating income is primarily due to a decrease in average selling prices.

Income Taxes. The Company's effective income tax rates for the third quarter of 2009 and 2008 were 32.8% and 32.4%, respectively. For the nine months ended September 30, 2009 and 2008, the effective tax rates were 32.8% and 36.4%, respectively. The effective tax rates differ from the federal statutory rate primarily due to state income taxes and minor adjustments to previous tax estimates.

Net Income. For the third quarter of 2009, the Company reported net income of \$2.6 million compared to net income of \$3.0 million for the third quarter of 2008. For the nine months ended September 30, 2009, the net income was \$8.3 million compared to \$9.5 million for the nine months ended September 30, 2008. The decrease in net income is primarily due to a decrease in average selling prices.

LIQUIDITY AND CAPITAL RESOURCES

The Company's cash flow from operations and borrowings under credit facilities have been adequate to fund its current facilities' working capital and capital spending requirements and is expected to be sufficient to fund the recurring level of operations for the next twelve months. During 2009 and 2008, operating cash flow has been the primary source of liquidity. The Company monitors working capital and planned capital spending to assess liquidity and minimize cyclical cash flow.

On June 25, 2009, the Company announced that its Board of Directors had approved a new capital and funding structure designed to facilitate the Company's growth strategy. The Company's new capital and funding structure consists of a combination of an expanded bank facility (see Note 4) and a capital raise through a private placement offering of subordinated notes and warrants (see Note 7). The private placement transaction for \$7.3 million was completed August 21, 2009.

Cash from operations decreased \$0.1 million in the first nine months of 2009 versus the first nine months of 2008. The lower net income in 2008 and the increase in inventory were offset by the positive effect from receivables, deferred income taxes and share based compensation.

Capital expenditures for the first nine months of 2009 were \$8.0 million. Expenditures in the first nine months of 2009 include the construction of the new facility in Benwood, West Virginia (\$3.5 million) and upgrading facilities at the Hurst, Texas plant (\$3.6 million). In the first nine months of 2008, the Company spent \$2.1 million for capital expenditures.

During the first nine months of 2009 and 2008, the company repurchased common stock for the treasury totaling \$0.2 million and \$3.4 million, respectively. The Company has no outstanding bank debt as of September 30, 2009.

The Company has various commitments primarily related to vehicle and equipment operating leases, facilities operating leases, and zinc purchase commitments. The Company's off-balance sheet contractual obligations at September 30, 2009, consist of \$1.4 million for long-term operating leases for vehicles, office space, office equipment, galvanizing facilities and galvanizing equipment and approximately and approximately \$0.1 million for zinc purchase commitments. In addition, at September 30, 2009 the Company has approximately \$1.0 million in outstanding purchase commitments for various machinery, equipment and building improvements and \$1.3 million in outstanding commitments for other operating obligations. The various leases for galvanizing facilities, including option renewals, expire from 2009 to 2023. The vehicle leases expire annually on various schedules through 2012. NAGC periodically enters into fixed price purchase commitments with domestic and foreign zinc producers to purchase a portion of its requirements for its hot dip galvanizing operations; commitments for the future delivery of zinc can be for up to one year.

ENVIRONMENTAL MATTERS

The Company's facilities are subject to extensive environmental legislation and regulations affecting their operations and the discharge of wastes. The cost of compliance with such regulations in the first nine months of 2009 and 2008 was approximately \$1.4 million and \$1.3 million, respectively, for the disposal and recycling of wastes generated by the galvanizing operations.

NAGC was notified in 1997 by the Illinois Environmental Protection Agency ("IEPA") that it was one of approximately 60 potentially responsible parties under the Comprehensive Environmental Response, Compensation, and Liability Information System ("CERCLIS") in connection with cleanup of an abandoned site formerly owned by Sandoval Zinc Co., an entity unrelated to NAGC. The IEPA notice includes NACG as one of the organizations which arranged for the treatment and disposal of hazardous substances at Sandoval. The estimated timeframe for resolution of the IEPA contingency is unknown. The IEPA has yet to respond to a proposed work plan submitted in August 2000 by a group of the potentially responsible parties or suggest any other course of action, and there has been no activity in regards to this issue since 2001. Until the work plan is approved and completed, the range of potential loss or remediation, if any, is unknown, and in addition, the allocation of potential loss between the 60 potentially responsible parties is unknown and not reasonably estimable. Therefore, the Company has no basis for determining potential exposure and estimated remediation costs at this time and no liability has been accrued.

In September 2008, the United States Environmental Protection Agency (the "EPA") notified the Company of a claim against the Company as a potentially responsible party related to a Superfund site in Texas City, Texas.

This matter pertains to galvanizing facilities of a Company subsidiary and its disposal of waste, which was handled by their supplier in the early 1980's. The EPA offered the Company a special de minimis party settlement to resolve potential liability that the Company and its subsidiaries may have under CERCLA at this Site. The Company accrued the \$112,145 de minimis settlement amount during the third quarter of 2008 and accepted the EPA's offer before the deadline of December 30, 2008.

The Company is committed to complying with all federal, state and local environmental laws and regulations and using its best management practices to anticipate and satisfy future requirements. As is typical in the galvanizing business, the Company will have additional environmental compliance costs associated with past, present and future operations. Management is committed to discovering and eliminating environmental issues as they arise. Because of frequent changes in environmental technology, laws and regulations management cannot reasonably quantify the Company's potential future costs in this area.

North American Galvanizing & Coatings, Inc. and its subsidiary are parties to a number of other lawsuits and environmental matters which are not discussed herein. Management of the Company, based upon their analysis of known facts and circumstances and reports from legal counsel, does not believe that any such matter will have a material adverse effect on the results of operations, financial conditions or cash flows of the Company.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company's operations include managing market risks related to changes in interest rates and zinc commodity prices.

Interest Rate Risk. The Company is exposed to financial market risk related to changes in interest rates to the extent the company has borrowing outstanding. At September 30, 2009, the Company had no outstanding debt.

Zinc Price Risk. NAGC periodically enters into fixed price purchase commitments with domestic and foreign zinc producers to purchase a portion of its zinc requirements for its hot dip galvanizing operations. Commitments for the future delivery of zinc, which can be for up to one (1) year, reflect rates quoted on the London Metals Exchange. At September 30, 2009, the aggregate fixed price commitments for the procurement of zinc were approximately \$0.1 million (note 5). With respect to these zinc fixed price purchase commitments, a hypothetical decrease of 10% in the market price of zinc from the September 30, 2009 level represented a potential lost gross margin opportunity of approximately \$10,000.

The Company's financial strategy includes evaluating the selective use of derivative financial instruments to manage zinc and interest costs. As part of its inventory management strategy, the Company recognizes that hedging instruments may be effective in minimizing the impact of zinc price fluctuations. The Company's current zinc forward purchase commitments are considered derivatives, but the Company has elected to account for these purchase commitments as normal purchases.

Item 4. Controls and Procedures

As of the end of the period covered by this report, management, including our chief executive officer and chief financial officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures. Based upon, and as of the date of, the evaluation, our chief executive officer and chief financial officer concluded that the disclosure controls and procedures were effective, in all material respects, to ensure that information required to be disclosed in the reports we file and submit under the Exchange Act is recorded, processed, summarized and reported as and when required.

The Company's certifying officers have indicated that there were no significant changes in internal controls over financial reporting that have occurred during the fiscal quarter ended September 30, 2009 that materially affected, or

were reasonably likely to materially affect, internal controls over financial reporting.

- 19 -

Part II Other Information

Item 1. Legal Proceedings.

NAGC was notified in 1997 by the Illinois Environmental Protection Agency (“IEPA”) that it was one of approximately 60 potentially responsible parties under the Comprehensive Environmental Response, Compensation, and Liability Information System (“CERCLIS”) in connection with cleanup of an abandoned site formerly owned by Sandoval Zinc Co., an entity unrelated to NAGC. The IEPA notice includes NACG as one of the organizations which arranged for the treatment and disposal of hazardous substances at Sandoval. The estimated timeframe for resolution of the IEPA contingency is unknown. The IEPA has yet to respond to a proposed work plan submitted in August 2000 by a group of the potentially responsible parties or suggest any other course of action, and there has been no activity in regards to this issue since 2001. Until the work plan is approved and completed, the range of potential loss or remediation, if any, is unknown, and in addition, the allocation of potential loss between the 60 potentially responsible parties is unknown and not reasonably estimable. Therefore, the Company has no basis for determining potential exposure and estimated remediation costs at this time and no liability has been accrued.

In September 2008, the United States Environmental Protection Agency (the “EPA”) notified the Company of a claim against the Company as a potentially responsible party related to a Superfund site in Texas City, Texas.

This matter pertains to galvanizing facilities of a Company subsidiary and its disposal of waste, which was handled by their supplier in the early 1980’s. The EPA offered the Company a special de minimis party settlement to resolve potential liability that the Company and its subsidiaries may have under CERCLA at this Site. The Company accrued the \$112,145 de minimis settlement amount during the third quarter of 2008 and accepted the EPA’s offer before the deadline of December 30, 2008.

Item 1A. Risk Factors.

There are no material changes from risk factors as previously disclosed in the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2008 and the Company’s Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2009.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds – Not applicable.

Item 3. Defaults Upon Senior Securities – Not applicable.

Item 4. Submission of Matters to a Vote of Security Holders

During the second quarter 2009, the holders of a majority of the outstanding shares of common stock of North American Galvanizing & Coatings, Inc. (the “Company”) provided written consent approving an amendment to the Company’s Restated Certificate of Incorporation, as amended, pursuant to the Company’s consent solicitation authorized by the Company’s Board of Directors. Through the written consent, the holders of a majority of the outstanding shares of the Company’s common stock approved an increase in the number of authorized shares of the Company’s common stock from 18,000,000 shares to 25,000,000 shares.

The Company filed a Certificate of Amendment of the Restated Certificate of Incorporation, as amended, with the Secretary of State of Delaware on April 2, 2009, which provides that the aggregate number of shares of the Company’s common stock which the Company shall have authority to issue is 25,000,000 shares.

Edgar Filing: NORTH AMERICAN GALVANIZING & COATINGS INC - Form 10-Q

Shareholders at the Company's Annual Meeting on July 29, 2009 reelected seven incumbent directors, Linwood J. Bundy, Ronald J. Evans, Janice K. Henry, Gilbert L. Klemann, II, Patrick J. Lynch, Joseph J. Morrow, and John H. Sununu. Of the 14,686,139 shares represented at the meeting, 14,462,850 shares (98.5%) were voted for Mr. Bundy, 14,497,148 (98.7%) were voted for Mr. Evans, 14,497,905 (98.7%) were voted for Ms. Henry, 14,499,244 (98.7%) were voted for Mr. Klemann, 14,453,822 (98.4%) were voted for Mr. Lynch, 14,439,701 (98.3%) were voted for Mr. Morrow, and 14,461,728 (98.5%) were voted for Gov. Sununu. A proposal to ratify the appointment of Deloitte & Touche LLP as the independent registered public accounting firm of the Company for 2009 was adopted, with 14,619,725 votes cast for, 31,923 votes cast against and 34,491 votes abstained. A proposal to increase the number of authorized shares of the Company's common stock from 25,000,000 shares to 50,000,000 shares was approved with 13,122,478 votes cast for, 1,510,959 votes cast against and 52,702 votes abstained. In addition, a proposal to adopt the 2009 Incentive Stock Plan was approved with 7,558,382 votes cast for, 3,215,434 votes cast against and 121,561 votes abstained. The terms of the Incentive Stock Plan were set forth in the Company's proxy statement filed with the Securities and Exchange Commission on June 16, 2009.

Item 5. Other Information – Not applicable.

Item 6. Exhibits

No. Description

3.1 The Company's Restated Certificate of Incorporation, as amended (incorporated by reference to Exhibit 3.1 to the Company's Pre-Effective Amendment No. 1 to Registration Statement on Form S-3 (Reg. No. 333-4937) filed with the Commission on June 7, 1996).

3.2 The Company's Amended and Restated Bylaws (incorporated by reference to Exhibit 3.1 to the Company's Quarterly Report on Form 10-Q dated June 30, 1996).

15 Awareness Letter of Deloitte & Touche LLP.

31.1 Certification pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32 Certifications pursuant to 18 U.S.C. Section 1350, as adopted by Section 906 of the Sarbanes-Oxley Act of 2002.

SIGNATURES

Pursuant to the requirements of Section 13 and 15(d) of the Securities and Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized:
