NEWS RELEASE November 14, 2003

Trading Symbol: AMM - TSX

Mr. Duane Poliquin, President, announces the appointment of Donald M. Lorimer to the board of Director of Almaden Minerals Ltd.

Mr. Lorimer qualified as a Chartered Accountant with Price Waterhouse & Co. and subsequently was a financial executive with the Patino Mining Corporation and Little Long Lac Gold Mines Ltd. In 1971 he joined A.E. Ames & Co. and on his transfer to Vancouver became a director and vice president responsible for corporate and government underwriting in British Columbia. He is currently a portfolio manager with Odlum Brown Ltd.

Mr. Lorimer's experience will permit Almaden to fulfil the requirements of proposed new regulations regarding Corporate Compliance and Audit Committees.

Almaden is an exploration stage company engaged in the acquisition, exploration and development of minerals properties of merit in Canada, United States and Mexico.

For additional information, please contact Duane Poliquin, President (604) 689-7644.

ON BEHALF OF THE BOARD OF DIRECTORS

ADuane Poliquin@

Duane Poliquin, President

NEWS RELEASE November 21, 2003

Trading Symbol: AMM -TSX

Progress Report on the El Pulpo Project, Mexico

The El Pulpo property is located north-east of Mazatlan and covers an area of approximately 200 square kilometres. Almaden Minerals Ltd. (Almaden) has optioned this property to Ross River Minerals Ltd. (Ross River) who can earn a 60% interest by spending US\$3,000,000 and issuing 425,000 shares to Almaden. The property was staked by Almaden to cover two known copper-gold porphyry targets and three high grade gold vein targets including the Papaya and La Trucha zones. Work to date by Ross River has focussed on the high grade gold vein targets and has expanded mineralisation previously known and identified by Almaden over a surface area in excess of 12 square kilometres.

Ross River recently has informed Almaden that it has discovered a new area of porphyry style alteration and mineralization. Ross River has released the results of the initial findings of this work in a news release, an excerpt from which follows:

"Ross River Minerals has discovered a new copper porphyry zone and extended the known mineralized zones of both the Papaya and La Trucha targets on its El Pulpo property in Mexico. To date, the company has identified three copper porphyry targets and four gold-silver-copper vein targets on the 200-square-kilometre property.

A new area, named the Langosta target, consisting of strong quartz-sericite-pyrite (phyllic) alteration with stockwork quartz veining, has been identified extending southward along a tributary creek (Quebrada Magistral) 2,000 metres east of the Papaya target, approximately 2,500 metres southwest of La Cetolla copper porphyry target and 600 metres northeast from the El Bagre copper target on Rio Los Frailes. Phyllic alteration is observed, to date, on the north side of Rio Los Frailes over a distance of 100 metres and over a distance of 150 metres on the south side of Rio Los Frailes. This alteration extends outward from a core of potassic alteration consisting of secondary biotite and potassium feldspar and minor magnetite over a distance of 210 metres in a southerly direction. These two styles of alteration characteristic of porphyry systems are hosted within an altered granodiorite to quartz-diorite intrusive complex.

Copper mineralization observed along Quebrada Magistral, within the altered granodiorite to quartz-diorite, consists of veinlets, disseminations and clusters of chalcopyrite (approximately 5 to 10 per cent). At higher elevations within this mineralized area, clusters of arsenopyrite mineralization (approximately 1 to 5 per cent) have also been identified. Secondary copper oxides within this area consist of malachite and black copper oxides. The extent of the mineralized area mapped so far measures approximately 100 metres (north to south direction) and 75 metres (east to west direction) and remains open in all directions. A total of 25 panel and chip samples have been taken from this area and analytical results are pending. Geologic mapping and sampling are continuing to determine the dimension and grade of this altered and mineralized porphyry system. Samples are being prepared at GM-Lacme Laboratories in Guadalajara, Mexico, with final analyses being carried out by Acme Analytical Laboratories Ltd. in Vancouver, B.C. Victor Jaramillo, P. Geo, is the qualified person supervising the work in this area."

Ross River has also informed Almaden that it has commenced a program of trenching on the El Pulpo Property to better define targets for a drilling program.

Almaden currently has ten active joint ventures covering 12 properties, including six properties in which partners are spending to earn an interest in the project and a regional exploration program with partner BHP Billiton underway to explore for copper-gold deposits in Mexico.

ON BEHALF OF THE BOARD OF DIRECTORS

NEWS RELEASE November 27, 2003

Trading Symbol: AMM -TSX

www.almadenminerals.com

THIRD QUARTER RESULTS TO NOVEMBER 30, 2003

A 6570 metre drill program was recently completed on our Siwash Gold Property. Assay results are awaited. These and the 2002 results will be used with previous data for a new resource estimate. The mill purchased by the Company is now in a storage yard near the property. Water sampling was carried out in anticipation of dewatering the underground workings on the Siwash B zone.

Expatriate Resources Ltd. have announced an economic evaluation of production from our Logan zinc-silver property by blending this material with material from their Wolverine property. Almaden is carried for a 40 % interest in the Logan property until a positive production decision is made.

The Company is planning a ground geophysical program to include gravity, magnetic and electromagnetic survey method, on our ATW diamond project in the NWT. This program should help in identifying targets for a drill program planned for early 2004.

Our ongoing exploration for gold in British Columbia resulted in the discovery of several highly anomalous gold bearing quartz vein occurrences found both as float and in bedrock. Two new blocks of claims were acquired by staking to cover the areas identified. The results of this program are being evaluated in anticipation of a spring work program in 2004.

There was considerable exploration activity in Mexico over the past quarter, both by the Company's joint venture partners and in the form of regional exploration. The regional exploration has been focused on identifying new gold and copper-gold projects both within an area of mutual interest as a part of a joint venture with BHP Billiton, and wholly by Almaden outside of this area.

Grid Capital Corp. has optioned the Galeana gold-silver project in Chihuahua State from Almaden. Grid completed a program of geologic mapping, sampling and geophysics which identified several mineralized epithermal quartz adularia vein systems. Grid has informed the Company that a diamond drill program designed to test targets identified by this program will commence in January 2004.

The Caballo Blanco project, located in Veracruz State, has been optioned to Comaplex Minerals Ltd. (Comaplex) who have completed two phases of exploration work which included geologic and alteration mapping, sampling and induced polarization geophysics. This work has resulted in the identification of two separate areas of alteration typical of that found in high-sulphidation epithermal gold systems. Comaplex has informed Almaden that it is planning a drill program to test both areas in early 2004. Almaden has received reports from Comaplex describing the results of their 2003 work program to date.

The El Pulpo Project, located in Sinaloa State, has been optioned to Ross River Minerals Inc. (Ross River) and covers several areas of gold-copper-silver mineralisation. Ross River has completed a program of geologic mapping and sampling which was successful in defining two areas of porphyry-style copper gold mineralization and two extensive gold-copper-silver vein systems. Over the past quarter Ross River acquired permits to trench and drill these areas and a program of trenching is presently underway. Ross River has informed Almaden that it has planned a program of induced polarization geophysics for January 2004 to be followed by a drill program to test the targets identified by the cumulative work. Ross River recently completed a financing to complete this work.

The BHP Billiton regional joint venture program, designed to identify copper-gold systems in a broad area of Mexico, will continue in 2004 with further work planned for the months ahead. During the past quarter two gold projects were identified, staked and offered to BHP Billiton for exploration.

The company continues to investigate new potential projects in western North America for acquisition.

During October 2003, the Company had a booth at the New Orleans Investment Conference. The Company engaged Roth Investor Relations Inc. on a temporary basis at a cost of US\$6,500 to raise the Company's profile with fund managers in the United States which included organizing a series of meetings with fund managers in New York City.

In November 2003, the Company appointed Mr. Donald M. Lorimer to the Board of Directors of the Company.

For the nine months ended September 30, 2003, the Company incurred a loss of \$759,090. The Company had no revenue from mineral properties and mineral tax credits received decreased. General and administrative expenses decreased mainly in professional fees due to the reduction of costs in Mexico, stock exchange fees with most fees being a cost of financing and reduced promotional activity. General exploration increased mainly due to the exploration undertaken in Mexico by the Company and by the joint venture with BHP. Mineral property write-downs and loss on marketable securities decreased with most properties and securities having been previously written down. The loss on foreign exchange increased due to the rising Canadian dollar. There was no sale of fixed assets during the period.

Cash used in operations was \$465,914 in the nine months. Cash of \$1,816,235 was provided by the issuance of shares and cash used in investing activities totalled \$555,836. The Company incurred \$223,733 of expenditures on the drill program on the Elk property during the period. Fixed asset expenditures increased mostly due to transporting the mill to storage.

At September 30, 2003, cash and cash equivalents totaled \$1,759,452 and working capital was \$1,832,684. Included in working capital is the Company's inventory of gold recorded at the cost of production, not market value, and a contingent liability in the event the Company is unsuccessful in its appeal of assessed additional mineral tax for prior years. Also included in working capital are excess funds received from BHP to be spent on further exploration in eastern Mexico. In the subsequent period, the Company completed a private placement financing for gross proceeds of \$188,738.

FORM 45-103F4

REPORT OF EXEMPT DISTRIBUTION

Issuer information

1.

ALMADEN MINERALS LTD.
1103 -750 WEST PENDER STREET
VANCOUVER, B.C. V6C2T8

2.

The Issuer is a reporting issuer in the jurisdiction of British Columbia, Alberta and Ontario.

Details of distribution

3.

The date of Distribution was October 28, 2003

4.

For each security distributed:

(a)

55,000 Units (55,000 flow-through common shares and 27,500 warrants), and 70,000 flow-through common shares.

(b)

55,000 Units at a price of \$1.50 per Unit, each Unit consisting of 1 flow-through common share and 1/2 non flow-through purchase warrant with each whole warrant entitling the holder to purchase one (1) common shares of the Company at a price of \$1.60 for one year. As well, 70,000 flow-through shares at a price of \$1.50 per share.

1.

See attached Schedule "A".

2.

Complete the following table for each Canadian and foreign jurisdiction where purchasers of the securities reside. Provide a total dollar value of all securities distributed in all jurisdictions. Do not include in this table, securities issued as payment for commissions or finder's fees disclosed under item 7, below.

Each jurisdiction where purchasers reside	Price per security (Canadian \$)	Total dollar value raised from purchasers in the jurisdiction (Canadian \$)
British Columbia	\$1.50	\$187,500.00
Total dollar value of distribution in all jurisdictions (Canadian \$)	\$1.50	\$187,500.00

Commissions and finder's fees

3.

Provide the following information for each person who is being compensated in connection with the distribution(s). When disclosing compensation paid or to be paid, include discounts, commissions or other fees or payments of a similar nature directly related to the distribution. Do not include payments for services incidental to the trade, such as clerical, printing, legal or accounting services.

{W:\general\35574\101-15\00038017.DOC}

Full name and address of person being compensated	Compensation paid (in Canadian \$ and, if applicable, number and type of securities)	Exemption relied on and date of distribution (if applicable)	Price per share (Canadian \$)
Odlum Brown Ltd. Suite 1100 -250 Howe St. Vancouver, B.C. V6C 3S9	3% commission paid in \$1,237.00 cash and 825 Units	MI 45-103 (5.1) October 28, 2003	\$1.50

CERTIFICATE

On behalf of the issuer (or vendor), I certify that the statements made in this report and in each schedule to this report are true.

Date: November 5, 2003

Third Quarter ended September 30, 2003

November 27, 2003

Description of Business

The Company is an exploration stage company engaged in the acquisition, exploration and when warranted, development of mineral properties in Canada, the United States, and Mexico. The Company's primary properties include the Elk property in British Columbia which includes the Siwash Gold deposit; the Caballo Blanco, Yago/La Sarda, El Pulpo and Galeana prospects, all located in Mexico. None of the Company's property interests are beyond advanced exploration stage. The Company is a reporting issuer in Ontario, British Columbia and Alberta and trades on the TSX under the symbol AMM.

Exploration Programs

Canadian Activities

Siwash - A drill program was recently completed on our Siwash Gold Property. A total of 6570 meters was completed in 30 holes. All drill core has now been split and submitted for fire assay with results expected soon. The results of this program and a drill program carried out in 2002 will be incorporated into a new and updated resource estimate for the Siwash project which is expected to be completed by year end. The mill purchased by the Company is now in a storage yard near Merritt, B.C. Water sampling was carried out in anticipation of dewatering the decline on the Siwash B zone.

Logan - Expatriate Resources Ltd. have announced an economic evaluation of production from our Logan zinc-silver property by blending this material with material from their Wolverine property. Rising metal prices continue to make this project look promising. Almaden is carried for a 40 % interest in the Logan property until a positive production decision is made.

ATW - The Company is planning a ground geophysical program to include gravity, magnetic and electromagnetic survey method, on our ATW diamond project in the NWT. This program should help in identifying targets for a drill program planned for early 2004.

Regional Exploration in British Columbia - Our ongoing exploration for gold in British Columbia resulted in the discovery of several highly anomalous gold bearing quartz vein occurrences found both as float and in bedrock. Two new blocks of claims were acquired by staking to cover the areas identified. The results of this program are being evaluated in anticipation of a spring work program in 2004.

Mexican Activities

There was considerable exploration activity in Mexico over the past quarter, both by the Company's joint venture partners and in the form of regional exploration. The regional exploration has been focused on identifying new gold and copper-gold projects both within an area of mutual interest as a part of a joint venture with BHP Billiton, and wholly by Almaden outside of this area.

Galeana Project - Grid Capital Corp. (Grid) has optioned the Galeana gold-silver project in Chihuahua State from Almaden. Grid completed a program of geologic mapping, sampling and geophysics which identified several mineralized epithermal quartz adularia vein systems. Grid has informed the Company that a diamond drill program designed to test targets identified by this program will commence in January 2004.

Caballo Blanco Project - This project, located in Veracruz State, has been optioned to Comaplex Minerals Ltd. (Comaplex) who have completed two phases of exploration work which included geologic and alteration mapping, sampling and induced polarization geophysics. This work has resulted in the identification of two separate areas of alteration typical of that found in high-sulphidation epithermal gold systems. Comaplex has informed Almaden that it is planning a drill program to test both areas in early 2004. Almaden has received reports from Comaplex describing the results of their 2003 work program to date.

El Pulpo Project - The El Pulpo Project, located in Sinaloa State, has been optioned to Ross River Minerals Inc. (Ross River) and covers several areas of gold-copper-silver mineralisation. Ross River has completed a program of geologic mapping and sampling which was successful in defining two areas of porphyry-style copper gold mineralization and two extensive gold-copper-silver vein systems. Over the past quarter Ross River acquired permits to trench and drill these areas and a program of trenching is presently underway. Ross River has informed Almaden that it has planned a program of induced polarization geophysics for January 2004 to be followed by a drill program to test the targets identified by the cumulative work. Ross River recently completed a financing to complete this work.

BHP Billiton Regional Joint Venture - This joint venture program, designed to identify copper-gold systems in a broad area of Mexico, will continue in 2004 with further work planned for the months ahead. During the past quarter two gold projects were identified, staked and offered to BHP Billiton for exploration.

Future Plans

The company continues to investigate new potential projects in western North America for acquisition. A new resource calculation has been commissioned for the Siwash Gold Project and will be reported on when received. A Mining Engineer has been requested to complete a checklist of requirements to advance the Siwash Project towards a production decision. Further work programs will be based on these reports.

The Company has processed satellite imagery of areas of interest in Mexico, and integrated this data with geologic and metallogenic databases. This work has identified numerous targets which will be the focus of a large helicopter borne exploration program to be carried out in early 2004.

Investor Relations Activities

During October 2003, the Company had a booth at the New Orleans Investment Conference where the Company and its activities were presented to interested parties. The Company engaged Roth Investor Relations Inc. on a temporary basis at a cost of US\$6,500 to raise the Company's profile with fund managers in the United States which included organizing a series of meetings with fund managers in New York City. The presentations were made by the President and a director of the Company.

Directors and Officers

In November 2003, the Company appointed Mr. Donald M. Lorimer to the Board of Directors of the Company. Mr. Lorimer qualified as a Chartered Accountant with Price Waterhouse & Co. and subsequently was a financial executive with the Patino Mining Corporation and Little Long Lac Gold Mines Ltd. In 1971 he joined A.E. Ames & Co. and on his transfer to Vancouver became a director and vice president responsible for corporate and government underwriting in British Columbia. He is currently a portfolio manager with Odlum Brown Ltd. Mr. Lorimer's experience will permit the Company to fulfil the requirements of proposed new regulations regarding Corporate Compliance and Audit Committees.

Financial Results

For the nine months ended September 30, 2003, the Company incurred a loss of \$759,090 (\$0.03 per share) compared to the loss of \$2,695,808 (\$0.14 per share) for the nine months ended September 30, 2002. The large loss in the comparable period was mainly due to the write-down of mineral properties during that period.

Revenue decreased in the nine months ended September 30, 2003 compared with the nine months ended September 2002 due to proceeds from mineral properties exceeding costs and mineral tax credits, included in other income, received in the comparative period.

Expenses decreased in the nine months ended September 30, 2003 compared with the nine months ended September 30, 2002. General and administrative expenses decreased by \$49,143 mainly in the areas of professional fees due to the reduction of professional costs in Mexico, stock exchange fees with most fees being a cost of financing and a

reduction in promotional activity. General exploration increased by \$72,490 mainly due to the exploration undertaken in Mexico by the Company and by the joint venture with BHP Billiton World Exploration Inc. in eastern Mexico. Write-down of interests in mineral properties decreased in the nine months ended September 30, 2003 compared to September 30, 2002 due to the large write-down of mineral properties in the comparative period. A smaller loss was realized on marketable securities during the current period due to most holdings having been previously written down to the lower of cost or market. The loss on foreign exchange increased in the nine months ended September 30, 2003 due to the rising Canadian dollar. There was no sale of fixed assets during the current period.

Financial Position and Liquidity

Operating Cash Flow

Cash used in operations, after allowing for the effects of changes in non-cash working capital components, was \$465,914 in the nine months ended September 30, 2003 compared to \$739,222 in the nine months ended September 30, 2002.

Financing Activities

Cash of \$1,816,235 was provided by the issuance of shares pursuant to three private placement financings and on the exercise of stock options and share purchase warrants during the nine months ended September 30, 2003.

Investing Activities

Cash used in investing activities in the nine months ended September 30, 2003 totalled \$555,836 compared to \$126,424 in the nine months ended September 30, 2002. To September 30, 2003, a total of \$578,922 was deferred, net of recoveries, on exploration of the Company's mineral properties. During the current period, the Company incurred \$223,733 of expenditures on the drill program on the Elk property in B.C. Additional claims were staked and a new property optioned in Mexico and some claims were staked in Nevada. Several of the Company's properties in Mexico are optioned out to third parties who are incurring all costs to earn interests in these properties. Cash was provided in the nine months ended September 30, 2003 on the sale of marketable securities compared to the purchase of securities in the comparable period. The Company spent \$252,119 on fixed assets during the current nine months consisting mainly of transporting the mill purchased at the end of fiscal 2002 to storage. The Company is not expensing any depreciation relating to the mill while it remains in storage. During the nine months ended September 30, 2002, the Company sold part of its inventory of gold for general working capital. No gold was sold during the current period.

Cash Resources and Liquidity

At September 30, 2003, cash and cash equivalents totaled \$1,759,452 compared to \$964,967 at December 31, 2002, the Company's most recent financial year-end. Working capital was \$1,832,684 at September 30, 2003 compared to \$1,521,627 at December 31, 2002. Included in working capital is the Company's inventory of gold recorded at the cost of production, not market value, and a contingent liability in the event the Company is unsuccessful in its appeal of assessed additional mineral tax for prior years. Also included in working capital are excess funds received from BHP Billiton to be spent on further exploration by the joint venture in eastern Mexico. The Company's current working capital position is sufficient for its current requirements.

In the subsequent period, the Company completed a private placement financing consisting of 55,825 units and 70,000 common shares at a price of \$1.50 per unit/share for gross proceeds of \$188,738. Each unit consists of one flow through common share and one half share purchase warrant with each whole warrant entitling the holder to purchase one additional non flow through common share at a price of \$1.60 for one year.

Risks and Uncertainties

The business of exploring for minerals and mining involves a high degree of risk. There is no certainty that the expenditures made by the Company on the exploration of its properties will result in discoveries of commercial quantities of mineralized material. Most exploration projects do not result in the discovery of commercially mineable ore deposits. There is no certainty that commercial production will be profitable. Profitability depends on many factors including mining costs, recovery rates, metal prices, taxation, environmental remediation costs and government policies.

ADVISORY TO READER

"I have prepared these financial statements for Almaden Minerals Ltd. in my capacity as Chief Financial Officer. No independent firm of professional accountants has audited, reviewed, compiled, or otherwise attempted to verify the accuracy or completeness of these financial statements. -Signed Dione Bitzer, CMA

3.

DEFERRED EXPLORATION ADVANCES

At September 30, 2003, the Company has deferred \$86,663 received from its joint venture partner BHP Billiton World Exploration Inc. in advance of exploration. These funds will be used to further exploration in Eastern Mexico.

4.

SHARE CAPITAL

Since December 31, 2002, changes in issued shares were are follows:

	Number	Amount
Balance, December 31, 2002	21,918,722	\$ 17,389,381
For cash pursuant to private placement (i)	80,000	62,780
For cash pursuant to private placement (ii)	327,265	247,671
For cash pursuant to private placement (iii)	1,819,000	1,162,819
For cash on exercise of stock options (iv)	108,500	40,587
For cash on exercise of share purchase warrants (v)	540,799	302,378
Balance, September 30, 2003	24,794,286	19,205,616

(i)

The Company issued 80,000 flow-through common shares on March 13, 2003 on a private placement basis at a price of \$0.80 per share. Attached to these common shares were one-half common share purchase warrants. Each whole warrant is exercisable into one non-flow-through common share at \$0.95 per share until March 13, 2004. Costs relating to this financing totalled \$1,220.

(ii)

The Company issued 327,265 flow-through common shares on August 7, 2003 on a private placement basis at a price of \$0.80 per share. Attached to these common shares were one-half common share purchase warrants. Each whole warrant is exercisable into one non-flow-through common share at \$0.80 per share until March 13, 2004. Costs relating to this financing totalled \$14,141.

(iii)

The Company issued 1,819,000 common shares on September 18, 2003 on a private placement basis at a price of \$0.70 per share. Attached to these common shares were one common share purchase warrants. Each warrant is exercisable into one common share at \$1.25 per share until September 18, 2004, at \$1.50 per share until September 18, 2005, at \$1.75 per share until September 18, 2006, at \$2.00 per share until September 18, 2007 and at \$2.25 per share until September 18, 2007. Attached to all warrants is an accelerated expiry date. In the event that, at any time after September 18, 2004, the 20 trading day weighted average trading price of the Company's common shares for any 20 consecutive trading days is \$0.50 or more above the then current exercise price (the twentieth such trading day being the "Determination"), the Company agreed to immediately notify the Holder (the "Notice of Expiry") of the accelerated expiry date, being a date which is not less than the thirtieth calendar day following the date of the Notice of Expiry (the "Accelerated Expiry Date"). All warrants not exercised by the expiration of the Accelerated Expiry Date shall be deemed cancelled without further notice to the Holder(s). Costs relating to this financing totalled \$110,481.

4.

SHARE CAPITAL (Continued)

(i)

During the nine months ended September 30, 2003, the Company issued 108,500 common shares upon the exercise of 60,000 stock options at a price of \$0.30 per share, 3,850 stock options at a price of \$0.388 per share, 34,650 stock options at a price of \$0.45 per share and 10,000 stock options at a price of \$0.55 per share.

(ii)

During the nine months ended September 30, 2003, the Company issued 30,799 common shares upon the exercise of an equal number of warrants at a price of \$0.42467 per share, 230,000 common shares upon the exercise of an equal number of warrants at a price of \$0.51 per share, 200,000 common shares upon the exercise of an equal number of warrants at a price of \$0.60 per share and 80,000 common shares upon the exercise of an equal number of warrants at a price of \$0.65 per share.

Warrants

At September 30, 2003, the following share purchase warrants were outstanding:

Number of Warrants	Exercise Price Range	Expiry date
881,650	\$ 0.42/0.47	October 1, 2003/2004
662,500	\$ 0.60	April 2, 2004
1,651,500	\$ 0.60/0.70	October 15, 2003/2004
100,000	\$ 0.65	April 4, 2004
163,633	\$ 0.80	August 7, 2005
40,000	\$ 0.95	March 13, 2004
1,819,000	\$1.25/1.50/1.75/2.00/2.25	September 18, 2008
5,318,283		

Included in warrants outstanding are 959,700 held by directors.

5.**STOCK BASED COMPENSATION PLANS**

The Company has a fixed stock option plan under which, pursuant to the Toronto Stock Exchange, permits the issuance of options up to 10% of the Company's issued share capital. The maximum number of shares reserved for issuance under this plan is 2,000,000. At September 30, 2003, the Company has reserved 571,000 stock options that may be granted. The exercise price of an option cannot be less than the closing price of the common shares on the Toronto Stock Exchange on the day immediately preceding the grant of the option and the maximum term of all options is five years. Stock options previously granted by the Company and its predecessor, which by the terms of the amalgamation, become options granted by the Company, are not options granted under the Company's fixed stock option plan.

The Board of Directors determines the term of the option (to a maximum of 5 years) and the time during which any option may vest. All options granted during the nine months ended September 30, 2003 vested on the date granted.

ALMADEN MINERALS LTD.

Note to Consolidated Interim Financial Statements

Nine months ended September 30, 2003

(unaudited)

5.

STOCK BASED COMPENSATION PLANS (Continued)

The following table presents the outstanding options as at September 30, 2003 and changes during the period:

Fixed Options	Shares	Weighted Average Exercise Price
Outstanding at December 31, 2002	2,734,533	\$ 0.44
Granted	454,000	0.79
Exercised	(108,500)	0.37
Outstanding at September 30, 2003	3,080,033	\$0.49
Options exercisable at September 30, 2003	3,080,033	

The following table summarizes information about stock options outstanding at September 30, 2003:

Number Outstanding at September 30, 2003	Options Outstanding and Exercisable Weighted Average Remaining Contractual Life	Weighted Average Exercise Price
--	--	---------------------------------------

91,092	2.9	0.27
675,000	2.5	0.30
154,000	6.1	0.39
663,941	4.7	0.45
77,000	1.6	0.49
965,000	3.5	0.55
75,000	4.6	0.74
379,000	4.5	0.80
3,080,033		

The fair value assigned to stock options granted during the nine months ended September 30, 2003 was \$124,000. Had the portion of this compensation cost been charged to earnings, the net loss for the nine months ended September 30, 2003 would have been \$883,090 while the basic loss per share would increase to \$0.04 and the diluted loss per share would remain unchanged.

The fair value of each option grant is estimated on the date of the grant using the Black-Scholes option pricing model with the following weighted-average assumptions for grants in the nine months ended September 30, 2003: dividend yield of 0%; expected volatility of approximately 60%; risk-free rate of 3.5% and expected lives of five years. The weighted-average fair value of options granted in the nine months ended September 30, 2003 was \$0.79.
