FASTENAL COMPANY AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands except share and per share information and where otherwise noted)

September 30, 2010 and 2009

(Unaudited)

(1) Basis of Presentation

The accompanying unaudited consolidated financial statements of Fastenal Company and subsidiaries (collectively referred to as the Company, Fastenal, or by terms such as we, our, or us) have been prepared in accordance with United States generally accepted accounting principles for interim financial information. They do not include all information and footnotes required by United States generally accepted accounting principles for complete financial statements. However, except as described herein, there has been no material change in the information disclosed in the notes to consolidated financial statements included in our consolidated financial statements as of and for the year ended December 31, 2009. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included.

(2) Stockholders' Equity

Stock Options

On April 20, 2010, our Board of Directors approved the grant under our employee stock option plan, effective at the close of business that day, of options to purchase approximately 265 thousand shares of our common stock at a strike price of \$60.00 per share. The closing stock price on the date of grant was \$54.26 per share.

During April 2009, April 2008, and April 2007, our Board of Directors approved the grant under our employee stock option plan, effective at the close of business that day, of options to purchase approximately 395 thousand shares, 275 thousand shares, and 2.2 million shares, respectively, of our common stock.

All of the options noted above vest and become exercisable over a period of up to eight years. Each option will terminate, to the extent not previously exercised, 13 months after the end of the relevant vesting period. As of September 30, 2010, options granted in April 2007 had vested with respect to approximately 210 thousand shares. No other options were vested as of September 30, 2010.

Compensation expense equal to the grant date fair value will be recognized for all of these awards over the vesting period. The stock-based compensation expense for the nine month periods ended September 30, 2010 and 2009 was \$3,015 and \$2,850, respectively. Unrecognized compensation expense related to outstanding stock options as of September 30, 2010 was \$17,386 and is expected to be recognized over a weighted average period of 5.79 years. Any future changes in estimated forfeitures will impact this amount.

(Continued)

Table of Contents**FASTENAL COMPANY AND SUBSIDIARIES**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands except share and per share information and where otherwise noted)

September 30, 2010 and 2009

(Unaudited)

The fair value of each share-based option outstanding as of September 30, 2010, is estimated on the date of grant using a Black-Scholes valuation method that uses the assumptions noted in the following table. The expected life is the most significant assumption as it determines the period for which the risk-free interest rate, volatility, and dividend yield must be applied. The expected life is the average length of time over which the employee groups will exercise their options, which is based on historical experience with similar grants. Expected volatilities are based on the movement of the Company's stock over the most recent historical period equivalent to the expected life of the options. The risk-free interest rate is based on the U.S. Treasury rate over the expected life at the time of grant. The dividend yield is estimated over the expected life based on our current dividend payout, our historical dividends paid, and our expected future cash dividends. The following table illustrates the share price information and assumptions used to determine fair value:

	Options Granted			
	April 2010	April 2009	April 2008	April 2007
Strike price	\$ 60.00	54.00	54.00	45.00
Closing market price on date of grant	\$ 54.26	35.22	48.70	40.30
Weighted-average expected life of option in years	5.0	5.0	5.0	4.9
Weighted-average volatility	39.1%	38.8%	30.7%	31.6%
Risk free interest rate	2.6%	1.9%	2.7%	4.6%
Expected dividend yield	1.5%	1.0%	1.0%	1.0%
Weighted-average grant date fair value of stock option	\$ 16.27	7.27	15.50	11.36

Earnings per share

The following tables present: [Table 1](#) - a reconciliation of the denominators used in the computation of basic and diluted earnings per share related to our employee stock option plan and [Table 2](#) - a summary of the options to purchase shares of common stock which were excluded from the diluted earnings calculation because they were anti-dilutive:

	Nine-month period		Three-month period	
	2010	2009	2010	2009
Table 1 - Reconciliation				
Basic - weighted shares outstanding	147,431	148,531	147,431	148,531
Weighted shares assumed upon exercise of stock options	0	0	0	0
Diluted - weighted shares outstanding	147,431	148,531	147,431	148,531
Table 2 - Summary of options excluded				
Options to purchase shares of common stock	2,660	2,649	2,733	2,632
Weighted-average exercise prices of options	\$ 47.80	47.15	\$ 48.24	47.14

Edgar Filing: FASTENAL CO - Form 10-Q

Any dilutive impact summarized above would relate to periods when the average market price of our stock exceeded the exercise price of the potentially dilutive option securities then outstanding.

(3) Comprehensive Income

Comprehensive income and the components of other comprehensive income were as follows:

	Nine-month period		Three-month period	
	2010	2009	2010	2009
Net earnings	\$ 200,195	139,821	\$ 74,994	47,589
Translation adjustment	2,156	7,148	2,423	4,713
Change in marketable securities	59	4	(6)	1
Total comprehensive income	\$ 202,410	146,973	77,411	52,303

(4) Unrealized Investment Gains and Losses

The following tables show the fair value of our investments and the gross unrealized gains and losses of those investments as of the dates indicated. This information is aggregated by the investment category and maturity of the investment.

	Current		September 30, 2010 Non-current		Total	
	Fair value	Unrealized gain (loss)	Fair value	Unrealized gain (loss)	Fair value	Unrealized gain (loss)
Common stock	\$ 160	(23)	0	0	160	(23)
State and municipal bonds	0	0	5,166	1	5,166	1
Government and agency securities	24,481	81	0	0	24,481	81
Total	\$ 24,641	58	5,166	1	29,807	59

	Current		September 30, 2009 Non-current		Total	
	Fair value	Unrealized gain (loss)	Fair value	Unrealized gain (loss)	Fair value	Unrealized gain (loss)
State and municipal bonds	\$ 1,295	4	5,551	0	6,846	4
Certificates of deposit or money market	0	0	0	0	0	0
Total	\$ 1,295	4	5,551	0	6,846	4

Table of Contents

FASTENAL COMPANY AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands except share and per share information and where otherwise noted)

September 30, 2010 and 2009

(Unaudited)

As was disclosed in our 2009 Annual Report on Form 10-K, we classify these securities as available-for-sale. Available-for-sale securities are recorded at fair value based on current market value. Our financial assets that are measured at fair value on a recurring basis consist of debt securities. Government and agency securities have a maturity of 12 months and are valued using Level 1 inputs (Level 1 inputs are quoted prices in active markets for identical assets and liabilities which typically include exchange traded items). State and municipal bonds have maturities ranging from more than one year to 24 years and are valued using Level 2 inputs (Level 2 inputs are observable inputs that include Level 1 prices that have been adjusted, quoted prices for similar assets or liabilities, or quoted prices in less active exchanges). There have been no transfers between Level 1 and Level 2 during the nine month period ended September 30, 2010. Unrealized holding gains and losses on available-for-sale securities are excluded from earnings, but are included in comprehensive income, and are reported as a separate component of stockholders' equity until realized.

(5) Operating Leases with Guarantees

We lease certain pick-up trucks under operating leases. These leases have a non-cancellable lease term of one year, with renewal options for up to 72 months. The pick-up truck leases include an early buy out clause we generally exercise, thereby giving the leases an effective term of 28-36 months. Certain operating leases for vehicles contain residual value guarantee provisions, which could become due at the expiration of the operating lease agreement if the fair value of the leased vehicles is less than the guaranteed residual value. The aggregate residual value at lease expiration, of the leases that contain residual value guarantees, is approximately \$13,215 at September 30, 2010. We believe the likelihood of funding the guarantee obligation under any provision of the operating lease agreement is remote, except for a \$1,298 loss on disposal reserve provided at September 30, 2010.

(6) Income Taxes

Fastenal, or one of its subsidiaries, files income tax returns in the United States Federal jurisdiction, numerous states, and various local and foreign jurisdictions. With limited exceptions, we are no longer subject to income tax examinations by taxing authorities for taxable years before 2007, in the case of United States Federal and non-United States examinations, and 2004, in the case of state and local examinations.

As of September 30, 2010 and 2009, the Company had \$1,728 and \$7,253, respectively, of liabilities recorded related to unrecognized tax benefits. Included in this liability for unrecognized tax benefits is an immaterial amount for interest and penalties, both of which we classify as a component of income tax expense. The Company does not anticipate that total unrecognized tax benefits will change significantly during the next 12 months.

September 30, 2010 and 2009

(Unaudited)

(7) Contingencies

In July 2010, we received a letter from the Civil Division of the Department of Justice (the DOJ) advising that they intended to be ready to commence litigation against us regarding a contract we entered into with the United States General Services Administration (the GSA) in 2000. We discontinued the GSA contract in 2005. The letter is related to an audit conducted by the GSA Office of Inspector General (the OIG) in 2005-06 that suggested we had not complied with certain pricing and product requirement provisions, and had potentially overcharged government customers under the contract. We have communicated our disagreement with the audit report, and have participated in several meetings and discussions with the OIG and DOJ on these disputed issues during the past several years. A subpoena dated March 25, 2010 was sent to us from the DOJ seeking information about the Company's position concerning our compliance under the contract, and we provided responsive information to the DOJ in May 2010. Discussions between the DOJ and Fastenal relating to our compliance with the pricing and product requirement provisions under the contract are ongoing. As of June 30, 2010, the DOJ had offered to resolve this matter for a payment by us of \$9.5 million and we had offered \$750 thousand, which amount we had accrued. During the third quarter of 2010 we continued our discussions with the DOJ. The DOJ has currently offered to resolve this matter for \$8.5 million and we have offered \$2.75 million, which amount we have accrued as of September 30, 2010. The timing and outcome of these discussions are uncertain and could include settlement or civil litigation by the DOJ to recover, among other amounts, treble damages and penalties under the False Claims Act. While this matter is not expected to have a material adverse effect on our financial position, an unfavorable resolution could result in payments by the Company in excess of the amounts reserved. We continue to believe that we have complied with our obligations under the GSA contract in all material respects.

In early February 2010, we received a letter from a California fastener supplier dated January 26, 2010. This letter threatened to sue us for our alleged violation of an exclusive distribution arrangement this supplier believes exists between our organizations. In addition, this supplier provided a press release and a video regarding the claim that they threatened to make public unless we agreed to mediation of the claim. Shortly after receipt of this letter, we performed a preliminary internal review to understand (1) who this supplier was and (2) the nature of our relationship with this supplier. Based on that review, we determined that this supplier manufactures a niche type of fastener and that the total volume of purchases by us, from all suppliers, over the purported term of the alleged exclusivity arrangement of this niche type of fastener does not exceed \$1 million. Following completion of our preliminary internal review, we requested additional information and documentation from the supplier. The supplier's response failed to provide the requested information and documentation. By letter dated February 26, 2010, we quantified for the supplier our total volume of purchases as discussed above and informed the supplier that we believed their claim was grossly exaggerated and completely unsupported. We have not received any direct response to our February 26, 2010 letter. On May 3, 2010, this supplier filed suit in Arkansas alleging damages. In response, we filed a motion to dismiss. This motion to dismiss was denied on August 16, 2010. It is too early to determine how this case will progress. Based on current information, we believe that the prospect that we will incur a material liability as a result of this claim is remote. While we are not required to disclose this matter under the rules of the SEC, we initially disclosed the existence of this threat in February 2010 as we believed that disclosure was prudent due to the alleged amount (\$180 million) of the claim and the threat to make these allegations public.

Table of Contents

ITEM 2 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is management's discussion and analysis of certain significant factors that have affected our financial position and operating results during the periods included in the accompanying consolidated financial statements. (Dollar amounts are in thousands except for per share amounts and where otherwise noted.)

BUSINESS AND OPERATIONAL OVERVIEW:

Fastenal is a North American leader in the wholesale distribution of industrial and construction supplies. We distribute these supplies through a network of over 2,400 company owned stores. Most of our customers are in the manufacturing and non-residential construction markets. The manufacturing market includes both original equipment manufacturers (OEM) and maintenance and repair operations (MRO). The non-residential construction market includes general, electrical, plumbing, sheet metal, and road contractors. Other users of our product include farmers, truckers, railroads, mining companies, federal, state, and local governmental entities, schools, and certain retail trades. Geographically, our stores and customers are primarily located in North America.

Like most industrial and construction centric organizations, we have endured a roller coaster ride over the last several years. The third quarter of 2008 included the final months of an inflationary period related to both steel prices (approximately 50% of our sales consist of some type of fastener - nuts, bolts, screws, etc. - most of which are made of steel) and energy prices (a meaningful item for us given the amount of energy that is necessary in the production of our products and in the transportation of our products across North America in one of our over 5,000 vehicles on the road).

In the fourth quarter of 2008, and throughout much of 2009, this inflation turned to deflation. When the swings are dramatic, this can hurt our gross margins because we are selling expensive inventory on the shelf at declining prices. This hurt our gross margins in 2009. The drop in energy costs over the same period provided some relief, but it was small in comparison to the impact of deflation. The deflation of 2009 ended and these conditions normalized and allowed our gross margins to recover in 2010. (See later discussion on gross margins.)

The discussion that follows includes information regarding our sales growth and our sales by product line during the third quarter of 2010. This information provides a nice summary view to understand the dynamics of the quarter. However, we feel the real story is told in the monthly sales changes, sequential trends, and end market information that follow - they explain the real impact of the market dynamics affecting us over this period of uncertainty.

As always, the pathway to profit is the cornerstone of our business evolution, and it influences everything we do. Remember, our business centers on our 2,400 plus stores - their individual success leads to the success of the entire organization over time. As you read the balance of this discussion, you will see our stores were able to make great strides in their endeavor to dig out of the economic hole known as 2009. We will continue to work to complete this task and maintain our goal of *Growth through Customer Service*.

Table of Contents**SALES GROWTH:**

Net sales and growth rates in net sales were as follows:

	Nine-month period		Three-month period	
	2010	2009	2010	2009
Net sales	\$ 1,695,705	1,453,580	\$ 603,750	489,339
Percentage change	16.7%	-19.0%	23.4%	-21.7%

The increase in net sales in the first nine months of 2010 came primarily from higher unit sales. Our growth in net sales was not meaningfully impacted by deflationary or inflationary price changes in our products or by the introduction of new products or services. The higher unit sales resulted primarily from increases in sales at older store locations (discussed below and again later in this document) and to a lesser degree the opening of new store locations in the last several years. The growth in net sales at the older store locations was due to the moderating impacts of the current recessionary environment, an environment which dramatically worsened late in 2008. The increase in net sales also resulted from the strengthening of the Canadian currency relative to the United States dollar and from our Holo-Krome business, which we acquired in December 2009. These two items added approximately 1.3 and 0.8 percentage points to our growth in the nine month period and in the three month period ended September 30, 2010, respectively.

The impact of the economy is best reflected in the growth performance of our stores opened greater than ten years ago (store sites opened as follows: 2010 group opened 2000 and earlier, and 2009 group opened 1999 and earlier) and opened greater than five years ago (store sites opened as follows: 2010 group opened 2005 and earlier, and 2009 group opened 2004 and earlier). These two groups of stores are more cyclical due to the increased market share they enjoy in their local markets. The stores opened greater than two years ago represent a consistent same store view of our business (store sites opened as follows: 2010 group opened 2008 and earlier, and 2009 group opened 2007 and earlier). The daily sales change for each of these groups was as follows:

Store Age	Nine-month period		Three-month period	
	2010	2009	2010	2009
Opened greater than 10 years ago	12.4%	-23.0%	19.1%	-25.4%
Opened greater than 5 years ago	12.1%	-22.3%	19.0%	-25.2%
Opened greater than 2 years ago	13.9%	-21.1%	20.2%	-24.2%

Note: The age groups above are measured as of the last day of each respective year.

SALES BY PRODUCT LINE:

The mix of sales from the original fastener product line and from the other product lines was as follows:

	Nine-month period		Three-month period	
	2010	2009	2010	2009
Fastener product line	49.6%	49.9%	49.2%	49.5%
Other product lines	50.4%	50.1%	50.8%	50.5%
	100.0%	100.0%	100.0%	100.0%

Table of Contents**COMMENTS REGARDING MONTHLY SALES CHANGES, SEQUENTIAL TRENDS, AND END MARKET PERFORMANCE**

Note Daily sales are defined as the sales for the period divided by the number of business days in the period.

This section focuses on three distinct views of our business monthly sales changes, sequential trends, and end market performance. The discussion of monthly sales changes provides a good mechanical view of our business based on the age of our stores. The discussion of sales trends provides a framework for understanding the sequential trends (that is, comparing a period to the immediately preceding period) in our business since the market declined late in 2008. Finally, we believe the discussion regarding end market performance provides insight into activities with our various types of customers.

MONTHLY SALES CHANGES:

Stores opened greater than five years The impact of the economy, over time, is best reflected in the growth performance of our stores opened greater than five years (store sites opened as follows: 2010 group opened 2005 and earlier, 2009 group opened 2004 and earlier, and 2008 group opened 2003 and earlier). This store group is more cyclical due to the increased market share these stores enjoy in their local markets. During each of the first nine months in 2010 and each of the twelve months in 2009 and 2008, the stores opened greater than five years had daily sales growth rates of (compared to the comparable month in the preceding year):

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
2010	-2.1%	-0.5%	7.4%	14.9%	17.3%	16.2%	19.8%	18.2%	18.9%			
2009	-12.4%	-14.3%	-21.5%	-25.2%	-25.2%	-26.3%	-26.6%	-24.7%	-24.2%	-21.7%	-15.0%	-12.1%
2008	8.9%	8.8%	9.9%	10.5%	10.4%	11.2%	9.7%	11.3%	8.5%	6.8%	0.9%	-5.1%

Stores opened greater than two years Our stores opened greater than two years (store sites opened as follows: 2010 group opened 2008 and earlier, 2009 group opened 2007 and earlier, and 2008 group opened 2006 and earlier) represent a consistent same-store view of our business. During each of the first nine months in 2010 and each of the twelve months in 2009 and 2008, the stores opened greater than two years had daily sales growth rates of (compared to the comparable month in the preceding year):

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
2010	0.6%	2.3%	9.6%	16.3%	18.5%	18.3%	21.3%	19.2%	19.8%			
2009	-11.2%	-13.8%	-20.1%	-24.0%	-23.7%	-25.1%	-25.4%	-24.0%	-23.1%	-20.9%	-13.7%	-10.6%
2008	12.0%	11.1%	12.5%	13.1%	12.0%	12.0%	10.9%	12.8%	10.5%	8.1%	2.3%	-3.9%

All company sales During each of the first nine months in 2010 and each of the twelve months in 2009 and 2008, all of our selling locations combined had daily sales growth rates of (compared to the comparable month in the preceding year):

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
2010	2.4%	4.4%	12.1%	18.6%	21.1%	21.1%	24.4%	22.1%	23.5%			
2009	-8.5%	-10.5%	-17.4%	-21.0%	-20.7%	-22.5%	-22.9%	-21.4%	-20.8%	-18.7%	-12.0%	-8.6%
2008	15.6%	15.0%	16.9%	17.1%	16.0%	15.9%	14.8%	16.4%	14.3%	11.9%	6.8%	0.0%

The improvement in the first nine months of 2010 continues the trend we saw in the latter half of 2009. The slow-down in the final three months of 2008 and all of 2009 relate to the general economic weakness in the global marketplace.

Several additional factors positively impacted our sales growth in the first nine months of 2010: (1) the strengthening Canadian dollar (when compared to the United States dollar) added approximately 0.8 percentage points to our daily sales growth and (2) our Holo-Krome business, which we acquired in December 2009, added approximately 0.5 percentage points to our daily sales growth.

Table of Contents**SEQUENTIAL TRENDS:**

We find it helpful to think about the monthly sequential changes in our business using the analogy of climbing a stairway This stairway has several predictable landings where there is a pause in the sequential gain (i.e. April, July, and October to December), but generally speaking, climbs from January to October. The October landing then establishes the benchmark for the start of the next year.

History has identified these landings in our business cycle. They generally relate to months with impaired business days (certain holidays). The first landing centers on Easter, which alternates between March and April (Easter occurred in April in both 2009 and 2010), the second landing centers on July 4th, and the third landing centers on the approach of winter with its seasonal impact on primarily our construction business and with the Christmas / New Year holidays. The holidays we noted impact the trends because they either move from month-to-month or because they move around during the week.

The table below shows the pattern to the sequential change in our daily sales. The line labeled **Past** is an historical average of the sequential daily sales change for the period 1998 to 2003. We chose this time frame because it had similar characteristics, a weaker industrial economy in North America, and could serve as a benchmark for a possible trend line. The **2009** and **2010** lines represent our actual sequential daily sales changes. The **09Delta** line is the difference between the **Past** and **2009**; similarly, the **10Delta** is the difference between the **Past** and **2010**.

	Jan.(1)	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Past	0.9%	3.3%	2.9%	-0.3%	3.4%	2.8%	-2.3%	2.6%	2.6%	-0.7%	-4.7%	-6.0%
2009	-18.3%	-2.6%	-1.4%	-4.9%	2.7%	1.7%	-3.6%	5.5%	3.3%	-0.7%	-2.0%	-9.0%
09Delta	-19.2%	-5.9%	-4.3%	-4.6%	-0.7%	-1.1%	-1.3%	2.9%	0.7%	0.0%	2.7%	-3.0%
2010	2.9%	-0.7%	5.9%	0.6%	4.8%	1.7%	-1.0%	3.5%	4.5%			
10Delta	2.0%	-4.0%	3.0%	0.9%	1.4%	-1.1%	1.3%	0.9%	1.9%			

(1) The January figures represent the percentage change from the previous October, whereas the remaining figures represent the percentage change from the previous month.

The 18.3% drop from October 2008 to January 2009 represents the immediate impact of the economy on our business. During this time frame, our daily sales change, on a year-over-year basis, dropped from 11.9% growth in October to a contraction of 8.5% in January. After January, the trend continued downward as the **Delta** (or spread between the benchmark and the 2009 actual) in February, March, and April 2009 averaged a negative 4.9%. The daily sales contraction, on a year-over-year basis, was 21.0% in April. The **Delta** from May 2009 to July 2009 was not as significant, averaging a negative 1.0%. While this period was still painful, it began to show what we believe was the bottom of the drop. Finally, in the period from August 2009 to December 2009, the **Delta** improved, and averaged a positive 0.7%. During 2010, sales have been strong our business exceeded the trend line in January, February took a step back due to inclement weather, and March reestablished the trend of being at or above the trend line (see graph below).

Table of Contents

A graph of the sequential daily sales change pattern discussed above, starting with a base of 100 in the previous October and ending with the next October, would be as follows:

END MARKETS:

Fluctuations in end market business The sequential trends noted above were directly linked to fluctuations in our end markets. To place this in perspective approximately 50% of our business has historically been with customers engaged in some type of manufacturing. The daily sales to these customers grew, on an annual basis, approximately 15.7%, 29.8%, and 30.6% in the first, second, and third quarters of 2010, respectively. In the first, second, third, and fourth quarters of 2009, the daily sales of this business contracted 16.0%, 25.2%, 22.8%, and 10.1%, respectively. For the year, our total sales to our manufacturing customers contracted 18.8% from 2008 to 2009. The 2009 contraction was more severe in our industrial production business (this is business where we supply products that become part of the finished goods produced by our customers) and less severe in the maintenance portion of our manufacturing business (this is business where we supply products that maintain the facility or the equipment of our customers engaged in manufacturing).

Our non-residential construction customers have historically represented 20% to 25% of our business. On an annual basis, the daily sales of this business contracted approximately 14.7% in the first quarter of 2010 and then grew 0.5% and 6.3% in the second and third quarters of 2010, respectively. In the first, second, third, and fourth quarters of 2009, the contraction was 6.4%, 19.6%, 25.3%, and 24.8%, respectively. For the year, our total sales to our non-residential construction customers contracted 19.4% from 2008 to 2009.

On a sequential basis, the sales to our manufacturing customers stabilized in May 2009 and then started to demonstrate patterns that resemble historical norms. This reversed the negative trend which began in October 2008. This stabilization and improvement was partially offset by continued deterioration in our non-residential construction business which weakened dramatically in the first eight months of 2009, and then began to also demonstrate patterns that resemble historical norms.

Table of Contents

A graph of the sequential sales trends to these two end markets in 2008, 2009, and 2010, starting with a base of 100 in the previous October and ending with the next October, would be as follows:

Table of Contents

PATHWAY TO PROFIT AND ITS IMPACT ON OUR BUSINESS:

During April 2007 we disclosed our intention to alter the growth drivers of our business For most of the preceding ten years, we used store openings as the primary growth driver of our business (our historical rate was approximately 14% new stores each year). As announced in April 2007, we began to add outside sales personnel into existing stores at a faster rate than historical patterns. We funded this sales force expansion with the occupancy savings generated by opening stores at the rate of 7% to 10% per year (see our disclosure below regarding the temporary slowing of our store growth in 2009 and 2010). Our goal was four-fold: (1) to continue growing our business at a similar rate with the new outside sales investment model, (2) to grow the sales of our average store to \$125 thousand per month in the five year period from 2007 to 2012, (3) to enhance the profitability of the overall business by capturing the natural expense leverage that has historically occurred in our existing stores as their sales grow, and (4) to improve the performance of our business due to the more efficient use of working capital (primarily inventory) as our average sales volume per store increases. The economic weakness that dramatically worsened in the fall of 2008 and continued into 2009 caused us to alter the pathway to profit beginning in 2009. These changes centered on two aspects (1) temporarily slowing store openings to a range of 2% to 5% per year, and (2) stopping headcount additions except for store openings and for stores that are growing. (See later discussion on future store openings.)

The pathway to profit initiative, described above, has slowly altered our cost structure over the last several years to increase the portion of our operating costs which are variable versus fixed. This dramatically improved our ability to manage through the current economic environment. As discussed in our third quarter 2009 release, we began to stabilize our store headcount in October 2009. From the third quarter of 2009 to the third quarter of 2010 we grew our store average full-time headcount and also grew our store average full-time equivalent (FTE) headcount; the store FTE grew from 7,087 to 7,450, or 5.1%. (See later discussion on store count and FTE numbers by quarter.)

The pathway to profit initiative allows us to focus on the three drivers of our business: (1) store headcount, (2) store (or unit) growth, and (3) average sales volume per store, which ultimately drives our level of profitability. Our original goal was to hit the \$125 thousand per month store average by 2012. We believe the duration of the economic weakness could delay the timing of when we achieve the \$125 thousand per month average by approximately two years. However, the current economic weakness only serves to strengthen our belief in the pathway to profit .

Future store openings In July 2010, we indicated our intentions to open 80 to 95 new stores during the second half of 2010, or an annualized rate of 6.8% to 8.0%. During the third quarter of 2010 we opened 45 stores; our goal for openings in the second half of 2010 remains unchanged.

Table of Contents

Store Count and Full-Time Equivalent (FTE) Headcount In response to the pathway to profit , we increased both our store count (opening 7.5% and 8.1% new stores in calendar 2008 and 2007, respectively) and our store FTE headcount. However, the rate of increase in store locations slowed (we opened 3.0% new stores in calendar 2009) and our FTE headcount for all types of personnel was reduced when the economy weakened late in 2008. The number of stores at quarter (QTR) end, the average FTE headcount per quarter (QTR), and the percentage change were as follows for each of the last five quarters, for the third quarter of 2008 (our peak quarter before the economy weakened), and for the first quarter of 2007 (the last completed quarter before we began the pathway to profit):

	QTR 3 2010	QTR 2 2010	QTR 1 2010	QTR 4 2009	QTR 3 2009	QTR 3 2008	QTR 1 2007
Store locations-quarter end count	2,453	2,407	2,392	2,369	2,352	2,300	2,073
% change (twelve months)	4.3%	2.4%	2.1%	2.5%	2.3%	7.2%	
% change since March 2007	18.3%	16.1%	15.4%	14.3%	13.5%	11.0%	
Store personnel - absolute headcount	8,643	8,401	8,404	8,519	8,608	9,123	6,849
% change (twelve months)	0.4%	-3.7%	-7.8%	-9.9%	-5.6%	17.9%	
% change since March 2007	26.2%	22.7%	22.7%	24.4%	25.7%	33.2%	
Store personnel - FTE	7,450	7,118	7,004	7,007	7,087	8,280	6,383
Distribution and manufacturing personnel - FTE ¹	2,007	1,884	1,800	1,768	1,763	2,244	1,962
Administrative and sales support personnel - FTE	1,365	1,298	1,300	1,298	1,322	1,404	1,383
Total - average FTE headcount	10,822	10,300	10,104	10,073	10,172	11,928	9,728
% change (twelve months)							
Store personnel - FTE	5.1%	-1.2%	-9.7%	-15.1%	-14.4%	15.2%	
Distribution and manufacturing personnel - FTE ¹	13.8%	1.5%	-8.7%	-20.3%	-21.4%	5.4%	
Administrative and sales support personnel - FTE	3.3%	-4.7%	-6.7%	-8.1%	-5.8%	3.2%	
Total - average FTE headcount	6.4%	-1.2%	-9.1%	-15.2%	-14.7%	11.7%	
% change since March 2007							
Store personnel - FTE	16.7%	11.5%	9.7%	9.8%	11.0%	29.7%	
Distribution and manufacturing personnel - FTE ¹	2.3%	-4.0%	-8.3%	-9.9%	-10.1%	14.4%	
Administrative and sales support personnel - FTE	-1.3%	-6.1%	-6.0%	-6.1%	-4.4%	1.5%	
Total - average FTE headcount	11.2%	5.9%	3.9%	3.5%	4.6%	22.6%	

We have reduced our FTE headcount at our store locations 10.0% since our peak of 8,280 FTE headcount in third quarter of 2008, much of this decrease relates to a reduction in part-time hours worked as our absolute headcount numbers related to store personnel declined by 5.3% during this time period. Since the first quarter of 2007, the last completed quarter before we began the pathway to profit , our store count is up 18.3%, our absolute store headcount is up 26.2%, and our store FTE headcount is up 16.7%. During this timeframe, our non-store FTE headcount increased from 3,345 to 3,372¹, or 0.8%. We believe these fluctuations allow us to manage our expense in the short-term while maintaining our ability to sell into the marketplace.

¹ Note The distribution and manufacturing headcount was impacted by the addition of 92 employees with the acquisition of Holo-Krome in December 2009.

Table of Contents

Store Size and Profitability The store groups listed in the table below, when combined with our strategic account stores, represented approximately 87% and 89% of our sales in the third quarter of 2010 and 2009, respectively. Strategic account stores are stores that are focused on selling to a group of strategic account customers in a limited geographic market. Our remaining sales (approximately 13% to 11%) relate to either: (1) our in-plant locations, (2) our direct Fastenal Cold Heading business (including our Holo-Krome business acquired in December 2009), or (3) our direct import business. Our average store had sales of \$71,600 and \$61,600 per month in the third quarter of 2010 and 2009, respectively. This average amount was \$71,600 per month in the first quarter of 2007 (the last completed quarter before we began the pathway to profit). The average age, number of stores, and pre-tax margin data by store size for the third quarter of 2010 and 2009, respectively, were as follows:

Sales per Month	Average Age (Years)	Number of Stores	Percentage of Stores	Pre-Tax Margin Percentage
Three months ended September 30, 2010				
\$0 to \$30,000	3.8	419	17.1%	-11.0%
\$30,001 to \$60,000	6.7	913	37.2%	13.2%
\$60,001 to \$100,000	9.4	595	24.3%	22.7%
\$100,001 to \$150,000	11.7	325	13.2%	26.0%
Over \$150,000	15.5	166	6.8%	27.5%
Strategic Account Store		35	1.4%	
Total		2,453	100.0%	
Three months ended September 30, 2009				
\$0 to \$30,000	3.9	541	23.0%	-17.7%
\$30,001 to \$60,000	6.4	929	39.5%	9.7%
\$60,001 to \$100,000	9.5	521	22.2%	20.0%
\$100,001 to \$150,000	11.8	231	9.8%	24.2%
Over \$150,000	15.9	105	4.5%	26.6%
Strategic Account Store		25	1.1%	
Total		2,352	100.0%	

Note Amounts may not foot due to rounding difference.

Our goal under the pathway to profit is to increase the sales of our average store to approximately \$125,000 per month (see earlier discussion). This will shift the store mix emphasis from the first three categories (\$0 to \$30,000, \$30,001 to \$60,000, and \$60,001 to \$100,000) to the last three categories (\$60,001 to \$100,000, \$100,001 to \$150,000, and over \$150,000), and we believe will allow us to leverage our fixed cost and increase our overall productivity.

Note Dollar amounts in this section are presented in whole dollars, not thousands.

Table of Contents**STATEMENT OF EARNINGS INFORMATION (percentage of net sales)** for the periods ended September 30:

	Nine-month period		Three-month period	
	2010	2009	2010	2009
Net sales	100.0%	100.0%	100.0%	100.0%
Gross profit	51.7%	51.3%	51.8%	50.0%
Operating and administrative expenses	32.6%	35.8%	31.8%	34.4%
Loss (gain) on sale of property and equipment	0.0%	-0.1%	0.0%	0.0%
Operating income	19.1%	15.5%	20.0%	15.6%
Interest income	0.0%	0.1%	0.0%	0.1%
Earnings before income taxes	19.1%	15.6%	20.0%	15.7%

Note Amounts may not foot due to rounding difference.

Gross profit percentage for the first nine months of 2010 increased from the same period in 2009, and the gross profit percentage for the third quarter of 2010 increased from the same period in 2009. The gross profit percentage was 51.1%, 52.1%, and 51.8% in the first, second, and third quarters of 2010, respectively. The gross profit percentage was 52.9%, 51.1%, 50.0% and 49.9% in the first, second, third, and fourth quarters of 2009, respectively.

The gross profit percentage decrease from 2008 to 2009 was driven by decreases in three components of gross profit: (1) transactional gross profit, (2) organizational gross profit, and (3) vendor incentive gross profit. The transactional gross profit represents the gross profit realized due to the day-to-day fluctuations in customer pricing relative to product and freight costs. This component was negatively influenced by the competitive landscape in 2009 which depressed the prices we could charge for our products. This component has generally improved since August 2009, except for customer mix which is discussed later. The organizational gross profit represents the component of gross profit we attribute to buying scale and efficiency gains. This component was negatively influenced by deflationary impacts in 2009 as we were selling inventory sourced at peak costs late in 2008. This component was magnified in 2009 due to the nature of our inventory turns and the dramatic decrease in sales activity during much of the year. However, this component improved in the first, second, and third quarters of 2010 when compared to the fourth quarter of 2009. The third component relates to vendor volume allowances. The gross profit dollars associated with this component dropped dramatically in the second half of 2009. However, this component improved in the first, second, and third quarters of 2010 when compared to the fourth quarter of 2009. In our second quarter 2010 earnings release, we indicated our belief that the first two components would continue to improve as we progress into the remainder of 2010. This belief was based on (1) our focused effort to raise our transactional margin and (2) the bias which we believed existed for some inflation in 2010 rather than the significant deflation we experienced in 2009. In the third quarter of 2010, our assumptions about the latter half of the year were proven wrong and these two components had a negative impact on gross profit percentage. The decrease in gross profit percentage, from the second quarter of 2010 to the third quarter of 2010, was primarily caused by the strong growth of our industrial production business; which resulted in change in our overall business mix. The industrial production business has a lower gross margin; therefore, the change in mix pulled our gross margin down. (However, since the operating expenses are lower, operating income produced is similar to our overall business.) The second cause was the relative lack of inflation in the third quarter. Finally, as we indicated in our second quarter earnings release, vendor volume allowances largely recovered during the second quarter to the levels in place in 2008 and in early 2009 due to the reset of vendor allowance programs which tend to be calendar based.

Operating and administrative expenses improved relative to sales in the third quarter of 2010 versus the third quarter of 2009. Sales grew 23.4% for the quarter, employee related expenses grew 26.3%, and all other expenses contracted 5.1%.

Historically, 65% to 70% of our operating and administrative expenses consist of employee related costs. The components are: (1) payroll (which includes cash compensation, stock option expense, and profit sharing), (2) health care, and (3) education.

Table of Contents

During the first quarter of 2010 and all four quarters of 2009, this range had reduced to 60% to 65% due to the factors noted below. During the second and third quarters of 2010, this range moved back to the historical level.

The payroll cost component for the third quarter of 2010 increased 29.2% from the same quarter in 2009 and increased 7.0% from the second quarter of 2010. The disparity between the full-time equivalent headcount increase of 6.4% noted earlier and the 29.2% annual increase is driven by several factors: (1) the sales commissions earned grew (this increase was amplified by the sales growth and the gross margin expansion, both of which have a meaningful impact on the commissions earned), (2) the total bonuses earned increased due to our profit growth, (3) the hours worked per employee grew, and (4) our profit sharing contribution grew. These four items, when compared to the same quarter in 2009, all grew at a rate faster than the rate of sales growth.

Our health care costs in the third quarter of 2010 decreased from the third quarter of 2009, but increased for the nine-month period. Health care costs in 2009 and the first quarter of 2010 increased due to the increase in the percentage of employees opting for expanded coverage as their spouses lost their insurance coverage at other employers, increases in COBRA costs due to changes in federal funding within COBRA, and an increase in health care utilization when compared to previous years. These conditions still exist in the second and third quarters of 2010; however, the spike in costs in the second and third quarters of 2009 changed the comparison. On a two year basis, our health care costs are still up significantly despite a decrease in headcount.

The remaining costs within our operating and administrative expenses, in the third quarter of 2010, decreased 5.1% from the third quarter of 2009 and decreased 3.3% from the second quarter of 2010. Occupancy expenses increased 7.9% from the third quarter of 2009 and increased 4.5% from the second quarter of 2010. The annual and sequential changes in occupancy expense were driven by increases in (1) utilities, (2) taxes, and (3) our new Holo-Krome facilities as our rent paid increased by 2.3% and 0.4%, respectively. Net transportation costs included in operating and administrative expenses decreased 7.0% from the third quarter of 2009 and 8.8% from the second quarter of 2010.

The last several years have seen meaningful swings in the cost of diesel fuel and gasoline During the first, second, and third quarters of 2010, our total vehicle fuel costs were approximately \$6.4 million, \$6.8 million, and \$6.6 million, respectively. During the first, second, third, and fourth quarters of 2009, our total vehicle fuel costs were approximately \$5.2 million, \$5.7 million, \$6.2 million, and \$6.1 million, respectively. The changes resulted from variations in fuel costs, variations in the service levels provided to our stores from our distribution centers, and changes in the number of vehicles at our store locations. These fuel costs include the fuel utilized in our distribution vehicles (semi-tractors, straight trucks, and sprinter trucks) which is recorded in cost of goods and the fuel utilized in our store delivery vehicles which is included in operating and administrative expenses (the split in the last several years has been approximately 50:50 between distribution and store use).

Table of Contents

The average per gallon fuel costs and the percentage change (on a year-over-year basis) for the last three years was as follows:

Per gallon average price	1st	2nd		3rd	4th
		2010 - Quarter			
Diesel fuel	\$ 2.89	3.06	2.96		
Gasoline	\$ 2.68	2.80	2.71		
		2009 - Quarter			
Diesel fuel	\$ 2.19	2.29	2.61	2.70	
Gasoline	\$ 1.86	2.25	2.55	2.54	
		2008 - Quarter			
Diesel fuel	\$ 3.47	4.30	4.38	3.11	
Gasoline	\$ 3.07	3.65	3.85	2.49	
Per gallon price change	1st	2nd		3rd	4th
		2010 - Quarter			
Diesel fuel	32.0%	33.6%	13.4%		
Gasoline	44.1%	24.4%	6.3%		
		2009 - Quarter			
Diesel fuel	-36.9%	-46.7%	-40.4%	-13.2%	
Gasoline	-39.4%	-38.4%	-33.8%	2.0%	

Income taxes, as a percentage of earnings before income taxes, were approximately 38.1% for the first nine months of 2010 and 2009.

WORKING CAPITAL:

The year-over-year comparison and the related dollar and percentage changes related to accounts receivable and inventories were as follows:

	Balance at September 30,			Twelve Month Dollar		Twelve Month	
	2010	2009	2008	Change	Change	Percentage Change	Percentage Change
Accounts receivable, net	\$ 301,721	239,323	309,184	62,398	(69,861)	26.1%	-22.6%
Inventories	546,063	498,106	537,643	47,957	(39,537)	9.6%	-7.4%

The accounts receivable increase of 26.1% from September 2009 to September 2010 was created by a daily sales increase of 22.1% and 23.5% in August and September 2010, respectively. The accounts receivable decrease of 22.6% from September 2008 to September 2009 relates to a daily sales decrease of 21.4% and 20.8% in August and September 2009, respectively. A portion of our inventory procurement has a longer lead time than our ability to foresee sales trends; therefore, the drop in sales growth activity in the fourth quarter of 2008 and during the first two months of 2009 continued to result in inventory consumption that was less than the amount of inbound product. The inventory decrease began in March 2009 and continued through most of 2009. Our inventory dropped approximately \$9,000, \$36,000, and \$21,000 during the first, second, and third quarters of 2009, respectively. The inventory grew by approximately \$10,000 in the fourth quarter of 2009; approximately half of this increase related to our December 2009 acquisition of Holo-Krome and the balance related to an increase in inventory stocking at our distribution centers to support the improving sales trends we have seen since August 2009. At the beginning of the year, our goal was to hold inventory flat in 2010; based on the first nine months of the year, we believe this goal will not be achieved in 2010. During 2010, our inventory decreased approximately \$1,000 in the first quarter, increased approximately \$15,000 in the second quarter, and increased approximately \$23,000 in the third quarter; or a \$37,000 increase year-to-date. This is disappointing to us; however, the expanding sales trends noted earlier in this discussion overshadow the disappointment. In its most simplified view, our expanding inventories are directly related to

Table of Contents

(1) the expanding sales growth trends (with emphasis on our large account business both OEM & MRO), (2) our confidence in their sustainability, and (3) an increase in the rate of store openings.

BALANCE SHEET AND CASH FLOW:

Our balance sheet continues to be very strong and our operations have good cash generating characteristics. During the third quarter of 2010, we generated \$46,766 (or 62.4% of net earnings) of operating cash flow; year-to-date, we generated \$166,293 (or 83.1% of net earnings) of operating cash flow. Our first quarter typically has stronger cash flow characteristics due to the timing of tax payments; this benefit reverses itself in the second, third, and fourth quarters as income tax payments go out in April, June, September, and December. The remaining amounts of cash flow from operating activities are largely linked to the pure dynamics of a distribution business and its strong correlation to working capital as discussed above.

The strong free cash flow (operating cash flow less net capital expenditures) during 2009 and 2010 allowed us to increase our first dividend payment (declared January 2010 and paid in February 2010) by 14.3% (from \$0.35 per share in 2009 to \$0.40 per share in 2010) and to increase our second dividend payment (declared July 2010 and paid in September 2010) by 13.5% (from \$0.37 per share in 2009 to \$0.42 per share in 2010). Year-to-date, we have paid total dividends of \$120,893, or 60.4% of net earnings.

STOCK REPURCHASE:

In July 2009, we announced our Board of Directors had authorized purchases by us of up to 2,000,000 shares of our common stock. This authorization replaced any unused authorization previously approved by our Board of Directors. During 2009, we purchased 1,100,000 shares of our outstanding stock at an average price of approximately \$37.37 per share. These purchases occurred in the fourth quarter of 2009. We did not purchase any stock in the first nine months of 2010.

CRITICAL ACCOUNTING POLICIES:

A discussion of the critical accounting policies related to accounting estimates is contained in our 2009 Annual Report on Form 10-K.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES:**

Cash flow activity in dollars and as a percentage of net earnings was as follows:

	Nine-month period	
	2010	2009
Net cash provided by operating activities	\$ 166,293	253,184
Net cash used in investing activities	\$ 38,366	41,031
Net cash used in financing activities	\$ 120,893	106,943
Net cash provided by operating activities	83.1%	181.1%
Net cash used in investing activities	19.2%	29.3%
Net cash used in financing activities	60.4%	76.5%

Net cash provided by operating activities decreased from the prior year. This decrease was driven by a flip from sales contraction in 2009 to sales growth in 2010 and their expected impact on the working capital of a distribution business. These would include: accounts receivable changes, inventory and related accounts payable changes, and finally accrued expense and income tax payable changes.

Net cash used in investing activities changed primarily due to changes in capital expenditures and short-term investments. Property and equipment expenditures in the first nine months of 2010 consisted of: (1) the purchase of software and hardware for Fastenal's information processing systems, (2) the addition of certain pickup trucks, (3) the purchase of signage, shelving, and other fixed assets related to store openings, (4) the addition of manufacturing and warehouse equipment, (5) the expansion or improvement of certain owned or leased store properties, (6) the expansion of Fastenal's distribution/trucking fleet, (7) the addition of a manufacturing property in Connecticut to support our new Holo-Krome business into the future, and (8) the expansion of our Indianapolis, Indiana master distribution center. Property and equipment expenditures in the same period of 2009 consisted of these same types of items (excluding item (7)) as well as the additional cost related to the expansion of our Denton, Texas regional distribution center. Disposals of property and equipment in both periods consisted of the planned disposition of certain pickup trucks, semi-tractors, and trailers in the normal course of business and the disposition of real estate relating to several store locations.

Cash requirements for property and equipment expenditures were satisfied from net earnings, cash on hand, and the proceeds of disposals. As of September 30, 2010, we had no material outstanding commitments for capital expenditures. We anticipate funding our current expansion plans with cash generated from operations, from available cash and cash equivalents, and, to a lesser degree, from our borrowing capacity.

Net cash used in financing activities consisted of the payment of dividends. Our two dividend payouts in the first nine months of 2010 increased 13.0% over the same period in 2009.

A discussion of the nature and amount of future cash commitments is contained in our 2009 Annual Report on Form 10-K.

Table of Contents

Certain Risks and Uncertainties This report contains statements that are not historical in nature and that are intended to be, and are hereby identified as, forward-looking statements under the Private Securities Litigation Reform Act of 1995, including statements regarding (1) our anticipated sales growth and our goals regarding sales growth, (2) the goals of our long-term growth strategy, pathway to profit, including the anticipated rate of new store openings, planned additions to our outside sales personnel, the expected funding of such additions out of cost savings resulting from the slowing of the rate of new store openings, the growth in average store sales expected to result from this strategy, our ability to capture leverage and working capital efficiency expected to result from this strategy, and our ability to increase overall productivity as a result of this strategy, (3) our ability to manage our employee related costs in the short-term while maintaining our sales, (4) our expectations regarding our gross profit percentage in the remainder of 2010, (5) our intent to increase our range of store openings commencing in the second half of 2010, (6) the funding of our expansion plans, (7) our expectation that total unrecognized tax benefits will not change significantly during the next twelve months, (8) our expectations regarding inventory growth in 2010, (9) the expected unrecognized compensation expense related to stock options, and (10) our expectations regarding the litigation disclosed in this report. The following factors are among those that could cause the Company's actual results to differ materially from those predicted in such forward-looking statements: (1) a prolonged downturn in the economy, a significant decline in industrial production, or a change, from that projected, in the number of North American markets able to support new stores could cause store openings to change from that expected and could impede our sales growth, (2) a prolonged downturn in the economy, changes in the expected rate of new store openings, difficulties in successfully attracting and retaining additional qualified outside sales personnel, and difficulties in changing our sales process could adversely impact our ability to achieve the goals of our pathway to profit initiative, (3) a worsening trend in the economy, or changes in government regulations, could make it difficult to effectively manage our employee related costs in the short-term while maintaining sales, (4) a significant deterioration or improvement in the economy, additional inflation or deflation, or a change in our purchasing patterns could affect our expectations regarding our gross profit percentage in the remainder of 2010, (5) a prolonged downturn in the economy could affect our ability to increase our range of store openings commencing in the second half of 2010, (6) a change in our ability to generate free cash flow resulting from a slowdown in our sales or our inability to manage expenses could negatively impact the funding of our expansion plans, (7) changes in tax law or changes in the interpretation of tax law at the federal, state or local level could impact our expectation about total unrecognized tax benefits during the next twelve months, (8) an unexpected dramatic increase or decrease in sales, or inflation or deflation related to the price of steel, could impact our expectations regarding inventory growth in 2010, (9) an unexpected change in forfeiture rates due to demotion or turnover could impact the unrecognized compensation expense related to stock options, and (10) our expectations about the litigation disclosed in this report may be impacted by the disclosure of currently unknown facts and other uncertainties in the litigation including the possible expansion of claims brought by the claimants beyond those currently raised. A discussion of other risks and uncertainties which could cause our operating results to vary from anticipated results or which could materially adversely effect our business, financial condition, or operating results is included in our 2009 Annual Report on Form 10-K under the sections captioned *Certain Risks and Uncertainties* and *Item 1A Risk Factors*. We assume no obligation to update any forward-looking statements or any discussions of risks and uncertainties.

Table of Contents

ITEM 3 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to certain market risks from changes in interest rates, foreign currency exchange rates, commodity steel pricing, and commodity fuel prices. Changes in these factors cause fluctuations in our earnings and cash flows. We evaluate and manage exposure to these market risks as follows:

Interest Rates We have a line of credit totaling \$8 million which expires on August 26, 2011. The line bears interest at 0.9% over the LIBOR rate. During the quarter ended September 30, 2010, there was \$0 outstanding on the line. We pay no fee for the unused portion of the line of credit.

Foreign Currency Exchange Rates Foreign currency fluctuations can affect our net investments and earnings denominated in foreign currencies. Our primary exchange rate exposure is with the Canadian dollar against the United States dollar. Our estimated net earnings exposure for foreign currency exchange rates was not material at September 30, 2010.

Commodity Steel Pricing We buy and sell various types of steel products; these products consist primarily of different types of threaded fasteners. During the last decade, there has been nominal movement in overall steel pricing, with some deflation occurring in the wake of the economic crisis of the Far East markets that occurred in the late 1990 s. This trend reversed to inflation in the period from late 2003 to the early part of 2005 and again from mid 2007 to the fall of 2008. Since the fall of 2008, this flipped to deflation during most of 2009, which became largely neutral to minimal inflation as we moved through the first nine months of 2010. We are exposed to the impacts of commodity steel pricing and our related ability to pass through the impacts to our end customers.

Commodity Fuel Prices We have market risk for changes in gasoline and diesel fuel costs. Historically this risk has been mitigated over time by our ability to pass freight costs to our customers and the efficiency of our trucking distribution network.

ITEM 4 CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures As of the end of the period covered by this report, we conducted an evaluation, under the supervision and with the participation of the principal executive officer and principal financial officer of Fastenal, of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)). Based on this evaluation, the principal executive officer and principal financial officer concluded that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and is accumulated and communicated to our management, including the principal executive officer and principal financial officer, to allow for timely decisions regarding disclosure. There was no change in our internal control over financial reporting during our most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

ITEM 1 LEGAL PROCEEDINGS

In July 2010, we received a letter from the Civil Division of the Department of Justice (the DOJ) advising that they intended to be ready to commence litigation against us regarding a contract we entered into with the United States General Services Administration (the GSA) in 2000. We discontinued the GSA contract in 2005. The letter is related to an audit conducted by the GSA Office of Inspector General (the OIG) in 2005-06 that suggested we had not complied with certain pricing and product requirement provisions, and had potentially overcharged government customers under the contract. We have communicated our disagreement with the audit report, and have participated in several meetings and discussions with the OIG and DOJ on these disputed issues during the past several years. A subpoena dated March 25, 2010 was sent to us from the DOJ seeking information about the Company's position concerning our compliance under the contract, and we provided responsive information to the DOJ in May 2010. Discussions between the DOJ and Fastenal relating to our compliance with the pricing and product requirement provisions under the contract are ongoing. As of June 30, 2010, the DOJ had offered to resolve this matter for a payment by us of \$9.5 million and we had offered \$750 thousand, which amount we had accrued. During the third quarter of 2010 we continued our discussions with the DOJ. The DOJ has currently offered to resolve this matter for \$8.5 million and we have offered \$2.75 million, which amount we have accrued as of September 30, 2010. The timing and outcome of these discussions are uncertain and could include settlement or civil litigation by the DOJ to recover, among other amounts, treble damages and penalties under the False Claims Act. While this matter is not expected to have a material adverse effect on our financial position, an unfavorable resolution could result in payments by the Company in excess of the amounts reserved. We continue to believe that we have complied with our obligations under the GSA contract in all material respects.

In early February 2010, we received a letter from a California fastener supplier dated January 26, 2010. This letter threatened to sue us for our alleged violation of an exclusive distribution arrangement this supplier believes exists between our organizations. In addition, this supplier provided a press release and a video regarding the claim that they threatened to make public unless we agreed to mediation of the claim. Shortly after receipt of this letter, we performed a preliminary internal review to understand (1) who this supplier was and (2) the nature of our relationship with this supplier. Based on that review, we determined that this supplier manufactures a niche type of fastener and that the total volume of purchases by us, from all suppliers, over the purported term of the alleged exclusivity arrangement of this niche type of fastener does not exceed \$1 million. Following completion of our preliminary internal review, we requested additional information and documentation from the supplier. The supplier's response failed to provide the requested information and documentation. By letter dated February 26, 2010, we quantified for the supplier our total volume of purchases as discussed above and informed the supplier that we believed their claim was grossly exaggerated and completely unsupported. We have not received any direct response to our February 26, 2010 letter. On May 3, 2010, this supplier filed suit in Arkansas alleging damages. In response, we filed a motion to dismiss. This motion to dismiss was denied on August 16, 2010. It is too early to determine how this case will progress. Based on current information, we believe that the prospect that we will incur a material liability as a result of this claim is remote. While we are not required to disclose this matter under the rules of the SEC, we initially disclosed the existence of this threat in February 2010 as we believed that disclosure was prudent due to the alleged amount (\$180 million) of the claim and the threat to make these allegations public.

ITEM 1A RISK FACTORS

We are affected by risks specific to us as well as factors that affect all businesses operating in a global market. The significant factors known to us that could materially adversely affect our business, financial condition, or operating results are described in Item 2 of Part I above and in our most recently filed Annual Report on Form 10-K under *Certain Risks and Uncertainties* and *Item 1A Risk Factors*. There has been no material change in those risk factors.
