NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Reporting Entity

On November 17, 2006, HCA Inc. was acquired by a private investor group, including affiliates of, or funds sponsored by Bain Capital Partners, LLC, Kohlberg Kravis Roberts & Co., BAML Capital Partners and HCA founder, Dr. Thomas F. Frist Jr. (collectively, the Investors) and by members of management and certain other investors. The transaction was accounted for as a recapitalization in our financial statements, with no adjustments to the historical basis of our assets and liabilities.

On November 22, 2010, HCA Inc. reorganized by creating a new holding company structure (the Corporate Reorganization). HCA Holdings, Inc. became the new parent company, and HCA Inc. became HCA Holdings, Inc. s wholly-owned direct subsidiary. As part of the Corporate Reorganization, HCA Inc. s outstanding shares of common stock were automatically converted, on a share for share basis, into identical shares of HCA Holdings, Inc. s common stock. As a result of the Corporate Reorganization, HCA Holdings, Inc. was deemed the successor registrant to HCA Inc. under the Exchange Act.

During March 2011, we completed the initial public offering of 87,719,300 shares of our common stock at a price of $30.00 per share (before deducting underwriter discounts, commissions and other related offering expenses). Certain of our stockholders also sold 57,410,700 shares of our common stock in this offering. We did not receive any proceeds from the shares sold by the selling stockholders. Our common stock is traded on the New York Stock Exchange (symbol HCA).

The Investors provided management and advisory services to the Company pursuant to a management agreement among HCA Inc. and the Investors executed in connection with the Investors acquisition of HCA Inc. in November 2006. The management agreement was terminated pursuant to its terms upon completion of the initial public offering of our common stock during March 2011, and the Company paid the Investors a final fee of $181 million.

HCA Holdings, Inc. is a holding company whose affiliates own and operate hospitals and related health care entities. The term affiliates includes direct and indirect subsidiaries of HCA Holdings, Inc. and partnerships and joint ventures in which such subsidiaries are partners. At June 30, 2012, these affiliates owned and operated 163 hospitals, 110 freestanding surgery centers and provided extensive outpatient and ancillary services. HCA Holdings, Inc. s facilities are located in 20 states and England. The terms Company, HCA, we, our or us, as used herein and otherwise stated or indicated by context, refer to HCA Inc. and its affiliates prior to the Corporate Reorganization and to HCA Holdings, Inc. and its affiliates after the Corporate Reorganization. The terms facilities or hospitals refer to entities owned and operated by affiliates of HCA and the term employees refers to employees of affiliates of HCA.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all the information and footnotes required by generally accepted accounting principles for complete consolidated financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included and are of a normal and recurring nature.

The majority of our expenses are costs of revenues items. Costs that could be classified as general and administrative would include our corporate office costs, which were $59 million and $55 million for the quarters ended June 30, 2012 and 2011, respectively, and $112 million and $109 million for the six months ended

HCA HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 1 INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

Basis of Presentation (continued)

June 30, 2012 and 2011, respectively. Operating results for the quarter and the six months ended June 30, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012. For further information, refer to the consolidated financial statements and footnotes thereto included in our annual report on Form 10-K for the year ended December 31, 2011.

In 2011, we adopted the provisions of Accounting Standards Update (ASU) No. 2011-07, *Presentation and Disclosure of Patient Service Revenue, Provision for Bad Debts, and the Allowance for Doubtful Accounts for Certain Health Care Entities* (ASU 2011-07). ASU 2011-07 requires health care entities to change the presentation of the statement of operations by reclassifying the provision for doubtful accounts from an operating expense to a deduction from patient service revenues. Operating results for the quarter and six months ended June 30, 2011 have been reclassified in accordance with ASU 2011-07.

Revenues are recorded during the period the health care services are provided, based upon the estimated amounts due from the patients and third-party payers. Third-party payers include federal and state agencies (under the Medicare, Medicaid and other programs), managed care health plans, commercial insurance companies and employers. Estimates of contractual allowances under managed care health plans are based upon the payment terms specified in the related contractual agreements. Revenues related to uninsured patients and copayment and deductible amounts for patients who have health care coverage may have discounts applied (uninsured discounts and contractual discounts). We also record a provision for doubtful accounts related to uninsured accounts to record the net self pay accounts receivable at the estimated amounts we expect to collect. Our revenues from our third-party payers, the uninsured and other revenues for the quarters and six months ended June 30, 2012 and 2011 are summarized in the following tables (dollars in millions):

	Quarter			
	2012	**Ratio**	**2011**	**Ratio**
Medicare	**$ 1,989**	**24.5%**	$ 1,871	25.8%

Revenues	**$ 16,517**	**100.0%**	$ 14,655	100.0%

The increase in revenues for the six months ended June 30, 2012 compared to the six months ended June 30, 2011 includes two adjustments (Rural Floor Provision Settlement and Supplemental Security Income (SSI) ratios) related to Medicare revenues for prior periods. The net effect of the Medicare adjustments was an increase of $188 million to revenues. The Rural Floor Provision Settlement was signed on April 5, 2012. As a result of the agreement, we received additional Medicare payments of approximately $271 million during June 2012. This amount was recorded as an increase to Medicare revenues for the quarter ended March 31, 2012. During March 2012, the Centers for Medicare & Medicaid Services (CMS) issued new SSI ratios used for calculating Medicare Disproportionate Share Hospital (DSH) reimbursement for federal fiscal years ending September 30, 2006 through September 30, 2009. As a result, we recalculated our DSH reimbursement for all applicable periods. The cumulative impact of this retroactive adjustment was a reduction in Medicare revenues of approximately $83 million. This adjustment was recorded as a reduction to Medicare revenues during the quarter ended March 31 2012. The net effect of these adjustments (and related expenses) added $170 million to income before income taxes, or $0.22 per diluted share, for the six months ended June 30, 2012.

We previously reported $39 million of Medicaid electronic health record (EHR) incentives for the quarter and six months ended June 30, 2011 in the line item Revenues in our condensed consolidated income statements. This amount has been reclassified and is now included in the line item Electronic health record incentive income in our condensed consolidated comprehensive income statements for the quarter and six months ended June 30, 2011.

Certain prior year amounts have been reclassified to conform to the current year presentation.

NOTE 2 INCOME TAXES

At June 30, 2012, we were contesting certain claimed deficiencies and adjustments proposed by the IRS Examination Division in connection with its audit of HCA Inc. s 2005 and 2006 federal income tax returns. The disputed items include the timing of recognition of certain patient service revenues, the deductibility of certain debt retirement costs and our method for calculating the tax allowance for doubtful accounts. The

IRS Examination Division began an audit of HCA Inc. s 2007, 2008 and 2009 federal income tax returns in 2010.

7

Table of Contents

HCA HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 2 INCOME TAXES (continued)

Our liability for unrecognized tax benefits was $518 million, including accrued interest of $46 million, as of June 30, 2012 ($494 million and $62 million, respectively, as of December 31, 2011). Unrecognized tax benefits of $157 million ($173 million as of December 31, 2011) would affect the effective rate, if recognized. The provision for income taxes reflects $18 million and $2 million ($11 million and $1 million, respectively, net of tax) in reductions in interest expense related to taxing authority examinations for the quarters ended June 30, 2012 and 2011, respectively, and $21 million and $26 million ($13 million and $16 million, respectively, net of tax) in reductions in interest expense related to taxing authority examinations for the six months ended June 30, 2012 and 2011, respectively.

Depending on the resolution of the IRS disputes, the completion of examinations by federal, state or international taxing authorities, or the expiration of statutes of limitation for specific taxing jurisdictions, we believe it is reasonably possible our liability for unrecognized tax benefits may significantly increase or decline within the next 12 months. However, we are currently unable to estimate the range of any possible change.

NOTE 3 EARNINGS PER SHARE

We compute basic earnings per share using the weighted average number of common shares outstanding. We compute diluted earnings per share using the weighted average number of common shares outstanding, plus the dilutive effect of outstanding stock options, stock appreciation rights and restricted share units, computed using the treasury stock method.

The following table sets forth the computation of basic and diluted earnings per share for the quarters and six months ended June 30, 2012 and 2011 (dollars in millions, except per share amounts, and shares in thousands):

	Quarter		Six Months	
	2012	**2011**	**2012**	**2011**
Net income attributable to HCA Holdings, Inc.	**$ 391**	$ 229	**$ 931**	$ 469
Weighted average common shares outstanding	**439,473**	516,448	**438,705**	480,525
Effect of dilutive securities	**19,148**	22,109	**19,762**	19,938
Shares used for diluted earnings per share	**458,621**	538,557	**458,467**	500,463
Earnings per share:				
Basic earnings per share	**$ 0.89**	$ 0.44	**$ 2.12**	$ 0.98
Diluted earnings per share	**$ 0.85**	$ 0.43	**$ 2.03**	$ 0.94

Investment carrying value				**$ 495**

	December 31, 2011			
	Amortized Cost	Unrealized Amounts Gains	Unrealized Amounts Losses	Fair Value
Debt securities:				
States and municipalities	$ 398	$ 19	$	$ 417
Auction rate securities	139		(8)	131
Asset-backed securities	20			20
Money market funds	53			53
	610	19	(8)	621
Equity securities	7	1	(1)	7
	$ 617	$ 20	$ (9)	628
Amounts classified as current assets				(80)
Investment carrying value				$ 548

At June 30, 2012 and December 31, 2011, the investments of our insurance subsidiaries were classified as available-for-sale. Changes in temporary unrealized gains and losses are recorded as adjustments to other comprehensive income. At both June 30, 2012 and December 31, 2011, $19 million of our investments were subject to restrictions included in insurance bond collateralization and assumed reinsurance contracts.

9

Table of Contents

HCA HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 4 INVESTMENTS OF INSURANCE SUBSIDIARIES (continued)

Scheduled maturities of investments in debt securities at June 30, 2012 were as follows (dollars in millions):

	Amortized Cost	Fair Value
Due in one year or less	$ 161	$ 161
Due after one year through five years	115	123
Due after five years through ten years	132	140
Due after ten years	98	102
	506	526
Auction rate securities	76	70
Asset-backed securities	17	17
	$ 599	$ 613

The average expected maturity of the investments in debt securities at June 30, 2012 was 3.8 years, compared to the average scheduled maturity of 8.1 years. Expected and scheduled maturities may differ because the issuers of certain securities have the right to call, prepay or otherwise redeem such obligations prior to the scheduled maturity date. The average expected maturities for our auction rate and asset-backed securities were derived from valuation models of expected cash flows and involved management s judgment. At June 30, 2012, the average expected maturities for our auction rate and asset-backed securities were 4.9 years and 4.4 years, respectively, compared to average scheduled maturities of 24.6 years and 24.3 years, respectively.

NOTE 5 LONG-TERM DEBT

A summary of long-term debt at June 30, 2012 and December 31, 2011, including related interest rates at June 30, 2012, follows (dollars in millions):

	June 30, 2012	December 31, 2011
Senior secured asset-based revolving credit facility (effective interest rate of 1.7%)	**$ 1,335**	$ 2,155
Senior secured term loan facilities (effective interest rate of 5.0%)	**7,242**	7,425
Senior secured first lien notes (effective interest rate of 7.4%)	**8,434**	7,081
Other senior secured debt (effective interest rate of 6.8%)	**391**	350
First lien debt	**17,402**	17,011
Senior secured notes (effective interest rate of 11.0%)	**197**	197
Senior unsecured notes (effective interest rate of 7.3%)	**9,442**	9,844
Total debt (average life of 6.8 years, rates averaging 6.5%)	**27,041**	27,052
Less amounts due within one year	**1,309**	1,407

$	**25,732**	$	25,645

During April 2012, we extended $75 million of our term loan A-1 facility with a final maturity of November 2012 and $651 million of our term loan B-1 facility with a final maturity of November 2013 to term loan A-3 with a final maturity of February 2016.

During February 2012, we issued $1.350 billion aggregate principal amount of 5.875% senior secured notes due 2022. After the payment of related fees and expenses, we used the proceeds for general corporate purposes.

Table of Contents

HCA HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 5 LONG-TERM DEBT (continued)

During June 2011, we redeemed all $1.000 billion aggregate principal amount of our 9 $^{1}/_{8}$% senior secured notes due 2014, at a redemption price of 104.563% of the principal amount, and $108 million aggregate principal amount of our 9 $^{7}/_{8}$% senior secured notes due 2017, at a redemption price of 109.875% of the principal amount. The pretax losses on retirement of debt related to these redemptions were $75 million.

NOTE 6 FINANCIAL INSTRUMENTS

Interest Rate Swap Agreements

We have entered into interest rate swap agreements to manage our exposure to fluctuations in interest rates. These swap agreements involve the exchange of fixed and variable rate interest payments between two parties based on common notional principal amounts and maturity dates. Pay-fixed interest rate swaps effectively convert LIBOR indexed variable rate obligations to fixed interest rate obligations. The interest payments under these agreements are settled on a net basis. The net interest payments, based on the notional amounts in these agreements, generally match the timing of the related liabilities. The notional amounts of the swap agreements represent amounts used to calculate the exchange of cash flows and are not our assets or liabilities. Our credit risk related to these agreements is considered low because the swap agreements are with creditworthy financial institutions.

The following table sets forth our interest rate swap agreements, which have been designated as cash flow hedges, at June 30, 2012 (dollars in millions):

	Notional Amount	Maturity Date	Fair Value
Pay-fixed interest rate swaps	$ 500	December 2014	$ (8)
Pay-fixed interest rate swaps	3,000	December 2016	(362)
Pay-fixed interest rate swaps	1,000	December 2017	(70)

During the next 12 months, we estimate $118 million will be reclassified from other comprehensive income (OCI) to interest expense.

Cross Currency Swaps

The Company and certain subsidiaries have incurred obligations and entered into various intercompany transactions where such obligations are denominated in currencies, other than the functional currencies of the parties executing the trade. In order to mitigate the currency exposure risks and better match the cash flows of our obligations and intercompany transactions with cash flows from operations, we enter into various cross currency swaps. Our credit risk related to these agreements is considered low because the swap agreements are with creditworthy financial institutions.

Our cross currency swap is not designated as a hedge, and changes in fair value are recognized in results of operations. The following table sets forth our cross currency swap agreement at June 30, 2012 (amounts in millions):

	Notional Amount	Maturity Date	Fair Value
Euro United States dollar currency swap	266 Euro	November 2013	$ (26)

NOTE 6 FINANCIAL INSTRUMENTS (continued)

Derivatives Results of Operations

The following tables present the effect of our interest rate and cross currency swaps on our results of operations for the six months ended June 30, 2012 (dollars in millions):

Derivatives in Cash Flow Hedging Relationships	Amount of Loss Recognized in OCI on Derivatives, Net of Tax	Location of Loss Reclassified from Accumulated OCI into Operations	Amount of Loss Reclassified from Accumulated OCI into Operations
Interest rate swaps	$ 64	Interest expense	$ 60

Derivatives Not Designated as Hedging Instruments	Location of Loss Recognized in Operations on Derivatives	Amount of Loss Recognized in Operations on Derivatives
Cross currency swap	Other operating expenses	$ 10

Credit-risk-related Contingent Features

We have agreements with each of our derivative counterparties that contain a provision where we could be declared in default on our derivative obligations if repayment of the underlying indebtedness is accelerated by the lender due to our default on the indebtedness. As of June 30, 2012, we have not been required to post any collateral related to these agreements. If we had breached these provisions at June 30, 2012, we would have been required to settle our obligations under the agreements at their aggregate, estimated termination value of $494 million.

NOTE 7 ASSETS AND LIABILITIES MEASURED AT FAIR VALUE

Accounting Standards Codification 820, *Fair Value Measurements and Disclosures* (ASC 820) defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. ASC 820 applies to reported balances that are required or permitted to be measured at fair value under existing accounting pronouncements.

ASC 820 emphasizes fair value is a market-based measurement, not an entity-specific measurement. Therefore, a fair value measurement should be determined based on the assumptions market participants would use in pricing the asset or liability. As a basis for considering market participant assumptions in fair value measurements, ASC 820 establishes a fair value hierarchy that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs classified within Levels 1 and 2 of the hierarchy) and the reporting entity s own assumptions about market participant assumptions (unobservable inputs classified within Level 3 of the hierarchy).

Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs may include quoted prices for similar assets and liabilities in active markets, as well as inputs observable for the asset or liability (other than quoted prices), such as interest rates, foreign exchange rates, and yield curves observable at commonly quoted intervals. Level 3 inputs are unobservable inputs for the asset or liability, which are typically based on an entity s own assumptions, as there is little, if any, related market activity. In instances where the

determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair

Table of Contents

HCA HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 7 ASSETS AND LIABILITIES MEASURED AT FAIR VALUE (continued)

value measurement falls is based on the lowest level input significant to the fair value measurement in its entirety. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

Cash Traded Investments

Our cash traded investments are generally classified within Level 1 or Level 2 of the fair value hierarchy because they are valued using quoted market prices, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency. Certain types of cash traded instruments are classified within Level 3 of the fair value hierarchy because they trade infrequently and therefore have little or no price transparency. The transaction price is initially used as the best estimate of fair value.

Our wholly-owned insurance subsidiaries had investments in tax-exempt auction rate securities (ARS), which are backed by student loans substantially guaranteed by the federal government, of $70 million ($76 million par value) at June 30, 2012. We do not currently intend to attempt to sell the ARS as the liquidity needs of our insurance subsidiaries are expected to be met by other investments in their investment portfolios. During 2011 and the six months ended June 30, 2012, certain issuers and their broker/dealers redeemed or repurchased $112 million and $63 million, respectively, of our ARS at par value. The valuation of these securities involved management s judgment, after consideration of market factors and the absence of market transparency, market liquidity and observable inputs. Our valuation models derived a fair market value compared to tax-equivalent yields of other student loan backed variable rate securities of similar credit worthiness and similar effective maturities.

Derivative Financial Instruments

We have entered into interest rate and cross currency swap agreements to manage our exposure to fluctuations in interest rates and foreign currency risks. The valuation of these instruments is determined using widely accepted valuation techniques, including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves, foreign exchange rates and implied volatilities. To comply with the provisions of ASC 820 and ASU No. 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs* (ASU 2011-04), we incorporate credit valuation adjustments to reflect both our own nonperformance risk and the respective counterparty s nonperformance risk in the fair value measurements. We have made the accounting policy election to use the exception under ASU 2011-04 (commonly referred to as the portfolio exception) with respect to measuring counterparty credit risk for derivative instruments.

Although we determined the majority of the inputs used to value our derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with our derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by us and our counterparties. We assessed the significance of the impact of the credit valuation adjustments on the overall valuation of our derivative positions, and at June 30, 2012 and December 31, 2011, we determined the credit valuation adjustments were not significant to the overall valuation of our derivatives.

Less amounts classified as current assets	(80)	(54)	(26)	
	$ 548	$	$ 416	$ 132
Liabilities:				
Cross currency swap (Income taxes and other liabilities)	$ 16	$	$ 16	$
Interest rate swaps (Income taxes and other liabilities)	399		399	

The following table summarizes the activity related to the auction rate and equity securities investments of our insurance subsidiaries which have fair value measurements based on significant unobservable inputs (Level 3) during the six months ended June 30, 2012 (dollars in millions):

Asset balances at December 31, 2011	$ 132
Unrealized gains included in other comprehensive income	2
Settlements	(63)
Asset balances at June 30, 2012	$ 71

The estimated fair value of our long-term debt was $28.146 billion and $27.199 billion at June 30, 2012 and December 31, 2011, respectively, compared to carrying amounts aggregating $27.041 billion and $27.052 billion, respectively. The estimates of fair value are generally based upon the quoted market prices or quoted market prices for similar issues of long-term debt with the same maturities.

NOTE 8 CONTINGENCIES

We operate in a highly regulated and litigious industry. As a result, various lawsuits, claims and legal and regulatory proceedings have been and can be expected to be instituted or asserted against us. The resolution of any such lawsuits, claims or legal and regulatory proceedings could have a material, adverse effect on our results of operations or financial position.

Health care companies are subject to numerous investigations by various governmental agencies. Under the federal false claims act (FCA) private parties have the right to bring *qui tam*, or whistleblower, suits against companies that submit false claims for payments to, or improperly retain overpayments from, the government. Some states have adopted similar state whistleblower and false claims provisions. Certain of our individual facilities have received government inquiries from federal and state agencies and our facilities may receive such inquiries in future periods. Depending on whether the underlying conduct in these or future inquiries or investigations could be considered systemic, their resolution could have a material, adverse effect on our results of operations or financial position.

We are subject to claims and suits arising in the ordinary course of business, including claims for personal injuries or wrongful restriction of, or interference with, physicians staff privileges. In certain of these actions the claimants may seek punitive damages against us which may not be covered by insurance. It is management s opinion that the ultimate resolution of these pending claims and legal proceedings will not have a material, adverse effect on our results of operations or financial position.

The Civil Division of the Department of Justice (DOJ) has contacted the Company in connection with its nationwide review of whether, in certain cases, hospital charges to the federal government relating to implantable cardio-defibrillators (ICDs) met the CMS criteria. In connection with this nationwide review, the DOJ has indicated that it will be reviewing certain ICD billing and medical records at 95 HCA hospitals; the review covers the period from October 2003 to the present. The review could potentially give rise to claims against the Company under the federal FCA or other statutes, regulations or laws. At this time, we cannot predict what effect, if any, this review or any resulting claims could have on the Company.

In July 2012, the Civil Division of the U.S. Attorney s Office in Miami requested information on reviews assessing the medical necessity of interventional cardiology services provided at any Company facility (other than peer reviews). Based upon the Company s review to date, which is not yet complete, the Company believes that such reviews have occurred at approximately 10 of its affiliated hospitals, located primarily in Florida. At this time, we cannot predict what effect, if any, the request or any resulting claims, including any potential claims under the federal False Claims Act, other statutes, regulations or laws, could have on the Company.

On October 28, 2011, a shareholder action was filed in the United States District Court for the Middle District of Tennessee. The case seeks to include, as a class, all persons who acquired the Company s stock pursuant or traceable to the Company s Registration Statement and Prospectus issued in connection with the March 9, 2011 initial public offering. The lawsuit asserts a claim under Section 11 of the Securities Act of 1933 against the Company, certain members of the board of directors, and certain underwriters in the offering. It further asserts a claim under Section 15 of the Securities Act of 1933 against the same members of the board of directors. The action alleged various deficiencies in the Company s disclosures in the Registration Statement. Subsequently, two additional class action complaints setting forth substantially similar claims were filed in the same federal court. All three cases were consolidated. On July 13, 2012, the lead plaintiff filed an amended complaint asserting claims under Sections 11 and 12(a)(2) of the Securities Act of 1933 against the Company, certain members of the board of directors, and certain underwriters in the offering. It further asserts a claim under Section 15 of the Securities Act of 1933 against the same members of the board of directors and Hercules Holdings II, LLC, a majority shareholder of the Company. The consolidated complaint alleges deficiencies in the Company s disclosures in the Registration

NOTE 9 COMPREHENSIVE INCOME AND CAPITAL STRUCTURE (continued)

On February 3, 2012, our Board of Directors declared a distribution to the Company s stockholders and holders of vested stock awards. The distribution was $2.00 per share and vested stock award, or $971 million in the aggregate, and was paid on February 29, 2012 to holders of record on February 16, 2012. The distribution was funded using funds available under our senior secured credit facilities.

NOTE 10 SEGMENT AND GEOGRAPHIC INFORMATION

We operate in one line of business, which is operating hospitals and related health care entities. Our operations are structured into three geographically organized groups: the National, Southwest and Central Groups. At June 30, 2012, the National Group includes 64 hospitals located in Florida, South Carolina, southern Georgia, Alaska, California, Nevada, Utah and Idaho, the Southwest Group includes 47 hospitals located in Colorado, Texas, Oklahoma and the Wichita, Kansas market, and the Central Group includes 46 hospitals located in Louisiana, Indiana, Kentucky, Tennessee, Virginia, New Hampshire, northern Georgia and the Kansas City market. We also operate six hospitals in England, and these facilities are included in the Corporate and other group.

Table of Contents

HCA HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 10 SEGMENT AND GEOGRAPHIC INFORMATION (continued)

Adjusted segment EBITDA is defined as income before depreciation and amortization, interest expense, losses on sales of facilities, losses on retirement of debt, termination of management agreement, income taxes and net income attributable to noncontrolling interests. We use adjusted segment EBITDA as an analytical indicator for purposes of allocating resources to geographic areas and assessing their performance. Adjusted segment EBITDA is commonly used as an analytical indicator within the health care industry, and also serves as a measure of leverage capacity and debt service ability. Adjusted segment EBITDA should not be considered as a measure of financial performance under generally accepted accounting principles, and the items excluded from adjusted segment EBITDA are significant components in understanding and assessing financial performance. Because adjusted segment EBITDA is not a measurement determined in accordance with generally accepted accounting principles and is thus susceptible to varying calculations, adjusted segment EBITDA, as presented, may not be comparable to other similarly titled measures of other companies. The Southwest Group s increases in revenues, adjusted segment EBITDA and depreciation and amortization, and the declines in equity in earnings of affiliates, for the quarter and six months ended June 30, 2012 compared to the quarter and six months ended June 30, 2011 are primarily attributable to the financial consolidation of our 2011 acquisition of our partner s interest in the HCA-HealthONE LLC venture for periods subsequent to our acquisition of controlling interests during October 2011. The geographic distributions of our revenues, equity in earnings of affiliates, adjusted segment EBITDA and depreciation and amortization for the quarters and six months ended June 30, 2012 and 2011 are summarized in the following table (dollars in millions):

	Quarter		Six Months	
	2012	2011	**2012**	2011
Revenues:				
National Group	**$ 3,143**	$ 3,013	**$ 6,431**	$ 6,117

NOTE 11 ACQUISITIONS AND DISPOSITIONS

During the six months ended June 30, 2012, we paid $58 million, assumed liabilities of $33 million and recorded goodwill of $53 million related to the acquisition of a hospital facility in the Southwest Group. During the six months ended June 30, 2011, we paid $136 million to acquire a hospital in the National Group. During the six months ended June 30, 2012 and 2011, we paid $81 million and $32 million, respectively, to acquire nonhospital health care entities. During the six months ended June 30, 2012, we recorded final adjustments to the purchase price allocation related to our 2011 acquisition of our partner s interest in the HCA-HealthONE LLC joint venture. These adjustments resulted in a $30 million increase to noncontrolling interests, a $26 million reduction to property and equipment and a $56 million increase to goodwill.

During the six months ended June 30, 2012, we received proceeds of $6 million and recognized net pretax losses of $3 million related to sales of real estate investments. During the six months ended June 30, 2011, we received proceeds of $54 million and recognized a net pretax loss of $1 million related to the sales of a hospital facility and our investment in a hospital joint venture.

NOTE 12 SUPPLEMENTAL CONDENSED CONSOLIDATING FINANCIAL INFORMATION

On November 22, 2010, HCA Inc. reorganized by creating a new holding company structure. HCA Holdings, Inc. became the new parent company, and HCA Inc. is now HCA Holdings, Inc. s wholly-owned direct subsidiary. On November 23, 2010, HCA Holdings, Inc. issued $1.525 billion aggregate principal amount of 7 $^{3}/_{4}$% senior unsecured notes due 2021. These notes are senior unsecured obligations and are not guaranteed by any of our subsidiaries.

Our senior secured credit facilities and senior secured notes are fully and unconditionally guaranteed by substantially all existing and future, direct and indirect, wholly-owned material domestic subsidiaries that are Unrestricted Subsidiaries under our Indenture dated December 16, 1993 (except for certain special purpose subsidiaries that only guarantee and pledge their assets under our senior secured asset-based revolving credit facility).

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This quarterly report on Form 10-Q includes certain disclosures which contain forward-looking statements. Forward-looking statements include statements regarding estimated EHR incentive income and related EHR operating expenses, expected capital expenditures and expected net claim payments and all other statements that do not relate solely to historical or current facts, and can be identified by the use of words like may, believe, will, expect, project, estimate, anticipate, plan, initiative or continue. These forward-looking statements are based on ou and expectations and are subject to a number of known and unknown uncertainties and risks, many of which are beyond our control, which could significantly affect current plans and expectations and our future financial position and results of operations. These factors include, but are not limited to, (1) the impact of our substantial indebtedness and the ability to refinance such indebtedness on acceptable terms, (2) the effects related to the enactment and implementation of the Budget Control Act of 2011 (BCA) and the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act (collectively, the Health Reform Law), the possible enactment of additional federal or state health care reforms and possible changes to the Health Reform Law and other federal, state or local laws or regulations affecting the health care industry, (3) increases in the amount and risk of collectibility of uninsured accounts and deductibles and copayment amounts for insured accounts, (4) the ability to achieve operating and financial targets, and attain expected levels of patient volumes and control the costs of providing services, (5) possible changes in the Medicare, Medicaid and other state programs, including Medicaid upper payment limit (UPL) programs or waiver programs, that may impact reimbursements to health care providers and insurers, (6) the highly competitive nature of the health care business, (7) changes in service mix, revenue mix and surgical volumes, including potential declines in the population covered under managed care agreements and the ability to enter into and renew managed care provider agreements on acceptable terms and the impact of consumer driven health plans and physician utilization trends and practices, (8) the efforts of insurers, health care providers and others to contain health care costs, (9) the outcome of our continuing efforts to monitor, maintain and comply with appropriate laws, regulations, policies and procedures, (10) increases in wages and the ability to attract and retain qualified management and personnel, including affiliated physicians, nurses and medical and technical support personnel, (11) the availability and terms of capital to fund the expansion of our business and improvements to our existing facilities, (12) changes in accounting practices, (13) changes in general economic conditions nationally and regionally in our markets, (14) future divestitures which may result in charges and possible impairments of long-lived assets, (15) changes in business strategy or development plans, (16) delays in receiving payments for services provided, (17) the outcome of pending and any future tax audits, appeals and litigation associated with our tax positions, (18) potential adverse impact of known and unknown government investigations, litigation and other claims that may be made against us, (19) our ongoing ability to demonstrate meaningful use of certified electronic health record technology and recognize income for the related Medicare or Medicaid incentive payments, and (20) other risk factors described in our annual report on Form 10-K for the year ended December 31, 2011 and our other filings with the Securities and Exchange Commission. As a consequence, current plans, anticipated actions and future financial position and results of operations may differ from those expressed in any forward-looking statements made by or on behalf of HCA. You are cautioned not to unduly rely on such forward-looking statements when evaluating the information presented in this report, which forward-looking statements reflect management s views only as of the date of this report. We undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise.

Health Care Reform

As enacted, the Health Reform Law will change how health care services are covered, delivered and reimbursed through expanded coverage of uninsured individuals, reduced growth in Medicare program spending, reductions in Medicare and Medicaid Disproportionate Share Hospital (DSH) payments, and the establishment of programs in which reimbursement is tied to quality and integration. In addition, the Health Reform Law

Table of Contents

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Health Care Reform (continued)

reforms certain aspects of health insurance, expands existing efforts to tie Medicare and Medicaid payments to performance and quality, and contains provisions intended to strengthen fraud and abuse enforcement. Numerous lawsuits have challenged the constitutionality of the Health Reform Law. On June 28, 2012, the United States Supreme Court upheld the constitutionality of the individual mandate provisions of the Health Reform Law but struck down the provisions that would have allowed the Department of Health and Human Services (HHS) to penalize states that do not implement the Medicaid expansion provisions with the loss of existing federal Medicaid funding. States that choose not to implement the Medicaid expansion will forego funding established by the Health Reform Law to cover most of the expansion costs. It is unclear how many states will decline to implement the Medicaid expansion. Further, repeal or modification of the Health Reform Law has become a theme in political campaigns during the 2012 election year. Due to these factors, we are unable to predict with any reasonable certainty or otherwise quantify the likely impact of the Health Reform Law on our business model, financial condition or result of operations.

Second Quarter 2012 Operations Summary

Net income attributable to HCA Holdings, Inc. totaled $391 million, or $0.85 per diluted share, for the quarter ended June 30, 2012, compared to $229 million, or $0.43 per diluted share, for the quarter ended June 30, 2011. Revenues increased to $8.112 billion in the second quarter of 2012 from $7.249 billion in the second quarter of 2011. Second quarter 2011 results include losses on retirement of debt of $75 million, or $0.08 per diluted share. All per diluted share disclosures are based upon amounts net of the applicable income taxes. Shares used for diluted earnings per share were 458.6 million shares for the quarter ended June 30, 2012 and 538.6 million shares for the quarter ended June 30, 2011.

Revenues increased 11.9% on a consolidated basis and increased 3.8% on a same facility basis for the quarter ended June 30, 2012, compared to the quarter ended June 30, 2011. The increase in consolidated revenues can be attributed primarily to the combined impact of a 2.0% increase in revenue per equivalent admission and a 9.7% increase in equivalent admissions. The same facility revenues increase resulted primarily from the combined net impact of a 0.1% decline in same facility revenue per equivalent admission and a 3.9% increase in same facility equivalent admissions. The increase in consolidated revenues (and consolidated volume metrics) for the second quarter of 2012 compared to the second quarter of 2011 is related primarily to the impact of the financial consolidation of the HCA-HealthONE LLC venture for periods subsequent to our acquisition of controlling interests during October 2011. The HealthONE venture s operating results and volume metrics are not included in our same facility amounts.

During the quarter ended June 30, 2012, consolidated admissions and same facility admissions increased 7.7% and 2.5%, respectively, compared to the quarter ended June 30, 2011. Inpatient surgeries increased 5.5% on a consolidated basis and declined 0.6% on a same facility basis during the quarter ended June 30, 2012, compared to the quarter ended June 30, 2011. Outpatient surgeries increased 10.4% on a consolidated basis and 0.3% on a same facility basis during the quarter ended June 30, 2012, compared to the quarter ended June 30, 2011. Emergency department visits increased 13.4% on a consolidated basis and 8.8% on a same facility basis during the quarter ended June 30, 2012, compared to the quarter ended June 30, 2011.

For the quarter ended June 30, 2012, the provision for doubtful accounts increased $266 million, compared to the quarter ended June 30, 2011. The self-pay revenue deductions for charity care and uninsured discounts increased $76 million and $278 million, respectively, during the second quarter of 2012, compared to the second quarter of 2011. The sum of the provision for doubtful accounts, uninsured discounts and charity care, as a percentage of the sum of revenues, provision for doubtful accounts, uninsured discounts and charity care, was

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Second Quarter 2012 Operations Summary (continued)

29.5% for the second quarter of 2012, compared to 27.7% for the second quarter of 2011. Same facility uninsured admissions increased 8.9% and same facility uninsured emergency room visits increased 9.8% for the quarter ended June 30, 2012, compared to the quarter ended June 30, 2011.

Interest expense declined $72 million to $448 million for the quarter ended June 30, 2012 from $520 million for the quarter ended June 30, 2011. The decline in interest expense was due to a decline in the average effective interest rate.

Cash flows from operating activities increased $712 million from $748 million for the second quarter of 2011 to $1.460 billion for the second quarter of 2012. The increase is primarily related to the combined impact of the increase from changes in working capital items of $525 million and the increase in net income of $165 million.

Results of Operations

Revenue/Volume Trends

Our revenues depend upon inpatient occupancy levels, the ancillary services and therapy programs ordered by physicians and provided to patients, the volume of outpatient procedures and the charge and negotiated payment rates for such services. Gross charges typically do not reflect what our facilities are actually paid. Our facilities have entered into agreements with third-party payers, including government programs and managed care health plans, under which the facilities are paid based upon the cost of providing services, predetermined rates per diagnosis, fixed per diem rates or discounts from gross charges. We do not pursue collection of amounts related to patients who meet our guidelines to qualify for charity care; therefore, they are not reported in revenues. We provide discounts to uninsured patients who do not qualify for Medicaid or charity care. These discounts are similar to those provided to many local managed care plans. After the discounts are applied, we are still unable to collect a significant portion of uninsured patients accounts, and we record significant provisions for doubtful accounts (based upon our historical collection experience) related to uninsured patients in the period the services are provided.

We adopted the provisions of Accounting Standards Update (ASU) No. 2011-07, *Presentation and Disclosure of Patient Service Revenue, Provision for Bad Debts, and the Allowance for Doubtful Accounts for Certain Health Care Entities* (ASU 2011-07), during 2011. ASU 2011-07 requires health care entities to change the presentation of the statement of operations by reclassifying the provision for doubtful accounts from an operating expense to a deduction from patient service revenues. Operating results for the quarter and six months ended June 30, 2011 have been reclassified in accordance with ASU 2011-07.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Results of Operations (continued)

Revenue/Volume Trends (continued)

Revenues increased 11.9% from $7.249 billion in the second quarter of 2011 to $8.112 billion in the second quarter of 2012. Revenues are recorded during the period the health care services are provided, based upon the estimated amounts due from the patients and third-party payers. Third-party payers include federal and state agencies (under the Medicare, Medicaid and other programs), managed care health plans, commercial insurance companies and employers. Estimates of contractual allowances under managed care health plans are based upon the payment terms specified in the related contractual agreements. Revenues related to uninsured patients and copayment and deductible amounts for patients who have health care coverage may have discounts applied (uninsured discounts and contractual discounts). We also record a provision for doubtful accounts related to uninsured accounts to record the net self pay accounts receivable at the estimated amounts we expect to collect. Our revenues from our third-party payers, the uninsured and other revenues for the quarters and six months ended June 30, 2012 and 2011 are summarized in the following tables (dollars in millions):

	Quarter			
	2012	Ratio	2011	Ratio
Medicare	$ 1,989	24.5%	$ 1,871	25.8%
Managed Medicare	729	9.0	584	8.1

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Results of Operations (continued)

Revenue/Volume Trends (continued)

The increase in revenues for the first six months of 2012 compared to the first six months of 2011 includes two adjustments (Rural Floor Provision Settlement and SSI ratios) related to Medicare revenues for prior periods. The net effect of the Medicare adjustments was an increase of $188 million to revenues. The Rural Floor Provision Settlement was signed on April 5, 2012. As a result of the agreement, we received additional Medicare payments of approximately $271 million during June 2012. This amount was recorded as an increase to Medicare revenues during the first quarter of 2012. During March 2012, the Centers for Medicare & Medicaid Services (CMS) issued new SSI ratios used for calculating Medicare DSH reimbursement for federal fiscal years ending September 30, 2006 through September 30, 2009. As a result, we recalculated our DSH reimbursement for all applicable periods. The cumulative impact of this retroactive adjustment was a reduction in Medicare revenues of approximately $83 million. This adjustment was recorded as a reduction to Medicare revenues during the first quarter of 2012.

We previously reported $39 million of Medicaid EHR incentives for the quarter and six months ended June 30, 2011 in the line item Revenues in our condensed consolidated income statements. This amount has been reclassified and is now included in the line item Electronic health record incentive income in our condensed consolidated comprehensive income statements for the quarter and six months ended June 30, 2011.

Consolidated and same facility revenue per equivalent admission increased 2.0% and declined 0.1%, respectively, in the second quarter of 2012, compared to the second quarter of 2011. Consolidated and same facility equivalent admissions increased 9.7% and 3.9%, respectively, in the second quarter of 2012, compared to the second quarter of 2011. Consolidated and same facility admissions increased 7.7% and 2.5%, respectively, in the second quarter of 2012, compared to the second quarter of 2011. Consolidated and same facility outpatient surgeries increased 10.4% and 0.3%, respectively, in the second quarter of 2012, compared to the second quarter of 2011. Consolidated and same facility inpatient surgeries increased 5.5% and declined 0.6%, respectively, in the second quarter of 2012, compared to the second quarter of 2011. Consolidated and same facility emergency department visits increased 13.4% and 8.8%, respectively, in the second quarter of 2012, compared to the second quarter of 2011.

To quantify the total impact of and trends related to uninsured accounts, we believe it is beneficial to view the direct uninsured revenue deductions and provision for doubtful accounts in combination, rather than each separately. At June 30, 2012, our allowance for doubtful accounts represented approximately 92% of the $4.805 billion total patient due accounts receivable balance. The patient due accounts receivable balance represents the estimated uninsured portion of our accounts receivable. A summary of these adjustments to revenues amounts, related to uninsured accounts, for the quarters and six months ended June 30, 2012 and 2011 follows (dollars in millions):

	Quarter				Six Months			
	2012	**Ratio**	**2011**	**Ratio**	**2012**	**Ratio**	**2011**	**Ratio**
Charity care	**$ 733**	**21%**	$ 657	24%	**$ 1,531**	**23%**	$ 1,292	24%
Uninsured discounts	**1,620**	**48**	1,342	48	**3,259**	**49**	2,615	49
Provision for doubtful accounts	**1,041**	**31**	775	28	**1,835**	**28**	1,424	27
Totals	**$ 3,394**	**100%**	$ 2,774	100%	**$ 6,625**	**100%**	$ 5,331	100%

Same facility uninsured admissions increased by 2,589 admissions, or 8.9%, in the second quarter of 2012, compared to the second quarter of 2011. Same facility uninsured admissions increased 11.6% in the first quarter of 2012, compared to the first quarter of 2011. Same facility uninsured admissions in 2011, compared to 2010, increased by 5.2% in the fourth quarter of 2011, 8.8% in the third quarter of 2011, 10.6% in

the second quarter of 2011 and 4.7% in the first quarter of 2011.

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Results of Operations (continued)

Revenue/Volume Trends (continued)

The approximate percentages of our admissions related to Medicare, managed Medicare, Medicaid, managed Medicaid, managed care and other insurers and the uninsured for the quarters and six months ended June 30, 2012 and 2011 are set forth in the following table.

	Quarter		Six Months	
	2012	2011	2012	2011
Medicare	**33%**	35%	**34%**	35%
Managed Medicare	**12**	11	**12**	11
Medicaid	**8**	9	**8**	9
Managed Medicaid	**8**	7	**8**	7
Managed care and other insurers	**31**	31	**31**	31
Uninsured	**8**	7	**7**	7
	100%	100%	**100%**	100%

The approximate percentages of our inpatient revenues, before provision for doubtful accounts, related to Medicare, managed Medicare, Medicaid, managed Medicaid, managed care and other insurers and the uninsured for the quarters and six months ended June 30, 2012 and 2011 are set forth in the following table.

	Quarter		Six Months	
	2012	2011	2012	2011
Medicare	**29%**	31%	**31%**	32%
Managed Medicare	**10**	9	**10**	9
Medicaid	**6**	9	**6**	9
Managed Medicaid	**4**	4	**4**	4
Managed care and other insurers	**45**	44	**45**	44
Uninsured	**6**	3	**4**	2
	100%	100%	**100%**	100%

At June 30, 2012, we had 75 hospitals in the states of Texas and Florida. During the second quarter of 2012, 53% of our admissions and 46% of our revenues were generated by these hospitals. Uninsured admissions in Texas and Florida represented 57% of our uninsured admissions during the second quarter of 2012.

We receive a significant portion of our revenues from government health programs, principally Medicare and Medicaid, which are highly regulated and subject to frequent and substantial changes. We provide indigent care services in several communities in the state of Texas, in affiliation with other hospitals. The state of Texas has been involved in efforts to increase the indigent care provided by private hospitals. As a result of additional indigent care being provided by private hospitals, public hospital districts or counties in Texas have available funds that were

previously devoted to indigent care. The public hospital districts or counties are under no contractual or legal obligation to provide such indigent care. The public hospital districts or counties have elected to transfer some portion of these available funds to the state s Medicaid program. Such action is at the sole discretion of the public hospital districts or counties. It is anticipated that these contributions to the state will be matched with federal Medicaid funds. The state then may make supplemental payments to hospitals in the state for Medicaid services rendered. Hospitals receiving Medicaid supplemental payments may include those that are providing additional indigent care services. Our Texas Medicaid revenues included $112 million and $134 million during the second quarters of 2012 and 2011, respectively,

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Results of Operations (continued)

Revenue/Volume Trends (continued)

and $240 million and $301 million during the first six months of 2012 and 2011, respectively, of Medicaid supplemental payments. In addition, we receive supplemental payments in several other states. We are aware these supplemental payment programs are currently being reviewed by certain state agencies and some states have made waiver requests to CMS to replace their existing supplemental payment programs. It is possible these reviews and waiver requests will result in the restructuring of such supplemental payment programs and could result in the payment programs being reduced or eliminated. In 2011, CMS approved a Medicaid waiver that allows Texas to continue receiving supplemental Medicaid reimbursement while expanding its Medicaid managed care program, thus Texas is operating pursuant to a waiver program. However, we cannot predict whether the Texas private supplemental Medicaid reimbursement program will continue or guarantee that revenues recognized for the program will not decline. Because deliberations about these programs are ongoing, we are unable to estimate the financial impact the program structure modifications, if any, may have on our results of operations.

Electronic Health Record Incentive Payments

The American Recovery and Reinvestment Act of 2009 provides for Medicare and Medicaid incentive payments beginning in 2011 for eligible hospitals and professionals that adopt and meaningfully use certified electronic health record (EHR) technology. We recognize income related to Medicare and Medicaid incentive payments using a gain contingency model that is based upon when our eligible hospitals have demonstrated meaningful use of certified EHR technology for the applicable period and the cost report information for the full cost report year that will determine the final calculation of the incentive payment is available.

Medicaid EHR incentive calculations and related payment amounts are based upon prior period cost report information available at the time our eligible hospitals adopt, implement or demonstrate meaningful use of certified EHR technology for the applicable period, and are not subject to revision for cost report data filed for a subsequent period. Thus, incentive income recognition occurs at the point our eligible hospitals adopt, implement or demonstrate meaningful use of certified EHR technology for the applicable period, as the cost report information for the full cost report year that will determine the final calculation of the incentive payment is known at that time.

Medicare EHR incentive calculations and related initial payment amounts are based upon the most current filed cost report information available at the time our eligible hospitals demonstrate meaningful use of certified EHR technology for the applicable period. However, unlike Medicaid, this initial payment amount will be adjusted based upon an updated calculation using the annual cost report information for the cost report period that began during the applicable payment year. Thus, incentive income recognition occurs at the point our eligible hospitals demonstrate meaningful use of certified EHR technology for the applicable period and the cost report information for the full cost report year that will determine the final calculation of the incentive payment is available.

We recognized $70 million of electronic health record incentive income related to Medicare incentive programs during the second quarter of 2012, and we recognized $39 million of electronic health record incentive income related to Medicaid incentive programs during the second quarter of 2011. We recognized $125 million ($122 million Medicare and $3 million Medicaid) and $39 million (all Medicaid) of electronic health record incentive income during the first six months of 2012 and 2011, respectively. We previously reported $39 million of Medicaid EHR incentives for the quarter and six months ended June 30, 2011 in the line item Revenues in our condensed consolidated income statements. This amount has been reclassified and is now included in the line item Electronic health record incentive income in our condensed consolidated comprehensive income statements for the quarter and six months ended June 30, 2011. At June 30, 2012, we have $33 million of deferred EHR incentive income, which represents initial incentive payments received for which EHR incentive income has not been recognized.

35

Table of Contents

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Results of Operations (continued)

Electronic Health Record Incentive Payments (continued)

We have incurred and will continue to incur both capital costs and operating expenses in order to implement our certified EHR technology and meet meaningful use requirements. These expenses are ongoing and are projected to continue over all stages of implementation of meaningful use. The timing of recognition of the expenses may not correlate with the receipt of the incentive payments and the recognition of income. We incurred $20 million and $24 million during the second quarters of 2012 and 2011, respectively, and $37 million and $44 million during the first six months of 2012 and 2011, respectively, of operating expenses to implement our certified EHR technology and meet meaningful use.

For 2012, we estimate EHR incentive income will be recognized in the range of $325 million to $350 million and that related EHR operating expenses will be in the range of $90 million to $115 million. Actual EHR incentive income and EHR operating expenses could vary from these estimates due to certain factors, including the availability of federal funding for both Medicare and Medicaid incentive payments, timing of the approval of state Medicaid incentive payment plans by CMS and our ability to continue to demonstrate meaningful use of certified EHR technology. The failure of any of these factors to occur could have a material, adverse effect on our results of operations.

Revenue per equivalent admission	**0.1**	1.3

(a) Represents the total number of patients admitted to our hospitals and is used by management and certain investors as a general measure of inpatient volume.

(b) Equivalent admissions are used by management and certain investors as a general measure of combined inpatient and outpatient volume. Equivalent admissions are computed by multiplying admissions (inpatient volume) by the sum of gross inpatient revenues and gross outpatient revenues and then dividing the resulting amount by gross inpatient revenues. The equivalent admissions computation equates outpatient revenues to the volume measure (admissions) used to measure inpatient volume, resulting in a general measure of combined inpatient and outpatient volume.

(c) Same facility information excludes the operations of hospitals and their related facilities which were either acquired or divested during the current and prior period.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Results of Operations (continued)

Quarters Ended June 30, 2012 and 2011

Net income attributable to HCA Holdings, Inc. totaled $391 million, or $0.85 per diluted share, for the second quarter of 2012 compared to $229 million, or $0.43 per diluted share, for the second quarter of 2011. Second quarter 2011 results include losses on retirement of debt of $75 million, or $0.08 per diluted share. All per diluted share disclosures are based upon amounts net of the applicable income taxes. Shares used for diluted earnings per share were 458.6 million shares and 538.6 million shares for the quarters ended June 30, 2012 and 2011, respectively.

For the second quarter of 2012, consolidated and same facility admissions increased 7.7% and 2.5%, respectively, compared to the second quarter of 2011. Consolidated and same facility outpatient surgical volumes increased 10.4% and 0.3%, respectively, during the second quarter of 2012, compared to the second quarter of 2011. Consolidated and same facility inpatient surgeries increased 5.5% and declined 0.6%, respectively, in the second quarter of 2012, compared to the second quarter of 2011. Consolidated and same facility emergency department visits increased 13.4% and 8.8%, respectively, during the quarter ended June 30, 2012, compared to the quarter ended June 30, 2011.

Revenues before provision for doubtful accounts increased 14.1% for the second quarter of 2012 compared to the second quarter of 2011. Provision for doubtful accounts increased $266 million from $775 million in the second quarter of 2011 to $1.041 billion in the second quarter of 2012. The provision for doubtful accounts relates primarily to uninsured amounts due directly from patients, including copayment and deductible amounts for patients who have health care coverage. The self-pay revenue deductions for charity care and uninsured discounts increased $76 million and $278 million, respectively, during the second quarter of 2012, compared to the second quarter of 2011. The sum of the provision for doubtful accounts, uninsured discounts and charity care, as a percentage of the sum of revenues, the provision for doubtful accounts, uninsured discounts and charity care, was 29.5% for the second quarter of 2012, compared to 27.7% for the second quarter of 2011. At June 30, 2012, our allowance for doubtful accounts represented approximately 92% of the $4.805 billion total patient due accounts receivable balance, including accounts, net of estimated contractual discounts, related to patients for which eligibility for Medicaid coverage or uninsured discounts was being evaluated.

Revenues increased 11.9% primarily due to the combined impact of revenue per equivalent admission growth of 2.0% and an increase of 9.7% in equivalent admissions for the second quarter of 2012 compared to the second quarter of 2011. Same facility revenues increased 3.8% due to the combined net impact of a 0.1% decline in same facility revenue per equivalent admission and a 3.9% increase in same facility equivalent admissions for the second quarter of 2012 compared to the second quarter of 2011. The increase in revenues for the second quarter of 2012 compared to the second quarter of 2011 is related primarily to the financial consolidation of our 2011 acquisition of our partner s interest in the HCA-HealthONE LLC venture for periods subsequent to our acquisition of controlling interests during October 2011 (HealthONE revenues are not included in same facility amounts).

Salaries and benefits, as a percentage of revenues, were 45.7% in the second quarter of 2012 and 45.8% in the second quarter of 2011. Salaries and benefits per equivalent admission increased 1.8% in the second quarter of 2012 compared to the second quarter of 2011. Same facility labor rate increases averaged 1.3% for the second quarter of 2012 compared to the second quarter of 2011.

Supplies, as a percentage of revenues, were 17.5% in the second quarter of 2012 and 17.9% in the second quarter of 2011. Supply cost per equivalent admission increased 0.1% in the second quarter of 2012 compared to the second quarter of 2011. Supply costs per equivalent admission increased 1.5% for medical devices and 1.2% for general medical and surgical items and declined 1.8% for pharmacy supplies and 5.7% for blood products in the second quarter of 2012 compared to the second quarter of 2011.

Table of Contents

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Results of Operations (continued)

Quarters Ended June 30, 2012 and 2011 (continued)

Other operating expenses, as a percentage of revenues, increased to 18.5% in the second quarter of 2012 from 18.2% in the second quarter of 2011. Other operating expenses is primarily comprised of contract services, professional fees, repairs and maintenance, rents and leases, utilities, insurance (including professional liability insurance) and nonincome taxes. Other operating expenses include $71 million and $79 million of indigent care costs in certain Texas markets during the second quarters of 2012 and 2011, respectively. Provisions for losses related to professional liability risks were $77 million and $60 million for the second quarters of 2012 and 2011, respectively.

We recognized $70 million of electronic health record incentive income related to Medicare incentive programs during the second quarter of 2012, and we recognized $39 million of electronic health record incentive income related to Medicaid incentive programs during the second quarter of 2011. We recognize income related to Medicare and Medicaid incentive payments using a gain contingency model that is based upon when our eligible hospitals have demonstrated meaningful use of certified EHR technology for the applicable period and the cost report information for the full cost report year that will determine the final calculation of the incentive payment is available.

Equity in earnings of affiliates was $9 million and $73 million in the second quarters of 2012 and 2011, respectively. Equity in earnings of affiliates for the second quarter of 2011 relates primarily to our Denver, Colorado market (HealthONE) joint venture, which effective November 1, 2011, we began consolidating due to our acquisition of our partner s ownership interest.

Depreciation and amortization increased $62 million, from $358 million in the second quarter of 2011 to $420 million in the second quarter of 2012. The increase was primarily related to the consolidation of HealthONE.

Interest expense declined from $520 million in the second quarter of 2011 to $448 million in the second quarter of 2012 due to a decline in the average effective interest rate. Our average debt balance was $27.541 billion for the second quarter of 2012 compared to $25.437 billion for the second quarter of 2011. The average effective interest rate for our long term debt declined from 8.2% for the quarter ended June 30, 2011 to 6.5% for the quarter ended June 30, 2012 due primarily to debt refinancing transactions completed during 2011.

During the second quarter of 2012, we recorded net losses on sales of facilities of $2 million.

During the second quarter of 2011, we recorded losses on retirement of debt of $75 million related to the redemptions of all $1.000 billion aggregate principal amount of our $9\,^{1}/_{8}$% senior secured notes due 2014, at a redemption price of 104.563% of the principal amount, and $108 million aggregate principal amount of our $9\,^{7}/_{8}$% senior secured notes due 2017, at a redemption price of 109.875% of the principal amount.

The effective tax rates were 35.5% and 39.1% for the second quarters of 2012 and 2011, respectively. The effective tax rate computations exclude net income attributable to noncontrolling interests as it relates to consolidated partnerships. Our provision for income taxes for the second quarter of 2012 was reduced by $11 million related to a reduction in interest expense related to taxing authority examinations. Excluding the effect of this adjustment, the effective tax rate for the second quarter of 2012 would have been 37.4%.

Net income attributable to noncontrolling interests increased from $91 million for the second quarter of 2011 to $94 million for the second quarter of 2012.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Results of Operations (continued)

Six Months Ended June 30, 2012 and 2011

Net income attributable to HCA Holdings, Inc. totaled $931 million, or $2.03 per diluted share, in the six months ended June 30, 2012 compared to $469 million, or $0.94 per diluted share, in the six months ended June 30, 2011. The first six months of 2012 results include two Medicare adjustments (and related expenses) that added $170 million to income before income taxes, or $0.22 per diluted share. The first six months of 2011 results include a charge of $181 million, or $0.30 per diluted share, related to the termination of the management agreement between HCA and the Investors upon the completion of our initial public offering and $75 million, or $0.09 per diluted share, of losses on retirement of debt. All per diluted share disclosures are based upon amounts net of the applicable income taxes. Shares used for diluted earnings per share were 458.5 million shares and 500.5 million shares for the six months ended June 30, 2012 and 2011, respectively.

For the first six months of 2012, consolidated and same facility admissions increased 8.3% and 2.9%, respectively, compared to the first six months of 2011. Consolidated and same facility outpatient surgical volumes increased 11.5% and 1.4%, respectively, during the first six months of 2012, compared to the first six months of 2011. Consolidated and same facility inpatient surgeries increased 6.3% and 0.4%, respectively, in the first six months of 2012, compared to the first six months of 2011. Consolidated and same facility emergency department visits increased 11.9% and 7.1%, respectively, during the six months ended June 30, 2012, compared to the six months ended June 30, 2011.

Revenues before provision for doubtful accounts increased 14.1% for the first six months of 2012 compared to the first six months of 2011. Provision for doubtful accounts increased $411 million from $1.424 billion in the first six months of 2011 to $1.835 billion in the first six months of 2012. The provision for doubtful accounts relates primarily to uninsured amounts due directly from patients, including copayment and deductible amounts for patients who have health care coverage. The self-pay revenue deductions for charity care and uninsured discounts increased $239 million and $644 million, respectively, during the first six months of 2012, compared to the first six months of 2011. The sum of the provision for doubtful accounts, uninsured discounts and charity care, as a percentage of the sum of revenues, the provision for doubtful accounts, uninsured discounts and charity care, was 28.6% for the first six months of 2012, compared to 26.7% for the first six months of 2011. At June 30, 2012, our allowance for doubtful accounts represented approximately 92% of the $4.805 billion total patient due accounts receivable balance, including accounts, net of estimated contractual discounts, related to patients for which eligibility for Medicaid coverage or uninsured discounts was being evaluated.

Revenues increased 12.7% primarily due to the combined impact of revenue per equivalent admission growth of 2.0% and an increase of 10.5% in equivalent admissions for the first six months of 2012 compared to the first six months of 2011. Same facility revenues increased 4.5% due to the combined impact of a 0.1% increase in same facility revenue per equivalent admission and a 4.4% increase in same facility equivalent admissions for the first six months of 2012 compared to the first six months of 2011. The increase in revenues for the first six months of 2012 compared to the first six months of 2011 is related primarily to the combined impact of the financial consolidation of our 2011 acquisition of our partner s interest in the HCA-HealthONE LLC venture for periods subsequent to our acquisition of controlling interests during October 2011 (HealthONE revenues are not included in same facility amounts) and two adjustments (Rural Floor Provision Settlement and SSI ratios) related to Medicare revenues for prior periods. The net effect of the Medicare adjustments was an increase of $188 million to revenues.

Salaries and benefits, as a percentage of revenues, were 45.1% in the first six months of both 2012 and 2011. Salaries and benefits per equivalent admission increased 1.8% in the first six months of 2012 compared to the first six months of 2011. Same facility labor rate increases averaged 1.5% for the first six months of 2012 compared to the first six months of 2011.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Results of Operations (continued)

Six Months Ended June 30, 2012 and 2011 (continued)

Supplies, as a percentage of revenues, were 17.2% in the first six months of 2012 and 17.5% in the first six months of 2011. Supply cost per equivalent admission was unchanged in the first six months of 2012 compared to the first six months of 2011. Supply costs per equivalent admission increased 1.0% for medical devices and declined 1.5% for pharmacy supplies, 0.1% for general medical and surgical items and 5.8% for blood products in the first six months of 2012 compared to the first six months of 2011.

Other operating expenses, as a percentage of revenues, declined to 18.1% in the first six months of 2012 from 18.2% in the first six months of 2011. Other operating expenses is primarily comprised of contract services, professional fees, repairs and maintenance, rents and leases, utilities, insurance (including professional liability insurance) and nonincome taxes. Other operating expenses include $151 million and $170 million of indigent care costs in certain Texas markets during the first six months of 2012 and 2011, respectively. Provisions for losses related to professional liability risks were $171 million and $121 million for the first six months of 2012 and 2011, respectively.

We recognized $125 million ($122 million Medicare and $3 million Medicaid) and $39 million (all Medicaid) of electronic health record incentive income during the first six months of 2012 and 2011, respectively. We recognize income related to Medicare and Medicaid incentive payments using a gain contingency model that is based upon when our eligible hospitals have demonstrated meaningful use of certified EHR technology for the applicable period and the cost report information for the full cost report year that will determine the final calculation of the incentive payment is available.

Equity in earnings of affiliates was $20 million and $149 million in the first six months of 2012 and 2011, respectively. Equity in earnings of affiliates for the first six months of 2011 relates primarily to our Denver, Colorado market (HealthONE) joint venture, which effective November 1, 2011, we began consolidating due to our acquisition of our partner s ownership interest.

Depreciation and amortization increased $121 million, from $716 million in the first six months of 2011 to $837 million in the first six months of 2012. The increase was primarily related to the consolidation of HealthONE.

Interest expense declined from $1.053 billion in the first six months of 2011 to $890 million in the first six months of 2012 due to a decline in the average effective interest rate. Our average debt balance was $27.487 billion for the first six months of 2012 compared to $26.544 billion for the first six months of 2011. The average effective interest rate for our long term debt declined from 8.0% for the six months ended June 30, 2011 to 6.5% for the six months ended June 30, 2012 due primarily to debt refinancing transactions completed during 2011.

During the first six months of 2012 and 2011, we recorded net losses on sales of facilities of $3 million and $1 million, respectively.

During the first six months of 2011, we recorded losses on retirement of debt of $75 million related to the redemptions of all $1.000 billion aggregate principal amount of our 9 $^{1}/_{8}$% senior secured notes due 2014, at a redemption price of 104.563% of the principal amount, and $108 million aggregate principal amount of our 9 $^{7}/_{8}$% senior secured notes due 2017, at a redemption price of 109.875% of the principal amount.

Our Investors provided management and advisory services to the Company, pursuant to a management agreement among HCA and the Investors executed in connection with the Investors acquisition of HCA in November 2006. In March 2011, the management agreement was terminated pursuant to its terms upon completion of the initial public offering of our common stock, and the Investors were paid a final fee of $181 million.

Table of Contents

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Results of Operations (continued)

Six Months Ended June 30, 2012 and 2011 (continued)

The effective tax rates were 36.6% and 41.3% for the first six months of 2012 and 2011, respectively. The effective tax rate computations exclude net income attributable to noncontrolling interests as it relates to consolidated partnerships. Our provision for income taxes for the first six months of 2012 was reduced by $13 million related to a reduction in interest expense related to taxing authority examinations. Our provision for income taxes for the first six months of 2011 increased by $16 million related to adjustments to our liability for unrecognized tax benefits, including reductions in interest expense related to taxing authority examinations. Excluding the effect of these adjustments, the effective tax rates for the first six months of 2012 and 2011 would have been 37.5% and 39.3%, respectively.

Net income attributable to noncontrolling interests increased from $185 million for the first six months of 2011 to $193 million for the first six months of 2012.

Liquidity and Capital Resources

Cash provided by operating activities totaled $2.257 billion in the first six months of 2012 compared to $1.666 billion in the first six months of 2011. The $591 million increase in cash provided by operating activities in the first six months of 2012 compared to the first six months of 2011 related primarily to the combined impact of the increase from changes in working capital items of $60 million and the increase in net income of $470 million. The combined interest payments and net tax payments (refunds) in the first six months of 2012 and 2011 were $995 million and $1.007 billion, respectively. Working capital totaled $1.690 billion at June 30, 2012 and $1.679 billion at December 31, 2011.

Cash used in investing activities was $886 million in the first six months of 2012 compared to $812 million in the first six months of 2011. Excluding acquisitions, capital expenditures were $784 million in the first six months of 2012 and $776 million in the first six months of 2011. We expended $58 million for the acquisition of a hospital facility and $81 million to acquire nonhospital health care facilities during the first six months of 2012. We expended $136 million for the acquisition of a hospital facility and $32 million to acquire nonhospital health care facilities during the first six months of 2011. Capital expenditures are expected to approximate $1.83 billion in 2012. At June 30, 2012, there were projects under construction which had estimated additional costs to complete and equip over the next five years of approximately $1.69 billion. We expect to finance capital expenditures with internally generated and borrowed funds. We received $6 million and $54 million from sales of health care entities during the first six months of 2012 and 2011, respectively. We received net cash flows from our investments of $35 million and $76 million in the first six months of 2012 and 2011, respectively.

Cash used in financing activities totaled $1.226 billion during the first six months of 2012 compared to $726 million during the first six months of 2011. During the first six months of 2012, net cash flows used in financing activities included net debt repayments of $78 million, distributions to noncontrolling interests of $191 million, distributions to stockholders of $982 million, payments of debt issuance costs of $19 million and receipts of $71 million of income tax benefits for certain items (primarily distributions to holders of our stock options). During the first six months of 2011, net cash flows used in financing activities included reductions in net borrowings of $3.032 billion, net proceeds of $2.506 billion related to the issuance of common stock in conjunction with our initial public offering, distributions to noncontrolling interests of $185 million, distributions to stockholders of $30 million, payments of debt issuance costs of $12 million and receipts of $49 million of income tax benefits for certain items (primarily distributions to holders of our stock options).

We are a highly leveraged company with significant debt service requirements. Our debt totaled $27.041 billion at June 30, 2012. Our interest expense was $890 million for the first six months of 2012 and $1.053 billion for the first six months of 2011. The decline in interest expense was related to a decline in the average effective interest rate.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Liquidity and Capital Resources (continued)

In addition to cash flows from operations, available sources of capital include amounts available under our senior secured credit facilities ($3.100 billion and $3.475 billion available as of June 30, 2012 and July 31, 2012, respectively) and anticipated access to public and private debt markets.

During April 2012, we extended $75 million of our term loan A-1 facility with a final maturity of November 2012 and $651 million of our term loan B-1 facility with a final maturity of November 2013 to term loan A-3 with a final maturity of February 2016.

During February 2012, our Board of Directors declared a distribution to the Company s stockholders and holders of vested stock awards. The distribution declared was $2.00 per share and vested stock award, or approximately $971 million in the aggregate.

During February 2012, we issued $1.350 billion aggregate principal amount of 5.875% senior secured notes due 2022. After the payment of related fees and expenses, we used the proceeds for general corporate purposes.

Investments of our insurance subsidiaries, to maintain statutory equity and pay claims, totaled $621 million and $628 million at June 30, 2012 and December 31, 2011, respectively. An insurance subsidiary maintained net reserves for professional liability risks of $341 million and $410 million at June 30, 2012 and December 31, 2011, respectively. Our facilities are insured by a wholly-owned insurance subsidiary for losses up to $50 million per occurrence; however, this coverage is subject to a $5 million per occurrence self-insured retention. Net reserves for the self-insured professional liability risks retained were $948 million and $842 million at June 30, 2012 and December 31, 2011, respectively. Claims payments, net of reinsurance recoveries, during the next 12 months are expected to approximate $289 million. We estimate that approximately $221 million of the expected net claim payments during the next 12 months will relate to claims subject to the self-insured retention.

Management believes that cash flows from operations, amounts available under our senior secured credit facilities and our anticipated access to public and private debt markets will be sufficient to meet expected liquidity needs during the next 12 months.

Market Risk

We are exposed to market risk related to changes in market values of securities. The investments in debt and equity securities of our wholly-owned insurance subsidiaries were $613 million and $8 million, respectively, at June 30, 2012. These investments are carried at fair value, with changes in unrealized gains and losses being recorded as adjustments to other comprehensive income. At June 30, 2012, we had a net unrealized gain of $15 million on the insurance subsidiaries investment securities.

We are exposed to market risk related to market illiquidity. Investments in debt and equity securities of our wholly-owned insurance subsidiaries could be impaired by the inability to access the capital markets. Should the wholly-owned insurance subsidiaries require significant amounts of cash in excess of normal cash requirements to pay claims and other expenses on short notice, we may have difficulty selling these investments in a timely manner or be forced to sell them at a price less than what we might otherwise have been able to in a normal market environment. At June 30, 2012, our wholly-owned insurance subsidiaries had invested $70 million ($76 million par value) in tax-exempt student loan auction rate securities that continue to experience market illiquidity. It is uncertain if auction-related market liquidity will resume for these securities. We may be required to recognize other-than-temporary impairments on these long-term investments in future periods should issuers default on interest payments or should the fair market valuations of the securities deteriorate due to ratings downgrades or other issue specific factors.

We are also exposed to market risk related to changes in interest rates, and we periodically enter into interest rate swap agreements to manage our exposure to these fluctuations. Our interest rate swap agreements

44

Table of Contents

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Liquidity and Capital Resources (continued)

Market Risk (continued)

involve the exchange of fixed and variable rate interest payments between two parties, based on common notional principal amounts and maturity dates. The notional amounts of the swap agreements represent balances used to calculate the exchange of cash flows and are not our assets or liabilities. Our credit risk related to these agreements is considered low because the swap agreements are with creditworthy financial institutions. The interest payments under these agreements are settled on a net basis. These derivatives have been recognized in the financial statements at their respective fair values. Changes in the fair value of these derivatives, which are designated as cash flow hedges, are included in other comprehensive income, and changes in the fair value of derivatives which have not been designated as hedges are recorded in operations.

With respect to our interest-bearing liabilities, approximately $4.078 billion of long-term debt at June 30, 2012 was subject to variable rates of interest, while the remaining balance in long-term debt of $22.963 billion at June 30, 2012 was subject to fixed rates of interest. Both the general level of interest rates and, for the senior secured credit facilities, our leverage affect our variable interest rates. Our variable debt is comprised primarily of amounts outstanding under the senior secured credit facilities. Borrowings under the senior secured credit facilities bear interest at a rate equal to an applicable margin plus, at our option, either (a) a base rate determined by reference to the higher of (1) the federal funds rate plus 0.50% and (2) the prime rate of Bank of America, or (b) a LIBOR rate for the currency of such borrowing for the relevant interest period. The applicable margin for borrowings under the senior secured credit facilities may fluctuate according to a leverage ratio. The average effective interest rate for our long-term debt declined from 8.0% for the six months ended June 30, 2011 to 6.5% for the six months ended June 30, 2012.

The estimated fair value of our total long-term debt was $28.146 billion at June 30, 2012. The estimates of fair value are based upon the quoted market prices for the same or similar issues of long-term debt with the same maturities. Based on a hypothetical 1% increase in interest rates, the potential annualized reduction to future pretax earnings would be approximately $41 million. To mitigate the impact of fluctuations in interest rates, we generally target a portion of our debt portfolio to be maintained at fixed rates.

Our international operations and foreign currency denominated loans expose us to market risks associated with foreign currencies. In order to mitigate the currency exposure related to foreign currency denominated debt service obligations, we have entered into cross currency swap agreements. A cross currency swap is an agreement between two parties to exchange a stream of principal and interest payments in one currency for a stream of principal and interest payments in another currency over a specified period. Our credit risk related to these agreements is considered low because the swap agreements are with creditworthy financial institutions.

Pending IRS Disputes

We are contesting certain claimed deficiencies and adjustments proposed by the IRS Examination Division in connection with its audit of HCA Inc. s 2005 and 2006 federal income tax returns. The disputed items include the timing of recognition of certain patient service revenues, the deductibility of certain debt retirement costs and our method for calculating the tax allowance for doubtful accounts. The IRS Examination Division began an audit of HCA Inc. s 2007, 2008 and 2009 federal income tax returns in 2010.

Management believes HCA Holdings, Inc., its predecessors and affiliates properly reported taxable income and paid taxes in accordance with applicable laws and agreements established with the IRS and final resolution of these disputes will not have a material, adverse effect on our results of operations or financial position. However, if payments due upon final resolution of these issues exceed our recorded estimates, such resolutions could have a material, adverse effect on our results of operations or financial position.

FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Operating Data (Continued)

BALANCE SHEET DATA

	% of Accounts Receivable		
	Under 91 Days	91 180 Days	Over 180 Days
Accounts receivable aging at June 30, 2012 (m):			
Medicare and Medicaid	12%	1%	1%
Managed care and other discounted	23	5	4
Uninsured	17	9	28
Total	52%	15%	33%

(a) Licensed beds are those beds for which a facility has been granted approval to operate from the applicable state licensing agency.
(b) Represents the average number of licensed beds, weighted based on periods owned.
(c) Represents the average number of patients in our hospital beds each day.
(d) Represents the total number of patients admitted to our hospitals and is used by management and certain investors as a general measure of inpatient volume.
(e) Equivalent admissions are used by management and certain investors as a general measure of combined inpatient and outpatient volume. Equivalent admissions are computed by multiplying admissions (inpatient volume) by the sum of gross inpatient revenues and gross outpatient revenues and then dividing the resulting amount by gross inpatient revenues. The equivalent admissions computation equates outpatient revenues to the volume measure (admissions) used to measure inpatient volume resulting in a general measure of combined inpatient and outpatient volume.
(f) Represents the average number of days admitted patients stay in our hospitals.
(g) Represents the number of patients treated in our emergency rooms.
(h) Represents the number of surgeries performed on patients who were not admitted to our hospitals. Pain management and endoscopy procedures are not included in outpatient surgeries.
(i) Represents the number of surgeries performed on patients who have been admitted to our hospitals. Pain management and endoscopy procedures are not included in inpatient surgeries.
(j) Revenues per day is calculated by dividing the revenues for the period by the days in the period. Days revenues in accounts receivable is then calculated as accounts receivable, net of allowance for doubtful accounts, at the end of the period divided by the revenues per day. With our adoption of ASU 2011-07 during 2011, revenues used in this computation are net of the provision for doubtful accounts.
(k) Gross patient revenues are based upon our standard charge listing. Gross charges/revenues typically do not reflect what our hospital facilities are paid. Gross charges/revenues are reduced by contractual adjustments, discounts and charity care to determine reported revenues.
(l) Represents the percentage of patient revenues related to patients who are not admitted to our hospitals.
(m) Accounts receivable aging data is based upon consolidated gross accounts receivable of $8.901 billion (each 1% is equivalent to approximately $89 million of gross accounts receivable).

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

HCA s chief executive officer and chief financial officer have reviewed and evaluated the effectiveness of HCA s disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934 (the Exchange Act)) as of the end of the period covered by this quarterly report. Based on that evaluation, the chief executive officer and chief financial officer have concluded HCA s disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

During the period covered by this report, there have been no changes in our internal control over financial reporting that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We operate in a highly regulated and litigious industry. As a result, various lawsuits, claims and legal and regulatory proceedings have been and can be expected to be instituted or asserted against us. The resolution of any such lawsuits, claims or legal and regulatory proceedings could materially and adversely affect our results of operations and financial position in a given period.

Government Investigations, Claims and Litigation

Health care companies are subject to numerous investigations by various governmental agencies. Further, under the federal FCA, private parties have the right to bring *qui tam*, or whistleblower, suits against companies that submit false claims for payments to, or improperly retain overpayments from, the government. Some states have adopted similar state whistleblower and false claims provisions. Certain of our individual facilities have received, and from time to time, other facilities may receive, government inquiries from, and may be subject to investigation by, federal and state agencies. Depending on whether the underlying conduct in these or future inquiries or investigations could be considered systemic, their resolution could have a material, adverse effect on our financial position, results of operations and liquidity.

The DOJ has contacted the Company in connection with its nationwide review of whether, in certain cases, hospital charges to the federal government relating to implantable cardio-defibrillators (ICDs) met the CMS criteria. In connection with this nationwide review, the DOJ has indicated that it will be reviewing certain ICD billing and medical records at 95 HCA hospitals; the review covers the period from October 2003 to the present. The review could potentially give rise to claims against the Company under the federal FCA or other statutes, regulations or laws. At this time, we cannot predict what effect, if any, this review or any resulting claims could have on the Company.

In July 2012, the Civil Division of the U.S. Attorney s Office in Miami requested information on reviews assessing the medical necessity of interventional cardiology services provided at any Company facility (other than peer reviews). Based upon the Company s review to date, which is not yet complete, the Company believes that such reviews have occurred at approximately 10 of its affiliated hospitals, located primarily in Florida. At this time, we cannot predict what effect, if any, the request or any resulting claims, including any potential claims under the federal False Claims Act, other statutes, regulations or laws, could have on the Company.

New Hampshire Hospital Litigation

In 2006, the Foundation for Seacoast Health (the Foundation) filed suit against HCA in state court in New Hampshire. The Foundation alleged that both the 2006 recapitalization transaction and a prior 1999 intra-corporate transaction violated a 1983 agreement that placed certain restrictions on transfers of the Portsmouth Regional Hospital. In May 2007, the trial court ruled against the Foundation on all its claims. On appeal, the New Hampshire Supreme Court affirmed the ruling on the 2006 recapitalization, but remanded to the trial court the claims based on the 1999 intra-corporate transaction. The trial court ruled in December 2009 that the 1999 intra-corporate transaction breached the transfer restriction provisions of the 1983 agreement. In September of 2011, the trial court issued its remedies phase decision and held that the only remedy to which the Foundation was entitled was rescission of the intra-corporate transfer that breached the transfer restriction (the Company has complied with the Court s order, and it is not expected that such compliance will have any material effect on our operations or financial position). The Court awarded the Foundation, under the terms of the Asset Purchase Agreement, a fraction of its attorney fees. The Foundation appealed the remedy phase ruling, and the Company cross-appealed the liability determination. On October 31, 2011, the New Hampshire Supreme Court, on its own, raised the question whether the appeal needed to await the trial court s further ruling on attorney fees. On November 21, 2011, after the parties briefed the issue, the New Hampshire Supreme Court dismissed the appeal as premature and remanded the case to the trial court. In February 2012, the trial court certified the case for a possible interlocutory appeal without addressing the attorney fees issue. The New Hampshire Supreme Court rejected the request for an interlocutory appeal. The parties subsequently reached a stipulation regarding the attorney fees. The trial court accepted the parties stipulation regarding attorneys fees and entered final judgment on liability and remedies on May 4, 2012. Both sides filed appeals with the New Hampshire Supreme Court and are awaiting a briefing schedule.

Securities Class Action Litigation

On October 28, 2011, a shareholder action, Schuh v. HCA Holdings, Inc. et al., was filed in the United States District Court for the Middle District of Tennessee seeking monetary relief. The case sought to include as a class all persons who acquired the Company s stock pursuant or traceable to the Company s Registration Statement issued in connection with the March 9, 2011 initial public offering. The lawsuit asserted a claim under Section 11 of the Securities Act of 1933 against the Company, certain members of the board of directors, and certain underwriters in the offering. It further asserted a claim under Section 15 of the Securities Act of 1933 against the same members of the board of directors. The action alleged various deficiencies in the Company s disclosures in the Registration Statement. Subsequently, two additional class action complaints, Kishtah v. HCA Holdings, Inc. et al. and Daniels v. HCA Holdings, Inc. et al., setting forth substantially similar claims against substantially the same defendants were filed in the same federal court on November 16, 2011 and December 12, 2011, respectively. All three of the cases were consolidated. On May 3, 3012, the court appointed New England Teamsters & Trucking Industry Pension Fund as Lead Plaintiff for the consolidated action. On July 13, 2012, the lead plaintiff filed an amended complaint asserting claims under Sections 11 and 12(a)(2) of the Securities Act of 1933 against the Company, certain members of the board of directors, and certain underwriters in the offering. It further asserts a claim under Section 15 of the Securities Act of 1933 against the same members of the board of directors and Hercules Holdings II, LLC, a majority shareholder of the Company. The consolidated complaint alleges deficiencies in the Company s disclosures in the Registration Statement and Prospectus relating to: (1) the accounting for the Company s 2006 recapitalization and 2010 reorganization; (2) the Company s failure to maintain effective internal controls relating to its accounting for such transactions; and (3) the Company s Medicare and Medicaid revenue growth rates.

In addition to the above described shareholder class actions, on December 8, 2011, a federal shareholder derivative action, Sutton v. Bracken, et al., putatively initiated in the name of the Company, was filed in the United States District Court for the Middle District of Tennessee against certain officers and present and former directors of the Company seeking monetary relief. The action alleges breaches of fiduciary duties by the named officers and directors in connection with the accounting and earnings claims set forth in the shareholder class actions. Setting forth substantially similar claims against substantially the same defendants, an additional federal

derivative action, Schroeder v. Bracken, et al., was filed in the United States District Court for the Middle District of Tennessee on December 16, 2011, and a state derivative action, Bagot v. Bracken, et al., was filed in Tennessee state court in the Davidson County Circuit Court on December 20, 2011. The federal derivative actions have been consolidated in the Middle District of Tennessee and the parties have agreed that those cases shall be stayed pending developments in the shareholder class actions. The state derivative action has also been stayed pending developments in the shareholder class actions.

General Liability and Other Claims

We are subject to claims for additional income taxes and related interest by the IRS Examination Division. For a description of those proceedings, see Part I, Item 2, Management s Discussion and Analysis of Financial Condition and Results of Operations Pending IRS Disputes and Note 2 to our condensed consolidated financial statements.

We are also subject to claims and suits arising in the ordinary course of business, including claims for personal injuries or for wrongful restriction of, or interference with, physicians staff privileges. In certain of these actions the claimants have asked for punitive damages against us, which may not be covered by insurance. In the opinion of management, the ultimate resolution of these pending claims and legal proceedings will not have a material, adverse effect on our results of operations or financial position.

ITEM 1A: RISK FACTORS

Reference is made to the factors set forth under the caption Forward-Looking Statements in Part I, Item 2 of this Form 10-Q and other risk factors described in our annual report on Form 10-K for the year ended December 31, 2011, which are incorporated herein by reference. There have not been any material changes to the risk factors previously disclosed in our annual report on Form 10-K for the year ended December 31, 2011, except as set forth below.

The growth of uninsured and patient due accounts and a deterioration in the collectibility of these accounts could adversely affect our results of operations.

The primary collection risks of our accounts receivable relate to the uninsured patient accounts and patient accounts for which the primary insurance carrier has paid the amounts covered by the applicable agreement, but patient responsibility amounts (exclusions, deductibles and copayments) remain outstanding. The provision for doubtful accounts relates primarily to amounts due directly from patients. Although Medicare reimburses hospitals for a portion of Medicare bad debts, the Jobs Creation Act will reduce the reimbursement level from 70% of eligible bad debts to 65% beginning in federal fiscal year 2013.

The amount of the provision for doubtful accounts is based upon management s assessment of historical write-offs and expected net collections, business and economic conditions, trends in federal and state governmental and private employer health care coverage, the rate of growth in uninsured patient admissions and other collection indicators. At June 30, 2012, our allowance for doubtful accounts represented approximately 92% of the $4.805 billion patient due accounts receivable balance. The sum of the provision for doubtful accounts, uninsured discounts and charity care increased from $5.331 billion for the six months ended June 30, 2011 to $6.625 billion for the six months ended June 30, 2012.

A continuation of the trends that have resulted in an increasing proportion of accounts receivable being comprised of uninsured accounts and a deterioration in the collectibility of these accounts will adversely affect our collection of accounts receivable, cash flows and results of operations. We may also be adversely affected by the growth in patient responsibility accounts as a result of increases in the adoption of plan structures, including health savings accounts, that shift greater responsibility for care to individuals through greater exclusions and copayment and deductible amounts. Our facilities may experience growth in bad debts, uninsured discounts and

charity care as a result of a number of factors, including the economic downturn and continued high unemployment. The Health Reform Law seeks to decrease, over time, the number of uninsured individuals through reforms that mostly will become effective January 1, 2014. On June 28, 2012, the United States Supreme Court upheld the constitutionality of the individual mandate provisions of the Health Reform Law but struck down the provisions that would have allowed HHS to penalize states that do not implement the Medicaid expansion provisions with the loss of existing federal Medicaid funding. As a result, states may choose not to implement the Medicaid expansion. Thus, even after full implementation of the Health Reform Law, we may continue to experience bad debts and have to provide uninsured discounts and charity care for individuals residing in states that choose not to implement the Medicaid expansion. We may also continue to experience bad debts and have to provide uninsured discounts and charity care for undocumented aliens who are not permitted to enroll in a health insurance exchange or government health care programs and certain others who may not have insurance coverage. Further, implementation of the Health Reform Law could result in some patients terminating their current insurance plans in favor of lower cost Medicaid plans or other insurance coverage with lower reimbursement levels. Patient responsibility accounts may continue to increase even with expanded health plan coverage as a result of increases in plan exclusions and deductibles and copayment amounts.

It is difficult to predict the full impact of the Health Reform Law due to the law s complexity, lack of implementing regulations or interpretive guidance, gradual and potentially delayed implementation, court challenges and possible amendment or repeal, as well as our inability to foresee how individuals, states and businesses will respond to the choices afforded them by the law.

Changes in government health care programs may adversely affect our revenues.

A significant portion of our patient volume is derived from government health care programs, principally Medicare and Medicaid. Specifically, we derived 44.1% of our revenues from the Medicare and Medicaid programs for the six months ended June 30, 2012. Changes in government health care programs may reduce the reimbursement we receive and could adversely affect our business and results of operations.

In recent years, legislative and regulatory changes have resulted in limitations on and, in some cases, reductions in levels of payments to health care providers for certain services under the Medicare program. The Budget Control Act of 2011 (the BCA) provides for new spending on program integrity initiatives intended to reduce fraud and abuse under the Medicare program. The BCA requires automatic spending reductions of $1.2 trillion for federal fiscal years 2013 through 2021, minus any deficit reductions enacted by Congress and debt service costs. However, the percentage reduction for Medicare may not be more than 2% for a fiscal year, with a uniform percentage reduction across all Medicare programs. We are unable to predict how these spending reductions will be structured, what other deficit reduction initiatives may be proposed by Congress or whether Congress will attempt to suspend or restructure the automatic budget cuts.

These reductions will be in addition to reductions mandated by the Health Reform Law, which provides for material reductions in the growth of Medicare program spending, including reductions in Medicare market basket updates and Medicare DSH funding. Further, from time to time, CMS revises the reimbursement systems used to reimburse health care providers, including changes to the MS-DRG system and other payment systems, which may result in reduced Medicare payments.

Since most states must operate with balanced budgets and since the Medicaid program is often a state s largest program, some states have enacted or may consider enacting legislation designed to reduce their Medicaid expenditures. Further, many states have also adopted, or are considering, legislation designed to reduce coverage, enroll Medicaid recipients in managed care programs and/or impose additional taxes on hospitals to help finance or expand the states Medicaid systems. The current economic environment has increased the budgetary pressures on many states, and these budgetary pressures have resulted, and likely will continue to result, in decreased spending, or decreased spending growth, for Medicaid programs and the Children s Health Insurance Program in many states. Some states that provide Medicaid supplemental payments are reviewing these programs

or have filed waiver requests with CMS to replace these programs, which could result in Medicaid supplemental payments being reduced or eliminated. CMS approved a Medicaid waiver in December 2011 that allows Texas to continue receiving supplemental Medicaid reimbursement while expanding its Medicaid managed care program. However, we cannot predict whether the Texas private supplemental Medicaid Waiver Program will continue or guarantee that revenues recognized from the program will not decrease.

The Health Reform Law made changes to the Medicaid program and will likely cause additional changes in the future. For example, the Health Reform Law provides for material reductions to Medicaid DSH funding. The Health Reform Law will result in increased state legislative and regulatory changes in order for states to comply with new federal mandates, such as the requirement to establish Exchanges, and to participate in grants and other incentive opportunities. Effective March 23, 2010, the Health Reform Law requires states to maintain Medicaid eligibility standards established prior to the enactment of the law for adults until January 1, 2014 and for children until October 1, 2019. However, states with budget deficits may seek a waiver from this requirement to address eligibility standards that apply to adults making more than 133% of the federal poverty level. The Health Reform Law also provides for significant expansions to the Medicaid program in 2014. However, in its June 28, 2012 ruling, the United States Supreme Court struck down the portion of the Health Reform Law that would have allowed HHS to penalize states that do not implement the Medicaid expansion provisions with the loss of existing federal Medicaid funding. Thus, states may opt not to implement the expansion.

In some cases, commercial third-party payers rely on all or portions of Medicare payment systems to determine payment rates. Changes to government health care programs that reduce payments under these programs may negatively impact payments from commercial third-party payers.

Current or future health care reform and deficit reduction efforts, changes in laws or regulations regarding government health care programs, other changes in the administration of government health care programs and changes to commercial third-party payers in response to health care reform and other changes to government health care programs could have a material, adverse effect on our financial position and results of operations.

We are unable to predict the impact of the Health Reform Law, which represents a significant change to the health care industry.

As enacted, the Health Reform Law will change how health care services are covered, delivered, and reimbursed through expanded coverage of uninsured individuals, reduced growth in Medicare program spending, reductions in Medicare and Medicaid DSH payments and the establishment of programs where reimbursement is tied to quality and integration. In addition, the law reforms certain aspects of health insurance, expands existing efforts to tie Medicare and Medicaid payments to performance and quality, and contains provisions intended to strengthen fraud and abuse enforcement. Further, the Health Reform Law provides for a value-based purchasing program, the establishment of Accountable Care Organizations (ACOs) and bundled payment pilot programs, which may create sources of additional revenue. On June 28, 2012, the United States Supreme Court upheld the constitutionality of the individual mandate provisions of the Health Reform Law but struck down the provisions that would have allowed HHS to penalize states that do not implement the Medicaid expansion provisions with the loss of existing federal Medicaid funding. States that choose not to implement the Medicaid expansion will forego funding established by the Health Reform Law to cover most of the expansion costs. While the expansion of health insurance coverage under the Health Reform Law may result in a material increase in the number of patients using our facilities who have either private or public program coverage, it is unclear how many states will decline to implement the Medicaid expansion. Those states with relatively low income eligibility requirements for Medicaid may have the greatest financial incentives to implement the Medicaid expansion. The Company has a significant presence in several of these low income eligibility states, including Florida, Georgia, Kansas, Louisiana, Missouri, Oklahoma, Texas and Virginia. However, the governors of a number of states, including Florida and Texas, in which approximately one-half of the Company s licensed beds are located, have announced their intentions to opt out of expanding their Medicaid programs pursuant to the Health Reform Law. These statements are not legally binding and may be subject to change.

It is difficult to predict the size of the potential revenue gains to the Company as a result of these elements of the Health Reform Law, because of uncertainty surrounding a number of material factors, including the following:

- how many states will implement the Medicaid expansion provisions and under what terms;
- how many previously uninsured individuals will obtain coverage as a result of the Health Reform Law (prior to the Supreme Court ruling, the Congressional Budget Office (CBO) estimated 30 million by 2016 and 33 million by 2021, and CMS estimated almost 34 million by 2019, with both agencies making a number of assumptions. In a report that reflects the Supreme Court decision and assumes that some states will not expand Medicaid coverage or will do so after 2014, the CBO estimates 26 million in 2016 and 30 million by 2021. CMS has not released estimates that take into account the Supreme Court decision);
- what percentage of the newly insured patients will be covered under the Medicaid program and what percentage will be covered by private health insurers;
- the extent to which states will enroll new Medicaid participants in managed care programs;
- the pace at which insurance coverage expands, including the pace of different types of coverage expansion;
- the change, if any, in the volume of inpatient and outpatient hospital services that are sought by and provided to previously uninsured individuals;
- the rate paid to hospitals by private payers for newly covered individuals, including those covered through the newly created Exchanges and those who might be covered under the Medicaid program under contracts with the state;
- the rate paid by state governments under the Medicaid program for newly covered individuals;
- the effect of the value-based purchasing program on our hospitals revenues and the effects of other quality programs;
- the percentage of individuals in the Exchanges who select the high deductible plans, since health insurers offering those kinds of products have traditionally sought to pay lower rates to hospitals;
- whether the net effect of the Health Reform Law, including the prohibition on excluding individuals based on pre-existing conditions, the requirement to keep medical costs at or above a specified minimum percentage of premium revenue, other health insurance reforms and the annual fee applied to all health insurers, will be to put pressure on the bottom line of health insurers, which in turn might cause them to seek to reduce payments to hospitals with respect to both newly insured individuals and their existing business; and
- the possibility that the Health Reform Law or components of it will be delayed, revised or eliminated as a result of other court challenges and efforts to repeal or amend the law. Repeal of the Health Reform Law has become a theme in political campaigns during this election year.

On the other hand, the Health Reform Law provides for significant reductions in the growth of Medicare spending, reductions in Medicare and Medicaid DSH payments and the establishment of programs where reimbursement is tied to quality and integration. Since 44.1% of our revenues for the six months ended June 30, 2012 were from Medicare and Medicaid, reductions to these programs may significantly impact the Company and could offset any positive effects of the Health Reform Law. It is difficult to predict the size of the revenue reductions to Medicare and Medicaid spending because of uncertainty regarding a number of material factors, including the following:

- the amount of overall revenues the Company will generate from Medicare and Medicaid business when the reductions are implemented;

whether reductions required by the Health Reform Law will be changed by statute or by judicial decision prior to becoming effective;

the size of the Health Reform Law s annual productivity adjustment to the market basket;

the amount of the Medicare DSH reductions that will be made, commencing in federal fiscal year 2014;

the allocation to our hospitals of the Medicaid DSH reductions, commencing in federal fiscal year 2014;

what the losses in revenues will be, if any, from the Health Reform Law s quality initiatives;

how successful ACOs will be at coordinating care and reducing costs or whether they will decrease reimbursement;

the scope and nature of potential changes to Medicare reimbursement methods, such as an emphasis on bundling payments or coordination of care programs;

whether the Company s revenues from UPL programs, or other Medicaid supplemental programs developed through a federally approved waiver program (Waiver Program), will be adversely affected because there may be reductions in available state and local government funding for the programs; and

reductions to Medicare payments CMS may impose for excessive readmissions.

Because of the many variables involved, we are unable to predict the net effect on the Company of the expected increases in insured individuals using our facilities, reductions in Medicare spending, reductions in Medicare and Medicaid DSH funding, and numerous other provisions in the Health Reform Law that may affect the Company. Further, it is unclear how efforts to repeal or revise the Health Reform Law and remaining or new federal lawsuits challenging its constitutionality will be resolved or what the impact would be of any resulting changes to the law.

ITEM 6. EXHIBITS

(a) List of Exhibits:

31.1	Certification of Chief Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2	Certification of Chief Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32	Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
101	The following financial information from our quarterly report on Form 10-Q for the quarters and six months ended June 30, 2012 and 2011, filed with the SEC on August 6, 2012, formatted in Extensible Business Reporting Language (XBRL): (i) the condensed consolidated balance sheets at June 30, 2012 and December 31, 2011, (ii) the condensed consolidated comprehensive income statements for the quarters and six months ended June 30, 2012 and 2011, (iii) the condensed consolidated statements of cash flows for the six months ended June 30, 2012 and 2011 and (iv) the notes to condensed consolidated financial statements.(1)

(1) The XBRL related information in Exhibit 101 to this quarterly report on Form 10-Q shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise subject to liability of that section and shall not be incorporated by reference into any filing or other document pursuant to the Securities Act of 1933, as amended, except as shall be expressly set forth by specific reference in such filing or document.
