FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the quarterly period ended June 30, 2013

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from _____ to _____

Commission File Number: 001-34358

SOLARWINDS, INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

3711 S. MoPac Expressway

Building Two

Austin, Texas 78746

(512) 682.9300

(Address and telephone number of principal executive offices)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

On July 30, 2013, 75,413,380 shares of common stock, par value \$0.001 per share, were outstanding.

Safe Harbor Cautionary Statement

This quarterly report on Form 10-Q contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and the Private Securities Litigation Reform Act of 1995. Such statements may be signified by terms such as "anticipates," "believes," "continues," "estimates," "expects," "intends," "targets," "may," "could," "should," "will," "would" or similar expressions and the negatives of those terms. In this report, forward-looking statements include statements regarding our financial projections, future financial performance and plans and objectives for future operations including, without limitation, the following:

• Our expectation to grow our business by focusing on initiatives such as increasing our presence in several key geographic markets including Asia-Pacific, Latin America, Europe, Middle East and Africa by expanding our product portfolio, localizing marketing material, and establishing new relationships with distributors and resellers, expanding our web presence, brand awareness and improving our communication with prospects and our current customer base both domestically and internationally, acquisitions of products that will expand our network management and systems and application management offerings or potential acquisitions of products in new markets and international expansion company-wide at lower cost locations to drive our competitive advantage;

• Our expectation to continue to pursue acquisitions that will enable us to enter new markets, or new segments of our existing markets, by bringing new product offerings to market more quickly than we can develop them;

• Our belief that the acquisition of N-able will allow us to leverage the opportunity associated with rapidly growing adoption of the cloud and SaaS-based services among SMBs by enhancing our remote monitoring and management offerings and adding MSP service automation to the broad range of management challenges that we address for the IT industry;

• Our belief that we can bring the key features of our operating model to the N-able business and help drive revenue growth in the remote monitoring and management market;

• Our expectation to continue to generate solid growth while delivering strong operating income and to increase our cash flows from operating activities with our disciplined approach to investing in our business combined with our large market opportunity;

• The premise that we will be able to deliver ongoing value to our customers and maintain a long-term financial relationship with the users of our IT management products;

• Our expectation that our revenue growth will be approximately 20-22% for the full year of 2013;

• Our expectation that core product transaction volume growth will be the primary driver of our new license growth;

• Our expectation that our Non-GAAP operating margin will be approximately 49% for the full year of 2013;

• Our belief that IT-related trends and the limitations of existing offerings present a significant market opportunity for our products;

• Our expectation that our revenue will continue to grow as we capitalize on IT-related trends and other market opportunities through acquisitions and development;

• Our objective of targeting total new sales growth of 20% for our existing license and subscription products and new product offerings over the next three to five years;

• Our belief that there is a substantial opportunity for additional sales of our software in the Europe, Middle East and Africa, or EMEA, region, the Asian-Pacific region, and the Latin American region, and our intention to increase our sales, marketing and support operations in these regions;

• Our belief that although difficult economic conditions in certain geographic regions may adversely affect the sales of our products, such conditions also could offer us an opportunity to market and sell our products to mid-size businesses and enterprise customers at compelling prices compared to the prices of some competing products;

• Our expectation that the U.S. federal government will continue to be a significant market opportunity and our belief that the ease of deployment, power and scalability of our products gives us a competitive advantage to sell to various agencies and departments of the U.S. federal government;

• Our expectation that we will continue to experience inconsistency in the buying pattern of the U.S. federal government for larger transactions with our products;

• Our belief that many of our larger transactions with the U.S. federal government, both new licenses and maintenance renewals, are dependent on specific projects that may not be continued at the same scale in the future due to budgetary

cuts or other reasons, and the reduction or cancellation of specific projects such as these could result in our sales to the U.S. government growing less rapidly than expected or even decreasing;

3

Table of Contents

Our expectation that maintenance revenue will continue to increase in absolute dollars in future periods;

Our expectation that our cost of revenue will increase in absolute dollars and fluctuate as a percentage of revenue as we acquire additional companies or technologies and as we increase our headcount to support new customers and product offerings;

Our expectation that we will incur approximately \$16.0 to \$17.0 million of incremental expenses for the remainder of the year as a result of the N-able acquisition;

Our expectation that our operating expenses will continue to increase in absolute dollars as we make long-term investments in our business both domestically and internationally;

The possibility that our operating expenses in future periods may increase in absolute dollars and fluctuate as a percentage of revenue as we acquire additional companies or technologies and integrate the businesses;

Our intention to continue to grant equity awards to our current executives and employees and those who join us in the future through acquisitions or otherwise, which will result in additional stock-based compensation expense;

Our expectation that we will continue to hire sales personnel in the United States and in our international sales offices to drive new license sales growth;

Our expectation to continue to invest in our websites, online user community site and marketing programs to drive customer downloads and support our new product launches;

Our expectation that the continued expansion of our research and development centers in the Czech Republic and India will continue to result in an increase in facilities and personnel costs;

Our expectation that we will continue to invest in our research and development activities by hiring engineers in our international locations, which will allow us to continue our research and development growth strategy internationally;

Our expectation that we will incur higher administrative costs in future periods as our business continues to grow both organically and through acquisitions;

Our expectation that our international income, as a percentage of total income, will increase and that such increase should result in a corresponding decline in our effective income tax rate;

Our continued investment in the sales and marketing efforts that drive our revenue growth;

Our expectation that our international cash and cash equivalents will continue to increase as a percentage of our consolidated cash and cash equivalents;

Our intention that the earnings generated by our international operations will be invested indefinitely in those operations and our expectation that we will not repatriate those earnings to our domestic operations;

Our estimation that our capital expenditures for the remaining six months of 2013 will be approximately \$3.0 million, primarily related to purchases of equipment and software in our Austin and Czech Republic locations to support their continued growth;

Our expectation that repurchases of our common stock under our share repurchase program will occur over the next 12 months although the exact timing of repurchases and number of shares of common stock to be purchased will depend upon market conditions and other factors;

Our expectation that our share repurchase program will be funded using our cash on hand and cash generated from operations;

Our belief that our existing cash and cash equivalents and our cash flows from operating activities will be sufficient to fund our operations and our commitments for capital expenditures for at least the next 12 months; and

Our expectation that the lease for our future corporate headquarters in Austin, Texas will commence in the second quarter of 2014 and our plans with respect to either terminating our existing lease through a settlement with our landlord or subleasing all or part of our existing corporate headquarters to a third party for the remaining lease term through May 2016.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially and adversely different from any future results, performance or achievements expressed or implied by the forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those summarized under Risk Factors and Management's Discussion and Analysis of Financial Condition and Results of Operations in our annual report on Form 10-K for the year ended December 31, 2012 and our quarterly reports on Forms 10-Q and other documents we file with the

Securities and Exchange Commission ("SEC"). Given these risks and uncertainties, you should not place undue reliance on these forward-looking statements. Also, forward-

4

SolarWinds, Inc.

Notes to Condensed Consolidated Financial Statements (Unaudited)

1. Summary of Significant Accounting Policies

Organization and Nature of Operations

SolarWinds, Inc., a Delaware corporation, and its subsidiaries (“we” or “us”) design, develop, market, sell and support enterprise-class information technology, or IT, infrastructure management software to IT professionals in organizations of all sizes. Our product offerings range from individual software tools to more comprehensive software products that solve problems encountered every day by IT professionals. Our products are designed to help enable efficient and effective management of their networks, systems and application infrastructure.

Basis of Presentation

We prepared our interim condensed consolidated financial statements in conformity with United States of America generally accepted accounting principles, or GAAP, and the reporting regulations of the Securities and Exchange Commission, or the SEC. They do not include all of the information and footnotes required by GAAP for complete financial statements. The accompanying condensed consolidated financial statements include our accounts and the accounts of our wholly owned subsidiaries. We have eliminated all intercompany balances and transactions.

We have made estimates and judgments affecting the amounts reported in our condensed consolidated financial statements and the accompanying notes. The actual results that we experience may differ materially from our estimates. The accounting estimates that require our most significant, difficult and subjective judgments include: the valuation of goodwill, intangibles, long-lived assets and contingent consideration, including accrued earnouts; revenue recognition; stock-based compensation; income taxes; and loss contingencies.

The interim financial information is unaudited, but reflects all normal adjustments that are, in our opinion, necessary to provide a fair statement of results for the interim periods presented. This interim information should be read in conjunction with the audited consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2012.

Certain reclassifications have been made to prior periods’ financial statements to conform to the current period presentation. These reclassifications did not result in any change in previously reported net income, total assets or shareholders’ equity.

Recent Accounting Pronouncements

There have been no significant changes in recent accounting pronouncements that were disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012 that have had a significant impact on our condensed consolidated financial statements or notes thereto.

Fair Value Measurements

We apply the authoritative guidance on fair value measurements for financial assets and liabilities that are measured at fair value on a recurring basis and non-financial assets and liabilities, such as goodwill, intangible assets and property, plant and equipment that are measured at fair value on a non-recurring basis.

The guidance establishes a three-tiered fair value hierarchy that prioritizes inputs to valuation techniques used in fair value calculations. The three levels of inputs are defined as follows:

Level 1: Unadjusted quoted prices for identical assets or liabilities in active markets accessible by us.

Level 2: Inputs that are observable in the marketplace other than those inputs classified as Level 1.

Level 3: Inputs that are unobservable in the marketplace and significant to the valuation.

We determine the fair value of our available-for-sale securities based on inputs obtained from multiple pricing vendors, who may use quoted prices in active markets for identical assets (Level 1 inputs) or inputs other than quoted prices that are observable either directly or indirectly (Level 2 inputs) in determining fair value. However, we classify all of our available-for-sale securities as being valued using Level 2 inputs. The valuation techniques used to determine the fair value of our financial instruments having Level 2 inputs are derived from unadjusted, non-binding market consensus prices that are corroborated by

Table of Contents

observable market data, quoted market prices for similar instruments, or pricing models. Our procedures include controls to ensure that appropriate fair values are recorded by a review of the valuation methods and assumptions. See Note 4 for a summary of our financial instruments and acquisition related contingent considerations accounted for at fair value on a recurring basis. The carrying amounts reported in our condensed consolidated balance sheets for cash, accounts receivable, accounts payable and other accrued expenses approximate fair value due to relatively short periods to maturity.

Revenue Recognition

We derive substantially all of our revenue from the licensing of our software products, the sale of annual maintenance agreements for these products and, to a lesser extent, our subscription products and services. In accordance with current guidance, we recognize revenue for software, maintenance and subscriptions when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collectability is reasonably assured. Our return policy generally does not allow our customers to return software products.

We generally use a purchase order, an authorized credit card, an electronic or manually signed license agreement, or the receipt of a cash payment as evidence of an arrangement. We consider delivery to have occurred and recognize revenue when risk of loss transfers to the customer, reseller or distributor or the customer has access to their subscription which is generally upon electronic transfer of the license key or password that provides immediate availability of the product to the purchaser. We account for sales incentives to customers, resellers or distributors as a reduction of revenue at the time we recognize the revenue from the related product sale. We report revenue net of any sales tax collected.

We sell our software products through our direct sales force and through our distributors and other resellers. Our distributors and resellers do not carry inventory of our software and we generally require them to specify the end-user of the software at the time of the order. If the distributor or reseller does not provide end-user information, then we will generally not fulfill the order. Our distributors and resellers have no rights of return or exchange for software that they purchase from us and payment for these purchases is due to us without regard to whether the distributors or resellers collect payment from their customers. Sales through resellers and distributors are typically evidenced by a reseller or distributor agreement, together with purchase orders or authorized credit cards on a transaction-by-transaction basis.

License Revenue. Under software revenue recognition guidance, we use the residual method to recognize revenue when a license agreement includes one or more elements to be delivered and vendor-specific objective evidence, or VSOE, of fair value for all undelivered elements exists. Because our software is generally sold with maintenance, we calculate the amount of revenue allocated to the software license by determining the fair value of the maintenance and subtracting it from the total invoice or contract amount. We establish VSOE of the fair value of maintenance services by the standard published list pricing for our maintenance renewals since we generally charge list prices for our maintenance renewals. If evidence of the fair value of one or more undelivered elements does not exist, all revenue is generally deferred and recognized when delivery of those elements occurs or when fair value can be established. When the undelivered element for which we do not have VSOE of fair value is support, revenue for the entire arrangement is recognized ratably over the support period.

Maintenance and Other Revenue. We derive maintenance revenue from fees for software maintenance services. We typically include one year of maintenance as part of the initial purchase price of each perpetual software offering and then sell renewals of this maintenance agreement. We generally recognize maintenance revenue ratably on a daily basis over the contract period. Customers with maintenance agreements are entitled to receive unspecified upgrades or enhancements to new versions of their software products on a when-and-if-available basis. Other revenue is not currently significant nor do we expect it to be significant in future periods.

Subscription Revenue. We primarily derive subscription revenue from fees received from customers for time-based license arrangements and software-as-a-service, or SaaS offerings. We generally invoice subscription agreements monthly in advance over the subscription period. Subscription revenue is recognized ratably over the contractual subscription term when all revenue recognition criteria have been met. We introduced these offerings in the second quarter of 2013 as a result of the acquisition of N-able Technologies.

Table of Contents

2. Acquisitions

N-able Acquisition

In May 2013, we acquired N-able Technologies, or N-able, a provider of cloud-based remote monitoring and management and service automation software serving the small business market through the managed service providers (MSPs) channel for approximately \$127.7 million in cash, including cash acquired. The acquisition increased our product offerings and we believe will allow us to leverage the opportunity associated with rapidly growing adoption of the cloud and SaaS-based services among SMBs by enhancing our remote monitoring and management offerings and adding MSP service automation to the broad range of management challenges that we address for the IT industry. The acquisition was financed with available cash and we incurred \$0.7 million in acquisition related costs, which are included in general and administrative expense for the three and six months ended June 30, 2013. The weighted average amortization period for the intangible assets was 6.0 years. Goodwill is not deductible for tax purposes. The fair value of the assets acquired, including goodwill, is preliminary and therefore may be subject to adjustments due to the pending completion of the valuation of intangible assets.

The following table summarizes the consideration paid and the amounts recognized at the acquisition date for the assets acquired and liabilities assumed:

	Fair Value (in thousands)
Current assets, including cash of \$6,845	\$ 11,660
Property and equipment	693
Deferred tax assets	125
Identifiable intangible assets	30,080
Goodwill	94,109
Current liabilities	(3,294)
Deferred tax liabilities	(3,846)
Deferred revenue	(1,796)
Total consideration	\$ 127,731

The following table summarizes the fair value of the acquired identifiable intangible assets and estimated useful lives:

	Fair Value (in thousands)	Useful Life (in years)
Developed product technologies	\$ 17,170	5
Customer relationships	9,330	8
Customer backlog	2,170	4
Tradenames	970	8
Non-competition covenant	440	6
Total identifiable intangible assets	\$ 30,080	

The amounts of revenue and net loss related to the N-able acquisition included in our condensed consolidated financial statements from the effective date of the acquisition for the three months ended June 30, 2013 are \$1.7 million and \$1.1 million, respectively. We recognize revenue on the acquired products in accordance with our revenue recognition policy as described above in Note 1.

The following table presents our unaudited pro forma results of operations for the three and six month periods ended June 30, 2013 and 2012 as if the N-able acquisition had occurred at the beginning of the earliest period presented, or January 1, 2012. The pro forma financial information illustrates the measurable effects of a particular transaction, while excluding effects that rely on highly judgmental estimates of how operating decisions may or may not have changed as a result of that transaction. Accordingly, we adjusted the pro forma results for quantifiable items such as the amortization of acquired intangible assets and the estimated income tax provision of the pro forma combined results. The N-able pro forma results were

Table of Contents

not adjusted for post-acquisition operational decisions made by management such as changes in the product offerings, pricing and packaging of the products. We prepared the pro forma financial information for the combined entities for comparative purposes only, and it is not indicative of what actual results would have been if the acquisition had taken place on January 1, 2012, or of any future results.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
(in thousands, except per share data)	Pro Forma		Pro Forma	
Revenue	\$82,598	\$69,602	\$162,623	\$134,367
Net Income	20,093	18,555	42,446	34,420
Earnings per share:				
Basic	0.27	0.25	0.57	0.47
Diluted	0.26	0.24	0.55	0.46

The following table reflects the changes in goodwill for the six months ended June 30, 2013:

(in thousands)	
Balance at December 31, 2012	\$158,601
Acquisitions	94,109
Foreign currency translation and other adjustments	(368)
Balance at June 30, 2013	\$252,342

Goodwill and indefinite-lived intangibles are assessed at the consolidated level for impairment in the fourth quarter of each year or more frequently if events or changes in circumstances indicate that impairment may exist. We evaluate long-lived assets, including identifiable definite-lived intangibles and other assets, for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. As of June 30, 2013, there were no indicators of impairment identified as a result of our review of events and circumstances related to our goodwill, indefinite-lived intangible assets or long-lived assets.

3. Investments

Our cash and cash equivalents as of June 30, 2013 and December 31, 2012 consisted of demand deposit accounts and money market funds. The following table summarizes our cash and cash equivalents:

	June 30,	December 31,
(in thousands)	2013	2012
Demand deposit accounts	\$105,938	\$82,195
Money market funds	42,956	97,507
Total cash and cash equivalents	\$148,894	\$179,702

Our short-term and long-term investments as of June 30, 2013 and December 31, 2012 consisted primarily of available-for-sale securities, such as corporate bonds, municipal bonds and commercial paper. The following table summarizes our short-term and long-term available-for-sale securities as of June 30, 2013 and December 31, 2012:

Table of Contents

	June 30, 2013				December 31, 2012			
(in thousands)	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Total assets	\$42,956	\$47,379	\$—	\$90,335	\$97,507	\$62,099	\$—	\$159,606
Liabilities:								
Accrued earnout	\$—	\$—	\$—	\$—	\$—	\$—	\$121	\$121
Total liabilities	\$—	\$—	\$—	\$—	\$—	\$—	\$121	\$121

Contingent Consideration

A reconciliation of the beginning and ending balances of acquisition related accrued earnouts using significant unobservable inputs (Level 3) for the six months ended June 30, 2013 follows:

(in thousands)	
Accrued earnout liability as of December 31, 2012	\$121
Acquisition date fair value of contingent consideration	—
Change in fair value of contingent consideration	(121)
Payment of contingent consideration	—
Accrued earnout liability as of June 30, 2013	\$—

Table of Contents

The accrued earnout liability relates to an acquisition contingent consideration of \$2.5 million to be paid if new license sales during the one-year earnout measurement period equal or exceed the milestone specified in the purchase agreement. As of June 30, 2013, the achievement of this milestone was determined to be unattainable. The change in the fair value of the contingent consideration due to the change in probability of achieving the earnout criteria resulted in a \$0.1 million accrued earnout gain being recognized in general and administrative expense in our condensed consolidated statements of income for the three and six months ended June 30, 2013. At each reporting date, the contingent consideration liability is revalued to estimated fair value and changes in the estimates used to determine the probabilities could result in a change to the fair value measurement.

5. Derivative Instruments

As of June 30, 2013 and December 31, 2012, we did not have any forward contracts outstanding. The effect of derivative instruments not designated as hedging instruments in our condensed consolidated statements of income is summarized below:

(in thousands)	Location of Gain (Loss) Recognized in Statements of Income	Gains (Losses) Recognized in Net Income on Derivatives			
		Three months ended June 30,		Six months ended June 30,	
		2013	2012	2013	2012
Derivatives not Designated as Hedging Instruments	Other expense, net	\$146	\$(241)	\$6	\$(138)

6. Earnings Per Share

We computed basic earnings per share using the weighted-average number of our common shares outstanding during the reporting period. We adjusted diluted earnings per share for the after-tax impact of incremental shares that would be available for issuance upon the assumed exercise of stock options and vesting of restricted stock units using the treasury stock method.

A reconciliation of the number of shares in the calculation of basic and diluted earnings per share follows:

(in thousands)	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Basic earnings per share				
Numerator:				
Net income	\$22,797	\$19,427	\$45,796	\$36,558
Denominator:				
Weighted-average common shares outstanding used in computing basic earnings per share	75,250	74,033	75,117	73,885
Diluted earnings per share				
Numerator:				
Net income	\$22,797	\$19,427	\$45,796	\$36,558
Denominator:				
Weighted-average shares used in computing basic earnings per share	75,250	74,033	75,117	73,885
Add options and restricted stock units to purchase common stock	1,342	1,815	1,508	1,757
Weighted-average shares used in computing diluted earnings per share	76,592	75,848	76,625	75,642

Dilution from assumed exercises of stock options and vesting of restricted stock units is dependent upon several factors, including the market price of our common stock. The following stock-based incentive awards were outstanding but were not included in the computation of diluted earnings per share because the average market price of the underlying stock did not exceed the sum of the exercise price, unrecognized compensation expense and the excess tax benefit and thus the results would have been antidilutive:

Table of Contents

(in thousands)	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
Antidilutive shares	1,062	259	616	811

The calculation of diluted earnings per share requires us to make certain assumptions related to the use of proceeds that would be received upon the assumed exercise of stock options and vesting of restricted stock units. These assumed proceeds include the excess tax benefit that we receive upon assumed exercises of stock options and vesting of restricted stock units.

7. Income Taxes

For the three months ended June 30, 2013 and 2012, we recorded income tax expense of \$8.3 million and \$7.5 million, respectively, resulting in an effective tax rate of 26.7% and 28.0%, respectively. For the six months ended June 30, 2013 and 2012, we recorded income tax expense of \$14.6 million and \$14.2 million, respectively, resulting in an effective tax rate of 24.1% and 28.0%, respectively. The decrease in the effective tax rate from 2012 to 2013 was primarily attributable to the availability of the U.S. research and experimentation tax credit, or R&E tax credit, which resulted in the entire 2012 R&E tax credit of \$1.3 million being recognized discretely in the first quarter of 2013, as well as an increase in international earnings, which are generally taxed at lower tax rates. On January 2, 2013, the American Taxpayer Relief Act of 2012 was enacted which retroactively reinstated and extended the Federal R&E tax credit from January 1, 2012 to December 31, 2013.

We recognize interest and penalties related to unrecognized tax benefits in the provision for income taxes. In the three and six months ended June 30, 2013 and 2012, interest and penalties recorded were not significant. As of June 30, 2013, we have an insignificant amount accrued for interest and penalties related to unrecognized tax benefits.

We file U.S., state and foreign income tax returns in jurisdictions with varying statutes of limitations. The 2008 through 2012 tax years generally remain open and subject to examination by federal and foreign tax authorities. The 2007 through 2012 tax years generally remain open and subject to examination by the state tax authorities. We are currently under audit by the U.S. Internal Revenue Service, or IRS, for the tax years ended December 31, 2008, 2009 and 2010 and do not anticipate any material adjustments. We are not certain when the IRS audit will conclude.

However, upon completion of this audit, it is reasonably possible our unrecognized tax benefits will decrease. Besides the United States, we are not currently under audit in any taxing jurisdictions.

8. Commitments and Contingencies

Leases

In May 2013, we entered into a lease agreement for our future corporate headquarters in Austin, Texas. We expect the lease to commence in the second quarter of 2014 for an initial lease term of thirteen years. In the initial year of the lease, our new facility will consist of approximately 172,000 square feet. We will occupy the remaining building space in the second year which will increase our total square feet to approximately 230,000. Our base rent will be approximately \$2.8 million in the first year and approximately \$5.1 million in the second year with annual escalations of approximately 2.25% thereafter.

At June 30, 2013, future minimum lease payments under non-cancellable operating leases were as follows:

(in thousands)	
Remaining 2013	\$2,701
2014	7,085
2015	8,930
2016	7,596
2017	6,432
Thereafter	62,067
Total minimum lease payments	\$94,811

At the inception of our new lease agreement in the second quarter of 2014, we plan to either terminate our existing lease through a settlement with our landlord or sublease all or part of our existing corporate headquarters to a third

party for the remaining lease term through May 2016. If we are unable to terminate our lease or sublease the building, we would be required

16

Table of Contents

to recognize a loss for our remaining obligation of \$8.0 million.

Legal Proceedings

From time to time, we have been and may be involved in various legal proceedings arising from our ordinary course of business, which are discussed in Part II, Item 1 of this Form 10-Q under the heading “Legal Proceedings.” In the opinion of management, there was not at least a reasonable possibility we may have incurred a material loss, or a material loss in excess of a recorded accrual, with respect to loss contingencies. However, the outcome of litigation is inherently uncertain. Therefore, although management considers the likelihood of such an outcome to be remote, if one or more of these legal matters were resolved against us in the same reporting period for amounts in excess of management's expectations, our condensed consolidated financial statements could be materially adversely affected.

Uniloc Cases

Uniloc USA, Inc. and parent and/or affiliates have brought two lawsuits against the Company and have brought a series of lawsuits against numerous software companies around the world.

'216 Case

On September 13, 2010, Uniloc USA, Inc. and Uniloc (Singapore) Private Limited (“Uniloc”) brought a lawsuit against the Company and several other defendants in the United States District Court for the Eastern District of Texas (“Eastern District of Texas”). The complaint filed by Uniloc alleges that the Company and each of the other fifteen named defendants' software infringe U.S. patent 5,490,216 (“'216 Patent”) allegedly owned by Uniloc. Uniloc alleges that the Company's software, specifically its license key system, infringes upon its patent that utilizes a system for activating software products through a registration process. In September 2011, another company, Sureloc, Inc. (“Sureloc”) claimed that it owned the '216 Patent. As a result, on November 3, 2011, Uniloc and its affiliates filed a lawsuit in the Superior Court of the State of California against Sureloc, Patrick Rooney, and Does 1-100 (the “Sureloc case”), seeking, among other things, a declaratory judgment that Uniloc and not Sureloc, is the exclusive owner of the '216 Patent. Once the Eastern District of Texas was informed of the Sureloc case, all Uniloc cases alleging infringement of the '216 Patent that were pending before the Eastern District of Texas were stayed on December 1, 2011. Subsequently, Uniloc and Sureloc settled their dispute regarding ownership of the '216 Patent, and the California state case against Sureloc case was dismissed with prejudice on September 25, 2012.

On January 25, 2013, the Eastern District of Texas lifted the stay of all Uniloc '216 Patent cases and set the cases for a status conference on February 25, 2013. Following the status conference, on March 21, 2013 Uniloc filed a motion to dismiss all remaining defendants in the '216 Patent cases, without prejudice, and simultaneously filed a new complaint against the Company (as well as any other defendants from the original case that had not reached a settlement agreement with Uniloc). Uniloc has not yet served the re-filed complaint for infringement of the '216 Patent on the Company. Because this lawsuit is in the initial stages, it is not possible to reliably predict the outcome of the litigation. Therefore, we cannot currently estimate the loss, if any, associated with the litigation. We intend to contest the claims associated with this lawsuit vigorously.

'696 Case

On March 30, 2012, Uniloc Luxembourg, S.A. and Uniloc USA, Inc. brought a lawsuit against the Company and several other defendants in the United States District Court for the Eastern District of Texas (“Eastern District of Texas”). The complaint filed by Uniloc alleges that the Company and each of the other fifteen named defendants' software infringe U.S. patent 7,024,696 (“'696 Patent”) allegedly owned by Uniloc. Uniloc alleges that the Company's software, specifically its license key system, infringes upon its patent that utilizes a system for activating software products through a registration process. Because this lawsuit is in its early stages, it is not possible to reliably predict the outcome of the litigation. Therefore, we cannot currently estimate the loss, if any, associated with the litigation. We intend to contest the claims associated with this lawsuit vigorously.

9. Subsequent Event

On July 29, 2013, we announced that our Board of Directors had approved a share repurchase program, authorizing us to purchase up to \$50.0 million of our outstanding common stock. We expect the repurchases will occur over the next 12 months although the exact timing of repurchases and number of shares of common stock to be purchased will depend upon market conditions and other factors. We expect to fund the program using our cash on hand and cash

generated from operations. The program may be extended, suspended or discontinued at any time without prior notice.

17

Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

This section should be read in conjunction with the Condensed Consolidated Financial Statements and related notes thereto included elsewhere in this quarterly report on Form 10-Q. This discussion contains forward-looking statements. Please see the "Safe Harbor Cautionary Statement" above and the risk factors discussed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012 for a discussion of the uncertainties, risks and assumptions associated with these statements. The uncertainties, risks and assumptions associated with these statements could cause our actual results to differ materially from those expressed or implied in our forward-looking statements.

Overview

We design, develop, market, sell and support powerful yet easy-to-use enterprise-class IT infrastructure management software to IT professionals in organizations of all sizes. Our product offerings range from individual software tools to more comprehensive software products that solve problems encountered every day by IT professionals and help to enable efficient and effective management of their network, systems and application infrastructure. Our products are ready-to-use, featuring intuitive and easily customized user interfaces and built-in workflows. Our products can be downloaded directly from our websites and installed and configured by our end-users in a matter of hours. Our customers include small- and mid-size businesses, large enterprises, managed service providers, and local, state and federal government entities that have purchased our products.

Acquisitions

We have made multiple acquisitions of businesses as part of our growth strategy and expect to continue to pursue acquisitions that will enable us to enter new markets, or new segments of our existing markets, by bringing new product offerings to market more quickly than we can develop them. In the second quarter of 2013, we acquired N-able Technologies, or N-able, for \$127.7 million. We account for our acquisitions using the acquisition method of accounting. Accordingly, the financial results for these entities are included in our condensed consolidated financial results since the applicable acquisition dates. See Note 2—Acquisitions of our Notes to Condensed Consolidated Financial Statements for additional details.

The acquisition of N-able increased our product offerings and we believe will allow us to leverage the large opportunity associated with the adoption of cloud and SaaS-based services among SMBs by enhancing our remote monitoring and management offerings and adding MSP service automation to the broad range of management challenges that we address for the IT industry. N-able is based in Ottawa, Canada and serves thousands of MSPs. We believe we can bring the key features of our operating model to their business and help drive revenue growth in the remote monitoring and management market.

Key Financial Highlights

Key financial highlights for the first half of 2013 include the following:

• Total revenue was \$150.4 million in the first half of 2013 compared to \$123.7 million in the first half of 2012, or an increase of 21.6%;

• Net income was \$45.8 million in the first half of 2013 compared to \$36.6 million in the first half of 2012, or an increase of 25.3%;

• Net income was \$0.60 per share on a fully diluted basis for the first half of 2013 compared to \$0.48 per share on a fully diluted basis for the first half of 2012, or an increase of 25.0%; and

• Cash flow from operating activities was \$71.6 million in the first half of 2013 compared to \$61.4 million in the first half of 2012, or an increase of 16.7%.

We have transitioned from a network management software company into an IT infrastructure management software company with a portfolio of products for IT professionals in organizations of all sizes. In the first half of 2013, we invested in areas that we believe are an important foundation for our long term growth such as:

• We released new versions of SolarWinds Network Performance Monitor, SolarWinds IP Address Manager, DameWare

Table of Contents

Remote Support and SolarWinds Web Help Desk along with many other releases of our products, which continued to improve the usability and add features our customers rely on daily. We also released two additional free tools, which reflects our continued commitment to the IT community and our customers;

• We focused on finding new ways to communicate and sell to our customer base. Our customer base continues to grow and evolve with our business and we have to find new ways to deliver value to these customers;

• We continued to expand our international research and development locations allowing us to respond to user demand and support new product releases and enhancements for our acquired and internally developed technologies; and

• We continued to add targeted sales teams for products and regions that utilize our low touch, high-volume sales model.

Despite these specific investments and a number of other important investments, we continued to grow our operating income and increase our cash flows from operating activities.

We are committed to our business model and have continued to focus on ways to leverage and refine our model. We are pursuing a number of strategies that we believe will enable us to continue to grow. We have made progress towards our goals in recent periods but there are still many areas where we believe that we can continue to grow and improve. We expect to grow our business by focusing on the following initiatives:

• Increasing our presence in several key geographic markets including Asia-Pacific, Latin America, Europe, Middle East and Africa by expanding our product portfolio, localizing marketing material, and establishing new relationships with distributors and resellers;

• Expanding our web presence, brand awareness and improving our communication with prospects and our current customer base both domestically and internationally;

• Acquisitions of products that will expand our network management and systems and application management offerings or potential acquisitions of products in new markets; and

• International expansion company-wide at lower cost locations to drive our competitive advantage.

We expect to continue to generate solid growth while delivering strong operating income and to increase our cash flows from operating activities with our disciplined approach to investing in our business combined with our large market opportunity.

Key Business Metrics

We review a number of key business metrics to help us monitor the performance of our business model and to identify trends affecting our business. The measures that we believe are the primary indicators of our quarterly and annual performance are as follows:

Revenue Growth

Revenue growth includes the total revenue growth in our license, maintenance and subscription revenue, which are critical to our long-term success. We have employed a differentiated business model for marketing and selling high volumes of enterprise-class software, which is focused on revenue growth at high operating margins. We regularly review our total revenue growth to measure the success of our investments and strategic business decisions. We have built a financial and operational model that focuses on the long-term value of our customer relationships. After the initial new license purchase, our goal is to create opportunities for sales of additional products, license upgrades and renewal purchases from the customer. This is an important component of our financial model and future revenue growth. This model is based on the premise that we will be able to deliver ongoing value to our customers and maintain a long-term financial relationship with the users of our IT management products. Our revenue growth percentages were 21.6% and 39.3% for the first half of 2013 and 2012, respectively, as compared to the same period of the previous year. We expect our revenue growth to be approximately 20-22% for the full year of 2013.

Core Product Transaction Growth for New License Sales

We focus our sales, marketing and research and development efforts on IT professionals in organizations of all sizes, with the goal of driving purchases of our software by these IT professionals in short sales cycles. In addition, many of our customers make small initial purchases of our software and then over time may purchase an upgrade to increase the size of their license or buy additional software products from us. We review the core product transaction growth to ensure the effectiveness of our

Table of Contents

marketing and sales model and expect core product transaction volume growth to be the primary driver of our new license growth.

We define our core product transactions as the number of new license sales transactions that include at least one of our core products. We define a transaction as each invoice issued for the sale of one or more of our products. If one of our core products is included in a particular transaction, then that transaction is a core product transaction. New license sales of core products represented more than 85% of our license revenue for the first half of 2013. Accordingly, we believe that management can better evaluate changes in our product portfolio, expansion into new markets and the addition of new customers by evaluating the transactional growth of our core products. Our core product transaction growth for new license sales was 40.4% and 30.1% for the first half of 2013 and 2012, respectively, as compared to the same period of the previous year.

Non-GAAP Operating Income and Non-GAAP Operating Margin

Our management uses non-GAAP operating income and non-GAAP operating margin as key measures of our performance. Because our non-GAAP operating income excludes certain items such as amortization of intangible assets, stock-based compensation and related employer-paid payroll taxes, certain acquisition related adjustments and restructuring charges that may not be indicative of our core business, we believe that this measure provides us with additional useful information to measure and understand our performance, particularly with respect to changes in performance from period to period. We use non-GAAP operating income and non-GAAP operating margin in the preparation of our budgets and to measure and monitor our performance. Non-GAAP operating income and non-GAAP operating margin is not determined in accordance with GAAP and is not a substitute for, or superior to, financial measures determined in accordance with GAAP. We expect our Non-GAAP operating margin to be approximately 49% for the full year of 2013.

Free Cash Flow

We believe free cash flow is an important liquidity measure that reflects the cash generated by the business after the purchase of property and equipment that can then be used for, among other things, strategic acquisitions and investments in the business, stock repurchases and funding ongoing operations. We regularly review our free cash flow generation to measure our effectiveness at running our operations efficiently and in a manner that maximizes the value of our business. We define free cash flow as cash flows from operating activities plus the excess tax benefit from stock-based compensation and less the purchase of property and equipment. Free cash flow does not represent the total increase or decrease in the cash balance for the period, is not determined in accordance with GAAP and is not a substitute for, or superior to, financial measures determined in accordance with GAAP.

For further discussion regarding non-GAAP financial measures including non-GAAP operating income and free cash flow, see “Non-GAAP Financial Measures” below.

Opportunities, Trends and Uncertainties

Businesses, governments and other organizations are increasingly relying on networks, systems, and applications to execute their operations, facilitate their internal and external communications and transact business with their customers and partners. The size of these networks, the number of applications and servers, and the complexity of physical and virtual server environments are increasing as organizations place more reliance on them. In addition, business initiatives to capture, store, and analyze an increasing amount of organizational data are creating new IT management challenges. Furthermore, the adoption of cloud computing technologies, which is shifting a growing number of critical workloads off premises, is also creating new IT management complexities and placing increasing importance on the performance of IT assets as compute resources become more distributed. The development and evolution of cloud computing technologies is also allowing a growing number of small and medium-sized organizations to rely upon third parties, known as managed service providers, for their IT management needs. These managed service providers need powerful, yet easy-to-use and affordable solutions in order to address a wide range of IT management issues for the thousands of small and medium-sized organizations they serve.

In order to address these challenges, we offer a cohesive portfolio of powerful, yet easy-to-use and affordably priced IT management products spanning networks, systems, and application management. This includes software that we have either developed or acquired that allows IT professionals to manage the performance, health, and configurations

of network devices, firewalls, applications, physical and virtual servers, storage devices, as well as software for log and security information management. It also includes software that provides IT professionals with mobile and remote access to their IT infrastructure and software to help them track and resolve IT issues along with their IT assets. Lastly, our portfolio includes a set of cloud-based remote monitoring and management products that allow managed service providers to remotely access and address a broad range of IT issues faced by their customers in order to ensure the performance and security of their networks, desktops, servers, and other proprietary systems. We believe that IT-related trends and the limitations of existing offerings present a

Table of Contents

significant market opportunity for our products. We expect our revenue to continue to grow as we capitalize on these and other market opportunities through acquisitions and development. We continue to target total new sales growth of 20% for our existing license and subscription products and new product offerings over the next three to five years. However, our ability to meet our target will depend on a number of factors and assumptions, many of which are outside of our control. Further, any revenue growth and operating synergies of our acquired products and businesses depends on our ability to successfully integrate those products and businesses and may be lower than expected if we are unable to do so in the future.

In the second quarter of 2013, we recognized 26.2% of our revenue from sales by our international subsidiaries, which includes the Europe, Middle East and Africa, or EMEA, region, the Asian-Pacific region, and the Latin American region. We believe there is a substantial opportunity for additional sales of our software in these international regions and we intend to increase our sales, marketing and support operations in these regions. However, we believe there is significant uncertainty regarding the economic conditions in certain of these geographic regions, particularly in parts of Europe. While we believe that any difficult economic conditions may adversely affect the sales of our products, this could also offer us an opportunity to market and sell our products to mid-size businesses and enterprise customers at compelling prices compared to the prices of some competing products.

We expect the U.S. federal government to continue to be a significant market opportunity, as we believe the ease of deployment, power and scalability of our products gives us a competitive advantage to sell to various agencies and departments of the U.S. federal government. The U.S. federal government new license sales were 10.4% of our total new license sales in the second quarter of 2013 and 7.9% of our total new license sales in the first half of 2013. We have experienced and continue to expect inconsistency in the buying pattern of the U.S. federal government for larger transactions with our products. We believe that many of our larger transactions, both new licenses and maintenance renewals, with the U.S. federal government are dependent on specific projects that may not be continued at the same scale in the future due to budgetary cuts or other reasons, and the reduction or cancellation of specific projects such as these could result in our sales to the U.S. government growing less rapidly than expected or even decreasing. In addition, our sales, both new licenses and maintenance renewals, to the U.S. federal government are largely dependent on systems integrators, distributors and resellers whose purchases from us have been difficult to predict.

Key Components of Our Results of Operations

Sources of Revenue

Our revenue is primarily comprised of license, maintenance and subscription revenue.

License, Maintenance and Other Revenue. We primarily license our software under perpetual licenses, which ordinarily include one year of maintenance as part of the initial purchase price of the product. License revenue reflects the revenue recognized from sales of new perpetual licenses and upgrades of license size to our software. We have experienced annual growth in license revenue. Customers can renew, and generally have renewed, their maintenance agreements at our standard list maintenance renewal pricing for their software products. Current customers with maintenance agreements are entitled to receive unspecified upgrades or enhancements when and if they become available. Maintenance revenue is an important source of our future revenue. We have experienced strong and consistent annual and quarterly growth in maintenance and other revenue. Because our maintenance base grew during 2012 and during the first half of 2013 due to new license sales, high customer retention and acquisitions, we expect maintenance revenue to continue to increase in absolute dollars in future periods.

Subscription Revenue. We primarily derive subscription revenue from fees received from customers for time-based license arrangements and software-as-a-service, or SaaS, offerings which were introduced during the second quarter of 2013 as a result of our acquisition of N-able.

Cost of Revenue

Cost of revenue primarily consists of personnel costs related to providing technical support services, amortization of acquired developed product technologies and royalty and hosting fees. Personnel costs include salaries, bonuses and stock-based compensation and related employer-paid payroll taxes for technical support personnel, as well as an allocation of our facilities, information technology, employee benefit and other overhead costs. We allocate stock-based compensation expense and related employer-paid payroll taxes to personnel costs based on the expense category in which the option or restricted stock unit holder works. We allocate overhead, such as rent, computer and

other technology costs, and employee benefit costs to personnel costs in each expense category based on worldwide headcount in that category.

The amortization of developed product technologies can vary significantly each period based on the size and timing of our acquisitions. We expect our cost of revenue to increase in absolute dollars and to fluctuate as a percentage of revenue as we acquire additional companies or technologies and as we increase our headcount to support new customers and product

Table of Contents

offerings.

Operating Expenses

We classify our operating expenses into three categories: sales and marketing; research and development; and general and administrative. Our operating expenses primarily consist of personnel costs, contract research and development costs, marketing program costs and legal, accounting, consulting and other professional service fees. Personnel costs for each category of operating expenses primarily include employee compensation costs and facility overhead costs.

We include restructuring charges related to severance and relocation in the employee's respective department.

Our operating expenses increased in absolute dollars and decreased as a percentage of revenue in the first half of 2013 compared to the first half of 2012, as we have continued to build infrastructure and add employees through acquisitions and organic growth across all departments in order to accelerate and support our growth. The number of full-time employees as of June 30, 2013, was 1,142, as compared to 739, as of June 30, 2012. We added 188 full-time employees with the N-able acquisition in May 2013 and expect to incur approximately \$16.0 to \$17.0 million of incremental expenses for the remainder of the year as a result of this acquisition.

We expect our operating expenses to continue to increase in absolute dollars as we make long-term investments in our business both domestically and internationally. As we acquire additional companies or technologies and integrate the businesses, our operating expenses in future periods may increase in absolute dollars and fluctuate as a percentage of revenue as a result of such acquisitions. In addition, we intend to continue to grant equity awards to our current executives and employees and those who join us in the future through acquisitions or otherwise, which will result in additional stock-based compensation expense.

Sales and Marketing. Sales and marketing expenses primarily consist of personnel costs for our sales, marketing and business development employees and executives, commissions earned by our sales personnel, the cost of marketing programs such as paid search, search engine optimization and management, website maintenance and design and the cost of business development programs. We will continue to hire sales personnel in the United States and in our international sales offices to drive new license sales growth. We also expect to continue to invest in our websites, online user community site, brand awareness initiatives and marketing programs to drive customer downloads and support our new product launches.

Research and Development. Research and development expenses primarily consist of personnel costs for our product development employees and executives and, to a lesser extent, contractor fees. We have devoted our development efforts primarily to expanding our product line and increasing the functionality and enhancing the ease-of-use of our software products. We have significantly increased our research and development employee headcount with the continued expansion of our research and development centers in the Czech Republic and India, which has resulted in and will continue to result in an increase in facilities and personnel costs. We expect to continue to invest in our research and development activities by hiring engineers in our international locations, which will allow us to continue our research and development growth strategy internationally.

General and Administrative. General and administrative expenses primarily consist of personnel costs for our executive, finance, legal, human resources and administrative personnel and amortization of acquired intangible assets. Legal, accounting and other professional service fees, lease abandonment charges related to the closing of certain offices along with general corporate expenses are also recorded in general and administrative expenses. We expect to incur higher administrative costs in future periods as our business continues to grow both organically and through acquisitions.

Other Income (Expense)

Other income (expense) consists of interest income, transactional foreign exchange gains (losses), foreign exchange contracts gains (losses), grant income and acquisition related contingent consideration fair value adjustments due to the passage of time. We periodically receive government grant income related to grants in our Czech Republic and Ireland entities for the creation of job positions and related training costs. The amount and timing of the grant payments is determined by the Czech and Irish governments. Interest income represents interest received on our cash, cash equivalents and short-term and long-term investments, including any amortization or accretion of the premium and discount. Foreign exchange gains (losses) primarily relate to expenses and billing transactions denominated in currencies other than the functional currency of the associated subsidiary. Foreign exchange contracts gains (losses)

relate to the settlement of foreign currency forward contracts utilized to hedge foreign currency exposures that are not formally designated as hedges.

Table of Contents

Income Tax Expense

Income tax expense primarily consists of corporate income taxes related to profits resulting from the sale of our software offerings by our only three entities that sell our software, one in the United States, one in Canada and one in Ireland. The rate of taxation on income earned by our U.S. entity is higher than the rate of taxation on income earned by our Canadian and Irish entities. If our international income, as a percentage of total income, increases as we expect, then our effective income tax rate should correspondingly decline. However, our effective tax rate may be affected by many other factors, such as changes in tax laws, regulations or rates, new interpretations of existing laws or regulations, the impact of accounting for stock-based compensation, the impact of accounting for business combinations, the impact of accounting for uncertain tax positions, changes in our international structure, shifts in the amount of taxable income earned in the United States, as compared with other regions in the world, and changes in overall levels of income before tax.

The U.S. research and experimentation tax credit, or R&E tax credit, expired on December 31, 2011; however, the R&E tax credit was extended by the signing of the American Taxpayer Relief Act of 2012, or the Act, on January 2, 2013. The Act retroactively reinstated and extended the R&E tax credit from January 1, 2012 through December 31, 2013. Since the Act was enacted during 2013, the income tax benefit related to the 2012 R&E tax credit was reflected discretely in our results of operations for the quarter ended March 31, 2013. Additionally, the current year estimated annual effective tax rate reflects a benefit from the 2013 R&E tax credit.

The tax credit is currently set to expire on December 31, 2013, and may not be renewed, or if renewed, it may be renewed on terms significantly less favorable than current tax incentives or on terms resulting in our disqualification from the benefits of the R&E tax credit. The elimination or significant reduction in the R&E tax credit would increase our effective tax rate and could adversely affect our results of operations in the future.

Comparison of the Three Months Ended June 30, 2013 and 2012

The following table sets forth our condensed consolidated statements of income data for the periods indicated:

	Three months ended June 30,				
	2013	% of	2012	% of	Change
	(in thousands)	Revenue	(in thousands)	Revenue	(in thousands)

Table of Contents

Revenue

Revenue increased \$13.5 million, or 21.0%, in the quarter ended June 30, 2013 compared to the quarter ended June 30, 2012. Maintenance and other revenue increased \$10.8 million due to a growing maintenance renewal customer base and an increase in new license sales, which drives new maintenance revenue. We have maintained high customer retention and in addition, our renewal base has continued to increase each quarter as we have begun to renew and recognize the maintenance revenue associated with our acquired products. License revenue increased \$1.7 million due to continued growth in new license sales of our core network management products and our flagship system management product, Solarwinds Application Monitor, offset by decreases in our other system management products such as Storage Manager and DameWare. Subscription revenue of \$1.0 million is from the sale of products introduced as a result of our acquisition of N-able technologies.

Our core product transaction growth was 28.3% in the second quarter of 2013 compared to the second quarter of 2012 as a result of our growth in new license sales of our core systems management products, particularly Web Help Desk and Serv-U, and our network management products. As the number of core product transactions fluctuates with changes in the business or product mixes, this also affects our trailing 12-month average transaction size for new license sales. Through the second quarter of 2013, the trailing 12-month average transaction size for new license sales, excluding our high-volume and low-priced Kiwi and DameWare products, was approximately \$7,700 as compared to approximately \$8,800 for the trailing 12-month period through the second quarter of 2012, a decrease of 11.8%. The decrease in our trailing 12-month average transaction size was primarily due to the high volume of transactions of our Web Help Desk and Serv-U products combined with their lower average transaction size than our other core products. New license sales in our global commercial business increased 4.1% and new license sales in our U.S. federal government business increased 34.7% for the second quarter of 2013 as compared to the second quarter of 2012. This growth in our commercial business was driven by core product transaction growth of 29.6% in the second quarter of 2013 as compared to the second quarter of 2012. The increase in our U.S. federal government new license sales was primarily driven by an increase in the size of transactions in the second quarter of 2013 compared to the second quarter of 2012. We had one U.S. federal government transaction that resulted in license revenue greater than \$0.5 million in the second quarter of 2013, whereas we did not have any transactions that resulted in license revenue greater than \$0.5 million for the second quarter of 2012. Our revenue from our international subsidiaries was 26.2% and 24.5% of total revenue in the second quarter of 2013 and 2012, respectively.

Cost of Revenue

Cost of revenue increased \$1.9 million, or 44.2%, in the quarter ended June 30, 2013 compared to the quarter ended June 30, 2012. Cost of license revenue increased by \$1.0 million in the second quarter of 2013 compared to the second quarter of 2012, primarily due to the amortization of acquired product technologies associated with our acquisitions in the second half of 2012. Cost of maintenance revenue also increased \$0.4 million primarily due to increased headcount to support new customers, additional product offerings from acquisitions and internal product development. Cost of subscription revenue consists of personnel costs and other direct costs, including royalty fees and hosting fees, related to our subscription products and services which were introduced during the second quarter of 2013.

Operating Expenses

Sales and Marketing. Sales and marketing expenses increased \$2.7 million, or 15.3%, in the quarter ended June 30, 2013 compared to the quarter ended June 30, 2012. We continue to invest in the sales and marketing efforts that drive our revenue growth. In addition, we have increased employee headcount in our sales, marketing and maintenance renewal teams. As a result of these expansion efforts, our sales and marketing personnel costs, which include stock-based compensation expense, increased \$2.0 million and marketing program costs increased \$0.6 million. Our sales expense as a percentage of revenue remained consistent in the second quarter of 2013 as compared to the same period in 2012.

Research and Development. Research and development expenses increased \$1.3 million, or 18.6%, in the quarter ended June 30, 2013 compared to the quarter ended June 30, 2012. In order to support the ongoing development of acquired and new products, we continued to increase the size of our Czech Republic and India research and development centers during 2012 and the the first half of 2013. Due to this growth, our personnel costs, which include stock-based compensation expense, increased by \$1.1 million and contract services increased \$0.2 million in the

second quarter of 2013 as compared to the second quarter of 2012.

General and Administrative. General and administrative expenses increased \$3.2 million, or 38.0%, in the quarter ended June 30, 2013 compared to the quarter ended June 30, 2012. This increase was primarily due to a \$1.3 million increase in personnel costs, which include stock-based compensation expense, a \$0.6 million increase in acquisition costs, and a \$0.5 million increase in professional fees. In addition, other miscellaneous costs including amortization of acquired intangibles increased \$0.5 million and restructuring charges, which primarily consist of lease abandonment charges related to the closing of certain offices, increased \$0.3 million.

Table of Contents

Other Income (Expense)

Other income (expense) decreased by \$0.3 million primarily due to increases in net losses on foreign currency transactions for the quarter ended June 30, 2013 as compared to the same period in 2012.

Income Tax Expense

Our income tax expense increased by \$0.8 million in the quarter ended June 30, 2013 as compared to the same period in 2012. This increase resulted from an increase in our income before income taxes of \$4.1 million, offset by the reenacted R&E tax credit when comparing the same periods. Our results of operations for the quarter ended June 30, 2012 do not reflect an income tax benefit related to the R&E tax credits as the R&E tax credit expired on December 31, 2011. However, the R&E tax credit was extended by the signing of the American Taxpayer Relief Act of 2012, or the Act, on January 2, 2013. The Act retroactively reinstated and extended the R&E tax credit from January 1, 2012 through December 31, 2013. Therefore, the current year estimated annual effective tax rate reflects a benefit from the 2013 R&E tax credit, which was also a benefit to our effective tax rate for the quarter.

Our effective tax rate decreased from 28.0% in the quarter ended June 30, 2012 to 26.7% in the quarter ended June 30, 2013, which was primarily attributable to the availability of the U.S. R&E tax credit, as well as an increase in international earnings, which are generally taxed at lower tax rates.

Comparison of the Six Months Ended June 30, 2013 and 2012

The following table sets forth our condensed consolidated statements of income data for the periods indicated:

	Six months ended June 30,				
	2013	% of	2012	% of	Change
	(in thousands)	Revenue	(in thousands)	Revenue	(in thousands)
Revenue:					
License	\$61,856	41.1	% \$ 56,911	46.0	% \$ 4,945
Maintenance and other	87,558	58.2	66,800	54.0	20,758

Net income	\$45,796	30.4	% \$ 36,558	29.6	% \$ 9,238

Table of Contents

Revenue

Revenue increased \$26.7 million, or 21.6%, in the six months ended June 30, 2013 compared to the six months ended June 30, 2012. Maintenance and other revenue increased \$20.8 million due to a growing maintenance renewal customer base and an increase in new license sales, which drives new maintenance revenue. We have maintained high customer retention and in addition, our renewal base has continued to increase each quarter as we have begun to renew and recognize the maintenance revenue associated with our acquired products. License revenue increased \$4.9 million due to continued growth in new license sales of our core network management products and our flagship system management product, Solarwinds Application Monitor, offset by decreases in our other system management products such as Storage Manager and DameWare. Subscription revenue of \$1.0 million is from the sale of products introduced as a result of our acquisition of N-able technologies.

Our core product transaction growth was 40.4% in the first half of 2013 compared to the first half of 2012 as a result of our growth in new license sales of our core systems management products, particularly Web Help Desk and Serv-U, and our network management products. As the number of core product transactions fluctuates with changes in the business or product mixes, this also affects our trailing 12-month average transaction size for new license sales. Through the second quarter of 2013, the trailing 12-month average transaction size for new license sales, excluding our high-volume and low-priced Kiwi and DameWare products, was approximately \$7,700 as compared to approximately \$8,800 for the trailing 12-month period through the second quarter of 2012, a decrease of 11.8%. The decrease in our trailing 12-month average transaction size was primarily due to the high volume of transactions of our Web Help Desk and Serv-U products combined with their lower average transaction size than our other core products. New license sales in our global commercial business increased 8.4% and new license sales in our U.S. federal government business increased 22.5% for the first half of 2013 as compared to the first half of 2012. This growth in our commercial business was driven by core product transaction growth of 42.2% in the first half of 2013 as compared to the first half of 2012. The increase in our U.S. federal government new license sales was primarily driven by an increase in the size of transactions in the first half of 2013 compared to the first half of 2012. We had one U.S. federal government transaction that resulted in license revenue greater than \$0.5 million in the first half of 2013, whereas we did not have any transactions that resulted in license revenue greater than \$0.5 million for the first half of 2012. Our revenue from our international subsidiaries was 26.7% and 24.6% of total revenue in the first half of 2013 and 2012, respectively.

Cost of Revenue

Cost of revenue increased \$3.2 million, or 38.0%, in the six months ended June 30, 2013 compared to the six months ended June 30, 2012. Cost of license revenue increased by \$1.9 million in the first half of 2013 compared to the first half of 2012, primarily due to the amortization of acquired product technologies associated with our acquisitions in the second half of 2012. Cost of maintenance revenue also increased \$0.8 million primarily due to increased headcount to support new customers, additional product offerings from acquisitions and internal product development. Cost of subscription revenue consists of personnel costs and other direct costs, including royalty fees and hosting fees, related to our subscription products and services which were introduced during the second quarter of 2013.

Operating Expenses

Sales and Marketing. Sales and marketing expenses increased \$6.4 million, or 18.8%, in the six months ended June 30, 2013 compared to the six months ended June 30, 2012. We continue to invest in the sales and marketing efforts that drive our revenue growth. In addition, we have increased employee headcount in our sales, marketing and maintenance renewal teams. As a result of these expansion efforts, our sales and marketing personnel costs, which include stock-based compensation expense, increased \$4.7 million and marketing program costs increased \$1.5 million. Our sales expense as a percentage of revenue remained consistent in the first half of 2013 as compared to the same period in 2012.

Research and Development. Research and development expenses increased \$2.5 million, or 18.1%, in the six months ended June 30, 2013 compared to the six months ended June 30, 2012. In order to support the ongoing development of acquired and new products, we continued to increase the size of our Czech Republic and India research and development centers during 2012 and the first half of 2013. Due to this growth, our personnel costs, which include stock-based compensation expense, increased by \$2.0 million and contract services increased \$0.5 million in the first

half of 2013 as compared to the first half of 2012.

General and Administrative. General and administrative expenses increased \$4.6 million, or 27.1%, in the six months ended June 30, 2013 compared to the six months ended June 30, 2012. This increase was primarily due to a \$2.2 million increase in personnel costs, which include stock-based compensation expense, a \$0.9 million increase in professional fees and a \$0.3 million increase in acquisition related costs. In addition, other miscellaneous costs including amortization of acquired intangibles increased \$0.9 million and restructuring charges, which primarily consist of lease abandonment charges related to the closing of certain offices, increased \$0.3 million.

Table of Contents

Other Income (Expense)

Other income (expense) decreased by \$0.4 million primarily due to increases in net losses on foreign currency transactions for the six months ended June 30, 2013 as compared to the same period in 2012.

Income Tax Expense

Our income tax expense increased by \$0.4 million in the six months ended June 30, 2013 as compared to the same period in 2012. This increase resulted from an increase in our income before income taxes of \$9.6 million, offset by the reenacted R&E tax credit when comparing the same periods. Our results of operations for the six months ended June 30, 2012 do not reflect an income tax benefit related to the R&E tax credits as the R&E tax credit expired on December 31, 2011. However, the R&E tax credit was extended by the signing of the American Taxpayer Relief Act of 2012, or the Act, on January 2, 2013. The Act retroactively reinstated and extended the R&E tax credit from January 1, 2012 through December 31, 2013. Since the Act was enacted during 2013, the income tax benefit related to the 2012 R&E tax credit was reflected discretely in our results of operations for the quarter ended March 31, 2013. Additionally, the current year estimated annual effective tax rate reflects a benefit from the 2013 R&E tax credit, which was also a benefit to our effective tax rate for the quarter.

Our effective tax rate decreased from 28.0% in the six months ended June 30, 2012 to 24.1% in the six months ended June 30, 2013, which was primarily attributable to the availability of the U.S. R&E tax credit which resulted in the entire 2012 R&E tax credit being recognized discretely this period, as well as an increase in international earnings, which are generally taxed at lower tax rates.

Non-GAAP Financial Measures

In addition to disclosing financial measures prepared in accordance with GAAP, this Form 10-Q includes the following financial measures which are non-GAAP financial measures under SEC rules: (i) non-GAAP operating income; (ii) non-GAAP net income; (iii) non-GAAP diluted earnings per share; and (iv) free cash flow. Each of these financial measures excludes the impact of certain items and therefore has not been calculated in accordance with GAAP. In this report, these non-GAAP financial measures typically exclude stock-based compensation expense and related employer-paid payroll taxes; amortization of intangible assets; acquisition related adjustments, including contingent consideration fair value adjustments due to the changes in probability assumptions of achieving the earnout criteria and due to the passage of time; and restructuring charges. Each of these non-GAAP adjustments is described in more detail below. In addition to these adjustments, management may include or exclude additional items from these or similar non-GAAP financial measures in future periods to the extent that management believes such items may not be indicative of our core business. A reconciliation of each of these non-GAAP financial measures to its most comparable GAAP financial measure is also included below.

We believe that these non-GAAP financial measures provide meaningful supplemental information regarding our operating results because they exclude certain amounts that our management and Board of Directors do not consider part of core operating results when assessing our operational performance, allocating resources, preparing annual budgets and determining employee incentive compensation. Accordingly, these non-GAAP financial measures may provide insight to investors into the motivation and decision-making of management in operating the business. In addition, by comparing our non-GAAP financial measures in different historical periods, our investors can evaluate our operating results without the additional variations of certain items that may not be indicative of our core operations, including stock-based compensation expense, which we believe is a non-cash expense that is not a key measure of our operations.

While we believe that these non-GAAP financial measures provide useful supplemental information, there are limitations associated with the use of these non-GAAP financial measures. These non-GAAP financial measures are not prepared in accordance with GAAP, do not reflect a comprehensive system of accounting and may not be comparable to similarly titled measures of other companies due to potential differences in their financing and accounting methods, the book value of their assets, their capital structures, the method by which their assets were acquired and the manner in which they define non-GAAP measures. Items such as the amortization of intangible assets, stock-based compensation expense and related employer-paid payroll taxes, acquisition related adjustments and restructuring charges, as well as the related tax impacts of these items can have a material impact on operating and

net income. In addition, free cash flow does not represent the total increase or decrease in the cash balances for the period. As a result, these non-GAAP financial measures have limitations and should not be considered in isolation from, or as a substitute for, their most comparable GAAP measures. We compensate for these limitations by using these non-GAAP financial measures as supplements to GAAP financial measures and by reconciling the non-GAAP financial measures to their most comparable GAAP financial measure. Investors are encouraged to review the reconciliations of these non-GAAP financial measures to their most comparable GAAP financial measures below. For a detailed explanation of the adjustments made to comparable GAAP financial measures, the reasons why management uses these measures and the usefulness of these measures, see footnotes (1)—(7) below.

Table of Contents

Non-GAAP Operating Income and Non-GAAP Operating Margin

(in thousands)	Three Months Ended		Six Months Ended		
	June 30, 2013	2012	June 30, 2013	2012	
GAAP operating income	\$31,314	\$26,888	\$60,626	\$50,606	
Amortization of intangible assets (1)	4,535	3,536	8,973	7,043	
Stock-based compensation expense and related employer-paid payroll taxes (2)	5,257	3,718	12,203	7,852	
Acquisition related adjustments (3)	554	111	604	333	
Restructuring charges (4)	483	—	483	—	
Non-GAAP operating income	\$42,143	\$34,253	\$82,889	\$65,834	
Non-GAAP operating margin	54.4	% 53.5	% 55.1	% 53.2	%

The increases in non-GAAP operating income for the three and six month periods ended June 30, 2013 as compared to the same periods in 2012 were primarily due to increases in the corresponding GAAP operating income, which were driven by higher operating margins and revenue volumes in the corresponding periods. Amortization of intangible assets, which is excluded from our non-GAAP operating income, also increased in the second quarter and the first half of 2013 as compared to the same periods in 2012 primarily due to increases in intangible assets resulting from the various acquisitions that were completed during the second half of 2012 and 2013. Stock-based compensation expense and related employer-paid payroll taxes increased primarily due to share-based incentive awards issued to employees for retention and, to a lesser extent, the addition of employees through acquisitions and organic growth. Our acquisition related adjustments fluctuate due to variations in the legal and accounting fees and restructuring costs associated with each of our acquisitions. Our restructuring charges primarily consist of lease abandonment charges related to the closing of certain offices.

Non-GAAP Net Income and Non-GAAP Diluted Earnings Per Share

(in thousands)	Three Months Ended		Six Months Ended		
	June 30, 2013	2012	June 30, 2013	2012	
GAAP net income	\$22,797	\$19,427	\$45,796	\$36,558	
Amortization of intangible assets (1)	4,535	3,536	8,973	7,043	
Stock-based compensation expense and related employer-paid payroll taxes (2)	5,257	3,718	12,203	7,852	
Acquisition related adjustments (3)	556	124	608	355	
Restructuring charges (4)	483	—	483	—	
Tax benefits associated with above adjustments (5)	(2,897)	(2,025)	(6,125)	(4,216))
Non-GAAP net income	\$30,731	\$24,780	\$61,938	\$47,592	
Weighted-average number of shares used in computing diluted earnings per share	76,592	75,848	76,625	75,642	
Non-GAAP diluted earnings per share (6)	\$0.40	\$0.33	\$0.81	\$0.63	

The increases in non-GAAP net income for the three and six month periods ended June 30, 2013 as compared to the same periods in 2012 were primarily due to increases in the corresponding GAAP net income and the adjustments discussed above in the calculation of non-GAAP operating income. Other adjustments to non-GAAP net income include fair value adjustments due to the passage of time related to contingent consideration included in acquisition related costs and the tax benefits associated with the excluded items. Non-GAAP diluted earnings per share increased for the second quarter and the first half of 2013 as compared to the same periods in 2012 primarily due to increases in non-GAAP net income as discussed above as the number of shares used in the computation did not change significantly.

Table of Contents

Free Cash Flow

(in thousands)	Three Months Ended		Six Months Ended	
	June 30,	June 30,	June 30,	June 30,
	2013	2012	2013	2012
GAAP cash flows from operating activities	\$40,712	\$33,197	\$71,599	\$61,368
Excess tax benefit from stock-based compensation	1,516	1,875	6,246	5,184
Purchases of property and equipment	(964) (789) (1,746) (1,560
Free cash flow (7)	\$41,264	\$34,283	\$76,099	\$64,992

The increases in free cash flow for the three and six month periods ended June 30, 2013 as compared to the same periods in 2012 were primarily due to increases in operating income that converted to cash flow for the periods. For the six month period ended June 30, 2013, this increase was offset by higher cash payments in the first quarter of 2013 related to annual company-wide bonus payments for the 2012 fiscal year. The excess tax benefit from stock-based compensation fluctuates with the exercise of stock option awards.

Non-GAAP Footnotes:

(1) Amortization of Intangible Assets. We provide non-GAAP information that excludes expenses for the amortization of intangible assets that primarily relate to purchased intangible assets associated with our acquisitions. We believe that eliminating this expense from our non-GAAP measures is useful to investors, because the amortization of intangible assets can be inconsistent in amount and frequency and is significantly impacted by the timing and magnitude of our acquisition transactions, which also vary in frequency from period to period. Accordingly, we analyze the performance of our operations in each period without regard to such expenses.

(2) Stock-Based Compensation Expense and Related Employer-Paid Payroll Taxes. We provide non-GAAP information that excludes expenses for stock-based compensation and related employer-paid payroll taxes. We believe the exclusion of these items allows for financial results that are more indicative of our continuing operations. We believe that the exclusion of stock-based compensation expense provides for a better comparison of our operating results to prior periods and to our peer companies as the calculations of stock-based compensation vary from period to period and company to company due to different valuation methodologies, subjective assumptions and the variety of award types. Employer-paid payroll taxes on stock-based compensation is dependent on our stock price and the timing of the taxable events related to the equity awards, over which our management has little control, and does not correlate to the core operation of our business. Because of these unique characteristics of stock-based compensation and the related employer-paid payroll taxes, management excludes these expenses when analyzing the organization's business performance.

(3) Acquisition Related Adjustments. We exclude certain expense items resulting from acquisitions including the following, when applicable: (i) amortization of purchased intangible assets associated with our acquisitions (see Note 1 for further discussion); (ii) legal, accounting and advisory fees to the extent associated with acquisitions; (iii) changes in fair value of contingent consideration; (iv) costs related to integrating the acquired businesses; and (v) restructuring costs, including adjustments related to changes in estimates, related to acquisitions. We consider these adjustments, to some extent, to be unpredictable and dependent on a significant number of factors that are outside of our control. Furthermore, acquisitions result in non-continuing operating expenses, which would not otherwise have been incurred by us in the normal course of our organic business operations, with respect to each acquisition. We believe that providing non-GAAP information for acquisition related expense items in addition to the corresponding GAAP information allows the users of our financial statements to better review and understand the historical and current results of our continuing operations, and also facilitates comparisons to our historical results and results of less acquisitive peer companies, both with and without such adjustments.

(4) Restructuring Charges. We provide non-GAAP information that excludes restructuring charges such as severance, relocation and benefits and the estimated costs of exiting and terminating facility lease commitments, including accelerated depreciation on leasehold improvements and fixed assets, as they relate to our corporate restructuring and exit activities. These restructuring charges are inconsistent in amount and are significantly impacted by the timing and nature of these events. Therefore, although we may incur these types of expenses in the future, we believe that eliminating these charges for purposes of calculating the non-GAAP financial measures facilitates a

more meaningful evaluation of our current operating performance and comparisons to our past operating performance.

Table of Contents

(5) Income Tax Effect of Non-GAAP Exclusions. We believe providing financial information with and without the income tax effect of excluding items related to our non-GAAP financial measures provide our management and users of the financial statements with better clarity regarding the ongoing performance and future liquidity of our business.

(6) Non-GAAP Diluted Earnings Per Share Item. We provide non-GAAP diluted earnings per share. The non-GAAP diluted earnings per share amount was calculated based on our non-GAAP net income and the shares used in the computation of GAAP diluted earnings per share.

(7) Free Cash Flow. We define free cash flow as cash flows from operating activities plus the excess tax benefit from stock-based compensation and less the purchases of property and equipment. We believe free cash flow is an important liquidity measure that reflects the cash generated by the business after the purchase of property and equipment that can then be used for, among other things, strategic acquisitions and investments in the business, stock repurchases and funding ongoing operations. Free cash flow does not represent the total increase or decrease in the cash balance for the period. The changes in free cash flow result from fluctuations in cash flows from operating activities offset by excess tax benefits associated with the exercises of options. For further discussion regarding cash flows from operating activities, see the discussion under the caption "Liquidity and Capital Resources" included in this Item 2.

Liquidity and Capital Resources

Cash and cash equivalents and short-term and long-term investments were \$196.3 million as of June 30, 2013. Our international subsidiaries held approximately \$78.8 million of cash and cash equivalents of which 88.8% was held in Euros as of June 30, 2013. We expect our international cash and cash equivalents to continue to increase as a percentage of our consolidated cash and cash equivalents. We currently intend that the earnings generated by our international operations will be invested indefinitely in those operations and we do not expect to repatriate those earnings to our domestic operations. If we were to try and repatriate these earnings, we would incur a U.S. federal income tax liability that is not currently accrued in our consolidated financial statements.

Our available cash and cash equivalents are primarily held in bank deposits and money market funds at June 30, 2013. Our short-term and long-term investments, classified as available-for-sale securities, consist of corporate bonds, municipal bonds and commercial paper held in investment accounts in the United States.

Our emphasis is primarily on safety of principal while secondarily maximizing yield on those funds. The balances held in our demand deposit accounts in the United States may exceed the Federal Deposit Insurance Corporation, or FDIC, insurance limits. While we monitor the balances in our accounts and adjust the balances as appropriate, these balances could be impacted by adverse conditions in the financial markets or by failure of the underlying depository institutions or guarantors. We strive to maintain our cash deposits, money market funds and investments with multiple financial institutions of reputable credit quality and therefore, bear minimal credit risk. We actively monitor the third party depository institutions that hold our cash, cash equivalents and investments. To date, we have experienced no loss or lack of access to our invested cash, cash equivalents, and investments; however, we can provide no assurances that access to our funds will not be impacted by future adverse conditions.

Summarized cash flow information is as follows (in thousands):

(in thousands)	Six Months Ended	
	June 30,	
	2013	2012
Net cash provided by operating activities	\$71,599	\$61,368
Net cash used in investing activities	(108,578)	(45,363)
Net cash provided by financing activities	7,137	6,330
Effect of exchange rate changes	(966)	(1,034)
Net increase (decrease) in cash and cash equivalents	(30,808)	21,301

Operating Activities

Cash provided by operating activities is comprised of net income, adjustments for non-cash operating activities and changes in operating assets and liabilities. Adjustments for non-cash expenses were \$14.2 million and \$10.0 million for the six months ended June 30, 2013 and 2012, respectively. These adjustments primarily consist of stock-based

compensation expense, depreciation and amortization and excess tax benefits related to employee stock-based awards.
Stock-based compensation

30

Table of Contents

expense reduced income before income taxes by \$11.5 million and \$7.5 million in the six months ended June 30, 2013 and 2012, respectively.

The change in cash flows relating to operating activities resulted from changes in operating assets and liabilities and is primarily driven by the sales of our software and maintenance renewals. The significant changes in operating assets and liabilities include the following:

Deferred revenue increased to \$114.5 million at June 30, 2013 as compared to \$102.8 million at December 31, 2012, resulting in an increase in operating liabilities and reflecting a cash inflow of \$10.6 million for the six months ended June 30, 2013. For the six months ended June 30, 2012, net cash provided by operating activities increased \$9.5 million due to an increase in deferred revenue during the period. Deferred revenue primarily consists of billings or payments received in advance of revenue recognition from maintenance fees.

Accrued liabilities decreased to \$11.5 million at June 30, 2013 as compared to \$14.2 million at December 31, 2012, resulting in a decrease in operating liabilities and reflecting a cash outflow of \$5.0 million for the six months ended June 30, 2013. This cash outflow was primarily a result of annual company-wide bonus payments for the 2012 fiscal year accrued at December 31, 2012 and paid during the first quarter of 2013.

Changes in our income tax receivable and payable balances are also significant components of our cash flows from operating activities. The decrease in our income tax payable was primarily due to tax payments made during the first half of 2013. Net cash provided by operating activities was reduced by income tax payments of \$10.2 million in the first half of 2013.

Accounts receivable increased to \$35.8 million at June 30, 2013 as compared to \$32.5 million at December 31, 2012 resulting in an increase in operating assets and reflecting a cash outflow of \$0.1 million for the six months ended June 30, 2013. The increase in accounts receivable for the six months ended June 30, 2012 as compared to December 31, 2011 resulted in cash outflows of \$2.1 million for the six months ended June 30, 2012. Our accounts receivable balance fluctuates from period to period depending on the timing of our sales, cash collections and changes to our allowance for doubtful accounts, which affects our cash flow from operating activities. Our accounts receivable balance represents trade receivables from customers, including resellers and distributors, when we have provided software licenses and/or software maintenance agreements and we have not yet received payment. We have historically had insignificant write-offs related to bad debts. The allowance for doubtful accounts was \$0.3 million and \$0.2 million at June 30, 2013 and 2012, respectively. We use days sales outstanding, or DSO, calculated on a quarterly basis, as a measurement of the quality and status of our receivables. We define DSO as (a) accounts receivable divided by (b) total revenue for the most recent quarter, multiplied by (c) the number of days in the quarter. Our DSO was 42.0 days and 40.9 days at June 30, 2013 and 2012, respectively.

Investing Activities

Net cash used in investing activities for the six months ended June 30, 2013 was primarily related to \$120.9 million of cash used for the N-able acquisition, \$17.3 million of cash used to purchase available-for-sale securities classified as short-term and long-term investments, and \$31.5 million of proceeds from maturities of investments. For the six months ended June 30, 2012, net cash used in investing activities was primarily related to \$41.0 million of cash used to purchase available-for-sale securities classified as short-term and long-term investments, \$20.9 million of cash used for acquisitions, and \$19.0 million of proceeds from maturities of investments.

We estimate our capital expenditures for the remaining six months of 2013 to be approximately \$3.0 million, primarily related to purchases of equipment and software in our Austin and Czech Republic locations to support their continued growth.

Financing Activities

Net cash provided by financing activities for the six months ended June 30, 2013 was primarily due to the excess tax benefit related to stock-based awards of \$6.2 million, which is a reduction in cash payments related to income taxes and \$5.4 million of proceeds from the exercise of employee stock options. In addition, for the six months ended June 30, 2013, we withheld and retired shares of common stock to satisfy \$4.5 million of minimum statutory withholding tax requirements that we pay in cash to the appropriate taxing authorities on behalf of our employees related to the settlement of restricted stock units during the period. These shares are treated as common stock repurchases in our condensed consolidated financial statements as of June 30, 2013. Net cash provided by financing activities for the six

months ended June 30, 2012 was due to \$5.7 million of proceeds from the exercise of employee stock options and the excess tax benefit related to stock option exercises of \$5.2 million, which is a reduction in cash payments related to income taxes. Also during the six months ended June 30, 2012, we paid approximately \$3.5 million of cash upon the achievement of certain sales milestones related to the acquisition of Hyper9, of which \$3.2 million is reflected as cash flows from financing activities.

Table of Contents

On July 29, 2013, we announced that our Board of Directors had approved a share repurchase program, authorizing us to purchase up to \$50.0 million of our outstanding common stock. We expect the repurchases will occur over the next 12 months although the exact timing of repurchases and number of shares of common stock to be purchased will depend upon market conditions and other factors. We expect to fund the program using our cash on hand and cash generated from operations. The program may be extended, suspended or discontinued at any time without prior notice.

Anticipated Cash Flows

We believe that our existing cash and cash equivalents and our cash flows from operating activities will be sufficient to fund our operations and our commitments for capital expenditures for at least the next 12 months. Although we are not currently a party to any material definitive agreement regarding potential investments in, or acquisitions of, complementary businesses, applications or technologies, we may enter into these types of arrangements, which could reduce our cash and cash equivalents, require us to seek additional equity or debt financing or repatriate cash generated by our international operations that would cause us to incur a U.S. federal income tax liability. Additional funds from financing arrangements may not be available on terms favorable to us or at all.

Our future capital requirements will depend on many factors, including our rate of revenue growth, the expansion of our sales and marketing activities, the timing and extent of spending to support product development efforts and expansion into new territories, the timing of any acquisitions to expand our business, the timing of expansions to our office facilities, the timing of introductions of new software products and enhancements to existing software products, and the continuing market acceptance of our software offerings. We expect to continue to pursue acquisitions that will enable us to enter new markets or new segments of our existing markets by bringing new product offerings to market more quickly than we can develop them.

Contractual Obligations and Commitments

As of June 30, 2013, with the exception of our operating leases, there have been no material changes in our contractual obligations and commitments that were disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012. In May 2013, we entered into a new lease agreement for our future corporate headquarters in Austin, Texas expected to commence in the second quarter of 2014. See Note 8, Commitment and Contingencies, in the Notes to Condensed Consolidated Financial Statements in Item 1 of Part I of this Quarterly Report on Form 10-Q, for further discussion.

The following table summarizes our outstanding contractual operating lease obligations as of June 30, 2013, that require us to make future cash payments:

	Payments Due by Period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
(in thousands)					
Operating leases (1)	\$94,811	\$2,701	\$16,015	\$14,028	\$62,067

(1) At the inception of our new lease agreement in the second quarter of 2014, we plan to either terminate our existing lease through a settlement with our landlord or sublease all or part of our existing corporate headquarters to a third party for the remaining lease term through May 2016. If we are unable to terminate our lease or sublease the building, we would be required to recognize a loss for our remaining contractual obligation of \$8.0 million.

Critical Accounting Policies and Estimates

We prepare our condensed consolidated financial statements in accordance with GAAP. The preparation of condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs and expenses and related disclosures. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. In many instances, we could reasonably use different accounting estimates, and in some instances, changes in the accounting estimates are reasonably likely to occur from period to period. Accordingly, actual results could differ significantly from the estimates made by our management. To the extent that there are differences between our estimates and actual results,

our future financial statement presentation, financial condition, results of operations and cash flows will be affected, perhaps materially.

In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management's judgment in its application, while in other cases, management's judgment is required in selecting among

32

Table of Contents

available alternative accounting standards that allow different accounting treatment for similar transactions. We believe that these accounting policies generally require significant management judgment and estimates, and are critical to understanding our historical and future performance, as these policies relate to the more significant areas of our financial results. These critical accounting policies are:

- Valuation of goodwill, intangibles, long-lived assets and contingent consideration, including accrued earnouts;
- Revenue recognition;
- Stock-based compensation;
- Income taxes; and
- Loss contingencies.

A full description of our critical accounting policies that involve significant management judgment appears in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012 filed with the Securities and Exchange Commission on February 19, 2013 under the heading “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies and Estimates.” There have been no material changes to our critical accounting policies and estimates since that time, with the exception of our revenue recognition policy. As a result of the acquisition of N-able during the second quarter of 2013, we now offer time-based licenses and SaaS-based hosting services and have updated our revenue recognition policy for these offerings.

Revenue Recognition

We derive substantially all of our revenue from the licensing of our software products, the sale of annual maintenance agreements for these products and our subscription products and services. In accordance with current guidance, we recognize revenue for software, maintenance and subscriptions when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collectability is reasonably assured. Our return policy generally does not allow our customers to return software products.

We generally use a purchase order, an authorized credit card, an electronic or manually signed license agreement, or the receipt of a cash payment as evidence of an arrangement. We consider delivery to have occurred and recognize revenue when risk of loss transfers to the customer, reseller or distributor or the customer has access to their subscription which is generally upon electronic transfer of the license key or password that provides immediate availability of the product to the purchaser. We account for sales incentives to customers, resellers or distributors as a reduction of revenue at the time we recognize the revenue from the related product sale. We report revenue net of any sales tax collected.

We sell our software products through our direct sales force and through our distributors and other resellers. Our distributors and resellers do not carry inventory of our software and we generally require them to specify the end-user of the software at the time of the order. If the distributor or reseller does not provide end-user information, then we will generally not fulfill the order. Our distributors and resellers have no rights of return or exchange for software that they purchase from us and payment for these purchases is due to us without regard to whether the distributors or resellers collect payment from their customers. Sales through resellers and distributors are typically evidenced by a reseller or distributor agreement, together with purchase orders or authorized credit cards on a transaction-by-transaction basis.

License Revenue. Under software revenue recognition guidance, we use the residual method to recognize revenue when a license agreement includes one or more elements to be delivered and vendor-specific objective evidence, or VSOE, of fair value for all undelivered elements exists. Because our software is generally sold with maintenance, we calculate the amount of revenue allocated to the software license by determining the fair value of the maintenance and subtracting it from the total invoice or contract amount. We establish VSOE of the fair value of maintenance services by the standard published list pricing for our maintenance renewals since we generally charge list prices for our maintenance renewals. If evidence of the fair value of one or more undelivered elements does not exist, all revenue is generally deferred and recognized when delivery of those elements occurs or when fair value can be established.

When the undelivered element for which we do not have VSOE of fair value is support, revenue for the entire arrangement is recognized ratably over the support period. If in the future we were unable to establish VSOE of fair value of the maintenance or other services we would defer all revenue over the term of the agreement and until all

elements of the agreement had been delivered which could significantly impact the timing of our revenue recognition. Maintenance and Other Revenue. We derive maintenance revenue from fees for software maintenance services. We typically include one year of maintenance as part of the initial purchase price of each perpetual software offering and then sell renewals of this maintenance agreement. We generally bill maintenance renewal agreements annually in advance for services to be performed over a 12-month period. Customers have the option to purchase maintenance renewals for periods other than 12 months. We generally recognize maintenance revenue ratably on a daily basis over the contract period. Customers with maintenance agreements are entitled to receive unspecified upgrades or enhancements to new versions of their software

Table of Contents

products on a when-and-if-available basis. Other revenue is not currently significant nor do we expect it to be significant in future periods.

Subscription Revenue. We primarily derive subscription revenue from fees received from customers for time-based license arrangements and software-as-a-service, or SaaS offerings. We generally invoice subscription agreements monthly in advance over the subscription period. Subscription revenue is recognized ratably over the contractual subscription term when all revenue recognition criteria have been met. We introduced these offerings in the second quarter of 2013 as a result of the acquisition of N-able Technologies.

Recent Accounting Pronouncements

See Note 1—Summary of Significant Accounting Policies, in the Notes to Condensed Consolidated Financial Statements in Item 1 of Part I of this Quarterly Report on Form 10-Q, for a full description of recent accounting pronouncements, which is incorporated herein by reference.

Off-Balance Sheet Arrangements

During the first half of 2013, we did not have any relationships with unconsolidated organizations or financial partnerships, such as structured finance or special purpose entities that would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Table of Contents

Item 3: Quantitative and Qualitative Disclosures About Market Risk

We are exposed to certain financial market risks, including the following:

Interest Rate Risk

We had cash and cash equivalents of \$148.9 million and \$179.7 million at June 30, 2013 and December 31, 2012, respectively. We also had total short-term and long-term investments classified as available-for-sale securities of \$47.4 million and \$62.1 million at June 30, 2013 and December 31, 2012, respectively. Our cash and cash equivalents consist primarily of bank deposits and money market funds, and our available-for-sale securities consist primarily of corporate bonds, municipal bonds and commercial paper held in investment accounts in the United States. We hold cash, cash equivalents and available-for-sale securities for working capital purposes. Our investments are made for capital preservation purposes, and we do not enter into investments for trading or speculative purposes.

We do not have material exposure to market risk with respect to our cash and cash equivalents, as these consist primarily of highly liquid investments purchased with original maturities of three months or less at June 30, 2013. Our portfolio of available-for-sale securities classified as investments is subject to market risk due to changes in interest rates. Changes in interest rates could impact our future investment income, or we may suffer losses in principal if we are forced to sell securities that decline in market value due to changes in interest rates. However, because we classify our investment securities as “available for sale,” no gains or losses are recognized due to changes in interest rates unless such securities are sold prior to maturity or declines in fair value are determined to be other-than-temporary.

Foreign Currency Risk

As a global company, we face exposure to adverse movements in foreign currency exchange rates. Our revenue from our foreign subsidiaries was approximately 26.7% of our total revenue for the six months ended June 30, 2013. The foreign currencies that we invoice and on which we collect are primarily the Euro, British Pound Sterling, Australian Dollar and Japanese Yen. Expenses incurred by our international subsidiaries are, generally, denominated in the local currency of the subsidiary. Our condensed consolidated statements of income are translated into U.S. dollars at the average exchange rates in each applicable period. To the extent the U.S. dollar strengthens against foreign currencies, the translation of these foreign currency denominated transactions results in reduced revenues, operating expenses and net income for our international operations. Similarly, our revenues, operating expenses and net income will increase for our international operations if the U.S. dollar weakens against foreign currencies.

We utilize purchased foreign currency forward contracts to minimize our foreign exchange exposure on certain foreign balance sheet positions denominated in currencies other than the Euro. We do not enter into any derivative financial instruments for trading or speculative purposes. Our objective in managing our exposure to foreign currency exchange rate fluctuations is to reduce the impact of adverse fluctuations in such exchange rates on our earnings and cash flow. The notional amounts and currencies underlying our foreign currency forward contracts will fluctuate period to period as they are principally dependent on the balances of the balance sheet positions that are denominated in currencies other than the Euro held by our global entities. There can be no assurance that our foreign currency hedging activities will substantially offset the impact of fluctuation in currency exchange rates on our results of operational and functional positions. As of June 30, 2013, we did not have any forward contracts outstanding and while we do not have a formal policy to settle all derivatives prior to the end of each quarter, our current practice is to do so. See Note 5—Derivative Instruments, in the Notes to Condensed Consolidated Financial Statements for a summary of the effect of derivative instruments on our condensed consolidated statements of income.

We are exposed to credit-related losses in the event of non-performance by counterparties to derivative financial instruments, but we do not expect any counterparties to fail to meet their obligations given their high credit ratings. In addition, we diversify this risk across several counterparties and actively monitor their ratings.

We are also exposed to foreign exchange rate fluctuations as we translate the financial statements of our foreign subsidiaries into U.S. dollars in consolidation. If there is a change in foreign currency exchange rates, the conversion of the foreign subsidiaries’ financial statements into U.S dollars will lead to a translation gain or loss that is recorded as a component of accumulated other comprehensive income (loss).

Item 4: Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2013. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms.

Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of June 30, 2013, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective at a reasonable assurance level.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the quarter ended June 30, 2013, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we have been and may be involved in various legal proceedings and claims, including the pending litigation discussed below, as well as other legal proceedings and claims that have not been fully resolved and that have arisen in our ordinary course of business. In the opinion of management, there was not at least a reasonable possibility we may have incurred a material loss, or a material loss in excess of a recorded accrual, with respect to any legal proceedings. However, the outcome of legal proceedings and claims brought against us are subject to significant uncertainty. Therefore, although management considers the likelihood of such an outcome to be remote, if one or more of these legal matters were resolved against us in the same reporting period for amounts in excess of management's expectations, our consolidated financial statements of a particular period could be materially adversely affected. See the risk factor "Litigation exposure related to our pending and any future litigation could exceed our expectations and adversely affect our results of operations, profitability and cash flows" in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2012 under the heading "Risk Factors."

Uniloc Cases

Uniloc USA, Inc. and parent and/or affiliates have brought two lawsuits against the Company and have brought a series of lawsuits against numerous software companies around the world.

'216 Case

On September 13, 2010, Uniloc USA, Inc. and Uniloc (Singapore) Private Limited ("Uniloc") brought a lawsuit against the Company and several other defendants in the United States District Court for the Eastern District of Texas ("Eastern District of Texas"). The complaint filed by Uniloc alleges that the Company and each of the other fifteen named defendants' software infringe U.S. patent 5,490,216 ("216 Patent") allegedly owned by Uniloc. Uniloc alleges that the Company's software, specifically its license key system, infringes upon its patent that utilizes a system for activating software products through a registration process. In September 2011, another company, Sureloc, Inc. ("Sureloc") claimed that it owned the '216 Patent. As a result, on November 3, 2011, Uniloc and its affiliates filed a lawsuit in the Superior Court of the State of California against Sureloc, Patrick Rooney, and Does 1-100 (the "Sureloc case"), seeking, among other things, a declaratory judgment that Uniloc and not Sureloc, is the exclusive owner of the '216 Patent. Once the Eastern District of Texas was informed of the Sureloc case, all Uniloc cases alleging infringement of the '216 Patent that were pending before the Eastern District of Texas were stayed on December 1, 2011. Subsequently, Uniloc and Sureloc settled their dispute regarding ownership of the '216 Patent, and the California state case against Sureloc case was dismissed with prejudice on September 25, 2012.

On January 25, 2013, the Eastern District of Texas lifted the stay of all Uniloc '216 Patent cases and set the cases for a status conference on February 25, 2013. Following the status conference, on March 21, 2013 Uniloc filed a motion to dismiss all remaining defendants in the '216 Patent cases, without prejudice, and simultaneously filed a new complaint against the Company (as well as any other defendants from the original case that had not reached a settlement agreement with Uniloc). Uniloc has not yet served the re-filed complaint for infringement of the '216 Patent on the Company. Because this lawsuit is in the initial stages, it is not possible to reliably assess the outcome of the litigation. Therefore, we cannot currently estimate the potential loss, if any, associated with the litigation. We intend to contest the claims associated with this lawsuit vigorously.

'696 Case

On March 30, 2012, Uniloc Luxembourg, S.A. and Uniloc USA, Inc. brought a lawsuit against the Company and several other defendants in the United States District Court for the Eastern District of Texas ("Eastern District of Texas"). The complaint filed by Uniloc alleges that the Company and each of the other fifteen named defendants' software infringe U.S. patent 7,024,696 ("696 Patent") allegedly owned by Uniloc. Uniloc alleges that the Company's software, specifically its license key system, infringes upon its patent that utilizes a system for activating software products through a registration process. Because this lawsuit is in its early stages, it is not possible to reliably assess the outcome of the litigation. Therefore, we cannot currently estimate the potential loss, if any, associated with the litigation. We intend to contest the claims associated with this lawsuit vigorously.

Table of Contents

Item 1A. Risk Factors

There have been no material changes from the risk factors disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

Period	Number of Shares Purchased (1)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Plan or Program	Dollar Value of Shares That May Yet Be Purchased Under the Plan or Program
April 1-30, 2013	2,181	\$56.16	—	\$—
May 1-31, 2013	81	42.01	—	—
June 1-30, 2013	153	42.15	—	—

(1) Represents shares of our common stock withheld by us to satisfy employee withholding obligations due from equity awards issued pursuant to our 2008 Equity Incentive Plan.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

Item 5.02 Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers.

Douglas G. Hibberd, Executive Vice President, Strategic Operations, will be taking an unpaid leave of absence for a period of one year beginning July 31, 2013 to pursue a longtime personal goal. Mr. Hibberd is a “named executive officer” for whom disclosure was required to be made by the Company in its most recent proxy statement pursuant to Item 402(c) of Regulation S-K. Effective July 31, 2013, Mr. Hibberd will no longer be deemed an executive officer or officer of the Company.

Item 6. Exhibits

See the Exhibit Index following the signature page to this Quarterly Report on Form 10-Q for a list of exhibits filed or furnished with this report, which Exhibit Index is incorporated herein by reference.
