Notes to Consolidated Financial Statements

Note 1. Consolidated Financial Statements:

Basis of Presentation

These interim statements and related management's discussion and analysis should be read in conjunction with the Consolidated Financial Statements and the related notes and management's discussion and analysis of results of operations, liquidity and capital resources included in our 2014 Annual Report on Form 10-K ("2014 Form 10-K"). These interim statements are unaudited. The year-end balance sheet data included in this Form 10-Q filing was derived from audited financial statements, but does not include all disclosures required by generally accepted accounting principles in the United States of America. We have historically operated and continue to operate on a 52/53 week fiscal year ending on the Friday closest to the last day of the quarter. For ease of presentation, March 31 and December 31 are used consistently throughout this Form 10-Q and these interim financial statements and related notes to represent the period-end dates. For the 2015 and 2014 quarters, the actual closing dates were April 3 and March 28, respectively. The unaudited interim financial statements include all adjustments (consisting only of normal recurring adjustments) and accruals necessary in the judgment of management for a fair statement of the results for the periods presented. When used herein, the terms "IFF," the "Company," "we," "us" and "our" mean International Flavors & Fragrances Inc. and its consolidated subsidiaries.

Recent Accounting Pronouncements

In April 2015, the Financial Accounting Standards Board ("FASB") issued authoritative guidance which provides a practical expedient related to the measurement date of defined benefit plan assets and obligations. This guidance is effective for annual and interim periods beginning after December 15, 2015. The Company is currently evaluating the impact that this new standard will have on its consolidated financial statements.

In April 2015, the FASB issued authoritative guidance which requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability. This guidance is effective for fiscal years beginning after December 15, 2015 and interim periods within fiscal years beginning after December 15, 2016. The Company is currently evaluating the impact that this new standard will have on its consolidated financial statements.

In February 2015, the FASB issued authoritative guidance related to Consolidation which will change the analysis that a reporting entity must perform to determine the criteria for consolidating certain types of entities. This guidance is effective for annual and interim periods beginning after December 15, 2015. The Company is currently evaluating the impact that this new standard will have on its consolidated financial statements.

In May 2014, the FASB issued authoritative guidance to clarify the principles to be used to recognize revenue. The guidance is applicable to all entities and is effective for annual and interim periods beginning after December 15, 2016. Early adoption is not permitted. However, in April 2015, the FASB proposed a one-year deferral of the effective date. Under the proposal, the new guidance will be effective for reporting periods beginning after December 15, 2017. The Company is currently evaluating the impact that this new standard will have on its consolidated financial statements.

Accounts Receivable

The Company sells certain accounts receivable on a non-recourse basis to unrelated financial institutions under "factoring" agreements that are sponsored, solely and individually, by certain customers. The Company accounts for these transactions as sales of receivables, removes the receivables sold from its financial statements, and records cash proceeds when received by the Company. The beneficial impact on cash from operations from participating in these programs decreased approximately \$6.5 million for the three months ended March 31, 2015 compared to a decrease of approximately \$14.3 million for the three months ended March 31, 2014. The cost of participating in these programs was immaterial to our results in all periods.

Note 2. Net Income Per Share:

Net income per share is based on the weighted average number of shares outstanding. A reconciliation of the shares used in the computation of basic and diluted net income per share is as follows:

(SHARES IN THOUSANDS)	Three Months Ended March 31,	
	2015	2014
Basic	80,654	81,053
Assumed dilution under stock plans	541	679
Diluted	81,195	81,732

There were no stock options or stock-settled appreciation rights ("SSARs") excluded from the computation of diluted net income per share for the three months ended March 31, 2015 and 2014.

The Company has issued shares of purchased restricted common stock ("PRS") which contain rights to nonforfeitable dividends while these shares are outstanding and thus are considered participating securities. Such securities are required to be included in the computation of basic and diluted earnings per share pursuant to the two-class method. The Company did not present the two-class method since the difference between basic and diluted net income per share for both unrestricted common shareholders and PRS shareholders was less than \$0.01 per share for each period presented, and the number of PRS outstanding as of March 31, 2015 and 2014 was immaterial. Net income allocated to such PRS was \$0.6 million and \$0.7 million during the three months ended March 31, 2015 and 2014, respectively.

Note 3. Restructuring and Other Charges, Net:

In 2014, the Company closed its fragrance ingredients manufacturing facility in Augusta, Georgia and consolidated production into other Company facilities. In connection with this closure, during 2014 the Company recorded total charges of \$13.8 million, consisting of \$2.2 million of pre-tax charges related to severance included in Restructuring and other charges, net \$10.3 million of non-cash charges related to accelerated depreciation included in Cost of goods sold, and \$1.3 million in plant shutdown and other related costs in connection with the Fragrance Ingredients Rationalization. During the three months ended March 31, 2015, the Company recorded an additional \$0.2 million of plant shutdown and other related costs included in Restructuring and other charges. As a result of this closure, 43 positions have been eliminated.

Changes in employee-related restructuring liabilities during the three months ended March 31, 2015 related to the Fragrance Ingredients Rationalization were as follows:

(DOLLARS IN THOUSANDS)	Employee-Related Costs	Accelerated Depreciation	Other	Total
December 31, 2014	\$759	\$—	\$—	\$759
Additional charges, net	—	—	187	187

Note 4. Other Intangible Assets, Net:

Other intangible assets, net consist of the following amounts:

(DOLLARS IN THOUSANDS)	March 31, 2015	December 31, 2014
Gross carrying value ⁽¹⁾	\$218,676	\$218,676
Accumulated amortization	(143,959) (142,119
Total	\$74,717	\$76,557

⁽¹⁾ Includes patents, trademarks, technological know-how and other intellectual property, valued at acquisition.

Aromor

During the first quarter of 2014, the Company completed the acquisition of 100% of the equity of Aromor Flavors and Fragrances Ltd. ("Aromor"). Aromor is part of the IFF Fragrances Ingredients business. The Company paid \$102.6 million (including \$0.1 million of cash acquired) for this acquisition, which was funded out of existing cash resources.

The purchase

6

price exceeded the carrying value of existing net assets by approximately \$56 million. The excess was allocated principally to identifiable intangible assets (approximately \$53 million), goodwill (approximately \$10 million) and approximately \$9 million to deferred tax liabilities. Separately identifiable intangible assets are principally related to technological know-how. The intangible assets are amortized using lives ranging from 13-19 years. Additionally, the consideration included \$15 million related to post-combination contingent consideration, held in escrow, which is being expensed by the Company as it is earned by the selling shareholders.

Amortization

Amortization expense was \$1.8 million and \$1.2 million for the three months ended March 31, 2015 and 2014, respectively. Annual amortization is expected to be \$7.2 million for the years 2015 through 2018, and \$6.5 million for the years 2019 and 2020.

Note 5. Borrowings:

Debt consists of the following:

(DOLLARS IN THOUSANDS)	Rate	Maturities	March 31, 2015	December 31, 2014

Note 6. Income Taxes:

Uncertain Tax Positions

At March 31, 2015, the Company had \$14.8 million of unrecognized tax benefits recorded in Other liabilities and \$0.7 million recorded in Other current liabilities. If these unrecognized tax benefits were recognized, the effective tax rate would be affected.

At March 31, 2015, the Company had accrued interest and penalties of \$0.8 million classified in Other liabilities and \$0.5 million recorded in Other current liabilities.

As of March 31, 2015, the Company's aggregate provisions for uncertain tax positions, including interest and penalties, was \$16.8 million associated with various tax positions asserted in foreign jurisdictions, none of which is individually material.

The Company regularly repatriates a portion of current year earnings from select non-U.S. subsidiaries. No provision is made for additional taxes on undistributed earnings of subsidiary companies that are intended and planned to be indefinitely invested in such subsidiaries. We intend to, and have plans to, reinvest these earnings indefinitely in our foreign subsidiaries to fund local operations and/or capital projects.

The Company has ongoing income tax audits and legal proceedings which are at various stages of administrative or judicial review, of which the most significant items are discussed below. In addition, the Company has open tax years with various taxing jurisdictions that range primarily from 2005 to 2014. Based on currently available information, we do not believe the ultimate outcome of any of these tax audits and other tax positions related to open tax years, when finalized, will have a material impact on our financial position.

The Company also has other ongoing tax audits and legal proceedings that relate to indirect taxes, such as value-added taxes, capital tax, sales and use taxes and property taxes, which are discussed in Note 12.

Spanish Tax

As of December 31, 2014, the Company had one outstanding income tax case in Spain relating to fiscal year 2002, which had been previously appealed by the Company. As of December 31, 2014, the Company had fully reserved the original assessment asserted by the Spanish Tax Authority. During the first quarter of 2015, the Company received a favorable ruling on

this appeal and accordingly, reversed the total reserve related to the 2002 fiscal year (with a value of Euro 1.9 million or \$2.3 million).

As of March 31, 2015, the Company had an aggregate value of Euro 4.7 million (\$5.1 million), which was fully reserved for and reflected in income taxes payable, related to three dividend withholding tax controversies in Spain, all of which have now been resolved. The Company made payments of Euro 3.5 (\$3.8 million) in April 2015 related to two of the controversies and expects to make the remaining payment during the second quarter of 2015. As of March 31, 2015, the Company had posted bank guarantees of Euro 4.7 million (\$5.1 million) associated with the appeals of these matters.

Effective Tax Rate

The effective tax rate for the three months ended March 31, 2015 was 18.0% compared with 25.3% for the three months ended March 31, 2014. The quarter-over-quarter decrease is largely due to a benefit of \$10.5 million recorded in the first quarter of 2015, as a result of favorable tax rulings in Spain and another jurisdiction for which reserves were previously recorded.

Note 7. Stock Compensation Plans:

The Company has various plans under which its officers, senior management, other key employees and directors may be granted equity-based awards. Equity awards outstanding under the plans include PRS, restricted stock units ("RSUs"), stock options, SSARs and Long-Term Incentive Plan awards; liability-based awards outstanding under the plans are cash-settled RSUs.

Stock-based compensation expense and related tax benefits were as follows:

(DOLLARS IN THOUSANDS)	Three Months Ended March 31,	
	2015	2014
Equity-based awards	\$5,387	\$4,695
Liability-based awards	1,907	1,245
Total stock-based compensation expense	7,294	5,940
Less: tax benefit	(2,187) (1,726
Total stock-based compensation expense, after tax	\$5,107	\$4,214

On May 6, 2015, the shareholders of the Company approved the 2015 Stock Award and Incentive Plan (the "2015 Plan"). The 2015 Plan replaces the 2010 Stock Award and Incentive Plan (the "2010 Plan"). The total number of shares authorized for issuance under the Plan is 1,500,000 shares plus shares that remained available for issuance under the 2010 Plan as of May 6, 2015 and any shares subject to outstanding awards under the 2010 Plan that are cancelled, forfeited or expire.

Note 8. Segment Information:

The Company is organized into two operating segments: Flavors and Fragrances. These segments align with the internal structure of the Company used to manage these businesses. Performance of these operating segments is evaluated based on segment profit which is defined as operating profit before Restructuring and other charges, net, Global expenses (as discussed below) and certain non-recurring items, Interest expense, Other income (expense), net and Taxes on income.

The Global expenses caption below represents corporate and headquarters-related expenses which include legal, finance, human resources, certain incentive compensation expenses and other R&D and administrative expenses that are not allocated to individual operating segments.

Reportable segment information is as follows:

(DOLLARS IN THOUSANDS)	Three Months Ended March 31,	
	2015	2014
Net sales:		
Flavors	\$377,108	\$366,505
Fragrances	397,799	403,719
Consolidated	\$774,907	\$770,224
Segment profit:		
Flavors	\$92,727	\$88,063

Interest expense	(11,095) (11,677
Other income (expense), net	5,710	(1,443
Income before taxes	\$156,408	\$142,933

(1) Acquisition and related costs are associated with the acquisition of Henry H. Ottens Manufacturing Co., Inc., as discussed in Note 13.

(2) Operational improvement initiative costs relate to the closing of a smaller facility in Europe and certain manufacturing activities in Asia, while transferring production to larger facilities in each respective region.

Net sales are attributed to individual regions based upon the destination of product delivery. Net sales related to the U.S. for the three months ended March 31, 2015 and 2014 were \$164 million and \$159 million, respectively. Net sales attributed to all foreign countries in total for the three months ended March 31, 2015 and 2014 were \$611 million in both years. No country other than the U.S. had net sales in any period presented greater than 7.1% of total consolidated net sales.

Note 9. Employee Benefits:

Pension and other defined contribution retirement plan expenses included the following components:

Total expense	\$2,906	\$4,011

The Company expects to contribute a total of approximately \$30 million to its non-U.S. pension plans during 2015. During the three months ended March 31, 2015, \$35.0 million of contributions were made to the qualified U.S. pension plans. In the three months ended March 31, 2015, \$19.1 million of contributions were made to the non-U.S. plans. In the three months ended March 31, 2015, \$1.1 million of benefit payments were made with respect to the Company's non-qualified U.S. pension plan.

Expense recognized for postretirement benefits other than pensions included the following components:

Service cost for benefits earned	\$300	\$323
Interest cost on projected benefit obligation	1,082	1,238
Net amortization and deferrals	(711) (978
Total postretirement benefit expense	\$671	\$583

The Company expects to contribute approximately \$5 million to its postretirement benefits other than pension plans during 2015. In the three months ended March 31, 2015, \$1.7 million of contributions were made.

Note 10. Financial Instruments:

Fair Value

Accounting guidance on fair value measurements specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our market assumptions. These two types of inputs create the following fair value hierarchy:

Level 1—Quoted prices for identical instruments in active markets.

Level 2—Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3—Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

This hierarchy requires us to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value. We determine the fair value of structured liabilities (where performance is linked to structured interest rates, inflation or currency risks) using the LIBOR swap curve and forward interest and exchange rates at period end. Such instruments are classified as Level 2 based on the observability of significant inputs to the model. We do not have any instruments classified as Level 1 or Level 3, other than those included in pension asset trusts as discussed in Note 13 of our 2014 Form 10-K.

These valuations take into consideration our credit risk and our counterparties' credit risk. The estimated change in the fair value of these instruments due to such changes in our own credit risk (or instrument-specific credit risk) was immaterial as of March 31, 2015.

The amounts recorded in the balance sheet (carrying amount) and the estimated fair values of financial instruments at March 31, 2015 and December 31, 2014 consisted of the following:

	March 31, 2015		December 31, 2014	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
(DOLLARS IN THOUSANDS)				
Cash and cash equivalents ⁽¹⁾	\$443,689	\$443,689	\$478,573	\$478,573
Credit facilities and bank overdrafts ⁽²⁾	14,032	14,032	12,335	12,335
Long-term debt: ⁽³⁾				
Senior notes - 2007	500,000	591,713	500,000	587,650
Senior notes - 2006	125,000	131,786	125,000	133,137
Senior notes - 2013	299,789	304,294	299,782	296,290

(1) The carrying amount of cash and cash equivalents approximates fair value due to the short maturity of those instruments.

(2) The carrying amount of our credit facilities and bank overdrafts approximates fair value as the interest rate is reset frequently based on current market rates as well as the short maturity of those instruments.

(3) The fair value of our long-term debt was calculated using discounted cash flows applying current interest rates and current credit spreads based on our own credit risk.

Derivatives

We periodically enter into foreign currency forward contracts with the objective of reducing exposure to cash flow volatility associated with our intercompany loans, foreign currency receivables and payables, and anticipated purchases of certain raw materials used in operations. These contracts generally involve the exchange of one currency for a second currency at a future date, have maturities not exceeding twelve months and are with counterparties which are major international financial institutions.

During the three months ended March 31, 2015 and the year ended December 31, 2014, we entered into forward currency contracts which qualified as net investment hedges, in order to mitigate a portion of our net European investments from foreign currency risk. The effective portions of net investment hedges are recorded in Other comprehensive income ("OCI") as a component of Foreign currency translation adjustments in the accompanying Consolidated Statement of Comprehensive Income. Realized gains (losses) are deferred in accumulated other comprehensive income ("AOCI") where they will remain until the net investments in our European subsidiaries are divested. The outstanding forward currency contracts have remaining maturities of approximately one year.

During the three months ended March 31, 2015 and the year ended December 31, 2014, we entered into several forward currency contracts which qualified as cash flow hedges. The objective of these hedges is to protect against the currency risk associated with forecasted U.S. dollar (USD) denominated raw material purchases made by Euro (EUR)

functional currency entities which result from changes in the EUR/USD exchange rate. The effective portions of cash flow hedges are recorded in OCI as a component of Gains/(losses) on derivatives qualifying as hedges in the accompanying Consolidated Statement of Comprehensive Income. Realized gains/(losses) in AOCI related to cash flow hedges of raw material purchases are recognized

as a component of Cost of goods sold in the accompanying Consolidated Statement of Comprehensive Income in the same period as the related costs are recognized.

During 2014, we entered into interest rate swap agreements that effectively converted the fixed rate on a portion of our long-term borrowings to a variable short-term rate based on the LIBOR plus an interest markup. These swaps are designated as fair value hedges. Amounts recognized in Interest expense were immaterial for the three months ended March 31, 2015.

The following table shows the notional amount of the Company's derivative instruments outstanding as of March 31, 2015 and December 31, 2014:

The following tables show the Company's derivative instruments measured at fair value (Level 2 of the fair value hierarchy), as reflected in the Consolidated Balance Sheets as of March 31, 2015 and December 31, 2014:

(a) Derivative assets are recorded to Prepaid expenses and other current assets in the Consolidated Balance Sheet.

(b) Derivative liabilities are recorded as Other current liabilities in the Consolidated Balance Sheet.

The following table shows the effect of the Company's derivative instruments which were not designated as hedging instruments in the Consolidated Statement of Comprehensive Income for the three months ended March 31, 2015 and 2014 (in thousands):

Most of these net gains (losses) offset any recognized gains (losses) arising from the revaluation of the related intercompany loans during the same respective periods.

The following table shows the effect of the Company's derivative instruments designated as cash flow and net investment hedging instruments in the Consolidated Statements of Comprehensive Income for the three months ended March 31, 2015 and 2014 (in thousands):

(1) Interest rate swaps were entered into as pre-issuance hedges for the \$300 million bond offering.

No ineffectiveness was experienced in the above noted cash flow hedges during the three months ended March 31, 2015 and 2014. The ineffective portion of the net investment hedges was not material during the three months ended March 31, 2015 and 2014.

The Company expects that approximately \$15.2 million (net of tax) of derivative gains included in AOCI at March 31, 2015, based on current market rates, will be reclassified into earnings within the next 12 months. The majority of this amount will vary due to fluctuations in foreign currency exchange rates.

Note 12. Commitments and Contingencies:

Guarantees and Letters of Credit

The Company has various bank guarantees and letters of credit which are available for use regarding governmental requirements associated with pending litigation in various jurisdictions and to support its ongoing business operations. At March 31, 2015, we had total bank guarantees and standby letters of credit of approximately \$36 million with various financial institutions. Of this amount, Euro 4.7 million (\$5.1 million) in bank guarantees are related to governmental requirements on income tax disputes in Spain, as discussed in further detail in Note 9 of our 2014 Form 10-K. Also included in the above aggregate amount is a total of \$16.4 million in bank guarantees which the Company has posted for certain assessments in Brazil for other diverse income tax and indirect tax disputes related to fiscal years 1998-2011. There were no material amounts utilized under the standby letters of credit as of March 31, 2015. In order to challenge the assessments in these cases in Brazil, the Company has been required to, and has separately pledged assets, principally property, plant and equipment, to cover assessments in the amount of approximately \$15.5 million as of March 31, 2015.

Lines of Credit

The Company has various lines of credit which are available to support its ongoing business operations. At March 31, 2015, we had available lines of credit (in addition to the Credit Facility discussed in Note 8 of our 2014 Form 10-K) of approximately \$74.5 million with various financial institutions. There were no significant amounts drawn down pursuant to these lines of credit as of March 31, 2015.

Litigation

The Company assesses contingencies related to litigation and/or other matters to determine the degree of probability and range of possible loss. A loss contingency is accrued in the Company's consolidated financial statements if it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Because litigation is inherently unpredictable and unfavorable resolutions could occur, assessing contingencies is highly sensitive and requires judgments about future events. On at least a quarterly basis, the Company reviews contingencies related to litigation to determine the adequacy of accruals. The amount of ultimate loss may differ from these estimates and further events may require the Company to increase or decrease the amounts it has accrued on any matter.

Periodically, we assess our insurance coverage for all known claims, where applicable, taking into account aggregate coverage by occurrence, limits of coverage, self-insured retentions and deductibles, historical claims experience and claims experience with our insurance carriers. The liabilities are recorded at management's best estimate of the probable outcome of the lawsuits and claims, taking into consideration the facts and circumstances of the individual matters as well as past experience on similar matters. At each balance sheet date, the key issues that management assesses are whether it is probable that a loss as to asserted or unasserted claims has been incurred and if so, whether the amount of loss can be reasonably estimated. We record the expected liability with respect to claims in Other liabilities and expected recoveries from our insurance carriers in Other assets. We recognize a receivable when we believe that realization of the insurance receivable is probable under the terms of the insurance policies and our payment experience to date.

Environmental

Over the past 20 years, various federal and state authorities and private parties have claimed that we are a Potentially Responsible Party ("PRP") as a generator of waste materials for alleged pollution at a number of waste sites operated by third parties located principally in New Jersey and have sought to recover costs incurred and to be incurred to clean up the sites.

We have been identified as a PRP at eight facilities operated by third parties at which investigation and/or remediation activities may be ongoing. We analyze our potential liability on at least a quarterly basis. We accrue for environmental liabilities when they are probable and estimable. We estimate our share of the total future cost for these sites to be less than \$5 million.

While joint and several liability is authorized under federal and state environmental laws, we believe the amounts we have paid and anticipate paying in the future for clean-up costs and damages at all sites are not material and will not have a material adverse effect on our financial condition, results of operations or liquidity. This assessment is based upon, among other things, the involvement of other PRPs at most of the sites, the status of the proceedings, including various settlement agreements and consent decrees, and the extended time period over which payments will likely be made. There can be no assurance, however, that future events will not require us to materially increase the amounts we anticipate paying for clean-up costs and damages at these sites, and that such increased amounts will not have a material adverse effect on our financial condition, results of operations or cash flows.

Other Contingencies

The Company has contingencies involving third parties (such as labor, contract, technology or product-related claims or litigation) as well as government-related items in various jurisdictions in which we operate pertaining to such items as value-added taxes, other indirect taxes, customs and duties and sales and use taxes. It is possible that cash flows or results of operations, in any period, could be materially affected by the unfavorable resolution of one or more of these contingencies.

The most significant government-related contingencies exist in Brazil. With regard to the Brazilian matters, we believe we have valid defenses for the underlying positions under dispute; however, in order to pursue these defenses, we are required to, and have provided, bank guarantees and pledged assets in the aggregate amount of \$31.9 million. The Brazilian matters take an extended period of time to proceed through the judicial process and there are a limited number of rulings to date.

In March 2012, ZoomEssence, Inc. filed a complaint against the Company in the U.S. District Court of New Jersey alleging trade secret misappropriation, breach of contract and unjust enrichment in connection with certain spray dry technology disclosed to the Company. In connection with the claims, ZoomEssence is seeking an injunction and monetary damages. ZoomEssence initially sought a temporary restraining order and preliminary injunction, but the Court denied these applications in an order entered on September 27, 2013, finding that ZoomEssence had not demonstrated a likelihood of success on the merits of its claims. The Court subsequently referred the matter to mediation, however the private mediation session did not result in a resolution of the dispute. On November 3, 2014, ZoomEssence amended its complaint against the Company to include allegations of breach of the duty of good faith and fair dealing, fraud in the inducement, and misappropriation of confidential and proprietary information. On November 13, 2014, the Company filed a counterclaim against ZoomEssence alleging trade secret misappropriation,

breach of contract, breach of the implied covenant of good faith and fair dealing, unjust enrichment, misappropriation of confidential and proprietary information, common law unfair competition, tortious interference with contractual relations, and conversion. The case is currently proceeding through discovery with a trial on the merits anticipated in mid-2016. The Company denies the allegations and will vigorously defend and pursue its position in Court. At this stage of the litigation, based on the information currently available to the Company, management does not believe that this matter represents a material loss contingency.

Based on the information available as of March 31, 2015, we estimate a range of reasonably possible loss related to the matters above, collectively, is \$0-\$31 million.

Separately, the Spanish tax authorities are alleging claims for a capital tax in a case arising from similar allegations as the income tax cases (discussed in further detail in Note 9 of our 2014 Form 10-K). In connection with the 2002 income tax assessment ruling the Appellate Court rejected one of the two bases upon which we based our capital tax position. However, we believe that we still have a strong basis for our capital tax position and intend to continue to defend these claims. On January 22, 2014, we filed an appeal and in order to avoid future interest costs in the event our appeal is unsuccessful, we paid \$11.2 million (representing the principal amount) during the first quarter of 2014. If there is an unfavorable ruling in this case, we estimate a reasonably possible loss of approximately \$13 million, which was fully reserved as of March 31, 2015.

Note 13. Subsequent Events:

On May 1, 2015, the Company acquired 100% of the outstanding shares of Henry H. Ottens Manufacturing Co., Inc. Ottens Flavors ("Ottens") for approximately \$190 million from existing cash resources. Ottens was acquired in order to strengthen the Flavors business in North America. This acquisition will be accounted for as a business combination and is not expected to have a material impact on the consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We create, manufacture and supply flavors and fragrances for the food, beverage, personal care and household-products industries either in the form of compounds or individual ingredients. Our flavors and fragrance compounds combine a large number of ingredients that are blended, mixed or reacted together to produce proprietary formulas created by our perfumers and flavorists.

Flavors are the key building blocks that impart taste in processed food and beverage products and, as such, play a significant role in determining consumer preference of the end products in which they are used. While we are a global leader, our flavors business is more regional in nature, with different formulas that reflect local tastes and ingredients. As a leading creator of flavors, we help our customers deliver on the promise of delicious and healthy foods and drinks that appeal to consumers. Our flavors compounds are ultimately used by our customers in four end-use categories: (1) Savory, (2) Beverages, (3) Sweet, pharmaceutical and oral care ("Sweet"), and (4) Dairy.

Our fragrances are a key component in the world's finest perfumes and best-known consumer brands, including beauty care, fabric care, personal wash and home care products. Our Fragrance Compounds are defined into broad market categories, (1) Fine Fragrances and (2) Consumer Fragrances. Consumer Fragrances consists of five end-use categories: (1) Fabric Care, (2) Home Care, (3) Personal Wash, (4) Hair Care and (5) Toiletries. In addition, Fragrance Ingredients, which are used internally and sold to third parties, including customers and competitors, for use in preparation of compounds, are included in the Fragrances business unit.

The flavors and fragrances market is part of a larger market which supplies a variety of ingredients and components that consumer products companies utilize in their products. The broader market includes large multinational companies or smaller regional and local participants which supply products such as seasonings, texturizers, spices, enzymes, certain food-related commodities, fortified products and cosmetic ingredients. The flavors and fragrances market is estimated to be at least \$18 billion; however the exact size of the global market is not available due to fragmentation of data. We, together with the other top three companies, are estimated to comprise approximately two-thirds of the total estimated sales in the global flavors and fragrances sub-segment of the broader market. Net sales growth during the first quarter of 2015 was 1% on a reported basis and 6% on a currency neutral basis (which excludes the effects of changes in currency). The currency neutral growth reflects new win performance (net of losses) in both Flavors and Fragrance Compounds partially offset by volume erosion on existing business, as well as additional full shipping days in the first week of the 2015 quarter as compared to the 2014 quarter. For 2015, we continue to expect that currency neutral sales growth will be in line with our long-term targets.

Exchange rate fluctuations had a 500 basis point (bps) unfavorable impact on net sales for the first quarter, driven mainly by the weakening of the Euro against the U.S. dollar. The effect of exchange rates can vary by business and region, depending upon the mix of sales by destination country as well as the relative percentage of local sales priced in U.S. dollars versus local currencies.

Gross margins increased slightly year-over-year. Included in the first quarter of 2015 was \$0.3 million of costs associated with operational improvement initiatives, compared to \$2.6 million of costs related to restructuring and operational improvement initiatives included in the 2014 period. Excluding these items, gross margin remained consistent with the prior year period. The overall raw material cost base remains elevated, including certain categories where prices remain well above average levels. We believe input costs will increase approximately 1-2% in 2015 as higher prices on certain categories, such as naturals, will more than offset potential benefits associated with oil-based derivatives that are expected to occur later in 2015. We continue to seek improvements in our margins through operational performance and mix enhancement.

On May 1, 2015, the Company acquired Henry H. Ottens Manufacturing Co., Inc. Ottens Flavors for approximately \$190 million. This acquisition is not expected to have a material impact on the consolidated financial statements.

FINANCIAL PERFORMANCE OVERVIEW

Reported sales in the first quarter of 2015 increased approximately 1%. In currency neutral terms, sales increased 6% as a result of new win performance in both Flavors and Fragrance Compounds and lower volume erosion on existing business. We continue to benefit from our diverse portfolio of end-use product categories and geographies and had growth in three of four regions and Consumer Fragrances and Flavor Compounds both had positive currency neutral

growth. Flavors realized currency neutral growth of 9% for the first quarter of 2015. Our Fragrance business achieved currency neutral growth of 5%. Fragrances performance reflects new win performance in our Consumer Fragrances end-use categories, led by sales in Fabric Care. Overall, our first quarter 2015 results continued to be driven by our strong emerging market presence that represented 51% of

currency neutral sales and experienced 9% currency neutral growth. From a geographic perspective, for the first quarter, all regions delivered currency neutral growth in 2015, led by Latin America (LA), with 14%. Operating profit increased \$5.7 million to \$161.8 million (20.9% of sales) in the 2015 first quarter compared to \$156.1 million (20.3% of sales) in the comparable 2014 period. The three months ended March 31, 2015 included restructuring charges of \$0.2 million, operational improvement initiative costs of \$0.3 million and \$0.5 million of acquisition and related costs compared to \$2.7 million of restructuring and operational improvement initiative costs in the prior year period. Excluding these charges, adjusted operating profit was \$162.8 million (21.0% of sales) for the first quarter of 2015 compared to \$158.8 million (20.6% of sales) for the first quarter of 2014. Foreign currency changes had an unfavorable impact on operating profit of approximately 7% in the first quarter of 2015. Other (income) expense, net increased \$7.1 million to \$5.7 million of income in the first quarter of 2015 compared to \$1.4 million of expense in the first quarter of 2014. The year-over-year increase is primarily driven by higher levels of foreign exchange gains during 2015 compared to the 2014 period. Net income increased by \$21.6 million quarter-over-quarter to \$128.3 million for the first quarter of 2015. Although we are in the process of refreshing the key elements of our strategic priorities, we continued to execute against our strategic priorities of leveraging our geographic reach, strengthening our innovation platform and maximizing our portfolio during the first quarter of 2015. By maintaining cost discipline and realizing productivity gains across many parts of the business, we believe that we can continue to fund investments in resources and capabilities in emerging markets, R&D and key technologies. In 2015, we believe that capital spending will approach 4-5% of sales as we continue to prioritize investments in emerging markets and Flavors. Cash flows from operations for the three months ended March 31, 2015 were \$31.5 million or 4.1% of sales, compared to cash inflow from operations of \$35.0 million or 4.5% of sales for the three months ended March 31, 2014. The decrease in cash flow from operations in 2015 reflects higher net income and lower payments for incentive compensation, which were offset principally by higher pension contributions in the 2015 period.

S&A expenses include expenses necessary to support our commercial activities and administrative expenses supporting our overall operating activities.

FIRST QUARTER 2015 IN COMPARISON TO FIRST QUARTER 2014

Sales

Sales for the first quarter of 2015 totaled \$774.9 million, an increase of 1% from the prior year quarter. Excluding the impact of foreign currency, currency neutral sales increased 6%, as a result of new win performance (net of losses) in both Flavors and Fragrance Compounds and lower volume erosion on existing business. Overall currency neutral growth was driven by 9% growth in emerging markets.

Flavors Business Unit

Flavors reported sales growth was 3%, and currency neutral sales growth was 9% during the first quarter of 2015 compared to the 2014 period. The overall performance primarily reflects new wins and low volume growth. The overall increase was due to double-digit growth in Beverage and mid to high single-digit growth in Savory, Sweet and Dairy. The Flavors business delivered currency neutral growth in all regions, led by LA. Sales in LA were driven by high double-digit gains in Beverage. Sales in Europe, Africa, and the Middle East (EAME) and Greater Asia (GA) were driven by double-digit gains in Beverage and mid to high single-digit growth in Savory, and sales in North America (NOAM) were led by double-digit gains in Beverage, Sweet and Dairy.

Fragrances Business Unit

The Fragrances business experienced a decline of 1% in reported sales but a 5% increase in currency neutral sales for the first quarter of 2015 compared to the first quarter of 2014. The overall increase was primarily driven by double-digit gains in our Fabric Care and Home Care categories, offset by low single-digit declines in Fine Fragrance and Fragrance Ingredients. Our Fragrance Compounds saw currency neutral sales growth of 6%, while Fragrance Ingredients declined 2% over the prior year period.

⁽¹⁾ Currency neutral sales growth is calculated by translating prior year sales at the exchange rates for the corresponding 2015 period.

NOAM Flavors sales increased 10% as a result of double-digit gains in Beverage, Sweet and Dairy. NOAM Fragrance sales decreased 6% in the first quarter of 2015, principally due to double-digit declines in Fine Fragrance and Ingredients, that were only partially offset by double-digit growth in Home Care and high single-digit growth in Fabric Care categories.

EAME Flavors currency neutral sales growth of 9% was led by double-digit growth in Beverage, high single-digit growth in Sweet and mid single-digit growth in Savory. EAME Fragrance currency neutral sales increased 6% overall, driven mainly by double-digit growth in Fabric Care and Home Care categories, which were only partially offset by low single-digit declines in Fine Fragrance.

LA Flavors currency neutral sales were up 21% driven by double-digit gains in the Beverage, Sweet, Dairy and Savory categories. LA Fragrances currency neutral sales increased 11% overall, principally led by double-digit gains in Fabric Care and Home Care, which more than offset double-digit declines in Personal Wash and single-digit declines in Fragrance Ingredients.

GA Flavors had currency neutral sales growth of 4% principally from double-digit gains in Beverage and high single-digit gains in Savory. GA Fragrances currency neutral sales growth of 6% was principally driven by double-digit growth in Fragrance Ingredients as well as the Personal Wash, Toiletries and Fine Fragrance categories. In addition, the Hair Care and Home Care categories experienced mid to high single-digit growth.

Cost of Goods Sold

Cost of goods sold, as a percentage of sales, decreased 40 bps to 55.3% in the first quarter of 2015 compared to 55.7% in the first quarter of 2014. Included in cost of goods sold was \$0.3 million and \$0.4 million of charges related to operational improvement initiative costs in 2015 and 2014, respectively.

Research and Development (R&D) Expenses

Overall R&D expenses, as a percentage of sales, remained consistent with the prior year period at 8.2% in the first quarter of 2015 versus 8.0% in the first quarter of 2014.

Selling and Administrative (S&A) Expenses

S&A expenses decreased \$2.9 million to \$120.8 million or 15.6%, as a percentage of sales, in the first quarter of 2015 compared to 16.1% in the first quarter of 2014. The \$2.9 million decrease is principally due to the impact of currency, which was partially offset by higher amortization and incentive compensation expenses.

Operating Results by Business Unit

We evaluate the performance of business units based on segment profit which is defined as operating profit before Restructuring and other charges, net, Global expenses (as discussed in Note 8 to our Consolidated Financial Statements) and certain non-recurring items, net, Interest expense, Other income (expense), net and Taxes on income. See Note 8 to our Consolidated Financial Statements for the reconciliation to Income before taxes.

Fragrances	20.5	% 21.6	%
Consolidated	20.9	% 20.3	%

Flavors Segment Profit

Flavors segment profit increased approximately 5% to \$92.7 million in the first quarter of 2015, or 24.6% as a percentage of sales, compared to \$88.1 million, or 24.0% as a percentage of sales, in the comparable 2014 period. The improvement in segment profit and profit margin was driven primarily by strong new win performance and volume growth, which were partially offset by higher incentive compensation as well as unfavorable foreign currency impacts.

Fragrances Segment Profit

Fragrances segment profit declined approximately 6% to \$81.6 million in the first quarter of 2015, or 20.5% as a percentage of sales, compared to \$87.2 million, or 21.6% as a percentage of sales, in the comparable 2014 period. The decline in segment profit and profit margin was primarily due to unfavorable foreign currency impacts, competitive pressure on Ingredient prices, and rising input costs, which were partially offset by favorable volume growth, productivity initiatives and sales mix.

Global Expenses

Global expenses represent corporate and headquarters-related expenses which include legal, finance, human resources and R&D and other administrative expenses that are not allocated to an individual business unit. In the first quarter of 2015,

Global expenses were \$11.6 million compared to \$16.4 million during the first quarter of 2014. The decrease was principally driven by the favorable impact of our cash flow hedging program.

Restructuring and Other Charges, Net

In 2014, the Company closed its fragrance ingredients manufacturing facility in Augusta, Georgia and consolidated production into other Company facilities. During the first quarter of 2015, the Company recorded \$0.2 million of plant shutdown and other related costs included in Restructuring and other charges, net related to this closure. As a result of this closure, 43 positions have been eliminated.

Interest Expense

Interest expense decreased \$0.6 million to \$11.1 million in the first quarter of 2015 compared to the first quarter of 2014. Average cost of debt was 4.7% for the 2015 three month period compared to 5.0% for the 2014 three month period.

Other (Income) Expense, Net

Other (income) expense, net increased by approximately \$7.1 million to \$5.7 million of income in the first quarter of 2015 versus \$1.4 million of expense in the comparable 2014 period. The year-over-year increase is primarily driven by higher levels of foreign exchange gains on working capital during 2015 compared to the 2014 period.

Income Taxes

The effective tax rate for the three months ended March 31, 2015 was 18.0% compared with 25.3% for the three months ended March 31, 2014. The quarter-over-quarter decrease is largely due to a benefit of \$10.5 million recorded in the first quarter of 2015, as a result of favorable tax rulings in Spain and another jurisdiction for which reserves were previously recorded. Excluding the benefit related to the favorable tax rulings, the first quarter 2015 adjusted effective tax rate was 24.7%, or 80 basis points lower than the first quarter 2014 adjusted effective tax rate of 25.5%, due to lower repatriation costs and lower loss provisions in the current quarter.

Liquidity and Capital Resources

CASH AND CASH EQUIVALENTS

We had cash and cash equivalents of \$443.7 million at March 31, 2015 compared to \$478.6 million at December 31, 2014, of which \$344.0 million of the balance at March 31, 2015 was held outside the United States. Cash balances held in foreign jurisdictions are, in most circumstances, available to be repatriated to the United States; however, they would be subject to United States federal income taxes, less applicable foreign tax credits. We have not provided U.S. income tax expense on accumulated earnings of our foreign subsidiaries because we have the ability and plan to reinvest the undistributed earnings indefinitely.

Effective utilization of the cash generated by our international operations is a critical component of our tax strategy. Strategic dividend repatriation from foreign subsidiaries creates U.S. taxable income, which enables us to realize deferred tax assets. The Company regularly repatriates, in the form of dividends from its non-U.S. subsidiaries, a portion of its current year earnings to fund financial obligations in the U.S.

CASH FLOWS FROM OPERATING ACTIVITIES

Operating cash flows in the first three months of 2015 were \$31.5 million compared to \$35.0 million in the first three months of 2014. The decrease in operating cash flows for the first three months of 2015 compared to 2014 is principally driven by higher net income and lower payments for incentive compensation, which were offset principally by higher pension contributions in the 2015 period.

Working capital (current assets less current liabilities) totaled \$1,267.8 million at March 31, 2015, compared to \$1,191.2 million at December 31, 2014. The Company sold certain accounts receivable on a non-recourse basis to unrelated financial institutions under "factoring" agreements that are sponsored, solely and individually, by certain customers. We believe that participating in the factoring programs strengthens our relationships with these customers and provides operational efficiencies. The beneficial impact on cash from operations from participating in these programs decreased approximately \$6.5 million for the three months ended March 31, 2015 compared to a decrease of approximately \$14.3 million for the three months ended March 31, 2014. The cost of participating in these programs was immaterial to our results in all periods.

CASH FLOWS USED IN INVESTING ACTIVITIES

Net investing activities during the first three months of 2015 utilized \$17.9 million compared to \$122.4 million in the prior year period. The decrease in cash paid for investing activities is primarily driven by the acquisition of Aromor during the first quarter of 2014 for approximately \$102 million.

Additions to property, plant and equipment were \$19.4 million during the first three months of 2015 compared to \$33.8 million in the first three months of 2014. We expect additions to property, plant and equipment to approach 4-5% of our sales in 2015.

CASH FLOWS USED IN FINANCING ACTIVITIES

Net financing activities in the first three months of 2015 used \$39.5 million compared to \$49.3 million in the first three months of 2014. The decrease in cash used for financing activities principally reflects lower treasury stock purchases in the first quarter of 2015 as compared to the 2014 period.

At March 31, 2015, we had \$943.5 million of debt outstanding compared to \$942.3 million outstanding at December 31, 2014.

We paid dividends totaling \$38.0 million in the 2015 period. We declared a cash dividend per share of \$0.47 in the first quarter of 2015 that was paid on April 7, 2015 to all shareholders of record as of March 27, 2015.

In December 2012, the Board of Directors authorized a \$250 million share repurchase program, which commenced in the first quarter of 2013. Based on the total remaining amount of \$98.3 million available under the repurchase program, approximately 0.8 million shares, or 1.0% of shares outstanding (based on the market price and shares outstanding as of March 31, 2015) could be repurchased under the program as of March 31, 2015. The purchases will be made from time to time on the open market or through private transactions as market and business conditions warrant. Repurchased shares will be placed into treasury stock. During the three months ended March 31, 2015, we repurchased 98,113 shares on the open market at an aggregate cost of \$10.7 million or an average of \$108.65 per share. We expect total purchases during 2015 to be less than total purchases made during 2014. The ultimate level of purchases will be a function of the daily purchase limits established in the pre-approved program according to the share price at that time.

CAPITAL RESOURCES

Operating cash flow provides the primary source of funds for capital investment needs, dividends paid to shareholders and debt repayments. We anticipate that cash flows from operations and availability under our existing credit facilities are sufficient to meet our investing and financing needs for at least the next eighteen months. We regularly assess our capital structure, including both current and long-term debt instruments, as compared to our cash generation and investment needs in order to provide ample flexibility and to optimize our leverage ratios. We believe our existing cash balances are sufficient to meet our debt service requirements.

We supplement short-term liquidity with access to capital markets, mainly through bank credit facilities and issuance of commercial paper. We did not issue commercial paper during the first three months of 2015 or 2014.

We expect to contribute a total of approximately \$30 million to our non-U.S. pension plans during 2015. During the three months ended March 31, 2015, \$35.0 million of contributions were made to the qualified U.S. pension plans. For the three months ended March 31, 2015, we have contributed \$19.1 million related to our non-U.S. pension plans and \$1.1 million related to our non-qualified U.S. pension plans.

On May 1, 2015, the Company acquired Henry H. Ottens Manufacturing Co., Inc. Ottens Flavors for approximately \$190 million, which was funded from existing cash resources.

Under our revolving credit facility, we are required to maintain, at the end of each fiscal quarter, a ratio of net debt for borrowed money to adjusted EBITDA in respect of the previous 12-month period of not more than 3.25 to 1. Based on this ratio, at March 31, 2015 our covenant compliance provided overall borrowing capacity of \$1,833 million.

As of March 31, 2015 we had no borrowings under our revolving credit facility. The amount which we are able to draw down on under the facility is limited by financial covenants as described in more detail below. Our drawdown capacity on the facility was \$940.4 million at March 31, 2015.

At March 31, 2015, we were in compliance with all financial and other covenants, including the net debt to adjusted EBITDA ratio. At March 31, 2015 our Net Debt/adjusted EBITDA ⁽¹⁾ ratio was 0.69 to 1 as defined by the debt agreements, well below the financial covenants of existing outstanding debt. Failure to comply with the financial and

other covenants under

our debt agreements would constitute default and would allow the lenders to accelerate the maturity of all indebtedness under the related agreement. If such acceleration were to occur, we would not have sufficient liquidity available to repay the indebtedness. We would likely have to seek amendments under the agreements for relief from the financial covenants or repay the debt with proceeds from the issuance of new debt or equity, and/or asset sales, if necessary. We may be unable to amend the agreements or raise sufficient capital to repay such obligations in the event the maturities are accelerated.

Adjusted EBITDA and Net Debt, which are non-GAAP measures used for these covenants, are calculated in accordance with the definition in the debt agreements. In this context, these measures are used solely to provide (1) information on the extent to which we are in compliance with debt covenants and may not be comparable to adjusted EBITDA and Net Debt used by other companies. Reconciliations of adjusted EBITDA to net income and net debt to total debt are as follows:

As discussed in Note 12 to the Consolidated Financial Statements, at March 31, 2015, we had entered into various guarantees and had undrawn outstanding letters of credit from financial institutions. These arrangements reflect ongoing business operations, including commercial commitments, and governmental requirements associated with audits or litigation that are in process with various jurisdictions. Based on the current facts and circumstances they are not reasonably likely to have a material impact on our consolidated financial condition, results of operations, or cash flows.

As discussed in Notes 6 and 12 to the Consolidated Financial Statements, we had Euro 4.7 million (\$5.1 million) in bank guarantees outstanding as of March 31, 2015 related to the tax disputes in Spain. These amounts will be reduced once we make the remaining payments pursuant to the dividend withholding tax cases during the second quarter of 2015.

Cautionary Statement Under the Private Securities Litigation Reform Act of 1995

This Quarterly Report includes "forward-looking statements" under the Federal Private Securities Litigation Reform Act of 1995, including statements regarding the Company's expectations concerning (i) our ability to meet long-term growth targets in 2015, (ii) our competitive position in the market and financial performance in 2015, (iii) expected

cost pressures in 2015, (iv) capital spending in 2015, (v) cash flows to fund future operations and to meet debt service requirements, (vi) expected share repurchases in 2015, and (vii) the ultimate resolution of pending tax matters with the Spanish and Brazilian tax authorities. These forward-looking statements should be evaluated with consideration given to the many risks and uncertainties inherent in the Company's business that could cause actual results and events to differ materially from those in the forward-looking statements. Certain of such forward-looking information may be identified by such terms as "will," "expect," "anticipate," "believe," "outlook," "may," "estimate," "should" and "predict" similar or variations thereof. Such forward-looking statements are based on a series of expectations, assumptions, estimates and projections about the Company, are not

guarantees of future results or performance, and involve significant risks, uncertainties and other factors, including assumptions and projections, for all forward periods. Actual results of the Company may differ materially from any future results expressed or implied by such forward-looking statements. Such factors include, among others, the following:

- volatility and increases in the price of raw materials, energy and transportation;
- the economic and political risks associated with the Company's international operations;
- the Company's ability to benefit from its investments and expansion in emerging markets;
- fluctuations in the quality and availability of raw materials;
- our ability to successfully execute acquisitions, collaborations and joint ventures;
- changes in consumer preferences and demand for the Company's products or decline in consumer confidence and spending;
- the Company's ability to implement its business strategy, including the achievement of anticipated cost savings, profitability, realization of price increases and growth targets;
- the Company's ability to successfully develop new and competitive products that appeal to its customers and consumers;
- the impact of a disruption in the Company's supply chain or its relationship with its suppliers;
- the Company's ability to successfully manage inventory and working capital;
- the effects of any unanticipated costs and construction or start-up delays in the expansion of any of the Company's facilities;
- the impact of currency fluctuations or devaluations in the Company's principal foreign markets;
- any adverse impact on the availability, effectiveness and cost of the Company's hedging and risk management strategies;
- uncertainties regarding the outcome of, or funding requirements, related to litigation or settlement of pending litigation, uncertain tax positions or other contingencies;
- the impact of possible pension funding obligations and increased pension expense, particularly as a result of changes in asset returns or discount rates, on the Company's cash flow and results of operations;
- the Company's ability to optimize its manufacturing facilities, including the achievement of expected cost savings and increased efficiencies;
- the effect of legal and regulatory proceedings, as well as restrictions imposed on the Company, its operations or its representatives by U.S. and foreign governments;
- adverse changes in federal, state, local and foreign tax legislation or adverse results of tax audits, assessments, or disputes;
- the Company's ability to attract and retain talented employees;
- the direct and indirect costs and other financial impact that may result from any business disruptions due to political instability, armed hostilities, incidents of terrorism, natural disasters, or the responses to or repercussion from any of these or similar events or conditions;
- the Company's ability to quickly and effectively implement its disaster recovery and crisis management plans; and
- adverse changes due to accounting rules or regulations.

New risks emerge from time to time and it is not possible for management to predict all such risk factors or to assess the impact of such risks on the Company's business. Accordingly, the Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

Any public statements or disclosures by the Company following this report that modify or impact any of the forward-looking statements contained in or accompanying this report will be deemed to modify or supersede such outlook or other forward-looking statements in or accompanying this report.

The foregoing list of important factors does not include all such factors, nor necessarily present them in order of importance. In addition, you should consult other disclosures made by the Company (such as in our other filings with the SEC or in company press releases) for other factors that may cause actual results to differ materially from those

projected by the Company. Please refer to Part I. Item 1A., Risk Factors, of the 2014 Form 10-K for additional information regarding factors that could affect the Company's results of operations, financial condition and cash flow.

Non-GAAP Financial Measures

The Company uses non-GAAP financial operating measures in this Quarterly Report, including: (i) currency neutral sales (which eliminates the effects that result from translating its international sales in U.S. dollars), (ii) adjusted operating profit and adjusted operating margin (which excludes the acquisition costs, operational improvement initiative costs and restructuring charges), and (iii) adjusted effective tax rate (which excludes restructuring charges and operational improvement initiative

costs). The Company also provides the non-GAAP measures adjusted EBITDA (which excludes certain specified items and non-cash items as set forth in the Company's debt agreements) and net debt (which is adjusted for deferred gain on interest rate swaps and cash and cash equivalents) solely for the purpose of providing information on the extent to which the Company is in compliance with debt covenants contained in its debt agreements.

We have included each of these non-GAAP measures in order to provide additional information regarding our underlying operating results and comparable year-over-year performance. Such information is supplemental to information presented in accordance with GAAP and is not intended to represent a presentation in accordance with GAAP. In discussing our historical and expected future results and financial condition, we believe it is meaningful for investors to be made aware of and to be assisted in a better understanding of, on a period-to-period comparable basis, financial amounts both including and excluding these identified items, as well as the impact of exchange rate fluctuations. We believe such additional non-GAAP information provides investors with an overall perspective of the period-to-period performance of our business. In addition, management internally reviews each of these non-GAAP measures to evaluate performance on a comparative period-to-period basis in terms of absolute performance, trends and expected future performance with respect to our business. A material limitation of these non-GAAP measures is that such measures do not reflect actual GAAP amounts; for example, costs associated with operational improvements and restructuring activities involve actual cash outlays. We compensate for such limitations by using these measures as one of several metrics, including GAAP measures. These non-GAAP measures may not be comparable to similarly titled measures used by other companies.

** Currency neutral amount is calculated by translating prior year sales at the exchange rates used for the corresponding 2015 period.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

There are no material changes in market risk from the information provided in the Company's 2014 Annual Report on Form 10-K.

Item 4. Controls and Procedures

The Chief Executive Officer and Chief Financial Officer with the assistance of other members of our management, have evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on such evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are effective as of the end of the period covered by this Quarterly Report on Form 10-Q.

We have established controls and procedures designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and is accumulated and communicated to management, including the principal executive officer and the principal financial officer, to allow timely decisions regarding required disclosure.

The Chief Executive Officer and Chief Financial Officer have also concluded that there have not been any changes in our internal control over financial reporting during the quarter ended March 31, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

We are subject to various claims and legal actions in the ordinary course of our business.

Tax Claims

We are currently involved in a legal proceeding with the Spanish tax authorities that challenges tax deductions taken in our Spanish subsidiaries' tax returns and alleges claims of tax avoidance.

The Spanish tax authorities have also alleged claims related to capital tax positions arising from the business structure adopted by our Spanish subsidiaries. During the fourth quarter of 2013, the Company was notified that the Spanish High Court of Justice ruled against us in regards to the 2002 capital tax case. As a result, the Company recorded a charge of Euro 9.6 million (\$13.0 million, or \$9.1 million, after tax) for the year ended December 31, 2013. On January 22, 2014, we filed an appeal. In order to avoid future interest costs in the event our appeal is unsuccessful, we paid \$11.2 million (representing the principal amount) during the first quarter of 2014. Such amount will be refundable if we prevail in our appeal.

As of March 31, 2015, the Company had an aggregate value of Euro 4.7 million (\$5.1 million), which was fully reserved for and reflected in income taxes payable, related to three dividend withholding tax controversies in Spain, all of which have now been resolved. The Company made payments of Euro 3.5 (\$3.8 million) in April 2015 related to two of the controversies and expects to make the remaining payment during the second quarter of 2015. As of March 31, 2015, the Company had posted bank guarantees of Euro 4.7 million (\$5.1 million) associated with the appeals of these matters.

We do not currently believe that any of our pending tax assessments, even if ultimately resolved against us, would have a material impact on our financial condition.

Environmental

Over the past 20 years, various federal and state authorities and private parties have claimed that we are a Potentially Responsible Party ("PRP") as a generator of waste materials for alleged pollution at a number of waste sites operated by third parties located principally in New Jersey and have sought to recover costs incurred and to be incurred to clean up the sites.

We have been identified as a PRP at eight facilities operated by third parties at which investigation and/or remediation activities may be ongoing. We analyze our potential liability on at least a quarterly basis. We accrue for environmental liabilities when they are probable and estimable. We estimate our share of the total future cost for these sites to be less than \$5 million.

While joint and several liability is authorized under federal and state environmental laws, we believe the amounts we have paid and anticipate paying in the future for clean-up costs and damages at all sites are not material and will not have a material adverse effect on our financial condition, results of operations or liquidity. This assessment is based upon, among other things, the involvement of other PRPs at most of the sites, the status of the proceedings, including various settlement agreements and consent decrees, and the extended time period over which payments will likely be made. There can be no assurance, however, that future events will not require us to materially increase the amounts we anticipate paying for clean-up costs and damages at these sites, and that such increased amounts will not have a material adverse effect on our financial condition, results of operations or cash flows.

Other

In March 2012, ZoomEssence, Inc. filed a complaint against the Company in the U.S. District Court of New Jersey alleging trade secret misappropriation, breach of contract and unjust enrichment in connection with certain spray dry technology disclosed to the Company. In connection with the claims, ZoomEssence is seeking an injunction and monetary damages. ZoomEssence initially sought a temporary restraining order and preliminary injunction, but the Court denied these applications in an order entered on September 27, 2013, finding that ZoomEssence had not

demonstrated a likelihood of success on the merits of its claims. The Court subsequently referred the matter to mediation, however the private mediation session did not result in a resolution of the dispute. On November 3, 2014, ZoomEssence amended its complaint against the Company to include allegations of breach of the duty of good faith and fair dealing, fraud in the inducement, and

misappropriation of confidential and proprietary information. On November 13, 2014, the Company filed a counterclaim against ZoomEssence alleging trade secret misappropriation, breach of contract, breach of the implied covenant of good faith and fair dealing, unjust enrichment, misappropriation of confidential and proprietary information, common law unfair competition, tortious interference with contractual relations, and conversion. The case is currently proceeding through discovery with a trial on the merits anticipated in mid 2016. The Company denies the allegations and will vigorously defend and pursue its position in Court. At this stage of the litigation, based on the information currently available to the Company, management does not believe that this matter represents a material loss contingency.

We are also a party to other litigations arising in the ordinary course of our business. We do not expect the outcome of these cases, singly or in the aggregate, to have a material effect on our consolidated financial condition.
