[X] QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2010
OR

[ ] TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from __________ to __________

Commission File Number 0-19858

USA TRUCK, INC.
(Exact Name of Registrant as Specified in Its Charter)

Delaware	71-0556971
(State or other jurisdiction of incorporation or organization)	(I.R.S. employer identification no.)

3200 Industrial Park Road Van Buren, Arkansas	72956
(Address of principal executive offices)	(Zip code)

(479) 471-2500
(Registrant's telephone number, including area code)

Not applicable
(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes X No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of

this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer _____ Accelerated Filer X Non-Accelerated Filer _____ Smaller Reporting Company_____

(Do not check if a Smaller Reporting Company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No X

The number of shares outstanding of the registrant's Common Stock, par value $.01, as of July 28, 2010 is 10,491,526.

USA TRUCK, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

June 30, 2010

NOTE 1 – BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the three month and six month periods ended June 30, 2010, are not necessarily indicative of the results that may be expected for the year ending December 31, 2010. For further information, refer to the financial statements, and footnotes thereto, included in our Annual Report on Form 10-K for the year ended December 31, 2009.

The balance sheet at December 31, 2009, has been derived from the audited consolidated financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

By agreement with our customers, and consistent with industry practice, we add a graduated fuel surcharge to the rates we charge our customers as diesel fuel prices increase above an agreed-upon baseline price per gallon. Base revenue in the consolidated statements of operations represents revenue excluding this fuel surcharge revenue.

NOTE 2 – REVENUE RECOGNITION

Revenue generated by our Trucking operating segment is recognized in full upon completion of delivery of freight to the receiver's location. For freight in transit at the end of a reporting period, we recognize revenue pro rata based on relative transit time completed as a portion of the estimated total transit time. Expenses are recognized as incurred.

Revenue generated by our Strategic Capacity Solutions and Intermodal operating segments is recognized upon completion of the services provided. Revenue is recorded on a gross basis, without deducting third party purchased transportation costs because we have responsibility for billing and collecting such revenue.

Management believes these policies most accurately reflect revenue as earned and direct expenses, including third party purchased transportation costs, as incurred.

NOTE 3 – STOCK-BASED COMPENSATION

The current equity compensation plans that have been approved by our stockholders are our 2004 Equity Incentive Plan and our 2003 Restricted Stock Award Plan. We do not have any equity compensation plans under which equity awards are outstanding or may be granted that have not been approved by our stockholders.

The USA Truck, Inc. 2004 Equity Incentive Plan provides for the granting of incentive or nonqualified options or other equity-based awards covering up to 1,050,000 shares of Common Stock to directors, officers and other key employees. On the day of each annual meeting of stockholders of the Company for a period of nine years, which commenced with the Annual Meeting of Stockholders in 2005 and will end with the Annual Meeting of Stockholders in 2013, the maximum number of shares of Common Stock that is available for issuance under the Plan is

automatically increased by that number of shares equal to the lesser of 25,000 shares or such lesser number of shares (which may be zero or any number less than 25,000) as determined by the Board. No options were granted under this 2004 Equity Incentive Plan for less than the fair market value of the Common Stock as defined in the 2004 Equity Incentive Plan at the date of the grant. Although the exercise period is determined when options are granted, no option may be exercised later than 10 years after it is granted. Options granted under the 2004 Equity Incentive Plan generally vest ratably over three to five years. The option price under the 2004 Equity Incentive Plan is the fair market value of our Common Stock at the date the options were granted, except that the exercise prices of options granted to our Chairman of the Board are equal to 110% of the fair market value of our Common Stock at the date those options were granted. The exercise prices of outstanding options granted under the 2004 Equity Incentive Plan range from $11.19 to $30.22 as of June 30, 2010. At June 30, 2010, 529,760 shares were available for granting future options or other equity awards under this 2004 Equity Incentive Plan. The Company issues new shares upon the exercise of stock options.

Compensation cost recognized in the first six months of 2010 and 2009 includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of January 1, 2006 and (b) compensation cost for all share-based payments granted subsequent to January 1, 2006. The compensation cost is based on the grant-date fair value calculated using a Black-Scholes-Merton option-pricing formula and is amortized over the vesting period. The stock-based compensation (credit) expense that was recognized related to incentive and nonqualified stock options granted under our plans for the three and six month periods ended June 30, 2010, was approximately ($0.02) million and $0.04 million, respectively. For the three and six month periods ended June 30, 2009, we recognized approximately $0.07 million and $0.11 million, respectively, in compensation expense related to incentive and nonqualified stock options granted under our plans.

On January 28, 2009, the Executive Compensation Committee of the Board of Directors of the Company approved the USA Truck, Inc. Executive Team Incentive Plan. The Executive Team Incentive Plan consists of cash and equity incentive awards. The cash incentives will be awarded upon the achievement of predetermined results in designated performance measurements, which will be identified by the Committee on an annual basis. Executive Team Incentive Plan participants will be paid a cash percentage of their base salaries corresponding with the level of results achieved. As determined by the Committee on an annual basis, Executive Team Incentive Plan participants are also eligible for an annual equity incentive award consisting of Company Common Stock, issued under the 2004 Equity Incentive Plan. The equity incentive awards will consist of a combination of Restricted Stock Awards ("RSAs") and Incentive Stock Options ("ISOs"). The value of the equity award to each participant will be granted fifty percent in the form of RSAs and fifty percent in the form of ISOs, as defined. To the extent options fail to qualify as "incentive stock options" under IRS regulations, they will be nonqualified stock options. Annual awards approved by the Committee will be granted quarterly and will vest one-third each year on August 1, beginning the year following the year in which the shares are awarded. On January 27, 2010, the Committee approved the granting of the annual awards for 2010 under this plan.

The table below sets forth the assumptions used to value stock options granted during the years indicated:

	2010	2009
Dividend yield	0%	0%
Expected volatility	32.8 - 34.1%	36.5 - 53.1%
Risk-free interest rate	2.0 – 2.1%	1.4%
Expected life (in years)	4.21 - 4.25	4.13 - 4.25

Expected volatility is a measure of the expected fluctuation in our share price. We use the historical method to calculate volatility with the historical period being equal to the expected life of each option. This calculation is then used to determine the potential for our share price to increase over the expected life of the option. Expected life represents the length of time we anticipate the options to be outstanding before being exercised. The risk-free interest rate is based on an implied yield on United States zero-coupon treasury bonds with a remaining term equal to the expected life of the outstanding options. In addition to the above, we also include a factor for anticipated forfeitures, which represents the number of shares under options expected to be forfeited over the expected life of the options.

Information related to option activity for the six months ended June 30, 2010 is as follows:

	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (in years)	Aggregate Intrinsic Value (1)
Outstanding - beginning of year	201,446	$ 16.25		
Granted	18,117	14.63		
Exercised	(20,600)	11.47		$ 126,266
Cancelled/forfeited	(24,286)	16.07		
Expired	(26,300)	20.22		
Outstanding at June 30, 2010	148,377	$ 16.04	3.0	$ 296,361
Exercisable at June 30, 2010	51,500	$ 17.55	1.0	$ 93,060

(1) The intrinsic value of outstanding and exercisable stock options is determined based on the amount by which the market value of the underlying stock exceeds the exercise price of the option. The per share market value of our Common Stock, as determined by the closing price on June 30, 2010 (the last trading day of the quarter), was

$16.12.

8

Information related to the weighted average fair value of stock option activity for the six months ended June 30, 2010 is as follows:

	Number of Shares Under Options	Weighted Average Exercise Price
Nonvested options – December 31, 2009	117,096	$ 16.43
Granted	18,117	14.63
Forfeited	(24,286)	16.07
Vested	(14,050)	22.99
Nonvested options – June 30, 2010	96,877	15.24

The exercise price, number, weighted average remaining contractual life of options outstanding and the number of options exercisable as of June 30, 2010 is as follows:

Exercise Price	Number of Options Outstanding	Weighted-Average Remaining Contractual Life (in years)	Number of Options Exercisable
$ 11.19	17,876	4.1	--
11.47	16,800	0.9	16,800
12.21	9,712	5.1	--
12.66	4,000	0.6	4,000
13.88	14,057	4.1	--
14.18	10,482	4.1	--
14.50	15,448	4.1	500
15.83	5,000	4.1	1,000
17.06	11,400	1.7	6,000
18.58	6,052	5.1	--
22.54	33,800	2.1	20,200
22.93	1,500	0.8	1,500
30.22	2,250	1.6	1,500
	148,377	3.0	51,500

The 2003 Restricted Stock Award Plan, which terminated on August 31, 2009, allowed the Company to issue up to 150,000 shares of Common Stock as awards of restricted stock to its officers, 100,000 shares of which had been awarded. The Chairman of the Board contributed 100,000 shares of his Common Stock to the Company for purposes of issuance under the 2003 Restricted Stock Award Plan. Shares issued as restricted stock awards under the 2003 Restricted Stock Award Plan consisted solely of shares of Common Stock contributed to the Company by its Chairman of the Board. Awards under the 2003 Restricted Stock Award Plan vested over a period of no less than five years and vesting of awards is also subject to the achievement of such performance goals as set by the Board of Directors based on criteria set forth in the 2003 Restricted Stock Award Plan. Currently, the performance goals require the attainment of an annual retained earnings growth rate of 10.0% in order for the shares to qualify for full vesting (with 50.0% vesting if a 9.0% growth rate is achieved). The fair value of the 100,000 shares of Common Stock subject to the awards previously granted is being amortized over the vesting period as compensation expense based on management's assessment as to whether achievement of the performance goals is probable. To the extent the performance goals are not achieved and there is not full vesting in the shares awarded, the compensation expense recognized to the extent of the nonvested and forfeited shares will be reversed.

The performance goal for 2009 was not met, and as a result, no compensation expense was recognized for the 4,000 shares that were to have vested on March 1, 2010, based on 2009 performance. For financial statement purposes, the previously recorded expense in the amount of $0.1 million relating to the forfeited shares was recovered on September 30, 2009, the date on which it was determined that the achievement of the performance goal would not be met. As a result, such shares were recorded as treasury stock and are not included in the nonvested shares in the table below as of December 31, 2009.

Pursuant to the provisions of the Plan, any shares that remained in the Plan that were not subject to outstanding awards when the Plan terminated and any previously awarded shares that are forfeited after the Plan terminates are to be returned to Mr. Robert M. Powell, Chairman of the Board of Directors. Accordingly, the 4,000 shares which were deemed forfeited on September 30, 2009, were returned to Mr. Powell on March 1, 2010, the effective date of their forfeiture. Due to the termination of the employment of an officer of the Company during the quarter, 2,000 shares were forfeited resulting in the recovery of the previously recorded expense in the amount of approximately $0.05 million and returned to Mr. Powell. Also during the quarter, it was determined that the achievement of the performance goal for 2010 would not be met and therefore, the remaining 2,000 shares were deemed forfeited and recorded as treasury stock. For financial statement purposes, the previously recorded expense in the amount of $0.05 million relating to the forfeited shares was recovered during the quarter. These 2,000 shares will remain outstanding until their scheduled vesting date of March 1, 2011, at which time their forfeiture will become effective.

The compensation expense recognized is based on the market value of our Common Stock on the date the restricted stock award is granted and is not adjusted in subsequent periods. The amount recognized is amortized over the vesting period. The stock-based compensation (credit) expense that was recognized related to restricted stock awards granted under our plans for the three and six month periods ended June 30, 2010, was approximately ($0.13) million and ($0.09) million, respectively. For the three and six months ended June 30, 2009, the compensation expense related to our restricted stock awards was approximately $0.11 million and $0.20 million, respectively. Compensation expense is included in salaries, wages and employee benefits in the consolidated statement of operations.

Information related to the 2003 Restricted Stock Award Plan for the six months ended June 30, 2010 is as follows:

	Number of Shares	Weighted Average Grant Price (1)	
Nonvested shares – December 31, 2009	4,000	$	27.66
Granted	--		--
Forfeited	(2,000)		27.66
Vested	--		--
Nonvested shares – June 30, 2010	2,000	$	27.66

(1) The shares were valued at the closing price of the Company's common stock on the dates of the awards.

On July 16, 2008, the Executive Compensation Committee of the Board of Directors of the Company, pursuant to the 2004 Equity Incentive Plan, granted thereunder awards totaling 200,000 restricted shares of the Company's Common Stock to certain officers of the Company. The grants were made effective as of July 18, 2008 and were valued at $12.13 per share, which was the closing price of the Company's Common Stock on that date. Each officer's restricted shares of Common Stock will vest in varying amounts over the ten year period beginning April 1, 2011, subject to the Company's attainment of defined retained earnings growth. Management must attain an average five-year trailing retained earnings annual growth rate of 10.0% (before dividends) in order for the shares to qualify for full vesting (pro rata vesting will apply down to 50.0% at a 5.0% annual growth rate). Any shares which fail to vest as a result of the Company's failure to attain a performance goal will forfeit and result in the reversal of the related expense. These forfeited shares will revert to the 2004 Equity Incentive Plan where they will remain available for grants under the terms of that Plan until that Plan expires in 2014. Due to the termination of the employment of an officer of the Company during the quarter, 26,119 shares were forfeited resulting in the recovery of the previously recorded expense in the amount of approximately $0.08 million and were returned to the 2004 Equity Incentive Plan. During the quarter, management determined that the performance criteria will not be met for the 8,830 shares that were to vest on April 1, 2011, therefore these shares were deemed forfeited. The shares will remain outstanding until their scheduled vesting date of April 1, 2011, at which time their forfeiture will become effective and the shares will revert to the 2004 Equity Incentive Plan. The previously recorded expense in the amount of approximately $0.07 million was reversed at June 30, 2010.

Information related to the restricted stock awarded under the 2004 Equity Incentive Plan for the six months ended June 30, 2010, is as follows:

	Number of Shares	Weighted Average Grant Price (1)	
Nonvested shares – December 31, 2009	221,810	$	12.24
Granted	5,355		14.71
Forfeited	(27,227)		12.33
Vested	--		--

Nonvested shares – June 30, 2010	199,938	$ 12.30

(1) The shares were valued at the closing price of the Company's common stock on the dates of the awards.

As of June 30, 2010, we had approximately $0.2 million and $1.7 million in unrecognized compensation expense related to stock options and restricted stock, respectively, which is expected to be recognized over a weighted average period of approximately 1.7 years for stock options and 6.2 years for restricted stock.

NOTE 4 – REPURCHASE OF EQUITY SECURITIES

On October 21, 2009, the Board of Directors of the Company approved the repurchase of up to 2,000,000 shares of the Company's Common Stock expiring on October 21, 2012. Subject to applicable timing and other legal requirements, these repurchases may be made on the open market or in privately negotiated transactions on terms approved by the Company's Chairman of the Board or President. Repurchased shares may be retired or held in treasury for future use for appropriate corporate purposes including issuance in connection with awards under the Company's employee benefit plans. During the six months ended June 30, 2010, we did not repurchase any shares of our Common Stock. Our current repurchase authorization has 2,000,000 shares remaining.

NOTE 5 – SEGMENT REPORTING

The service offerings we provide relate to the transportation of truckload quantities of freight for customers in a variety of industries. The services generate revenue, and to a great extent incur expenses, primarily on a per mile basis. Our business is classified into three operating segments: our Trucking operating segment consisting primarily of our General Freight and Dedicated Freight service offerings; our Strategic Capacity Solutions operating segment consisting entirely of our freight brokerage service offering; and our rail Intermodal operating segment. We previously included the results of our freight brokerage and Container-on-Flat-Car ("COFC") portion of our rail Intermodal service offering in our Strategic Capacity Solutions operating segment. The Trailer-on-Flat-Car ("TOFC") portion of our rail Intermodal service offering was classified within our Trucking operating segment. COFC and TOFC are now combined and reported as Intermodal and brokerage is now reported as Strategic Capacity Solutions. Strategic Capacity Solutions and Intermodal are reported as separate operating segments. These three operating segments are aggregated into one segment for financial reporting purposes.

Our Strategic Capacity Solutions and Intermodal operating segments are intended to provide services which complement our Trucking services, primarily to existing customers of our Trucking operating segment. A majority of the customers using our Strategic Capacity Solutions and Intermodal services are also customers of our Trucking operating segment. Both our Strategic Capacity Solutions and Intermodal operating segments, while making significant contributions to our business, represent a relatively small portion of our revenue. For the three and six months ended June 30, 2010, our Strategic Capacity Solutions operating segment generated approximately 9.0% and 8.0% of our total base revenue, respectively, while our Intermodal operating segment generated approximately 2.9% and 2.8% of our total base revenue, respectively, for the same period. For the three months ended June 30, 2009, our Strategic Capacity Solutions and Intermodal operating segments generated approximately 3.9% and 2.2% of total base revenue, respectively. For the six months ended June 30, 2009, our Strategic Capacity Solutions and Intermodal operating segments generated approximately 3.5% and 2.1% of total base revenue, respectively.

Our decision to aggregate our three operating segments into one reporting segment was based on factors such as the similar economic and operating characteristics of our service offerings and our centralized internal management structure. Except with respect to the relatively minor components of our operations that do not involve the use of our trucks, key operating statistics include, for example, revenue per mile and miles per tractor per week. While the operations of our Strategic Capacity Solutions operating segment do not involve the use of our equipment and drivers, we nevertheless provide truckload freight services to our customers through arrangements with third party carriers who are subject to the same general regulatory environment and cost sensitivities imposed upon our Trucking operations.

NOTE 6 – NEW ACCOUNTING PRONOUNCEMENTS

In January 2010, the FASB issued Accounting Standards Update No. 2010-06, Fair Value Measurements and Disclosures (the "Update"), which provides amendments to Accounting Standards Codification 820-10 (Fair Value Measurements and Disclosures – Overall Subtopic) of the Codification. The Update requires improved disclosures

about fair value measurements. Separate disclosures need to be made of the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements along with a description of the reasons for the transfers. Also, disclosure of activity in Level 3 fair value measurements needs to be made on a gross basis rather than as one net number. The Update also requires: (1) fair value measurement disclosures for each class of assets and liabilities, and (2) disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements, which are required for fair value measurements that fall in either Level 2 or Level 3. The new disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, except for the Level 3 activity disclosures, which are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The enhanced disclosure requirements have not had a material impact on the Company's financial reporting.

NOTE 7 – DERIVATIVE FINANCIAL INSTRUMENTS

We record derivative financial instruments in the balance sheet as either an asset or liability at fair value based on the active market in which the derivative financial instrument is traded, with classification as current or long-term depending on the duration of the instrument.

Changes in the derivative instrument's fair value must be recognized currently in earnings unless specific hedge accounting criteria are met. For cash flow hedges that meet the criteria, the derivative instrument's gains and losses, to the extent effective, are recognized in accumulated other comprehensive income and reclassified into earnings in the same period during which the hedged transaction affects earnings.

On February 6, 2009, we entered into a $10.0 million interest rate swap agreement with an effective date of February 19, 2009. The rate on the swap is fixed at 1.57% until February 19, 2011. The interest rate swap agreement is being accounted for as a cash flow hedge, the fair value of this liability at June 30, 2010, was approximately $0.09 million and it is included in accrued expenses in the accompanying consolidated balance sheet.

On May 25, 2010, we entered into a contract to hedge approximately 0.5 million gallons of diesel fuel per month for the time period of July 2010 through June 2012. Under this agreement, we pay a fixed rate per gallon of heating oil and receive the monthly average price of NYMEX HO heating oil. As diesel fuel is not a traded commodity on the futures market, heating oil is used as a substitute for diesel fuel as prices for both generally move in similar directions.

On June 28, 2010, the Company sold its contract related to the forecasted purchase of diesel fuel for the time period of July 2010 through June 2012 to lock in related gains. The purchase contract had not been designated as a hedge; therefore, the related gain was recorded as a reduction in fuel expense of approximately $1.2 million on a pre-tax basis and on a net of tax basis of approximately $0.7 million or $0.07 per share.

NOTE 8 – COMPREHENSIVE INCOME (LOSS)

Comprehensive income (loss) was comprised of net loss plus the market value adjustment on our interest rate swap that will expire on February 19, 2011, which is designated as a cash flow hedge. Comprehensive income (loss) consisted of the following components:

	(in thousands)			
	Three Months Ended June 30, 2010	Three Months Ended June 30, 2009	Six Months Ended June 30, 2010	Six Months Ended June 30, 2009
Net income (loss)	$ 900	$ (1,148)	$ (2,096)	$ (3,028)
Change in fair value of interest rate swap, with no effect on income taxes for the three months ended June 30, 2010 and net of income tax of $1 for the three months ended June 30, 2009, and net of income tax benefit of $(14) for the six months ended June 30, 2010 and $(44) for the six months ended June 30, 2009	(1)	1	(22)	(70)
Reclassification of derivative net losses to statement of operations, net of income tax of $12 for the three months ended June 30, 2010 and $9 for the three months ended June 30, 2009, and net of income tax of $25 for the six months ended June 30, 2010 and $48 for the six months ended June 30, 2009	19	14	40	77
	$ 918	$ (1,133)	$ (2,078)	(3,021)

Total comprehensive income (loss)

Fair Value Measurements

	(in thousands)			
	Total Fair Value Assets (Liabilities) at June 30, 2010	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Derivative Liabilities	$ (43)	$ --	$ (43)	$ --

The fair value of derivatives, consisting entirely of interest rate swaps as discussed above, is calculated using proprietary models utilizing observable inputs as well as future assumptions related to interest rates and other applicable variables. These calculations are performed by the financial institutions that are counterparties to the applicable swap agreements and reported to the Company on a monthly basis. The Company uses these reported fair values to adjust the asset or liability as appropriate. The Company evaluates the reasonableness of the calculations by comparing the yield curve from other sources for the applicable period.

NOTE 9 – ACCRUED EXPENSES

Accrued expenses consisted of the following:

	(in thousands)			
	June 30, 2010		December 31, 2009	
Salaries, wages and employee benefits	$	5,234	$	3,966
Other (1)		5,793		5,042
Total accrued expenses	$	11,027	$	9,008

(1) As of June 30, 2010 and December 31, 2009, no single item included within other accrued expenses exceeded 5.0% of our total current liabilities.

NOTE 10 – NOTE PAYABLE

At June 30, 2010 and December 31, 2009, we had an unsecured note payable of $0.3 million and $1.0 million, respectively. The note, which is payable in monthly installments of principal and interest of approximately $114,400, is scheduled to mature on September 1, 2010, and bears an interest rate of 3.4%. The note payable is being used to finance a portion of the Company's annual insurance premiums.

NOTE 11 – LONG-TERM DEBT

Long-term debt consisted of the following:

	(in thousands)			
	June 30, 2010		December 31, 2009	
Revolving credit agreement (1)	$	56,300	$	46,718
Capitalized lease obligations (2)		52,974		55,859
		109,274		102,577
Less current maturities		(17,232)		(63,461)
Long-term debt and capital leases, less current maturities	$	92,042	$	39,116

(1) On April 19, 2010, we entered into a new Credit Agreement with Branch Banking and Trust Company as Administrative Agent, which replaced our Amended and Restated Senior Credit Facility scheduled to mature on September 1, 2010. The Credit Agreement provides for available borrowings of up to $100.0 million, including letters of credit not to exceed $25.0 million. Availability may be reduced by a borrowing base limit as defined in the Credit Agreement. The Credit Agreement provides an accordion feature allowing us to increase the maximum borrowing amount by up to an additional $75.0 million in the aggregate in one or more increases, subject to certain conditions. The Credit Agreement bears variable interest based on the type of borrowing and on the Administrative Agent's prime rate or the London Interbank Offered Rate plus a certain percentage, which is determined based on our attainment of certain financial ratios. A quarterly commitment fee is payable on the

unused portion of the credit line and bears a rate which is determined based on our attainment of certain financial ratios. The obligations of the Company under the Credit Agreement are guaranteed by the Company and secured by a pledge of substantially all of the Company's assets with the exception of real estate. The Credit Agreement includes usual and customary events of default for a facility of this nature and provides that, upon the occurrence and continuation of an event of default, payment of all amounts payable under the Credit Agreement may be accelerated, and the lenders' commitments may be terminated. The Credit Agreement contains certain restrictions and covenants relating to, among other things, dividends, liens, acquisitions and dispositions outside of the ordinary course of business, and affiliate transactions. The new Credit Agreement will expire on April 19, 2014.

Borrowings under the Credit Agreement are classified as either "base rate loans" or "LIBOR loans." Base rate loans accrue interest at a base rate equal to the Administrative Agent's prime rate plus an applicable margin that is adjusted quarterly between 0.0% and 1.0%, based on the Company's leverage ratio. LIBOR loans accrue interest at LIBOR plus an applicable margin that is adjusted quarterly between 2.00% and 3.25% based on the Company's leverage ratio. On a per annum basis, the Company must pay a fee on the unused amount of the revolving credit facility of between 0.25% and 0.375% based on the Company's leverage ratio, and it must pay an annual administrative fee to the Administrative Agent of 0.03% of the total commitments.

The interest rate on our overnight borrowings under the Credit Agreement at June 30, 2010 was 3.5%. The interest rate including all borrowings made under the Credit Agreement at June 30, 2010 was 3.0%. The interest rate on the Company's borrowings under the agreements for the six months ended June 30, 2010 was 2.3%. A quarterly commitment fee is payable on the unused portion of the credit line and bears a rate which is determined based on our attainment of certain financial ratios. At June 30, 2010, the rate was 0.25% per annum. The Credit Agreement is collateralized by revenue equipment having a net book value of $177.0 million at June 30, 2010, and all trade and other accounts receivable. The Credit Agreement requires us to meet certain financial covenants and to maintain a minimum tangible net worth of approximately $105.8 million at June 30, 2010. We were in compliance with these covenants at June 30, 2010. The covenants would prohibit the payment of dividends by us if such payment would cause us to be in violation of any of the covenants. As the Company recently refinanced its debt in April 2010, the borrowings under the Credit Agreement approximate its fair value.

(2) Our capitalized lease obligations have various termination dates extending through March 2013 and contain renewal or fixed price purchase options. The effective interest rates on the leases range from 3.2% to 4.8% at June 30, 2010. The lease agreements require us to pay property taxes, maintenance and operating expenses.

NOTE 12 – LEASES AND COMMITMENTS

The Company leases certain revenue equipment under capital leases with terms of 42 or 45 months. At June 30, 2010, property and equipment included capitalized leases, which had capitalized costs of $73.9 million, accumulated amortization of $20.9 million and a net book value of $53.0 million. At December 31, 2009, property and equipment included capitalized leases, which had capitalized costs of $72.8 million, accumulated amortization of $17.0 million and a net book value of $55.8 million. Amortization of leased assets is included in depreciation and amortization expense and totaled $5.7 million for the six months ended June 30, 2010, and $5.9 million for the six months ended June 30, 2009.

We have entered into leases with lenders who participated in our Amended and Restated Senior Credit Facility and who participate in the Credit Agreement we entered into on April 19, 2010. Those leases contain cross-default provisions with the Facility and the new Credit Agreement, which replaced that Facility. We have also entered into leases with other lenders who do not participate in our Credit Agreement. Multiple leases with lenders who do not participate in our Credit Agreement generally contain cross-default provisions.

We routinely monitor our equipment acquisition needs and adjust our purchase schedule from time to time based on our analysis of factors such as new equipment prices, the condition of the used equipment market, demand for our freight services, prevailing interest rates, technological improvements, fuel efficiency, equipment durability, equipment specifications and the availability of qualified drivers.

As of June 30, 2010, we had commitments for purchases of revenue equipment in the aggregate amount of approximately $1.5 million for the remainder of 2010, none of which is cancelable by us upon advance written notice.

NOTE 13 – INCOME TAXES

During the three months ended June 30, 2010 and 2009, our effective tax rates were 54.2% and 12.1%, respectively. During the six months ended June 30, 2010 and 2009, our effective tax rates were 10.9% and 20.3%, respectively. Income tax expense varies from the amount computed by applying the statutory federal tax rate to income before income taxes primarily due to state income taxes, net of federal income tax effect, adjusted for permanent differences, the most significant of which is the effect of the per diem pay structure for drivers. Drivers may elect to receive non-taxable per diem pay in lieu of a portion of their taxable wages. This per diem program increases our drivers' net pay per mile, after taxes, while decreasing gross pay, before taxes. As a result, salaries, wages and employee benefits are slightly lower, and our effective income tax rate is higher than the statutory

rate. Generally, as pre-tax income increases, the impact of the driver per diem program on our effective tax rate decreases because aggregate per diem pay becomes smaller in relation to pre-tax income. Due to the partially nondeductible effect of per diem pay, our tax rate will fluctuate in future periods based on fluctuations in earnings and in the number of drivers who elect to receive this pay structure.

We account for any uncertainty in income taxes by determining whether it is more likely than not that a tax position we have taken in a tax return will be sustained upon examination by the appropriate taxing authority based on the technical merits of the position. In that regard, we have analyzed filing positions in our federal and applicable state tax returns as well as in all open tax years. The only periods subject to examination for our federal returns are the 2007, 2008 and 2009 tax years. We believe that our income tax filing positions and deductions will be sustained on audit and do not anticipate any adjustments that will result in a material change to our consolidated financial position, results of operations and cash flows. In conjunction with the above, our policy is to recognize interest related to unrecognized tax benefits as interest expense and penalties as operating expenses. We have not recorded any unrecognized tax benefits through June 30, 2010.

NOTE 14 – CHANGE IN ACCOUNTING ESTIMATE

Effective April 1, 2009, we changed our method of accounting for tires. Commencing when the tires, including recaps, are placed into service, we account for them as prepaid expenses and amortize their cost over varying time periods, ranging from 18 to 30 months, depending on the type of tire. Prior to April 1, 2009, the cost of tires was fully expensed when they were placed into service. We believe the new accounting method more appropriately matches the tire costs to the period during which the tire is being used to generate revenue. For the three and six months ended June 30, 2010, this change in estimate effected by a change in principle resulted in a reduction of operations and maintenance expense on a pre-tax basis of approximately $1.8 million and $2.7 million, respectively, and on a net of tax basis of approximately $1.1 million ($0.11 per share) and $1.7 million ($0.16 per share), respectively. For the three and six month periods ended June 30, 2009, this change in estimate effected by a change in principle resulted in a reduction of operations and maintenance expense on a pre-tax basis of approximately $1.4 million and on a net of tax basis of approximately $0.9 million ($0.08 per share).

NOTE 15 – EARNINGS (LOSS) PER SHARE

Basic earnings (loss) per share is computed based on the weighted average number of shares of Common Stock outstanding during the period. Diluted earnings (loss) per share is computed by adjusting the weighted average number of shares of Common Stock outstanding by Common Stock equivalents attributable to dilutive stock options and restricted stock. The computation of diluted loss per share does not assume conversion, exercise, or contingent issuance of securities that would have an antidilutive effect on loss per share. The Company is correcting the Diluted share count for the quarter ended June 30, 2010 to 10,320 from 10,405 (in thousands) noted in the Company's second quarter earnings release.

The following table sets forth the computation of basic and diluted earnings (loss) per share:

	(in thousands, except per share amounts)			
	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Numerator:				
Net income (loss)	$ 900	$ (1,148)	$ (2,096)	$ (3,028)
Denominator:				
Denominator for basic earnings (loss) per share – weighted average shares	10,293	10,230	10,287	10,222
Effect of dilutive securities:				
Employee stock options and restricted stock	27	--	--	--
Denominator for diluted earnings (loss) per share – adjusted weighted average shares and assumed conversions	10,320	10,230	10,287	10,222
Basic earnings (loss) per share	$ 0.09	$ (0.11)	$ (0.20)	$ (0.30)
Diluted earnings (loss) per share	$ 0.09	$ (0.11)	$ (0.20)	$ (0.30)
Weighted average anti-dilutive employee stock options and restricted stock	95	116	128	112

NOTE 16 – LITIGATION

We are party to routine litigation incidental to our business, primarily involving claims for personal injury and property damage incurred in the transportation of freight. We maintain insurance to cover liabilities in excess of certain self-insured retention levels. Though management believes these claims to be routine and immaterial to our long-term financial position, adverse results of one or more of these claims could have a material adverse effect on our financial position or results of operations in any given reporting period.

ITEM 2.MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended. These statements generally may be identified by their use of terms or phrases such as "expects," "estimates," "anticipates," "projects," "believes," "plans," "in "may," "will," "should," "could," "potential," "continue," "future," and terms or phrases of similar substance. Forward-l statements are based upon the current beliefs and expectations of our management and are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified, which could cause future events and actual results to differ materially from those set forth in, contemplated by, or underlying the forward-looking statements. Accordingly, actual results may differ from those set forth in the forward-looking statements. Readers should review and consider the factors that may affect future results and other disclosures by the Company in its press releases, Annual Report on Form 10-K and other filings with the Securities and Exchange Commission. Additional risks associated with our operations are discussed in our Annual Report on Form 10-K for the year ended December 31, 2009 under the heading "Risk Factors" in Item 1A of that report and updates, if any, to that information are included in Item 1A of Part II of this report. We disclaim any obligation to update or revise any forward-looking statements to reflect actual results or changes in the factors affecting the forward-looking information. In light of these risks and uncertainties, the forward-looking events and circumstances discussed in this report might not occur.

All forward-looking statements attributable to us, or persons acting on our behalf, are expressly qualified in their entirety by this cautionary statement.

References to the "Company," "we," "us," "our" and words of similar import refer to USA Truck, Inc. and its subsidiary.

The following discussion should be read in conjunction with our consolidated financial statements and notes thereto and other financial information that appears elsewhere in this report.

Overview

The following Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to help the reader understand USA Truck, Inc., our operations and our present business environment. MD&A is provided as a supplement to, and should be read in conjunction with, our consolidated financial statements and notes thereto and other financial information that appears elsewhere in this report. This overview summarizes the MD&A, which includes the following sections:

Our Business – a general description of our business, the organization of our operations and the service offerings that comprise our operations.

Results of Operations – an analysis of our consolidated results of operations for the periods presented in our consolidated financial statements and a discussion of seasonality, the potential impact of inflation and fuel availability and cost.

Off-Balance Sheet Arrangements – a discussion of significant financial arrangements, if any, that are not reflected on our balance sheet.

Liquidity and Capital Resources – an analysis of cash flows, sources and uses of cash, debt, equity and contractual obligations.

Critical Accounting Estimates – a discussion of accounting policies that require critical judgment and estimates.

Our Business

We operate in the for-hire truckload segment of the trucking industry. Customers in a variety of industries engage us to haul truckload quantities of freight, with the trailer we use to haul that freight being assigned exclusively to that customer's freight until delivery. Our business is classified into three operating segments: our Trucking operating segment consisting primarily of our General Freight and Dedicated Freight service offerings; our Strategic Capacity Solutions operating segment consisting entirely of our freight brokerage service offering; and our rail Intermodal operating segment. We previously included the results of our freight brokerage and Container-on-Flat-Car ("COFC") portion of our rail Intermodal service offering in our Strategic Capacity Solutions operating segment. The Trailer-on-Flat-Car ("TOFC") portion of our rail Intermodal service offering was classified within our Trucking operating segment. COFC and TOFC are now combined and reported as Intermodal and brokerage is now reported as Strategic Capacity Solutions. Strategic Capacity Solutions and Intermodal are reported as separate operating segments. These three operating segments are aggregated into one segment for financial reporting purposes.

Our Strategic Capacity Solutions and Intermodal operating segments are intended to provide services which complement our Trucking services, primarily to existing customers of our Trucking operating segment. A majority of the customers using our Strategic Capacity Solutions and Intermodal services are also customers of our Trucking operating segment. Both our Strategic Capacity Solutions and Intermodal operating segments, while making significant contributions to our business, represents a relatively small portion of our revenue.

Substantially all of our base revenue from the three operating segments is generated by transporting, or arranging for the transportation of, freight for customers and is predominantly affected by the rates per mile received from our customers and similar operating costs. For the three and six months ended June 30, 2010, Trucking base revenue represented 88.1% and 89.2% of base revenue, respectively, with the remaining base revenue being generated through Strategic Capacity Solutions and Intermodal. For the three and six months ended June 30, 2009, Trucking base revenue represented 93.9% and 94.4% of base revenue, respectively, with the remaining base revenue being generated through Strategic Capacity Solutions and Intermodal.

We generally charge customers for our services on a per-mile basis. The expenses which have a major impact on our profitability are the variable costs of transporting freight for our customers. The variable costs include fuel expense, insurance and claims and driver-related expenses, such as wages and benefits.

Trucking. Trucking includes the following primary service offerings provided to our customers:

- General Freight. Our General Freight service offering provides truckload freight services as a short- to medium-haul common carrier. We have provided General Freight services since our inception and we derive the largest portion of our revenue from these services.

- Dedicated Freight. Our Dedicated Freight service offering is a variation of our General Freight service, whereby we agree to make our equipment and drivers available to a specific customer for shipments over particular routes at specified times. In addition to serving specific customer needs, our Dedicated Freight service offering also aids in driver recruitment and retention.

Strategic Capacity Solutions. Our Strategic Capacity Solutions consists entirely of our freight brokerage service offering which matches customer shipments with available equipment of authorized carriers.

Intermodal. Our rail Intermodal service offering provides our customers cost savings over General Freight with a slightly slower transit speed, while allowing us to reposition our equipment to maximize our freight network yield.

Results of Operations

Executive Overview

We made solid year-over-year progress this quarter and dramatically improved our performance sequentially from the first quarter this year. Through disciplined execution of our long-term strategic plan, VEVA (Vision for Economic Value Added), and aided by an improving operating environment and the sale of a fuel contract, we achieved our near-term goal of returning to profitability by the second quarter 2010.

Our employees, particularly our professional drivers, have faced many challenges over the past two years, and we are deeply proud of the work ethic and resilience they have displayed in our return to profitability. Through their efforts, we posted year-over-year improvements in practically every area of our operations including miles per tractor per week (+4.3%), Trucking base revenue per total mile (+6.1%), Spider Web lane compliance (+12.0 percentage points), empty mile factor (down 11.3%), insurance and claims expense (down 100 basis points), Strategic Capacity Solutions base revenue (+171.2%) and Intermodal base revenue (+53.8%).

Though improved year-over-year, our tractor utilization (miles per tractor per week) remains below our expectations. The single largest contributor to our utilization shortfall was our unmanned tractor count (6.5% of the fleet during the quarter) resulting from a substantially tighter market for hiring qualified drivers. Also hampering utilization were an overall lack of lane density that often positioned our tractors in the wrong markets, and excessive freight volumes in the Northeast U.S. where maintaining high tractor utilization is inherently difficult. Between enhancing our recruiting and retention efforts and continuing to build Spider Web lane compliance, we expect continued utilization improvement if the freight markets maintain an upward trend.

Our tractors and trailers are still young by industry standards (2.4 and 5.4 years, respectively), but have higher mileage than we prefer. The result is our maintenance costs per mile increased by approximately 100 basis points year-over-year. Also, after several years of improving fuel economy, we are now experiencing year-over-year declines due to the higher mileage on this equipment.

While our Trucking base revenue per mile has steadily improved over the past few years, we are still below the targets we have established for our freight network. Several years of declining industry freight prices have taken their toll. We do not believe we are being adequately compensated for our services, particularly in the face of higher operating costs (tractor and trailer prices, toll charges, taxes, health insurance, etc.).

Moving forward, we intend to remain disciplined in the execution of our VEVA plan. We will not be distracted by the pursuit of short-term, but unsustainable, profits when such an extraordinary opportunity lies before us to build a model we believe is capable of producing superior long-term returns for our shareholders. As such, our priorities for the remainder of 2010 are as follows:

- Continue to build our Spider Web freight network. During the quarter, Spider Web freight network lanes, on average, yielded approximately $0.30 more in rate per loaded mile than our legacy network lanes. Only 45.8% of our freight moved in Spider Web lanes during the quarter (compared to 33.8% in the second quarter 2009).

- Improve tractor utilization. We are already working on specific plans to improve our tractor utilization by deploying more of our unmanned tractors into service, by redirecting our capacity away from the congested Northeast U.S. and by building Spider Web lane density. We expect these efforts will provide our customers with additional capacity where they need it most.

- Reduce maintenance costs by lowering the fleet age. Between July and October 2010, we plan to place in-service approximately 285 new tractors (with pre-2010 emission engines) that were purchased, and included on our balance sheet, during the first half of this year. We also intend to purchase an additional 300-500 new tractors to be placed in-service between November 2010 and May 2011. Each of these new tractors will be offset by the corresponding sale of an old truck from our active fleet. The net result will be zero fleet growth, but a declining average age of tractors. We expect the reduced age to have a positive effect on our maintenance costs in 2011, though maintenance costs will likely climb sequentially over the next few quarters. Despite the capital expenditures this undertaking requires, we expect to produce positive free cash flow (net cash flow from operations less net cash used in investing activities) over the next twelve months (even at a very modest level of profitability).

- Increase freight network yield. We are reviewing the lowest yielding lanes within our freight network and taking proactive steps to improve their pricing and operational characteristics in order to achieve an acceptable level of profitability. We expect to continue this yield management activity until we are generating acceptable rates of return on our invested capital.

- Continue growing our asset-light business. Finally, we expect continued aggressive, but controlled and profitable, growth within our Strategic Capacity Solutions and Intermodal operating segments. In a tightening capacity environment, we believe it is essential to offer our customers flexible sources of capacity to fulfill their transportation needs. During the quarter, base revenue from our asset-light services more than doubled (+128.5%), and was a much more significant part of our business at 11.9% of our total base revenue compared to just 6.1% in the second quarter of 2009.

These priorities reflect our outlook for industry conditions, which are presently characterized by a considerable shortage of capacity. This tight capacity environment has been growing steadily tighter since mid-February when we believe freight demand experienced a systemic improvement as businesses began to restock inventory in response to unsustainably low inventory levels. However, stubbornly low inventory-to-sales ratios suggest that such buying is merely replenishing sales and not rebuilding inventory levels. So, although we do not describe today's freight volumes as robust, they are substantially better than 2009 levels. We believe this incremental improvement has revealed the dramatic exodus of trucking capacity over the past several years. The result is a tight capacity environment that we expect may only grow tighter when the world economy returns to normal growth rates and when new government regulations (such as the Department of Transportation’s Comprehensive Safety Analysis 2010, a wide-ranging performance based safety initiative) reduce the number of employable truck drivers. We believe those eventualities coupled with long-term demographic trends reducing the population of qualified truck drivers and lack of Class 8 tractor builds over the past few years will converge to create an extended period of tight capacity in the industry.

Note Regarding Presentation

By agreement with our customers, and consistent with industry practice, we add a graduated surcharge to the rates we charge our customers as diesel fuel prices increase above an agreed-upon baseline price per gallon. The surcharge is designed to approximately offset increases in fuel costs above the baseline. Fuel prices are volatile, and the fuel surcharge increases our revenue at different rates for each period. We believe that comparing operating costs and expenses to total revenue, including the fuel surcharge, could provide a distorted comparison of our operating performance, particularly when comparing results for current and prior periods. Therefore, we have used base revenue, which excludes the fuel surcharge revenue, and instead taken the fuel surcharge as a credit against the fuel

and fuel taxes and purchased transportation line items in the table setting forth the percentage relationship of certain items to base revenue below.

We do not believe that a reconciliation of the information presented on this basis and corresponding information comparing operating costs and expenses to total revenue would be meaningful. Data regarding both total revenue, which includes the fuel surcharge, and base revenue, which excludes the fuel surcharge, is included in the Consolidated Statements of Operations included in this report.

Base revenue from our Strategic Capacity Solutions and Intermodal operating segments have fluctuated in recent periods. These services typically do not involve the use of our tractors and trailers. Therefore, an increase in revenue from these operating segments tends to cause expenses related to our operations that do involve our equipment—including fuel expense, depreciation and amortization expense, operations and maintenance expense, salaries, wages and employee benefits and insurance and claims expense—to decrease as a percentage of base revenue. Likewise, a decrease in revenue from these operating segments tends to cause those expenses to increase as a percentage of base revenue with a related increase in purchased transportation expense. Since changes in revenue from these operating segments generally affect all such expenses, as a percentage of base revenue, we do not specifically mention it as a factor in our discussion of increases or decreases in those expenses in the period-to-period comparisons below. Base revenue from our Strategic Capacity Solutions operating segment increased approximately 171.2% and 154.1% for the three and six month periods ended June 30, 2010, compared to the same periods of the prior year. Base revenue from our Intermodal operating segment increased approximately 53.8% and 49.6% for the three and six month periods ended June 30, 2010, compared to the same periods of the prior year.

Relationship of Certain Items to Base Revenue

The following table sets forth the percentage relationship of certain items to base revenue, for the periods indicated. The period-to-period comparisons below should be read in conjunction with this table and our Consolidated Statements of Operations and accompanying notes.

	Three Months Ended June 30,				Six Months Ended June 30,			
	2010		2009		2010		2009	
Base revenue	100.0	%	100.0	%	100.0	%	100.0	%
Operating expenses and costs:								
Salaries, wages and employee benefits	33.8		38.1		35.5		38.9	
Fuel and fuel taxes (1)	11.1		13.3		13.8		12.9	
Purchased transportation (2)	17.8		12.5		16.1		11.9	
Depreciation and amortization	12.8		15.0		13.4		15.1	
Operations and maintenance	8.8		7.6		8.7		8.3	
Insurance and claims	5.8		6.8		6.3		6.8	
Operating taxes and licenses	1.4		1.8		1.4		1.9	
Communications and utilities	1.1		1.2		1.1		1.2	
Gain on disposal of revenue equipment, net	--		--		--		--	
Other	4.2		4.4		4.0		4.4	
Total operating expenses and costs	96.8		100.7		100.3		101.4	
Operating income (loss)	3.2		(0.7)		(0.3)		(1.4)	
Other expenses (income):								
Interest expense	1.0		0.9		0.9		0.9

Net income (loss)	0.9	%	(1.4)	%	(1.1)	%	(1.8)	%

(1) Net of fuel surcharge revenue from Trucking operating segment.

(2) Net of fuel surcharge revenue from Strategic Capacity Solutions and Intermodal operating segments.

Three Months Ended June 30, 2010 Compared to Three Months Ended June 30, 2009

Results of Operations – Combined Services

Our base revenue increased 16.8% from $81.2 million to $94.9 million; see each operating segment's section below for the explanation.

Net income for all service offerings was $0.9 million for the three months ended June 30, 2010, as compared to a net loss of $1.1 million for the same period of 2009.

Overall, our operating ratio improved by 3.9 percentage points of base revenue to 96.8% because of the following factors:

- Salaries, wages and employee benefits decreased by 4.3 percentage points of base revenue due in large part to a 128.5% increase in non-trucking revenue, a 10.7% increase in Trucking base revenue per tractor per week and to a

lesser extent a decrease of 8.4% in uncompensated miles (empty miles). If our Strategic Capacity Solutions and Intermodal revenue continues to increase, we would expect salaries, wages and employee benefits to continue to decrease as a percentage of base revenue absent offsetting increases in those expenses.

- Fuel and fuel taxes decreased by 2.2 percentage points of base revenue, led by a $1.2 million gain recognized on the sale of a fuel contract which was recorded as a reduction in fuel expense. On May 25, 2010 we entered into an agreement to purchase 0.5 million gallons of diesel fuel per month for the time period of July 2010 through June 2012 as a hedge against the price of diesel fuel. On June 28, 2010 we sold the contract to lock in the related gains, which resulted in a net of tax gain of $0.07 per share. Fuel prices increased 23.4% per gallon and our fuel economy decreased 1.3% due in part to our higher mileage equipment. This was partially offset by the above-mentioned increase in non-trucking revenue. Fuel costs may continue to be affected in the future by price fluctuations, the terms and collectability of fuel surcharge revenue, the percentage of total miles driven by owner operators, the diversification of our business model into less asset-intensive operations and fuel efficiency.

- Purchased transportation, which is comprised of owner-operator compensation and fees paid to external transportation providers such as railroads, drayage carriers, broker carriers and Mexican carriers, increased by 5.3 percentage points of base revenue led by a 130.4% increase in carrier expense associated with our Strategic Capacity Solutions and Intermodal revenue growth and a 35.5% increase in owner-operator expense in our Trucking segment. This increase in owner-operator expense was the result of an 18.4% increase in owner-operators, partially offset by a 3.3% increase in total revenue miles. We expect this expense would continue to increase when compared to prior periods if we achieve our long-term goals to increase the revenue of our Strategic Capacity Solutions and Intermodal operating segments and grow our owner-operator fleet.

- Depreciation and amortization decreased 2.2 percentage points of base revenue due to the above-mentioned increase in Trucking base revenue per tractor per week and an increase in the percentage of our fleet comprised of owner-operators. Prices for new tractors have risen in recent years due to Environmental Protection Agency mandates on engine emissions, and they are expected to increase with the introduction of the 2010 emission standards. Depreciation and amortization expense may be affected in the future as equipment manufacturers increase prices.

- Operations and maintenance expense increased 1.2 percentage points of base revenue primarily due to a 24.7% increase in direct repair costs related to our higher mileage equipment and a 41.9% increase in tolls and weight tickets. Toll expense has increased as a result of our excessive freight volumes in the Northeast U.S. where toll roads are more prevalent. These increases were partially offset by the above mentioned increase in Trucking base revenue per tractor per week and purchased transportation. On April 1, 2009, we changed our method of accounting for tires; this change in estimate affected by a change in principle resulted in a reduction of operations and maintenance expense. For the three months ended June 30, 2010 and 2009, this reduction on a pre-tax basis was approximately $1.8 and $1.4 million, respectively, and on a net of tax basis of approximately $1.1 million ($0.11 per share) and $0.9 million ($0.08 per share), respectively.

- Insurance and claims expense decreased 1.0 percentage point of base revenue as we have seen a reduction in the severity of motor vehicle accidents. This reduction combined with the continuing education of our drivers regarding accident prevention contributed to a decrease in our bodily injury and property damage claims and worker compensation claims. This was partially offset by a 41.7% increase in collision expense related to late spring snows and flooding. If we are able to continue to successfully execute our “War on Accidents” safety initiative, we would expect insurance and claims expense to gradually decrease over the long term, though remaining volatile from period-to-period.

- Operating taxes and licenses expense decreased 0.4 percentage points of base revenue primarily due to a 2.3% decrease in Company-owned tractors.

- Our effective tax rate increased from 12.1% in the second quarter of 2009 to 54.2% for the same period of 2010. Income tax expense varies from the amount computed by applying the federal tax rate to income before income taxes primarily due to state income taxes, net of federal income tax effect, adjusted for permanent

differences, the most significant of which is the effect of the per diem pay structure for drivers. Due to the partially nondeductible effect of per diem payments, our tax rate will vary in future periods based on fluctuations in earnings and in the number of drivers who elect to receive this pay structure.

Results of Operations – Trucking

Key Operating Statistics:

	Three Months Ended June 30,	
	2010	2009
Total miles (in thousands) (1)	60,624	58,705
Empty mile factor (2)	9.6%	10.8%
Weighted average number of tractors (3)	2,331	2,354
Average miles per tractor per period	26,008	24,938
Average miles per tractor per week	2,001	1,918
Average miles per trip (4)(5)	539	599
Base Trucking revenue per tractor per week (5)	$ 2,759	$ 2,493
Number of tractors at end of period (3)	2,331	2,325
Operating ratio (6)	96.8%	100.7%

(1) Total miles include both loaded and empty miles.

(2) The empty mile factor is the number of miles traveled for which we are not typically compensated by any customer as a percent of total miles traveled.

(3) Tractors include Company-operated tractors in-service plus owner-operator tractors.

(4) Average miles per trip is based upon loaded miles divided by the number of Trucking shipments.

(5) Our Trailer-on-Flat-Car rail Intermodal service offering was previously included in our Trucking operating segment. Container-on-Flat-Car rail Intermodal and Trailer-on-Flat-Car rail Intermodal are now combined and reported as Intermodal. Because of this reclassification, previously reported amounts for average miles per trip and base Trucking revenue per tractor per week have been recalculated excluding Trailer-on-Flat-Car rail Intermodal from Trucking.

(6) Operating ratio is based upon total operating expenses, net of fuel surcharge revenue, as a percentage of base revenue.

Base
Revenue

Base revenue from our Trucking operating segment increased by 9.6% to $83.6 million from $76.3 million.

Overall, the weighted average size of our Trucking segment's tractor fleet decreased 1.0%. We reduced the weighted average size of the Company-owned tractor fleet by 2.3% to 2,151 tractors and grew our weighted average owner-operator fleet by 18.4% to 180 tractors.

We are committed to improving the pricing yield within our Trucking segment and have implemented Velocity and Yield Management initiatives to reach our goals. Consistent with that philosophy, we have continued to make improvements as we reduced our average length-of-haul by 10.0%, while increasing our velocity by 17.3% and our Trucking base revenue per mile by 6.1%.

Results of Operations – Strategic Capacity Solutions and Intermodal

Base revenue from Strategic Capacity Solutions increased 171.2% to $8.5 million from $3.1 million while base revenue from our Intermodal segment increased 53.8% to $2.8 million from $1.8 million. Overall, the base revenue growth for both our Strategic Capacity Solutions and our Intermodal operating segments can be attributed to our efforts to integrate and cross-sell these asset-light services with our traditional Trucking services. In addition, we are continuing to build our Strategic Capacity Solutions infrastructure by establishing and developing new branches across the United States.

Six Months Ended June 30, 2010 Compared to Six Months Ended June 30, 2009

Results of Operations – Combined Services

Our base revenue increased 12.2% from $164.1 million to $184.1 million; see each operating segment's section below for an explanation.

Net loss for all service offerings was $2.1 million for the six months ended June 30, 2010, as compared to a net loss of $3.0 million for the same period of 2009.

Overall, our operating ratio improved by 1.1 percentage points of base revenue to 100.3% because of the following factors:

- Salaries, wages and employee benefits decreased by 3.4 percentage points of base revenue due in large part to a 115.4% increase in non-trucking revenue, a 7.6% increase in Trucking base revenue per tractor per week and to a lesser extent a decrease of 10.0% in uncompensated miles (empty miles). If our Strategic Capacity Solutions and Intermodal revenue continues to increase, we would expect salaries, wages and employee benefits to continue to decrease as a percentage of base revenue absent offsetting increases in those expenses.

- Fuel and fuel taxes increased by 0.9 percentage points of base revenue despite an improvement in our fuel surcharge recovery per gallon compared to the prior year. Fuel prices increased 29.8% per gallon and our fuel economy decreased 1.0% due to the harsh winter weather experienced in the first quarter of 2010 combined with our higher mileage equipment. These increases were partially offset by a $1.2 million gain recognized on the sale of a fuel contract during the second quarter which was recorded as a reduction of fuel expense. On May 25, 2010 we entered into an agreement to purchase 0.5 million gallons of diesel fuel per month for the time period of July 2010 through June 2012 as a hedge against the price of diesel fuel. On June 28, 2010 we sold the contract to lock in the related gains, which resulted in a net of tax gain of $0.07 per share. This was partially offset by the above-mentioned increase in non-trucking revenue. Fuel costs may continue to be affected in the future by price fluctuations, the terms and collectability of fuel surcharge revenue, the percentage of total miles driven by owner operators, the diversification of our business model into less asset-intensive operations and fuel efficiency.

- Purchased transportation, which is comprised of owner-operator compensation and fees paid to external transportation providers such as railroads, drayage carriers, broker carriers and Mexican carriers, increased by 4.2 percentage points of base revenue due primarily to a 129.0% increase in carrier expense associated with our Strategic Capacity Solutions and Intermodal operating segment revenue growth. We expect this expense would continue to increase when compared to prior periods if we can achieve our long-term goals to increase the revenue of our Strategic Capacity Solutions and Intermodal operating segments and grow our owner-operator fleet.

- Depreciation and amortization decreased 1.7 percentage points of base revenue due to the above-mentioned increase in Trucking base revenue per tractor per week and an increase in the percentage of our fleet comprised of owner-operators. Prices for new tractors have risen in recent years due to Environmental Protection Agency mandates on engine emissions, and they are expected to increase with the introduction of the 2010 emission standards. Depreciation and amortization expense may be affected in the future as equipment manufacturers increase prices.

- Operations and maintenance expense increased 0.4 percentage points of base revenue primarily due to our higher mileage equipment and a 41.4% increase in tolls and weight tickets, partially offset by the above-mentioned increase in Trucking base revenue per tractor per week and purchased transportation. Toll expense has increased as a result of our excessive freight volumes in the Northeast U.S. where toll roads are more prevalent. On April 1, 2009, we changed our method of accounting for tires; this change in estimate affected by a change in principle resulted in a reduction of operations and maintenance expense. For the six months ended June 30, 2010 and 2009, this resulted in a reduction of operations and maintenance expense on a pre-tax basis of approximately $2.7 and $1.4 million, respectively, and on a net of tax basis of approximately $1.7 million ($0.16 per share) and $0.9 million ($0.08 per share), respectively.

- Insurance and claims expense decreased 0.5 percentage points of base revenue as we have seen a reduction in the severity of motor vehicle accidents which, in effect, has contributed to a decrease in bodily injury and property damage claims and worker compensation claims. Also having a positive impact has been the continuing education of our drivers regarding accident prevention. If we are able to continue to successfully execute our "War on Accidents" safety initiative, we would expect insurance and claims expense to gradually decrease over the long term, though remaining volatile from period-to-period.

-

Operating taxes and licenses expense decreased 0.5 percentage points of base revenue primarily due to a 2.4% decrease in Company-owned tractors.

- Other expense decreased 0.4 percentage points of base revenue due to cost controls implemented in several areas of the Company and a reduction in software conversion costs.

- Our effective tax rate decreased from 20.3% in 2009 to 10.9% in 2010. Income tax expense varies from the amount computed by applying the federal tax rate to income before income taxes primarily due to state income taxes, net of federal income tax effect, adjusted for permanent differences, the most significant of which is the effect of the per diem pay structure for drivers. Due to the partially nondeductible effect of per diem payments, our tax rate will vary in future periods based on fluctuations in earnings and in the number of drivers who elect to receive this pay structure.

Results of Operations – Trucking

Key Operating Statistics:

	Six Months Ended June 30,	
	2010	2009
Total miles (in thousands) (1)	122,105	120,322
Empty mile factor (2)	9.9%	11.2%
Weighted average number of tractors (3)	2,338	2,370
Average miles per tractor per period	52,226	50,769
Average miles per tractor per week	2,020	1,963
Average miles per trip (4)(5)	557	628
Base Trucking revenue per tractor per week (5)	$ 2,718	$ 2,527
Number of tractors at end of period (3)	2,331	2,325
Operating ratio (6)	100.3%	101.4%

(1) Total miles include both loaded and empty miles.

(2) The empty mile factor is the number of miles traveled for which we are not typically compensated by any customer as a percent of total miles traveled.

(3) Tractors include Company-operated tractors in-service plus owner-operator tractors.

(4) Average miles per trip is based upon loaded miles divided by the number of Trucking shipments.

(5) Our Trailer-on-Flat-Car rail Intermodal service offering was previously included in our Trucking operating segment. Container-on-Flat-Car rail Intermodal and Trailer-on-Flat-Car rail Intermodal are now combined and reported as Intermodal. Because of this reclassification, previously reported amounts for average miles per trip and base Trucking revenue per tractor per week have been recalculated excluding Trailer-on-Flat-Car rail Intermodal from Trucking.

(6) Operating ratio is based upon total operating expenses, net of fuel surcharge revenue, as a percentage of base revenue.

Base Revenue

Base revenue from our Trucking operating segment increased by 6.1% to $164.3 million from $154.9 million.

Overall, the weighted average size of our Trucking segment's tractor fleet decreased 1.4%. We have reduced the weighted average size of the Company-owned tractor fleet by 2.4% to 2,162 tractors and while we have grown our weighted average owner-operator fleet by 13.5% to 176 tractors.

We are committed to improving the pricing yield within our Trucking segment and have implemented Velocity and Yield Management initiatives to reach our goals. Consistent with that philosophy, we have continued to make improvements as we reduced our average length-of-haul by 11.3%, while increasing our velocity by 17.5% and our Trucking base revenue per mile by 4.6%.

Results of Operations – Strategic Capacity Solutions and Intermodal

Base revenue from our Strategic Capacity Solutions operating segment increased 154.1% to $14.7 million from $5.8 million while base revenue from our Intermodal operating segment increased 49.6% to $5.1 million from $3.4 million. Overall, the base revenue growth for both our Strategic Capacity Solutions and our Intermodal operating segments can be attributed to our efforts to integrate and cross-sell these asset-light services with our traditional Trucking services. In addition, we are continuing to build our Strategic Capacity Solutions infrastructure by establishing and developing new branches across the United States.

Seasonality

In the trucking industry, revenue generally decreases as customers reduce shipments during the winter holiday season and as inclement weather impedes operations. At the same time, operating expenses increase due primarily to decreased fuel efficiency and increased maintenance costs. Future revenue could be impacted if customers, particularly those with manufacturing operations, reduce shipments due to temporary plant closings. Historically, many of our customers have closed their plants for maintenance or other reasons during January and July.

Inflation

Most of our operating expenses are inflation sensitive, and we have not always been able to offset inflation-driven cost increases through increases in our revenue per mile and our cost control efforts. The effect of inflation-driven cost increases on our overall operating costs is not expected to be greater for us than for our competitors.

Fuel Availability and Cost

The motor carrier industry is dependent upon the availability of fuel. Fuel shortages or increases in fuel taxes or fuel costs have adversely affected our profitability and will continue to do so. Fuel prices have fluctuated widely, and fuel prices and fuel taxes have generally increased in recent years. We have not experienced difficulty in maintaining necessary fuel supplies, and in the past we generally have been able to partially offset increases in fuel costs and fuel taxes through increased freight rates and through a fuel surcharge that increases incrementally as the price of fuel increases above an agreed upon baseline price per gallon. Typically, we are not able to fully recover increases in fuel prices through rate increases and fuel surcharges, primarily because those items do not provide any benefit with respect to empty and out-of-route miles, for which we typically do not receive compensation from customers.

On May 25, 2010, we entered into a contract to hedge approximately 0.5 million gallons of diesel fuel per month for the time period of July 2010 through June 2012. Under this agreement we pay a fixed rate per gallon of heating oil and receive the monthly average price of NYMEX HO heating oil. As diesel fuel is not a traded commodity on the futures market, heating oil is used as a substitute for diesel fuel as prices for both generally move in similar directions.

On June 28, 2010, the Company sold its contract related to the forecasted purchase of diesel fuel for the time period of July 2010 through June 2012 to lock in related gains. The purchase contract had not been designated as a hedge; therefore, the related gain was recorded as a reduction in fuel expense of approximately $1.2 million on a pre-tax basis and on a net of tax basis of approximately $0.7 million or $0.07 per share.

At June 30, 2010, we did not have any long-term fuel purchase contracts and we have not entered into any other hedging arrangements that protect us against fuel price increases.

Off-Balance Sheet Arrangements

We do not currently have off-balance sheet arrangements that have or are reasonably likely to have a material current or future effect on our consolidated financial condition, revenue or expenses, results of operations, liquidity, capital expenditures or capital resources. From time to time, we enter into operating leases relating to facilities and office equipment that are not reflected in our balance sheet.

Liquidity and Capital Resources

On April 19, 2010, we entered into a new Credit Agreement with Branch Banking and Trust Company as Administrative Agent, which replaced our Amended and Restated Senior Credit Facility scheduled to mature on September 1, 2010. The Credit Agreement provides for available borrowings of up to $100.0 million, including letters of credit not exceeding $25.0 million. Availability may be reduced by a borrowing base limit as defined in the Credit Agreement. The Credit Agreement provides an accordion feature allowing us to increase the maximum borrowing amount by up to an additional $75.0 million in the aggregate in one or more increases, subject to certain conditions. The Credit Agreement bears variable interest based on the type of borrowing and on the Administrative Agent's prime rate or the London Interbank Offered Rate plus a certain percentage, which is determined based on our attainment of certain financial ratios. A quarterly commitment fee is payable on the unused portion of the credit line and bears a rate which is determined based on our attainment of certain financial ratios. The obligations of the Company under the Credit Agreement are guaranteed by the Company and secured by a pledge of substantially all of

the Company's assets with the exception of real estate. The Credit Agreement includes usual and customary events of default for a facility of this nature and provides that, upon the occurrence and continuation of an event of default, payment of all amounts payable under the Credit Agreement may be accelerated, and the lenders' commitments may be terminated. The Credit Agreement contains certain restrictions and covenants relating to, among other things, dividends, liens, acquisitions and dispositions outside of the ordinary course of business, and affiliate transactions. The new Credit Agreement will expire on April 19, 2014.

The nature of our business requires significant investments in new revenue equipment. We have financed new tractor and trailer purchases predominantly with cash flows from operations, the proceeds from sales or trades of used equipment, borrowings under our Credit Agreement and capital lease purchase arrangements. We have historically met our working capital needs with cash flows from operations and with borrowings under financing arrangements. We use these financing arrangements to minimize fluctuations in cash flow needs and to provide flexibility in financing revenue equipment purchases. Management is not aware of any known trends or uncertainties that would cause a significant change in our sources of liquidity. We expect our principal sources of capital to be sufficient to finance our operations, annual debt maturities, lease commitments, letter of credit commitments, stock repurchases and capital expenditures over the next twelve months. There can be no assurance, however, that such sources will be sufficient to fund our operations and all expansion plans for the next several years, or that any necessary additional financing and facility renewal will be available, if at all, in amounts required or on terms satisfactory to us. At June 30, 2010, we had approximately $41.9 million available under the Agreement.

Our balance sheet debt, less cash, represents 42.9% of our total capitalization, and we have no material off-balance sheet debt. Our capital leases currently represent 48.3% of our total debt and carry an average fixed rate of 3.8%. Not only does that provide us with a natural hedge against London Interbank Offered Rate volatility, but it has also allowed for additional availability on our revolving credit line on which we could have borrowed up to an additional $41.9 million without violating any of our current financial covenants applicable to us on June 30, 2010. We expect our net capital expenditures for the remainder of 2010 to be approximately $15.1 million.

Cash Flows

	(in thousands)	
	Six Months Ended June 30,	
	2010	2009
Net cash provided by operating activities	$ 24,911	$ 21,634
Net cash used in investing activities	(22,967)	(12,936)
Net cash provided by (used in) financing activities	280	(7,841)

Net cash provided by operating activities increased approximately $3.3 million for the six months ended June 30, 2010 as compared to the six months ended June 30, 2009. The change was primarily due to the following factors:

- A $2.1 million net loss was incurred for the six months ended June 30, 2010 compared to the $3.0 million net loss for the comparable period of the prior year due primarily to an increase in revenue. This change resulted in approximately $0.9 million in additional cash being provided by operating activities for the six months ended June 30, 2010 compared to that provided by operations for the same period of the prior year;

- Resulting from the loss we incurred in 2009, we recorded a federal tax receivable of $10.0 million in the fourth quarter of 2009. We collected this tax refund during the second quarter of this year, which resulted in a reduction of accounts receivable. The tax refund impact to accounts receivable was offset against an increase in trade freight accounts of $8.8 million due to the increase in revenue during the second quarter. The cumulative result of the tax, trade freight and other receivables was a net cash provided of $0.6 million for the six months ended June 30, 2010, which reflected a cash increase of $3.2 million from the comparable prior year period;

- Effective April 1, 2009, we changed our accounting for tires to amortize the cost of tires over the expected life. Prior to April 1, 2009, we directly expensed the cost of tires when placed into service. This change in accounting estimate effected by a change in principle was the primary reason for the increase in cash used for inventories and prepaid expenses during the six months ended June 30, 2010. The result was an increase of $2.8 million of cash used in operations for the first six months of 2010 compared to the same period of the 2009;

- For the six months ended June 30, 2010, accounts payable and accrued expenses increased by $6.7 million compared to a $3.4 million increase for the same period of 2009. The primary reason for the approximate $3.3 million decrease in cash used for accounts payable and accrued expenses was related to the timing of equipment purchases and fuel purchases;

- The approximate $2.9 million increase in cash used in deferred taxes resulted from the utilization of a net operating loss carryover in calculating the tax provision for the six months ended June 30, 2009; and

-

Cash used for Insurance and Claims was $2.0 million less than the same period of 2009. The primary reason for this change was related to resolutions of older claims during the first six months of 2009.

For the six months ended June 30, 2010, net cash used in investing activities was $23.0 million, compared to $12.9 million for the same period of 2009. This $10.1 million increase was primarily attributable to an increase of net revenue equipment purchases. During the six months ended June 30, 2009, we purchased 165 tractors compared to 301 tractors in the same period of 2010. Our equipment purchases increased due to the trading of higher mileage equipment and the opportunity to purchase tractors with pre-2010 emission engines.

For the six months ended June 30, 2010, net cash provided by financing activities was $0.3 million, compared to cash used in financing activities of $7.8 million for the same period of 2009. This $8.1 million increase in cash provided by financing activities is primarily attributable to the funding of the additional revenue equipment purchases. For the six months ended June 30, 2010, we borrowed a net amount of $9.6 million compared to $2.3 million for the same period in 2009.

Debt

On April 19, 2010, we entered into a new Credit Agreement with Branch Banking and Trust Company as Administrative Agent, which replaced our Amended and Restated Senior Credit Facility scheduled to mature on September 1, 2010. The Credit Agreement provides for available borrowings of up to $100.0 million, including letters of credit not exceeding $25.0 million. Availability may be reduced by a borrowing base limit as defined in the Credit Agreement. The Credit Agreement provides an accordion feature allowing us to increase the maximum borrowing amount by up to an additional $75.0 million in the aggregate in one or more increases, subject to certain conditions. The Credit Agreement bears variable interest based on the type of borrowing and on the Administrative Agent's prime rate or the London Interbank Offered Rate plus a certain percentage, which is determined based on our attainment of certain financial ratios. A quarterly commitment fee is payable on the unused portion of the credit line and bears a rate which is determined based on our attainment of certain financial ratios. The obligations of the Company under the Credit Agreement are guaranteed by the Company and secured by a pledge of substantially all of the Company's assets with the exception of real estate. The Credit Agreement includes usual and customary events of default for a facility of this nature and provides that, upon the occurrence and continuation of an event of default, payment of all amounts payable under the Credit Agreement may be accelerated, and the lenders' commitments may be terminated. The Credit Agreement contains certain restrictions and covenants relating to, among other things, dividends, liens, acquisitions and dispositions outside of the ordinary course of business, and affiliate transactions. The new Credit Agreement will expire on April 19, 2014.

Borrowings under the Credit Agreement are classified as either "base rate loans" or "LIBOR loans." Base rate loans accrue interest at a base rate equal to the Administrative Agent's prime rate plus an applicable margin that is adjusted quarterly between 0.0% and 1.0%, based on the Company's leverage ratio. LIBOR loans accrue interest at LIBOR plus an applicable margin that is adjusted quarterly between 2.00% and 3.25% based on the Company's leverage ratio. On a per annum basis, the Company must pay a fee on the unused amount of the revolving credit facility of between 0.25% and 0.375% based on the Company's leverage ratio, and it must pay an annual administrative fee to the Administrative Agent of 0.03% of the total commitments.

The interest rate on our overnight borrowings under the Credit Agreement at June 30, 2010 was 3.5%. The interest rate including all borrowings made under the Credit Agreement at June 30, 2010 was 3.0%. The interest rate on the Company's borrowings under the Credit Agreement for the six months ended June 30, 2010 was 2.3%. A quarterly commitment fee is payable on the unused portion of the credit line and bears a rate which is determined based on our attainment of certain financial ratios. At June 30, 2010, the rate was 0.25% per annum. The Credit Agreement is collateralized by revenue equipment having a net book value of $177.0 million at June 30, 2010, and all trade and other accounts receivable.

The Credit Agreement requires us to meet certain financial covenants and to maintain a minimum tangible net worth of approximately $105.8 million at June 30, 2010. We were in compliance with these covenants at June 30, 2010. The covenants would prohibit the payment of dividends by us if such payment would cause us to be in violation of any of the covenants. As the Company recently refinanced its debt in April 2010, the borrowings under the Credit Agreement approximate its fair value.

We have entered into leases with lenders who participate in our Credit Agreement and who participated in our Amended and Restated Senior Credit Facility, which was replaced by the Credit Agreement. Those leases contain cross-default provisions with the Credit Agreement and the previous Facility. We have also entered into leases with other lenders who do not participate in our Credit Agreement nor participated in our previous Facility. Multiple leases with lenders who do not participate in our Credit Agreement generally contain cross-default provisions.

We record derivative financial instruments in the balance sheet as either an asset or liability at fair value, with classification as current or long-term depending on the duration of the instrument. Changes in the derivative

instrument's fair value must be recognized currently in earnings unless specific hedge accounting criteria are met. For cash flow hedges that meet the criteria, the derivative instrument's gains and losses, to the extent effective, are recognized in accumulated other comprehensive income and reclassified into earnings in the same period during which the hedged transaction affects earnings.

On February 6, 2009, we entered into a $10.0 million interest rate swap agreement with an effective date of February 19, 2009. The rate on the swap is fixed at 1.57% until February 19, 2011. The interest rate swap agreement will be accounted for as a cash flow hedge.

Equity

At June 30, 2010, we had stockholders' equity of $138.6 million and total debt including current maturities of $109.6 million, resulting in a total debt, less cash, to total capitalization ratio of 42.9% compared to 42.1% at December 31, 2009.

Purchases and Commitments

As of June 30, 2010, our capital expenditures forecast, net of proceeds from the sale or trade of equipment, was $15.1 million for the remainder of 2010, approximately $13.6 million of which relates to revenue equipment acquisitions. To the extent further capital expenditures are feasible based on our debt covenants and operating cash requirements, we would use the balance of $1.5 million primarily for property acquisitions, facility construction and improvements and maintenance and office equipment. We routinely evaluate our equipment acquisition needs and adjust our purchase and disposition schedules from time to time based on our analysis of factors such as freight demand, driver availability and the condition of the used equipment market. During the six months ended June 30, 2010, we made $27.8 million of net capital expenditures, including $27.2 million for revenue equipment purchases and $0.6 million for facility expansions and other expenditures.

The following table represents our outstanding contractual obligations at June 30, 2010, excluding letters of credit:

	(in thousands) Payments Due By Period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Contractual Obligations:					
Long-term debt obligations (1)	$ 56,300	$ --	$ --	$ 56,300	$ --
Capital lease obligations (2)	57,396	20,460	34,329	2,607	--
Purchase obligations	1,868	1,868	--	--	--
Rental obligations	3,089	1,017	1,141	613	318
Total	$ 118,653	$ 23,345	$ 35,470	$ 59,520	$ 318

(1) Long-term debt obligations, excluding letters of credit in the amount of $1.8 million, consist of our recently consummated Credit Agreement, which matures on April 19, 2014. The primary purpose of this agreement is to provide working capital for the Company; however, the agreement is also used, as appropriate, to minimize interest expense on other Company purchases that could be obtained through other more expensive capital purchase financing sources. Because the borrowing amounts fluctuate and the interest rates vary, they are subject to various factors that will cause actual interest payments to fluctuate over time. Based on these factors, we have not included in this line item an estimate of future interest payments.

(2) Includes interest payments not included in the balance sheet.

Critical Accounting Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. We base our assumptions, estimates and judgments on historical experience, current trends and other factors that management believes to be relevant at the time our consolidated financial statements are prepared. Actual results could differ from those estimates, and such differences could be material.

The most significant accounting policies and estimates that affect our financial statements include the following:

- Revenue recognition and related direct expenses based on relative transit time in each period. Revenue generated by our Trucking operating segment is recognized in full upon completion of delivery of freight to the receiver's location. For freight in transit at the end of a reporting period, we recognize revenue pro rata based on relative transit time completed as a portion of the estimated total transit time. Expenses are recognized as incurred.

Revenue generated by our Strategic Capacity Solutions and Intermodal operating segments is recognized upon completion of the services provided. Revenue is recorded on a gross basis, without deducting third party purchased transportation costs because we have responsibility for billing and collecting such revenue.

Management believes these policies most accurately reflect revenue as earned and direct expenses, including third party purchased transportation costs, as incurred.

- Selections of estimated useful lives and salvage values for purposes of depreciating tractors and trailers. We operate a significant number of tractors and trailers in connection with our business. We may purchase this

equipment or acquire it under leases. We depreciate purchased equipment on the straight-line method over the estimated useful life down to an estimated salvage or trade-in value. We initially record equipment acquired under capital leases at the net present value of the minimum lease payments and amortize it on the straight-line method over the lease term. Depreciable lives of tractors and trailers range from three years to ten years. We estimate the salvage value at the expected date of trade-in or sale based on the expected market values of equipment at the time of disposal.

We make equipment purchasing and replacement decisions on the basis of various factors, including, but not limited to, new equipment prices, used equipment market conditions, demand for our freight services, prevailing interest rates, technological improvements, fuel efficiency, equipment durability, equipment specifications and driver availability. Therefore, depending on the circumstances, we may accelerate or delay the acquisition and disposition of our tractors and trailers from time to time, based on an operating principle whereby we pursue trade intervals that economically balance our maintenance costs and expected trade-in values in response to the circumstances existing at that time. Such adjustments in trade intervals may cause us to adjust the useful lives or salvage values of our tractors or trailers. By changing the relative amounts of older equipment and newer equipment in our fleet, adjustments in trade intervals also increase and decrease the average age of our tractors and trailers, whether or not we change the useful lives or salvage values of any tractors or trailers. We also adjust depreciable lives and salvage values based on factors such as changes in prevailing market prices for used equipment. We periodically monitor these factors in order to keep salvage values in line with expected market values at the time of disposal. Adjustments in useful lives and salvage values are made as conditions warrant and when we believe that the changes in conditions are other than temporary. These adjustments result in changes in the depreciation expense we record in the period in which the adjustments occur and in future periods. These adjustments also impact any resulting gain or loss on the ultimate disposition of the revenue equipment. Management believes our estimates of useful lives and salvage values have been materially accurate as demonstrated by the insignificant amounts of gains and losses on revenue equipment dispositions in recent periods. However, given the current economic environment, previously established salvage values need to be more closely monitored to assure that book values do not exceed market values. We continually review salvage values to address this issue.

To the extent depreciable lives and salvage values are changed, such changes are recorded in accordance with the applicable generally accepted accounting principles existing at the time of change.

- Estimates of accrued liabilities for claims involving bodily injury, physical damage losses, employee health benefits and workers' compensation. We record both current and long-term claims accruals at the estimated ultimate payment amounts based on information such as individual case estimates, historical claims experience and an estimate of claims incurred but not reported. The current portion of the accrual reflects the amounts of claims expected to be paid in the next twelve months. In making the estimates, we rely on past experience with similar claims, negative or positive developments in the case and similar factors. We do not discount our claims liabilities. See our Claims Liabilities disclosure in our Annual Report on Form 10-K for additional information.

- Stock option valuation. The assumptions used to value stock options are dividend yield, expected volatility, risk-free interest rate, expected life and anticipated forfeitures. As we have not paid any dividends on our Common Stock, the dividend yield is zero. Expected volatility represents the measure used to project the expected fluctuation in our share price. We use the historical method to calculate volatility with the historical period being equal to the expected life of each option. This calculation is then used to determine the potential for our share price to increase over the expected life of the option. The risk-free interest rate is based on an implied yield on United States zero-coupon treasury bonds with a remaining term equal to the expected life of the outstanding options. Expected life represents the length of time we anticipate the options to be outstanding before being exercised. Based on historical experience, that time period is best represented by the option's contractual life. Anticipated forfeitures represent the number of shares under options we expect to be forfeited over the expected life of the options.

- Accounting for income taxes. Our deferred tax assets and liabilities represent items that will result in taxable income or a tax deduction in future years for which we have already recorded the related tax expense or benefit in our consolidated statements of operations. Deferred tax accounts arise as a result of timing differences between when items are recognized in our consolidated financial statements compared to when they are recognized in our tax returns. Significant management judgment is required in determining our provision for income taxes and in determining whether deferred tax assets will be realized in full or in part. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. We periodically assess the likelihood that all or some portion of deferred tax assets will be recovered from future taxable income. To the extent we believe recovery is not probable, a valuation allowance is established for the amount determined not to be realizable. We have not recorded a valuation allowance at June 30, 2010, as all deferred tax assets are more likely than not to be realized.

We believe that we have adequately provided for our future tax consequences based upon current facts and circumstances and current tax law. During the three months ended June 30, 2010, we made no material changes in our assumptions regarding the determination of income tax liabilities. However, should our tax positions be challenged, different outcomes could result and have a significant impact on the amounts reported through our consolidated statements of operations.

- Prepaid tires. Effective April 1, 2009, we changed our method of accounting for tires. Commencing when the tires, including recaps, are placed into service, we account for them as prepaid expenses and amortize their cost over varying time periods, ranging from 18 to 30 months depending on the type of tire. Prior to April 1, 2009, the cost of tires was fully expensed when they were placed into service. We believe the new accounting method more appropriately matches the tire costs to the period during which the tire is being used to generate revenue. For the three and six months ended June 30, 2010, this change in estimate effected by a change in principle resulted in a reduction of operations and maintenance expense on a pre-tax basis of approximately $1.8 and $2.7 million, respectively, and on a net of tax basis of approximately $1.1 million ($0.11 per share) and $1.7 million ($0.16 per share), respectively. For the three and six month periods ended June 30, 2009, this change in estimate effected by a

change in principle resulted in a reduction of operations and maintenance expense on a pre-tax basis of approximately $1.4 million and on a net of tax basis of approximately $0.9 million ($0.08 per share).

New Accounting Pronouncements

See "Note 6 – New Accounting Pronouncements" to the consolidated financial statements included in this Form 10-Q for a description of the most recent accounting pronouncements and their effect, if any.

ITEM 3.QUANTITATIVE AND QUALITATIVE DISCLOSURES
ABOUT MARKET RISK

We experience various market risks, including changes in interest rates, foreign currency exchange rates and commodity prices.

Interest Rate Risk. We are exposed to interest rate risk primarily from our Credit Agreement. The Credit Agreement bears variable interest based on the type of borrowing and on the Administrative Agent's prime rate or the London Interbank Offered Rate plus a certain percentage which is determined based on our attainment of certain financial ratios. At June 30, 2010, we had $56.3 million outstanding pursuant to our Credit Agreement including letters of credit of $1.8 million. Assuming the outstanding balance at June 30, 2010 was to remain constant, a hypothetical one-percentage point increase in interest rates applicable to the Credit Agreement would increase our interest expense over a one-year period by approximately $0.6 million.

On February 6, 2009, we entered into a $10.0 million interest rate swap agreement with an effective date of February 19, 2009. The rate on the swap is fixed at 1.57% until February 19, 2011. The interest rate swap agreement will be accounted for as a cash flow hedge.

Foreign Currency Exchange Rate Risk. We require customers to pay for our services in U.S. dollars. Although the Canadian government makes certain payments, such as tax refunds, to us in Canadian dollars, any foreign currency exchange risk associated with such payments is not material.

Commodity Price Risk. Fuel prices have fluctuated greatly and have generally increased in recent years. In some periods, our operating performance was adversely affected because we were not able to fully offset the impact of higher diesel fuel prices through increased freight rates and fuel surcharge revenue recoveries. We cannot predict the extent to which high fuel price levels will continue in the future or the extent to which fuel surcharge revenue recoveries could be collected to offset such increases. In May 2010, we entered into a contract to hedge 0.5 million gallons of diesel fuel per month for July 2010 through June 2012. In June 2010, we accepted a favorable settlement offered by the other party to terminate the contract in exchange for a $1.2 million payment to us. The contract was terminated before the hedging began in July 2010. Had we not terminated the contract and had fuel prices decreased below the contracted price, the result would have been a negative impact on our fuel costs. As of June 30, 2010, we did not have any derivative financial instruments to reduce our exposure to fuel price fluctuations, but may use such instruments in the future. Accordingly, volatile fuel prices will continue to impact us significantly. A significant increase in fuel costs, or a shortage of diesel fuel, could materially and adversely affect our results of operations. Further, these costs could also exacerbate the driver shortages our industry experiences by forcing independent contractors to cease operations.

ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, an evaluation was performed under the supervision and with the participation of our management, including our Chief Executive Officer (the "CEO") and Chief Financial Officer (the "CFO"), of the effectiveness of the design and operation of our disclosure controls and procedures. Based on that evaluation, our management, including the CEO and CFO, concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective at the reasonable assurance level. There have been no changes in our internal control over financial reporting during the last fiscal quarter that have materially affected, or

are reasonably likely to materially affect, our internal control over financial reporting.

We have confidence in our internal controls and procedures. Nevertheless, our management, including our CEO and CFO, does not expect that our disclosure procedures and controls or our internal controls will prevent all errors or intentional fraud. An internal control system, no matter how well-conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of such internal controls are met. Further, the design of an internal control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all internal control systems, no evaluation of controls can provide absolute assurance that all our control issues and instances of fraud, if any, have been detected.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are party to routine litigation incidental to our business, primarily involving claims for personal injury and property damage incurred in the transportation of freight. We maintain insurance to cover liabilities in excess of certain self-insured retention levels. Though management believes these claims to be routine and immaterial to our long-term financial position, adverse results of one or more of these claims could have a material adverse effect on our financial position or results of operations in any given reporting period.

ITEM 1A. RISK FACTORS

Certain risks associated with our operations are discussed in our Annual Report on Form 10-K for the year ended December 31, 2009, under the heading "Risk Factors" in Item 1A of that report. Except as set forth below, we do not believe there have been any material changes in these risks during the six months ended June 30, 2010.

Our business is subject to economic, credit, and business factors affecting the trucking industry that are largely out of our control, any of which could have a material adverse effect on our operating results.

The factors that have negatively affected us, and may do so in the future, include volatile fuel prices, excess capacity in the trucking industry, surpluses in the market for used equipment, higher interest rates, higher license and registration fees, increases in insurance premiums, higher self-insurance levels, increases in accidents and adverse claims and difficulty in attracting and retaining qualified drivers and independent contractors.

We are also affected by recessionary economic cycles and downturns in customers' business cycles. Economic conditions may adversely affect our customers and their ability to pay for our services. It is not possible to predict the effects of armed conflicts or terrorist attacks and subsequent events on the economy or on consumer confidence in the United States, or the impact, if any, on our future results of operations.

There has been widespread concern over the credit markets and their effect on the economy. If the economy and credit markets weaken, our business, financial results, and results of operations could be materially and adversely affected, especially if consumer confidence declines and domestic spending decreases. Additionally, the stresses in the credit market have caused uncertainty in the equity markets. Although some stability has returned to the equity markets, there still exists enough economic uncertainty that could cause the market price of our securities to be volatile.

If the credit markets erode, we also may not be able to access our current sources of credit and our lenders may not have the capital to fund those sources. We may need to incur additional indebtedness or issue debt or equity securities in the future to refinance existing debt, fund working capital requirements, make investments, or for general corporate purposes. As a result of contractions in the credit market, as well as other economic trends in the credit market industry, we may not be able to secure financing for future activities on satisfactory terms, or at all. If we are not successful in obtaining sufficient financing because we are unable to access the capital markets on financially economical or feasible terms, it could impact our ability to provide services to our customers and may materially and adversely affect our business, financial results, current operations, results of operations, and potential investments.

Our Credit Agreement and other financing arrangements contain certain covenants, restrictions, and requirements, and we may be unable to comply with the covenant, restrictions, and requirements. A default could result in the acceleration of all or part of our outstanding indebtedness, which could have an adverse effect on our financial condition, liquidity, results of operations, and the price of our common stock.

We have a $100.0 million Credit Agreement with a group of banks and numerous other financing arrangements. The Credit Agreement contains certain restrictions and covenants relating to, among other things, dividends, liens, acquisitions and dispositions outside of the ordinary course of business, affiliate transactions, and various financial covenants. Certain other financing arrangements contain certain restrictions and covenants, as well. If we fail to comply with any of our financing arrangement covenants, restrictions, and requirements, we will be in default under the relevant agreement, which could cause cross-defaults under our other financing arrangements. In the event of any such default, if we failed to obtain replacement financing, amendments to, or waivers under the applicable financing arrangements, our lenders could cease making further advances, declare our debt to be immediately due and payable, fail to renew letters of credit, impose significant restrictions and requirements on our operations, institute foreclosure procedures against their collateral, or impose significant fees and transaction costs. If acceleration occurs, it may be difficult or expensive to refinance the accelerated debt or we may have to issue equity securities, which would dilute stock ownership. Even if new financing is made available to us, more stringent borrowing terms may mean that credit is not available to us on acceptable terms. A default under our financing arrangements could cause a materially adverse effect on our liquidity, financial condition, and results of operations.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) Recent unregistered sales of securities.

None.

(b) Use of proceeds from registered sales of securities.

None.

(c) Purchases of equity securities by the issuer and affiliated purchasers.

On October 21, 2009, the Board of Directors of the Company approved the repurchase of up to 2,000,000 shares of the Company's Common Stock expiring on October 21, 2012. Subject to applicable timing and other legal requirements, these repurchases may be made on the open market or in privately negotiated transactions on terms approved by the Company's Chairman of the Board or President. Repurchased shares may be retired or held in treasury for future use for appropriate corporate purposes including issuance in connection with awards under the Company's employee benefit plans. During the six months ended June 30, 2010, we did not repurchase any shares of our Common Stock. Our current repurchase authorization has 2,000,000 shares remaining.

The following table sets forth information regarding shares of Common Stock purchased or that may yet be purchased by us under the current authorization during the second quarter of 2010.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
April 1 – April 30	--	$ --	--	2,000,000
May 1 – May 31	--	--	--	2,000,000
June 1 – June 30	--	--	--	2,000,000
Total	--	$ --	--	2,000,000

We may reissue repurchased shares under our equity compensation plans or as otherwise directed by the Board of Directors.

We are required to include in the table above purchases made by us or by an affiliated purchaser. For this purpose, "affiliated purchaser" does not include our Employee Stock Purchase Plan, which provides that shares purchased for employees under that Plan may be shares provided by us or shares purchased on the open market. Open market purchases under that Plan are made by the administrator of the Plan, which is an agent independent of us. Any shares purchased by the administrator are not counted against the number of shares available for purchase by us pursuant to the repurchase authorization described above.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. (REMOVED AND RESERVED)

None.

ITEM 5. OTHER INFORMATION

None.

31

ITEM 6. EXHIBITS

(a) Exhibits

3.1 Restated and Amended Certificate of Incorporation of the Company (incorporated by reference to Exhibit 3.1 to the Company's Registration Statement on Form S-1, Registration No. 33-45682, filed with the Securities and Exchange Commission on February 13, 1992 [the "Form S-1"]).

3.2 Amended Bylaws of the Company as currently in effect (incorporated by reference to Exhibit 3.2 to the Company's annual report on Form 10-K for the year ended December 31, 2001).

3.3 Certificate of Amendment to Certificate of Incorporation of the Company filed March 17, 1992 (incorporated by reference to Exhibit 3.3 to Amendment No. 1 to the Form S-1 filed with the Securities and Exchange Commission on March 19, 1992).

3.4 Certificate of Amendment to Certificate of Incorporation of the Company filed April 29, 1993 (incorporated by reference to Exhibit 5 to the Company's Registration Statement on Form 8-A/A filed with the Securities and Exchange Commission on June 2, 1997 [the "Form 8-A/A"]).

3.5 Certificate of Amendment to Certificate of Incorporation of the Company filed May 13, 1994 (incorporated by reference to Exhibit 6 to the Form 8-A/A).
