May 16, 2005

SECURITIES AND EXCHANGE COMMISSION
WASHINGTON D.C. 20549

FORM 10-KSB/A

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(D) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended: December 31, 2004 Commission file number: 1-15087

I.D. SYSTEMS, INC.

(Name of small business issuer in its charter)

Delaware

22-3270799

(State or other jurisdiction
of incorporation or organization)

(I.R.S. Employer
Identification No.)

One University Plaza, Hackensack, New Jersey

07601

(Address of Principal Executive Offices)

(Zip Code)

Issuer's telephone number, including area code: (201) 996-9000 Securities registered pursuant to Section 12(b) of the Act: None Securities registered pursuant to Section 12(g) of the Act: Common Stock, par value \$0.01

Check whether the Issuer (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes [x] No [].

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-B is not contained herein, and will not be contained, to the best of Issuer's knowledge, in the definitive proxy or information statements incorporated by reference in Part III of this Form 10-KSB or any amendment to this Form 10-KSB. []

State issuer's revenues for its most recent fiscal year = \$13,741,000.

The aggregate market value of the Common Stock held by nonaffiliates of the Issuer was approximately \$72,210,000 based upon the last sales price of such stock on March 15, 2005, as disclosed on The NASDAQ National Market (IDSY).

The number of shares of common stock, par value \$0.01 per share, outstanding as of March 15, 2005 was 7,707,000.

DOCUMENTS INCORPORATED BY REFERENCE

Part III incorporates information by reference from the definitive proxy statement to be filed in connection with the issuer's 2005 annual meeting of stockholders.

EXPLANATORY NOTE

I.D. Systems, Inc. is filing this Amendment to its Annual Report on Form 10-KSB for the year ended December 31, 2004, as filed with the Securities and Exchange Commission on March 29, 2005. This amendment is being filed to include the conformed signature of Eisner LLP, the Company's independent auditor, on its opinion contained on page F-1 of the Form 10-KSB.

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

PART I.

ITEM 1. DESCRIPTION OF BUSINESS

I.D. Systems, Inc. (the "Company"), a Delaware corporation incorporated in 1993, is a leading provider of advanced wireless solutions for tracking, managing, and securing enterprise assets. The Company's patented RF (radio frequency) technology and proprietary software, the Wireless Asset Net(TM) System, enables real-time, automated, cost-effective monitoring, control, and analysis of a broad range of objects. The Company's solutions can benefit users by reducing operating costs, increasing security and revenues, improving safety, enhancing service, and increasing profits. The Company's customers include 3M Company, American Axle, Archer Daniels Midland, Avis Rent A Car System, Inc., DaimlerChrysler, Deere & Co., Ford Motor Company, General Dynamics, Hallmark Cards, Northrop Grumman, Target Corporation, Toyota Motor Manufacturing Kentucky, Inc., Walgreen Co., the U.S. Navy, the U.S. Postal Service, and the U.S. Transportation Security Administration, among others. During the year ended December 31, 2004, Ford Motor Company, Target Corporation and the U.S. Transportation Administration accounted for approximately 49%, 15% and 12%, respectively, of the Company's revenue. During the year ended December 31, 2003, Ford Motor Company accounted for approximately 58% of the Company's revenue and no other customer accounted for more than 10% of the Company's revenue.

2004 HIGHLIGHTS

- o Expansion of business with Ford Motor Company, including additional orders for I.D. Systems' industrial vehicle electronic control systems (IVECS) for Ford's North American manufacturing plants, and a new contract to provide enterprise-wide support and maintenance for IVECS. The IVECS system is designed to enhance safety, security, and maintenance for forklifts and other industrial equipment. The system is designed to improve safety and security by restricting vehicle access to trained, authorized operators (as required by OSHA) and by providing electronic safety inspection checklists. The system can reduce maintenance expenses by automatically uploading vehicle data, reporting problems identified on checklists in real time, scheduling maintenance according to actual vehicle usage rather than on a calendar basis, and helping management determine the optimal economic time to replace equipment.
- o Expansion of business with Target Corporation, which rolled out a new version of I.D. Systems' Wireless Asset Net industrial fleet management system on approximately 400 material handling vehicles in Target distribution facilities throughout the United States. This roll-out program followed a successful pilot initiative in which I.D. Systems demonstrated the value of new system enhancements designed specifically for warehouse/distribution environments.
- o Continued work with the United States Postal Service (USPS), to translate the previous success of Wireless Asset Net technology at individual USPS mail processing facilities into an enterprise-wide implementation of a wireless Powered Industrial Vehicle Management System (PIVMS). These efforts culminated in a USPS contract award to I.D. Systems, announced in January 2005, for a national PIVMS deployment encompassing up to 460 USPS facilities over the next three years. The PIVMS represents I.D. Systems' most technologically advanced wireless solution to date, with state-of-the-art functionality for controlling and tracking mobile equipment.

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

- o Continued development of homeland security applications with the Transportation Security Administration (TSA), including the successful completion of a series of key functional tests at Newark Liberty International Airport, an increase in funding for the Newark program, and the award of a new TSA contract to deploy a wireless vehicle security system at a seaport in Jacksonville, Florida. This vehicle security system, a version of I.D. Systems' Wireless Asset Net, has advanced capabilities to deter potential threats at port facilities, including alerts when vehicles enter prohibited areas, emergency remote disabling of vehicles, and reports detailing vehicle and operator activity.
- o Expansion of business with WinCo Foods, which placed a follow-on order for the Wireless Asset Net for its newest distribution center. I.D. Systems' continued penetration into the food processing and distribution industry resulted in the company being named to the "FL 100," a list of 100 prominent technology solution providers selected by the food industry publication Food Logistics.
- o Continued development of rental car fleet management applications with Avis Rent A Car System, Inc., which has a version of the Wireless Asset Net deployed on its 2,000-vehicle fleet in Puerto Rico. This system is designed to automate various aspects of the car rental and return process, helping improve customer service and increasing the efficiency of fleet operations. For example, by accurately detecting and automatically transmitting vehicle data, the system can help renters get on their way more quickly at the end of their rentals.
- o Continued work with Northrop Grumman Ship Systems, General Dynamics' National Steel and Shipbuilding Company, and the U.S. Navy's Portsmouth Naval Shipyard to develop and implement an advanced Wireless Equipment Monitoring and Control System (WEMACS) for commercial and shipyard environments. This project, funded by the National Shipbuilding Research Program, includes new product development for monitoring complex machinery such as cranes.
- o New business in the automotive industry, as Premier Manufacturing Support Services ordered the Wireless Asset Net on behalf of one of the world's largest automotive parts manufacturers. Premier provides management and support services for more than 120 automotive plants worldwide and could potentially develop into a strategic marketing and system support partner for I.D. Systems.
- o New business in the mass market retail distribution sector, as Wajax Industries ordered the Wireless Asset Net on behalf of a major Canadian retailer, as announced in January 2005. With a network of 31 branches across Canada, Wajax distributes mobile equipment and provides related services for a wide range of industries - including retail/wholesale distribution, manufacturing, mining, utilities, construction, and forestry - and could potentially become a foundation for I.D. Systems' dealer/ reseller program in Canada.
- o New Wireless Asset Net system enhancements, including the launch of a new generation of wireless vehicle monitoring hardware (the Universal Vehicle Asset Communicator, or UVAC 02) and a series of software upgrades. The UVAC 02 has expanded data management capabilities, can be installed more quickly and easily than earlier hardware generations, simplifies interactivity for equipment operators, and allows for easier maintenance. The improved software includes expanded server options for enterprise-wide deployments,

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

augmented database support, increased data throughput, new reporting and auto-emailing tools, and enhanced remote diagnostic capabilities.

2

- o New RFID-based product developments, including the Battery Charger Monitoring Point(TM) (Battery ChaMP(TM)), the AC Power Control Module (ACPCM), and the Machine Asset Communicator(TM) (MAC).
 - o The Battery ChaMP provides remote management and real-time visibility of batteries and chargers used to power fleets of electric vehicles. I.D. Systems has already received an order for this new product, as announced in January 2005 - AeroVironment, Inc. purchased 500 ChaMP units for its PosiCharge(TM) fast-charging system, which is being deployed for a major automotive manufacturer.
 - o The ACPCM product, developed as part of I.D. Systems' program with the National Shipbuilding Research Program, supports Wireless Asset Net installations on complex machinery, such as cranes. The ACPCM is designed to accommodate virtually any power input and monitor multiple motor data points for advanced maintenance management and asset utilization analysis.
 - o The MAC product provides advanced wireless monitoring and control of fixed machinery, including automatic quality control checks, real-time alerts on out-of-specification machine parameters, automatic machine shut-down based on user-defined criteria, and electronic maintenance checklists. The initial application of MAC technology is in the automotive industry, where it is being used to enforce quality control on adhesive-dispensing robots.
- o A new cooperative relationship with Unisys Corporation, which, as a subcontractor to I.D. Systems, will provide implementation services and technical support for I.D. Systems' program with the U.S. Postal Service. I.D. Systems is also working with Unisys in an informal joint marketing capacity to explore other opportunities for Wireless Asset Net system deployments within the U.S. Government.
- o The transition of trading in I.D. Systems common stock from the NASDAQ Small Cap Market to the NASDAQ National Market on November 8, 2004.

THE TECHNOLOGY

The primary hardware components of the Company's system are wireless programmable "Asset Communicators" installed on each asset and one or more fixed-position "System Monitors" which form a coverage area. These devices communicate with each other via low-power radio frequency transmissions with no ongoing communication costs.

Asset Communicators are miniature programmable computers that provide significantly more functionality than conventional asset tracking "RFID tags". For example, Asset Communicators can control access, detect asset movement/location, monitor asset utilization, provide two-way text messaging, and store a large amount of dynamic, configurable asset data. The firmware in the devices can also be readily customized to meet specific customer needs.

The system does not require a central or controlling computer to make decisions. Asset Communicators and System Monitors make decisions autonomously, which significantly reduces the overall system cost and improves system reliability. System Monitors incorporate a computer network connection as well as a two-way RF transceiver, and are capable of linking to both the mobile assets being monitored and to management software on the network.

The Company designs and implements software as well as hardware. Its modular software systems are user-friendly, utilizing a robust database platform, a Windows-style browser-based graphical user interface and options for both client-server and web-based delivery.

CURRENT TARGET MARKETS

While there are diverse applications for its technology, the Company is currently focused on companies that need to monitor, control and manage industrial vehicles and rental fleet vehicles.

INDUSTRIAL VEHICLE APPLICATIONS. The Company's WIRELESS ASSET NET(TM) fleet management system is designed to address the safety, security and cost issues of the material handling industry.

To improve fleet safety and security, the system provides:

- o wireless vehicle access control to restrict access of equipment to trained and authorized personnel, as required by the Occupational Safety and Health Administration ("OSHA");
- o electronic vehicle inspection checklists for paperless proof of OSHA compliance;
- o early detection of emerging vehicle safety issues; and
- o impact sensing to assign responsibility for accidents.

The Company's system is designed to prevent unauthorized personnel from operating equipment, which we believe results in optimizing fleet health, eliminating anonymous accidents and reducing damage-related costs. To further reduce fleet maintenance costs, the Wireless Asset Net also automates and enforces preventative maintenance scheduling by:

- o wirelessly uploading true "drive-time" data from each individual vehicle;
- o automatically prioritizing maintenance events based on weighted variables; and

- o enabling remote lock-out of vehicles overdue for maintenance. The system can also interface seamlessly with existing maintenance databases.

To generate perhaps the most significant impact on fleet operating costs, the Wireless Asset Net provides a set of tools to measure vehicle and operator

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

utilization and justify fleet and or personnel reductions. The system automatically records the actual usage-time against idle-time of each individual vehicle/operator to benchmark productivity, compare performance, and enable informed decisions about vehicle allocation, disposal, and replacement. The system also visually monitors the location of vehicles -- both in real time and historically -- to locate vehicles that are idle or due for maintenance, to instantly track vehicle inventory, and to monitor vehicle travel-paths in order to optimize labor efficiencies. In addition, the system communicates work instructions to vehicle operators via two-way text paging to improve productivity.

The Company believes its Wireless Asset Net technology can have a significant impact on the security of airports and military bases. Aircraft ground support equipment includes aircraft tow tractors, cargo loaders, baggage tractors, fuel trucks, and catering trucks. The Company believes there are few systems that effectively control and monitor the use of these vehicles. In the absence of such controls, a perpetrator who gains access to the ramp area at airports could access ground support equipment without restriction. The Company's wireless solution prevents unauthorized use of aircraft ground support equipment by linking vehicle ignition to a personal identification system and/or biometrics. The system requires an operator to present an access control ID badge to the system's intelligent vehicle-mounted hardware (and, optionally, enter a PIN code) prior to operating a vehicle that services aircraft. A person must be authorized and trained for a particular vehicle, in a particular area of the airport, at a particular time of day, in order to use the vehicle. This driver tracking and control technology not only prevents the unauthorized use of equipment, but it also allows equipment to be instantly and remotely deactivated via radio frequency in the event of an emergency.

The industrial vehicle market is the Company's most developed application. Customers that have piloted and/or deployed the Company's Wireless Asset Net system include, 3M Company, American Axle, Archer Daniels Midland, DaimlerChrysler, Deere & Co., Ford Motor Company, General Dynamics, Hallmark Cards, Northrop Grumman, Target Corporation, Walgreen Co., the U.S. Navy, the U.S. Postal Service, and the U.S. Transportation Security Administration, among others.

To expand the scope and variation of its industrial equipment management applications, the Company has developed several new products, including the Battery Charger Monitoring Point(TM) (Battery ChaMP(TM)), the AC Power Control Module (ACPCM), and the Machine Asset Communicator(TM) (MAC).

The Battery ChaMP provides remote management and real-time visibility of batteries and fast-chargers used to power fleets of electric vehicles. This wireless visibility ensures that fast-charge systems are properly administered and maintained to maximize return on investment for the customer. The Company has provided AeroVironment, Inc.'s PosiCharge(TM) business unit with Battery ChaMP systems in support of a fast-charging system being deployed for a major automotive manufacturer.

5

The ACPCM product, developed as part of I.D. Systems' program with the National Shipbuilding Research Program, supports Wireless Asset Net installations on complex machinery, such as cranes. The ACPCM is designed to accommodate virtually any power input and monitor multiple motor data points for advanced maintenance management and asset utilization analysis.

The MAC product provides advanced wireless monitoring and control of fixed machinery, including automatic quality control checks, real-time alerts on

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

out-of-specification machine parameters, automatic machine shut-down based on user-defined criteria, and electronic maintenance checklists. The initial application of MAC technology is in the automotive industry, where it is being used to enforce quality control on adhesive-dispensing robots.

RENTAL FLEET APPLICATIONS. The Company's wireless rental car monitoring system automatically uploads mileage and fuel data from rental vehicles, and is designed to produce a significant impact on rental revenues and quality of customer service to the user's customers.

There are many benefits offered by the Company's solution to car rental companies, with two such benefits being the most significant. First, by accurately reporting fuel levels, without human intervention, rental car companies can potentially increase revenues by accurately billing customers for fuel used. Second, by utilizing the Company's system, the average car return transaction, including customer wait time, can be reduced as well. This time savings can allow the rental company to reduce staff and/or devote more attention to customer service or vehicle inspections, which may result in detecting damage that would otherwise go unnoticed and uncharged.

The system also automates the car rental and car handling processes. As a customer approaches the exit gate, the system recognizes the identification of the car and validates the rental for security purposes. In addition, the system prints the rental agreement for the customer as he/she leaves the lot. This functionality eliminates the need to pre-assign vehicles and pre-print rental contracts. The system is also designed to optimize fleet usage by automating the inventory process and monitoring the flow of vehicles.

The Company and Avis Rent A Car System, Inc. commenced a program to implement the Company's Wireless Asset Net fleet management technology on Avis' fleet of approximately 2,000 rental vehicles in Puerto Rico. Puerto Rico was selected because it allows the use of the Company's system on a captive fleet which is intended to be representative of benefits that can also be achieved as a result of broader based implementation.

FUTURE APPLICATIONS AND OTHER MARKETS

Deployment of the Company's system infrastructure in customers' facilities creates many new revenue opportunities. The Company's system enables virtually any asset owned, operated or maintained by a customer to be monitored. With relatively simple customizations, the Company can create and deploy asset "tags" to track pallets and containers, control the use of machinery, cranes and manage other assets. Once these tags are deployed, the customer can utilize one integrated system for all of its asset tracking and monitoring needs. To date, the Company delivered effective systems that have demonstrated significant benefits by providing companies with the ability to monitor, control and manage railcars, as well as letters and packages.

6

MANUFACTURING

The Company outsources its hardware manufacturing operations to leading contract manufacturers, including Flextronics International Ltd. and NuVisions Manufacturing Inc. This strategy enables the Company to focus on its core competency - designing hardware and software systems and delivering solutions to customers - and to avoid investing in capital-intensive electronics manufacturing infrastructure. Outsourcing also provides the Company with the ability to ramp up deliveries to meet increases in demand without increasing fixed expenses.

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

The Company's manufacturers are responsible for obtaining the necessary components and supplies to manufacture the Company's products. While components and supplies are generally available from a variety of sources, manufacturers generally depend on a limited number of suppliers for several components, certain subassemblies and products. In the past, unexpected demand for communication products caused worldwide shortages of certain electronic parts and allocation of such parts by suppliers that had an adverse impact on the ability of manufacturers to deliver products as well as on the cost of producing such products.

Due to the general availability of manufacturers for the Company's products, the Company does not believe that the loss of either of its manufacturers would have a long-term material adverse effect on its business, although there could be a short-term adverse effect on the business.

The Company generally attempts to maintain sufficient inventory to meet customer demand for products on short notice, as well as to meet anticipated sales levels. If the Company's product mix changes in unanticipated ways, or if sales for particular products do not materialize as anticipated, the Company may have excess inventory or inventory that becomes obsolete. In such cases, the Company's operating results could be negatively affected.

SALES AND MARKETING

The Company's sales and marketing objective is to achieve broad market penetration through targeted sales activities, with an emphasis both on expanding business opportunities and applications with existing customers and on developing new customers and applications. The Company currently markets its systems to large corporations and government agencies primarily through direct sales. In addition, the Company has developed, and will continue to focus on, strategic relationships with key companies in target markets, including equipment dealers, complementary hardware and software vendors, original equipment manufacturers (OEMs), and service providers.

The Company has a new United States General Services Administration contract pending that will enable any government agency to purchase the Company's products on an off-the-shelf basis, without further competitive bidding. This contract will supersede a previous GSA contract that expired in September 2004 and will incorporate numerous new products and services not covered under the previous contract. The Company believes that the new GSA contract will provide significant sales opportunities with government agencies.

7

RESEARCH AND DEVELOPMENT

In the past, we focused our research and development efforts on the development and deployment of a "universal system," which allows widespread use of the Company's hardware and software on a broad and diverse base of industrial equipment assets without requiring multiple or custom versions.

In addition, the Company customized its core fleet management technology to meet the needs of several emerging markets, including the rental car market and the airport ground service equipment market. As a result of the important security implications of the Company's technology in the airport environment, our internal research and development funding was partially offset by the Transportation Security Administration.

We intend to continue our commitment to leading-edge technology

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

development. Current research and development efforts have transitioned to:

- o further expanding the list of features and benefits to customers;
- o meeting the requirements of new classes of assets;
- o reducing the size and cost of the Company's core products; and
- o simplifying product manufacturing and deployment.

Additionally, we believe that the Company's core digital, wireless and software systems have and will continue to expand on cutting-edge technologies.

The Company expended \$891,000 and \$1,234,000 for research and development during the years ended December 31, 2003 and 2004, respectively.

COMPETITION

The market for wireless tracking and management of enterprise assets is relatively new, constantly evolving, and highly competitive. Although the Company's current competitors do not provide the precise capabilities of the Company's systems, they do offer subsets of the Company's system capabilities or alternate approaches to the issues the Company's products address. Those companies include both emerging companies with limited operating histories, such as WhereNet Corp., Media Recovery, Inc., Access Control Group L.L.C. and companies with longer operating histories, greater name recognition and/or significantly greater financial, technical and marketing resources than the Company, such as Savi Technology, Symbol Technologies, Inc., and Intermecc Technologies Corp. The Company competes principally on the basis of performance and the quality of its products and services. The Company expects that competition will intensify in the near future. However, the Company believes there are significant barriers to entry for the Company's potential competitors.

8

INTELLECTUAL PROPERTY

The Company currently has one United States patent which expires in October of 2014, and pending patent applications relating to the Company's system architecture, system functionality and rental car technology. It also has a corresponding patent and pending patent applications in selected foreign countries. The patents and patent applications may not provide the Company with any competitive advantage. Many of the Company's current and potential competitors dedicate substantially greater resources to protection and enforcement of intellectual property rights.

The Company attempts to avoid infringing known proprietary rights of third parties in its product development efforts. However, the Company has not conducted and does not conduct comprehensive patent searches to determine whether it infringes patents or other proprietary rights held by third parties. In addition, it is difficult to proceed with certainty in a rapidly evolving technological environment in which there may be numerous patent applications pending, many of which are confidential when filed, with regard to similar technologies. If the Company were to discover that its products violate third-party proprietary rights, the Company may not be able to:

- o obtain licenses to continue offering such products without substantial reengineering;
- o reengineer the Company's products successfully to avoid

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

infringement;

- o obtain licenses on commercially reasonable terms, if at all; or
- o litigate an alleged infringement successfully or settle without substantial expense and damage awards.

Any claims against the Company relating to the infringement of third-party proprietary rights, even if without merit, could result in the expenditure of significant financial and managerial resources or in injunctions preventing us from distributing certain products. Such claims could materially adversely affect the Company's business, financial condition and results of operations.

The Company's software products are susceptible to unauthorized copying and uses that may go undetected, and policing such unauthorized use is difficult. In general, the Company's efforts to protect its intellectual property rights through patent, copyright, trademark and trade secret laws may not be effective to prevent misappropriation of the technology, or to prevent the development and design by others of products or technologies similar to or competitive with those developed by the Company. The Company's failure or inability to protect its proprietary rights could materially adversely affect the Company's business, financial condition and results of operations.

GOVERNMENT REGULATIONS

The use of radio emissions are subject to regulation in the United States by various Federal agencies including the Federal Communications Commission ("FCC"), the OSHA and various State agencies have promulgated regulations which concern the use of lasers and/or radio/electromagnetic emissions standards.

9

Regulatory changes in the United States and other countries in which we may operate in the future may require modifications to some of the Company's products in order for it to continue to be able to manufacture and market these products.

The Company's products intentionally transmit radio signals as part of their normal operation. We have obtained certification from the FCC for our products that require certification. Users of these products in the United States do not require any license from the FCC to use or operate these products. Some of the Company's products transmit narrow band and spread spectrum radio signals as part of their normal operation.

The Company has obtained certification from the FCC for the Company's narrow band and spread spectrum radio products. Users of these products in the United States do not require any license from the FCC to use or operate these products.

The implementation of unfavorable regulations, or unfavorable interpretations of existing regulations by courts or regulatory bodies, could require us to incur significant compliance costs, cause the development of the affected markets to become impractical or otherwise adversely affect our ability to produce or market our products.

In addition, some of the Company's operations use substances regulated under various federal, state and local laws governing the environment and worker health and safety, including those governing the discharge of pollutants into the ground, air and water, the management and disposal of hazardous substances

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

and wastes and the cleanup of contaminated sites. Certain of our products are subject to various federal, state and local laws governing chemical substances in electronic products.

EMPLOYEES

The Company currently has fifty-five full time employees, of which sixteen are engaged in customer satisfaction, twelve in product development (which includes engineering), nine in operations, nine in sales and marketing, and nine in finance and general administration. None of the Company's employees are represented by union or collective bargaining agreements. The Company believes that it's relationships with its employees are good.

RISK FACTORS

WE HAVE A HISTORY OF SIGNIFICANT OPERATING LOSSES AND A SUBSTANTIAL ACCUMULATED EARNINGS DEFICIT AND WE MAY NOT BE ABLE TO MAINTAIN OUR PROFITABILITY

Although we generated net income of approximately \$400,000 for the year ended December 31, 2004, we have incurred substantial net losses of approximately \$1.2 million and \$1.4 million for the years ended December 31, 2003 and 2002, respectively. At December 31, 2004, we had an accumulated deficit of approximately \$11.4 million. If revenues do not continue to grow or if operating expenses exceed our expectations or cannot be adjusted accordingly, we may not be able to continue to maintain profitability and the value of our common stock could decline significantly.

10

THE MARKET FOR OUR TECHNOLOGY MIGHT NOT CONTINUE TO DEVELOP, CAUSING OUR REVENUES TO DECREASE

Our success is highly dependent on the continued market acceptance of our wireless monitoring and tracking system. The market for wireless monitoring and tracking products and services is new and rapidly evolving. We are not certain that our future target customers will purchase our wireless monitoring and tracking system. Additionally, we cannot assure you that the market for wireless monitoring and tracking technology will continue to emerge or become sustainable. If the market for our products fails to grow, develops more slowly than we expect or becomes saturated with competing products or services, then our revenues will not increase and our financial condition may be materially adversely affected.

OUR CONCENTRATION OF REVENUE TO ONE MAJOR CUSTOMER, FORD MOTOR COMPANY, MAY ADVERSELY AFFECT OUR BUSINESS IF FORD DECIDES TO DISCONTINUE PURCHASING OUR PRODUCTS.

During the year ended December 31, 2004, Ford Motor Company, Target Corporation and the U.S. Transportation Administration accounted for approximately 49%, 15% and 12%, respectively, of the Company's revenue. During the year ended December 31, 2003, Ford Motor Company accounted for approximately 58% of the Company's revenue. Our revenue and our profitability would be adversely affected if these customers ceased purchasing from us. We would have no guarantee that we would be able to replace the loss of such revenue with existing or new customers or in a timely manner to avoid an adverse financial impact to our business.

WE MAY BE UNABLE TO MEET OUR FUTURE CAPITAL REQUIREMENTS, LIMITING OUR ABILITY TO DEVELOP AND EXPAND OPERATIONS

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

Based on our current estimates, we believe that we have sufficient cash to continue operations for at least the next 12 months. Unplanned expenses or development opportunities may require us to raise additional capital. We cannot be certain that additional financing will be available when we require it and to the extent that we require it. If additional funds are unavailable to us, or are not available to us on acceptable terms, we may be unable to fund our expansion, develop or enhance our products or respond to competitive pressures.

IF WE RAISE ADDITIONAL CAPITAL THROUGH THE SALE OF COMMON STOCK, PREFERRED STOCK OR CONVERTIBLE DEBT SECURITIES, THE PERCENTAGE OWNERSHIP OF OUR THEN EXISTING STOCKHOLDERS WILL BE DILUTED

In order to raise additional capital, we have issued common stock and warrants to purchase our common stock, and in the future we may issue additional shares of common stock, options, warrants, preferred stock, other securities exercisable for or convertible into our common stock or debt. In addition at March 15, 2005, there were options to employees and directors outstanding for the purchase of approximately 2,776,000 shares of our common stock. We expect to continue to grant employees stock options. Holders of our common stock do not have preemptive rights. Therefore, issuances of additional securities will dilute the percentage ownership of our stockholders. If additional financing is raised through debt financing, it may involve significant restrictive covenants which could affect our ability to operate our business.

11

OUR FAILURE TO PROTECT OUR PROPRIETARY TECHNOLOGY MAY IMPAIR OUR COMPETITIVE POSITION

We believe that we have a competitive advantage due to our intellectual property rights. Although we seek to protect our intellectual property rights through patents, copyrights, trade secrets and other measures, we cannot be certain that: we will be able to adequately protect our technology; our patents will not be successfully challenged by one or more third parties, which could result in our loss of the right to prevent others from exploiting the technology described in the patent; competitors will not be able to develop similar technology independently; and intellectual property laws will be adequate to protect our intellectual property rights. Furthermore, policing the unauthorized use of our products is difficult, and expensive litigation may be necessary to enforce our intellectual property rights. Accordingly, we cannot be certain that we will be able to protect our proprietary rights against unauthorized third party copying or use. If we are unsuccessful in protecting our intellectual property, we may lose the technological advantage we have over competitors.

WE COULD INCUR SUBSTANTIAL COSTS DEFENDING OUR INTELLECTUAL PROPERTY FROM A CLAIM OF INFRINGEMENT BY A THIRD PARTY

In recent years, there has been significant litigation in the United States involving claims of alleged infringement of patents and other intellectual property rights. Any such litigation could result in substantial costs and diversion of management's attention and our resources. We may be a party to litigation from time to time as a result of an alleged infringement of another's intellectual property. If a claim of infringement of intellectual property rights was decided against us, we could be required to: cease selling, incorporating or using products or services that incorporate the challenged intellectual property; obtain from the holder of the infringed intellectual property right a license to sell or use the relevant technology, which license may not be available on reasonable terms; or redesign those products or services that incorporate such technology.

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

IF WE ARE UNABLE TO KEEP UP WITH RAPID TECHNOLOGICAL CHANGE, WE MAY BE UNABLE TO MEET THE NEEDS OF OUR CUSTOMERS

Our market is characterized by rapid technological change and frequent new product announcements. Significant technological changes could render our existing technology obsolete. We are active in the research and development of new products and technologies and enhancing our current products. However, research and development in our industry is complex and filled with uncertainty. If we expend a significant amount of resources and our efforts do not lead to the successful introduction of new or improved products, there could be a material adverse effect on our revenues and market share. In addition, it is common for research and development projects to encounter delays due to unforeseen problems, resulting in low initial volume production, fewer product features than originally considered desirable and higher production costs than initially budgeted, which may result in lost market opportunities. In addition, new products may not be commercially well received. There could be a material adverse effect on our revenues, operating results and market share due to such delays or deficiencies in the development, manufacturing and delivery of new products. In addition, our inability to meet customer needs would lead to a loss of customers and a decrease in our revenues.

12

IF WE LOSE OUR KEY PERSONNEL OR ARE UNABLE TO RECRUIT ADDITIONAL PERSONNEL, OUR BUSINESS MAY SUFFER

We are dependent on the continued employment and performance of our executive officers and key employees, particularly Jeffrey M. Jagid, Chief Executive Officer, Kenneth S. Ehrman, Chief Operating Officer, Ned Mavrommatis, Chief Financial Officer, Michael Ehrman, Executive Vice President Engineering and Frederick Muntz, Executive Vice President Sales and Marketing. We currently do not have employment agreements with our key employees. Like other companies in our industry, we face intense competition for qualified personnel. Many of our competitors have greater resources than we have to hire qualified personnel. We cannot be certain that we will be able to maintain salaries at market levels. Therefore, we cannot be certain that we will be successful in attracting or retaining qualified personnel in the future.

WE MIGHT NOT BE ABLE TO OBTAIN THE SERVICES OF QUALIFIED SUBCONTRACTORS TO PRODUCE OUR PRODUCTS LEADING TO DISRUPTION IN PRODUCTION AND DISTRIBUTION OF OUR PRODUCTS TO OUR CUSTOMERS

In order to meet our requirements under our contracts, we rely on the efforts and skills of subcontractors for the manufacture of our products and the delivery of our products to our customers. Our dependence on third-party manufacturers subjects us to the risk of failure by these third parties to provide us with our products in a timely manner and customer dissatisfaction with the quality or performance of our products manufactured by these third parties. Quality or performance failures by our third-party manufacturers or changes in their financial or business condition could disrupt our ability to supply quality products to our customers and thereby have a material adverse effect on our business, revenues and financial condition. In addition, if we are unable to fulfill orders from our customers, we could experience business interruption, increased costs, damage to our reputation and loss of our customers. Although we have several sources for production, the inability to provide our products to our customers in a timely manner could result in the loss of customers and our revenues could be materially delayed and/or reduced. There is great competition for the most qualified and competent subcontractors. If we are unable to afford or hire qualified subcontractors the quality of our services and products could decline. In addition, third-party manufacturers are

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

consolidating in the electronic component industry. The consolidation of third-party manufacturers may give the remaining and larger third-party manufacturers greater leverage to increase the prices that they charge and thereby increase our manufacturing costs.

THE INDUSTRY IN WHICH WE OPERATE IS HIGHLY COMPETITIVE, AND COMPETITIVE PRESSURES FROM EXISTING AND NEW COMPANIES MAY HAVE A MATERIAL ADVERSE EFFECT ON OUR BUSINESS, REVENUES, GROWTH RATES AND MARKET SHARE.

The industry in which we operate is a highly competitive industry that is influenced by the following:

- o advances in technology;
- o New product introductions;

13

- o evolving industry standards;
- o product improvements;
- o rapidly changing customer needs;
- o intellectual property invention and protection;
- o marketing and distribution capabilities;
- o competition from highly capitalized companies;
- o entrance of new competitors;
- o ability of customers to invest in information technology; and
- o price competition.

If we do not keep pace with product and technology advances, there could be a material adverse effect on our competitive position, revenues and prospects for growth. There is also likely to be continued pricing pressure as competitors attempt to maintain or increase market share.

The products manufactured and marketed by us and our competitors are becoming more complex. As the technological and functional capabilities of future products increase, these products may begin to compete with products being offered by traditional computer, network and communications industry participants that have substantially greater financial, technical, marketing and manufacturing resources than we do. We may not be able to compete successfully against these new competitors, and competitive pressures may result in a material adverse effect on our revenues and our operating results.

THE FEDERAL GOVERNMENT MIGHT IMPLEMENT SIGNIFICANT REGULATIONS WHICH MIGHT REQUIRE US TO INCUR SIGNIFICANT COMPLIANCE COSTS

Our products transmit radio frequency waves, the transmission of which is governed by the rules and regulations of the Federal Communication Commission, as well as other Federal and State agencies.. Our ability to design, develop and sell our products will continue to be subject to the rules and regulations of the Federal Communication Commission, as well as other Federal and State agencies for the foreseeable future. The implementation of unfavorable regulations, or unfavorable interpretations of existing regulations by courts or

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

regulatory bodies, could require us to incur significant compliance costs, cause the development of the affected markets to become impractical or otherwise adversely affect our ability to produce or market our products.

IF WE ARE UNABLE TO EFFECTIVELY MANAGE OUR GROWTH WE WILL BE UNABLE TO SUCCESSFULLY OPERATE OUR BUSINESS IN THE FUTURE

14

Our rapid growth has placed, and is expected to continue to place, a significant strain on our managerial, technical, operational and financial resources and has caused our expenses to increase. To manage our expected growth, we will have to implement and improve our operational and financial systems, and we will have to train and manage our growing employee base, each of which will result in increased expenses. We will also need to maintain and expand our relationships with customers, subcontractors and other third parties. If we are unable to effectively manage our growth, our business may become inefficient and we might not be able to effectively compete with competitors, increase our revenues and control our expenses.

OUR NEW PRODUCTS MAY CONTAIN TECHNOLOGICAL FLAWS AND WE MAY INCUR SUBSTANTIAL LIABILITY DUE TO THESE FLAWS

Complex technological products like ours often contain undetected errors or failures when first introduced or when new versions of the products are introduced. Despite our every effort to eliminate these flaws, there still may be flaws in our new products, even after the commencement of commercial shipments. These flaws could result in a delay of, or failure to, achieve market acceptance of our products, which, since our products are used in business critical applications, could lead to substantial product liability claims.

Although we maintain insurance, we cannot provide any assurance that:

- o our insurance will provide adequate coverage against potential liabilities if a product causes harm or fails to perform as promised;
- o adequate product liability insurance will continue to be available in the future; or
- o our insurance can be maintained on acceptable terms.

The obligation to pay any product liability claim in excess of whatever insurance we are able to obtain would increase our expenses and could greatly reduce our assets. In addition, any such claims could permanently injure our reputation in our industry.

WHEN WE ARE REQUIRED TO TAKE A COMPENSATION EXPENSE FOR THE VALUE OF STOCK OPTIONS OR OTHER COMPENSATORY AWARDS THAT WE ISSUE TO OUR EMPLOYEES, OUR RESULTS OF OPERATIONS WILL BE NEGATIVELY IMPACTED.

We believe that stock options are a key element in our ability to attract and retain employees in the markets in which we operate. In December 2004, the Financial Accounting Standards Board issued Share-Based Payment: an amendment of FASB Statements No. 123 and 95, which requires a company to recognize, as an expense, the fair value of stock option and other stock-based compensation to employees beginning in 2005. We currently use the intrinsic value method to measure compensation expense for stock-based awards to our employees. Under this standard, we generally do not consider stock option grants issued under our employee stock option plans to be compensation when the exercise price of the

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

stock option is equal to or greater than the fair market value on the date of grant. For 2005 and thereafter, we will be required to take a compensation charge as stock options or other stock-based compensation awards are issued or as they vest, including the unvested portion of options that were granted prior to 2005. This compensation charge will be based on a calculated value of the option or other stock-based award using a complex methodology, and which may not correlate to the current market price of our stock. The calculations required under the new accounting rules are very complex. Recognizing this, the Financial Accounting Standard Board has made such rules effective as of the beginning of the first interim or annual reporting period that begins after June 15, 2005. For us, this will be our fiscal third quarter, which commences July 1, 2005. However, under the new rules, we will be required to retroactively calculate and recognize such expense as if the new rules had become effective January 1, 2005. We believe that the effect of such compensation expense will be to materially increase our operating expenses from historical levels, resulting in reduced earnings and earnings per share.

OUR EXECUTIVE OFFICERS AND DIRECTORS OWN A SIGNIFICANT PERCENTAGE OF OUR OUTSTANDING COMMON STOCK AND HAVE THE ABILITY TO INFLUENCE SIGNIFICANTLY THE OUTCOME OF CORPORATE TRANSACTIONS OR OTHER MATTERS SUBMITTED FOR STOCKHOLDER APPROVAL.

Our executive officers and directors beneficially own, in the aggregate, approximately 12% of our outstanding common stock, not including shares of common stock that the officers and directors may acquire in the event that they exercise any of the options granted to them or if they otherwise acquire additional shares of common stock. As a result, our officers and directors have the ability to influence significantly the outcome of all corporate actions requiring stockholder approval, irrespective of how our other stockholders may vote, including the following actions:

- o the election of directors;

15

- o adoption of stock option plans;
- o the amendment of charter documents; or
- o the approval of certain mergers and other significant corporate transactions, including a sale of substantially all of our assets.

FUTURE SALES OF OUR COMMON STOCK MAY DEPRESS OUR STOCK PRICE

Sales of a substantial number of shares of our common stock in the public market could cause a decrease in the market price of our common stock. As of December 31, 2004, we had 7,690,000 shares of common stock outstanding. Of the 7,690,000 shares of common stock outstanding, 6,744,000 shares are freely tradable and 946,000 shares are restricted as a result of securities laws. In addition, stock options to purchase 2,291,000 shares of our common stock were outstanding at December 31, 2004, of which 1,100,000 were vested. The remainder represents stock options that will vest over the next five years. The weighted-average exercise prices of such stock options are substantially lower than the current market price of our common stock. We may also issue additional shares of stock in connection with our business and may grant additional stock options to our employees, officers, directors and consultants under our stock option plans or warrants to third parties. If a significant portion of these shares were sold in the public market, the market value of our common stock could be adversely affected. The terms on which we could obtain additional capital during the life of our outstanding options and warrants may be adversely

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

affected, and it should be expected that the holders of these securities would exercise or convert them at a time when we would be able to obtain equity capital on terms more favorable than those provided for by such convertible securities. As a result, any issuance of additional shares of common stock may cause our current stockholders to suffer significant dilution which may adversely affect the market price of our common stock.

SUPERVISION AND REGULATION -- SECURITIES AND EXCHANGE COMMISSION

The Company maintains a website at <http://www.id-systems.com>. The Company makes available free of charge on our website all electronic filings with the SEC (including proxy statements and reports on Forms 8-K, 10-KSB and 10-QSB and any amendments to these reports) as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. The Company has also posted policies, codes and procedures that outline its corporate governance principles, including the charters of the board's audit and nominating committees, and the Company's Code of Ethics for senior financial officers, Code of Ethics covering directors and all employees on the website. These materials also are available free of charge in print to shareholders who request them in writing. The information contained on the Company's website does not constitute a part of this report.

ITEM 2. DESCRIPTION OF PROPERTIES

In November 1999, the Company entered into a lease that expires on March 31, 2010 for a facility in Hackensack, New Jersey, covering approximately 22,500 square feet, which the Company first occupied in March 2000. The rent is currently \$31,060 per month and will increase to \$34,835 per month from the 61st month until the end of the lease. During 2003, the Company entered into an agreement to sublease 6,270 square feet through the end of the lease. The sublease provides for monthly payments of \$11,619 and also provides for escalations relating to increases in real estate taxes and certain operating expenses.

16

ITEM 3. LEGAL PROCEEDINGS

On September 1, 2004, I.D. Systems, Inc. filed a complaint against Access Control Group L.L.C. ("Access") in the United States District Court in the District of New Jersey asserting patent infringement (the "Action").

The Action seeks an injunction against continued infringement, treble damages resulting from the infringement and the defendant's conduct, interest on the damages, and such further relief as the Court deems just and appropriate. The Action has been settled on a confidential basis.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

17

PART II.

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

Between June 30, 1999 and November 7, 2004, the Company's Common Stock had

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

been quoted on the Nasdaq SmallCap Market. Since November 8, 2004, the Company's common stock has been quoted on The Nasdaq National Market under the symbol IDSY. The following table sets forth, for the periods indicated, the high and low sales price for the Company's common stock as reported on such quotation systems.

QUARTER ENDING: -----	HIGH ----	LOW ---
2003		

March 31, 2003	\$ 5.19	\$ 4.02
June 30, 2003	\$ 8.20	\$ 4.54
September 30, 2003	\$ 9.24	\$ 7.08
December 31, 2003	\$ 10.00	\$ 5.77
2004		

March 31, 2004	\$ 8.50	\$ 6.05
June 30, 2004	\$ 16.18	\$ 6.35
September 30, 2004	\$ 16.54	\$ 10.48
December 31, 2004	\$ 19.96	\$ 13.47
2005		

January 1, 2005 - March 15, 2005	\$ 18.50	\$ 10.50

There were 21 registered holders and approximately 1,600 beneficial owners of the Company's Common Stock of record as of March 15, 2005. The Company has not declared or paid dividends on its Common Stock to date and intends to retain future earnings, if any, for use in its business for the foreseeable future.

ITEM 6. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of the Company's financial condition and results of operations should be read in conjunction with its financial statements and notes thereto appearing elsewhere herein.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

This discussion and analysis of our financial condition and results of operations are based on our financial statements that have been prepared under accounting principles generally accepted in the United States of America. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires our management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could materially differ from those estimates. We have disclosed all significant accounting policies in note B to the financial statements included in this Form 10-KSB. The financial statements and the related notes thereto should be read in conjunction with the following discussion of our critical accounting policies. Our critical accounting policies are:

REVENUE RECOGNITION

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

The Company's revenues are derived from contracts with multiple element arrangements, which include the Company's system, training and technical support. Revenues are recognized as each element is earned based on the relative fair value of each element and when there are no undelivered elements that are essential to the functionality of the delivered elements. The Company's system is typically implemented by the customer or a third party and, as a result, revenue is recognized when title and risk of loss passes to the customer, which usually is upon delivery of the system, pervasive evidence of an arrangement exists, sales price is fixed and determinable, collectibility is reasonably assured and contractual obligations have been satisfied. Training and technical support revenue are generally recognized at time of performance.

The Company also enters into post-contract maintenance and support agreements. Revenue is recognized over the service period and the cost of providing these services is expensed as incurred.

The Company also derives revenues under leasing arrangements. Such arrangements provide for monthly payments covering the system sale, maintenance and interest. These arrangements meet the criteria to be accounted for as sales-type leases pursuant to Statement of Financial Accounting Standards No. 13, "Accounting for Leases". Accordingly, the system sale is recognized upon delivery of the system, provided all other revenue recognition criteria are met as described above. Upon the recognition of revenue, an asset is established for the "investment in sales-type leases". Maintenance revenue and interest income are recognized monthly over the lease term.

RESULTS OF OPERATIONS

The following table sets forth, for the periods indicated, certain operating information expressed as a percentage of revenue:

	Year Ended December 31,	
	2003	2004
Revenues	100.0%	100.0%
Cost of revenues	51.2	47.4
Gross profit	48.8	52.6
Selling, general and administrative expenses	56.0	42.8
Research and development expenses	11.2	9.0
Income (loss) from operations	(18.4)	0.8
Net interest income	2.6	1.0
Other income	0.7	1.1
Net income (loss)	(15.1)%	2.9%
	=====	=====

YEAR ENDED DECEMBER 31, 2004 COMPARED TO THE YEAR ENDED DECEMBER 31, 2003

REVENUES. Revenues were \$13,741,000 for the year ended December 31, 2004 compared to \$7,959,000 in the year ended December 31, 2003, an increase of

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

\$5,872,000, or 72.6%. The increase in revenues for the year was primarily attributable to increased sales of the Company's Wireless Asset Net system for tracking and managing fleets of industrial equipment. Included in revenues in the year ended December 31, 2004 was \$400,000 of revenues related to the cost recovery method as described in Note B [9] of the financial statements included herein. The revenue was offset by \$400,000 of amortized capital costs included in costs of revenues.

COST OF REVENUES. Cost of revenues were \$6,509,000 for the year ended December 31, 2004 compared to \$4,075,000 in the year ended December 31, 2003, an increase of \$2,434,000, or 59.7%. As a percentage of revenues, cost of revenues decreased to 47.4% in the year ended December 31, 2004 from 51.2% in the year ended December 31, 2003. This percentage decrease was primarily attributable to the sale of higher margin services during the year ended December 31, 2004, from cost reductions to the hardware components of the Company's system, as well as the write-off of approximately \$150,000 of obsolete components during the year ended December 31, 2003. Gross profit was \$7,232,000 in the year ended December 31, 2004 compared to \$3,884,000 in the year ended December 31, 2003. As a percentage of revenues, gross profit increased to 52.6% in the year ended December 31, 2004 from 48.8% in the year ended December 31, 2003. Included in costs of revenues in the year ended December 31, 2004 is \$400,000 of amortized capitalized costs associated with the cost recovery method as described in Note B [9] of the financial statements included herein. In accordance, with the cost recovery method, the capitalized contract costs were reduced by the same amount equal to the revenue recognized in the period. Excluding the amortization of the deferred contract costs of \$400,000 for the year ended December 31, 2004, gross profit as a percentage of revenues was 54.2% in comparison to 48.8% in the year ended December 31, 2003.

SELLING, GENERAL AND ADMINISTRATIVE EXPENSES. Selling, general and administrative expenses were \$5,879,000 in the year ended December 31, 2004 compared to \$4,456,000 in the year ended December 31, 2003, an increase of \$1,423,000, or 31.9%. The increase was primarily attributable to increased payroll and related expenses as well as travel expenses due to the hiring of additional personnel to support the continued growth in the business. As a percentage of revenues, selling, general and administrative expenses decreased to 42.8% in the year ended December 31, 2004 from 56.0% in the year ended December 31, 2003.

RESEARCH AND DEVELOPMENT EXPENSES. Research and development expenses were \$1,234,000 in the year ended December 31, 2004 compared to \$891,000 in the year ended December 31, 2003, an increase of \$343,000 or 38.5%. This increase was attributable to furthering our efforts to reduce costs, increase flexibility and enhance the functionality of the Company's system. As a percentage of revenues, research and development expenses decreased to 9.0% in the year ended December 31, 2004 from 11.2% in the year ended December 31, 2003.

20

INTEREST INCOME AND EXPENSE.

Interest income was \$195,000 in the year ended December 31, 2004 as compared to \$269,000 in the year ended December 31, 2003, a decrease of \$74,000 or 27.5%. This decrease was attributable to the assignment of certain sales type leases to a third party leasing company. During the year ended December 31, 2003, the Company earned interest income in connection with sales type lease arrangements. The Company invests in investment grade commercial paper and corporate bonds which are classified as held to maturity.

INTEREST EXPENSE. Interest expense was \$63,000 in the year ended December 31,

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

2004 as compared to \$59,000 in the year ended December 31, 2003.

OTHER INCOME. Other income was \$147,000 in the year ended December 31, 2004 as compared to \$54,000 in the year ended December 31, 2003. Other income reflects rental income from a sublease arrangement entered during 2003.

NET INCOME (LOSS). Net income was \$398,000 or \$0.05 per basic and diluted share, in the year ended December 31, 2004 as compared to a net loss of \$1,199,000, or \$(0.17) per basic and diluted share, in the year ended December 31, 2003. This was due primarily to the reasons described above.

21

LIQUIDITY AND CAPITAL RESOURCES

As of December 31, 2004, the Company had cash, cash equivalents and investments of \$11,635,000 and working capital of \$12,697,000 as compared to \$8,618,000 and \$8,180,000, respectively, at December 31, 2003.

Net cash provided by operating activities was \$1,623,000 for the year ended December 31, 2004 as compared to net cash used in operating activities of \$235,000 for the year ended December 31, 2003. Net cash provided by operating activities in the year ended December 31, 2004 was primarily due to an increase in accounts payable and accrued expenses of \$1,485,000, a decrease in accounts receivable of \$779,000, net income of \$398,000, depreciation and amortization of \$255,000 and amortization of deferred contract costs of \$199,000 partially offset by an increase in inventory of \$1,063,000 and an increase in unbilled receivables of \$402,000. Net cash used in operating activities in the year ended December 31, 2003 was primarily due to a net loss of \$1,199,000, an increase in accounts receivable of \$1,110,000, an increase in deferred contract costs of \$675,000, a decrease in accounts payable and accrued expenses of \$70,000 and a decrease in other liabilities of \$100,000 partially offset by a decrease in installment receivable of \$867,000, a decrease in inventory of \$715,000, a decrease in investment in sales type leases of \$571,000, an increase in deferred revenue of \$348,000, amortization of premium on investments of \$174,000 and depreciation and amortization of \$173,000.

Net cash provided by investing activities for the year ended December 31, 2004 was \$1,767,000 as compared to net cash used in investing activities of \$1,945,000 for the year ended December 31, 2003. Net cash provided by investing activities in the year ended December 31, 2004 was primarily from maturities of investments of \$3,385,000 partially offset by purchases of investments of \$1,235,000 and the purchases of fixed assets of \$419,000. Net cash used in investing activities in the year ended December 31, 2003 was primarily from purchases of investments of \$5,698,000 and the purchases of fixed assets of \$339,000 partially offset by maturities of investments of \$4,084,000.

Net cash provided by financing activities for the year ended December 31, 2004 was \$1,871,000 as compared to net cash provided in financing activities of \$1,601,000 for the year ended December 31, 2003. Net cash provided by financing activities for the year ended December 31, 2004, resulted primarily from the proceeds of \$1,171,000 received in connection with the exercise of stock options and \$1,025,000 received in connection with the exercise of warrants, partially offset by \$188,000 of repayments made under the term loan and \$137,000 of repayments for the Company's line of credit. Net cash provided by financing activities for the year ended December 31, 2003, resulted primarily from the proceeds of \$1,000,000 received in connection with obtaining a five year term loan and \$765,000 of proceeds received from exercise of employee stock options, partially offset by \$164,000 of repayments made under the term loan.

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

The Company has a working capital line of credit, with maximum borrowings of \$500,000. Interest at the 30 day LIBOR Market Index Rate plus 1.75% is payable monthly. At December 31, 2004, the Company did not owe anything under this line of credit.

In January 2003, the Company closed on a five-year term loan for \$1,000,000 with a financial institution. Interest at the 30-day LIBOR plus 1.75% and principal are payable monthly. To hedge the loan's floating interest expense the Company entered into an interest rate swap contemporaneously with the closing of the loan and fixed the rate of interest at 5.28% for the five-year term. The loan is secured by all the assets of the Company and the Company is in compliance with the covenants under the term loan. The fair value of the interest rate swap is not material to the financial statements or results of operations.

22

Maturities of long-term debt are as follows:

YEAR ENDING DECEMBER 31,	
2005	\$ 199,000
2006	209,000
2007	221,000
2008	19,000
----	-----
	\$ 648,000
	=====

The Company believes it has sufficient cash, cash equivalents and investments for the next twelve months of operations.

The Company believes its operations have not been and, in the foreseeable future, will not be materially adversely affected by inflation or changing prices.

OFF-BALANCE SHEET ARRANGEMENTS

The Company does not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on its financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

SFAS123(R)

In December 2004, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 123R, SHARE-BASED PAYMENT, which is a revision of SFAS No. 123 and APB 25. Generally, the approach in SFAS No. 123(R) is similar to the approach described in SFAS No. 123. However, SFAS No. 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. Pro forma disclosure is no longer an alternative. The new standard will be effective for the Company beginning July 1, 2005. The Company has not yet completed their evaluation but expects the adoption to have a material effect on the financial statements.

SFAS151

In November 2004, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 151. "Inventory Costs, an amendment of ARB No. 43, Chapter 4." SFAS 151 amends ARB No. 43, Chapter 4, to clarify that abnormal amounts of idle facility expense, freight, handling costs, and wasted material (spoilage) should be recognized as current period charges. In addition, SFAS 151 requires that allocation of fixed production overhead to the cost of conversion be based on the normal capacity of the production facilities. The provision of SFAS 151 shall be effective for the Company beginning on September 1, 2005. The Company is currently evaluating whether this statement will have a material effect on its financial statements.

23

SFAS153

EXCHANGES OF NONMONETARY ASSETS - AN AMENDMENT OF APE OPINION NO. 29 - SFAS NO. 153

SFAS No. 153 addresses the measurement of exchanges of nonmonetary assets. It eliminates the exception from fair value accounting for nonmonetary exchanges of similar productive assets and replaces it with an exception for exchanges that do not have commercial substance. SFAS No. 153 specifies that a nonmonetary exchange has commercial substance if the future cash flows of an entity are expected to change significantly as a result of the exchange. This statement is effective beginning in October 1, 2006 and is not expected to have a significant impact on our financial statements.

EITF04-8

In September 2004, the EITF reached a consensus on Issue No. 04-8, "The Effect of Contingently Convertible Debt on Diluted Earnings per Share." EITF 04-8 requires that all issued securities that have embedded conversion features that are contingently exercisable upon the occurrence of a market-price condition should be in the calculation of diluted earnings per share, regardless of whether the market price trigger has been met. EITF 04-8 is effective for reporting periods ending after December 15, 2004. The adoption of EITF 04-8 will not materially effect the diluted EPS calculation.

FORWARD LOOKING STATEMENTS

Certain statements in this Annual Report on Form 10-KSB, under the sections "Management Discussion and Analysis of Financial Condition and Results of Operations," "Business" and elsewhere relate to future events and expectations and as such constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. The words "believes," "anticipates," "plans," "expects," and similar expressions are intended to identify forward-looking statements. Such forward-looking statements involve known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements and to vary significantly from reporting period to reporting period. These forward looking statements were based on various factors and were derived utilizing numerous important assumptions and other factors that could cause actual results to differ materially from those in the forward looking statements, including, but not limited to: uncertainty as to the Company's future profitability and the Company's ability to develop and implement operational and financial systems to

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

manage rapidly growing operations, competition in the Company's existing and potential future lines of business, and other factors. Other factors and assumptions not identified above were also involved in the derivation of these forward looking statements, and the failure of such other assumptions to be realized, as well as other factors, may also cause actual results to differ materially from those projected. The Company assumes no obligation to update these forward looking statements to reflect actual results, changes in assumptions or changes in other factors affecting such forward looking statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders
I.D. Systems, Inc.

We have audited the accompanying balance sheet of I.D. Systems, Inc. as of December 31, 2004 and the related statements of operations, changes in stockholders' equity and cash flows for the years ended December 31, 2003 and 2004. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

reasonable basis for our opinion.

In our opinion, the financial statements enumerated above present fairly, in all material respects, the financial position of I.D. Systems, Inc. as of December 31, 2004 and the results of its operations and its cash flows for the years ended December 31, 2003 and 2004, in conformity with United States generally accepted accounting principles.

F-5

I.D. SYSTEMS, INC.
NOTES TO FINANCIAL STATEMENTS

NOTE A - THE COMPANY

I.D. Systems, Inc. (the "Company") is a provider of wireless solutions for corporate asset management. The Company designs, develops and produces innovative wireless monitoring and tracking products that utilize its patented radio-frequency-based system. The Company's products are designed to enable users to improve operating efficiencies and reduce costs. The Company outsources its hardware manufacturing operations to contract manufacturers. The Company was incorporated in Delaware in 1993 and commenced operations in January 1994.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

[1] USE OF ESTIMATES:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. These estimates include collectibility of accounts receivable, sales returns, recoverability of inventory, realization of deferred tax assets, useful lives and impairment of tangible and intangible assets.

[2] CASH AND CASH EQUIVALENTS:

The Company considers all highly liquid debt instruments purchased with an original maturity of three months or less to be cash equivalents.

[3] INVENTORY:

Inventory, which consists of components for the Company's products and finished goods to be shipped to customers under existing orders, is stated at the lower of cost or market using the first-in first-out method. At December 31, 2004 the Company's inventory consisted of components of approximately \$499,000 and finished goods of approximately \$1,240,000.

[4] FIXED ASSETS AND DEPRECIATION:

Fixed assets are recorded at cost and depreciated using the straight-line method over the estimated useful lives of the assets which range from three to ten years. Equipment under capital leases and leasehold improvements are amortized using the straight-line method over the terms of the respective leases, or their estimated useful lives, whichever is shorter.

[5] LONG-LIVED ASSETS:

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

The Company evaluates its long-lived assets in accordance with Statement of Financial Accounting Standards ("SFAS") No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets,". In the evaluation, the Company compares values of such assets to the estimated undiscounted future cash flows expected from the use of the assets and their eventual disposition. When the estimated undiscounted future cash flows are less than the carrying amount an impairment loss is recognized equal to the difference between the assets fair value and their carrying value. At December 31, 2004, the Company had not incurred an impairment charge.

F-6

I.D. SYSTEMS, INC. NOTES TO FINANCIAL STATEMENTS

[6] RESEARCH AND DEVELOPMENT:

Research and development costs are charged to expense as incurred.

[7] PATENT COSTS:

Costs incurred in connection with acquiring patent rights are charged to expense as incurred.

[8] REVENUE RECOGNITION:

The Company's revenues are derived from contracts with multiple element arrangements, which include the Company's system, training and technical support. Revenues are recognized as each element is earned based on the relative fair value of each element and when there are no undelivered elements that are essential to the functionality of the delivered elements. The Company's system is typically implemented by the customer or a third party and, as a result, revenue is recognized when title and risk of loss passes to the customer, which usually is upon delivery of the system, pervasive evidence of an arrangement exists, sales price is fixed and determinable, collectibility is reasonably assured and contractual obligations have been satisfied. Training and technical support revenue are generally recognized at time of performance.

The Company also enters into post-contract maintenance and support agreements. Revenue is recognized over the service period and the cost of providing these services is expensed as incurred.

The Company also derives revenues under leasing arrangements. Such arrangements provide for monthly payments covering the system sale, maintenance and interest. These arrangements meet the criteria to be accounted for as sales-type leases pursuant to Statement of Financial Accounting Standards No. 13, "Accounting for Leases". Accordingly, the system sale is recognized upon delivery of the system, provided all other revenue recognition criteria are met as described above. Upon the recognition of revenue, an asset is established for the "investment in sales-type leases". Maintenance revenue and interest income are recognized monthly over the lease term.

[9] DEFERRED CONTRACT COSTS:

During 2003, the Company entered into a contract with a customer pursuant to which the Company's system will be implemented on a portion of the customer's fleet of vehicles. The Company will be entitled to issue sixty monthly invoices of up to \$40,000 per month, each of which is contingent upon certain conditions being met. Costs directly attributable to this

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

contract, consisting principally of engineering and manufacturing costs, are being deferred until implementation of the system is completed. The deferred costs will be charged to cost of revenue in accordance with the cost recovery method, pursuant to which the deferred contract costs will be reduced in each period by an amount equal to the revenue recognized until all of the deferred costs are written off at which time the Company will recognize a gross profit, if any. As of December 31, 2004, the Company deferred \$876,000 of such contract costs and amortized \$400,000 of such costs during the year then ended. The implementation of the system is substantially completed and additional contract costs are not anticipated to be significant. The Company will continue to evaluate the carrying amount of the deferred contract costs for potential impairment.

F-7

I.D. SYSTEMS, INC.
NOTES TO FINANCIAL STATEMENTS

[10] BENEFIT PLAN:

The Company maintains a retirement plan under Section 401(k) of the Internal Revenue Code, which covers all eligible employees. The Company did not make any contributions to the plan during the years ended December 31, 2003 and 2004.

[11] RENT EXPENSE:

Expense related to the Company's facility lease is recorded on a straight-line basis over the lease term. The difference between rent expense incurred and the amount paid is recorded as deferred rent and is amortized over the lease term.

[12] STOCK-BASED COMPENSATION:

The Company accounts for stock-based employee compensation under Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees", and related interpretations. The Company has adopted the disclosure-only provisions of SFAS No. 123, "Accounting for Stock-Based Compensation" and SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure." The following table illustrates the effect on net income (loss) and earnings (loss) per share if the fair value based method had been applied to all awards.

	YEAR ENDED DECEMBER 31,	
	2003	2004
	-----	-----
Reported net income (loss)	\$(1,199,000)	\$ 398,000
Stock-based employee compensation expense included in reported net loss, net of related tax effects	0	0
Stock-based employee compensation determined under the fair value based method, net of related tax effects	(862,000)	(1,187,000)
	-----	-----

As reported	\$ (0.17)	\$ 0.05
	=====	=====
Pro forma	\$ (0.30)	\$ (0.11)
	=====	=====

F-8

I.D. SYSTEMS, INC.
NOTES TO FINANCIAL STATEMENTS

[12] STOCK-BASED COMPENSATION: (CONTINUED)

The fair value of each option grant on the date of grant is estimated using the Black-Scholes option-pricing model reflecting the following weighted average assumptions:

	YEAR ENDED DECEMBER 31,	
	2003	2004
	-----	-----
Volatility	44%	52%
Expected life of options	5 years	5 years
Risk free interest rate	3%	3%
Dividend yield	0%	0%

The weighted average fair value of options granted during the years ended December 31, 2003 and 2004 were \$3.52 and \$3.74 respectively.

[13] INCOME TAXES:

The Company uses the asset and liability method of accounting for deferred income taxes. Deferred income taxes are measured by applying enacted statutory rates to net operating loss carry forwards and to the differences between the financial reporting and tax bases of assets and liabilities. Deferred tax assets are reduced, if necessary, by a valuation allowance if it is more likely than not that some portion or all of the deferred tax assets will not be realized.

[14] NET INCOME (LOSS) PER SHARE:

	YEAR ENDED DECEMBER 31,	
	2003	2004
	-----	-----
BASIC EARNINGS (LOSS) PER SHARE		

Net income (loss)	\$ (1,199,000)	\$ 398,000
	-----	-----
Weighted average shares outstanding	6,905,000	7,455,000
	-----	-----

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

Basic earnings (loss) per share	\$ (0.17)	\$ 0.05
	=====	=====
DILUTED EARNINGS (LOSS) PER SHARE		

Net income (loss)	\$(1,199,000)	\$ 398,000
	-----	-----
Weighted average shares outstanding	6,905,000	7,455,000
	-----	-----
Dilutive effect of stock options	0	1,328,000
	-----	-----
Weighted average shares outstanding, diluted	6,905,000	8,783,000
	-----	-----
Diluted earnings (loss) per share	\$ (0.17)	\$ 0.05
	=====	=====

Basic income (loss) per share is based on the weighted average number of common shares outstanding during each period. Diluted income (loss) per share reflects the potential dilution assuming common shares were issued upon the exercise of outstanding options and warrants and the proceeds thereof were used to purchase outstanding common shares. For the year ended December 31, 2003, the basic and diluted weighted average shares outstanding are the same since the effect from the potential exercise of outstanding stock options and warrants of 2,436,000 would have been anti-dilutive.

F-9

I.D. SYSTEMS, INC.
NOTES TO FINANCIAL STATEMENTS

[15] FINANCIAL INSTRUMENTS:

The carrying amounts of cash equivalents, accounts receivable, investments and other liabilities approximate their fair values due to the short period to maturity of these instruments. The carrying amounts of investment in sales-type leases and "installment receivable - noncurrent portion" approximate their fair value due to the market rate of interest charged to customers.

[16] RECLASSIFICATIONS

Certain prior year amounts have been reclassified to conform with the current year presentation.

[17] RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS:

SFAS123(R)

In December 2004, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 123R, SHARE-BASED PAYMENT, which is a revision of SFAS No. 123 and APB 25. Generally, the approach in SFAS No. 123(R) is similar to the approach described in SFAS No. 123. However, SFAS No. 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

fair values. Pro forma disclosure is no longer an alternative. The new standard will be effective for the Company beginning July 1, 2005. The Company has not yet completed their evaluation but expects the adoption to have a material effect on the financial statements.

SFAS151

In November 2004, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 151. "Inventory Costs, an amendment of ARB No. 43, Chapter 4." SFAS 151 amends ARB No. 43, Chapter 4, to clarify that abnormal amounts of idle facility expense, freight, handling costs, and wasted material (spoilage) should be recognized as current period charges. In addition, SFAS 151 requires that allocation of fixed production overhead to the cost of conversion be based on the normal capacity of the production facilities. The provision of SFAS 151 shall be effective for the Company beginning on September 1, 2005. The Company is currently evaluating whether this statement will have a material effect on its financial statements.

SFAS153

EXCHANGES OF NONMONETARY ASSETS - AN AMENDMENT OF APE OPINION NO. 29 - SFAS NO. 153

SFAS No. 153 addresses the measurement of exchanges of nonmonetary assets. It eliminates the exception from fair value accounting for nonmonetary exchanges of similar productive assets and replaces it with an exception for exchanges that do not have commercial substance. SFAS No. 153 specifies that a nonmonetary exchange has commercial substance if the future cash flows of an entity are expected to change significantly as a result of the exchange. This statement is effective beginning in October 1, 2006 and is not expected to have a significant impact on our financial statements.

EITF04-8

In September 2004, the EITF reached a consensus on Issue No. 04-8, "The Effect of Contingently Convertible Debt on Diluted Earnings per Share." EITF 04-8 requires that all issued securities that have embedded conversion features that are contingently exercisable upon the occurrence of a market-price condition should be in the calculation of diluted earnings per share, regardless of whether the market price trigger has been met. EITF 04-8 is effective for reporting periods ending after December 15, 2004. The adoption of EITF 04-8 will not materially effect the diluted EPS calculation.

F-10

I.D. SYSTEMS, INC.
NOTES TO FINANCIAL STATEMENTS

NOTE C - SHORT-TERM INVESTMENTS

The Company's investments at December 31, 2004 consist principally of corporate bonds and are classified as held to maturity. Accordingly, investments are carried at amortized cost.

NOTE D - FIXED ASSETS

Fixed assets are stated at cost, less accumulated depreciation and amortization, and at December 31, 2004, are summarized as follows:

Equipment	\$ 451,000
Computer software	277,000

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

Computer hardware	335,000
Furniture and fixtures	237,000
Leasehold improvements	447,000

	1,747,000
Accumulated depreciation and amortization	738,000

	\$ 1,009,000
	=====

NOTE E - OFFICER LOAN

In June 2002, the Company loaned \$56,000 to an officer. The loan is payable together with interest of 4% in semi-monthly installments of \$500 through August 2007. At December 31, 2004, \$30,000 is due to the Company, \$10,000 of which is due in 2005. The loan is fully payable upon demand and is due if the employee is terminated from the Company for any reason. This loan was made prior to the enactment of the Sarbanes-Oxley Act of 2002. The Company is prohibited from making any loans to officers in the future.

NOTE F - LINE OF CREDIT

The Company has a working capital line of credit, with maximum borrowings of \$500,000. Interest at the 30 day LIBOR Market Index Rate plus 1.75% is payable monthly. At December 31, 2004, the Company did not owe anything under this line of credit.

NOTE G - LONG-TERM DEBT

In January 2003, the Company closed on a five-year term loan for \$1,000,000 with a financial institution. Interest at the 30-day LIBOR plus 1.75% and principal are payable monthly. To hedge the loan's floating interest expense the Company entered into an interest rate swap contemporaneously with the closing of the loan and fixed the rate of interest at 5.28% for the five-year term. The loan is secured by all the assets of the Company and the Company is in compliance with the covenants under the term loan. The fair value of the interest rate swap is not material to the financial statements or results of operations.

F-11

I.D. SYSTEMS, INC.
NOTES TO FINANCIAL STATEMENTS

Maturities of long-term debt are as follows:

YEAR ENDING	
DECEMBER 31,	
2005	\$ 199,000

[1] PREFERRED STOCK:

The Company is authorized to issue 5,000,000 shares of \$.01 par value preferred stock. The Company's Board of Directors has the authority to issue shares of preferred stock and to determine the price and terms of those shares.

[2] STOCK OPTIONS:

The Company has adopted the 1995 Stock Option Plan, pursuant to which the Company may grant options to purchase up to an aggregate of 1,250,000 shares of common stock. The Company has also adopted the 1999 Stock Option Plan and the 1999 Director Option Plan, pursuant to which the Company may grant options to purchase up to 2,813,000 and 300,000 shares of common stock, respectively. The Plans are administered by the Board of Directors, which has the authority to determine the term during which an option may be exercised (not more than 10 years), the exercise price of an option and the vesting provisions.

A summary of the status of the Company's stock option plans as of December 31, 2003 and 2004 and changes during the years ended on those dates, is presented below:

[3] WARRANTS:

In connection with the Company's initial public offering in June 1999, warrants to purchase 200,000 shares of common stock were issued to the underwriter for nominal consideration. The warrants were exercisable for a period of four years, commencing in June 2000, at a price of \$11.55 per share. The warrants were exercised during 2004 on a cashless basis in accordance with their original terms. In connection with the exercise the Company issued 42,000 shares.

In connection with the Company's private placement in January 2002, warrants to purchase 107,000 shares of common stock were issued to the placement agent and a finder. The warrants were exercisable for a period of five years, commencing in January 2002 at a price of \$9.58 per share. The warrants were exercised during 2004. In connection with the exercise the Company received proceeds of \$1,025,000.

I.D. SYSTEMS, INC.
NOTES TO FINANCIAL STATEMENTS

NOTE I - INCOME TAXES

The Company has a deferred tax asset of approximately \$6,313,000 at December 31, 2004 primarily relating to net operating loss carryforward. The Company has a net operating loss carryforward of approximately \$15,921,000 for federal income tax purposes, substantially all of which expires from 2020 through 2024 and, certain state and local net operating loss carryforwards. There were no significant timing differences between financial and tax reporting.

\$4,775,000 of the net operating loss carryforwards relates to stock options for which there were no compensation charges for financial reporting. Accordingly, any future benefit would be credited to additional paid-in capital. Future stock issuances may subject the Company to annual limitations on the utilization of its net operating loss carryforwards. The Company has provided a valuation allowance, which increased during 2003 and 2004 by \$789,000 and \$1,045,000, respectively, against the full amount of its deferred tax asset, since the likelihood of realization cannot be determined.

The difference between income taxes at the statutory federal income tax rate and income taxes reported in the statements of operations are attributable to the

NOTE J - COMMITMENTS, CONTINGENCIES AND OTHER MATTERS

[1] OPERATING LEASES:

The Company is obligated under operating leases for its facility, which it occupied in March 2000. The Company's operating leases provide for minimum annual rental payments as follows:

F-14

I.D. SYSTEMS, INC.
NOTES TO FINANCIAL STATEMENTS

YEAR ENDING	
DECEMBER 31,	

2005	\$410,000
2006	410,000
2007	410,000
2008	410,000
2009	410,000
Thereafter	205,000

	\$2,255,000
	=====

The office lease, which expires in 2010, also provides for escalations relating to increases in real estate taxes and certain operating expenses. Expenses relating to operating leases aggregated approximately \$409,000 and \$499,000 for the years ended December 31, 2004 and 2003, respectively.

During 2003, the Company entered into an agreement to sublease a portion of its space through the end of the lease. The sublease provides for monthly payments of approximately \$12,000 and also provides for escalations relating to increases in real estate taxes and certain operating expenses. Other income of \$147,000 and \$54,000 for the year ended December 31, 2004 and 2003, respectively reflects rent received by the Company under the sublease.

Edgar Filing: ID SYSTEMS INC - Form 10KSB/A

[2] CONCENTRATION OF CUSTOMERS:

Three customers accounted for 49%, 15%, and 12%, respectively, of the Company's revenue during the year ended December 31, 2004. Two of those customers accounted for 31% and 21% of the Company's account and unbilled receivables at December 31, 2004.

One customer, accounted for 58% of the Company's revenue during the year ended December 31, 2003 and 54% of the Company's accounts receivable as of December 31, 2003.

[3] LEGAL PROCEEDINGS:

On September 1, 2004, I.D. Systems, Inc. filed a complaint against Access Control Group L.L.C. ("Access") in the United States District Court in the District of New Jersey asserting patent infringement (the "Action").

The Action seeks an injunction against continued infringement, treble damages resulting from the infringement and the defendant's conduct, interest on the damages, and such further relief as the Court deems just and appropriate. The Action has been settled on a confidential basis.

ITEM 8. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 8A. CONTROLS AND PROCEDURES

Disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in the reports filed under the Exchange Act is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934). Based upon and as of the date of that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports the Company files and submits under the Exchange Act is recorded, processed, summarized and reported as and when required.

There were no changes in the Company's internal controls over financial reporting that occurred during the last fiscal quarter to which this report relates that have materially effected or is reasonably likely to materially effect, the Company's internal control over financial reporting.

ITEM 8B. OTHER INFORMATION
