Item 1. Business

Our Company

AMN Healthcare Services, Inc. AMN is the largest healthcare staffing company in the United States. As the largest nationwide provider of travel nurse and allied staffing services, locum tenens (temporary physician staffing) and physician permanent placement services, we recruit physicians, nurses and allied healthcare professionals, our healthcare professionals, nationally and internationally and place them on assignments of variable lengths and in permanent positions at acute-care hospitals, physician practice groups and other healthcare settings, including rehabilitation centers, radiology imaging facilities, dialysis clinics and pharmacies throughout the United States.

Our staffing services are marketed primarily to two distinct customer groups: (1) healthcare professionals and (2) hospitals, physician practice groups and other healthcare centers. We use a multi-brand recruiting strategy to enhance our ability to successfully attract healthcare professionals in the United States and internationally. We market our staffing opportunities to healthcare professionals under recruitment brands that include American Mobile Healthcare®, Medical ExpressSM, NurseChoice®, NursesRx®, Preferred Healthcare Staffing®, Med TravelersSM, Platinum Select StaffingSM, Rx Pro HealthSM, RN Demand®, O Grady Peyton International, Staff Care® and Merritt, Hawkins & Associates®. Each brand has a distinct clinician focus, market strengths and brand reputation.

At the end of 2007, we had healthcare professionals on assignment at over 2,000 different clients. We provide staffing services mainly to acute-care and sub-acute healthcare facilities, physician groups, dialysis centers, clinics, radiology imaging facilities and retail and mail-order pharmacies. We market our travel nursing services to hospitals and healthcare facilities generally under one brand, AMN Healthcare®, as a single staffing provider with access to healthcare professionals from several nurse recruitment brands. We market our locum tenens and physician permanent placement services under the brand names Staff Care and Merritt, Hawkins & Associates, respectively, and market our allied healthcare staffing services under the brand names Med Travelers, Platinum Select Staffing and Rx Pro Health. Rx Pro Health is a pharmacy staffing company that we acquired in May 2007 and Platinum Select Staffing is an allied healthcare staffing company, whose assets we acquired in February 2008.

Our clients utilize our temporary healthcare staffing services to cost-effectively manage both short and long-term shortages in their staff due to a variety of circumstances, including a lack of qualified, specialized local healthcare professionals, attrition, leave schedules, new unit openings, seasonal patient census variations and to identify candidates for permanent positions. In addition to providing continuity of care and quality patient care, we believe our hospitals, healthcare facilities and other clients contract with us due to our access to a large national network of quality temporary and permanent healthcare professionals, our ability to meet their specific staffing needs, our flexible staffing assignment lengths and our reliable and superior customer service.

Physicians, nurses and allied healthcare professionals choose temporary assignments for a wide variety of reasons that include: seeking flexible work opportunities, exploring different areas of the country, building clinical skills and experience by working at prestigious healthcare facilities, avoiding the demands and political environment of working as permanent staff, working through life and career transitions and as a means of access into a permanent staff position with our clients.

Our large number of hospital, healthcare facility and other clients provides us with the opportunity to offer temporary positions typically in all 50 states and in a variety of work environments and clinical settings. In addition, we provide our temporary healthcare professionals with an attractive benefit package that may include free or subsidized housing, free or reimbursed travel, competitive wages, professional development opportunities,

1

Table of Contents

professional liability insurance, and, for employed professionals, a 401(k) plan and health insurance. We believe that we attract temporary healthcare professionals due to our long-standing reputation for providing a high level of service, our numerous job opportunities, our benefit packages, our innovative marketing programs and word-of-mouth referrals from our thousands of current and former healthcare professionals.

The physician permanent placement market has strong growth potential due to client demand for physicians that enable our clients to generate revenue. Physicians are significant drivers of revenue, influencing many hospitals, healthcare facilities and physician practice groups to devote the resources necessary to recruit them. While this demand creates significant competition for a limited supply of physicians, our national reach and brand recognition positions us well in this environment.

The strong demand and significant overlap of clients seeking physicians for both temporary and permanent placement assignments provide us an opportunity to cross-sell these complementary physician staffing services.

Industry Overview

The U. S. temporary healthcare staffing industry revenues are expected to grow by 8% in 2008 to \$12.3 billion, according to self-reported growth estimates supplied by staffing companies to Staffing Industry Analysts, which was published in September 2007. Industry revenue estimates for the markets in which we provide temporary healthcare staffing services are \$2.7 billion for travel nursing, \$1.9 billion for locum tenens and \$3.5 billion for allied healthcare.

Our supply of healthcare professionals continues to be constrained relative to the demands of our healthcare facility clients. We have experienced a shortage in healthcare professionals in the markets in which we provide temporary healthcare staffing service in that we have more demand than we can fill in each of these markets.

Our nurse and allied healthcare staffing segment, the Company s largest reporting segment, experienced a strong demand and tight supply environment during 2005 and early 2006. However, since the last quarter of 2006, the nurse and allied healthcare staffing industry has generally been experiencing a lessening of demand in certain key states, such as California, which has been partially offset by increased demand in other parts of the country. The lower demand in certain states has been driven by several factors, such as relatively flat hospital admission levels, the aggressive hiring of new graduates and some improvement in hospitals ability to retain permanent labor.

We recruit a small percentage of our nurses from international channels through our O Grady Peyton International (OGP) brand to meet our facility clients long-term staffing needs. During 2007, revenue from OGP was about 5% of our consolidated revenue. Our continued utilization of this international supply channel is reliant upon an increase or exemption from current permanent immigrant visa quotas. Since late 2006, there have effectively been no permanent immigrant visas available for nurses overseas as a result of these quotas, which has limited our ability to place any new international nurses on assignment. Looking forward, we anticipate that additional visa quotas will be made available for our nurses overseas either through legislative relief or the normal progress of the visa bulletin. Internationally trained nurses have represented an important supply channel to meet current nursing demand, and internationally trained nurses have comprised roughly 15% of newly licensed registered nurses since 2005.

Locum tenens physicians are used by our hospital, healthcare facility and physician practice group clients to fill temporary vacancies due to vacation and leave schedules, and increasingly, to bridge staffing gaps while these clients seek permanent physician candidates. Staffing

Industry Analysts estimates the locum tenens market to be the fastest-growing segment of the healthcare staffing industry. The demand environment for locum tenens services continues to be strong, and socioeconomic factors, such as increased physician emphasis on job and lifestyle flexibility, suggest a growing number of physicians are embracing locum tenens as a practice style.

Table of Contents

The market for physician permanent placement services also continues to experience a strong demand environment that has contributed to growth in this segment of our business over the past year. As with our locum tenens business, the supply of candidates is insufficient to meet the demands of our clients seeking a physician to join their practice or staff.

Competition

The healthcare staffing industry is highly competitive. We compete in national, regional and local markets with full-service staffing companies and specialized temporary staffing agencies for both healthcare professionals and hospital and healthcare facility clients. We also compete with hospital systems that have developed their own recruitment departments and interim staffing pools to attract highly qualified healthcare professionals. We compete with other staffing companies for hospital and healthcare facility clients primarily on the basis of the volume, depth and quality of our healthcare professionals, the timely availability of our professionals with requisite skills, the quality, breadth, price and geographic reach of our services, our customer service and our recruitment expertise. We compete for healthcare professionals primarily on the basis of customer service knowledge and expertise, the quantity, diversity and quality of available assignments, compensation packages and, for our temporary nurses and allied healthcare professionals, the benefits that we provide to them while they are on assignment.

We believe that larger, national firms enjoy distinct competitive advantages over smaller, local and regional competitors in the healthcare staffing industry. More established firms generally have access to a larger pool of available candidates, substantial word-of-mouth referral networks and more recognizable brand names, enabling them to attract a consistent flow of new applicants. Larger firms also generally have a deeper, more comprehensive infrastructure with a more established business framework and processes that provide the long-term stability and foundation for quality standards recognition, such as the Joint Commission staffing agency certification. The greater financial resources of these larger firms also make it relatively easier to provide payroll and housing services for their temporary healthcare professionals, which are cash flow intensive.

Some of our competitors in the travel nurse, allied and locum tenens staffing sectors include Cross Country Healthcare, CHG Healthcare Services, On Assignment, Maxim Healthcare Services Inc., Jackson Healthcare Staffing and Medical Doctor Associates.

Demand and Supply Drivers

Demand Drivers

Demographics and Advances in Medicine and Technology. As the U.S. population ages and medical technology advances result in longer life expectancy, it is likely that chronic illnesses and hospital census will increase. We believe that these factors will increase the demand for both temporary and permanent healthcare professionals. In addition, enhanced healthcare technology has increased the demand for specialty clinicians who are qualified to operate advanced medical equipment and perform complex medical procedures.

Increased Hospital Revenue Opportunity. Hospital and healthcare facilities primary revenue source is generated by physicians. By using permanent physician search and locum tenens staffing services to fill both permanent and temporary vacancies more quickly, hospitals and healthcare facilities can generate additional revenue. With more physicians admitting and treating patients, healthcare facilities will have a need for more nurses and allied healthcare professionals to support the increased patient census.

Shift to Flexible Staffing Models. Nurse wages comprise the largest percentage of hospitals labor expenses. A focus on cost-effective healthcare service delivery may lead more hospitals and other healthcare facilities to adopt adjustable staffing models that include utilization of flexible staffing resources such as temporary healthcare professionals.

Table of Contents

Physician and Nursing Shortage. Many regions of the United States are experiencing a pronounced shortage of physicians and registered nurses. While the extent of the physician shortage is debated, the Bureau of Labor Statistics projects that the incremental job openings for physicians and surgeons from 2004 to 2014 will be 136,000, an increase of 24.0% over ten years. The demand for our nursing staffing services is correlated with activity in the permanent labor market at hospitals. In particular, when nurse vacancy rates increase, order levels typically increase as well. The U.S. Department of Health and Human Services reported that the registered nurse workforce is expected to be 36% below projected requirements by 2020. Faced with ongoing demand and tight supply for physicians and nurses, hospitals are utilizing more temporary physicians and nurses to meet staffing requirements. Factors that we believe are contributing to the supply shortage of healthcare professionals include:

Aging of Physician and Nurse Population. Approximately 30% of all physicians are 55 years and older and approximately 38% are considering retirement in the next one to three years. The average age of a registered nurse was estimated to be 47 years old in 2004, an increase of 10.6% since 1996.

Shortage of Medical and Nursing Schools. As a result of a shortage of qualified faculty and the limited availability of medical and nursing schools to prospective healthcare professionals, many believe that the numbers of medical and nursing school graduates are well below the number of new healthcare professionals needed in order to eliminate the projected shortage.

Healthcare Professionals Leaving Patient Care Environments for Better Career Opportunities. Healthcare professionals career opportunities have expanded beyond the traditional bedside role. Pharmaceutical companies, insurance companies, HMOs and hospital management, service and supply companies offer healthcare professionals attractive positions which involve work that may be perceived as more rewarding, and providing increased compensation, less demanding work schedules and more varied career progression and opportunity.

Physicians Leaving Practices Due to Burdens of Malpractice Insurance and Medical Insurance Reimbursement. Physicians are concerned over reimbursement levels from insurance companies and government agencies and displeased with claim billing restrictions and paperwork. In addition, the cost of malpractice insurance is a consideration for physicians as well.

Seasonality. Hospitals in states that experience significant seasonal fluctuations in population, such as Florida or Arizona during the winter months, must be able to efficiently adjust their staffing levels to accommodate the change in patient census. Many of these hospitals find it more cost-effective to utilize temporary healthcare professionals to satisfy these seasonal staffing needs.

Patient Demand. Patients have increasing access to healthcare information through various channels including the internet and advertising. With this information, many patients are taking a more active role in their own healthcare management, including requesting diagnostic tests and elective and non-elective procedures. This increased patient demand for healthcare services is expected to drive an increased need for healthcare professionals.

Supply Drivers

Traditional Reasons for a Healthcare Professional to Work on a Temporary Assignment. Temporary staffing allows healthcare professionals to explore new areas of the United States, work at prestigious hospitals, learn new skills, manage work/life balance, build their resumes, try out different clinical settings, reduce administrative burdens, allow for a transitional period between permanent jobs and avoid unwanted workplace politics that may accompany a permanent position. Other benefits to

4

temporary healthcare professionals could include free or subsidized housing, competitive wages, professional liability insurance coverage, professional development opportunities, health insurance, and completion bonuses for some assignments. All of these opportunities have been constant supply drivers which continue to attract new healthcare professionals into our industry.

Word-of-Mouth Referrals. New applicants are often referred to staffing companies by other healthcare professionals who have taken temporary assignments with or been placed in a permanent position by those staffing companies. Growth in the number of healthcare professionals who have worked on temporary assignments or have been placed in permanent positions by a staffing agency, as well as growth in the number of hospital and healthcare facilities that have utilized temporary healthcare professionals, creates more opportunities for referrals.

More Physicians Choosing Temporary Staffing Due to Increased Malpractice and Reimbursement Concerns. Locum tenens positions provide physicians the opportunity to practice medicine without undue concern for malpractice costs or insurance reimbursement.

Nurses Choose Travel Staffing Due to the Nursing Shortage. In times of nursing shortages, permanent staff nurses are often required to assume greater responsibility and patient loads, work overtime and deal with increased pressures within the hospital. Many experienced nurses choose to leave their permanent employer and look for a more flexible and rewarding position.

Legislation Allowing Nurses to Be Mobile. The Mutual Recognition Compact Legislation, promoted by the National Council of State Boards of Nursing, allows nurses to work more freely within states participating in the Compact Legislation without obtaining new state licenses. The recognition legislation began in 1999 and has been implemented in 22 states.

Growth Strategy

Our goal is to expand our leadership position within the healthcare staffing sector in the United States. The key components of our business strategy include:

Strengthening and Expanding Our Relationships with Hospitals and Healthcare Facilities. We continue to strengthen and expand our relationships with our current hospital and healthcare facility clients and continue to develop new relationships. Hospitals and healthcare facilities are seeking a strong business partner who can fulfill the quantity, breadth and quality of their temporary and permanent staffing needs and help them develop strategies for the most cost-effective staffing models. In addition, over the last few years, hospitals and healthcare facilities have shown an interest in working with fewer vendors in order to increase efficiency. We believe that our larger size and proven ability to fill our clients—staffing needs provide us with the opportunity to serve our client facilities implementing this vendor consolidation strategy. Because we possess the largest national network of available physician, nurse and allied healthcare professionals, we are well positioned to offer our hospital and healthcare facility clients a wide spectrum of effective solutions to meet their staffing needs.

Expanding Our Network of Qualified Healthcare Professionals. Through our recruiting efforts, we continue to expand our network of qualified healthcare professionals. We continue to build our supply of healthcare professionals through referrals from healthcare professionals who are currently working or have been placed by us in the past, as well as through advertising and internet sources. We have also conducted several research initiatives to assist us in segmenting the population of healthcare professionals and have developed targeted advertising campaigns directed at these different segments.

Leveraging Our Business Model and Large Hospital and Healthcare Facility Client Base. We seek to increase our effectiveness through our proven multi-brand recruiting strategy, large network of

healthcare professionals, established hospital and healthcare facility client relationships, proprietary information systems, innovative marketing and recruitment programs, training programs and centralized administrative support systems. Our multi-brand recruiting strategy for temporary nurses generally allows a recruiter in any of our nurse staffing brands to take advantage of all of our nationwide placement opportunities. In addition, our information systems and operational support and customer service personnel permit our recruiters to spend more time focused on the placement of our healthcare professionals.

Expanding and Enhancing our Service Offerings. In order to further enhance the growth in our business and improve our competitive position in the healthcare staffing sector, we continue to introduce new service offerings and enhance our existing service offerings. As our hospital and healthcare facility clients needs change, we constantly explore what additional services we can provide to better serve those needs. In addition, our focus of market expansion is the diversification into new facility client settings such as specialty hospitals, retail health clinics, etc.

Providing Innovative Technology. We continue to be an innovation leader in healthcare staffing by providing on-line services and tools to both our hospital and healthcare facility clients and our healthcare professionals. Our on-line resource, Staffing Service Center, provides online resources for hospital and healthcare facility clients to streamline their communications and process flow to secure and manage staffing services. Another on-line resource, The Service Connection, provides an on-line self-service resource for our healthcare professionals to track assignment information and complete key forms electronically. Both sites offer secure access and self-service features twenty-four hours a day, seven days a week.

Building the Strongest Management Team to Optimize Our Business Model. We continue to focus on training and professional development for all levels of management and sales staff and continue to hire skilled and experienced team members to deliver superior service to our hospital and healthcare facility clients.

Capitalizing on Strategic Acquisition Opportunities. In order to enhance our competitive position, we will continue to selectively explore strategic acquisitions. In the period following acquisitions, we have sought to leverage our hospital relationships and orders across our brands, integrate back-office functions and, where appropriate, maintain brand differentiation for temporary healthcare professional recruitment purposes.

Business Overview

Services Provided

Nurse and Allied Healthcare Staffing Segment

Hospitals and healthcare facilities generally obtain supplemental staffing for nurses and allied healthcare professionals from two external sources, local temporary (per diem) agencies and regional and national travel healthcare staffing companies. Per diem staffing involves the placement of locally based healthcare professionals on daily shift work on an as needed basis. Hospitals and healthcare facilities often give only a few hours notice of their per diem assignments, which require a quick turnaround from their staffing agencies of generally less than 24 hours. Travel staffing, on the other hand, has historically provided hospital and healthcare facilities with staffing solutions to address anticipated or longer-term staffing requirements, typically for four to 26 weeks. In contrast to per diem agencies, travel staffing companies select from a national (and in some cases international) skilled labor pool and provide pre-screened candidates to their hospital and healthcare facility clients, often at a lower cost than per diem staffing. Historically, we have focused on the travel segment of the temporary healthcare staffing industry for our nurse and allied healthcare professionals. In the past few years we have

6

Table of Contents

expanded our service offerings to include assignment lengths of four weeks to 24 months in placing both domestic and internationally trained healthcare professionals, with the majority of assignments between 8 to 26 weeks. The nurse and allied healthcare staffing segment s revenue and segment operating income are provided in Item 8. Financial Statements and Supplementary Data Notes to Consolidated Financial Statements Note 1(r).

Nurses. We provide medical nurses, surgical nurses, specialty nurses, licensed practical or vocational nurses and advanced practice nurses in a wide range of specialties for travel assignments throughout the United States. We place our qualified nurse professionals with premier, nationally recognized hospitals and hospital systems. The majority of our assignments are in acute-care hospitals, including teaching institutions, trauma centers and community hospitals. In 2007, nurses comprised approximately 90% of the nurse and allied healthcare segment of our business. We typically place the majority of our nurses on 13-week assignments with hospitals and healthcare facilities. While the majority of nurses that we place on assignment have been educated and trained in the United States, we recruit English-speaking internationally trained nurses from foreign countries through our O Grady Peyton International brand for 12-24 month assignments. In addition, we offer a shorter-term staffing solution under our NurseChoice brand to address hospitals—urgent need for registered nurses. NurseChoice is targeted to recruit and staff nurses who can begin assignments within one to two weeks in acute-care facilities in contrast to the three to five week lead time that may be required for travel nurses. Typical assignments are four to eight weeks and provide premium compensation packages to nurses.

Allied Health Professionals. We also provide allied health professionals under our Med Travelers, Platinum Select Staffing and Rx Pro Health brands to acute-care hospitals and other healthcare facilities such as skilled nursing facilities, rehabilitation clinics, and retail and mail-order pharmacies. Allied health professionals include such disciplines as physical therapists, surgical technologists, respiratory therapists, occupational therapists, medical and radiology technologists, dialysis technicians, speech pathologists, rehabilitation assistants, pharmacists and pharmacy technicians. Allied health professionals comprise approximately 10% of the total nurse and allied health temporary healthcare professionals working for us in 2007.

Locum Tenens Staffing Segment

Under our Staff Care brand, we place physicians of all specialties, certified registered nurse anesthetists (CRNA) and dentists on a temporary basis (locum tenens) as independent contractors with all types of healthcare organizations throughout the United States, including hospitals, medical groups, occupational medical clinics, individual practitioners, networks, psychiatric facilities, government institutions, and managed care entities. These professionals are recruited nationwide and typically placed on multi-week contracts. Assignment length ranges from a few days up to one year. The locum tenens staffing segment s revenue and segment operating income are provided in Item 8. Financial Statements and Supplementary Data Notes to Consolidated Financial Statements Note 1(r) .

Physician Permanent Placement Services Segment

We provide permanent physician placement services under our Merritt, Hawkins & Associates brand to hospitals, healthcare facilities and physician practice groups throughout the United States. Using a distinct consultative approach that we believe is more client-oriented, we are paid for our services through a blend of retained search fees and variable fees tied to work performed and successful placement. Our broad specialty offerings include over 70 specialist and sub-specialist opportunities such as internal medicine, family practice and radiology. The physician permanent placement services segment servenue and segment operating income are provided in Item 8. Financial Statements and Supplementary Data Notes to Consolidated Financial Statements Note 1(r).

Table of Contents

Offering Comprehensive Healthcare Staffing Solutions

We employ a focused marketing strategy for our hospital and healthcare facility clients, and market and administer the majority of our nursing services under the single corporate brand of AMN Healthcare. Our physician, allied and international staffing services are marketed to our hospital and healthcare facility clients under their respective brands.

The following chart depicts our comprehensive healthcare staffing capabilities and focus on critical staffing needs:

National Presence and Diversified Hospital and Healthcare Facility Client Base

We offer healthcare professionals placement opportunities throughout the United States and provide staffing solutions to our hospital and healthcare facility clients that are located throughout the United States. We typically generate revenue in all 50 states. During 2007, the largest percentages of our revenue were concentrated in California, Florida, Arizona, Texas, North Carolina and New York.

We had temporary healthcare professionals on assignment at over 2,000 different healthcare facility clients at the end of 2007. The majority of our temporary healthcare professional assignments are at acute-care hospitals. In addition to acute-care hospitals, we provide services to sub-acute healthcare facilities, physician groups, dialysis centers, clinics, radiology imaging facilities and retail and mail-order pharmacies. Our clients include hospitals and healthcare systems such as Georgetown University Hospital, HCA, NYU Medical Center, Stanford Hospital and Clinics, UCLA Medical Center, The University of Chicago Hospitals and Mayo Health System. No single client healthcare system comprised more than 10% of revenue and no single client facility comprised more than 3% of revenue for the year ended December 31, 2007.

Our Business Model

We have developed and continually refine our business model to achieve greater levels of productivity and efficiency. Our model is designed to optimize the communication with, and service to, both our healthcare professionals and our hospital and healthcare facility clients.

Marketing and Recruitment of New Healthcare Professionals

We believe that physician, nursing and allied health professionals are attracted to us because of our customer service and relationship-oriented approach, our competitive compensation and benefits package, and

Table of Contents

our large and diverse offering of work assignments that provide the opportunity to work at numerous attractive locations throughout the United States. We believe that our multi-brand recruiting strategy makes us more effective at reaching a larger number of healthcare professionals.

In our effort to attract and retain highly qualified temporary healthcare professionals, we offer a variety of benefits to our employed professionals. These benefits may include: free or subsidized housing; free or reimbursed travel; competitive wages, professional development opportunities, professional liability insurance and, for employed professionals, a 401(k) plan and health insurance.

Screening, Licensing and Quality Management

Through our quality management and assurance departments, we screen all temporary nursing, allied and locum tenens candidates prior to placement, and we continue to evaluate our temporary healthcare professionals after they are placed to ensure adequate performance and manage risk, as well as to determine feasibility for future placements. Our internal processes are designed to ensure that our temporary healthcare professionals have the appropriate experience, credentials and skills for the assignments they accept. Additionally, these processes enable us to provide licensing and privileging assistance to our physicians for temporary assignments. Our experience has shown us that well-matched placements result in more satisfied healthcare professionals and healthcare facility clients.

Placement

For our nurse staffing services, generally, orders are entered into our information network by our hospital account managers and are available to the recruiters at all of our recruitment brands. The hospital account managers develop a relationship with the healthcare facility, arrange telephone interviews between the temporary healthcare professional and the hospital, and confirm offers and placements with the hospital or healthcare facility. At the same time, our recruiters seek to develop and maintain strong and lasting relationships with our healthcare professionals.

In the case of our international temporary healthcare professionals, the recruiters and placement coordinators at our O Grady Peyton International brand, including those located in the United Kingdom, Australia, and India, assist candidates in preparing for the United States nursing examination and subsequently obtaining a U.S. nursing license. These recruiters and other staff also assist our international temporary healthcare professionals to obtain petitions to become lawful permanent residents prior to their arrival in the United States. Our international temporary healthcare professionals are typically placed in permanent positions or on longer-term, 12-24 month assignments as a result of our substantial investment in bringing them to work in the United States. Our recruiters will work with these temporary healthcare professionals to explore their options for new assignments after completion of their initial assignment.

For the locum tenens staffing and physician permanent placement services segments, orders for temporary physicians or permanent placement requests are generated by our national marketing team. Our national presence and infrastructure enable us to provide physicians with a variety of attractive client locations, perquisites and opportunities for career development. Our recruiters and account representatives work together using proprietary information systems to fill orders and schedule physicians on temporary assignments. Our permanent placement recruiters work closely with our clients and marketing team to recruit and fill permanent placement requests. We also have the ability to cross-sell our permanent placement and temporary placement services to our clients.

Hospital Billing

To accommodate the needs of our healthcare facility clients, for temporary healthcare professional staffing, we offer two types of billing: hours and days worked contracts and flat fee contracts. During 2007, we billed substantially all of the nurse and allied healthcare segment services and working temporary physicians based on hours and days worked contracts.

9

Table of Contents

Hours and Days Worked Contracts. Under hours and days worked contracts, the temporary healthcare professional is either our employee for payroll and benefits purposes or an independent contractor typically paid directly by us on behalf of the hospital and healthcare facility clients. Under this arrangement, we bill our hospital and healthcare facility clients at an hourly or daily rate that effectively includes reimbursement for recruitment fees, compensation and any benefits for the temporary healthcare professional and any applicable employer taxes. Housing or travel expenses are either included in the rate or billed separately. Overtime, shift differential and holiday hours worked are typically billed at a premium rate. In turn, we pay the temporary healthcare professional s wages or contracted fees, housing and travel costs and any benefits. Providing payroll services is a value-added and convenient service that hospitals and healthcare facilities generally expect from their supplemental staffing sources.

Flat Rate Contracts. With flat rate contracts, the temporary healthcare professional is compensated directly by the hospital or healthcare facility. We bill the hospital a flat weekly rate that includes reimbursement for recruitment fees and other temporary healthcare professional benefits.

Information Systems

Our management information and communications systems, including our financial reporting systems, are primarily centralized and controlled in our corporate headquarters in San Diego, CA, with additional systems for our physician businesses centralized and controlled at our offices in Irving, TX. We have developed and currently operate proprietary information systems that include integrated processes for healthcare professional and healthcare facility contract management, matching of healthcare professionals with client assignments, healthcare professional file submissions for placements, quality management tracking, managing compensation packages and managing healthcare facility contract and billing terms. These systems provide our staff with fast, detailed information regarding individual healthcare professionals and hospital and other clients and are scalable to support future business growth.

Risk Management

We have developed an integrated risk management program that focuses on loss analysis, education and assessment in an effort to reduce our operational costs and risk exposure. We regularly analyze our losses on professional liability claims and workers compensation claims to identify trends. This allows us to focus our resources on those areas that may have the greatest impact on us and adjust our sales and operational approach to these areas. We have also developed educational materials for distribution to our temporary healthcare professionals that are targeted to address specific work-injury risks and documentation of clinical events.

In addition to our proactive measures, we engage in a review process for incidents involving our healthcare professionals. Upon notification of a healthcare professional s involvement in an incident that may result in liability for us, the healthcare professional s actions are reviewed and a prompt determination is made regarding whether the healthcare professional will continue the assignment and whether we will place him/her on future assignments. We also rely on our hospital and healthcare facility clients and the state professional associations investigation of incidents involving our healthcare professionals in determining continued and future assignments.

Regulation

The healthcare industry is subject to extensive and complex federal and state laws and regulations related to professional licensure, conduct of operations, payment for services and payment for referrals. Our business, however, is not directly impacted by or subject to much of the extensive and complex laws and regulations that generally govern the healthcare industry. The laws and regulations that are directly applicable to our hospital and healthcare facility clients could indirectly impact our business to a certain extent, but because we provide services on a contract basis and are paid directly by our hospital, healthcare facility and physician practice group clients, we do not have any direct Medicare or managed care reimbursement risk.

10

Table of Contents

Some states require state licensure for businesses that employ, assign and/or place healthcare personnel to provide healthcare services at hospitals and other healthcare facilities. We are currently licensed in states that require such licenses and take measures to ensure compliance with all material state licensure requirements. Our travel nurse brands of American Mobile Healthcare, Medical Express, NursesRx, Preferred Healthcare Staffing and NurseChoice, our international staffing brand, O Grady-Peyton International, Inc. and our allied healthcare staffing brand, Platinum Select Staffing, have all received Joint Commission Certification based on a review of our compliance with national standards. We were the first healthcare staffing firm in the country to receive the prestigious Joint Commission Certification as a corporate system with multiple staffing sites.

Most of the temporary healthcare professionals that we employ or independently contract with are required to be individually licensed or certified under applicable state laws. We take prudent steps to ensure that our healthcare professionals possess all necessary licenses and certifications.

We recruit nurses from Canada for placement in the United States. Canadian nurses can come to the United States on TN Visas under the North American Free Trade Agreement. TN Visas are renewable, one-year temporary work visas, which generally allow entrance into the United States provided the nurse presents at the border proof of waiting employment in the United States, evidence of the necessary healthcare practice licenses and a visa credentials assessment from the Commission on Graduates of Foreign Nursing Schools.

With respect to our recruitment of international temporary healthcare professionals through our O Grady Peyton International brand, we must comply with certain United States immigration law requirements, including the Illegal Immigration Reform and Immigrant Responsibility Act of 1996. We primarily bring healthcare professionals to the United States on permanent immigrant visas, commonly referred to as green cards. Effectively, since late 2006, however, there have been no permanent immigrant visas available for nurses overseas as a result of visa quotas. We screen foreign healthcare professionals and assist them in preparing for the national nursing examination and subsequently obtaining a U.S. nursing license. We file petitions with the United States Citizenship and Immigration Service for a healthcare professional to become a permanent resident of the United States or obtain necessary work visas. Such petitions are accompanied by proof that the healthcare professional has either passed the Commission on Graduates of Foreign Nursing Schools Examination or holds a full and unrestricted state license to practice professional nursing, as well as a contract between us and the healthcare professional demonstrating that there is a bona fide job offer.

Employees

As of December 31, 2007, we had approximately 2,000 corporate employees. During the fourth quarter of 2007, we had an average of over 6,500 nurse and allied healthcare professionals working on assignment, and days filled by our physician and CRNA independent contractors totaled 51,639. Days filled is calculated by dividing the physician independent contractor hours filled during the period by eight hours.

Additional Information

We maintain a corporate website at www.amnhealthcare.com/investors. Our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to these reports, are made available, free of charge, through this website as soon as reasonably practicable after being filed with or furnished to the Securities and Exchange Commission. The information found on our website is not part of this or any other report we file with or furnish to the Securities and Exchange Commission.

Item 1A. Risk Factors

The following risk factors should be read carefully in connection with evaluating us and the forward-looking statements contained in this Annual Report on Form 10-K. Any of the following risks could materially adversely affect our company, operating results, financial condition and the actual outcome of matters as to which forward-looking statements are made in this Annual Report on Form 10-K. Certain statements in Risk Factors

11

constitute forward-looking statements. Our actual results could differ materially from those projected in the forward-looking statements as a result of certain factors and uncertainties set forth below and elsewhere in this Annual Report on Form 10-K. See Item 7. Management s Discussion and Analysis of Financial Condition and Results of Operations Special Note Regarding Forward-Looking Statements.

If we are unable to continue to recruit and retain healthcare professionals for our healthcare staffing business at reasonable costs, it could increase our operating costs and negatively impact our business.

We rely significantly on our ability to recruit and retain healthcare professionals who possess the skills, experience and licenses necessary to meet the requirements of our hospital, healthcare facility clients and physician practice groups. We compete for healthcare staffing personnel with other temporary healthcare staffing companies and with hospitals, healthcare facilities and physician practice groups based on the quantity, diversity and quality of assignments offered, compensation packages and the benefits that we provide to our healthcare professionals. We rely on our human capital intensive, relationship-oriented approach and national infrastructure to enable us to compete in all aspects of our business, but particularly in the permanent physician staffing business. We must continually evaluate and expand our temporary and permanent healthcare professional network to serve the needs of our hospital, physician practice groups and other clients.

Currently, there is a shortage of qualified nurses and certain allied healthcare professionals in the United States, significant competition exists for these personnel, and salaries and benefits have risen. We may be unable to continue to increase the number of temporary and permanent healthcare professionals that we recruit, decreasing the potential for growth of our business. Our ability to recruit and retain temporary and permanent healthcare professionals depends on several factors, including our ability to provide our healthcare professionals with assignments and placements that they view as attractive and to provide our temporary healthcare professionals with competitive wages and benefits, including health insurance and housing. We cannot assure you that we will be successful in any of these areas as the costs of attracting healthcare professionals and providing them with attractive benefit packages may be higher than we anticipate, or we may be unable to pass these costs on to our hospital and healthcare facility clients. If we are unable to increase the rates that we charge our hospital and healthcare facility clients to cover these costs, our profitability could decline. Moreover, if we are unable to recruit temporary and permanent healthcare professionals, the quality of our services to our hospital and healthcare facility clients may decline and, as a result, we could lose clients.

Our operations may deteriorate if we are unable to continue to attract, develop and retain our sales and operations personnel.

Our success is dependent upon the performance of our sales and operations personnel. The number of individuals who meet our qualifications for these positions is limited, and we may experience difficulty in attracting qualified candidates. In addition, we commit substantial resources to the training, development and support of our personnel. Competition for qualified sales personnel in the line of business in which we operate is strong, and there is a risk that we may not be able to retain our sales personnel after we have expended the time and expense to recruit and train them.

We operate in a highly competitive market and our success depends on our ability to remain competitive in obtaining and retaining hospital, healthcare facility and physician practice group clients and demonstrating the value of our services.

The temporary healthcare staffing business is highly competitive. We compete in national, regional and local markets with full-service staffing companies, specialized temporary staffing agencies and hospital systems that have developed their own interim staffing pools. Some of our competitors in the temporary nurse and locum tenens staffing sectors include Cross Country Healthcare, CHG Healthcare Services, Inc., On Assignment, Maxim Healthcare Services Inc., Jackson Healthcare Staffing and Medical Doctor Associates.

We believe that the primary competitive factors in obtaining and retaining hospital, healthcare facility and physician practice group clients are identifying qualified healthcare professionals for specific job requirements, providing qualified employees in a timely manner, pricing services competitively and effectively monitoring the job performance of our employees and independent contractor professionals. Competition for hospital, healthcare facility and physician practice group clients and temporary and permanent healthcare professionals may increase in the future related to these factors or due to a shortage of qualified healthcare professionals in the marketplace and, as a result, we may not be able to remain competitive. To the extent competitors seek to gain or retain market share by reducing prices or increasing marketing expenditures, we could lose revenue or clients and our margins could decline, which could seriously harm our operating results and cause the price of our stock to decline. In addition, the development of alternative recruitment channels could lead our clients to bypass our services, which would also cause revenue and margins to decline.

Our business depends upon our ability to secure and fill new orders from our hospital, healthcare facility and physician practice group clients because our temporary healthcare staffing business does not have long-term, exclusive or guaranteed contracts, and economic conditions may adversely impact the number of new orders and contracts we receive.

We generally do not have long-term, exclusive or guaranteed order contracts for temporary healthcare staffing with our hospital, healthcare facility and physician practice group clients. The success of our business is dependent upon our ability to continually secure new contracts and orders from hospitals, healthcare facilities and physician practice groups and to fill those orders with our temporary healthcare professionals. Our hospital, healthcare facility and physician practice group clients are free to award contracts and place orders with our competitors and choose to use temporary healthcare professionals that our competitors offer them. Therefore, we must maintain positive relationships with our hospital, healthcare facility and physician practice group clients. If we fail to maintain positive relationships with them, we may be unable to generate new temporary healthcare professional orders and our business may be adversely affected.

Some hospitals and healthcare facility clients choose to outsource this contract and order function to staffing associations owned by member healthcare facilities or vendor management service companies that may act as intermediaries with our client facilities. These organizations may impact our ability to obtain new clients and maintain our existing client relationships by impeding our ability to access and contract directly with healthcare facility clients. We may also experience pricing pressure or incremental fees from these organizations that may negatively impact our revenue and profitability.

Additionally, some of our hospital and healthcare facility clients are state and federal government agencies, where our ability to compete for new contracts and orders may be affected by government legislation or policy.

Depressed economic conditions, such as increasing unemployment rates and low job growth, could also negatively influence our ability to secure new orders and contracts from clients. In times of economic downturn, permanent healthcare facility staff may be more inclined to work overtime and less likely to leave their positions, resulting in fewer available vacancies and less demand for our services. Fewer placement opportunities for our temporary healthcare professionals impairs our ability to recruit and place both temporary and permanent placement healthcare professionals and our revenues and profitability may decline as a result of this constricted demand and supply.

The demand for our services, and therefore the profitability of our business, may be adversely affected by changes in the staffing needs due to the adoption of alternative modes of healthcare delivery, staffing preferences of our healthcare facility clients and fluctuations in hospital admissions.

The settings for the delivery of patient services are continually evolving and alternative modes of healthcare delivery, such as specialty hospitals and retail clinics, are becoming more prevalent. Demand for our services is affected by the public s adoption and demand for such new modes of healthcare delivery, by our clients

13

evolving needs in light of that demand, and by our ability to adapt to fill those needs. Demand for our temporary healthcare staffing services is also affected by the staffing needs and preferences of our healthcare facility clients, as well as by fluctuations in patient occupancy at our client healthcare facilities due to economic factors and seasonal fluctuations that are beyond our control. Hospitals in certain geographical regions experience significant seasonal fluctuations in admissions, and must be able to adjust their staffing levels to accommodate the change in patient census. Our healthcare facility clients may choose to use temporary staff, additional overtime from their permanent staff or add new permanent staff in order to accommodate changes in their staffing needs. Many healthcare facilities will utilize temporary healthcare professionals to accommodate an increase in hospital admissions. Alternatively, if hospital admissions decrease, the demand for our temporary healthcare professionals may decline as healthcare facility clients typically will reduce their use of temporary staff before reducing the workload or undertaking layoffs of their regular employees. In addition, we may experience more competitive pricing pressure during periods of patient occupancy and hospital admission downturns, negatively impacting our revenue and profitability.

The ability of our hospital, healthcare facility and physician practice group clients to retain and increase the productivity of their permanent staff may affect the demand for our services.

If our hospital, healthcare facility and physician practice group clients retain and increase the productivity of their permanent staff, their need for our services may decline. Higher permanent staff retention rates and increased productivity of permanent staff members could result in increased efficiencies, thereby reducing the demand for both our temporary staffing and permanent placement services, which could negatively impact our revenue and profitability.

We operate in a regulated industry and changes in regulations or violations of regulations may result in increased costs or sanctions that could reduce revenue and profitability and may impact our ability to grow and operate our business.

The healthcare industry is subject to extensive and complex federal and state laws and regulations related to professional licensure, conduct of operations, costs and payment for services and payment for referrals.

Our business is generally not subject to the extensive and complex laws that apply to our hospital, healthcare facility and physician practice group clients, including laws related to Medicare, Medicaid and other federal and state healthcare programs. However, these laws and regulations could indirectly affect the demand or the prices paid for our services. For example, our hospital, healthcare facility and physician practice group clients could suffer civil and criminal penalties and be excluded from participating in Medicare, Medicaid and other healthcare programs if they fail to comply with the laws and regulations applicable to their businesses. In addition, our hospital, healthcare facility and physician practice group clients could receive reduced reimbursements, or be excluded from coverage, because of a change in the rates or conditions set by federal or state governments. Such changes in federal reimbursement program laws and regulations, or the exclusion of our hospital, healthcare facility and physician practice group clients from such programs could adversely affect our clients which in turn could also adversely affect the prices and demand for our services. Similarly, state legislation exists, such as legislation in Massachusetts that limits the hourly rate paid to temporary nursing agencies for registered nurses, licensed practical nurses and certified nurses—aides. While our service offerings are exempt, in part, from this regulation, similar regulations may be enacted in other states in which we operate, and as a result revenue and margins could decrease. Furthermore, third party payers, such as federal and state government and health maintenance organizations, significantly impact the prices charged for medical care. Failure by hospitals, healthcare facilities and physician practice groups to obtain full reimbursement from those third party payers could reduce the demand or the price paid for our services, or result in some client solvency issues or cessation of business.

We are also subject to certain laws and regulations applicable to healthcare staffing agencies and general temporary staffing services. Like all employers, we must also comply with various laws and regulations relating to pay practices, workers compensation and immigration. There is a risk that we could be subject to payment of

additional wages, insurance and employment and payroll related taxes if certain of our corporate employees classified as exempt from overtime and minimum wage requirements are re-classified as non-exempt from overtime and minimum wage requirements. Because of the nature of our business, the impact of these laws and regulations may have a more pronounced effect on our business. These laws and regulations may also impede our ability to grow our operations.

We primarily draw our supply of healthcare professionals from the United States, but international supply channels have represented a small temporary nurse supply source. Our continued utilization of this international supply channel is reliant upon an increase or exemption from current permanent immigrant visa quotas. As a result of these quotas, there are delays ranging from three to five years for foreign-trained nurses from certain countries, such as India and the Philippines, to enter into the United States on a permanent immigrant visa.

Additionally, we have incurred and will continue to incur additional legal and accounting expenses related to compliance with corporate governance and disclosure standards implemented by the Sarbanes-Oxley Act of 2002, the rules of the New York Stock Exchange and regulations of the Securities and Exchange Commission. If we are found in non-compliance with these laws and regulations, damages, civil and criminal penalties, injunctions and cease and desist orders may be imposed, which would negatively impact our business and operations. The costs required to comply with these laws and regulations affecting our business reduces our overall profitability, and reduces the assets and resources available for utilization in the expansion of our business operations.

Our profitability is impacted by our ability to leverage our cost structure.

We have technology, operations and human capital infrastructures to support our existing business and contemplated growth. In the event that our business does not grow at the rate that we had anticipated, our inability to reduce these costs would impair our profitability. Additionally, if we are not able to capitalize on this infrastructure, our earnings growth rate will be impacted.

The variation in pricing of the healthcare facility contracts under which we place temporary and permanent healthcare professionals impacts our profitability.

The pricing of our contracts with hospitals, healthcare facilities and physician practice groups may vary depending on circumstances, including geographic location, economic conditions and supply and demand factors. These pricing variables impact our gross margin and could result in decreased profitability if we are unable to renew existing accounts on economically favorable terms.

We may not be able to successfully implement our strategic growth, acquisition and integration strategies.

An effective growth management strategy is necessary to organically grow our current operations, and if we do not successfully execute on this growth strategy, our profitability could decline. We continue to explore strategic acquisition opportunities to supplement our organic growth strategy. Our acquisition and integration strategy involves significant risks and uncertainties, including appropriate valuation of target companies, current liquidity issues in the credit markets, the assumption of liabilities and exposure to unforeseen liabilities of acquired companies, difficulties integrating acquired personnel and corporate cultures into our business, the potential loss of key employees or customers of acquired companies, and the diversion of management attention from existing operations. We may not be able to fully integrate the operations of the acquired businesses with our own in an efficient and cost-effective manner. Acquisitions may also require significant expenditures of cash and other resources and assumption of debt that may ultimately negatively impact our overall financial performance.

Difficulties in maintaining our management information and communications systems may negatively impact our business operations and as a result, our financial performance.

Our ability to deliver our staffing services to our hospital, healthcare facility and physician practice group clients and manage our internal systems depends to a large extent upon our access to and the performance of our

15

management information and communications systems. These systems also maintain accounting and financial information, which we depend upon to fulfill our financial reporting obligations. If these systems do not adequately support our operations, these systems are damaged or service is disrupted or if we are required to incur significant additional costs to repair, maintain or expand these systems, our business and financial results could be materially adversely affected. Although we have risk mitigation measures, these systems, and our access to these systems, are not impervious to floods, fire, storms, or other natural disasters or service interruptions, and the loss of systems information could result in disruption to our business.

The challenge to the classification of certain of our healthcare professionals as independent contractors could adversely impact our profitability.

Although it is general industry standard to treat certain healthcare professionals, such as physicians, as independent contractors, there is a risk we could be subject to additional wage and insurance claims, and employment and payroll-related taxes if federal or state taxing authorities re-classify our independent contractor physicians and certified registered nurse anesthetists as employees, which would significantly reduce our profitability. In addition, many states have laws which prohibit non-physician owned companies from employing physicians, referred to as the corporate practice of medicine. If our independent contractor physicians are classified as employees, we could be found in violation of state laws that prohibit the corporate practice of medicine, which would have a substantial negative impact on our profitability.

The impact of medical malpractice and other claims asserted against us could subject us to substantial liabilities.

In recent years, our hospital, healthcare facility and physician practice group clients are subject to a number of legal actions alleging malpractice or related legal theories. Because our temporary and permanent healthcare professionals provide medical care and we recruit and assist in credentialing of these healthcare professionals, claims may be brought against us and our healthcare professionals relating to the recruitment and qualification of these healthcare professionals and the quality of medical care provided by our temporary healthcare professionals while on assignment or after placement at our hospital, healthcare facility and physician practice group clients. We and the healthcare professional are at times named in these lawsuits regardless of our contractual obligations, the competency of the healthcare professional, the standard of care provided by the healthcare professional or the quality of service that we provided. In some instances, we are required to indemnify hospital, healthcare facility and physician practice group clients contractually against some or all of these potential legal actions.

Also, because some of our temporary healthcare professionals are our employees, we may be subject to various employment claims and contractual disputes regarding the terms of a temporary healthcare professional s employment. Because we are in the business of placing our temporary healthcare professionals in the workplaces of other companies, we are subject to possible claims by our temporary healthcare professionals alleging discrimination, sexual harassment and other similar activities by our hospital and healthcare facility clients or their agents. We maintain a policy for employment practices coverage. However, the cost of defending such claims, even if groundless, could be substantial and the associated negative publicity could adversely affect our ability to attract, retain and place qualified individuals in the future.

We maintain various types of insurance coverage, including professional liability, workers compensation and employment practices, through insurance carriers, and we also self-insure for these claims through accruals for retention reserves. We may experience increased insurance costs and reserve accruals and may not be able to pass on all or any portion of increased insurance costs to our hospital, healthcare facility and physician practice group clients, thereby reducing our profitability. Our insurance coverage and reserve accruals may not be sufficient to cover all claims against us, and we may be exposed to substantial liabilities.

Terrorist threats or attacks may disrupt or adversely affect our business operations.

Our business operations may be interrupted or adversely impacted in the United States and abroad in the event of a terrorist attack or heightened security alerts. Our temporary healthcare professionals may become

16

reluctant to travel and may decline assignments based upon the perceived risk of terrorist activity, which would reduce our revenue and profitability. In addition, terrorist activity or threats may impede our access to our management and information systems resulting in loss of revenue. We do not maintain insurance coverage against terrorist attacks.

If we are unable to carry out our business strategy, our profitability could be negatively impacted.

Our success is dependent on our ability to execute our business strategy, which necessarily involves the successful operation of a number of integral components and business objectives. Our ability to execute these business objectives is dependent upon a sufficient cash flow and capital structure to support the business. If we are unable to access credit on commercially reasonable terms or our cash flow is significantly impaired, our profitability could be negatively impacted.

The loss of key officers and management personnel could adversely affect our ability to remain competitive.

We believe that the success of our business strategy and our ability to maintain our recent levels of profitability depends on the continued employment of our senior management team. We have an employment agreement only with Susan R. Nowakowski, our President and Chief Executive Officer. If members of our senior management team become unable or unwilling to continue in their present positions, our business and financial results could be adversely affected.

We have a substantial amount of goodwill on our balance sheet that may have the effect of decreasing our earnings or increasing our losses in the event that we are required to recognize an impairment to goodwill.

As of December 31, 2007, we had \$241.3 million of unamortized goodwill on our balance sheet, which represents the excess of the total purchase price of our acquisitions over the fair value of the net assets acquired. At December 31, 2007, goodwill represented 38.1% of our total assets.

SFAS No. 142, *Goodwill and Other Intangible Assets*, requires that goodwill not be amortized but rather that it be reviewed annually for impairment. In the event impairment is identified, a charge to earnings would be recorded. Although an impairment charge to earnings for goodwill would not affect our cash flow, it would decrease our earnings or increase our losses, as the case may be, and our stock price could be adversely affected. We have reviewed our goodwill for impairment in accordance with the provisions of SFAS No. 142, and have not identified any impairment to goodwill as of October 31, 2007, our annual impairment testing date.

We have a substantial accrual for self-insured retentions on our balance sheet, and any significant adverse adjustments in these accruals may have the effect of decreasing our earnings or increasing our losses.

We maintain accruals for self-insured retentions for professional liability, health insurance, workers compensation and other employment practices related matters on our balance sheet. Generally, increases to these accruals do not immediately affect our cash flow, but a significant increase to these self-insured retention accruals may decrease our earnings. We determine the adequacy of our self-insured retention accruals by

evaluating our historical experience and trends, related to both insurance claims and payments, information provided to us by our insurance brokers, attorneys and third party administrators, as well as industry experience and trends. If such information indicates that our accruals are overstated or understated, we reduce or provide for additional accruals, as appropriate.

17

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We believe that our leased space is adequate for our current needs. In addition, we believe that adequate space can be obtained to meet our foreseeable business needs. In accordance with, and as required by, the terms of our Credit Agreement, we have pledged substantially all of our assets and properties to our lenders under our Credit Agreement to secure our obligations thereunder. Our principal leases for office space during 2007 are identified in the chart below:

Location	Square Feet
	
San Diego, California (corporate headquarters)	175,672
Irving, Texas (all segments)	154,315
Huntersville, North Carolina (nurse and allied healthcare staffing segment)	30,870
Ft. Lauderdale, Florida (nurse and allied healthcare staffing segment)	27,146
Salt Lake City, Utah (locum tenens staffing segment)	25,043
Westminster, Colorado (nurse and allied healthcare staffing segment)	19,427
Atlanta, Georgia (physician permanent placement services segment)	13,302
Denver, Colorado (nurse and allied healthcare staffing segment)	10,519
Irvine, California (physician permanent placement services segment)	6,165
Birmingham (United Kingdom) (nurse and allied healthcare staffing segment)	5,001
Savannah, Georgia (nurse and allied healthcare staffing segment)	4,780
London (United Kingdom) (nurse and allied healthcare staffing segment)	4,398
Bangalore (India) (nurse and allied healthcare staffing segment)	3,305
Sydney (Australia) (nurse and allied healthcare staffing segment)	2,734

Item 3. Legal Proceedings

We are subject to various claims and legal actions in the ordinary course of our business. Some of these matters include professional liability, tax, payroll and employee-related matters and inquiries and investigations by governmental agencies regarding our employment practices. We are not aware of any pending or threatened litigation that we believe is reasonably likely to have a material adverse effect on our results of operations, financial position or liquidity.

Our hospital, healthcare facility and physician practice clients may also become subject to claims, governmental inquiries and investigations and legal actions to which we may become a party relating to services provided by our professionals. From time to time, and depending upon the particular facts and circumstances, we may be subject to indemnification obligations under our contracts with our hospital, healthcare facility and physician practice clients relating to these matters. At this time, we are not aware of any such pending or threatened litigation that we believe is reasonably likely to have a material adverse effect on our results of operations, financial position or liquidity.

Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of security holders during the fourth quarter of fiscal 2007.

18

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock has traded on the New York Stock Exchange under the symbol AHS since our initial public offering on November 13, 2001. Prior to that time, there was no public trading market for our common stock. The following table sets forth, for the periods indicated, the high and low sales prices reported by the New York Stock Exchange.

	Sales	Price
	High	Low
Year Ended December 31, 2006		
First Quarter	\$ 21.39	\$ 17.75
Second Quarter	\$ 21.90	\$ 17.28
Third Quarter	\$ 24.94	\$ 19.36
Fourth Quarter	\$ 28.33	\$ 23.34
Year Ended December 31, 2007		
First Quarter	\$ 29.10	\$ 20.75
Second Quarter	\$ 25.25	\$ 21.04
Third Quarter	\$ 22.38	\$ 16.62
Fourth Quarter	\$ 20.05	\$ 16.40

As of February 25, 2008, there were 33,830,346 shares of our common stock outstanding. On February 25, 2008, the last reported sale price of our common stock on the New York Stock Exchange was \$15.15 per share. As of the record date, February 14, 2008, shares were held by approximately 152 stockholders of record. Because many of our shares of common stock are held by brokers and other institutions on behalf of stockholders, we are unable to estimate the total number of stockholders represented by these record holders.

On November 2, 2005, we issued 2.3 million shares of common stock in connection with our acquisition of The MHA Group, Inc. (MHA), and we issued an additional 0.7 million shares on March 9, 2006 for payment of earn-out amounts as provided in the acquisition agreement. The issuance is exempt from the registration requirements of the Securities Act of 1933, as amended (the Securities Act), pursuant to Section 4(2) thereof and Regulation D promulgated thereunder (Regulation D), based upon representations that we have obtained from each MHA shareholder receiving such shares, including that such shareholder is an accredited investor as such term is defined in Rule 501(a) of Regulation D. On March 10, 2006, we filed a registration statement on Form S-3 to register the 2.3 million shares of common stock in connection with our acquisition of MHA and the additional 0.7 million shares for payment of the earn-out amounts as provided in the acquisition agreement. On April 18, 2007, we filed a Registration Statement on Form S-8 registering 3 million shares of our common stock reserved for issuance under the AMN Healthcare Equity Plan. The AMN Healthcare Equity Plan, as amended, was approved by the Company s stockholders on April 18, 2007.

From time to time, we repurchase our common stock in the open market pursuant to programs approved by our Board. We may repurchase our common stock for a variety of reasons, such as acquiring shares to offset dilution related to equity-based incentives and optimizing our capital structure. On July 10, 2007, we announced that our Board had authorized us to repurchase up to 1 million shares of our outstanding common stock in the open market commencing in the third quarter of 2007. We completed the 1 million shares repurchase at an average purchase price of \$18.48 per share, or an aggregate of \$18.5 million, during August 2007. The following table presents the detail of shares repurchased during the third quarter of 2007, which was the only quarter we repurchased the shares during 2007.

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
July 1 31, 2007				
August 1 31, 2007	1,000,000	\$ 18.48	1,000,000	
September 1 30, 2007				
Total	1,000,000	\$ 18.48	1,000,000	

We have not paid any dividends in the past and currently do not expect to pay cash dividends or make any other distributions in the future. We expect to retain our future earnings, if any, for use in the operation and expansion of our business. Any future determination to pay dividends will be at the discretion of our board of directors and will depend upon our financial condition, results of operations, capital requirements and such other factors as our Board deems relevant. In addition, our ability to declare and pay dividends on our common stock is subject to covenants in our credit facility. See Item 7. Management s Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources.

Additional information regarding our equity award plans and plan activity for the years ended December 31, 2007, 2006 and 2005 is provided in our consolidated financial statements in this Annual Report on Form 10-K in Notes to Consolidated Financial Statements, Note 10 Stock-Based Compensation and is incorporated herein by reference to our Proxy Statement under the heading Equity Compensation Plan Information at December 31, 2007 to be distributed in connection with our Annual Meeting of Stockholders to be held on April 9, 2008.

20

Performance Graph

This performance graph shall not be deemed filed with the SEC or subject to Section 18 of the Securities Exchange Act of 1934, as amended (the Exchange Act), nor shall it be deemed incorporated by reference in any of our filings under the Exchange Act or the Securities Act of 1933, as amended.

The graph below compares the total stockholder return on our Common Stock with the total stockholder return of (i) the New York Stock Exchange (NYSE) Composite Index, and (ii) the Dow Jones Business Training & Employment Agencies Index (BTEA), assuming an investment of \$100 on November 13, 2001 (the first day of trading in our common stock) in our Common Stock, the stocks comprising the NYSE Market Index, and the stocks comprising the BTEA.

Item 6. Selected Financial Data

The selected financial and operating data presented below should be read in conjunction with Item 7. Management s Discussion and Analysis of Financial Condition and Results of Operations and Item 8. Financial Statements and Supplemental Data appearing elsewhere in this Annual Report on Form 10-K. Our statements of operations data for the years ended December 31, 2007, 2006 and 2005, and the balance sheet data at December 31, 2007 and 2006 are derived from the audited financial statements included elsewhere in this Annual Report on Form 10-K. The statements of operations data for the years ended December 31, 2004 and 2003 and the balance sheet data at December 31, 2005, 2004 and 2003 are derived from our audited financial statements that do not appear herein. Because of our acquisition of MHA in November 2005, the consolidated statement of operations for the year ended December 31, 2005 only includes the results of operations of MHA since the date of acquisition. Our historical results are not necessarily indicative of our results of operations to be expected in the future.

Item 7. Management s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with our consolidated financial statements and the notes thereto and other financial information included elsewhere in this Annual Report on Form 10-K. Certain statements in this Management s Discussion and Analysis of Financial Condition and Results of Operations are forward-looking statements. See Special Note Regarding Forward-Looking Statements below.

Overview

We are the largest healthcare staffing company in the United States. As the largest nationwide provider of travel nurse and allied staffing services, locum tenens (temporary physician staffing) and physician permanent placement services, we recruit physicians, nurses, and allied healthcare professionals, our healthcare professionals , nationally and internationally and place them on assignments of variable lengths and in permanent positions at acute-care hospitals, physician practice groups and other healthcare settings, including rehabilitation centers, radiology imaging facilities, dialysis clinics and pharmacies throughout the United States.

For the year ended December 31, 2007, we recorded revenue of \$1,164.0 million, as compared to revenue of \$1,081.7 million and \$705.8 million for the years ended December 31, 2006 and 2005, respectively. We recorded net income of \$36.5 million for the year ended December 31, 2007, as compared to net income of \$35.1 million and \$22.2 million for the years ended December 31, 2006 and 2005, respectively.

Our staffing services are marketed to two distinct customer groups: (1) healthcare professionals and (2) hospitals, physician practice groups and other healthcare centers. We use distinct brands to market our differentiated services throughout the healthcare staffing spectrum.

We use a multi-brand recruiting strategy to enhance our ability to successfully attract healthcare professionals in the United States and internationally. We market our staffing opportunities to healthcare professionals under recruitment brands including American Mobile Healthcare, Medical Express, NurseChoice, NursesRx, Preferred Healthcare Staffing, Med Travelers, Platinum Select Staffing, Rx Pro Health, RN Demand, O Grady Peyton International, Staff Care and Merritt, Hawkins & Associates. Each brand has a distinct clinician focus, market strengths and brand reputation.

At the end of 2007, we had healthcare professionals on assignment at over 2,000 different healthcare facility clients. We provide staffing services mainly to acute care and sub-acute healthcare facilities, physician groups, dialysis centers, clinics, radiology imaging facilities and retail and mail-order pharmacies. We market our travel nursing services to hospitals and healthcare facilities generally under one brand, AMN Healthcare, as a single staffing provider with access to healthcare professionals from several nurse recruitment brands. We market our locum tenens staffing and physician permanent placement services under the brand names Staff Care and Merritt, Hawkins & Associates, respectively, and market our allied healthcare staffing services to hospitals and healthcare facilities generally under the brand names Med Travelers, Platinum Select Staffing and Rx Pro Health. Rx Pro Health is a pharmacy staffing company that we acquired in May 2007, and Platinum Select Staffing is an allied healthcare staffing company, whose assets we acquired in February 2008.

Physicians, nurses and allied healthcare professionals join us on temporary assignments for a wide variety of reasons that include: seeking flexible work opportunities, exploring different areas of the country, building clinical skills and experience by working at prestigious healthcare facilities, avoiding the demands and political environment of working as permanent staff and working through life and career transitions, and as a means of access into a permanent staff position with our clients.

Our large number of hospital, healthcare facility and other clients provides us with the opportunity to offer temporary positions typically in all 50 states and in a variety of work environments and clinical settings. In

23

Table of Contents

addition, we provide our temporary healthcare professionals with an attractive benefits package that may include free or subsidized housing, free or reimbursed travel, competitive wages, professional development opportunities, professional liability insurance, and, for employed professionals, a 401(k) plan and health insurance. We believe that we attract temporary healthcare professionals due to our long-standing reputation for providing a high level of service, our numerous job opportunities, our benefit packages, our innovative marketing programs and word-of-mouth referrals from our thousands of current and former healthcare professionals.

Our clients include hospitals and healthcare systems such as Georgetown University Hospital, HCA, NYU Medical Center, Stanford Health Care, UCLA Medical Center, The University of Chicago Hospitals, and Mayo Health System. We also provide services to government facilities, sub-acute healthcare facilities, physician practice groups, dialysis centers, clinics and schools.

Our hospital and healthcare facility clients utilize our services to cost-effectively manage both short and long-term shortages in their staff due to a variety of circumstances such as a lack of qualified, specialized local healthcare professionals, attrition, leave schedules, new unit openings, seasonal patient census variations and to identify candidates for permanent positions. In addition to providing continuity of care and quality patient care, we believe hospitals, healthcare facilities and other clients contract with us due to our access to a large national network of quality temporary and permanent healthcare professionals, our ability to meet their specific staffing needs, our flexible staffing assignment lengths and our reliable and superior customer service.

The physician permanent placement market has strong growth potential due to client demand for physicians that enable our clients to generate revenue. Physicians are significant drivers of revenue, influencing many hospitals, healthcare facilities and physician practice groups to devote the resources necessary to recruit them. While this demand creates significant competition for a limited supply of physicians, our national reach and brand recognition positions us well in this environment.

The strong demand and significant overlap of clients seeking physicians for both temporary and permanent placement assignments provide us an opportunity to cross-sell these complementary physician staffing services.

Recent Trends

The U. S. temporary healthcare staffing industry revenues are expected to grow by 8% in 2008 to \$12.3 billion according to self-reported growth estimates supplied by staffing companies to Staffing Industry Analysts, which was published in September 2007. Industry revenue estimates for the markets in which we provide temporary healthcare staffing services are \$2.7 billion for travel nursing, \$1.9 billion for locum tenens and \$3.5 billion for allied healthcare.

Our supply of healthcare professionals continues to be constrained relative to the demands of our healthcare facility clients. We have experienced a shortage in healthcare professionals in the markets in which we provide temporary healthcare staffing service in that we have more demand than we can fill in each of these markets.

Our nurse and allied healthcare staffing segment, the Company s largest reporting segment, experienced a strong demand and tight supply environment during 2005 and early 2006. However, since the last quarter of 2006, the nurse and allied healthcare staffing industry has generally been experiencing a lessening of demand in certain key states, such as California, which has been partially offset by increased demand in other parts of the country. The lower demand in certain states has been driven by several factors, such as relatively flat hospital admission levels, the

aggressive hiring of new graduates and some improvement in hospitals ability to retain permanent labor.

We recruit a small percentage of nurses from international channels through our O Grady Peyton International (OGP) brand to meet our facility clients long-term staffing needs. During 2007, revenue from OGP was about 5% of our consolidated revenue. Our continued utilization of this international supply channel is reliant upon an increase or exemption from current permanent immigrant visa quotas. Since late 2006, there have

24

Table of Contents

effectively been no permanent immigrant visas available for nurses overseas as a result of these quotas, which has limited our ability to place any new international nurses on assignment. Looking forward, we anticipate that additional visa quotas will be made available for our nurses overseas either through legislative relief or the normal progress of the visa bulletin. Internationally trained nurses have represented an important supply channel, comprising roughly 15% of newly licensed nurses since 2005.

In addition to these demand and supply dynamics, in the first half of the year, we experienced fluctuations in direct costs, primarily for increased housing and health insurance costs, associated with the placement of temporary nurse and allied professionals that impacted our gross margins in this segment.

Locum tenens physicians are used by our hospitals, healthcare facility and physician practice group clients to fill temporary vacancies due to vacations and leave schedules, and increasingly, to bridge staffing gaps while these clients seek permanent physician candidates. Staffing Industry Analysts estimates the locum tenens market to be the fastest-growing segment of the healthcare staffing industry. The demand environment for locum tenens services continues to be strong, and socioeconomic factors, such as increased physician emphasis on job and lifestyle flexibility, suggest a growing number of physicians are embracing locum tenens as a practice style.

The market for physician permanent placement services also continues to experience a strong demand environment that has contributed to growth in this segment of our business over the past year. As with our locum tenens business, the supply of candidates is insufficient to meet the demands of our clients seeking a physician to join their practice or staff.

Critical Accounting Principles and Estimates

We have identified the following critical accounting policies that affect the more significant judgments and estimates used in the preparation of our consolidated financial statements. The preparation of our consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and judgments that affect our reported amounts of assets and liabilities, revenue and expenses, and related disclosures of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates, including those related to asset impairment, accruals for self-insurance and compensation and related benefits, accounts receivable and contingencies and litigation and share-based payments. These estimates are based on the information that is currently available to us and on various other assumptions that we believe to be reasonable under the circumstances. Actual results could vary from these estimates under different assumptions or conditions.

We believe that the following critical accounting policies affect the more significant judgments and estimates used in the preparation of our consolidated financial statements:

Goodwill and Intangible Assets

We have recorded goodwill and intangible assets resulting from our past acquisitions. Commencing with the adoption of Statement of Financial Accounting Standards (SFAS) No. 142, *Goodwill and Other Intangible Assets*, on January 1, 2002, we ceased amortizing goodwill and have performed annual impairment analyses each year to assess the recoverability of the goodwill and indefinite lived intangibles, in accordance with the provisions of SFAS No. 142. Application of the goodwill impairment test requires judgment, including the identification of reporting units, assigning assets and liabilities to reporting units, assigning goodwill to reporting units, and determining the fair value of each reporting unit.

Significant judgments required to estimate the fair value of reporting units include estimating future cash flows, and determining appropriate discount rates, growth rates and other assumptions. Changes in these estimates and assumptions could materially affect the determination of fair value for each reporting unit which could trigger impairment. We performed the annual impairment test at October 31, 2006 and 2007, respectively, and determined there was no impairment of goodwill. No events have occurred subsequent to October 31, 2007 that indicate impairment may have occurred.

25

Table of Contents

SFAS No. 142 also requires that intangible assets with estimable useful lives continue to be amortized over their respective estimated useful lives and reviewed for impairment in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. We have analyzed our amortizable intangible assets for impairment in accordance with the provisions of SFAS No. 144 and determined that there is no impairment.

If we are required to record an impairment charge in the future, it could have an adverse impact on our results of operations.

Professional Liability Reserve

We maintain an accrual for professional liability self-insured retention limits, which is included in accounts payable and accrued expenses and other long term liabilities in our consolidated balance sheets. We determine the adequacy of this accrual by evaluating our historical experience and trends, loss reserves established by our insurance carriers, management and third party administrators, as well as through the use of independent actuarial studies. For the nurse and allied healthcare staffing segment, we obtain updated actuarial studies on a regular basis that use our historical claims data and industry data to determine the appropriate reserves for incurred, but not reported, professional liability claims for each year, with reserves for reported claims based upon loss reserves established by management and our third party administrators. For the locum tenens staffing segment, we obtain updated actuarial studies on a regular basis that primarily utilize industry data to determine the appropriate reserves for both reported claims and incurred, but not reported, claims.

Self-Insured Health Benefit Claims Reserve

We maintain an accrual for self-insured health benefits we provide to our corporate employees and temporary nurse and allied healthcare professionals, which is included in accrued compensation and benefits in our consolidated balance sheets. We determine the adequacy of this accrual by evaluating our historical experience and trends related to both health insurance claims and payments, information provided to us by our insurance broker and third party administrator and industry experience and trends. If such information indicates that our accruals are overstated or understated, we reduce or provide for additional accruals. Our accrual is based on (i) a monthly average of our actual historical health insurance claim amounts and (ii) the average period of time from the date the claim is incurred to the date that it is reported to us and paid. We believe this is the best estimate of the amount of incurred, but not reported, self-insured health benefit claims at year-end. Historically, our accrual for health insurance has been adequate to provide for incurred claims and has fluctuated with increases or decreases in the average number of plan participants, changes in our claims experience and changes in the reporting and payment processing time for claims.

Workers Compensation Reserve

We maintain an accrual for workers compensation self-insured retention limits, which is included in accrued compensation and benefits and other long term liabilities in our consolidated balance sheets. We determine the adequacy of these accruals by evaluating our historical experience and trends, loss reserves established by our insurance carriers and third party administrators, as well as through the use of independent actuarial studies. We obtain updated actuarial studies on a semi-annual basis that use our payroll and actual claims data, as well as industry data, to determine the appropriate reserve both for reported claims and incurred, but not reported, claims for each policy year. The actuarial study for workers compensation provides us with the estimated losses for prior policy years and an estimated percentage of payroll compensation to be accrued for the current year. We record our accruals based on the amounts provided in the actuarial study, and we believe this is the best estimate of our liability for reported claims and incurred, but not reported, claims.

26

Accounts Receivable

Accounts receivable are recorded at the invoiced amount and are non-interest bearing. We maintain an allowance for doubtful accounts for estimated credit losses resulting from collection risks, including the inability of our customers to make required payments under contractual agreements. This results in a provision for bad debt expense. The allowance for doubtful accounts is reported as a reduction of accounts receivable in our consolidated balance sheets. We determine the adequacy of this allowance by evaluating historical delinquency and write-off trends, the financial condition and credit risk and histories of each customer, historical payment trends and current economic conditions. If the financial condition of our customers deteriorates, resulting in an impairment of their ability to make payments, additional allowances would be provided.

Contingent Liabilities

We are subject to various claims and legal actions in the ordinary course of our business. Some of these matters include tax, payroll and employee-related matters and investigations by governmental agencies regarding our employment practices. We are the subject of an assessment by the California Employment Development Department (EDD) with respect to the payment of certain payroll related taxes, in connection with our locum tenens staffing segment, for the period between April 1, 2001 and March 31, 2004. We have appealed the EDD s assessment. Although we have not received an assessment for the subsequent periods, we are the subject of an audit by the EDD with respect to these matters for the subsequent periods. As we become aware of such claims and legal actions, we provide accruals if the exposures are probable and estimable. If an adverse outcome of such claims and legal actions is reasonably possible, we assess materiality and provide disclosure, as appropriate. We may also become subject to claims, governmental inquiries and investigations and legal actions relating to services provided by our temporary healthcare professionals, and we maintain accruals for these matters if the amounts are probable and estimable. We currently are not aware of any such pending or threatened litigation that would be considered reasonably likely to have a material adverse effect on our consolidated financial position, results of operations or liquidity.

Share-Based Payments

Prior to January 1, 2006, we accounted for our share-based employee compensation plans under the measurement and recognition provisions of Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and related Interpretations, as permitted by SFAS No. 123, Accounting for Stock-Based Compensation. We also provided disclosures in accordance with the requirements of SFAS No. 123, as amended by SFAS No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure.

Effective January 1, 2006, we adopted the provisions of revised SFAS No. 123 (SFAS No. 123R), *Share-Based Payment*, which established accounting for share-based awards exchanged for employee services and requires companies to expense the estimated fair value of these awards over the requisite employee service period. Accordingly, stock-based compensation cost is measured at grant date, based on the fair value of the award, and is recognized as expense over the employee s requisite service period. The measurement of stock based compensation cost is based on several criteria including, but not limited to, the valuation model used and associated input factors such as expected term of the award, our stock price volatility, dividend rate, risk free interest rate, and award forfeiture rate. The input factors to use in the valuation model are based on subjective future expectations combined with management judgment. We estimate the fair value of stock options and stock appreciation rights granted using the Black-Scholes valuation model and the assumptions shown in Note 10(b) to the accompanying consolidated financial statements. We use historical data to estimate pre-vesting equity award forfeitures and record stock-based compensation expense only for those awards that are expected

27

to vest. We estimate the expected term, dividend yield, and risk-free interest rate assumptions consistent with the methodologies used prior to January 1, 2006. After consideration of both our implied volatility and historical volatility, we determined our historical volatility to be the most accurate estimate of future volatility and therefore utilize this measure. Prior to January 1, 2006, we estimated volatility based on a combination of our historical volatility rate and the historical volatility rate of comparable companies. The fair value of equity awards granted is amortized on a straight-line basis over the requisite service periods of the awards, which are the vesting periods. If factors change, we may decide to use different assumptions under the Black-Scholes valuation model, or a different valuation model, in the future, which could materially affect our net income and earnings per share.

Results of Operations

The following table sets forth, for the periods indicated, certain statements of operations data as a percentage of revenue. Our results of operations include three reportable segments: (1) nurse and allied healthcare staffing; (2) locum tenens staffing; and (3) physician permanent placement services. We completed our acquisition of MHA in November 2005, therefore the consolidated statement of operations for the year ended December 31, 2005 only includes the results of operations of MHA and the locums tenens staffing and physician permanent placement services segments since the date of acquisition. Accordingly, reporting segment information in the following table would not be meaningful. Additionally, as reporting comparative information for the year ended December 31, 2005 would not be meaningful, we have included reporting segment information only for the years ended December 31, 2006 and 2007. Our historical results are not necessarily indicative of our results of operations to be expected in the future.

	Years I	Years Ended December 31,			
	2007	2006	2005		
Consolidated Statements of Operations:					
Revenue	100.0%	100.0%	100.0%

•					
Income before income taxes	5.2	5.2	5.3		
Income tax expense	2.1	2.0	2.1		
-					
Net income	3.1%	3.2%	3.2%		

Comparison of Results for the Year Ended December 31, 2007 to the Year Ended December 31, 2006

Revenue. Revenue increased 8%, to \$1,164.0 million for 2007 from \$1,081.7 million for 2006, primarily due to an increase in the number of days filled by healthcare professionals in the locum tenens staffing segment and an increase in average bill rates in the locum tenens and nurse and allied staffing segments.

Nurse and allied healthcare staffing segment revenue increased 5%, to \$802.0 million for 2007 from \$763.2 million for 2006. Of the \$38.8 million increase, \$22.5 million was attributable to the increase in revenue generated per temporary healthcare professional due primarily to an increase in the average bill rates charged to hospital and healthcare facility clients, \$5.6 million was attributable to an increase in the average number of temporary healthcare professionals on assignment, \$5.0 million was attributable to a shift in the mix of temporary healthcare professionals working on flat rate contracts to hours and days worked contracts, and \$5.7 million was attributable to the acquisition of Rx Pro Health in May 2007.

28

Table of Contents

Locum tenens staffing segment revenue increased 16%, to \$310.5 million for 2007 from \$268.1 million for 2006. Of the \$42.4 million increase, \$25.4 million was attributable to an increase in the number of days filled by healthcare professionals during 2007, and \$17.0 million was attributable to a combination of bill rate increases and a shift in the mix of healthcare specialties worked.

Physician permanent placement services segment revenue increased 2%, to \$51.5 million for 2007 from \$50.4 million for 2006.

Cost of Revenue. Cost of revenue increased 9%, to \$860.9 million for 2007 from \$792.4 million for 2006, primarily due to an increase in the number of days filled by healthcare professionals in the locum tenens staffing segment and an increase in compensation paid and housing provided to healthcare professionals in the nurse and allied healthcare staffing segment.

Nurse and allied healthcare staffing segment cost of revenue increased 6%, to \$611.2 million for 2007 from \$575.8 million for 2006. Of the \$35.4 million increase, \$23.9 million was attributable to net increases in compensation, primarily related to wages, housing and health insurance costs provided to our temporary healthcare professionals, \$4.2 million was attributable to an increase in the average number of temporary healthcare professionals on assignment, \$4.1 million was attributable to a shift in the mix of temporary healthcare professionals working on flat rate contracts to hours and days worked contracts, and \$3.2 million was attributable to the acquisition of Rx Pro Health in May 2007.

Locum tenens staffing segment cost of revenue increased 17%, to \$229.7 million for 2007 from \$197.1 million for 2006. Of the \$32.6 million increase, \$18.7 million was attributable to an increase in the number of days filled by healthcare professionals during 2007, with the remaining \$13.9 million attributable to a combination of an increase in compensation provided to our healthcare professionals and a shift in the mix of physician specialties worked.

Physician permanent placement services segment cost of revenue increased 3%, to \$20.0 million for 2007 from \$19.5 million for 2006.

Gross Profit. Gross profit increased 5%, to \$303.2 million for 2007 from \$289.3 million for 2006, representing gross margins of 26.0% and 26.7%, respectively. Gross margin by reportable segment for 2007 and 2006 was 23.8% and 24.6% for nurse and allied healthcare staffing, 26.0% and 26.5% for locum tenens staffing and 61.3% and 61.4% for physician permanent placement services, respectively. The decrease in the nurse and allied healthcare staffing segment gross margin was primarily attributable to an increase in housing costs, and the decrease in the locum tenens staffing segment gross margin was primarily attributable to a shift in the mix of physician specialties.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased 6%, to \$218.3 million for 2007 from \$205.5 million for 2006. The increase was primarily attributable to increases in professional liability insurance costs, stock-based compensation expense, additional expenses since the acquisition of Rx Pro Health in May 2007, and restructuring related costs associated with our OGP business. The increases were partially offset by decreases in professional services expense, travel and marketing expenses. Selling, general and administrative expenses by reportable segment for 2007 and 2006, respectively, were \$140.8 million and \$137.2 million for nurse and allied healthcare staffing, \$58.2 million and \$50.2 million for locum tenens staffing and \$19.3 million and \$18.1 million for physician permanent placement services.

Depreciation and Amortization Expenses. Amortization expense increased 17%, to \$3.5 million for 2007 from \$3.0 million for 2006, with the increase primarily attributable to the amortization of identifiable amortizable intangible assets acquired through the acquisition of Rx Pro Health in May 2007. Depreciation expense increased to \$8.2 million for 2007 from \$7.3 million for 2006, with the increase primary attributable to

additional internally developed software.

Interest Expense, Net. Interest expense, net, was \$12.5 million for 2007 as compared to \$16.7 million for 2006. The \$4.2 million decrease was primarily attributable to a lower average debt outstanding balance for 2007 as compared to 2006.

Income Tax Expense. Income tax expense increased to \$24.3 million for 2007 from \$21.7 million for 2006, reflecting effective income tax rates of 39.9% and 38.2% for these periods, respectively. The increase in the effective income tax rate was primarily attributable to increases in the state tax provision and a \$0.9 million tax provision recorded in 2007 for uncertain tax positions liability.

Comparison of Results for the Year Ended December 31, 2006 to the Year Ended December 31, 2005

Revenue. Revenue increased 53%, to \$1,081.7 million for 2006 from \$705.8 million for 2005. Of the \$375.9 million increase, \$313.6 million was attributable to the acquisition of MHA in November 2005, \$32.1 million was attributable to the organic increase in revenue generated per temporary healthcare professional due primarily to an increase in the average bill rates charged to hospital and healthcare facility clients, \$15.1 million was attributable to a shift in the mix of temporary healthcare professionals working on flat rate contracts to hours and days worked contracts and \$15.1 million was attributable to the increase in the average number of temporary healthcare professionals on assignment. Revenue by reportable segment for 2006 was \$763.2 million for nurse and allied healthcare staffing, \$268.1 million for locum tenens staffing and \$50.4 million for physician permanent placement services.

Cost of Revenue. Cost of revenue increased 48%, to \$792.4 million for 2006 from \$535.6 million for 2005. Of the \$256.8 million increase, \$215.7 million was attributable to the acquisition of MHA in November 2005, \$17.3 million was attributable to net increases in compensation provided to our temporary healthcare professionals, which was net of \$2.4 million of worker s compensation reserve adjustments, \$12.3 million was attributable to the shift in the mix of temporary healthcare professionals working on flat rate contracts to hours and days worked contracts and \$11.5 million was attributable to the increase in the average number of temporary healthcare professionals on assignment. Cost of revenue by reportable segment for 2006 was \$575.8 million for nurse and allied healthcare staffing, \$197.1 million for locum tenens staffing and \$19.5 million for physician permanent placement services.

Gross Profit. Gross profit increased 70%, to \$289.3 million for 2006 from \$170.2 million for 2005, representing gross margins of 26.7% and 24.1%, respectively. The increase in gross margin was primarily attributable to an increase in the spread between bill rates and pay rates, lower workers compensation costs due primarily to an actuarial-based reserve reduction during 2006, and the addition of the higher gross margin locum tenens staffing and physician permanent placement services segments through the acquisition of MHA in November 2005. Gross margin by reportable segment for 2006 was 24.6% for nurse and allied healthcare staffing, 26.5% for locum tenens staffing and 61.4% for physician permanent placement services.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased 75%, to \$205.5 million for 2006 from \$117.3 million for 2005. Of the \$88.2 million increase, \$67.6 million was attributable to the acquisition of MHA in November 2005, which was net of a \$2.6 million actuarial based reduction to our professional liability reserve during the three months ended December 31, 2006, \$12.2 million was attributable to an increase in employee expenses primarily to support growth in the nurse and allied healthcare staffing segment, \$6.3 million was attributable to the increase in non-cash stock-based compensation charges resulting from the adoption of SFAS No. 123R on January 1, 2006, and the remaining \$2.1 million increase was primarily attributable to increases in office expenses and travel and related expense, partially offset by a decrease in professional liability insurance expenses. Selling, general and administrative expenses by reportable segment for 2006 was \$137.2 million for nurse and allied healthcare staffing, \$50.2 million for locum tenens staffing and \$18.1 million for physician permanent placement services.

Depreciation and Amortization. Depreciation expense increased 30%, to \$7.3 million in 2006 from \$5.6 million in 2005. The increase was primarily attributable to the acquisition of MHA in November 2005.

30

Table of Contents

Amortization expense was \$3.0 million in 2006 and \$0.6 million in 2005. The increase was primarily attributable to the amortization of identifiable amortizable intangible assets acquired through the acquisition of MHA in November 2005.

Interest Expense, *Net.* Interest expense, net, was \$16.7 million for 2006 as compared to \$9.6 million for 2005. The increase was primarily attributable to interest expense on additional borrowings in connection with the acquisition of MHA in November 2005.

Income Tax Expense. Income tax expense increased to \$21.7 million for 2006 from \$14.9 million for 2005, reflecting effective income tax rates of 38.2% and 40.2% for these periods, respectively. The decrease in the effective income tax rate in 2006 was primarily attributable to decreases in the state tax provision and a \$0.4 million tax benefit recorded in 2006 from the adjustment of deferred taxes due to recently enacted Texas tax legislation.

Liquidity and Capital Resources

Historically, our primary liquidity requirements have been for acquisitions, working capital requirements and debt service under our credit facility. We have funded these requirements through internally generated cash flow and funds borrowed under our credit facility. At December 31, 2007, \$147.0 million was outstanding under our credit facility. We believe that cash generated from operations and available borrowings under our revolving credit facility will be sufficient to fund our operations for the next 12 months. We expect to be able to finance future acquisitions either with cash provided from operations, borrowings under our revolving credit facility, bank loans, debt or equity offerings, or some combination of the foregoing. The following discussion provides further details of our liquidity and capital resources.

Operating Activities:

Historically, our principal working capital need has been for accounts receivable. At December 31, 2007 and December 31, 2006, our Days Sales Outstanding (DSO) was 59 days and 63 days, respectively. The decrease in DSO is due primarily to an improvement in collection efforts during the twelve months ended December 31, 2007. Our principal sources of cash to fund our working capital needs are cash generated from operating activities and borrowings under our revolving credit facility. Net cash provided by operations increased \$25.1 million to \$79.6 million in 2007 from \$54.5 million in 2006. This increase in net cash provided by operations was primarily driven by increased cash collected on accounts receivable during the twelve months ended December 31, 2007, partially offset by income tax related decreases, decreases in accrued compensation and benefits and increases in deposits and other assets.

Investing Activities:

We continue to have relatively low capital investment requirements. Capital expenditures were \$9.2 million, \$9.7 million and \$3.8 million in 2007, 2006 and 2005, respectively. In 2007, our capital expenditures were \$6.9 million for purchased and internally developed software and \$2.3 million for computers, furniture and equipment, leasehold improvements and other expenditures. We expect our future capital expenditure requirements to be similar to 2007 in relation to revenue.

Our business acquisition expenditures were \$5.5 million in 2007 compared to \$36.0 million in 2006 and \$111.5 million in 2005. Of the \$5.5 million of expenditures in 2007, we paid \$5.2 million cash consideration for the acquisition of Rx Pro Health in May 2007, which was paid with cash provided by operations. The remaining \$0.3 million related to transaction costs incurred for the acquisition. On February 15, 2008, we acquired substantially all of the assets of Platinum Select, L.P. (Platinum Select Staffing) for up to \$50.3 million in cash, consisting of an initial payment of \$32.9 million and a potential additional earn-out payment based on 2008 performance. We financed the acquisition using cash on hand at the purchase date and our revolving credit facility. We will continue to evaluate and look for acquisition opportunities that may require additional funding.

Financing Activities:

Our credit facility, the Second Amended and Restated Credit Agreement (Credit Agreement), provides for, among other things, a \$75.0 million secured revolving credit facility, a \$30.0 million letter of credit sub-facility, a \$15.0 million swing-line sub-facility, all maturing in November 2010, and a \$235.0 million secured term loan facility maturing in November 2011. The secured term loan facility was used primarily to fund our acquisition of MHA in November 2005, pay off then-existing borrowings, and repurchase shares of our common stock in May 2006. On July 6, 2007, we entered into a Second Amendment (the Second Amendment) to our Credit Agreement. The Second Amendment provided that we may repurchase our common stock in an aggregate cash amount not to exceed \$25 million, provided that no default or event of default exists either before or after giving effect to such restricted payment and such repurchase occurs on or before September 30, 2007. We completed the repurchase of 1 million shares during August 2007, at an average purchase price of \$18.48 per share, resulting in an aggregate purchase price of \$18.5 million.

The revolving credit facility portion of our Credit Agreement carries an unused fee of between 0.5% and 0.375% per annum based on our then current leverage ratio, and there are no mandatory reductions in the revolving commitment under the revolving credit facility. Borrowings under this revolving credit facility bear interest at floating rates based upon either a LIBOR or a prime interest rate option selected by us, plus a spread of 1.50% to 2.25% and 0.50% to 1.25%, respectively, to be determined based on our then current leverage ratio. Amounts available under our revolving credit facility may be used for working capital, capital expenditures, permitted acquisitions and general corporate purposes, subject to various limitations. As of December 31, 2007, there was no outstanding balance on our revolving credit facility.

The term loan portion of our Credit Agreement is subject to quarterly amortization of principal (in equal installments), with an amount equal to 1.25% of the initial aggregate principal amount of the facility payable quarterly through September 30, 2007 (except in the case of the initial quarterly payment on June 30, 2006 of 2.5%) and 2.5% of the initial aggregate principal amount of the facility payable quarterly from December 31, 2007 through September 30, 2010 with any remaining amounts payable in 2011. The term loan portion of our credit facility bears interest, at our option, at either LIBOR plus 1.75% or the Base Rate plus 0.75%. Voluntary prepayments of the term loan portion of the credit facility are applied as we may elect, including ratably to the remaining quarterly principal amortization payments. In September and November 2007, we made voluntary prepayments of \$8.0 million and \$6.0 million, respectively, which were applied ratably to the remaining quarterly amortization payments. In connection with these voluntary prepayments, we wrote off \$0.1 million of deferred financing costs at each voluntary prepayment, which were recorded in interest expense. In March, June, September and December 2007, we made the quarterly amortization payments of \$2.3 million, \$2.3 million, \$2.2 million and \$4.1 million, respectively.

We are required to make additional mandatory prepayments on the term loan with the proceeds of asset dispositions, extraordinary receipts, debt issuances and certain equity issuances. We also are required to make mandatory prepayments on the term loan within ninety days after the end of each fiscal year, commencing with the fiscal year ended December 31, 2006, in an amount equal to 50% of our excess cash flow (as defined in the Credit Agreement), less any voluntary prepayments made during the fiscal year. These mandatory prepayment amounts, if any, are applied ratably to the remaining quarterly amortization payments. The voluntary prepayments made throughout the year, in addition to the 10 million mandatory prepayment made in February, 2008, satisfied this additional prepayment requirement for the year ending December 31, 2007.

We are required to maintain a maximum leverage ratio, based on EBITDA and funded indebtedness as defined in the Credit Agreement, as of the end of each fiscal quarter of not more than 3.25 to 1.00 for the fiscal quarter ending December 31, 2007, decreasing throughout the term of the agreement to ultimately arrive at a ratio of 2.00 to 1.00 for the fiscal quarter ending March 31, 2009 and thereafter. We are also required to maintain a minimum fixed charge coverage ratio, based on EBITDA and debt and interest payments as defined in the Credit Agreement, as of the end of each fiscal quarter of not less than 1.50 to 1.00 for the fiscal quarter ending December 31, 2007, decreasing throughout the term of the agreement to ultimately arrive at a ratio of 1.25 to

32

1.00 for the fiscal quarter ending September 30, 2008 and thereafter. We are also subject to limitations on the amount of our annual capital expenditures and on the amount of consolidated total assets and consolidated EBITDA that may be owned or attributable to our foreign subsidiaries. We were in compliance with these requirements at December 31, 2007.

Under our Credit Agreement, our subsidiaries are not permitted to pay dividends or distributions to us, except for certain permitted dividends and distributions, including those related to taxes, certain reporting obligations under federal and state law and certain other ordinary course operating expenses, subject to the limitations contained in our Credit Agreement.

We are also required to maintain interest rate protection on at least 50% of the term loan portion of our Credit Agreement beginning November 2006 until May 2009. As of December 31, 2007, we maintain three interest rate swap agreements with notional amounts totaling \$75 million. We pay fixed rates ranging from 4.87% to 4.95% under these agreements and receive a floating three-month LIBOR. The agreements expire beginning June 2008 through December 2009, and no initial investments were made to enter into these agreements.

At December 31, 2007 and 2006, the interest rate swap agreements had a fair value of \$(1.1) million and \$0.5 million, respectively, which is included in other assets and liabilities in the accompanying consolidated balance sheets. We have formally documented the hedging relationships and account for these arrangements as cash flow hedges.

As of December 31, 2007 and 2006, our credit facility also served to collateralize certain letters of credit aggregating \$20.0 million and \$19.5 million, respectively, issued by us in the normal course of business.

Contractual Obligations

The following table summarizes our contractual obligations as of December 31, 2007 (in thousands):

		Fiscal Year					
	2008	2009	2010	2011	2012	Thereafter	Total
Notes payable (1)	\$ 35,092	\$ 23,802	\$ 43,450	\$ 68,503	\$	\$	\$ 170,847
Capital lease obligations (2)	730	720	392	123	23		1,988
Operating lease obligations (3)	13,377	13,283	12,970	12,433	11,235	54,882	118,180
Cash holdback (4)	13,600	·			·		13,600
Total contractual obligations	\$ 62,799	\$ 37,805	\$ 56,812	\$ 81,059	\$ 11,258	\$ 54,882	\$ 304,615

(1) Amounts represent contractual amounts due, including interest.

- (2) Amounts represent contractual amounts due, including interest, with initial or remaining lease terms in excess of one year.
- (3) Amounts represent minimum contractual amounts, with initial or remaining lease terms in excess of one year. We have assumed no escalations in rent or changes in variable expenses other than as stipulated in lease contracts.
- (4) Amounts represent the cash holdback payable in cash in connection with the MHA acquisition.

We adopted the provisions of FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes*, on January 1, 2007. In addition to the above disclosed contractual obligations, the FIN 48 tax liability was \$6.1 million at December 31, 2007. Based on the uncertainties associated with the settlement of these items, we are unable to make reasonably reliable estimates of the period of potential cash settlements, if any, with taxing authorities.

33

Off-Balance Sheet and Other Financing Arrangements

At December 31, 2007 and 2006, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance, variable interest or special purpose, which would have been established for the purpose of facilitating off-balance-sheet arrangements or other contractually narrow or limited purposes. In addition, we do not engage in trading activities involving non-exchange traded contracts. As such, we are not materially exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in such relationships. We do not have relationships or transactions with persons or entities that derive benefits from their non-independent relationship with us or our related parties other than what is disclosed in Item 8. Financial Statements and Supplementary Data Notes to Consolidated Financial Statements Note 11.

Potential Fluctuations in Quarterly Results and Seasonality

Due to the regional and seasonal fluctuations in the hospital patient census and staffing needs of our hospital and healthcare facility and other clients and due to the seasonal preferences for destinations of our temporary healthcare professionals, revenue, earnings and the number of temporary healthcare professionals on assignment are subject to moderate seasonal fluctuations. Many of our hospital and healthcare facility clients are located in areas that experience seasonal fluctuations in population during the winter and summer months. These facilities adjust their staffing levels to accommodate the change in this seasonal demand and many of these facilities utilize temporary healthcare professionals to satisfy these seasonal staffing needs. This historical seasonality of revenue and earnings may vary due to a variety of factors and the results of any one quarter are not necessarily indicative of the results to be expected for any other quarter or for any year.

Inflation

Although inflation has abated during the last several years, the rate of inflation in healthcare related services continues to exceed the rate experienced by the economy as a whole. Our contracts typically provide for an annual increase in the fees paid to us by our clients based on increases in various inflation indices allowing us to pass on inflation costs to our clients.

Recent Accounting Pronouncements

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157 (SFAS No. 157), *Fair Value Measurements*. SFAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures related to fair value measurements. SFAS No. 157 does not require any new fair value measurements, but provides guidance on how to measure fair value by providing a fair value hierarchy used to classify the source of the information. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued FASB Staff Position No. 157-2, Effective Date of FASB Statement No. 157, which permits the deferral of the effective date of SFAS No. 157 to fiscal years beginning after November 15, 2008 for all nonfinancial assets and liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis. We are required to adopt SFAS No. 157 beginning January 1, 2008 except as it applies to those nonfinancial assets and nonfinancial liabilities, and we do not expect the adoption will have a material effect on its consolidated financial statements.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159 (SFAS No. 159), *The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115.* This statement permits, but does not require, entities to

measure certain financial instruments and other assets and liabilities at fair value on an instrument-by-instrument basis. Unrealized gains and losses on items for which the fair value option has been elected should be recognized in earnings at each subsequent

34

reporting date. SFAS No. 159 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years, and cannot be adopted early unless SFAS No. 157 is also adopted. We are required to adopt SFAS No. 159 beginning January 1, 2008, and we do not expect the adoption will have a material effect on our consolidated financial statements.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 141R (SFAS No. 141R), *Business Combinations*. This statement establishes principles and requirements for the reporting entity in a business combination, including recognition and measurement in the financial statements of the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree. This statement also establishes disclosure requirements to enable financial statement users to evaluate the nature and financial effects of the business combination. SFAS No. 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008, and interim periods within those fiscal years. We are required to adopt SFAS No. 141R beginning January 1, 2009.

Special Note Regarding Forward-Looking Statements

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. We based these forward-looking statements on our current expectations and projections about future events. Our actual results could differ materially from those discussed in, or implied by, these forward-looking statements. Forward-looking statements are identified by words such as believe, anticipate, expect, intend, plan, will, other similar expressions. In addition, any statements that refer to expectations, projections or other characterizations of future events or circumstances are forward-looking statements. The following factors could cause our actual results to differ materially from those implied by the forward-looking statements in this Annual Report:

our ability to continue to recruit qualified temporary and permanent healthcare professionals at reasonable costs;

our ability to retain qualified temporary healthcare professionals for multiple assignments at reasonable costs;

our ability to attract and retain sales and operational personnel;

our ability to enter into contracts with hospitals, healthcare facility clients, affiliated healthcare networks and physician practice groups on terms attractive to us and to secure orders related to those contracts;

our ability to demonstrate the value of our services to our healthcare and facility clients;

our ability to maintain and enhance the brand identities we have developed, at reasonable costs;

changes in the timing of hospital, healthcare facility and physician practice group clients orders for temporary healthcare professionals;

the general level of patient occupancy and utilization of services at our hospital and healthcare facility clients facilities, including the potential impact on such utilization caused by adoption of alternative modes of healthcare delivery, which utilization may influence

demand for our services;

the overall level of demand for services offered by temporary and permanent healthcare staffing providers;

the ability of our hospital, healthcare facility and physician practice group clients to retain and increase the productivity of their permanent staff;

35

Table of Contents

the variation in pricing of the healthcare facility contracts under which we place temporary healthcare professionals;

our ability to successfully design our strategic growth, acquisition and integration strategies and to implement those strategies, including integration of acquired companies accounting, management information, human resource and other administrative systems, and implementation or remediation of controls, procedures and policies at acquired companies;

our ability to leverage our cost structure;

access to and undisrupted performance of our management information and communication systems, including use of the Internet, and our candidate and client databases and payroll and billing software systems;

our ability to keep our web sites operational at a reasonable cost and without service interruptions;

the effect of existing or future government legislation and regulation;

our ability to grow and operate our business in compliance with legislation and regulations, including regulations that may affect our clients and, in turn, affect demand for our services;

the challenge to the classification of certain of our healthcare professionals as independent contractors;

the impact of medical malpractice and other claims asserted against us;

the disruption or adverse impact to our business as a result of a terrorist attack;

our ability to carry out our business strategy and maintain sufficient cash flow and capital structure to support our business;

the loss of key officers and management personnel that could adversely affect our ability to remain competitive;

the effect of recognition by us of an impairment to goodwill; and

the effect of adjustments by us to accruals for self-insured retentions.

Other factors that could cause actual results to differ from those implied by the forward-looking statements in this Annual Report on Form 10-K are more fully described in the Risk Factors section and elsewhere in this Annual Report on Form 10-K. We undertake no obligation to update the forward-looking statements in this filing. References in this Annual Report on Form 10-K to AMN Healthcare, the Company, we, us and refer to AMN Healthcare Services, Inc. and its wholly owned subsidiaries.

Table of Contents

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Market risk is the risk of loss arising from adverse changes in market rates and prices, such as interest rates, foreign currency exchange rates and commodity prices.

During 2007 and 2006, our primary exposure to market risk was interest rate risk associated with our debt instruments. See Item 7. Management s Discussion and Analysis Liquidity and Capital Resources Financing Activities for further description of our debt instruments and interest rate swaps. Excluding the effect of our interest rate swap arrangements, a 1% change in interest rates on our variable rate debt would have resulted in interest expense fluctuating approximately \$1.9 million in 2007 and \$2.2 million in 2006. Considering the effect of our interest rate swap arrangements, a 1% change in interest rates on our variable rate debt would have resulted in interest expense fluctuating approximately \$0.8 million in 2007 and \$0.4 million in 2006.

Our international operations create exposure to foreign currency exchange rate risks. We believe that our foreign currency risk is immaterial.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

AMN Healthcare Services, Inc.:

We have audited the accompanying consolidated balance sheets of AMN Healthcare Services, Inc. and subsidiaries (the Company) as of December 31, 2007 and 2006, and the related consolidated statements of operations, stockholders equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2007. In connection with our audits of the consolidated financial statements, we have also audited the financial statement Schedule II. These consolidated financial statements and financial statements schedule are the responsibility of the Company s management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of AMN Healthcare Services, Inc. and subsidiaries as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2007, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement Schedule II, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

As discussed in notes 1 and 6 to the consolidated financial statements, the Company adopted FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109*, effective January 1, 2007. As discussed in notes 1 and 10 to the consolidated financial statements, the Company adopted Statement of Financial Accounting Standards No. 123(R), *Share-Based Payment*, effective January 1, 2006.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company s internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 27, 2008 expressed an unqualified opinion on the effectiveness of the Company s internal control over financial reporting.

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2007, 2006 and 2005

(1) Summary of Significant Accounting Policies	

(a) General

AMN Healthcare Services, Inc. was incorporated in Delaware on November 10, 1997. AMN Healthcare Services, Inc. and its subsidiaries recruit and place physicians, nurses and allied health professionals nationally and internationally on a temporary or permanent basis at acute-care hospitals and other healthcare facilities throughout the United States. AMN Healthcare Services, Inc. and its subsidiaries collectively are herein referred to as the Company.

(b) Principles of Consolidation

The accompanying consolidated financial statements include the accounts of AMN Healthcare Services, Inc. and its subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

(c) Cash and Cash Equivalents

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents. Cash and cash equivalents include currency on hand, deposits with financial institutions and highly liquid investments. At December 31, 2007 and 2006, the Company held \$342,000 and \$326,000, respectively, in a collateral trust account restricted for use related to a professional liability insurance agreement. Cash and cash equivalents were \$18,495,000 and \$4,422,000 at December 31, 2007 and 2006, respectively.

(d) Fixed Assets

Furniture, equipment, leasehold improvements and software are recorded at cost less accumulated amortization and depreciation. Equipment acquired under capital leases is recorded at the present value of the future minimum lease payments. Major additions and improvements are capitalized and maintenance and repairs are expensed when incurred. Depreciation on furniture, equipment and software is calculated using the straight-line method based on the estimated useful lives of the related assets (generally three to five years). Leasehold improvements and equipment obtained under capital leases are amortized over the shorter of the term of the lease or their estimated useful life. Amortization of equipment obtained under capital leases is included with depreciation expense in the accompanying consolidated financial statements.

Costs incurred to develop internal-use software during the application development stage are capitalized and recorded at cost. Application development stage costs generally include costs associated with internal-use software configuration, coding, installation and testing. Costs of significant upgrades and enhancements that result in additional functionality also are capitalized, whereas costs incurred for maintenance and minor upgrades and enhancements are expensed as incurred. Capitalized costs are amortized using the straight-line method over three to five years once placed into service.

The Company reviews long-lived assets for impairment annually and whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the future undiscounted net cash flows that are expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

44

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(e) Goodwill

The excess of purchase price and related costs over the fair value of net assets of entities acquired is recorded as goodwill. In accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*, the Company evaluates goodwill annually for impairment at the reporting unit level and whenever circumstances occur indicating that goodwill might be impaired. The performance of the test involves a two-step process. The first step of the impairment test involves comparing the fair value of the Company s reporting units with the reporting unit s carrying amount, including goodwill. The Company generally determines the fair value of its reporting units using the expected present value of future cash flows, giving consideration to the market valuation approach. If the carrying amount of the Company s reporting units exceeds the reporting unit s fair value, the Company performs the second step of the goodwill impairment test to determine the amount of impairment loss. The second step of the goodwill impairment test involves comparing the implied fair value of the Company s reporting unit s goodwill with the carrying amount of that goodwill. The Company performed the annual impairment test at October 31, 2006 and 2007, and determined there was no impairment of goodwill. No events have occurred subsequent to October 31, 2007 that indicate impairment may have occurred.

(f) Intangible Assets

Intangible assets consist of identifiable intangible assets acquired through the Company s acquisition of MHA in November 2005 and Lifework, Inc. and its wholly-owned subsidiaries (Rx Pro Health) in May 2007, and other noncompete covenants from previous acquisitions. Identifiable intangible assets acquired through the acquisition of MHA and Rx Pro Health include tradenames and trademarks, customer relationships, noncompete agreements, staffing databases, acquired technology and online courses. Amortizable intangible assets, which do not include those tradenames and trademarks with an indefinite life, are amortized using the straight-line method over their useful lives. Noncompete covenants are amortized using the straight-line method over the life of the related agreements. Indefinite lived intangibles, comprised of indefinite lived tradenames and trademarks, are not amortized and are instead reviewed for impairment annually in accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*. This review includes comparing the fair value of the Company s indefinite lived intangibles with their carrying amount. If the carrying amount exceeds the fair value, the Company records the excess as an impairment loss. The Company performed the annual impairment test at October 31, 2006 and 2007, and determined there was no impairment. No events have occurred subsequent to October 31, 2007 that indicate impairment may have occurred. SFAS No. 142 requires that intangible assets with estimable useful lives continue to be reviewed for impairment in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. The Company has reviewed its amortizable intangible assets for impairment and determined that there was no impairment at December 31, 2007 and 2006.

(g) Insurance Reserves

The Company maintains an accrual for self-insured health benefits provided to the Company s nurse and allied healthcare professionals and corporate employees, which is included in accrued compensation and benefits in the consolidated balance sheets. The Company determines the adequacy of this accrual by evaluating its historical experience and trends related to both health insurance claims and payments, information provided by its insurance broker and third party administrator, as well as industry experience and trends. If such information indicates that the accruals are overstated or understated, the Company reduces or provides for additional accruals. The Company s accrual at December 31, 2007 was based on (i) a monthly average of the Company s actual historical health insurance claim amounts and (ii) the average period of time from

the date the claim is incurred to the date that it is reported to the Company and paid.

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company maintains an accrual for professional liability self-insured retention limits, which is included in accounts payable and accrued expenses and other long term liabilities in the consolidated balance sheets. The Company determines the adequacy of this accrual by evaluating its historical experience and trends, loss reserves established by the Company s insurance carriers, management and third-party administrators, as well as through the use of independent actuarial studies. For the nurse and allied healthcare staffing segment, the Company obtains updated actuarial studies on a regular basis that use the Company s actual claims data and industry data to determine the appropriate reserves for incurred, but not reported, professional liability claims for each year, and reserves for reported claims are based upon loss reserves established by management and the Company s third party administrators. For the locum tenens staffing segment, the Company obtains updated actuarial studies on a regular basis that primarily utilize industry data to determine the appropriate reserves for both reported claims and incurred, but not reported, claims.

The Company maintains an accrual for workers compensation self-insured retention limits, which is included in accrued compensation and benefits and other long term liabilities in the consolidated balance sheets. The Company determines the adequacy of this accrual by evaluating its historical experience and trends, loss reserves established by the Company s insurance carriers and third party administrators, as well as through the use of independent actuarial studies. The Company obtains updated actuarial studies on a semi-annual basis that use the Company s payroll and actual claims data, as well as industry data, to determine the appropriate reserve both for reported claims and incurred, but not reported, claims for each policy year. The actuarial study for workers compensation provides the Company with the estimated losses for prior policy years and an estimated percentage of payroll compensation to be accrued for current years. The Company records its accruals based on the amounts provided in the actuarial study.

(h) Accounts Receivable

The Company records accounts receivable at the invoiced amount and accounts receivable are non-interest bearing. The company maintains an allowance for doubtful accounts for estimated credit losses resulting from collection risks, including the inability of customers to make required payments under contractual agreements. This results in a provision for bad debt expense. The allowance for doubtful accounts is reported as a reduction of accounts receivable in the consolidated balance sheets. The adequacy of this allowance is determined by evaluating historical delinquency and write-off trends, the credit risk for individual customer receivables, the financial condition and credit history of each customer, historical payment trends, and current economic conditions.

(i) Concentration of Credit Risk

The majority of the Company s business activity is with hospitals located throughout the United States. Credit is extended based on the evaluation of each entity s financial condition, and collateral is generally not required. Credit losses have been within management s expectations. No single client healthcare system exceeded 10% of revenue for the years ended December 31, 2007, 2006 and 2005.

The Company s cash and cash equivalents are also financial instruments that are exposed to concentration of credit risk. The Company places its cash balances with high-credit quality and federally insured institutions. Cash balances with any one institution may be in excess of federally

insured limits or may be invested in a non-federally insured money market account.

(j) Revenue Recognition

Revenue consists of fees earned from the permanent and temporary placement of healthcare professionals. Revenue is recognized when earned and realizable and therefore when the following criteria have been met:

46

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(a) persuasive evidence of an arrangement exists; (b) services have been rendered; (c) the fee is fixed or determinable; and (d) collectibility is reasonably assured. For temporary placements, revenue is recognized in the period in which services are provided based on hours worked by the temporary healthcare professionals. For permanent placements, revenue is recognized over the estimated maximum service period on a straight-line basis. Any fees that are billable on a contingent basis are recognized once the contingency is resolved over the remaining estimated maximum service period. Billings in excess of revenue are recorded as deferred revenue in the accompanying consolidated balance sheets.

(k) Advertising Expenses

Advertising costs are expensed as incurred. Advertising expenses were \$8,840,000, \$9,832,000 and \$8,166,000 for the years ended December 31, 2007, 2006 and 2005, respectively.

(l) Income Taxes

The Company records income taxes using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in operations in the period the changes are enacted. If it is more likely than not that some portion or all of a deferred tax asset will not be realized, a valuation allowance is recognized.

Beginning with the adoption of FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109*, as of January 1, 2007, the Company recognizes the effect of income tax positions only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. Prior to the adoption of FIN 48, the Company recognized the effect of income tax positions only if such positions were probable of being sustained.

(m) Fair Value of Financial Instruments

The carrying amounts of cash and cash equivalents, accounts receivable, income tax receivable, bank overdraft, accounts payable and accrued expenses, accrued compensation and benefits, income taxes payable and other current liabilities approximate their respective fair values due to the short-term nature and liquidity of these financial instruments. The carrying amounts of notes payable approximate their fair value, as the instruments interest rates are comparable to rates currently offered for similar debt instruments of comparable maturities. Derivative financial instruments are recorded at fair value based on current market pricing models. The acquisition price holdback liability is recorded at its fair

value, using the discounted cash flow method. The fair value of the long-term portion of the Company s self insurance accruals cannot be estimated as the Company cannot reasonably determine the timing of future payments.

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(n) Stock-Based Compensation

Prior to January 1, 2006, the Company accounted for its share-based employee compensation plans under the measurement and recognition provisions of Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and related Interpretations, as permitted by SFAS No. 123, Accounting for Stock-Based Compensation. The Company also provided disclosures in accordance with the requirements of SFAS No. 123, as amended by SFAS No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure.

Effective January 1, 2006, the Company adopted the provisions of revised SFAS No. 123 (SFAS No. 123R), *Share-Based Payment*, which established accounting for share-based awards exchanged for employee services and requires companies to expense the estimated fair value of these awards over the requisite employee service period. Accordingly, stock-based compensation cost is measured at grant date, based on the fair value of the award, and is recognized as expense over the employee s requisite service period. The measurement of stock based compensation cost is based on several criteria including, but not limited to, input factors to the valuation model such as expected term of the award, stock price volatility, dividend rate, risk free interest rate, and award forfeiture rate. The input factors used in the valuation model are based on subjective future expectations combined with management judgment. The Company estimates the fair value of stock options and stock appreciation rights granted using the Black-Scholes valuation model and the assumptions shown in Note 10, Stock-Based Compensation. The Company uses historical data to estimate pre-vesting equity award forfeitures and record stock-based compensation expense only for those awards that are expected to vest. The Company estimates the expected term, dividend yield, and risk-free interest rate assumptions consistent with the methodologies used prior to January 1, 2006. After consideration of both its implied volatility and historical volatility, the Company determined its historical volatility to be the most accurate estimate of future volatility and therefore utilizes this measure. Prior to January 1, 2006, the Company estimated volatility based on a combination of its historical volatility rate and the historical volatility rate of comparable companies. The fair value of equity awards granted is amortized on a straight-line basis over the requisite service periods of the awards, which are the vesting periods. See Note 10, Stock-based Compensation for addition

(o) Net Income per Common Share

Basic net income per common share is calculated by dividing net income by the weighted average number of common shares outstanding during the reporting period.

Options to purchase 839,000, 842,000 and 567,000 shares of common stock in 2007, 2006 and 2005, respectively, were not included in the calculations of diluted net income per common share because the effect of these instruments was anti-dilutive.

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table sets forth the computation of basic and diluted net income per common share for the years ended December 31, 2007, 2006 and 2005, respectively (in thousands, except per share amounts):

	Years	Years Ended December 31,			
	2007	2006	2005		
Net income	\$ 36,532	\$ 35,091	\$ 22,234		
Weighted average common shares outstanding basic	34,377	32,662	29,130		
Net income per common share basic	\$ 1.06	\$ 1.07	\$ 0.76		
Weighted average common shares outstanding basic Plus dilutive equity awards	34,377 503	32,662 1,842	29,130 2,988		
Weighted average common shares outstanding diluted	34,880	34,504	32,118		
Net income per common share diluted	\$ 1.05	\$ 1.02	\$ 0.69		

(p) Derivative Instruments

SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, requires that all derivative instruments be recorded on the balance sheet at fair value. Gains or losses resulting from changes in the values of those derivatives are accounted for depending upon the use of the derivative and whether it qualifies for hedge accounting. The Company uses derivative instruments to manage the fluctuations in cash flows resulting from interest rate risk on variable-rate debt financing. The Company currently maintains three interest rate swap agreements with notional amounts totaling \$75 million. The Company pays fixed rates under these agreements and receives floating three-month LIBOR, and no initial investments were made to enter into these agreements.

The Company has formally documented the hedging relationships and accounts for these arrangements as cash flow hedges. The Company recognizes all derivatives on the balance sheet at fair value based on dealer quotes. Gains or losses resulting from changes in the values of these arrangements are recorded in other comprehensive income, net of tax, until the hedged item is recognized in earnings. The Company also formally assesses, both at the hedge s inception and on an ongoing basis, whether the derivatives that are used in the hedging transactions are highly effective in offsetting changes in fair values or cash flows of the hedged items. When it is determined that a derivative is not highly effective as a hedge or that it has ceased to be a highly effective hedge, the Company discontinues hedge accounting prospectively and recognizes subsequent changes in market value in earnings.

In November 2005, the Company entered into four interest rate swap agreements for notional amounts of \$15 million, \$10 million, \$30 million, and \$35 million, whereby the Company pays fixed rates ranging from 4.82% to 4.95%. The \$15 million interest rate swap agreement expired in December 2007, and the remaining three agreements expire beginning June 2008, with the last agreement expiring December 2009.

The Company entered into two interest rate swaps in June 2005. The first agreement had a notional amount of \$20 million and became effective in September 2005 and expired in March 2007, whereby the Company paid a fixed rate of 3.99%. The second agreement became effective in September 2006 and expired in September 2007, with a notional amount of \$15 million whereby the Company paid a fixed rate of 4.09%.

In October 2003, the Company entered into an interest rate swap agreement with a notional amount of \$30 million, whereby the Company paid a fixed rate of 2.65%. This agreement expired in September 2006. In December 2006, the Company terminated an interest rate swap agreement originally contracted in November 2005 with a notional amount of \$50 million, fixed rate of 4.97% and an original expiration date of December

49

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2010. The company paid less than \$0.1 million to settle the transaction. During the quarterly assessment of hedge effectiveness, the Company determined that although this derivative was highly effective retrospectively, including for the three months ended December 31, 2006, it no longer qualified for hedge accounting prospectively due to the anticipated future debt prepayments forecasted at that time. Therefore, the Company reclassified the loss of less than \$0.1 million previously recorded in accumulated comprehensive income in the Company s consolidated balance sheet into earnings for the period ended December 31, 2006.

At December 31, 2007 and 2006, the remaining interest rate swap agreements had a fair value of \$(1.1) million and \$0.5 million, respectively, which is included in other assets and liabilities in the accompanying consolidated balance sheets.

(q) New Accounting Pronouncements

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157 (SFAS No. 157), *Fair Value Measurements*. SFAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures related to fair value measurements. SFAS No. 157 does not require any new fair value measurements, but provides guidance on how to measure fair value by providing a fair value hierarchy used to classify the source of the information. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued FASB Staff Position No. 157-2, Effective Date of FASB Statement No. 157, which permits the deferral of the effective date of SFAS No. 157 to fiscal years beginning after November 15, 2008 for all nonfinancial assets and liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis. The Company is required to adopt SFAS No. 157 beginning January 1, 2008 except as it applies to those nonfinancial assets and nonfinancial liabilities, and the Company does not expect the adoption will have a material effect on its consolidated financial statements.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159 (SFAS No. 159), *The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115.* This statement permits, but does not require, entities to measure certain financial instruments and other assets and liabilities at fair value on an instrument-by-instrument basis. Unrealized gains and losses on items for which the fair value option has been elected should be recognized in earnings at each subsequent reporting date. SFAS No. 159 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years, and cannot be adopted early unless SFAS No. 157 is also adopted. The Company is required to adopt SFAS No. 159 beginning January 1, 2008, and the Company does not expect the adoption will have a material effect on its consolidated financial statements.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 141R (SFAS No. 141R), *Business Combinations*. This statement establishes principles and requirements for the reporting entity in a business combination, including recognition and measurement in the financial statements of the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree. This statement also establishes disclosure requirements to enable financial statement users to evaluate the nature and financial effects of the business combination. SFAS No. 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008, and interim periods within those fiscal years. The Company is required to adopt SFAS 141R beginning January 1, 2009.

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(r) Segment Information

SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*, establishes annual and interim reporting standards for an enterprise s operating segments and related disclosures about its products, services, geographic areas and major customers. An operating segment is defined as a component of an enterprise that engages in business activities from which it may earn revenue and incur expenses, and for which discrete financial information is regularly evaluated by the chief operating decision maker in deciding how to allocate resources and assess performance.

The Company provides hospital and healthcare facilities with temporary staffing for physicians, nurses and allied healthcare professionals and physician permanent placement services through the use of several brand names, each having their own marketing and supply distinction. The Company s operating segments are identified in the same manner as they are reported internally and used by the Company s chief operating decision maker for the purposes of evaluating performance and allocating resources.

The Company s management relies on internal management reporting processes that provide revenue and segment operating income for making financial decisions and allocating resources. Segment operating income includes income from operations before depreciation, amortization of intangible assets and amortization of stock compensation expense. Management believes that segment operating income is an appropriate measure of evaluating the operational performance of the Company s segments. However, this measure should be considered in addition to, not as a substitute for, or superior to, income from operations or other measures of financial performance prepared in accordance with generally accepted accounting principles. The Company s management does not evaluate, manage or measure performance of segments using asset information; accordingly, asset information by segment is not prepared or disclosed. The information in the following table is derived from the segment s internal financial information as used for corporate management purposes.

The following table provides a reconciliation of revenue and segment operating income by reportable segment to consolidated results (in thousands):

	Year	Years Ended December 31,				
	2007	2006	2005

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(s) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from those estimates.

(t) Reclassifications

Certain immaterial amounts in the 2006 consolidated financial statements have been reclassified to conform to the 2007 presentation.

(2) Acquisitions

Rx Pro Health Acquisition

On May 21, 2007, the Company completed its acquisition of Rx Pro Health, a leading provider of pharmacy staffing, workforce technology solutions, and online educational services for hospital-based and retail pharmacies and pharmaceutical companies. The strategic combination has broadened the type of services the Company offers and will allow the Company to provide a more comprehensive staffing solution to clients. Total purchase price was \$5.5 million, which included \$5.2 million cash consideration and \$0.3 million of direct transaction costs. The acquisition agreement also provides for annual performance-based contingent earn-out payments for 2007, 2008 and 2009. No earn-out will be paid in 2008 based on the financial performance of Rx Pro Health for the period between May 21, 2007 and December 31, 2007. The remaining contingent earn-out payments total up to \$10.5 million over the next two years. The allocation of the purchase price consisted of \$0.1 million of net assets acquired, \$1.8 million of deferred tax liabilities assumed, \$2.3 million of goodwill and \$4.9 million of identified intangible assets. The intangible assets included the fair value of trademarks, tradenames, customer relationships, non-compete agreements, online courses, staffing databases and acquired technology. The weighted average useful life of the intangible assets is approximately 10 years. The goodwill was allocated to the nurse and allied healthcare staffing segment. Goodwill represents the excess of the purchase price over the fair value of the net tangible and intangible assets acquired, and is not deductible for tax purpose. Goodwill will not be amortized and will be tested for impairment at least annually. The acquisition was recorded using the purchase method of accounting. The results of operations of Rx Pro Health are included in the nurse and allied healthcare staffing segment in the Company s consolidated financial statements from the acquisition date.

MHA Acquisition

On November 2, 2005, the Company completed its acquisition of MHA. The acquisition established AMN as the largest provider of healthcare staffing services in the United States. The strategic combination has broadened the type of services the Company offers and allows the Company to provide a more comprehensive staffing solution to clients as the Company now possesses one of the largest national networks of available physician, nurse and allied health professionals.

The acquisition was recorded using the purchase method of accounting. Thus, the results of operations from MHA are included in the Company s consolidated financial statements from the acquisition date. The total purchase price of \$210.0 million consisted of (i) an initial price of \$160.0 million, paid approximately 75% in cash, excluding a \$15.0 million holdback for potential claims indemnified by the MHA shareholders, and

52

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

approximately 25% in unregistered shares of the Company's common stock, (ii) contingent purchase price of \$47.3 million, paid approximately 75% in cash and 25% in unregistered share of the Company's common stock, and (iii) \$2.7 million of direct acquisition costs. The purchase price included contingent consideration based on the financial performance of MHA for the twelve months ended December 31, 2005. The earn-out of \$47.3 million was finalized on December 31, 2005 and recorded as additional purchase price at its fair value. The holdback, net of any indemnified claims made by the selling shareholders, is expected to be released to the selling shareholders in early 2008. In addition to cash consideration paid, the Company issued 2.3 million unregistered shares of common stock in connection with the acquisition of MHA, and issued an additional 0.7 million unregistered shares on March 9, 2006 for payment of earn-out amounts as provided in the acquisition agreement. The cash and stock components of the earn-out and holdback, as well as the stock portion of the initial purchase price, were recorded at their fair values, including discounts for restrictions on the marketability of the stock and the timing of expected future cash payments. The allocation of the initial purchase price to the assets acquired and liabilities assumed based on their estimated fair values was as follows (in thousands):

Purchase Price:	
Cash paid for common stock	\$ 108,140
Cash holdback	13,904
Equity issued for MHA common stock	31,948
Earn-out cash	35,164
Earn-out equity	10,667
Transaction costs	2,712
Total purchase price of acquisition	\$ 202,535
Assets Acquired:	
Net assets acquired	\$ 27,240
Identifiable intangible assets	115,600
Deferred tax liability and other liabilities	(45,188)
Goodwill	104,883
Total assets acquired	\$ 202,535

Intangible assets include amounts recognized for the fair value of tradenames and trademarks, customer relationships, non-compete agreements, and staffing databases. The following table summarizes the fair value and useful life of each intangible asset acquired:

	Fair	Value	Useful Life
	(in the	ousands)	(in years)
Identifiable intangible assets subject to amortization:			
Staffing databases	\$	1,600	5
Customer relationships		32,000	14
Tradenames and trademarks		1,200	5
Noncompete agreements		900	5
Customer relationships Tradenames and trademarks	\$	32,000 1,200	

	35,700	
Identifiable intangible assets not subject to amortization:		
Tradenames and trademarks	79,900	indefinite
Total identifiable intangible assets acquired	\$ 115,600	
·	 <u> </u>	

Of the total \$104.9 million of the initial purchase price allocated to goodwill, \$59.1 million, \$36.1 million and \$9.7 million was allocated to the Company s locum tenens staffing segment, physician permanent placement

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

services segment and nurse and allied healthcare staffing segment, respectively. The Company had recorded \$1.7 million and \$0.1 million of tax related purchase accounting adjustments to goodwill during the twelve months ended December 31, 2007 and 2006, respectively. Goodwill represents the excess of the purchase price over the fair value of the net tangible and intangible assets acquired, and is not deductible for tax purposes. Goodwill will not be amortized and will be tested for impairment at least annually.

(3) Stock Repurchase

On April 28, 2006, the Company entered into a Stock Purchase Agreement with several former MHA stockholders to purchase from them an aggregate of 1,852,000 shares of the Company s common stock issued in connection with the acquisition of MHA. The share purchase price was \$20.17, calculated as the volume weighted average sales price of the common stock on the New York Stock Exchange for the 20 consecutive trading days immediately preceding the closing date, for a total aggregate purchase price of \$37.5 million, including \$0.2 million of transaction costs. The Stock Purchase Agreement contained customary representations and warranties.

During August 2007, the Company repurchased 1,000,000 shares of its common stock at an average price of \$18.48 per share, resulting in an aggregate purchase price of \$18.5 million.

(4) Goodwill and Identifiable Intangible Assets

As of December 31, 2007 and 2006, the Company had the following acquired intangible assets (in thousands):

	December 31, 2007			6		
	Gross Carrying Amount	Accumulated Amortization	, 6	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Intangible assets subject to amortization:

Edgar Filing: AMN HEALTHCARE SERVICES INC - Form 10-K

	\$ 40,670	\$	(7,035)	\$ 33,635	\$ 35,750	\$	(3,534)	\$ 32,216
Intangible assets not subject to amortization:								
Goodwill (1)	\$ 251,718	\$	(10,452)	\$ 241,266	\$ 251,171	\$	(10,452)	\$ 240,719
Tradenames and trademarks	79,900			79,900	79,900			79,900
		_				_		
	\$ 331,618	\$	(10,452)	\$ 321,166	\$ 331,071	\$	(10,452)	\$ 320,619

⁽¹⁾ Goodwill accumulated amortization represents amortization expense recorded prior to the Company s adoption of SFAS No. 142, *Goodwill and Other Intangible Assets*, on January 1, 2002.

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Aggregate amortization expense for intangible assets was \$3,501,000 and \$3,053,000 for the years ended December 31, 2007 and 2006, respectively. Based on the current amount of intangibles subject to amortization, the estimated amortization expense as of December 31, 2007 is as follows (in thousands):

	Amount
Year ending December 31, 2008	\$ 3,796
Year ending December 31, 2009	3,787
Year ending December 31, 2010	3,591
Year ending December 31, 2011	2,924
Year ending December 31, 2012	2,599
Thereafter	16,938
	\$ 33,635

As of December 31, 2007 and 2006, the Company had unamortized goodwill of \$241,266,000 and \$240,719,000, respectively. Of the \$0.5 million increase in goodwill, \$2.3 million was related to the acquisition of Rx Pro Health in May 2007 in the Company s nurse and allied healthcare staffing segment. The increase was partially offset by \$1.8 million of tax related purchase accounting adjustments mainly related to the acquisition of MHA recorded during 2007. Of the \$1.8 million adjustment, \$1.0 million, \$0.6 million and \$0.2 million were recorded in the Company s locum tenens staffing segment, physician permanent placement services segment and nurse and allied healthcare staffing segment, respectively.

AMN HEALTHCARE SERVICES, INC.

Other, net	890	503	264	
Income tax expense	\$ 24,252	\$ 21,675	\$ 14,931	

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The tax effects of temporary differences that give rise to significant portions of deferred tax assets and deferred tax liabilities are presented below as of December 31, 2007 and 2006 (in thousands):

	Decem	ber 31,
	2007	2006
Deferred tax assets:		
Stock compensation	\$ 4,733	\$ 2,712
Deferred revenue	4,502	2,870
Allowance for doubtful accounts	1,196	957
Deferred compensation	2,419	1,391
Accrued expenses, net	13,093	9,626
Deferred rent	2,393	2,007
Net operating losses	998	7,671
State taxes	2,123	664
Credit carryforwards	146	502
Insurance premiums	214	373
Other	841	1,504
Total deferred tax assets	\$ 32,658	\$ 30,277
Deferred tax liabilities:		
Intangibles	\$ (68,228)	\$ (64,604)
Fixed assets, net	(5,403)	(4,936)
Prepaid expenses	(1,959)	(3,712)
Total deferred tax liabilities	\$ (75,590)	\$ (73,252)
Valuation allowance	\$ (76)	\$ (115)
Net deferred tax liabilities	\$ (43,008)	\$ (43,090)

Management believes it is more likely than not that the results of future operations will generate sufficient taxable income to realize the deferred tax assets, excluding certain state net operating loss carryforwards and foreign tax credit carryforwards, and, accordingly, has not provided a valuation allowance for these assets except for the items mentioned below.

As of December 31, 2007 the Company has no federal net operating loss carryforward. As of December 31, 2007 the Company has state net operating loss carryforwards of \$9,618,000 that are set to expire at various dates between 2010 and 2025. Management believes it is not more likely than not that the Company will generate sufficient taxable income to utilize \$29,000 of these state losses prior to the expiration of these

state net operating loss carryforwards, and therefore the Company has established a valuation allowance of \$1,000 for these state net operating loss carryforwards.

As of December 31, 2007 the Company has foreign tax credit carryforwards of \$75,000 that are set to expire in 2014. Management believes it is not more likely than not that the Company will generate sufficient foreign source income to utilize these foreign tax credit carryforwards, and therefore the Company has established a valuation allowance of \$75,000 for these foreign tax credit carryforwards.

As of December 31, 2007 pursuant to APB No. 23, *Accounting for Income Taxes Special Areas*, the Company did not provide for United States income taxes or foreign withholding taxes on undistributed earnings from certain non-U.S. subsidiaries that will be permanently reinvested outside the United States. The Company intends to reinvest its foreign earnings indefinitely under APB No. 23. Should the Company repatriate foreign earnings, the Company would have to adjust the income tax provision in the period management determined that the Company would repatriate earnings, however the Company s foreign earnings are insignificant.

58

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Company adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48), on January 1, 2007.

The total amount of unrecognized tax benefits (UTB) as of the date of adoption was \$6,172,000, including interest and penalties. Of the total liability of \$6,172,000, \$3,531,000 related to uncertain tax positions taken in fiscal years resulting in net operating losses in such years, therefore the liability was presented as a reduction of the related deferred tax asset as of the date of adoption. The net operating loss carryforward has been used in 2007 and therefore, the total liability is presented as a liability as of December 31, 2007.

Following is a tabular reconciliation of the Unrecognized Tax Benefits activity during 2007:

Gross UTB balance at January 1, 2007, excluding interest and penalties of \$426,000	\$ 5,746,000
Additions based on tax positions related to current year	592,000
Additions for tax positions of prior years	1,510,000
Reductions for tax positions of prior years	(2,221,000)
Settlements	
Reductions due to lapse of applicable statute of limitations	(114,000)
Gross UTB balance at December 31, 2007, excluding interest and penalties of \$614,000	\$ 5,513,000

If recognized, approximately \$3,832,000, net of \$1,500,000 of temporary differences, would affect the Company s effective tax rate, and \$795,000 would be treated as a reduction to goodwill.

The Company recognizes interest and penalties related to uncertain tax positions in income tax expense. As of December 31, 2007, the Company has accrued approximately \$614,000 of interest and penalties related to uncertain tax positions.

The Company is subject to taxation in the US and various states and foreign jurisdictions. The Company s tax years for 2004 and 2005 are under examination by the Internal Revenue Service.

With few exceptions, the Company is no longer subject to U.S. federal, state, local or foreign examinations by tax authorities for years before 2003, although carryforward attributes that were generated prior to 2002 may still be adjusted upon examination by the IRS or state authorities if they either have been or will be utilized in a future period.

The Company does not foresee material changes to its gross FIN48 liability within the next twelve months.

(7) Notes Payable and Related Derivative Instruments and Credit Agreement

In November 2005, in connection with the acquisition of MHA, the Company amended and restated its existing credit facility. The new credit facility, the Second Amended and Restated Credit Agreement (Credit Agreement), provides for, among other provisions, a \$75 million secured revolving credit facility, a \$30 million letter of credit sub-facility, a \$15 million swing-line sub-facility, all maturing in November 2010, and a new \$205 million secured term loan facility maturing in November 2011. The new secured term loan facility was used to pay off existing borrowings of \$87.8 million of term debt and provide financing for the acquisition. In connection with the pay off, the Company wrote off \$1.2 million of deferred financing costs, which is recorded in interest expense. The Company incurred financing costs of \$4,822,000 in connection with the Credit Agreement.

In May 2006, the Company entered into a First Amendment (the First Amendment) to the Credit Agreement. The First Amendment provides that the Company may request, on a one-time basis and subject to

59

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

meeting certain conditions, an additional term loan (Incremental Term Loan) in an amount not to exceed \$45 million and permits the Company to repurchase up to \$45 million of capital stock (subject to certain conditions). The First Amendment also reset the applicable interest rate for term loan borrowings based upon the then current leverage ratio. The Company incurred financing costs of \$327,000 in conjunction with the First Amendment. Also in May 2006, the Company borrowed an Incremental Term Loan of \$30 million, which along with cash on hand was used to fund the purchase of 1,852,000 shares of common stock under the Stock Purchase Agreement for a total purchase price of \$37.5 million, including transaction costs. Effective with this borrowing, the interest rate for all term loans outstanding (including the Incremental Term Loan) under the Credit Agreement initially bore interest, at the Company s option, at either LIBOR plus 2.00% or the Base Rate plus 1.00%. Beginning in August 2006 and thereafter, based on the Company s then current leverage ratio, all term loans bear interest, at the Company s option, at either LIBOR plus 1.75% or the Base Rate plus 0.75%. The terms of the Incremental Term Loan are consistent with the existing term loan under the Credit Agreement.

On July 6, 2007, the Company entered into a Second Amendment (the Second Amendment) to the Credit Agreement. The Second Amendment provided that the Company may repurchase its common stock in an aggregate cash amount not to exceed \$25 million, provided that no default or event of default exists either before or after giving effect to such restricted payment and such repurchase occurs on or before September 30, 2007. The Company completed the repurchase of 1,000,000 shares at an average purchase price of \$18.48 per share during August 2007, resulting in an aggregate purchase price of \$18.5 million.

The term loan portion of the Credit Agreement is subject to quarterly amortization of principal, with an amount equal to 1.25% of the initial aggregate principal amount of the facility payable quarterly through September 30, 2007 (except in the case of the initial quarterly payment on June 30, 2006 of 2.5%) and 2.5% of the initial aggregate principal amount of the facility payable quarterly from December 31, 2007 through September 30, 2010 with any remaining amounts payable in 2011. Voluntary prepayments of the term loan portion of the credit facility are applied as the Company may elect, including ratably to the remaining quarterly amortization payments. In September and November 2007, the Company made voluntary prepayments of \$8.0 million and \$6.0 million, respectively, which were applied ratably to the remaining quarterly amortization payments. In connection with these voluntary prepayments, the Company wrote off \$0.1 million of deferred financing costs for each prepayment, which are recorded in interest expense. In March, June, September and December 2007, the Company made the quarterly principal amortization payments of \$2.3 million, \$2.3 million, \$2.2 million and \$4.1 million, respectively.

The revolving credit facility portion of the Credit Agreement carries an unused fee of between 0.375% and 0.5% per annum based on the Company's then current leverage ratio, and there are no mandatory reductions in the revolving commitment under the revolving credit facility. Borrowings under this revolving credit facility bear interest at floating rates based upon either a LIBOR or a prime interest rate option selected by the Company, plus a spread of 1.50% to 2.25% and 0.50% to 1.25%, respectively, to be determined based on the then current leverage ratio. Borrowings under the swing-line sub-facility bear interest at the prime interest rate. Amounts available under the Company's revolving credit facility may be used for working capital, capital expenditures, permitted acquisitions and general corporate purposes, subject to various limitations. At December 31, 2007 the Company had no borrowings outstanding under the swing-line sub-facility. At December 31, 2006, the Company had \$1.6 million outstanding under the swing-line sub-facility, which was paid off in January 2007.

The Company maintained outstanding standby letters of credit totaling \$10.1 million, \$9.8 million and \$0.1 million as collateral in relation to its professional liability insurance agreements, workers compensation insurance agreements, and a foreign office lease agreement, respectively, at December 31, 2007. Each of these letters of credit bears interest at a fixed rate of 1.50% to 2.25% based on the Company s leverage ratio. Total outstanding standby letters of credit at December 31, 2007 and 2006 was \$20.0 million and \$19.5 million, respectively.

60

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Notes payable balances as of December 31, 2007 and 2006 consisted of the following (in thousands):

	December 31,	
	2007	2006
\$75,000 Revolver expiring November 2, 2011 with variable interest rates. The weighted average interest rate at December 31, 2006 was 9.0%	\$	\$ 1,600
\$235,000 Term Loan due September 30, 2011 with variable interest rates. The weighted average interest rate at December 31, 2007 and 2006 was 6.4% and 6.5%, respectively	146,968	171,780
Total notes payable	146,968	173,380
Less current portion of notes payable, including Revolver	(26,616)	(12,901)
Long-term portion of notes payable	\$ 120,352	\$ 160,479
Annual principal maturities of notes payable are as follows:		
2008	\$ 26,616	
2009	16,560	
2010	37,259	
2011	66,533	
	\$ 146,968	

The Company is required to make additional mandatory prepayments on the term loan with the proceeds of asset dispositions, extraordinary receipts, debt issuances and certain equity issuances. The Company is also required to make mandatory prepayments on the term loan within ninety days after the end of each fiscal year, commencing with the fiscal year ended December 31, 2006 in an amount equal to 50% of the Company s excess cash flow (as defined in the Credit Agreement), less any voluntary prepayments made during the fiscal year. These mandatory prepayment amounts, if any, are applied ratably to the remaining quarterly amortization payments. The voluntary prepayments made throughout the year, in addition to the \$10 million mandatory prepayment made in February 2008, satisfied this additional prepayment requirement for the year ended December 31, 2007.

The Company s outstanding debt instruments at December 31, 2007 and 2006 were secured by all assets of the Company and the common stock of its subsidiaries. The Company s Credit Agreement contains various financial ratio covenants, including a minimum fixed charge coverage ratio and maximum leverage ratio, as well as restrictions on assumption of additional indebtedness, declaration of dividends, dispositions of assets, consolidation into another entity, capital expenditures in excess of specified amounts and allowable investments.

The Company is required to maintain interest rate protection on at least 50% of the term loan portion of its Credit Agreement beginning November 2006 until May 2009. At December 31, 2007, the Company maintained three interest rate swap agreements with notional amounts totaling \$75 million. The Company pays fixed rates ranging from 4.87% to 4.95% under these agreements and receives a floating three-month LIBOR. The first agreement expires in June 2008 and the last in December 2009. No initial investments were made to enter into these agreements. At December 31, 2007 and 2006, the interest rate swap agreements had a fair value of \$(1.1) million and \$0.5 million, respectively, which is included in other assets and liabilities in the accompanying consolidated balance sheets. The Company has formally documented the hedging relationships and accounts for these arrangements as cash flow hedges. See Note 1 (p), Derivative Instruments for additional information related to the Company s interest rate swap agreements.

61

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(8) Retirement Plans

The Company maintains the Healthcare Staffing Retirement Savings Plan (the AMN Plan), a plan that complies with the Internal Revenue Code Section (IRC) 401(k) provisions. The AMN Plan covers all employees that meet certain age and other eligibility requirements. An annual discretionary matching contribution is determined by the Compensation and Stock Plan Committee of the Board of Directors each year and may be up to a maximum 6% of eligible compensation paid to all participants during the plan year. The amount of the employer contributions, net of forfeitures, under this plan were \$2,624,000, \$1,592,000, and \$1,165,000 for the years ended December 31, 2007, 2006 and 2005, respectively.

In January 2002, the Company established the Executive Nonqualified Excess Plan of AMN Healthcare, Inc. To comply with the then newly enacted legislation, allow additional key employees to participate and increase the amounts eligible for deferral, the Company established the 2005 Amended and Restated Executive Nonqualified Excess Plan effective January 1, 2005. The Company amended the 2005 Amended and Restated Executive Nonqualified Excess Plan effective November 1, 2005, January 1, 2006 and April 11, 2006. All deferred compensation contributions after January 1, 2005 are made to the 2005 Amended and Restated Executive Non Qualified Excess Plan. The Executive Nonqualified Excess Plan is not intended to be tax qualified and is an unfunded plan. This plan is composed of deferred compensation and all related income and losses attributable thereto. Discretionary matching contributions to the plan are made that vest incrementally so that the employee is fully vested in the match following five years of employment with the Company. Under the Plan, participants can defer up to 80% of their base salary, 100% of their bonus and 100% of their grant of restricted stock units. An annual discretionary matching contribution is determined by the Compensation and Stock Plan Committee of the Board of Directors each year. The amount of the employer contributions, net of forfeitures, under this plan were \$243,000, \$273,000 and \$69,000 for the years ended December 31, 2007, 2006 and 2005, respectively.

(9) Stockholders Equity

On April 28, 2006, the Company entered into a Stock Purchase Agreement with several former MHA stockholders to purchase from them an aggregate of 1,852,000 shares of the Company s common stock issued in connection with the acquisition of MHA. The share purchase price was \$20.17, calculated as the volume weighted average sales price of the common stock on the New York Stock Exchange for the 20 consecutive trading days immediately preceding the closing date, for a total aggregate purchase price of \$37.5 million, including \$0.2 million of transaction costs. The Stock Purchase Agreement contains customary representations and warranties.

During August 2007, the Company repurchased 1,000,000 shares of its common stock at an average price of \$18.48 per share, resulting in an aggregate purchase price of \$18.5 million.

As of December 31, 2007, there were no authorized stock repurchase programs.

(10) Stock-Based Compensation

(a) Equity Award Plans

In November 1999, the Company established two performance stock option plans (the 1999 Plans), which were approved by the Company s shareholders prior to the Company s initial public offering, to provide for the grant of options to the Company s upper management. Options for a maximum of 4,040,000 shares of common stock were authorized at an exercise price of \$3.80 per option for grants within 120 days of the 1999 Recapitalization and not less than the fair market value in the case of subsequent grants. During 2000, options for

62

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

an additional 1,493,000 shares were reserved under the 1999 Plans. On April 12, 2006, the number of shares of common stock reserved for future issuance under the 1999 Plans, 351,274, had been rolled into the Equity Plan. There will be no further equity awards granted from the 1999 Plans. Pursuant to the amended provisions of the 1999 Plans, all options previously granted under the 1999 Plans became fully vested upon the November 2001 common stock offering and at December 31, 2007 are fully exercisable. All previously granted options under the 1999 Plans expire in 2009.

In July 2001, the Company established the 2001 Stock Option Plan to provide a means to attract and retain employees. In May 2004, the 2001 Stock Option Plan was renamed the Stock Option Plan, and an additional 2,000,000 options were authorized for issuance to increase the maximum number of options to be granted under the plan to 4,178,000. Unless otherwise provided at the time of the grant, the options vest and become exercisable in increments of 25% on each of the first four anniversaries of the date of grant. The plan expires on the tenth anniversary of the effective date. On April 12, 2006, the number of shares of common stock reserved for future issuance under the Stock Option Plan, 372,001, had been rolled into the Equity Plan. There will be no further equity awards granted from the Stock Option Plan.

In April 2006, the Company established the AMN Healthcare Equity Plan (Equity Plan), which was approved by the Company s shareholders. Equity awards, based on the Company s common stock, may be issued under the Equity Plan for a maximum of 723,275 shares plus the number of shares of common stock underlying any grants under the Company s Stock Option Plan that are forfeited, cancelled or terminated (other than by exercise) from and after the effective date of the Equity Plan. There will be no further equity awards granted from the Stock Option Plan or the 1999 Plans. Pursuant to the Equity Plan, equity awards granted have a maximum contractual life of ten years and exercise prices will be determined at the time of grant and will be no less than fair market value of the underlying common stock on the date of grant. Any shares to be issued under the Equity Plan will be issued by the Company from authorized but unissued common stock or shares of common stock reacquired by the Company. On April 18, 2007, the Company amended the Equity Plan, with stockholder approval, to increase the number of shares authorized under the plan by 3,000,000 (plus shares forfeited under the Company s Stock Option Plan). For the twelve months ended December 31, 2007, 427,000 stock appreciation rights (SARs) and 268,000 restricted stock units (RSUs) were granted to employees, officers and directors of the Company under the Equity Plan. The SARs typically vest ratably over a three year period, with about one third of the awards vesting annually. The RSUs typically vest at the end of a three year vesting period, however, 33% of the awards may vest on the 13th month anniversary of the grant date, and 34% on the 2nd anniversary of the grant date, if certain performance targets are met. No grants may be made under the Equity Plan after the tenth anniversary of the effective date. At December 31, 2007 and 2006, respectively, 2,341,000 and 140,000 shares of equity awards were reserved for the future grants related to the Equity Plan.

(b) Stock-Based Compensation

The Company adopted the provisions of Financial Accounting Standards Board (FASB) revised Statement of Financial Accounting Standards No. 123 (SFAS No. 123R), *Share-Based Payment*, on January 1, 2006. Under SFAS No. 123R, stock-based compensation cost is measured at the grant date, based on the estimated fair value of the award, and is recognized as expense over the employee s requisite service period. The Company adopted the provisions of SFAS No. 123R using a modified prospective application. The provisions of SFAS No. 123R apply to new awards and to awards that are outstanding on the effective date and subsequently modified or cancelled. Estimated compensation expense for unvested awards outstanding at the effective date will be recognized over the remaining service period using the compensation cost calculated for pro forma disclosure purposes under SFAS Statement No. 123 (SFAS No. 123), *Accounting for Stock-Based Compensation*, adjusted for estimated forfeitures. The Company previously applied Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees*, and related interpretations and provided the required pro forma disclosures under SFAS No. 123.

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Stock Options and SARs

Stock options entitle the holder to purchase, at the end of a vesting period, a specified number of shares of the Company s common stock at a price per share set at the date of grant. SARs, granted under the Company s Equity Plan, entitle the holder to receive, at the end of a vesting period, shares of the Company s common stock equal to the difference between the exercise price of the SAR, which is set at the date of grant, and the fair market value of the Company s common stock on the date of exercise.

A summary of stock option and SAR activity under the 1999 Plans, the Stock Option Plan and the Equity Plan are as follows:

	19.97 - 22.46	16,000	9	21.46	3,000	9	21.61
	22.47 - 24.95	366,000	9	24.95			
		722,000			108,000		

The weighted average remaining contractual life for the stock options that were vested and expected to vest under the Stock Option Plan at December 31, 2007 was approximately 6.1 years. The weighted average remaining contractual life for the SARs that were vested and expected to vest under the Equity Plan at December 31, 2007 was approximately 8.8 years.

Stock-based compensation cost of stock options and SARs is measured based on several criteria including, but not limited to, the valuation model used and associated input factors such as expected term of the award, stock price volatility, dividend rate, risk-free interest rate, and award forfeiture rate. The input factors to be used in the valuation model are based on subjective future expectations combined with management judgment. The Company estimates the fair value of awards granted using the Black-Scholes valuation model. After consideration of both its implied volatility and historical volatility, the Company determined its historical volatility to be the most accurate estimate of future volatility and therefore utilizes this measure. The Company estimates the expected term based on historical exercise patterns, and based the dividend yield assumption on historical dividend payouts, which is zero. The risk-free interest rate assumption is based on observed interest rates appropriate for the expected term of the Company sequity awards. The Company uses historical data to estimate pre-vesting award forfeitures and records stock-based compensation expense only for those awards that are expected to vest. The fair value of awards granted is amortized on a straight-line basis over the requisite service periods of the awards, which are the vesting periods.

Prior to January 1, 2006, for disclosure purposes under SFAS No. 123, the Company estimated the fair value of awards granted consistent with the current methodology utilizing the Black-Scholes valuation model. The Company estimated the option term, dividend yield, and risk-free interest rate assumptions consistent with the current methodology, however the volatility of the Company s common stock at the date of grant was based on a combination of the Company s historical volatility rate and the historical volatility rate of companable companies. Also, prior to January 1, 2006, compensation expense previously recorded for unvested employee stock-based compensation awards that were forfeited upon employee termination was reversed in the period of forfeiture.

65

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Stock-based compensation expense for 2007 and 2006, and pro-forma stock-based compensation expense for 2005 for stock options and SARs granted was estimated at the date of grant using the Black-Scholes valuation model based on the following weighted average assumptions (annualized percentages):

	2007	2006	2005
Expected life	3.8 years	4.5 years	5.0 years
Risk-free interest rate	4.5%	5.1%	4.0%
Volatility	31%	46%	48%
Dividend yield	0%	0%	0%

The weighted average grant date fair value of the 427,000 and 386,000 SARs granted during 2007 and 2006 was \$7.41 and \$8.02, respectively, per SAR, and the weighted average grant date fair value of stock options granted during 2005 was \$6.99 per stock option. As of December 31, 2007, there was \$6.0 million of pre-tax total unrecognized compensation cost related to non-vested stock options and SARs, which will be adjusted for future changes in forfeitures. The Company expects to recognize such cost over a weighted average period of 1.6 years. The total intrinsic value of stock options and SARs exercised was \$2,071,000, \$74,593,000 and \$5,748,000 for 2007, 2006 and 2005, respectively. At December 31, 2007, the total intrinsic value of stock options and SARs outstanding was \$5,886,000, the total intrinsic value of stock options and SARs exercisable was \$4,362,000.

Restricted Stock Units

RSUs, granted under the Company s Equity Plan, entitle the holder to receive, at the end of a vesting period, a specified number of shares of the Company s common stock. Stock-based compensation cost of RSUs is measured by the market value of the Company s common stock on the date of grant. The weighted average grant date intrinsic value was \$24.35 per RSU for the 268,000 RSUs granted during 2007. The Company uses historical data to estimate pre-vesting award forfeitures and records stock-based compensation expense only for those awards that are expected to vest. The grant date intrinsic value of awards granted is amortized on a straight-line basis over the requisite service periods of the awards, which are the vesting periods.

The following table summarizes RSU activity for non-vested awards for the twelve months ended December 31, 2007:

	Number of Shares (in thousands)	Gra	ed Average nt Date sic Value
Unvested at January 1, 2007	255	\$	18.08
Granted	268	\$	24.35

Edgar Filing: AMN HEALTHCARE SERVICES INC - Form 10-K

Vested Cancelled/forfeited/expired	(84)	\$ 18.04
	(31)	\$ 21.60
Unvested at December 31, 2007	408	\$ 21.94

As of December 31, 2007, there was \$6.7 million of pre-tax total unrecognized compensation cost related to non-vested RSUs, which will be adjusted for future changes in forfeitures. The Company expects to recognize such cost over a period of 2.0 years. The aggregate intrinsic value of the RSUs outstanding was \$7,000,000 as of December 31, 2007.

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Stock-Based Compensation

The following table shows the total stock-based compensation expense, related to all of the Company s equity awards, recognized for the twelve month periods ended December 31, 2007 and 2006, in accordance with SFAS No. 123R (in thousands):

	Years Ended	Years Ended December 31	
	2007	2006	
Stock-based employee compensation before tax	\$ 8,392	\$ 6,803	
Related income tax benefits	(3,348)	(2,563)	
Stock-based employee compensation, net of tax	\$ 5,044	\$ 4,240	

For the twelve month periods ended December 31, 2007 and 2006, the adoption of SFAS No. 123R resulted in cash flows from financing activities of \$3,285,000 and \$9,232,000, respectively, for excess tax benefits related to equity awards exercised and vested during the period. Prior to the adoption of SFAS No. 123R, the Company presented excess tax benefits associated with stock option exercises as an operating cash flow activity.

Prior to January 1, 2006, in accordance with the provisions of SFAS No. 123, the Company applied APB Opinion No. 25 and related interpretations in accounting for its 1999 Plans and the Stock Option Plan. Accordingly, because the 1999 Plans were performance-based and certain grants under the Stock Option Plan were granted at less than fair market value, the following table shows the total stock-based compensation expense, related to all of the Company s equity awards, recognized for the twelve month period ended December 31, 2005 (in thousands):

	Year Ended December 31,
	2005
Stock-based employee compensation before tax Related income tax benefits	\$ 142 (57)
Related income tax benefits	(31)
Stock-based employee compensation, net of tax	\$ 85

Had compensation expense been recognized for stock-based compensation during 2005 by applying the fair value provisions of SFAS No. 123, net income and earnings per common share would have been recorded as follows (in thousands, except per share amounts):

		ar Ended tember 31, 2005
Net income, as reported	\$	22,234
Deduct: Incremental stock-based employee compensation expense determined under the fair value based method for all awards, net of tax		(3,575)
Pro forma net income	\$	18,659
	_	
Earnings per common share:		
Basic as reported	\$	0.76
Basic pro forma	\$	0.64
	_	
Diluted as reported	\$	0.69
Diluted pro forma	\$	0.58

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(11)	Related	Party	Transactions
------	---------	--------------	---------------------

(a) Majority stockholder

The Company completed secondary offerings of its common stock for 2,300,000 and 10,631,303 shares on April 18, 2005 and May 27, 2005, respectively. All of the 12,931,303 shares were sold by affiliates of Haas Wheat & Partners, L.P., a private equity investment firm whose affiliates had owned shares of the company since 1999. Robert B. Haas, who exercised sole voting and dispositive power over the 12,931,303 shares by virtue of his control over Haas Wheat & Partners, L.P. and its affiliates, served as the Chairman of the Company s Board of Directors until May 4, 2005. The Company s Presiding Director, Douglas D. Wheat, served as President of Haas Wheat & Partners, L.P. at the time of the secondary offerings.

(b) Minority stockholders

During 2005, a family member of an MHA executive received a non-interest bearing loan of \$55,000 prior to the acquisition date, of which \$16,000 was included in other current assets in the accompanying consolidated balance sheet for the year ended December 31, 2005. During 2006, the remaining unpaid balance of \$16,000 was forgiven by the Company.

(12) Commitments and Contingencies

(a) Legal

The Company is subject to various claims and legal actions in the ordinary course of business. Some of these matters include tax, payroll and employee-related matters and investigations by governmental agencies regarding employment practices. As the Company becomes aware of such claims and legal actions, the Company provides accruals if the exposures are probable and estimable. If an adverse outcome of such claims and legal actions is reasonably possible, the Company assesses materiality and provides disclosure, as appropriate. The Company may also become subject to claims, governmental inquiries and investigations and legal actions relating to services provided by the Company s temporary healthcare professionals, and maintain accruals for these matters if the amounts are probable and estimable. The Company is the subject of an assessment by the California Employment Development Department (EDD) with respect to the payment of certain payroll related taxes, in connection with its locum tenens staffing segment, for the period between April 1, 2001 and March 31, 2004. The Company has appealed the EDD s assessment. Although the Company has not received an assessment for the subsequent periods, the Company is the subject of an audit by the EDD with respect to these matters for the subsequent periods. The Company is currently not aware of any such pending or threatened litigation that would be considered reasonably likely to have a material adverse effect on the Company s consolidated financial position, results of operations or liquidity.

AMN HEALTHCARE SERVICES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(b) Leases

The Company leases certain office facilities and equipment under various operating and capital leases over the next five years and thereafter. The Company recognizes rent expense on a straight-line basis over the lease term. Future minimum lease payments under noncancelable operating leases (with initial or remaining lease terms in excess of one year) and future minimum capital lease payments as of December 31, 2007 are as follows (in thousands):

	Capital	Operating	
	Leases	Leases	
Years ending December 31:			
2008	\$ 730	\$ 13,377	
2009	720	13,283	
2010	392	12,970	
2011	123	12,433	
2012	23	11,235	
Thereafter		54,882	
Total minimum lease payments	\$ 1,988	\$ 118,180	
Less amount representing interest (at rates ranging from 0.6% to 7.3%)	(113)		
Present value of minimum lease payments	1,875		
Less current installments of obligations under capital leases	(656)		
Obligations under capital leases, excluding current installments	\$ 1,219		

Fixed assets obtained through capital leases as of December 31, 2007 and 2006 are as follows (in thousands):

	Decemb	er 31,
	2007	2006
Fixed assets	\$ 3,216	\$ 2,904
Accumulated amortization	(1,466)	(869)
Fixed assets, net	\$ 1,750	\$ 2,035

Obligations under capital leases are included in other current and other long-term liabilities in the accompanying consolidated balance sheets. Rent expense was \$16,491,000, \$14,592,000, and \$11,839,000 for the years ended December 31, 2007, 2006 and 2005, respectively.

(14) Subsequent Event

On February 15, 2008, the company acquired substantially all of the assets of Platinum Select, L.P. (Platinum Select Staffing), a national travel allied staffing firm, for up to \$50.3 million in cash, consisting of an initial payment of \$32.9 million and a potential additional earn-out payment based on 2008 performance. The company financed the acquisition using cash on hand at the purchase date and its revolving credit facility.

Item 9. Changes In and Disagreements With Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

(1) Evaluation of Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures as of December 31, 2007 were effective to ensure that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission s rules and forms.

(2) Management s Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f). Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Based on our evaluation under the framework in Internal Control Integrated Framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2007.

The effectiveness of our internal control over financial reporting as of December 31, 2007 has been audited by KPMG LLP, an independent registered public accounting firm, as stated in their report which is included herein.

(3) Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the quarter ended December 31, 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

(4) Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

AMN Healthcare Services, Inc.:

We have audited AMN Healthcare Services, Inc. and subsidiaries, (the Company) internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Managements Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also includes performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. A company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, AMN Healthcare Services, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of AMN Healthcare Services, Inc. and subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of operations, stockholders—equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 2007, and the related financial statement schedule, and our report dated February 27, 2008 expressed an unqualified opinion on those consolidated financial statements and financial statement schedule.
