FOR IMMEDIATE RELEASE

THE DEWEY ELECTRONICS CORPORATION RECEIVES CONTRACT FOR U.S. MARINE CORPS 'LOGISTIC VEHICLE' AUXILIARY POWER SYSTEMS

Oakland, NJ, August 16, 2007 - The Dewey Electronics Corporation (OTCBB: DEWY) announced today the receipt of a new contract to provide auxiliary power systems for the United States Marine Corps (USMC) 'Logistic Vehicle'. This contract, awarded by the USMC Systems Command, Quantico, VA, consists of a base year and three option years. The initial delivery order for the Logistic Vehicle Power System (LVPS), valued at approximately \$2.4 million, has been received with an accelerated delivery of 150 days. The LVPS is a diesel-powered 3.5 kilowatt 28 volt DC generator, providing power to equipment that protects against improvised explosive devices.

The LVPS production award follows the recent receipt of a contract to develop an armored 3 kilowatt 28 volt DC auxiliary power unit than can be mounted on the back of the USMC main battle tank, the Abrams M1A1. The development contract, for \$550,000, was awarded by the USMC Tank Program Office, also in Quantico, VA, through a sub-contract administered by CACI, Eatontown, NJ, and has the possibility of a follow-on production contract.

## Edgar Filing: DEWEY ELECTRONICS CORP - Form 8-K

"These two events mark a significant entry into the military vehicle auxiliary power unit (APU) market for Dewey Electronics," said Dana Hollis, Vice President, Business Development and Program Management of Dewey Electronics. "The LVPS is an addition to the Dewey product lines that will provide USMC vehicles with auxiliary 28 volt DC power to support their critical missions."

John Dewey, President and CEO of Dewey Electronics, added, "I am proud of the Company and this extension of our product line of rugged military open frame 2 kilowatt diesel generators. I am also proud of the excellent work of our employees, our partners and our vendors."

The Company continues to supply 2 kilowatt tactical portable diesel operated generators to the US Army, USMC and other Department of Defense agencies. The 2 kilowatt generator sets provides either 28 volt DC or 120 volt AC portable power for multi-applications.

### About The Dewey Electronics Corporation

The Dewey Electronic Corporation, founded in 1955, is a diversified manufacturer of sophisticated electronic and electromechanical systems for the military. Visit our website at [www.deweyelectronics.com](http://www.deweyelectronics.com).

This release contains forward-looking statements as defined in Section 21E of the Securities and Exchange Act of 1934, including statements about future business operations, financial performance and market conditions. Such forward-looking statements involve risks and uncertainties including those involved in the Company's dependence upon its Department of Defense business, as further described in our filings under the Securities Exchange Act.
