UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

SCHEDULE 14A

(RULE 14a-101)

SCHEDULE 14A INFORMATION

Proxy Statement Pursuant to Section 14(a) of the
Securities Exchange Act of 1934

Filed by the Registrant

Filed by a Party other than the Registrant

Check the appropriate box:

- Preliminary Proxy Statement
- Confidential, for Use of the Commission Only (as permitted by Rule 14a-6(e)(2))**
- Definitive Proxy Statement
- Definitive Additional Materials
- Soliciting Material Pursuant to §240.14a-12

LEAP WIRELESS INTERNATIONAL, INC.

(Name of Registrant as Specified In Its Charter)

(Name of Person(s) Filing Proxy Statement, if other than the Registrant)

Payment of Filing Fee (Check the appropriate box):

- No fee required.
- Fee computed on table below per Exchange Act Rules 14a-6(i)(1) and 0-11.

(1) Title of each class of securities to which transaction applies:

Edgar Filing: LEAP WIRELESS INTERNATIONAL INC - Form DEFA14A

(2) Aggregate number of securities to which transaction applies:

(3) Per unit price or other underlying value of transaction computed pursuant to Exchange Act Rule 0-11 (set forth the amount on which the filing fee is calculated and state how it was determined):

(4) Proposed maximum aggregate value of transaction:

(5) Total fee paid:

.. Fee paid previously with preliminary materials.

.. Check box if any part of the fee is offset as provided by Exchange Act Rule 0-11(a)(2) and identify the filing for which the offsetting fee was paid previously. Identify the previous filing by registration statement number, or the Form or Schedule and the date of its filing.

(1) Amount Previously Paid:

(2) Form, Schedule or Registration Statement No.:

(3) Filing Party:

(4) Date Filed:

Leap Wireless International, Inc. (Leap) is filing the attached presentation materials in connection with Leap s solicitation of proxies for proposals to be voted on at its 2011 Annual Meeting of Stockholders. Leap may present the attached materials to stockholders and others on future occasions. The information contained in the attached presentation materials is summary information that is intended to be considered in the context of Leap s filings with the SEC and other public announcements. Leap undertakes no duty or obligation to publicly update or revise this information, although it may do so from time to time.

In connection with the 2011 Annual Meeting, Leap mailed to stockholders its definitive proxy statement filed with the SEC on June 28, 2011 (the Definitive Proxy Statement). In addition, Leap files annual, quarterly and special reports, proxy and information statements and other information with the SEC. Stockholders are urged to read the Definitive Proxy Statement and other information because they contain important information about Leap and the proposals to be presented at the 2011 Annual Meeting. These documents are available free of charge at the SEC s website at www.sec.gov or from Leap at www.leapwireless.com. The contents of the websites referenced herein are not deemed to be incorporated by reference into the Definitive Proxy Statement.

Leap and its directors, executive officers and certain employees may be deemed to be participants in the solicitation of proxies from stockholders in connection with the election of directors and other proposals to be voted on at the 2011 Annual Meeting. Information regarding the interests, if any, of these directors, executive officers and specified employees is included in the Definitive Proxy Statement filed by Leap with the SEC.

Proxy Solicitation

In connection with the solicitation of proxies, Leap filed with the SEC on June 28, 2011 a definitive proxy statement and has filed proposals to be presented at Leap's 2011 Annual Stockholders Meeting (the 2011 Annual Meeting). Leap also mailed the definitive proxy statement to its stockholders. In addition, Leap files annual, quarterly and special reports, proxy and information statements and other information with the SEC. Leap's stock information because they contain important information about Leap and the proposals to be presented at the 2011 Annual Meeting website (www.sec.gov) or from Leap (www.leapwireless.com). The contents of the websites referenced herein are not deemed to constitute an offer by Leap and its directors, executive officers and certain employees may be deemed to be participants in the solicitation of proxies from Leap's stockholders in connection with the election of directors and other matters to be proposed at Leap's 2011 Annual Meeting. Information regarding the interests, if any, of these persons is included in the definitive proxy statement filed by Leap with the SEC.

Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform

Act
of
1995.

Such
statements
reflect
management's
current

expectations based on currently available operating, financial and competitive information, but are subject to risks, uncertainties and other factors that could cause actual results to differ materially from those anticipated in or implied by the forward-looking statements. Our forward-looking statements include our expectations regarding our future product and service plan offerings, future plans to transition to LTE and expected changes in our board of directors and nominees to the board of directors and are generally identified with words such as "believe,"

"think," "expect,"
"estimate,"
"intend,"
"seek,"
"anticipate,"
"continue,"
"plan,"
"will,"
"could,"
"should,"
"may"

and similar expressions. Risks, uncertainties and assumptions that could affect our forward-looking statements include, among other things, changes in our customer base; the duration and severity of the current economic downturn in the United States; changes in interest rates, consumer credit conditions, consumer debt levels, consumer confidence, unemployment rates, energy costs and other macroeconomic factors; the services we provide; the impact of competitors

and our ability to successfully implement product and service plan offerings, expand our retail distribution and execute our other strategic activities; our ability to obtain and maintain roaming and wholesale services from other carriers at cost-effective rates; our ability to attract, integrate, motivate and retain an experienced workforce, including members of our senior management; our ability to manage or increase network capacity to meet increasing customer demand in the future at a reasonable cost or on a timely basis; our ability to

comply with the covenants in any credit agreement, indenture or other similar instrument governing any of our existing or future

debt; our ability to effectively integrate, manage and operate our new joint venture in South Texas; failure of our network to meet our expectations and risks associated with the upgrade or transition

of certain of those systems, including our billing system; and other factors detailed in the section entitled "Risk Factors" included in our periodic reports filed with the SEC, including our Quarterly Report on Form 10-Q for the quarter ended March 31, 2011.

All forward-looking statements included in this presentation should be considered in the context of these risks. We undertake no obligation to update or revise our forward-looking statements, whether as a result of new information, future events or otherwise. In light of these risks and uncertainties, the forward-looking statements included in this presentation may not occur and actual results could differ materially from those anticipated or implied in the forward-looking statements. We do not intend and do not place undue reliance on our forward-looking statements.

As investors review the analysis from Institutional Shareholder Services (ISS), they should take into account critical information that we believe **ISS failed to consider in making its** recommendation, including:

Pentwater s
opportunistic,

short-term
history
of
trading
in
Leap
stock
and
its
track
record
of
disregarding
other
stockholders
interests

MHR s
long-term
focus,
track
record
of
producing
stockholder
value

The
lack
of
qualifications
of
the
director
nominees
proposed
by
Pentwater
and
the
risk
we
believe
is
posed
to
stockholder
value
if
these

nominees
are
elected
to
the
Leap
Board

Extensive telecommunications experience of Leap's nominees

Leap's
positive
financial
and
operating
performance
compared
to
its

Pentwater

3

Leap believes ISS has failed to consider critical information
in making its recommendation

What ISS Failed to Consider:

Pentwater's Interests Not Aligned with Stockholders

Pentwater's track record reveals its **opportunistic short-term focus** and in

Leap's view Pentwater has **no interest in providing value to other** stockholders.

In contrast, MHR is a private equity fund with a **long-term focus** that has provided **tremendous value** to other stockholders.

-

Pentwater has **sold and shorted** Leap stock since announcing the proxy contest whereas MHR has **never sold or shorted** Leap stock.

-

Net of its short position, **Pentwater's holdings represent only ~1%** of Leap's shares, whereas **MHR holds ~20%** of Leap's shares.

-

Pentwater **sold down its entire position** in Post Properties prior to placing a director on the Post board.

-

Pentwater risked the interests of all other BPW Acquisition Corp. stock and warrant holders by attempting to **hold up** the merger of BPW and Talbots in order to **extract further value for itself**.

-

Pentwater has **no track record of producing value at public** companies whereas **Loral's stock price has increased ~340%** since September 2008, all while three of Leap's nominees served on the board.

Pentwater's interests aligned with other stockholders and

would give unaffiliated shareholders a strong voice in the boardroom.

ISS says

Reality

4

MHR supported Leap **replacing ~30% of its vice presidents and other** members of senior management last year in order to ensure that it had the right management team in place to execute Leap's current operational strategy. MHR not willing to hold management and other board members accountable

What ISS Failed to Consider:
Halbower's Lack of Experience and Long-Term Interest
...Halbower is the most obvious
candidate
and will be able to
contribute immediately to board
deliberations and strategic
discussions.

ISS says . . .

Reality

5

Halbower has no relevant telecommunications experience he has **never** worked for, managed or sat on the board of a telecommunications company.

Halbower has nothing new to propose. We believe Pentwater's plan for Leap is vague, misinformed and **does not contain a single idea** that the Board hasn't either implemented or initiated with significantly more depth.

Halbower **never asked to speak to the Leap Board or management team** to discuss Pentwater's operational proposals

we believe this is because he simply **doesn't have anything new to propose.**

In our view, Halbower's firm (Pentwater) takes a short-term approach to investing and his track record suggests he is not likely to have a vested interest in giving stockholders a voice in the boardroom:

In 2008, Pentwater ran a proxy contest at Post Properties, which was settled by allowing David R. Schwartz to stand for election to the board. Schwartz served on the Post board for **only 14 months.**

Even before Mr. Schwartz joined

Post's
board,
Pentwater
had
already
sold
its
entire
position
in
Post
common
stock.

Between the time Pentwater announced its proxy contest and when Schwartz resigned, Post's share price **dropped 57%**.

What ISS Failed to Consider:
Poor Track Record of Pentwater's Nominees

The dissident has explicitly
identified two nominees

Switz
and Roscitt

with extensive,

relevant senior-level industry
experience.
ISS says . . .
Reality
6

Switz
and Roscitt
are experienced in the telecom industry
experienced in
presiding over the destruction of value
for stockholders in the telecom
industry.

While Roscitt
was Chairman and CEO of ADC Telecommunications, its stock price
plummeted
84%.
During
his
tenure
on
the
board
of
Net2Phone,
Net2Phone's
stock
price
declined
60%,
and
during
his
time
on
Sequoia
Software's
board,
Sequoia's
stock
price
fell
44%.

Switz
has a similar track record. ADC Telecommunications was sold for **16% less**
per share
than the share price when Switz
became CEO seven years earlier

(after succeeding Roscitt). During Switz's tenure on the board of Micron Technology, Micron's stock price had **declined 54%**, and during his tenure on the board of Hickory Tech Corporation, Hickory's stock price **declined 22%**.

What ISS Failed to Consider:
Experience of Leap's Directors and Nominees
ISS says . . .
Reality

7

Other than the CEO, this
[telecom] experience [of the
incumbent directors] appears

to be largely their experience
as directors of Leap .
Moreover, with its two newest
nominees the board appears
to have continued its pattern
of nominating candidates
without any operating
experience in the industry.

Simply **not true**
that Leap s directors and nominees lack relevant experience.

Dr.
Rachesky
serves
as
Chairman
of
Loral
Space
&
Communications
(satellite
communications) and
Telesat Canada
(satellite communications for television and
telephone networks).

Mr.
Targoff
is
a
director
of
Loral
and
ViaSat
(satellite/digital
communications)
an
d was **founder and principal**
of a private investment company focused on early-
stage companies in **telecommunications and related industries**.

Mr. Harkey has been an **executive of and investor in**
companies in diverse
industries, including retail, hospitality and **telecommunications and serves on**
the Loral Board.

Mr. Leavitt (a Leap nominee) is a managing director and the current head of

global technology,
media and telecommunications
at an investment bank.

Ms. Kruger (a Leap nominee) served as an executive vice president of **Qwest**
Communications
(residential and business telecom services) and **Excel**
Communications
(integrated voice and data communications products and
services).

Mr. Hutcheson, Leap's president, CEO, a director and a member of Leap's founding
management team served as vice president, marketing in the Wireless
Infrastructure Division at **Qualcomm Incorporated**
(mobile technologies).

What ISS Failed to Consider:
Positive Performance Compared to Relevant Peers
ISS says
Reality
8
MetroPCS is Leap's nearest
and most relevant
peer and

compares Leap's financial and operational performance only to MetroPCS in its report

There is only a 5% overlap in markets between Leap and MetroPCS.

There is a **greater than 90% overlap in markets between Leap and Sprint, Verizon, T-Mobile and AT&T.**

When Leap's performance is viewed within the broader prepaid wireless section, Leap compares favorably as demonstrated by 1Q11 results:

Leap **penetration rate (6%)** within the prepaid segment as a percentage of covered POPs was higher than T-Mobile (3%) and Sprint (5%) and just behind Tracfone (7%).

Leap **average revenue per user (ARPU)** of \$39.35 increased near the highest in the prepaid segment, ahead of Sprint, T-Mobile and Tracfone.

Leap **churn (3.1%)** was among the **lowest in the prepaid segment**, again ahead of Sprint, T-Mobile and Tracfone.

ISS says
Reality
9

Leap's cost structure is
excessive relative to PCS

Leap operates in 65 markets whereas MetroPCS operates in only 13

Leap's markets have **significantly less population density** than MetroPCS, although the size of Leap's operating markets (on a covered POPs basis) has continued to grow with each wave of markets launched since 2000

Despite the difference in population density, **Leap has been able to deliver** comparable sales, general and administrative costs to MetroPCS when compared on an apples-to-apples basis only a 6% average difference in SG&A per covered POP over the last four quarters. Leap's foray into broadband diverted and wasted considerable corporate resources and endorses that PCS, by contrast, eschewed a broadband strategy.

ISS fails to understand that Leap's 3G strategy has been a strong success

- Broadband service has contributed **over \$72 million of adjusted OIBDA** over the last four quarters

- Established a **solid foundation** for Leap's current smartphone offerings

Carriers who skipped the initial broadband investment are now forced, due to slow LTE adoption, to spend substantial additional capital to upgrade their 2G networks and improve the significantly limited customer

experience

for

3G smartphones on their networks

-

Other carriers likely to **lose subscribers**

frustrated with poor performance

of their 3G smartphone devices on 2G networks

What ISS Failed to Consider:

Comparable SG&A and 3G Success
