Forward-Looking Statements

This report contains forward-looking statements that are based on management's beliefs, assumptions, current expectations, estimates and projections about the financial services industry, the economy, and Southern Michigan Bancorp, Inc. Forward-looking statements are identifiable by words or phrases such as "outlook", or "strategy"; that an event or trend "may", "should", "will", or "is likely" to occur or "continue" or "is scheduled" or "on track" or that Southern Michigan Bancorp, Inc. or its management "anticipates", "believes", "estimates", "plans", "forecasts", "intends", "predicts", "projects", or "expects" a particular result, or is "confident" or "optimistic" that an event will occur, and variations of such words and similar expressions. All of the information concerning interest rate sensitivity is forward-looking. Management's determination of the provision and allowance for loan losses involves judgments that are inherently forward-looking. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions ("risk factors") that are difficult to predict with regard to timing, extent, likelihood and degree of occurrence. Therefore, actual results and outcomes may materially differ from what may be expressed or forecasted in such forward-looking statements.

Risk factors include, but are not limited to, the risk factors described in "Item 1A - Risk Factors" of Southern Michigan Bancorp, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2007; the timing and level of asset growth; changes in banking laws and regulations; changes in tax laws; changes in prices, levies and assessments; the impact of technological advances and issues; governmental and regulatory policy changes; opportunities for acquisitions and the effective completion of acquisitions and integration of acquired entities; the possibility that anticipated cost savings and revenue enhancements from acquisitions, restructurings, reorganizations and bank consolidations may not be realized at amounts projected, at all or within expected time frames; the local and global effects of the ongoing war on terrorism and other military actions, including actions in Iraq; and current uncertainties and fluctuations in the financial markets and stocks of financial services providers due to concerns about credit availability and concerns about the Michigan economy in particular. These and other factors are representative of the risk factors that may emerge and could cause a difference between an ultimate actual outcome and a preceding forward-looking statement.

This section is intended to provide meaningful cautionary statements. This should not be construed as a complete list of all economic, competitive, governmental, technological, and other factors that could adversely affect our expected consolidated financial position, results of operations or liquidity. Southern Michigan Bancorp, Inc. undertakes no obligation to update or revise any forward-looking statements to reflect developments that occur or information obtained after the date of this report.

SOUTHERN MICHIGAN BANCORP, INC. NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation: The consolidated financial statements include the accounts of Southern Michigan Bancorp, Inc. and its wholly-owned subsidiaries, Southern Michigan Bank & Trust (SMB&T) and FNB Financial (FNB) after elimination of significant inter-company balances and transactions. SMB&T owns SMB Mortgage Company, which transacts all residential real estate loans. It is consolidated into SMB&T's financial statements. FNB owns FNB Financial Services, which conducts a brokerage business and is consolidated into FNB's financial statements. During 2004, the Company formed a special purpose trust, Southern Michigan Bancorp Capital Trust I for the sole purpose of issuing trust preferred securities. Under generally accepted accounting principles, the trust is not consolidated into the financial statements of the Company.

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions for Form 10-Q and Rule 8-03 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments considered necessary in order to make the financial statements not misleading have been included. Operating results for the three months ended March 31, 2008 are not necessarily indicative of the results that may be expected for the year ending December 31, 2008.

The accompanying consolidated financial statements should be read in conjunction with the consolidated financial statements and footnotes of the Company for December 31, 2007 included in the Company's Annual Report on Form 10-K for the year ended December 31, 2007, filed with the Securities and Exchange Commission on March 28, 2008. As discussed in the Company's Annual Report on Form 10-K for the year ended December 31, 2007, the Company acquired FNB on December 1, 2007. The transaction was accounted for using the purchase method of accounting and therefore the operating results for the three months ended March 31, 2007 do not include FNB.

<u>Reclassifications</u>: Some items in the prior period consolidated financial statements have been reclassified to conform to the current year presentation.

NOTE B - NEW ACCOUNTING PRONOUNCEMENTS

On February 15, 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 159, "The Fair Value Opinion for Financial Assets and Financial Liabilities" (FAS 159). FAS 159 permits, but does not require, entities to measure selected financial assets and liabilities at fair value. Changes in fair value are recorded through the income statement in subsequent periods. The statement provides for a one time opportunity to transfer existing assets and liabilities to fair value at the point of adoption with a cumulative effect adjustment recorded against equity. After adoption, the election to report assets and liabilities at fair value must be made at the point of their inception. There was no impact on the consolidated financial statements of the Company as a result of the adoption of FAS 159 during the first quarter of 2008 since the Company has not elected the fair value option for any eligible items, as defined in FAS 159.

In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements" (FAS 157) which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. FAS 157 also establishes a fair value hierarchy which requires the use of observable inputs and minimizes the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

- Level 1 Quoted prices in active markets for identical assets or liabilities.
- Level 2 Observable inputs other than Level 1 prices, such as quoted process for similar assets or liabilities; quoted prices in active markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

7

On February 12, 2008, the FASB issued Staff Position 157-2 which defers the effective date of FAS 157 for certain non-financial assets and liabilities to fiscal years beginning after November 15, 2008. All other provisions of FAS 157 are effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years.

The Company adopted the provisions of FAS 157 for the quarter ended March 31, 2008 except for those non-financial assets and liabilities subject to deferral as a result of Staff Position 157-2. There was no impact on the March 31, 2008 consolidated financial statements of the Company as a result of the adoption of FAS 157.

Following is a description of the valuation methodologies used for instruments measured at fair value on a recurring basis and recognized in the accompanying consolidated balance sheet, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Securities available for sale

Where quoted market prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. Level 1 securities would include highly liquid government bonds, mortgage products and exchange traded equities. If quoted market prices are not available, then fair values are estimated by using pricing models, quoted prices of securities with similar characteristics or discounted cash flows. Level 2 securities include U.S. agency securities, mortgage-backed agency securities, obligations of states and political subdivisions and certain corporate, asset backed and other securities. In certain cases where Level 1 or Level 2 inputs are not available, securities are classified within Level 3 of the hierarchy. Currently, all of the Company's securities are considered to be Level 2 securities and fair values are provided by a third party pricing provider.

Following is a description of the valuation methodologies used for instruments measured at fair value on a non-recurring basis and recognized in the accompanying consolidated balance sheet, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Impaired Loans

Loan impairment is reported when full payment under the loan terms is not expected. Impaired loans are carried at the present value of estimated future cash flows using the loan's existing rate, or the fair value of collateral if the loan is collateral dependent. A portion of the allowance for loan losses is allocated to impaired loans if the value of such loans is deemed to be less than the unpaid balance. This valuation is considered Level 3 when consisting of appraisals of underlying collateral. Substantially all impaired loans are valued considering appraisals of underlying collateral.

The FASB Emerging Issues Task Force finalized in 2007 Issues No. 06-4 and 06-10 dealing with the accounting for deferred compensation and post-retirement benefit aspects of endorsement and collateral assignment split-dollar life insurance arrangements. These Issues require that a liability be recorded during the service period when a split-dollar life insurance agreement continues after participants' employment or retirement. The required accrued liability will be based on either the post-employment benefit cost for the continuing life insurance or based on the future death benefit depending on the contractual terms of the underlying agreement. The Issues are effective for fiscal years beginning after December 15, 2007. The adoption of the Issues effective January 1, 2008 did not have a material impact on the Company's consolidated financial statements.

On November 5, 2007, the SEC issued Staff Accounting Bulletin No. 109, Written Loan Commitments Recorded at Fair Value through Earnings ("SAB 109"). Previously, SAB 105, Application of Accounting Principles to Loan Commitments, stated that in measuring the fair value of a derivative loan commitment, a company should not

incorporate the expected net future cash flows related to the associated servicing of the loan. SAB 109 supersedes SAB 105 and indicates that the expected net future cash flows related to the associated servicing of the loan should be included in measuring fair value for all written loan commitments that are accounted for at fair value through earnings. SAB 105 also indicated that internally-developed intangible assets should not be recorded as part of the fair value of a derivative loan commitment, and SAB 109 retains that view. SAB 109 is effective for derivative loan commitments issued or modified in fiscal quarters beginning after December 15, 2007. The adoption of this

standard effective January 1, 2008 did not have a material impact on the Company's consolidated financial statements.

NOTE C - EARNINGS PER SHARE

Basic earnings per common share is net income divided by the weighted average number of common shares outstanding during the period. ESOP shares are considered outstanding for this calculation unless unearned. Diluted earnings per common share includes the dilutive effect of additional potential common shares issuable under stock options. Earnings and dividends per common share are restated for all stock splits and dividends through the date of issue of the financial statements.

A reconciliation of the numerators and denominators of basic and diluted earnings per share for the three month periods ended March 31, 2008 and 2007 is as follows (dollars in thousands, except per share data):

	Enc Marc	Three Months Ended March 31, 2008 Three Mon Ended March 31 2007		
Basic earnings per share:				
Net income	\$	1,201	\$	978
Weighted average common shares outstanding		2,307,924		1,771,303
Less unallocated ESOP shares		11,115		7,634
Weighted average common shares outstanding for basic earnings per share		2,296,809		1,763,669
Basic earnings per share	\$	0.52	\$	0.55
Diluted earnings per share: Net income	\$	1,201	\$	978
Weighted average common shares outstanding for basic earnings per share		2,296,809		1,763,669
Add: Dilutive effect of assumed exercise of stock options		1,661		6,926
Weighted average common and dilutive potential common		0.000.470		1.770.505
shares outstanding		2,298,470		1,770,595

Diluted earnings per share \$0.52 \$ 0.55

Shares outstanding in 2008 included the issuance of 535,936 shares in connection with the purchase of FNB.

Stock option awards outstanding that were anti-dilutive and therefore not included in the computation of earnings per share were as follows: 186,338 and 46,775 for the three months ended March 31, 2008 and 2007, respectively.

9

NOTE D - STOCK OPTIONS

Shareholders of the Company approved a stock option plan in April 2000 and a stock incentive plan in June 2005. The plans were authorized to issue up to 115,500 and 157,500 shares, respectively. As of March 31, 2008, there were 44,841 shares available for future issuance under the 2000 plan and 20,502 shares available for future issuance under the 2005 plan.

A summary of stock option activity in the plans is as follows for the three months ended March 31, 2008:

	Shares	Weighted Average Price
	107.100	0.22.16
Outstanding at beginning of year	197,108	\$ 23.16
Granted	-	-
Exercised	-	-
Forfeited	-	-
Outstanding at March 31, 2008	197,108	23.16
Options exercisable at March 31, 2008	94,298	22.15

In January 2007, 2,740 shares of restricted stock were issued to employees and directors. The shares vest 20% per year over five years. Compensation expense of \$4,000 was recorded during the three months ended March 31, 2008.

For the three months ended March 31, 2008, compensation expense of \$26,000 was recorded with respect to options granted in 2007. Such expense was computed in accordance with Statement of Financial Accounting Standards No. 123R, "Share-Based Payment."

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion provides information about the financial condition and results of operations of the Company and its subsidiary banks, Southern Michigan Bank & Trust (SMB&T) and FNB Financial (FNB) for the three month periods ending March 31, 2008 and 2007. Financial results for 2008 were influenced by the acquisition of FNB on December 1, 2007. In accordance with the purchase method of accounting, FNB's results of operations were included in the Company's consolidated statements of income from the date of acquisition. Consequently, a comparison of this quarter's results to March 31, 2007 results are affected by the inclusion of FNB's results. The purchase of FNB resulted in an increase in assets of \$150,406,000 and an increase in shareholders' equity of \$12,711,000.

Results of Operations

For the first three months of 2008, net income was \$1,201,000 and basic and diluted earnings per share were \$0.52, compared with net income of \$978,000 and basic and diluted earnings per share of \$0.55 for the first three months of 2007. Included in the 2008 results was a \$371,000 tax free gain on life insurance proceeds.

Return on average assets was 0.99% for the first three months of 2008 compared to 1.18% for the first three months of 2007. Return on average shareholders' equity was 10.64% for the first three months of 2008, compared to 13.38% for the same period in 2007.

Net Interest Income

The Company derives the greatest portion of its income from net interest income. During 2007, short-term rates were unchanged for the first eight months of the year. Beginning in September of 2007, the Federal Open Market Committee began lowering short-term rates. Through the first quarter of 2008, short-term rates dropped 300 basis points. The Company has been able to lower its cost of funds by 53 basis points compared to March 31, 2007, but tax equivalent yields on average assets declined to 6.82% from 7.51% for the same periods. This resulted in a decline in the interest rate spread and net interest margin.

The following tables provide information regarding interest income and expense for the three-month periods ended March 31, 2008 and 2007, respectively. Table 1 shows the year-to-date daily average balances for interest earning assets and interest bearing liabilities, interest earned or paid, and the annualized effective rate. Table 2 shows the effect on interest income and expense of changes in volume and interest rates on a tax equivalent basis.

Table 1 - Average Balances and Tax Equivalent Interest Rates

Total interest bearing liabilities	\$	(273)	\$	723	\$	450	\$	406	\$	76	\$	482
Net interest income	\$	(155)	\$	1,350	\$	1,195	\$	(130)	\$	149	\$	19

As shown in Tables 1 and 2, tax-equivalent net interest income increased \$1,195,000 in the first three months of 2008 compared to the same period in 2007. Increases in the average balances primarily resulted from the FNB acquisition. Net interest income decreased \$155,000 due to rate changes comparing the first quarter of 2008 with the first quarter of 2007 on a tax equivalent basis. This decrease is due primarily to the rate decreases described above.

The presentation of net interest income on a tax equivalent basis is not in accordance with generally accepted accounting principles ("GAAP"), but is customary in the banking industry. This non-GAAP measure ensures comparability of net interest income arising from both taxable and tax-exempt loans and investment securities. The adjustments to determine net interest income on a tax equivalent basis were \$150,000 and \$87,000 for the three months ended March 31, 2008 and 2007, respectively. These adjustments were computed using a 34% federal income tax rate.

Provision for Loan Losses

The provision for loan losses is based on an analysis of the required additions to the allowance for loan losses. The provision is charged to income to bring the allowance for loan losses to a level deemed appropriate by management. The allowance for loan losses is maintained at a level believed adequate by management to absorb probable incurred losses in the loan portfolio. Some factors considered by management in determining the level at which the allowance is maintained include specific credit reviews, historical loan loss experience, current economic conditions and trends, results of examinations by regulatory agencies and the volume, growth and composition of the loan portfolio. The provision is adjusted quarterly, if necessary, to reflect changes in the factors above as well as actual charge-off experience and any known losses.

The provision for loan losses was \$350,000 for the first three months of 2008. In 2008 specific reserves increased from December 31, 2007 levels, net charge-offs were higher than in the first quarter of 2007 and nonperforming loans have increased 50% or \$2,417,000 from December 31, 2007 levels. All of these factors contributed to the higher provision.

The allowance was 1.58% of total loans at March 31, 2008 compared to 1.53% at December 31, 2007.

Charge-offs and recoveries for respective loan categories for the three months ended March 31, 2008 and 2007 were as follows:

(Dollars in thousands)

		2008	3		2007				
	Charge	Charge-offs		Recoveries		Charge-offs		Recoveries	
Commercial	\$	160	\$	18	\$	102	\$	17	
Residential real estate Consumer		37 44		3 23		39		38	
Total	\$	241	\$	44	\$	148	\$	55	

Net charge-offs in the first three months of 2008 were \$197,000, or 0.24% of loans on an annualized basis. Net charge-offs in the first three months of 2007 were \$93,000, or 0.15% of loans on an annualized basis.

Non-interest income

Total non-interest income increased from \$954,000 at March 31, 2007 to \$1,950,000 at March 31, 2008, an increase of \$996,000. The increase is a result of the FNB acquisition which provided \$607,000 of non-interest income during the quarter and, as previously mentioned, the \$371,000 gain from life insurance proceeds. Other non-interest income items remained steady, with the exception of trust fees which increased over 11% excluding the impact of FNB.

Non-interest expense

Total non-interest expense increased \$1,899,000, or 63.4%, when comparing the three month periods ending March 31, 2008 and 2007. The FNB purchase generated \$1,514,000 of the increase. Salary and employee benefits were \$811,000 higher than the 2007 first quarter, and include staffing for FNB. Occupancy, equipment, telecommunication and software maintenance costs also increased as an additional 8 branch locations were added from FNB. Amortization of other intangibles was \$93,000 higher in 2008; as a result of the core deposit amortization from the FNB acquisition.

Federal income taxes

The provision for federal income taxes for the three months ended March 31, 2008 and 2007 resulted in an effective tax rate of 14.6% and 26.4%, respectively. The decrease in the effective tax rate from March 31, 2007 to March 31, 2008 primarily results from the \$371,000 gain on life insurance proceeds which is non-taxable. In addition, tax exempt interest income increased during the first quarter of 2008 compared to 2007.

Financial Condition

The Company's balance sheet was relatively flat in all categories at March 31, 2008 compared to December 31, 2007. Federal funds sold increased \$6 million to \$12.5 million at March 31, 2008 from December 31, 2007 as

non-earning cash and called securities were invested in overnight federal funds. Gross loans were down less than 0.5% to \$334.9 million from \$336.0 million.

Nonperforming assets

Nonperforming assets include non-accrual loans, accruing loans past due 90 days or more, and other real estate owned, which includes real estate acquired through foreclosures and deeds in lieu of foreclosure.

13

A loan generally is classified as nonaccrual when full collectibility of principal or interest is doubtful or a loan becomes 90 days past due as to principal or interest, unless management determines that the estimated net realizable value of the collateral is sufficient to cover the principal balance and accrued interest. When interest accruals are discontinued, unpaid interest is reversed. Nonperforming loans are returned to performing status when the loan is brought current and has performed in accordance with contract terms for a period of time.

The following table sets forth the aggregate amount of nonperforming assets in each of the following categories:

(Dollars in thousands)

	March 31, 2008		December 31, 2007		March 31, 2007	
Nonaccrual loans:						
Commercial, financial and agricultural	\$	5,550	\$	3,032	\$	2,846
Real estate mortgage		1,394		1,342		453
Installment		-		31		8
		6,944		4,405		3,307
Loans contractually past due 90 days or more and still on accrual:						
Commercial, financial and agricultural		106		411		305
Real estate mortgage		153		-		-
Installment		48		18		1
		307		429		306
Total nonperforming loans		7,251		4,834		3,613
Other real estate owned		902		866		1,026
Total nonperforming assets	\$	8,153	\$	5,700	\$	4,639
Nonperforming loans to total loans		2.16%		1.44%		1.43%
Nonperforming assets to total assets		1.70%		1.19%		1.36%

Nonperforming loans are subject to continuous monitoring by management and estimated losses are specifically allocated for in the allowance for loan losses where appropriate.

In management's evaluation of the loan portfolio risks, any significant future increases in nonperforming loans is dependent to a large extent on the economic environment. In a deteriorating or uncertain economy, such as the Company is faced with today, management applies more conservative assumptions when assessing the future prospects of borrowers and when estimating collateral values. This has resulted in a higher number of loans being classified as nonperforming.

The increase in nonaccrual loans at March 31, 2008 is primarily the result of one commercial credit being placed on non-accrual in February 2008.

Shareholders' equity

Total shareholders' equity increased \$997,000 from the year ended December 31, 2007. The increase is primarily attributable to the current year's net income, offset by dividends declared to shareholders.

The following table summarizes the Company's capital ratios as of March 31, 2008 and December 31, 2007:

	March 31, 2008	December 31, 2007	Regulatory Minimums
Total risk-based capital ratio	11.0%	10.9%	8.0%
Tier I capital ratio	9.5%	9.5%	4.0%
Leverage ratio	7.4%	10.3%	4.0%
	14		

Liquidity

Liquidity management involves the ability to meet the cash flow requirements of customers who may be either depositors wanting to withdraw funds or borrowers needing assurance that sufficient funds will be available to meet their credit needs. The subsidiary banks maintain certain levels of liquid assets (the most liquid of which are cash and cash equivalents, federal funds sold and investment securities) in order to meet these demands. Maturing loans and investment securities are the principal sources of asset liquidity.

The subsidiary banks maintain correspondent accounts with a number of other banks for various purposes. In addition, cash sufficient to meet the operating needs of its branches is maintained at its lowest practical levels. At times, the subsidiary banks are a participant in the federal funds market. Federal funds are generally borrowed or sold for one-day periods. The subsidiary banks have available credit arrangements at March 31, 2008 enabling them to purchase up to \$32,000,000 in federal funds should the need arise.

The Company's principal source of funds to pay cash dividends is the earnings and dividends paid by its subsidiary banks. The Company also has available \$2,250,000 at March 31, 2008 on revolving lines of credit for general working capital purposes.

Impact of Inflation and Changing Prices

The majority of assets and liabilities of a financial institution are monetary in nature and therefore differ greatly from most commercial and industrial companies that have significant investments in fixed assets or inventories. However, inflation does have an important impact on the growth of total assets in the banking industry and the resulting need to increase equity capital at higher than normal rates in order to maintain an appropriate equity-to-assets ratio. Another significant effect of inflation is on other expenses, which tend to rise during periods of general inflation.

Item 4T. Controls and Procedures

An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of March 31, 2008. Based on and as of the time of that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report.

There was no change in the Company's internal control over financial reporting that occurred during the three months ended March 31, 2008 that has materially affected, or that is reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II. Other Information

Item 1A. Risk Factors

Information concerning risk factors is contained in the section entitled "Risk Factors" in Southern Michigan Bancorp, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2007, filed with the Securities and Exchange Commission on March 28, 2008. As of the date of this report, Southern does not believe that there has been a material change in the nature or categories of the Company's risk factors, as compared to the information disclosed in the Company's Annual Report on Form 10-K.

Item 6. Exhibits

Exhibits. The following exhibits are filed as part of this report on Form 10-Q:
