CARBO CERAMICS INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$ in thousands, except per share data)
(Unaudited)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements of CARBO Ceramics Inc. have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments, consisting only of normal recurring adjustments, considered necessary for a fair presentation have been included. The results of the interim periods presented herein are not necessarily indicative of the results to be expected for any other interim period or the full year. The consolidated balance sheet as of December 31, 2009 has been derived from the audited financial statements at that date. These financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto for the year ended December 31, 2009 included in the annual report on Form 10-K of CARBO Ceramics Inc. for the year ended December 31, 2009.

The consolidated financial statements include the accounts of CARBO Ceramics Inc. and its operating subsidiaries (the Company). The consolidated financial statements also include a 6% interest in a Texas-based electronic equipment manufacturing company that was acquired in March 2008 that is reported under the cost method of accounting. All significant intercompany transactions have been eliminated.

Cash Equivalents

The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents. The carrying amounts reported in the balance sheet for cash equivalents approximate fair value.

2. Acquisition of Business

On October 2, 2009 a wholly-owned subsidiary of the Company purchased substantially all of the assets of BBL Falcon Industries, Ltd. (Falcon), a supplier of spill prevention and containment systems for the oil and gas industry. The acquisition was made for the purpose of expanding the Company's product and service offerings to its existing client base. Falcon uses proprietary technology to provide solutions that are designed to enable its clients to extend the life of their storage assets, reduce the potential for hydrocarbon spills and provide containment of stored materials. The acquisition was accounted for using the purchase method of accounting under ASC Topic 805, *Business Combinations* (formerly SFAS No. 141(R)). The aggregate purchase price of the acquisition, including purchase price adjustments, was \$22,807 in cash. The operating results of the acquired company have been included in the consolidated financial statements from the date of acquisition. Goodwill of \$8,664 arising in the transaction is deductible for income tax purposes.

Unaudited pro forma revenue, earnings and earnings per share were not materially different from reported results and as such are not presented herein.

The following table summarizes the fair values of the assets acquired and liabilities assumed at the date of acquisition:

Current assets	\$ 3,704
Property, plant and equipment	5,892
Intangible assets	6,453
Goodwill arising in the transaction	8,664
	24,713
Current liabilities	(1,906)
Net assets acquired	\$ 22,807

Table of Contents**3. Earnings Per Share**

ASC Topic 260, *Earnings Per Share* (formerly Staff Position No. EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*) provides that unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share pursuant to the two-class method. The Company's outstanding non-vested restricted stock awards are participating securities. Accordingly, earnings per common share are computed using the two-class method prescribed by ASC Topic 260 *Earnings Per Share*.

The following table sets forth the computation of basic and diluted earnings per share under the two-class method:

	Three months ended March 31,	
	2010	2009
Numerator for basic and diluted earnings per share:		
Net income	\$ 18,992	\$ 16,428
Effect of reallocating undistributed earnings of participating securities	(121)	(94)
Net income available under the two-class method	\$ 18,871	\$ 16,334
Denominator:		
Denominator for basic earnings per share weighted-average shares	22,967,485	23,460,057
Effect of dilutive securities:		
Employee stock options (See Note 7)	5,701	13,675
Deferred stock awards (See Note 7)	4,017	39,770
Dilutive potential common shares	9,718	53,445
Denominator for diluted earnings per share adjusted weighted-average shares	22,977,203	23,513,502
Basic earnings per share	\$ 0.82	\$ 0.70
Diluted earnings per share	\$ 0.82	\$ 0.70

4. Common Stock Repurchase Program

On August 28, 2008, the Company's Board of Directors authorized the repurchase of up to two million shares of the Company's Common Stock. Shares are effectively retired at the time of purchase. The Company did not repurchase any shares under this plan during the first quarter of 2010. As of March 31, 2010, the Company has repurchased and retired 1,743,076 shares at an aggregate price of \$64,713.

5. Dividends Paid

On January 19, 2010, the Board of Directors declared a cash dividend of \$0.18 per common share payable to shareholders of record on February 1, 2010. The dividend was paid on February 16, 2010. On March 16, 2010, the Board of Directors declared a cash dividend of \$0.18 per common share payable to shareholders of record on May 3, 2010. The dividend is payable on May 17, 2010 and is presented in Current Liabilities at March 31, 2010.

Table of Contents**6. Comprehensive Income**

The following table sets forth the components of comprehensive income:

	Three months ended March 31,	
	2010	2009
Net income	\$ 18,992	\$ 16,428
Foreign currency translation adjustment	1,288	(4,692)
Comprehensive income	\$ 20,280	\$ 11,736

The foreign currency translation adjustment for the three months ended March 31, 2010 and 2009 is net of deferred income tax benefit of none and \$2,526, respectively.

7. Stock Based Compensation

The CARBO Ceramics Inc. Omnibus Incentive Plan (the Omnibus Incentive Plan), which replaced the previously expired restricted stock and stock option plans, provides for granting of cash-based awards, stock options (both non-qualified and incentive) and other equity-based awards (including stock appreciation rights, phantom stock, restricted stock, restricted stock units, performance shares, deferred share units or share-denominated performance units) to employees and non-employee directors. The amount paid under the Omnibus Incentive Plan to any single participant in any calendar year with respect to any cash-based award shall not exceed \$2,000. Awards may be granted with respect to a number of shares of the Company's Common Stock that in the aggregate does not exceed 750,000 shares prior to the fifth anniversary of its effective date, plus (i) the number of shares that are forfeited, cancelled or returned, and (ii) the number of shares that are withheld from the participants to satisfy an option exercise price or minimum statutory tax withholding obligations. No more than 50,000 shares may be granted to any single participant in any calendar year. Equity-based awards may be subject to performance-based and/or service-based conditions. With respect to stock options and stock appreciation rights granted, the exercise price shall not be less than the market value of the underlying Common Stock on the date of grant. The maximum term of an option is ten years. Restricted stock awards granted generally vest (i.e., transfer and forfeiture restrictions on these shares are lifted) proportionately on each of the first three anniversaries of the grant date, but subject to certain limitations, awards may specify other vesting periods. Unvested shares granted to an individual vest upon retirement at or after the age of 62. As of March 31, 2010, 669,288 shares were available for issuance under the Omnibus Incentive Plan. Although the Company's previous restricted stock and stock option plans have expired, outstanding options and unvested shares granted under these plans remain outstanding in accordance with their terms.

The Company also had a Director Deferred Fee Plan (the Plan), which terminated on January 19, 2010, that permitted non-employee directors of the Company to defer receipt of cash compensation for service as a director and to receive those fees in the form of the Company's Common Stock on a specified later date that was on or after the director's retirement from the Board of Directors. As of March 31, 2010, a total of 4,028 shares were reserved for future issuance in payment of \$168 of deferred fees under the Plan by electing directors. These shares will be issued no later than 2011.

A summary of stock option activity and related information for the three months ended March 31, 2010 is presented below:

	Options	Weighted- Average Exercise Price	Aggregate Intrinsic Value
Outstanding at January 1, 2010	13,425	\$ 28.59	
Granted			
Exercised			

Forfeited

Outstanding at March 31, 2010	13,425	\$	28.59	\$	453
Exercisable at March 31, 2010	13,425	\$	28.59	\$	453

As of March 31, 2010, all compensation cost related to stock options granted under the expired stock option plans has been recognized. The weighted-average remaining contractual term of options outstanding at March 31, 2010 was 2.9 years. There were no options exercised during the three months ended March 31, 2010.

Table of Contents

A summary of restricted stock activity and related information for the three months ended March 31, 2010 is presented below:

	Shares	Weighted-Average Grant-Date Fair Value
Nonvested at January 1, 2010	139,391	\$ 38.88
Granted	55,460	\$ 68.80
Vested	(45,235)	\$ 35.40
Forfeited	(1,147)	\$ 55.36
Nonvested at March 31, 2010	148,469	\$ 50.99

As of March 31, 2010, there was \$5,848 of total unrecognized compensation cost, net of estimated forfeitures, related to restricted shares granted under the restricted stock plans. That cost is expected to be recognized over a weighted-average period of 2.1 years. The total fair value of shares vested during the three months ended March 31, 2010 was \$1,601.

The Company also had an International Long-Term Incentive Plan that provided for granting units of stock appreciation rights (SARs) or phantom shares to key international employees. This plan was replaced by the Omnibus Incentive Plan. One-third of the units subject to an award vests and ceases to be forfeitable on each of the first three anniversaries of the grant date. Participants awarded units of SARs have the right to receive an amount, in cash, equal to the excess of the fair market value of a share of Common Stock as of the vesting date, or in some cases on a later exercise date chosen by the participant, over the exercise price. Participants awarded units of phantom shares are entitled to a lump sum cash payment equal to the fair market value of a share of Common Stock on the vesting date. In no event will Common Stock of the Company be issued under either plan. As of March 31, 2010, there were 18,895 units of phantom shares granted under the plans, of which 5,372 have vested and 325 have been forfeited, with a total value of \$823, the vested portion of which is recorded as a liability within Other Accrued Expenses.

8. Bank Borrowings

The Company replaced its prior credit facility with a new unsecured revolving credit agreement with a bank. Under the terms of the agreement, dated January 29, 2010, the Company can borrow up to \$10,000. The Company has the option of choosing either the bank's fluctuating Base Rate or LIBOR Fixed Rate, plus an Applicable Margin, all as defined in the credit agreement. The terms of the credit agreement provide for certain affirmative and negative covenants and require the Company to maintain certain financial ratios. Commitment fees are payable quarterly at the annual rate of 0.50% of the unused line of credit.

9. Foreign Currencies

As of March 31, 2010, the Company's net investment that is subject to foreign currency fluctuations totaled \$79,329 and the Company has recorded a cumulative foreign currency translation loss of \$3,921, net of deferred income tax benefit. This cumulative translation loss is included in Accumulated Other Comprehensive Loss.

10. New Accounting Pronouncements

Effective January 1, 2010, the Company adopted ASC Topic 350, *Intangibles-Goodwill and Others-General Intangibles Other than Goodwill*. The statement discusses determination of the useful life of intangible assets and amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset. This guidance is intended to improve the consistency between the useful life of an intangible asset determined under the guidance for goodwill and other intangible assets and the period of expected cash flows used to measure the fair value of the asset. The adoption did not have a material impact on the Company's financial position, results of operations, or cash flows.

Table of Contents

11. Legal Proceedings

The Company is subject to legal proceedings, claims and litigation arising in the ordinary course of business. While the outcome of these matters is currently not determinable, management does not expect that the ultimate costs to resolve these matters will have a material adverse effect on the Company's consolidated financial position, results of operations, or cash flows.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****Business**

The Company generates revenue primarily through the sale of products and services to the oil and natural gas industry. The Company's principal business consists of manufacturing and selling ceramic proppant for use primarily in the hydraulic fracturing of oil and natural gas wells. The Company also provides the world's most popular fracture simulation software, as well as fracture design and consulting services. In addition, the Company provides a broad range of technologies for spill prevention, containment and countermeasures, along with geotechnical monitoring. On October 2, 2009, Falcon Technologies and Services, Inc. (Falcon Technologies), a wholly-owned subsidiary of the Company, purchased substantially all of the assets of BBL Falcon Industries, Ltd. (Falcon), a supplier of spill prevention, containment and countermeasure systems for the oil and gas industry. The acquisition was made for the purpose of expanding the Company's product and service offerings to its existing client base. Falcon Technologies uses proprietary technology to provide solutions that are designed to enable its clients to extend the life of their storage assets, reduce the potential for hydrocarbon spills and provide containment of stored materials. Furthermore, the acquired tangible and intangible assets will be subject, in 2010, to our policies regarding impairment of long-lived assets.

Critical Accounting Policies

The consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States, which require the Company to make estimates and assumptions (see Note 1 to the consolidated financial statements included in the annual report on Form 10-K for the year ended December 31, 2009). The Company believes that some of its accounting policies involve a higher degree of judgment and complexity than others. As of December 31, 2009, critical accounting policies for the Company included revenue recognition, estimating the recoverability of accounts receivable, inventory valuation, accounting for income taxes and accounting for long-lived assets. These critical accounting policies are discussed more fully in the Company's annual report on Form 10-K for the year ended December 31, 2009. The Company added purchase accounting as a critical accounting policy in 2010 as a result of the Falcon acquisition. There have been no other changes in the Company's evaluation of its critical accounting policies since December 31, 2009.

Purchase accounting requires extensive use of estimates and judgments to allocate the cost of an acquired enterprise to the assets acquired and liabilities assumed. The cost of an acquired enterprise is allocated to the assets acquired and liabilities assumed based on their estimated fair values. If necessary, these estimates can be revised during an allocation period when information becomes available to further define and quantify the value of assets acquired and liabilities assumed. The allocation period does not exceed a period of one-year from the date of acquisition. To the extent additional information to refine the original allocation becomes available during the allocation period, the purchase price allocation would be adjusted accordingly. Should information become available after the allocation period, the effects would be reflected in operating results.

Results of Operations**Three Months Ended March 31, 2010**

Revenues. Revenues of \$123.4 million for the first quarter of 2010 increased 36% compared to \$90.6 million for the same period in 2009. Revenues increased primarily due to a 46% increase in proppant sales volume and the addition of Falcon, partially offset by an 11% decrease in the average proppant selling price. Worldwide proppant sales volume totaled 370 million pounds in the first three months of 2010 compared to 253 million pounds for the same period in 2009. North American (defined as Canada and the U.S.) sales volume increased 47% due primarily to a 53% increase in U.S. sales volume driven by increases for both lightweight and heavyweight products. International (excluding Canada) sales volume increased 45% primarily due to increases in Russia, China, Asia and the North Sea. The average selling price per pound of ceramic proppant was \$0.313 during the first quarter of 2010 compared to \$0.350 for the same period in 2009. The lower average proppant selling price was primarily attributed to price reductions instituted in the second quarter of 2009.

Gross Profit. Gross profit for the first quarter of 2010 was \$42.6 million, or 34% of revenues, compared to \$36.0 million, or 40% of revenues, for the first quarter of 2009. Despite higher gross profit from increased sales

Table of Contents

volume, the gross profit margin decreased as a result of the lower average proppant selling price, a change in the mix of products sold towards heavyweight proppant and an increase in freight costs.

Selling, General and Administrative (SG&A) and Other Operating Expenses. SG&A expenses totaled \$13.6 million for the first quarter of 2010 compared to \$11.5 million for the first quarter of 2009. As a percentage of revenues, SG&A expenses decreased to 11.0% in 2010 compared to 12.7% for the first quarter of 2009. The increase in SG&A expenses primarily resulted from the inclusion of Falcon SG&A expenses in the first quarter of 2010 and higher research and development spending. Start-up costs of \$0.1 million in 2010 related to the start-up of the resin-coating plant within the Company's existing manufacturing infrastructure at the New Iberia, Louisiana facility.

Other Income (Expense). Other income for the first quarter of 2010 declined \$0.4 million compared to the same period in 2009. This decline is mainly attributed to a \$0.2 million decrease in interest income and a \$0.3 million decrease in gains resulting from changes in exchange rates between the functional currency and the foreign currency in which the effective transactions were denominated.

Income Tax Expense. Income tax expense was \$9.7 million, or 33.9% of pretax income, for the first quarter of 2010 compared to \$8.4 million, or 33.8% of pretax income, for the same period last year. The \$1.3 million increase is primarily due to higher pre-tax income.

Liquidity and Capital Resources

At March 31, 2010, the Company had cash and cash equivalents of \$80.0 million compared to cash and cash equivalents of \$69.6 million at December 31, 2009. During the first quarter of 2010, the Company generated \$29.1 million of cash from operating activities and \$0.2 million from the effect of exchange rate changes on cash. Uses of cash included \$14.7 million for investing activities, primarily capital spending, and \$4.2 million for the payment of cash dividends.

The Company remains cautious with respect to the near-term outlook for natural gas, given the current supply-demand situation. While market conditions for natural gas during the second half of 2010 are difficult to predict, some industry experts expect activity in oil drilling to remain strong during that period. Based on these factors, the Company expects that for the next two quarters, ceramic proppant sales volume will closely match its production capacity. Although the North American drilling rig count has improved during the last three quarters, it is not apparent whether this is the beginning of a recovery or a short-term correction. The Company believes the steep natural gas decline curves in North America will eventually help in bringing supply and demand more into balance; however, the timing of a sustainable recovery in the oil and gas industry is difficult to pinpoint.

Subject to its financial condition, the amount of funds generated from operations and the level of capital expenditures, the Company's current intention is to continue to pay quarterly dividends to holders of its common stock. On March 16, 2010, the Company's Board of Directors approved the payment of a quarterly cash dividend of \$0.18 per share, or \$4.2 million in the aggregate, to shareholders of the Company's common stock on May 3, 2010. The Company estimates its total capital expenditures for the remainder of 2010 will be between \$75 million and \$85 million. Capital expenditures in 2010 are expected to include costs associated with the previously announced construction of the Company's third and fourth production lines at its Toombsboro, Georgia facility. The Company currently anticipates that the third production line will be completed near the end of 2010 and the fourth production line will be completed in the second half of 2011. The construction of the fourth production line is expected to increase the Company's capacity by an additional 250 million pounds per year and will have a total cost of approximately \$62 million for completion.

The Company has historically maintained an unsecured line of credit of \$10.0 million. That line of credit expired as of December 31, 2009; however, in January 2010 the Company obtained another \$10.0 million unsecured line of credit with Wells Fargo Bank, N.A. As of March 31, 2010, there was no outstanding debt under the new credit agreement.

The Company anticipates that cash on hand, cash provided by operating activities and funds available under its line of credit will be sufficient to meet planned operating expenses, tax obligations, capital expenditures and other cash needs for the next 12 months. The Company also believes that it could acquire additional debt financing, if needed. Based on these assumptions, the Company believes that its fixed costs could be met even with a moderate decrease in demand for the Company's products.

Off-Balance Sheet Arrangements

The Company had no off-balance sheet arrangements as of March 31, 2010.

Forward-Looking Information

The statements in this Form 10-Q that are not historical statements, including statements regarding our future financial and operating performance and liquidity and capital resources, are forward-looking statements within the meaning of the federal securities laws. All forward-looking statements are based on management's current expectations and estimates, which involve risks and uncertainties that could cause actual results to differ materially from those expressed in forward-looking statements. Among these factors are:

- changes in overall economic conditions,
- changes in the cost of raw materials and natural gas used in manufacturing our products,
- changes in demand and prices charged for our products,
- changes in the demand for, or price of, oil and natural gas,
- risks of increased competition,
- technological, manufacturing and product development risks,
- loss of key customers,
- changes in foreign and domestic government regulations,
- changes in foreign and domestic political and legislative risks,
- the risks of war and international and domestic terrorism,
- risks associated with foreign operations and foreign currency exchange rates and controls, and
- weather-related risks and other risks and uncertainties.

Additional factors that could affect our future results or events are described from time to time in our reports filed with the Securities and Exchange Commission (the "SEC"). See in particular our Form 10-K for the fiscal year ended December 31, 2009 under the caption "Risk Factors" and similar disclosures in subsequently filed reports with the SEC. We assume no obligation to update forward-looking statements, except as required by law.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's major market risk exposure is to foreign currency fluctuations that could impact its investments in China and Russia. As of March 31, 2010, the Company's net investment that is subject to foreign currency fluctuations totaled \$79.3 million and the Company has recorded a cumulative foreign currency translation loss of \$3.9 million, net of deferred income tax benefit. This cumulative translation loss is included in Accumulated Other Comprehensive Loss. From time to time, the Company may enter into forward foreign exchange contracts to hedge the impact of foreign currency fluctuations. There were no such foreign exchange contracts outstanding at March 31, 2010.

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

Disclosure controls and procedures are designed to ensure that information required to be disclosed in the reports filed or submitted under the Securities Exchange Act of 1934 (the "Exchange Act") is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in the reports filed under the Exchange Act is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

As of March 31, 2010, management carried out an evaluation, under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurances of achieving their control objectives. Based upon and as of the date of that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and

reported, within the time periods specified in the SEC's rules and forms, and to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes in Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting during the quarter ended March 31, 2010, that materially affected, or are reasonably likely to materially affect, those controls.
