UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

Form 10-K

þ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the year ended December 31, 2007

Commission file number: 011-33209

Altra Holdings, Inc.
(Exact Name of Registrant as Specified in its Charter)

Delaware	**61-1478870**
(State or Other Jurisdiction of Incorporation or Organization)	*(I.R.S. Employer Identification No.)*
14 Hayward Street, Quincy, Massachusetts	**02171**
(Address of Principal Executive Offices)	*(Zip Code)*

Registrant s telephone number, including area code:

(617) 328-3300

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on Which Registered
Common Stock, $0.001 par value	NASDAQ Global Market

Securities registered pursuant to Section 12(g) of the Act:

NONE

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes o   No þ

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes þ   No o

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes þ   No o

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant s knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.   o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer,   accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer o	Accelerated filer þ	Non-accelerated filer o (Do not check if a smaller reporting company)	Smaller reporting company o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o   No þ

The aggregate market value of the registrant s common stock held by non-affiliates of the registrant based on the closing price (as reported by NASDAQ) of such common stock on the last business day of the registrant s most recently completed second fiscal quarter (June 30, 2007) was approximately $419.2 million.

As of March 15, 2008, there were 26,406,638 shares of Common Stock, $.001 par value per share, outstanding.

FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements made by or on behalf of Altra Holdings, Inc. We make forward-looking statements throughout this Form 10-K. Whenever you read a statement that is not solely a statement of historical fact, such as when we state that we believe, expect, anticipate or plan that an event will occur and other similar statements, you should understand that our expectations may not be correct, although we believe they are reasonable, and that our plans may change. We do not guarantee that the transactions and events described in this Form 10-K will happen as described or that any positive trends noted in this Form 10-K will continue. The forward-looking information contained in this Form 10-K is generally located under the headings, Risk Factors, Management s Discussion and Analysis of Financial Condition and Results of Operations and Business, but may be found in other locations as well. These forward-looking statements generally relate to our strategies, plans and objectives for, and potential results of, future operations and are based upon management s current plans and beliefs or current estimates of future results or trends.

Forward-looking statements regarding management s present plans or expectations for new product offerings, capital expenditures, increasing sales, cost-saving strategies and growth involve risks and uncertainties relative to among other things, return expectations, allocation of resources and changing economic or competitive conditions, and as a result, actual results could differ from present plans or expectations and such differences could be material. Similarly, forward-looking statements regarding management s present expectations for operating results and cash flow involve risks and uncertainties relative to these and other factors, such as the ability to increase revenues and/or to achieve cost reductions, and other factors discussed under Risk Factors or elsewhere in this Form 10-K, which also would cause actual results to differ from present plans or expectations. Such differences could be material.

Table of Contents

Item 1. *Business*

Our Company

We are a leading global designer, producer and marketer of a wide range of mechanical power transmission, or MPT, and motion control products serving customers in a diverse group of industries, including energy, general industrial, material handling, mining, transportation and turf and garden. Our product portfolio includes industrial clutches and brakes, enclosed gear drives, open gearing, engineered belted drives, couplings, engineered bearing assemblies, linear components and other related products. Our products are used in a wide variety of high-volume manufacturing processes, where the reliability and accuracy of our products are critical in both avoiding costly down time and enhancing the overall efficiency of manufacturing operations. Our products are also used in non-manufacturing applications where product quality and reliability are especially critical, such as clutches and brakes for elevators and residential and commercial lawnmowers. For the year ended December 31, 2007, we had net sales of $584.4 million, net income of $11.5 million and EBITDA of $86.3 million.

We market our products under well recognized and established brands, many of which have been in existence for over 50 years. We believe many of our brands, when taken together with our brands in the same product category have achieved the number one or number two position in terms of consolidated market share and brand awareness in their respective product categories. Our products are either incorporated into products sold by original equipment manufacturers, or OEMs, sold to end users directly or sold through industrial distributors.

We are led by a highly experienced management team that has established a proven track record of execution, successfully completing and integrating major strategic acquisitions and delivering significant growth in both revenue and profits. We employ a comprehensive business process called the Altra Business System, or ABS, which focuses on eliminating inefficiencies from every business process to improve quality, delivery and cost.

We file reports and other documents with the Securities and Exchange Commission. You may read and copy any document we file at the SEC s Public Reference Room at 100 F Street, NE, Washington, D.C. 20549. You should call 1-800-SEC-0330 for more information on the public reference room. Our SEC Filings are also available to you on the SEC s internet site at http://www.sec.gov.

Our internet address is www.altramotion.com. We are not including the information contained in our website as part of, or incorporating it by reference into, this annual report on Form 10-K.

Our Industry

Based on industry data supplied by Penton Information Services, we estimate that industrial power transmission products generated sales in the United States of approximately $34.5 billion in 2007. These products are used to generate, transmit, control and transform mechanical energy. The industrial power transmission industry can be divided into three areas: MPT products; motors and generators; and adjustable speed drives. We compete primarily in the MPT area which, based on industry data, we estimate was a $17.4 billion market in the United States in 2007.

The global MPT market is highly fragmented, with over 1,000 small manufacturers. While smaller companies tend to focus on regional niche markets with narrow product lines, larger companies that generate annual sales of over $100 million generally offer a much broader range of products and have global capabilities. The industry s customer base is broadly diversified across many sectors of the economy and typically places a premium on factors such as quality, reliability, availability and design and application engineering support. We believe the most successful industry participants are those that leverage their distribution network, their products reputations for quality and reliability and their service and technical support capabilities to maintain attractive margins on products and gain

market share.

Our Strengths

Leading Market Shares and Brand Names. We believe we hold the number one or number two market position in key products across several of our core platforms. We believe that over 50% of our sales

from continuing operations are derived from products where we hold the number one or number two share and brand recognition, on a consolidated basis with our brands in the same product category, in the markets we serve.

Large Installed Base Supporting Aftermarket Sales. With a history dating back to 1857 with the formation of TB Wood s, we believe we benefit from one of the largest installed customer bases in the industry which has lead to significant aftermarket replacement demand creating a recurring revenue stream. For the year ended December 31, 2007, we estimate that approximately 45% of our revenues from continuing operations were derived from aftermarket sales.

Diversified End-Markets. Our revenue base has balanced exposure across a diverse mix of end user industries, including energy, general industrial, material handling, mining, transportation and turf and garden, which helps mitigate the impact of business and economic cycles. In 2007, no single industry represented more than 8% of our total sales from continuing operations, and approximately 30% of our sales from continuing operations were from outside North America.

Strong Relationships with Distributors and OEMs. We have over 1,000 direct OEM customers and enjoy established, long-term relationships with the leading MPT industrial distributors, critical factors that contribute to our high base of recurring aftermarket revenues. We sell our products through more than 3,000 distributor outlets worldwide.

Experienced, High-Caliber Management Team. We are led by a highly experienced management team with over 330 years of cumulative industrial business experience and an average of 12 years with our companies. Our CEO, Michael Hurt, has over 40 years of experience in the MPT industry, and our COO, Carl Christenson, has over 27 years of experience in the MPT industry.

The Altra Business System. We benefit from an established culture of lean management emphasizing quality, delivery and cost through the ABS. ABS is at the core of our performance-driven culture and drives both our strategic development and operational improvements.

Proven Product Development Capabilities. Our extensive application engineering know-how drives both new and repeat sales. Our broad portfolio of products, knowledge and expertise across various MPT applications allows us to provide our customers customized solutions to meet their specific needs. We are highly focused on developing new products in response to customer requirements. We employ approximately 191 non-manufacturing engineers involved with product development, research and development, test and technical customer support. Recent new product development examples include the Foot/Deck Mount Kopper Kool Brake which was designed for very high heat dissipation in extremely rugged tensioning applications such as draw works for oil and gas wells and anchoring systems for on-shore and off-shore drilling platforms.

Our Business Strategy

We intend to continue to increase our sales through organic growth, expand our geographic reach and product offering through strategic acquisitions and improve our profitability through cost reduction initiatives. We seek to achieve these objectives through the following strategies:

> *Leverage Our Sales and Distribution Network.* We intend to continue to leverage our relationships with our distributors to gain shelf space, further integrate our recently acquired brands with our core brands and sell new products. We seek to capitalize on customer brand preference for our products to generate pull-through aftermarket demand from our distribution channel.

Focus our Strategic Marketing on New Growth Opportunities. Through a systematic process that leverages our core brands and products, we seek to identify attractive markets and product niches, collect customer and market data, identify market drivers, tailor product and service solutions to specific market and customer requirements and deploy resources to gain market share and drive future sales growth.

Accelerate New Product and Technology Development. We focus on developing new products across our business in response to customer needs in various markets. In total, new products developed by us during the past three years generated approximately $70 million in revenues from continuing operations in 2007.

Capitalize on Growth and Sourcing Opportunities in the Asia-Pacific Market. We intend to leverage our established sales offices in China, Taiwan and Singapore, as well as add representation in Japan and South Korea. We also intend to expand our manufacturing presence in Asia beyond our current plant in Shenzhen, China. During 2007, we sourced approximately 19% of our purchases from low-cost countries, resulting in average cost reductions of approximately 50% for these products. Within the next five years, we intend to utilize our sourcing office in Shanghai to significantly increase our current level of low-cost country sourced purchases. We may also consider additional opportunities to outsource some of our production from North American and Western European locations to Asia or lower cost regions.

Continue to Improve Operational and Manufacturing Efficiencies through ABS. We believe we can continue to improve profitability through cost control, overhead rationalization, global process optimization, continued implementation of lean manufacturing techniques and strategic pricing initiatives. We have implemented these principles with our acquisitions of Hay Hall, Bear Linear, All Power and TB Wood s and intend to apply such principles to future acquisitions.

Pursue Strategic Acquisitions that Complement our Strong Platform. Management believes that there may be a number of attractive potential acquisition candidates in the future, in part due to the fragmented nature of the industry. As an example, through our acquisition of TB Wood s, we significantly enhanced our position as a leading manufacturer of MPT products by broadening our offering of flexible couplings and adding a new product group in belted drives. We plan to continue our disciplined pursuit of other strategic acquisitions to accelerate our growth, enhance our industry leadership and create value.

Products

We produce and market a wide variety of MPT products. Our product portfolio includes industrial clutches and brakes, open and enclosed gearing, couplings, engineered belted drives, engineered bearing assemblies and other related power transmission components which are sold across a wide variety of industries. Our products benefit from our industry leading brand names including Warner Electric, Boston Gear, TB Wood s, Kilian, Nuttall Gear, Ameridrives, Wichita Clutch, Formsprag Clutch, Bibby Transmissions, Stieber, Matrix, Inertia Dynamics, Twiflex, Industrial Clutch, Huco Dynatork, Marland Clutch, Delroyd, Warner Linear and Saftek. Our products serve a wide variety of end markets including aerospace, energy, food processing, general industrial, material handling, mining, petrochemical, transportation and turf and garden. We primarily sell our products to OEMs and through long-standing relationships with the industry s leading industrial distributors such as Motion Industries, Applied Industrial Technologies, Kaman Industrial Technologies and W.W. Grainger. The following discussion of our products does not include detailed product category revenue because such information is not individually tracked by our financial reporting system and is not separately reported by our general purpose financial statements. Conducting a detailed product revenue internal assessment and audit would involve unreasonable effort and expense as revenue information by product line is not available. We maintain sales information by operating facility, but do not maintain any accounting sales data by product line.

Table of Contents

Our products, principal brands and markets and sample applications are set forth below:

Products	Principal Brands	Principal Markets	Sample Applications
Clutches and Brakes	Warner Electric, Wichita Clutch, Formsprag Clutch, Stieber Clutch, Matrix, Inertia Dynamics, Twiflex, Industrial Clutch, Marland Clutch	Aerospace, energy, material handling, metals, turf and garden, mining	Elevators, forklifts, lawn mowers, oil well draw works, punch presses, conveyors
Gearing	Boston Gear, Nuttall Gear, Delroyd	Food processing, material handling, metals, transportation	Conveyors, ethanol mixers, packaging machinery, metal processing equipment
Engineered Couplings	Ameridrives, Bibby Transmissions, TB Wood s	Energy, metals, plastics, chemical	Extruders, turbines, steel strip mills, pumps
Engineered Bearing Assemblies	Kilian	Aerospace, material handling, transportation	Cargo rollers, seat storage systems, conveyors
Power Transmission Components	Warner Electric, Boston Gear, Huco Dynatork, Warner Linear, Matrix, Saftek, TB Wood s	Material handling, metals, turf and garden	Conveyors, lawn mowers, machine tools
Engineered Belted Drives	TB Wood s	Aggregate, HVAC, material handling	Pumps, sand and gravel conveyors, industrial fans

Clutches and Brakes. Clutches are devices which use mechanical, magnetic, hydraulic, pneumatic, or friction type connections to facilitate engaging or disengaging two rotating members. Brakes are combinations of interacting parts that work to slow or stop machinery. We manufacture a variety of clutches and brakes in three main product categories: electromagnetic, overrunning and heavy duty. Our core clutch and brake manufacturing facilities are located in Connecticut, Indiana, Illinois, Michigan, Texas, the United Kingdom, Germany, France and China.

Electromagnetic Clutches and Brakes. Our industrial products include clutches and brakes with specially designed controls for material handling, forklift, elevator, medical mobility, mobile off-highway, baggage handling and plant productivity applications. We also offer a line of clutch and brake products for walk-behind mowers, residential lawn tractors and commercial mowers. While industrial applications are predominant, we also manufacture several vehicular niche applications including on-road refrigeration compressor clutches and agricultural equipment clutches. We market our electromagnetic products under the Warner Electric, Inertia Dynamics and Matrix brand names.

Overrunning Clutches. Specific product lines include the Formsprag Marland and Stieber indexing and backstopping clutches. Primary industrial applications include conveyors, gear reducers, hoists and cranes, mining machinery, machine tools, paper machinery, packaging machinery, pumping equipment and other specialty machinery. We market and sell these products under the Formsprag Marland and Stieber brand names.

Heavy Duty Clutches and Brakes. Our heavy duty clutch and brake product lines serve various markets including metal forming, off-shore and land-based oil and gas drilling platforms, mining

material handling, marine applications and various off-highway and

Table of Contents

construction equipment segments. Our line of heavy duty pneumatic, hydraulic and caliper clutches and brakes are marketed under the Wichita Clutch and Twiflex brand names.

Gearing. Gears reduce the output speed and increase the torque of an electric motor or engine to the level required to drive a particular piece of equipment. These products are used in various industrial, material handling, mixing, transportation and food processing applications. Specific product lines include vertical and horizontal gear drives, speed reducers and increasers, high-speed compressor drives, enclosed custom gear drives, various enclosed gear drive configurations and open gearing products such as spur, helical, worm and miter/bevel gears. We design and manufacture a broad range of gearing products under the Boston Gear, Nuttall Gear and Delroyd brand names. We manufacture our gearing products at our facilities in New York and North Carolina and sell to a variety of end markets.

Engineered Couplings. Couplings are the interface between two shafts, which enable power to be transmitted from one shaft to the other. Because shafts are often misaligned, we designed our couplings with a measure of flexibility that accommodates various degrees of misalignment. Our coupling product line includes gear couplings, high-speed disc and diaphragm couplings, elastomeric couplings, grid couplings, universal joints, jaw couplings and spindles. Our coupling products are used in a wide range of markets including power generation, steel and custom machinery industries. We manufacture a broad range of coupling products under the Ameridrives, Bibby and TB Wood s brand names. Our engineered couplings are manufactured in our facilities in Mexico, Michigan, Pennsylvania, Texas, the United Kingdom and Wisconsin.

Engineered Bearing Assemblies. Bearings are components that support, guide and reduce friction of motion between fixed and moving machine parts. Our engineered bearing assembly product line includes ball bearings, roller bearings, thrust bearings, track rollers, stainless steel bearings, polymer assemblies, housed units and custom assemblies. We manufacture a broad range of engineered bearing products under the Kilian brand name. We sell bearing products to a wide range of end markets, including the general industrial and automotive markets, with a particularly strong OEM customer focus. We manufacture our bearing products at our facilities in New York, Canada and China.

Engineered Belted Drives. Belted drives incorporate both a rubber-based belt and at least two sheaves or sprockets. Belted drives typically change the speed of an electric motor or engine to the level required for a particular piece of equipment. Our belted drive line includes three types of v-belts, three types of synchronous belts, standard and made-to-order sheaves and sprockets, and split taper bushings. We sell belted drives to a wide range of end markets, including aggregate, energy, chemical and material handling. Our engineered belted drives are primarily manufactured under the TB Wood s brand in our facilities in Pennsylvania, Mexico and Texas.

Power Transmission Components. Power transmission components are used in a number of industries to generate, transfer or control motion from a power source to an application requiring rotary or linear motion. Power transmission products are applicable in most industrial markets, including, but not limited to metals processing, turf and garden and material handling applications. Specific product lines include linear actuators, miniature and small precision couplings, air motors, friction materials, hydrostatic drives and other various items. We manufacture or market a broad array of power transmission components under several businesses including Warner Linear, Huco Dynatork, Saftek, Boston Gear, Warner Electric, TB Wood s and Matrix. Our core power transmission component manufacturing facilities are located in Illinois, Michigan, North Carolina, the United Kingdom and China.

Warner Linear. Warner Linear is a designer and manufacturer of rugged service electromechanical linear actuators for off-highway vehicles, agriculture, turf care, special vehicles, medical equipment, industrial and marine applications.

Huco Dynatork. Huco Dynatork is a leading manufacturer and supplier of a complete range of precision couplings, universal joints, rod ends and linkages.

Other Accessories. Our Boston Gear, Warner Electric, Matrix and TB Wood s businesses make or market several other accessories such as sensors, sleeve bearings, AC/DC motors,

shaft accessories, face tooth couplings, mechanical variable speed drives, and fluid power components that are used in numerous end markets.

Research and Development and Product Engineering

We closely integrate new product development with marketing, manufacturing and product engineering in meeting the needs of our customers. We have product engineering teams that work to enhance our existing products and develop new product applications for our growing base of customers that require custom solutions. We believe these capabilities provide a significant competitive advantage in the development of high quality industrial power transmission products. Our product engineering teams focus on:

- lowering the cost of manufacturing our existing products;
- redesigning existing product lines to increase their efficiency or enhance their performance; and
- developing new product applications.

Our continued investment in new product development is intended to help drive customer growth as we address key customer needs.

Sales and Marketing

We sell our products in over 70 countries to over 1,000 direct OEM customers and over 3,000 distributor outlets. We offer our products through our direct sales force comprised of 103 company-employed sales associates as well as independent sales representatives. Our worldwide sales and distribution presence enables us to provide timely and responsive support and service to our customers, many of which operate globally, and to capitalize on growth opportunities in both developed and emerging markets around the world.

We employ an integrated sales and marketing strategy concentrated on both key industries and individual product lines. We believe this dual vertical market and horizontal product approach distinguishes us in the marketplace allowing us to quickly identify trends and customer growth opportunities and deploy resources accordingly. Within our key industries, we market to OEMs, encouraging them to incorporate our products into their equipment designs, to distributors and to end-users, helping to foster brand preference. With this strategy, we are able to leverage our industry experience and product breadth to sell MPT and motion control solutions for a host of industrial applications.

Distribution

Our MPT components are either incorporated into end products sold by OEMs or sold through industrial distributors as aftermarket products to end users and smaller OEMs. We operate a geographically diversified business. For the year ended December 31, 2007, we derived 70% of our net sales from continuing operations were derived from customers in North America, 22% from customers in Europe and 8% from customers in Asia and the rest of the world. Our global customer base is served by an extensive global sales network comprised of our sales staff as well as our network of over 3,000 distributor outlets.

Rather than serving as passive conduits for delivery of product, our industrial distributors are active participants in influencing product purchasing decisions in the MPT industry. In addition, distributors play a critical role through stocking inventory of our products, which affects the accessibility of our products to aftermarket buyers. It is for this reason that distributor partner relationships are so critical to the success of the business. We enjoy strong established relationships with the leading distributors as well as a broad, diversified base of specialty and regional distributors.

Competition

We operate in highly fragmented and very competitive markets within the MPT market. Some of our competitors have achieved substantially more market penetration in certain of the markets in which we operate, such as helical gear drives and some of our competitors are larger than us and have greater financial and other resources. In particular, we compete with Emerson Power Transmission Manufacturing, L.P., Regal-

Beloit Corporation and Rockwell Automation. In addition, with respect to certain of our products, we compete with divisions of our OEM customers. Competition in our business lines is based on a number of considerations including quality, reliability, pricing, availability and design and application engineering support. Our customers increasingly demand a broad product range and we must continue to develop our expertise in order to manufacture and market these products successfully. To remain competitive, we will need to invest regularly in manufacturing, customer service and support, marketing, sales, research and development and intellectual property protection. We may have to adjust the prices of some of our products to stay competitive. In addition, some of our larger, more sophisticated customers are attempting to reduce the number of vendors from which they purchase in order to increase their efficiency. There is substantial and continuing pressure on major OEMs and larger distributors to reduce costs, including the cost of products purchased from outside suppliers such as us. As a result of cost pressures from our customers, our ability to compete depends in part on our ability to generate production cost savings and, in turn, find reliable, cost-effective outside component suppliers or manufacture our products. See *Risk Factors Risks Related to our Business We operate in the highly competitive mechanical power transmission industry and if we are not able to compete successfully our business may be significantly harmed.*

Intellectual Property

We rely on a combination of patents, trademarks, copyright and trade secret laws in the United States and other jurisdictions, as well as employee and third-party non-disclosure agreements, license arrangements and domain name registrations to protect our intellectual property. We sell our products under a number of registered and unregistered trademarks, which we believe are widely recognized in the MPT industry. With the exception of Boston Gear, Warner Electric and TB Wood s, we do not believe any single patent, trademark or trade name is material to our business as a whole. Any issued patents that cover our proprietary technology and any of our other intellectual property rights may not provide us with adequate protection or be commercially beneficial to us and, patents applied for, may not be issued. The issuance of a patent is not conclusive as to its validity or its enforceability. Competitors may also be able to design around our patents. If we are unable to protect our patented technologies, our competitors could commercialize technologies or products which are substantially similar to ours.

With respect to proprietary know-how, we rely on trade secret laws in the United States and other jurisdictions and on confidentiality agreements. Monitoring the unauthorized use of our technology is difficult and the steps we have taken may not prevent unauthorized use of our technology. The disclosure or misappropriation of our intellectual property could harm our ability to protect our rights and our competitive position.

Some of our registered and unregistered trademarks include: Warner Electric, Boston Gear, TB Wood s, Kilian, Nuttall Gear, Ameridrives, Wichita Clutch, Formsprag, Bibby Transmissions, Stieber, Matrix, Inertia Dynamics, Twiflex, Industrial Clutch, Huco Dynatork, Marland, Delroyd, Warner Linear and Saftek.

Employees

As of December 31, 2007, we had approximately 3,455 full-time employees, of whom approximately 59% were located in North America, 28% in Europe, and 13% in Asia. Approximately 18% of our full-time factory North American employees are represented by labor unions. In addition, approximately 34% of our employees in our facility in Scotland are represented by a labor union. Additionally, approximately 94 employees in the TB Wood s production facilities in Mexico are unionized under collective bargaining agreements that are subject to annual renewals. The three U.S. collective bargaining agreements to which we are a party will expire on August 10, 2010, June 2, 2008 and February 1, 2009. One of the three U.S. collective bargaining agreements contain provisions for additional, potentially significant, lump-sum severance payments to all employees covered by the agreements who are terminated as the result of a plant closing and one of our collective bargaining agreements contains provisions restricting our ability to terminate or relocate operations. See *Risk Factors Risks Related to Our Business We may be subject to work*

stoppages at our facilities, or our customers may be subjected to work stoppages, which could seriously impact our operations and the profitability of our business.

The remainder of our European facilities have employees who are generally represented by local and national social works councils which are common in Europe. Social works councils meet with employer industry associations every two to three years to discuss employee wages and working conditions. Our facilities in France and Germany often participate in such discussions and adhere to any agreements reached.

When one of our collective bargaining agreements expired in September 2007, we agreed with the union in Erie, Pennsylvania that the plant would close in 2008.

Suppliers and Raw Materials

We obtain raw materials, component parts and supplies from a variety of sources, generally from more than one supplier. Our suppliers and sources of raw materials are based in both the United States and other countries and we believe that our sources of raw materials are adequate for our needs for the foreseeable future. We do not believe the loss of any one supplier would have a material adverse effect on our business or result of operations. Our principal raw materials are steel, castings and copper. We generally purchase our materials on the open market, where certain commodities such as steel and copper have increased in price significantly in recent years. We have not experienced any significant shortage of our key materials and have not historically engaged in hedging transactions for commodity suppliers.

Regulation

We are subject to a variety of government laws and regulations that apply to companies engaged in international operations. These include compliance with the Foreign Corrupt Practices Act, U.S. Department of Commerce export controls, local government regulations and procurement policies and practices (including regulations relating to import-export control, investments, exchange controls and repatriation of earnings). We maintain controls and procedures to comply with laws and regulations associated with our international operations. In the event we are unable to remain compliant with such laws and regulations, our business may be adversely affected.

Environmental and Health and Safety Matters

We are subject to a variety of federal, state, local, foreign and provincial environmental laws and regulations, including those governing health and safety requirements, the discharge of pollutants into the air or water, the management and disposal of hazardous substances and wastes and the responsibility to investigate and cleanup contaminated sites that are or were owned, leased, operated or used by us or our predecessors. Some of these laws and regulations require us to obtain permits, which contain terms and conditions that impose limitations on our ability to emit and discharge hazardous materials into the environment and periodically may be subject to modification, renewal and revocation by issuing authorities. Fines and penalties may be imposed for non-compliance with applicable environmental laws and regulations and the failure to have or to comply with the terms and conditions of required permits. From time to time our operations may not be in full compliance with the terms and conditions of our permits. We periodically review our procedures and policies for compliance with environmental laws and requirements. We believe that our operations generally are in material compliance with applicable environmental laws and requirements and that any non-compliance would not be expected to result in us incurring material liability or cost to achieve compliance. Historically, the costs of achieving and maintaining compliance with environmental laws and requirements have not been material.

Certain environmental laws in the United States, such as the federal Superfund law and similar state laws, impose liability for the cost of investigation or remediation of contaminated sites upon the current or, in some cases, the former site owners or operators and upon parties who arranged for the disposal of wastes or transported or sent those wastes to an off-site facility for treatment or disposal, regardless of when the release of hazardous substances occurred

or the lawfulness of the activities giving rise to the release. Such liability can be imposed without regard to fault and, under certain circumstances, can be joint and several, resulting in one party being held responsible for the entire obligation. As a practical matter, however, the costs of investigation and remediation generally are allocated among the viable responsible parties on some form of

---

Table of Contents

equitable basis. Liability also may include damages to natural resources. We have not been notified that we are a potentially responsible party in connection with any sites we currently or formerly owned or operated or for liability at any off-site waste disposal facility.

However, there is contamination at some of our current facilities, primarily related to historical operations at those sites, for which we could be liable for the investigation and remediation under certain environmental laws. The potential for contamination also exists at other of our current or former sites, based on historical uses of those sites. We currently are not undertaking any remediation or investigations and our costs or liability in connection with potential contamination conditions at our facilities cannot be predicted at this time because the potential existence of contamination has not been investigated or not enough is known about the environmental conditions or likely remedial requirements. Currently, other parties with contractual liability are addressing or have plans or obligations to address those contamination conditions that may pose a material risk to human health, safety or the environment. In addition, while we attempt to evaluate the risk of liability associated with our facilities at the time we acquire them, there may be environmental conditions currently unknown to us relating to our prior, existing or future sites or operations or those of predecessor companies whose liabilities we may have assumed or acquired which could have a material adverse effect on our business.

We are being indemnified, or expect to be indemnified by third parties subject to certain caps or limitations on the indemnification, for certain environmental costs and liabilities associated with certain owned or operated sites. Accordingly, based on the indemnification and the experience with similar sites of the environmental consultants who we have hired, we do not expect such costs and liabilities to have a material adverse effect on our business, operations or earnings. We cannot assure you, however, that those third parties will in fact satisfy their indemnification obligations. If those third parties become unable to, or otherwise do not, comply with their respective indemnity obligations, or if certain contamination or other liability for which we are obligated is not subject to these indemnities, we could become subject to significant liabilities.

Table of Contents

Executive Officers of Registrant

The following sets forth certain information with regard to our executive officers as of March 14, 2008 (ages are as of December 31, 2007):

Michael L. Hurt (age 62), P.E. has been our Chief Executive Officer and a director since our formation in 2004. In November 2006, Mr. Hurt was elected as chairman of our board. During 2004, prior to our formation, Mr. Hurt provided consulting services to Genstar Capital and was appointed Chairman and Chief Executive Officer of Kilian in October 2004. From January 1991 to November 2003, Mr. Hurt was the President and Chief Executive Officer of TB Wood s Incorporated, a manufacturer of industrial power transmission products. Prior to TB Wood s, Mr. Hurt spent 23 years in a variety of management positions at the Torrington Company, a major manufacturer of bearings and a subsidiary of Ingersoll Rand. Mr. Hurt holds a B.S. degree in Mechanical Engineering from Clemson University and an M.B.A. from Clemson-Furman University.

Carl R. Christenson (age 48) has been our President and Chief Operating Officer since January 2005. From 2001 to 2005, Mr. Christenson was the President of Kaydon Bearings, a manufacturer of custom-engineered bearings and a division of Kaydon Corporation. Prior to joining Kaydon, Mr. Christenson held a number of management positions at TB Wood s Incorporated and several positions at the Torrington Company. Mr. Christenson holds a M.S. and B.S. degree in Mechanical Engineering from the University of Massachusetts and an M.B.A. from Rensselaer Polytechnic.

Christian Storch (age 47) has been our Chief Financial Officer since December 2007. From 2001 to 2007, Mr. Storch was the Vice President and Chief Financial Officer at Standex International Corporation. Mr. Storch also served on the Board of Directors of Standex International from October 2004 to December 2007. Mr. Storch also served as Standex International s Treasurer from 2003 to April 2006 and Manager of Corporate Audit and Assurance Services from July 1999 to 2003. Prior to Standex International, Mr. Storch was a Divisional Financial Director and Corporate Controller at Vossloh AG, a publicly held German transport technology company. Mr. Storch has also previously served as an Audit Manager with Deloitte & Touche, LLP. Mr.. Storch holds a degree in business administration from the University of Passau, Germany.

Gerald Ferris (age 58) has been our Vice President of Global Sales since May 2007 and held the same position with Power Transmission Holdings, LLC, our Predecessor, since March 2002. He is responsible for the worldwide sales of our broad product platform. Mr. Ferris joined our Predecessor in 1978 and since joining has held various positions. He became the Vice President of Sales for Boston Gear in 1991. Mr. Ferris holds a B.A. degree in Political Science from Stonehill College.

Timothy McGowan (age 51) has been our Vice President of Human Resources since May 2007 and held the same position with our Predecessor since June 2003. Prior to joining us, from 1994 to 1998 and again from 1999 to 2003 Mr. McGowan was Vice President, Human Resources for Bird Machine, part of Baker Hughes, Inc., an oil equipment manufacturing company. Before his tenure with Bird Machine, Mr. McGowan spent many years with Raytheon in various Human Resources positions. Mr. McGowan holds a B.A. degree in English from St. Francis College in Maine.

Todd B. Patriacca (age 38) has been our Vice President of Finance and Corporate Controller since May 2007. Prior to his current position, Mr. Patriacca has been Corporate Controller since May 2005. Prior to joining us, Mr. Patriacca was Corporate Finance Manager at MKS Instrument Inc., a semi-conductor equipment manufacturer since March 2002. Prior to MKS, Mr. Patriacca spent over ten years at Arthur Andersen LLP in the Assurance Advisory practice. Mr. Patriacca is a Certified Public Accountant and holds a B.A. in History from Colby College and an M.B.A. and an M.S. in Accounting from Northeastern University.

Craig Schuele (age 44) has been our Vice President of Marketing and Business Development since May 2007 and held the same position with our Predecessor since July 2004. Prior to his current position, Mr. Schuele has been Vice President of Marketing since March 2002, and previous to that he was a Director of Marketing. Mr. Schuele joined our Predecessor in 1986 and holds a B.S. degree in Management from Rhode Island College.

Item 1A. *Risk Factors*

Risks Related to Our Business

We operate in the highly competitive mechanical power transmission industry and if we are not able to compete successfully our business may be significantly harmed.

We operate in highly fragmented and very competitive markets in the MPT industry. Some of our competitors have achieved substantially more market penetration in certain of the markets in which we operate, such as helical gear drives and some of our competitors are larger than us and have greater financial and other resources. With respect to certain of our products, we compete with divisions of our OEM customers. Competition in our business lines is based on a number of considerations, including quality, reliability, pricing, availability and design and application engineering support. Our customers increasingly demand a broad product range and we must continue to develop our expertise in order to manufacture and market these products successfully. To remain competitive, we will need to invest regularly in manufacturing, customer service and support, marketing, sales, research and development and intellectual property protection. In the future we may not have sufficient resources to continue to make such investments and may not be able to maintain our competitive position within each of the markets we serve. We may have to adjust the prices of some of our products to stay competitive.

Additionally, some of our larger, more sophisticated customers are attempting to reduce the number of vendors from which they purchase in order to increase their efficiency. If we are not selected to become one of these preferred providers, we may lose market share in some of the markets in which we compete.

There is substantial and continuing pressure on major OEMs and larger distributors to reduce costs, including the cost of products purchased from outside suppliers such as us. As a result of cost pressures from our customers, our ability to compete depends in part on our ability to generate production cost savings and, in turn, find reliable, cost effective outside suppliers to source components or manufacture our products. If we are unable to generate sufficient cost savings in the future to offset price reductions, then our gross margin could be materially adversely affected.

Changes in general economic conditions or the cyclical nature of our markets could harm our operations and financial performance.

Our financial performance depends, in large part, on conditions in the markets that we serve and on the U.S. and global economies in general. Some of the markets we serve are highly cyclical, such as the metals, mining, industrial equipment and energy markets. In addition, these markets may experience cyclical downturns. The present uncertain economic environment may result in significant quarter-to-quarter variability in our performance. Any sustained weakness in demand or downturn or uncertainty in the economy generally would reduce our sales and profitability.

We rely on independent distributors and the loss of these distributors could adversely affect our business.

In addition to our direct sales force and manufacturer sales representatives, we depend on the services of independent distributors to sell our products and provide service and aftermarket support to our customers. We support an extensive distribution network, with over 3,000 distributor locations worldwide. Rather than serving as passive conduits for delivery of product, our independent distributors are active participants in the overall competitive dynamics in the MPT industry. During the year ended December 31, 2007, approximately 38% of our net sales from continuing operations were generated through independent distributors. In particular, sales through our largest distributor accounted for approximately 10% of our net sales for the year ended December 31, 2007. Almost all of the

distributors with whom we transact business offer competitive products and services to our customers. In addition, the distribution agreements we have are typically non-exclusive and cancelable by the distributor after a short notice period. The loss of any major distributor or a substantial number of smaller distributors or an increase in the distributors sales of our competitors products to our customers could materially reduce our sales and profits.

We must continue to invest in new technologies and manufacturing techniques; however, our ability to develop or adapt to changing technology and manufacturing techniques is uncertain and our failure to do so could place us at a competitive disadvantage.

The successful implementation of our business strategy requires us to continuously invest in new technologies and manufacturing techniques to evolve our existing products and introduce new products to meet our customers needs in the industries we serve and want to serve. For example, motion control products offer more precise positioning and control compared to industrial clutches and brakes. If manufacturing processes are developed to make motion control products more price competitive and less complicated to operate, our customers may decrease their purchases of MPT products.

Our products are characterized by performance and specification requirements that mandate a high degree of manufacturing and engineering expertise. If we fail to invest in improvements to our technology and manufacturing techniques to meet these requirements, our business could be at risk. We believe that our customers rigorously evaluate their suppliers on the basis of a number of factors, including:

- product quality and availability;
- price competitiveness;
- technical expertise and development capability;
- reliability and timeliness of delivery;
- product design capability;
- manufacturing expertise; and
- sales support and customer service.

Our success depends on our ability to invest in new technologies and manufacturing techniques to continue to meet our customers changing demands with respect to the above factors. We may not be able to make required capital expenditures and, even if we do so, we may be unsuccessful in addressing technological advances or introducing new products necessary to remain competitive within our markets. Furthermore, our own technological developments may not be able to produce a sustainable competitive advantage.

Our operations are subject to international risks that could affect our operating results.

Our net sales outside North America represented approximately 30% of our total net sales for the year ended December 31, 2007. In addition, we sell products to domestic customers for use in their products sold overseas. We also source a significant portion of our products and materials from overseas, which is increasing. Our business is subject to risks associated with doing business internationally, and our future results could be materially adversely affected by a variety of factors, including:

- fluctuations in currency exchange rates;
- exchange rate controls;
- tariffs or other trade protection measures and import or export licensing requirements;

potentially negative consequences from changes in tax laws;

interest rates;

unexpected changes in regulatory requirements;

changes in foreign intellectual property law;

differing labor regulations;

requirements relating to withholding taxes on remittances and other payments by subsidiaries;

- restrictions on our ability to own or operate subsidiaries, make investments or acquire new businesses in various jurisdictions;
- potential political instability and the actions of foreign governments; and
- restrictions on our ability to repatriate dividends from our subsidiaries.

As we continue to expand our business globally, our success will depend, in large part, on our ability to anticipate and effectively manage these and other risks associated with our international operations. However, any of these factors could materially adversely affect our international operations and, consequently, our operating results.

Our operations depend on production facilities throughout the world, many of which are located outside the United States and are subject to increased risks of disrupted production causing delays in shipments and loss of customers and revenue.

We operate businesses with manufacturing facilities worldwide, many of which are located outside the United States including in Canada, China, France, Germany, Italy, Mexico and the United Kingdom. Serving a global customer base requires that we place more production in emerging markets to capitalize on market opportunities and cost efficiencies. Our international production facilities and operations could be disrupted by a natural disaster, labor strike, war, political unrest, terrorist activity or public health concerns, particularly in emerging countries that are not well-equipped to handle such occurrences.

We rely on estimated forecasts of our OEM customers needs, and inaccuracies in such forecasts could materially adversely affect our business.

We generally sell our products pursuant to individual purchase orders instead of under long-term purchase commitments. Therefore, we rely on estimated demand forecasts, based upon input from our customers, to determine how much material to purchase and product to manufacture. Because our sales are based on purchase orders, our customers may cancel, delay or otherwise modify their purchase commitments with little or no consequence to them and with little or no notice to us. For these reasons, we generally have limited visibility regarding our customers actual product needs. The quantities or timing required by our customers for our products could vary significantly. Whether in response to changes affecting the industry or a customer s specific business pressures, any cancellation, delay or other modification in our customers orders could significantly reduce our revenue, impact our working capital, cause our operating results to fluctuate from period to period and make it more difficult for us to predict our revenue. In the event of a cancellation or reduction of an order, we may not have enough time to reduce operating expenses to minimize the effect of the lost revenue on our business and we may purchase too much inventory and spend more capital than expected.

The materials used to produce our products are subject to price fluctuations that could increase costs of production and adversely affect our profitability.

The materials used to produce our products, especially copper and steel, are sourced on a global or regional basis and the prices of those materials are susceptible to price fluctuations due to supply and demand trends, transportation costs, government regulations and tariffs, changes in currency exchange rates, price controls, the economic climate and other unforeseen circumstances. From the first quarter of 2004 to the fourth quarter of 2007, the average price of copper and steel has increased approximately 162% and 40%, respectively. If we are unable to continue to pass a substantial portion of such price increases on to our customers on a timely basis, our future profitability may be materially and adversely affected. In addition, passing through these costs to our customers may also limit our ability

to increase our prices in the future.

We face potential product liability claims relating to products we manufacture or distribute, which could result in our having to expend significant time and expense to defend these claims and to pay material claims or settlement amounts.

We face a business risk of exposure to product liability claims in the event that the use of our products is alleged to have resulted in injury or other adverse effects. We currently have several product liability claims against us with respect to our products. Although we currently maintain product liability insurance coverage, we may not be able to obtain such insurance on acceptable terms in the future, if at all, or obtain insurance that will provide adequate coverage against potential claims. Product liability claims can be expensive to defend and can divert the attention of management and other personnel for long periods of time, regardless of the ultimate outcome. An unsuccessful product liability defense could have a material adverse effect on our business, financial condition, results of operations or our ability to make payments under our debt obligations when due. In addition, we believe our business depends on the strong brand reputation we have developed. In the event that our reputation is damaged, we may face difficulty in maintaining our pricing positions with respect to some of our products, which would reduce our sales and profitability.

We may be subject to work stoppages at our facilities, or our customers may be subjected to work stoppages, which could seriously impact our operations and the profitability of our business.

As of December 31, 2007, we had approximately 3,455 full time employees, of whom approximately 47% were employed outside the United States. Approximately 384 of our North American employees and 45 of our employees in Scotland are represented by labor unions. In addition, our employees in Europe are generally represented by local and national social works councils that hold discussions with employer industry associations regarding wage and work issues every two to three years. Our European facilities, particularly those in France and Germany, may participate in such discussions and be subject to any agreements reached with employees.

Our three U.S. collective bargaining agreements will expire on June 2, 2008. February 1, 2009 and August 10, 2010. We may be unable to renew these agreements on terms that are satisfactory to us, if at all. In addition, one of our three U.S. collective bargaining agreements contain provisions for additional, potentially significant, lump-sum severance payments to all employees covered by the agreements who are terminated as the result of a plant closing and one of our collective bargaining agreements contains provisions restricting our ability to terminate or relocate operations. Additionally, approximately 94 employees in the TB Wood s production facilities in Mexico are unionized under collective bargaining agreements that are subject to annual renewals.

If our unionized workers or those represented by a works council were to engage in a strike, work stoppage or other slowdown in the future, we could experience a significant disruption of our operations. Such disruption could interfere with our ability to deliver products on a timely basis and could have other negative effects, including decreased productivity and increased labor costs. In addition, if a greater percentage of our work force becomes unionized, our business and financial results could be materially adversely affected. Many of our direct and indirect customers have unionized work forces. Strikes, work stoppages or slowdowns experienced by these customers or their suppliers could result in slowdowns or closures of assembly plants where our products are used and could cause cancellation of purchase orders with us or otherwise result in reduced revenues from these customers.

Changes in employment laws could increase our costs and may adversely affect our business.

Various federal, state and international labor laws govern our relationship with employees and affect operating costs. These laws include minimum wage requirements, overtime, unemployment tax rates, workers compensation rates paid, leaves of absence, mandated health and other benefits, and citizenship requirements. Significant additional government-imposed increases or new requirements in these areas could materially affect our business, financial condition, operating results or cash flow.

17

In the event our employee-related costs rise significantly, we may have to curtail the number of our employees or shut down certain manufacturing facilities. Any such actions would be not only costly but could also materially adversely affect our business.

We depend on the services of key executives, the loss of whom could materially harm our business.

Our senior executives are important to our success because they are instrumental in setting our strategic direction, operating our business, maintaining and expanding relationships with distributors, identifying, recruiting and training key personnel, identifying expansion opportunities and arranging necessary financing. Losing the services of any of these individuals could adversely affect our business until a suitable replacement could be found. We believe that our senior executives could not easily be replaced with executives of equal experience and capabilities. Although we have entered into employment agreements with certain of our key domestic executives, we cannot prevent our key executives from terminating their employment with us. We do not maintain key person life insurance policies on any of our executives.

If we lose certain of our key sales, marketing or engineering personnel, our business may be adversely affected.

Our success depends on our ability to recruit, retain and motivate highly skilled sales, marketing and engineering personnel. Competition for these persons in our industry is intense and we may not be able to successfully recruit, train or retain qualified personnel. If we fail to retain and recruit the necessary personnel, our business and our ability to obtain new customers, develop new products and provide acceptable levels of customer service could suffer. If certain of these key personnel were to terminate their employment with us, we may experience difficulty replacing them, and our business could be harmed.

We are subject to environmental laws that could impose significant costs on us and the failure to comply with such laws could subject us to sanctions and material fines and expenses.

We are subject to a variety of federal, state, local, foreign and provincial environmental laws and regulations, including those governing the discharge of pollutants into the air or water, the management and disposal of hazardous substances and wastes and the responsibility to investigate and cleanup contaminated sites that are or were owned, leased, operated or used by us or our predecessors. Some of these laws and regulations require us to obtain permits, which contain terms and conditions that impose limitations on our ability to emit and discharge hazardous materials into the environment and periodically may be subject to modification, renewal and revocation by issuing authorities. Fines and penalties may be imposed for non-compliance with applicable environmental laws and regulations and the failure to have or to comply with the terms and conditions of required permits. From time to time our operations may not be in full compliance with the terms and conditions of our permits. We periodically review our procedures and policies for compliance with environmental laws and requirements. We believe that our operations generally are in material compliance with applicable environmental laws, requirements and permits and that any lapses in compliance would not be expected to result in us incurring material liability or cost to achieve compliance. Historically, the costs of achieving and maintaining compliance with environmental laws, and requirements and permits have not been material; however, the operation of manufacturing plants entails risks in these areas, and a failure by us to comply with applicable environmental laws, regulations, or permits could result in civil or criminal fines, penalties, enforcement actions, third party claims for property damage and personal injury, requirements to clean up property or to pay for the costs of cleanup, or regulatory or judicial orders enjoining or curtailing operations or requiring corrective measures, including the installation of pollution control equipment or remedial actions. Moreover, if applicable environmental laws and regulations, or the interpretation or enforcement thereof, become more stringent in the future, we could incur capital or operating costs beyond those currently anticipated.

Certain environmental laws in the United States, such as the federal Superfund law and similar state laws, impose liability for the cost of investigation or remediation of contaminated sites upon the current or, in some cases, the former site owners or operators and upon parties who arranged for the disposal of wastes or transported or sent those wastes to an off-site facility for treatment or disposal, regardless of when the release

of hazardous substances occurred or the lawfulness of the activities giving rise to the release. Such liability can be imposed without regard to fault and, under certain circumstances, can be joint and several, resulting in one party being held responsible for the entire obligation. As a practical matter, however, the costs of investigation and remediation generally are allocated among the viable responsible parties on some form of equitable basis. Liability also may include damages to natural resources. We have not been notified that we are a potentially responsible party in connection with any sites we currently or formerly owned or operated or for liability at any off-site waste disposal facility.

However, there is contamination at some of our current facilities, primarily related to historical operations at those sites, for which we could be liable for the investigation and remediation under certain environmental laws. The potential for contamination also exists at other of our current or former sites, based on historical uses of those sites. We currently are not undertaking any remediation or investigations and our costs or liability in connection with potential contamination conditions at our facilities cannot be predicted at this time because the potential existence of contamination has not been investigated or not enough is known about the environmental conditions or likely remedial requirements. Currently, other parties with contractual liability are addressing or have plans or obligations to address those contamination conditions that may pose a material risk to human health, safety or the environment. In addition, while we attempt to evaluate the risk of liability associated with our facilities at the time we acquire them, there may be environmental conditions currently unknown to us relating to our prior, existing or future sites or operations or those of predecessor companies whose liabilities we may have assumed or acquired which could have a material adverse effect on our business.

We are being indemnified, or expect to be indemnified by third parties subject to certain caps or limitations on the indemnification, for certain environmental costs and liabilities associated with certain owned or operated sites. Accordingly, based on the indemnification and the experience with similar sites of the environmental consultants who we have hired, we do not expect such costs and liabilities to have a material adverse effect on our business, operations or earnings. We cannot assure you, however, that those third parties will in fact satisfy their indemnification obligations. If those third parties become unable to, or otherwise do not, comply with their respective indemnity obligations, or if certain contamination or other liability for which we are obligated is not subject to these indemnities, we could become subject to significant liabilities.

We may face additional costs associated with our post-retirement and post-employment obligations to employees which could have an adverse effect on our financial condition.

As part of the PTH Acquisition, we agreed to assume pension plan liabilities for active U.S. employees under the Retirement Plan for Power Transmission Employees of Colfax and the Ameridrives International Pension Fund for Hourly Employees Represented by United Steelworkers of America, Local 3199-10, collectively referred to as the Prior Plans. We have established a defined benefit plan, the Altra Industrial Motion, Inc. Retirement Plan or New Plan, mirroring the benefits provided under the Prior Plans. The New Plan accepted a spin-off of assets and liabilities from the Prior Plans, in accordance with Section 414(l) of the Internal Revenue Code, or the Code, with such assets and liabilities relating to active U.S. employees as of the closing of the PTH Acquisition. Given the funded status of the Prior Plans and the asset allocation requirements of Code Section 414(l), liabilities under the New Plan greatly exceed the assets that were transferred from the Prior Plans. The accumulated benefit obligation (not including accumulated benefit obligations of non-U.S. pension plans in the amount of $3.2 million) was approximately $24.8 million as of December 31, 2007 while the fair value of plan assets was approximately $14.6 million as of December 31, 2007. As the New Plan has a considerable funding deficit, the cash funding requirements are expected to be substantial over the next several years, and could have a material adverse effect on our financial condition. As of December 31, 2007, minimum funding requirements are estimated to be $2.5 million in 2008, $5.7 million in 2009 $1.3 million in 2010, $2.0 million in 2011 and $2.1 million thereafter. These amounts are based on actuarial assumptions and actual amounts could be materially different.

Additionally, as part of the PTH Acquisition, we agreed to assume all pension plan liabilities related to non-U.S. employees. The accumulated benefit obligations of non-U.S. pension plans were approximately $3.2 million as of December 31, 2007. There are no assets associated with these plans.

Table of Contents

Finally, as part of the PTH Acquisition, we also agreed to assume all post-employment and post-retirement welfare benefit obligations with respect to active U.S. employees. The benefit obligation for post-retirement benefits, which are not funded, was approximately $3.1 million as of December 31, 2007.

For a description of the post-retirement and post-employment costs, see Note 10 to our audited financial statements included elsewhere in this Form 10-K.

Our future success depends on our ability to integrate acquired companies and manage our growth effectively.

Our growth through acquisitions has placed, and will continue to place, significant demands on our management, operational and financial resources. Realization of the benefits of acquisitions often requires integration of some or all of the acquired companies sales and marketing, distribution, manufacturing, engineering, finance and administrative organizations. Integration of companies demands substantial attention from senior management and the management of the acquired companies. In addition, we will continue to pursue new acquisitions, some of which could be material to our business if completed. We may not be able to integrate successfully our recent acquisitions, including TB Wood s, or any future acquisitions, operate these acquired companies profitably, or realize the potential benefits from these acquisitions.

We may not be able to protect our intellectual property rights, brands or technology effectively, which could allow competitors to duplicate or replicate our technology and could adversely affect our ability to compete.

We rely on a combination of patent, trademark, copyright and trade secret laws in the United States and other jurisdictions, as well as on license, non-disclosure, employee and consultant assignment and other agreements and domain names registrations in order to protect our proprietary technology and rights. Applications for protection of our intellectual property rights may not be allowed, and the rights, if granted, may not be maintained. In addition, third parties may infringe or challenge our intellectual property rights. In some cases, we rely on unpatented proprietary technology. It is possible that others will independently develop the same or similar technology or otherwise obtain access to our unpatented technology. In addition, in the ordinary course of our operations, we pursue potential claims from time to time relating to the protection of certain products and intellectual property rights, including with respect to some of our more profitable products. Such claims could be time consuming, expensive and divert resources. If we are unable to maintain the proprietary nature of our technologies or proprietary protection of our brands, our ability to market or be competitive with respect to some or all of our products may be affected, which could reduce our sales and profitability.

Goodwill comprises a significant portion of our total assets, and if we determine that goodwill has become impaired in the future, net income in such years may be materially and adversely affected.

Goodwill represents the excess of cost over the fair market value of net assets acquired in business combinations. We review goodwill and other intangibles annually for impairment and any excess in carrying value over the estimated fair value is charged to the results of operations. Reduction in net income resulting from the write down or impairment of goodwill would affect financial results.

Unplanned repairs or equipment outages could interrupt production and reduce income or cash flow.

Unplanned repairs or equipment outages, including those due to natural disasters, could result in the disruption of our manufacturing processes. Any interruption in our manufacturing processes would interrupt our production of products, reduce our income and cash flow and could result in a material adverse effect on our business and financial condition.

Our operations are highly dependent on information technology infrastructure and failures could significantly affect our business.

We depend heavily on our information technology, or IT, infrastructure in order to achieve our business objectives. If we experience a problem that impairs this infrastructure, such as a computer virus, a problem with the functioning of an important IT application, or an intentional disruption of our IT systems by a third party, the resulting disruptions could impede our ability to record or process orders, manufacture and ship in a timely manner, or otherwise carry on our business in the ordinary course. Any such events could cause us to lose customers or revenue and could require us to incur significant expense to eliminate these problems and address related security concerns.

Our leverage could adversely affect our financial health and make us vulnerable to adverse economic and industry conditions.

We have incurred indebtedness that is substantial relative to our stockholders investment. As of December 31, 2007, we had approximately $296.9 million of indebtedness outstanding and $23.5 million available under lines of credit. Our indebtedness has important consequences; for example, it could:

- make it more challenging for us to obtain additional financing to fund our business strategy and acquisitions, debt service requirements, capital expenditures and working capital;

- increase our vulnerability to interest rate changes and general adverse economic and industry conditions;

- require us to dedicate a substantial portion of our cash flow from operations to service our indebtedness, thereby reducing the availability of our cash flow to finance acquisitions and to fund working capital, capital expenditures, research and development efforts and other general corporate activities;

- make it difficult for us to fulfill our obligations under our credit and other debt agreements;

- limit our flexibility in planning for, or reacting to, changes in our business and our markets; and

- place us at a competitive disadvantage relative to our competitors that have less debt.

Substantially all of our assets have been pledged as collateral against any outstanding borrowings under the credit agreements, or the Credit Agreements, governing Altra Industrial s senior revolving credit facility and the credit facility we entered into in connection with the TB Wood s Acquisition, or the TB Wood s senior secured credit facility. In addition, the Credit Agreements require us to maintain specified financial ratios and satisfy certain financial condition tests, which may require that we take action to reduce our debt or to act in a manner contrary to our business objectives. If an event of default under the Credit Agreements, then the lenders could declare all amounts outstanding under the senior revolving credit facility and the TB Wood s senior secured credit facility, together with accrued interest, to be immediately due and payable. In addition, our senior revolving credit facility, the TB Wood s senior secured credit facility and the indentures governing the 9% senior secured notes and 111/4% senior notes have cross-default provisions such that a default under any one would constitute an event of default in any of the others.

We are subject to tax laws and regulations in many jurisdictions and the inability to successfully defend claims from taxing authorities related to our current or acquired businesses could adversely affect our operating results and financial position.

We conduct business in many countries, which requires us to interpret the income tax laws and rulings in each of those taxing jurisdictions. Due to the subjectivity of tax laws between those jurisdictions as well as the subjectivity of factual interpretations, our estimates of income tax liabilities may differ from actual payments or assessments. Claims from taxing authorities related to these differences could have an adverse impact on our operating results and financial position.

Item 2. *Properties*

In addition to our leased headquarters in Quincy, Massachusetts, we maintain 29 production facilities, fifteen of which are located in the United States, two in Canada, ten in Europe, and one in China and Mexico. The following table lists all of our facilities, other than sales offices and distribution centers, as of December 31, 2007, indicating the location, principal use and whether the facilities are owned or leased.

Item 3. ***Legal Proceedings***

We are, from time to time, party to various legal proceedings arising out of our business. These proceedings primarily involve commercial claims, product liability claims, intellectual property claims, environmental claims, personal injury claims and workers compensation claims. We cannot predict the outcome of these lawsuits, legal proceedings and claims with certainty. Nevertheless, we believe that the outcome of any currently existing proceedings, even if determined adversely, would not have a material adverse effect on our business, financial condition and results of operations.

Item 4. ***Submission of Matters to a Vote of Security Holders***

During the fourth quarter of fiscal year 2007, there were no matters submitted to a vote of security holders.

PART II

Item 5. ***Market for the Registrant s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities***

Market Information

Our common stock trades on the NASDAQ Global Market under the symbol AIMC . As of March 7, 2008, there were 22 holders of record of our common stock.

The following table sets forth, for the periods indicated, the high and low sales price for our common stock as reported on The NASDAQ Global Market. Our common stock commenced trading on the NASDAQ Global Market on December 15, 2006.

	High	Low
Fiscal Year Ended December 31, 2006:		
Fourth Quarter	$ 14.55	$ 13.75
Fiscal Year Ended December 31, 2007:		
First Quarter	$ 16.87	$ 15.40
Second Quarter	$ 18.00	$ 15.04
Third Quarter	$ 18.72	$ 13.94
Fourth Quarter	$ 16.99	$ 13.71

Dividends

We have never declared or paid any dividends on our common stock. We currently intend to retain any earnings for use in the operation and expansion of our business and, therefore do not anticipate paying any cash dividends in the foreseeable future. In addition, the Credit Agreement governing the senior revolving credit facility and the indentures governing the 9% senior secured notes and 111/4% senior notes limit our ability to pay dividends or other distributions on our common stock.

Recent Sales of Unregistered Securities

None.

Issuer Purchases of Equity Securities

None.

Item 6. *Selected Financial Data*

We were formed to facilitate the PTH Acquisition. The following table contains our selected historical financial data for the years ended December 31, 2007, 2006, 2005 and the period from inception (December 1, 2004) to December 31, 2004 and PTH (the Predecessor), for the period from January 1, 2004 through November 30, 2004 and for the year ended December 31, 2003. Colfax Corporation did not maintain separate financial statements for PTH as a stand-alone business. At the time of the PTH Acquisition, Colfax Corporation produced historical financial statements for PTH for the eleven month period January 1, 2004 November 30, 2004 and the fiscal year ended 2003. The following should be read in conjunction with Management s Discussion and Analysis of Financial Condition and Results of Operations and the consolidated financial statements and notes included elsewhere in this Form 10- K.

Comparability of the information included in the selected financial data has been impacted by the acquisitions of Hay Hall and Warner Linear in 2006 and TB Wood s and All Power in 2007.

Item 7. ***Management s Discussion and Analysis of Financial Condition and Results of Operations***

The following discussion of the financial condition and results of income of Altra Holdings, Inc. should be read together with the Selected Historical Financial Data, and the financial statements of Altra Holdings, Inc. and its Predecessor and related notes included elsewhere in this Form 10-K. The following discussion includes forward-looking statements. For a discussion of important factors that could cause actual results to differ materially from the results referred to in the forward-looking statements, see Forward-Looking Statements and Risk Factors .

General

We are a leading global designer, producer and marketer of a wide range of MPT and motion control products with a presence in over 70 countries. Our global sales and marketing network includes over 1,000 direct OEM customers and over 3,000 distributor outlets. Our product portfolio includes industrial clutches and brakes, enclosed gear drives, open gearing, couplings, engineered bearing assemblies, linear components and other related products. Our products serve a wide variety of end markets including energy, general industrial, material handling, mining, transportation and turf and garden. We primarily sell our products to a wide range of OEMs and through long-standing relationships with industrial distributors such as Motion Industries, Applied Industrial Technologies, Kaman Industrial Technologies and W.W. Grainger.

Our net sales have grown at a compound annual growth rate of approximately 20% over the last three fiscal years. We believe this growth has been a result of recent acquisitions, greater overall global demand for our products due to a strengthening economy, increased consumption in certain geographic markets such as China, expansion of our relationships with our customers and distributors and implementation of improved sales and marketing initiatives.

We improved our gross profit margin and operating profit margin every year from fiscal year 2003 through fiscal year 2007 by implementing strategic price increases, utilizing low-cost country sourcing of components, increasing our productivity and employing a more efficient sales and marketing strategy.

While the power transmission industry has undergone some consolidation, we estimate that in 2007 the top five broad-based MPT companies represented approximately 19% of the U.S. power transmission market. The remainder of the power transmission industry remains fragmented with many small and family-owned companies that cater to a specific market niche often due to their narrow product offerings. We believe that consolidation in our industry will continue because of the increasing demand for global distribution channels, broader product mixes and better brand recognition to compete in this industry.

Initial Public Offering

In December 2006, the Company completed an initial public offering. The Company offered 3,333,334 of their own shares. In addition selling stockholders offered 6,666,666 shares. Proceeds to the Company after the underwriting discount were $41.9 million. As of December 31, 2006, there are 50,000,000 shares of common stock authorized with a par value of $0.001 and 21,467,500 outstanding.

Table of Contents

Secondary Public Offering

In June 2007, we completed a secondary public offering of 12,650,000 shares of our common stock, par value $0.001 per share, which included 1,650,000 sold as a result of the underwriters exercise of their overallotment option in full at closing. We received proceeds of $48.7 million, net of underwriting discount and other issuance costs. In the offering we sold 3,178,494 shares and certain selling stockholders sold 9,471,506 shares.

History and the Acquisitions

Our current business began with the acquisition by Colfax Corporation, or Colfax, of the MPT group of Zurn Technologies, Inc. in December 1996. Colfax subsequently acquired Industrial Clutch Corp. in May 1997, Nuttall Gear Corp. in July 1997 and the Boston Gear and Delroyd Worm Gear brands in August 1997 as part of Colfax s acquisition of Imo Industries, Inc. In February 2000, Colfax acquired Warner Electric, Inc., which sold products under the Warner Electric, Formsprag Clutch, Stieber and Wichita Clutch brands. Colfax formed PTH in June 2004 to serve as a holding company for all of these power transmission businesses.

On November 30, 2004, we acquired our original core business through the acquisition of PTH from Colfax for $180.0 million in cash. We refer to this transaction as the PTH Acquisition.

On October 22, 2004, The Kilian Company, or Kilian, a company formed at the direction of Genstar Capital, the largest stockholder of Altra Holdings, acquired Kilian Manufacturing Corporation from Timken U.S. Corporation for $8.8 million in cash and the assumption of $12.2 million of debt. At the completion of the PTH Acquisition, (i) all of the outstanding shares of Kilian capital stock were exchanged for approximately $8.8 million of shares of our capital stock and Kilian and its subsidiaries were transferred to our wholly owned subsidiary, Altra Industrial and (ii) all outstanding debt of Kilian was retired with a portion of the proceeds of the sale of Altra Industrial s 9% senior secured notes due 2011, or the 9% senior secured notes.

On February 10, 2006, we purchased all of the outstanding share capital of Hay Hall for $49.2 million. During 2007, the purchase price was reduced by $0.4 million related to the finalization of the working capital adjustment in accordance with the terms of the purchase price agreement. Included in the purchase price was $6.0 million paid in the form of deferred consideration. At the closing we deposited such deferred consideration into an escrow account for the benefit of the former Hay Hall shareholders. The deferred consideration is represented by a loan note. While the former Hay Hall shareholders will hold the note, their rights will be limited to receiving the amount of the deferred consideration placed in the escrow account. They will have no recourse against us unless we take action to prevent or interfere in the release of such funds from the escrow account. At closing, Hay Hall and its subsidiaries became our direct or indirect wholly owned subsidiaries. Hay Hall is a UK-based holding company established in 1996 that is focused primarily on the manufacture of couplings and clutch brakes. Hay Hall consists of five main businesses that are niche focused and have strong brand names and established reputations within their primary markets.

Through Hay Hall, we acquired 15 strong brands in complementary product lines, improved customer leverage and expanded geographic presence in over 11 countries. Hay Hall s product offerings diversified our revenue base and strengthened our key product areas, such as electric clutches, brakes and couplings. Matrix International, Inertia Dynamics and Twiflex, three Hay Hall businesses, combined with Warner Electric, Wichita Clutch, Formsprag Clutch and Stieber, make the consolidated company one of the largest individual manufacturers of industrial clutches and brakes in the world.

On May 18, 2006, we acquired substantially all of the assets of Bear Linear for $5.0 million. Approximately $3.5 million was paid at closing and the remaining $1.5 million is payable over approximately the next two years. Bear Linear manufactures high value-added linear actuators which are electromechanical power transmission devices

designed to move and position loads linearly for mobile off-highway and industrial applications. Bear Linear s product design and engineering expertise, coupled with our sourcing alliance with a low cost country manufacturer, were critical components in our strategic expansion into the motion control market.

On April 5, 2007, we acquired all of the outstanding shares of TB Wood s for $24.80 per share, or aggregate consideration of $93.5 million. As part of the TB Wood s acquisition, we retired $18.7 million of TB Wood s indebtedness and paid $9.2 million to retire options under the TB Wood s equity plan. TB Wood s is an established designer, manufacturer and marketer of mechanical and electronic industrial power transmission products.

On October 5, 2007, we acquired substantially all of the assets of All Power Transmission Manufacturing, Inc. (All Power). Approximately $5.0 million was paid at closing and the remaining $2.6 million of consideration was issued in the form of a note payable, due in installments over a 2 year period. The total cash payments including deal costs and the net present value of the $2.6 million note payable reflect the total purchase consideration of $7.2 million.

Divestitures

On December 31, 2007, we sold the TB Wood s adjustable speed drives business or Electronics division to Vacon, Inc. for $29.0 million. We sold the Electronics division in order to continue our strategic focus on our core electro-mechanical power transmission business.

Critical Accounting Policies

The methods, estimates and judgments we use in applying our critical accounting policies have a significant impact on the results we report in our financial statements. We evaluate our estimates and judgments on an on-going basis. Our estimates are based upon historical experience and assumptions that we believe are reasonable under the circumstances. Our experience and assumptions form the basis for our judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may vary from what our management anticipates and different assumptions or estimates about the future could change our reported results.

We believe the following accounting policies are the most critical in that they are important to the financial statements and they require the most difficult, subjective or complex judgments in the preparation of the financial statements.

Revenue Recognition. Product revenues are recognized, net of sales tax collected, at the time title and risk of loss pass to the customer, which generally occurs upon shipment to the customer. Service revenues are recognized as services are performed. Amounts billed for shipping and handling are recorded as revenue. Product return reserves are accrued at the time of sale based on the historical relationship between shipments and returns, and are recorded as a reduction of net sales. Certain large distribution customers receive quantity discounts which are recognized net at the time the sale is recorded.

Inventory. Inventories are stated at the lower of cost or market using the first-in, first-out (FIFO) method for all of our subsidiaries except TB Wood s. TB Wood s inventory is stated at the lower of current cost or market, principally using the last-in, first-out (LIFO) method. Inventory stated using the LIFO method approximates 15% of total inventory. We state inventories acquired by us through acquisitions at their fair values at the date of acquisition as determined by us based on the replacement cost of raw materials, the sales price of the finished goods less an appropriate amount representing the expected profitability from selling efforts, and for work-in-process the sales price of the finished goods less an appropriate amount representing the expected profitability from selling efforts and costs to complete.

We periodically reviews our quantities of inventories on hand and compares these amounts to the expected usage of each particular product or product line. We record as a charge to cost of sales any amounts required to reduce the carrying value of inventories to net realizable value.

Retirement Benefits. Obligations for pension obligations and other post retirement benefits are actuarially determined and are affected by several assumptions, including the discount rate, assumed annual rates of return on plan assets, and

per capita cost of covered health care benefits. Changes in discount rate and differences from actual results for each assumption will affect the amounts of pension expense and other post retirement expense recognized in future periods.

Goodwill and Intangible Assets. In connection with our acquisitions, intangible assets were identified and recorded at their fair value, in accordance with Statement of Financial Accounting Standards, or SFAS No. 141, Business Combinations. We recorded intangible assets for customer relationships, trade names and trademarks, product technology and patents, and goodwill. In valuing the customer relationships, trade names and trademarks and product technology intangible assets, we utilized variations of the income approach. The income approach was considered the most appropriate valuation technique because the inherent value of these assets is their ability to generate current and future income. The income approach relies on historical financial and qualitative information, as well as assumptions and estimates for projected financial information. Projected information is subject to risk if our estimates are incorrect. The most significant estimate relates to our projected revenues. If we do not meet the projected revenues used in the valuation calculations then the intangible assets could be impaired. In determining the value of customer relationships, we reviewed historical customer attrition rates which were determined to be approximately 5% per year. Most of our customers tend to be long-term customers with very little turnover. While we do not typically have long-term contracts with customers, we have established long-term relationships with customers which make it difficult for competitors to displace us. Additionally, we assessed historical revenue growth within our industry and customers industries in determining the value of customer relationships. The value of our customer relationships intangible asset could become impaired if future results differ significantly from any of the underlying assumptions. This could include a higher customer attrition rate or a change in industry trends such as the use of long-term contracts which we may not be able to obtain successfully. Customer relationships and product technology and patents are considered finite-lived assets, with estimated lives ranging from 8 years and 16 years. The estimated lives were determined by calculating the number of years necessary to obtain 95% of the value of the discounted cash flows of the respective intangible asset. Goodwill and trade names and trademarks are considered indefinite lived assets. Trade names and trademarks were determined to be indefinite lived assets based on the criteria stated in paragraph 11 in SFAS No. 142, Goodwill and Other Intangible Assets. Other intangible assets include trade names and trademarks that identify us and differentiate us from competitors, and therefore competition does not limit the useful life of these assets. All of our brands have been in existence for over 50 years and therefore are not susceptible to obsolescence risk. Additionally, we believe that our trade names and trademarks will continue to generate product sales for an indefinite period. All indefinite lived intangible assets are reviewed at least annually to determine if an impairment exists. An impairment could be triggered by a loss of a major customer, discontinuation of a product line, or a change in any of the underlying assumptions utilized in estimating the value of the intangible assets. If an impairment is identified it will be recognized in that period.

In accordance with SFAS No. 142, we assess the fair value of our reporting units for impairment of intangible assets based upon a discounted cash flow methodology. Estimated future cash flows are based upon historical results and current market projections, discounted at a market comparable rate. If the carrying amount of the reporting unit exceeds the estimated fair value determined using the discounted cash flow calculation, goodwill impairment may be present. We would evaluate impairment losses based upon the fair value of the underlying assets and liabilities of the reporting unit, including any unrecognized intangible assets, and estimate the implied fair value of the intangible asset. An impairment loss would be recognized to the extent that a reporting unit s recorded value of the intangible asset exceeded its calculated fair value.

We have calculated goodwill and intangible assets arising from the application of purchase accounting from our acquisitions, and have allocated these assets across our reporting units. We evaluated our intangible assets at the reporting unit level at December 31, 2007 and found no evidence of impairment at that date. If the book value of a reporting unit exceeds its fair value, the implied fair value of goodwill is compared with the carrying amount of goodwill. If the carrying amount of goodwill exceeds the implied fair value, an impairment loss is recorded in an amount equal to that excess. The fair value of a reporting unit is estimated using the discounted cash flow approach, and is dependent on estimates and judgments related to future cash flows and discount rates. If the actual cash flows differ significantly from the estimates used by management, we may be required to record an impairment charge to write down the goodwill to its realizable value.

Long-lived Assets. Long-lived assets are reviewed for impairment when events or circumstances indicate that the carrying amount of a long-lived asset may not be recovered. Long-lived assets held for use

---

are reviewed for impairment by comparing the carrying amount of an asset to the undiscounted future cash flows expected to be generated by the asset over its remaining useful life. If an asset is considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the asset exceeds its fair value, and is charged to results of operations at that time. Assets to be disposed of are reported at the lower of the carrying amounts or fair value less cost to sell. Our management determines fair value using discounted future cash flow analysis. Determining market values based on discounted cash flows requires our management to make significant estimates and assumptions, including long-term projections of cash flows, market conditions and appropriate discount rates.

Income Taxes. We record income taxes using the asset and liability method. Deferred income tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective income tax bases, and operating loss and tax credit carryforwards. We evaluate the realizability of our net deferred tax assets and assess the need for a valuation allowance on a quarterly basis. The future benefit to be derived from our deferred tax assets is dependent upon our ability to generate sufficient future taxable income to realize the assets. We record a valuation allowance to reduce our net deferred tax assets to the amount that may be more likely than not to be realized. To the extent we establish a valuation allowance, an expense will be recorded within the provision for income taxes line on the statement of operations. In periods subsequent to establishing a valuation allowance, if we were to determine that we would be able to realize our net deferred tax assets in excess of our net recorded amount, an adjustment to the valuation allowance would be recorded as a reduction to income tax expense in the period such determination was made.

Non-GAAP Financial Measures

The discussion of EBITDA (earnings before interest, income taxes, depreciation and amortization) included in the discussion of Results of Operations below is being provided because management considers EBITDA to be an important measure of financial performance. Among other things, management believes that EBITDA provides useful information for our investors because it is useful for trending, analyzing and benchmarking the performance and value of our business. Management also believes that EBITDA is useful in assessing current performance compared with the historical performance of our Predecessor because significant line items within our statements of operations such as depreciation, amortization and interest expense are significantly impacted by the PTH Acquisition. Internally, EBITDA is used as a financial measure to assess the operating performance and is an important measure in our incentive compensation plans.

EBITDA has important limitations, and should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP. For example, EBITDA does not reflect:

- cash expenditures, or future requirements, for capital expenditures or contractual commitments;
- changes in, or cash requirements for, working capital needs;
- the significant interest expense, or the cash requirements necessary to service interest or principal payments, on debts;
- tax distributions that would represent a reduction in cash available to us; and
- any cash requirements for assets being depreciated and amortized that may have to be replaced in the future.

EBITDA is not a recognized measurement under GAAP, and when analyzing our operating performance, investors should use EBITDA in addition to, and not as an alternative for, operating income (loss) and net (loss) income (each as determined in accordance with GAAP). Because not all companies use identical calculations, our presentation of EBITDA may not be comparable to similarly titled measures of other companies. The amounts shown for EBITDA also differ from the amounts calculated under similarly titled definitions in our debt instruments, which are further adjusted to reflect certain other cash and non-cash charges and are used to determine compliance with financial covenants and our ability to engage in certain activities, such as incurring additional debt and making certain restricted payments.

To compensate for the limitations of EBITDA we utilize several GAAP measures to review our performance. These GAAP measures include, but are not limited to, net income (loss), operating income (loss), cash provided by (used in) operations, cash provided by (used in) investing activities and cash provided by (used in) financing activities. These important GAAP measures allow our management to, among other things, review and understand our uses of cash period to period, compare our operations with competitors on a consistent basis and understand the revenues and expenses matched to each other for the applicable reporting period. We believe that the use of these GAAP measures, supplemented by the use of EBITDA, allows us to have a greater understanding of our performance and allows us to adapt to changing trends and business opportunities.

Results of Operations

	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2005
		(Dollars in thousands)	
Net sales	$ 584,376	$ 462,285	$ 363,465

Net Income	$ 11,460	$ 8,941	$ 2,504

Year Ended December 31, 2007 Compared with Year Ended December 31, 2006

Net sales. Net sales increased $122.1 million, or 26.4%, from $462.3 million, for the year ended December 31, 2006 to $584.4 million for the year ended December 31, 2007. Net sales increased primarily due to inclusion of TB Wood s and All Power and the full year inclusion of the previously acquired Hay Hall and Warner Linear in the results of the year ended December 31, 2007. TB Wood s net sales for the period April 5, 2007 to December 31, 2007 were $61.2 million. All Power s net sales for the period October 5, 2007 to December 31, 2007 were $2.3 million. The

remaining net increase was due to price increases, strong distribution sales and the strength of several key markets including energy, primary metals and mining.

Gross profit. Gross profit increased $39.8 million, or 31.7%, from $125.4 million (27.1% of net sales), in 2006 to $165.3 million (28.3% of net sales) in 2007. The increase includes $14.5 million from TB Wood s for the period April 5, 2007 to December 31, 2007 and $0.5 million from All Power for the period October 5, 2007 to December 31, 2007. Excluding TB Wood s and All Power, gross profit increased approximately $24.8 million, or 19.8%, and gross profit as a percent of sales increased to 28.8% due to price

increases during the second quarter of 2007, an increase in low cost country material sourcing, low cost country manufacturing and further manufacturing efficiencies as a result of continued application of the Altra Business System.

Selling, general and administrative expenses. Selling, general and administrative expenses increased $9.9 million, or 11.9%, from $83.3 million in 2006 to $93.2 million in 2007. The increase in selling, general and administrative expenses is due to the inclusion of TB Wood s for the period April 5, 2007 to December 31, 2007, which contributed $5.1 million and All Power for the period October 5, 2007 to December 31, 2007, which contributed $0.2 million, the remaining increase was primarily due to 2007 wage increases and increased costs associated to being a public company. Excluding TB Wood s and All Power, selling, general and administrative expenses, as a percentage of net sales, decreased from 18.2% in 2006 to 16.9% in 2007, primarily due to the $3.0 million termination fee paid to Genstar Capital and $1.0 million transaction fee paid to Genstar Capital in connection with the Hay Hall acquisition during 2006 which were partially offset by 2007 wage increases and increased costs associated with being a public company.

Research and development expenses. Research and development expenses increased $1.1 million, or 23.1%, from $4.9 million in 2006 to $6.1 million in 2007. The increase was primarily due to the inclusion of TB Wood s for the period April 5, 2007 to December 31, 2007, which amounted to $0.9 million.

EBITDA. To reconcile net income to EBITDA for 2007, we added back to net income $14.3 million provision of income taxes, $38.6 million of interest expense and $21.9 million of depreciation and amortization expenses. To reconcile net income to EBITDA for 2006, we added back to net income $5.8 million provision of income taxes, $25.5 million of interest expense and $14.6 million of depreciation and amortization expenses. Taking into account the foregoing adjustments, our resulting EBITDA was $86.3 million for 2007 and $54.8 million for 2006.

Other non-operating (income) expense. We recorded $0.6 million and $0.9 million of non-operating expense in 2007 and 2006, respectively, which was primarily due to foreign currency translation losses due to the strengthening of the British Pound Sterling and Euro in both fiscal years.

Interest expense. We recorded interest expense of $38.6 million during 2007 which was an increase of $13.1 million, or 51.3%, compared to $25.5 million during 2006. The increase was due to the $7.1 million in interest associated with the additional $105.0 million of the 9% senior secured notes being outstanding for nine months of 2007, additional deferred financing costs of $0.6 million associated with the issuance of the additional 9% senior secured notes, the interest associated with 111/4% senior notes outstanding for an additional six weeks during the first quarter of 2007 of $0.8 million, the $7.5 million pre-payment premium, the write-off of $2.0 million of deferred financing costs associated with the pay-down of the 111/4% senior notes and the $0.7 million of interest expense associated with the TB Wood s Revolving Credit Agreement. The increase was partially offset by a decrease in interest expense on the 111/4% senior notes after the February 2007 redemption and June and September 2007 pay-downs and the Subordinated Notes due to pay down on these notes during 2006. For a description of the 111/4% senior notes and 9% senior secured notes, please see Note 11 in the audited financial statements.

Restructuring. During 2007, we adopted two restructuring programs. The first was intended to improve operational efficiency by reducing headcount, consolidating our operating facilities and relocating manufacturing to lower cost areas (Altra Plan). The second was related to the acquisition of TB Wood s and was intended to reduce duplicate staffing and consolidate facilities (TB Wood s Plan). The total restructuring charge for the year to date periods ended December 31, 2007 was $2.4 million, which is comprised of $0.2 million of non-cash asset impairment and losses on sale of assets and $2.2 million of other restructuring expenses. In 2008, we expect to incur an additional $0.7 million of severance expense and $0.2 million of moving and relocation expense related to these restructuring programs.

Curtailment. One of our four U.S. collective bargaining agreements expired in September 2007. In October 2007, an agreement was reached which extended the existing collective bargaining agreement. The negotiations also resulted in a provision to close the Erie, Pennsylvania plant by December 2008 through the transfer of manufacturing equipment to other existing facilities and a ratable reduction in headcount. The plant

Table of Contents

closure has triggered a special retirement pension feature and plan curtailment. The curtailment and special termination benefits are approximately $2.9 million for the year ended December 31, 2007.

In connection with the union renegotiation, the post retirement benefit plan for employees at that location have been terminated for all eligible employees who have not retired, or given notice to retire in 2007. We recognized a non-cash gain associated with the curtailment of these plans in 2007 of $0.2 million.

Provision for income taxes. The provision for income taxes was $8.2 million, or 37.9%, of income before taxes, for 2007, versus a provision of $5.8 million, or 39.3%, of income before taxes, for 2007. The 2006 provision as a percent of income before taxes was lower than that of 2006 primarily due to a greater proportion of taxable income in jurisdictions possessing lower statutory tax rates. For further discussion, refer to Note 9 in the audited financial statements.

Discontinued Operations. On December 31, 2007, we completed the divestiture of our TB Wood s adjustable speed drives business (Electronics division) for $29.0 million. The decision to sell the Electronics division was made to allow us to continue our strategic focus on our core electro-mechanical power transmission business.

As of December 31, 2007, $11.9 million of cash had been received for the purchase of the Electronics division. The remaining $17.1 million is recorded as a receivable for sale of Electronics division on the consolidated balance sheet. We determined that the Electronics division became a discontinued operation in the fourth quarter of 2007. Accordingly, the operating results of the Electronics division have been segregated from the continuing operations in the consolidated statements of operations for the periods subsequent to the acquisition of TB Wood s (April 5, 2007) through December 31, 2007.

The following table summarizes the results from discontinued operations for the period from April 5 to December 31, 2007:

$	
Sales	$ 28,715
Cost of sales	19,120
Gross Profit	9,595
Selling, general and administrative expenses	5,334
Research and development	1,825
Operating income from continuing operations	2,436
Interest income, net	(76)
Other non-operating income	(83)
Gain on the sale of the Electronics division	1,513
Total income from discontinued operations before income taxes	4,108
Income taxes	6,109
Total net loss from discontinued operations	$ (2,001)

Year Ended December 31, 2006 Compared with Year Ended December 31, 2005

Net sales. Net sales increased $98.8 million, or 27.2%, from $363.5 million, for the year ended December 31, 2005 to $462.3 million for the year ended December 31, 2006. Net sales increased primarily due to the inclusion of Hay Hall and Warner Linear in the results of the year ended December 31, 2006. Hay Hall net sales for the period February 10 to December 31, 2006 were $65.5 million and Warner Linear s sales for the period May 18 to December 31, 2006 were $3.2 million. The remaining net increase was due to price increases and strong distribution sales for the aftermarket and the strength of several key markets including energy, primary metals and mining.

Gross profit. Gross profit increased $33.9 million, or 37.1%, from $91.5 million (25.2% of net sales), in 2005 to $125.4 million (27.1% of net sales) in 2006. The increase includes $14.1 million from Hay Hall for the period February 10, 2006 to December 31, 2006 and $0.7 million from Warner Linear for the

period May 18, 2006 to December 31, 2006. Excluding Hay Hall and Warner Linear, gross profit increased approximately $19.2 million, or 21.0%, and gross profit as a percent of sales increased to 28.1% due to price increases during the first quarter of 2006 and an increase in low cost country material sourcing and manufacturing efficiencies implemented by the new management team in the second half of 2005.

Selling, general and administrative expenses. Selling, general and administrative expenses increased $21.7 million, or 35.2%, from $61.6 million in 2005 to $83.3 million in 2006. The increase in selling, general and administrative expenses is due to the inclusion of Hay Hall for the period February 10, 2006 to December 31, 2006 and Warner Linear for the period May 18, 2006 to December 31, 2006, which contributed $11.1 million and $0.6 million, respectively. Excluding Hay Hall and Warner Linear, selling, general and administrative expenses, as a percentage of net sales, increased from 16.9% in 2005 to 18.2% in 2006, primarily due to the $3.0 million termination fee paid to Genstar, $1.0 million transaction fee paid to Genstar in connection with the Hay Hall acquisition and $1.9 million stock based compensation expense offset by the cost savings initiatives.

Research and development expenses. Research and development expenses increased $0.2 million, or 5.4%, from $4.7 million in 2005 to $4.9 million in 2006. The increase was primarily due to the inclusion of Hay Hall for the period February 10 to December 31, 2006.

EBITDA. To reconcile net income to EBITDA for 2006, we added back to net income $5.8 million provision of income taxes, $25.5 million of interest expense and $14.6 million of depreciation and amortization expenses. To reconcile net income to EBITDA for 2005, we added back to net income $3.3 million provision of income taxes, $19.5 million of interest expense and $11.5 million of depreciation and amortization expenses. Taking into account the foregoing adjustments, our resulting EBITDA was $54.8 million for 2006 and $36.9 million for 2005.

Other non-operating (income) expense. We recorded $0.9 million of non-operating expense in 2006 which was primarily due to foreign currency translation losses due to the strengthening of the British Pound Sterling and Euro.

Interest expense. We recorded interest expense of $25.5 million during 2006 primarily relating to the 9% senior secured notes, 111/4% senior notes, subordinated notes and amortization of related deferred financing costs. Interest expense of $19.5 million was recorded during 2005. The increase was due to the issuance of the 111/4% senior notes during 2006 and the redemption of the subordinated notes which resulted in prepayment penalties and the write-off of the related deferred financing costs.

Curtailment. During 2006, we renegotiated our contract with the labor union at our South Beloit, IL manufacturing facility. As a result of the renegotiation, participants in our pension plan cease to accrue additional benefits starting July 3, 2006. Additionally, the other post retirement benefit plan for employees at that location has been terminated for all eligible participants who had not retired, or given notice to retire in 2006, by August 1, 2006. We recognized a non-cash gain associated with the curtailment of these in 2006 of $3.8 million.

Provision for income taxes. The provision for income taxes was $5.8 million, or 39.3%, of income before taxes, for 2006, versus a combined provision of $3.3 million, or 57.2%, of income before taxes, for 2005. The 2005 provision as a percent of income before taxes was higher than that of 2006 primarily due to the Hay Hall acquisition and a greater proportion of taxable income in jurisdictions possessing lower statutory tax rates. For further discussion, refer to Note 9 in the audited financial statements.

Liquidity and Capital Resources

Overview

We finance our capital and working capital requirements through a combination of cash flows from operating activities and borrowings under our senior revolving credit facility. We expect that our primary ongoing requirements for cash will be for working capital, debt service, capital expenditures and pension plan

funding. If additional funds are needed for strategic acquisitions or other corporate purposes, we believe we could borrow additional funds or raise funds through the issuance of equity securities.

Borrowings

In connection with the PTH Acquisition, we incurred substantial indebtedness. To partially fund the PTH acquisition, our wholly owned subsidiary, Altra Industrial issued $165.0 million of 9% senior secured notes, we issued $14.0 million of subordinated notes, or the CDPQ subordinated notes, to Caisse de dépôt et placement du Québec, or CDPQ, a limited partner of Genstar Capital Partners III, L.P., and Altra Industrial entered into a $30.0 million senior revolving credit facility. All of the CDPQ subordinated notes were redeemed in 2006. In connection with our acquisition of Hay Hall in February 2006 Altra Industrial issued £33.0 million of 111/4% senior notes. Based on an exchange rate of 1.7462 U.S. Dollars to U.K. pounds sterling (as of February 8, 2006), the proceeds from these notes were approximately $57.6 million. The notes are unsecured and are due in 2013. Interest on the 111/4% senior notes is payable in U.K. pounds sterling semiannually in arrears on February 15 and August 15 of each year, commencing August 15, 2006. In connection with our acquisition of TB Wood s in April 2007, Altra Industrial issued an additional $105.0 million of its 9% senior secured notes.

As of December 31, 2007, Altra Industrial had outstanding $270.0 million of 9% senior secured notes, $7.8 million of 111/4% senior notes, $3.4 million in capital leases, $2.6 million in mortgages, $7.7 million in outstanding borrowings and $6.9 million of outstanding letters of credit under the TB Wood s Revolving Credit Agreement, $5.3 million of Industrial Revenue Bonds and had no outstanding borrowings and $6.5 million of outstanding letters of credit under our senior revolving credit facility. This constitutes approximately $296.8 million of total indebtedness which results in approximately $28.6 million of annual interest expense.

During 2007, we redeemed £29.1 million aggregate principal amount of the outstanding 111/4% Senior Notes. In connection with the redemption, Altra Industrial expensed $2.0 million of deferred financing costs and incurred $7.5 million of a pre-payment premium.

Altra Industrial s senior revolving credit facility provides for senior secured financing of up to $30.0 million, including $10.0 million available for letters of credit. The senior revolving credit facility requires us to comply with a minimum fixed charge coverage ratio of 1.20 for all four quarter periods when availability falls below $12.5 million.

TB Wood s revolving credit facility does not allow for any additional borrowings.

Altra Industrial and all of its domestic subsidiaries are borrowers, or Borrowers, under the senior revolving credit facility. Certain of our existing and subsequently acquired or organized domestic subsidiaries which are not Borrowers do and will guarantee (on a senior secured basis) the senior revolving credit facility. Obligations of the other Borrowers under the senior revolving credit facility and the guarantees are secured by substantially all of the Borrowers assets and the assets of each of our existing and subsequently acquired or organized domestic subsidiaries that is a guarantor of our obligations under the senior revolving credit facility (with such subsidiaries being referred to as the U.S. subsidiary guarantors), including but not limited to: (a) a first-priority pledge of all the capital stock of subsidiaries held by the Borrowers or any U.S. subsidiary guarantor (which pledge, in the case of any foreign subsidiary, will be limited to 100% of any non-voting stock and 65% of the voting stock of such foreign subsidiary) and (b) perfected first-priority security interests in and mortgages on substantially all tangible and intangible assets of each Borrower and U.S. subsidiary guarantor, including accounts receivable, inventory, equipment, general intangibles, investment property, intellectual property, real property (other than (i) leased real property and (ii) our existing and future real property located in the State of New York), cash and proceeds of the foregoing (in each case subject to materiality thresholds and other exceptions).

An event of default under the senior revolving credit facility would occur in connection with a change of control if: (i) Altra Industrial ceases to own or control 100% of each of its borrower subsidiaries, or (ii) a

---

change of control occurs under the 9% senior secured notes, 111/4% senior notes or any other subordinated indebtedness.

An event of default under the senior revolving credit facility would occur if an event of default occurs under the indentures governing the 9% senior secured notes or the 111/4% senior notes or if there is a default under any other indebtedness any Borrower may have involving an aggregate amount of $3 million or more and such default: (i) occurs at final maturity of such debt, (ii) allows the lender there under to accelerate such debt or (iii) causes such debt to be required to be repaid prior to its stated maturity. An event of default would also occur under the senior revolving credit facility if any of the indebtedness under the senior revolving credit facility ceases to be senior in priority to any of our other contractually subordinated indebtedness, including the obligations under the 9% senior secured notes and the 111/4% senior notes.

Under the agreements governing Altra Industrial s indebtedness, its subsidiaries are permitted to make dividend payments to Altra Industrial for use in its operations and to pay off its senior revolving credit facility and outstanding notes. During 2006, Altra Industrial pre-paid $14.0 million of the CDPQ subordinated notes on our behalf. The outstanding balance due under the CDPQ subordinated notes was paid in full on December 7, 2006. In addition, the first priority liens against us, its subsidiaries and their assets created by our indebtedness limits our ability to sell or transfer such subsidiaries or assets.

As of December 31, 2007, we were in compliance with all covenant requirements associated with all of our borrowings.

Net Cash

Cash and cash equivalents totaled $45.8 million at December 31, 2007 compared to $42.5 million at December 31, 2006. The primary source of funds for our fiscal year 2007 was cash provided by financing and operating activities of $84.5 million and $41.8 million, respectively. Net cash provided by operating activities for 2007 resulted mainly from net income of $11.5 million, non-cash depreciation, amortization and deferred financing costs of $25.4 million, net accretion of debt discount and premium of $0.8 million, non-cash amortization of $0.9 million for inventory step-ups recorded as part of the TB Wood s and All Power Acquisitions, non-cash stock compensation expense of $2.0 million, non-cash loss on the curtailment of pension and other post-retirement benefit plans of $2.7 million $5.5 million deferred tax provision of and $0.7 million related to the loss on foreign currency which was offset by a non-cash gain on the sale of the Electronics division of $3.0 million and by cash used by a net increase in operating assets and liabilities of $5.1 million.

Net cash used in investing activities of $124.7 million for 2007 resulted from $11.6 million of purchases of property, plant and equipment primarily for investment in manufacturing equipment and $123.9 million related to the acquisitions of TB Wood s and All Power, offset by the proceeds of $10.8 million received from the sale of the Electronics division.

Net cash provided by financing activities of $84.5 million for 2007 consisted primarily of $106.1 million from the issuance of the 9.0% senior secured notes and $49.6 million from the proceeds of the secondary stock offering, net of the underwriter s discount. These amounts are offset by the $58.4 million pre-payment of the 111/4% senior notes, $5.2 million in payments under the TB Wood s revolving credit facility, payment of $4.2 million in debt issuance costs associated with the 9.0% senior secured notes and $2.2 million in stock offering costs.

Capital Expenditures

We made capital expenditures of approximately $11.6 million and $9.4 million in the year ended December 31, 2007 and December 31, 2006, respectively. These capital expenditures will support on-going business needs. We expect capital expenditures to be in the range of $16 million to $19 million in 2008.

Our senior revolving credit facility imposes a maximum annual limit on our capital expenditures of $20.0 million for fiscal year 2008, $21.3 million for fiscal year 2009, $22.5 million for 2010 and each fiscal year thereafter, provided that 75% of unspent amounts from prior periods may be used in future fiscal years.

Table of Contents

Pension Plans

As of December 31, 2007, we had minimum cash funding requirements associated with our pension plan which we estimated to be $2.5 million in 2008, $5.7 million in 2009, $1.3 million in 2010 and $2.0 million in 2011 and $2.1 million in 2012.. These amounts represent minimum funding requirements for the previous pension benefits we provided our employees. In addition to the minimum funding requirements, we may choose to make additional supplemental payments to the plan. In 2006, we eliminated pension benefits in one of our locations and in 2007 we eliminated pension benefits at two other locations. These amounts are based on actuarial assumptions and actual amounts could be materially different. See Note 10 in the audited financial statements.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that provide liquidity, capital resources, market or credit risk support that expose us to any liability that is not reflected in our consolidated financial statements.

Related Party Transactions

One of the Company s directors is an executive of Joy Global, Inc. The Company sold approximately $5.4 million and $3.2 million in goods to divisions of Joy Global, Inc. during the year to date periods ended December 31, 2007 and 2006, respectively. Other than his position as an executive of Joy Global, Inc., the Company s director has no interest in sales transactions between the Company and Joy Global, Inc.

Contractual Obligations

The following table is a summary of our contractual cash obligations as of December 31, 2007 (in millions):

	Payments Due by Period						
	2008	2009	2010	2011	2012	Thereafter	Total
9% senior secured notes[1]	$	$	$	$ 270.0	$	$	$ 270.0
111/4% senior notes[2]						7.8	7.8
Operating leases	4.5	3.1	2.2	1.6	1.4	3.0	15.7
Capital leases	1.1	0.9	0.8	0.8	0.2		3.8
Mortgage[3]	0.1	0.1	0.1	0.1	0.1	2.1	2.6
TB Wood s Revolving Credit Facility[4]	1.5	0.2	6.0				7.7
Variable Rate Demand Revenue Bonds[5]						5.3	5.3
Senior Revolving Credit Facility[6]							
Total contractual cash obligations	$ 6.3	$ 3.4	$ 8.6	$ 271.1	$ 0.8	$ 68.2	$ 306.9

(1) We have semi-annual cash interest requirements due on the 9% senior secured notes with $24.3 million payable in, 2008, 2009, and 2010 and $22.3 million payable in 2011.

(2)

Assuming an exchange rate of 1.997 of U.S. Dollars to 1.0 U.K. Pounds as of December 31, 2007, we have semi-annual cash interest requirements due on the 111/4% senior notes with $0.9 million payable in 2008, 2009, 2010, 2011 and 2012 and $0.1 million thereafter. The principal balance of £3.9 million is due in 2013 which, assuming an exchange rate of 1.997 of U.S. Dollars to 1.0 U.K. Pounds, equals approximately $7.8 million.

(3) In June, 2006, our German subsidiary entered into a mortgage on its building in Heidelberg, Germany, with a local bank. The mortgage has a principal of 2.0 million, an interest rate of 5.75% and is payable in monthly installments over 15 years.

(4) In April 2007, as part of the acquisition, we refinanced the TB Wood s revolving credit facility with a commercial bank. As of December 31, 2007, there was $7.7 million of outstanding borrowings and $6.9 million of outstanding letters of credit under this facility.

(5) In April 2007, as part of the TB Wood s acquisition, we assumed the Variable Rate Demand Revenue Bonds. These bonds bear variable interest rates and mature in April 2022 and April 2024.

(6) We have up to $30.0 million of borrowing capacity, through November 2010, under our senior revolving credit facility (including $10.0 million available for use for letters of credit). As of December 31, 2007, there were no outstanding borrowings and $6.5 million of outstanding letters of credit under our senior revolving credit facility.

We have cash funding requirements associated with our pension plan. As of December 31, 2007, these requirements were estimated to be $2.5 million for 2008, $5.7 million for 2009, $1.3 million for 2010, $2.0 million for 2011 and $2.1 million thereafter.

We may be required to make cash outlays related to our unrecognized tax benefits. However, due to the uncertainty of the timing of future cash flows associated with our unrecognized tax benefits, we are unable to make reasonably reliable estimates of the period of cash settlement, if any, with the respective taxing authorities. Accordingly, unrecognized tax benefits of $4.0 million as of December 31, 2007 have been excluded from the contractual obligations table above. For further information on unrecognized tax benefits, see Note 9 to the consolidated financial statements included in this Report.

Stock-based Compensation

In January 2005, we established the 2004 Equity Incentive Plan that provides for various forms of stock based compensation to our officers and senior level employees. We account for grants under this plan in accordance with the provisions of SFAS No. 123(R).

As of December 31, 2007, we had 1,120,864 shares of unvested restricted stock. The remaining compensation cost to be recognized through 2012 is $2.9 million. Based on the stock price at December 31, 2007 of $16.63 per share, the intrinsic value of these awards as of December 31, 2007 was $26.7 million, of which $8.0 million related to vested shares and $18.7 million related to unvested shares.

Income Taxes

We are subject to taxation in multiple jurisdictions throughout the world. Our effective tax rate and tax liability will be affected by a number of factors, such as the amount of taxable income in particular jurisdictions, the tax rates in such jurisdictions, tax treaties between jurisdictions, the extent to which we transfer funds between jurisdictions and repatriate income, and changes in law. Generally, the tax liability for each legal entity is determined either (a) on a non-consolidated and non-combined basis or (b) on a consolidated and combined basis only with other eligible entities subject to tax in the same jurisdiction, in either case without regard to the taxable losses of non-consolidated and non-combined affiliated entities. As a result, we may pay income taxes to some jurisdictions even though on an overall basis we incur a net loss for the period.

Seasonality

We experience seasonality in our turf and garden business, which in recent years has represented approximately 10% of our net sales. As our large OEM customers prepare for the spring season, our shipments generally start increasing in December, peak in February and March, and begin to decline in April and May. This allows our customers to have inventory in place for the peak consumer purchasing periods for turf and garden products. The June-through-November period is typically the low season for us and our customers in the turf and garden market. Seasonality is also affected by weather and the level of housing starts.

Table of Contents

Inflation

Inflation can affect the costs of goods and services we use. The majority of the countries that are of significance to us, from either a manufacturing or sales viewpoint, have in recent years enjoyed relatively low inflation. The competitive environment in which we operate inevitably creates pressure on us to provide our customers with cost-effective products and services.

Recent Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 157, *Fair Value Measurements* (SFAS 157), which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements, but provides guidance on how to measure fair value by providing a fair value hierarchy used to classify the source of the information. SFAS 157 is effective for fiscal years beginning after November 15, 2007. However, on December 14, 2007, the FASB issued proposed FSP FAS 157-b which would delay the effective date of SFAS 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). This proposed FSP partially defers the effective date of Statement 157 to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years for items within the scope of this FSP. The partial adoption of SFAS 157 will not have a material impact on the Company s consolidated financial position, results of operations and cash flows.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities- including an Amendment of FASB Statement No. 115* (SFAS 159), which allows an entity to choose to measure certain financial instruments and liabilities at fair value. Subsequent measurements for the financial instruments and liabilities an entity elects to fair value will be recognized in earnings. SFAS 159 also establishes additional disclosure requirements. SFAS 159 is effective for the Company beginning January 1, 2008. The Company is currently evaluating the potential impact of the adoption of SFAS 159 on our consolidated financial position, results of operations and cash flows.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations* (SFAS 141R). SFAS 141R establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any noncontrolling interest in the acquiree and the goodwill acquired. SFAS 141R also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. This statement is effective for the Company beginning January 1, 2009. The Company is currently evaluating the potential impact of the adoption of SFAS 141R on the Company s consolidated financial position, results of operations and cash flows.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements* an amendment of Accounting Research Bulletin No. 51 (SFAS 160). SFAS 160 establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent s ownership interest, and the valuation of retained noncontrolling equity investments when a subsidiary is deconsolidated. SFAS 160 also establishes disclosure requirements that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. This statement is effective for the Company beginning January 1, 2009. The Company is currently evaluating the potential impact of the adoption of SFAS 160 on their consolidated financial position, results of operations and cash flows.

In June 2006, the FASB issued FASB Interpretation No. (FIN) 48, Accounting for Uncertainty in Income Taxes An Interpretation of FASB Statement No. 109 , which prescribes a recognition threshold and measurement attribute for the

financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Company adopted FIN 48 on January 1, 2007. See Note 9 to the condensed consolidated financial statements for the impact of adoption of this pronouncement.

Item 7A. ***Qualitative and Quantitative Information about Market Risk***

We are exposed to various market risk factors such as fluctuating interest rates and changes in foreign currency rates. At present, we do not utilize derivative instruments to manage this risk.

Currency translation. The results of operations of our foreign subsidiaries are translated into U.S. dollars at the average exchange rates for each period concerned. The balance sheets of foreign subsidiaries are translated into U.S. dollars at the exchange rates in effect at the end of each period. Any adjustments resulting from the translation are recorded as other comprehensive income. As of December 31, 2007 and 2006, the aggregate total assets (based on book value) of foreign subsidiaries were $55.6 million and $46.8 million, respectively, representing approximately 38.0% and 58.9%, respectively, of our total assets (based on book value). Our foreign currency exchange rate exposure is primarily with respect to the Euro and British Pound Sterling. The approximate exchange rates in effect at December 31, 2007 and 2006 were $1.47 and $1.31, respectively to the Euro. The approximate exchange rates in effect at December 31, 2007 and 2006 were $1.98 and $1.96, respectively to the British Pound Sterling. We have debt denominated in British Pound Sterling with a carrying value of (£3.9 million) or ($7.8 million) as of December 31, 2007. If the British Pound Sterling were to increase 10%, the carrying value of the debt would increase to $8.6 million. If the British Pound Sterling were to decrease 10%, the carrying value of the debt would decrease to $7.0 million.

Currency transaction exposure. Currency transaction exposure arises where actual sales and purchases are made by a business or company in a currency other than its own functional currency. Any transactional differences at an international location are recorded in net income on a monthly basis.

Interest rate risk. We are subject to market exposure to changes in interest rates based on our financing activities. This exposure relates to borrowings under our senior revolving credit facility, TB Wood s revolving credit facility and our Variable Rate Demand Revenue Bonds. Our senior revolving credit facility and TB Wood s revolving credit facility is payable at prime rate plus 0.25% in the case of prime rate loans, or LIBOR rate plus 1.75%, in the case of LIBOR rate loans. As of December 31, 2007, we had no borrowings under our senior revolving credit facility and $6.6 million of outstanding letters of credit under our senior revolving credit facility. The Variable Rate Demand Revenue Bonds have a variable interest rate that was 3.57% as of December 31, 2007. Due to the minimal amounts of outstanding debt a hypothetical change in interest rates of 1% would not have a material effect on our near-term financial condition or results of operations.

Item 8. ***Financial Statements and Supplementary Data***

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Altra Holdings, Inc.

We have audited the accompanying consolidated balance sheets of Altra Holdings, Inc. as of December 31, 2007 and 2006, and the related consolidated statements of income and comprehensive income (loss), convertible preferred stock and stockholders equity, and cash flows for each of the three years in the period ended December 31, 2007. Our audits also included the consolidated financial statement schedules listed in the index at Item 15(a)(2). These financial statements and schedules are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements and schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Altra Holdings, Inc. at December 31, 2007 and 2006, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2007, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related consolidated financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

As discussed in Note 2 to the consolidated financial statements, in fiscal 2007, the Company adopted Financial Accounting Standards Board (FASB) Interpretation No. 48, Accounting for Uncertainty in Income Taxes. As discussed in Note 10 to the consolidated financial statements, in fiscal 2006, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans An amendment of FASB Statements No. 87, 88, 106, and 132(R).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Altra Holdings, Inc. s internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 12, 2008 expressed an unqualified opinion thereon.

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements

1. Description of Business and Summary of Significant Accounting Policies

Basis of Preparation and Description of Business

Headquartered in Quincy, Massachusetts, Altra Holdings, Inc. (the Company), through its wholly-owned subsidiary Altra Industrial Motion, Inc. (Altra Industrial) is a leading multi-national designer, producer and marketer of a wide range of mechanical power transmission products. The Company brings together strong brands covering over 40 product lines with production facilities in nine countries and sales coverage in over 70 countries. The Company s leading brands include Boston Gear, Warner Electric, TB Wood s, Formsprag Clutch, Ameridrives Couplings, Industrial Clutch, Kilian Manufacturing, Marland Clutch, All Power Transmissions, Nuttall Gear, Stieber Clutch, Wichita Clutch, Twiflex Limited, Bibby Transmissions, Matrix International, Inertia Dynamics, Huco Dynatork and Warner Linear.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and their wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

Net Income Per Share

Basic earnings per share is based on the weighted average number of common shares outstanding, and diluted earnings per share is based on the weighted average number of common shares outstanding and all dilutive potential common equivalent shares outstanding. Common equivalent shares are included in the per share calculations when the effect of their inclusion would be dilutive.

The following is a reconciliation of basic to diluted net income per share:

	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2005
Net income from continuing operations	$ 13,461	$ 8,941	$ 2,504
Net loss on discontinued operations	(2,001)		
Net Income	$ 11,460	$ 8,941	$ 2,504
Shares used in net income per common share basic	23,579	1,183	9
Effect of dilutive securities:			
Incremental shares of unvested restricted common stock	1,051	1,321	1,210
Preferred Stock		17,021	17,750
Shares used in net income per common share diluted	24,630	19,525	18,969

Earnings per share Basic:

Net income from continuing operations	$	0.57	$	7.56	$	278.22
Net income from discontinued operations	$	(0.08)	$		$	
Net income	$	0.49	$	7.56	$	278.22

Notes to Consolidated Financial Statements (Continued)

Fair Value of Financial Instruments

The carrying values of financial instruments, including accounts receivable, accounts payable and other accrued liabilities, approximate their fair values due to their short-term maturities. The carrying amount of the 9% Senior Secured Notes was $267.2 million and $160.4 million at December 31, 2007 and 2006, respectively. The carrying amount of the 11.25% Senior Notes was $7.8 million and $64.6 million as of December 31, 2007 and 2006, respectively. The estimated fair value of the 9% Senior Secured Notes at December 31, 2007 and December 31, 2006 was $274.1 million and $168.3 million, respectively based on quoted market prices for such Notes. The estimated fair value of the 11.25% Senior Notes was approximately £4.3 million ($8.5 million), £36.3 million ($71.1 million) as of December 31, 2007 and December 31, 2006, respectively.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the financial statements. Actual results could differ from those estimates.

Foreign currency translation

Assets and liabilities of subsidiaries operating outside of the United States with a functional currency other than the U.S. dollar are translated into U.S. dollars using exchange rates at the end of the respective period. Revenues and expenses are translated at average exchange rates effective during the respective period.

Foreign currency translation adjustments are included in accumulated other comprehensive loss as a separate component of stockholder s equity. Net foreign currency transaction gains and losses are included in the results of operations in the period incurred and included in other non-operating expense(income), net in the accompanying statement of income and comprehensive income (loss).

Cash and Cash Equivalents

Cash and cash equivalents include all financial instruments purchased with an initial maturity of three months or less. Cash equivalents are stated at cost, which approximates fair value.

Trade Receivables

An allowance for doubtful accounts is recorded for estimated collection losses that will be incurred in the collection of receivables. Estimated losses are based on historical collection experience, as well as, a review by management of the status of all receivables. Collection losses have been within the Company s expectations.

Inventories

Inventories are stated at the lower of cost or market using the first-in, first-out (FIFO) method for all entities excluding one of the Company s subsidiaries, TB Woods. TB Wood s inventory is stated at the lower of cost or market, principally using the last-in, first-out (LIFO) method. Inventory stated using the LIFO method approximates 15% of

total inventory. The cost of inventories acquired by the Company in its acquisitions reflect their fair values at the date of acquisition as determined by the Company based on the replacement cost of raw materials, the sales price of the finished goods less an appropriate amount representing the expected profitability from selling efforts, and for work-in-process the sales price of the finished goods less an appropriate amount representing the expected profitability from selling efforts and costs to complete.

The Company periodically reviews its quantities of inventories on hand and compares these amounts to the expected usage of each particular product or product line. The Company records a charge to cost of sales for any amounts required to reduce the carrying value of inventories to its estimated net realizable value.

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

Property, Plant and Equipment

Property, plant, and equipment are stated at cost, net of accumulated depreciation.

Depreciation of property, plant, and equipment, including capital leases is provided using the straight-line method over the estimated useful life of the asset, as follows:

Buildings and improvements	15 to 45 years
Machinery and equipment	2 to 15 years
Capital lease	Life of lease

Improvements and replacements are capitalized to the extent that they increase the useful economic life or increase the expected economic benefit of the underlying asset. Repairs and maintenance expenditures are charged to expense as incurred.

Intangible Assets

Intangibles represent product technology and patents, tradenames and trademarks and customer relationships. Product technology, patents and customer relationships are amortized on a straight-line basis over 8 to 16 years. The tradenames and trademarks are considered indefinite-lived assets and are not being amortized. Intangibles are stated at fair value on the date of acquisition. At December 31, 2007, and 2006 intangibles are stated net of accumulated amortization incurred since the date of acquisition.

Goodwill

Goodwill represents the excess of the purchase price paid by the Company for the Predecessor, Kilian, Hay Hall, Bear Linear, TB Woods, Inc. and All Power Transmission Manufacturing, Inc. (All Power) over the fair value of the net assets acquired in each of the acquisitions. Goodwill can be attributed to the value placed on the Company being an industry leader with a market leading position in the Power Transmission industry. The Company s leadership position in the market was achieved by developing and manufacturing innovative products and management anticipates that its leadership position and profitability will continue to expand, enhanced by cost improvement programs associated with ongoing consolidation and centralization of its operations.

Impairment of Goodwill and Indefinite-Lived Intangible Assets

The Company evaluates the recoverability of goodwill and indefinite-lived intangible assets annually, or more frequently if events or changes in circumstances, such as a decline in sales, earnings, or cash flows, or material adverse changes in the business climate, indicate that the carrying value of an asset might be impaired. Goodwill is considered to be impaired when the net book value of a reporting unit exceeds its estimated fair value. Fair values are established using a discounted cash flow methodology (specifically, the income approach). The determination of discounted cash flows is based on the Company s strategic plans and long-range forecasts. The revenue growth rates included in the forecasts are the Company s best estimates based on current and anticipated market conditions, and the profit margin assumptions are projected based on current and anticipated cost structures. This analysis included

consideration of discounted cash flows as well as EBITDA multiples. The analysis indicated no impairment to be present as of December 31, 2007 and 2006.

Impairment of Long-Lived Assets Other Than Goodwill and Indefinite-Lived Intangible Assets

The Company assesses its long-lived assets other than goodwill and indefinite-lived intangible assets for impairment whenever facts and circumstances indicate that the carrying amounts may not be fully recoverable. To analyze recoverability, the Company projects undiscounted net future cash flows over the remaining lives of such assets. If these projected cash flows are less than the carrying amounts, an impairment loss would be

Table of Contents

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

recognized, resulting in a write-down of the assets with a corresponding charge to earnings. The impairment loss is measured based upon the difference between the carrying amounts and the fair values of the assets. Assets to be disposed of are reported at the lower of the carrying amounts or fair value less cost to sell. Management determines fair value using the discounted cash flow method or other accepted valuation techniques.

Debt Issuance Costs

Costs directly related to the issuance of debt are capitalized, included in other long-term assets and amortized using the effective interest method over the term of the related debt obligation. The net carrying value of debt issuance costs was approximately $6.1 million and $5.4 million at December 31, 2007 and 2006, respectively.

Revenue Recognition

Product revenues are recognized, net of sales tax collected, at the time title and risk of loss pass to the customer, which generally occurs upon shipment to the customer. Service revenues are recognized as services are performed. Amounts billed for shipping and handling are recorded as revenue. Product return reserves are accrued at the time of sale based on the historical relationship between shipments and returns, and are recorded as a reduction of net sales.

Certain large distribution customers receive quantity discounts which are recognized net at the time the sale is recorded.

Shipping and Handling Costs

Shipping and handling costs associated with sales are classified as a component of cost of sales.

Warranty Costs

Estimated expenses related to product warranties are accrued at the time products are sold to customers. Estimates are established using historical information as to the nature, frequency, and average costs of warranty claims.

Self-Insurance

Certain operations are self-insured up to pre-determined amounts above which third-party insurance applies, for medical claims, workers compensation, vehicle insurance, product liability costs and general liability exposure. The accompanying balance sheets include reserves for the estimated costs associated with these self-insured risks, based on historic experience factors and management s estimates for known and anticipated claims. A portion of medical insurance costs are offset by charging employees a premium equivalent to group insurance rates.

Research and Development

Research and development costs are expensed as incurred.

Advertising

Advertising costs are charged to selling, general, and administrative expenses as incurred and amounted to approximately $2.4 million, $2.4 million and $2.2 million, for the year ended December 31, 2007, 2006, and 2005, respectively.

Stock-Based Compensation

The Company established the 2004 Equity Incentive Plan that provides for various forms of stock based compensation to officers, directors and senior-level employees of the Company. The Company accounts

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

for grants under this plan in accordance with the provisions of SFAS No. 123(R). Expense associated with equity awards is recognized on a straight-line basis over the requisite service period which typically coincides with the vesting period of the grant.

Income Taxes

The Company records income taxes using the asset and liability method. Deferred income tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective income tax bases, and operating loss and tax credit carryforwards. The Company evaluates the realizability of its net deferred tax assets and assesses the need for a valuation allowance in purchase price accounting and on a quarterly basis. The future benefit to be derived from its deferred tax assets is dependent upon the Company s ability to generate sufficient future taxable income to realize the assets. The Company records a valuation allowance to reduce its net deferred tax assets to the amount that may be more likely than not to be realized. In periods subsequent to an acquisition, if the Company were able to realize net deferred tax assets in excess of their net recorded amount established in the purchase price allocation, an adjustment to the valuation allowance would be recorded as a reduction to goodwill in the period such determination was made.

To the extent the Company establishes a valuation allowance on net deferred assets generated from operations, an expense will be recorded within the provision for income taxes. In periods subsequent to establishing a valuation allowance on net deferred assets from operations, if the Company were to determine that it would be able to realize its net deferred tax assets in excess of their net recorded amount, an adjustment to the valuation allowance would be recorded as a reduction to income tax expense in the period such determination was made.

We assess our income tax positions and record tax benefits for all years subject to examination, based upon our evaluation of the facts, circumstances and information available at the reporting date. For those tax positions for which it is more likely than not that a tax benefit will be sustained, we record the amount that has a greater than 50% likelihood of being realized upon settlement with the taxing authority that has full knowledge of all relevant information. Interest and penalties are accrued, where applicable. If we do not believe that it is more likely than not that a tax benefit will be sustained, no tax benefit is recognized.

Accumulated Other Comprehensive Income (Loss)

The Company s total accumulated other comprehensive income (loss) is comprised of the following:

	Minimum Pension Liability/SFAS No. 158 Asset/(liability)	Cumulative Foreign Currency Translation Adjustment	Accumulated Other Comprehensive Income (loss)
Balance at December 31, 2004	(722)	549	(173)
Minimum pension liability adjustment	(700)		(700)
Foreign currency translation adjustment		(6,400)	(6,400)

Balance at December 31, 2005		(1,422)		(5,851)		(7,273)

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

Reclassifications

Certain prior period amounts have been reclassified in the condensed consolidated financial statements to conform to the current period presentation.

2. Recent Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 157, *Fair Value Measurements* (SFAS 157), which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements, but provides guidance on how to measure fair value by providing a fair value hierarchy used to classify the source of the information. SFAS 157 is effective for fiscal years beginning after November 15, 2007. However, on December 14, 2007, the FASB issued proposed FSP FAS 157-b which would delay the effective date of SFAS 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). This proposed FSP partially defers the effective date of Statement 157 to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years for items within the scope of this FSP. The partial adoption of SFAS 157 will not have a material impact on the Company s consolidated financial position, results of operations and cash flows.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities including an Amendment of FASB Statement No. 115* (SFAS 159), which allows an entity to choose to measure certain financial instruments and liabilities at fair value. Subsequent measurements for the financial instruments and liabilities an entity elects to fair value will be recognized in earnings. SFAS 159 also establishes additional disclosure requirements. SFAS 159 is effective for the Company beginning January 1, 2008. The Company is currently evaluating the potential impact of the adoption of SFAS 159 on our consolidated financial position, results of operations and cash flows.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), *Business Combinations* (SFAS 141R). SFAS 141R establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any noncontrolling interest in the acquiree and the goodwill acquired. SFAS 141R also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. This statement is effective for the Company beginning January 1, 2009. The Company is currently evaluating the potential impact of the adoption of SFAS 141R on the Company s consolidated financial position, results of operations and cash flows.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements* an amendment of Accounting Research Bulletin No. 51 (SFAS 160). SFAS 160 establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent s ownership interest, and the valuation of retained noncontrolling equity investments when a subsidiary is deconsolidated. SFAS 160 also establishes disclosure requirements that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. This statement is effective for the Company beginning January 1, 2009. The Company is currently evaluating the potential impact of the adoption of SFAS 160 on their consolidated financial position, results of operations and cash flows.

In June 2006, the FASB issued FASB Interpretation No. (FIN) 48, Accounting for Uncertainty in Income Taxes An Interpretation of FASB Statement No. 109 , which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

expected to be taken in a tax return. The Company adopted FIN 48 on January 1, 2007. See Note 9 to the condensed consolidated financial statements for the impact of adoption of this pronouncement.

3. Acquisitions

On April 5, 2007, the Company acquired all of the outstanding shares of TB Wood s for $24.80 per share, or aggregate consideration of $93.5 million. As part of the TB Wood s acquisition, the Company retired $18.7 million of TB Wood s indebtedness and paid $9.2 million to retire options under the TB Wood s equity plan. TB Wood s is an established designer, manufacturer and marketer of mechanical and electronic industrial power transmission products.

The TB Wood s acquisition has been accounted for in accordance with SFAS No. 141. The closing date of the TB Wood s acquisition was April 5, 2007, and as such, the Company s consolidated financial statements reflect TB Wood s results of operations from that date forward.

The Company has completed its final purchase price allocation. The value of the acquired assets, assumed liabilities and identified intangibles from the acquisition of TB Wood s, as presented below, are based upon the fair value as of the date of the acquisition. Goodwill and intangibles recorded in connection with the acquisition of TB Wood s have been allocated across the business units acquired. The purchase price allocation is as follows:

Total purchase price, including closing costs of approximately $2.7 million	$ 124,092
Cash and cash equivalents	5,522
Trade receivables	16,186
Inventories	29,215
Prepaid expenses and other	1,927
Property, plant and equipment	38,574
Intangible assets	41,901
Total assets acquired	$ 133,325
Accounts payable, accrued payroll, and accruals and other current liabilities	$ 22,768
Debt	18,669
Other liabilities	24,424
Total liabilities assumed	$ 65,861
Net assets acquired	$ 67,464
Excess purchase price over the fair value of net assets acquired	$ 56,628

The excess of the purchase price over the fair value of the net assets acquired was recorded as goodwill.

The estimated amounts recorded as intangible assets consist of the following:

Customer relationships, subject to amortization	$ 30,117
Trade names and trademarks, not subject to amortization	11,784
Total intangible assets	$ 41,901

Customer relationships are subject to amortization over their estimated useful lives of 16 years representing the anticipated period over which the Company estimates it will benefit from the acquired assets. The acquisition of TB Woods did not result in any tax deductible goodwill.

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

On October 5, 2007, the Company acquired substantially all of the assets of All Power Transmission Manufacturing, Inc. (All Power). Approximately $5.0 million was paid at closing and the remaining $2.6 million of consideration was issued in the form of a note payable, due in installments over a 2 year period. The total cash payments including deal costs and the net present value of the $2.6 million note payable reflect the total purchase consideration of $7.2 million.

The All Power acquisition has been accounted for in accordance with SFAS No. 141. The closing date of the All Power acquisition was October 19, 2007, and as such, the Company s consolidated financial statements reflect All Power s results of operations only from that date forward.

The fair value of All Power s acquired net assets was $4.3 million consisting primarily of accounts receivable, inventory, fixed assets, accounts payable and accrued liabilities. The Company identified $2.4 million of customer relationships. The customer relationships will be amortized over a period of 10 years representing the anticipated period over which the Company estimates it will benefit from the acquired assets. The Company recorded the $0.6 million excess purchase price over the fair value of the net assets acquired as goodwill. The Company has completed its final purchase price allocation. The All Power acquisition resulted in goodwill that the Company believes is deductible for tax purposes.

On February 10, 2006, the Company purchased all of the outstanding share capital of Hay Hall for $49.2 million. During 2007, the purchase price was reduced by $0.4 million related to the finalization of the working capital adjustment in accordance with the terms of the purchase price agreement. Included in the purchase price was $6.0 million paid in the form of deferred consideration. At the closing the Company deposited such deferred consideration into an escrow account for the benefit of the former Hay Hall shareholders. The deferred consideration is represented by a loan note. While the former Hay Hall shareholders will hold the note, their rights will be limited to receiving the amount of the deferred consideration placed in the escrow account. They will have no recourse against the Company unless we take action to prevent or interfere in the release of such funds from the escrow account. At closing, Hay Hall and its subsidiaries became the Company s direct or indirect wholly owned subsidiaries. Hay Hall is a UK-based holding company established in 1996 that is focused primarily on the manufacture of couplings and clutch brakes. Hay Hall consists of five main businesses that are niche focused and have strong brand names and established reputations within their primary markets.

The Hay Hall acquisition has been accounted for in accordance with SFAS No. 141. The closing date of the Hay Hall acquisition was February 10, 2006, and as such, the Company s consolidated financial statements reflect Hay Hall s results of operations only from that date forward.

The Company has completed its final purchase price allocation. The value of the acquired assets, assumed liabilities and identified intangibles from the acquisition of Hay Hall, as presented below, are based upon fair value as of the date of the acquisition. The goodwill and intangibles recorded in connection with the

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

acquisition of Hay Hall have been allocated across the business units acquired. The final purchase price allocation is as follows:

Total purchase price, including closing costs of approximately $1.8 million and the working capital adjustment of $0.4 million	$ 50,584
Cash and cash equivalents	775
Trade receivables	12,111
Inventories	17,004
Prepaid expenses and other	510
Property, plant and equipment	13,670
Intangible assets	16,352
Total assets acquired	60,422
Accounts payable, accrued payroll, and accruals and other current liabilities	12,971
Other liabilities	8,784
Total liabilities assumed	21,755
Net assets acquired	38,667
Excess purchase price over the fair value of net assets acquired	$ 12,809

The excess of the purchase price over the fair value of the net assets acquired was recorded as goodwill.

The amounts recorded as intangible assets consist of the following:

Patents, subject to amortization	$ 110
Customer relationships, subject to amortization	9,312
Trade names and trademarks, not subject to amortization	6,930
Total intangible assets	$ 16,352

Customer relationships are amortized on a straight-line basis over 11 years representing the anticipated periods over which the Company estimates it will benefit from the acquired assets. The Company anticipates that substantially all of this amortization is deductible for income tax purposes. The acquisition of Hay Hall did not result in any tax deductible goodwill.

On May 18, 2006, the Company entered into a purchase agreement with the shareholders of Bear Linear LLC, or Bear, to purchase substantially all of the assets of the company for $5.0 million. Approximately $3.5 million was paid

at closing and the remaining $1.5 million is payable over the next 2.5 years. Bear manufacturers high value-added linear actuators for mobile off-highway and industrial applications.

The Bear acquisition has been accounted for in accordance with SFAS No. 141. The closing date of the Bear acquisition was May 18, 2006, and as such, the Company s consolidated financial statements reflect Bear s results of operations only from that date forward.

Bear had approximately $0.5 million of net assets at closing consisting primarily of accounts receivable, inventory, fixed assets and accounts payable and accrued liabilities. The Company did not identify any specifically identifiable intangible assets. The Company recorded the $4.2 million excess purchase price over the fair value of the net assets acquired as goodwill. The Company has completed its final purchase price allocation. The Bear Linear acquisition resulted in goodwill that the Company believes is tax deductible.

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

The following table sets forth the unaudited pro forma results of operations of the Company for the year to date periods ended December 31, 2007 and 2006 as if the Company had acquired TB Wood s, Hay Hall, Bear Linear and All Power at the beginning of the respective periods. The pro forma information contains the actual operating results of the Company and TB Wood s, Hay Hall, Bear Linear and All Power with the results prior to April 5, 2007, for TB Wood s, February 11, 2006 for Hay Hall, May 19, 2006 for Bear Linear and October 19, 2007 for All Power, adjusted to include the pro forma impact of (i) additional depreciation expense as a result of estimated depreciation on fair value of fixed assets; (ii) additional expense as a result of estimated amortization of identifiable intangible assets; (iii) additional interest expense associated with debt issued on April 5, 2007 in connection with the TB Wood s Acquisition, (iv) elimination of intercompany sales between Hay Hall and the Company and (v) and an adjustment to the tax provision for the tax effect of the above adjustments. The unaudited pro-forma financial information for the year to date period ended December 31, 2007 and 2006 includes a charge to step-up the value of acquired inventory sold of $0.9 million and $2.3 million, respectively. These pro forma amounts do not purport to be indicative of the results that would have actually been obtained if the acquisitions occurred at the beginning of the respective periods or that may be obtained in the future.

	Pro Forma (unaudited)	
	Year to Date Ended December 31, 2007	Year to Date Ended December 31, 2006
Total revenues	$ 623,249	$ 591,131
Net income from continuing operations	11,697	6,845
Net loss from discontinued operations	(2,001)	
Net income	$ 9,696	$ 6,845
Basic earnings per share:		
Net income from continuing operations	$ 0.50	$ 5.37
Net loss from discontinued operations	$ (0.09)	
Net income	$ 0.41	$ 5.37
Diluted earnings per share:		
Net income from continuing operations	$ 0.47	$ 0.33
Net loss from discontinued operations	$ (0.08)	
Net income	$ 0.39	$ 0.33

4. Discontinued Operations

On December 31, 2007, the Company completed the divestiture of its TB Wood s adjustable speed drives business (Electronics division) to Finland-based Vacon for $29.0 million. The decision to sell the Electronics division was made to allow the Company to continue its strategic focus on its core electro-mechanical power transmission business. The Company determined that the carrying value of the Electronics division was less than the sale price less the cost to sell, as a result, no adjustment to carrying value of this long-lived asset was necessary during the year-ended

December 31, 2007.

As of December 31, 2007, $11.9 million of cash had been received from Vacon for the purchase of the Electronics division. The remaining $17.1 million is recorded as a receivable for sale of Electronics division on the consolidated balance sheet. In accordance with SFAS 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (SFAS 144), the Company determined that the Electronics division became a discontinued operation in the fourth quarter of 2007. Accordingly, the operating results of the Electronics division have been segregated from the continuing operations in the consolidated statements of income and comprehensive income for the periods subsequent to the acquisition of TB Wood s (April 5, 2007) through December 31, 2007.

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

The following table summarizes the results from discontinued operations for the periods indicated:

	April 5 to December 31, 2007
Sales	$ 28,715
Cost of sales	19,120
Gross Profit	9,595
Selling, general and administrative expenses	5,334
Research and development	1,825
Operating income from continuing operations	2,436
Interest income, net	76
Other non-operating income	83
Gain on the sale of the Electronics division	1,513
Total income from discontinued operations before income taxes	4,108
Income taxes	(6,109)
Total net loss from discontinued operations	$ (2,001)

The Company will also receive additional consideration from Vacon through facility leases in North America and transition services to be provided by Altra for a period of time after closing, not to exceed 18 months. The Company does not believe net cash flows from the transition services agreement will be significant.

5. Inventories

Inventories located at certain subsidiaries acquired in connection with the TB Wood s acquisition are stated at the lower of current cost or market, principally using the last-in, first-out (LIFO) method. All of the Company s remaining subsidiaries are stated at the lower of cost or market, using the first-in, first-out (FIFO) method. Market is defined as net realizable value. Inventories at December 31, 2007 and 2006 consisted of the following:

	2007	2006
Raw materials	$ 33,601	$ 26,731
Work in process	20,376	19,112
Finished goods	47,858	29,926

Inventories, net	$ 101,835	75,769

Approximately 15% of total inventories at December 31, 2007 were valued using the LIFO method. All LIFO inventory acquired as part of the TB Wood s acquisition was valued at the estimated fair market value less cost to sell. The adjustment resulted in a $1.7 million increase in the carrying value of the inventory. From April 5, 2007 to December 31, 2007, a $0.3 million LIFO provision was recorded as a component of costs of sales in the accompanying consolidated statement of income and comprehensive income (loss). As of December 31, 2007, the net LIFO reserve included as part of inventory on the consolidated balance sheet was an asset of $1.4 million.

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

6. Property, Plant and Equipment

Property, plant and equipment at December 31, 2007 and 2006, consisted of the following:

	2007	2006
Land	$ 13,993	$ 9,599
Buildings and improvements	33,927	19,849
Machinery and equipment	102,678	71,866
	150,598	101,314
Less Accumulated depreciation	(33,988)	(18,927)
	$ 116,610	$ 82,387

During the fourth quarter of 2007, management entered into a plan to exit the building located in Stratford, Canada. The facility, which was acquired as part of the TB Woods acquisition is to be combined with the Company s remaining facilities in 2008. In accordance with SFAS 144, the building is classified as an asset held for sale in the consolidated balance sheet.

7. Goodwill and Intangible Assets

Goodwill as of December 31, 2007 and 2006 consisted of the following:

Goodwill	
Balance December 31, 2006	$ 65,397
Additions related to TB Wood s acquisition	56,628
Additions related to All Power acquisition	628
Impact of additional tax contingencies	956
Adjustments to acquisition related deferred tax liabilities	(2,309)
Working capital adjustments related to the purchase price of Hay Hall	(446)
Reductions related to sale of the Electronics division	(7,931)
Impact of changes in foreign currency	2,056
Balance December 31, 2007	$ 114,979

	December 31, 2007		December 31, 2006	
		Accumulated		Accumulated

	Cost	Amortization	Cost	Amortization
Other Intangibles				
Intangible assets not subject to amortization:				
Tradenames and trademarks	30,730	$	$ 23,010	$
Intangible assets subject to amortization:				
Customer relationships	62,038	10,139	37,114	5,679
Product technology and patents	5,232	2,348	5,232	1,316
Impact of changes in foreign currency	3,430		1,301	
Total intangible assets	$ 101,430	12,487	$ 66,657	$ 6,995

The Company recorded $5.5 million, $3.8 million and $3.0 million of amortization for the years ended December 31, 2007, 2006 and 2005, respectively.

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

Customer relationships, product technology and patents are amortized over their useful lives ranging from 8 to 16 years. The weighted average estimated useful life of intangible assets subject to amortization is approximately 11 years.

The estimated amortization expense for intangible assets is approximately $5.5 million in each of the next five years and then $27.3 million thereafter.

8. Warranty Costs

Estimated expenses related to product warranties are accrued at the time products are sold to customers. Estimates are established using historical information as to the nature, frequency and average costs of warranty claims. Changes in the carrying amount of accrued product warranty costs for the year ended December 31, 2007 and 2006 are as follows:

	Year-Ended December 31, 2007	Year-Ended December 31, 2006
Balance at beginning of period	$ 2,083	$ 1,876
Balance assumed with TB Wood s acquisition	843	
Accrued warranty costs	2,310	1,666
Balance sold with the Electronics division	(873)	
Payments and adjustments	(265)	(1,459)
Balance at end of period	4,098	$ 2,083

9. Income Taxes

Pre-tax income (loss) from continuing operations by domestic and foreign locations consists of the following:

	December 31, 2007	December 31, 2006	December 31, 2005
Domestic	$ 10,190	$ 15,969	$ 2,127
Foreign	11,479	(1,231)	3,726
	$ 21,669	$ 14,738	$ 5,853

The components of the provision (benefit) for income taxes from continuing operations consists of the following:

	December 31, 2007	December 31, 2006	December 31, 2005
Current:			
Federal	$ 781	$ 2,616	$ 1,086
Foreign and State	1,972	1,991	2,038
	2,753	4,607	3,124
Deferred:			
Federal	4,988	998	509
Foreign and state	467	192	(284)
	5,455	1,190	225
Provision (benefit) for income taxes	$ 8,208	$ 5,797	$ 3,349

Table of Contents

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

A reconciliation from the federal statutory rate to the Company s effective tax rate for income taxes from continuing operations is as follows:

	December 31, 2007	December 31, 2006	December 31, 2005
Tax at U.S. federal income tax rate	$ 7,584	$ 5,158	$ 2,049
State taxes, net of federal income tax effect	306	674	373
Change in tax rate	(750)	53	
Foreign Taxes	1,761	944	
Interest	(1,365)	(1,361)	313
Foreign and other	672	329	614
Provision (benefit) for income taxes	$ 8,208	$ 5,797	$ 3,349

The Company adopted the provisions of FASB interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB 109 (FIN 48) at the beginning of fiscal 2007, which resulted in a decrease of approximately $0.2 million to the December 31, 2006 retained earning balance. FIN 48 provides a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions taken or expected to be taken in income tax returns.

A reconciliation of the gross amount of unrecognized tax benefits excluding accrued interest and penalties from January 1, 2007 through December 31, 2007 is as follows:

Balance at January 1, 2007	$ 922
Increases related to prior year tax positions	1,916
Increases related to acquisitions	3,581
Decreases related to prior year tax positions	(1,970)
Increases related to current year tax positions	1,785
Lapse of statute limitations	(651)
Balance at December 31, 2007	$ 5,583

At December 31, 2007, the Company had $4.0 million of net unrecognized tax benefits, of which $1.2 million, if recognized would reduce the Company s effective tax rate and $2.8 million would result in a decrease to goodwill. We do not expect the amount of unrecognized tax benefit disclosed above to change significantly over the next 12 months.

The Company recognizes interest and penalties related to unrecognized tax benefits in income tax expense in the consolidated statements of income. At the date of adoption and December 31, 2007, the Company had $0.3 million and $1.7 million of accrued interest and penalties, respectively in income taxes payable.

The Company and its subsidiaries file consolidated and separate income tax returns in the U.S. federal jurisdiction as well as in various state and foreign jurisdictions. In the normal course of business, the Company is subject to examination by taxing authorities in all of these jurisdictions. With the exception of certain foreign jurisdictions, the Company is no longer subject to income tax examinations for the tax years prior to 2004 in these major jurisdictions. Additionally, the Company has indemnification agreements with the sellers of the Colfax and Hay Hall entities, which provides for reimbursement to the Company for payments made in satisfaction of tax liabilities relating to pre-acquisition periods.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

purposes. Significant components of the deferred tax assets and liabilities as of December 31, 2007 and 2006 were as follows:

	2007	2006
Deferred tax assets:		
Post-retirement obligations	$ 5,031	$ 5,247
Goodwill	2,051	7,555
Inventory	0	2,036
Expenses not currently deductible	6,801	5,852
Net operating loss carryover	1,761	2,899
Other	177	557
Total deferred tax assets	15,821	24,146
Valuation allowance for deferred tax assets	(1,336)	(1,252)
Net deferred tax assets	14,485	22,894
Deferred tax liabilities:		
Property, plant and equipment	16,081	9,650
Intangible assets	20,331	11,730
Other	2,106	1,108
Total deferred tax liabilities	38,518	22,488
Net deferred tax liabilities	(24,033)	406

At December 31, 2007 and 2006, the Company had net operating loss carry forwards primarily related to operations in the United Kingdom of $6.3 million and $4.2 million respectively, and in France of $0 million and $3.4 million respectively, which can be carried forward indefinitely.

The increase in deferred tax liabilities for the year includes the addition of deferred tax liability balances of approximately $23 million attributable to the acquisition of TB Wood s Corp.

Valuation allowances are established for a deferred tax asset that management believes may not be realized. The Company continually reviews the adequacy of the valuation allowance and recognizes tax benefits only as reassessments indicate that it is more likely than not the benefits will be realized. A valuation allowance at December 31, 2007 and December 31, 2006 of $1.3 related to the net operating loss in the UK has been established due to the uncertainty of realizing the benefits of these net operating losses. The valuation allowance existing at December 31, 2007 will be allocated to reduce book goodwill if and when released in subsequent periods.

The Company s current intention is to reinvest the total amount of its unremitted foreign earnings in the local tax jurisdiction to the extent that they are generated and available, or to repatriate the earnings only when tax effective. As

such, the Company has not provided U.S. tax expense on approximately $10.4 million of unremitted earnings from certain of its foreign subsidiaries. If these undistributed earnings were distributed, it would result in incremental US tax expense of approximately $2.1 million to the Company.

10. Pension and Other Employee Benefits

Defined Benefit (Pension) and Postretirement Benefit Plans

The Company sponsors various defined benefit (pension) and postretirement (medical and life insurance coverage) plans for certain, primarily unionized, active employees (those in the employment of the Company at or hired since November 30, 2004).

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

Included in accumulated other comprehensive loss at December 31, 2007 are $0.7 million ($0.3 million, net of tax) of unrecognized actuarial losses that have not yet been recognized in net periodic pension cost.

The following tables represent the reconciliation of the benefit obligation, fair value of plan assets and funded status of the respective defined benefit (pension) and postretirement benefit plans as of December 31, 2007 and 2006:

	Pension Benefits		Post Retirement Benefits	
	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2007	Year Ended December 31, 2006
Change in benefit obligation:				
Obligation at beginning of period	$ 26,121	$ 27,697	$ 3,549	$ 10,983
Service cost	325	513	72	140
Interest cost	1,452	1,491	175	315
Amendments		57	(25)	(2,564)
Curtailments	2,899	119	(154)	(3,838)
Actuarial loss (gain)	(1,756)	(1,188)	168	(1,291)
Foreign exchange effect	374	326		
Benefits paid	(1,404)	(2,894)	(303)	(196)
Obligation at end of period	$ 28,011	$ 26,121	$ 3,482	$ 3,549
Change in plan assets:				
Fair value of plan assets, beginning of period	$ 10,952	$ 5,832	$	$
Actual return on plan assets	1,196	821		
Employer contribution	3,836	7,193	302	196
Benefits paid	(1,404)	(2,894)	(302)	(196)
Fair value of plan assets, end of period	$ 14,580	$ 10,952	$	$
Funded status	$ (13,431)	$ (15,169)	$ (3,482)	$ (3,549)
Amounts Recognized in the balance sheet consist of:				
Non current assets	$	$	$	$
Current liabilities			(312)	(287)
Non-current liabilities	(13,431)	(15,169)	(3,170)	(3,262)
Total	$ (13,431)	$ (15,169)	$ (3,482)	$ (3,549)

For all pension plans presented above, the accumulated and projected benefit obligations exceed the fair value of plan assets. The accumulated benefit obligation at December 31, 2007 and 2006 was $28.0 million and $26.1 million, respectively. Non-US pension liabilities recognized in the amounts presented above are $3.2 million and $3.4 million at December 31, 2007 and 2006, respectively.

Table of Contents

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

The weighted average discount rate used in the computation of the respective benefit obligations at December 31, 2007 and 2006 presented above are as follows:

	2007	2006
Pension benefits	6.25%	5.75%
Other postretirement benefits	6.25%	5.75%

The following table represents the components of the net periodic benefit cost associated with the respective plans:

	Pension Benefits			Postretirement Benefits		
	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2005	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2005
Service cost	$ 325	$ 513	$ 591	$ 72	$ 140	$ 295
Interest cost	1,452	1,491	1,362	175	315	549
Recognized net actuarial loss					(113)	
Expected return on plan assets	(1,066)	(829)	(431)			
Settlement/Curtailment	2,899	119		(154)	(3,838)	
Amortization	(4)	6	72	(1,022)	(640)	(423)
Net periodic benefit cost	$ 3,606	$ 1,300	$ 1,594	$ (929)	$ (4,136)	$ 421

The key economic assumptions used in the computation of the respective net periodic benefit cost for the periods presented above are as follows:

	Pension Benefits			Postretirement Benefits		
	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2005	Year Ended December 31, 2007	Year Ended December 31, 2006	Year Ended December 31, 2005
Discount rate	5.75%	5.5%	5.5%	5.75%	5.5%	5.5%
Expected return on plan assets	8.5%	8.5%	8.5%	N/A	N/A	N/A
	N/A	N/A	N/A	N/A	N/A	N/A

Compensation rate
increase

The reasonableness of the expected return on the funded pension plan assets was determined by three separate analyses: (i) review of forty years of historical data of portfolios with similar asset allocation characteristics, (ii) analysis of six years of historical performance for the Predecessor plan assuming the current portfolio mix and investment manager structure, and (iii) a projected portfolio performance, assuming the plan s target asset allocation.

For measurement of the postretirement benefit obligations and net periodic benefit costs, an annual rate of increase in the per capita cost of covered health care benefits of approximately 9.0% was assumed. This rate was assumed to decrease gradually to 5% by 2012 and remain at that level thereafter. The assumed

Table of Contents

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

health care trends are a significant component of the postretirement benefit costs. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	1-Percentage-Point Increase		1-Percentage-Point Decrease	
Effect on service and interest cost components for the period January 1, 2007 through December 31, 2007	$	31	$	(25)
Effect on the December 31, 2007 post-retirement benefit obligation	$	287	$	(239)

The asset allocations for the Company s funded retirement plan at December 31, 2007 and 2006, respectively, and the target allocation for 2007, by asset category, are as follows:

	Allocation Percentage of Plan Assets at Year-End		
	2007 Actual	2007 Target	2006 Actual
Asset Category			
Equity securities	66%	65%	59%
Fixed income securities	34%	35%	41%

The investment strategy is to achieve a rate of return on the plan s assets that, over the long-term, will fund the plan s benefit payments and will provide for other required amounts in a manner that satisfies all fiduciary responsibilities. A determinant of the plan s returns is the asset allocation policy. The plan s asset mix will be reviewed by the Company periodically, but at least quarterly, to rebalance within the target guidelines. The Company will also periodically review investment managers to determine if the respective manager has performed satisfactorily when compared to the defined objectives, similarly invested portfolios, and specific market indices.

Expected cash flows

The following table provides the amounts of expected benefit payments, which are made from the plans assets and includes the participants share of the costs, which is funded by participant contributions. The amounts in the table are actuarially determined and reflect the Company s best estimate given its current knowledge; actual amounts could be materially different.

	Pension Benefits	Postretirement Benefits
Expected benefit payments (from plan assets)		

2008	$ 1,194	$ 311
2009	1,315	332
2010	1,428	335
2011	1,533	337
2012	1,688	312
2013 2017	9,871	910

The Company contributed $3.5 million to its pension plan in 2007. The Company has minimum cash funding requirements associated with its pension plan which are estimated to be $2.5 million in 2008, $5.7 million in 2009, $1.3 million in 2010 and $2.0 million annually until 2012.

One of our four U.S. collective bargaining agreements expired in August 2007. An agreement was reached in September 2007 with the union that extends the collective bargaining agreement through August 2010. The agreement reached provides for certain wage increases over a three year period, transition of health

Table of Contents

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

insurance premiums to a union administered plan and other benefits. In addition, the defined benefit plan will be frozen effective December 31, 2007, with all eligible plan participants transitioned to a 401 (k) defined contribution plan. This is considered a pension curtailment in accordance with SFAS No. 88 (Employer s Accounting for Settlements and Curtailments of Defined Benefit Plans and for Termination Benefits). The Company evaluated the amendment to the defined benefit plan and concluded that there was no curtailment gain/loss in connection with this change.

One of our four U.S. collective bargaining agreements expired in September 2007. In October 2007, an agreement was reached which extended the existing collective bargaining agreement. The negotiations also resulted in a provision to close the Erie, Pennsylvania plant by December 2008 through the transfer of manufacturing equipment to other existing facilities and a ratable reduction in headcount. The plant closure has triggered a special retirement pension feature and plan curtailment.

Under the special retirement pension feature, plan participants become eligible for pension benefits at an age earlier than the normal retirement feature would allow provided that service is broken by permanent shutdown, layoff or disability. The pension benefit is increased by a special supplemental benefit payment on a monthly basis and a special one time payment at the time of retirement.

The curtailment and special termination benefits are approximately $2.9 million for the year ended December 31, 2007.

In connection with the union renegotiation, the post retirement benefit plan for employees at that location has been terminated for all eligible employees who have not retired, or given notice to retire in 2007. The Company recognized a non-cash gain associated with the curtailment of these plans in 2007 of $0.2 million.

In May 2006, the Company renegotiated its contract with the labor union at its South Beloit, IL manufacturing facility. As a result of the renegotiation, participants in the Company s pension plan cease to accrue additional benefits starting July 3, 2006. Additionally, the other post retirement benefit plan for employees at that location has been terminated for all eligible participants who had not retired, or given notice to retire in 2006, by August 1, 2006. The Company recognized a non-cash gain associated with the curtailment of these plans in 2006 of $3.8 million.

Defined Contribution Plans

At November 30, 2004, the Company established a defined contribution plan for substantially all full-time U.S.-based employees on terms that mirror those previously provided by the Predecessor. All active employees became participants of the Company s plan and all of their account balances in the Predecessor plans were transferred to the Company s plan at Inception.

Under the terms of the Company s plan, eligible employees may contribute from one to fifty percent of their compensation to the plan on a pre-tax basis. The Company makes a matching contribution equal to half of the first six percent of salary contributed by each employee and makes a unilateral contribution of three percent of all employees salary (including non-contributing employees). The Company s expense associated with the defined contribution plan was $3.4 million and $2.9 million during the years ended December 31, 2007 and 2006, respectively.

On December 31, 2006, the Company adopted the recognition and disclosure provisions of SFAS No. 158.
SFAS No. 158 required the Company to recognize the funded status (i.e., the difference between the fair value of plan assets and the projected benefit obligations) of its pension plans and postretirement benefit plan in the December 31, 2006 balance sheet, with a corresponding adjustment to accumulated other comprehensive income (loss), net of tax. The adjustment to accumulated other comprehensive income (loss) at adoption represents the net unrecognized actuarial losses, unrecognized prior service

Table of Contents

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

costs, and unrecognized transition obligation remaining from the initial adoption of SFAS No. 87 Employers Accounting for Pensions (SFAS No. 87), all of which were previously netted against the plan s funded status in the Company s statement of financial position pursuant to the provisions of SFAS No. 87. These amounts will be subsequently recognized as net periodic pension cost pursuant to the Company s historical accounting policy for amortizing such amounts. Further, actuarial gains and losses that arise in subsequent periods and are not recognized as net periodic pension cost in the same periods will be recognized as a component of other comprehensive income. Those amounts will be subsequently recognized as a component of net periodic pension cost on the same basis as the amounts recognized in accumulated other comprehensive income at adoption of SFAS No. 158.

The incremental effects of adopting the provisions of SFAS No. 158 on the Company s balance sheet at December 31, 2006 are presented in the following table. The adoption of SFAS No. 158 had no effect on the Company s consolidated statement of operations for the year ended December 31, 2006, or for any prior period presented, and it will not effect the Company s operating results in future periods. Had the Company not been required to adopt SFAS No. 158 at December 31, 2006, it would have recognized an additional minimum liability pursuant to the provisions of SFAS No. 87. The effect of recognizing the additional minimum liability is included in the table below in the column labeled Prior to Application of SFAS No. 158.

	Pension as of December 31, 2006	
	Prior to Adopting SFAS No. 158	**As Reported at December 31, 2006**

11. Long-Term Debt

Revolving Credit Agreement

The Company maintains a $30 million revolving borrowings facility with a commercial bank (the Revolving Credit Agreement) through its wholly owned subsidiary Altra Industrial Motion, Inc. (Altra Industrial). The Revolving Credit Agreement is subject to certain limitations resulting from the requirement of Altra Industrial to maintain certain levels of collateralized assets, as defined in the Revolving Credit Agreement. Altra Industrial may use up to $10.0 million of its availability under the Revolving Credit Agreement for standby letters of credit issued on its behalf, the issuance of which will reduce the amount of borrowings that would otherwise be available to Altra Industrial. Altra Industrial may re-borrow any amounts paid to reduce the amount of outstanding borrowings; however, all borrowings under the Revolving Credit Agreement must be repaid in full as of November 30, 2010.

Substantially all of Altra Industrial s assets have been pledged as collateral against outstanding borrowings under the Revolving Credit Agreement. The Revolving Credit Agreement requires Altra Industrial to maintain a minimum fixed charge coverage ratio (when availability under the line falls below $12.5 million) and imposes customary affirmative covenants and restrictions on Altra Industrial. Altra Industrial was in compliance with all requirements of the Revolving Credit Agreement at December 31, 2007.

There were no borrowings under the Revolving Credit Agreement at December 31, 2007 and 2006, however, the lender had issued $6.5 million of outstanding letters of credit on behalf of Altra Industrial as of both dates.

In April 2007, Altra Industrial amended the Revolving Credit Agreement. The interest rate on any outstanding borrowings on the line of credit was reduced to the lender s Prime Rate plus 25 basis points or LIBOR plus 175 basis points. The rate on all outstanding letters of credit was reduced to 1.5% and .25% on any unused availability under the Revolving Credit Agreement. All borrowings under the amended plan must be repaid by November 30, 2010.

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

TB Wood s Revolving Credit Agreement

As part of the TB Wood s acquisition, the Company refinanced the existing line of credit agreement with a commercial bank. The Company refinanced $13.0 million of debt associated with TB Wood s line of credit. As of December 31, 2007, there was $7.7 million of debt outstanding under the TB Wood s Credit Agreement, and $6.9 million of outstanding letters of credit.

Overdraft Agreements

Certain of our foreign subsidiaries maintain overdraft agreements with financial institutions. There were no borrowings as of December 31, 2007 or 2006 under any of the overdraft agreements.

9% Senior Secured Notes

On November 30, 2004, Altra Industrial issued 9% Senior Secured Notes (Senior Secured Notes), with a face value of $165.0 million. Interest on the Senior Secured Notes is payable semiannually, in arrears, on June 1 and December 1 of each year, beginning June 1, 2005, at an annual rate of 9%.

The Senior Secured Notes are guaranteed by Altra Industrial s U.S. domestic subsidiaries and are secured by a second priority lien, subject to first priority liens securing the Revolving Credit Agreement, on substantially all of Altra Industrial s assets. The Senior Secured Notes contain numerous terms, covenants and conditions, which impose substantial limitations on Altra Industrial. Altra Industrial was in compliance with all covenants of the indenture governing the Senior Secured Notes at December 31, 2007.

In connection with the acquisition of TB Wood s on April 5, 2007, Altra Industrial completed a follow-on offering issuing an additional $105.0 million of the Senior Secured Notes. The additional $105.0 million has the same terms and conditions as the previously issued Senior Secured Notes. The effective interest rate on the Senior Secured Notes, after the follow-on offering is approximately 9.6% after consideration of the amortization of $5.6 million net discount and $6.5 million of deferred financing costs.

11.25% Senior Notes

On February 8, 2006, Altra Industrial issued 11.25% Senior Notes (Senior Notes), with a face value of £33 million. Interest on the Senior Notes is payable semiannually, in arrears, on August 15 and February 15 of each year, beginning August 15, 2006, at an annual rate of 11.25%. The effective interest rate on the Senior Notes is approximately 12.7%, after consideration of the $0.7 million of deferred financing costs (included in other assets). The Senior Notes mature on February 13, 2013.

The Senior Notes are guaranteed on a senior unsecured basis by Altra Industrial s U.S. domestic subsidiaries. The Senior Notes contain numerous terms, covenants and conditions, which impose substantial limitations on the Company. Altra Industrial was in compliance with all covenants of the indenture governing the Senior Notes at December 31, 2007.

During 2007, the Company redeemed £29.1 million aggregate principal amount of the outstanding Senior Notes. In connection with the redemption, Altra Industrial expensed $2.0 million of deferred financing costs and incurred $7.5 million of a pre-payment premium.

The remaining principal amount of the Senior Notes matures on February 13, 2013, unless previously redeemed by Altra Industrial prior to such maturity date. As of December 31, 2007, the remaining principal balance outstanding was £3.9 million, or $7.8 million.

Subordinated Notes

At November 30, 2004, the Company executed an agreement with a stockholder to obtain $14.0 million of unsecured subordinated financing (the Subordinated Notes). The interest accrued at an annual rate of

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

17% and was payable quarterly in full or payment-in-kind (PIK). In December 2006, the remaining principal, penalty, unpaid and accrued interest balance was paid in full. All unamortized deferred financing costs associated with the Subordinated Notes was written off to interest expense in connection with the repayment of the Subordinated Notes in 2006.

Variable Rate Demand Revenue Bonds

In connection with the acquisition of TB Wood s, the Company assumed the Variable Rate Demand Revenue Bonds outstanding as of the acquisition date. TB Wood s had borrowed approximately $3.0 and $2.3 million by issuing Variable Rate Demand Revenue Bonds under the authority of the industrial development corporations of the City of San Marcos, Texas and City of Chattanooga, Tennessee, respectively. These bonds bear variable interest rates (3.57% as of December 31, 2007) and mature in April 2024 and April 2022. The bonds were issued to finance production facilities for TB Wood s manufacturing operations in those cities, and are secured by letters of credit issued under the terms of the TB Wood s Credit Agreement.

Mortgage

In June 2006, the Company entered into a mortgage on its building in Heidelberg, Germany with a local bank. As of December 31, 2007 and 2006, the mortgage has a remaining principal of 1.8 million, or $2.6 million and 2.0 million or $2.6 million, respectively and an interest rate of 5.75% and is payable in monthly installments over 15 years.

Capital Leases

The Company leases certain equipment under capital lease arrangements, whose obligations are included in both short-term and long-term debt. Capital lease obligations amounted to approximately $3.4 million and $1.5 million at December 31, 2007 and 2006, respectively. Assets under capital leases are included in property, plant and equipment with the related amortization recorded as depreciation expense.

12. Stockholders Equity

Common Stock

In December 2006, the Company completed an initial public offering. The Company offered 3,333,334 shares and selling stockholders offered 6,666,666 shares. Proceeds to the Company after the underwriting discount and issuance cost were $39.3 million. As of December 31, 2006, there are 50,000,000 shares of common stock authorized with a par value of $.001 and 21,467,502 outstanding.

In June 2007, the Company closed its secondary public offering of 12,650,000 shares of its common stock, par value $0.001 per share (the Shares), which included 1,650,000 sold as a result of the underwriters exercise of their overallotment option in full at closing. The Company received proceeds of $48.7 million, net of issuance costs. In the offering the Company sold 3,178,494 Shares and certain selling stockholders, including Genstar Capital, the Company s largest stockholder, sold an aggregate of 9,471,506 shares.

Amended and Restated Stockholders Agreement

We had entered into an agreement with our stockholders that granted certain rights to and placed certain limitations on the actions of our stockholders. These rights and restrictions generally included (i) restrictions on the right to sell or transfer our stock, (ii) the Genstar Funds rights of first refusal and drag-along rights with respect to sales of shares by other stockholders, (iii) the stockholders rights to participate in the sale of the our shares by the Genstar Fund (a co-sale right), (iv) the stockholders right of first offer with respect to additional sales of shares by us and (v) the Genstar Funds right to designate all of our directors. In addition, stockholders who were part of our management were subject to non- competition and non-solicitation

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

provisions and also granted us and the Genstar Funds the right to repurchase their shares upon their termination of employment.

Upon the completion of the Company s initial public stock offering, certain significant provisions of the stockholders agreement terminated automatically, including the rights of first refusal, drag-along rights, co-sale rights, rights of first offer, and the Genstar Funds right to designate directors. In addition, shares held by members of the Company s management no longer are subject to a repurchase right upon termination. Members of management remained subject to the non-competition and non-solicitation provisions following the offering.

Preferred Stock

On December 20, 2006, the Company amended and restated its certificate of incorporation authorizing 10,000,000 shares of undesignated Preferred Stock (Preferred stock). The Preferred stock may be issued from time to time in one or more classes or series, the shares of each class or series to have such designations and powers, preferences, and rights, and qualifications, limitations and restrictions as determined by the Company s Board of Directors. There was no Preferred stock issued or outstanding at December 31, 2007 or 2006.

Restricted Common Stock

The Company s Board of Directors established the 2004 Equity Incentive Plan (the Plan) that provides for various forms of stock based compensation to independent directors, officers and senior-level employees of the Company. The restricted shares issued pursuant to the plan generally vest ratably over each of the five years from the date of grant, provided, that the vesting of the restricted shares may accelerate upon the occurrence of certain liquidity events, if approved by the Board of Directors in connection with the transactions. Common stock awarded under the 2004 Equity Incentive Plan is generally subject to restrictions on transfer, repurchase rights, and other limitations and rights as set forth in the Stockholders Agreement and Registration Agreement.

The Plan permits the Company to grant restricted stock to key employees and other persons who make significant contributions to the success of the Company. The restrictions and vesting schedule for restricted stock granted under the Plan are determined by the Compensation Committee of the Board of Directors. Compensation expense recorded during the year ended December 31, 2007, 2006 and 2005 was $2.0 million ($1.5 million, net of tax), $1.9 million ($1.3 million, net of tax) and $0.1 million, respectively. Compensation expense is recognized on a straight-line basis over the service period.

The following table sets forth the activity of the Company s restricted stock grants to date:

	Shares	Weighted-Average Grant Date Fair Value
Restricted shares unvested December 31, 2005	1,604,833	$ 0.20
Restricted shares granted	346,756	$ 14.38
Shares for which restrictions lapsed	(331,500)	$ 0.20

Restricted shares unvested December 31, 2006	1,620,089	$	3.24
Restricted shares granted	61,652	$	16.88
Restricted shares forfeited	(78,000)	$	$0.20
Restricted shares for which restrictions lapsed	(482,877)	$	4.23
Restricted shares unvested at December 31, 2007	1,120,864	$	3.76

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

Total remaining unrecognized compensation cost is approximately $2.9 million as of December 31, 2007 and will be recognized over a weighted average remaining period of two years. The fair market value of the shares in which the restrictions have lapsed during 2007 was $6.8 million .

Prior to the initial public offering, the fair value of the Company s common stock is determined by the Company s Board of Directors (the Board) at the time of the restricted common stock grants. Prior to the initial public offering, in the absence of a public trading market for the Company s common stock, the Company s Board considers objective and subjective factors in determining the fair value of the Company s common stock and related options. Consistent with the guidance provided by the AICPA s Technical Practice Aid on *The Valuation of Privately-held- Company Equity Securities Issued as Compensation* (the TPA), such considerations included, but were not limited to, the following factors:

- Historical and expected future earnings performance
- The liquidation preferences and dividend rights of the preferred stock
- Milestones achieved by the company
- Marketplace and major competition
- Market barriers to entry
- The Company s workforce and related skills
- Customer and vendor characteristics
- Strategic relationships with suppliers
- Risk factors and uncertainties facing the Company

Subsequent to the initial public offering restricted shares granted will be valued based on the fair market value of the stock on the date of grant.

Common stock split

In December 2006, the Board of Directors of the Company approved a two-for-one reverse stock split of the Company s common stock. All financial information presented reflects the impact of the reverse split.

13. Related-Party Transactions

Joy Global Sales

One of the Company s directors is an executive of Joy Global, Inc. The Company sold approximately $5.4 million and $3.2 million in goods to divisions of Joy Global, Inc. during the year to date periods ended December 31, 2007 and

2006, respectively. Other than his position as an executive of Joy Global, Inc., the Company s director has no interest in sales transactions between the Company and Joy Global, Inc.

Management Agreement

At November 30, 2004, the Company entered into an advisory services agreement with Genstar Capital, L.P. (Genstar), whereby Genstar agreed to provide certain management, business strategy, consulting, financial advisory and acquisition related services to the Company. Pursuant to the agreement, the Company was required to pay to Genstar an annual consulting fee of $1.0 million (payable quarterly, in arrears at the end of each calendar quarter), reimbursement of out-of-pocket expenses incurred in connection with the advisory services and an advisory fee of 2.0% of the aggregate consideration relating to any acquisition or dispositions completed by the Company. The Company recorded $1.0 million and $1.0 million in management fees, included in selling, general and administrative expenses for the years ended December 31, 2006 and

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

2005, respectively. Genstar also received a one-time transaction fee of $1.0 million for the Hay Hall acquisition and such amounts are reflected in selling, general and administrative expenses for the year ended December 31, 2006. At December 31, 2005, the Company had $0.3 million recorded in accruals and other liabilities as a payable to Genstar in connection with the annual consulting fee. In December 2006, the Genstar management agreement was terminated and $3.0 million was paid to Genstar as a termination fee. There are no amounts in accruals or other liabilities payable to Genstar as of December 31, 2006.

Transition Services Agreement

In connection with the acquisition of the Predecessor operations from Colfax, the Company entered into a transition services agreement with Colfax whereby Colfax agreed to provide the Company with transitional support services. The transition services include the continued access to Colfax employee benefit plans through February 2005, the provision of certain accounting, treasury, tax and payroll services through various periods all of which ended by May 2005 and the transition of management oversight of various on-going business initiatives through May 2005. The cost of these services was less than $0.1 million.

Subordinated Notes

As discussed in Note 10, a Preferred Stockholder was the holder of the Subordinated Notes payable. In 2005, the Company recorded $2.4 million of related interest expense and disbursed $2.0 million in cash payments to the holder. In 2006, the Company recorded $2.0 million of related interest expense and disbursed $15.7 million of cash payments to the holder. During December 2006, the Company paid all amounts outstanding in full.

14. Concentrations of Credit, Business Risks and Workforce

Financial instruments, which are potentially subject to concentrations of credit risk, consist primarily of trade accounts receivable. The Company manages this risk by conducting credit evaluations of customers prior to delivery or commencement of services. When the Company enters into a sales contract, collateral is normally not required from the customer. Payments are typically due within thirty days of billing. An allowance for potential credit losses is maintained, and losses have historically been within management s expectations.

Credit related losses may occur in the event of non-performance by counterparties to financial instruments. Counterparties typically represent international or well established financial institutions.

No customer represented greater than 10% of total sales for the year ended December 31, 2007, 2006 and 2005.

The Company and its Predecessor operate in a single business segment for the development, manufacturing and sales of mechanical power transmission products. The Company s chief operating decision maker reviews consolidated operating results to make decisions about allocating resources and assessing performance for the entire Company. Net sales to third parties and property, plant and equipment by geographic region are as follows:

	Net Sales	Property, Plant and Equipment

	Year-ended December 31, 2007	Year-ended December 31, 2006	Year-ended December 31, 2005	December 31, 2007	December 31, 2006
North America (primarily U.S.)	$ 424,031	$ 332,647	$ 288,883	$ 84,850	$ 50,673
Europe	137,908	113,799	59,176	29,767	29,865
Asia and other	22,437	15,839	15,406	1,993	1,849
Total	$ 584,376	$ 462,285	$ 363,465	$ 116,610	$ 82,387

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

Net sales to third parties are attributed to the geographic regions based on the country in which the shipment originates. Amounts attributed to the geographic regions for property, plant and equipment are based on the location of the entity, which holds such assets.

The net assets of our foreign subsidiaries at December 31, 2007 and 2006 were $55.6 million and $46.8 million, respectively.

The Company has not provided specific product line sales as our general purpose financial statements do not allow us to readily determine groups of similar product sales.

Approximately 20.3% of the Company s labor force (15.5% and 32.3% in the United States and Europe, respectively) is represented by collective bargaining agreements.

15. Restructuring, Asset Impairment and Transition Expenses

During 2007, the Company adopted two restructuring programs. The first is intended to improve operational efficiency by reducing headcount, consolidating its operating facilities and relocating manufacturing to lower cost areas (Altra Plan). The second is related to the acquisition of TB Wood s and is intended to reduce duplicate staffing and consolidate facilities (TB Wood s Plan). The plan was initially formulated at the time of the TB Wood s acquisition and therefore the accrual has been recorded as part of purchase price accounting. The total restructuring charge for the year to date periods ended December 31, 2007 was $2.4 million, which is comprised of $0.2 million of non-cash asset impairment and losses on sale of assets and $2.2 million of other restructuring expenses.

The Company s total restructuring expense, by major component for the year to date period ended December 31, 2007 were as follows:

	Altra Plan	TB Wood s Plan	Total
Expenses			
Non-cash asset impairment and loss on sale of fixed asset	$ 215	$	$ 215
Other cash expenses			
Moving and relocation	1,055	267	1,322
Severance	718		718
Other	144		144
Total cash expenses	1,917	267	2,184
Total restructuring expenses	$ 2,132	$ 267	$ 2,399

The following is a reconciliation of the accrued restructuring costs between December 31, 2006 and December 31, 2007:

	Altra Plan	TB Wood s Plan	Total
Balance at December 31, 2006	$	$	$
Restructuring expense incurred	2,132	267	2,399
Accruals established as part of purchase accounting related to severance		1,741	1,741
Cash payments	(1,468)	(979)	(2,447)
Non-cash loss on disposal of fixed assets	(215)		(215)
Balance at December 31, 2007	$ 449	$ 1,029	$ 1,478

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

The Company expects to incur an additional $0.7 million of severance expense in 2008 and $0.2 million of moving and relocation expense.

16. Commitments and Contingencies

Minimum Lease Obligations

The Company leases certain offices, warehouses, manufacturing facilities, automobiles and equipment with various terms that range from a month to month basis to ten year terms and which, generally, include renewal provisions. Future minimum rent obligations under non-cancelable operating and capital leases are as follows:

Year Ending December 31:	Operating Leases	Capital Leases
2008	$ 4,452	$ 1,069
2009	3,090	894
2010	2,199	805
2011	1,600	765
2012	1,357	215
Thereafter	3,009	34
Total lease obligations	$ 15,707	3,782
Less amounts representing interest		(440)
Present value of minimum capital lease obligations		$ 3,342

Net rent expense under operating leases for the years ended December 31, 2007, 2006 and 2005 was approximately $6.8 million, $6.6 million and $4.3 million, respectively.

General Litigation

The Company is involved in various pending legal proceedings arising out of the ordinary course of business. None of these legal proceedings is expected to have a material adverse effect on the financial condition of the Company. With respect to these proceedings, management believes that it will prevail, has adequate insurance coverage or has established appropriate reserves to cover potential liabilities. Any costs that management estimates may be paid related to these proceedings or claims are accrued when the liability is considered probable and the amount can be reasonably estimated. There can be no assurance, however, as to the ultimate outcome of any of these matters, and if all or substantially all of these legal proceedings were to be determined adversely to the Company, there could be a material adverse effect on the financial condition of the Company. Colfax and other sellers have agreed to indemnify the Company for certain pre-existing matters up to agreed upon limits.

18. Subsequent Events

On February 7, 2008, the Company s Board of Directors approved the grant of 156,900 shares of restricted common stock to certain management and independent directors of the Company.

Table of Contents

Item 9. ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.***

None.

Item 9A. ***Controls and Procedures***

1. Disclosure Controls and Procedures

The term disclosure controls and procedures is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended or the Exchange Act. These rules refer to the controls and other procedures of a company that are designed to ensure that information is recorded, processed, summarized and communicated to management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding what is required to be disclosed by a company in the reports that it files under the Exchange Act. As of December 31, 2007 or the Evaluation Date, our management, under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, carried out an evaluation of the effectiveness of our disclosure controls and procedures. Based upon that evaluation, our chief executive officer and chief financial officer have concluded that, as of the Evaluation Date, our disclosure controls and procedures are effective at the reasonable assurance level.

2. Internal Control over Financial Reporting

(a) Management s Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Internal control over financial reporting is a process designed by, or under the supervision of, our chief executive officer and chief financial officer, and implemented by our Board of Directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. Internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect our transactions;

- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures are being made only in accordance with authorizations of our management and directors; and

- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management, under the supervision and with the participation of our chief executive officer and chief financial officer, has assessed the effectiveness of our internal control over financial reporting as of December 31, 2007 based on the criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Management has concluded that our internal control over

financial reporting was effective as of December 31, 2007.

The effectiveness of our internal control over financial reporting as of December 31, 2007 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report which is included in this Annual Report on Form 10-K.

Table of Contents

(b) Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of
Altra Holdings, Inc.

We have audited Altra Holdings, Inc. s internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Altra Holdings, Inc. s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management s Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Altra Holdings, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Altra Holdings, Inc. as of December 31, 2007 and 2006, and the related consolidated statements of income and comprehensive income (loss), convertible preferred stock and stockholders equity, and cash flows for each of the three years in the period ended December 31, 2007 of Altra Holdings, Inc. and our report dated March 12, 2008 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP

Boston, Massachusetts

March 12, 2008

(c) Changes in Internal Control over Financial Reporting

No changes in our internal control over financial reporting as defined in Rules 13a-15(f) and 15d 15(f) under the Exchange Act occurred during the quarter ended December 31, 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ALTRA HOLDINGS, INC. (PARENT COMPANY)

SCHEDULE I CONDENSED FINANCIAL INFORMATION OF REGISTRANT (Continued)

NOTES TO CONDENSED FINANCIAL STATEMENTS

1. Basis of Presentation

In the parent-company-only financial statements, the Company s investment in subsidiaries is stated at cost plus equity in undistributed earnings of subsidiaries since the date of acquisition. The parent-company-only financial statements should be read in conjunction with the Company s consolidated financial statements.

2. Restriction

The Company s wholly owned subsidiary, Altra Industrial Motion, Inc. (Altra Industrial), issued 9% senior secured notes in an aggregate principal amount of $270.0 million due in 2011 (the Notes). The Notes are secured on a second-priority basis, by security interests in substantially all of the Company s domestic restricted subsidiaries. The indenture governing the Notes contains covenants which restrict the Company s restricted subsidiaries. These restrictions limit or prohibit, among other things, their ability to incur additional indebtedness; repay subordinated indebtedness prior to stated maturities; pay dividends on or redeem or repurchase stock or make other distributions; make investments or acquisitions; sell certain assets or merge with or into other companies; sell stock in the Company s subsidiaries; and create liens. The net assets of the domestic restricted subsidiaries were $335.9 million and $211.4 million at December 31, 2007 and 2006, respectively.

During 2007, the Company redeemed £29.1 million aggregate principal amount of the outstanding Senior Notes. In connection with the redemption, Altra Industrial expensed $2.0 million of deferred financing costs and incurred $7.5 million of a pre-payment premium.

The remaining principal amount of the Senior Notes matures on February 13, 2013, unless previously redeemed by Altra Industrial prior to such maturity date. As of December 31, 2007, the remaining principal balance outstanding was £3.9 million, or $7.8 million.
