May 15, 2007

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2007

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-33294

Fortress Investment Group LLC
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

20-5837959
(I.R.S. Employer
Identification No.)

1345 Avenue of the Americas, New York, NY
(Address of principal executive offices)

10105
(Zip Code)

(212) 798-6100

(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☐ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐

Edgar Filing: Fortress Investment Group LLC - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the last practicable date.

Class A Shares: 94,597,646 outstanding as of May 11, 2007.

Class B Shares: 312,071,550 outstanding as of May 11, 2007.

DEFINED TERMS

As used in this Quarterly Report on Form 10-Q, unless the context otherwise requires:

“Assets Under Management,” or “AUM,” refers to the assets we manage, including capital we have the right to call from our investors pursuant to their capital commitments to various funds. Our AUM equals the sum of:

- (i) the net asset value, or “NAV,” of our private equity funds and hedge funds plus the capital that we are entitled to call from investors pursuant to the terms of their capital commitments to those funds;
- (ii) the NAV of managed accounts; and
- (iii) the market capitalization of the common stock of each of our publicly traded alternative investment vehicles, which we refer to as our “Castles”.

We earn management fees pursuant to management agreements on a basis which varies from Fortress Fund to Fortress Fund (e.g., any of “net asset value,” “capital commitments,” “invested equity” or “gross equity,” each as defined in the applicable management agreement, may form the basis for a management fee calculation). Our calculation of AUM may differ from the calculations of other asset managers and, as a result, this measure may not be comparable to similar measures presented by other asset managers. Our AUM measure includes, for instance, assets under management for which we charge either no or nominal fees, generally related to our principal investments in funds as well as investments in funds by our principals, directors and employees. Our definition of AUM is not based on any definition of assets under management contained in our operating agreement or in any of our Fortress Fund management agreements.

“Fortress,” “we,” “us,” “our,” and the “company” refer, (i) following the consummation of the reorganization and the Nomura transaction, collectively, to Fortress Investment Group LLC and its subsidiaries, including the Fortress Operating Group and all of its subsidiaries, and, (ii) prior to the consummation of the reorganization and the Nomura transaction on January 17, 2007, to the Fortress Operating Group and all of its subsidiaries, in each case not including funds that, prior to March 31, 2007, were consolidated funds, except with respect to our historical financial statements and discussion thereof unless otherwise specified. Effective March 31, 2007, all of our previously consolidated funds were deconsolidated. The financial statements contained herein represent consolidated financial statements of Fortress Investment Group LLC subsequent to the reorganization and combined financial statements of Fortress Operating Group, considered the predecessor, prior to the reorganization. See Part I, Item 1, “Financial Statements.”

“Fortress Funds” and “our funds” refers to the private investment funds and alternative asset companies that are managed by the Fortress Operating Group.

“Fortress Operating Group” refers to the combined entities, which were wholly-owned by the Principals prior to the Nomura transaction and in each of which Fortress Investment Group LLC acquired an indirect controlling interest upon completion of the Nomura transaction (described below).

“principals” refers to Peter Briger, Wesley Edens, Robert Kauffman, Randal Nardone and Michael Novogratz, collectively, who prior to the completion of our initial public offering and the Nomura transaction directly owned 100% of the Fortress Operating Group units and following completion of our initial public offering and the Nomura transaction own approximately 76.7% of the Fortress Operating Group units and all of the Class B shares, representing approximately 76.7% of the total combined voting power of all of our outstanding Class A and Class B shares.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Some of the statements under Part I, Item 2, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” Part I, Item 3, “Quantitative and Qualitative Disclosures About Market Risk,” Part II, Item 1A, “Risk Factors,” and elsewhere in this Quarterly Report on Form 10-Q may contain forward-looking statements which reflect our current views with respect to, among other things, future events and financial performance. Readers can identify these forward-looking statements by the use of forward-looking words such as “outlook,” “believes,” “expects,” “potential,” “continues,” “may,” “will,” “should,” “seeks,” “approximately,” “predicts,” “intends,” “plans,” “estimates,” or other similar words, and the negative version of those words or other comparable words. Any forward-looking statements contained in this report are based upon the historical performance of us and our subsidiaries and on our current plans, estimates and expectations. The inclusion of this forward-looking information should not be regarded as a representation by us or any other person that the future plans, estimates or expectations contemplated by us will be achieved. Such forward-looking statements are subject to various risks and uncertainties and assumptions relating to our operations, financial results, financial condition, business prospects, growth strategy and liquidity. If one or more of these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, our actual results may vary materially from those indicated in these statements. These factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included in this report. We do not undertake any obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise.

FORTRESS INVESTMENT GROUP LLC

(PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

MARCH 31, 2007

(dollars in tables in thousands, except share data)

1. ORGANIZATION AND BASIS OF PRESENTATION

Fortress Investment Group LLC (the “Registrant,” or, together with its subsidiaries, “Fortress”) is a global alternative asset management firm whose predecessor was founded in 1998. Its primary business is to sponsor the formation of, and provide investment management services for, various investment funds and companies (the “Fortress Funds”). Fortress generally makes principal investments in these funds, which typically range from less than 1% to approximately 5% of the equity of the entities.

Fortress has three principal sources of income from the Fortress Funds: management fees, related incentive returns or income, and investment income on its principal investments in the funds. The Fortress Funds fall into four primary business segments in which Fortress operates:

- 1) Private equity funds, which invest in debt and equity securities of public or privately held entities.
- 2) Liquid hedge funds, which invest in the global fixed income, commodities, currency and equity markets, and their related derivatives.
- 3) Hybrid hedge funds, which invest in undervalued, distressed and other less liquid investments.
- 4) Publicly traded alternative investment vehicles that Fortress refers to as the “Castles,” which are companies that invest in operating real estate and real estate related loans and securities (debt and equity).

The accompanying consolidated financial statements include the following:

- subsequent to Fortress’s reorganization and the inception of operations of Fortress Investment Group LLC on January 17, 2007, the accounts of Fortress Investment Group LLC and its consolidated subsidiaries, and
- prior to such reorganization and the inception of operations of Fortress Investment Group LLC, the accounts of eight affiliated entities under common control and management (“Fortress Operating Group” or the “predecessor”) and their respective consolidated subsidiaries. Each of the eight entities was owned either directly or indirectly by its members, Peter Briger, Wesley Edens, Robert Kauffman, Randal Nardone, and Michael Novogratz (the “Principals”).

Reorganization of Fortress Operating Group

Fortress Investment Group LLC was formed on November 6, 2006 for the purpose of becoming the general partner of Fortress Operating Group, completing the Nomura Transaction (described below), and effecting a public offering of shares and related transactions (the “Transactions”) in order to carry on the business of its predecessor, Fortress Operating Group, as a publicly traded entity. The Registrant completed the Nomura Transaction and commenced its operations on January 17, 2007 and completed its initial public offering on February 8, 2007. As a result of the Transactions, the Registrant acquired control of Fortress Operating Group and holds, through two intermediate holding companies (FIG Corp. and FIG Asset Co. LLC), approximately 23.3% of the Fortress Operating Group

limited partnership units and all of the general partner interests. The Principals retained the remaining 76.7% of the Fortress Operating Group limited partnership units and a 76.7% voting interest in the Registrant. All of the businesses engaged in by the Registrant continue to be conducted by Fortress Operating Group. FIG Corp. is a corporation for tax purposes. As a result, the Registrant is subject to income taxes on that portion of its income which flows through FIG Corp.

5

FORTRESS INVESTMENT GROUP LLC
(PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
MARCH 31, 2007
(dollars in tables in thousands, except share data)

In January 2007, in connection with the Nomura transaction and the initial public offering, Fortress Operating Group was reorganized from eight limited liability companies, each having individual capital accounts for each of the Principals, into four limited partnerships, each having a unitized capital structure. The Principals were issued 367,143,000 non-voting limited partner interests in each of the four limited partnerships and the Registrant, through two intermediate holding companies, was issued the non-economic general partner interest in each of them. The Principals were also issued 367,143,000 non-economic Class B shares of the Registrant, of which 55,071,450 were cancelled in the Nomura transaction (see below). The term “Fortress Operating Group unit” is used to represent one limited partner interest in each limited partnership. A Fortress Operating Group unit is not a legal interest but is the term used to refer to the aggregate of one limited partnership interest in each reorganized Fortress Operating Group entity.

As the Registrant is a newly formed company, Fortress Operating Group is considered its predecessor for accounting purposes, and its combined financial statements have become the Registrant’s historical financial statements. Also, because the Principals controlled Fortress Operating Group before the Transactions and control the Registrant after the Transactions, the Transactions have been accounted for as a reorganization of entities under common control. Accordingly, the Registrant has carried forward unchanged the value of assets and liabilities recognized in Fortress Operating Group’s combined financial statements into its consolidated financial statements. When the Registrant purchased Fortress Operating Group units, from the Principals and directly from the Fortress Operating Group partnerships, it recorded the proportion of Fortress Operating Group net assets acquired at their historical carrying value and proportionately reduced the Principals’ and others’ interests in equity of consolidated subsidiaries. The excess of the amounts paid for the purchase of Fortress Operating Group units over the historical carrying value of the proportion of net assets acquired was charged to paid-in capital and is identified in the statement of members’ and shareholders’ equity as dilution.

Following completion of the Transactions, substantially all of Fortress’s expenses (other than (i) income tax expenses of the Registrant, FIG Corp. and FIG Asset Co. LLC (Note 5), (ii) obligations incurred under the tax receivable agreement (Note 5) and (iii) payments on indebtedness incurred by the Registrant, FIG Corp. and FIG Asset Co. LLC), including substantially all expenses incurred by or attributable solely to the Registrant, such as expenses incurred in connection with the Transactions, are accounted for as expenses of Fortress Operating Group.

Edgar Filing: Fortress Investment Group LLC - Form 10-Q

The unaudited pro forma share data presented on the income statement is based on the number of Fortress Operating Group units issued to the Principals upon the reorganization of Fortress in January 2007, as if the units had been outstanding from January 1, 2006.

Nomura Transaction

On December 18, 2006, the Principals entered into a securities purchase agreement with Nomura Investment Managers U.S.A., Inc., a Delaware corporation, or Nomura (whose ultimate parent is Nomura Holdings, Inc., a Japanese corporation), pursuant to which Nomura acquired a then 15% indirect stake in Fortress Operating Group for \$888 million, all of the proceeds of which were paid to the Principals. On January 17, 2007, Nomura completed the transaction by purchasing 55,071,450 Class A shares of the Registrant for \$888 million and the Registrant, in turn, purchased 55,071,450 Fortress Operating Group units, which then represented 15% of Fortress Operating Group's economic interests, and the sole general partner interest, from the Principals for \$888 million.

(dollars in tables in thousands, except share data)

Initial Public Offering (“IPO”)

On February 8, 2007, the Registrant completed an initial public offering of 39,428,900 of its Class A shares, including the underwriters' over allotment option, for net proceeds of approximately \$652.7 million. The Registrant contributed the net proceeds from the offering to Fortress Operating Group in exchange for 39,428,900 Fortress Operating Group units. Fortress Operating Group applied those proceeds as follows: (a) to pay \$250 million outstanding under its term loan facility, as required by the credit agreement (Note 4), and (b) to pay \$85 million then outstanding under its revolving credit facility (Note 4), and intended to use the remaining proceeds (a) to fund \$169 million of commitments to existing private equity funds, and (b) to use \$149 million for general business purposes. As of March 31, 2007, \$206.2 million of IPO proceeds remain unused, of which \$67.7 million is intended for private equity capital commitments and \$138.5 million is intended for general business purposes.

Following the IPO, the Principals held, collectively, an approximately 76.7% economic interest in Fortress Operating Group as well as voting control of the Registrant, which has an approximately 23.3% economic interest in, and general partner control of, Fortress Operating Group.

Following the IPO, Fortress adopted accounting policies with respect to new transactions as described in Notes 5, 7 and 8.

Consolidation and Deconsolidation of Fortress Funds

Certain of the Fortress Funds were consolidated into Fortress prior to the Transactions, notwithstanding the fact that Fortress has only a minority economic interest in these funds. Consequently, Fortress's financial statements reflected the assets, liabilities, revenues, expenses and cash flows of the consolidated Fortress Funds on a gross basis through the date of their deconsolidation, as described below. The majority ownership interests in these funds, which are not owned by Fortress, were reflected as Principals' and others' interests in equity of consolidated subsidiaries in the accompanying financial statements during periods in which such funds were consolidated. The management fees and incentive income earned by Fortress from the consolidated Fortress Funds were eliminated in consolidation; however, Fortress's allocated share of the net income from these funds was increased by the amount of these eliminated fees. Accordingly, the consolidation of these Fortress Funds had no net effect on Fortress's earnings from the Fortress Funds. For a reconciliation between the financial statements and the segment-based financial data that management uses for making operating decisions and assessing performance, see Note 10.

Following the IPO, each Fortress subsidiary that acts as a general partner of a consolidated Fortress Fund has granted rights, effective March 31, 2007, to the investors in the fund to provide that a simple majority of the fund's unrelated investors are able to liquidate the fund, without cause, in accordance with certain procedures, or to otherwise have the ability to exert control over the fund. The granting of these rights has led to the deconsolidation of the Fortress Funds from Fortress's financial statements as of March 31, 2007. The deconsolidation of the Fortress Funds has had significant effects on many of the items within these financial statements but has had no material net effect on net income or equity. Since the deconsolidation did not occur until March 31, 2007, the income statement and the statement of cash flows for the three months ended March 31, 2007 are presented with these funds on a consolidated basis. The unaudited pro forma effects of the deconsolidation on these financial statements are described in Note 12.

7

FORTRESS INVESTMENT GROUP LLC
(PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
MARCH 31, 2007
(dollars in tables in thousands, except share data)

The accompanying consolidated financial statements and related notes of Fortress have been prepared in accordance with accounting principles generally accepted in the United States for interim financial reporting and the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, certain information and footnote disclosures normally included in financial statements prepared under U.S. generally accepted accounting principles have been condensed or omitted. In the opinion of management, all adjustments considered necessary for a fair presentation of Fortress's financial position, results of operations and cash flows have been included and are of a normal and recurring nature. The operating results presented for interim periods are not necessarily indicative of the results that may be expected for any other interim period or for the entire year. These financial statements should be read in conjunction with Fortress's combined financial statements for the year ended December 31, 2006 and notes thereto included in Fortress's annual report on Form 10-K filed with the Securities and Exchange Commission. Capitalized terms used herein, and not otherwise defined, are defined in Fortress's combined financial statements for the year ended December 31, 2006.

2. MANAGEMENT AGREEMENTS AND FORTRESS FUNDS
Management Fees, Incentive Income and Related Profit Sharing Expense

Edgar Filing: Fortress Investment Group LLC - Form 10-Q

On a pro forma basis (Note 12), as adjusted for the deconsolidation of the consolidated Fortress Funds as if it had occurred on January 1, 2007, Fortress recognized management fees and incentive income as follows:

	Three Months Ended March 31, 2007
Private Equity Funds	
Management fees	\$ 26,664
Incentive income	206,440
Liquid Hedge Funds	
Management fees	29,858
Incentive income	45,688
Hybrid Hedge Funds	
Management fees	27,997
Incentive income	95
Castles	
Management fees	11,029
Management fees – options	811
Incentive income	3,688
Total	
Management fees	\$ 96,359
Incentive income	\$ 255,911

Incentive Income Subject to Annual Performance Criteria

Incentive income from certain Fortress Funds is earned based on achieving annual performance criteria. Accordingly, this incentive income is recorded as revenue at year end (in the fourth quarter of each year) and has not been recognized for these funds during the three months ended March 31, 2007 and 2006. If the amount of incentive income contingent on achieving annual performance criteria was not contingent on the results of the subsequent quarters, \$45.6 million

8

FORTRESS INVESTMENT GROUP LLC
(PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
MARCH 31, 2007
(dollars in tables in thousands, except share data)

and \$28.6 million of additional incentive income from affiliates would have been recognized during the three months ended March 31, 2007 and 2006, respectively.

Edgar Filing: Fortress Investment Group LLC - Form 10-Q

Deferred incentive income from the Fortress Funds, subject to contingent repayment, was comprised of the following:

	March 31, 2007	December 31, 2006
Distributed – gross	\$ 391,595	\$ 252,774
Less: Recognized (A)	(165,798)	(9,473)
Distributed – unrecognized	\$ 225,797	243,301
Undistributed (B)	1,119,170	1,405,481
Total	\$ 1,344,967	\$ 1,648,782

(A) All related contingencies have been resolved.

(B) On a consolidated basis, undistributed incentive income from the Fortress Funds is recognized on the balance sheet as deferred incentive income; on a deconsolidated basis as of March 31, 2007, undistributed incentive income is no longer recorded and has been removed from the balance sheet.

As of March 31, 2007, Fortress has recognized and paid compensation expense under its employee profit sharing arrangements in connection with the \$225.8 million of distributed incentive income. If the \$1,119.2 million of undistributed incentive income were realized, Fortress would recognize and pay an additional \$400.4 million of compensation expense.

The change in deferred incentive income is summarized as follows:

	Distributed	Undistributed	Total
Deferred incentive income as of December 31, 2006	\$ 243,301	\$ 1,405,481	\$ 1,648,782
Share of income (loss) of Fortress Funds	190,298	(289,530)	(99,232)
Recognition of previously deferred incentive income	(206,440)	—	(206,440)
Other income components	(1,362)	—	(1,362)
Total income components	(17,504)	(289,530)	(307,034)
Other	—	3,219	3,219
Deferred incentive income as of March 31, 2007	\$ 225,797	\$ 1,119,170	\$ 1,344,967

Recognized profit sharing compensation expense is summarized as follows:

	Three Months Ended March 31,	
	2007	2006
Private equity funds	\$ 71,753	\$ 9,414
Liquid hedge funds	28,947	27,205
Hybrid hedge funds	19,518	13,902
Castles	2,356	2,461
Total	\$ 122,574	\$ 52,982

Principals' and Others' Interests in Consolidated Subsidiaries

This balance sheet caption was comprised of the following at March 31, 2007:

Employee interests in majority owned and controlled fund advisor and general partner entities	\$ 75,061
Principals' Fortress Operating Group units	342,137
Other	2,126
Total	\$ 419,324

This income statement caption was comprised of shares of consolidated net income related to the following, on a pre-tax basis, for the three months ended March 31, 2007:

	Actual	Pro Forma (A)
Employee interests in majority owned and controlled fund advisor and general partner entities	\$ 2,842	\$ 2,842
Third party investors in Fortress Funds	(460,615)	—
Principals' Fortress Operating Group units	(77,642)	(77,642)
Other	(115)	(115)
Total	\$ (535,530)	\$ (74,915)

(A) On a pro forma basis (Note 12), as adjusted for the deconsolidation of the consolidated Fortress Funds as if it had occurred on January 1, 2007.

Private Equity Funds

In January 2007, Fortress increased its capital commitment to one of its private equity funds by \$80 million.

In February 2007, Fortress had its first closing of a new private equity Fortress Fund, Long Dated Value Fund III ("LDVF III"), with \$201.4 million in capital commitments. A second closing was held in March 2007 resulting in total commitments of \$275.3 million. Fortress, its affiliates and employees represent \$23.0 million of the total commitments. Fortress will manage LDVF III under similar terms to the other private equity Fortress Funds.

In March 2007, \$11.6 million of Fortress's remaining capital commitment to one of its private equity funds was extinguished.

Liquid Hedge Funds and Hybrid Hedge Funds

Approximately \$378.2 million of distributions were made to the Principals during the period from January 1, 2007 through the date of the IPO from the net proceeds from collection of deferred fee receivables, earned in prior periods, related to the liquid and hybrid hedge funds. Following this distribution, all of the deferred fee arrangements were terminated. Subsequent to March 31, 2007, \$27.4 million of net proceeds from all of the remaining deferred fee receivables were collected.

10

FORTRESS INVESTMENT GROUP LLC (PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
MARCH 31, 2007
(dollars in tables in thousands, except share data)

In February 2007, one of the consolidated hybrid hedge funds raised \$1.2 billion of capital commitments from existing and new limited partners, of which 18% was called in March 2007 and 8% was called in April 2007. During the capital commitment period, which expires on the earlier of when it is fully drawn or December 31, 2008, no other new third party investors will be permitted in this fund.

In February 2007, one of the consolidated hybrid hedge funds originated a \$1.2 billion loan in connection with a transaction between two third parties. As part of the syndication of this loan, Fortress formed four managed account relationships totaling \$425 million, whereby Fortress manages investments on behalf of third parties in exchange for fees, syndicated \$300 million to a third party participant and retained the remainder in certain Fortress Funds. Fortress will earn incentive fees from the managed account relationships based upon the performance of the underlying investment.

3. INVESTMENTS IN EQUITY METHOD INVESTEEES

Investments in Equity Method Investees

Fortress holds investments in certain unconsolidated Fortress Funds which are accounted for under the equity method. Upon the deconsolidation of the consolidated Fortress Funds on March 31, 2007 (Note 1), these funds also became equity method investees. Fortress's maximum exposure to loss with respect to these entities is generally equal to its investment plus its basis in any options received from such entities as described below. In addition, unconsolidated affiliates also hold an ownership interest in certain of these entities. Summary financial information related to these investments is as follows:

Equity Held by Fortress

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
MARCH 31, 2007
(dollars in tables in thousands, except share data)

Options in Affiliates

Edgar Filing: Fortress Investment Group LLC - Form 10-Q

Fortress holds options to purchase additional shares of its equity method investees with carrying values as follows:

	March 31, 2007	December 31, 2006	Accounting Treatment
Newcastle options	\$ 2,787	\$ 2,950	Held at cost subject to impairment
Eurocastle options	134,128	136,316	Qualify as a derivative, held at fair value
	\$ 136,915	\$ 139,266	

The fair value of the Newcastle options as of March 31, 2007 was approximately \$3.4 million.

In January 2007, in connection with a capital raise, Newcastle issued 242,000 options to purchase shares of its common stock at \$31.30 per share to Fortress, which were valued at \$0.8 million. Fortress assigned 121,605 of these options to employees, recording compensation expense of \$0.4 million. In addition, during May 2004 and January 2005, Newcastle issued 675,000 options (at a weighted average strike price of \$27.63) to purchase shares of its common stock to Fortress. During March 2007, Fortress assigned 261,525 of these options to employees, recording compensation expense of \$0.5 million.

During the first quarter of 2007, Fortress assigned a total of 274,567 Eurocastle options, with a weighted average strike price of €20.18 per share, to certain of its employees. Fortress recorded compensation expense of \$1.7 million associated with the assignment of these options during the three months ended March 31, 2007.

Investments in Variable Interest Entities

As part of the deconsolidation of the consolidated Fortress Funds (Note 1), Fortress caused reconsideration events to occur in each of the variable interest entities in which it was deemed to be the primary beneficiary. As a result of these reconsideration events, Fortress is no longer considered the primary beneficiary of, and therefore does not consolidate, any of the variable interest entities in which it holds an interest. No other reconsideration events occurred during the three months ended March 31, 2007 which caused a change in Fortress's accounting.

The following table represents information as of March 31, 2007 regarding entities formed during the three months ended March 31, 2007 that were determined to be VIEs in which Fortress holds a variable interest:

Business Segment	Fortress is not Primary Beneficiary Gross Assets	Fortress Investment (A)
Liquid Hedge Funds	\$ 5,634,230	\$ 33,397

(A) Includes \$32.9 million of incentive income receivable. Also represents Fortress's maximum exposure to loss with respect to these entities.

(dollars in tables in thousands, except share data)

4. DEBT AND DERIVATIVE OBLIGATIONS

The following table presents summarized information regarding Fortress's debt obligations:

Debt Obligation/Collateral	Month Issued	Face Amount and Carrying Value		Contractual Interest Rate	Final Stated Maturity	Weighted Average Funding Cost (A)
		March 31, 2007	December 31, 2006			
Credit agreement						
Revolving debt (B)	Jun 2006	\$ —	\$ 85,000	LIBOR + 1.50% (C)	Jun 2011	0.00%
Term loan	Jun 2006	350,000	600,000	LIBOR + 1.50%	Jun 2011	6.89%
Aircraft loan	Jun 2002	2,153	2,153	LIBOR + 2.25%	Jul 2007	7.13%
Total		\$352,153	687,153			6.89%
Consolidated Fortress Fund debt			2,619,456			
Total			\$3,306,609			

(A) Including the effect of the applicable hedge in the case of the aircraft loan.

(B) Approximately \$150 million was undrawn on the Credit Agreement as of March 31, 2007.

(C) Subject to unused commitment fees of 0.25% and letter of credit fees of 1.50% per annum.

(D) Collateralized by substantially all of Fortress Operating Group's assets as well as Fortress Operating Group's rights to fees from the Fortress Funds and its equity interests therein.

In connection with the repayment of the prior credit facility, deferred loan costs of \$3.1 million were written off to interest expense in June 2006. In connection with the repayment of a portion of the term loan, \$2.0 million of deferred loan costs were written off to interest expense in February 2007.

Management believes that for similar financial instruments with comparable credit risks, the stated interest rates of Fortress's debt as of March 31, 2007 approximate market rates. Accordingly, the carrying values outstanding are believed to approximate fair value.

5. INCOME TAXES AND TAX RELATED PAYMENTS

Prior to January 17, 2007, Fortress, as a partnership, generally had not been subject to U.S. federal income tax but certain of its subsidiaries had been subject to the New York City unincorporated business tax ("UBT") on its U.S. earnings based on a statutory rate of 4%. One subsidiary of Fortress was subject to U.S. federal corporate income taxes. Certain subsidiaries of Fortress are subject to income tax of the foreign countries in which they conduct business. In connection with the Nomura transaction and the initial public offering (Note 1), Fortress was reorganized. Fortress was established as a publicly traded partnership and also established a wholly owned corporate subsidiary. Accordingly, a substantial portion of Fortress's income earned by the corporate subsidiary is subject to U.S. federal income taxation and taxed at prevailing rates. The remainder of Fortress's income is allocated directly to its shareholders and is not subject to a corporate level of taxation.

The Nomura transaction involved Fortress's purchase of Fortress Operating Group units from the Principals and an election by certain Fortress Operating Group entities under Section 754 of the Code, resulting in the tax basis of the assets owned by Fortress Operating Group to increase. Fortress established a deferred tax asset of \$454.8 million for the expected tax benefit associated with the difference between the book value of net assets and the tax basis of net

Edgar Filing: Fortress Investment Group LLC - Form 10-Q

assets, based on an estimated combined marginal federal and state tax rate of approximately 39.4 % and the expectation, based on an analysis of expected future earnings, that it is more likely than not that this benefit will be realized. The establishment of the deferred tax asset increased additional paid in capital as the transaction giving rise to the increase in tax basis was between Fortress and its shareholders. The deferred tax asset described above reflects the tax impact of payments expected to be made under the tax receivable agreement (described below), which further increase Fortress's deferred tax benefits and the estimated payments due under the tax receivable agreement.

As a result of the contribution of \$578.3 million of the net proceeds of the initial public offering by FIG Corp. to the capital of Fortress Operating Group, a temporary difference arose between the carrying value of Fortress Operating Group for financial reporting purposes and that for income tax purposes. A gross deferred tax asset of \$24.6 million has been recorded to reflect the deferred tax effects of the tax basis over financial reporting basis.

The tax effects of temporary differences have resulted in deferred income tax assets and liabilities as follows:

	March 31, 2007	December 31, 2006
Deferred tax assets	\$ 477,568	\$ 2,808
Deferred tax liabilities (A)	\$ 11,303	\$ 12,989

(A) Included in Other Liabilities.

For the period January 17, 2007, the reorganization date, through March 31, 2007, an estimated annual (January 17, 2007 through December 31, 2007) negative effective tax rate of (24.31%) was used to compute the tax provision on the Registrant's income subject to U.S. federal income taxes. Fortress incurred a loss before income taxes for financial reporting purposes, after deducting the compensation expense arising from the Principals' forfeiture agreement (Note 7).

18

FORTRESS INVESTMENT GROUP LLC
(PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

MARCH 31, 2007

(dollars in tables in thousands, except share data)

However, this compensation expense is not deductible for income tax purposes and therefore Fortress's taxable loss is substantially less than the loss before income taxes for financial reporting purposes. Also, after the reorganization, a portion of Fortress's income is still not subject to U.S. federal corporate income tax but is allocated directly to Fortress's shareholders.

The actual effective tax rate for the entire quarter is significantly different than the effective tax rate above primarily because (i) all of the income earned by the predecessor prior to January 17, 2007 was earned through partnerships and

only subject to the New York City UBT; and (ii) sufficient income was earned by the predecessor prior to January 17, 2007 such that there was income for the quarter as compared to a loss incurred by the Registrant for the period from January 17, 2007 through March 31, 2007.

As a result of the foregoing, Fortress's effective tax rate for GAAP reporting purposes may be subject to significant variation from period to period.

Tax Receivable Agreement

The Principals have the right to exchange each of their Fortress Operating Group units for one of the Class A shares. The Fortress Operating Group entities intend to make an election under Section 754 of the Internal Revenue Code, as amended, which may result in an adjustment to the tax basis of the assets owned by Fortress Operating Group at the time of an exchange. The exchanges may result in increases in tax deductions and tax basis that would reduce the amount of tax that the corporate taxpayers (i.e. FIG Corp.) would otherwise be required to pay in the future. Additionally, the further acquisition of Fortress Operating Group units from the Principals, such as in the Nomura transaction (Note 1), also may result in increases in tax deductions and tax basis that would reduce the amount of tax that the corporate taxpayers would otherwise be required to pay in the future. The corporate taxpayers entered into a tax receivable agreement with each of the Principals that provides for the payment to an exchanging or selling Principal of 85% of the amount of cash savings, if any, in U.S. federal, state, local and foreign income tax that the corporate taxpayers actually realize (or are deemed to realize in the case of an early termination payment by the corporate taxpayers or a change of control, as defined) as a result of these increases in tax basis. Such payments are expected to occur over approximately the next 15 years. In connection with the Nomura transaction and related tax effects, a \$390 million capital decrease and offsetting liability to the Principals was recorded with respect to the tax receivable agreement. Such amount is a component of the deferred tax effects reflected in the Statement of Members' and Shareholders' Equity. No further liability was recorded during the period ended March 31, 2007, nor were any payments made during that period. Although the tax receivable agreement payments are calculated based on annual tax savings, for the period ended March 31, 2007 the payments which would have been made pursuant to the tax receivable agreement, if such period was calculated by itself, were \$3.8 million.

Recently Adopted Accounting Pronouncement

We adopted the Financial Accounting Standards Board's Interpretation No. 48, "Accounting for Uncertainty in Income Taxes, an interpretation of SFAS No. 109" ("FIN 48"), effective January 1, 2007. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in financial statements and requires the impact of a tax position to be recognized in the financial statements if that position is more likely than not of being sustained by the taxing authority. The adoption of FIN 48 did not have a material effect on our consolidated financial position, liquidity or results of operations.

In February 2007, Fortress entered into a preliminary agreement with two employees who were departing from Fortress to form their own investment management company. Fortress received a minority ownership interest in their management company, and, as part of the transaction, a Fortress Fund received certain rights to invest at discounted fee rates in the fund being formed by the departing employees, and committed to invest \$200 million in that fund subject to certain conditions. The transaction was approved by the advisory board of the Fortress Fund.

In March 2007, a departing Fortress employee entered into a sourcing agreement with a Fortress Fund pursuant to which the Fortress Fund agreed to make contingent payments to the former employee based on the employee sourcing future transactions for that Fortress Fund.

In March 2007, one of the Portfolio Companies leased office space to a company owned by one of the Principals. The Principal pays approximately \$0.2 million per annum in rent to the Portfolio Company.

In March 2007, in conjunction with the deconsolidation (Note 1), Fortress transferred its general partner interests in certain CDO Portfolio Companies to certain Fortress Funds for \$6.5 million.

In connection with the IPO, Fortress entered into a tax receivable agreement with the Principals, as described in Note 5, and the Principals entered into a forfeiture agreement with each other, as described in Note 7. The Principals, employees, directors and Fortress Funds have and continue to make investments in Fortress Funds.

7. EQUITY-BASED COMPENSATION

Fortress currently has seven categories of equity-based compensation which are accounted for as described in the table below. A total of 115,000,000 Class A shares have been authorized for issuance under Fortress's equity-based compensation plan. RSUs are Class A restricted share units which entitle the holder to receive Class A shares on various future dates if the applicable service conditions, if any, are met. LTIP means long-term incentive plan.

Granted To	Type of Award	Service Conditions (A)	Entitled to Dividends (B)	Accounting	March 31, 2007 Shares/Units Outstanding	Weighted Average Grant Date Estimated Value per Share/Unit	Weighted Average March 31, 2007 Estimated Value per Share/Unit

	RSUs	Yes	No	Fair value at grant date (D) discounted for the non-entitlement to dividends, expensed over service period.	16,237,828	14.64	N/A
	RSUs	No	Yes	Fair value at grant date (D) discounted for post-vesting restrictions (delivery of shares as described in (B)), expensed at grant date.	394,286	22.11	N/A
	RSUs LTIP (C)	No Yes (C)	No (C)	Fair value at grant date (D) discounted for the non-entitlement to dividends and further discounted for post-vesting restrictions (delivery of shares as described in (B)), expensed at grant date.	642,313 2,857,143	11.50 7.24	N/A \$22.43

				Fair value at grant date, based on a valuation model, expensed over service period. Subsequent changes in fair value, through the vesting date, expensed over remaining service period with a cumulative catch-up adjustment in the period of change.			
Directors	Restricted Shares	Yes	Yes	Fair value at grant date (D) expensed over service period.	97,296	18.50	N/A
Employees of our Private Equity Funds	RSUs	Yes	No	Fair value at grant date (D) discounted for the non-entitlement to dividends, expensed over service period. Subsequent changes in fair value, through the vesting date, expensed over remaining service period with a cumulative catch-up adjustment in the period of change.	8,288,563	14.54	23.72

(A) Generally, such awards vest 25% at each of January 1, 2010, 2011, 2012, and 2013 (for employees) and 33-1/3% after each of our annual meetings in 2008, 2009 and 2010 (for directors). Certain employees (primarily those hired after the IPO) have different vesting schedules.

21

FORTRESS INVESTMENT GROUP LLC
(PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
MARCH 31, 2007
(dollars in tables in thousands, except share data)

(B) Vested Class A shares will be delivered to employee grant recipients 25% at each of, or within no more than six months after, January 1, 2010, 2011, 2012, and 2013 (for employees). Director restricted shares were delivered effective on the grant date. Certain awards entitle the recipient to receive dividend equivalent payments prior to such delivery dates.

(C) Represents a profits interest in respect of certain Fortress Operating Group units that have a

maximum value that corresponds to 2.9 million Fortress Operating Group units, granted by one of the Principals to one of Fortress's employees at the date of the IPO. The profits interests have a five-year cliff-vesting service condition.

(D) For awards granted in connection with the IPO, the fair value is based on the IPO price. For awards granted subsequent to the IPO, the fair value is based on the closing price on the grant date of Fortress's Class A shares.

The aggregate fair value of each of the RSU grants which are subject to service conditions is reduced by an estimated forfeiture factor (that is, the estimated amount of awards which will be forfeited prior to vesting). The estimated forfeiture factor is based upon historic turnover rates within Fortress, adjusted for the expected effects of the grants on turnover and other factors in the best judgment of management. The estimated forfeiture factor is updated at each reporting date. The estimated forfeiture factor as of the grant date and as of March 31, 2007 was 16% for unvested RSU awards that are entitled to dividends and 19% for unvested RSU awards that are not entitled to dividends.

The discount related to RSUs which do not entitle the recipients to dividend equivalents prior to the delivery of Class A shares was based on the estimated present value of dividends to be paid during the vesting period, which in turn was based on an estimated initial dividend rate (3.68%), an estimated dividend growth rate (20%) and a risk-free discount rate (between 4.71% and 5.14% based on term).

The discount related to RSUs with no service conditions which are subject to the delayed delivery of Class A shares, which occurs in periods subsequent to the grant date, was based on the estimated value of a put option on such shares over the delayed delivery period since essentially this would be the value of owning, and being able to trade, those shares during the delayed delivery period rather than having to wait for delivery. This estimated value was in turn derived from a binomial option pricing model based on the following assumptions: volatility (35%), term (equal to delayed delivery period), dividend rate (between 2.96% and 3.68% based on grant date) and risk-free discount rate (between 4.54% and 4.79% based on term).

The estimated fair value of the LTIP award was estimated using a Monte Carlo simulation valuation model with the following assumptions: volatility (35%), term (equal to vesting period), and risk-free discount rate (4.49%) of like term.

Each of these elements, particularly the forfeiture factor and the volatility assumptions used in valuing certain awards, are subject to significant judgment and variability and the impact of changes in such elements on equity-based compensation expense could be material. The volatility assumption was estimated based on five-year historical stock price volatilities observed for a group of comparable companies, adjusted for management's expectations.

22

FORTRESS INVESTMENT GROUP LLC
(PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
MARCH 31, 2007
(dollars in tables in thousands, except share data)

Edgar Filing: Fortress Investment Group LLC - Form 10-Q

The following table sets forth information regarding equity-based compensation activities during the three months ended March 31, 2007.

	RSUs		Restricted	LTIP	Total
	Employees	Non-Employees	Shares		Equity-Based Compensation Expense
Issued at IPO (A)	42,375,371	8,358,011	97,296		
Issued subsequent to IPO	164,058	—	—		
Forfeited	(1,534,694)	(69,448)	—		
Outstanding at March 31, 2007 (A)	41,004,735	8,288,563	97,296		
Expense incurred during the period	\$ 29,482	\$ 3,814	\$ 84	\$ 1,825	\$ 35,205

(A) Excludes 21,816 RSUs approved for issuance to employees whose employment began after March 31, 2007.

Fortress will further recognize compensation expense on its non-vested equity-based awards of \$944.4 million, with a weighted average recognition period of 5.75 years.

The Principals entered into an agreement among themselves (the “Principals Agreement”) which provides that, in the event a Principal voluntarily terminates his employment with Fortress Operating Group for any reason prior to the fifth anniversary of the IPO, a portion of the equity interests held by that Principal as of the completion of the IPO will be forfeited to the Principals who are employed by Fortress Operating Group generally as of the date that is six months after the date of such termination of employment. As a result of the service requirement, the fair value of Fortress Operating Group units subject to the risk of forfeiture of \$4,755 million will be charged to compensation expense on a straight-line basis over the five year service period, including \$138.3 million during the three months ended March 31, 2007.

When Fortress records equity-based compensation expense, including that related to the Principals Agreement, it records a corresponding increase in capital. Of the total increase in capital during the three months ended March 31, 2007 from equity-based compensation arrangements of \$173.5 million, \$40.3 million increased Fortress’s paid-in capital, as reflected in the Statement of Members’ and Shareholders’ Equity, and \$133.2 million increased Principals’ interests in equity of consolidated subsidiaries corresponding to the Principals’ interest in the equity-based compensation expense.

8. EARNINGS PER SHARE

As a result of Fortress’s reorganization in January 2007 (Note 1), Fortress has calculated its earnings per share for two different periods within the three months ended March 31, 2007. For the first period, prior to the reorganization on January 17, 2007, the calculation is based on the income and outstanding units of Fortress Operating Group, which was owned by the Principals as described in Note 1, as if such units had been outstanding from the beginning of the period. For the second period, subsequent to the reorganization and commencement of operations of the Registrant, the calculation is based on the consolidated income of Fortress from January 17, 2007 through March 31, 2007 and the Class A shares outstanding for such period.

FORTRESS INVESTMENT GROUP LLC

(PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

MARCH 31, 2007

(dollars in tables in thousands, except share data)

The computations of net income per Fortress Operating Group unit are set forth below:

	January 1 through January 16, 2007	
	Basic	Diluted
Weighted average units outstanding		
Fortress Operating Group units outstanding	367,143,000	367,143,000
Total weighted average units outstanding	367,143,000	367,143,000
Net income per unit is calculated as follows:		
Net income	\$ 133,397	\$ 133,397
Dilution in earnings of certain equity method investees	—	—
Net income available to Fortress Operating Group unitholders	\$ 133,397	\$ 133,397
Weighted average units outstanding	367,143,000	367,143,000
Net income per unit	\$ 0.36	\$ 0.36

The computations of basic and diluted net income (loss) per Class A share are set forth below:

	January 17 through March 31, 2007	
	Basic	Diluted
Weighted average shares outstanding		
Class A shares outstanding	82,245,422	82,245,422
Fully vested restricted Class A share units with dividend equivalent rights	10,656	10,656
Fortress Operating Group units exchangeable into Fortress Investment Group LLC		
Class A shares (1)	—	—
Class A restricted shares and Class A restricted share units granted to employees and directors (eligible for dividend and dividend equivalent payments) (2)	—	—
Class A restricted share units granted to employees (not eligible for dividend and dividend equivalent payments) (3)	—	—
Total weighted average shares outstanding	82,256,078	82,256,078

FORTRESS INVESTMENT GROUP LLC

(PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

MARCH 31, 2007

(dollars in tables in thousands, except share data)

	January 17 through March 31, 2007	
	Basic	Diluted
Basic and diluted net income (loss) per Class A share		
Net income (loss)	\$ (71,254)	\$ (71,254)
Dividend equivalents declared on non-vested restricted Class A share units	(569)	(569)
Dilution in earnings of certain equity method investees	—	—
Add back Principals' and others' interests in loss of Fortress Operating Group, net of assumed corporate income tax at enacted rates, attributable to Fortress Operating Group units exchangeable into Fortress Investment Group LLC Class A shares (1)	—	—
Net income (loss) available to Class A shareholders	\$ (71,823)	\$ (71,823)
Weighted average shares outstanding	82,256,078	82,256,078
Basic and diluted net income (loss) per Class A share	\$ (0.87)	\$ (0.87)

(1) The Fortress Operating Group units not held by Fortress (that is, those held by the Principals) are exchangeable into Class A shares on a one-to-one basis. These units are not included in the computation of basic earnings per share. These units enter into the computation of diluted net income (loss) per Class A share when the effect is dilutive using the if-converted method. Under the if-converted method the Principals' and others' interests in income (loss) of Fortress Operating Group attributable to the units, net of assumed corporate income tax, is added to the net loss in the numerator of the computation and the Class A shares available from the assumed conversion of the Fortress Operating Group units, as if it had occurred at the beginning of the period, is added to the denominator. Accordingly, the effect of the units may be dilutive when Fortress's effective income tax rate is less than the effective income tax rate that would be applicable to Fortress Operating Group if it were a corporate taxable entity. For this period, the effect of including the units would have been antidilutive. The weighted average number of Fortress Operating Group units outstanding for the period from January 17, 2007 through March 31, 2007 was 312,071,550 units.

(2) Restricted Class A shares granted to directors and certain restricted Class A share units granted to employees are eligible to receive dividend or dividend equivalent payments when dividends are

declared and paid on our Class A shares and therefore participate fully in the results of our operations from the date they are granted. They are included in the

25

FORTRESS INVESTMENT GROUP LLC

(PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

MARCH 31, 2007

(dollars in tables in thousands, except share data)

computation of both basic and diluted pro forma earnings per Class A share using the two-class method for participating securities, except during periods of net losses in accordance with EITF 03-6, “Participating Securities and the Two-Class Method under FASB Statement No. 128.” The weighted average restricted Class A shares and share units eligible to receive dividend or dividend equivalent payments outstanding for the period from January 17, 2007 through March 31, 2007 were 67,055 shares and 16,688,147 share units.

(3) Certain restricted Class A share units granted to employees are not entitled to dividend or dividend equivalent payments until they are vested and are therefore non-participating securities. These units are not included in the computation of basic earnings per share. They are included in the computation of diluted earnings per share when the effect is dilutive using the treasury stock method. As a result of the net loss incurred for the period, the effect of the units on the calculation is anti-dilutive for the period. The weighted average restricted Class A share units which are not entitled to receive dividend or dividend equivalent payments outstanding for the period from January 17, 2007 through March 31, 2007 was 17,394,787 share units.

The Class B shares have no net income (loss) per share as they do not participate in Fortress’s earnings (losses) or distributions. The Class B shares have no dividend or liquidation rights. Each Class B share, along with one Fortress Operating Group unit, can be exchanged for one Class A share, subject to certain limitations. The Class B shares have voting rights on a pari passu basis with the Class A shares. The number of Class B shares outstanding did not change subsequent to the IPO.

During the period from January 1 through March 31, 2007, Fortress’s dividend paying shares and units were as follows:

	Weighted Average	Period End
Class A shares	67,624,013	94,500,350
Restricted Class A share units (A)	8,762	394,286
Restricted Class A shares	55,134	97,296
Restricted Class A share units	13,721,365	23,730,308
Fortress Operating Group units	321,862,030	312,071,550
Total	403,271,304	430,793,790

(A) Represents fully vested restricted Class A share units which are entitled to dividend equivalent payments.

9. COMMITMENTS AND CONTINGENCIES

Indemnifications — In the normal course of business, Fortress and its subsidiaries enter into operating contracts that contain a variety of representations and warranties and that provide general indemnifications. In addition, subsidiaries of Fortress that act as general partners (or in similar capacities) of Fortress Funds enter into guarantees of certain obligations of such funds in the case of fraud by Fortress employees or under similar circumstances. Fortress's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against Fortress that have not yet occurred. However, based on experience, Fortress expects the risk of material loss to be remote.

26

FORTRESS INVESTMENT GROUP LLC

(PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

MARCH 31, 2007

(dollars in tables in thousands, except share data)

Debt Covenants — Fortress's debt obligations contain various customary loan covenants. These covenants do not, in management's opinion, materially restrict Fortress's investment or financing strategy at this time. Fortress was in compliance with all of its loan covenants as of March 31, 2007.

Litigation — Fortress is, from time to time, a defendant in legal actions from transactions conducted in the ordinary course of business. Management, after consultation with legal counsel, believes the ultimate liability arising from such actions that existed as of March 31, 2007, if any, will not materially affect Fortress's results of operations, liquidity or financial position.

On September 15, 2005, a lawsuit captioned David T. Atkins et al. v. Apollo Real Estate Advisors, L.P. et al. was brought on behalf of current and former limited partners in certain investing partnerships related to the sale of certain facilities to Ventas Realty Limited Partnership ("Ventas") against a number of defendants, including one of the Portfolio Companies and a subsidiary of Fortress ("FIG"). FIG was the investment manager of consolidated Fortress Funds that were controlling shareholders of the Portfolio Company during the relevant time periods. The suit alleges that the defendants improperly obtained certain rights with respect to such facilities from the investing partnerships. The plaintiffs have asked for damages in excess of \$100 million on each of nine counts, as to which FIG is a defendant on seven counts, including treble damages with respect to certain counts. Fortress has filed an action to have itself removed as a named defendant in this case. The Portfolio Company has filed a motion to dismiss the claims and continues to vigorously defend this action. Fortress believes that the resolution of this action will not have a material adverse effect on its financial condition, liquidity or results of operations.

In addition, in the ordinary course of business, the Fortress Funds are and can be both the defendant and the plaintiff in numerous actions with respect to bankruptcy, insolvency and other types of proceedings. Such lawsuits may involve claims that adversely affect the value of certain financial instruments owned by the Fortress Funds. Although

Edgar Filing: Fortress Investment Group LLC - Form 10-Q

the ultimate outcome of actions cannot be ascertained with certainty, Fortress believes that the resolution of any such actions will not have a material adverse effect on its financial condition, liquidity or results of operations.

Private Equity Fund and Other Capital Commitments — Fortress has remaining capital commitments to certain of the Fortress Funds which aggregated \$81.2 million at March 31, 2007. These commitments can be drawn by the funds on demand. In addition, Fortress had committed \$11.3 million as of March 31, 2007 to one pending investment.

Incentive Income Contingent Repayment — Incentive income received from certain Fortress Funds, primarily private equity funds, is subject to contingent repayment and is therefore recorded as deferred incentive income, a liability, until all related contingencies have been resolved. The Principals guaranteed the contingent repayments to certain funds and Fortress has indemnified the Principals for any payments to be made under such guarantees. Furthermore, one of the private equity funds (NIH) is entitled to 50% of the incentive income from another private equity fund (Fund I). Fortress is contingently liable under a guarantee for any contingent repayment of incentive income from Fund I to NIH. Fortress expects the risk of loss on each of these indemnifications and guarantees to be remote.

Minimum Future Rentals — Fortress is a lessee under operating leases for office space located in New York, Dallas, San Diego, Los Angeles, San Francisco, Atlanta, Toronto, Geneva, Sydney, Hong Kong, Tokyo, Frankfurt, Munich and London.

27

Rent expense recognized on a straight-line basis during the three months ended March 31, 2007 and 2006 was \$3.6 million and \$2.1 million, respectively, and was included in General, Administrative and Other Expense.

10. SEGMENT REPORTING

Fortress conducts its management and investment business through the following four primary segments: (i) private equity funds, (ii) liquid hedge funds, (iii) hybrid hedge funds, and (iv) Castles. These segments are differentiated based on their varying investment strategies.

The amounts not allocated to a segment consist primarily of interest income earned on short term investments, certain general and administrative expenses and all interest expense incurred with respect to corporate borrowings.

Management makes operating decisions and assesses performance with regard to each of Fortress's primary segments based on financial data that is presented without the consolidation of any Fortress Funds. Accordingly, segment data for these segments is reflected on an unconsolidated basis, even for periods prior to the deconsolidation (Note 1). Management also assesses Fortress's segments on a Fortress Operating Group and pre-tax basis and therefore adds

28

FORTRESS INVESTMENT GROUP LLC
(PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
MARCH 31, 2007
(dollars in tables in thousands, except share data)

back the interests in consolidated subsidiaries related to Fortress Operating Group units (held by the Principals) and income tax expense.

Management assesses the net performance of each segment based on its "distributable earnings." Distributable earnings is not a measure of cash generated by operations which is available for distribution. Rather, distributable earnings is a

supplemental measure of the value created during any period which management uses in its determination of its periodic distributions to its dividend paying share and unit holders (Note 8). Distributable earnings should not be considered as an alternative to cash flow, in accordance with GAAP, as a measure of Fortress's liquidity, and is not necessarily indicative of cash available to fund cash needs (including distributions).

"Distributable earnings" for the existing Fortress businesses is equal to net income adjusted as follows:

Incentive Income

- (i) a. for Fortress Funds which are private equity funds, adding (a) incentive income paid (or declared as a distribution) to Fortress, less an applicable reserve for potential future clawbacks if the likelihood of a clawback is deemed greater than remote (net of the reversal of any prior such reserves that are no longer deemed necessary), minus (b) incentive income recorded in accordance with GAAP,
- b. for other Fortress Funds, at interim periods, adding (a) incentive income on an accrual basis as if the incentive income from these funds were payable on a quarterly basis, minus (b) incentive income recorded in accordance with GAAP,

Other Income

- (ii) with respect to income from certain principal investments and certain other interests that cannot be readily transferred or redeemed:
 - a. for equity method investments in the Castles and private equity funds as well as indirect equity method investments in hedge fund special investment accounts (which generally have investment profiles similar to private equity funds), treating these investments as cost basis investments by adding (a) realizations of income, primarily dividends, from these funds, minus (b) impairment with respect to these funds, if necessary, minus (c) equity method earnings (or losses) recorded in accordance with GAAP,
 - b. subtracting gains (or adding losses) on stock options held in the Castles,
 - c. subtracting unrealized gains (or adding unrealized losses) from consolidated private equity funds,
- (iii) adding (a) proceeds from the sale of shares received pursuant to the exercise of stock options in certain of the Castles, in excess of their strike price, minus (b) management fee income recorded in accordance with GAAP in connection with the receipt of these options,

Expenses

- (iv) adding or subtracting, as necessary, the employee profit sharing in incentive income described in (i) above to match the timing of the expense with the revenue,
- (v) adding back equity-based compensation expense (including Castle options assigned to employees, RSUs (including the portion of related dividend equivalents recorded as compensation expense), restricted shares and the LTIP),

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

MARCH 31, 2007

(dollars in tables in thousands, except share data)

-
- (vi) adding back compensation expense recorded in connection with the forfeiture arrangements entered into among the principals (Note 7),
 - (vii) adding the income (or subtracting the loss) allocable to the interests in consolidated subsidiaries attributable to Fortress Operating Group units, and
 - (viii) adding back income tax expense and any expense recorded in connection with the tax receivable agreement (Note 5).

Management believes only the incentive income related to realized fund income should be considered available for distribution, subject to a possible reserve, determined on a fund by fund basis, as necessary, for potential future clawbacks deemed to have more than a remote likelihood of occurring. As such, distributable earnings generally includes incentive income to the extent it relates to paid or declared distributions from Fortress Funds' investments that have been monetized through sale or financing.

The computation of the clawback reserve, if any, takes into account, among other factors, the amount of unrealized incentive income within a given fund since, on an overall fund basis, this unrealized incentive income would have to suffer a complete loss before the realized portion becomes subject to contingent repayment. This type of incentive income is not recorded as revenue for GAAP purposes, under the revenue recognition method Fortress has selected, until the possibility of a clawback is resolved. This GAAP method is not completely reflective of value created during the period which is available for distribution as it disregards the likelihood that any contingent repayment will in fact occur.

Distributable earnings is limited in its usefulness in measuring earnings because it recognizes as revenues amounts which are subject to contingent repayment, it ignores significant unrealized gains and it does not fully reflect the economic costs to Fortress by ignoring certain equity-based compensation expenses. Management utilizes distributable earnings as well as net income in its analysis of the overall performance of Fortress and notes that the two measures are each useful for different purposes.

Total segment assets after consolidation are equal to total GAAP assets adjusted for:

- (i) the difference between the GAAP carrying amount of equity method investments and their carrying amount for segment reporting purposes, which is generally fair value for publicly traded investments and cost for nonpublic investments,
- (ii) employee portions of investments, which are reported gross for GAAP purposes (as assets offset by Principals' and others' interests in equity of consolidated subsidiaries) but net for segment reporting purposes, and
- (iii) the difference between the GAAP carrying amount for options owned in certain of the Castles and their carrying amount for segment reporting purposes, which is intrinsic value.

Summary financial data on Fortress's segments is presented on the following pages, together with a reconciliation to revenues, assets and net income for Fortress as a whole. Fortress's investments in, and earnings from, its equity method investees by segment are presented in Note 3.

FORTRESS INVESTMENT GROUP LLC

(PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

MARCH 31, 2007

(dollars in tables in thousands, except share data)

Fortress's depreciation expense by segment is as follows:

Three Months Ended March 31,	Private Equity Funds	Liquid Hedge Funds	Hybrid Hedge Funds	Castles	Unallocated	Total
2007	\$ 239	\$ 580	\$ 576	\$ 214	\$ 400	\$ 2,009
2006	\$ 164	\$ 422	\$ 506	\$ 159	\$ 315	\$ 1,566

Note that distributable earnings for the periods presented includes earnings (losses) on deferred fee arrangements (Note 3), net of any employee share, as presented in the table below. A substantial majority of these deferred fees have been collected and the remainder will be collected later in 2007. The deferred fee arrangements were terminated in 2007 (Note 2) and therefore these earnings (losses) are not reflective of ongoing operations and will not contribute to distributable earnings subsequent to the termination date.

11. SUBSEQUENT EVENTS

In April 2007, in connection with a capital raise, Newcastle issued 456,000 options to purchase shares of its common stock at \$27.75 per share to Fortress, which were valued at \$1.2 million. The Principals in their personal capacities purchased approximately \$60 million in the aggregate of the shares sold in this offering directly from the underwriter at the public offering price.

On May 10, 2007, Fortress entered into a new \$1 billion credit agreement (the “2007 Credit Agreement”) in order to refinance its existing credit agreement (Note 4), reduce the amount of interest and other fees payable under its credit facilities and increase the amount of funds available for investments. The credit facilities available under the 2007 Credit Agreement include a \$200 million revolving credit facility (including a \$25 million letter of credit subfacility), a \$350 million term loan facility and a \$450 million delayed term loan facility. Borrowings and letters of credit issued under the 2007 Credit Agreement bear interest at a rate equal to (i) with respect to LIBOR loans, LIBOR plus 1.20% or (ii) with respect to base rate loans, the base rate, as defined in the agreement, plus 0.20%, with such rates subject to reduction upon the receipt of specified debt ratings by S&P and Moody’s. In addition, Fortress will be required to pay a commitment fee of 0.375% per annum on the unused portion of amounts available under its revolving credit facility and its delayed term loan facility (provided that the unused commitment fee for the delayed term loan facility will be 0.175% per annum for the first 135 days after closing).

In May 2007, Fortress formed a new private equity Fortress Fund known as Fortress Investment Fund V (“Fund V”) that is expected to have total capital commitments from third-party investors of \$4.0 billion. Fortress expects to commit to contribute at least 1.5% of Fund V’s total equity from third party investors, or at least \$60 million. Fortress has entered into management agreements with the Fund V entities and will manage Fund V under essentially the same terms as the other private equity Fortress Funds, including management fees and incentive income.

12. PRO FORMA FINANCIAL INFORMATION

The unaudited pro forma financial information presented below was derived from the application of pro forma adjustments to the combined and consolidated financial statements of Fortress, as applicable, to give effect to the deconsolidation of the consolidated Fortress Funds. The deconsolidation transaction occurred effective March 31, 2007 as described in Note 1. The unaudited pro forma balance sheet information as of December 31, 2006 has been prepared as if this transaction had occurred on December 31, 2006. The unaudited pro forma income statement and statement of cash flows information for the three months March 31, 2007 have been prepared as if this transaction had occurred on January 1, 2007.

The primary effects of the deconsolidation transaction on Fortress's financial position, results of operations and liquidity are the following:

- Fortress no longer records on its balance sheet and income statement the gross assets, liabilities, revenues, expenses and other income of the deconsolidated Fortress Funds, along with the related interests of the fund investors in the equity and net income of these funds.
- Fortress reflects its investment in these funds on its balance sheet using the equity method of accounting, rather than eliminating the investment in consolidation.

35

FORTRESS INVESTMENT GROUP LLC

(PRIOR TO JANUARY 17, 2007, FORTRESS OPERATING GROUP – NOTE 1)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

MARCH 31, 2007

(dollars in tables in thousands, except share data)

- Fortress will include the management fees and incentive income earned from these funds on its income statement rather than eliminating the revenue in consolidation.
- Fortress will record its equity in the income of these funds using the equity method of accounting. However, it will not record any equity in income arising from incentive income arrangements to the extent that the incentive income is subject to contingent repayment until the contingency is resolved. Therefore, Fortress no longer needs to record deferred incentive income with respect to these funds for incentive income that it is not yet distributed.
- Fortress will also remove the cash flow activities of the deconsolidated funds from its statement of cash flows and replace them with its cash contributions to and distributions from the deconsolidated funds, which previously were eliminated in consolidation. This would not have any effect on Fortress's overall net change in cash for the period; however, it would result in significant changes to Fortress's operating, investing and financing cash flow categories.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
(tables in thousands except as otherwise indicated and per share data)

The following discussion should be read in conjunction with Fortress Investment Group's consolidated financial statements and the related notes (referred to as "consolidated financial statements" or "historical consolidated financial

statements'') included within this Quarterly Report on Form 10-Q. This discussion contains forward-looking statements that are subject to known and unknown risks and uncertainties. Actual results and the timing of events may differ significantly from those expressed or implied in such forward-looking statements due to a number of factors, including those included in Part II, Item 1A, "Risk Factors" and elsewhere in this Quarterly Report on Form 10-Q.

During the first quarter of 2007, we consummated a number of significant transactions, including the Nomura transaction, the formation transactions, our initial public offering, and the deconsolidation of a number of Fortress Funds. The deconsolidation of the Fortress Funds has had significant effects on many of the items within our financial statements but had no net effect on net income or equity. Since the deconsolidation did not occur until March 31, 2007, the income statement and the statement of cash flows for the three months ended March 31, 2007 are presented including these funds on a consolidated basis. The pro forma effects of the deconsolidation on these financial statements are described in Note 12 to Part I, Item 1, "Financial Statements — Pro Forma Financial Information."

General

Our Business

Fortress is a leading global alternative asset manager with approximately \$36.0 billion in AUM as of March 31, 2007. We raise, invest and manage private equity funds, hedge funds and publicly traded alternative investment vehicles. We earn management fees based on the size of our funds, incentive income based on the performance of our funds, and investment income from our principal investments in those funds. We invest capital in each of our businesses.

As of March 31, 2007, we managed approximately \$36.0 billion of alternative assets in three core businesses:

Private Equity Funds — a business that manages approximately \$17.8 billion of AUM that primarily makes significant, control-oriented investments in North America and Western Europe, with a focus on acquiring and building asset-based businesses with significant cash flows. We also manage a family of "long dated value" funds focused on investing in undervalued assets with limited current cash flows and long investment horizons;

Hedge Funds — a business that manages approximately \$13.5 billion of AUM comprised of two business segments; (i) hybrid hedge funds – which make highly diversified investments globally in assets, opportunistic lending situations and securities through the capital structure with a value orientation; and (ii) liquid hedge funds – which invest globally in fixed income, currency, equity and commodity markets and related derivatives to capitalize on imbalances in the financial markets; and

Publicly Traded Alternative Investment Vehicles, which we refer to as "Castles" – approximately \$4.7 billion of aggregate market capitalization in two publicly traded companies managed by us. The Castles currently invest primarily in real estate and real estate debt investments.

Managing Business Performance

We conduct our management and investment business through the following four primary segments: (i) private equity funds, (ii) liquid hedge funds, (iii) hybrid hedge funds, and (iv) Castles. These segments are differentiated based on the varying investment strategies of the funds we manage in each segment.

The amounts not allocated to a segment consist primarily of interest earned on short-term investments, certain general and administrative expenses and all interest incurred with respect to corporate borrowings.

Management makes operating decisions and assesses performance with regard to each of our primary segments based on financial data that is presented without the consolidation of any Fortress Funds. Accordingly, segment data for these segments is reflected on an unconsolidated basis, even for periods prior to the deconsolidation. Management also assesses our segments on a Fortress Operating Group and pre-tax basis, and therefore adds back the interests in consolidated subsidiaries related to Fortress Operating Group units (held by the principals) and income tax expense.

Management assesses the net performance of each segment based on its “distributable earnings.” Distributable earnings is not a measure of cash generated by operations which is available for distribution. Rather distributable earnings is a supplemental measure of the value created during any period which management uses in its determination of its periodic distributions to its dividend paying share and unit equity holders. Distributable earnings should not be considered as an alternative to cash flow in accordance with GAAP, as a measure of our liquidity, and is not necessarily indicative of cash available to fund cash needs (including distributions).

We believe that the presentation of distributable earnings enhances a reader’s understanding of the economic operating performance of our segments. Distributable earnings reflects GAAP net income adjusted for the following items:

- i. adding a measure of incentive income which is subject to contingent repayment but for which collectibility is reasonably assured because management believes the likelihood of clawback is remote;
- ii. modifying the timing of recognition of compensation expense related to employee profit sharing in incentive income to match the timing of the recognition of the related revenue, which is not matched under GAAP;
- iii. recording income from equity method investees only to the extent it has been realized. While equity method income is a meaningful measure of the operating performance of equity method investees, it is not a measure of currently recognizable income for us as we are holding the interests in our funds for long-term investment purposes. Since any difference between our share of their GAAP income and the distributions we receive is unlikely to be realized until a liquidation transaction occurs, which is not planned in the foreseeable future, adjusting this income to delay recognition of our equity in undistributed earnings until it is realized is consistent with the principles of distributable earnings;
- iv. only recording income from options received once they are exercised and the underlying shares sold, since the timing and amount of economic gain which may be realized from options held in equity method investees is highly uncertain and the GAAP valuation of such options is not a reliable measure of sustainable earnings; and
- v. adding back our equity-based compensation because it does not require settlement by the future transfer or use of assets and therefore does not impact our analysis of earnings which will be available for potential distributions.

“Distributable earnings” for our existing businesses is equal to net income adjusted as follows:

- Incentive Income
 - (i) a. for Fortress Funds which are private equity funds, adding (a) incentive income paid (or declared as a distribution) to us, less an applicable reserve for potential future clawbacks if the likelihood of a clawback is deemed greater than remote (net of the reversal of any prior such reserves that are no longer deemed necessary), minus (b) incentive income recorded in accordance with GAAP, based on the accounting method described in “— Application of Critical Accounting Policies — Revenue Recognition on

Incentive Income,”

- b. for other Fortress Funds, at interim periods, adding (a) incentive income on an accrual basis as if the incentive income from these funds were payable on a quarterly basis, minus (b) incentive income recorded in accordance with GAAP,

41

- Other Income
 - (ii) with respect to income from certain principal investments and certain other interests that cannot be readily transferred or redeemed:
 - a. for equity method investments in the Castles and private equity funds as well as indirect equity method investments in hedge fund special investment accounts (which generally have investment profiles similar to private equity funds), treating these investments as cost basis investments by adding (a) realizations of income, primarily dividends, from these funds, minus (b) impairment with respect to these funds, if necessary, minus (c) equity method earnings (or losses) recorded in accordance with GAAP,
 - b. subtracting gains (or adding losses) on stock options held in the Castles,
 - c. subtracting unrealized gains (or adding unrealized losses) from our consolidated private equity funds,
 - (iii) adding (a) proceeds from the sale of shares received pursuant to the exercise of stock options in certain of the Castles, in excess of their strike price, minus (b) management fee income recorded in accordance with GAAP in connection with our receipt of these options,
- Expenses
 - (iv) adding or subtracting, as necessary, the employee profit sharing in (i) above to match the timing of the expense with the revenue,
 - (v) adding back equity-based compensation expense (including Castle options assigned to employees, RSUs (including the portion of related dividend equivalents recorded as compensation expense), restricted shares and the LTIP),
 - (vi) adding back compensation expense recorded in connection with the forfeiture arrangements entered into among the principals (see Note 7 to Part I, Item 1, “Financial Statements — Equity-Based Compensation”),
 - (vii) adding the income (or subtracting the loss) allocable to the Principals’ interests attributable to Fortress Operating Group units, and
 - (viii) adding back income tax expense and any expense recorded in connection with the tax receivable agreement (see Note 5 to Part I, Item 1, “Financial Statements — Income Taxes and Tax Related Payments”).

Surplus

Our private equity funds have sponsored the initial public offerings of six portfolio companies since 2004 and have invested in one of the Castles whose initial public offering was sponsored directly by us. Our funds’ investments (including those of hedge funds) in these public companies include \$6.1 billion of unrealized gains based on their stock price as of March 30, 2007. Our share of those profits, which we call our private equity unrealized “surplus,” represents Fortress’s unrealized potential incentive income in respect of these investments. This potential incentive income is not reflected currently in our revenues. The periods in which such incentive income will be realized will be a function of our decisions regarding the timing of realization of fund investments in our portfolio companies, with

actual amounts, which may be significantly less, a function of market conditions at those times.

42

Portfolio Company	IPO Date	Shares Owned ⁽¹⁾ (in thousands)	Price Per Share (March 30, 2007)	USD Market Value ⁽²⁾ (dollars in thousands)

Total Potential Incentive Income				\$ 1,145,809
Fortress Retained % of Incentive Income ⁽⁵⁾				62.04%
Potential Incentive Income to Fortress Operating Group (unrealized surplus)				\$ 710,149 ⁽⁶⁾⁽⁷⁾

(1) Includes shares owned in hedge funds.

(2) Foreign exchange rates are as of March 30, 2007. Calculated as the number of shares held multiplied by the closing stock price on the applicable stock exchange, without regard to liquidity discounts or other factors that could adversely impact the potential proceeds that might be realized upon disposition of these shares.

(3) On January 12, 2007, Global Signal completed its announced merger with Crown Castle International Corp. (“Crown Castle”). On that day, Global Signal merged with and into a wholly owned subsidiary of Crown Castle, and Fortress Funds which owned shares of Global Signal received cash and stock of Crown Castle as consideration for the merger. These Fortress Funds subsequently resold a portion of the Crown Castle shares to Crown Castle for approximately \$374.0 million.

(4) Assumes all incentive income thresholds specified in applicable fund agreements are met.

(5) Represents percentage of incentive income not payable to employees.

(6) Amounts ultimately received by us may vary significantly based on a variety of factors, including future public market values of these investments as well as the performance of investments that are not listed above held by the funds that hold the investments listed above. See Part II, Item 1A, “Risk Factors — Risks Related to Our Funds — The historical performance of our funds should not be considered as indicative of the future results of our funds, or of our future results or of any returns expected on our Class A shares.”

(7)

The amount of unrealized surplus was reduced by approximately \$104.7 million in January 2007 as a result of the distribution of proceeds from a financing arrangement entered into by certain Fortress Funds which own shares of GAGFAH.

43

Market Considerations

Our revenues consist principally of (i) management fees which are based on the size of our funds, (ii) incentive income which is based on the performance of our funds and (iii) investment income from our investments in those funds. Our ability to grow our revenues depends on our ability to attract new capital and investors, which in turn depends on our ability to successfully invest our funds' capital. The primary market factors that impact this are:

- The strength of the alternative investment management industry, including the amount of capital invested and withdrawn from alternative investments. Our share of this capital is dependent on the strength of our performance relative to the performance of our competitors. The capital we attract is a driver of our AUM, as are our returns, which in turn drive the fees we earn.
- The strength and liquidity of the U.S. and relevant global equity markets generally, and the IPO market specifically, which affect our ability to increase the value of our equity positions in our private equity portfolio companies.
- The strength and liquidity of the U.S. and relevant global debt markets. Our hybrid hedge funds, private equity funds and Castles all make investments in debt instruments which are assisted by a strong and liquid debt market. In addition, our funds borrow money to make acquisitions. Our funds utilize leverage in order to increase investment returns which ultimately drive the performance of our funds. Furthermore, we utilize debt to finance our investments in our funds and for working capital purposes.
- Volatility within the markets. Volatility within the debt and equity markets, as well as within the commodity market to a limited extent, increases opportunities for investments within each of our segments, and directly impacts the performance of our liquid hedge funds.
- Other than in our liquid hedge funds, we benefit from stable interest rate and foreign currency exchange rate markets. The direction of the impact of changes in interest rates or foreign currency exchange rates on our liquid hedge funds is dependent on their expectations and the related direction of their investments at such time; therefore, historical trends in these markets are not necessarily indicative of future performance in these funds.

For the most part, we believe the trends in these factors have created a favorable investment environment for our funds.

- In recent years, the U.S. economy and capital markets have been robust, and we have successfully identified opportunities within other economies where trends have also been favorable for investment, such as Germany and the United Kingdom. Partially as a result of the globalization of our operations and the internationalization of our investments, we continue to identify what we believe to be attractive investment opportunities in new markets. Furthermore, the U.S. and international debt markets have expanded significantly in recent years as a result of the widespread growth in the securitization markets.
- Institutions, high net worth individuals and other investors are increasing their allocations of capital to the alternative investment sector. As a leader in this sector based on the size, diversity

and performance of our funds, we have been and continue to be able to attract a significant amount of new capital, at least in part as a result of this trend.

- Allocations of capital to the alternative investment sector are also dependent, in part, on the strength of the economy and the returns available from other investments relative to returns from alternative investments. This, in turn, is also dependent on the interest rate and credit spread markets; as interest rates rise and/or spreads widen, returns available on other investments would tend to increase, which could slow capital flow to the alternative investment sector. We have experienced relatively steady and historically low interest rates and tight credit spreads during the periods presented, which has been favorable to our business.

Historically, trends discussed above have been generally favorable to our performance. No assurance can be given that future trends will not be disadvantageous to us.

44

In the first quarter of 2007, there was a limited disruption in the global capital markets due to numerous factors, including a lack of stability in the Asian capital markets. As a result, the Fortress Funds generated lower returns than they have historically, including unrealized losses in some consolidated funds. From a deconsolidated or segment perspective, this had a negative effect on our incentive income earned on the performance of our liquid hedge funds. Conversely, in the beginning of the second quarter the global capital markets appear to be demonstrating favorable trends.

For a more detailed description of how economic and global financial market conditions can materially affect our financial performance and condition, see Part II, Item 1A, “Risk Factors — Risks Related to Our Funds — Difficult market conditions can adversely affect our funds in many ways, including by reducing the value or performance of the investments made by our funds and reducing the ability of our funds to raise or deploy capital, which could materially reduce our revenue and results of operations.”

Results of Operations

Following is a discussion of our consolidated results of operations for the three months ended March 31, 2007 and 2006. For a more detailed discussion of the factors that affected our revenues and distributable earnings from each of our segments, see “— Segment Analysis” below.

The following table presents our results of operations as derived from our accompanying consolidated and combined financial statements.

	Three Months Ended March 31,	
	2007	2006
Revenues		
Management fees from affiliates	\$ 43,287	\$ 44,976
Incentive income from affiliates	44,229	59,982
Other revenues	19,784	16,398

Edgar Filing: Fortress Investment Group LLC - Form 10-Q

Interest and dividend income – investment company holdings	309,030	248,675
	416,330	370,031
Expenses		
Interest expense	144,639	125,105
Compensation and benefits	355,791	83,445
General, administrative and other (including depreciation and amortization)	41,314	24,837
	541,744	233,387
Other Income (Loss)		
Gains (losses) – investment company holdings	(647,477)	892,085
Gains (losses) – other investments	6,722	81,877
Earnings from equity method investees	195	1,896
	(640,560)	975,858
Income (Loss) Before Deferred Incentive Income, Principals' and Others' Interests in Income of Consolidated Subsidiaries and Income Taxes	(765,974)	1,112,502
Deferred incentive income	307,034	(151,706)
Principals' and others' interests in (income) loss of consolidated subsidiaries	535,530	(825,372)
Income Before Income Taxes	76,590	135,424
Income tax expense	(14,447)	(5,144)
Net Income	\$ 62,143	\$ 130,280

45

Factors Affecting Our Business

During the periods discussed herein, the following are significant factors which have affected our business and materially impacted our results of operations:

- growth in our AUM;
- level of performance of our funds;
- growth of our fund management and investment platform and our compensation structure to sustain that growth; and
- the income tax expenses as a result of our reorganization which occurred in 2007.

Assets Under Management

We measure total AUM by reference to the assets we manage, including the capital we have the right to call from our investors due to their capital commitments. As a result of raising new funds with sizeable capital commitments, raising capital for our Castles, securing capital commitments to our hedge funds and increases in the NAVs of our hedge funds from new investor capital and their retained profits, our AUM have increased significantly over the periods discussed.

Average Fee Paying AUM

Average fee paying AUM represent the reference amounts upon which our management fees are based. The reference amounts for management fee purposes are: (i) capital commitments or invested capital for the private equity funds, which in connection with funds raised after March 2006 includes the mark-to-market value on public securities held within the fund, (ii) contributed capital for the Castles, or (iii) the NAV for hedge funds.

Management Fees, Interest Income and Dividend Income

Significant growth of our average fee paying AUM has had a positive effect on our revenues. Management fees are calculated based upon AUM of unconsolidated funds. As the AUM in our unconsolidated funds grew, so did the management fees we earned. Fees earned from our consolidated funds were eliminated in consolidation. Increases in AUM of our consolidated funds generated gross interest and dividend income. In either case, depending on the timing of capital contributions in a given period, the full economic benefits of an increase in AUM may not be recognized until the following period.

Performance of Our Funds

Incentive Income, Deferred Incentive Income and Gains from Investments

Incentive income is calculated as a percentage of profits earned by the Fortress Funds. Incentive income that is not subject to contingent repayment is recorded as earned. Such incentive income not subject to repayment generated from unconsolidated Fortress Funds is recorded as incentive income from affiliates. Earned incentive income generated from consolidated Fortress Funds increases our share of the net income from such consolidated funds. Incentive income allocated to us from the funds that continues to be subject to contingent repayment is deferred and recorded as a deferred incentive income liability until the related contingency is resolved.

The contingencies related to a portion of the incentive income we have received from two private equity Fortress Funds have been resolved in the fourth quarter of 2006 and the first quarter of 2007. As our private equity funds continue to mature, the amount of incentive income recognized could continue to increase, subject to the resolution of the contingencies.

The performance of the consolidated Fortress Funds has impacted our gains (losses) from investments, both realized and unrealized. Unrealized gains (losses) within our consolidated private equity funds have fluctuated primarily as a result of the change in fair value of the funds' portfolio company investments. Unrealized gains (losses) within our consolidated liquid and hybrid hedge funds also have fluctuated as a result of the value of assets held within their portfolios.

46

Interest Expense

Our historical consolidated financial statements reflect payments of interest on our collateralized debt obligations issued by our hybrid hedge funds and also reflect allocations to us of interest payments made by the master funds of our liquid hedge funds. These allocations increased during the periods primarily due to the increased use by such master funds of repurchase transactions to finance positions in their trading business.

Fund Management and Investment Platform

In order to accommodate the increasing demands of our funds' rapidly growing investment portfolios, we have expanded our investment platforms, which are comprised primarily of our people, financial and operating systems and supporting infrastructure. Expansion of our investment platform required increases in headcount, consisting of newly hired investment professionals and support staff, as well as leases and associated improvements to new corporate offices to house the increasing number of employees, and related augmentation of systems and infrastructure. Our headcount increased from 438 employees as of March 31, 2006 to 636 employees as of March 31, 2007. This resulted in increases in our compensation, office related and other personnel related expenses. In addition, in conjunction with and subsequent to our initial public offering, we have implemented an equity-based compensation plan described in Note 7 to Part I, Item 1, "Financial Statements — Equity-Based Compensation" as a means to provide an additional financial incentive to retain our existing and future employees.

Income Tax Expense

Prior to January 17, 2007, we generally had not been subject to U.S. federal income tax but certain of our subsidiaries had been subject to the New York City unincorporated business tax ("UBT") on their U.S. earnings based on a statutory rate of 4%. One of our subsidiaries was subject to U.S. federal corporate income taxes. Certain of our subsidiaries are subject to income tax of the foreign countries in which they conduct business. In connection with the Nomura transaction and the initial public offering (see Note 1 to Part I, Item 1, "Financial Statements — Organization and Basis of Presentation"), our operating entities were reorganized and a portion of our income is now subject to U.S. federal income taxes and taxed at the prevailing corporate tax rates.

Revenues

Total revenues increased by \$46.3 million. This change was primarily due to higher interest and dividend income and partially offset by a decrease in incentive income.

	Year Ended March 31,		
	2007	2006	Variance \$
Management fees from affiliates	\$ 43,287	\$ 44,976	\$ (1,689)
Incentive income from affiliates	44,229	59,982	(15,753)
Other revenues	19,784	16,398	3,386
Interest and dividend income – investment company holdings	309,030	248,675	60,355
Total revenues	\$ 416,330	\$ 370,031	\$ 46,299

Management fees from affiliates decreased by \$1.7 million primarily due to the net effect of the following:

an \$11.4 million increase in management fees from one of our unconsolidated liquid hedge funds. This increase was mainly the result of a \$1.8 billion growth in this fund's average fee paying AUM;
a \$4.2 million increase in contractual management fees from Eurocastle as a result of multiple capital raises, which increased its total outstanding common equity subject to management fees from €811.4 million as of March 31, 2006 to €1,457.0 million as of March 31, 2007, and an increase in its average fee paying assets AUM by €826.4 million;

~~a~~ \$1.7 million increase in management fees from one of our unconsolidated hybrid hedge funds. This increase was mainly the result of a \$213.5 million growth in the fund's average fee paying AUM; and ~~an~~ \$18.7 million decrease in management fees related to options that were received from Eurocastle as compensation for services performed in raising capital in January 2006.

Incentive income from affiliates decreased by \$15.8 million primarily as a result of:

~~a~~ \$7.9 million decrease in incentive income from Newcastle Investment Holdings LLC ("NIH"), which recognizes accrued incentive income on the fair value increases in its investment holdings. In the three months ended March 31, 2006, the fair value of NIH investments increased and an incentive fee was recognized. In the three months ended March 31, 2007, the fair value of NIH investments decreased and no incentive income was accrued; and

~~a~~ \$7.1 million decrease in incentive income from one of our unconsolidated liquid hedge funds. The main driver of the decrease in this unconsolidated liquid hedge fund's incentive income was a decrease in its promotable performance return from 7.8% for the three months ended March 31, 2006 to 4.1% for the three months ended March 31, 2007, which generated a decrease in incentive income of \$23.5 million on our existing base of average fee paying AUM. This decrease was partially offset by increased incentive income earned on higher average fee paying AUM, which grew by \$1.8 billion, and a higher incentive fee paying percentage, which collectively generated \$16.3 million of additional incentive income.

Other revenues increased by \$3.4 million primarily due to the net effect of the following:

~~an~~ increase of \$12.2 million in other revenues recorded by Fortress Operating Group primarily as a result of \$4.4 million of bank interest earned on cash balances, an increase of \$3.1 million in expenses recoverable from the unconsolidated Fortress Funds and \$2.0 million earned for assisting an externally managed hedge fund in liquidating its portfolio; and

~~a~~ decrease of \$8.1 million in other revenues recognized by Northcastle, which was substantially liquidated at the end of 2006.

Interest and dividend income relating to holdings of our consolidated investment companies increased by \$60.4 million.

Interest income increased by \$66.3 million primarily due to the net effect of the following:

~~a~~ \$35.9 million increase in interest income earned by our consolidated hybrid hedge funds, mainly due to increased loan volume and spread earned over LIBOR, which increased interest income by \$27.0 million and \$7.4 million, respectively;

~~a~~ \$25.6 million increase related to our CDO entities, which was primarily driven by the net effect of the following:

- the creation of two CDO entities in February and April 2006, which generated an additional \$26.3 million in interest income;
- a decrease in interest income in two of these CDO entities of \$1.3 million;
- a \$6.7 million increase in interest income earned by our consolidated liquid hedge funds, mainly due to our highly leveraged relative value fund. This liquid hedge fund recognized a \$28.7 million increase in interest income as a result of a 62% increase in average trading activity. This increase was partially offset by a \$22.0 million decrease in interest income earned by our other liquid hedge fund. This fund had a significant investment in the same highly leveraged relative value strategy in the first quarter of 2006, generating considerable interest income, but subsequently had decided to re-allocate this investment to another strategy; and
- a \$7.2 million decrease in interest income from Fund II mainly due to the repayment of debt positions related to its investment in a servicer of manufactured housing loans.

Dividend income decreased by \$5.9 million primarily due to the net effect of:

- decreases of \$43.9 million and \$17.5 million in dividends earned by Fund II and Fund I, respectively. In June 2006, these funds transferred their investments in certain portfolio companies to two intermediate holding companies in which the funds were the sole investors, whereby the holding companies received the dividends and retained them to service debt. As a result, in 2007 no dividend income from these investments was recorded by these two funds. These holding companies are accounted for at fair value by these funds;
- a \$21.7 million increase and a \$4.1 million increase in dividends earned by Fund III and Fund III Co-investment Fund, respectively. These increases primarily resulted from \$15.0 million in dividends received from their investment in an aircraft leasing company, which went public in August 2006, and \$8.2 million from their investment in a local media publisher, which went public in October 2006;
- recognizing \$10.5 million and \$2.3 million of dividends in FRID and GAGACQ Coinvestment Fund, respectively, from their investments in a residential housing company;
- the collection by FRIC and Fund IV, both of which were created in the second half of 2006, of \$3.9 million and \$3.0 million, respectively, in dividends from their investment in a senior living facilities company;
- a \$3.5 million increase in dividends earned by our hybrid hedge fund and its special investments. This increase was mostly due to dividends collected from this fund's special investment in an aircraft leasing company and from dividends paid on its direct investment in a publicly traded residential housing company of \$1.9 million and \$1.6 million, respectively;
- a \$3.0 million increase in dividend income generated in our Long Dated Value Fund I ("LDVF I") from various non-affiliated investments; and
- a \$3.5 million increase in dividends recorded by seven different funds.

Expenses

In the analysis below, general, administrative and other expenses include depreciation and amortization.

Total expenses increased by \$308.4 million. This change was mainly driven by an increase in compensation and benefits expenses.

	Year Ended March 31,		Variance
	2007	2006	\$
Interest expense			
Investment company holdings	\$ 132,620	\$ 118,248	\$ 14,372
Other	12,019	6,857	5,162
Compensation and benefits	355,791	83,445	272,346
General, administrative and other (including depreciation and amortization)	41,314	24,837	16,477
Total expenses	\$ 541,744	\$ 233,387	\$ 308,357

Total interest expense increased by \$19.5 million mainly due to the net effect of the following:

a \$14.8 million increase in interest expense incurred by our consolidated CDO entities. This increase was principally due to the creation of two CDO entities in February and April 2006, which contributed to a combined increase of \$13.6 million in interest expense;

a \$7.7 million increase in interest expense incurred by our consolidated hybrid hedge funds, which grew as a result of increased borrowings on margin, from prime brokers and against their publicly traded investment in a residential housing company;

- a \$1.8 million increase in interest expense incurred by our consolidated liquid hedge funds. This increase was due to the combined net effect of:

49

- a \$28.6 million increase in interest expense in our liquid hedge fund with a highly leveraged relative value strategy, which generated higher trading volume and a \$28.1 million increase;
- a \$26.8 million decrease in interest expense in our existing consolidated liquid hedge fund. This fund significantly increased its debt to invest in the same highly leveraged relative value strategy throughout 2005 and through the first quarter of 2006. The result was a considerable increase in the interest expense from this fund over this reporting period. Subsequently, the decision was made to alter this strategy and the debt position was paid down, resulting in the decrease in interest expense;

- a \$9.9 million decrease in interest expense incurred by Fund I. Fund I refinanced its debt in June 2006. Prior to June 2006, debt in connection with certain investment company holdings was held at the fund level and therefore during the first quarter of 2006, the fund recognized interest expense with a corresponding increase in dividend income received from the controlled affiliate. After June 2006, this debt was held at the unconsolidated controlled affiliate level and, therefore, the fund did not directly record any interest expense during the first quarter of 2007, but rather the interest expense was recognized by the fund through lower dividends paid by the controlled affiliate; and

- a \$7.7 million increase in other interest expense primarily due to the increase of our weighted average debt outstanding under Fortress Operating Group's credit facility to \$521.7 million for the three months ended March 31, 2007 from \$205.8 million for the three months ended March 31, 2006, while the weighted average annual interest rate on this facility (excluding write-offs of deferred loan costs) declined to 7.50% for the three months ended March 31, 2007 from 8.23% for the three months ended March 31, 2006. In addition, in connection with the partial repayment of our 2006 Credit Agreement with proceeds from the initial public offering in February 2007, deferred loan costs of \$2.0 million were written off to interest expense.

Our compensation expense increased by \$272.3 million which is mainly the result of:

- a \$138.3 million increase due to the Principals Agreement as referenced within Note 7 to Part I, Item 1, "Financial Statements — Equity-Based Compensation." The Principals Agreement provides that, in the event a principal voluntarily terminates his employment with Fortress Operating Group for any reason prior to the fifth anniversary of the IPO, a portion of the equity interests held by that principal as of the completion of the IPO will be forfeited to the principals who are employed by Fortress Operating Group generally as of the date that is six months after the date of such termination of employment. As a result of the service requirement, the fair value of Fortress Operating Group units subject to the risk of forfeiture is charged to compensation expense on a straight-line basis over the five year service period;

- an increase of \$69.6 million in the employee portion of management fees and incentive income paid as compensation expense, primarily related to a significant private equity realization event in the three months ended March 31, 2007 associated with multiple funds; and
- an additional \$35.2 million of equity-based compensation expense related to our equity-based compensation plan, which encompasses the restricted stock units and LTIP award described in Note 7 to Part I, Item 1, “Financial Statements — Equity-Based Compensation,” including \$16.1 million of one-time expense as a result of certain restricted stock awards with no service conditions.

We will further recognize compensation expense on our non-vested equity-based awards of \$944.4 million, with a weighted average recognition period of 5.75 years.

General, administrative and other expenses increased by \$16.5 million, primarily as a result of increased office and administrative costs needed to support a significantly larger workforce and professional fees related to the initial public offering and ongoing infrastructure demands of being a public company.

50

Other Income

Total other income decreased by \$1.6 billion. This change was mainly driven by losses in investment company holdings.

	Year Ended March 31,		
	2007	2006	Variance \$
Gains (losses) – investment company holdings	\$ (647,477)	\$ 892,085	\$ (1,539,562)
Gains (losses) – other investments	6,722	81,877	(75,155)
Earnings from equity method investees	195	1,896	(1,701)
Total other income	\$ (640,560)	\$ 975,858	\$ (1,616,418)

Gains (losses) from our consolidated investment company holdings changed by \$1.5 billion. This change was primarily due to the net effect of:

- a decrease of \$570.2 million in gains (losses) from Fund II’s controlled affiliates primarily as a result of the net effect of:
 - a decrease in unrealized gains (losses) from affiliates of \$822.2 million which fluctuated from a gain of \$295.3 million in 2006 to a loss of \$526.9 million in 2007 mainly from the effects of changes in fair value of a senior living facilities company and a residential housing company of \$359.7 million and \$345.0 million, respectively;
 - a partial offset of \$252.0 million in realized gain from affiliates mainly attributable to a realization of profits on investments in a residential housing company and a servicer of manufactured housing loans;
- a decrease of \$329.6 million in unrealized gains (losses) from Fund I’s controlled affiliates. This decrease in unrealized gains (losses) in affiliates from a gain of \$289.1 million in 2006 to a loss of \$40.5 million in 2007 was primarily attributable to fluctuations in the fair value of a cell

tower company, a senior living facilities company and a real estate company of \$112.8 million, \$99.3 million and \$93.5 million, respectively;

- a decrease of \$222.6 million and \$132.5 million in gains (losses) from affiliates of FRID and GAGACQ, respectively. Unrealized gains (losses) from FRID and GAGACQ fluctuated from a gain of \$5.1 million and \$7.4 million in 2006, respectively, to a loss of \$217.5 million and \$283.8 million in 2007, respectively, as a result of some fair value fluctuations of a residential housing company. These decreases were partially offset by realized gains recorded by GAGACQ of \$158.7 million related to a realization of profits on this investment;
- a decrease of \$191.0 million in gains (losses) from Fund III's controlled affiliates mainly due to the net effect of:
 - a decrease in unrealized gains (losses) from affiliates of \$457.8 million, which fluctuated from a gain of \$179.7 million in 2006 to a loss of \$278.1 million in 2007 from the combined effects of changes in fair value of a residential housing company and Eurocastle of \$486.8 million and \$135.7 million, respectively, offset partially by an increase in the fair value of an aircraft leasing company and a local media publisher of \$127.0 million and \$34.8 million, respectively; and
 - a realized gain from affiliates of \$266.8 million mainly attributable to a realization of profits on the investment in a residential housing company.

Gains (losses) from other investments decreased by \$75.2 million. This decrease was primarily attributable to a decrease in the unrealized gain on our Eurocastle stock options of \$41.0 million, and a decrease in earnings from the receivable for previously earned fees from our unconsolidated hedge funds of \$33.4 million as a result of the distribution of these fees and termination of these fee arrangements.

Earnings from equity method investees decreased by \$1.7 million primarily as a result of a decrease in our share of net income from NIH of \$1.1 million. In addition, earnings from Eurocastle decreased by \$0.6 million due to the acquisition of higher credit quality, lower yielding assets.

51

Deferred Incentive Income

Deferred incentive income represents the deferral of our share of incentive income allocated from private equity funds, which is recognized as current income to the extent that previously deferred income is no longer subject to contingent repayment. The changes are the result of the net change in our proportionate share of the profits of our private equity funds, which are subject to contingent repayment, other than the \$207.8 million offset to this amount in the first quarter of 2007 related to the recognition of previously deferred incentive income, which is no longer subject to contingent repayment.

Income Tax Expense

The primary cause of the \$9.3 million growth in tax expense is due to the reorganization of Fortress Operating Group (see Note 1 to Part I, Item 1, "Financial Statements — Organization and Basis of Presentation"). Prior to the reorganization, Fortress was generally not subject to U.S. federal income tax, with the exception of one subsidiary. Some subsidiaries were subject to New York City unincorporated business tax ("UBT") at a statutory rate of 4%. Certain subsidiaries were subject to income tax in the foreign countries in which they conduct business.

Edgar Filing: Fortress Investment Group LLC - Form 10-Q

After the reorganization, FIG Corp., a wholly owned corporate subsidiary of Fortress, is taxed as a corporation for U.S. federal income tax purposes at a statutory rate of 35% on its share of income for Fortress Operating Group. Additionally, FIG Corp. is subject to state and local corporate income tax.

Segment Analysis

Discussed below are our results of operations for each of our reportable segments. They represent the separate segment information available and utilized by our Management Committee, which consists of our principals, and which functions as our chief operating decision maker to assess performance and to allocate resources. Management evaluates the performance of each segment based on its distributable earnings.

As segment revenues reflected in our distributable earnings are presented on an unconsolidated basis, management fee and incentive income are reflected on a gross basis prior to elimination as required in consolidation. As a result of this presentation, management fees and incentive income are greater than those reflected on a consolidated GAAP basis. Other items within distributable earnings are less than the related amounts on a GAAP basis, as they do not include the effects of consolidating the Fortress Funds.

As segment revenues are presented on an unconsolidated basis, changes in AUM indirectly impact our management fee and incentive income revenues. We therefore believe distributable earnings more clearly reflects the effects of such changes on our segment results of operations and thereby forms the primary basis upon which we assess our performance.

As a result of our reorganization on January 17, 2007 and our initial public offering on February 8, 2007, we have four additional reconciling items between our segment measure, distributable earnings, and GAAP net income. As described above under “— General,” these adjustments relate to equity-based compensation expense of our employees and principals, interests in consolidated subsidiaries held by the principals, and income tax and related expense.

52

Private Equity Funds

	Year Ended March 31,		Variance
	2007	2006	\$
Management fees	\$ 26,764	\$ 12,504	\$ 14,260
Incentive income	190,298	25,009	165,289
Segment revenues – total	\$ 217,062	\$ 37,513	\$ 179,549
Pre-tax distributable earnings	\$ 147,767	\$ 25,911	\$ 121,856

Pre-tax distributable earnings increased by \$121.9 million mainly due to the growth in incentive income of \$165.3 million partially offset by a corresponding increase in the employees’ share of incentive income of \$62.9 million reflected as compensation expense, for a net increase of \$102.4 million. The net increase of \$102.4 million of incentive income was primarily related to a gain realization event and related distribution of \$38.8 million from Fund III, \$36.4 million from Fund II, and \$30.8 million from GAGFAH Coinvestment Fund as a

result of the financing proceeds related to their investments in a residential housing company. Management fees increased by \$14.3 million primarily because of a \$13.2 million increase in fees collected from Fund IV, Fund IV Coinvestment, Holiday Sidecar Fund, and Intrust Coinvestment Fund which were created in March, April, November, and December 2006, respectively. In addition, fees earned by FRID and Long Dated Value Fund increased by \$3.9 million as their invested capital grew over the period. These increases in management fees were partially offset by a combined reduction in management fees of \$3.1 million related to Fund II and Fund III, which was attributable to distributions and reaching the reset date for Fund III as a consequence of the creation of Fund IV (after which Fund III pays management fees based on invested capital rather than capital commitments). Investment income increased by \$8.1 million due to a portion of the same distribution received from the investment in a residential housing company.

Liquid Hedge Funds

	Year Ended March 31,		
	2007	2006	Variance \$
Management fees	\$ 30,941	\$ 18,804	\$ 12,137
Incentive income	45,279	54,969	(9,690)
Segment revenues – total	\$ 76,220	\$ 73,773	\$ 2,447
Pre-tax distributable earnings	\$ 33,073	\$ 71,216	\$ (38,143)

Pre-tax distributable earnings decreased by \$38.1 million mainly due to investment income, which decreased by \$35.7 million. This decrease to investment income is mainly attributable to the distribution of previously earned fees, which had generated \$30.4 million in income in the 2006 period and a \$1.9 million of income in the 2007 period. Operating expenses increased by \$12.2 million, driven by a 36.7% increase in headcount to 139 employees. In addition, incentive income decreased by \$9.7 million partially offset by a corresponding decrease in the employees' share of incentive income of \$1.2 million reflected as compensation expense, resulting in a net decrease of \$8.5 million. The decrease in incentive income was primarily due to a decline in performance of one of our funds to a 3.6% per annum return during the three months ended March 31, 2007 from a 7.1% per annum return during the three months ended March 31, 2006. The two largest components of this decrease were declines of 11.4% and 4.3% in the per annum returns of the relative value and foreign exchange trading strategies, respectively. This decline in performance generated a \$26.0 million decrease to incentive income. This decline was partially offset by growth in average fee paying AUM, which grew by \$1.9 billion, and an increase in the incentive fee paying percentage of the fund, which combined resulted in an increase in incentive income of \$17.5 million. These decreases to pre-tax distributable earnings were partially offset by a \$12.1 million increase in management fees, which also benefited from the increase in average fee paying AUM.

Hybrid Hedge Funds

Year Ended March 31,	
2007	2006

Edgar Filing: Fortress Investment Group LLC - Form 10-Q

			Variance \$
Management fees	\$ 29,013	\$ 16,677	\$ 12,336
Incentive income	46,105	28,503	17,602
Segment revenues – total	\$ 75,118	\$ 45,180	\$ 29,938
Pre-tax distributable earnings	\$ 43,709	\$ 21,204	\$ 22,505

Pre-tax distributable earnings increased by \$22.5 million mainly due to growth in management fees, which increased by \$12.3 million. The increase in management fees was primarily the result of the growth of average fee paying AUM, which grew by \$2.6 billion. In addition, incentive income grew by \$17.6 million partially offset by a corresponding increase in the employees' share of incentive income of \$5.6 million reflected as compensation expense, resulting in a net increase of \$12.0 million. The increase in incentive income was due to larger average fee paying AUM with an essentially flat year-to-year return. Furthermore, investment income grew by \$8.3 million. The increase in investment income was mainly due to a \$175.7 million investment in Fortress Partners Fund, which was made in July 2006 and generated \$8.9 million in income. These were offset by an increase in operating expenses of \$10.2 million primarily due to a 47.9% increase in headcount to 209 employees.

Publicly Traded Alternative Investment Vehicles (“Castles”)

	Year Ended March 31,		Variance
	2007	2006	\$
Management fees	\$ 10,905	\$ 7,609	\$ 3,296
Incentive income	3,688	2,847	841
Segment revenues – total	\$ 14,593	\$ 10,456	\$ 4,137
Pre-tax distributable earnings	\$ 5,676	\$ 1,818	\$ 3,858

Pre-tax distributable earnings increased by \$3.9 million mainly due to growth in management fees, which increased by \$3.3 million. The driver for the increase in management fees was the growth of average fee paying AUM, which grew by \$0.9 billion primarily driven by the capital raises of Eurocastle. With the incentive income from the Castles being based on a percentage of their FFO, in excess of certain performance hurdles, incentive income increased by \$0.8 million as a result of higher FFO for Newcastle of \$33.9 million during the three months ended March 31, 2007 from \$28.7 million during the three months ended March 31, 2006.

Unallocated

	Year Ended March 31,		Variance \$
	2007	2006	
Management fees	\$ —	\$ —	\$ —
Incentive income	—	—	—
Segment revenues – total	\$ —	\$ —	\$ —
Pre-tax distributable earnings	\$ (10,644)	\$ (4,505)	\$ (6,139)

Pre-tax distributable earnings decreased by \$6.1 million. This decrease was primarily driven by an increase in interest expense of \$6.2 million. Our weighted average debt balance was \$521.7 million for the three months ended March 31, 2007 in contrast to \$205.8 million for the three months ended March 31, 2006, which led to the increase in interest expense. The higher weighted average debt balance was slightly offset with a decrease in weighted average annual interest rates to 7.50% for the three months ended March 31, 2007 from 8.23% for the three months ended

March 31, 2006. In addition, in connection with the partial repayment of the 2006 Credit Agreement with proceeds from

54

the initial public offering, deferred loan costs of \$2.0 million were written off to interest expense. Increases in professional fees of \$2.2 million also contributed to the decrease in distributable earnings. These decreases were partially offset by an increase in interest earned on cash balances of \$4.4 million.

Sensitivity

Investments held by the Fortress Funds are sensitive to changes in our valuation assumptions and estimates as well as fluctuations in fair value. A 10% change in the fair value of the net investments held by all of our funds (other than a permanent impairment) would have the following effects on our segment revenues:

	Segment Basis		Investment
	Management Fees	Incentive Income	Income (Unrealized Gains and Losses)
Private equity funds	None (A)	None (B)	None
Hedge funds (hybrid and liquid)	10% annual change in management fees from these funds, subsequent to the change in value.	Generally, a 10% immediate change in incentive income from these funds. Since the incentive income is equal to 20% of fund returns, the dollar effect would be 2% (20% of 10%) of the dollar change in values.	Generally, a 10% immediate change in investment income. Since we generally have a 1% – 5% investment in these funds, the dollar effect would be 0.1% – 0.5% (1% – 5% of 10%) of the dollar change in values.
Castles	None	None	None

(A) For funds formed after March 2006, a 10% change in the fair value of net investments held in publicly traded entities would decrease management fees by 10% of the value of such investments on a prospective basis, subsequent to the change in value.

(B) Although a change in fair value could indirectly impact our conclusion regarding a potential reserve. A 10% increase or decrease in the fair value of net investments held by all of our funds as of March 31, 2007 would have increased or decreased our segment incentive income by \$229.6 million or (\$91.4 million), respectively, and impacted investment income by \$59.5 million.

Liquidity and Capital Resources

Liquidity is a measurement of our ability to meet potential cash requirements, including ongoing commitments to repay borrowings, fund and maintain investments, including our capital commitments to our funds, pay compensation, and satisfy our other general business needs including our obligation to pay U.S. federal income tax as a result of our reorganization (see Note 1 to Part I, Item 1, “Financial Statements — Organization and Basis of Presentation”). In addition, we will require cash to meet our intended distribution policy. Our primary sources of funds for liquidity consist of cash flows provided by operating activities, primarily the management fees and incentive income paid to us from the Fortress Funds, borrowings under loans, and the issuance of debt and equity securities, as well as the investment returns on our principal investments in these funds.

We expect that our cash on hand and our cash flows from operating activities, plus the proceeds from our initial public offering in February 2007, will satisfy our liquidity needs with respect to current commitments relating to investments and with respect to our debt obligations over the next twelve

55

months. We expect to meet our long-term liquidity requirements, including the repayment of our debt obligations and any new commitments, and any increases in our commitments, relating to principal investments, through the generation of operating income, additional borrowings and potential equity offerings.

On February 8, 2007, we completed an initial public offering of 39,428,900 of our Class A shares, including the underwriters’ over allotment option, for net proceeds of approximately \$652.7 million. We contributed the net proceeds from the offering to Fortress Operating Group in exchange for 39,428,900 limited partnership units. Fortress Operating Group applied these proceeds as follows: (a) to pay \$250 million outstanding under the term loan facility, as required by the credit agreement, and (b) to pay \$85 million then outstanding under the revolving credit facility. Fortress Operating Group intends to use the remaining proceeds (a) to fund \$169 million of commitments to existing private equity funds, and (b) to use \$149 million for general business purposes. As of March 31, 2007, \$206.2 million of initial public offering proceeds remain unused of which \$67.7 million is intended for private equity capital commitments and \$138.5 million is intended for general business purposes.

In addition, in connection with the Nomura transaction and the initial public offering (see Note 1 to Part I, Item 1, “Financial Statements — Organization and Basis of Presentation”), we reorganized. We established a publicly traded partnership and also established a wholly owned corporate subsidiary. Accordingly, a substantial portion of our income earned by the corporate subsidiary is subject to U.S. federal income taxation and taxed at prevailing rates. The remainder of our income is allocated directly to our shareholders and is not subject to any corporate level of taxation.

Our ability to execute our business strategy, particularly our ability to form new funds and increase our AUM, depends on our ability to raise additional investor capital within such funds. Decisions by counterparties to enter into transactions with us will depend upon a number of factors, such as our historical and projected financial performance and condition, compliance with the terms of our current credit arrangements, industry and market trends and performance, the availability of capital and our counterparties’ policies and rates applicable thereto, the rates at which we are willing to borrow, and the relative attractiveness of alternative investment or lending opportunities.

As of March 31, 2007, our material cash commitments and contractual cash requirements were related to our distributions, capital commitments to our funds, lease obligations and debt obligations.

Dividends / Distributions

Edgar Filing: Fortress Investment Group LLC - Form 10-Q

On March 20, 2007, we declared a partial first quarter cash dividend of \$0.1225 per Class A share for the period beginning February 8, 2007 (the pricing date of our initial public offering) through March 31, 2007. The dividend was paid on April 13, 2007 to holders of record of our Class A shares on March 30, 2007. The aggregate amount of this dividend payment was \$11.6 million. In connection with this dividend, a distribution of \$39.4 million was declared from Fortress Operating Group to the principals and dividend equivalent payments of \$3.0 million were made to holders of restricted Class A share units.

Capital Commitments

We determine whether to make capital commitments to our private equity funds in excess of the minimum required amounts based on a variety of factors, including estimates regarding our liquidity over the estimated time period during which commitments will have to be funded, estimates regarding the amounts of capital that may be appropriate for other funds which we are in the process of raising or are considering raising, and our general working capital requirements.

We generally fund our principal investments in the Fortress Funds with cash, either from working capital or borrowings, and not with carried interest. We do not hold any principal investments in the funds other than through the Fortress Operating Group entities. Our principals do not own any portion of the carried interest in any fund personally. Accordingly, their personal investments in the funds are funded directly with cash.

56

Our capital commitments to our funds with outstanding commitments as of March 31, 2007 consisted of the following:

	Outstanding Commitment
Private Equity Funds	
Fund II	\$ 1,992
Fund III	3,763
Fund III Co	10
FRID	2,632
Fund IV	59,226
Fund IV Co	62
FICO	12
FHIF	8,474
LDVF	665
LDVF II	3,997
LDVF III	401
Total	\$ 81,234

In May 2007, we formed a new private equity Fortress Fund known as Fortress Investment Fund V (“Fund V”) that is expected to have total capital commitments from third-party investors of \$4.0 billion. We have committed to contribute at least 1.5% of Fund V’s total equity from third party investors. We have entered into management agreements with the Fund V entities and will manage Fund V under essentially the same terms as the other private

equity Fortress Funds, including management fees and incentive income.

Lease Obligations

Minimum future rental expense under our operating leases is as follows:

April 1 to December 31, 2007	\$ 10,255
2008	13,053
2009	12,491
2010	12,054
2011	9,094
2012	6,038
Thereafter	22,857
Total	\$ 85,842

Debt Obligations

As of March 31, 2007, our debt obligations consisted of our aircraft loan and our credit agreement, as described below.

In 2002, we borrowed \$2.9 million collateralized by our interest in an aircraft (the “Aircraft Loan”), of which \$2.2 million was outstanding as of March 31, 2007. This loan bears interest at LIBOR plus 2.25% and matures in July 2007. We have hedged our exposure to the risk of changes in market interest rates with respect to this loan by entering into an interest rate swap, which fixes the effective interest rate on this loan at approximately 6.80% through maturity.

In March 2005, we entered into a new \$175 million credit agreement (the “2005 Credit Agreement”), which, among other things, refinanced the \$98.5 million credit facility. The 2005 Credit Agreement bore interest at LIBOR plus 2.75% and was subject to unused commitment fees of 0.375% per annum and letter of credit fees of 2.75% per annum.

The 2005 Credit Agreement was collateralized by substantially all of our assets as well as our rights to fees from the Fortress Funds and our equity interest therein. In connection with the 2005

57

Credit Agreement, fees of approximately \$2.6 million were incurred. In December 2005, the agreement was amended to increase the available line by \$70.1 million. In connection with this amendment, fees of approximately \$1.8 million were incurred.

In June 2006, we entered into a new \$750 million credit agreement (the “2006 Credit Agreement”). Borrowings under the 2006 Credit Agreement bear interest at LIBOR plus 2.00%, with the agreement being subject to unused commitment fees of 0.375% per annum. The purpose of the 2006 Credit Agreement was to refinance the 2005 Credit Agreement described above, to make funds available for investments in the various existing and new Fortress Funds, and to make a one-time \$250 million distribution of capital to our principals. In connection with the repayment of the

prior credit facility, deferred loan costs of \$3.1 million were written off to interest expense in June 2006.

As a result of the initial public offering, we became subject to a reduced unused commitment fee of 0.25% and a letter of credit fee of 1.50% and borrowings under the 2006 Credit Agreement accrued interest at a rate equal to (i) with respect to LIBOR loans, LIBOR plus 1.50% and (ii) with respect to base rate loans, the base rate, as defined in the credit agreement, plus 0.50%. In connection with the initial public offering, \$250 million of the term loan and \$85 million of the revolving credit facility under the 2006 Credit Agreement were repaid. In connection with the partial pay-down of the existing credit facility, deferred loan costs of \$2.0 million were written off to interest expense.

On May 10, 2007, we entered into a new \$1 billion credit agreement (the “2007 Credit Agreement”) in order to refinance the 2006 Credit Agreement described above, reduce the amount of interest and other fees payable under our credit facilities and increase the amount of funds available for investments.

The credit facilities available under the 2007 Credit Agreement include a \$200 million revolving credit facility (including a \$25 million letter of credit subfacility), a \$350 million term loan facility and a \$450 million delayed term loan facility. Borrowings and letters of credit issued under the 2007 Credit Agreement bear interest at a rate equal to (i) with respect to LIBOR loans, LIBOR plus 1.20% or (ii) with respect to base rate loans, the base rate, as defined in the agreement, plus 0.20%, with such rates subject to reduction upon the receipt of specified debt ratings by S&P and Moody’s. In addition, we will be required to pay a commitment fee of 0.375% per annum on the unused portion of amounts available under our revolving credit facility and our delayed term loan facility (provided that the unused commitment fee for the delayed term loan facility will be 0.175% per annum for the first 135 days after closing).

The following table presents summarized information regarding our debt obligations:

Debt Obligation/Collateral Credit Agreement(2)	Face Amount and Carrying Value		Final Stated Maturity	As of March 31, 2007	
	March 31, 2007	December 31, 2006		Weighted Average Funding Cost ⁽¹⁾	Weighted Average Maturity (Years)
Revolving debt	\$ —	\$ 85,000	Jun 2011	0.00%	—
Term loan debt	350,000	600,000	Jun 2011	6.89%	3.43
Aircraft loan	2,153	2,153	Jul 2007	7.13%	0.25
Total	\$352,153	687,153		6.89%	3.41
Consolidated Fortress Fund debt		2,619,456			
Total		\$3,306,609			

(1) Including the effect of the applicable hedge in the case of the aircraft loan.

(2) Approximately \$500 million was available under this credit agreement as of March 31, 2007. Consistent with the terms of the credit agreement, the weighted average maturity of the debt drawn on the credit agreement has been calculated on an accelerated scale since the initial public offering occurred before December 31, 2007.

Covenants

Fortress Operating Group is required to prepay the 2007 Credit Agreement upon the occurrence of certain events, including asset sales and other dispositions.

The 2007 Credit Agreement includes customary covenants. Among other things, the borrowers are prohibited from incurring additional indebtedness or further encumbering their assets, subject to certain exceptions. In addition, Fortress Operating Group must not:

- Permit the assets under management subject to management fee to be less than \$18 billion during fiscal year 2007, plus an additional \$500 million during each subsequent fiscal year;
- Permit the EBITDA, as defined in the Credit Agreement, generated during the previous twelve months to be less than (i) \$375 million as of each of June 30, 2007, or September 30, 2007, (ii) \$400 million as of the end of each of December 31, 2007, March 31, 2008, June 30, 2008, or September 30, 2008, or (iii) \$500 million as of the end of each subsequent fiscal quarter;
- Permit the aggregate value of investments held to be less than the sum of (i) \$550 million plus (ii) the aggregate outstanding amount of any delayed draw term loans plus (iii) an additional \$50 million as of March 31 of each subsequent fiscal year (together, the “Required Investment Assets”);
- Permit the aggregate value of Fortress Fund Investments (generally defined in the Credit Agreement as the stock of Newcastle, Eurocastle and any other publicly traded company pledged as collateral (and any options in respect of such stock), Fortress Operating Group’s interest in the Fortress private equity funds, hedge funds and certain other investment funds) to be less than 40% of the Required Investment Assets; and
- Permit the aggregate value of the sum of (i) the Fortress Fund Investments plus (ii) certain investments in co-investment funds to be less than 60% of the Required Investment Assets (with no single co-investment fund investment exceeding \$75 million).

In addition, under the 2007 Credit Agreement, we are permitted to make cash distributions (i) in order for our shareholders to pay their taxes and (ii) other cash distributions subject to the following restrictions: (a) no event of default exists immediately prior to or subsequent to the distribution and (b) there has been a sufficient amount of free cash flow. Free cash flow as defined in our Credit Agreement is approximately \$163 million, plus EBITDA earned since March 31, 2007, minus interest paid, capital expenditures made and distributions paid since March 31, 2007.

The events of default described under the 2007 Credit Agreement are typical of such agreements and include payment defaults, failure to comply with credit agreement covenants, cross-defaults to material indebtedness, bankruptcy and insolvency, change of control, and adverse events with respect to our material funds.

This summary is qualified by reference to our 2007 Credit Agreement, a copy of which has been filed with the SEC as an exhibit to our current report on Form 8-K dated May 14, 2007.

Cash Flows

Our historical consolidated statements of cash flows reflect the cash flows of Fortress Operating Group as well as those of our consolidated Fortress Funds, which are all investment companies for the period ended March 31, 2007, but included Northcastle, which was not an investment company, for the period ended March 31, 2006.

The consolidated Fortress Funds, on a gross basis, are much larger than Fortress Operating Group and therefore

substantially all of the gross cash flows reflected in our statement of cash flows relate to their activities. The primary cash flow activities of Fortress Operating Group are: (i) generating cash flow from operations, (ii) making investments in Fortress Funds (these cash flows are eliminated in consolidation), (iii) meeting financing needs through the credit agreement, and (iv) distributing cash flow to equity holders. The primary cash flow activities of the consolidated Fortress

59

Funds are: (i) raising capital from their investors, which have historically been reflected as Principals' and others' interests in equity of consolidated subsidiaries in our financial statements, (ii) using this capital to make investments, (iii) financing certain investments with debt, (iv) generating cash flow from operations through the realization of investments, and (iv) distributing cash flow to investors.

As described above in “— Results of Operations” our AUM, which are primarily representative of the net assets within the Fortress Funds, have grown significantly throughout the periods reflected in our financial statements included in this Quarterly Report on Form 10-Q. This growth is a result of these funds raising and investing capital, and generating gains from investments, during these periods. Their cash flows, which are reflected in our statement of cash flows for consolidated Fortress Funds, have increased substantially as a result of this growth. This growth is the primary cause of increases in the gross cash flows reflected in our statement of cash flows.

Our dividend policy has certain risks and limitations, particularly with respect to liquidity. Although we expect to pay dividends in accordance with our dividend policy, we may not pay the amount of dividends suggested by our policy, or at all, if, among other things, we do not have the cash necessary to pay the intended dividends. To the extent we do not have cash on hand sufficient to pay dividends, we may have to borrow funds to pay dividends, or we may determine not to borrow funds to pay dividends. By paying cash dividends rather than investing that cash in our future growth, we risk slowing the pace of our growth, or not having a sufficient amount of cash to fund our operations or unanticipated capital expenditures, should the need arise.

Although we are not aware of any issue that would cause the IRS to challenge a tax basis increase, our principals will not reimburse the corporate taxpayers for any payments that have been previously made under the tax receivable agreement. As a result, in certain circumstances, payments could be made to our principals under the tax receivable agreement in excess of the corporate taxpayers' cash tax savings. The corporate taxpayers' ability to achieve benefits from any tax basis increase, and the payments to be made under this agreement, will depend upon a number of factors, including the timing and amount of our future income.

Operating Activities

Our net cash flow (used in) operating activities was (\$1,320.2) million and (\$2,116.0) million during the three months ended March 31, 2007 and 2006, respectively. These amounts primarily include net purchases of investments by consolidated Fortress Funds, which are investment companies, after proceeds from sales of investments, of (\$1,707.1) million and (\$1,296.5) million during those periods, respectively, which are reflected as operating activities pursuant to investment company accounting.

As of March 31, 2007, we had \$27.4 million remaining in deferred management and incentive fee receivables due from our hedge funds. During the period, we collected \$454.6 million from our hedge funds related to these receivables and distributed these amounts to our principals and other interests in consolidated subsidiaries. Following

these transactions, all of the deferred fee arrangements were terminated.

The consolidation of the Fortress Funds and this voluntary deferral of fees caused our historical cash flows from operations to be negative. We do not expect this to be the case in the second quarter, subsequent to the discontinuation of the voluntary deferral of fees and the deconsolidation of the Fortress Funds.

Investing Activities

Our net cash flow (used in) investing activities was (\$10.8) million and (\$29.7) million during the three months ended March 31, 2007 and 2006, respectively. Our investing activities primarily included: (i) purchases, net of proceeds from sales of investments, of loan and security investments by one of our consolidated Fortress Funds, which is not an investment company, of \$0.3 million and (\$26.2) million during those periods, respectively, (ii) contributions to equity method investees, of (\$9.4) million and (\$0.2) million during those periods, respectively, (iii) distributions of capital from equity method investees of \$2.3 million in the 2007 period, and (iv) purchases of fixed assets, of (\$4.2) million and (\$3.3) million during those periods, respectively.

60

Financing Activities

On December 18, 2006, the principals entered into a securities purchase agreement with Nomura, pursuant to which Nomura acquired a then 15% indirect stake in Fortress Operating Group for \$888 million, all of the proceeds of which were paid to the principals. On January 17, 2007, Nomura completed the transaction by purchasing 55,071,450 of our Class A shares for \$888 million and we, in turn, purchased 55,071,450 Fortress Operating Group limited partnership units, which then represented 15% of Fortress Operating Group's economic interests, and the sole general partner interest, from the principals for \$888 million.

In addition, on February 8, 2007, we completed an initial public offering of 39,248,900 of our Class A shares, for net proceeds of approximately \$652.7 million.

Our net cash flow provided by financing activities was \$1,622.4 million and \$2,136.0 million during the three months ended March 31, 2007 and 2006, respectively. Our financing activities included (i) contributions made by, net of distributions made to, the investors in our consolidated Fortress Funds, historically reflected as other interests in consolidated subsidiaries, of \$1,522.8 million and \$2,079.3 million during those periods, respectively, (ii) distributions made to principals between January 1, 2007 and January 16, 2007 of \$415.9 million as compared to \$37.2 million distributed for the three months ended March 31, 2006, and (iii) our net borrowing and repayment activity.

Critical Accounting Policies

Consolidation

Historically, we consolidated certain of the Fortress Funds as a result of owning a substantive, controlling general partner interest in these entities, or, for variable interest entities, by being their primary beneficiary. We had operational discretion and control of these funds combined with the limited partners' limited substantive rights to impact their ongoing governance and operating activities which resulted in their being consolidated by us; however, in

no case were we the majority equity holder. In connection with the initial public offering, Fortress granted rights effective March 31, 2007 to the investors in the consolidated Fortress Funds to provide a simple majority of the unrelated limited partners with the ability to liquidate the funds without cause or otherwise have the ability to exert control over the funds, resulting in the deconsolidation of these funds for financial reporting purposes.

The analysis as to whether to consolidate an entity is subject to a significant amount of judgment. Some of the criteria considered are the determination as to the degree of control over an entity by its various equity holders, the design of the entity, how closely related the entity is to each of its equity holders, the relation of the equity holders to each other and a determination of the primary beneficiary in entities in which we have a variable interest. These analyses involve estimates, probability weighting of subjectively determined cash flow scenarios, and other estimates based on the assumptions of management.

Fortress Operating Group's combined financial statements reflected the assets, liabilities, revenues, expenses and cash flows of the consolidated Fortress Funds on a gross basis. Our investors' interests in these funds, which are the majority ownership interests, have historically been reflected as other interests in consolidated subsidiaries in these financial statements. The management fees and incentive income earned by Fortress from the consolidated Fortress Funds were eliminated in consolidation; however, our allocated share of the net income from these funds was increased by the amount of these eliminated fees. Accordingly, the consolidation of these Fortress Funds had no net effect on our net earnings from the Fortress Funds and the deconsolidation of the funds likewise has no net effect on Fortress's earnings. The deconsolidation will have the effect of restoring the presentation of management fees and incentive income from the Fortress Funds that had been eliminated in consolidation.

Revenue Recognition on Incentive Income

Incentive income is calculated as a percentage of the profits earned by the Fortress Funds subject to the achievement of performance criteria. Incentive income from certain of the private equity funds

61

we manage is subject to contingent repayment (or clawback) and may be paid to us as particular investments made by the funds are realized. If, however, upon liquidation of a fund the aggregate amount paid to us as incentive income exceeds the amount actually due to us based upon the aggregate performance of the fund, the excess is required to be returned by us (i.e. "clawed back") to that fund. We have elected to adopt the preferred method of recording incentive income subject to contingencies, Method 1 of Emerging Issues Task Force Topic D-96 "Accounting for Management Fees Based on a Formula." Under this method, we do not recognize incentive income subject to contingent repayment until all of the related contingencies have been resolved. Deferred incentive income related to a particular private equity fund, each of which has a limited life, would be recognized upon the termination of a private equity fund, or when distributions from a fund exceed the point at which a clawback of a portion or all of the historic incentive income distributions could no longer occur. Recognition of incentive income allocated to us prior to that date is deferred and recorded as a deferred incentive income liability. For GAAP purposes, the determination of when incentive income is recognized as income is formulaic in nature, resulting directly from each fund's governing documents.

Profit Sharing Arrangements

Pursuant to employment arrangements, certain of Fortress's employees are granted profit sharing interests and are thereby entitled to a portion of the incentive income realized from certain Fortress Funds, which is payable upon a realization event within the respective funds. Accordingly, incentive income resulting from a realization event within a fund gives rise to the incurrence of a profit sharing obligation. Amounts payable under these profit sharing plans are recorded as compensation expense when they become probable and reasonably estimable.

For profit sharing plans related to hedge funds, where incentive income is received on a quarterly or annual basis, the related compensation expense is accrued during the period for which the related payment is made.

For profit sharing plans related to private equity funds, where incentive income is received as investments are realized but is subject to clawback (see "Revenue Recognition on Incentive Income" above), although Fortress defers the recognition of incentive income until all contingencies are resolved, accruing expense for employee profit sharing is based upon when it becomes probable and reasonably estimable that incentive income has been earned and therefore a profit sharing liability has been incurred. Based upon this policy, the recording of an accrual for profit sharing expense to employees generally precedes the recognition of the related incentive income revenue.

Our determination of the point at which it becomes probable and reasonably estimable that incentive income will be earned and therefore a corresponding profit sharing expense should be recorded is based upon a number of factors, the most significant of which is the level of realized gains generated by the underlying funds that may ultimately give rise to incentive income payments. Accordingly, profit sharing expense is generally recorded upon realization events within the underlying funds. A realization event has occurred when an investment within a fund generates proceeds in excess of its related invested capital, such as when an investment is sold at a gain. Changes in the judgments and estimates made in arriving at the appropriate amount of profit sharing expense accrual could materially impact net income.

As of March 31, 2007, Fortress has recognized and paid compensation expense under its employee profit sharing arrangements in connection with the \$225.8 million of distributed incentive income from private equity funds. If the \$1,119.2 million of undistributed incentive income from private equity funds was realized, Fortress would recognize and pay an additional \$400.4 million of compensation expense.

Valuation of Investments

As a result of the deconsolidation described above, our investments in the Fortress Funds are accounted for under the equity method. The Fortress Funds themselves apply specialized accounting principles specified by the AICPA Audit and Accounting Guide – Investment Companies. As such,

62

our results are based on the reported fair value of the funds as of the reporting date with our pro rata ownership interest (based on our principal investment) in the changes in each fund's NAV reflected in our results of operations. Fair value generally represents the amount at which an investment could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. We are the manager of these funds and in certain cases participate in the valuation of underlying investments, many of which are illiquid and/or without a public market. The fair value of these investments is generally estimated based on either values provided by independent valuation agents, who use their own proprietary valuation models, or proprietary models developed by us, which include discounted cash flow analyses and other techniques and may be based, at least in part, on independently

sourced market parameters. The material estimates and assumptions used in these models include the timing and expected amount of cash flows, the appropriateness of discount rates used, and, in some cases, the ability to execute, timing of, and estimated proceeds from expected financings. The values arrived at may be adjusted if, when estimating the value, it is determined that a more accurate value can be obtained from recent trading activity or by incorporating other relevant information that may not have been reflected in pricing obtained from the models. Fair values obtained from external sources are rarely (less than 1% of our value estimates) adjusted in this manner. Significant judgment and estimation goes into the assumptions which drive these models and the actual values realized with respect to investments could be materially different from values obtained based on the use of those estimates. The valuation methodologies applied impact the reported value of our investments in the Fortress Funds in our consolidated financial statements as of March 31, 2007.

Private Equity Funds

Under the valuation policies and guidelines of our private equity funds, investments are categorized into two types of securities: those for which there is a market quotation and those for which there is no market quotation. Securities for which there is a market quotation are valued at their quoted market price. A discount may be applied to those securities with sale restrictions. Securities for which there is no market quotation are referred to as private securities and are valued at fair value. Our guidelines state that the fair values of private securities are generally based on the following methods:

1. Public market transactions of similar securities
2. Private market transactions of similar or identical securities
3. Analytical methods

Our private equity funds have never based a valuation of a private security upon public or private market transactions in a similar security. There have been no circumstances to date in which a security in a public market transaction, or a private market transaction of which we were aware, has been considered to be sufficiently similar to a private security owned by one of our private equity funds to be used as a measure of valuation for such private security investment.

Our private equity funds have used the price of private market transactions in identical securities as a valuation method for investments. In cases in which there has been a significant private transaction in a private security held by our private equity funds, the value of private equity fund investments in the private security are based upon the price of such recent private transaction in that security and no sensitivity analysis is used. Based on this guideline, the value of an investment is considered to be its purchase price for a period of one year after the date of acquisition, unless a more recent transaction has occurred.

If the fair value of private security investments held by our private equity funds cannot be valued by reference to a public or private market transaction, then the primary analytical method used to estimate the fair value of such private securities is the discounted cash flow method. Sensitivity analysis is applied to the estimated future cash flows using various factors depending on the investment, including assumed growth rates (in cash flows), capitalization rates (for determining terminal values) and appropriate discount rates based on the investment to determine a range of reasonable values. The valuation based on the inputs determined to be the most probable is used as

companies (for example, EBITDA multiples) to value private securities.

Liquid Hedge Funds

The vast majority of the investments in our liquid hedge funds are valued based on quoted market prices. Investments valued based on other observable market parameters in our liquid hedge funds are made up almost entirely of interest rate swaps and swaptions, equity swaps and foreign exchange swaps which are valued by the independent fund administrator using models with significant observable market parameters. The fair value of interest rate swaps and swaptions is calculated using the market price of the relevant interest rate and an appropriate discount rate to determine a present value. The fair value of equity swaps and foreign exchange swaps is calculated using the market price of the underlying stock or foreign exchange pair, plus the financing cost of carrying the transaction. The fair value of these investments is also confirmed independently with the counterparty to the transaction.

Hybrid Hedge Funds

In our hybrid hedge funds, investments are valued using quoted market prices, to the extent available. Independent valuation agents are used by our hybrid hedge funds to provide estimates of the fair value of investments for which quoted market prices are not available. For investments in our hybrid hedge funds, we understand that the independent valuation agents use some or all of the following methods and techniques to estimate the fair value of the relevant type of investments:

Private Loans

The most common method used to value private loans is a discounted cash flow analysis. In this method, the estimated future payments to be made by the borrower under the loan agreement are discounted to the present using a discount rate appropriate to the risk level of the borrower.

If it is likely that a borrower will not be able to repay a loan in full, the loan may be valued by estimating how much the borrower will be able to repay based on obtaining refinancing from a new lender. Under this method, the borrower's business must be examined in detail, and then compared to known loans in the market to estimate how much the borrower will likely be able to borrow, and therefore repay under the existing loan. If the amount likely to be able to be refinanced is less than the total payments due under the loan, the fair value of the loan will be reduced.

Another method used to value loans that may not be repaid in full is to value the total amount of assets of the borrower that might be sold to raise proceeds to repay the loan if necessary. Under this method, all assets of the borrower must be analyzed and valued. If the total value is less than the total payments due under the loan, the fair value of the loan will be reduced.

Asset-backed securities and collateralized debt obligations for which there are no quoted market prices are valued using a discounted cash flow analysis based on the estimated cash flows to be generated by the relevant underlying assets and the appropriate interest rate based on the nature of the underlying assets.

Real estate is usually valued based on sales of comparable property. The value of real estate which is net leased is also influenced by the credit quality of major tenants, as their ability to make lease payments is relevant to the value of the property under lease.

Sensitivity

A 10% net change in the fair value of the investments held by all of our funds (other than a permanent impairment) would have the following effects for the three months ended March 31, 2007:

	GAAP Basis		
	Management Fees	Incentive Income	Investment Income (Unrealized Gains and Losses)
Private equity funds	None (A)	None (B)	Generally, a 10% immediate change in earnings from equity method investees. Since we generally have a 1% – 5% investment in these funds, the dollar effect would be 0.1% – 0.5% (1% – 5% of 10%) of the dollar change in values.
Hybrid & Liquid Hedge funds	10% annual change in management fees from these funds, subsequent to the change in value.	Generally, a 10% immediate change in incentive income from these funds. Since the incentive income is generally equal to 20% – 25% of fund returns, the dollar effect would be 2% – 2.5% of the dollar change in values.	Generally, a 10% immediate change in earnings from equity method investees. Since we generally have a 1% – 5% investment in these funds, the dollar effect would be 0.1% – 0.5% (1% – 5% of 10%) of the dollar change in values.
Castles	None	None	None

(A) For funds formed after March 2006 which are no longer in the commitment period, a 10% change in the fair value of investments held in publicly traded entities would affect management fees by 10% of the management fees based on the value of such investments on a prospective basis, subsequent to the change in value.

(B) Except for one private equity fund whose incentive income is not subject to clawback, where the effect would be similar to that on a hedge fund.

A 10% increase or decrease in the fair value of investments held by Fortress Funds as of March 31, 2007 would have increased or decreased our results on an unconsolidated basis for the three quarters ended March 31, 2007 by \$187.5 million or (\$104.8 million), respectively. These changes are comprised of an increase or decrease of incentive income from hedge funds of \$127.9 million or (\$45.3 million), respectively, and of an increase or decrease of earnings from equity method investees from private equity funds of \$27.9 million, liquid hedge funds of \$3.2 million, and hybrid hedge funds of \$28.4 million.

As discussed above, the determination of investment fair values involves management's judgments and estimates. The degree of judgment involved is dependent upon the availability of quoted market prices or observable market

Edgar Filing: Fortress Investment Group LLC - Form 10-Q

parameters. The following table summarizes the investments held by the Fortress Funds by valuation methodology as of March 31, 2007.

65

	Private Equity Funds	Liquid Hedge Funds	Hybrid Hedge Funds	Total Investment Company Funds
Fair Value Based on Quoted market prices	62%	70%	24%	54%
Other observable market parameters (including valuations based on reports of independent valuation agents and internal models with significant observable market parameters)	5%	29%	73%	27%
Internal models with significant unobservable market parameters	33%	1%	3%	19%
Total	100%	100%	100%	100%

As of March 31, 2007, \$4,785.7 million of investments in our private equity funds, \$63.3 million of investments in our liquid hedge funds and \$212.1 million of investments in our hybrid hedge funds are valued by internal models with significant unobservable market parameters. A 10% increase or decrease in the value of investments held by the Fortress Funds valued through internal models with significant unobservable market parameters would have had the following increase or decrease on our results on an unconsolidated basis for the three months ended March 31, 2007, consistent with the table above:

	Private Equity Funds	Liquid Hedge Funds	Hybrid Hedge Funds
Management fees, on a prospective basis	N/A (A)	\$0.1 million	\$0.4 million
Incentive fees	N/A (B)	\$1.3 million or (\$0.5 million)	N/A (C)
Earnings from equity method investees	\$9.3 million	\$0.0 million	\$0.9 million

- (A) Private equity fund management fees would be unchanged as, for investments in non-publicly traded securities, they are not based on the value of the funds, but rather on the amount of capital invested in the funds.
- (B) Private equity fund incentive income would be unchanged as it is not recognized until received and all contingencies are resolved. Furthermore, incentive income would be based on the actual price realized in a transaction, not on a valuation.
- (C) Hybrid Hedge fund incentive income would be unchanged as it is not recognized until received and all contingencies are resolved in the fourth quarter.

The effects on private equity fees and income assume that a decrease in value does not cause a permanent write-down of investments below their associated invested capital. Our equity, net income, and overall financial condition (as well as results of operations following the deconsolidation of the consolidated Fortress Funds) are only moderately sensitive to changes in these assumptions and estimates.

Income Taxes

Historically, we operated as a limited liability company which was not subject to U.S. federal and had limited state income taxes. However, certain of our consolidated subsidiaries are subject to UBT on their trade and business activities conducted in New York City. The UBT rates vary significantly between the rate applicable to income from business activities and the rate applicable to income from investment activities. Allocation of income between business activities and investing activities is subject to detailed and complex rules applied to facts and circumstances that generally are not readily determinable at the date financial statements are prepared. Accordingly, estimates are made of income

66

allocations in computing our effective tax rate that might be different from actual allocations determined when tax returns are prepared by investee companies and subsidiaries.

As a result of the completion of the transactions resulting from the initial public offering, and the reorganization of our businesses, FIG Corp. is subject to U.S. federal and state income tax on income allocated to it from Fortress Operating Group. FIG Corp.'s carrying value of Fortress Operating Group is higher for income tax purposes than for financial reporting purposes. The net deferred tax asset that has been recognized for this difference is limited to the tax benefit expected to be realized in the foreseeable future. This benefit was estimated based on a number of factors, with an important factor being the amount of unrealized gains in all of the net assets of Fortress Operating Group existing for tax purposes at the date of the reorganization that are expected to be realized for tax purposes in the foreseeable future. If our estimate of the unrealized gains at the date of our initial public offering that actually will be realized in the future increases or decreases, deferred income tax expense or benefit will be recognized.

For the period January 17, 2007, the reorganization date, through March 31, 2007, an estimated annual (January 17, 2007 through December 31, 2007) negative effective tax rate was used to compute the tax provision on our income subject to U.S. federal income taxes. We incurred a loss before income taxes for financial reporting purposes, after deducting the compensation expense arising from the principals' forfeiture agreement (See Note 7 to Part I, Item I, "Financial Statements — Equity-Based Compensation"). However, this compensation expense is not deductible for income tax purposes and therefore our taxable loss is substantially less than the loss before income taxes for financial reporting purposes. Also, after the reorganization, a portion of our income is still not subject to U.S. federal corporate income tax but is allocated directly to our shareholders.

The actual effective tax rate for the entire quarter is significantly different than the effective tax rate above primarily because (i) all of the income earned by the predecessor prior to January 17, 2007 was earned through partnerships and only subject to the New York City UBT; and (ii) sufficient income was earned by the predecessor prior to January 17, 2007 such that there was income for the quarter as compared to a loss incurred by us for the period from January 17, 2007 through March 31, 2007.

As a result of the foregoing, our effective tax rate for GAAP reporting purposes may be subject to significant variation from period to period.

67

Equity-Based Compensation

We currently have seven categories of equity-based compensation which are accounted for as described in the table below. A total of 115,000,000 Class A shares have been authorized for issuance under our equity-based compensation plan. RSUs are Class A restricted share units which entitle the holder to receive Class A shares on various future dates if the applicable service conditions, if any, are met. LTIP means long-term incentive plan.

Granted To	Type of Award	Service Conditions (A)	Entitled to Dividends (B)	Accounting
Employees	RSUs	Yes	Yes	Fair value at grant date (D) expensed over service period.
	RSUs	Yes	No	Fair value at grant date (D) discounted for the non-entitlement to dividends, expensed over service period.
	RSUs	No	Yes	Fair value at grant date (D) discounted for post-vesting restrictions (delivery of shares as described in (B)), expensed at grant date.
	RSUs	No	No	Fair value at grant date (D) discounted for the non-entitlement to dividends and further discounted for post-vesting restrictions (delivery of shares as described in (B)), expensed at grant date.
Directors	LTIP (C)	Yes (C)	(C)	Fair value at grant date, based on a valuation model, expensed over service period. Subsequent changes in fair value, through the vesting date, expensed over remaining service period with a cumulative catch-up adjustment in the period of change.
	Restricted Shares	Yes	Yes	Fair value at grant date (D) expensed over service period.
Employees of our Private Equity Funds	RSUs	Yes	No	Fair value at grant date (D) discounted for the non-entitlement to dividends, expensed over service period. Subsequent changes in fair value, through the vesting date, expensed over remaining service period with a cumulative catch-up adjustment in the period of change.

(A) Generally, such awards vest 25% at each of January 1, 2010, 2011, 2012, and 2013 (for employees) and 33 1/3% after each of our annual meetings in 2008, 2009 and 2010 (for directors). Certain

employees (primarily those hired after the IPO) have different vesting schedules.

- (B) Vested Class A shares will be delivered to employee grant recipients 25% of each of, or within no more than six months after, January 1, 2010, 2011, 2012, and 2013 (for employees). Director restricted shares were delivered effective on the grant date. Certain awards entitle the recipient to receive dividend equivalent payments prior to such delivery dates.
- (C) Represents a profits interest in respect of certain Fortress Operating Group units that have a maximum value that corresponds to 2.9 million Fortress Operating Group units, granted by one of the principals to one of our employees at the date of the initial public offering. The profits interests have a five-year cliff-vesting service condition.
- (D) For awards granted in connection with the initial public offering, the fair value is based on the initial public offering price. For awards granted subsequent to the IPO, the fair value is based on the closing price on the grant date of Fortress' Class A shares.

68

The aggregate fair value of each of the RSU grants that are subject to service conditions is reduced by an estimated forfeiture factor (that is, the estimated amount of awards which will be forfeited prior to vesting). The estimated forfeiture factor is based upon historic turnover rates within our company adjusted for the expected effects of the grants on turnover and other factors in the best judgment of management. The estimated forfeiture factor is updated at each reporting date.

The following elements of the above described accounting are subject to significant judgment and estimation:

- The estimated forfeiture factor.
- The discount related to RSUs which do not entitle the recipients to dividend equivalents prior to the delivery of Class A shares. This discount was based on the estimated present value of dividends to be paid during the service period, which in turn was based on an estimated initial dividend rate, an estimated dividend growth rate and a risk-free discount rate of like term.
- The discount related to RSUs with no service conditions which are subject to the delayed delivery of Class A shares, which occurs in periods subsequent to the grant date. This discount was based on the estimated value of a put option on such shares over the delayed delivery period since essentially this would be the value of owning, and being able to trade, those shares during the delayed delivery period rather than having to wait for delivery. This estimated value was in turn derived from a binomial option pricing model based on the following assumptions: volatility, term, dividend rate and risk-free discount rate.
- The estimated fair value of the LTIP awards, which was estimated using a Monte Carlo simulation valuation model, with the following assumptions: volatility, term, and risk-free discount rate.

Each of these elements, particularly the forfeiture factor and the volatility assumptions used in valuing certain awards, are subject to significant judgment and variability and the impact of changes in such elements on equity-based compensation expense could be material.

Recent Accounting Pronouncements

In December 2004, the FASB issued SFAS No. 123 (R), "Share-Based Payment," which requires all equity-based payments to employees to be recognized using a fair value based method. Our policy is to expense all equity-based

compensation awards granted or modified under the fair value recognition provisions of SFAS 123. On January 1, 2006, we adopted SFAS No. 123 (R) using the modified prospective method. Under this method prior period amounts are not restated. The adoption of SFAS 123 (R) did not have a material impact on our historical financial statements.

In June 2006, the Financial Accounting Standards Board (“FASB”) issued Interpretation No. 48, “Accounting for Uncertainty in Income Taxes, an interpretation of SFAS No. 109” (“FIN 48”). FIN 48 requires companies to recognize the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The tax benefit recognized is the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. FIN 48 is effective for fiscal years beginning after December 15, 2006. The adoption of FIN 48 did not have a material impact on our financial condition, liquidity or results of operations.

In February 2006, the FASB issued Statement of Financial Accounting Standards (“SFAS”) No. 155, “Accounting for Certain Hybrid Financial Instruments,” which amends SFAS 133, “Accounting for Derivative Instruments and Hedging Activities,” and SFAS 140, “Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities.” SFAS 155 provides, among other things, that (i) for embedded derivatives which would otherwise be required to be bifurcated from their host contracts and accounted for at fair value in accordance with SFAS 133 an entity may make an irrevocable election, on an instrument-by-instrument basis, to measure the hybrid financial instrument at fair value in its entirety, with changes in fair value recognized in earnings and (ii)

69

concentrations of credit risk in the form of subordination are not considered embedded derivatives. SFAS 155 is effective for all financial instruments acquired, issued or subject to remeasurement after the beginning of an entity’s first fiscal year that begins after September 15, 2006. Upon adoption, differences between the total carrying amount of the individual components of an existing bifurcated hybrid financial instrument and the fair value of the combined hybrid financial instrument should be recognized as a cumulative effect adjustment to beginning retained earnings. Prior periods are not restated. The adoption of SFAS 155 did not have a material impact on our financial statements.

In September 2006, the FASB cleared Statement of Position No. 07-1, “Clarification of the Scope of the Audit and Accounting Guide — Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies” (“SOP 07-1”) for issuance. SOP 07-1 addresses whether the accounting principles of the Audit and Accounting Guide for Investment Companies may be applied to an entity by clarifying the definition of an investment company and whether those accounting principles may be retained by a parent company in consolidation or by an investor in the application of the equity method of accounting. SOP 07-1 will apply to reporting periods beginning on or after December 15, 2007. We are currently evaluating the potential effect on our financial condition, liquidity and results of operations upon adoption of SOP 07-1.

In September 2006, the FASB issued SFAS No. 157, “Fair Value Measurements.” SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the market in which the reporting entity transacts, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. SFAS 157 applies to reporting periods beginning after November 15, 2007. The adoption of SFAS 157 is not expected to have a material impact on our financial condition, liquidity or results of operations.

In February 2007, the FASB issued SFAS No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities.” SFAS 159 permits entities to choose to measure many financial instruments, and certain other items, at fair value. SFAS 159 also establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. SFAS 159 applies to reporting periods beginning after November 15, 2007. We are currently evaluating the potential effect on its financial condition, liquidity and results of operations upon adoption of SFAS 159.

Market Risks

Our predominant exposure to market risk is related to our role as investment manager for the Fortress Funds and the sensitivities to movements in the fair value of their investments on management fee and incentive income revenue. Our investment in the funds will continue to impact our net income in a similar way after the deconsolidation of the Fortress Funds. For a discussion of the impact of market risk factors on our financial instruments refer to Part I, Item 3 “Quantitative and Qualitative Disclosures About Market Risk” and “— Application of Critical Accounting Policies — Valuation of Investments.”

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements.

Contractual Obligations

Our future contractual obligations decreased from \$1.10 billion on a pro forma deconsolidated basis as of December 31, 2006 to \$1.05 billion as of March 31, 2007.

As a result of the deconsolidation, the contractual obligations of the Fortress Funds are no longer considered obligations of Fortress as of March 31, 2007. These contracts include investment company debt obligations that had a total payable balance of \$3.9 billion at December 31, 2006.

Our debt obligations payable decreased from \$836.1 million as of December 31, 2006 (on a pro forma deconsolidated basis) to \$448.5 million as of March 31, 2007, including estimates for interest

70

payments. This decrease was attributable to our completion of an initial public offering on February 8, 2007, of 39,428,900 of our Class A shares, including the underwriters’ over allotment option, for net proceeds of \$652.7 million of which \$250.0 million and \$85.0 million were paid on our outstanding term loan facility and revolving credit facility, respectively. In addition to the pay-down of the debt obligations payable, future interest payable on that obligation payable was reduced.

Our capital commitments, including our commitments to our funds, have decreased by \$44.9 million from \$137.4 million as of December 31, 2006 (on a pro forma deconsolidated basis) to \$92.5 million as of March 31, 2007. This is primarily attributable to a draw down of \$66.8 million of the capital commitment to FHIF. However, this decrease is partially offset by the net effect of an \$80.0 million increase in our capital commitment to Fund IV, of which \$51.5 million was called in the three months ended March 31, 2007.

In February 2007, the corporate taxpayers (i.e., FIG Corp.) entered into a tax receivable agreement with each of the principals that provides for the payment to an exchanging or selling principal of 85% of the amount of cash savings, if any, in U.S. federal, state, local and foreign income tax that the corporate taxpayers actually realize (or are deemed to realize in the case of an early termination payment by the corporate taxpayers or a change of control, as defined) as a result of an increase in the tax basis of the assets owned by Fortress Operating Group at the time of an exchange of a Fortress Operating Group limited partnership unit for one of the Class A shares. Such payments are expected to occur over approximately the next 15 years. In connection with the Nomura transaction and related tax effects, a \$390 million capital decrease and offsetting liability to the principals was recorded with respect to the tax receivable agreement. It is currently anticipated that no payments will be made with respect to the tax receivable agreement in 2007. Starting in 2008 and continuing several years thereafter, it is expected that payments of \$20 to \$25 million per annum will be made pursuant to the tax receivable agreement. This projection is based on several assumptions, including management's expectation that benefits associated with the increase in the tax basis of assets will be realized over the next four years.

The adoption of FIN 48 did not have a material impact on our financial condition, liquidity or results of operations and therefore did not cause us to incur any material contractual obligations.

71

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our predominant exposure to market risk is related to our role as investment manager for the Fortress Funds and the sensitivities to movements in the fair value of their investments on management fee and incentive income revenue.

The fair value of the financial assets and liabilities of the Fortress Funds may fluctuate in response to changes in the value of securities, foreign exchange, commodities and interest rates. Prior to the deconsolidation of the consolidated Fortress Funds, the net effect of these fair value changes impacted the gains (losses) from investments in our consolidated income statements while the majority of these fair value changes were absorbed by the other interest holders in consolidated subsidiaries. As of March 31, 2007 and on a prospective basis, fluctuations in the fair value of the Fortress Funds will continue to directly affect the value of our investments in the Fortress Funds and thereby our earnings from equity method investees, as well as the management fees and incentive income we record, to the extent that they are earned based on fair value or NAV.

Risks are analyzed across funds from the "bottom up" and from the "top down" with a particular focus on asymmetric risk. The company gathers and analyzes data, monitors investments and markets in detail, and constantly strives to better quantify, qualify and circumscribe relevant risks.

Although the Fortress Funds share many common themes, each segment within the investment companies runs their own investment and risk management process subject to the company's overall risk tolerance and philosophy:

- the investment process of our private equity funds involves a detailed analysis of potential acquisitions, and asset management teams assigned to oversee the strategic development, financing and capital deployment decisions of each portfolio investment;
- our hybrid hedge funds and Castles perform extensive credit and cash-flow analysis of borrowers, tenants and credit-based assets, and have extensive asset management teams that

monitor covenant compliance by, and relevant financial data of, borrowers, tenants and other obligors, asset pool performance statistics, tracking of cash payments relating to investments, and ongoing analysis of the credit status of investments; and

- our liquid hedge funds continuously monitor a variety of markets for attractive trading opportunities, applying a number of traditional and customized risk management metrics to analyze risk related to specific assets or portfolios, as well as fund-wide risks.

Each segment has an institutional risk management process and related infrastructure to address these risks. The following table summarizes our financial assets and liabilities that may be impacted by various market risks such as equity prices, interest rates and exchange rates as of March 31, 2007:

Assets	
Equity method investees	\$ 620,434
Options in affiliates	136,915
	\$ 757,349
Liabilities	
Derivative liabilities, at fair value	\$ 2,125
Other debt obligations payable	352,153
	\$ 354,278

The Fortress Funds are sensitive to changes in market and exchange rate risk factors that impact management fees and incentive income earned by Fortress Operating Group, which are reflected in our historical consolidated financial statements as an allocation of income from consolidated Fortress Funds. Financial assets and liabilities of Fortress Operating Group that are impacted by changes in the value of securities, foreign exchange, and interest rates are debt obligations payable, options in affiliates and foreign currency forward contracts entered into to economically hedge the risk of fluctuations in foreign currency exchange rates with respect to its foreign investments.

72

Table of Contents

Fortress Funds' Market Risk Impact on Management Fees

Our management fees are based on either: (i) capital commitments to a Fortress Fund, (ii) capital invested in a Fortress Fund, or (iii) the NAV of a Fortress Fund, as described in our historical combined financial statements. Management fees will only be impacted by changes in market risk factors to the extent they are based on NAV. These management fees will be increased (or reduced) in direct proportion to the impact of changes in market risk factors on our investments in the related funds and would occur only in periods subsequent to the change, as opposed to having an immediate impact. The proportion of our management fees that are based on NAV is dependent on the number and types of Fortress Funds in existence and the current stage of each fund's life cycle. As of March 31, 2007, approximately 62.1% of our management fees earned were based on the NAV of the applicable funds.

- Management fees from our hedge funds are based on their NAV, which in turn is dependent on the estimated fair values of their investments. Assuming that there is no change to the investments held by the hedge funds in the next four quarters after March 31, 2007, a 10% change in the fair values of all of the investments held by our hedge funds as of March 31, 2007 would impact future management fees in the next year from our hedge funds by \$24.1 million.

- For private equity funds, management fees of 1% to 1.5% are charged on committed capital during the investment period of a new fund, and then generally on invested capital after the investment period, with the exception of funds formed after March 2006. For funds formed after March 2006 that are no longer in the investment period, management fees are earned on the NAV of investments in publicly traded entities (to the extent they exceed invested capital), and a 10% change in these fair values would impact management fees in the next year by \$0.1 million.
- For Castles, management fees are not calculated based on NAV but instead a 1.5% fee is charged based on the funds' paid-in equity.

Changes in values of investments could indirectly affect future management fees from private equity funds and Castles by, among other things, reducing the funds' access to capital or liquidity and their ability to currently pay the management fees or for private equity funds if such change resulted in a write-down of investments below their associated invested capital. However, these effects would be under very remote circumstances.

Fortress Funds' Market Risk Impact on Incentive Income

Our incentive income is generally based on a percentage of profits of the various Fortress Funds subject to the achievement of performance criteria. Our incentive income will be impacted by changes in market risk factors. However, several major factors will influence the degree of impact: (i) the performance criteria for each individual fund in relation to how that fund's results of operations are impacted by changes in market risk factors, (ii) whether such performance criteria are annual or over the life of the fund, (iii) to the extent applicable, the previous performance of each fund in relation to its performance criteria, and (iv) whether each fund's incentive income is subject to contingent repayment. As a result, the impact of changes in market risk factors on incentive income will vary widely from fund to fund, as summarized below, and is heavily dependent on the prior performance of each fund, and is therefore not readily predicted or estimated.

- Incentive income from our hedge funds, which is quantified in Part I, Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations — Segment Analysis" section, is directly impacted by changes in the fair value of their investments. Incentive income from certain of our hedge funds is earned based on achieving quarterly or annual performance criteria. For the hedge funds with quarterly performance criteria, a 10% decrease to the NAV of the fund on March 31, 2007 would have created a loss to investors for the quarter. In future quarters, this loss would be a "high water mark" (minimum future return to recover the loss to the investors) for our funds' performance prior to any incentive

73

Table of Contents

income being earned by us. This "high water mark" is reset on an annual basis. For the hedge funds with annual performance criteria, a 10% decrease to the NAV of the fund on March 31, 2007, assuming that NAV is constant for the next nine months, would result in no incentive income recorded as revenue at year end (in the fourth quarter of each year).

- Incentive income from our private equity funds is not recorded as revenue but instead is deferred under GAAP until the related clawback contingency is resolved. Deferred incentive income, which is subject to contingencies, will be recognized as revenue to the extent it is received and all the associated contingencies are resolved. Assuming that the deferred incentive income earned to date would be equal to what would be recognized when all contingencies are resolved, a 10% increase or decrease in the fair values of investments held by all of the private

equity funds at March 31, 2007 would increase or decrease future incentive income by \$228.1 million or (\$166.2 million), respectively; however, this would have no effect on our current reported financial condition or results of operations.

- Incentive income from the Castles is not impacted by changes in the fair values of their investments since these changes do not impact the measure of current operating results (i.e. FFO in excess of specified returns to the company's shareholders) upon which the incentive income is calculated. The definition of FFO excludes unrealized changes in the values of the Castles' investments (primarily real estate, loans and securities), except for minor items (for example, the unrealized gain or loss on non-hedge derivatives which make up only an immaterial portion of their assets).

Market Risk

Our investments in the Fortress Funds accounted for under the equity method, to the extent they are investment companies, are directly affected by the impact of changes in market risk factors on the investments held by our Fortress Funds, which could vary significantly from fund to fund. We estimate that a 10% change in the value of our equity method investments in these Fortress Funds would increase or decrease earnings from equity method investees by \$62.0 million.

Interest Rate Risk

Fortress Operating Group has debt obligations payable that accrue interest at variable rates. Interest rate changes may therefore impact the amount of interest payments, future earnings and cash flows. Based on debt obligations payable as of March 31, 2007, we estimate that interest expense relating to variable rate debt obligations payable would increase \$3.5 million on an annual basis in the event interest rates were to increase by one percentage point.

Equity Prices and Exchange Rate Risk

We are not materially exposed to foreign exchange risk since foreign investments are economically hedged by foreign currency forward contracts.

Gains (losses) on options granted to us by one of the Castles are affected by movements in (i) the equity price of the underlying shares and (ii) the rate of exchange between the U.S. dollar and the Euro. Analyzed separately, we estimate that a 10% increase (decrease) in the equity price of the underlying shares of the options on March 31, 2007 would affect gains and losses for the three months ended March 31, 2007 by \$28.1 million and (\$26.7 million), respectively. In the event of a 10% change in the applicable foreign exchange rate against the U.S. dollar on March 31, 2007, we estimate the gains and losses for the three months ended March 31, 2007 in relation to the value of the options would increase or decrease by \$13.4 million.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

- (a) Disclosure Controls and Procedures. The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in

Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of the end of the period covered by this report. The Company’s disclosure controls and procedures are designed to provide reasonable assurance that information is recorded, processed, summarized and reported accurately and on a timely basis. Based on such evaluation, the Company’s Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Company’s disclosure controls and procedures are effective.

75

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

On September 15, 2005, a lawsuit captioned David T. Atkins et al. v. Apollo Real Estate Advisors, L.P. et al., which we refer to as the Brookdale Action, was brought in the United States District Court for the Eastern District of New York on behalf of current and former limited partners in certain investing partnerships related to the sale of certain facilities to Ventas Realty Limited Partnership, or Ventas, an unaffiliated real estate investment trust. It names as defendants, among others, Brookdale Senior Living, Inc. (one of our portfolio companies, which we refer to as Brookdale), Brookdale Living Communities, Inc. (a subsidiary of Brookdale, which we refer to as BLC), GFB-AS Investors, LLC (which we refer to as GFB-AS), a subsidiary of BLC, the general partners of 14 investing partnerships which are alleged to be subsidiaries of GFB-AS, Fortress, and the Chief Financial Officer of Brookdale. Fortress was the investment manager of consolidated Fortress Funds which were controlling shareholders of the private equity portfolio company during the relevant time periods. The suit alleges that the defendants improperly obtained certain rights with respect to such facilities from the investing partnerships. The plaintiffs’ nine count third amended complaint alleges, among other things, (i) that the defendants converted for their own use the property of the limited partners of 11 partnerships, including through the failure to obtain consents the plaintiffs contend were required for the sale of facilities indirectly owned by those partnerships to Ventas; (ii) that the defendants fraudulently persuaded the limited partners of three partnerships to give up a valuable property right based upon incomplete, false and misleading statements in connection with certain consent solicitations; (iii) that certain defendants, not including the company, committed mail fraud in connection with the sale of facilities indirectly owned by the 14 partnerships at issue in the Brookdale Action to Ventas; (iv) that certain defendants committed wire fraud in connection with certain communications with plaintiffs in the Brookdale Action and another investor in a limited partnership; (v) that the defendants committed substantive violations of the Racketeer Influenced and Corrupt Organizations Act, or RICO; (vi) that the defendants conspired to violate RICO; (vii) that GFB-AS and the general partners violated the partnership agreements of the 14 investing partnerships; (viii) that GFB-AS, the general partners, and Brookdale’s Chief Financial Officer breached fiduciary duties to the plaintiffs; and (ix) that the defendants were unjustly enriched. The plaintiffs have asked for damages in excess of \$100 million on each of nine counts, as to which Fortress is a defendant on seven counts, including treble damages with respect to certain counts. Fortress has filed a motion to have itself removed as a named defendant in this case. Brookdale has filed a motion to dismiss the claims and continues to vigorously defend this action. We believe that the resolution of this action will not have a material adverse effect on our financial condition or results of operations.

We may from time to time be involved in litigation and claims incidental to the conduct of our business. Our industry is always subject to scrutiny by government regulators, which could result in litigation related to regulatory compliance matters. As a result, we maintain insurance policies in amounts and with the coverage and deductibles we believe are adequate, based on the nature and risks of our business, historical experience and industry standards. We

believe that the cost of defending any pending or future litigation or challenging any pending or future regulatory compliance matter will not have a material adverse effect on our business. However, increased regulatory scrutiny of hedge fund trading activities combined with extensive trading in our liquid hedge funds may cause us to re-examine our beliefs regarding the likelihood that potential investigation and defense-related costs could have a material adverse effect on our business.

76

Table of Contents

Item 1A. Risk Factors

We face a variety of significant and diverse risks, many of which are inherent in our business. Described below are certain risks that we currently believe could materially affect us. Other risks and uncertainties that we do not presently consider to be material or of which we are not presently aware may become important factors that affect us in the future. The occurrence of any of the risks discussed below could materially and adversely affect our business, prospects, financial condition, results of operations or cash flow.

Risks Related To Our Business

We depend on Messrs. Briger, Edens, Kauffman, Nardone and Novogratz, and the loss of any of their services would have a material adverse effect on us.

The success of our business depends on the efforts, judgment and personal reputations of our principals, Peter Briger, Wesley Edens, Robert Kauffman, Randal Nardone and Michael Novogratz. Our principals' reputations, expertise in investing, relationships with our investors and relationships with members of the business community on whom our funds depend for investment opportunities and financing, are each critical elements in operating and expanding our businesses. We believe our performance is strongly correlated to the performance of these individuals. Accordingly, the retention of our principals is crucial to our success. In addition, if any of our principals were to join or form a competitor, some of our investors could choose to invest with that competitor rather than in our funds. The loss of the services of any of our principals would have a material adverse effect on us, including our ability to retain and attract investors and raise new funds, and the performance of our funds. We do not carry any "key man" insurance that would provide us with proceeds in the event of the death or disability of any of our principals.

Each of our principals has entered into an employment agreement with us. The initial term of these agreements is five years, with automatic one-year renewals until a non-renewal notice is given by us or the principal. If a principal terminates his employment voluntarily or we terminate his employment for cause (as defined in the agreement), the principal will be subject to eighteen-month post-employment covenants requiring him not to compete with us. However, if we terminate a principal's employment without cause, the principal will not be subject to the non-competition provisions.

The principals have also entered into an agreement among themselves, which provides that, in the event a principal voluntarily terminates his employment with us for any reason prior to the fifth anniversary of the consummation of our initial public offering, the principal may be required to forfeit a portion of his Fortress Operating Group units (and the corresponding Class B shares) to the other principals who continue to be employed by the Fortress Operating Group. However, this agreement may be amended by the principals who are then employed by the Fortress Operating Group. We, our shareholders and the Fortress Operating Group have no ability to enforce any provision of this agreement or to prevent the principals from amending the agreement or waiving any of its obligations.

There is no guarantee that our principals will not resign, join our competitors or form a competing company, or that the non-competition provisions in the employment agreements would be upheld by a court. If any of these events were to occur, our business, prospects, financial condition and results of operation would be materially adversely affected.

Several of our funds have “key man” provisions pursuant to which the failure of one or more of our principals to be actively involved in the business provides investors with the right to redeem from the funds or otherwise limits our rights to manage the funds. The loss of the services of any one of Messrs. Briger, Edens or Novogratz, or both of Mr. Kauffman and Mr. Nardone, would have a material adverse effect on certain of our funds and on us.

Investors in most of our hedge funds may generally redeem their investment without paying redemption fees if the relevant principal ceases to perform his functions with respect to the fund for 90 consecutive days. In addition, the terms of certain of our hedge funds’ financing arrangements contain “key man” provisions, which may result, under certain circumstances, in the acceleration of

77

Table of Contents

such funds’ debt or the inability to continue funding certain investments if the relevant principal ceases to perform his functions with respect to the fund and a replacement has not been approved.

The loss or inability of Mr. Novogratz to perform his services for 90 days could result in substantial withdrawal requests from investors in our Drawbridge Global Macro funds (which as of March 31, 2007, had AUM of approximately \$5.9 billion) and, in the event that a replacement is not approved, the termination of a substantial portion of the funds’ financing arrangements. Such withdrawals and terminations would have a material adverse effect on the Drawbridge Global Macro funds by reducing our management fees from those funds and, since the funds would have fewer assets, such withdrawals would reduce the amount of incentive income potential of those funds. Further, such withdrawals and terminations could lead possibly to the liquidation of the funds and a corresponding elimination of our management fees and potential to earn incentive income from those funds. The loss of Mr. Novogratz could, therefore, ultimately result in a loss of substantially all of our earnings attributable to our liquid hedge fund business segment.

The loss or inability of Mr. Briger to perform his services for 90 days could result in substantial withdrawal requests from investors in our Drawbridge Special Opportunities funds (which as of March 31, 2007, had AUM of approximately \$6.9 billion) and, in the event that a replacement for him is not approved, the termination of a substantial portion of the funds’ financing arrangements. Such withdrawals and terminations would have a material adverse effect on the Drawbridge Special Opportunities funds by reducing our management fees from those funds and, since the funds would have fewer assets, such withdrawals would reduce the amount of incentive income potential of those funds. Further, such withdrawals and terminations could lead possibly to the eventual liquidation of the funds and a corresponding elimination of our management fees and potential to earn incentive income from those funds. The loss or inability of Mr. Briger to perform his services or devote an appropriate portion of his business time to the long dated value funds for 90 days would (unless approved by a majority of fund investors) prevent the Drawbridge long dated value funds from making additional investments. This could have a material adverse effect on the long dated value funds, resulting in us receiving reduced management fees and incentive income. The loss of Mr. Briger could, therefore, ultimately result in a loss of substantially all of our earnings attributable to our hybrid hedge fund business segment with respect to the Drawbridge Special Opportunities funds, and a relatively small loss of earnings attributable to our private equity fund business segment with respect to the long dated value funds.

If either Mr. Edens or both of Mr. Kauffman and Mr. Nardone cease to devote certain minimum portions of their business time to the affairs of certain of our private equity funds, the funds will not be permitted to make further investments, and then-existing investments may be liquidated if investors vote to do so. Our ability to earn management fees and realize incentive income from our private equity funds therefore would be adversely affected if we cannot make further investments or if we are required to liquidate fund investments at a time when market conditions result in our obtaining less for investments than could be obtained at later times. In addition, we may be unable to raise additional private equity funds if existing private equity fund key-man provisions are triggered. The loss of either Mr. Edens or both of Mr. Kauffman and Mr. Nardone could, therefore, ultimately result in a loss of substantially all of our earnings attributable to our private equity fund business segment, which as of March 31, 2007, had AUM of approximately \$17.8 billion.

In addition, the decline of more than 20% of its assets under management of a fund following one of such “key-men” events would result in a default under our credit agreement.

Any such events would have a direct material adverse effect on our revenues and earnings, and would likely harm our ability to maintain or grow assets under management in existing funds or raise additional funds in the future.

Our ability to retain our managing directors is critical to our success and our ability to grow depends on our ability to attract additional key personnel.

Our success depends on our ability to retain our managing directors and the other members of our investment management team and recruit additional qualified personnel. We collectively refer to

78

Table of Contents

these key employees (other than our principals) as our investment professionals. We anticipate that it will be necessary for us to add investment professionals as we pursue our growth strategy. However, we may not succeed in recruiting additional personnel or retaining current personnel, as the market for qualified investment professionals is extremely competitive. Our investment professionals possess substantial experience and expertise in investing, are responsible for locating and executing our funds’ investments, have significant relationships with the institutions which are the source of many of our funds’ investment opportunities, and in certain cases have strong relationships with our investors. Therefore, if our investment professionals join competitors or form competing companies it could result in the loss of significant investment opportunities and certain existing investors. As a result, the loss of even a small number of our investment professionals could jeopardize the performance of our funds, which could have a material adverse effect on our results of operations as well as our ability to retain and attract investors and raise new funds. Efforts to retain or attract investment professionals may result in significant additional expenses, which could adversely affect our profitability.

We have experienced rapid growth, which may be difficult to sustain and which may place significant demands on our administrative, operational and financial resources.

Our assets under management have grown from approximately \$1.2 billion as of December 31, 2001 to \$36.0 billion as of March 31, 2007. Our rapid growth has caused, and if it continues will continue to cause, significant demands on our legal, accounting and operational infrastructure, and increased expenses. The complexity of these demands, and the expense required to address them, is a function not simply of the amount by which our assets under management have grown, but of significant differences in the investing strategies of our different funds. In addition, we are

required to continuously develop our systems and infrastructure in response to the increasing sophistication of the investment management market and legal, accounting and regulatory developments. Moreover, the strains upon our resources caused by our growth are compounded by the additional demands imposed upon us now that we are a public company with shares listed on the New York Stock Exchange and, thus, subject to an extensive body of regulations that did not apply to us previously.

Our future growth will depend, among other things, on our ability to maintain an operating platform and management system sufficient to address our growth and will require us to incur significant additional expenses and to commit additional senior management and operational resources. As a result, we face significant challenges:

- in maintaining adequate accounting, financial and business controls,
- implementing new or updated information, financial and disclosure systems and procedures, and
- in training, managing and appropriately sizing our work force and other components of our business on a timely and cost-effective basis.

There can be no assurance that we will be able to manage our expanding operations effectively or that we will be able to continue to grow, and any failure to do so could adversely affect our ability to generate revenue and control our expenses.

Operational risks may disrupt our businesses, result in losses or limit our growth.

We face operational risk from errors made in the execution, confirmation or settlement of transactions. We also face operational risk from transactions not being properly recorded, evaluated or accounted for in our funds. In particular, our liquid and hybrid hedge fund businesses are highly dependent on our ability to process and evaluate, on a daily basis, transactions across markets and geographies in a time-sensitive, efficient and accurate manner. Consequently, we rely heavily on our financial, accounting and other data processing systems. In addition, new investment products we introduce create (and recently introduced products created) a significant risk that our existing systems may not be adequate to identify or control the relevant risks in the investment strategies employed by such new investment products. If any of these systems do not operate properly or are disabled, we could suffer financial loss, a disruption of our businesses, liability to our funds, regulatory intervention and reputational damage.

79

Table of Contents

In addition, we operate in an industry that is highly dependent on its information systems and technology. We believe that we have designed, purchased and installed high-quality information systems to support our business. There can be no assurance, however, that our information systems and technology will continue to be able to accommodate our growth, or that the cost of maintaining such systems will not increase from its current level. Such a failure to accommodate growth, or an increase in costs related to such information systems, could have a material adverse effect on us.

Furthermore, we depend on our headquarters, which is located in New York City, for the operation of our business. A disaster or a disruption in the infrastructure that supports our businesses, including a disruption involving electronic communications or other services used by us or third parties with whom we conduct business, or directly affecting our headquarters, may have an adverse impact on our ability to continue to operate our business without interruption which could have a material adverse effect on us. Although we have disaster recovery programs in place, there can be

no assurance that these will be sufficient to mitigate the harm that may result from such a disaster or disruption. In addition, insurance and other safeguards might only partially reimburse us for our losses.

Finally, we rely on third party service providers for certain aspects of our business, including certain financial operations of our hedge funds. Any interruption or deterioration in the performance of these third parties could impair the quality of the funds' operations and could impact our reputation and adversely affect our business and limit our ability to grow.

The historical and unaudited pro forma financial information included in this report is not necessarily indicative of our future performance.

The historical combined financial information included in this report is not necessarily indicative of our future financial results. Our historical combined financial information consolidates a large number of our significant funds, which will not be consolidated in future periods as a result of the consummation of the deconsolidation of such funds on March 31, 2007. In addition, the historical combined financial information included in this report does not reflect the added costs that we will incur as a public company or the impact of changes in our structure that we implemented immediately after the consummation of our initial public offering in February 2007, for periods prior to that date. Moreover, because we operated through limited liability companies prior to our initial public offering, we paid little or no taxes on profits. However, we are now subject to certain taxation on our profits as a result of the changes we made to our structure in connection with our initial public offering.

The results of future periods are likely to be materially different as a result of:

- the impact of transactions occurring in connection with our initial public offering in relation to the size of the company during earlier periods;
- fund performance in the future which differs from the historical performance reflected in our financial information for earlier periods; and
- the pace of growth of our business in the future, including the formation of new funds, which differs from the historical growth reflected in our financial information for earlier periods.

Accordingly, our historical combined financial information is not intended to be, and should not be regarded as, indicative of our future performance.

In addition, we have provided in this report pro forma financial information regarding the impact of the deconsolidation of a number of Fortress Funds, which took place on March 31, 2007, on our historical combined financial information as of December 31, 2006 and for the three months ended March 31, 2007. The pro forma adjustments, which are based on available information and certain assumptions that we believe are reasonable, have been applied to this historical combined financial information. The pro forma financial information is provided for informational purposes only and does not purport to represent or be indicative of the results that actually would have been obtained had the deconsolidation occurred on December 31, 2006 or January 1, 2007, or that may be obtained for any future period. See Note 12 to Part I, Item 1, "Financial Statements — Pro Forma Financial Information (Unaudited)."

Table of Contents

We derive a substantial portion of our revenues from funds managed pursuant to management agreements that may be terminated or fund partnership agreements that permit investors to request liquidation of investments in our funds on

short notice.

The terms of our funds generally give either the general partner of the fund or the fund's board of directors the right to terminate our investment management agreement with the fund. However, insofar as we control the general partner of our funds which are limited partnerships, the risk of termination of investment management agreement for such funds is limited, subject to our fiduciary or contractual duties as general partner. This risk is more significant for our offshore hedge funds where we do not serve as the general partner. As of March 31, 2007, we had \$6.0 billion of assets under management in our offshore hedge funds.

With respect to our private equity funds formed as registered investment companies, each fund's investment management agreement must be approved annually by the independent members of such fund's board of directors and, in certain cases, by its members, as required by law. Termination of these agreements would reduce the fees we earn from the relevant funds, which could have a material adverse effect on our results of operations.

In addition, following the deconsolidation, investors in any private equity fund and certain hedge funds have the ability to act, without cause, to accelerate the date on which the fund must be wound down. Our ability to realize incentive income from such funds therefore would be adversely affected if we are required to liquidate fund investments at a time when market conditions result in our obtaining less for investments than could be obtained at later times.

In addition, management agreements of our funds which are registered investment companies under the Investment Company Act of 1940 would terminate if we were to experience a change of control without obtaining investor consent. Such a change of control could be deemed to occur in the event our principals exchange enough of their interests in the Fortress Operating Group into our Class A shares such that our principals no longer own a controlling interest in us. We cannot be certain that consents required for the assignment of our investment management agreements will be obtained if such a deemed change of control occurs. In addition, the board of directors of certain hedge funds have the right under certain circumstances to terminate the investment management agreements with the applicable fund. Termination of these agreements would affect the fees we earn from the relevant funds, which could have a material adverse effect on our results of operations.

We are subject to third-party litigation risk that could result in significant liabilities and reputational harm, which could materially adversely affect our results of operations, financial condition and liquidity.

In general, we will be exposed to risk of litigation by our investors if our management of any fund is alleged to constitute gross negligence or willful misconduct. Investors could sue us to recover amounts lost by our funds due to our alleged misconduct, up to the entire amount of loss. Further, we may be subject to litigation arising from investor dissatisfaction with the performance of our funds or from allegations that we improperly exercised control or influence over companies in which our funds have large investments. By way of example, we, our funds and certain of our employees, are each exposed to the risks of litigation relating to investment activities in our funds and actions taken by the officers and directors (some of whom may be Fortress employees) of portfolio companies, such as risks relating to a funds' high-yield lending activities and the risk of shareholder litigation by other shareholders of public companies in which our funds have large investments. In addition, we are exposed to risks of litigation or investigation relating to transactions which presented conflicts of interest that were not properly addressed. In such actions we would be obligated to bear legal, settlement and other costs (which may be in excess of available insurance coverage). In addition, although we are indemnified by the funds we manage, our rights to indemnification may be challenged. If we are required to incur all or a portion of the costs arising out of litigation or investigations as a result of inadequate insurance proceeds or failure to obtain indemnification from our funds, our results of operations, financial condition and liquidity could be materially adversely affected.

Table of Contents

In our liquid hedge funds, we are exposed to the risk of litigation if the funds suffer catastrophic losses due to the failure of a particular investment strategy or due to the trading activity of an employee who has violated market rules and regulations. Any litigation arising in such circumstances is likely to be protracted, expensive and surrounded by circumstances which are materially damaging to our reputation and our business. In addition, we face the risk of litigation from investors in our private equity funds and hybrid hedge funds if we violate restrictions in such funds' organizational documents (for example, by failing to seek approval for related party transactions requiring approval or by exceeding the mandate of such funds).

Our liquid hedge funds, our offshore hybrid hedge fund and many of our private equity funds are incorporated or formed under the laws of the Cayman Islands. Cayman Islands laws, particularly with respect to shareholders rights, partner rights and bankruptcy, may differ from the laws of the United States. Cayman Islands laws could change, possibly to the detriment of our funds and investment management subsidiaries.

In addition, with a workforce consisting of many very highly paid investment professionals, we face the risk of lawsuits relating to claims for compensation, which may individually or in the aggregate be significant in amount. The cost of settling such claims could adversely affect our results of operations.

Our reputation, business and operations could be adversely affected by regulatory compliance failures, the potential adverse effect of changes in laws and regulations applicable to our business and effects of negative publicity surrounding the hedge fund industry in general.

Potential regulatory action poses a significant risk to our reputation and thereby to our business. Our business is subject to extensive regulation in the United States and in the other countries in which our investment activities occur. The Securities and Exchange Commission, or SEC, oversees our activities as a registered investment adviser under the Investment Advisers Act of 1940. In addition, we are subject to regulation under the Investment Company Act of 1940, the Securities Exchange Act of 1934, and various other statutes. We are subject to regulation by the Department of Labor under the Employee Retirement Income Security Act of 1974 or ERISA. We and our Castles, as public companies, are subject to applicable stock exchange regulations, and both we and Newcastle are subject to the Sarbanes-Oxley Act of 2002. A number of our investing activities, such as our lending business, are subject to regulation by various U.S. state regulators. In the United Kingdom, we are subject to regulation by the U.K. Financial Services Authority. Our other European operations, and our investment activities around the globe, are subject to a variety of regulatory regimes that vary country by country.

Each of the regulatory bodies with jurisdiction over us has regulatory powers dealing with many aspects of financial services, including the authority to grant, and in specific circumstances to cancel, permissions to carry on particular businesses. A failure to comply with the obligations imposed by the Investment Advisers Act of 1940 on investment advisers, including record-keeping, advertising and operating requirements, disclosure obligations and prohibitions on fraudulent activities, or by the Investment Company Act of 1940, could result in investigations, sanctions and reputational damage. Our liquid hedge fund business, and, to a lesser degree, our hybrid hedge fund business, are involved regularly in trading activities which implicate a broad number of U.S. and foreign securities law regimes, including laws governing trading on inside information, market manipulation and a broad number of technical trading requirements that implicate fundamental market regulation policies. Violation of such laws could result in severe restrictions on our activities and in damage to our reputation.

Some of our private equity funds currently qualify as venture capital operating companies, or VCOC, and therefore are not subject to the fiduciary requirements of ERISA with respect to their assets. However, it is possible that the

U.S. Department of Labor may amend the relevant regulations or the characteristics of our funds may change. If these funds fail to qualify as VCOCs or otherwise satisfy the requirements of ERISA, including the requirement of investment prudence and diversification or the prohibited transaction rules, it could materially interfere with our activities in relation to these funds or expose us to risks related to our failure to comply with such requirements.

82

Table of Contents

Our failure to comply with applicable laws or regulations could result in fines, censure, suspensions of personnel or investing activities or other sanctions, including revocation of our registration as an investment adviser. The regulations that our businesses are subject to are designed primarily to protect investors in our funds and to ensure the integrity of the financial markets. They are not designed to protect our Class A shareholders. Even if a sanction imposed against us or our personnel by a regulator is for a small monetary amount, the adverse publicity related to such sanction against us by regulators could harm our reputation, result in redemptions by investors from our hedge funds and impede our ability to raise additional capital or new funds.

As a result of recent highly-publicized financial scandals, investors have exhibited concerns over the integrity of the U.S. financial markets, and the regulatory environment in which we operate is subject to heightened regulation. In recent years, there has been debate in both the U.S. and foreign governments about new rules or regulations to be applicable to hedge funds or other alternative investment products. For example, certain officials in Germany have called for implementing these types of additional regulations, which, if enacted, could potentially apply to our business activities throughout the European Union. We may be adversely affected if new or revised legislation or regulations are enacted, or by changes in the interpretation or enforcement of existing rules and regulations imposed by the SEC, other U.S. or foreign governmental regulatory authorities or self-regulatory organizations that supervise the financial markets. Such changes could place limitations on the type of investor that can invest in alternative asset funds or on the conditions under which such investors may invest. Further, such changes may limit the scope of investing activities that may be undertaken by alternative asset managers. Any such changes could increase our costs of doing business or materially adversely affect our profitability.

Our failure to deal appropriately with conflicts of interest could damage our reputation and adversely affect our business.

As we have expanded the number and scope of our businesses, we increasingly confront potential conflicts of interest relating to our funds' investment activities. Certain of our funds have overlapping investment objectives, including funds which have different fee structures, and potential conflicts may arise with respect to our decisions regarding how to allocate investment opportunities among those funds. For example, a decision to acquire material non-public information about a company while pursuing an investment opportunity for a particular fund gives rise to a potential conflict of interest when it results in our having to restrict the ability of other funds to take any action. In addition, holders of Class A shares may perceive conflicts of interest regarding investment decisions for funds in which our principals, who have and may continue to make significant personal investments in a variety of Fortress Funds, are personally invested. Similarly, conflicts of interest may exist or develop regarding decisions about the allocation of specific investment opportunities between Fortress and the Fortress Funds. In addition, because the Operating Entities are held, in part, by FIG Corp., which is subject to tax, conflicts of interest may exist regarding decisions about which of Fortress's holdings should be held by Operating Entities and which by Principal Holdings.

Pursuant to the terms of our operating agreement, whenever a potential conflict of interest exists or arises between any of the principals, one or more directors or their respective affiliates, on the one hand, and the company, any subsidiary

of the company or any member other than a principal, on the other, any resolution or course of action by our board of directors shall be permitted and deemed approved by all shareholders if the resolution or course of action (i) has been specifically approved by a majority of the members of a committee composed entirely of two or more independent directors, or it is deemed approved because it complies with rules or guidelines established by such committee, (ii) has been approved by a majority of the total votes that may be cast in the election of directors that are held by disinterested parties, (iii) is on terms no less favorable to the company or shareholders (other than a principal) than those generally being provided to or available from unrelated third parties or (iv) is fair and reasonable to the company taking into account the totality of the relationships between the parties involved. Notwithstanding the foregoing, it is possible that potential or perceived conflicts could give rise to investor dissatisfaction or litigation or regulatory enforcement actions. Appropriately dealing with conflicts of interest is complex and difficult and our reputation could be damaged if we fail, or appear to fail, to deal appropriately with one or more

83

Table of Contents

potential or actual conflicts of interest. Regulatory scrutiny of, or litigation in connection with, conflicts of interest would have a material adverse effect on our reputation, which would materially adversely affect our business in a number of ways, including as a result of redemptions by our investors from our hedge funds, an inability to raise additional funds and a reluctance of counterparties to do business with us.

Employee misconduct could harm us by impairing our ability to attract and retain investors and by subjecting us to significant legal liability, regulatory scrutiny and reputational harm.

Our reputation is critical to maintaining and developing relationships with the investors in our funds, potential investors and third-parties with whom we do business. In recent years, there have been a number of highly-publicized cases involving fraud, conflicts of interest or other misconduct by individuals in the financial services industry in general and the hedge fund industry in particular. There is a risk that our employees could engage in misconduct that adversely affects our business. For example, if an employee were to engage in illegal or suspicious activities, we could be subject to regulatory sanctions and suffer serious harm to our reputation, financial position, investor relationships and ability to attract future investors. It is not always possible to deter employee misconduct, and the precautions we take to detect and prevent this activity may not be effective in all cases. Misconduct by our employees, or even unsubstantiated allegations, could result in a material adverse effect on our reputation and our business.

The investment management business is intensely competitive.

Over the past several years, the size and number of hedge funds and private equity funds has continued to increase. If this trend continues, it is possible that it will become increasingly difficult for our funds to raise capital. More significantly, the allocation of increasing amounts of capital to alternative investment strategies by institutional and individual investors may lead to a reduction in profitable investment opportunities, including by driving prices for investments higher and increasing the difficulty of achieving targeted returns. In addition, if interest rates were to rise or there were to be a prolonged bull market in equities, the attractiveness of our funds relative to investments in other investment products could decrease. Competition is based on a variety of factors, including:

- investment performance;
- investor perception of investment managers' drive, focus and alignment of interest;
- quality of service provided to and duration of relationship with investors;

- business reputation; and
- level of fees and expenses charged for services.

We compete in all aspects of our business with a large number of investment management firms, private equity fund sponsors, hedge fund sponsors and other financial institutions. A number of factors serve to increase our competitive risks:

- investors may develop concerns that we will allow a business to grow to the detriment of its performance;
- some of our competitors have greater capital, lower targeted returns or greater sector or investment strategy specific expertise than we do, which creates competitive disadvantages with respect to investment opportunities;
- some of our competitors may perceive risk differently than we do, which could allow them either to outbid us for investments in particular sectors or, generally, to consider a wider variety of investments;
- there are relatively few barriers to entry impeding new private equity and hedge fund management firms, and the successful efforts of new entrants into our various lines of business, including former “star” portfolio managers at large diversified financial institutions as well as such institutions themselves, will continue to result in increased competition; and
- other industry participants continuously seek to recruit our best and brightest investment professionals away from us.

84

Table of Contents

These and other factors could reduce our earnings and revenues and materially adversely affect our business. In addition, if we are forced to compete with other alternative asset managers on the basis of price, we may not be able to maintain our current management and performance fee structures. We have historically competed primarily on the performance of our funds, and not on the level of our fees relative to those of our competitors. However, there is a risk that fees in the alternative investment management industry will decline, without regard to the historical performance of a manager. Fee reductions on existing or future funds, without corresponding decreases in our cost structure, would adversely affect our revenues and profitability.

Our internal control over financial reporting does not currently meet all of the standards contemplated by Section 404 of the Sarbanes-Oxley Act of 2002, and failure to achieve and maintain effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act could have a material adverse effect on our business and stock price.

Our internal control over financial reporting does not currently meet all of the standards contemplated by Section 404 of the Sarbanes-Oxley Act that we will be required to meet as of December 31, 2007. We are in the process of addressing our internal controls over financial reporting and are establishing formal committees to oversee our policies and processes related to financial reporting and to the identification of key financial reporting risks, assessment of their potential impact and linkage of those risks to specific areas and activities within our organization.

While we do not believe we have any material weaknesses in our internal controls, we do not currently have comprehensive documentation of our system of controls, nor do we yet fully document or test our compliance with this system on a periodic basis in accordance with Section 404 of the Sarbanes-Oxley Act. Furthermore, we have not yet fully tested our internal controls in accordance with Section 404 and, due to our lack of documentation, such a test

would not be possible to perform at this time. As a result, we cannot conclude in accordance with Section 404 that we do not have a material weakness, or possibly a combination of significant deficiencies which could result in the conclusion that we have a material weakness in our internal controls in accordance with such rules.

We have begun the process of documenting and testing our internal control procedures to satisfy the requirements of Section 404, which requires annual management assessments of the effectiveness of our internal control over financial reporting and a report by our independent registered public accounting firm addressing these assessments. As a public company, we will be required to complete our initial assessment in a timely manner. If we are not able to implement the requirements of Section 404 in a timely manner or with adequate compliance, our independent registered public accounting firm may not be able to certify as to the adequacy of our internal control over financial reporting. Matters impacting our internal controls may cause us to be unable to report our financial information on a timely basis and thereby subject us to adverse regulatory consequences, including sanctions or investigations by the SEC, or violations of applicable stock exchange listing rules, and result in a breach of the covenants under our credit agreement. There could also be a negative reaction in the financial markets due to a loss of investor confidence in us and the reliability of our financial statements. Confidence in the reliability of our financial statements is also likely to suffer if we or our independent registered public accounting firm reports a material weakness in our internal control over financial reporting. This could materially adversely affect us and lead to a decline in our share price and impair our ability to raise capital. In addition, we will incur incremental costs in order to improve our internal control over financial reporting and comply with Section 404, including increased accounting, auditing and legal fees and costs associated with hiring additional accounting and administrative staff.

Our organizational documents do not limit our ability to enter into new lines of businesses, and we may enter into new businesses, make future strategic investments or acquisitions or enter into joint ventures, each of which may result in additional risks and uncertainties in our business.

We intend, to the extent that market conditions warrant, to grow our business by increasing assets under management in existing businesses and creating new investment products. Our organizational documents, however, do not limit us to the investment management business. Accordingly, we may pursue growth through strategic investments, acquisitions or joint ventures, which may include

85

Table of Contents

entering into new lines of business, such as the insurance, broker-dealer or financial advisory industries, and which may involve assuming responsibility for the actual operation of assets or entire companies. In addition, we expect opportunities will arise to acquire other alternative or traditional asset managers. To the extent we make strategic investments or acquisitions, enter into joint ventures, or enter into a new line of business, we will face numerous risks and uncertainties, including risks associated with (i) the required investment of capital and other resources, (ii) the possibility that we have insufficient expertise to engage in such activities profitably or without incurring inappropriate amounts of risk, and (iii) combining or integrating operational and management systems and controls. Entry into certain lines of business may subject us to new laws and regulations with which we are not familiar, or from which we are currently exempt, and may lead to increased litigation and regulatory risk. If a new business generates insufficient revenues or if we are unable to efficiently manage our expanded operations, our results of operations will be adversely affected. In the case of joint ventures, we are subject to additional risks and uncertainties in that we may be dependent upon, and subject to liability, losses or reputational damage relating to, systems, controls and personnel that are not under our control.

Our revenue and profitability fluctuate, particularly inasmuch as we cannot predict the timing of realization events in our private equity business, which may make it difficult for us to achieve steady earnings growth on a quarterly basis and may cause volatility in the price of our Class A shares.

We experience significant variations in revenues and profitability during the year and among years because we are paid incentive income from certain funds only when investments are realized, rather than periodically on the basis of increases in the funds' net asset values. The timing and receipt of incentive income generated by our private equity funds is event driven and thus highly variable, which contributes to the volatility of our segment revenue, and our ability to realize incentive income from our private equity funds may be limited. We cannot predict when, or if, any realization of investments will occur. If we were to have a realization event in a particular quarter, it may have a significant impact on our segment revenues and profits for that particular quarter which may not be replicated in subsequent quarters. In addition, our private equity investments are adjusted for accounting purposes to fair value at the end of each quarter, resulting in revenue attributable to our principal investments, even though we receive no cash distributions from our private equity funds, which could increase the volatility of our quarterly earnings. With respect to our hedge funds, our incentive income is paid annually or quarterly if the net asset value of a fund has increased for the period. The amount (if any) of the incentive income we earn from our hedge funds depends on the increase in the net asset value of the funds, which is subject to market volatility. Our liquid hedge funds have historically experienced significant fluctuations in net asset value from month to month. Certain of our hedge funds also have "high water marks" whereby we do not earn incentive income for a particular period even though the fund had positive returns in such period if the fund had greater losses in prior periods. Therefore, if a hedge fund experiences losses in a period, we will not be able to earn incentive income from that fund until it surpasses the previous high water mark. These quarterly fluctuations in our revenues and profits in any of our businesses could lead to significant volatility in the price of our Class A shares.

An increase in our borrowing costs may adversely affect our earnings and liquidity.

On May 10, 2007, we refinanced our existing credit agreement with a new \$1 billion credit agreement. Under the new credit agreement, we have a \$200 million revolving credit facility, a \$350 million term loan facility and a \$450 million delayed term loan facility. As of May 11, 2007, we had a \$350 million term loan outstanding and no amounts outstanding under our revolving credit facility or delayed term loan facility. Borrowings under the credit agreement mature on May 10, 2012. As our facilities mature, we will be required to either refinance them by entering into new facilities, which could result in higher borrowing costs, or issuing equity, which would dilute existing shareholders. We could also repay them by using cash on hand or cash from the sale of our assets. No assurance can be given that we will be able to enter into new facilities or issue equity in the future on attractive terms, or at all.

Our credit facilities are LIBOR-based floating-rate obligations and the interest expense we incur will vary with changes in the applicable LIBOR reference rate. As a result, an increase in short-term

Table of Contents

interest rates will increase our interest costs and will reduce the spread between the returns on our investments and the cost of our borrowings. An increase in interest rates would adversely affect the market value of any fixed-rate debt investments and/or subject them to prepayment or extension risk, which may adversely affect our earnings and liquidity.

There can be no assurance that we will be successful in developing a market for our investment products in Asia or that our relationship with Nomura will yield profitable investment opportunities for the funds we manage.

On December 18, 2006, our principals entered into an agreement with Nomura pursuant to which Nomura acquired a 15% stake in Fortress for \$888.0 million on January 17, 2007. Pursuant to the terms of the agreement, the parties agreed that Nomura will work with us to develop a strategy to market and sell our investment products. We believe that a strategic relationship with Nomura, the largest leading Japanese financial institution, could provide us with access to Nomura's distribution capabilities in Asia. In addition, we believe that our relationship will provide us with potential investment opportunities for the funds we manage. However, there can be no assurance that we will be able to develop a strategy and enter into a mutually satisfactory distribution agreement with Nomura, or that if reached, a market for our investment products will ever develop in Asia.

Risks Related to Our Funds

Our results of operations are dependent on the performance of our funds. Poor fund performance will result in reduced revenues, reduced returns on our principal investments in the funds and reduced earnings. Poor performance of our funds will also make it difficult for us to retain or attract investors to our funds and to grow our business. The performance of each fund we manage is subject to some or all of the following risks.

The historical performance of our funds should not be considered as indicative of the future results of our funds or of our future results or of any returns expected on our Class A shares.

The historical and potential future returns of the funds we manage are not directly linked to returns on our Class A shares. Therefore, readers should not conclude that continued positive performance of the funds we manage will necessarily result in positive returns on our Class A shares. However, poor performance of the funds we manage will cause a decline in our revenue from such funds, and would therefore have a negative effect on our performance and the returns on our Class A shares.

Moreover, with respect to the historical performance of our funds:

- the historical performance of our funds should not be considered indicative of the future results that should be expected from such funds or from any future funds we may raise;
- our private equity funds' performance, which is calculated on the basis of net asset value of the funds' investments, reflect unrealized gains that may never be realized;
- our private equity funds' performance has been positively influenced by a select number of investments that experienced rapid and substantial increases in value following the initial public offerings of the private equity portfolio companies in which those investments were made; and
- our funds' returns have benefited from investment opportunities and general market conditions that may not repeat themselves, and there can be no assurance that our current or future funds will be able to avail themselves of profitable investment opportunities.

Poor performance of our funds would cause a decline in our revenue and results of operations, may obligate us to repay incentive income previously paid to us, and would adversely affect our ability to raise capital for future funds.

Our revenue from the Fortress Funds is derived principally from three sources: (1) management fees, based on the size of our funds; (2) incentive income, based on the performance of our funds; and

Table of Contents

(3) investment income from our investments in the funds, which we refer to as our “principal investments.” In the event that any of our funds perform poorly, our revenue and results of operations will decline, and it will likely be more difficult for us to raise new capital. In addition, hedge fund investors may withdraw their investments in our funds, while investors in private equity funds may decline to invest in future funds we raise, as a result of poor performance of our funds or otherwise. Furthermore, if, as a result of poor performance of later investments in a private equity fund’s life, the fund does not achieve total investment returns that exceed a specified investment return threshold for the life of the fund, we will be obligated to repay the amount by which incentive income that was previously distributed to us exceeds the amounts to which we are ultimately entitled. Our investors and potential investors continually assess our funds’ performance and our ability to raise capital.

Difficult market conditions can adversely affect our funds in many ways, including by reducing the value or performance of the investments made by our funds and reducing the ability of our funds to raise or deploy capital, which could materially reduce our revenue and adversely affect results of operations.

If economic conditions are unfavorable, our funds may not perform well and we may not be able to raise money in existing or new funds. Our funds are materially affected by conditions in the global financial markets and economic conditions throughout the world. The global market and economic climate may deteriorate because of many factors beyond our control, including rising interest rates or inflation, terrorism or political uncertainty. In the event of a market downturn, each of our businesses could be affected in different ways. Our private equity funds may face reduced opportunities to sell and realize value from their existing investments, and a lack of suitable investments for the funds to make. In addition, adverse market or economic conditions as well as a slowdown of activities in a particular sector in which portfolio companies of these funds operate could have an adverse effect on the earnings of those portfolio companies, and therefore, our earnings.

A general market downturn, or a specific market dislocation, may cause our revenue and results of operations to decline by causing:

- the NAV of the AUM to decrease, lowering management fees;
- lower investment returns, reducing incentive income;
- material reductions in the value of our private equity fund investments in portfolio companies which reduce our “surplus” and, therefore, our ability to realize incentive income from these investments; and
- investor redemptions, resulting in lower fees.

Furthermore, while difficult market conditions may increase opportunities to make certain distressed asset investments, such conditions also increase the risk of default with respect to investments held by our funds with debt investments, such as the hybrid hedge funds and the Castles. Our liquid hedge funds may also be adversely affected by difficult market conditions if they fail to predict the adverse effect of such conditions on particular investments, resulting in a significant reduction in the value of those investments. In addition, the Castles, as well as the publicly traded portfolio companies owned by our private equity funds, currently pay a material amount of dividends. This makes their share prices vulnerable to increases in interest rates, which would, by causing declines in the value of the share prices, in turn result in lower management fees and incentive income for us.

Investors in our hedge funds may redeem their investments and investors in our private equity funds may elect to dissolve the funds at any time without cause. These events would lead to a decrease in our revenues, which could be substantial and lead, therefore, to a material adverse effect on our business.

Investors in our hedge funds may generally redeem their investments on an annual or quarterly basis, subject to the

applicable fund's specific redemption provisions (e.g., a redeeming Drawbridge Special Opportunities Fund investor is not entitled to cash at the redemption date, but retains instead an interest in the investments as of the redemption date and receives monies from the fund only as

88

Table of Contents

and when such investments are realized). Investors may decide to move their capital away from us to other investments for any number of reasons in addition to poor investment performance. Factors which could result in investors leaving our funds include changes in interest rates that make other investments more attractive, the publicly traded nature of our manager, changes in investor perception regarding our focus or alignment of interest, unhappiness with changes in or broadening of a fund's investment strategy, changes in our reputation, and departures or changes in responsibilities of key investment professionals. In a declining financial market, the pace of redemptions and consequent reduction in our assets under management could accelerate. The decrease in our revenues that would result from significant redemptions in our hedge fund business would have a material adverse effect on our business.

In addition, the investors in our private equity and domestic hedge funds may, subject to certain conditions, act at any time to accelerate the liquidation date of the fund without cause, resulting in a reduction in management fees we earn from such funds, and a significant reduction in the amounts of total incentive income we could earn from those funds. Incentive income could be significantly reduced as a result of our inability to maximize the value of a fund's investments in a liquidation. The occurrence of such an event with respect to any of our funds would, in addition to the significant negative impact on our revenue and earnings, likely result in significant reputational damages as well.

Many of our funds invest in relatively high-risk, illiquid assets that often have significantly leveraged capital structures, and we may fail to realize any profits from these activities for a considerable period of time or lose some or all of the principal amount we invest in these activities.

Many of our funds invest in securities that are not publicly traded. In many cases, our funds may be prohibited by contract or by applicable securities laws from selling such securities for a period of time. Our funds will generally not be able to sell these securities publicly unless their sale is registered under applicable securities laws, or unless an exemption from such registration requirements is available. Accordingly, our funds may be forced to sell securities at a loss, under certain conditions. The ability of many of our funds, particularly our private equity funds, to dispose of investments is heavily dependent on the public equity markets, inasmuch as our ability to realize any value from an investment may depend upon our ability to sell equity of the portfolio company in the public equity markets through an initial public offering (an "IPO") of the portfolio company in which such investment is held. Furthermore, large holdings even of publicly traded equity securities can often be disposed of only over a substantial period of time, exposing the investment returns to risks of downward movement in market prices during the disposition period.

In addition, many of our funds, particularly our private equity funds, hybrid hedge funds and our Castles, invest in businesses with capital structures that have significant leverage. The large amount of borrowing in the leveraged capital structure of such businesses increases the risk of losses due to factors such as rising interest rates, downturns in the economy or deteriorations in the condition of the investment or its industry. In the event of defaults under borrowings, the assets being financed would be at risk of foreclosure, and the fund could lose its entire investment.

Our hedge funds are subject to risks due to potential illiquidity of assets.

Our hedge funds may make investments or hold trading positions in markets that are volatile and which may become illiquid. Timely divestiture or sale of trading positions can be impaired by decreased trading volume, increased price volatility, concentrated trading positions, limitations on the ability to transfer positions in highly specialized or structured transactions to which we may be a party, and changes in industry and government regulations. When a fund holds a security or position it is vulnerable to price and value fluctuations and may experience losses to the extent the value of the position decreases and it is unable to timely sell, hedge or transfer the position. Therefore, it may be impossible or costly for our funds to liquidate positions rapidly, particularly if the relevant market is moving against a position or in the event of trading halts or daily price movement limits on the market or otherwise. Alternatively, it may not be possible in certain circumstances for a position to be purchased or sold promptly, particularly if there is insufficient trading activity in the relevant market or otherwise.

89

Table of Contents

The hedge funds we manage may operate with a substantial degree of leverage. They may borrow, invest in derivative instruments and purchase securities using borrowed money, so that the positions held by the funds may in aggregate value exceed the net asset value of the funds. This leverage creates the potential for higher returns, but also increases the volatility of a fund, including the risk of a total loss of the amount invested.

The risks identified above will be increased if a fund is required to rapidly liquidate positions to meet margin requests, margin calls or other funding requirements on that position or otherwise. The inability to rapidly sell positions due to a lack of liquidity has historically been the cause of substantial losses in the hedge fund industry. The ability of counterparties to force liquidations following losses or a failure to meet a margin call can result in the rapid sale of highly leveraged positions in declining markets, which would likely subject our hedge funds to substantial losses. We may fail to adequately predict the liquidity that our hedge funds require to address counterparty requirements due to falling values of fund investments being financed by such counterparties, which could result not only in losses related to such investments, but in losses related to the need to liquidate unrelated investments in order to meet the fund's obligations. Our hedge funds may incur substantial losses in the event significant capital is invested in highly leveraged investments or investment strategies. Such losses would result in a decline in AUM, lead to investor requests to redeem remaining AUM, and damage our reputation, each of which would materially and adversely impact our earnings.

Valuation methodologies for certain assets in our funds can be subject to significant subjectivity and the values of assets established pursuant to such methodologies may never be realized, which could result in significant losses for our funds.

There are no readily-ascertainable market prices for a very large number of illiquid investments in our private equity and hybrid hedge funds. The value of the investments of our funds is determined periodically by us based on the fair value of such investments. The fair value of investments is determined using a number of methodologies described in the funds' valuation policies. These policies are based on a number of factors, including the nature of the investment, the expected cash flows from the investment, bid or ask prices provided by third parties for the investment, the length of time the investment has been held, the trading price of securities (in the case of publicly traded securities), restrictions on transfer and other recognized valuation methodologies. The methodologies we use in valuing individual investments are based on a variety of estimates and assumptions specific to the particular investments, and actual results related to the investment therefore often vary materially as a result of the inaccuracy of such assumptions or estimates. In addition, because many of the illiquid investments held by our funds are in industries or sectors which are unstable, in distress, or undergoing some uncertainty, such investments are subject to rapid changes in value

caused by sudden company-specific or industry-wide developments.

Because there is significant uncertainty in the valuation of, or in the stability of the value of, illiquid investments, the fair values of such investments as reflected in a fund's net asset value do not necessarily reflect the prices that would actually be obtained by us on behalf of the fund when such investments are sold. Realizations at values significantly lower than the values at which investments have been reflected in fund net asset values would result in losses for the applicable fund, a decline in asset management fees and the loss of potential incentive income. Also, a situation where asset values turn out to be materially different than values reflected in fund net asset values will cause investors to lose confidence in us which would, in turn, result in redemptions from our hedge funds or difficulties in raising additional private equity funds.

In some cases, the Fortress Funds realize value from an illiquid portfolio company when the portfolio company is able to sell equity in the public markets through an IPO. An IPO of a portfolio company increases the liquidity of the funds' investment in the company and can create significant value when the dividend yield on the company's shares after the IPO is lower than the return being generated by the company's net assets, thereby increasing the value of its equity. Because of the significant uncertainties, both market-driven and regulatory in consummating an IPO, Fortress believes that the theoretical value added to a portfolio company investment by an IPO should not be recorded in the asset value of a fund until the IPO is completed. Therefore, Fortress values illiquid

90

Table of Contents

portfolio companies for which an IPO is being contemplated, or is in process, at fair value without regard to the theoretical value which may be created by the IPO, and such theoretical value may never be realized if the IPO is never consummated.

Certain of our funds utilize special situation and distressed debt investment strategies that involve significant risks.

Our private equity and hybrid hedge funds invest in obligors and issuers with weak financial conditions, poor operating results, substantial financial needs, negative net worth, and/or special competitive problems. These funds also invest in obligors and issuers that are involved in bankruptcy or reorganization proceedings. In such situations, it may be difficult to obtain full information as to the exact financial and operating conditions of these obligors and issuers. Additionally, the fair values of such investments are subject to abrupt and erratic market movements and significant price volatility if they are publicly traded securities, and are subject to significant uncertainty in general if they are not publicly traded securities. Furthermore, some of our funds' distressed investments may not be widely traded or may have no recognized market. A fund's exposure to such investments may be substantial in relation to the market for those investments, and the assets are likely to be illiquid and difficult to sell or transfer. As a result, it may take a number of years for the fair value of such investments to ultimately reflect their intrinsic value as perceived by us.

A central feature of our distressed investment strategy is our ability to successfully predict the occurrence of certain corporate events, such as debt and/or equity offerings, restructurings, reorganizations, mergers, takeover offers and other transactions. If the corporate event we predict is delayed, changed or never completed, the market price and value of the applicable fund's investment could decline sharply.

If our risk management systems for our hedge fund business are ineffective, we may be exposed to material unanticipated losses.

In our hedge fund business, we continue to refine our risk management techniques, strategies and assessment methods. However, our risk management techniques and strategies do not fully mitigate the risk exposure of our funds in all economic or market environments, or against all types of risk, including risks that we might fail to identify or anticipate. Some of our strategies for managing risk in our funds are based upon our use of historical market behavior statistics. We apply statistical and other tools to these observations to measure and analyze the risks to which our funds are exposed. Any failures in our risk management techniques and strategies to accurately quantify such risk exposure could limit our ability to manage risks in the funds or to seek adequate risk-adjusted returns. In addition, any risk management failures could cause fund losses to be significantly greater than the historical measures predict. Further, our mathematical modeling does not take all risks into account. Our more qualitative approach to managing those risks could prove insufficient, exposing us to material unanticipated losses.

Some of our funds invest in foreign countries and securities of issuers located outside of the United States, which may involve foreign exchange, political, social and economic uncertainties and risks.

Some of our funds invest a portion of their assets in the equity, debt, loans or other securities of issuers located outside the U.S. In addition to business uncertainties, such investments may be affected by changes in exchange values as well as political, social and economic uncertainty affecting a country or region. Many financial markets are not as developed or as efficient as those in the U.S., and as a result, liquidity may be reduced and price volatility may be higher. The legal and regulatory environment may also be different, particularly with respect to bankruptcy and reorganization, and may afford us less protection as a creditor than we may be entitled to under U.S. law. Financial accounting standards and practices may differ, and there may be less publicly available information in respect of such companies.

Restrictions imposed or actions taken by foreign governments may adversely impact the value of our fund investments. Such restrictions or actions could include exchange controls, seizure or nationalization of foreign deposits and adoption of other governmental restrictions which adversely affect the prices of securities or the ability to repatriate profits on investments or the capital invested

91

Table of Contents

itself. Income received by our funds from sources in some countries may be reduced by withholding and other taxes. Any such taxes paid by a fund will reduce the net income or return from such investments. While our funds will take these factors into consideration in making investment decisions, including when hedging positions, no assurance can be given that the funds will be able to fully avoid these risks or generate sufficient risk-adjusted returns.

We are subject to risks in using prime brokers and custodians.

The funds in our liquid hedge funds business depend on the services of prime brokers and custodians to carry out certain securities transactions. In the event of the insolvency of a prime broker and/or custodian, the funds might not be able to recover equivalent assets in full as they will rank among the prime broker and custodian's unsecured creditors in relation to assets which the prime broker or custodian borrows, lends or otherwise uses. In addition, the funds' cash held with a prime broker or custodian will not be segregated from the prime broker's or custodian's own cash, and the funds will therefore rank as unsecured creditors in relation to the cash they have deposited.

Risks Related to Our Organization and Structure

Control by our principals of the combined voting power of our shares and holding their economic interest through Fortress Operating Group may give rise to conflicts of interests.

Our principals control approximately 76.7% of the combined voting power of our Class A and Class B shares. Accordingly, our principals have the ability to elect all of the members of our board of directors, subject to Nomura's right to nominate one designee, and thereby to control our management and affairs. In addition, they are able to determine the outcome of all matters requiring shareholder approval and are able to cause or prevent a change of control of our company or a change in the composition of our board of directors, and could preclude any unsolicited acquisition of our company. The control of voting power by our principals could deprive Class A shareholders of an opportunity to receive a premium for their Class A shares as part of a sale of our company, and might ultimately affect the market price of the Class A shares.

In addition, the shareholders agreement among us and the principals provides the principals who are then employed by the Fortress Operating Group holding shares greater than 50% of the total combined voting power of all shares held by such principals, so long as the principals and their permitted transferees continue to hold more than 40% of the total combined voting power of our outstanding Class A and Class B shares, with approval rights over a variety of significant corporate actions, including:

- ten percent indebtedness: any incurrence of indebtedness, in one transaction or a series of related transactions, by us or any of our subsidiaries in an amount in excess of approximately 10% of the then existing long-term indebtedness of us and our subsidiaries;
- ten percent share issuance: any issuance by us, in any transaction or series of related transactions, of equity or equity-related securities which would represent, after such issuance, or upon conversion, exchange or exercise, as the case may be, at least 10% of the total combined voting power of our outstanding Class A and Class B shares other than (1) pursuant to transactions solely among us and our wholly-owned subsidiaries, or (2) upon conversion of convertible securities or upon exercise of warrants or options, which convertible securities, warrants or options are either outstanding on the date of, or issued in compliance with, the shareholders agreement;
- investment of \$250 million or greater: any equity or debt commitment or investment or series of related equity or debt commitments or investments in an entity or related group of entities in an amount greater than \$250 million;
- new business requiring investment in excess of \$100 million: any entry by us or any of our controlled affiliates into a new line of business that does not involve investment management and that requires a principal investment in excess of \$100 million;
- the adoption of a shareholder rights plan;

92

Table of Contents

- any appointment of a chief executive officer or co-chief executive officer; or
- the termination of the employment of a principal with us or any of our material subsidiaries without cause.

Furthermore, the principals have certain consent rights with respect to structural changes involving our company.

In addition, our principals are entitled to approximately 76.7% of our economic returns through their holdings of 76.7% of Fortress Operating Group units. Because they hold their economic interest in our business directly through Fortress Operating Group, rather than through the public company, our principals may have conflicting interests with

holders of Class A shares. For example, our principals may have different tax positions from us which could influence their decisions regarding whether and when to dispose of assets, and whether and when to incur new or refinance existing indebtedness, especially in light of the existence of the tax receivable agreement. In addition, the structuring of future transactions may take into consideration the principals' tax considerations even where no similar benefit would accrue to us. Moreover, any distribution by the Fortress Operating Group to us to satisfy our tax obligations will result in a corresponding pro rata distribution to our principals.

We intend to pay regular dividends but our ability to do so may be limited by our holding company structure; we are dependent on distributions from the Fortress Operating Group to pay dividends, taxes and other expenses. Our ability to pay dividends is also subject to not defaulting on our credit agreement.

As a holding company, our ability to pay dividends is subject to the ability of our subsidiaries to provide cash to us. We intend to distribute quarterly dividends to our Class A shareholders. Accordingly, we expect to cause the Fortress Operating Group to make distributions to its unitholders, including our wholly-owned subsidiaries, pro rata in an amount sufficient to enable us to pay such dividends to our Class A shareholders; however, no assurance can be given that such distributions will or can be made. Our board can reduce or eliminate our dividend at any time, in its discretion. In addition, Fortress Operating Group is required to make minimum tax distributions to its unitholders. See also “— Risks Related to Taxation — There can be no assurance that amounts paid as dividends on Class A shares will be sufficient to cover the tax liability arising from ownership of Class A shares.” If Fortress Operating Group has insufficient funds, we may have to borrow additional funds or sell assets, which could materially adversely affect our liquidity and financial condition. In addition, Fortress Operating Group's earnings may be insufficient to enable it to make required minimum tax distributions to unitholders.

We are also subject to certain contingent repayment obligations that may affect our ability to pay dividends. We earn incentive income – generally 20% of the profits – from each of our private equity funds based on a percentage of the profits earned by the fund as a whole, provided that the fund achieves specified performance criteria. We generally receive, however, our percentage share of the profits on each investment in the fund as it is realized, before it is known with certainty that the fund as a whole will meet the specified criteria. As a result, the incentive income paid to us as a particular investment made by the funds is realized is subject to contingent repayment (or “clawback”) if, upon liquidation of the fund, the aggregate amount paid to us as incentive income exceeds the amount actually due to us based upon the aggregate performance of the fund. If we are required to repay amounts to a fund in order to satisfy a clawback obligation, any such repayment will reduce the amount of cash available to distribute as a dividend to our Class A shareholders. Moreover, we intend to distribute a portion of the incentive income that we receive as quarterly dividend payments to our Class A shareholders. Once we distribute such funds, we have no ability to recall the funds from our Class A shareholders and would, thus, be required to satisfy any subsequent clawback obligation using other sources. While the principals have personally guaranteed, subject to certain limitations, this “clawback” obligation, our shareholders agreement with them contains our agreement to indemnify the principals for all amounts which the principals pay pursuant to any of these personal guaranties in favor of our private equity funds. Consequently, any requirement to satisfy a clawback obligation could impair our ability to pay dividends on our Class A shares.

Table of Contents

There may also be circumstances under which we are restricted from paying dividends under applicable law or regulation (for example due to Delaware limited partnership or limited liability company act limitations on making distributions if liabilities of the entity after the distribution would exceed the value of the entity's assets). In addition, under our credit agreement, we are permitted to make cash distributions subject to the following restrictions: (a) no

event of default exists immediately prior to or subsequent to the distribution, (b) the amount of distributions over the prior 12 months do not exceed free cash flow (as defined in our credit agreement as net income plus (i) taxes, depreciation and private equity incentive income presented on an as-received basis less (ii) capital expenditures, permitted tax distributions and certain other adjustments) for the prior 12 month period, and (c) after giving effect to the distribution, we have cash on hand of not less than accrued but unpaid taxes (based on estimated entity level taxes due and payable by the Fortress Operating Group entities, primarily New York City unincorporated business tax) and amortization obligations (including scheduled principal payments) under the credit agreement which are required in the next 90 days. The events of default under the credit agreement are typical of such agreements and include payment defaults, failure to comply with credit agreement covenants, cross-defaults to material indebtedness, bankruptcy and insolvency, change of control, and adverse events with respect to our material funds. Our lenders may also attempt to exercise their security interests over substantially all of the assets of the Fortress Operating Group.

The cash reflected on our historical balance sheets for 2006 and earlier periods, which consolidates many of our funds, is not our cash and is not available to us; we depend on the cash we receive from the Fortress Operating Group.

Our historical combined financial information for 2006 and earlier periods includes significant balances of cash and restricted cash held at consolidated funds as assets on our balance sheet. Although the cash and other assets of certain Fortress Funds have historically been included in our assets on a consolidated basis for financial reporting purposes, such cash is not available to us to pay dividends or for other liquidity needs but rather is property of the relevant fund. Following changes to our fund documents that became effective on March 31, 2007, these funds are no longer consolidated, and such cash amounts are no longer included in our balance sheet assets. We depend on distributions from the Fortress Operating Group for cash. Although the Fortress Operating Group may borrow under our credit facility, it depends primarily on the management fees and incentive income it receives from the Fortress Funds and its portion of the distributions made by the Fortress Funds, if any, for cash.

Tax consequences to the principals may give rise to conflicts of interests.

As a result of unrealized built-in gain attributable to the value of our assets held by the Fortress Operating Group entities at the time of our initial public offering, upon the sale or, refinancing or disposition of the assets owned by the Fortress Operating Group entities, our principals will incur different and significantly greater tax liabilities as a result of the disproportionately greater allocations of items of taxable income and gain to the principals upon a realization event. As the principals will not receive a corresponding greater distribution of cash proceeds, they may, subject to applicable fiduciary or contractual duties, have different objectives regarding the appropriate pricing, timing and other material terms of any sale, refinancing, or disposition, or whether to sell such assets at all. Decisions made with respect to an acceleration or deferral of income or the sale or disposition of assets may also influence the timing and amount of payments that are received by an exchanging or selling principal under the tax receivable agreement. All other factors being equal, earlier disposition of assets following a transaction will tend to accelerate such payments and increase the present value of the tax receivable agreement, and disposition of assets before a transaction will increase a principal's tax liability without giving rise to any rights to receive payments under the tax receivable agreement. Decisions made regarding a change of control also could have a material influence on the timing and amount of payments received by the principals pursuant to the tax receivable agreement.

Table of Contents

We are required to pay our principals for most of the tax benefits we realize as a result of the tax basis step-up we receive in connection with taxable exchanges by our principals of units held in the Fortress Operating Group entities

or our acquisitions of units from our principals.

At any time and from time to time, each principal has the right to exchange his Fortress Operating Group units for our Class A shares in a taxable transaction. These taxable exchanges, as well as our acquisitions of units from our principals, may result in increases in the tax depreciation and amortization deductions, as well as an increase in the tax basis of other assets, of the Fortress Operating Group that otherwise would not have been available. These increases in tax depreciation and amortization deductions, as well as the tax basis of other assets, may reduce the amount of tax that FIG Corp. or FIG Asset Co. LLC and any other corporate taxpayers would otherwise be required to pay in the future, although the IRS may challenge all or part of increased deductions and tax basis increase, and a court could sustain such a challenge.

We have entered into a tax receivable agreement with our principals that provides for the payment by the corporate taxpayers to our principals of 85% of the amount of tax savings, if any, that the corporate taxpayers actually realize (or are deemed to realize in the case of an early termination payment by the corporate taxpayers or a change of control, as discussed below) as a result of these increases in tax deductions and tax basis of the Fortress Operating Group. The payments that the corporate taxpayers may make to our principals could be material in amount.

Although we are not aware of any issue that would cause the IRS to challenge a tax basis increase, our principals will not reimburse the corporate taxpayers for any payments that have been previously made under the tax receivable agreement. As a result, in certain circumstances, payments could be made to our principals under the tax receivable agreement in excess of the corporate taxpayers' cash tax savings. The corporate taxpayers' ability to achieve benefits from any tax basis increase, and the payments to be made under this agreement, will depend upon a number of factors, including the timing and amount of our future income.

In addition, the tax receivable agreement provides that, upon a merger, asset sale or other form of business combination or certain other changes of control, the corporate taxpayers' (or their successors') obligations with respect to exchanged or acquired units (whether exchanged or acquired before or after such change of control) would be based on certain assumptions, including that the corporate taxpayers would have sufficient taxable income to fully utilize the deductions arising from the increased tax deductions and tax basis and other benefits related to entering into the tax receivable agreement.

If we were deemed an investment company under the Investment Company Act of 1940, applicable restrictions could make it impractical for us to continue our business as contemplated and could have a material adverse effect on our business and the price of our Class A shares.

We do not believe that we are an "investment company" under the Investment Company Act of 1940 because the nature of our assets and the sources of our income exclude us from the definition of an investment company pursuant to Rule 3a-1 under the Investment Company Act of 1940. In addition, we believe the company is not an investment company under Section 3(b)(1) of the Investment Company Act because it is primarily engaged in a non-investment company business. If one or more of the Fortress Operating Group entities ceased to be a wholly-owned subsidiary of ours, our interests in those subsidiaries could be deemed an "investment security" for purposes of the Investment Company Act of 1940. Generally, a person is an "investment company" if it owns investment securities having a value exceeding 40% of the value of its total assets (exclusive of U.S. government securities and cash items) on an unconsolidated basis. We intend to conduct our operations so that we will not be deemed an investment company. However, if we were to be deemed an investment company, restrictions imposed by the Investment Company Act of 1940, including limitations on our capital structure and our ability to transact with affiliates, could make it impractical for us to continue our business as contemplated and would have a material adverse effect on our business and the price of our Class A shares.

Table of Contents

Risks Related To Our Class A Shares

An active market for our Class A shares may not be sustained.

Our Class A shares are listed on the New York Stock Exchange under the symbol “FIG.” However, we cannot provide any assurance that a regular trading market of our Class A shares will be sustained on that exchange or elsewhere. Accordingly, we cannot provide any assurance of the liquidity of any trading market, holders’ ability to sell their Class A shares when desired, or at all, or the prices that they may obtain for their Class A shares.

The market price and trading volume of our Class A shares may be volatile, which could result in rapid and substantial losses for our shareholders.

The market price of our Class A shares may be highly volatile and could be subject to wide fluctuations. In addition, the trading volume in our Class A shares may fluctuate and cause significant price variations to occur, which may limit or prevent investors from readily selling their Class A shares and may otherwise negatively affect the liquidity of our Class A shares. If the market price of our Class A shares declines significantly, holders may be unable to resell their Class A shares at or above their purchase price, if at all. We cannot provide any assurance that the market price of our Class A shares will not fluctuate or decline significantly in the future. Some of the factors that could negatively affect the price of our Class A shares or result in fluctuations in the price or trading volume of our Class A shares include:

- variations in our quarterly operating results or dividends;
- failure to meet analysts’ earnings estimates or failure to meet, or the lowering of, our own earnings guidance;
- publication of research reports about us or the investment management industry or the failure of securities analysts to cover our Class A shares;
- additions or departures of our principals and other key management personnel;
- adverse market reaction to any indebtedness we may incur or securities we may issue in the future;
- actions by shareholders;
- changes in market valuations of similar companies;
- speculation in the press or investment community;
- changes or proposed changes in laws or regulations or differing interpretations thereof affecting our business or enforcement of these laws and regulations, or announcements relating to these matters;
- litigation or governmental investigations;
- adverse publicity about the asset management industry generally or individual scandals, specifically; and
- general market and economic conditions.

In addition, when the market price of a stock has been volatile in the past, holders of that stock have, at times, instituted securities class action litigation against the issuer of the stock. If any of our shareholders brought a lawsuit against us, we may be required to incur substantial costs defending any such suit, even those without merit. Such a lawsuit could also divert the time and attention of our management from our business and lower our Class A share price.

Our Class A share price may decline due to the large number of shares eligible for future sale and for exchange into Class A shares.

The market price of our Class A shares could decline as a result of sales of a large number of our Class A shares or the perception that such sales could occur. These sales, or the possibility that these

96

Table of Contents

sales may occur, also might make it more difficult for us to sell equity securities in the future at a time and price that we deem appropriate. As of May 11, 2007, we had 406,571,900 outstanding Class A shares on a fully diluted basis, 49,315,114 restricted Class A share units granted to employees (net of forfeitures) and 97,296 restricted Class A shares granted to directors pursuant to our equity incentive plan, and 65,587,590 Class A shares and Fortress Operating Group units that remain available for future grant under our equity incentive plan. Beginning in 2008, the Class A shares reserved under our equity incentive plan will be increased on the first day of each fiscal year during the plan's term by the lesser of (x) the excess of (i) 15% of the number of outstanding Class A and Class B shares of the company on the last day of the immediately preceding fiscal year over (ii) the number of shares reserved and available for issuance under our equity incentive plan as of such date or (y) 60,000,000 shares.

In connection with the consummation of our initial public offering, we agreed with the underwriters not to sell, otherwise dispose of or hedge any of our Class A shares or any securities issuable upon conversion of, or exchange or exercise for, Class A shares (including Fortress Operating Group units), subject to specified exceptions, during the period from February 8, 2007 through June 8, 2007, except with the prior written consent of the representatives of the underwriters. Subject to these agreements, we may issue and sell in the future additional Class A shares or any securities issuable upon conversion of, or exchange or exercise for, Class A shares (including Fortress Operating Group units).

Our principals own an aggregate of 312,071,550 Fortress Operating Group units. Each principal has the right to exchange each of his Fortress Operating Group units for one of our Class A shares at any time, subject to the Principals Agreement. Our principals, executive officers, directors and certain employees who received Class A shares and Fortress Operating Group units in connection with our initial public offering, Nomura and participants in our directed share program agreed with the underwriters not to dispose of or hedge any of our Class A shares, or Fortress Operating Group units, subject to specified exceptions, during the period from February 8, 2007 through June 8, 2007, except with the prior written consent of the representatives of the underwriters. After the expiration of this 120-day lock-up period, these Class A shares and Fortress Operating Group units will be eligible for resale from time to time, subject to certain contractual restrictions and Securities Act limitations. Under certain circumstances the 120-day lock-up period may be extended.

Our principals and Nomura are parties to shareholders agreements with us. After the expiration of their 120-day lock-up period, the principals will have the ability to cause us to register the Class A shares they acquire upon exchange for their Fortress Operating Group units. Nomura will have the ability to cause us to register any of its 55,071,450 Class A shares beginning one year after its acquisition of Class A shares and may only transfer its Class A shares prior to such time to its controlled affiliates.

Our principals' beneficial ownership of Class B shares and anti-takeover provisions in our charter documents and Delaware law could delay or prevent a change in control.

Our principals beneficially own all of our Class B shares. The principals' Class B shares will represent approximately 76.7% of the total combined voting power of our outstanding Class A and Class B shares. As a result, if they vote all of their shares in the same manner, they will be able to exercise control over all matters requiring the approval of shareholders and will be able to prevent a change in control of our company. In addition, provisions in our operating agreement may make it more difficult and expensive for a third party to acquire control of us even if a change of control would be beneficial to the interests of our shareholders. For example, our operating agreement provides for a staggered board, requires advance notice for proposals by shareholders and nominations, places limitations on convening shareholder meetings, and authorizes the issuance of preferred shares that could be issued by our board of directors to thwart a takeover attempt. In addition, certain provisions of Delaware law may delay or prevent a transaction that could cause a change in our control. The market price of our Class A shares could be adversely affected to the extent that our principals' control over us, as well as provisions of our operating agreement, discourage potential takeover attempts that our shareholders may favor.

97

Table of Contents

There are certain provisions in our operating agreement regarding exculpation and indemnification of our officers and directors that differ from the Delaware General Corporation Law (DGCL) in a manner that may be less protective of the interests of our Class A shareholders.

Our operating agreement provides that to the fullest extent permitted by applicable law our directors or officers will not be liable to us. However, under the DGCL, a director or officer would be liable to us for (i) breach of duty of loyalty to us or our shareholders, (ii) intentional misconduct or knowing violations of the law that are not done in good faith, (iii) improper redemption of shares or declaration of dividend, or (iv) a transaction from which the director or officer derived an improper personal benefit. In addition, our operating agreement provides that we indemnify our directors and officers for acts or omissions to the fullest extent provided by law. However, under the DGCL, a corporation can only indemnify directors and officers for acts or omissions if the director or officer acted in good faith, in a manner he reasonably believed to be in the best interests of the corporation, and, in a criminal action, if the officer or director had no reasonable cause to believe his conduct was unlawful. Accordingly, our operating agreement may be less protective of the interests of our Class A shareholders, when compared to the DGCL, insofar as it relates to the exculpation and indemnification of our officers and directors.

Risks Related to Taxation

Class A shareholders may be subject to U.S. federal income tax on their share of our taxable income, regardless of whether they receive any cash dividends from us.

So long as we are not required to register as an investment company under the Investment Company Act of 1940 and 90% of our gross income for each taxable year constitutes "qualifying income" within the meaning of the Internal Revenue Code of 1986, as amended (the "Code"), on a continuing basis, we will be treated, for U.S. federal income tax purposes, as a partnership and not as an association or a publicly traded partnership taxable as a corporation. Class A shareholders may be subject to U.S. federal, state, local and possibly, in some cases, foreign income taxation on their allocable share of our items of income, gain, loss, deduction and credit (including our allocable share of those items of any entity in which we invest that is treated as a partnership or is otherwise subject to tax on a flow through basis) for each of our taxable years ending with or within their taxable year, regardless of whether or not they receive cash dividends from us. They may not receive cash dividends equal to their allocable share of our net taxable income or even the tax liability that results from that income. In addition, certain of our holdings, including holdings, if any, in a

Controlled Foreign Corporation (“CFC”) and a Passive Foreign Investment Company (“PFIC”), may produce taxable income prior to the receipt of cash relating to such income, and holders of our Class A shares will be required to take such income into account in determining their taxable income. Under our operating agreement, in the event of an inadvertent partnership termination in which the Internal Revenue Service (“IRS”) has granted us limited relief, each holder of our Class A shares also is obligated to make such adjustments as are required by the IRS to maintain our status as a partnership. Such adjustments may require persons who hold our Class A shares to recognize additional amounts in income during the years in which they hold such shares. We may also be required to make payments to the IRS.

Our intermediate holding company, FIG Corp., is subject to corporate income taxation in the United States, and we may be subject to additional taxation in the future.

A significant portion of our investments and activities may be made or conducted through FIG Corp. Dividends paid by FIG Corp. from time to time will, as is usual in the case of a U.S. corporation, then be included in our income. Income received as a result of investments made or activities conducted through FIG Asset Co. LLC (but excluding through its taxable corporate affiliates) is not subject to corporate income taxation in our structure, but we cannot provide any assurance that it will not become subject to additional taxation in the future, which would negatively impact our results of operations.

98

Table of Contents

There can be no assurance that amounts paid as dividends on Class A shares will be sufficient to cover the tax liability arising from ownership of Class A shares.

Any dividends paid on Class A shares will not take into account a shareholder’s particular tax situation (including the possible application of the alternative minimum tax) and, therefore, because of the foregoing as well as other possible reasons, may not be sufficient to pay their full amount of tax based upon their share of our net taxable income. In addition, the actual amount and timing of dividends will always be subject to the discretion of our board of directors and we cannot provide any assurance that we will in fact pay cash dividends as currently intended. In particular, the amount and timing of dividends will depend upon a number of factors, including, among others:

- our actual results of operations and financial condition;
- restrictions imposed by our operating agreement or applicable law;
- restrictions imposed by our credit agreements;
- reinvestment of our capital;
- the timing of the investment of our capital;
- the amount of cash that is generated by our investments or to fund liquidity needs;
- levels of operating and other expenses;
- contingent liabilities; or
- factors that our board of directors deems relevant.

Even if we do not distribute cash in an amount that is sufficient to fund a shareholder’s tax liabilities, they will still be required to pay income taxes on their share of our taxable income.

If we are treated as a corporation for U.S. federal income tax purposes, the value of the Class A shares would be adversely affected.

We have not requested, and do not plan to request, a ruling from the IRS on our treatment as a partnership for U.S. federal income tax purposes, or on any other matter affecting us. As of the date of the consummation of our initial public offering, under then current law and assuming full compliance with the terms of our operating agreement (and other relevant documents) and based upon factual statements and representations made by us, our outside counsel opined, as of that date, that we would be treated as a partnership, and not as an association or a publicly traded partnership taxable as a corporation for U.S. federal income tax purposes. However, opinions of counsel are not binding upon the IRS or any court, and the IRS may challenge this conclusion and a court may sustain such a challenge. The factual representations made by us upon which our outside counsel relied related to our organization, operation, assets, activities, income, and present and future conduct of our operations. In general, if an entity that would otherwise be classified as a partnership for U.S. federal income tax purposes is a “publicly traded partnership” (as defined in the Code) it will be nonetheless treated as a corporation for U.S. federal income tax purposes, unless the exception described below, and upon which we intend to rely, applies. A publicly traded partnership will, however, be treated as a partnership, and not as a corporation for U.S. federal income tax purposes, so long as 90% or more of its gross income for each taxable year constitutes “qualifying income” within the meaning of the Code and it is not required to register as an investment company under the Investment Company Act of 1940. We refer to this exception as the “qualifying income exception.”

Qualifying income generally includes dividends, interest, capital gains from the sale or other disposition of stocks and securities and certain other forms of investment income. We expect that our income generally will consist of interest, dividends, capital gains and other types of qualifying income, including dividends from FIG Corp. and interest on indebtedness from FIG Corp. No assurance can be given as to the types of income that will be earned in any given year. If we fail to satisfy the qualifying income exception described above, items of income and deduction would not pass through to holders of the Class A shares and holders of the Class A shares would be treated for U.S. federal (and certain state and local) income tax purposes as shareholders in a corporation. In such a case, we

99

Table of Contents

would be required to pay income tax at regular corporate rates on all of our income. In addition, we would likely be liable for state and local income and/or franchise taxes on all of such income. Dividends to holders of the Class A shares would constitute ordinary dividend income taxable to such holders to the extent of our earnings and profits, and the payment of these dividends would not be deductible by us. Taxation of us as a publicly traded partnership taxable as a corporation could result in a material adverse effect on our cash flow and the after-tax returns for holders of Class A shares and thus could result in a substantial reduction in the value of the Class A shares.

Our structure involves complex provisions of U.S. federal income tax law for which no clear precedent or authority may be available. Our structure also is subject to potential legislative, judicial or administrative change and differing interpretations, possibly on a retroactive basis.

The U.S. federal income tax treatment of holders of the Class A shares depends in some instances on determinations of fact and interpretations of complex provisions of U.S. federal income tax law for which no clear precedent or authority may be available. Readers should be aware that the U.S. federal income tax rules are constantly under review by persons involved in the legislative process, the IRS, and the U.S. Treasury Department, frequently resulting in revised interpretations of established concepts, statutory changes, revisions to regulations and other modifications and interpretations. The IRS pays close attention to the proper application of tax laws to partnerships. The present U.S. federal income tax treatment of an investment in the Class A shares may be modified by administrative, legislative or judicial interpretation at any time, and any such action may affect investments and commitments

previously made. For example, changes to the U.S. federal tax laws and interpretations thereof could make it more difficult or impossible to meet the qualifying income exception for us to be treated as a partnership for U.S. federal income tax purposes that is not taxable as a corporation, affect or cause us to change our investments and commitments, affect the tax considerations of an investment in us and adversely affect an investment in our Class A shares.

Our organizational documents and agreements permit the board of directors to modify our operating agreement from time to time, without the consent of the holders of Class A shares, in order to address certain changes in U.S. federal income tax regulations, legislation or interpretation. In some circumstances, such revisions could have a material adverse impact on some or all of the holders of our Class A shares. Moreover, we will apply certain assumptions and conventions in an attempt to comply with applicable rules and to report income, gain, deduction, loss and credit to holders in a manner that reflects such holders' beneficial ownership of partnership items, taking into account variation in ownership interests during each taxable year because of trading activity. However, these assumptions and conventions may not be in compliance with all aspects of applicable tax requirements. It is possible that the IRS will assert successfully that the conventions and assumptions used by us do not satisfy the technical requirements of the Code and/or Treasury regulations and could require that items of income, gain, deductions, loss or credit, including interest deductions, be adjusted, reallocated, or disallowed, in a manner that adversely affects holders of the Class A shares.

FIG Asset Co. LLC may not be able to invest in certain assets, other than through a taxable corporation.

In certain circumstances, FIG Asset Co. LLC or one of its subsidiaries may have an opportunity to invest in certain assets through an entity that is characterized as a partnership for U.S. federal income tax purposes, where the income of such entity may not be "qualifying income" for purposes of the publicly traded partnership rules. In order to manage our affairs so that we will meet the qualifying income exception, we may either refrain from investing in such entities or, alternatively, we may structure our investment through an entity classified as a corporation for U.S. federal income tax purposes. If the entity were a U.S. corporation, it would be subject to U.S. federal income tax on its operating income, including any gain recognized on its disposal of its interest in the entity in which the opportunistic investment has been made, as the case may be, and such income taxes would reduce the return on that investment.

100

Table of Contents

Complying with certain tax-related requirements may cause us to forego otherwise attractive business or investment opportunities or enter into acquisitions, borrowings, financings or arrangements we may not have otherwise entered into.

In order for us to be treated as a partnership for U.S. federal income tax purposes, and not as an association or publicly traded partnership taxable as a corporation, we must meet the qualifying income exception discussed above on a continuing basis and we must not be required to register as an investment company under the Investment Company Act of 1940. In order to effect such treatment we (or our subsidiaries) may be required to invest through foreign or domestic corporations, forego attractive business or investment opportunities or enter into borrowings or financings we may not have otherwise entered into. This may adversely affect our ability to operate solely to maximize our cash flow. Our structure also may impede our ability to engage in certain corporate acquisitive transactions because we generally intend to hold all of our assets through the Fortress Operating Group. In addition, we may be unable to participate in certain corporate reorganization transactions that would be tax free to our holders if we were a corporation. To the extent we hold assets other than through the Fortress Operating Group, we will make appropriate

adjustments to the Fortress Operating Group agreements so that distributions to principals and us would be the same as if such assets were held at that level.

The IRS could assert that we are engaged in a U.S. trade or business, with the result that some portion of our income is properly treated as effectively connected income with respect to non-U.S. holders. Moreover, certain REIT dividends and other stock gains may be treated as effectively connected income with respect to non-U.S. holders.

While we expect that our method of operation will not result in a determination that we are engaged in a U.S. trade or business, there can be no assurance that the IRS will not assert successfully that we are engaged in a U.S. trade or business, with the result that some portion of our income is properly treated as effectively connected income with respect to non-U.S. holders. Moreover, dividends paid by an investment that we make in a REIT that is attributable to gains from the sale of U.S. real property interests will, and sales of certain investments in the stock of U.S. corporations owning significant U.S. real property may, be treated as effectively connected income with respect to non-U.S. holders. To the extent our income is treated as effectively connected income, non-U.S. holders generally would be subject to withholding tax on their allocable shares of such income, would be required to file a U.S. federal income tax return for such year reporting their allocable shares of income effectively connected with such trade or business, and would be subject to U.S. federal income tax at regular U.S. tax rates on any such income. Non-U.S. holders may also be subject to a 30% branch profits tax on such income in the hands of non-U.S. holders that are corporations.

An investment in Class A shares will give rise to UBTI to certain tax-exempt holders.

We will not make investments through taxable U.S. corporations solely for the purpose of limiting unrelated business taxable income, or UBTI, from “debt-financed” property and, thus, an investment in Class A shares will give rise to UBTI to certain tax-exempt holders. For example, FIG Asset Co. LLC will invest in or hold interests in entities that are treated as partnerships, or are otherwise subject to tax on a flow-through basis, that will incur indebtedness. FIG Asset Co. LLC may borrow funds from FIG Corp. or third parties from time to time to make investments. These investments will give rise to UBTI from “debt-financed” property. However, we expect to manage our activities to avoid a determination that we are engaged in a trade or business, thereby limiting the amount of UBTI that is realized by tax-exempt holders of our Class A shares.

We may hold or acquire certain investments through an entity classified as a PFIC or CFC for U.S. federal income tax purposes.

Certain of our investments may be in foreign corporations or may be acquired through a foreign subsidiary that would be classified as a corporation for U.S. federal income tax purposes. Such an entity may be a PFIC or a CFC for U.S. federal income tax purposes. U.S. holders of Class A shares indirectly owning an interest in a PFIC or a CFC may experience adverse U.S. tax consequences.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Use of Proceeds from Initial Public Offering

Edgar Filing: Fortress Investment Group LLC - Form 10-Q

On February 8, 2007, Fortress Investment Group LLC completed an initial public offering of 39,428,900 of its Class A shares, including those shares sold pursuant to the exercise of the underwriters' over-allotment option, at a price of \$18.50 per share. Fortress Investment Group LLC sold all of the shares offered, for which it received net proceeds of approximately \$652.7 million, which is net of the underwriters' discount of approximately \$43.8 million and other expenses. The Class A shares sold in the offering were registered under the Securities Act on a registration statement on Form S-1 (No. 333-138514) that was declared effective by the SEC on February 8, 2007. Public trading on the common stock commenced on February 9, 2007. The managing underwriters for the initial public offering were Goldman, Sachs & Co. and Lehman Brothers Inc.

Upon consummation of the offering, Fortress Investment Group LLC contributed the net proceeds from the offering to Fortress Operating Group in exchange for 39,428,900 limited partnership units. Fortress Operating Group applied these proceeds as follows: (a) to pay \$250 million outstanding under the term loan facility of our 2006 Credit Agreement, as required by that credit agreement, (b) to pay \$85 million currently outstanding under the revolving credit facility of our 2006 Credit Agreement, and intended to use the remaining proceeds (a) to fund \$169 million of commitments to existing private equity funds, and (b) to use \$149 million for general business purposes. As of March 31, 2007, \$206.2 million of IPO proceeds remained unused, of which \$67.7 million is intended for private equity capital commitments and \$138.5 million is intended for general business purposes.

Item 3. Defaults upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Item 5. Other Information

None.
