PART I

ITEM 1. DESCRIPTION OF BUSINESS.

GENERAL

We were incorporated under the laws of the State of Colorado on August 8, 1996. As of the date of this report on Form 10-KSB, we are still in the development stage. To date our only activities have been organizational ones, directed at developing our business plan and raising our initial capital. While we have no current operations, we are in the oil and gas business. We have no full-time employees and own no real estate.

On December 17, 1997, control of us passed to Michael Delaney, who paid cash consideration of \$11,359 for a total of 627,965 common shares, which was a total of approximately 61% of our shares. Mr. Delaney was also named our President, Secretary, and sole Director at that time, and the former Officer and Director resigned.

PROPOSED OPERATIONS

Our business plan is to develop oil and gas wells for our own account and for potential clients. We have investigated certain possibilities but have drilled no oil or gas wells. At the present time, there are no active negotiations being carried on regarding the acquisition of properties and the drilling of oil or gas wells. Within the next twelve months, we plan to limit our activities to the Western United States. We may also look to option leases, which we would hold for resale to third parties.

Potential leases may be received from individuals or companies by assignment under an agreement to develop or sell such leases on behalf of such persons. We plan in the future to act as a broker for lease situations involving third parties. No leases or clients have been identified at this time. It is also our intention to develop oil and gas lease projects in which we can act either as the drilling operator for an investor group or as a broker of leases for a lessor.

When acting for our own account, we will acquire interests in various lease tracts located in areas where we plan to explore for oil or gas. At the present time, none of the specific tracts have been identified by us. However, the tracts are expected to fit into an overall profile.

The tracts will be entirely within a specific, defined geographical area, will be exploratory or developmental, at our discretion, and will be subject to landowners' and overriding royalty interests totaling in the range of 12.5% to 25%, so we and our partners can acquire between a 87.5% and 75% net revenue interest and a 100% working interest in the drill site. The specific ownership interests between us and our partners will be negotiated on an individual project basis.

Edgar Filing: BOULDER CAPITAL OPPORTUNITIES II LTD - Form 10KSB

We will focus our attention on drilling primarily in the same specific geographical area in which we plan to acquire interests. We plan to concentrate our activities in the Western United States. We plan to utilize various reporting services such as Petroleum Information and our contacts within the petroleum industry to identify drilling locations, companies and ownership activity. However, since the thrust of our initial efforts will be to acquire leases with a minimum of capital outlay, we will also look at situations in any other geographical area where such leases may be obtained. The ability to drill in a specific lease area will be secondary to the ability to acquire a lease on terms most favorable to us and at little or no capital outlay. At the present time, we have been looking for leases which meet the above-mentioned criteria but has not yet identified any lease situations which we believe would be appropriate for acquisition. We cannot predict when such identification will occur.

We expect to enter into turnkey drilling contracts with an unaffiliated third party for the drilling of any wells. At some later time, we may act as the driller of the wells, although there are no plans to do so at the present time. The costs of drilling wells have not been determined at this time. In any case, we will make every attempt to see that the well are drilled in such areas with our best estimate of making the best return on investment for us and our partners.

The turnkey drilling contract represents the cost of drilling and completion. If, in our sole opinion, a well should not be completed because it will not produce sufficient oil or gas to return a profit, then we would not anticipate expending the completion funds for such well.

It is currently anticipated that any wells to be drilled by us will be drilled within the geographical area or areas selected by us. However, once selected, if subsequent engineering evaluation indicates a more favorable location, we reserve the right to move the drill site or sites, as the case may be, to such location or locations, as the case may be. Any substituted well location or drill site would compare favorably with the general character of the site previously selected regarding degree of risk, drilling depth and cost. Furthermore, it is expected, though not necessarily required, that any such substituted well location or drill site will be in the same general area as the site specified herein.

In addition, we would reserve the right to unitize or pool all of the wells in the selected geographical area into a common production pool or unit. In such event, the owners of the wells, which may include non-partnership investors of ours, will share in the revenue on a pro-rata basis.

We expect to participate in joint ventures with other entities in the development of some prospects. We will have the sole discretion in determining which prospects will be suitable for joint venture participation. In each such joint venture project, any such partnership would receive its pro rata portion of the 100% working interest and would be responsible for its pro rata share of costs and expenses.

Also, we may seek, investigate, and, if warranted, acquire one or more oil or gas properties. The acquisition of a business opportunity may be made by purchase, merger, exchange of stock, or otherwise, and may encompass assets or a business entity, such as a corporation, joint venture, or partnership. We have very limited capital, and it is unlikely that we will be able to take advantage of more than one such business opportunity. We intend to seek opportunities demonstrating the potential of long-term growth as opposed to short-term

Edgar Filing: BOULDER CAPITAL OPPORTUNITIES II LTD - Form 10KSB

earnings.

At the present time we have not identified any oil or gas business opportunity that we plan to pursue, nor have we reached any agreement or definitive understanding with any person concerning any business matter. No assurance can be given that we will be successful in finding or acquiring a desirable business opportunity, or that any acquisition that occurs will be on terms that are favorable to us or our stockholders.

MARKETS

Our initial marketing plan will be focused completely on developing oil and gas lease projects in which we can act either as the drilling operator for an investor group or as a broker of leases for a lessor. No efforts toward this marketing plan have been made as of the date hereof.

RAW MATERIALS

The use of raw materials is not now material factor in our operations at the present time.

CUSTOMERS AND COMPETITION

At the present time, we are expected to be experience intense competition in the acquisition of oil and gas leases. There are a number of established companies, many of which are larger and better capitalized than us and/or have greater personnel resources and technical expertise. In view of our extremely limited financial resources, we will be at a significant competitive disadvantage compared to our competitors.

BACKLOG

At December 31, 2004, we had no backlogs.

EMPLOYEES

At as of the date hereof, we have one employee, our President, Mr. Delaney, who presently does not receive any compensation. We do not plan to hire employees in the future.

PROPRIETARY INFORMATION

We have no proprietary information.

4

We expect to be subject to material governmental regulation and environmental compliance and approvals customarily incident to the operation of an oil and gas company. 5

PLAN OF OPERATIONS

We have generated no revenues from our operations in recent years and have been a development stage company since our formation. Since we have not generated revenues and have not been in a profitable position, we operate with minimal overhead. Our primary activity will be to search for and to acquire oil and gas leases for our own account, and for the foreseeable future to search for and to acquire oil and gas leases for the account of our clients. No leases or clients have been identified at this time. We intend to develop oil and gas lease projects in which we can act either as the drilling operator for an investor group or as a broker of leases for a lessor and for the account of its clients. Leases may be received from individuals or companies by assignment under an agreement to develop or sell such leases on behalf of such persons. We also plan in the future to act as a broker for lease situations involving third parties.

No assurance can be given that we will be successful in finding or acquiring a desirable business opportunity, or that any acquisition that occurs will be on terms that are favorable to us or our stockholders.

Edgar Filing: BOULDER CAPITAL OPPORTUNITIES II LTD - Form 10KSB

Our plan of operations for the next twelve months is to continue to carry out our plan of business discussed above. This includes seeking to complete a merger or acquisition transaction for oil or gas properties.

LIQUIDITY AND CAPITAL RESOURCES

As of the end of the reporting period, we had no material cash or cash equivalents. There was no significant change in working capital during this fiscal year.

Our management feels we have inadequate working capital to pursue any business opportunities other than seeking leases for acquisition and partnership with third parties. We will have negligible capital requirements prior to the consummation of any such acquisition. We so not intend to pay dividends in the foreseeable future.

We will not be required to raise additional funds, nor will our shareholders be required to advance funds in order to pay our current liabilities and to satisfy our cash requirements for the next twelve months.

ITEM 7. FINANCIAL STATEMENTS.

Financial statements for the years ended December 31, 2004 and 2003 are presented in a separate section of this report following Item 14.

That evaluation was performed under the supervision and with the participation of its management, including its Chief Executive Officer and its Chief Financial Officer. Based on that evaluation, our Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting him to material information relating to Entrust Financial Services required to be included in its periodic SEC filings.

BOULDER CAPITAL OPPORTUNITIES II, INC.
(An Exploration Stage Company)
FINANCIAL STATEMENTS
For Years Ended December 31, 2004 and 2003

INDEPENDENT AUDITOR'S REPORT

Board of Directors
Boulder Capital Opportunities II, Inc.
Chandler, AZ

We have audited the accompanying balance sheet of Boulder Capital Opportunities II, Inc., (An Exploration Stage Company) as of December 31, 2004 and 2003, and the related statements of operations, stockholders' equity, and cash flows for the years ended December 31, 2004 and 2003 and for the period August 6, 1996 (inception) to December 31, 2004. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements, based on our audits.

We conducted our audits "in accordance with standards of the Public Company Accounting Oversight Board (United States)" as outlined in PCAOB Auditing Standard No. 1. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Edgar Filing: BOULDER CAPITAL OPPORTUNITIES II LTD - Form 10KSB

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Boulder Capital Opportunities II, Inc., as of December 31, 2004 and 2003, and the results of their operations and their cash flows for the years ended December 31, 2004 and 2003, and for the period August 6, 1996 (inception) to December 31, 2004, in conformity with accounting principles generally accepted in the United States.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 3 to the financial statements the Company is in the exploration stage, and will require funds from profitable operations, from borrowing or from sale of equity securities to execute its business plan. Management's plans in regard to these matters are also discussed in Note 3. These factors raise substantial doubt about its ability to continue as a going concern. The financial statements do not include any adjustments that might result from this uncertainty.

effective date of FIN 146 for variable interest entities in existence prior to February 1, 2003, was delayed to December 31, 2003. In December 2003, the FASB issued a revised version of FIN 146, which effectively delayed implementation until March 2004, with earlier adoption permitted. SFAS No. 146 did not materially effect the financial statements.

In March 2003, the FAS issued SFAS No. 149, "Amendment of Statement 133 on Derivative Instruments and Hedging Activities". SFAS 149 is effective for contracts entered into or modified after June 30, 2003. The statement amends and clarifies financial accounting and reporting for derivative instruments, including certain derivative instruments embedded in other contracts (collectively referred to as derivatives) and for hedging activities under SFAS 133, "Accounting for Derivative Instruments and Hedging Activities". SFAS 149 did not materially effect the financial statements.

In May 2003, the FASB issued SFAS No. 150, "Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity". SFAS 150 is effective for financial instruments entered into or modified after May 31, 2003, and otherwise is effective at the beginning to the first interim period beginning after June 15, 2003. This statement establishes new standards of how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. SFAS 150 requires that an issuer classify a financial instrument that is within the scope of this statement as a liability because the financial instrument embodies an obligation of the issuer. This statement applies to certain forms of mandatorily redeemable financial instruments including certain types of preferred stock, written put options and forward contracts. SFAS 150 did not materially effect the financial statements.
