Notes to Consolidated Financial Statements

October 3, 2015

NOTE 1 BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements include the accounts of Newport Corporation and its subsidiaries (collectively referred to as the Company) and have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions of Form 10-Q and Rule 10-01 of Regulation S-X. In the opinion of management, all adjustments (consisting of normal and recurring accruals) considered necessary for a fair presentation have been included. All intercompany transactions and balances have been eliminated in consolidation.

The accompanying unaudited consolidated financial statements do not include certain footnotes and financial presentations normally required under generally accepted accounting principles (GAAP) and, therefore, should be read in conjunction with the consolidated financial statements and related notes contained in the Company's Annual Report on Form 10-K for the year ended January 3, 2015. The results for the interim periods are not necessarily indicative of the results the Company will have for the full year ending January 2, 2016. The January 3, 2015 balances reported herein are derived from the audited consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended January 3, 2015.

NOTE 2 RECENT ACCOUNTING PRONOUNCEMENTS

In September 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2015-16, *Simplifying the Accounting for Measurement Period Adjustments*. ASU No. 2015-16 requires an acquirer in a business combination to recognize adjustments to the provisional amounts that are identified during the measurement period to be reported in the period in which the adjustment amounts are determined. In addition, the effect on earnings of changes in depreciation or amortization, or other income effects (if any) as a result of the change to the provisional amounts, calculated as if the accounting had been completed as of the acquisition date, must be recorded in the reporting period in which the adjustment amounts are determined. ASU No. 2015-16 will be effective for fiscal years and interim periods beginning after December 15, 2015, and is required to be applied prospectively. Early adoption is permitted for financial statements that have not been issued prior to the effective date of this update. The Company's adoption of ASU No. 2015-16 is not expected to have a material impact on the Company's financial position or results of operations.

NOTE 3 ACQUISITION OF FEMTOLASERS

On February 11, 2015, the Company acquired all of the capital stock of FEMTOLASERS Produktions GmbH (FEMTOLASERS). The initial purchase price of \$9.1 million was paid in cash at closing and is subject to a net asset adjustment. The Company has estimated a net asset adjustment of \$2.1 million, resulting in a purchase price of \$7.0 million (approximately \$7.9 million). The final amount of this net asset

Edgar Filing: NEWPORT CORP - Form 10-Q

adjustment is currently under negotiation between the Company and the FEMTOLASERS selling shareholders. Of the initial purchase price, 2.3 million was deposited at closing into escrow until 30 months after closing, to secure certain obligations of the FEMTOLASERS selling shareholders under the share purchase agreement, including the net asset adjustment. The Company incurred \$0.4 million in transaction costs, which have been expensed as incurred and are included in *selling, general and administrative expense* in the statements of income and comprehensive income. FEMTOLASERS expands the Company's offering of ultrafast laser products and enhances its technology base in this area. The results of FEMTOLASERS have been included in the results of the Company's Lasers Group as of the acquisition date.

Immediately following the closing of the acquisition, the Company repaid 3.6 million (approximately \$4.0 million) of FEMTOLASERS outstanding loans that were assumed as part of the acquisition.

The consideration paid by the Company for the acquisition of FEMTOLASERS is allocated to the assets acquired, net of the liabilities assumed, based upon their estimated fair values as of the date of the acquisition. The excess of the purchase price over the estimated fair value of the assets acquired, net of the estimated fair value of the liabilities assumed, is recorded as goodwill. As discussed above, the Company has not yet finalized the purchase price. Any changes during the measurement period may have a further impact on goodwill.

The goodwill related to the acquisition of FEMTOLASERS has been allocated to the Company's Lasers Group and will not be deductible for tax purposes.

The actual net sales and net income (loss) of FEMTOLASERS from February 11, 2015, the closing date of the acquisition, were included in the Company's consolidated statements of income and comprehensive income for the three and nine months ended October 3, 2015, and are set forth in the table below. Also set forth in the table below are the pro forma net sales and net income of the Company during the three and nine months ended October 3, 2015 and September 27, 2014, including the results of FEMTOLASERS as though the acquisition had occurred at the beginning of 2014. This supplemental pro forma financial information is presented for information purposes only and is not necessarily indicative of the results of operations that would have been achieved if the acquisition had occurred as of the beginning of 2014.

For the purposes of determining pro forma net income, adjustments were made to actual net income of the Company for all periods presented in the table above. The pro forma net income assumes that amortization of acquired intangible assets began at the beginning of 2014 rather than on February 11, 2015. The result is a net increase in amortization expense of \$0.1 million and \$0.4 million for the three and nine months ended September 27, 2014, respectively. Transaction costs totaling \$0.4 million, which were incurred prior to the closing of the acquisition, are excluded from pro forma net income.

NOTE 4 FAIR VALUE MEASUREMENTS

Accounting Standards Codification (ASC) 820-10, *Fair Value Measurements*, requires the fair value of any assets and liabilities stated at fair value on a recurring basis in the Company's financial statements to be measured based on the price that would be received from selling such an asset or paid to transfer such a liability in an orderly transaction between market participants at the measurement date. Level 1 asset and liability values are derived from quoted prices in active markets for identical assets and liabilities, and Level 2 asset and liability values are derived from quoted prices in inactive markets or based on other observable inputs.

The Company's assets and liabilities measured at fair value on a recurring basis are categorized in the table below based upon their level within the fair value hierarchy as of October 3, 2015.

Accrued Warranty Obligations

Unless otherwise stated in the Company's product literature or in its agreements with customers, products sold by the Company's Photonics and Optics Groups generally carry a one-year warranty from the original invoice date on all product materials and workmanship, other than filters and gratings products, which generally carry a 90-day warranty, and laser beam profilers and dental CAD/CAM scanners, which generally carry a two-year warranty. Products sold by the Photonics and Optics Groups to original equipment manufacturer (OEM) customers carry warranties generally ranging from 15 to 19 months. Products sold by the Company's Lasers Group carry warranties that vary by product and product component, but generally range from 90 days to two years. In certain cases, such warranties for Lasers Group products are limited by either a set time period or a maximum amount of hourly usage of the product, whichever occurs first. Defective products will be either repaired or replaced, generally at the Company's option, upon meeting certain criteria. The Company accrues a provision for the estimated costs that may be incurred for warranties relating to a product (based on historical experience) as a component of cost of sales. Short-term accrued warranty obligations, which expire within one year, are included in *accrued expenses and other current liabilities* and long-term warranty obligations are included in *other long-term liabilities* in the accompanying consolidated balance sheets.

The activity in accrued warranty obligations was as follows:

As of October 3, 2015, the gross values and accumulated amortization shown in the table above for intangible assets subject to amortization exclude amounts related to the Company's acquisition of Spectra-Physics, Inc. (and certain related entities), as the purchased intangible assets related to that acquisition have been fully amortized.

As of January 3, 2015, acquisition related intangible assets were as follows:

(In thousands)	Amortization Period	Gross Value	Accumulated Amortization	Carrying Value
Intangible assets subject to amortization:				
Developed technology	10-20 years	\$ 45,646	\$ (16,782)	\$ 28,864

Amortization expense related to intangible assets totaled \$2.1 million and \$1.9 million for the three months ended October 3, 2015 and September 27, 2014, respectively, and \$6.3 million and \$6.8 million for the nine months ended October 3, 2015 and September 27, 2014, respectively.

Edgar Filing: NEWPORT CORP - Form 10-Q

Estimated aggregate amortization expense for future fiscal years is as follows:

(In thousands)		Estimated Aggregate Amortization Expense
2015 (remaining)	\$	2,168
2016		8,283
2017		7,131
2018		4,966

NOTE 8 STOCK-BASED COMPENSATION

During the nine months ended October 3, 2015, the Company granted 0.5 million restricted stock units and 0.5 million stock-settled stock appreciation rights with weighted average grant date fair values of \$19.06 and \$7.60, respectively.

The total stock-based compensation expense included in the Company's consolidated statements of income and comprehensive income was as follows:

(In thousands)	Three Months Ended		Nine Months Ended	
	October 3, 2015	September 27, 2014	October 3, 2015	September 27, 2014

	\$ 3,231	\$ 3,141	\$ 10,058	\$ 8,588

At October 3, 2015, the total compensation cost related to unvested stock-based awards granted to employees, officers and directors under the Company's stock-based benefit plans that had not yet been recognized was \$18.3 million, net of estimated forfeitures. This future compensation expense will be amortized over a weighted-average period of 1.9 years using the straight-line attribution method. The actual compensation

expense that the Company will recognize in the future related to unvested stock-based awards outstanding at October 3, 2015 will be adjusted for actual forfeitures and will be adjusted based on the Company's determination as to the extent to which performance conditions applicable to any stock-based awards have been or will be achieved.

Basic	\$ 0.18	\$ 0.24	\$ 0.55	\$ 0.66
Diluted	\$ 0.18	\$ 0.23	\$ 0.54	\$ 0.65

For the three and nine months ended October 3, 2015, 1.5 million stock appreciation rights, and for the three and nine months ended September 27, 2014, an aggregate of 0.7 million stock options and stock appreciation rights, were excluded from the computations of diluted net income per share, as their inclusion would have been antidilutive. For the three and nine months ended October 3, 2015, 0.5 million performance-based restricted stock units, and for the three and nine months ended September 27, 2014, 0.6 million performance-based restricted stock units, were excluded from the computations of diluted net income per share, as the performance criteria for their vesting had not been met as of the end of such periods.

NOTE 11 **INCOME TAXES**

Income tax expense for each of the three and nine months ended October 3, 2015 and September 27, 2014 consisted of a provision for federal, state and foreign taxes based on the annual estimated effective tax rate applicable to the Company, adjusted for items which are considered discrete to a particular period. The effective tax rates for the three and nine months ended October 3, 2015 were 22.0% and 30.2%, respectively, and the effective tax rates for the three and nine months ended September 27, 2014 were 19.7% and 27.0%, respectively.

The effective tax rates for the three and nine months ended October 3, 2015 were lower than the U.S. statutory rate of 35% due primarily to the benefit of income recorded in foreign jurisdictions that have tax rates that are lower than U.S. tax rates and an increased utilization of foreign tax credits that were previously unrecognized, necessitated by the completion and filing of the 2014 U.S. federal consolidated return during the third quarter, which was recorded as a discrete item. The effective tax rate for the three months ended October 3, 2015 was also favorably impacted by profitable results recorded in jurisdictions where the Company maintains a full valuation allowance. The effective tax rate for the nine months ended October 3, 2015 was unfavorably impacted by the passage of Japanese tax reform legislation on March 31, 2015, which lowered long-term corporate tax rates, necessitating a corresponding reduction of deferred tax assets applicable to the Company's Japanese locations. The effective tax rates for the three and nine months ended September 27, 2014 were lower than the rates for the three and nine months ended October 3, 2015, respectively, due primarily to the favorable impact of an extraterritorial income exclusion benefit and a reduction of the corresponding uncertain tax position, which was recorded as a discrete item during the third quarter of 2014.

NOTE 12

STOCKHOLDERS EQUITY TRANSACTIONS

In May 2008, the Board of Directors of the Company approved a share repurchase program, authorizing the purchase of up to 4.0 million shares of the Company's common stock. During the nine months ended October 3, 2015, the Company repurchased 1.7 million shares for a total of \$27.9 million under this program. As of October 3, 2015, 1.7 million shares remained available for purchase under the program.

Table of Contents**NEWPORT CORPORATION****Notes to Consolidated Financial Statements****October 3, 2015**

During the nine months ended October 3, 2015, the Company cancelled 0.2 million shares of common stock underlying restricted stock units in payment by employees of taxes owed upon the vesting of restricted stock units issued to them under the Company's stock incentive plans. The value of these restricted stock units totaled \$3.4 million at the time they were cancelled.

NOTE 13 DEFINED BENEFIT PENSION PLANS

The Company has defined benefit pension plans covering substantially all full-time employees in France, Germany, Israel and Japan. In addition, the Company has certain pension liabilities relating to former employees of the Company in the United Kingdom. The Company's German plan is unfunded, as permitted under the plan and applicable laws. For financial reporting purposes, the calculation of net periodic pension costs is based upon a number of actuarial assumptions, including a discount rate for plan obligations, an assumed rate of return on pension plan assets and an assumed rate of compensation increase for employees covered by the plan. All of these assumptions are based upon management's judgment, considering all known trends and uncertainties. Actual results that differ from these assumptions would impact future expense recognition and the cash funding requirements of the Company's pension plans.

Net periodic benefit costs for the plans in aggregate included the following components:

(In thousands)	Three Months Ended		Nine Months Ended	
	October 3, 2015	September 27, 2014	October 3, 2015	September 27, 2014

NOTE 14 BUSINESS SEGMENT INFORMATION

The operating segments reported below are the segments of the Company for which separate financial information is available and for which operating results are evaluated regularly by the Chief Executive Officer, who is the chief operating decision maker, in deciding how to allocate resources and in assessing performance. The Company develops, manufactures and markets its products within three distinct business segments: its Photonics Group, its Lasers Group and its Optics Group.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with our unaudited consolidated financial statements and related notes included elsewhere in this Quarterly Report on Form 10-Q and in conjunction with our Annual Report on Form 10-K for the year ended January 3, 2015 previously filed with the SEC. This discussion contains descriptions of our expectations regarding future trends affecting our business. Words such as anticipate, believe, can, continue, could, estimate, expect, intend, may, plan, potential, predict, should, will, would, or the negative or other variations thereof or comparable terminology are intended to identify forward-looking statements. In addition, any statements that refer to projections of our future financial performance or condition, trends in our business, or other characterizations of future events or circumstances are forward-looking statements. These forward-looking statements and other forward-looking statements made elsewhere in this report are made in reliance upon safe harbor provisions in Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of several factors, including, but not limited to those factors set forth and discussed in Item 1 (Business) and Item 1A (Risk Factors) of Part I, and Item 7 (Management's Discussion and Analysis of Financial Condition and Results of Operations) of Part II, of our Annual Report on Form 10-K for the year ended January 3, 2015. In light of the significant uncertainties inherent in the forward-looking information included in this report, the inclusion of this information should not be regarded as a representation by us or any other person that our objectives or plans will be achieved and readers are cautioned not to place undue reliance on such forward-looking information. Except as required by law, we undertake no obligation to update or revise these forward-looking statements, whether as a result of new information, future events or otherwise.

Overview

We are a global supplier of advanced-technology products and systems, including lasers, photonics instrumentation, precision positioning and vibration isolation products and systems, optical components, subassemblies and subsystems, and three-dimensional non-contact measurement equipment. Our products are used worldwide in a variety of industries, including scientific research, defense and security, microelectronics, life and health sciences and industrial markets. We operate within three distinct business segments: our Photonics Group, our Lasers Group and our Optics Group. Each of these groups offers a broad array of advanced technology products and services to original equipment manufacturer (OEM) and end-user customers across a wide range of applications in all of our targeted end markets.

The following is a discussion and analysis of certain factors that have affected our results of operations and financial condition during the periods included in the accompanying unaudited consolidated financial statements.

Acquisition of FEMTOLASERS

On February 11, 2015, we acquired all of the capital stock of FEMTOLASERS Produktions GmbH (FEMTOLASERS). The initial purchase price of 9.1 million was paid in cash at closing and is subject to a net asset adjustment. We have estimated a net asset adjustment of 2.1 million,

Edgar Filing: NEWPORT CORP - Form 10-Q

resulting in a purchase price of 7.0 million (approximately \$7.9 million). The final amount of this net asset adjustment is currently under negotiation between us and the FEMTOLASERS selling shareholders. Of the initial purchase price, 2.3 million was deposited at closing into escrow until 30 months after closing, to secure certain obligations of the FEMTOLASERS selling shareholders under the share purchase agreement, including the net asset adjustment. We incurred \$0.4 million in transaction costs, which have been expensed as incurred and are included in *selling, general and administrative expense* in the statements of income and comprehensive income. FEMTOLASERS expands our offering of ultrafast laser products and enhances our technology base in this area. The results of FEMTOLASERS have been included in the results of our Lasers Group as of the acquisition date.

Immediately following the closing of the acquisition, we repaid 3.6 million (approximately \$4.0 million) of FEMTOLASERS outstanding loans that were assumed as part of the acquisition.

Net Sales

Each of our operating groups sells products to customers in a wide range of industries, which we categorize into five key end markets: scientific research market; defense and security markets; microelectronics market; life and health sciences market; and industrial manufacturing and other end markets. The tables below reflect our net sales for the three and nine months ended October 3, 2015 and September 27, 2014, by operating group and by key end market.

Our sales for the three and nine months ended October 3, 2015 were negatively impacted by the stronger U.S. dollar, which resulted in the translation of foreign currency denominated sales into fewer U.S. dollars, compared with the corresponding periods in 2014. Our sales for both periods in 2015 were positively impacted compared with the corresponding periods in 2014 by the additional sales contributed by V-Gen Ltd. (V-Gen), which we acquired in the fourth quarter of 2014, and by FEMTOLASERS, which we acquired in the first quarter of 2015. The aggregate sales of these acquired businesses, which are included in our Lasers Group, were \$3.6 million and \$10.7 million for the three and nine months ended October 3, 2015, respectively, and there were no corresponding sales in the three and nine months ended September 27, 2014.

The increases in sales to the scientific research market for the three and nine months ended October 3, 2015 compared with the corresponding periods in 2014 were due primarily to increased demand for products sold by our Lasers Group for research applications, and our acquisition of FEMTOLASERS, which contributed net sales to this market of \$2.2 million and \$4.5 million for the three and nine months ended October 3, 2015, respectively, for which there were no corresponding sales in the 2014 periods. Generally, our net sales to this market by each of our operating groups may fluctuate from period to period due to changes in overall research spending levels and the timing of large sales relating to major research programs and, in some cases, these fluctuations may be offsetting between our operating groups or between such periods.

The decrease in sales to the microelectronics market for the three months ended October 3, 2015 compared with the corresponding period in 2014 was due primarily to lower sales by both our Lasers and Optics Groups to semiconductor equipment manufacturing customers, as well as a large sale of laser products for a solar equipment manufacturing application in the third quarter of 2014 that did not recur in the third quarter of 2015. Such decreases were offset in part by higher sales by our Photonics Group to semiconductor equipment manufacturing customers. The increase in sales to this market in the nine months ended October 3, 2015 compared with the corresponding period in 2014 was due primarily to higher sales by our Photonics Group to semiconductor equipment and mobile device manufacturing customers, offset in part by the lower sales by our Lasers and Optics Groups discussed above. Our microelectronics market is comprised primarily of OEM customers in the semiconductor capital equipment industry, which has historically been characterized by sudden and severe cyclical variations in product supply and demand. In addition, certain of our programs with these customers often comprise a significant portion of our sales to this market in any period. As such, our net sales to this market may fluctuate significantly from period to period depending on the timing and severity of industry upturns and downturns, as well as the timing and success of new design wins and associated customer programs.

Table of Contents

The decreases in sales to the life and health sciences market for the three and nine months ended October 3, 2015 compared with the corresponding periods in 2014 were due primarily to decreased sales of products used for surgical and dental imaging applications. For the three month period, the decrease was offset in part by increased sales of products used in bioimaging applications. Generally, our net sales to this market may fluctuate from period to period due to the timing of shipments to our OEM customers and, in some cases, these fluctuations may be offsetting between our operating groups or between such periods.

The increase in sales to the defense and security markets for the three months ended October 3, 2015 compared with the corresponding period in 2014 was due to moderately higher sales by each of our operating groups. The increase in sales to these markets for the nine months ended October 3, 2015 compared with the corresponding period in 2014 was due primarily to increased sales of optics products for defense programs that had been previously delayed due to government funding constraints and for new programs. Generally, our net sales to these markets by each of our operating groups may fluctuate from period to period due to changes in overall defense spending levels and the timing of large sales relating to major defense programs and, in some cases, these fluctuations may be offsetting between our operating groups or between such periods.

The decrease in sales to the industrial manufacturing and other end markets for the three months ended October 3, 2015 compared with the corresponding period in 2014 was due to general weakness in macro-economic conditions. The decrease in sales to these markets for the nine months ended October 3, 2015 compared with the corresponding period in 2014 was due primarily to lower sales of test systems for diode laser manufacturing applications, as well as general weakness in macro-economic conditions. These decreases were offset in part by our acquisition of V-Gen, which contributed net sales to these markets of \$0.5 million and \$3.8 million for the three and nine months ended October 3, 2015, respectively, for which there were no corresponding sales in the 2014 periods.

The table below reflects our net sales by geographic region. Sales are attributed to each region based on the customer address to which the product is shipped.

The increase in sales to customers in the United States for the nine months ended October 3, 2015 compared with the corresponding period in 2014 was due primarily to increased sales to customers in our scientific research and defense and security end markets.

Table of Contents

The decrease in sales to customers in Germany for the three months ended October 3, 2015 compared with the corresponding period in 2014 was due primarily to lower sales to customers in our life and health sciences and industrial manufacturing end markets, offset in part by higher sales to customers in our scientific research end market. The decrease in sales to customers in Germany for the nine months ended October 3, 2015 compared with the corresponding period in 2014 was due to lower sales to customers in all of our end markets.

The increases in sales to customers in other European countries for the three and nine months ended October 3, 2015 compared with the same periods in 2014 were due primarily to higher sales to customers in our scientific research end market. Such increases were offset in part by lower sales to customers in our industrial manufacturing and other end markets and, for the nine month period, such increases were also offset in part by lower sales to customers in our life and health sciences end market.

The increase in sales to customers in Japan for the three months ended October 3, 2015 compared with the corresponding period in 2014 was due primarily to increased sales to customers in our microelectronics end market, offset in part by lower sales to customers in our life and health sciences end market. The decrease in sales to customers in Japan for the nine months ended October 3, 2015 compared with the corresponding period in 2014 was due primarily to lower sales to customers in our life and health sciences and scientific research end markets, offset in part by higher sales to customers in our microelectronics end market.

The decrease in sales to customers in other Pacific Rim countries for the three months ended October 3, 2015 compared with the corresponding period in 2014 was due primarily to lower sales to customers in our microelectronics end market, offset in large part by increased sales to customers in our scientific research end market. The increase in sales to customers in other Pacific Rim countries for the nine months ended October 3, 2015 compared with the corresponding period in 2014 was due primarily to higher sales to customers in our scientific research end market, offset in part by lower sales to customers in our microelectronics and life and health sciences end markets.

The increases in sales to customers in the rest of the world for the three and nine months ended October 3, 2015 compared with the corresponding periods in 2014 were due primarily to higher sales to customers in our defense and security end markets, offset in part by lower sales to customers in our scientific research end market.

Our sales in the third quarter and first nine months of 2015 in certain geographic locations, particularly in Europe and Japan, were negatively impacted by the stronger U.S. dollar, which resulted in the translation of such sales into fewer U.S. dollars, compared with the corresponding periods in 2014.

Gross Margin

Gross margin was 42.3% and 45.1% for the three months ended October 3, 2015 and September 27, 2014, respectively, and gross margin was 43.5% and 45.1% for the nine months ended October 3, 2015 and September 27, 2014, respectively. The gross margin of our Lasers Group was negatively impacted for the three and nine months ended October 3, 2015 due to a higher proportion of sales of lower margin products, particularly products sold by recently acquired businesses, as we work to improve operational efficiencies and reduce costs as part of the integration of these businesses. In addition, gross margins were negatively impacted due to lower absorption of manufacturing overhead resulting from the lower production levels. For the nine month period, our Lasers Group's gross margin was also negatively impacted by increased inventory charges. The gross margin of our Optics Group was negatively impacted in both periods by lower absorption of

Edgar Filing: NEWPORT CORP - Form 10-Q

manufacturing overhead at our North Andover facility, as we transition the operations of that facility to other facilities, and by increased inventory charges. Our gross margins in both periods in 2015 were also negatively impacted by the stronger U.S. dollar, which resulted in the translation of our foreign currency denominated sales into fewer U.S. dollars. This negative impact was offset in part by lower manufacturing costs in certain locations due to the stronger U.S. dollar.

In general, we expect that our gross margin will vary in any given period depending upon factors such as our mix of sales, product pricing variations, manufacturing absorption levels, and changes in levels of inventory and warranty reserves.

Table of Contents

Selling, General and Administrative (SG&A) Expense

SG&A expense totaled \$37.7 million, or 25.6% of net sales, and \$39.1 million, or 26.8% of net sales, for the three months ended October 3, 2015 and September 27, 2014, respectively. SG&A expense totaled \$117.0 million, or 25.9% of net sales, and \$120.4 million, or 27.0% of net sales, for the nine months ended October 3, 2015 and September 27, 2014, respectively. The decrease in SG&A expense for the three months ended October 3, 2015 compared with the corresponding period in 2014 was due primarily to lower depreciation expense and professional fees. The decrease in SG&A expense for the nine months ended October 3, 2015 compared with the corresponding period in 2014 was due primarily to lower incentive compensation and travel expenses, as well as lower depreciation expense and professional fees. The stronger U.S. dollar in certain locations also contributed to the decreases in SG&A expense for both periods in 2015. The decreases for both periods in 2015 were offset in part by higher rental costs and software licensing fees, and by the addition of SG&A expenses for V-Gen and FEMTOLASERS, for which there were no corresponding expenses in the prior year periods.

We have implemented certain cost reduction actions during 2015, which have resulted in lower personnel costs; however, for both periods in 2015, such decreases in personnel costs were offset in large part by increased severance costs related to such actions. We expect our SG&A expense to be more favorably impacted by our cost reduction actions in future periods once all actions have been completed.

In general, we expect that SG&A expense will vary as a percentage of net sales in the future based on our sales level in any given period. Because the majority of our SG&A expense is fixed in the short term, changes in SG&A expense will likely not be in proportion to changes in net sales. In addition, any acquisitions would increase our SG&A expense, and such increases may not be in proportion to the changes in net sales.

Research and Development (R&D) Expense

R&D expense totaled \$14.2 million, or 9.6% of net sales, and \$14.1 million, or 9.6% of net sales, for the three months ended October 3, 2015 and September 27, 2014, respectively. R&D expense totaled \$44.3 million, or 9.8% of net sales, and \$42.5 million, or 9.5% of net sales, for the nine months ended October 3, 2015 and September 27, 2014, respectively. The increases in R&D expense for the three and nine months ended October 3, 2015 compared with the corresponding periods in 2014 were due primarily to the addition of R&D expenses of V-Gen and FEMTOLASERS, for which there were no corresponding expenses in the prior year periods, offset in part by the impact of the stronger U.S. dollar in certain locations and the benefits of our cost reduction actions.

We believe that the continued development and advancement of our products and technologies is critical to our success, and we intend to continue to invest in R&D initiatives, while working to ensure that our efforts are focused and the resources are deployed efficiently. In general, we expect that R&D expense as a percentage of net sales will vary in the future based on our sales level in any given period. Because of our commitment to continued product development, and because the majority of our R&D expense is fixed in the short term, changes in R&D expense will likely not be in proportion to changes in net sales. In addition, any acquisitions would increase our R&D expense, and such increases may not be in proportion to the changes in net sales.

Loss on Disposal of Assets

During the first quarter of 2015, we entered into a plan to transfer the operations of our North Andover, Massachusetts facility to certain of our other facilities and to close that facility. In connection with this plan, we determined that the carrying value of leasehold improvements for this facility was not recoverable and recorded an impairment loss of \$1.1 million.

Interest and Other Expense, Net

Interest and other expense, net totaled \$1.4 million and \$1.0 million for the three months ended October 3, 2015 and September 27, 2014, respectively. Interest and other expense, net totaled \$3.3 million and \$2.6 million for the nine months ended October 3, 2015 and September 27, 2014, respectively. The increases in interest and other expense, net for the three and nine months ended October 3, 2015 compared with the same periods in 2014 were due primarily to foreign currency transaction losses.

Table of Contents

Income Taxes

Our effective tax rate was 22.0% and 19.7% for the three months ended October 3, 2015 and September 27, 2014, respectively, and 30.2% and 27.0% for the nine months ended October 3, 2015 and September 27, 2014, respectively. Our effective tax rates for the three and nine months ended October 3, 2015 were lower than the U.S. statutory rate of 35% due primarily to the benefit of income recorded in foreign jurisdictions that have tax rates that are lower than U.S. tax rates and an increased utilization of foreign tax credits that were previously unrecognized, necessitated by the filing of the 2014 U.S. federal consolidated tax return during the third quarter, which was recorded as a discrete item. The effective tax rate for the three months ended October 3, 2015 was also favorably impacted by profitable results recorded in jurisdictions where we maintain a full valuation allowance. The effective tax rate for the nine months ended October 3, 2015 was unfavorably impacted by the passage of Japanese tax reform legislation on March 31, 2015, which lowered long-term corporate tax rates, necessitating a corresponding reduction of deferred tax assets applicable to our Japanese locations. The effective tax rates for the three and nine months ended September 27, 2014 were lower than the rates for the three and nine months ended October 3, 2015 due primarily to the favorable impact of an extraterritorial income exclusion benefit and a reduction of the corresponding uncertain tax position, which was recorded as a discrete item during the third quarter of 2014.

Liquidity and Capital Resources

Our cash and cash equivalents and restricted cash balances decreased to a total of \$31.4 million as of October 3, 2015 from \$48.6 million as of January 3, 2015. This decrease was attributable primarily to cash used in connection with repurchases of our common stock, purchases of property and equipment and our acquisition of FEMTOLASERS, offset in part by net cash provided by our operating activities and net borrowings.

Net cash provided by our operating activities of \$28.4 million for the nine months ended October 3, 2015 was attributable primarily to cash provided by our results of operations, offset in part by an increase in gross inventory of \$16.0 million, an increase in accounts receivable of \$7.0 million due to the timing of collections, and decreases in accrued payroll and other expenses of \$3.5 million and accounts payable of \$3.1 million due to the timing of payments.

Net cash used in investing activities of \$25.9 million for the nine months ended October 3, 2015 was attributable primarily to purchases of property and equipment of \$15.5 million and cash used in connection with our acquisition of FEMTOLASERS of \$10.2 million, including amounts that are expected to be refunded pursuant to a net asset adjustment.

Net cash used in financing activities of \$18.6 million for the nine months ended October 3, 2015 was attributable to payments of \$27.9 million to repurchase our common stock and payments of \$3.4 million in connection with the cancellation of shares of common stock underlying restricted stock units for taxes owed by employees upon vesting of restricted stock units issued under our stock incentive plans. These cash payments were offset in part by net borrowings of \$8.8 million, an excess tax benefit of \$2.6 million related to employee stock plans, and proceeds of \$1.4 million received from the issuance of common stock under employee stock plans.

On July 18, 2013, we entered into a credit agreement with certain lenders (Credit Agreement). The Credit Agreement consists of a senior secured revolving credit facility of \$275 million with a term of five years (Credit Facility). The Credit Agreement also provides us with the

Edgar Filing: NEWPORT CORP - Form 10-Q

option to increase the aggregate principal amount of loans in the form of additional revolving loans or a separate tranche of term loans, in an aggregate amount that does not exceed \$50 million, in each case subject to certain terms and conditions contained in the Credit Agreement. At October 3, 2015, the outstanding balance under the Credit Facility was \$84.0 million, with an effective interest rate of 1.75%.

Our obligations under the Credit Agreement are secured by a lien on substantially all of the assets of Newport Corporation and certain of our domestic subsidiaries, which are guarantors under the Credit Agreement, as well as by a pledge of certain shares of our foreign subsidiaries. Our ability to borrow funds under the Credit Facility is subject to certain conditions, including compliance with certain covenants and making certain representations and warranties. In particular, our borrowing capacity under the Credit Facility is limited by our Consolidated Adjusted

Table of Contents

EBITDA (as defined in the Credit Agreement) for the preceding four fiscal quarters. At October 3, 2015, based on our Consolidated Adjusted EBITDA, the \$84.0 million borrowed under the Credit Facility, additional indebtedness of \$3.8 million and outstanding letters of credit of \$4.9 million, we had approximately \$140.3 million available for additional borrowing under the Credit Facility.

At October 3, 2015, we also had (i) revolving lines of credit with Japanese banks; (ii) an agreement with a Japanese bank under which we sell trade notes receivable with recourse; (iii) a loan with an Israeli bank; and (iv) loans from the Austrian government, as follows:

Description	Principal Amount Outstanding (in millions)	Additional Amount Available for Borrowing (in millions)	Interest Rate(s)	Expiration Date(s)
Japanese lines of credit	\$ 3.1	\$ 1.9	1.27% to 2.20%	No expiration dates
Japanese agreements for sale of receivables	\$ 0.3	\$ 1.4	1.20%	No expiration dates
Israeli loan	\$ 0.2	\$	2.97%	October 2015
Austrian loans	\$ 0.3	\$	0.75% to 2.00%	Through March 2019

In May 2008, our Board of Directors approved a share repurchase program, authorizing the purchase of up to 4.0 million shares of our common stock. The terms of the Credit Agreement permit us to purchase shares under the repurchase program, subject to certain conditions and limitations. During the nine months ended October 3, 2015, we repurchased 1.7 million shares for a total of \$27.9 million under this program. As of October 3, 2015, 1.7 million shares remained available for purchase under the program. The amount and timing of future repurchases will be dependent upon factors such as our share price level, our other capital requirements and the terms of our Credit Agreement.

During the remainder of 2015, we expect to use approximately \$5 million to \$7 million of cash for capital expenditures.

We expect that our current working capital position, together with our expected future cash flows from operations and the borrowing availability under our Credit Facility and other lines of credit, will be adequate to fund our operations in the ordinary course of business, anticipated capital expenditures, our debt payment requirements and other contractual obligations for at least the next twelve months. While a substantial portion of our cash and cash equivalents and restricted cash is held outside of the United States, we currently do not intend or anticipate a need to repatriate such funds, as we expect that the cash and cash equivalents and restricted cash held in the United States, together with our cash flows from U.S. operations and the borrowing capacity under our Credit Facility, will be sufficient to fund our U.S. operations and cash commitments for investing and financing activities, including debt repayment and capital expenditures for at least the next twelve months and thereafter for the foreseeable future. However, these expectations are based upon many assumptions and are subject to numerous risks, including those discussed in Item 1A (Risk Factors) of Part I of our Annual Report on Form 10-K for the year ended January 3, 2015. In addition, under current tax laws and regulations, if cash and cash equivalents and investments held outside of the United States, which relate to undistributed earnings of certain of our foreign subsidiaries and are considered to be indefinitely reinvested, were to be distributed to the United States in the form of dividends or otherwise, we would be subject to additional U.S. income taxes (subject to an adjustment for foreign tax credits) and foreign withholding taxes. The potential tax liability related to any repatriation would depend on the tax laws of the United States and the respective foreign jurisdictions and on the facts and circumstances that exist at the time such repatriation is made.

Edgar Filing: NEWPORT CORP - Form 10-Q

Except for the aforementioned capital expenditures, we have no present agreements or commitments with respect to any material acquisitions of businesses, products, product rights or technologies or any other material capital expenditures. We will continue to evaluate acquisitions of and/or investments in products, technologies, capital equipment or improvements and companies that complement our business and may make such acquisitions and/or investments in the future. However, our Credit Agreement only permits us to make investments and acquisitions under certain circumstances, and restricts our ability to incur additional indebtedness, which limits to some extent our ability to make such acquisitions and investments.

Critical Accounting Policies and Estimates

The preparation of our consolidated financial statements requires that we make estimates and assumptions that affect the reported amounts of assets and liabilities and related disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. We evaluate these estimates and assumptions on an ongoing basis. We base our estimates on our historical experience and on various other factors which we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the amounts of certain expenses that are not readily apparent from other sources. The accounting policies that involve the most significant judgments, assumptions and estimates used in the preparation of our financial statements are those related to revenue recognition, allowances for doubtful accounts, pension liabilities, inventory reserves, warranty obligations, asset impairment, income taxes and stock-based compensation. The judgments, assumptions and estimates used in these areas by their nature involve risks and uncertainties, and in the event that any of them prove to be inaccurate in any material respect, it could have a material effect on our reported amounts of assets and liabilities at the date of the financial statements and on the reported amounts of revenues and expenses during the reporting periods. A summary of these critical accounting policies is included in Item 7 (Management's Discussion and Analysis of Financial Condition and Results of Operations) of Part II of our Annual Report on Form 10-K for the fiscal year ended January 3, 2015. There have been no material changes to the critical accounting policies disclosed in such Annual Report on Form 10-K.

Recent Accounting Pronouncements

In September 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2015-16, *Simplifying the Accounting for Measurement Period Adjustments*. ASU No. 2015-16 requires an acquirer in a business combination to recognize adjustments to the provisional amounts that are identified during the measurement period to be reported in the period in which the adjustment amounts are determined. In addition, the effect on earnings of changes in depreciation or amortization, or other income effects (if any) as a result of the change to the provisional amounts, calculated as if the accounting had been completed as of the acquisition date, must be recorded in the reporting period in which the adjustment amounts are determined. ASU No. 2015-16 will be effective for fiscal years and interim periods beginning after December 15, 2015, and is required to be applied prospectively. Early adoption is permitted for financial statements that have not been issued prior to the effective date of this update. The adoption of ASU No. 2015-16 is not expected to have a material impact on our financial position or results of operations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The principal market risks (i.e., the risk of loss arising from adverse changes in market rates and prices) to which we are exposed are changes in foreign exchange rates, which may generate translation and transaction gains and losses, and changes in interest rates.

Foreign Currency Risk

Operating in international markets sometimes involves exposure to volatile movements in currency exchange rates. The economic impact of currency exchange rate movements on our operating results is complex because such changes are often linked to variability in real growth, inflation, interest rates, governmental actions and other factors. These changes, if material, may cause us to adjust our financing and operating strategies. Consequently, isolating the effect of changes in currency does not incorporate these other important economic factors.

We use foreign currency option and forward exchange contracts to mitigate the risks associated with certain foreign currency transactions entered into in the ordinary course of business, primarily foreign currency denominated receivables, payables and other expenses. These derivative instruments are used as an economic hedge. However, we have not elected hedge accounting treatment and therefore, all changes in value of these derivative instruments are reflected in *interest and other expense, net* in our consolidated statements of income and comprehensive income. We do not engage in currency speculation. All of our foreign currency option and forward exchange contracts are established to reduce the volatility of earnings, primarily related to Israeli shekel-based expenses. If the counterparties to these contracts (typically highly rated banks) do not fulfill their obligations to deliver the contracted currencies, we could be at risk for any currency related fluctuations.

Table of Contents

As currency exchange rates change, translation of the statements of income of international operations into U.S. dollars affects the year-over-year comparability of operating results, particularly in translating foreign currency denominated sales into U.S. dollars. However, because we have manufacturing facilities located globally, the impact of currency exchange rate fluctuations on our income is mitigated in part by the translation of foreign currency denominated expenses. We do not generally hedge translation risks because cash flows from international operations are generally reinvested locally. Changes in currency exchange rates that would have the largest impact on translating our future international operating results include changes to the exchange rates of the U.S. dollar to the euro and Japanese yen.

The following table provides information about our foreign currency derivative financial instruments outstanding as of October 3, 2015. The information is presented in U.S. dollars, as presented in our consolidated financial statements:

(In thousands)	October 3, 2015	
	Notional Amount	Average Strike Price
Foreign currency options		
Israeli Shekel - call options	\$ 21,352	4.03
Israeli Shekel - put options	(22,822)	3.77
	\$ (1,470)	
Fair value	\$ (52)	

Interest Rate Risk

Our investments in cash, cash equivalents and restricted cash, which totaled \$31.4 million at October 3, 2015, are sensitive to changes in the general level of interest rates. In addition, certain assets related to our pension plans are sensitive to interest rates and economic conditions in Europe and Asia.

We have a \$275 million revolving line of credit in the United States. We also have lines of credit and other loans in Israel, Austria and Japan. Our revolving line of credit in the United States and our other borrowings carry variable interest rates and therefore are subject to interest rate risk.

The table below presents information about our debt obligations as of October 3, 2015:

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

Our Chief Executive Officer and our Chief Financial Officer, after evaluating our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)) as of the end of the period covered by this Quarterly Report on Form 10-Q (the Evaluation Date), have concluded that as of the Evaluation Date, our disclosure controls and procedures were effective to ensure that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and to ensure that information required to be disclosed by us in such reports is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer where appropriate, to allow timely decisions regarding required disclosure.

(b) Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****ITEM 1A. RISK FACTORS**

Our Annual Report on Form 10-K for the year ended January 3, 2015 contains a full discussion of the risks associated with our business. There have been no material changes to the risks described in our Annual Report on Form 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table reflects purchases made by us during the quarter ended October 3, 2015, of equity securities that are registered by us pursuant to Section 12 of the Securities Exchange Act of 1934, as amended:

Period(1)	Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
