COGENT, INC.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

Note 1. General

Company Background

Cogent, Inc. and subsidiaries (Cogent or the Company) was initially incorporated in the state of California on April 20, 1990 as Cogent Systems, Inc. and was reincorporated in Delaware on May 3, 2004 as Cogent, Inc. Cogent is a provider of advanced automated fingerprint identification systems (AFIS) solutions, which typically consist of Cogent s Programmable Matching Accelerator (PMA) servers and other AFIS equipment, including work stations and live-scans, bundled with Cogent s proprietary software and other fingerprint biometrics products and solutions, to governments, law enforcement agencies and other organizations worldwide. Cogent also provides professional services, technical support and maintenance services to its customers.

Basis of Presentation

The accompanying condensed consolidated balance sheet as of March 31, 2010 and the condensed consolidated statements of income and cash flows for the three months ended March 31, 2009 and 2010 are unaudited. These statements should be read in conjunction with the audited consolidated financial statements and related notes, together with management s discussion and analysis of financial position and results of operations, contained in the Company s Annual Report on Form 10-K filed with the U.S. Securities and Exchange Commission (SEC) on March 12, 2010.

The accompanying condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States, or (GAAP). In the opinion of the Company s management, the unaudited condensed consolidated financial statements have been prepared on the same basis as the audited consolidated financial statements in the Annual Report on Form 10-K for the year ended December 31, 2009 and include all adjustments necessary for the fair presentation of the Company s statement of financial position as of March 31, 2010, and its results of operations and cash flows for the three months ended March 31, 2009 and 2010. The condensed consolidated balance sheet as of December 31, 2009 has been derived from the December 31, 2009 audited financial statements. The interim financial information contained in this quarterly report is not necessarily indicative of the results to be expected for any other interim period or for the entire year.

Classification of revenues

Product Revenues

The timing of product revenue recognition is dependent on the nature of the product sold and is generally comprised of the following:

Revenues associated with AFIS solutions that do not require significant modification or customization of our software, exclusive of amounts allocated to maintenance for which the Company has vendor specific evidence of fair value (VSOE) are recognized upon installation and receipt of written acceptance of the solution by the customer when required by the provisions of the contract, provided all other criteria for revenue recognition have been met.

Revenues associated with AFIS solutions that require significant modification or customization of our software, are recognized using the percentage-of-completion method. The percentage-of-completion method reflects the portion of the anticipated contract revenue which has been earned, equal to the ratio of labor effort expended to date to the anticipated final labor effort, based on current estimates of total labor effort necessary to complete the project. The amount subject to the percentage-of-completion method is exclusive of the maintenance, the fair value of which is established by VSOE. Material differences may result in the amount and timing of our revenue for any period if actual results differ from our judgments and estimates. The Company recognizes revenue in this manner from sales of significant initial AFIS deployments.

Edgar Filing: Cogent, Inc. - Form 10-Q

Revenue associated with the sale of our application specific integrated circuit, or ASIC applications, stand-alone live-scans and other biometric products, exclusive of maintenance (when applicable), the fair value of which is established by VSOE, is recognized upon shipment to the customer provided (i) persuasive evidence of an arrangement exists, (ii) title and risk of ownership has passed to the buyer, (iii) the fee is fixed or determinable and (iv) collection is deemed probable.

Revenue associated with service offerings where the Company maintains and operate a portion of the AFIS systems on an outsourced application-hosting basis is recognized on a per transaction basis provided (i) persuasive evidence of an arrangement exists, (ii) the fee is fixed or determinable and (iii) collection is deemed probable.

Revenue associated with contracts where sufficient VSOE cannot be established for the allocation of revenue to the various elements of the arrangement is deferred until the earlier of the point at which (i) such sufficient VSOE is established or (ii) all elements of the arrangement have been delivered, except for when the only undelivered element in the arrangement for which VSOE has not been established is maintenance. In these instances revenue is recognized

Table of Contents

ratably over the contractual maintenance term, but in accordance with Rule 5-03(b)(1) of Regulation S-X, the Company allocates a portion of the revenues recognized to maintenance revenues based on an analysis of historical maintenance renewals, and the residual is allocated to product revenues. Revenues recognized under such arrangements were \$558,000 and \$967,000 for the three months ended March 31, 2009 and 2010, respectively.

As a result of our analysis of historical maintenance renewals, the Company determined it no longer had sufficient pricing consistency of maintenance renewals to establish VSOE of maintenance for our AFIS arrangements bundled with maintenance that have been executed since the three months ended June 30, 2009 and for the arrangements consisting of stand-alone Livescans that have been executed during the three months ended March 31, 2010. During the three months ended March 31, 2010 the impact on such arrangements was the deferral of \$1.1 million of revenue that would have otherwise been recognized. Any new AFIS arrangements or arrangements for stand-alone Livescans that the Company executes in future periods in which maintenance becomes the only undelivered element and the Company is unable to establish VSOE of maintenance, would typically result in the total payments due under the arrangement being deferred and recognized as revenue, subject to the Rule 5-03(b)(1) allocation, ratably over the contractual maintenance term.

Cash received from customers in advance of recognition of the related revenue is recorded as deferred revenue.

Maintenance Revenues

Maintenance revenue consists of fees for providing technical support and software updates on a when-and-if available basis. The Company recognizes all maintenance revenue ratably over the applicable maintenance period. The Company determines the amount of maintenance revenue to be deferred through reference to substantive maintenance renewal provisions contained in a particular arrangement or, in the absence of such renewal provisions, through reference to VSOE of maintenance renewal rates. The Company considers substantive maintenance provisions to be provisions where the stated maintenance renewal as a percentage of the product fee is comparable to its normal pricing for maintenance only renewals. In the event that maintenance included in an AFIS solution or a stand-alone Livescans contract does not have VSOE, the entire arrangement fee, including the contractual amount of the maintenance obligation, is included in revenues and recognized ratably over the term of the maintenance period.

Services Revenues

Professional services revenue is primarily derived from engineering services and AFIS system operation and maintenance services that are not an element of an arrangement for the sale of products. These services are generally billed on a time-and-materials basis. The majority of the Company's professional services are performed either directly or indirectly for U.S. government organizations. Revenue from such services is recognized as the services are provided.

The amount of revenue recognized from commissions where the Company is acting as an agent is the net amount after payments are made to the primary obligor responsible for delivering the services.

Concentration

The Company derives a significant portion of its revenues and accounts receivable from a limited number of customers as described below:

Percentage of Revenues	Three months ended March 31,	
	2009	2010
Customer A	56%	23%
Customer B	*	31%

Percentage of Billed Accounts Receivable	December 31,	March 31,
	2009	2010
Customer A	20%	42%
Customer B	*	*
Customer C	15%	*

(*) Amounts do not exceed 10% for such period

Table of Contents

Note 2 Recent Accounting Pronouncements

In June 2009, the FASB issued authoritative guidance on the consolidation of variable interest entities, which was effective for us beginning January 1, 2010. The new guidance requires revised evaluations of whether entities represent variable interest entities, ongoing assessments of control over such entities, and additional disclosures for variable interests. The adoption of this new guidance did not have an impact on our financial statements.

In October 2009, the FASB issued authoritative guidance on revenue recognition that will become effective for us beginning January 1, 2011, with earlier adoption permitted. Under the new guidance on arrangements that include software elements, tangible products that have software components and non-software components that function together to deliver the tangible products essential functionality will no longer be within the scope of the software revenue recognition guidance, and software-enabled products will now be subject to other relevant revenue recognition guidance. Additionally, the FASB issued authoritative guidance on revenue arrangements with multiple deliverables that are outside the scope of the software revenue recognition guidance. Under the new guidance, when VSOE or third party evidence for deliverables in an arrangement cannot be determined, a best estimate of the selling price is required to separate deliverables and allocate arrangement consideration using the relative selling price method. The new guidance includes new disclosure requirements on how the application of the relative selling price method affects the timing and amount of revenue recognition. We are currently evaluating the effect that adoption of this new guidance will have on our financial statements.

In January 2010, the FASB issued authoritative guidance to amend the disclosure requirements related to recurring and nonrecurring fair value measurements. The guidance requires new disclosures on the transfers of assets and liabilities between Level 1 (quoted prices in active market for identical assets or liabilities) and Level 2 (significant other observable inputs) of the fair value measurement hierarchy, including the reasons and the timing of the transfers. Additionally, the guidance requires a roll forward of activities on purchases, sales, issuance, and settlements of the assets and liabilities measured using significant unobservable inputs (Level 3 fair value measurements). The guidance became effective for us with the reporting period beginning January 1, 2010, except for the disclosure on the roll forward activities for Level 3 fair value measurements, which will become effective for us with the reporting period beginning January 1, 2011. The adoption of this new guidance did not have a material impact on our financial statements.

Other new pronouncements issued but not effective until after March 31, 2010, are not expected to have a significant effect on the Company's consolidated financial position or results of operations.

Note 3. Settlement of Claims with Northrop

In April 2005, Cogent initiated a lawsuit against Northrop Grumman Corporation in California State Court (Cogent Systems, Inc. vs. Northrop Grumman Corporation, Northrop Grumman Technology Overseas, Inc., et al., Superior Court of the State of California, in and for the County of Los Angeles, Case No. BC 332199) based on claims of breach of contract, conversion, misappropriation of trade secrets, breach of trust, interference with prospective economic advantage, breach of the implied covenants of good faith and fair dealing, and unfair competition (the Action). On December 5, 2007, Cogent and Northrop entered into a definitive Settlement Agreement and Mutual Release of Claims (the Settlement). Pursuant to the terms of the Settlement, Cogent and Northrop formally settled and released all claims and causes of action alleged in the Action. Under the Settlement, Cogent and Northrop entered into four agreements; collectively, the Agreements:

1. The Settlement Agreement, pursuant to which Northrop agreed to pay Cogent \$25 million, of which \$15 million was paid in January 2008 and \$10 million was paid in January 2009;

Table of Contents

2. The Software License Agreement, pursuant to which Northrop will pay Cogent \$15 million over three years for a non-exclusive license to use certain of Cogent's automated fingerprint identification software in certain existing programs, of which \$5 million was paid in each of January 2008, January 2009 and January 2010;

3. The Product and Services Agreement, pursuant to which Northrop will pay Cogent a minimum of \$20 million for products and services over the five year term of the agreement, of which \$5 million was paid in January 2009; and

4. The Strategic Alliance Agreement, pursuant to which Cogent and Northrop will meet semiannually over the three year term of the agreement to discuss business opportunities and proposal efforts for the design, development, sale and support of biometric identification solutions.

Table of Contents

Total proceeds to Cogent under the agreements will be \$60.0 million. Cogent has accounted for the agreements as one multiple element arrangement. Contractual proceeds to Cogent under each of the agreements do not necessarily represent the fair value of each agreement. The Strategic Alliance Agreement was determined not to be an element requiring accounting recognition. The Company determined that the \$20.0 million in proceeds scheduled under the Product and Services Agreement includes both a guaranteed payment component valued at \$1.0 million and a component for the purchase of products and services valued at \$19.0 million using VSOE of fair value in accordance with FASB guidance on software revenue recognition. The Company determined the fair value of the Software License Agreement and the guaranteed payment component of the Product and Services Agreement to be \$30.0 million and \$1.0 million, respectively, based on generally accepted valuation techniques. The residual method was used to derive the \$10.0 million fair value for the Settlement Agreement.

Element	Scheduled Proceeds	Allocated Fair Value (in millions)
Product and Services Agreement	\$ 20.0	\$ 20.0
Software License Agreement	15.0	30.0
Settlement Agreement	25.0	10.0
	\$ 60.0	\$ 60.0

Accounting for the Software License Agreement is subject to the FASB guidance on software revenue recognition. However, the provision of the AFIS software under the Software License Agreement did not represent a stand-alone arm's length transaction. Rather, the revenue amount was determined based on a valuation. Thus, the Company did not believe it appropriate to apply the Company's standard maintenance VSOE rate to this amount and the Company could not determine the fair value of the associated maintenance commitment. The Company will recognize revenue under the Software License Agreement and the Products and Services Agreement, on a combined basis, based on the lowest proportion of revenue recognizable under the contracts. While the Company was not able to establish VSOE of the maintenance commitment, the Company believes its standard maintenance rate represents a reasonable basis for the allocation of revenues recognized under the Software License Agreement, between product and maintenance, as the revenues are recognized over the term of the Software License Agreement. The Company will therefore allocate a portion of the revenues representing its standard annual maintenance renewal rate (based on VSOE), to maintenance revenues. The remainder will be recorded as product revenues. The \$1.0 million value of the guaranteed payment will be recognized as income on a pro-rata basis (i.e., each dollar of revenue under the Products and Services Agreement will result in ninety-five cents of revenue and five cents of Income from settlement of lawsuit). The residual value allocated to the Settlement Agreement is presented as Income from settlement of lawsuit in the accompanying condensed consolidated statement of income.

As of March 31, 2010, the Company had received cash payments aggregating \$45.0 million of the total \$60.0 million due under the Agreements. The remaining \$15.0 million payable pursuant to the Product and Services Agreement is due as products or services are purchased under the agreement or, to the extent the entire \$15.0 million is not paid pursuant to purchases under the agreement, any remaining balance is due upon expiration of the agreement in December 2012. Of the total payments received under the Agreements, \$10.0 million was recognized in January 2008 as income from settlement of a lawsuit in the consolidated statement of income. This \$10.0 million represents the residual value allocated to the Settlement Agreement out of the total fair value of the Agreements of \$60.0 million. The Company recognizes revenue under the Software License Agreement and the Products and Services Agreement, on a combined basis, based on the lowest proportion of revenue recognizable under the contracts. The Company recognized approximately \$6.4 million of product revenue and \$1.1 million of maintenance and service revenue under the combined Software License Agreement and the Product and Services Agreement for the three months ended March 31, 2010. Additionally, \$153,000 relating to the guaranteed payment component of the Product and Services Agreement was recognized as income from settlement of a lawsuit in the accompanying consolidated statement of income during the three months ended March 31, 2010. Total deferred revenue from Northrop pursuant to the Agreements was \$27.4 million as of March 31, 2010.

Table of Contents**Note 4 Intangible Assets and Goodwill**

Goodwill is tested for impairment at least annually and more frequently if an event occurs to indicate it may be impaired. Based on its annual impairment test in 2009, the Company determined that goodwill was not impaired. Furthermore, the Company determined there were no events or changes in circumstances that indicate that carrying values of goodwill or other intangible assets are not be recoverable as of December 31, 2009 and March 31, 2010.

The following table provides information regarding the Company's intangible assets with finite lives at December 31, 2009 and March 31, 2010 (in thousands):

	Useful lives (years)	December 31, 2009			March 31, 2010		
		Gross carrying amount	Accumulated amortization	Net amount	Gross carrying amount	Accumulated amortization	Net amount
Backlog	<1	\$ 260	\$ 260	\$	\$ 260	\$ 260	\$
Customer relationships	3	1,500	833	667	1,500	958	542
Non-compete agreement	3	400	222	178	400	256	144
Patents	5	750	700	50	750	738	12
Total		\$ 2,910	\$ 2,015	\$ 895	\$ 2,910	\$ 2,212	\$ 698

Amortization expense for intangible assets with finite lives was \$196,000 and \$197,000 for the three months ended March 31, 2009 and the three months ended March 31, 2010, respectively.

Estimated amortization expense for the next five years is expected to be \$487,000 for the remainder of 2010, \$211,000 in 2011 and zero thereafter. As of December 31, 2009 and March 31, 2010, the Company had intangible assets not subject to amortization in the amount \$2.9 million which relates to goodwill from the Company's April 2008 acquisition of the Security Solutions Division of MAXIMUS, Inc.

Intangibles and goodwill are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (e.g. when there is evidence of impairment). At March 31, 2010, no fair value adjustments were required.

Note 5. Investments in Marketable Securities

The Company has investments classified as available-for-sale securities included in short-term and long-term investments, categorized as follows (in thousands):

March 31, 2010

Type of Security	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
Short-term instruments	\$ 4,642	\$	\$	\$ 4,642
Corporate debt securities with maturities of less than one year	71,504	424	(13)	71,915
Municipal securities with maturities of less than one year	42,467	119	(7)	42,579
U.S. government securities with maturities of less than one year	154,190	644	(39)	154,795
Total short-term investments	272,803	1,187	(59)	273,931
Corporate debt securities with maturities between one and three years	85,590	1,236	(4)	86,822
U.S. government securities with maturities between one and three years	138,038	492	(95)	138,435

Table of Contents

Proceeds from the sale of available-for-sale securities for the three months ended March 31, 2009 and 2010, are disclosed separately in the accompanying consolidated statements of cash flows. For the three months ended March 31, 2009 and 2010, there were no gross realized gains or gross realized losses that the Company recognized.

The following table shows the gross unrealized losses and fair value of the Company's investments with unrealized losses that are not deemed to be other-than-temporarily impaired, aggregated by investment category and length of time that the individual securities have been in a continuous loss position as March 31, 2010.

Type of Security:	Less Than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(in thousands)					
Short-term instruments	\$ 4,642	\$	\$	\$	\$ 4,642	\$
Corporate debt securities	158,737	(17)			158,737	(17)
Municipal securities	42,579	(7)			42,579	(7)
U.S. government securities	293,230	(134)			293,230	(134)
Total investments	\$ 499,188	\$ (158)	\$	\$	\$ 499,188	\$ (158)

The Company's short-term instruments consist primarily of money market funds, certificates of deposit and commercial paper. These available-for-sale securities are accounted for at their fair value, and unrealized gains and losses on these securities are reported as a separate component of stockholders' equity. The Company's corporate debt securities, long and short term, include debt securities issued pursuant to the Temporary Liquidity Guarantee Program which are U.S. Government securities. In addition, the Company's municipal securities, long and short term, include pre-refunded municipal bonds that are secured by U.S. Treasury securities. The accumulated unrealized gain (loss) on available-for-sale securities at December 31, 2009 and March 31, 2010 was as follows:

	December 31, 2009	March 31, 2010
Accumulated unrealized gain	\$ 2,689	\$ 2,757

Authoritative guidance issued by the FASB on fair value measurements for financial assets and liabilities clarifies the definition of fair value as an exit price representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. As a basis for considering such assumptions, it establishes a three-tier value hierarchy, which prioritizes, in descending order, the inputs used in measuring fair value as follows:

- Level 1 Observable inputs such as quoted prices in active markets
- Level 2 Inputs other than the quoted prices in active markets that are observable either directly or indirectly
- Level 3 Unobservable inputs in which there is little or no market data, which require us to develop our own assumptions.

This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value. On a recurring basis, the Company measures certain financial assets and liabilities at fair value, including its marketable securities. The Company's investment instruments, except for auction rate securities, listed below are classified within Level 2 of the fair value hierarchy because they are valued using quoted market prices from a variety of industry standard providers, security master files from large financial institutions, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency which are input into a distribution-curve based algorithm to determine market value. The Company's auction rate securities are classified as Level 3 of the fair value hierarchy due to the limited market data for pricing these securities.

Table of Contents

As of March 31, 2010	Fair value	Level 1	Level 2	Level 3
	(in thousands)			
Short-term instruments	\$ 4,642	\$	\$ 4,642	\$
Corporate debt securities	158,737		156,160	2,577
Municipal securities	42,579		42,579	
U.S. government securities	293,230		293,230	
	\$ 499,188	\$	\$ 496,611	\$ 2,577

As of March 31, 2010, the Company's investments included \$2.6 million of auction rate securities which are classified as long-term investments in marketable securities. Due to uncertainties in the credit markets, the Company has been unable to liquidate its investments in auction rate securities. Based on its analysis of impairment factors, including but not limited to, whether the credit ratings of the issuers deteriorate, or the collateral of the securities deteriorates, the Company's auction rate securities are not deemed to be impaired as of March 31, 2010.

Table of Contents

The following table sets forth a reconciliation of changes in the fair value of financial assets classified as Level 3 in the fair value hierarchy:

	Fair Value Measurements Using Significant Unobservable Inputs Level 3 (in thousands)
Balance at January 1, 2010	\$ 2,576
Total gains or losses (realized or unrealized)	
Included in earnings	1
Included in comprehensive income	
Purchases, issuances, and settlements	
Transfers in and/or out of Level 3	
Balance at March 31, 2010	\$ 2,577

Note 6. Inventory and Contract Related Costs

Inventory and contract related costs consist of the following:

	December 31, 2009	March 31, 2010
	(in thousands)	
Materials and components	\$ 8,706	\$ 9,727
Inventory and costs related to long-term contracts	74	74
Deferred costs of revenue	8,879	14,245
	\$ 17,659	\$ 24,046

Materials and components are stated at the lower of cost or market determined using the first-in, first-out method. Inventoried costs relating to long-term contracts are stated at actual production costs incurred to date reduced by amounts identified with revenue recognized on progress completed. Deferred costs of revenue relate to contracts for which revenue has been deferred, and such costs are stated at actual production costs incurred to date, which primarily include materials, labor and subcontract costs which are directly related to the contract. Deferred costs of revenue are amortized to costs of revenue at the time revenues are recognized.

Note 7 Accounting for Share-Based Compensation

Share-based compensation expense included in the Company's results of operations was as follows:

	Three months ended March 31, 2009 2010 (in thousands)	
Cost of product revenues	\$ 138	\$ 178
Cost of maintenance and services revenues	165	358
Research and development expenses	250	256
Selling and marketing expenses	230	223
General and administrative expenses	193	120

The Company recognized income tax benefits relating to the stock based compensation in the table above of approximately \$53,000 and \$16,000 for the three months ended March 31, 2009 and 2010, respectively. The Company has two stock option plans, the 2000 Stock Option Plan and the 2004 Equity Incentive Plan, which authorize the issuance of stock options, nonvested equity share units and other share-based instruments to employees and directors.

Stock Options

During the three months ended March 31, 2009 and 2010, 12,000 and zero stock options were granted, respectively. The fair values of each award granted under the Company's stock option plans during the three months ended March 31, 2009 were estimated at the date of grant using the Black-Scholes option pricing model and the following weighted average assumptions:

Volatility	46%
Risk-free interest rate	2.0%
Dividend yield	0.00%
Expected life (years)	6.1

Table of Contents

The weighted average estimated grant date fair value of options granted under the Company's stock option plans for the three months ended March 31, 2009 was \$4.69.

The options outstanding as of March 31, 2010 have been granted with an exercise price equal to the fair market value of the Company's common stock on the date of grant with a 10-year term, and vest 25% at the completion of the first year and vest quarterly thereafter over the remaining three-year period. A combined summary of the status of stock options granted under the 2000 Stock Option Plan and the 2004 Equity Incentive Plan as well as changes during the three months ended March 31, 2010 is presented below:

	Number of Options	Weighted Average Exercise Price	Aggregate Intrinsic Value
Outstanding, December 31, 2009	1,204,426	\$ 8.77	5,134
Granted			
Exercised	(22,900)	4.13	
Canceled or forfeited			
Outstanding, March 31, 2010	1,181,526	\$ 8.56	4,861
Exercisable at March 31, 2010	1,085,400	\$ 8.54	4,857
Vested and expected to vest	1,169,030	\$ 8.95	4,861

A total of 2,350,610 options remain available for grant under the Company's share-based compensation plans at March 31, 2010.

The Company defines in-the-money options at March 31, 2010 as options that had exercise prices that were lower than the \$10.20 fair market value of its common stock at that date. The aggregate intrinsic value of options outstanding at March 31, 2010 is calculated as the difference between the exercise price of the underlying options and the fair market value of the Company's common stock for the 685,226 million shares that were in-the-money at that date. There were 666,476 million in-the-money options exercisable at March 31, 2010. The total intrinsic value of options exercised during the three months ended March 31, 2009 and 2010 was \$246,000 and \$135,000, respectively, determined as of the date of exercise. As of March 31, 2010, there was approximately \$0.5 million of total unrecognized compensation cost related to non-vested share-based compensation that is expected to be recognized over a weighted average period of 0.9 years.

Upon the exercise of a stock option award, shares of common stock are issued from authorized but unissued shares.

Nonvested Equity Share Units

Beginning in 2007, the Compensation Committee of the Company's Board of Directors has issued awards of nonvested equity share units to certain of the Company's directors, employees and executive officers under the Company's 2004 Equity Incentive Plan. These awards entitle the holder to shares of common stock subject to certain terms and, generally, vest in 25% increments each year on the anniversary of the grant date throughout a four year vesting period. The nonvested equity share unit awards are valued based on the closing market price on the date of award. Nonvested equity share unit compensation is to be amortized and charged to operations on a straight-line basis over the four year vesting period.

A summary of nonvested equity share unit activity for the three months ended March 31, 2010 is as follows:

	Shares	Weighted Average Grant Date Fair Value	Aggregate Intrinsic Value (in thousands)
Nonvested equity share units outstanding at December 31, 2009	720,137	\$ 11.98	\$ 8,624
Granted			
Vested	(7,588)	10.16	

Edgar Filing: Cogent, Inc. - Form 10-Q

Cancelled or forfeited	(1,200)		9.85		
Nonvested equity share units outstanding at March 31, 2010	711,349	\$	12.00	\$	8,536
Expected to vest	618,874	\$	10.20	\$	6,312

Table of Contents

The Company recorded \$769,000 and \$892,000 in compensation cost on outstanding nonvested equity share units during the three months ended March 31, 2009 and 2010, respectively. As of March 31, 2010, there was approximately \$6.6 million of total unrecognized compensation cost related to nonvested equity share unit-based compensation that is expected to be recognized over a weighted-average period of 3.4 years.

Upon issuance of shares upon the vesting of a nonvested equity share unit, shares of common stock are issued from authorized but unissued shares.

Note 8 Net Income Per Share

Basic net income per common share is calculated by dividing net income by the weighted-average number of common shares outstanding during the reporting period. Diluted net income per common share reflects the effects of potentially dilutive securities, which consist of stock options and nonvested equity share units. A reconciliation of the numerator and denominator used in the calculation of basic and diluted net income per share follows:

	Three months ended March 31,	
	2009	2010
	(in thousands, except per share data)	
Numerator:		
Net income available to common stockholders	\$ 8,950	\$ 5,019
Denominator:		
Denominator for basic net income per share weighted average shares	89,579	89,558
Dilutive potential common stock options and nonvested shares	922	535
Denominator for diluted net income per share adjusted weighted average shares	90,501	90,093
Basic net income per share	\$ 0.10	\$ 0.06
Diluted net income per share	\$ 0.10	\$ 0.06

During the three months ended March 31, 2009 and 2010, options to purchase 423,354 and 485,453 shares of common stock, respectively, were outstanding but were not included in the computation of diluted earnings per share because the options' exercise price was greater than the average market price of the common shares for each of these respective periods.

Note 9. Comprehensive Income

Comprehensive income consists of net income and other comprehensive income (loss). Other comprehensive income (loss) includes certain changes in equity that are excluded from net income. Specifically, cumulative foreign currency translation adjustments and unrealized gains or losses on the Company's investments in marketable securities are included in accumulated other comprehensive income (loss).

	Three Months Ended March 31,	
	2009	2010
	(In thousands)	
Net income	\$ 8,950	\$ 5,019
Other comprehensive income (loss):		
Change in unrealized gain (loss), net of tax	251	15
Change in foreign currency translation adjustment	85	(69)
Total comprehensive income	\$ 9,286	\$ 4,965

Note 10. Income Taxes

Effective January 1, 2007, the Company adopted authoritative guidance issued by the FASB accounting for uncertainty in income taxes, which prescribes a comprehensive model for recognizing, measuring, presenting and disclosing in the financial statements tax positions taken or expected to be taken on a tax return, including a decision whether to file or not to file in a particular jurisdiction. For those benefits to be recognized, a tax position must be more likely than not to be sustained upon examination by taxing authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement.

Table of Contents

As of March 31, 2010 the Company had cumulative unrecognized tax benefits of \$3.9 million. Included in this balance is approximately \$2.1 million related to items that would affect other tax accounts, primarily deferred income taxes, if recognized. The Company believes that it is reasonably possible that there will not be a decrease in unrecognized tax benefits within the next 12 months. During the first quarter of 2010, the Company reduced its cumulative unrecognized tax benefits by \$5.3 million for certain temporary differences that did not result in any change to the Company's income tax expense.

The Company continues to recognize accrued interest and penalties related to unrecognized tax benefits in the income tax provision. As of December 31, 2009, the total amount of accrued income tax-related interest and penalties before tax benefits was \$2.0 million. During the three months ended March 31, 2010, an additional \$117,000 of interest before tax benefits was accrued.

The Company files Federal income tax returns, as well as multiple state, local and foreign jurisdiction tax returns. With few exceptions, the Company is no longer subject to examination for its U.S. Federal and state, foreign and local jurisdictions for years prior to 2003. The Internal Revenue Service (IRS) completed its examination of the Company's Federal consolidated tax returns for 2004 and 2005 and issued a "no change" letter. The California Franchise Tax Board completed its examination of the Company's California tax returns for 2005 and 2006 and issued a "no change" letter. The IRS commenced an examination of the Company's 2008 income tax return in the first quarter of 2010 that is anticipated to be completed by the second quarter of 2011.

Note 11. Deferred Revenues and Deferred Costs

In December 2007, the Company settled its lawsuit with Northrop Grumman (See Note 3). As of March 31, 2010, deferred revenue related to the agreements entered into in connection with the settlement of the lawsuit was \$26.7 million. For the three months ended March 31, 2010, the Company recognized \$7.5 million of revenue related to the Agreements.

In November 2007, the Company entered into a contract to provide a turnkey AFIS to certain law enforcement agencies in Spain for \$11.0 million. In December 2007, the Company recorded \$6.0 million in deferred revenue representing a scheduled billing under the contract. The system was accepted in the fourth quarter of 2008 and \$3.7 million of revenue related to this contract was recognized. Deferred revenue related to the contract was \$4.5 million as of March 31, 2010. The deferred balance as of March 31, 2010 consists primarily of unamortized maintenance revenue which will be recognized over the remaining contract period of 4.8 years.

In August 2006, the Company entered into a contract with a law enforcement agency in Maryland to provide an integrated AFIS system as well as provide other services to re-engineer some of their clearance and record maintenance systems. As of March 31, 2010, the Company has \$2.6 million in deferred revenue which represents billing for services to be rendered over the remaining contract period.

Note 12. Segment Information

The Company considers its business activities to constitute a single segment. A summary of the Company's revenues by geographic area follows (in thousands):

	Three months ended March 31, 2010				
	Americas	Europe	Asia	Other	Total
Revenues:					
Product revenues	\$ 10,992	\$ 513	\$ 222	\$	\$ 11,727
Maintenance and services revenues	10,785	1,325	262	299	12,671
Total	\$ 21,777	\$ 1,838	\$ 484	\$ 299	\$ 24,398
	Three months ended March 31, 2009				
	Americas	Europe	Asia	Other	Total
Revenues:					
Product revenues	\$ 18,386	\$ 2,187	\$ 93	\$	\$ 20,666
Maintenance and services revenues	8,597	1,193	240	338	10,368

Edgar Filing: Cogent, Inc. - Form 10-Q

Total \$ 26,983 \$ 3,380 \$ 333 \$ 338 \$ 31,034

Revenues from external customers in the United States were \$21.2 million and \$25.9 million for the three months ended March 31, 2010 and March 31, 2009, respectively.

At December 31, 2009 and March 31, 2010, the Company's property and equipment, net of accumulated depreciation and intangible assets net of amortization was as follows (in thousands):

	December 31, 2009	March 31, 2010
Property and equipment, net of accumulated depreciation in the United States	\$ 34,926	\$ 34,855
Property and equipment, net of accumulated depreciation in other countries	2,626	3,128
	\$ 37,552	\$ 37,983
Intangible assets, net of accumulated amortization in the United States	\$ 3,818	\$ 3,622

Table of Contents

Note 13. Equity Investment in ANP

Effective January 2008, Cogent and ANP Technologies, Inc. (ANP), a biological detection company producing nano-assays entered into an agreement whereby Cogent obtained 20% of the outstanding shares of ANP in exchange for \$3 million in cash and the transfer of Cogent's reader technology, applicable only for the biological market. Cogent's investment in ANP is accounted for under the equity method. The Company's share of its equity in earnings of the investee, which totaled \$31,000 and \$114,000 during the three months ended March 31, 2010 and 2009, respectively, are reported in the Other, net line item in the Company's condensed consolidated statement of income.

Table of Contents

Note 14. Commitments and Contingencies

The Company evaluates all pending or threatened contingencies and any commitments, if any, which are reasonably likely to have a material adverse effect on its operations or financial position. The Company assesses the probability of an adverse outcome and determines if it is remote, reasonably possible or probable as defined in accordance with the authoritative guidance issued by the FASB on accounting for contingencies. If information available prior to the issuance of the Company's financial statements indicates that it is probable that an asset had been impaired or a liability had been incurred at the date of the Company's financial statements, and the amount of the loss, or the range of probable loss can be reasonably estimated, then such loss is accrued and charged to operations. If no accrual is made for a loss contingency because one or both of the conditions pursuant to this guidance are not met, but the probability of an adverse outcome is at least reasonably possible, the Company will disclose the nature of the contingency and provide an estimate of the possible loss or range of loss, or state that such an estimate cannot be made.

During the normal course of business, the Company may be subject to litigation involving various business matters. Management believes that an adverse outcome of any such known matters would not have a material adverse impact on the Company.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This report contains forward-looking statements. These statements relate to future events or our future financial performance. In some cases, you can identify forward-looking statements by terminology such as may, will, should, expect, plan, anticipate, believe, estimate, predict, potential or continue, the negative of such terms or other comparable terminology. These statements are only predictions. Actual events or results may differ materially.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Moreover, neither we, nor any other person, assume responsibility for the accuracy and completeness of the forward-looking statements. We are under no obligation to update any of the forward-looking statements after the filing of this Quarterly Report to conform such statements to actual results or to changes in our expectations.

The following discussion of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and the related notes and other financial information appearing elsewhere in this Quarterly Report. Readers are also urged to carefully review and consider the various disclosures made by us which attempt to advise interested parties of the factors which affect our business, including without limitation the disclosures made in Item 1A of Part II of this Quarterly Report under the caption "Risk Factors" and under the captions "Management's Discussion and Analysis of Financial Condition and Results of Operations," and "Risk Factors" and in our audited consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2009, previously filed with the Securities and Exchange Commission (SEC).

Risk factors that could cause actual results to differ from those contained in the forward-looking statements include but are not limited to: changes in government policies; uncertain political conditions in international markets; deriving a significant portion of revenues from a limited number of customers; deriving a significant portion of revenues from the sale of solutions pursuant to government contracts; failure of the biometrics market to experience significant growth; failure of our products to achieve broad acceptance; potential fluctuations in quarterly and annual results; changes in our effective tax rate; failure to successfully compete; failure to comply with government regulations; failure to accurately predict financial results due to long sales cycles; negative publicity and/or loss of clients due to security breaches resulting in the disclosure of confidential information; loss of export licenses or changes in export laws; failure to manage projects; rapid technology change in the biometrics market; loss of a key member of management team; termination of backlog orders; loss of limited source suppliers; negative audits by government agencies; failure to protect intellectual property; and exposure to intellectual property and product liability claims.

Table of Contents

Overview

We are a leading provider of advanced Automated Fingerprint Identification Systems, (AFIS), and other fingerprint biometrics solutions to governments, law enforcement agencies and other organizations worldwide. We were incorporated and commenced operations in 1990. We have been researching, designing, developing and marketing AFIS and other fingerprint biometrics solutions since inception. During most of our operating history, we have achieved positive income and cash flows from operations. For the years ended December 31, 2008 and December 31, 2009, our revenues increased as our revenue base diversified from a product and customer standpoint. In addition to our strong AFIS products business, during these periods we experienced significant revenues from three other areas: our maintenance and service revenues increased as a percentage of our total revenues; sales of our web-based application service programs increased; and sales of our handheld mobile scanners became an important contributor to our revenue. We expect these trends to continue in 2010, and believe the result will be revenues increasing in 2010 over 2009 levels. During 2010 we expect to recognize revenue from previously announced contracts with customers including Northrop Grumman, U.K. Post Office Limited, Ecuador and the Department of Homeland Security, or DHS, as well as from new contracts with customers such as the DHS and various programs in Europe.

Sources of Revenue

We generate product revenues principally from sales of our AFIS solutions, which typically consist of our Programmable Matching Accelerator (PMA) servers and other AFIS equipment, including workstations and live-scans, bundled with our proprietary software. Also included in product revenues are fees generated from design and deployment of our AFIS solutions. We generate maintenance revenues from maintenance contracts that are typically included with the sale of our AFIS solutions. Maintenance contracts for technical support and software updates generally cover a period of one year, and after contract expiration, our customers have the right to purchase maintenance contract renewals, which generally cover a period of one year. Revenues from maintenance contracts are deferred and amortized on a straight-line basis over the life of the maintenance obligation. We generate services revenues from engineering services and AFIS system operation services that are not an element of an arrangement for the sale of products. These services are typically performed under fixed-price and time-and-material agreements.

We market our solutions primarily to U.S. and foreign government agencies and law enforcement agencies. In a typical contract with a government agency for an initial AFIS deployment, we agree to design the AFIS, supply and install equipment and software and integrate the AFIS within the agency's existing network infrastructure. These initial deployment contracts frequently require significant modification or customization of our solution as part of our integration services. These contracts provide for billings up to a fixed price total contract value upon completion of agreed milestones or deliveries, with each milestone or delivery typically having a value specified in the contract. These customers usually impose specific performance and acceptance criteria that must be satisfied prior to invoicing for each milestone or delivery. When customers purchase AFIS solutions that do not require significant modification or customization of our software, whether as an initial deployment or as an expansion of an existing AFIS, we typically agree to deliver the products and perform limited installation services subject to customer-specific acceptance criteria. Certain of our customers, including the DHS, submit purchase orders under blanket purchase order agreements. Blanket purchase order agreements set out the basic terms and conditions of our arrangement with the customer and simplify the procedures for ordering our products to avoid administrative processes that would otherwise apply, particularly with the federal government. The billing of these contracts is generally tied to delivery and acceptance of specific AFIS equipment, usually our PMA servers or live-scans. Most of our contracts for AFIS solutions also include an ongoing maintenance obligation that we honor over a term specified in the deployment contract or the blanket purchase order agreement. The nature of our business and our customer base is such that we negotiate a set of unique terms for each contract that are based upon the purchaser's standard form of documentation.

The most significant portion of our revenues in the most recent three fiscal years has been derived from sales to the DHS. The DHS uses our solutions in connection with the implementation of the United States Visitor and Immigrant Status Indicator Technology, or US-VISIT, program. We anticipate that the DHS will account for a significant portion of our revenues for the foreseeable future. We do not have any long-term contracts with any of our customers, including the DHS, for the sale of our products, and our future sales will depend upon the receipt of new orders. Any delay or other change in the rollout of US-VISIT or any failure to obtain new orders from the DHS could cause our revenues to fall short of our expectations.

We also expect to experience continued demand from a number of other governments as they deploy AFIS solutions at points of entry and exit, including borders, seaports and airports, and in connection with national identification programs. For example, we recently won a contract with the U.K. National Mobile Identification Project (formerly known as MIDAS) to provide a full AFIS, an online ordering system and biometric capture devices to suit a broad range of policing needs in the U.K. Another example is the contract we won earlier this year to provide an AFIS for the New York State Office of Temporary and Disability Assistance. The quantity and timing of orders from both U.S. and foreign government entities depends on a number of factors outside of our control, such as the level and timing of budget appropriations. Government contracts for security solutions, at points of entry and exit and in connection with national identification programs are typically awarded in open competitive bidding processes. Therefore, our future level of sales of AFIS solutions for deployments and at points of entry and exit may vary substantially, and will depend on our ability to successfully compete for this business.

Table of Contents**Cost of Revenues and Operating Expenses**

Cost of Revenues. Cost of product revenues consists principally of compensation costs incurred in designing, integrating, installing and customizing AFIS solutions, the costs associated with manufacturing, assembling and testing our AFIS solutions and utilizing subcontractors. A substantial portion of these costs represents components, such as servers, integrated circuits, workstations, live-scans and other hardware. Cost of product revenues also includes related overhead, compensation, final assembly, quality-assurance, inventory management, support costs and payments to contract manufacturers that perform assembly functions. Cost of maintenance and services revenues consists of customer support costs and training and professional service expenses, including compensation. Cost of revenues also includes share-based compensation allocable to personnel performing services related to cost of revenues. We expect our gross margin to be affected by many factors, including our mix of products and the amount of third party hardware included in our AFIS solutions. Other factors that may affect our gross margin include changes in selling prices of our products, maintenance and services, fluctuations in demand for our products, the timing and size of customer orders, fluctuations in manufacturing volumes, changes in costs of components and new product introductions by us and our competitors and agreements entered into with our subcontractors.

Research and Development. Research and development expenses consist primarily of salaries and related expenses for engineering personnel, fees paid to consultants and outside service providers, depreciation of development and test equipment, prototyping expenses related to the design, development, testing and enhancements of our products, and the cost of computer support services. We expense all research and development costs as incurred. Under our customer contracts, we typically obtain the rights to use any improvements to our technology developed on a particular customer deployment on other customer deployments. As a result, we have historically been able to moderate our research and development expenses by leveraging the improvements developed by our personnel working on customer engagements. Research and development expenses also include share-based compensation allocable to personnel performing services related to research and development.

Selling and Marketing. Selling and marketing expenses consist primarily of salaries, commissions and related expenses for personnel engaged in marketing, sales, public relations and advertising, along with promotional and trade show costs and travel expenses. Sales and marketing expenses also include share-based compensation allocable to personnel performing services related to sales and marketing.

General and Administrative. General and administrative expenses include salaries and related expenses for personnel engaged in finance, human resources, insurance, information technology, administrative activities and legal and accounting fees. General and administrative expenses also include share-based compensation allocable to personnel performing general and administrative services.

Settlement of Claims against Northrop

In April 2005, we initiated a lawsuit against Northrop Grumman in California State Court (Cogent Systems, Inc. vs. Northrop Grumman Corporation, Northrop Grumman Technology Overseas, Inc., et al., Superior Court of the State of California, in and for the County of Los Angeles, Case No. BC 332199) based on claims of breach of contract, conversion, misappropriation of trade secrets and other claims (the Action). On December 5, 2007, we and Northrop entered into a definitive Settlement Agreement and Mutual Release of Claims (the Settlement). Pursuant to the terms of the Settlement, we and Northrop formally settled and released all claims and causes of action alleged in the Action. Under the Settlement, we entered into four agreements with Northrop (collectively, the Agreements):

1. The Settlement Agreement, pursuant to which Northrop agreed to pay Cogent \$25 million, of which \$15 million was paid in January 2008 and \$10 million was paid in January 2009;
2. The Software License Agreement, pursuant to which Northrop will pay Cogent \$15 million over three years for a non-exclusive license to use certain of Cogent's automated fingerprint identification software in certain existing programs, of which \$5 million was paid in each of January 2008, January 2009 and January 2010;
3. The Product and Services Agreement, pursuant to which Northrop will pay Cogent a minimum of \$20 million for products and services over the five year term of the agreement, of which \$5 million was paid in January 2009; and

Edgar Filing: Cogent, Inc. - Form 10-Q

4. The Strategic Alliance Agreement, pursuant to which Cogent and Northrop will meet semiannually over the three year term of the agreement to discuss business opportunities and proposal efforts for the design, development, sale and support of biometric identification solutions.

Table of Contents

Our total proceeds under the agreements will be \$60.0 million. We have accounted for the agreements as one multiple element arrangement. The contract values for each of the agreements do not necessarily represent the fair value of each agreement. The Strategic Alliance Agreement was determined not to be an element requiring accounting recognition. We determined that the \$20 million in proceeds scheduled under the Product and Services Agreement includes both a guaranteed payment component valued at \$1.0 million and a component for the purchase of products and services valued at \$19.0 million using VSOE of fair value in accordance with FASB guidance on software revenue recognition. We determined the fair value of the Software License Agreement and the guaranteed payment component of the Product and Services Agreement to be \$30.0 million and \$1.0 million, respectively, based on generally accepted valuation techniques. The residual method was used to derive the \$10.0 million fair value for the Settlement Agreement.

Accounting for the Software License Agreement is subject to the FASB guidance on software revenue recognition. However, the provision of the AFIS software under the Software License Agreement did not represent a stand-alone arm's length transaction. Rather, the revenue amount was determined based on a valuation. Thus, we did not believe it appropriate to apply our standard maintenance VSOE rate to this amount and we could not determine the fair value of the associated maintenance commitment. We will recognize revenue under the Software License Agreement and the Products and Services Agreement, on a combined basis, based on the lowest proportion of revenue recognizable under the contracts. While we were not able to establish VSOE of the maintenance commitment, we believe our standard maintenance rate represents a reasonable basis for the allocation of revenues recognized under the Software License Agreement, between product and maintenance, as the revenues are recognized over the term of the Software License Agreement. We will therefore allocate a portion of the revenues representing our standard annual maintenance renewal rate (based on VSOE), to maintenance revenues, in accordance with Rule 5-03(b)(1) of Regulation S-X. The remainder will be recorded as product revenues. The \$1.0 million value of the guaranteed payment will be recognized as income on a pro-rata basis (i.e., each dollar of revenue under the Products and Services Agreement will result in ninety-five cents of revenue and five cents of Income from settlement of lawsuit).

Application of Critical Accounting Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with accounting principles generally accepted in the U.S. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate these estimates, including those related to percentage-of-completion, bad debts, investments, income taxes, share-based compensation, commitments, contingencies and litigation. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We consider the following accounting estimates to be both those most important to the portrayal of our results of operations and financial condition and those that require the most subjective judgment:

revenue recognition;

commitments and contingencies;

allowance for doubtful accounts;

investments in marketable securities;

accounting for taxes; and

accounting for share-based compensation.

Edgar Filing: Cogent, Inc. - Form 10-Q

Revenue Recognition. Because our proprietary software is essential to the functionality of our AFIS solutions and other biometrics products, we apply the authoritative guidance issued by the FASB on software revenue recognition. For arrangements that require significant production, modification, or customization of software, we apply authoritative guidance issued by the FASB for long-term construction-type contracts and the accounting for performance of construction-type and production type contracts. To the extent an element within our software arrangements falls within a level of accounting literature that is higher than the FASB guidance on software revenue recognition, we record revenue on such element in accordance with the relevant authoritative literature. For arrangements that contain the lease of equipment, we account for the lease element in accordance with authoritative guidance issued by the FASB on accounting for leases and account for the remaining elements in the arrangement in accordance with authoritative guidance issued by the FASB on software revenue recognition. For arrangements that contain a non-software deliverable such as hardware, we apply authoritative guidance issued by the FASB on accounting for non-software deliverables in arrangement containing more-than-incidental software and recognize revenue when all other revenue recognition criteria are met. For multiple element arrangements not subject to software revenue recognition, we account for these arrangements in accordance with authoritative guidance issued by the FASB on revenue arrangements with multiple deliverables. The application of the appropriate accounting principle to our revenue is dependent upon the specific transaction and whether the sale includes systems, software and services or a combination of these items. As our business evolves, the mix of products and services sold will impact the timing of when revenue

Table of Contents

and related costs are recognized. Additionally, revenue recognition involves judgments, including estimates of costs to complete contracts accounted for using the percentage of completion method of accounting and assessments of the likelihood of nonpayment. We analyze various factors, including a review of specific transactions, the credit-worthiness of our customers, our historical experience and market and economic conditions. Changes in judgments on these factors could materially impact the timing and amount of revenue and costs recognized.

Product Revenues

The timing of product revenues recognition is dependent on the nature of the product sold and is generally comprised of the following:

Revenues associated with AFIS solutions that do not require significant modification or customization of our software, exclusive of amounts allocated to maintenance for which the Company has vendor specific evidence of fair value (VSOE) are recognized upon installation and receipt of written acceptance of the solution by the customer when required by the provisions of the contract, provided all other criteria for revenue recognition have been met.

Revenues associated with AFIS solutions that require significant modification or customization of our software, are recognized using the percentage-of-completion method. The percentage-of-completion method reflects the portion of the anticipated contract revenue which has been earned, equal to the ratio of labor effort expended to date to the anticipated final labor effort, based on current estimates of total labor effort necessary to complete the project. The amount subject to the percentage-of-completion method is exclusive of the maintenance, the fair value of which is established by VSOE. Material differences may result in the amount and timing of our revenue for any period if actual results differ from our judgments and estimates. The Company recognizes revenue in this manner from sales of significant initial AFIS deployments.

Revenue associated with the sale of our application specific integrated circuit, or ASIC applications, stand-alone live-scans and other biometric products, exclusive of maintenance (when applicable), the fair value of which is established by VSOE, is recognized upon shipment to the customer provided (i) persuasive evidence of an arrangement exists, (ii) title and risk of ownership has passed to the buyer, (iii) the fee is fixed or determinable and (iv) collection is deemed probable.

Revenue associated with service offerings where the Company maintains and operates a portion of the AFIS systems on an outsourced application-hosting basis is recognized on a per transaction basis provided (i) persuasive evidence of an arrangement exists, (ii) the fee is fixed or determinable and (iii) collection is deemed probable.

Revenue associated with contracts where sufficient VSOE cannot be established for the allocation of revenue to the various elements of the arrangement is deferred until the earlier of the point at which (i) such sufficient VSOE is established or (ii) all elements of the arrangement have been delivered, except for when the only undelivered element in the arrangement for which VSOE has not been established is maintenance. In these instances revenue is recognized ratably over the contractual maintenance term, but in accordance with Rule 5-03(b)(1) of Regulation S-X, the Company allocates a portion of the revenues recognized to maintenance revenues based on an analysis of historical maintenance renewals, and the residual is allocated to product revenues. Revenues recognized under such arrangements were \$558,000 and \$967,000 for the three months ended March 31, 2009 and 2010, respectively.

As a result of our analysis of historical maintenance renewals, we determined we no longer had sufficient pricing consistency of maintenance renewals to establish VSOE of maintenance for our AFIS arrangements bundled with maintenance that have been executed since the three months ended June 30, 2009 and for the arrangements consisting of stand-alone Livescans that have been executed during the three months ended March 31, 2010. During the three months ended March 31, 2010 the impact on such arrangements was the deferral of \$1.1 million of revenue that would have otherwise been recognized. Any new AFIS arrangements or arrangements for stand-alone Livescans that we execute in future periods in which maintenance becomes the only undelivered element and we are unable to establish VSOE of maintenance, would typically result in the total payments due under the arrangement being deferred and recognized as revenue, subject to the Rule 5-03(b)(1) allocation, ratably over the contractual maintenance term.

Edgar Filing: Cogent, Inc. - Form 10-Q

Cash received from customers in advance of recognition of the related revenue is recorded as deferred revenue.

Maintenance Revenues

Maintenance revenue consists of fees for providing technical support and software updates on a when-and-if available basis. We recognize all maintenance revenue ratably over the applicable maintenance period. We determine the amount of maintenance revenue to be deferred through reference to substantive maintenance renewal provisions contained in a particular arrangement or, in the absence of such renewal provisions, through reference to VSOE of maintenance renewal rates. We consider substantive maintenance provisions to be provisions where the stated maintenance renewal as a percentage of the product fee is comparable to our normal pricing for maintenance only renewals. In the event that maintenance included in an AFIS solutions or stand-alone Livescans contract does not have VSOE, the entire arrangement fee, including the contractual amount of the maintenance obligation, is included in revenues and recognized ratably over the term of the maintenance period.

Table of Contents

Services Revenues

Professional services revenue is primarily derived from engineering services and AFIS system operation and maintenance services that are not an element of an arrangement for the sale of products. These services are generally billed on a time-and-materials basis. The majority of our professional services are performed either directly or indirectly for U.S. government organizations. Revenue from such services is recognized as the services are provided.

The amount of revenue recognized from commissions where we are acting as an agent is the net amount after payments are made to the primary obligor responsible for delivering the services.

Revenue Recognition Criteria

We recognize revenue when persuasive evidence of an arrangement exists, the element has been delivered, the fee is fixed or determinable and collection of the resulting receivable is probable.

Persuasive evidence of an arrangement: We use either contracts signed by both the customer and us or written purchase orders issued by the customer that legally bind us and the customer as evidence of an arrangement.

Product delivery: We deem delivery to have occurred when AFIS solutions are installed and, when required under the terms of a particular arrangement, upon acceptance by the customer. Shipments of our ASICs, stand-alone live-scans and other biometric products are recognized as revenue when shipped and title and risk of ownership has passed to the buyer.

Fixed or determinable fee: For product arrangements not accounted for using the percentage-of-completion method, we consider the fee to be fixed or determinable if the fee is not subject to refund or adjustment and the payment terms are within normal established practices. If the fee is not fixed or determinable, we recognize the revenue as amounts become due and payable.

Collection is deemed probable: We conduct a credit review for all significant transactions at the time of the arrangement to determine the credit-worthiness of the customer. Collection is deemed probable if we expect that the customer will pay amounts under the arrangement as payments become due.

Deferred Revenue. Our deferred revenue balance results primarily from payments received from customers in advance of recognition of the related revenue and, to a lesser extent, from invoicing of customers prior to recognition of the related revenue. Certain customers make upfront payments resulting in cash collected prior to our recognition of revenue. These payments can be significant. We record this upfront payment as deferred revenue and reduce the deferred revenue balance as revenue is recognized. As a result, our deferred revenue balance fluctuates from quarter to quarter because it is a function of the timing of (i) the receipt of cash payments from those customers who pay in advance of revenue recognition, (ii) invoicing of customers in advance of revenue recognition and (iii) amortization of deferred revenues into revenues. Deferred revenues also consist of payments received in advance from our customers for maintenance agreements, under which revenues are recognized ratably over the term of the maintenance period. However, the fluctuation in the deferred revenue balance from quarter to quarter is generally not significantly affected by the deferred maintenance revenue. Because the mix of customers who pay or are invoiced in advance of revenue recognition changes from period to period, fluctuations in our deferred revenue balance are not a reliable indicator of total revenue to be recognized in any future period. Our cash flow from operations is also affected each quarter as a result of fluctuations in the deferred revenue balance.

Commitments and Contingencies. We periodically evaluate all pending or threatened contingencies and commitments, if any, that are reasonably likely to have a material adverse effect on our operations or financial position. We assess the probability of an adverse outcome and determine if it is remote, reasonably possible or probable as defined in accordance with authoritative guidance issued by the FASB on accounting for contingencies. If information available prior to the issuance of our financial statements indicates that it is probable that an asset had been impaired or a liability had been incurred at the date of our financial statements, and the amount of the loss, or the range of probable loss can be reasonably estimated, then such loss is accrued and charged to operations. If no accrual is made for a loss contingency because one or both of the conditions pursuant to authoritative guidance issued by the FASB on accounting for contingencies are not met, but the probability of an adverse outcome is at least reasonably possible, we will disclose the nature of the contingency and provide an estimate of the possible loss or range of loss, or state that such an estimate cannot be made.

Allowances for Doubtful Accounts. We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments, which results in a provision for bad debt expense. We determine the adequacy of this allowance by evaluating individual customer accounts receivable, through consideration of the customer's financial condition, credit history and current

Edgar Filing: Cogent, Inc. - Form 10-Q

economic conditions. If the financial condition of our customers was to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

Table of Contents

Investments in Marketable Securities. Our investments in marketable securities consist of money market funds, certificates of deposit and commercial paper, U.S. Treasury securities, government-sponsored enterprise securities, municipal bonds, foreign government bonds and corporate bonds and notes. Marketable securities are classified as available-for-sale securities and are accounted for at their fair value. We have the intent, ability and history of holding these securities until maturity. Unrealized holding gains and losses are excluded from earnings and reported net of the related tax effect in other comprehensive income (OCI) as a separate component of stockholders' equity. When the fair value of an investment declines below its original cost, we consider all available evidence to evaluate whether the decline is other-than-temporary. Among other things, we consider the duration and extent of the decline and economic factors influencing the markets. If a decline in fair value is judged to be other-than-temporary, the cost basis of the individual security is written down to fair value as a new cost basis and the amount of the write-down is included in earnings (that is, accounted for as a realized loss). The new cost basis is not to be changed for subsequent recoveries in fair value. Subsequent increases in the fair value of available-for-sale securities are included in OCI; subsequent decreases in fair value, if not an other-than-temporary impairment, also are included in OCI. The determination of whether a loss is other than temporary is highly judgmental and may have a material impact on our results of operations.

Management makes decisions relating to our marketable securities in accordance with the criteria, policies and guidelines set forth in a written investment policy adopted by our Board of Directors. The primary goal of our investment policy is to invest cash balances in a manner that ensures the preservation and liquidity of those funds. We are not permitted to invest or trade in securities for short-term speculative purposes, or otherwise hold investments in speculative debt or equity.

The investment policy sets forth eligible investments and mandates the following with respect to our investment portfolio:

The maximum maturity for each issue is three years, and the maximum weighted average maturity of our investment portfolio is no more than two years;

Investments (other than direct obligations of the U.S. Government and securities of U.S. Government-sponsored agencies) must have a short-term rating of at least A-1/SP-1 by Standard & Poor's or P-1/MIG 1 by Moody's. If there is no short-term rating the issuer must have a long-term rating of single A or better by Standard & Poor's or Moody's. Investments in longer term issues must have a rating of at least single A by Standard & Poor's and/or Moody's; and

Positions in all investments may not exceed 5% per issuer; provided that there is no limitation with regard to money market sweep funds, direct obligations of the U.S. Government or securities of U.S. Government-sponsored agencies.

Accounting for Taxes. In preparing our consolidated financial statements, we estimate our income tax liability in each of the jurisdictions in which we operate by estimating our actual current tax exposure together with assessing temporary differences resulting from differing treatment of items for tax and financial statement purposes. As of March 31, 2010, our net deferred tax assets were \$22.1 million. Management judgment is required in assessing the realizability of our deferred tax assets. In performing this assessment, we consider whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. We consider the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. In the event that actual results differ from our estimates or we adjust our estimates in future periods, we may need to make or adjust valuation allowances with respect to our deferred tax assets, which could materially impact our financial position and results of operations. Our income tax provision is based on calculations and assumptions that may be subject to examination by the Internal Revenue Service and other tax authorities. Should the actual results differ from our estimates, we would have to adjust the income tax provision in the period in which the facts that give rise to the revision become known. Tax law and rate changes are reflected in the income tax provision in the period in which such changes are enacted.

We generate a significant portion of our revenues from contracts with foreign government agencies. Each country with which we do business has its own particular rules to determine the point at which our activities within such country will become subject to taxes, if any. To the extent our contracts with foreign government agencies are subject to income taxes and we do not generate adequate foreign tax credits for purposes of our Federal income tax return, our effective tax rate may be impacted.

Effective January 1, 2007, we adopted authoritative guidance issued by the FASB on accounting for uncertainty in income taxes, which requires significant judgment in determining what constitutes an individual tax position as well as assessing the outcome of each tax position. Changes in judgment as to recognition or measurement of tax positions can materially affect the estimate of the effective tax rate and consequently, affect our operating results.

Edgar Filing: Cogent, Inc. - Form 10-Q

Accounting for Share-Based Compensation. The calculation of share-based employee compensation expense involves estimates that require management's judgment. These estimates include the fair value of each of our stock option awards, which is estimated on the date of grant using a Black-Scholes option-pricing model as discussed in Note 7 of our condensed consolidated financial statements included elsewhere in this report. The fair value of options granted is amortized on a straight-line basis over the requisite service periods of the awards, which are generally the vesting periods. The expected term of stock option awards granted is

Table of Contents

calculated using the simplified method, which utilizes the weighted average expected life of each tranche of stock option, determined based on the sum of each tranche's vesting period plus one-half of the period from the vesting date of each tranche to the stock option's expiration in accordance with authoritative accounting guidance. We estimate the volatility of our common stock at the date of grant based on the implied volatility of publicly traded options on our common stock. Our decision to use implied volatility was based upon the availability of actively traded options on our common stock and our belief that implied volatility is more representative of future stock price trends than historical volatility. We base the risk-free interest rate that we use in the Black-Scholes option valuation model on the implied yield in effect at the time of option grant on U.S. Treasury zero-coupon issues with equivalent remaining terms. We do not anticipate paying any cash dividends in the foreseeable future. Consequently, we use an expected dividend yield of zero in the Black-Scholes option valuation model. We estimate forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates. We use historical data to estimate pre-vesting option forfeitures and record share-based compensation expense only for those awards that are expected to vest.

Beginning in 2007, the Compensation Committee of the Company's Board of Directors has issued awards of nonvested equity share units to certain of the Company's employees and executive officers under the Company's 2004 Equity Incentive Plan. These awards entitle the holder to shares of common stock subject to certain terms and, generally, vest in 25% increments each year on the anniversary of the grant date throughout a four year vesting period. The nonvested equity share unit awards are valued based on the closing market price on the date of award. Nonvested equity share unit compensation is to be amortized and charged to operations on a straight-line basis over the four year vesting period.

Results of Operations

The following table sets forth selected statements of income data for each of the periods indicated expressed as a percentage of total revenues:

	Three Months Ended March 31,	
	2009	2010
Consolidated Statements of Income Data:		
Revenues:		
Product revenues	66.6%	48.1%
Maintenance and services revenues	33.4	51.9
Total revenues	100.0	100.0
Cost of revenues:		
Cost of product revenues	17.9	18.9
Cost of maintenance and services revenues	13.7	20.0
Total cost of revenues	31.6	38.9
Gross profit	68.4	61.1
Operating expenses:		
Research and development	12.0	15.6
Selling and marketing	10.2	13.6
General and administrative	9.7	10.3
Income from settlement of lawsuit	0.0	(0.6)
Total operating expenses (income)	31.9	38.9
Operating income	36.5	22.2
Interest income	10.5	8.3
Other, net	0.1	1.1
Income before income taxes	47.1	31.6
Income tax provision	18.3	11.0

Edgar Filing: Cogent, Inc. - Form 10-Q

Net income		28.8%	20.6%
------------	--	-------	-------

Table of Contents**Comparison of Results for the three months ended March 31, 2010 and 2009**

Revenues. Revenues were \$24.4 million for the three months ended March 31, 2010, compared to \$31.0 million for the three months ended March 31, 2009. Product revenues were \$11.7 million for the three months ended March 31, 2010, compared to \$20.7 million for the three months ended March 31, 2009. The \$9.0 million, or 43.5% decrease in product revenues was driven primarily by a \$13.2 million decrease in product revenues recognized from the DHS (primarily due to the timing of recognizing sales to the DHS), partially offset by a \$6.4 million increase in product revenue recognized under the settlement agreement with Northrop Grumman.

Maintenance and services revenues increased to \$12.7 million for the three months ended March 31, 2010 from \$10.4 million for the three months ended March 31, 2009. The increase of \$2.3 million or 22.1% was primarily due to an increase in maintenance renewals and engineering services associated with product sales in prior periods and \$1.1 million of maintenance revenue recognized under the Northrop Agreements.

Gross Profit. Gross profit as a percentage of revenues was 61.1% for the three months ended March 31, 2010, compared to 68.4% for the three months ended March 31, 2009. Product gross margins were 60.6% for the three months ended March 31, 2010, compared to 73.1% for the three months ended March 31, 2009. The decline in margins on product revenues was primarily due to the allocation of fixed costs over a lower revenue base.

Costs of maintenance and service revenues increased \$0.6 million or 14.0%, to \$4.9 million for the three months ended March 31, 2010 from \$4.3 million for the three months ended March 31, 2009. This increase was the result of the increase in maintenance and support services provided during the period. Margins on maintenance and services increased from 58.9% during the three months ended March 31, 2009 to 61.4% during the three months ended March 31, 2010. The increase in maintenance and service gross margin was primarily due to the recognition of \$1.1 million in maintenance revenue in the first quarter of 2010 under the settlement agreement with Northrop Grumman.

Research and Development. Research and development expenses stayed relatively consistent at \$3.8 million for three months ended March 31, 2010 compared to \$3.7 million for the three months ended March 31, 2009. As a percentage of revenues research and development expenses increased to 15.6% for the three months ended March 31, 2010 compared to 12.0% of revenues for the three months ended March 31, 2009. The increase in research and development expenses as a percent of revenues was primarily due to the expenses related to our efforts to develop new products remaining relatively consistent as compared to such expenses for the three months ended March 31, 2009, compared to lower revenues in the first quarter of 2010 than in the first quarter of 2009.

Selling and Marketing. Selling and marketing expenses stayed relatively consistent at \$3.3 million for the three months ended March 31, 2010 compared to \$3.2 million for the three months ended March 31, 2009. As a percentage of revenues such expenses increased to 13.6% for the three months ended March 31, 2010, compared to 10.2% for the three months ended March 31, 2009. This increase in selling and marketing expenses as a percentage of revenue was primarily due to management's continued investment in marketing and business development compared to lower revenues in the first quarter of 2010 compared to revenues in the first quarter of 2009.

General and Administrative. General and administrative expenses decreased \$0.5 million, or 16.7%, to \$2.5 million for the three months ended March 31, 2010 from \$3.0 million for the three months ended March 31, 2009. As a percentage of revenues, general and administrative expenses increased to 10.3% for the three months ended March 31, 2010 compared to 9.7% for the three months ended March 31, 2009 primarily due to our relatively fixed expenses compared to lower revenues in the first quarter of 2010. This effect was partially offset by a decrease in general and administrative expenses that was partially due to professional services related to our settlement with Northrop Grumman that were incurred in 2009 and not in 2010.

Interest Income. We earned interest income of \$2.0 million during the three months ended March 31, 2010, compared to \$3.3 million during the three months ended March 31, 2009. The decrease in interest income was primarily due to us holding a higher amount of securities issued or guaranteed by the U.S. Government which have lower interest rates than less secure investments, and a decrease in interest rates in general.

Income Tax Provision. We recognized an income tax provision of \$2.7 million during the three months ended March 31, 2010. Our effective tax rate of 34.7% for the three months ended March 31, 2010 represents federal, state and foreign taxes on our income reduced primarily as a result of the domestic production activities deduction as well as state research and development credits. We recognized an income tax provision of \$5.7 million, with an effective tax rate of 38.8%, during the three months ended March 31, 2009. The decrease in the effective tax rate from 38.8% in the first quarter of 2009 to 34.7% in 2010 is attributable to a non-recurring expense in 2009 due to state tax law changes and a income tax benefit recognized in the first quarter of 2010 related to foreign taxes, in addition to the relative impact on effective tax rate due to lower operating income earned during the first quarter of 2010 compared to 2009.

Liquidity and Capital Resources

Edgar Filing: Cogent, Inc. - Form 10-Q

Since our inception we have financed our operations by generating cash from operations. Since September 2004 we have supplemented our cash resources through public offerings of our common stock, raising \$228.6 million in our initial public offering in September 2004 and \$96.8 million in a subsequent public offering in June 2005. As of March 31, 2010, we had \$24.3 million in cash and \$499.2 million in investments in marketable securities.

Table of Contents*Cash provided by operations*

In addition to our net income, the key drivers of our cash flows from operations are changes in accounts receivable, inventory, deferred revenues and deferred income taxes and taxes payable. The effect of these key drivers on our cash provided by operations for the three months ended March 31, 2009 and 2010 was as follows:

	Three Months Ended March 31,	
	2009	2010
	(in thousands)	
Key Drivers of Cash Provided by Operations		
Net income	\$ 8,950	\$ 5,019
Changes in:		
Billed and unbilled accounts receivable	7,275	(3,291)
Inventory and contract related costs	(4,420)	(6,388)
Deferred revenues	5,866	7,367
Prepays and other assets	(394)	(2,840)
Accounts payable and accrued expenses	8,500	2,189
Net other activity	2,546	(1,894)
Net cash provided by operating activities	\$ 28,323	\$ 162

A substantial portion of our revenues represents sales of multiple element software based solutions. Elements of our software based solutions may be delivered immediately or may be delivered over several years. The timing for the recognition of our revenues, and the related costs, is dependent on the nature of the products and services sold and does not necessarily coincide with cash collections. On the other hand, the timing of cash collections depends on our customers' budgeting processes, the length and terms of each arrangement and the terms negotiated during the bidding process.

Cash provided by operating activities was reduced by \$28.8 million over the prior year same period primarily due to the decrease in net income compounded by an increase in income tax payments of \$9.4 million as well as an increase in accounts receivable. The increase in accounts receivable for the three months ended March 31, 2010 is primarily due to the timing of billing and the related collections for DHS. During the three months ended March 31, 2009 we experienced strong cash collections on our accounts receivable balances which contributed to the cash provided by operations during that period.

The increase in deferred revenues of \$7.4 million during the three months ended March 31, 2010 was primarily due to an increase in deferred revenue of \$8.9 million from DHS orders as well as approximately \$6.0 million from various contracts including Mexico, the U.K. National Mobile Identification Project and the U.K. Post Office. This increase was partially offset by approximately \$7.5 million of revenue recognized during the three months ended March 31, 2010 from Northrop under the settlement and software license agreement previously discussed.

The increase in inventory and contract related costs of \$6.4 million during the three months ended March 31, 2010 was primarily due to the build-up of inventory for fulfillment of equipment requirements for the the U.K. National Mobile Identification Project and U.K. Post Office contracts.

Our effective tax rates have been impacted by the disqualifying disposition of incentive stock options, which reduce our income taxes payable and result in positive cash flow. Our cash flows from income taxes could be impacted depending on the timing of disqualifying dispositions. To the extent we have previously recorded share-based compensation expense related to incentive stock options we record the benefit from the disqualifying disposition of incentive stock options as a reduction to our provision for income taxes.

Cash Used In Investing Activities

Net cash used in investing activities was \$25.5 million and \$4.8 million for the three months ended March 31, 2009 and 2010, respectively. Investing activities consisted primarily of purchases and sales of available-for-sale securities and capital expenditures, which generally consisted of computer equipment and software for our engineering, service and information technology departments. Cash used of \$24.7 million and \$3.8 million during the three months ended March 31, 2009 and 2010, respectively, represented the net change in the balance of investments due to

Edgar Filing: Cogent, Inc. - Form 10-Q

purchases and sales of available-for-sale securities. Capital expenditures, which consisted primarily of computer equipment and software for our engineering, service and information technology departments, were \$825,000 and \$1.1 million for the three months ended March 31, 2009 and 2010, respectively.

Cash Provided by Financing Activities

Cash provided by financing activities was \$160,000 and \$80,000 for the three months ended March 31, 2009 and 2010, respectively. Proceeds from the exercise of stock options were \$63,000 and \$97,000 during the three months ended March 31, 2009 and 2010, respectively. We classified the cash flows resulting from the excess tax benefits from share-based compensation as financing cash flows.

Table of Contents

We currently have no material cash commitments, except our normal recurring trade payables, expense accruals and operating leases, all of which are currently expected to be funded through existing working capital and future cash flows from operations. We believe that our cash and cash equivalent balances will be sufficient to satisfy our cash requirements for at least the next twelve months. Although we cannot accurately anticipate the effect of inflation or foreign exchange markets on our operations, we do not believe these external economic forces have had, or are likely in the foreseeable future to have, a material impact on our liquidity or capital resources.

At March 31, 2010 we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance, special purpose, or variable interest entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. In addition, we did not engage in trading activities involving non-exchange traded contracts. As a result, we are not exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in such relationships. We do not have material relationships and transactions with persons or entities that derive benefits from their non-independent relationship with us or our related parties.

Commitments and contingencies as discussed in the Note 14 to the Consolidated Financial Statements do not include payments that could be made related to our unrecognized tax benefits liability, which amounted to \$3.9 million as of March 31, 2010. The timing and amount of any future payments is not reasonably estimable, as such payments are dependent on the completion and resolution of examinations with tax authorities.

Table of Contents

Recent Accounting Pronouncements

In June 2009, the FASB issued authoritative guidance on the consolidation of variable interest entities, which was effective for us beginning January 1, 2010. The new guidance requires revised evaluations of whether entities represent variable interest entities, ongoing assessments of control over such entities, and additional disclosures for variable interests. The adoption of this new guidance did not have a material impact on our financial statements.

In October 2009, the FASB issued authoritative guidance on revenue recognition that will become effective for us beginning January 1, 2011, with earlier adoption permitted. Under the new guidance on arrangements that include software elements, tangible products that have software components and non-software components that function together to deliver the tangible products' essential functionality will no longer be within the scope of the software revenue recognition guidance, and software-enabled products will now be subject to other relevant revenue recognition guidance. Additionally, the FASB issued authoritative guidance on revenue arrangements with multiple deliverables that are outside the scope of the software revenue recognition guidance. Under the new guidance, when VSOE or third party evidence for deliverables in an arrangement cannot be determined, a best estimate of the selling price is required to separate deliverables and allocate arrangement consideration using the relative selling price method. The new guidance includes new disclosure requirements on how the application of the relative selling price method affects the timing and amount of revenue recognition. We are currently evaluating the effect that adoption of this new guidance will have on our financial statements.

In January 2010, the FASB issued authoritative guidance to amend the disclosure requirements related to recurring and nonrecurring fair value measurements. The guidance requires new disclosures on the transfers of assets and liabilities between Level 1 (quoted prices in active market for identical assets or liabilities) and Level 2 (significant other observable inputs) of the fair value measurement hierarchy, including the reasons and the timing of the transfers. Additionally, the guidance requires a roll forward of activities on purchases, sales, issuance, and settlements of the assets and liabilities measured using significant unobservable inputs (Level 3 fair value measurements). The guidance became effective for us with the reporting period beginning January 1, 2010, except for the disclosure on the roll forward activities for Level 3 fair value measurements, which will become effective for us with the reporting period beginning January 1, 2011. The adoption of this new guidance did not have a material impact on our financial statements.

Other new pronouncements issued but not effective until after March 31, 2010, are not expected to have a significant effect on the Company's consolidated financial position or results of operations.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Although we generally bill for our products and services mostly in U.S. dollars, our financial results could be affected by factors such as changes in foreign currency rates or weak economic conditions in foreign markets. A strengthening of the dollar could make our products and services less competitive in foreign markets and therefore could reduce our revenues. We are billed by and pay substantially all of our vendors in U.S. dollars. In the future, an increased portion of our revenues and costs may be denominated in foreign currencies. To date, exchange rate fluctuations have had little impact on our operating results. We do not enter into derivative instrument transactions for trading or speculative purposes.

Fixed income securities are subject to interest rate risk. The fair value of our investment portfolio would not be significantly impacted by either a 100 basis point increase or decrease in interest rates due mainly to the short-term nature of the major portion of our investment portfolio. The portfolio is diversified and consists primarily of investment grade securities to minimize credit risk.

Item 4. Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Edgar Filing: Cogent, Inc. - Form 10-Q

As required by Rule 13a-15(b) under the Exchange Act, we conducted an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based on the foregoing evaluation, our principal executive officer and our principal financial officer concluded that as of the end of the period covered by this report our disclosure controls and procedures were effective at the reasonable assurance level.

There were no changes in our internal controls over financial reporting during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect our internal controls over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we may become involved in various lawsuits and legal proceedings which arise in the ordinary course of business. However, litigation is subject to inherent uncertainties, and an adverse result in these or other matters may arise from time to time that may harm our business. We are not currently aware of any such legal proceedings or claims that we believe will have, individually or in the aggregate, a material adverse affect on our business, financial condition or operating results.

Item 1A. Risk Factors

You should consider each of the following factors as well as the other information in this Quarterly Report in evaluating our business and our prospects. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties not presently known to us or that we currently consider immaterial may also impair our business operations. If any of the following risks actually occur, our business and financial results could be harmed. In that case, the trading price of our common stock could decline. You should also refer to the other information set forth in this Quarterly Report, including our financial statements and the related notes.

Table of Contents

Our business could be adversely affected by significant changes in the contracting or fiscal policies of governments and governmental entities.

We derive substantially all of our revenues from contracts with international, federal, state and local governments and government agencies, and subcontracts under federal government prime contracts, and we believe that the success and growth of our business will continue to depend on our successful procurement of government contracts either directly or through prime contractors. Accordingly, changes in government contracting policies or government budgetary constraints could directly affect our financial performance. Among the factors that could adversely affect our business are:

changes in fiscal policies or decreases in available government funding;

changes in government funding priorities;

changes in government programs or applicable requirements;

the adoption of new laws or regulations or changes to existing laws or regulations;

changes in political or social attitudes with respect to security and defense issues;

changes in audit policies and procedures of government entities;

potential delays or changes in the government appropriations process; and

delays in the payment of our invoices by government payment offices.

These and other factors could cause governments and governmental agencies, or prime contractors that use us as a subcontractor, to reduce their purchases under existing contracts, to exercise their rights to terminate contracts at-will or to abstain from exercising options to renew contracts, any of which could have an adverse effect on our business, financial condition and results of operations. Many of our government customers are subject to stringent budgetary constraints. The award of additional contracts from government agencies could be adversely affected by spending reductions or budget cutbacks at these agencies.

In 2009 and for the three months ended March 31, 2010, we derived 41% and 23% respectively, of our revenues from a limited number of customers.

In each fiscal period we have derived, and we believe that in each future fiscal period we will continue to derive, a significant portion of our revenues from a limited number of customers. In 2009, the DHS accounted for 41% of revenues, and in the three months ended March 31, 2010, the DHS accounted for 23% of revenues. We do not have any long-term contracts with any of our customers, including the DHS, for the sale of our products, and our future sales will depend upon the receipt of new orders. To the extent that any significant customer, like the DHS, reduces or delays its purchases from us or terminates its relationship with us, our revenues would decline significantly and our financial condition and results of operations would suffer substantially. For example, a delay in the rollout of US-VISIT, or the completion of the implementation of that program, resulting in a decrease or cessation of orders for our products from the DHS, would materially affect our business.

In 2009 and for the three months ended March 31, 2010, we derived 79% and 84% respectively, of our revenues from the sale of our solutions either directly or indirectly to U.S. government entities pursuant to government contracts, which involve competitive bidding and may be subject to cancellation or delay without penalty, any of which may produce volatility in our revenues and earnings.

Edgar Filing: Cogent, Inc. - Form 10-Q

Our performance in any one reporting period is not necessarily indicative of future operating performance because of our reliance on a small number of customers, the majority of which are government entities. Government contracts are frequently awarded only after formal competitive bidding processes, which have been and may continue to be protracted, and typically impose provisions that permit cancellation in the event that necessary funds are unavailable to the public agency. In many cases, unsuccessful bidders for government agency contracts are provided the opportunity to formally protest certain contract awards through various agency, administrative and judicial channels. The protest process may substantially delay a successful bidder's contract performance, result in cancellation of the contract award entirely and distract management. We may not be awarded contracts for which we bid, and substantial delays or cancellation of purchases may even follow our successful bids as a result of such protests.

In addition, local government agency contracts may be contingent upon availability of matching funds from federal or state entities. Also, law enforcement and other government agencies are subject to political, budgetary, purchasing and delivery constraints which may cause our quarterly and annual revenues and operating results to fluctuate in a manner that is difficult to predict.

Table of Contents

If the biometrics market does not experience significant growth or if our products do not achieve broad acceptance both domestically and internationally, we will not be able to grow our business.

Our revenues are derived from sales of our biometrics solutions. We cannot accurately predict the future growth rate or the size of the biometrics market. The expansion of the biometrics market and the market for our biometrics solutions depends on a number of factors, such as:

the cost, performance and reliability of our solutions and the products and services offered by our competitors;

customers' perceptions regarding the benefits of biometrics solutions;

the development and growth of demand for biometric solutions in markets outside of government and law enforcement;

public perceptions regarding the intrusiveness of these solutions and the manner in which organizations use the biometric information collected;

public perceptions regarding the confidentiality of private information;

proposed or enacted legislation related to privacy of information;

customers' satisfaction with biometrics solutions; and

marketing efforts and publicity regarding biometrics solutions.

Even if biometrics solutions gain wide market acceptance, our solutions may not adequately address market requirements and may not continue to gain market acceptance. If biometrics solutions generally or our solutions specifically do not gain wide market acceptance, we may not be able to achieve our anticipated level of growth and our revenues and results of operations would suffer.

Our financial results often vary significantly from quarter to quarter and may be negatively affected by a number of factors.

Since individual orders can represent a meaningful percentage of our revenues and net income in any single quarter, the deferral or cancellation of or failure to close a single order in a quarter can result in a revenue and net income shortfall that results in our failing to meet securities analysts' expectations for that period. We base our current and future expense levels on our internal operating plans and sales forecasts, and our operating costs are to a large extent fixed. As a result, we may not be able to sufficiently reduce our costs in any quarter to adequately compensate for an unexpected near-term shortfall in revenues, and even a small shortfall could disproportionately and adversely affect financial results for that quarter.

In addition, our financial results may fluctuate from quarter to quarter and be negatively affected by a number of factors, including the following:

the lack or reduction of government funding and the political, budgetary and purchasing constraints of our government agency customers;

Edgar Filing: Cogent, Inc. - Form 10-Q

the terms of customer contracts that affect the timing of revenue recognition;

the size and timing of our receipt of customer orders;

significant fluctuation in demand for our solutions;

price reductions or adjustments, new competitors, or the introduction of enhanced solutions from new or existing competitors;

cancellations, delays or contract amendments by government agency customers;

protests of federal, state or local government contract awards by competitors;

unforeseen legal expenses, including litigation and/or administrative protest costs;

the results of audits by government agencies;

expenses related to acquisitions or mergers;

potential effects of providing services as a prime contractor that may not carry gross margins as high as those of our core solutions;

impairment charges arising out of our assessments of goodwill and intangibles; and

other one-time financial charges.

Table of Contents

We face intense competition from other biometrics solutions providers, including diversified technology providers, alternative solutions providers and providers of biometric products.

A significant number of established companies have developed or are developing and marketing software and hardware for fingerprint biometrics products and applications that currently compete with or will compete directly with our offerings. Our offerings also compete with non-biometric technologies such as public key infrastructure solutions, smart card security solutions and traditional key, card surveillance and password systems. We believe that additional competitors will enter the biometrics market and become significant long-term competitors, and that, as a result, competition will increase. In certain instances, we compete with third parties who are also our suppliers or prime contractors. Companies competing with us may introduce solutions that are competitively priced, have increased performance or functionality or incorporate technological advances we have not yet developed or implemented. Our current principal competitors include:

diversified technology providers such as NEC and Safran Group (through its wholly owned subsidiary MorphoTrak) that offer integrated AFIS solutions to governments, law enforcement agencies and other organizations;

companies that are AFIS component providers, such as Cross Match Technologies and L-1 Identity Solutions;

prime government contractors that develop integrated information technology products and services that include biometrics-related solutions that are frequently delivered in partnership with diversified technology providers and biometrics-focused companies; and

companies focused on other fingerprint biometric solutions, such as AuthenTec, Dermalog and UPEK.

We expect competition to intensify in the near term in the biometrics market. Many current and potential competitors have substantially greater financial, marketing, research and manufacturing resources than we have. To compete effectively in this environment, we must continually develop and market new and enhanced solutions and technologies at competitive prices and must have the resources available to invest in significant research and development activities. Our failure to compete successfully could cause our revenues and market share to decline.

We are subject to extensive government regulation, and our failure to comply with applicable regulations could subject us to penalties that may restrict our ability to conduct our business.

We are affected by and must comply with various government regulations that impact our operating costs, profit margins and the internal organization and operation of our business. Furthermore, we may be audited to assure our compliance with these requirements. Our failure to comply with applicable regulations, rules and approvals could result in the imposition of penalties, the loss of our government contracts or our disqualification as a U.S. government contractor, all of which could adversely affect our business, financial condition and results of operations.

Among the most significant regulations affecting our business are:

the Federal Acquisition Regulations, or the FAR, and agency regulations supplemental to the FAR, which comprehensively regulate the formation and administration of, and performance under government contracts;

the Truth in Negotiations Act, which requires certification and disclosure of all cost and pricing data in connection with contract negotiations;

the Cost Accounting Standards, which impose accounting requirements that govern our right to reimbursement under cost-based government contracts;

the Foreign Corrupt Practices Act; and

laws, regulations and executive orders restricting the use and dissemination of information classified for national security purposes and the exportation of certain products and technical data.

These regulations affect how our customers and we can do business and, in some instances, impose added costs on our business. Any changes in applicable laws and regulations could restrict our ability to conduct our business. Any failure by us to comply with applicable laws and regulations could result in contract termination, price or fee reductions or suspension or debarment from contracting with the federal government generally.

Our lengthy and variable sales cycle will make it difficult to predict financial results.

Our AFIS solutions often require a lengthy sales cycle ranging from several months to sometimes over a year before we can receive approvals for purchase. The length of the sales cycle depends on the size and complexity of the solutions, the customer's budgeting process, the customer's in-depth evaluation of our solutions and a competitive bidding process. As a result, we may incur substantial expense before we earn associated revenues, since a significant portion of our operating expenses is relatively fixed. The lengthy sales cycles of our solutions make forecasting the volume and timing of sales difficult. In addition, the delays inherent in lengthy sales cycles raise additional risks that customers may cancel contracts or change their minds. If customer cancellations occur, they could result in the loss of anticipated sales without allowing us sufficient time to reduce our operating expenses.

Table of Contents

Security breaches in systems that we sell or maintain could result in the disclosure of sensitive government information or private personal information that could result in the loss of clients and negative publicity.

Many of the systems we sell manage private personal information and protect information involved in sensitive government functions. A security breach in one of these systems could cause serious harm to our business as a result of negative publicity and could prevent us from having further access to such systems or other similarly sensitive areas for other governmental clients.

As part of our service offerings, we agree from time to time to maintain and operate a portion of the AFIS systems of our customers on an outsourced web-based application hosting basis. Our ability to continue this service is subject to a number of risks. For example, our systems may be vulnerable to physical or electronic break-ins and service disruptions that could lead to interruptions, delays, loss of data or the inability to process user requests. If any such compromise of our security were to occur, it could be very expensive to cure, could damage our reputation and could discourage potential customers from using our services. Although we have not experienced attempted break-ins, we may experience such attempts in the future. Our systems may also be affected by outages, delays and other difficulties. Our insurance coverage may be insufficient to cover losses and liabilities that may result from such events.

If we are unable to continue to obtain U.S. government authorization regarding the export of our products, or if current or future export laws limit or otherwise restrict our business, we could be prohibited from shipping our products to certain countries, which could cause our business, financial condition and results of operations to suffer.

We must comply with U.S. laws regulating the export of our products. In some cases, explicit authorization from the U.S. government is needed to export our products. The export regimes and the governing policies applicable to our business are subject to changes. We cannot assure you that such export authorizations will be available to us or for our products in the future. In some cases where we act as a subcontractor, we rely upon the compliance activities of our prime contractors, and we cannot assure you that they have taken or will take all measures necessary to comply with applicable export laws. If we or our prime contractor partners cannot obtain required government approvals under applicable regulations, we may not be able to sell our products in certain international jurisdictions.

Failure to properly manage projects may result in costs or claims against us, and our financial results could be adversely affected.

Deployments of our solutions often involve large-scale projects. The quality of our performance on such projects depends in large part upon our ability to manage relationships with our customers and to effectively manage the projects and deploy appropriate resources, including our own project managers and third party subcontractors, in a timely manner. Any defects or errors or failures to meet clients' expectations could result in reputational damage or even claims for substantial monetary damages against us. In addition, we sometimes guarantee customers that we will complete a project by a scheduled date or that our solutions will achieve defined performance standards. If our solutions experience a performance problem, we may not be able to recover the additional costs we will incur in our remedial efforts, which could materially impair profit from a particular project. Moreover, 25% of our revenues in 2009 and 3% of our revenues for the three months ended March 31, 2010 were derived from fixed price contracts. Changes in the actual and estimated costs and time to complete fixed-price, time-certain projects may result in revenue adjustments for contracts where revenue is recognized under the percentage of completion method. Finally, if we miscalculate the amount of resources or time we need to complete a project for which we have agreed to capped or fixed fees, our financial results could be adversely affected.

The biometrics industry is characterized by rapid technological change and evolving industry standards, which could render our existing solutions obsolete.

Our future success will depend upon our ability to develop and introduce a variety of new capabilities and enhancements to our existing solutions in order to address the changing and sophisticated needs of the marketplace. Frequently, technical development programs in the biometrics industry require assessments to be made of the future direction of technology, which is inherently difficult to predict. Delays in introducing new products and enhancements, the failure to choose correctly among technical alternatives or the failure to offer innovative products or enhancements at competitive prices may cause customers to forego purchases of our solutions and purchase our competitors' solutions. We may not have adequate resources available to us or may not adequately keep pace with appropriate requirements in order to effectively compete in the marketplace.

We are dependent on our management team, particularly Ming Hsieh, our founder and Chief Executive Officer, and the loss of any key member of our team may impair our ability to operate effectively and may harm our business.

Our success depends largely upon the continued services of our executive officers and other key personnel, particularly Ming Hsieh, our founder and Chief Executive Officer. The relationships that our key managers have cultivated with our customers makes us particularly dependent upon

Edgar Filing: Cogent, Inc. - Form 10-Q

their continued employment with us. We are also substantially dependent on the continued services of our existing engineering and project management personnel because of the highly technical nature of our solutions. We do not have employment agreements with any of our executive officers or key personnel obligating them to provide us with continued services and

Table of Contents

therefore, they could terminate their employment with us at any time without penalty. We do not maintain key person life insurance policies on any of our employees. The loss of one or more members of our management team could seriously harm our business.

Termination of all or some of our backlog of orders could negatively affect our sales.

We record an item as backlog when we receive a contract, purchase order or other notification, such as an award document, indicating the specific products and/or services to be purchased, the purchase price, specifications and other customary terms and conditions. Our backlog includes deferred revenue reflected on our consolidated balance sheet. Further, we include in our backlog contracts that have been awarded but not yet signed or for which certain contract terms such as quantities or specifications have not yet been fully defined. For these awarded contracts, we have made assumptions based on best available information to estimate their values. There can be no assurance that any of the contracts comprising our backlog will result in actual revenue in any particular periods or that the actual revenue from such contracts will equal our backlog estimates. Furthermore, there can be no assurance that any contract included in our estimated backlog that actually generates revenue will be profitable. These estimates are based on our experience under such contracts and similar contracts and may not be accurate.

Loss of limited source suppliers may result in delays or additional expenses.

We obtain hardware components and complete products from a limited group of suppliers, and we do not have any long term agreements with any of these suppliers obligating them to continue to sell components or products to us. Our reliance on them involves significant risks, including reduced control over quality, price, and delivery schedules. Moreover, any financial instability of, or consolidation among, our manufacturers or contractors could result in our having to find new suppliers. We may experience significant delays in manufacturing and shipping our products to customers if we lose these sources or if the supplies from these sources are delayed, or are of poor quality or supplied in insufficient amounts. As a result, we may be required to incur additional development, manufacturing and other costs to establish alternative sources of supply. It may take several months to locate alternative suppliers, if required, or to re-tool our products to accommodate components from different suppliers. We cannot predict if we will be able to obtain replacement components within the time frames we require at an affordable cost, or at all. Any delays resulting from suppliers failing to deliver components or products on a timely basis, in sufficient quantities and of sufficient quality or any significant increase in the price of components from existing or alternative suppliers could disrupt our ability to meet customer demands or reduce our gross margins.

Our business could be adversely affected by negative audits by government agencies, and we could be required to reimburse the U.S. government for costs that we have expended on our contracts, and our ability to compete successfully for future contracts could be materially impaired.

Government agencies may audit us as part of their routine audits and investigations of government contracts. As part of an audit, these agencies may review our performance on contracts, cost structures and compliance with applicable laws, regulations and standards. These agencies may also review the adequacy of, and our compliance with, our internal control systems and policies, including our purchasing, property, estimating, compensation and management information systems. Furthermore, government audit standards have recently changed, and companies, like us, who work with government agencies have come under increased audit scrutiny. If any of our costs are found to be improperly allocated to a specific contract, the costs may not be reimbursed and any costs already reimbursed for such contract may have to be refunded. An audit could materially affect our competitive position and result in a material adjustment to our financial results or statement of operations. If a government agency audit uncovers improper or illegal activities, we may be subject to civil and criminal penalties and administrative sanctions, including termination of contracts, forfeiture of profits, suspension of payments, fines and suspension or debarment from doing business with the federal government. In addition, we could suffer serious reputational harm if allegations of impropriety were made against us. If we were suspended or debarred from contracting with the federal government generally, or if our reputation or relationships with government agencies were impaired, or if the government otherwise ceased doing business with us or significantly decreased the amount of business it does with us, our revenues and prospects would be materially harmed.

Any failure to protect our intellectual property rights could impair our ability to protect our proprietary technology which could have a material adverse effect on our business, financial condition and results of operations, and on our ability to compete effectively.

The core technology used in our products and solutions is not the subject of any patent protection, and we may be unable to obtain patent protection in the future. We rely primarily on trade secrets and confidentiality procedures to protect our proprietary technology, and cannot assure you that we will be able to enforce the patents we own effectively against third parties. Despite our efforts, these measures can only provide limited protection. Unauthorized third parties may try to copy or reverse engineer portions of our products or otherwise obtain and use our intellectual property. If we fail to protect our intellectual property rights adequately, our competitors may gain access to our technology, and our business would thus be harmed. In addition, defending our intellectual property rights may entail significant expense. Any of our trademarks or other intellectual property rights may be challenged by others or invalidated through administrative processes or litigation. In addition, our patents, or any patents that may be issued to us in the future, may not provide us with any competitive advantages, or may be challenged by third

parties. Furthermore, legal standards

Table of Contents

relating to the validity, enforceability and scope of protection of intellectual property rights are uncertain. Effective patent, trademark, copyright and trade secret protection may not be available to us in every country in which we market our solutions. The laws of some foreign countries may not be as protective of intellectual property rights as those in the United States, and domestic and international mechanisms for enforcement of intellectual property rights may be inadequate. Accordingly, despite our efforts, we may be unable to prevent third parties from infringing upon or misappropriating our intellectual property or otherwise gaining access to our technology.

We may be required to expend significant resources to monitor and protect our intellectual property rights. We may initiate claims or litigation against third parties for infringement of our proprietary rights or to establish the validity of our proprietary rights. Any such litigation, whether or not it is ultimately resolved in our favor, could result in significant expense to us and divert the efforts of our technical and management personnel. For example, in April 2005 we initiated a lawsuit against Northrop Grumman which asserted that Northrop caused us harm by misappropriating our trade secrets. Our management devoted a significant amount of time to, and we spent a significant amount of funds in connection with, this lawsuit, which was settled in 2007.

We may be sued by third parties for alleged infringement of their proprietary rights.

As the size of our market increases, the likelihood of an intellectual property claim against us increases. Our technologies may not be able to withstand third-party claims against their use. Any intellectual property claims, with or without merit, could be time-consuming and expensive to litigate or settle, and could divert management attention away from the execution of our business plan. In addition, we may be required to indemnify our customers for third-party intellectual property infringement claims, which would increase the cost to us of an adverse ruling in such a claim. An adverse determination could also prevent us from offering our solutions to others.

Ming Hsieh controls a significant amount of our outstanding stock, and this may delay or prevent a change of control of our company or adversely affect our stock price.

Ming Hsieh, our Chief Executive Officer, controlled a significant amount of our outstanding common stock as of March 31, 2010. As a result, he is able to substantially influence matters requiring stockholder approval, such as the election of directors and the approval of significant corporate transactions. These types of transactions include transactions involving an actual or potential change of control of our company or other transactions that other stockholders may deem to be in their best interests and in which such stockholders could receive a premium for their shares.

Because competition for highly qualified project managers and technical personnel is intense, we may not be able to attract and retain the managers we need to support our business plan.

To execute our business plan, we must attract and retain highly qualified project managers. Competition for hiring these managers is intense, especially with regard to engineers with high levels of experience in designing, developing and integrating biometrics solutions. We may not be successful in attracting and retaining qualified managers. Many of the companies with which we compete for hiring experienced managers have greater resources than we have. In addition, in making employment decisions, particularly in the Internet and high-technology industries, job candidates often consider the value of the equity incentives they are to receive in connection with their employment. Significant volatility in the price of our stock may, therefore, adversely affect our ability to attract or retain key managers. If we fail to attract new personnel or fail to retain and motivate our current managers, our business and future growth prospects could be severely harmed.

Competition for skilled personnel in our industry is intense and companies such as ours sometimes experience high attrition rates with regard to their skilled employees. In addition, we often must comply with provisions in federal government contracts that require employment of persons with specified levels of education and work experience. The loss of any significant number of our existing key technical personnel or our inability to attract and retain key technical employees in the future could have a material adverse effect on both our ability to win new business and our financial results.

International uncertainties and fluctuations in the value of foreign currencies could harm our profitability.

In 2009 and for the three months ended March 31, 2010, revenues outside of the Americas accounted for approximately 16% and 11%, respectively, of our total revenues. We also currently have international operations, including offices in Austria, Canada, China, Taiwan and the United Kingdom. Our international revenues and operations are subject to a number of material risks, including, but not limited to:

Edgar Filing: Cogent, Inc. - Form 10-Q

difficulties in building and managing foreign operations;

regulatory uncertainties in foreign countries;

difficulties in enforcing agreements and collecting receivables through foreign legal systems and other relevant legal issues;

longer payment cycles;

Table of Contents

foreign and U.S. taxation issues;

potential weaknesses in foreign economies;

fluctuations in the value of foreign currencies;

general economic and political conditions in the markets in which we operate; and

unexpected domestic and international regulatory, economic or political changes.

Fluctuations in the value of foreign currencies relative to the U.S. dollar may, in some locations, make our solutions more expensive than solutions offered by our competitors. This would make our solutions less price competitive, which could harm our business. We do not currently engage in currency hedging activities to limit the risks of currency fluctuations. Therefore, fluctuations in the value of foreign currencies could harm our profitability.

If biometrics solutions and products based on biometrics other than fingerprints become predominant or more significant in the biometrics market, our business, financial condition and results of operations could suffer materially.

Our current business and products are based primarily on fingerprint biometrics. It is possible that other biometrics solutions could become predominant or more significant in the future, such as biometrics based on face or iris recognition. In such event, we cannot assure you that we would be able to develop and market successful products and solutions based on these other biometrics or that any such products or solutions we develop would be as successful as our fingerprint biometric solutions.

Our products and solutions could have unknown defects or errors, which may give rise to claims against us or divert application of our resources from other purposes.

Products and solutions as complex as those we offer frequently develop or contain undetected defects or errors. Despite testing, defects or errors may arise in our existing or new products and solutions, which could result in loss of revenue or market share, failure to achieve market acceptance, diversion of development resources, injury to our reputation and increased service and maintenance costs. Defects or errors in our products and solutions might discourage customers from purchasing future products and services.

Potential future acquisitions could be difficult to integrate, divert the attention of key management personnel, disrupt our business, dilute stockholder value and adversely affect our financial results.

As part of our business strategy, we intend to consider acquisitions of companies, technologies and products that we feel could accelerate our ability to compete in our core markets or allow us to enter new markets. Acquisitions involve numerous risks, including:

difficulties in integrating operations, technologies, accounting and personnel;

difficulties in supporting and transitioning customers of our acquired companies;

diversion of financial and management resources from existing operations;

risks of entering new markets;

potential loss of key employees; and

inability to generate sufficient revenues to offset acquisition costs.

Acquisitions also frequently result in the recording of goodwill and other intangible assets which are subject to potential impairments in the future that could harm our financial results. In addition, if we finance acquisitions by issuing convertible debt or equity securities, our existing stockholders may be diluted, which could affect the market price of our stock. As a result, if we fail to properly evaluate acquisitions or investments, we may not achieve the anticipated benefits of any such acquisitions, and we may incur costs in excess of what we anticipate.

Our charter documents and Delaware law may deter potential acquirers of our business and may thus depress our stock price.

Our amended and restated certificate of incorporation and our bylaws contain provisions that could delay or prevent a change of control of our company that our stockholders might consider favorable. In addition, we are governed by the provisions of Section 203 of the Delaware General Corporation Law, which may discourage, delay or prevent certain business combinations with stockholders owning 15% or more of our outstanding voting stock. These and other provisions in our charter documents may make it more difficult for stockholders or potential acquirers to initiate actions that are opposed by the then-current board of directors, including delaying or impeding a merger, tender offer, or proxy contest or other change of control transaction involving our company. Any delay or prevention of a change of control transaction could cause stockholders to lose a substantial premium over the then current market price of their shares.

Table of Contents

The trading price of our common stock is volatile.

The trading prices of the securities of technology companies have historically been highly volatile. Accordingly, the trading price of our common stock is likely to be subject to wide fluctuations. Factors affecting the trading price of our common stock may include:

variations in our financial results;

announcements of technological innovations, new solutions, strategic alliances or significant agreements by us or by our competitors;

recruitment or departure of key personnel;

changes in the estimates of our financial results or changes in the recommendations of any securities analysts that elect to follow our common stock; and

market conditions in our industry, the industries of our customers and the economy as a whole.

In addition, if the market for biometrics or other technology stocks or the stock market in general experiences continued or greater loss of investor confidence, the trading price of our common stock could decline for reasons unrelated to our business or financial results. The trading price of our common stock might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us.

Future sales of shares by existing stockholders could cause our stock price to decline.

All of our outstanding shares are eligible for sale in the public market, subject in certain cases to volume limitations under Rule 144 of the Securities Act of 1933, as amended. Also, shares subject to outstanding options and rights under our 2000 Stock Option Plan and 2004 Equity Incentive Plan are eligible for sale in the public market to the extent permitted by the provisions of various vesting agreements and Rules 144 and 701 under the Securities Act. If these shares are sold, or if it is perceived that they will be sold in the public market, the trading price of our common stock could decline.

In addition, Ming Hsieh, who was our sole stockholder prior to our initial public offering, continues to hold a substantial number of shares of our common stock. Sales by Mr. Hsieh of a substantial number of shares, or the expectation that such sales may occur, could significantly reduce the market price of our common stock.

If we fail to maintain an effective system of internal controls, we may not be able to accurately report our financial results. As a result, current and potential stockholders could lose confidence in our financial reporting, which would harm our business.

Effective internal controls are necessary for us to provide reliable financial reports. If we cannot provide reliable financial reports, our operating results could be misstated, our reputation may be harmed and the trading price of our stock could be negatively affected. There can be no assurance that our controls over financial processes and reporting will be effective in the future.
