Various inputs are used in determining the value of the fund's investments relating to Financial Accounting Standard No. 157 (FAS 157),

Fair Value Measurements.

These inputs are summarized in the three broad levels listed below.

Level 1 - quoted prices in active markets for identical investments.

Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speed credit risk, etc.)

Level 3 - significant unobservable inputs (including fund's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of June 30, 2009 in valuing the fund's investments:

			Level 3 -	
	Level 1 -	Level 2 - Other	Significant	
	Quoted	Significant Observable	Unobservable	
Assets (\$)	Prices	Inputs	Inputs	Total
Investments in Securities:				
Municipal Bonds	-	273,808,493	-	273,808,493
Other Financial Instruments+	-	-	-	-
Liabilities (\$)				
Other Financial Instruments+	-	-	-	-

Other financial instruments include derivative instruments, such as futures, forward currency exchange contracts, swap contracts and options contracts. Amounts shown represents unrealized appreciation (depreciation), or in the case of options, market value at period end.

The fund adopted Statement of Financial Accounting Standards No. 161 Disclosures about Derivative Instruments and Hedging Activities (FAS 161). FAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments and disclosures about credit-risk-related contingent features in derivative agreements. Since the fund held no derivatives during the period, FAS 161 disclosures did not impact the notes to the financial statements.

Portfolio valuation: Investments in municipal debt securities are valued on the last business day of each week and month by an independent pricing service (the Service) approved by the Board of Directors. Investments for which quoted bid prices are readily available and are representative of the bid side of the market in the judgment of the Service are valued at the mean between the quoted bid prices (as obtained by the Service from dealers in such securities) and asked prices (as calculated by the Service based upon its evaluation of the market for such securities). Other investments (which constitute a majority of the portfolio securities) are carried at fair value as determined by the Service, based on methods which include consideration of: yields or prices of municipal securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. Options and financial futures on municipal and U.S. Treasury securities are valued at the last sales price on the securities exchange on which such securities are primarily traded or at the last sales price on the national securities market on the last business day of each week and month.

Additional investment related disclosures are hereby incorporated by reference to the annual and semi-annual reports previously filed with the Securities and Exchange Commission on Form N-CSR.
