THE MIDDLEBY CORPORATION AND SUBSIDIARIES  
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

March 30, 2013

(Unaudited)

1) Summary of Significant Accounting  
Policies

A) Basis of Presentation

The condensed consolidated financial statements have been prepared by The Middleby Corporation (the "company" or "Middleby"), pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements are unaudited and certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations, although the company believes that the disclosures are adequate to make the information not misleading. These financial statements should be read in conjunction with the financial statements and related notes contained in the company's 2012 Form 10-K. The company's interim results are not necessarily indicative of future full year results for the fiscal year 2013.

In the opinion of management, the financial statements contain all adjustments necessary to present fairly the financial position of the company as of March 30, 2013 and December 29, 2012, and the results of operations for the three months ended March 30, 2013 and March 31, 2012 and cash flows for the three months ended March 30, 2013 and March 31, 2012.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the company to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses. Significant estimates and assumptions are used for, but are not limited to, allowances for doubtful accounts, reserves for excess and obsolete inventories, long lived and intangible assets, warranty reserves, insurance reserves, income tax reserves and post-retirement obligations. Actual results could differ from the company's estimates.

B) Non-Cash Share-Based Compensation

The company estimates the fair value of market-based stock awards and stock options at the time of grant and recognizes compensation cost over the vesting period of the awards and options. Non-cash share-based compensation expense was \$3.0 million and \$2.7 million for the first quarter periods ended March 30, 2013 and March 31, 2012, respectively.

C) Income Taxes

As of December 29, 2012, the total amount of liability for unrecognized tax benefits related to federal, state and foreign taxes was approximately \$12.1 million (of which \$10.4 million would impact the effective tax rate if recognized) plus approximately \$1.6 million of accrued interest and \$1.6 million of penalties. The company recognizes interest and penalties accrued related to unrecognized tax benefits in income tax expense. As of March 30, 2013, there were no significant changes in the total amount of liability for unrecognized tax benefits.

It is reasonably possible that the amounts of unrecognized tax benefits associated with state, federal and foreign tax positions may decrease over the next twelve months due to expiration of a statute or completion of an audit. The company believes that it is reasonably possible that approximately \$0.8 million of its currently remaining unrecognized tax benefits may be recognized over the next twelve months as a result of lapses of statutes of limitations.

A summary of the tax years that remain subject to examination in the company's major tax jurisdictions are:

United States - federal	2008 – 2012
United States - states	2004 – 2012
Australia	2011 – 2012
Brazil	2010 – 2012
Canada	2009 – 2012
China	2003 – 2012
Denmark	2009 – 2012
France	2011 – 2012
Germany	2011 – 2012
Italy	2009 – 2012
Luxembourg	2011 – 2012
Mexico	2007 – 2012

South Korea	2006 – 2012
Spain	2008 – 2012
Taiwan	2008 – 2012
United Kingdom	2008 – 2012

## D) Fair Value Measures

ASC 820 "Fair Value Measurements and Disclosures" defines fair value as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 establishes a fair value hierarchy, which prioritizes the inputs used in measuring fair value into the following levels:

Level 1 – Quoted prices in active markets for identical assets or liabilities.

Level 2 – Inputs, other than quoted prices in active markets, that are observable either directly or indirectly.

Level 3 – Unobservable inputs based on our own assumptions.

The company's financial assets and liabilities that are measured at fair value and are categorized using the fair value hierarchy are as follows (in thousands):

	Fair Value Level 1	Fair Value Level 2	Fair Value Level 3	Total
As of March 30, 2013				
Financial Assets:				
Pension plans	\$24,346	\$935	—	\$25,281
Financial Liabilities:				
Interest rate swaps	—	\$3,369	—	\$3,369
Contingent consideration	—	—	\$8,210	\$8,210
As of December 29, 2012				
Financial Assets:

Financial Liabilities:				
Interest rate swaps	—	\$2,853	—	\$2,853
Contingent consideration	—	—	\$8,609	\$8,609

The contingent consideration relates to the earnout provisions recorded in conjunction with the acquisitions of CookTek, Danfotech, Stewart and Nieco.

## E) Consolidated Statements of Cash Flows

Cash paid for interest was \$3.1 million and \$1.9 million for the three months ended March 30, 2013 and March 31, 2012, respectively. Cash payments totaling \$8.4 million and \$10.5 million were made for income taxes for the three months ended March 30, 2013 and March 31, 2012, respectively.

## 2) Acquisitions and Purchase Accounting

The company operates in a highly fragmented industry and has completed numerous acquisitions over the past several years as a component of its growth strategy. The company has acquired industry leading brands and technologies to position itself as a leader in the commercial foodservice equipment and food processing equipment industries.

The company has accounted for all business combinations using the acquisition method to record a new cost basis for the assets acquired and liabilities assumed. The difference between the purchase price and the fair value of the assets acquired and liabilities assumed has been recorded as goodwill in the financial statements. The results of operations are reflected in the consolidated financial statements of the company from the date of acquisition.

## Stewart

On September 5, 2012, the company completed its acquisition of certain assets of Stewart Systems Global, LLC ("Stewart"), a manufacturer of automated proofing and oven baking systems for the food processing industry, for a purchase price of approximately \$27.8 million. An additional payment is also payable upon the achievement of certain financial targets. The purchase price is subject to adjustment based upon a working capital provision within the purchase agreement. The company expects to finalize this in the second quarter of 2013.

The following estimated fair values of assets acquired and liabilities assumed are provisional and are based on the information that was available as of the acquisition date to estimate the fair value of assets acquired and liabilities assumed (in thousands):

The company believes that information gathered to date provides a reasonable basis for estimating the fair values of assets acquired and liabilities assumed but the company is waiting for additional information necessary to finalize those fair values. Thus, the provisional measurements of fair value set forth above are subject to change. The company expects to complete the purchase price allocation as soon as practicable but no later than one year from the acquisition date.

The Stewart purchase agreement includes an earnout provision providing for a contingent payment due the sellers to the extent certain financial targets are exceeded. This earnout is payable within the first quarters of 2014 and 2015, respectively, if Stewart exceeds certain sales and earnings targets for fiscal 2013 and 2014. The contractual obligation associated with the contingent earnout provision recognized on the acquisition date is \$4.0 million.

Also, the pro forma financial information does not reflect the costs which the company has incurred or may incur to integrate Viking. The proforma information for the quarter ended March 31, 2012 is materially consistent with the actual 2013 quarter results.

Excluding Viking, other acquisitions were not material to the proforma information provided.

## 3)Litigation Matters

From time to time, the company is subject to proceedings, lawsuits and other claims related to products, suppliers, employees, customers and competitors. The company maintains insurance to partially cover product liability, workers compensation, property and casualty, and general liability matters. The company is required to assess the likelihood of any adverse judgments or outcomes to these matters as well as potential ranges of probable losses. A determination of the amount of accrual required, if any, for these contingencies is made after assessment of each matter and the related insurance coverage. The accrual requirement may change in the future due to new developments or changes in approach such as a change in settlement strategy in dealing with these matters. The company does not believe that any pending litigation will have a material effect on its financial condition, results of operations or cash flows.

## 4)Recently Issued Accounting Standards

On July 27, 2012, the FASB issued ASU 2012-02, "Intangibles - Goodwill and Other (Topic 350)". Similar to ASU 2011-08, this ASU amends the guidance in ASC 350-30. While ASU 2011-08 allows an entity the option to make a qualitative evaluation about the likelihood of goodwill impairment to determine whether it should calculate the fair value of a reporting unit, ASU-2012-02 allows an entity the option to make a qualitative evaluation to determine whether the existence of events and circumstances indicate that it is more likely than not the indefinite-lived intangible asset is impaired thus requiring the entity to perform quantitative impairment tests in accordance with ASC 350-30. The ASU also amends previous guidance by expanding upon the examples of events and circumstances that an entity should consider when making the qualitative evaluation. The adoption of this guidance did not have an impact on the company's financial position, results of operations or cash flows.

In January 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2013-01, "Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities". This update provides clarification on the disclosure requirements related to recognized derivatives, repurchase agreements and reverse purchase agreements, and securities borrowing and lending transactions. This update is effective for interim and annual reporting periods beginning on or after January 1, 2013, and retrospective application is required. The company does not expect that the adoption of the provisions of ASU No. 2013-01 will have a material impact to the company's financial position, results of operations or cash flows.

In March 2013, the FASB issued ASU No. 2013-02, "Comprehensive Income - Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income". ASU No. 2013-02 requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. Additionally, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income. The guidance does not change the items reported in other comprehensive income or when an item of other comprehensive income is reclassified to net income. The company adopted the provisions of ASU No. 2013-02 on December 20, 2012. As this guidance only revises the presentation of comprehensive income, there was no impact to the company's financial position, results of operations or cash flows.

#### 5) Other Comprehensive Income

The company reports changes in equity during a period, except those resulting from investments by owners and distributions to owners, in accordance with ASC 220, "Comprehensive Income."

Changes in accumulated other comprehensive income(1) were as follows (in thousands):

Comprehensive income	21,078	28,094

## 6)Inventories

Inventories are composed of material, labor and overhead and are stated at the lower of cost or market. Costs for inventories at two of the company's manufacturing facilities have been determined using the last-in, first-out ("LIFO") method. These inventories under the LIFO method amounted to \$23.1 million at March 30, 2013 and \$22.2 million at December 29, 2012 and represented approximately 12.4% and 14.5% of the total inventory in each respective period. The amount of LIFO reserve at March 30, 2013 and December 29, 2012 was not material. Costs for all other inventory have been determined using the first-in, first-out ("FIFO") method. The company estimates reserves for inventory obsolescence and shrinkage based on its judgment of future realization. Inventories at March 30, 2013 and December 29, 2012 are as follows:

	Mar 30, 2013 (in thousands)	Dec 29, 2012
Raw materials and parts	\$104,120	\$87,184
Work-in-process	27,290	18,957

Other accrued expenses	35,186	17,919
	\$199,479	\$170,932

## 9) Warranty Costs

In the normal course of business the company issues product warranties for specific product lines and provides for the estimated future warranty cost in the period in which the sale is recorded. The estimate of warranty cost is based on contract terms and historical warranty loss experience that is periodically adjusted for recent actual experience.

Because warranty estimates are forecasts that are based on the best available information, actual claims costs may differ from amounts provided. Adjustments to initial obligations for warranties are made as changes in the obligations become reasonably estimable.

A rollforward of the warranty reserve is as follows:

	Three Months Ended Mar 30, 2013 (in thousands)
Beginning balance	\$17,593
Warranty reserve related to acquisitions	3,951
Warranty expense	8,493
Warranty claims	(10,897)
Ending balance	\$19,140

## 10) Financing Arrangements

	Mar 30, 2013 (in thousands)	Dec 29, 2012
Senior secured revolving credit line	\$635,000	\$256,500
Foreign loans	3,082	3,220
Other debt arrangement	344	350
Total debt	\$638,426	\$260,070
Less: Current maturities of long-term debt	1,669	1,850
Long-term debt	\$636,757	\$258,220

On August 7, 2012, the company entered into a new senior secured multi-currency credit facility. Terms of the company's senior credit agreement provide for \$1.0 billion of availability under a revolving credit line. As of March 30, 2013, the company had \$635.0 million of borrowings outstanding under this facility. The company also had \$9.5 million in outstanding letters of credit as of March 30, 2013, which reduces the borrowing availability under the revolving credit line. Remaining borrowing availability under this facility was \$355.5 million at March 30, 2013.

At March 30, 2013, borrowings under the senior secured credit facility are assessed at an interest rate of 1.75% above LIBOR for long-term borrowings or at the higher of the Prime rate and the Federal Funds Rate. At March 30, 2013 the average interest rate on the senior debt amounted to 1.44%. The interest rates on borrowings under the senior secured credit facility may be adjusted quarterly based on the company's indebtedness ratio on a rolling four-quarter basis.

Additionally, a commitment fee based upon the indebtedness ratio is charged on the unused portion of the revolving credit line. This variable commitment fee amounted to 0.23% as of March 30, 2013.

In August 2006, the company completed its acquisition of Houno A/S in Denmark. This acquisition was funded in part with locally established debt facilities with borrowings in Danish Krone. On March 30, 2013 these facilities amounted to \$1.6 million in U.S. dollars, including \$0.1 million outstanding under a revolving credit facility and \$1.5 million of a term loan. The interest rate on the revolving credit facility is assessed at 1.25% above Euro LIBOR, which amounted to 2.80% on March 30, 2013. The term loan matures in 2022 and the interest rate is assessed at 4.55%.

In April 2008, the company completed its acquisition of Giga Grandi Cucine S.r.l in Italy. This acquisition was funded in part with locally established debt facilities with borrowings denominated in Euro. On March 30, 2013 these facilities amounted to \$1.5 million in U.S. dollars. The interest rate on the credit facilities is variable based on the three-month Euro LIBOR. At March 30, 2013, the average interest rate on these facilities was approximately 4.52%. The facilities mature in April 2013.

The company's debt is reflected on the balance sheet at cost. Based on current market conditions, the company believes its interest rate margins on its existing debt are consistent with current market conditions and therefore the carrying value of debt reflects fair value. However, as the interest rate margin is based upon numerous factors, including but not limited to the credit rating of the borrower, the duration of the loan, the structure and restrictions under the debt agreement, current lending policies of the counterparty, and the company's relationships with its lenders, there is no readily available market data to ascertain the current market rate for an equivalent debt instrument. As a result, the current interest rate margin is based upon the company's best estimate based upon discussions with its lenders.

The company estimated the fair value of its loans by calculating the upfront cash payment a market participant would require to assume the company's obligations. The upfront cash payment is the amount that a market participant would be able to lend at March 30, 2013 to achieve sufficient cash inflows to cover the cash outflows under the company's senior revolving credit facility assuming the facility was outstanding in its entirety until maturity. Since the company maintains its borrowings under a revolving credit facility and there is no predetermined borrowing or repayment schedule, for purposes of this calculation the company calculated the fair value of its obligations assuming the current amount of debt at the end of the period was outstanding until the maturity of the company's senior revolving credit facility in August 2017. Although borrowings could be materially greater or less than the current amount of borrowings outstanding at the end of the period, it is not practical to estimate the amounts that may be outstanding during future periods. The carrying value and estimated aggregate fair value, a level 2 measurement, based primarily on market prices, of debt is as follows (in thousands):

	Mar 30, 2013		Dec 29, 2012	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Total debt	\$638,426	\$638,426	\$260,070	\$260,070

The company believes that its current capital resources, including cash and cash equivalents, cash generated from operations, funds available from its current lenders and access to the credit and capital markets will be sufficient to finance its operations, debt service obligations, capital expenditures, product development and expenditures for the foreseeable future.

The company has historically entered into interest rate swap agreements to effectively fix the interest rate on a portion of its outstanding debt. The agreements swap one-month LIBOR for fixed rates. As of March 30, 2013 the company had the following interest rate swaps in effect:

Notional Amount	Fixed Interest Rate	Effective Date	Maturity Date
\$25,000,000	1.610%	02/23/11	02/24/14
\$25,000,000	2.520%	02/23/11	02/23/16
\$25,000,000	0.975%	07/18/11	07/18/14
\$15,000,000	1.185%	09/12/11	09/12/16
\$15,000,000	0.620%	09/12/11	09/11/14
\$10,000,000	0.498%	02/11/13	07/11/15
\$15,000,000	0.458%	02/11/13	10/11/15
\$25,000,000	0.635%	02/11/13	08/11/16
\$25,000,000	0.789%	02/11/13	03/11/17
\$25,000,000	0.803%	02/11/13	05/11/17
\$35,000,000	0.880%	02/11/13	07/11/17

The terms of the senior secured credit facility limit the ability of the company and its subsidiaries to, with certain exceptions: incur indebtedness; grant liens; engage in certain mergers, consolidations, acquisitions and dispositions; make restricted payments; and enter into certain transactions with affiliates; and require, among other things, a maximum ratio of indebtedness to EBITDA of 3.5 and a fixed charge coverage ratio (as defined in the senior secured credit facility) of 1.25. The senior secured credit facility is secured by substantially all of the assets of Middleby Marshall, the company and the company's domestic subsidiaries and is unconditionally guaranteed by, subject to certain exceptions, the company and certain of the company's direct and indirect material domestic subsidiaries. The senior secured credit facility contains certain customary events of default, including, but not limited to, the failure to make required payments; bankruptcy and other insolvency events; the failure to perform certain covenants; the material breach of a representation or warranty; non-payment of certain other indebtedness; the entry of undischarged judgments against the company or any subsidiary for the payment of material uninsured amounts; the invalidity of the Company guarantee or any subsidiary guaranty; and a change of control of the company. The credit agreement also provides that if a material adverse change in the company's business operations or conditions occurs, the lender could declare an event of default. Under terms of the agreement, a material adverse effect is defined as (a) a material adverse change in, or a material adverse effect upon, the operations, business properties, condition (financial and otherwise) or prospects of the company and its subsidiaries taken as a whole; (b) a material impairment of the ability of the company to perform under the loan agreements and to avoid any event of default; or (c) a material adverse effect upon the legality, validity, binding effect or enforceability against the company of any loan document. A material adverse effect is determined on a subjective basis by the company's creditors. At March 30, 2013, the company was in compliance with all covenants pursuant to its borrowing agreements.

#### 11) Financial Instruments

ASC 815 "Derivatives and Hedging" requires an entity to recognize all derivatives as either assets or liabilities and measure those instruments at fair value. Derivatives that do not qualify as a hedge must be adjusted to fair value in earnings. If a derivative does qualify as a hedge under ASC 815, changes in the fair value will either be offset against the change in the fair value of the hedged assets, liabilities or firm commitments or recognized in other accumulated comprehensive income until the hedged item is recognized in earnings. The ineffective portion of a hedge's change in fair value will be immediately recognized in earnings.

Foreign Exchange: The company uses foreign currency forward purchase and sale contracts with terms of less than one year to hedge its exposure to changes in foreign currency exchange rates. The company's primary hedging activities are to mitigate its exposure to changes in exchange rates on intercompany and third party trade receivables and payables. The company does not currently enter into derivative financial instruments for speculative purposes. In managing its foreign currency exposures, the company identifies and aggregates naturally occurring offsetting positions and then hedges residual balance sheet exposures. The following table summarizes the forward contracts outstanding at March 30, 2013. The fair value of the forward contracts was a liability of \$0.2 million at the end of the first quarter of 2013.

Sell		Purchase		Maturity
25,000,000	British Pounds	29,393,738	Euro Dollars	June 28, 2013
22,000,000	Euro Dollars	28,302,400	US Dollars	June 28, 2013

Interest Rate: The company has entered into interest rate swaps to fix the interest rate applicable to certain of its variable-rate debt. The agreements swap one-month LIBOR for fixed rates. The company has designated these swaps as cash flow hedges and all changes in fair value of the swaps are recognized in accumulated other comprehensive income. As of March 30, 2013, the fair value of these instruments was a liability of \$3.4 million. The change in fair value of these swap agreements in the first three months of 2013 was a loss of \$0.5 million, net of taxes.

The following tables summarize the company's fair value of interest rate swaps (in thousands):

Interest rate swaps are subject to default risk to the extent the counterparties are unable to satisfy their settlement obligations under the interest rate swap agreements. The company reviews the credit profile of the financial institutions and assesses its creditworthiness prior to entering into the interest rate swap agreements. The interest rate swap agreements typically contain provisions that allow the counterparty to require early settlement in the event that the company becomes insolvent or is unable to maintain compliance with its covenants under its existing debt agreements.

**OPERATING ACTIVITIES.** Net cash provided by operating activities was \$13.5 million for the three months ended March 30, 2013 compared to \$10.8 million for the three months ended March 31, 2012 due primarily to increased earnings.

During the three months ended March 30, 2013, working capital levels changed due to increased working capital needs. These changes in working capital levels included a \$13.2 million increase in inventory, due to several factors including increased order rates, increased inventory levels during build out periods in conjunction with plant consolidation efforts and higher levels of stock associated with foreign sourcing initiatives. Accounts receivable increased \$8.6 million due to increased sales volume and higher receivable balances at the Food Processing Equipment Group resulting from the timing of projects. Changes in working capital levels also included a \$5.5 million increase in prepaid expenses and other assets primarily related to the timing of orders at the Food Processing Equipment Group, an \$0.9 million decrease in accounts payable due to the timing of vendor payments and a \$2.2 million decrease in accrued expenses and other non-current liabilities primarily related to the payment of 2012 annual rebate programs.

**INVESTING ACTIVITIES.** During the three months ended March 30, 2013, net cash used in investing activities included \$377.8 million related to the 2013 acquisition of Viking and Stewart along with \$3.9 million of additions and upgrades of production equipment and manufacturing facilities.

The company used \$1.1 million to repurchase 13,480 shares of its common stock that were surrendered to the company by employees in lieu of cash for payment for withholding taxes related to restricted stock vestings and stock option exercises that occurred during the three months ended March 30, 2013.

At March 30, 2013, the company was in compliance with all covenants pursuant to its borrowing agreements. The company believes that its current capital resources, including cash and cash equivalents, cash generated from operations, funds available from its revolving credit facility and access to the credit and capital markets will be sufficient to finance its operations, debt service obligations, capital expenditures, acquisitions, product development and integration expenditures for the foreseeable future.

#### Recently Issued Accounting Standards

On July 27, 2012, the FASB issued ASU 2012-02, "Intangibles - Goodwill and Other (Topic 350)". Similar to ASU 2011-08, this ASU amends the guidance in ASC 350-30. While ASU 2011-08 allows an entity the option to make a qualitative evaluation about the likelihood of goodwill impairment to determine whether it should calculate the fair value of a reporting unit, ASU-2012-02 allows an entity the option to make a qualitative evaluation to determine whether the existence of events and circumstances indicate that it is more likely than not the indefinite-lived intangible asset is impaired thus requiring the entity to perform quantitative impairment tests in accordance with ASC 350-30. The ASU also amends previous guidance by expanding upon the examples of events and circumstances that an entity should consider when making the qualitative evaluation. The adoption of this guidance did not have an impact on the company's financial position, results of operations or cash flows.

In January 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2013-01, "Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities". This update provides clarification on the disclosure requirements related to recognized derivatives, repurchase agreements and reverse purchase agreements, and securities borrowing and lending transactions. This update is effective for interim and annual reporting periods beginning on or after January 1, 2013, and retrospective application is required. The company does not expect that the adoption of the provisions of ASU No. 2013-01 will have a material impact to the company's financial position, results of operations or cash flows.

In March 2013, the FASB issued ASU No. 2013-02, "Comprehensive Income - Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income". ASU No. 2013-02 requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. Additionally, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income. The guidance does not change the items reported in other comprehensive income or when an item of other comprehensive income is reclassified to net income. The company adopted the provisions of ASU No. 2013-02 on December 20, 2012. As this guidance only revises the presentation of comprehensive income, there was no impact to the company's financial position, results of operations or cash flows.

#### Critical Accounting Policies and Estimates

Management's discussion and analysis of financial condition and results of operations are based upon the company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires the company to make significant estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses as well as related disclosures. On an ongoing basis, the company evaluates its estimates and judgments based on historical experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions and any such differences could be material to our consolidated financial statements.

**Revenue Recognition.** At the Commercial Foodservice Group, the company recognizes revenue on the sale of its products when risk of loss has passed to the customer, which occurs at the time of shipment, and collectibility is reasonably assured. The sale prices of the products sold are fixed and determinable at the time of shipment. Sales are reported net of sales returns, sales incentives and cash discounts based on prior experience and other quantitative and qualitative factors. Such revenue was approximately 60% for the three month period ended March 30, 2013.

At the Food Processing Equipment Group, the company enters into long-term sales contracts for certain products that are often significant relative to the business. Revenue under these long-term sales contracts is recognized using the percentage of completion method defined within ASC 605-35 “Construction-Type and Production-Type Contracts” due to the length of time to fully manufacture and assemble the equipment. The company measures revenue recognized based on the ratio of actual labor hours incurred in relation to the total estimated labor hours to be incurred related to the contract. Because estimated labor hours to complete a project are based upon forecasts using the best available information, the actual hours may differ from original estimates. The percentage of completion method of accounting for these contracts most accurately reflects the status of these uncompleted contracts in the company's financial statements and most accurately measures the matching of revenues with expenses. At the time a loss on a contract becomes known, the amount of the estimated loss is recognized in the consolidated financial statements. Revenue for sales of products and services not covered by long-term sales contracts are recognized when risk of loss has passed to the customer, which occurs at the time of shipment, and collectibility is reasonably assured. The sale prices of the products sold are fixed and determinable at the time of shipment. Sales are reported net of sales returns, sales incentives and cash discounts based on prior experience and other quantitative and qualitative factors.

**Inventories.** Inventories are stated at the lower of cost or market using the first-in, first-out method for the majority of the company's inventories. The company evaluates the need to record valuation adjustments for inventory on a regular basis. The company's policy is to evaluate all inventories including raw material, work-in-process, finished goods, and spare parts. Inventory in excess of estimated usage requirements is written down to its estimated net realizable value. Inherent in the estimates of net realizable value are estimates related to our future manufacturing schedules, customer demand, possible alternative uses, and ultimate realization of potentially excess inventory.

**Goodwill and Other Intangibles.** The company's business acquisitions result in the recognition of goodwill and other intangible assets, which are a significant portion of the company's total assets. The company recognizes goodwill and other intangible assets under the guidance of ASC Topic 350-10, “Intangibles — Goodwill and Other.” Goodwill represents the excess of acquisition costs over the fair value of the net tangible assets and identifiable intangible assets acquired in a business combination. Identifiable intangible assets are recognized separately from goodwill and include trademarks and trade names, technology, customer relationships and other specifically identifiable assets. Trademarks and trade names are deemed to be indefinite-lived. Goodwill and indefinite-lived intangible assets are not amortized, but are subject to impairment testing. On an annual basis, or more frequently if triggering events occur, the company compares the estimated fair value to the carrying value to determine if a potential goodwill impairment exists. If the fair value is less than its carrying value, an impairment loss, if any, is recorded for the difference between the implied fair value and the carrying value of goodwill. In estimating the fair value of specific intangible assets, management relies on a number of factors, including operating results, business plans, economic projections, anticipated future cash flows, comparable transactions and other market data. There are inherent uncertainties related to these factors and management's judgment in applying them in the impairment tests of goodwill and other intangible assets. The company determined to change the date of its annual impairment test from the last day of its fiscal fourth quarter to the first day. This will allow the company more time to prepare the necessary tests prior to filing its annual report.

**Income Taxes.** The company provides deferred income tax assets and liabilities based on the estimated future tax effects of differences between the financial and tax bases of assets and liabilities based on currently enacted tax laws. The company's deferred and other tax balances are based on management's interpretation of the tax regulations and rulings in numerous taxing jurisdictions. Income tax expense and liabilities recognized by the company also reflect its best estimates and assumptions regarding, among other things, the level of future taxable income, the effect of the Company's various tax planning strategies and uncertain tax positions. Future tax authority rulings and changes in tax laws, changes in projected levels of taxable income and future tax planning strategies could affect the actual effective tax rate and tax balances recorded by the company. The company follows the provisions under ASC 740-10-25 that provides a recognition threshold and measurement criteria for the financial statement recognition of a tax benefit taken or expected to be taken in a tax return. Tax benefits are recognized only when it is more likely than not, based on the technical merits, that the benefits will be sustained on examination. Tax benefits that meet the more-likely-than-not recognition threshold are measured using a probability weighting of the largest amount of tax benefit that has greater than 50% likelihood of being realized upon settlement. Whether the more-likely-than-not recognition threshold is met

for a particular tax benefit is a matter of judgment based on the individual facts and circumstances evaluated in light of all available evidence as of the balance sheet date.

## Contractual Obligations

The company's contractual cash payment obligations as of March 30, 2013 are set forth below (in thousands):

	Amounts Due Sellers From Acquisitions	Debt	Estimated Interest on Debt	Operating Leases	Total Contractual Cash Obligations
