Unity Bancorp, Inc.
Notes to the Consolidated Financial Statements (Unaudited)
June 30, 2016

NOTE 1. Significant Accounting Policies

The accompanying Consolidated Financial Statements include the accounts of Unity Bancorp, Inc. (the "Parent Company") and its wholly-owned subsidiary, Unity Bank (the "Bank" or when consolidated with the Parent Company, the "Company"), and reflect all adjustments and disclosures which are generally routine and recurring in nature, and in the opinion of management, necessary for a fair presentation of interim results. The Bank has multiple subsidiaries used to hold part of its investment and loan portfolios and OREO properties. All significant intercompany balances and transactions have been eliminated in consolidation. Certain reclassifications have been made to prior period amounts to conform to the current year presentation, with no impact on current earnings or shareholders' equity. The financial information has been prepared in accordance with U.S. generally accepted accounting principles and has not been audited. In preparing the financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and revenues and expenses during the reporting periods. Actual results could differ from those estimates. Amounts requiring the use of significant estimates include the allowance for loan losses, valuation of deferred tax and servicing assets, the carrying value of loans held for sale and other real estate owned, the valuation of securities and the determination of other-than-temporary impairment for securities and fair value disclosures. Management believes that the allowance for loan losses is adequate. While management uses available information to recognize losses on loans, future additions to the allowance for loan losses may be necessary based on changes in economic conditions. The Company has evaluated subsequent events for potential recognition and/or disclosure through the date the Consolidated Financial Statements included in this Quarterly Report on Form 10-Q were available to be issued.

The interim unaudited Consolidated Financial Statements included herein have been prepared in accordance with instructions for Form 10-Q and the rules and regulations of the Securities and Exchange Commission ("SEC") and consist of normal recurring adjustments necessary for the fair presentation of interim results. The results of operations for the three and six months ended June 30, 2016 are not necessarily indicative of the results which may be expected for the entire year. As used in this Form 10-Q, "we" and "us" and "our" refer to Unity Bancorp, Inc., and its consolidated subsidiary, Unity Bank, depending on the context. Certain information and financial disclosures required by U.S. generally accepted accounting principles have been condensed or omitted from interim reporting pursuant to SEC rules. Interim financial statements should be read in conjunction with the Company's Consolidated Financial Statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

Stock Transactions

Stock Option Plans

The Company has incentive and nonqualified option plans, which allow for the grant of options to officers, employees and members of the Board of Directors. Transactions under the Company's stock option plans for the six months ended June 30, 2016 are summarized in the following table:

	Shares	Weighted average exercise price	Weighted average remaining contractual life in years	Aggregate intrinsic value
Outstanding at December 31, 2015	475,396	\$ 7.09	5.1	\$2,562,175
Options granted	89,000	11.06		

Options exercised	(18,525)	5.65		
Options forfeited	—	—		
Options expired	—	—		
Outstanding at June 30, 2016	545,871	\$ 7.79	5.4	\$2,685,821
Exercisable at June 30, 2016	392,042	\$ 6.81	3.9	\$2,312,616

Grants under the Company's incentive and nonqualified option plans generally vest over 3 years and must be exercised within 10 years of the date of grant. The exercise price of each option is the market price on the date of grant. As of June 30, 2016, 1,920,529 shares have been reserved for issuance upon the exercise of options, 545,871 option grants are outstanding, and 1,271,073 option grants have been exercised, forfeited or expired, leaving 103,585 shares available for grant.

The fair values of the options granted during the three and six months ended June 30, 2016 and 2015 were estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions:

	For the three months ended June 30,		For the six months ended June 30,	
	2016	2015	2016	2015
Number of options granted	—	—	89,000	40,000
Weighted average exercise price	\$ —	\$ —	\$11.06	\$ 9.12
Weighted average fair value of options	\$ —	\$ —	\$3.50	\$ 3.82
Expected life in years (1)	0.00	0.00	6.85	6.69
Expected volatility (2)	—%	—%	31.91%	46.76%
Risk-free interest rate (3)	—%	—%	1.79%	1.80%
Dividend yield (4)	—%	—%	1.44%	1.33%

(1) The expected life of the options was estimated based on historical employee behavior and represents the period of time that options granted are expected to be outstanding.

(2) The expected volatility of the Company's stock price was based on the historical volatility over the period commensurate with the expected life of the options.

(3) The risk-free interest rate is the U.S. Treasury rate commensurate with the expected life of the options on the date of grant.

(4) The expected dividend yield is the projected annual yield based on the grant date stock price.

Upon exercise, the Company issues shares from its authorized but unissued common stock to satisfy the options. The following table presents information about options exercised during the three and six months ended June 30, 2016 and 2015:

	For the three months ended June 30,		For the six months ended June 30,	
	2016	2015	2016	2015
Number of options exercised	18,525	—	18,525	—
Total intrinsic value of options exercised	\$116,992	—	\$116,992	—
Cash received from options exercised	—	—	—	—
Tax deduction realized from options	—	—	—	—

The following table summarizes information about stock options outstanding and exercisable at June 30, 2016:

Range of exercise prices	Options outstanding			Weighted average exercise price	Options exercisable	
	Options outstanding	Weighted average remaining contractual life (in years)	Weighted average exercise price		Options exercisable	Weighted average exercise price
\$0.00 - 4.00	87,000	2.7	\$ 3.85	87,000	\$ 3.85	
4.01 - 8.00	265,425	4.9	6.79	247,593	6.71	
8.01 - 12.00	102,551	9.1	9.71	15,554	9.32	
12.01 - 16.00	90,895	5.4	12.32	41,895	12.62	
Total	545,871	5.4	\$ 7.79	392,042	\$ 6.81	

Financial Accounting Standards Board Accounting Standards Codification ("FASB ASC") Topic 718, "Compensation - Stock Compensation," requires an entity to recognize the fair value of equity awards as compensation expense over the period during which an employee is required to provide service in exchange for such an award (vesting period).

Compensation expense related to stock options and the related income tax benefit for the three and six months ended June 30, 2016 and 2015 are detailed in the following table:

	For the three months ended June 30,		For the six months ended June 30,	
	2016	2015	2016	2015
Compensation expense	\$57,765	\$39,072	\$113,748	\$68,990
Income tax benefit	23,684	15,605	46,466	27,555

As of June 30, 2016, unrecognized compensation costs related to nonvested share-based compensation arrangements granted under the Company's stock option plans totaled approximately \$430 thousand. That cost is expected to be recognized over a weighted average period of 2.2 years.

Restricted Stock Awards

Restricted stock is issued under the stock bonus program to reward employees and directors and to retain them by distributing stock over a period of time. The following table summarizes nonvested restricted stock activity for the six months ended June 30, 2016:

	Shares	Average grant date fair value
Nonvested restricted stock at December 31, 2015	80,800	\$ 8.50
Granted	30,350	11.21
Cancelled	(2,000)	5.35
Vested	(14,950)	8.26
Nonvested restricted stock at June 30, 2016	94,200	\$ 9.48

Restricted stock awards granted to date vest over a period of 4 years and are recognized as compensation to the recipient over the vesting period. The awards are recorded at fair market value at the time of grant and amortized into salary expense on a straight line basis over the vesting period. As of June 30, 2016, 471,551 shares of restricted stock were reserved for issuance, of which 146,350 shares are available for grant.

Restricted stock awards granted during the three and six months ended June 30, 2016 and 2015 were as follows:

	For the three months ended June 30, 2016		For the six months ended June 30, 2016		2015	
Number of shares granted	—	—	30,350	34,800		
Average grant date fair value	\$ —	\$ —	\$ 11.21	\$ 9.27		

Compensation expense related to restricted stock for the three and six months ended June 30, 2016 and 2015 is detailed in the following table:

	For the three months ended June 30, 2016		For the six months ended June 30, 2016		2015	
Compensation expense	\$81,110	\$79,961	\$157,229	\$157,510		
Income tax benefit	32,545	31,937	64,230	62,909		

As of June 30, 2016, there was approximately \$716 thousand of unrecognized compensation cost related to nonvested restricted stock awards granted under the Company's stock incentive plans. That cost is expected to be recognized over a weighted average period of 2.7 years.

401(k) Savings Plan

The Bank has a 401(k) savings plan covering substantially all employees. Under the Plan, an employee can contribute up to 80 percent of their salary on a tax deferred basis. The Bank may also make discretionary contributions to the Plan. The Bank contributed \$179 thousand and \$145 thousand to the Plan during the six months ended June 30, 2016 and 2015, and \$90 thousand and \$69 thousand during the three months ended June 30, 2016 and 2015, respectively.

Deferred Fee Plan

The Company has a deferred fee plan for Directors and executive management. Directors of the Company have the option to elect to defer up to 100 percent of their respective retainer and Board of Director fees, and each member of executive management has the option to elect to defer 100 percent of their year end cash bonuses. Director and executive deferred fees totaled \$31.6 thousand and \$26.3 thousand during the six months ended June 30, 2016 and 2015, and \$4.9 thousand and \$5.4 thousand during the three months ended June 30, 2016 and 2015, respectively. The interest paid on the deferred balances totaled \$14.9 thousand and \$12.8 thousand during the six months ended June 30, 2016 and 2015, and \$7.6 thousand and \$6.5 thousand during the three months ended June 30, 2016 and 2015, respectively. No fees were distributed in 2016 and 2015, respectively.

Benefit Plans

In addition to the 401(k) savings plan which covers substantially all employees, the Company established in 2015 an unfunded supplemental defined benefit plan to provide additional retirement benefits for the President and Chief Executive Officer (“CEO”) and certain key executives.

On June 4, 2015, the Company approved the Supplemental Executive Retirement Plan (“SERP”) pursuant to which the President and CEO is entitled to receive certain supplemental nonqualified retirement benefits. Upon separation from service after age 66, the President and CEO will be entitled to an annual benefit in the amount of \$156 thousand, payable in fifteen annual installments subject to annual 2% increases. The future payments are estimated to total \$2.7 million. A discount rate of 3.84% was used to calculate the present value of the benefit obligation.

The President and CEO commenced vesting to this retirement benefit on January 1, 2014, and vests an additional 3% each year until fully vested on January 1, 2024. In the event that the President and CEO’s separation from service from the company were to occur prior to full vesting, the President and CEO would be entitled to and shall be paid the vested portion of the retirement benefit calculated as of the date of separation from service. Notwithstanding the foregoing, upon a Change in Control, and provided that within 6 months following the Change in Control the President and CEO is involuntarily terminated for reasons other than “cause” or the President and CEO resigns for “good reason”, as such is defined in the SERP, or the President and CEO voluntarily terminates his employment after being offered continued employment in a position that is not a “Comparable Position”, as such is also defined in the SERP, the President and CEO shall become 100% vested in the full retirement benefit.

No contributions or payments have been made during the three and six months ended June 30, 2016. The following table summarizes the components of the net periodic pension cost of the defined benefit plan recognized during the three and six months ended June 30, 2016:

(In thousands)	For the three months ended June 30, 2016	For the six months ended June 30, 2016
Service cost	\$ 16	\$ 31
Interest cost	9	19
Amortization of prior service cost	21	41
Net periodic benefit cost	\$ 46	\$ 91

The following table summarizes the changes in benefit obligations of the defined benefit plan during the six months ended June 30, 2016:

(In thousands)	For the six months ended
----------------	-----------------------------------

	June
	30,
	2016
Benefit obligation, beginning of year	\$ 923
Service cost	31
Interest cost	19
Actuarial gain (loss)	—
Benefit obligation, end of period	\$ 973

On October 22, 2015, the Company entered into an Executive Incentive Retirement Plan (the “Plan”) with certain key executive officers. The Plan has an effective date of January 1, 2015.

The Plan is an unfunded, nonqualified deferred compensation plan. For any Plan Year, a guaranteed annual Deferral Award percentage of seven and one half percent (7.5%) of the participant's annual base salary will be credited to each Participant's Deferred Benefit Account. A discretionary annual Deferral Award equal to seven and one half percent (7.5%) of the participant's annual base salary may be credited to the Participant's account in addition to the guaranteed Deferral Award, if the Bank exceeds the benchmarks set forth in the Annual Executive Bonus Matrix. The total Deferral Award shall never exceed fifteen percent (15%) for any given Plan Year. Each Participant shall be one hundred percent 100% vested in all Deferral Awards as of the date they are awarded.

As of June 30, 2016, the Company had total year to date expenses of \$30 thousand related to the Plan. The Plan is reflected on the Company's balance sheet as accrued expenses.

Certain members of management are also enrolled in a split-dollar life insurance plan with a post retirement death benefit of \$250 thousand. Total expenses related to this plan were \$1 thousand and 2 thousand for the three and six months ended June 30, 2016 and 2015, respectively.

Other-Than-Temporary Impairment

The Company has a process in place to identify securities that could potentially incur credit impairment that is other-than-temporary. This process involves monitoring late payments, pricing levels, downgrades by rating agencies, key financial ratios, financial statements, revenue forecasts and cash flow projections as indicators of credit issues. Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concern warrants such evaluation. This evaluation considers relevant facts and circumstances in evaluating whether a credit or interest rate-related impairment of a security is other-than-temporary. Relevant facts and circumstances considered include: (1) the extent and length of time the fair value has been below cost; (2) the reasons for the decline in value; (3) the financial position and access to capital of the issuer, including the current and future impact of any specific events and (4) for fixed maturity securities, our intent to sell a security or whether it is more likely than not we will be required to sell the security before the recovery of its amortized cost which, in some cases, may extend to maturity and for equity securities, our ability and intent to hold the security for a forecasted period of time that allows for the recovery in value.

Management assesses its intent to sell or whether it is more likely than not that it will be required to sell a security before recovery of its amortized cost basis less any current-period credit losses. For debt securities that are considered other-than-temporarily impaired with no intent to sell and no requirement to sell prior to recovery of its amortized cost basis, the amount of the impairment is separated into the amount that is credit related (credit loss component) and the amount due to all other factors. The credit loss component is recognized in earnings and is the difference between the security's amortized cost basis and the present value of its expected future cash flows. The remaining difference between the security's fair value and the present value of future expected cash flows is due to factors that are not credit related and is recognized in other comprehensive income. For debt securities where management has the intent to sell, the amount of the impairment is reflected in earnings as realized losses.

The present value of expected future cash flows is determined using the best estimate cash flows discounted at the effective interest rate implicit to the security at the date of purchase or the current yield to accrete an asset-backed or floating rate security. The methodology and assumptions for establishing the best estimate cash flows vary depending on the type of security. The asset-backed securities cash flow estimates are based on bond specific facts and circumstances that may include collateral characteristics, expectations of delinquency and default rates, loss severity and prepayment speeds and structural support, including subordination and guarantees. The corporate bond cash flow estimates are derived from scenario-based outcomes of expected corporate restructurings or the disposition of assets using bond specific facts and circumstances including timing, security interests and loss severity.

Transfers of Financial Assets

Transfers of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Loans

Loans Held for Sale

Loans held for sale represent the guaranteed portion of Small Business Administration (“SBA”) loans and are reflected at the lower of aggregate cost or market value. The Company originates loans to customers under an SBA program that historically has provided for SBA guarantees of up to 90 percent of each loan. The Company generally sells the guaranteed portion of its SBA loans to a third party and retains the servicing, holding the nonguaranteed portion in its portfolio. The net amount of loan origination fees on loans sold is included in the carrying value and in the gain or loss on the sale. When sales of SBA loans do occur, the premium received on the sale and the present value of future cash flows of the servicing assets are recognized in income. All criteria for sale accounting must be met in order for the loan sales to occur; see details under the “Transfers of Financial Assets” heading above.

Servicing assets represent the estimated fair value of retained servicing rights, net of servicing costs, at the time loans are sold. Servicing assets are amortized in proportion to, and over the period of, estimated net servicing revenues. Impairment is evaluated based on stratifying the underlying financial assets by date of origination and term. Fair value is determined using prices for similar assets with similar characteristics, when available, or based upon discounted cash flows using market-based assumptions. Any impairment, if temporary, would be reported as a valuation allowance.

Serviced loans sold to others are not included in the accompanying Consolidated Balance Sheets. Income and fees collected for loan servicing are credited to noninterest income when earned, net of amortization on the related servicing assets.

Loans Held to Maturity

Loans held to maturity are stated at the unpaid principal balance, net of unearned discounts and deferred loan origination fees and costs. In accordance with the level yield method, loan origination fees, net of direct loan origination costs, are deferred and recognized over the estimated life of the related loans as an adjustment to the loan yield. Interest is credited to operations primarily based upon the principal balance outstanding.

Loans are reported as past due when either interest or principal is unpaid in the following circumstances: fixed payment loans when the borrower is in arrears for two or more monthly payments; open end credit for two or more billing cycles; and single payment notes if interest or principal remains unpaid for 30 days or more.

Nonperforming loans consist of loans that are not accruing interest as a result of principal or interest being in default for a period of 90 days or more or when the ability to collect principal and interest according to the contractual terms is in doubt (nonaccrual loans). When a loan is classified as nonaccrual, interest accruals are discontinued and all past due interest previously recognized as income is reversed and charged against current period earnings. Generally, until the loan becomes current, any payments received from the borrower are applied to outstanding principal until such time as management determines that the financial condition of the borrower and other factors merit recognition of a portion of such payments as interest income. Loans may be returned to an accrual status when the ability to collect is reasonably assured and when the loan is brought current as to principal and interest.

Loans are charged off when collection is sufficiently questionable and when the Company can no longer justify maintaining the loan as an asset on the balance sheet. Loans qualify for charge-off when, after thorough analysis, all possible sources of repayment are insufficient. These include: 1) potential future cash flows, 2) value of collateral, and/or 3) strength of co-makers and guarantors. All unsecured loans are charged off upon the establishment of the loan’s nonaccrual status. Additionally, all loans classified as a loss or that portion of the loan classified as a loss is charged off. All loan charge-offs are approved by the Board of Directors.

Troubled debt restructurings ("TDRs") occur when a creditor, for economic or legal reasons related to a debtor's financial condition, grants a concession to the debtor that it would not otherwise consider. These concessions typically include reductions in interest rate, extending the maturity of a loan, or a combination of both. Interest income on accruing TDRs is credited to operations primarily based upon the principal amount outstanding, as stated in the paragraphs above.

The Company evaluates its loans for impairment. A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. The Company has defined impaired loans to be all TDRs and nonperforming loans individually evaluated for impairment. Impairment is evaluated in total for smaller-balance loans of a similar nature (consumer and residential mortgage loans), and on an individual basis for all other loans. Impairment of a loan is measured based on the present value of expected future cash flows, discounted at the loan's effective interest rate, or as a practical expedient, based on a loan's observable market price or the fair value of collateral, net of estimated costs to sell, if the loan is collateral-dependent. If the value of the impaired loan is less than the recorded investment in the loan, the Company establishes a valuation allowance, or adjusts existing valuation allowances, with a corresponding charge to the provision for loan losses.

For additional information on loans, see Note 8 to the Consolidated Financial Statements and the section titled "Loan Portfolio" under Item 2. Management's Discussion and Analysis.

Allowance for Loan Losses and Reserve for Unfunded Loan Commitments

The allowance for loan losses is maintained at a level management considers adequate to provide for probable loan losses as of the balance sheet date. The allowance is increased by provisions charged to expense and is reduced by net charge-offs.

The level of the allowance is based on management's evaluation of probable losses in the loan portfolio, after consideration of prevailing economic conditions in the Company's market area, the volume and composition of the loan portfolio, and historical loan loss experience. The allowance for loan losses consists of specific reserves for individually impaired credits and TDRs, reserves for nonimpaired loans based on historical loss factors and reserves based on general economic factors and other qualitative risk factors such as changes in delinquency trends, industry concentrations or local/national economic trends. This risk assessment process is performed at least quarterly, and, as adjustments become necessary, they are realized in the periods in which they become known.

Although management attempts to maintain the allowance at a level deemed adequate to provide for probable losses, future additions to the allowance may be necessary based upon certain factors including changes in market conditions and underlying collateral values. In addition, various regulatory agencies periodically review the adequacy of the Company's allowance for loan losses. These agencies may require the Company to make additional provisions based on their judgments about information available to them at the time of their examination.

The Company maintains an allowance for unfunded loan commitments that is maintained at a level that management believes is adequate to absorb estimated probable losses. Adjustments to the allowance are made through other expenses and applied to the allowance which is maintained in other liabilities.

For additional information on the allowance for loan losses and unfunded loan commitments, see Note 9 to the Consolidated Financial Statements and the sections titled "Asset Quality" and "Allowance for Loan Losses and Reserve for Unfunded Loan Commitments" under Item 2. Management's Discussion and Analysis.

Income Taxes

The Company accounts for income taxes according to the asset and liability method. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using the enacted tax rates applicable to taxable income for the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax

rates is recognized in income in the period that includes the enactment date.

Valuation reserves are established against certain deferred tax assets when it is more likely than not that the deferred tax assets will not be realized. Increases or decreases in the valuation reserve are charged or credited to the income tax provision. When tax returns are filed, it is highly certain that some positions taken would be sustained upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that ultimately would be sustained. The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. The evaluation of a tax position taken is considered by itself and not offset or aggregated with other positions. Tax positions that meet the more likely than not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of benefits associated with tax positions taken that exceeds the amount measured as described above is reflected as a liability for unrecognized tax benefits in the accompanying balance sheet along with any associated interest and penalties that would be payable to the taxing authorities upon examination.

Interest and penalties associated with unrecognized tax benefits would be recognized in income tax expense on the income statement.

NOTE 2. Litigation

The Company may, in the ordinary course of business, become a party to litigation involving collection matters, contract claims and other legal proceedings relating to the conduct of its business. In the best judgment of management, based upon consultation with counsel, the consolidated financial position and results of operations of the Company will not be affected materially by the final outcome of any pending legal proceedings or other contingent liabilities and commitments.

NOTE 3. Net Income per Share

Basic net income per common share is calculated as net income divided by the weighted average common shares outstanding during the reporting period.

Diluted net income per common share is computed similarly to that of basic net income per common share, except that the denominator is increased to include the number of additional common shares that would have been outstanding if all potentially dilutive common shares, principally stock options, were issued during the reporting period utilizing the Treasury stock method.

The following is a reconciliation of the calculation of basic and diluted income per share:

(In thousands, except per share amounts)	For the three months ended		For the six months ended	
	June 30, 2016	June 30, 2015	June 30, 2016	June 30, 2015
Net income	\$2,824	\$2,428	\$7,029	\$4,367
Weighted average common shares outstanding - Basic	8,471	8,425	8,465	8,421
Plus: Potential dilutive common stock equivalents	137	99	132	98
Weighted average common shares outstanding - Diluted	8,608	8,524	8,597	8,519
Net income per common share - Basic	\$0.33	\$0.29	\$0.83	\$0.52
Net income per common share - Diluted	0.33	0.28	0.82	0.51
Stock options and common stock excluded from the income per share calculation as their effect would have been anti-dilutive	153	141	170	127

NOTE 4. Income Taxes

The Company follows FASB ASC Topic 740, "Income Taxes," which prescribes a threshold for the financial statement recognition of income taxes and provides criteria for the measurement of tax positions taken or expected to be taken in a tax return. ASC 740 also includes guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition of income taxes.

For the quarter ended June 30, 2016, the Company reported income tax expense of \$1.6 million for an effective tax rate of 36.5 percent, compared to an income tax expense of \$1.2 million and an effective tax rate of 32.7 percent for the prior year's quarter. For the six months ended June 30, 2016, the Company reported income tax expense of \$3.9 million for an effective tax rate of 35.6 percent, compared to an income tax expense of \$2.2 million and an effective tax rate of 33.5 percent for the six months ended June 30, 2015. The Company did not recognize or accrue any interest or penalties related to income taxes during the three or six months ended June 30, 2016 or 2015. The Company did not have an accrual for uncertain tax positions as of June 30, 2016 or December 31, 2015, as deductions taken and benefits accrued are based on widely understood administrative practices and procedures and are based on clear and unambiguous tax law. Tax returns for all years 2011 and thereafter are subject to future examination by tax authorities.

NOTE 5. Other Comprehensive (Loss) Income ^(a)

The following tables show the changes in other comprehensive (loss) income for the three and six months ended June 30, 2016 and 2015, net of tax:

(In thousands)	For the three months ended June 30, 2016				2015			
	Net unrealized gains on securities	Adjustments related to defined benefit plan	Net unrealized losses from cash flow hedges	Accumulated other comprehensive loss	Net unrealized gains (losses) on securities	Adjustments related to defined benefit plan	Accumulated other comprehensive income (loss)	
Balance at March 31,	\$34	\$ (428)	\$ (307)	\$ (701)	\$180	\$ —	\$ 180	
Other comprehensive (loss) income before reclassification	175	—	(228)	(53)	(121)	(498)	(619)	
Less amounts reclassified from accumulated other comprehensive loss	53	(14)	—	39	18	(25)	(7)	
Period change	122	14	(228)	(92)	(139)	(473)	(612)	
Balance at June 30,	\$156	\$ (414)	\$ (535)	\$ (793)	\$41	\$ (473)	\$ (432)	

(a) All amounts are net of tax.

(In thousands)	For the six months ended June 30, 2016				2015			
	Net unrealized gains (losses) on securities	Adjustments related to defined benefit plan	Net unrealized losses from cash flow hedges	Accumulated other comprehensive loss	Net unrealized gains (losses) on securities	Adjustments related to defined benefit plan	Accumulated other comprehensive income	
Balance at December 31,	\$ (2)	\$ (448)	\$ (17)	\$ (467)	\$ 143	\$ —	\$ 143	
Other comprehensive (loss) income before reclassification	272	—	(518)	(246)	(84)	(498)	(582)	
Less amounts reclassified from accumulated other comprehensive loss	114	(34)	—	80	18	(25)	(7)	
Period change	158	34	(518)	(326)	(102)	(473)	(575)	
Balance at June 30,	\$ 156	\$ (414)	\$ (535)	\$ (793)	\$ 41	\$ (473)	\$ (432)	

(a) All amounts are net of tax.

NOTE 6. Fair Value

Fair Value Measurement

The Company follows FASB ASC Topic 820, “Fair Value Measurement and Disclosures,” which requires additional disclosures about the Company’s assets and liabilities that are measured at fair value. Fair value is the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. In determining fair value, the Company uses various methods including market, income and cost approaches. Based on these approaches, the Company often utilizes certain assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and/or the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated, or generally unobservable inputs. The Company utilizes techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. The fair value hierarchy ranks the quality and reliability of the information used to determine fair values. Financial assets and liabilities carried at fair value will be classified and disclosed as follows:

Level 1 Inputs

Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Generally, this includes debt and equity securities and derivative contracts that are traded in an active exchange market (i.e. New York Stock Exchange), as well as certain U.S. Treasury, U.S. Government and sponsored entity agency mortgage-backed securities that are highly liquid and are actively traded in over-the-counter markets.

Level 2 Inputs

Quoted prices for similar assets or liabilities in active markets.

Quoted prices for identical or similar assets or liabilities in inactive markets.

Inputs other than quoted prices that are observable, either directly or indirectly, for the term of the asset or liability (i.e., interest rates, yield curves, credit risks, prepayment speeds or volatilities) or “market corroborated inputs.”

Generally, this includes U.S. Government and sponsored entity mortgage-backed securities, corporate debt securities and derivative contracts.

Level 3 Inputs

Prices or valuation techniques that require inputs that are both unobservable (i.e. supported by little or no market activity) and that are significant to the fair value of the assets or liabilities.

These assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

Fair Value on a Recurring Basis

The following is a description of the valuation methodologies used for instruments measured at fair value on a recurring basis:

Securities Available for Sale

The fair value of available for sale ("AFS") securities is the market value based on quoted market prices, when available, or market prices provided by recognized broker dealers (Level 1). If listed prices or quotes are not available, fair value is based upon quoted market prices for similar or identical assets or other observable inputs (Level 2) or externally developed models that use unobservable inputs due to limited or no market activity of the instrument (Level 3).

As of June 30, 2016, the fair value of the Company's AFS securities portfolio was \$45.3 million. Approximately 52 percent of the portfolio was made up of residential mortgage-backed securities, which had a fair value of \$23.7 million at June 30, 2016. Approximately \$23.0 million of the residential mortgage-backed securities are guaranteed by the Government National Mortgage Association ("GNMA"), the Federal National Mortgage Association ("FNMA") or the Federal Home Loan Mortgage Corporation ("FHLMC"). The underlying loans for these securities are residential mortgages that are geographically dispersed throughout the United States.

All of the Company's AFS securities were classified as Level 2 assets at June 30, 2016. The valuation of AFS securities using Level 2 inputs was primarily determined using the market approach, which uses quoted prices for similar assets or liabilities in active markets and all other relevant information. It includes model pricing, defined as valuing securities based upon their relationship with other benchmark securities.

There were no changes in the inputs or methodologies used to determine fair value during the period ended June 30, 2016, as compared to the periods ended December 31, 2015 and June 30, 2015.

The tables below present the balances of assets and liabilities measured at fair value on a recurring basis as of June 30, 2016 and December 31, 2015:

(In thousands)	June 30, 2016			Total
	Level 1	Level 2	Level 3	
Securities available for sale:				
U.S. Government sponsored entities	\$—	\$7,042	\$—	\$7,042
State and political subdivisions	—	5,650	—	5,650
Residential mortgage-backed securities	—	23,707	—	23,707
Corporate and other securities	—	8,867	—	8,867
Total securities available for sale	\$—	\$45,266	\$—	\$45,266
Interest rate swap agreements	—	(886)	—	(886)

Fair Value on a Nonrecurring Basis

Certain assets and liabilities are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following is a description of the valuation methodologies used for instruments measured at fair value on a nonrecurring basis:

Appraisal Policy

All appraisals must be performed in accordance with the Uniform Standards of Professional Appraisal Practice ("USPAP"). Appraisals are certified to the Company and performed by appraisers on the Company's approved list of appraisers. Evaluations are completed by a person independent of Company management. The content of the appraisal depends on the complexity of the property. Appraisals are completed on a "retail value" and an "as is value".

The Company requires current real estate appraisals on all loans that become OREO or in-substance foreclosure, loans that are classified substandard, doubtful or loss, or loans that are over \$100,000 and nonperforming. Prior to each balance sheet date, the Company values impaired collateral-dependent loans and OREO based upon a third party appraisal, broker's price opinion, drive by appraisal, automated valuation model, updated market evaluation, or a combination of these methods. The amount is discounted for the decline in market real estate values (for original appraisals), for any known damage or repair costs, and for selling and closing costs. The amount of the discount ranges from 10 to 25 percent and is dependent upon the method used to determine the original value. The original appraisal is generally used when a loan is first determined to be impaired. When applying the discount, the Company takes into consideration when the appraisal was performed, the collateral's location, the type of collateral, any known damage to the property and the type of business. Subsequent to entering impaired status and the Company determining that there is a collateral shortfall, the Company will generally, depending on the type of collateral, order a third party appraisal, broker's price opinion, automated valuation model or updated market evaluation. After receiving the third party results, the Company will discount the value 8 to 10 percent for selling and closing costs.

OREO

The fair value of OREO is determined using appraisals, which may be discounted based on management's review and changes in market conditions (Level 3 Inputs).

Impaired Collateral-Dependent Loans

The fair value of impaired collateral-dependent loans is derived in accordance with FASB ASC Topic 310, "Receivables." Fair value is determined based on the loan's observable market price or the fair value of the collateral. Partially charged-off loans are measured for impairment based upon an appraisal for collateral-dependent loans. When an updated appraisal is received for a nonperforming loan, the value on the appraisal is discounted in the manner discussed above. If there is a deficiency in the value after the Company applies these discounts, management applies a specific reserve and the loan remains in nonaccrual status. The receipt of an updated appraisal would not qualify as a reason to put a loan back into accruing status. The Company removes loans from nonaccrual status generally when the borrower makes nine months of contractual payments and demonstrates the ability to service the debt going forward. Charge-offs are determined based upon the loss that management believes the Company will incur after evaluating collateral for impairment based upon the valuation methods described above and the ability of the borrower to pay any deficiency.

The valuation allowance for impaired loans is included in the allowance for loan losses in the consolidated balance sheets. At June 30, 2016, the valuation allowance for impaired loans was \$689 thousand, a decrease of \$153 thousand from \$842 thousand at December 31, 2015.

The following tables present the assets and liabilities subject to fair value adjustments (impairment) on a non-recurring basis carried on the balance sheet by caption and by level within the hierarchy (as described above):

(In thousands)	Fair value at June 30, 2016			Total
	Level	Level	Level	
	1	2	3	
Financial assets:				
OREO	\$—	\$—	—\$1,702	\$1,702
Impaired collateral-dependent loans	—	—	4,402	4,402

(In thousands)	Fair value at December 31, 2015			Total
	Level	Level	Level	
	1	2	3	
Financial assets:				
OREO	\$—	\$—	—\$1,591	\$1,591
Impaired collateral-dependent loans	—	—	6,331	6,331

Fair Value of Financial Instruments

FASB ASC Topic 825, “Financial Instruments,” requires the disclosure of the estimated fair value of certain financial instruments, including those financial instruments for which the Company did not elect the fair value option. These estimated fair values as of June 30, 2016 and December 31, 2015 have been determined using available market information and appropriate valuation methodologies. Considerable judgment is required to interpret market data to develop estimates of fair value. The estimates presented are not necessarily indicative of amounts the Company could realize in a current market exchange. The use of alternative market assumptions and estimation methodologies could have had a material effect on these estimates of fair value. The methodology for estimating the fair value of financial assets and liabilities that are measured on a recurring or nonrecurring basis are discussed above. The following methods and assumptions were used to estimate the fair value of other financial instruments for which it is practicable to estimate that value:

Cash and Cash Equivalents

For these short-term instruments, the carrying value is a reasonable estimate of fair value.

Securities

The fair value of securities is based upon quoted market prices for similar or identical assets or other observable inputs (Level 2) or externally developed models that use unobservable inputs due to limited or no market activity of the instrument (Level 3).

SBA Loans Held for Sale

The fair value of SBA loans held for sale is estimated by using a market approach that includes significant other observable inputs.

Loans

The fair value of loans is estimated by discounting the future cash flows using current market rates that reflect the interest rate risk inherent in the loan, except for previously discussed impaired loans.

FHLB Stock

Federal Home Loan Bank stock is carried at cost. Carrying value approximates fair value based on the redemption provisions of the issues.

Servicing Assets

Servicing assets do not trade in an active, open market with readily observable prices. The Company estimates the fair value of servicing assets using discounted cash flow models incorporating numerous assumptions from the perspective of a market participant including market discount rates and prepayment speeds.

Accrued Interest

The carrying amounts of accrued interest approximate fair value.

OREO

The fair value of OREO is determined using appraisals, which may be discounted based on management's review and changes in market conditions (Level 3 Inputs).

Deposit Liabilities

The fair value of demand deposits and savings accounts is the amount payable on demand at the reporting date (i.e. carrying value). The fair value of fixed-maturity certificates of deposit is estimated by discounting the future cash flows using current market rates.

Borrowed Funds and Subordinated Debentures

The fair value of borrowings is estimated by discounting the projected future cash flows using current market rates.

Standby Letters of Credit

At June 30, 2016, the Bank had standby letters of credit outstanding of \$2.7 million, as compared to \$1.8 million at December 31, 2015. The fair value of these commitments is nominal.

The table below presents the carrying amount and estimated fair values of the Company's financial instruments presented as of June 30, 2016 and December 31, 2015:

(In thousands)	Fair value level	June 30, 2016		December 31, 2015	
		Carrying amount	Estimated fair value	Carrying amount	Estimated fair value
Financial assets:					
Cash and cash equivalents	Level 1	\$96,077	\$96,077	\$88,157	\$88,157
Securities (1)	Level 2	73,994	74,599	71,336	71,472

Loans, net of allowance for loan losses (2)	Level 2	889,040	895,597	863,085	864,691
FHLB stock	Level 2	5,092	5,092	4,600	4,600
Servicing assets	Level 3	1,953	1,953	1,389	1,389
Accrued interest receivable	Level 2	3,953	3,953	3,884	3,884
OREO	Level 3	1,702	1,702	1,591	1,591
Financial liabilities:					
Deposits	Level 2	912,198	914,353	894,493	893,651
Borrowed funds and subordinated debentures	Level 2	124,310	126,652	107,465	109,549
Accrued interest payable	Level 2	368	368	461	461

Includes held to maturity ("HTM") commercial mortgage-backed securities that are considered Level 3. These (1) securities had book values of \$3.8 million and \$3.9 million at June 30, 2016 and December 31, 2015, respectively, and market values of \$4.0 million and \$3.8 million at June 30, 2016 and December 31, 2015, respectively.

Includes collateral-dependent impaired loans that are considered Level 3 and reported separately in the tables under (2) the "Fair Value on a Nonrecurring Basis" heading. Collateral-dependent impaired loans, net of specific reserves totaled \$4.4 million and \$6.3 million at June 30, 2016 and December 31, 2015, respectively.

NOTE 7. Securities

This table provides the major components of AFS and HTM securities at amortized cost and estimated fair value at June 30, 2016 and December 31, 2015:

(In thousands)	June 30, 2016				December 31, 2015			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value

This table provides the remaining contractual maturities and yields of securities within the investment portfolios. The carrying value of securities at June 30, 2016 is distributed by contractual maturity. Mortgage-backed securities and other securities, which may have principal prepayment provisions, are distributed based on contractual maturity. Expected maturities will differ materially from contractual maturities as a result of early prepayments and calls.

Unrealized Losses

The unrealized losses in each of the categories presented in the tables above are discussed in the paragraphs that follow:

U.S. government sponsored entities and state and political subdivision securities: The unrealized losses on investments in these types of securities were caused by the increase in interest rate spreads or the increase in interest rates at the long end of the Treasury curve. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than the par value of the investments. Because the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost basis, which may be at maturity, the Company did not consider these investments to be other-than temporarily impaired as of June 30, 2016. There was no impairment on these securities at December 31, 2015.

Residential and commercial mortgage-backed securities: The unrealized losses on investments in mortgage-backed securities were caused by increases in interest rate spreads or the increase in interest rates at the long end of the Treasury curve. The majority of contractual cash flows of these securities are guaranteed by the FNMA, GNMA, and the FHLMC. It is expected that the securities would not be settled at a price significantly less than the par value of the investment. Because the decline in fair value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost basis, which may be at maturity, the Company did not consider these investments to be other-than-temporarily impaired as of June 30, 2016 or December 31, 2015.

Corporate and other securities: Included in this category are corporate debt securities, Community Reinvestment Act (“CRA”) investments, asset-backed securities, and one trust preferred security. The unrealized losses on corporate debt securities were due to widening credit spreads or the increase in interest rates at the long end of the Treasury curve and the unrealized losses on CRA investments were caused by decreases in the market value of underlying bonds and rate changes. The Company evaluated the prospects of the issuers and forecasted a recovery period; and as a result determined it did not consider these investments to be other-than-temporarily impaired as of June 30, 2016 or December 31, 2015. The contractual terms do not allow the security to be settled at a price less than the par value. Because the Company does not intend to sell the security and it is not more likely than not that the Company will be required to sell the security before recovery of its amortized cost basis, which may be at maturity, the Company did not consider this security to be other-than-temporarily impaired as of June 30, 2016 or December 31, 2015.

Realized Gains and Losses

Gross realized gains on securities for the three and six months ended June 30, 2016 and 2015 are detailed in the table below:

	For the three months ended June 30, 2016		For the six months ended June 30, 2015	
(In thousands)	2016	2015	2016	2015
Available for sale:				
Realized gains	\$81	\$28	\$175	\$28
Realized losses	—	—	—	—
Total securities available for sale	81	28	175	28
Held to maturity:				
Realized gains	—	—	—	—
Realized losses	—	—	—	—
Total securities held to maturity	—	—	—	—
Net gains on sales of securities	\$81	\$28	\$175	\$28

The net realized gains are included in noninterest income in the Consolidated Statements of Income as net security gains. There was a gross realized gain of \$81 thousand for the three months ended June 30, 2016. For the six months ended June 30, 2016, there was a gross gain of \$175 thousand.

For the six months ended June 30, 2016, the net gains are attributed to the sale of fifteen municipal securities with a total book value of \$6.4 million and resulting gains of \$112 thousand and the sale of one equity security totaling \$40 thousand in book value, resulting in pre-tax gains of approximately \$63 thousand.

For the three and six months ended June 30, 2015, there was a gross realized gain of \$28 thousand. The net realized gains during 2015 were a result of the following:

For the six months ended June 30, 2015, the Company sold one corporate bond totaling \$500 thousand in book value, resulting in pre-tax gains of approximately \$28 thousand.

Pledged Securities

Securities with a carrying value of \$18.5 million at both June 30, 2016 and December 31, 2015 were pledged to secure Government deposits, secure other borrowings and for other purposes required or permitted by law. In June 2016, the FHLB issued a letter of credit in the name of Unity Bank naming the NJ Dept. of Banking and Insurance as beneficiary. The letter of credit will take the place of securities previously pledged to the state for the Bank's municipal deposits. For additional information on amounts pledged to secure Government deposits at June 30, 2016, see section titled "Borrowed Funds and Subordinated Debentures" under Item 2. Management Discussion and Analysis.

NOTE 8. Loans

The following table sets forth the classification of loans by class, including unearned fees, deferred costs and excluding the allowance for loan losses as of June 30, 2016 and December 31, 2015:

(In thousands)	June 30, 2016	December 31, 2015
SBA loans held for investment	\$40,006	\$ 39,393
SBA 504 loans	27,038	29,353
Commercial loans		
Commercial other	51,981	49,332
Commercial real estate	396,480	391,071
Commercial real estate construction	33,252	25,115
Residential mortgage loans	268,774	264,523
Consumer loans		
Home equity	44,518	45,042
Consumer other	39,749	32,015
Total loans held for investment	\$901,798	\$ 875,844
SBA loans held for sale	13,245	13,114
Total loans	\$915,043	\$ 888,958

Loans are made to individuals as well as commercial entities. Specific loan terms vary as to interest rate, repayment, and collateral requirements based on the type of loan requested and the credit worthiness of the prospective borrower. Credit risk tends to be geographically concentrated in that a majority of the loan customers are located in the markets serviced by the Bank. Loan performance may be adversely affected by factors impacting the general economy or conditions specific to the real estate market such as geographic location and/or property type. A description of the Company's different loan segments follows:

SBA Loans: SBA 7(a) loans, on which the SBA has historically provided guarantees of up to 90 percent of the principal balance, are considered a higher risk loan product for the Company than its other loan products. The guaranteed portion of the Company's SBA loans is generally sold in the secondary market with the nonguaranteed portion held in the portfolio as a loan held for investment. SBA loans are for the purpose of providing working capital, financing the purchase of equipment, inventory or commercial real estate and for other business purposes. Loans are guaranteed by the businesses' major owners. SBA loans are made based primarily on the historical and projected cash flow of the business and secondarily on the underlying collateral provided.

SBA 504 Loans: The SBA 504 program consists of real estate backed commercial mortgages where the Company has the first mortgage and the SBA has the second mortgage on the property. SBA 504 loans are made based primarily on the historical and projected cash flow of the business and secondarily on the underlying collateral provided. Generally, the Company has a 50 percent loan to value ratio on SBA 504 program loans at origination.

Commercial Loans: Commercial credit is extended primarily to middle market and small business customers. Commercial loans are generally made in the Company's market place for the purpose of providing working capital, financing the purchase of equipment, inventory or commercial real estate and for other business purposes. Loans will generally be guaranteed in full or for a meaningful amount by the businesses' major owners. Commercial loans are made based primarily on the historical and projected cash flow of the business and secondarily on the underlying collateral provided.

Residential Mortgage and Consumer Loans: The Company originates mortgage and consumer loans including principally residential real estate and home equity lines and loans and consumer construction lines. Each loan type is evaluated on debt to income, type of collateral and loan to collateral value, credit history and Company's relationship with the borrower.

Inherent in the lending function is credit risk, which is the possibility a borrower may not perform in accordance with the contractual terms of their loan. A borrower's inability to pay their obligations according to the contractual terms can create the risk of past due loans and, ultimately, credit losses, especially on collateral deficient loans. The Company minimizes its credit risk by loan diversification and adhering to credit administration policies and procedures. Due diligence on loans begins when we initiate contact regarding a loan with a borrower. Documentation, including a borrower's credit history, materials establishing the value and liquidity of potential collateral, the purpose of the loan, the source of funds for repayment of the loan, and other factors, are analyzed before a loan is submitted for approval. The loan portfolio is then subject to on-going internal reviews for credit quality which in part is derived from ongoing collection and review of borrowers' financial information, as well as independent credit reviews by an outside firm.

The Company's extension of credit is governed by the Credit Risk Policy which was established to control the quality of the Company's loans. These policies and procedures are reviewed and approved by the Board of Directors on a regular basis.

Credit Ratings

For SBA 7(a), SBA 504 and commercial loans, management uses internally assigned risk ratings as the best indicator of credit quality. A loan's internal risk rating is updated at least annually and more frequently if circumstances warrant a change in risk rating. The Company uses a 1 through 10 loan grading system that follows regulatorily accepted definitions.

Pass: Risk ratings of 1 through 6 are used for loans that are performing, as they meet, and are expected to continue to meet, all of the terms and conditions set forth in the original loan documentation, and are generally current on principal and interest payments. These performing loans are termed "Pass".

Special Mention: Criticized loans are assigned a risk rating of 7 and termed "Special Mention", as the borrowers exhibit potential credit weaknesses or downward trends deserving management's close attention. If not checked or corrected, these trends will weaken the Bank's collateral and position. While potentially weak, these borrowers are currently marginally acceptable and no loss of interest or principal is anticipated. As a result, special mention assets do not expose an institution to sufficient risk to warrant adverse classification. Included in "Special Mention" could be turnaround situations, such as borrowers with deteriorating trends beyond one year, borrowers in startup or deteriorating industries, or borrowers with a poor market share in an average industry. "Special Mention" loans may include an element of asset quality, financial flexibility, or below average management. Management and ownership may have limited depth or experience. Regulatory agencies have agreed on a consistent definition of "Special Mention" as an asset with potential weaknesses which, if left uncorrected, may result in deterioration of the repayment prospects for the asset or in the Bank's credit position at some future date. This definition is intended to ensure that the "Special Mention" category is not used to identify assets that have as their sole weakness credit data exceptions or collateral documentation exceptions that are not material to the repayment of the asset.

Substandard: Classified loans are assigned a risk rating of an 8 or 9, depending upon the prospect for collection, and deemed "Substandard". A risk rating of 8 is used for borrowers with well-defined weaknesses that jeopardize the orderly liquidation of debt. The loan is inadequately protected by the current paying capacity of the obligor or by the collateral pledged, if any. Normal repayment from the borrower is in jeopardy, although no loss of principal is

envisioned. There is a distinct possibility that a partial loss of interest and/or principal will occur if the deficiencies are not corrected. Loss potential, while existing in the aggregate amount of substandard assets, does not have to exist in individual assets classified "Substandard".

A risk rating of 9 is used for borrowers that have all the weaknesses inherent in a loan with a risk rating of 8, with the added characteristic that the weaknesses make collection of debt in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. Serious problems exist to the point where partial loss of principal is likely. The possibility of loss is extremely high, but because of certain important, reasonably specific pending factors that may work to strengthen the assets, the loans' classification as estimated losses is deferred until a more exact status may be determined. Pending factors include proposed merger, acquisition, or liquidation procedures; capital injection; perfecting liens on additional collateral; and refinancing plans. Partial charge-offs are likely.

The tables below detail the Company's loan portfolio by class according to their credit quality indicators discussed in the paragraphs above as of December 31, 2015:

(In thousands)	December 31, 2015 SBA, SBA 504 & Commercial loans - Internal risk ratings			
	Pass	Special mention	Substandard	Total
SBA loans held for investment	\$35,032	\$ 2,647	\$ 1,714	\$39,393

Total residential mortgage and consumer loans	\$ 338,766	\$ 2,814	\$341,580

Nonperforming and Past Due Loans

Nonperforming loans consist of loans that are not accruing interest (nonaccrual loans) as a result of principal or interest being in default for a period of 90 days or more or when the ability to collect principal and interest according to the contractual terms is in doubt. Loans past due 90 days or more and still accruing interest are not included in nonperforming loans and generally represent loans that are well collateralized and in a continuing process expected to result in repayment or restoration to current status. The risk of loss is difficult to quantify and is subject to fluctuations in collateral values, general economic conditions and other factors. The improved state of the economy has resulted in a substantial reduction in nonperforming loans and loan delinquencies. The Company values its collateral through the use of appraisals, broker price opinions, and knowledge of its local market.

The following tables set forth an aging analysis of past due and nonaccrual loans as of June 30, 2016 and December 31, 2015:

(In thousands)	June 30, 2016			Nonaccrual (1)	Total past due	Current	Total loans
	30-59 days past due	60-89 days past due	90+ days and still accruing				
SBA loans held for investment	\$763	\$315	\$ —	\$ 1,616	\$2,694	\$37,312	\$40,006
SBA 504 loans	—	—	—	513	513	26,525	27,038
Commercial loans							
Commercial other	2	—	—	1,529	1,531	50,450	51,981

Consumer loans							
Home equity	130	3	—	590	723	44,319	45,042
Consumer other	1	—	—	—	1	32,014	32,015
Total loans held for investment	\$4,548	\$1,820	\$ —	\$ 7,260	\$13,628	\$862,216	\$875,844
SBA loans held for sale	—	—	—	—	—	13,114	13,114
Total loans	\$4,548	\$1,820	\$ —	\$ 7,260	\$13,628	\$875,330	\$888,958

At December 31, 2015, nonaccrual loans included \$293 thousand of TDRs and \$288 thousand of loans guaranteed (1)by the SBA. The remaining \$3.0 million of TDRs are in accrual status because they are performing in accordance with their restructured terms.

Impaired Loans

The Company has defined impaired loans to be all nonperforming loans individually evaluated for impairment and TDRs. Management considers a loan impaired when, based on current information and events, it is determined that the Company will not be able to collect all amounts due according to the loan contract. Impairment is evaluated on an individual basis for SBA, SBA 504, and commercial loans.

The following table provides detail on the Company's impaired loans that are individually evaluated for impairment with the associated allowance amount, if applicable, as of June 30, 2016:

(In thousands)	June 30, 2016		
	Unpaid principal balance	Recorded investment	Specific reserves
With no related allowance:			
SBA loans held for investment (1)	\$ 1,097	\$ 719	\$ —

Total commercial loans	3,062	3,040	137
Total individually evaluated impaired loans	\$8,452	\$ 7,173	\$ 842

(1) Balances are reduced by amount guaranteed by the SBA of \$288 thousand at December 31, 2015.

The following tables present the average recorded investments in impaired loans and the related amount of interest recognized during the time period in which the loans were impaired for the three and six months ended June 30, 2016 and 2015. The average balances are calculated based on the month-end balances of impaired loans. When the ultimate collectability of the total principal of an impaired loan is in doubt and the loan is on nonaccrual status, all payments are applied to principal under the cost recovery method, and therefore no interest income is recognized. The interest income recognized on impaired loans noted below represents primarily accruing TDRs and nominal amounts of income recognized on a cash basis for well-collateralized impaired loans.

(In thousands)	For the three months ended June 30,			
	2016		2015	
	Average recorded investment	Interest income recognized on impaired loans	Average recorded investment	Interest income recognized on impaired loans
SBA loans held for investment (1)	\$1,640	\$ 1	\$1,873	\$ 2
SBA 504 loans	513	—	1,996	26
Commercial loans				
Commercial other	929	14	1,073	38
Commercial real estate	1,273	19	4,521	9
Commercial real estate construction	339	—	—	—
Total	\$4,694	\$ 34	\$9,463	\$ 75

(1) Balances are reduced by the average amount guaranteed by the SBA of \$218 thousand and \$269 thousand for the three months ended June 30, 2016 and 2015, respectively.

(In thousands)	For the six months ended June 30,			
	2016		2015	
	Average recorded investment	Interest income recognized on impaired loans	Average recorded investment	Interest income recognized on impaired loans
SBA loans held for investment (1)	\$1,822	\$ 3	\$1,935	\$ 39
SBA 504 loans	1,082	—	2,933	53
Commercial loans				
Commercial other	496	38	1,095	56
Commercial real estate	1,662	31	4,778	71
Commercial real estate construction	288	—	—	—
Total	\$5,350	\$ 72	\$10,741	\$ 219

(1) Balances are reduced by the average amount guaranteed by the SBA of \$241 thousand and \$534 thousand for the six months ended June 30, 2016 and 2015, respectively.

TDRs

The Company's loan portfolio also includes certain loans that have been modified as TDRs. TDRs occur when a creditor, for economic or legal reasons related to a debtor's financial condition, grants a concession to the debtor that it would not otherwise consider, unless it results in a delay in payment that is insignificant. These concessions typically include reductions in interest rate, extending the maturity of a loan, or a combination of both. When the Company

modifies a loan, management evaluates for any possible impairment using either the discounted cash flows method, where the value of the modified loan is based on the present value of expected cash flows, discounted at the contractual interest rate of the original loan agreement, or by using the fair value of the collateral less selling costs if the loan is collateral-dependent. If management determines that the value of the modified loan is less than the recorded investment in the loan, impairment is recognized by segment or class of loan, as applicable, through an allowance estimate or charge-off to the allowance. This process is used, regardless of loan type, and for loans modified as TDRs that subsequently default on their modified terms.

TDRs of \$933 thousand and \$3.3 million are included in the impaired loan numbers as of June 30, 2016 and December 31, 2015, respectively. The decrease was due to the payoff of three loans and principal pay downs. At June 30, 2016, there were specific reserves of \$70 thousand on TDRs, \$35 thousand on performing TDRs and \$35 thousand on nonperforming TDRs. At December 31, 2015, there were specific reserves of \$208 thousand on TDRs, \$167 thousand on performing TDRs and \$41 thousand on nonperforming TDRs. At June 30, 2016, \$161 thousand of TDRs were in nonaccrual status, compared to \$293 thousand at December 31, 2015. The remaining TDRs are in accrual status since they continue to perform in accordance with their restructured terms.

To date, the Company's TDRs consisted of interest rate reductions and maturity extensions. There has been no principal forgiveness. There were no loans modified during the three or six months ended June 30, 2016 and 2015 that were deemed to be TDRs.

There were no loans modified as a TDR within the previous 12 months that subsequently defaulted at some point during the three or six months ended June 30, 2016. In this case, the subsequent default is defined as 90 days past due or transferred to nonaccrual status.

NOTE 9. Allowance for Loan Losses and Reserve for Unfunded Loan Commitments

Allowance for Loan Losses

The Company has an established methodology to determine the adequacy of the allowance for loan losses that assesses the risks and losses inherent in the loan portfolio. At a minimum, the adequacy of the allowance for loan losses is reviewed by management on a quarterly basis. For purposes of determining the allowance for loan losses, the Company has segmented the loans in its portfolio by loan type. Loans are segmented into the following pools: SBA 7(a), SBA 504, commercial, residential mortgages, and consumer loans. Certain portfolio segments are further broken down into classes based on the associated risks within those segments and the type of collateral underlying each loan. Commercial loans are divided into the following four classes: commercial real estate, commercial real estate construction, unsecured business line of credit and commercial other. Consumer loans are divided into two classes as follows: Home equity and other.

The standardized methodology used to assess the adequacy of the allowance includes the allocation of specific and general reserves. The same standard methodology is used, regardless of loan type. Specific reserves are made to individual impaired loans and TDRs (see Note 1 for additional information on this term). The general reserve is set based upon a representative average historical net charge-off rate adjusted for the following environmental factors: delinquency and impairment trends, charge-off and recovery trends, changes in the volume of restructured loans, volume and loan term trends, changes in risk and underwriting policy trends, staffing and experience changes, national and local economic trends, industry conditions and credit concentration changes. Within the five-year historical net charge-off rate, the Company weights the past three years more heavily as it believes it is more indicative of future charge-offs. All of the environmental factors are ranked and assigned a basis points value based on the following scale: low, low moderate, moderate, high moderate and high risk. Each environmental factor is evaluated separately for each class of loans and risk weighted based on its individual characteristics.

For SBA 7(a), SBA 504 and commercial loans, the estimate of loss based on pools of loans with similar characteristics is made through the use of a standardized loan grading system that is applied on an individual loan level and updated on a continuous basis. The loan grading system incorporates reviews of the financial performance of the borrower, including cash flow, debt-service coverage ratio, earnings power, debt level and equity position, in conjunction with an assessment of the borrower's industry and future prospects. It also incorporates analysis of the type of collateral and the relative loan to value ratio.

For residential mortgage and consumer loans, the estimate of loss is based on pools of loans with similar characteristics. Factors such as credit score, delinquency status and type of collateral are evaluated. Factors are

updated frequently to capture the recent behavioral characteristics of the subject portfolios, as well as any changes in loss mitigation or credit origination strategies, and adjustments to the reserve factors are made as needed.

According to the Company's policy, a loss ("charge-off") is to be recognized and charged to the allowance for loan losses as soon as a loan is recognized as uncollectable. All credits which are 90 days past due must be analyzed for the Company's ability to collect on the credit. Once a loss is known to exist, the charge-off approval process is immediately expedited. This charge-off policy is followed for all loan types.

The allocated allowance is the total of identified specific and general reserves by loan category. The allocation is not necessarily indicative of the categories in which future losses may occur. The total allowance is available to absorb losses from any segment of the portfolio. An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in methodologies for estimating allocated and general reserves in the portfolio. The unallocated portion of the allowance decreased during the quarter ended June 30, 2016, to \$149 thousand from \$162 thousand at December 31, 2015.

The following tables detail the activity in the allowance for loan losses by portfolio segment for the three months ended June 30, 2016 and 2015:

(In thousands)	For the three months ended June 30, 2016						Total
	SBA held for investment	SBA 504	Commercial	Residential	Consumer	Unallocated

Changes in Methodology:

The Company did not make any changes to its allowance for loan losses methodology in the current period.

Reserve for Unfunded Loan Commitments

In addition to the allowance for loan losses, the Company maintains a reserve for unfunded loan commitments at a level that management believes is adequate to absorb estimated probable losses. Adjustments to the reserve are made through other expense and applied to the reserve which is classified as other liabilities. At June 30, 2016, a \$183 thousand commitment reserve was reported on the balance sheet as an “other liability”, compared to a \$138 thousand commitment reserve at December 31, 2015, due to a larger loan portfolio requiring a larger general reserve.

NOTE 10. New Accounting Pronouncements

ASU 2014-09, “Revenue from Contracts with Customers (Topic 606).” This ASU has three sections:

Section A – Summary and amendments that creates revenue from contracts with customers (Topic 606) and Other Assets and Deferred Costs – Contracts with Customers (Subtopic 340-40);

Section B – Conforming amendments to other topics and subtopics in the codification and status tables;

Section C – Background information and basis for conclusions.

The accounting changes in this update have been revised to defer the effective date for public business entities to annual reporting periods beginning after December 15, 2017 and the interim periods within that year. Early adoption is permitted as of the first interim or annual period beginning after December 15, 2016. The Company is currently evaluating the impact of the standard.

ASU 2015-01, “Income Statement-Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items.” ASU 2015-01 seeks to eliminate from generally accepted accounting principles (“GAAP”) the concept of extraordinary items. Presently, an event or transaction is presumed to be an ordinary and usual activity of the reporting entity unless evidence clearly supports its classification as an extraordinary item. The guidance was issued as part of an initiative to reduce complexity in accounting standards. The amendments in this update are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. A reporting entity may apply the amendments prospectively. A reporting entity also may apply the amendments retrospectively to all prior periods presented in the financial statements. Early adoption is permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The effective date is the same for both public business entities and all other entities. The Company does not expect adoption of this guidance to have a material effect on the financial condition or results of operations of the Company.

ASU No. 2016-01, “Financial Instruments – Overall (Subtopic 825-10) – Recognition and Measurement of Financial Assets and Financial Liabilities.” ASU 2016-01 addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. This eliminates the available for sale classification of accounting for equity securities and adjusts the fair value disclosures for financial instruments carried at amortized cost such that the disclosed fair values represent an exit price as opposed to an entry price. This update requires that equity securities be carried at fair value on the balance sheet and any periodic changes in value will be adjusted through the income statement. A practical expedient is provided for equity securities without a readily determinable fair value, such that these securities can be carried at cost less any impairment. For public business entities, the amendments in this update are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The Company is currently evaluating the impact of the standard.

ASU 2016-02, “Leases (Topic 842)”. ASU 2016-02 was issued in three parts: (a) Section A, “Leases: Amendments to the FASB Accounting Standards Codification®,” (b) Section B, “Conforming Amendments Related to Leases:

Amendments to the FASB Accounting Standards Codification®,” and (c) Section C, “Background Information and Basis for Conclusions.” While both lessees and lessors are affected by the new guidance, the effects on lessees are much more significant. The update states that a lessee should recognize the assets and liabilities that arise from all leases with a term greater than 12 months. The core principle requires the lessee to recognize a liability to make lease payments and a "right-of-use" asset. The accounting applied by the lessor is relatively unchanged as the majority of operating leases should remain classified as operating leases and the income from them recognized, generally, on a straight-line basis over the lease term. The standards update also requires expanded qualitative and quantitative disclosures. For public business entities, ASC 2016-02 is effective for interim and annual reporting periods beginning after December 15, 2018. ASC 2016-02 mandates a modified retrospective transition for all entities. The Company is currently evaluating the impact of the adoption of ASC 2016-02 on its consolidated financial statements.

ASU 2016-09, “Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting.” ASU 2016-09 was issued as part of FASB’s simplification initiative as a result of its post-implementation review of FASB Statement No. 123(R), Share-Based Payment. Areas addressed include the accounting for income taxes, classification of awards as either equity or liabilities and classification on the statement of cash flows. For public business entities, ASU 2016-09 is effective for interim and annual reporting periods beginning after December 15, 2016. The Company is currently evaluating the impact of the adoption of ASU 2016-09 on its consolidated financial statements.

ASU 2016-13, “Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments.” ASU 2016-13, was issued to provide financial statement users with information about expected credit losses on financial instruments and other commitments to extend credit rather than the current “incurred loss” model. For public business entities, ASU 2016-13 is effective for interim and annual reporting periods beginning after December 15, 2019. The Company is currently evaluating the impact of the adoption of ASU 2016-09 on its consolidated financial statements.

NOTE 11. Derivative Financial Instruments and Hedging Activities

Derivative Financial Instruments

The Company has derivative financial instruments in the form of interest rate swap agreements, which derive their value from underlying interest rates. These transactions involve both credit and market risk. The notional amounts are amounts on which calculations, payments, and the value of the derivatives are based. Notional amounts do not represent direct credit exposures. Direct credit exposure is limited to the net difference between the calculated amounts to be received and paid, if any. Such difference, which represents the fair value of the derivative instrument, is reflected on the Company’s balance sheet as other assets or other liabilities.

The Company is exposed to credit-related losses in the event of nonperformance by the counterparties to any derivative agreement. The Company controls the credit risk of its financial contracts through credit approvals, limits and monitoring procedures, and does not expect any counterparties to fail their obligations. The Company deals only with primary dealers.

Derivative instruments are generally either negotiated OTC contracts or standardized contracts executed on a recognized exchange. Negotiated OTC derivative contracts are generally entered into between two counterparties that negotiate specific agreement terms, including the underlying instrument, amount, exercise prices and maturity.

Risk Management Policies – Hedging Instruments

The primary focus of the Company’s asset/liability management program is to monitor the sensitivity of the Company’s net portfolio value and net income under varying interest rate scenarios to take steps to control its risks. On a quarterly basis, the Company evaluates the effectiveness of entering into any derivative agreement by measuring the cost of such an agreement in relation to the reduction in net portfolio value and net income volatility within an assumed range of interest rates.

Interest Rate Risk Management – Cash Flow Hedging Instruments

The Company has variable rate debt as a source of funds for use in the Company’s lending and investment activities and for other general business purposes. These debt obligations expose the Company to variability in interest payments due to changes in interest rates. If interest rates increase, interest expense increases. Conversely, if interest rates decrease, interest expense decreases. Management believes it is prudent to limit the variability of a portion of its interest payments and, therefore hedges its variable-rate interest payments. To meet this objective, management enters into interest rate swap agreements whereby the Company receives variable interest rate payments and makes

fixed interest rate payments during the contract period.

39

During the three and six months ended June 30, 2016, the Company received variable rate Libor payments from and paid fixed rates in accordance with its interest rate swap agreements. A summary of the Company's outstanding interest rate swap agreements used to hedge variable rate debt at June 30, 2016 and 2015, respectively is as follows:

	For the three months ended June 30,		For the six months ended June 30,	
(In thousands, except percentages and years)	2016	2015	2016	2015
Notional amount	\$40,000	\$ —	-\$40,000	\$ —
Weighted average pay rate	1.36 %	—	1.36 %	—
Weighted average receive rate	0.65 %	—	0.64 %	—
Weighted average maturity in years	4.04	0.00	4.04	0.00
Unrealized loss relating to interest rate swaps	\$(366)	\$ —	-\$ (858)	\$ —

At June 30, 2016, the unrealized loss relating to interest rate swaps was recorded as a derivative liability. Changes in the fair value of the interest rate swaps designated as hedging instruments of the variability of cash flows associated with long-term debt are reported in other comprehensive income.

NOTE 12. Repurchase of Subordinated Debentures

On February 26, 2016, the Company repurchased \$5.2 million of its outstanding subordinated debentures, reducing its outstanding subordinated debt to \$10.3 million. The subordinated debentures were repurchased at a price of \$0.5475 per dollar, resulting in a pre-tax gain of \$2.3 million. This gain is included in noninterest income on the income statement.

The subordinated debentures were previously issued by Unity (NJ) Statutory Trust III, a statutory business trust and wholly-owned subsidiary of Unity Bancorp, Inc., on December 19, 2006 and were due on December 19, 2036. The floating interest rate was 3 month Libor plus 165 basis points and repriced quarterly. Upon completion of the transaction, Unity (NJ) Statutory Trust III was dissolved effective March 4, 2016.

These securities qualified as Tier 1 capital under the terms of the Dodd-Frank Wall Street Reform and Consumer Protection Act and thus repurchasing them reduced Tier 1 capital.

ITEM 2 Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of financial condition and results of operations should be read in conjunction with the 2015 consolidated audited financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2015. When necessary, reclassifications have been made to prior period data throughout the following discussion and analysis for purposes of comparability. This Quarterly Report on Form 10-Q contains certain “forward looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995, which may be identified by the use of such words as “believe”, “expect”, “anticipate”, “should”, “planned”, “estimated” “potential”. Examples of forward looking statements include, but are not limited to, estimates with respect to the financial condition, results of operations and business of Unity Bancorp, Inc. that are subject to various factors which could cause actual results to differ materially from these estimates. These factors include, in addition to those items contained in the Company’s Annual Report on Form 10-K under Item IA-Risk Factors, as updated by our subsequent Quarterly Reports on Form 10-Q, the following: changes in general, economic, and market conditions, legislative and regulatory conditions, or the development of an interest rate environment that adversely affects Unity Bancorp, Inc.’s interest rate spread or other income anticipated from operations and investments.

Overview

Unity Bancorp, Inc. (the “Parent Company”) is incorporated in New Jersey and is registered as a bank holding company under the Bank Holding Company Act of 1956, as amended. Its wholly-owned subsidiary, Unity Bank (the “Bank” or, when consolidated with the Parent Company, the “Company”) was granted a charter by the New Jersey Department of Banking and Insurance and commenced operations on September 13, 1991. The Bank provides a full range of commercial and retail banking services through 15 branch offices located in Hunterdon, Somerset, Middlesex, Union and Warren counties in New Jersey, and Northampton County in Pennsylvania as well as a loan production office in Bergen County, New Jersey. These services include the acceptance of demand, savings, and time deposits and the extension of consumer, real estate, SBA and other commercial credits. The Bank has multiple subsidiaries used to hold part of its investment and loan portfolios and OREO properties.

Unity (NJ) Statutory Trust II is a statutory business trust and wholly owned subsidiary of Unity Bancorp, Inc. On July 24, 2006, the Trust issued \$10.0 million of trust preferred securities to investors. These floating rate securities are treated as subordinated debentures on the Company’s financial statements. However, they qualify as Tier I Capital for regulatory capital compliance purposes, subject to certain limitations. The Company does not consolidate the accounts and related activity of any of its business trust subsidiaries.

Earnings Summary

Net income totaled \$2.8 million, or \$0.33 per diluted share for the quarter ended June 30, 2016, compared to \$2.4 million, or \$0.28 per diluted share for the same period a year ago. Return on average assets and average common equity for the quarter were 1.03% and 13.59%, respectively, compared to 1.01 % and 13.35% for the same period a year ago.

Second quarter highlights include:

- Consumer and commercial loans increased 9.4% and 3.5%, respectively, while total loans increased 2.9% since year end 2015.
- Noninterest-bearing demand deposits rose 13.4% and total deposits increased 2.0% since year-end 2015.
- Net interest income increased 11.6% compared to the prior year’s quarter due to strong loan growth.
- Net interest margin equaled 3.61% this quarter compared to 3.70% in the prior years' quarter.
- Credit quality continued to improve. Nonperforming loans fell 26.0% from June 30, 2015.

For the six months ended June 30, 2016, net income totaled \$7.0 million, or \$0.82 per diluted share, compared to \$4.4 million, or \$0.51 per diluted share, in the prior year's period. Return on average assets and average common equity for the six month periods were 1.28% and 17.25%, respectively, compared to 0.92% and 12.23% for the same period a year ago.

During the first quarter, the Company repurchased \$5.0 million of its outstanding subordinated debentures, resulting in a pre-tax gain of \$2.3 million on the transaction. This gain is included in noninterest income on the income statement. Net income, excluding the nonrecurring gain on the repurchased subordinated debentures, was \$5.6 million, or \$0.65 per diluted share, for the six months ended June 30, 2016, compared to net income of \$4.4 million, or \$0.51 per diluted share, for the same period a year ago. Return on average assets and average common equity for the six months ended June 30, 2016 would have been 1.01% and 13.63%, respectively, compared to 0.92% and 12.23% for the same period a year ago.

The Company's quarterly performance ratios may be found in the table below.

	For the three months ended June 30,		For the six months ended June 30,	
	2016	2015	2016	2015
Net income per common share - Basic (1)	\$0.33	\$0.29	\$0.83	\$0.52
Net income per common share - Diluted (1)	\$0.33	\$0.28	\$0.82	\$0.51
Return on average assets	1.03 %	1.01 %	1.28 %	0.92 %
Return on average equity (2)	13.59 %	13.35 %	17.25 %	12.23 %
Efficiency ratio	58.53 %	64.99 %	54.06 %	66.12 %

The Company's quarterly performance ratios, net of gain on subordinated debenture, may be found in the table below.

	For the three months ended June 30,		For the six months ended June 30,	
	2016	2015	2016	2015
Net income per common share - Basic (1)	\$0.33	\$0.29	\$0.66	\$0.52
Net income per common share - Diluted (1)	\$0.33	\$0.28	\$0.65	\$0.51
Return on average assets	1.03 %	1.01 %	1.01 %	0.92 %
Return on average equity (2)	13.59 %	13.35 %	13.63 %	12.23 %
Efficiency ratio	58.53 %	64.99 %	59.53 %	66.12 %

(1) Defined as net income divided by weighted average shares outstanding.

(2) Defined as net income divided by average shareholders' equity.

Net Interest Income

The primary source of the Company's operating income is net interest income, which is the difference between interest and dividends earned on earning assets and fees earned on loans, and interest paid on interest-bearing liabilities. Earning assets include loans to individuals and businesses, investment securities, interest-earning deposits and federal funds sold. Interest-bearing liabilities include interest-bearing demand, savings and time deposits, FHLB advances and other borrowings. Net interest income is determined by the difference between the yields earned on earning assets and the rates paid on interest-bearing liabilities ("net interest spread") and the relative amounts of earning assets and interest-bearing liabilities. The Company's net interest spread is affected by regulatory, economic and competitive factors that influence interest rates, loan demand, deposit flows and general levels of nonperforming assets.

During the quarter ended June 30, 2016, tax-equivalent net interest income amounted to \$9.4 million, an increase of \$967 thousand or 11.5 percent when compared to the same period in 2015. The net interest margin decreased 9 basis points to 3.61 percent for the quarter ended June 30, 2016, compared to 3.70 percent for the same period in 2015. The net interest spread was 3.39 percent for the second quarter of 2016, a 10 basis point decrease compared to the same period in 2015.

During the three months ended June 30, 2016, tax-equivalent interest income was \$11.5 million, an increase of \$1.3 million or 12.3 percent when compared to the same period in the prior year. This increase was mainly driven by the increase in the balance of average loans:

Of the \$1.3 million net increase in interest income on a tax-equivalent basis, \$1.1 million of the increase was due to increased average earning assets, and \$141 thousand was due to increased yields on the earning assets.

The average volume of interest-earning assets increased \$133.8 million to \$1.0 billion for the second quarter of 2016 compared to \$909.9 million for the same period in 2015. This was due primarily to a \$95.1 million increase in average loans, primarily commercial, residential mortgage and consumer loans, along with a \$42.4 million increase in federal funds sold and interest-bearing deposits, partially offset by a \$4.9 million decrease in average investment securities.

The yield on total interest-earning assets decreased 8 basis points to 4.44 percent for the three months ended June 30, 2016 when compared to the same period in 2015 due to higher balances in lower yielding federal funds and interest-bearing deposits.

Total interest expense was \$2.1 million for the three months ended June 30, 2016, an increase of \$296 thousand or 16 percent compared to the same period in 2015. This increase was driven by the increase in average time deposits and increased rates on savings deposits compared to a year ago:

Of the \$296 thousand increase in interest expense, \$356 thousand was due to an increase in the volume of average interest-bearing liabilities, partially offset by \$60 thousand in reduced interest rates paid on our borrowed funds and subordinated debenture.

Interest-bearing liabilities averaged \$821.6 million for the second quarter of 2016, an increase of \$101.6 million or 14.0 percent, compared to the prior year's quarter. The increase in interest-bearing liabilities was primarily due to an increase in average time and savings deposits, and borrowed funds and subordinated debentures.

The average cost of total interest-bearing liabilities increased 2 basis point to 1.05 percent. While the cost of interest-bearing deposits increased 12 basis points to 0.82 percent for the second quarter of 2016, the cost of borrowed funds and subordinated debentures decreased 82 basis points to 2.60 percent due to the modification of borrowings with the FHLB over the past year. The increase in the cost of deposits was primarily driven by the intentional growth of five year time deposits and a promotional savings product.

During the six months ended June 30, 2016, tax-equivalent net interest income amounted to \$18.4 million, an increase of \$1.9 million or 11.7 percent when compared to the same period in 2015. The net interest margin decreased 12 basis points to 3.55 percent for the six months ended June 30, 2016, compared to 3.67 percent for the same period in 2015. The net interest spread was 3.33 percent for the first six months of 2016, a 13 basis point decrease compared to the same period in 2015.

During the six months ended June 30, 2016, tax-equivalent interest income was \$22.7 million, an increase of \$2.6 million or 12.6 percent when compared to the same period in the prior year. This increase was driven by the increase in the balance of average loans:

Of the \$2.6 million net increase in interest income on a tax-equivalent basis, \$2.5 million of the increase was due to increased average earning assets, and \$54 thousand was due to increased yields on securities and federal funds sold and interest-bearing deposits.

The average volume of interest-earning assets increased \$139 million to \$1.0 billion for the first six months of 2016 compared to \$903.3 million for the same period in 2015. This was due primarily to a \$104.1 million increase in average loans, primarily commercial and residential mortgage loans, and a \$41.9 million increase in federal funds sold and interest-bearing deposits, partially offset by a \$7.6 million decrease in average investment securities.

The yield on total interest-earning assets decreased 12 basis points to 4.38 percent for the six months ended June 30, 2016 when compared to the same period in 2015 due to the yield on the loan portfolio decreasing 3 basis points to 4.83 percent and a high volume of lower yielding Fed funds and interest-bearing deposits

Total interest expense was \$4.3 million for the six months ended June 30, 2016, an increase of \$621 thousand or 16.7 percent compared to the same period in 2015. This increase was driven by the increase in average savings and time deposits and increased rates on savings and time deposits compared to a year ago:

Of the \$621 thousand increase in interest expense, \$734 thousand was due to an increase in the volume of average interest-bearing liabilities, partially offset by a \$113 thousand reduction due primarily to decreased rates on borrowed funds and subordinated debentures.

Interest-bearing liabilities averaged \$824.8 million for first six months ended June 30, 2016, an increase of \$104.9 million or 14.6 percent, compared to the prior year's quarter. The increase in interest-bearing liabilities was a result of an increase in average savings and time deposits and borrowed funds and subordinated debentures.

The average cost of total interest-bearing liabilities increased slightly to 1.05 percent for the six months ended June 30, 2016. The cost of interest-bearing deposits increased 12 basis points to 0.81 percent for the six months ended June

30, 2016 due to a savings promotion and the cost of borrowed funds and subordinated debentures decreased 78 basis point to 2.71 percent.

Although our net interest income has increased over the periods noted above, we have been impacted by the sustained low interest rate environment. Recent remarks by the Federal Reserve Open Market Committee (“FOMC”) of the Federal Reserve Board indicate that only gradual increases in the federal funds rates will be warranted as inflation remains low in the near term but rises up to 2 percent over the medium term.

The following table reflects the components of net interest income, setting forth for the periods presented herein: (1) average assets, liabilities and shareholders' equity, (2) interest income earned on interest-earning assets and interest expense paid on interest-bearing liabilities, (3) average yields earned on interest-earning assets and average rates paid on interest-bearing liabilities, (4) net interest spread, and (5) net interest income/margin on average earning assets. Rates/Yields are computed on a fully tax-equivalent basis, assuming a federal income tax rate of 35 percent.

Edgar Filing: UNITY BANCORP INC /NJ/ - Form 10-Q

Net interest margin	3.55	%	3.67	%

Yields related to securities exempt from federal and state income taxes are stated on a fully tax-equivalent (A) basis. They are reduced by the nondeductible portion of interest expense, assuming a federal tax rate of 35 percent for 2016 and 34 percent for 2015, as well as all applicable state rates.

(B) The loan averages are stated net of unearned income, and the averages include loans on which the accrual of interest has been discontinued.

The rate volume table below presents an analysis of the impact on interest income and expense resulting from changes in average volume and rates over the periods presented. Changes that are not due to volume or rate variances have been allocated proportionally to both, based on their relative absolute values. Amounts have been computed on a tax-equivalent basis, assuming a federal income tax rate of 35 percent for 2016 and 34 percent for 2015.

Provision for Loan Losses

Provision for loan losses totaled \$400 thousand for the three months ended June 30, 2016, compared to no provision for loan losses for the three months ended June 30, 2015. For the six months ended June 30, 2016, the provision for loan losses totaled \$600 thousand, compared to \$200 thousand for the same period in 2015. Each period's loan loss provision is the result of management's analysis of the loan portfolio and reflects changes in the size and composition of the portfolio, the level of net charge-offs, delinquencies, current economic conditions and other internal and external factors impacting the risk within the loan portfolio. Additional information may be found under the captions "Financial Condition - Asset Quality" and "Financial Condition - Allowance for Loan Losses and Reserve for Unfunded Loan Commitments." The current provision is considered appropriate under management's assessment of the adequacy of the allowance for loan losses.

Noninterest Income

The following table shows the components of noninterest income for the three and six months ended June 30, 2016 and 2015:

(In thousands)	For the three months ended June 30,		For the six months ended June 30,	
	2016	2015	2016	2015
Branch fee income	\$286	\$373	\$619	\$719
Service and loan fee income	267	466	522	762

Edgar Filing: UNITY BANCORP INC /NJ/ - Form 10-Q

Gain on sale of SBA loans held for sale, net	637	—	945	363
Gain on sale of mortgage loans, net	593	687	1,308	1,031
BOLI income	93	95	187	189
Net security gains	81	28	175	28
Net gain on subordinated debenture	—	—	2,264	—
Other income	277	244	494	442
Total noninterest income	\$2,234	\$1,893	\$6,514	\$3,534

For the three months ended June 30, 2016, noninterest income increased \$341 thousand to \$2.2 million, compared to the same period last year. Quarterly noninterest income increased due to gains on the sale of Small Business Administration (SBA) loans. Year-to-date, noninterest income increased \$3.0 million to \$6.5 million due to a nonrecurring gain on the repurchase of subordinated debentures. The Company repurchased \$5.0 million of its outstanding debentures on February 26, 2016. The subordinated debentures were repurchased at a price of \$0.5475 per dollar, resulting in pre-tax gain of \$2.3 million on the transaction. Excluding the nonrecurring gain, noninterest income increased \$716 thousand to \$4.3 million due to higher gains on the sale of mortgage loans.

Changes in our noninterest income for the three and six months ended June 30, 2016 vs. 2015 reflects:

• Branch fee income declined in the quarterly and year-to-date periods due to lower levels of overdraft fees, partially offset by increased fees from commercial checking accounts.

• Service and loan fee income declined in the quarterly and year-to-date periods due to reduced loan payoff fees. SBA loans sales during the second quarter of 2016 totaled \$7.2 million with a net gain of \$637 thousand. There were no sales during the prior year's quarter. Year-to-date, SBA loan sales totaled \$10.6 million and \$3.5 million with net gains on sale of \$945 and \$363 thousand, respectively.

• During the quarter, \$26.0 million in residential mortgage loans were sold at a gain of \$593 thousand, compared to \$27.1 million in loans sold at a gain of \$ 687 thousand during the prior year's quarter.

• Security gains totaled \$81 thousand and \$28 thousand for the quarters ended June 30, 2016 and 2015, respectively.

• Year-to-date, security gains were \$175 thousand and \$28 thousand.

• Other income increased in the quarterly and year-to-date periods primarily due to an increase in ACH origination fees.

Noninterest Expense

The following table presents a breakdown of noninterest expense for the three and six months ended June 30, 2016 and 2015:

(In thousands)	For the three		For the six	
	months ended	months ended	months ended	months ended
	June 30,	June 30,	June 30,	June 30,
	2016	2015	2016	2015
Compensation and benefits	\$3,709	\$3,481	\$7,258	\$6,952
Occupancy	513	601	1,131	1,273
Processing and communications	600	614	1,198	1,210
Furniture and equipment	395	422	815	795
Professional services	239	242	494	478
Loan costs	59	160	257	382
OREO expenses	82	67	105	103
Deposit insurance	165	150	326	333
Advertising	303	343	544	525
Other expenses	663	572	1,210	1,103
Total noninterest expense	\$6,728	\$6,652	\$13,338	\$13,154

Noninterest expense increased \$76 thousand to \$6.7 million for the three months ended June 30, 2016, while year-to-date expense increased \$184 thousand to \$13.3 million. The majority of the increase in each period was due to higher compensation and employee benefit expenses.

Changes in noninterest expense for the three and six months ended June 30, 2016 versus 2015 reflect:

• Compensation and benefits expense, the largest component of noninterest expense, increased \$228 thousand and \$306 thousand for the three and six months ended June 30, 2016, respectively. Expenses have increased in both periods primarily due to higher employee salary and benefit expenses such as medical insurance, retirement and 401(k) plan benefits.

Occupancy expense decreased \$88 thousand and \$142 thousand for the three and six months ended June 30, 2016, respectively. The decreases for both periods were due to reduced property rental expense following the purchase of our headquarters, partially offset by increased building depreciation expense.

Processing and communications expenses decreased \$14 thousand and \$12 thousand for the three and six months ended June 30, 2016, respectively. In each period, expenses decreased due to lower data line and document delivery expenses, partially offset by increased product related expenses such as electronic banking and card related expenses.

Furniture and equipment expense decreased \$27 thousand and increased \$20 thousand for the three and six months ended June 30, 2016, respectively, primarily due to lower equipment depreciation and maintenance expense, offset by higher network expense as we continue to upgrade our current technology.

Professional service fees remained relatively flat for the three month period. For the six months ended June 30, 2016 professional service fees increased \$16 thousand due to higher consulting and external audit expense.

Loan costs decreased \$101 thousand and \$125 thousand for the three and six months ended June 30, 2016, respectively, when compared to the same periods in the prior year. Both decreases were primarily due to lower property tax and other loan expense.

OREO expenses increased \$15 thousand for the three months ended June 30, 2016 due to a loss on the sale of an OREO property. OREO expenses remained relatively flat for the six months ended June 30, 2016 when compared to the same period in the prior year.

Deposit insurance expense increased \$15 thousand for the three months ended June 30, 2016 due to a higher quarterly assessment base as our assets have increased. For the six months ended June 30, 2016, deposit insurance expense decreased \$7 thousand due to lower assessment rates when compared to the same period in the prior year due to improved financial ratios.

Advertising expense decreased \$40 thousand for the three months ended June 30, 2016, primarily due to lower marketing, events and community relations expense. For the six months ended June 30, 2016, advertising expense increased \$19 thousand due to higher marketing, community relations and printing expense, partially offset by a decrease in gift and promotion expenses when compared to the same period in the prior year.

Other expenses increased \$91 thousand and \$107 thousand for the three and six months ended June 30, 2016, respectively, primarily due to higher director fees, employee training and education expenses.

Income Tax Expense

For the quarter ended June 30, 2016, the Company reported income tax expense of \$1.6 million for an effective tax rate of 36.5 percent, compared to an income tax expense of 1.2 million and an effective tax rate of 32.7 percent for the prior year's quarter. For the six months ended June 30, 2016 the Company reported income tax expense of \$3.9 million for an effective tax rate of 35.6 percent, compared to an income expense of \$2.2 million and an effective tax rate of 33.5 percent for the six months ended June 30, 2015.

Financial Condition at June 30, 2016

Total assets increased \$43.5 million or 4.0 percent, to \$1.1 billion at June 30, 2016, when compared to year end 2015. This increase was primarily due to an increase of \$26.1 million in net loans, \$7.9 million in cash and cash equivalents, and \$2.7 million in securities.

Total deposits increased \$17.7 million, due to increases of \$24.8 million in noninterest-bearing demand deposits and \$16.7 million in savings deposits, partially offset by a decrease of \$13.4 million in interest-bearing demand deposits and \$10.4 million in time deposits. Borrowed funds increased \$22.0 million due to an increase of \$12.0 million in overnight borrowings and \$10.0 million in term borrowings. Subordinated debentures decreased \$5.2 million due to the repurchase of subordinated debentures during the first quarter of 2016.

Total shareholders' equity increased \$6.5 million over year end 2015, primarily due to earnings less the dividends paid for the six months ended June 30, 2016. These fluctuations are discussed in further detail in the paragraphs that follows.

Securities Portfolio

The Company's securities portfolio consists of AFS and HTM investments. Management determines the appropriate security classification of AFS and HTM at the time of purchase. The investment securities portfolio is maintained for asset-liability management purposes, as well as for liquidity and earnings purposes.

AFS securities are investments carried at fair value that may be sold in response to changing market and interest rate conditions or for other business purposes. Activity in this portfolio is undertaken primarily to manage liquidity and interest rate risk, to take advantage of market conditions that create economically attractive returns and as an additional source of earnings. AFS securities consist primarily of obligations of U.S. Government sponsored entities, obligations of state and political subdivisions, mortgage-backed securities, and corporate and other securities.

AFS securities totaled \$45.3 million at June 30, 2016, a decrease of \$7.6 million or 14.4 percent, compared to \$52.9 million at December 31, 2015. This net decrease was the result of:

- \$6.4 million in sales net of realized gains, which consisted of municipal securities,
- \$5.5 million in principal payments and maturities, and
- \$142 thousand in net amortization of premiums, partially offset by

\$4.2 million from the purchase of one agency note, one municipal security and three equity or community bank holdings, and

\$261 thousand of appreciation in the market value of the portfolio. At June 30, 2016, the portfolio had a net unrealized gain of \$257 thousand compared a net unrealized loss of \$4 thousand at December 31, 2015. These net unrealized gains (losses) are reflected net of tax in shareholders' equity as accumulated other comprehensive income.

The weighted average life of AFS securities, adjusted for prepayments, amounted to 4.7 years and 4.0 years at June 30, 2016 and December 31, 2015, respectively.

HTM securities, which are carried at amortized cost, are investments for which there is the positive intent and ability to hold to maturity. The portfolio is comprised primarily of U.S. Government sponsored entities, obligations of state and political subdivisions, mortgage-backed securities, and corporate and other securities.

HTM securities were \$28.7 million at June 30, 2016, an increase of \$10.3 million or 55.5 percent, from year end 2015. This increase was the result of:

- \$11.1 million from the purchase of six corporate bonds, partially offset by
- \$823 thousand in principal payments and maturities, and
- \$29 thousand in net amortization of premiums.

The weighted average life of HTM securities, adjusted for prepayments, amounted to 6.9 years and 6.5 years at June 30, 2016 and December 31, 2015, respectively. As of June 30, 2016 and December 31, 2015, the fair value of HTM securities was \$29.3 million and 18.6 million, respectively.

The average balance of taxable securities amounted to \$60.9 million for the six months ended June 30, 2016, compared to \$65.4 million for the same period in 2015. The average yield earned on taxable securities increased 30 basis points, to 2.61 percent for the six months ended June 30, 2016, from 2.31 percent for the same period in the prior year. The average balance of tax-exempt securities amounted to \$8.9 million for the six months ended June 30, 2016, compared to \$11.9 million for the same period in 2015. The average yield earned on tax-exempt securities increased 40 basis points, to 3.99 percent for the six months ended June 30, 2016, from 3.59 percent for the same period in 2015.

Securities with a carrying value of \$18.5 million at June 30, 2016 and December 31, 2015, were pledged to secure Government deposits, secure other borrowings and for other purposes required or permitted by law.

Approximately 84 percent of the total investment portfolio had a fixed rate of interest at June 30, 2016.

See Note 7 to the accompanying Consolidated Financial Statements for more information regarding Securities.

Loan Portfolio

The loan portfolio, which represents the Company's largest asset group, is a significant source of both interest and fee income. The portfolio consists of SBA, SBA 504, commercial, residential mortgage and consumer loans. Each of these segments is subject to differing levels of credit and interest rate risk.

Total loans increased \$26.1 million or 2.9 percent to \$915.0 million at June 30, 2016, compared to \$889.0 million at year end 2015. Commercial, consumer, residential mortgage and SBA loans increased \$16.2 million, \$7.2 million, \$4.3 million and \$744 thousand, respectively, partially offset by a decrease of \$2.3 million in SBA 504 loans.

The following table sets forth the classification of loans by major category, including unearned fees and deferred costs and excluding the allowance for loan losses as of June 30, 2016 and December 31, 2015:

(In thousands, except percentages)	June 30, 2016		December 31, 2015	
	Amount	% of total	Amount	% of total
SBA loans held for investment	\$40,006	4.4 %	\$39,393	4.4 %
SBA 504 loans	27,038	3.0	29,353	3.3
Commercial loans	481,713	52.6	465,518	52.3
Residential mortgage loans	268,774	29.4	264,523	29.8
Consumer loans	84,267	9.2	77,057	8.7
Total loans held for investment	901,798	98.6	875,844	98.5
SBA loans held for sale	13,245	1.4	13,114	1.5
Total loans	\$915,043	100.0%	\$888,958	100.0%

Average loans increased \$104.1 million or 13.1 percent to \$897.5 million for the six months ended June 30, 2016 from \$793.4 million for the same period in 2015. The increase in average loans was due to increases in commercial, residential mortgages, consumer, and SBA 7(a) loans, partially offset by a decline in SBA 504 loans. The yield on the overall loan portfolio decreased 3 basis points to 4.83 percent for the six months ended June 30, 2016 when compared to the same period in the prior year.

SBA 7(a) loans, on which the SBA historically has provided guarantees of up to 90 percent of the principal balance, are considered a higher risk loan product for the Company than its other loan products. These loans are made for the purposes of providing working capital or financing the purchase of equipment, inventory or commercial real estate. Generally, an SBA 7(a) loan has a deficiency in its credit profile that would not allow the borrower to qualify for a traditional commercial loan, which is why the SBA provides the guarantee. The deficiency may be a higher loan to value (“LTV”) ratio, lower debt service coverage (“DSC”) ratio or weak personal financial guarantees. In addition, many SBA 7(a) loans are for start up businesses where there is no history or financial information. Finally, many SBA borrowers do not have an ongoing and continuous banking relationship with the Bank, but merely work with the Bank on a single transaction. The guaranteed portion of the Company’s SBA loans are generally sold in the secondary market with the nonguaranteed portion held in the portfolio as a loan held for investment.

SBA 7(a) loans held for sale, carried at the lower of cost or market, amounted to \$13.2 million at June 30, 2016, an increase of \$131 thousand from \$13.1 million at December 31, 2015. SBA 7(a) loans held to maturity amounted to \$40.0 million at June 30, 2016, an increase of \$613 thousand from \$39.4 million at December 31, 2015. The yield on SBA loans, which are generally floating and adjust quarterly to the Prime rate, was 5.48 percent for the six months ended June 30, 2016, compared to 5.41 percent in the prior year.

The guarantee rates on SBA 7(a) loans range from 50 percent to 90 percent, with the majority of the portfolio having a guarantee rate of 75 percent at origination. The guarantee rates are determined by the SBA and can vary from year to year depending on government funding and the goals of the SBA program. The carrying value of SBA loans held for sale represents the guaranteed portion to be sold into the secondary market. The carrying value of SBA loans held to maturity represents the unguaranteed portion, which is the Company’s portion of SBA loans originated, reduced by the guaranteed portion that is sold into the secondary market. Approximately \$84.2 million and \$80.0 million in SBA loans were sold but serviced by the Company at June 30, 2016 and December 31, 2015, respectively, and are not included on the Company’s balance sheet. There is no relationship or correlation between the guarantee percentages and the level of charge-offs and recoveries on the Company’s SBA 7(a) loans. Charge-offs taken on SBA 7(a) loans effect the unguaranteed portion of the loan. SBA loans are underwritten to the same credit standards irrespective of the guarantee percentage.

The SBA 504 program consists of real estate backed commercial mortgages where the Company has the first mortgage and the SBA has the second mortgage on the property. Generally, the Company has a 50 percent LTV ratio on SBA 504 program loans at origination. At June 30, 2016, SBA 504 loans totaled \$27.0 million, a decrease of \$2.3 million from \$29.4 million at December 31, 2015. The yield on SBA 504 loans increased 61 basis points to 5.19 percent for the six months ended June 30, 2016, from 4.58 percent for the same period in 2015.

Commercial loans are generally made in the Company's marketplace for the purpose of providing working capital, financing the purchase of equipment, inventory or commercial real estate and for other business purposes. These loans amounted to \$481.7 million at June 30, 2016, an increase of \$16.2 million from year end 2015. The yield on commercial loans was 4.94 percent for the six months ended June 30, 2016, compared to 5.03 percent for the same period in 2015.

Residential mortgage loans consist of loans secured by 1 to 4 family residential properties. These loans amounted to \$268.8 million at June 30, 2016, an increase of \$4.3 million from year end 2015. Sales of mortgage loans totaled \$51.1 million for the six months ended June 30, 2016. Approximately \$14.9 million of the loans sold were from portfolio, with the remainder consisting of new production. The yield on residential mortgages was 4.47 percent for the six months ended June 30, 2016, compared to 4.55 percent for the same period in 2015. Residential mortgage loans maintained in portfolio are generally to individuals that do not qualify for conventional financing. In extending credit to this category of borrowers, the Bank considers other mitigating factors such as credit history, equity and liquid reserves of the borrower. As a result, the residential mortgage loan portfolio of the Bank includes adjustable rate mortgages with rates that exceed the rates on conventional fixed-rate mortgage loan products but which are not considered high priced mortgages.

Consumer loans consist of home equity loans, construction loans and loans for the purpose of financing the purchase of consumer goods, home improvements, and other personal needs, and are generally secured by the personal property being purchased. These loans amounted to \$84.3 million, an increase of \$7.2 million from year end 2015. The yield on consumer loans was 4.79 percent for the six months ended June 30, 2016, compared to 4.58 percent for the same period in 2015.

There are no concentrations of loans to any borrowers or group of borrowers exceeding 10 percent of the total loan portfolio and no foreign loans in the portfolio.

In the normal course of business, the Company may originate loan products whose terms could give rise to additional credit risk. Interest-only loans, loans with high LTV or debt service ratios, construction loans with payments made from interest reserves and multiple loans supported by the same collateral (e.g. home equity loans) are examples of such products. However, these products are not material to the Company's financial position and are closely managed via credit controls that mitigate their additional inherent risk. Management does not believe that these products create a concentration of credit risk in the Company's loan portfolio. The Company does not have any option adjustable rate mortgage loans.

The majority of the Company's loans are secured by real estate. Declines in the market values of real estate in the Company's trade area impact the value of the collateral securing its loans. This could lead to greater losses in the event of defaults on loans secured by real estate. At June 30, 2016 and December 31, 2015, approximately 96 percent of the Company's loan portfolio was secured by real estate.

TDRs

TDRs occur when a creditor, for economic or legal reasons related to a debtor's financial condition, grants a concession to the debtor that it would not otherwise consider. These concessions typically include reductions in interest rate, extending the maturity of a loan, or a combination of both. When the Company modifies a loan, management evaluates for any possible impairment using either the discounted cash flows method, where the value of the modified loan is based on the present value of expected cash flows, discounted at the contractual interest rate of the original loan agreement, or by using the fair value of the collateral less selling costs. If management determines that the value of the modified loan is less than the recorded investment in the loan, impairment is recognized by segment or class of loan, as applicable, through an allowance estimate or charge-off to the allowance. This process is used, regardless of loan type, and for loans modified as TDRs that subsequently default on their modified terms.

At June 30, 2016, there were four loans totaling \$933 thousand that were classified as TDRs by the Company and deemed impaired, compared to seven such loans totaling \$3.3 million at December 31, 2015. Nonperforming loans included \$161 thousand of TDRs as of June 30, 2016, compared to \$293 thousand at December 31, 2015.

Restructured loans that are placed in nonaccrual status may be removed after six months of contractual payments and the borrower showing the ability to service the debt going forward. The remaining TDRs are in accrual status since they are performing in accordance with the restructured terms. There are no commitments to lend additional funds on these loans.

The following table presents a breakdown of performing and nonperforming TDRs by class as of June 30, 2016 and December 31, 2015:

(In thousands)	June 30, 2016			December 31, 2015		
	Performing TDRs	Nonperforming TDRs	Total TDRs	Performing TDRs	Nonperforming TDRs	Total TDRs
SBA loans held for investment	\$35	\$ 161	\$ 196	\$431	\$ 293	\$724
SBA 504 loans	—	—	—	1,708	—	1,708
Commercial loans						
Commercial other	—	—	—	—	—	—
Commercial real estate	737	—	737	876	—	876
Total	\$772	\$ 161	\$ 933	\$3,015	\$ 293	\$3,308

Through June 30, 2016, our TDRs consisted of interest rate reductions, interest only periods and maturity extensions. There has been no principal forgiveness. The following table shows the types of modifications done to date by class through June 30, 2016:

(In thousands)	June 30, 2016		
	SBA held for investment	Commercial real estate	Total
Type of modification:			
Principal only	\$8	\$ —	\$8
Interest only with nominal principal	35	—	35
Interest with extra principal	—	737	737
Previously modified back to original terms	153	—	153
Total TDRs	\$196	\$ 737	\$933

Asset Quality

Inherent in the lending function is credit risk, which is the possibility a borrower may not perform in accordance with the contractual terms of their loan. A borrower's inability to pay their obligations according to the contractual terms can create the risk of past due loans and, ultimately, credit losses, especially on collateral deficient loans. The Company minimizes its credit risk by loan diversification and adhering to strict credit administration policies and procedures. Due diligence on loans begins when we initiate contact regarding a loan with a borrower. Documentation, including a borrower's credit history, materials establishing the value and liquidity of potential collateral, the purpose of the loan, the source of funds for repayment of the loan, and other factors, are analyzed before a loan is submitted for approval. The loan portfolio is then subject to on-going internal reviews for credit quality, as well as independent credit reviews by an outside firm.

The risk of loss is difficult to quantify and is subject to fluctuations in collateral values, general economic conditions and other factors. In some cases, these factors have also resulted in significant impairment to the value of loan collateral. The Company values its collateral through the use of appraisals, broker price opinions, and knowledge of its local market.

Nonperforming assets consist of nonperforming loans and OREO. Nonperforming loans consist of loans that are not accruing interest (nonaccrual loans) as a result of principal or interest being in default for a period of 90 days or more or when the ability to collect principal and interest according to the contractual terms is in doubt. When a loan is classified as nonaccrual, interest accruals discontinue and all past due interest previously recognized as income is reversed and charged against current period income. Generally, until the loan becomes current, any payments

received from the borrower are applied to outstanding principal, until such time as management determines that the financial condition of the borrower and other factors merit recognition of a portion of such payments as interest income. Loans past due 90 days or more and still accruing interest are not included in nonperforming loans. Loans past due 90 days or more and still accruing generally represent loans that are well collateralized and in a continuing process that are expected to result in repayment or restoration to current status.

The following table sets forth information concerning nonperforming assets and loans past due 90 days or more and still accruing interest at each of the periods presented:

(In thousands, except percentages)	June 30, 2016	December 31, 2015	June 30, 2015		
Nonperforming by category:					
SBA loans held for investment (1)	\$1,616	\$ 1,764	\$1,715		
SBA 504 loans	513	518	276		
Commercial loans	2,324	2,164	4,191		
Residential mortgage loans	1,589	2,224	1,759		
Consumer loans	499	590	896		
Total nonperforming loans (2)	\$6,541	\$ 7,260	\$8,837		
OREO	1,702	1,591	2,265		
Total nonperforming assets	\$8,243	\$ 8,851	\$11,102		
Past due 90 days or more and still accruing interest:					
Residential mortgage loans	\$485	—	\$273		
Total past due 90 days or more and still accruing interest	\$485	\$ —	\$273		
Nonperforming loans to total loans	0.71	% 0.82	% 1.08	%	
Nonperforming loans and TDRs to total loans (3)	0.80	1.16	1.48		
Nonperforming assets to total loans and OREO	0.90	0.99	1.35		
Nonperforming assets to total assets	0.73	0.82	1.08		
(1) Guaranteed SBA loans included above	\$134	\$ 288	\$267		
(2) Nonperforming TDRs included above	161	293	2,843		
(3) Performing TDRs	772	3,015	3,360		

Nonperforming loans were \$6.5 million at June 30, 2016, a \$719 thousand decrease from \$7.3 million at year end 2015 and a \$2.3 million decrease from \$8.8 million at June 30, 2015. Since year end 2015, nonperforming loans in the residential mortgage, SBA, consumer, and SBA 504 loan segments decreased, partially offset by an increase in the commercial loan segment. Included in nonperforming loans at June 30, 2016 are approximately \$134 thousand of loans guaranteed by the SBA, compared to \$288 thousand at December 31, 2015 and \$267 thousand at June 30, 2015. In addition, there were \$485 thousand in loans past due 90 days or more and still accruing interest at June 30, 2016, compared to zero and \$273 thousand at December 31, 2015 and June 30, 2015, respectively.

OREO properties totaled \$1.7 million at June 30, 2016, an increase of \$111 thousand from \$1.6 million at year end 2015 and a \$563 thousand decrease from \$2.3 million at June 30, 2015. During the six months ended June 30, 2016, the Company took title to two new properties valued at \$1.6 million that resulted in a charge to the allowance of \$200 thousand. Two OREO properties were sold, resulting in net gains on sale of \$44 thousand.

The Company also monitors potential problem loans. Potential problem loans are those loans where information about possible credit problems of borrowers causes management to have doubts as to the ability of such borrowers to comply with loan repayment terms. These loans are not included in nonperforming loans as they continue to perform. Potential problem loans totaled \$1.6 million at June 30, 2016, a decrease of \$667 thousand from \$2.3 million at December 31, 2015. The decrease is due to the deletion of three loans totaling \$1.8 million as well as the payoff of a loan totaling \$391 thousand, offset by the addition of five loans totaling \$1.6 million.

See Note 8 to the accompanying Consolidated Financial Statements for more information regarding Asset Quality.

Allowance for Loan Losses and Reserve for Unfunded Loan Commitments

Management reviews the level of the allowance for loan losses on a quarterly basis. The standardized methodology used to assess the adequacy of the allowance includes the allocation of specific and general reserves. Specific reserves are made to individual impaired loans, which have been defined to include all nonperforming loans and TDRs. The general reserve is set based upon a representative average historical net charge-off rate adjusted for certain environmental factors such as: delinquency and impairment trends, charge-off and recovery trends, volume and loan term trends, risk and underwriting policy trends, staffing and experience changes, national and local economic trends, industry conditions and credit concentration changes.

When calculating the five-year historical net charge-off rate, the Company weights the past three years more heavily. The Company believes using this approach is more indicative of future charge-offs. All of the environmental factors are ranked and assigned a basis points value based on the following scale: low, low moderate, moderate, high moderate, and high risk. The factors are evaluated separately for each type of loan. For example, commercial loans are broken down further into commercial and industrial loans, commercial mortgages, construction loans, etc. Each type of loan is risk weighted for each environmental factor based on its individual characteristics.

According to the Company's policy, a loss ("charge-off") is to be recognized and charged to the allowance for loan losses as soon as a loan is recognized as uncollectable. All credits which are 90 days past due must be analyzed for the Company's ability to collect on the credit. Once a loss is known to exist, the charge-off approval process is immediately expedited.

The allowance for loan losses totaled \$12.8 million at June 30, 2016 and December 31, 2015, compared to \$12.4 million at June 30, 2015, with resulting allowance to total loan ratios of 1.39 percent, 1.44 percent, and 1.51 percent, respectively. Net charge-offs amounted to \$601 thousand for the six months ended June 30, 2016, compared to \$347 thousand for the same period in 2015. Net charge-offs to average loan ratios are shown in the table below for each major loan category.

(In thousands, except percentages)	For the three months ended		For the six months ended	
	June 30, 2016	2015	June 30, 2016	2015
Balance, beginning of period	\$12,634	\$12,181	\$12,759	\$12,551
Provision for loan losses charged to expense	400	—	600	200
Less: Chargeoffs				
SBA loans held for investment	142	6	228	135
SBA 504 loans	—	—	—	589
Commercial loans	152	147	380	247
Consumer loans	—	7	28	37

Balance, end of period	\$12,758	\$12,404	\$12,758	\$12,404
Selected loan quality ratios:				
Net chargeoffs (recoveries) to average loans:				
SBA loans held for investment	0.98	% 0.03	% 0.77	% 0.40
SBA 504 loans	—	—	—	3.78
Commercial loans	0.12	(0.21)	0.15	(0.16)
Residential mortgage loans	—	(0.02)	—	(0.04)
Consumer loans	—	0.04	0.07	0.11
Total loans	0.12	(0.11)	0.13	0.09
Allowance to total loans	1.39	1.51	1.39	1.51
Allowance to nonperforming loans	195.05	% 140.36	% 195.05	% 140.36

In addition to the allowance for loan losses, the Company maintains a reserve for unfunded loan commitments that is maintained at a level that management believes is adequate to absorb estimated probable losses. Adjustments to the reserve are made through other expense and applied to the reserve which is maintained in other liabilities. At June 30, 2016, a \$183 thousand commitment reserve was reported on the balance sheet as an “other liability”, compared to a \$138 thousand commitment reserve at December 31, 2015.

See Note 9 to the accompanying Consolidated Financial Statements for more information regarding the Allowance for Loan Losses and Reserve for Unfunded Loan Commitments.

Deposits

Deposits, which include noninterest-bearing demand deposits, interest-bearing demand deposits, savings deposits and time deposits, are the primary source of the Company’s funds. The Company offers a variety of products designed to attract and retain customers, with primary focus on building and expanding relationships. The Company continues to focus on establishing a comprehensive relationship with business borrowers, seeking deposits as well as lending relationships.

Total deposits increased \$17.7 million to \$912.2 million at June 30, 2016, from \$894.5 million at December 31, 2015. This increase in deposits was due to increases of \$24.8 million in noninterest-bearing demand deposits and \$16.7 million in savings deposits, partially offset by a decrease of \$13.4 million in interest-bearing demand deposits and \$10.4 million in time deposits. The increase in noninterest-bearing demand deposits is attributable to growth in commercial customer relationships. The increase in savings was primarily due to new Savings promotions. The decrease in interest-bearing deposits was due to a seasonal reduction in municipal deposits. The decrease in time deposits was due to the reduction in municipal and institutional time deposits.

The Company's deposit composition at June 30, 2016, consisted of 35.0 percent savings deposits, 29.2 percent time deposits, 23.0 percent noninterest-bearing demand deposits and 12.8 percent interest-bearing demand deposits.

Borrowed Funds and Subordinated Debentures

Borrowed funds consist primarily of fixed rate advances from the FHLB of New York and repurchase agreements. These borrowings are used as a source of liquidity or to fund asset growth not supported by deposit generation. Residential mortgages collateralize the borrowings from the FHLB, while investment securities are pledged against the repurchase agreements.

Borrowed funds and subordinated debentures totaled \$124.3 million and \$107.5 million at June 30, 2016 and December 31, 2015, respectively, and are broken down in the following table:

(In thousands)	June 30, 2016	December 31, 2015
FHLB borrowings:		
Fixed rate advances	\$ 50,000	\$ 50,000
Adjustable rate advances	30,000	20,000
Overnight advances	19,000	7,000
Other repurchase agreements	15,000	15,000
Subordinated debentures	10,310	15,465
Total borrowed funds and subordinated debentures	\$ 124,310	\$ 107,465

The \$16.8 million increase in total borrowed funds and subordinated debentures was due to a \$22.0 million increase in borrowed funds, partially offset by a \$5.2 million decrease in subordinated debentures. Borrowed funds increased \$22.0 million from prior year-end due to a \$12.0 million increase in overnight borrowings at a rate of 0.665%, and the addition of a \$10.0 million adjustable rate FHLB borrowing, while subordinated debentures declined \$5.2 million to \$10.3 million during the six months ended June 30, 2016. The following transactions impacted borrowed funds and subordinated debentures:

The Bank had a \$10.0 million FHLB borrowing with a rate of 4.27% maturing on April 5, 2017. The FHLB offered to modify the Bank's borrowing. On March 23, 2016, this \$10.0 million FHLB advance was modified into a 4.75 year no-call 1 year (callable quarterly) at a rate of 2.10%.

The Bank had a \$20.0 million ARC FHLB borrowing with a rate of 2.025% that matured on June 7, 2016. This \$20.0 million FHLB advance was renewed an additional six months at a rate of 1.855%.

- On February 26, 2016, the Company repurchased \$5.2 million of its outstanding subordinated debentures, reducing its outstanding subordinated debt to \$10.3 million. The subordinated debentures were repurchased at a price of \$0.5475 per dollar, resulting in a pre-tax gain of \$2.3 million on the transaction.

In June 2016, the FHLB issued a \$49.0 million municipal deposit letter of credit in the name of Unity Bank naming the NJ Department of Banking and Insurance as beneficiary. The letter of credit will take the place of securities previously pledged to the state for the Bank's municipal deposits.

At June 30, 2016, the Company had \$47.7 million of additional credit available at the FHLB. Pledging additional collateral in the form of 1 to 4 family residential mortgages and investment securities can increase the line with the FHLB.

Interest Rate Sensitivity

The principal objectives of the asset and liability management function are to establish prudent risk management guidelines, evaluate and control the level of interest-rate risk in balance sheet accounts, determine the level of appropriate risk given the business focus, operating environment, capital, and liquidity requirements, and actively manage risk within the Board approved guidelines. The Company seeks to reduce the vulnerability of the operations to changes in interest rates, and actions in this regard are taken under the guidance of the Asset/Liability Management Committee (“ALCO”) of the Board of Directors. The ALCO reviews the maturities and re-pricing of loans, investments, deposits and borrowings, cash flow needs, current market conditions, and interest rate levels.

The Company utilizes Modified Duration of Equity and Economic Value of Portfolio Equity (“EVPE”) models to measure the impact of longer-term asset and liability mismatches beyond two years. The modified duration of equity measures the potential price risk of equity to changes in interest rates. A longer modified duration of equity indicates a greater degree of risk to rising interest rates. Because of balance sheet optionality, an EVPE analysis is also used to dynamically model the present value of asset and liability cash flows with rate shocks of 200 basis points. The economic value of equity is likely to be different as interest rates change. Results falling outside prescribed ranges require action by the ALCO. The Company’s variance in the economic value of equity, as a percentage of assets with rate shocks of 200 basis points at June 30, 2016, is a decline of 0.40 percent in a rising-rate environment and a decrease of 1.21 percent in a falling-rate environment. The variances in the EVPE at June 30, 2016 are within the Board-approved guidelines of +/- 3.00 percent. At December 31, 2015, the economic value of equity as a percentage of assets with rate shocks of 200 basis points was a decline of 0.80 percent in a rising-rate environment and a decrease of 0.84 percent in a falling-rate environment.

Liquidity

Consolidated Bank Liquidity

Liquidity measures the ability to satisfy current and future cash flow needs as they become due. A bank’s liquidity reflects its ability to meet loan demand, to accommodate possible outflows in deposits and to take advantage of interest rate opportunities in the marketplace. Our liquidity is monitored by management and the Board of Directors through a Risk Management Committee, which reviews historical funding requirements, our current liquidity position, sources and stability of funding, marketability of assets, options for attracting additional funds, and anticipated future funding needs, including the level of unfunded commitments. Our goal is to maintain sufficient asset-based liquidity to cover potential funding requirements in order to minimize our dependence on volatile and potentially unstable funding markets.

The principal sources of funds at the Bank are deposits, scheduled amortization and prepayments of investment and loan principal, sales and maturities of investment securities and funds provided by operations. While scheduled loan payments and maturing investments are relatively predictable sources of funds, deposit inflows and outflows and loan prepayments are greatly influenced by general interest rates, economic conditions and competition. The Consolidated Statement of Cash Flows provides detail on the Company’s sources and uses of cash, as well as an indication of the Company’s ability to maintain an adequate level of liquidity. At June 30, 2016, the balance of cash and cash equivalents was \$96.1 million, an increase of \$7.9 million from December 31, 2015. A discussion of the cash provided by and used in operating, investing and financing activities follows.

Operating activities provided \$6.6 million and used \$93 thousand in net cash for the six months ended June 30, 2016 and 2015, respectively. The primary sources of funds were net income from operations and adjustments to net income, such as the proceeds from the sale of mortgage and SBA loans held for sale, partially offset by originations of mortgage and SBA loans held for sale.

Investing activities used \$35.0 million and \$49.9 million in net cash for the six months ended June 30, 2016 and 2015, respectively. Cash was primarily used to fund new loans, purchase securities held to maturity and available for sale, premises and equipment and FHLB stock, partially offset by proceeds from sales of and maturities and principal payments on securities available for sale.

Securities. The Consolidated Bank’s available for sale investment portfolio amounted to \$45.0 million and \$52.6 million at June 30, 2016 and December 31, 2015, respectively. This excludes the Parent Company’s securities discussed under the heading “Parent Company Liquidity” below. Projected cash flows from securities over the next twelve months are \$12.7 million.

•

Loans. The SBA loans held for sale portfolio amounted to \$13.2 million and \$13.1 million at June 30, 2016 and December 31, 2015, respectively. Sales of these loans provide an additional source of liquidity for the Company. Outstanding Commitments. The Company was committed to advance approximately \$183.2 million to its borrowers as of June 30, 2016, compared to \$138.3 million at December 31, 2015. At June 30, 2016, \$96.9 million of these commitments expire within one year, compared to \$51.3 million at December 31, 2015. The Company had \$2.7 million in standby letters of credit at June 30, 2016, compared to \$1.8 million December 31, 2015, which are included in the commitments amount noted above. The estimated fair value of these guarantees is not significant. The Company believes it has the necessary liquidity to honor all commitments. Many of these commitments will expire and never be funded.

Financing activities provided \$36.3 million in net cash for the six months ended June 30, 2016, compared to \$10.6 million for the same period in the prior year, primarily due to proceeds from new borrowings and an increase in the Company's deposits partially offset by repayments of borrowings and subordinated debentures.

Deposits. As of June 30, 2016, deposits included \$69.9 million of Government deposits, as compared to \$112.7 million at year end 2015. These deposits are generally short in duration and are very sensitive to price competition. The Company believes that the current level of these types of deposits is appropriate. Included in the portfolio were \$63.7 million of deposits from twelve municipalities with account balances in excess of \$1.5 million. The withdrawal of these deposits, in whole or in part, would not create a liquidity shortfall for the Company.

Borrowed Funds. Total FHLB borrowings amounted to \$99.0 million and \$77.0 million as of June 30, 2016 and December 31, 2015, respectively. Third party repurchase agreements totaled \$15.0 million as of both June 30, 2016 and December 31, 2015. As a member of the Federal Home Loan Bank of New York ("FHLB"), the Company can borrow additional funds based on the market value of collateral pledged. At June 30, 2016, pledging provided an additional \$47.7 million in borrowing potential from the FHLB. In addition, the Company can pledge additional collateral in the form of 1 to 4 family residential mortgages or investment securities to increase this line with the FHLB.

Parent Company Liquidity

The Parent Company's cash needs are funded by dividends paid by the Bank. Other than its investment in the Bank and Unity Statutory Trust II, the Parent Company does not actively engage in other transactions or business. Only expenses specifically for the benefit of the Parent Company are paid using its cash, which typically includes the payment of operating expenses and cash dividends on common stock.

At June 30, 2016, the Parent Company had \$2.1 million in cash and cash equivalents and \$256 thousand in investment securities valued at fair market value, compared to \$466 thousand in cash and cash equivalents and \$216 thousand in investment securities at December 31, 2015.

Regulatory Capital

A significant measure of the strength of a financial institution is its capital base. Federal regulators have classified and defined capital into the following components: (1) Tier 1 capital, which includes tangible shareholders' equity for common stock, qualifying preferred stock and certain qualifying hybrid instruments, and (2) Tier 2 capital, which includes a portion of the allowance for loan losses, subject to limitations, certain qualifying long-term debt, preferred stock and hybrid instruments, which do not qualify for Tier 1 capital. The Parent Company and its subsidiary Bank are subject to various regulatory capital requirements administered by banking regulators. Quantitative measures of capital adequacy include the leverage ratio (Tier 1 capital as a percentage of tangible assets), Tier 1 risk-based capital ratio (Tier 1 capital as a percent of risk-weighted assets), total risk-based capital ratio (total risk-based capital as a percent of total risk-weighted assets), and common equity Tier 1 capital ratio.

Minimum capital levels are regulated by risk-based capital adequacy guidelines, which require the Company and the Bank to maintain certain capital as a percentage of assets and certain off-balance sheet items adjusted for predefined credit risk factors (risk-weighted assets). Failure to meet minimum capital requirements can initiate certain mandatory and possibly discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action applicable to banks, the Company and the Bank must meet specific capital guidelines. Prompt corrective action provisions are not applicable to bank holding companies.

In September 2010, the Group of Governors and Heads of Supervision, the oversight body of the Basel Committee on Banking Supervision, adopted Basel III, which constitutes a set of capital reform measures designed to strengthen the regulation, supervision and risk management of banking organizations worldwide. In order to implement Basel III and certain additional capital changes required by the Dodd-Frank Act, the FDIC approved, as an interim final rule in July 2014, the regulatory capital requirements substantially similar to final rules issued by the Board of Governors of the Federal Reserve System (“Federal Reserve”) for U.S. state nonmember banks and the Office of the Comptroller of the Currency for national banks.

The interim final rule includes a new capital conservation buffer risk that will be phased-in from 2015 to 2019 for most state nonmember banks. The rule includes a new common equity Tier 1 capital (“CET1”) to risk-weighted assets ratio of 4.5% and a common equity Tier 1 capital conservation buffer of 2.5% of risk-weighted assets, when fully phased in, which is in addition to the Tier 1 and total risk-based capital requirements. The interim final rule also raises the minimum ratio of Tier 1 capital to

risk-weighted assets from 4.0% to 6.0% and requires a minimum leverage ratio of 4.0%. The required minimum ratio of total capital to risk-weighted assets will remain 8.0%. The new risk-based capital requirements (except for the capital conservation buffer) became effective for the Company and the Bank on January 1, 2015.

The new rules also include a one-time opportunity to opt-out of the changes to treatment of accumulated other comprehensive income (“AOCI”) components. By making the election to opt-out, the institution may continue treating AOCI items in a manner consistent with risk-based capital rules in place prior to January 2015. The Bank and the Company have made the election to opt out of the treatment of AOCI on the appropriate March 31, 2015 filings.

In addition to the risk-based guidelines, regulators require that a bank or holding company, which meets the regulator’s highest performance and operation standards, maintain a minimum leverage ratio of 4.0%. For those institutions with higher levels of risk or that are experiencing or anticipating significant growth, the minimum leverage ratio will be proportionately increased. Minimum leverage ratios for each institution are evaluated through the ongoing regulatory examination process.

The Company’s capital amounts and ratios are presented in the following table:

	Actual		For capital adequacy purposes		To be well-capitalized under prompt corrective action provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
(In thousands)						
As of June 30, 2016						
Leverage ratio	\$94,044	8.52 %	≥\$44,171	4.00 %	≥ N/A	N/A
CET1	84,044	9.70	38,992	4.50	N/A	N/A
Tier I risk-based capital ratio	94,044	10.85	51,989	6.00	N/A	N/A
Total risk-based capital ratio	104,901	12.11	69,319	8.00	N/A	N/A
As of December 31, 2015						
Leverage ratio	\$92,442	8.82 %	≥\$41,934	4.00 %	≥ N/A	N/A
CET1	77,442	9.37	37,210	4.50	N/A	N/A
Tier I risk-based capital ratio	92,442	11.18	49,613	6.00	N/A	N/A
Total risk-based capital ratio	102,809	12.43	66,151	8.00	N/A	N/A

The Bank’s capital amounts and ratios are presented in the following table:

	Actual		For capital adequacy purposes		To be well-capitalized under prompt corrective action provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
(In thousands)						
As of June 30, 2016						
Leverage ratio	\$83,967	7.62 %	≥\$44,078	4.00 %	≥\$55,098	5.00 %
CET1	83,967	9.71	38,897	4.50	56,184	6.50
Tier I risk-based capital ratio	83,967	9.71	51,862	6.00	69,149	8.00
Total risk-based capital ratio	100,493	11.63	69,149	8.00	86,437	10.00
As of December 31, 2015						
Leverage ratio	\$83,316	7.95 %	≥\$41,908	4.00 %	≥\$52,385	5.00 %

Tier I risk-based capital ratio	83,316	10.08	49,590	6.00	66,120	8.00

Total risk-based capital ratio	102,179	12.36	66,120	8.00	82,650	10.00
--------------------------------	---------	-------	--------	------	--------	-------

60

The new capital rules will require the Company and the Bank to meet a capital conservation buffer requirement. To meet the requirement when it is fully phased in, common equity Tier 1 capital must be maintained at an amount that exceeds the buffer level of 2.5% above each of the minimum risk-weighted asset ratios. The requirement will be phased in over a four year period, which has been implemented by the Bank starting January 1, 2016.

At June 30, 2016 and December 31, 2015, Unity Bank is “well-capitalized” under the applicable regulatory capital adequacy guidelines.

Shareholders' Equity

Shareholders' equity increased \$6.5 million to \$85.0 million at June 30, 2016 compared to \$78.5 million at December 31, 2015, primarily due to net income of \$7.0 million. Other items impacting shareholders' equity included \$425 thousand from the issuance of common stock under employee benefit plans, partially offset by \$326 thousand in accumulated other comprehensive loss related primarily to cash flow hedges. Additionally, \$631 thousand of common stock dividends were paid. The issuance of common stock under employee benefit plans includes nonqualified stock options and restricted stock expense related entries, employee option exercises and the tax benefit of options exercised.

Repurchase Plan

On October 21, 2002, the Company authorized the repurchase of up to 10 percent of its outstanding common stock. The amount and timing of purchases is dependent upon a number of factors, including the price and availability of the Company's shares, general market conditions and competing alternate uses of funds. There were no shares repurchased during the six months ended June 30, 2016 or 2015. The Company currently has no plans on repurchasing its common stock.

Impact of Inflation and Changing Prices

The financial statements and notes thereto, presented elsewhere herein have been prepared in accordance with generally accepted accounting principles, which require the measurement of financial position and operating results in terms of historical dollars without considering the change in the relative purchasing power of money over time and due to inflation. The impact of inflation is reflected in the increased cost of the operations. Unlike most industrial companies, nearly all the Company's assets and liabilities are monetary. As a result, interest rates have a greater impact on performance than do the effects of general levels of inflation. Interest rates do not necessarily move in the same direction or to the same extent as the prices of goods and services.

ITEM 3 Quantitative and Qualitative Disclosures about Market Risk

During the six months ended June 30, 2016, there have been no significant changes in the Company's assessment of market risk as reported in Item 6 of the Company's Annual Report on Form 10-K for the year ended December 31, 2015. (See Interest Rate Sensitivity in Management's Discussion and Analysis herein.)

ITEM 4 Controls and Procedures

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures as of June 30, 2016. Based on this evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that a) the Company's disclosure controls and procedures are effective for recording, processing, summarizing and reporting the information the Company is required to disclose in the reports it files under the Securities Exchange Act of 1934, within the time periods specified in the SEC's rules and forms.

No significant change in the Company's internal control over financial reporting has occurred during the quarterly b)period covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's controls over financial reporting.

PART II OTHER INFORMATION

ITEM 1 Legal Proceedings

From time to time, the Company is subject to other legal proceedings and claims in the ordinary course of business. The Company currently is not aware of any such legal proceedings or claims that it believes will have, individually or in the aggregate, a material adverse effect on the business, financial condition, or the results of the operation of the Company.

ITEM 1A Risk Factors

Information regarding this item as of June 30, 2016 appears under the heading, "Risk Factors" within the Company's Form 10-K for the year ended December 31, 2015.

ITEM 2 Unregistered Sales of Equity Securities and Use of Proceeds - None

ITEM 3 Defaults upon Senior Securities - None

ITEM 4 Mine Safety Disclosures - N/A

ITEM 5 Other Information - None
