

SOUTHWESTERN ENERGY CO
Form 10-Q
October 31, 2013

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

Form 10-Q

(Mark One)

Quarterly Report pursuant to Section 13 or 15(d) of the Securities

Exchange Act of 1934

For the quarterly period ended September 30, 2013

Or

Transition Report pursuant to Section 13 or 15(d) of the Securities

Exchange Act of 1934

For the transition period from _____ to _____

Commission file number: 1-08246

Southwestern Energy Company
(Exact name of registrant as specified in its charter)

Delaware 71-0205415
(State or other jurisdiction of incorporation or (I.R.S. Employer Identification No.)
organization)

2350 North Sam Houston Parkway East, Suite 77032
125, Houston, Texas
(Address of principal executive offices) (Zip Code)

(281) 618-4700

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date:

Class	Outstanding as of October 29, 2013

Item 6.	<u>Exhibits</u>	46

CAUTIONARY STATEMENT ABOUT FORWARD-LOOKING STATEMENTS

All statements, other than historical fact or present financial information, may be deemed to be forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements that address activities, outcomes and other matters that should or may occur in the future, including, without limitation, statements regarding the financial position, business strategy, production and reserve growth and other plans and objectives for our future operations, are forward-looking statements. Although we believe the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance. We have no obligation and make no undertaking to publicly update or revise any forward-looking statements, except as may be required by law.

Forward-looking statements include the items identified in the preceding paragraph, information concerning possible or assumed future results of operations and other statements in this Form 10-Q identified by words such as “anticipate,” “project,” “intend,” “estimate,” “expect,” “believe,” “predict,” “budget,” “projection,” “goal,” “plan,” “forecast,” “target” or similar terms.

You should not place undue reliance on forward-looking statements. They are subject to known and unknown risks, uncertainties and other factors that may affect our operations, markets, products, services and prices and cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. In addition to any assumptions and other factors referred to specifically in connection with forward-looking statements, risks, uncertainties and factors that could cause our actual results to differ materially from those indicated in any forward-looking statement include, but are not limited to:

- the timing and extent of changes in market conditions and prices for natural gas and oil (including regional basis differentials);
- our ability to fund our planned capital investments;
- our ability to transport our production to the most favorable markets or at all;
- the timing and extent of our success in discovering, developing, producing and estimating reserves;

- the economic viability of, and our success in drilling, our large acreage position in the Fayetteville Shale play overall as well as relative to other productive shale gas plays;
- the impact of government regulation, including any increase in severance or similar taxes, legislation relating to hydraulic fracturing, the climate and over the counter derivatives;
- the costs and availability of oilfield personnel, services and drilling supplies, raw materials, and equipment, including pressure pumping equipment and crews;
- our ability to determine the most effective and economic fracture stimulation for the Fayetteville Shale play and Marcellus Shale play;
- our future property acquisition or divestiture activities;
- the impact of the adverse outcome of any material litigation against us;
- the effects of weather;
- increased competition and regulation;
- the financial impact of accounting regulations and critical accounting policies;
- the comparative cost of alternative fuels;
- conditions in capital markets, changes in interest rates and the ability of our lenders to provide us with funds as agreed;
- credit risk relating to the risk of loss as a result of non-performance by our counterparties; and
- any other factors listed in the reports we have filed and may file with the Securities and Exchange Commission (“SEC”).

We caution you that forward-looking statements contained in this Form 10-Q are subject to all of the risks and uncertainties, many of which are beyond our control, incident to the exploration for and development, production and sale of natural gas and oil. These risks include, but are not limited to, commodity price volatility, third-party interruption of sales to market, inflation, lack of availability of goods and services, environmental risks, drilling and other operating risks, regulatory changes, the uncertainty inherent in estimating proved natural gas and oil reserves and in projecting future rates of production and timing of development expenditures and the other risks described in our Annual Report on Form 10-K for the year ended December 31, 2012 (the “2012 Annual Report on Form 10-K”), and all quarterly reports on Form 10-Q filed subsequently thereto, including this Form 10-Q (“Form 10-Qs”).

Should one or more of the risks or uncertainties described above or elsewhere in this Form 10-Q occur, or should underlying assumptions prove incorrect, our actual results and plans could differ materially from those expressed in any forward-looking statements. We specifically disclaim all responsibility to publicly update any information contained in a forward-looking statement or any forward-looking statement in its entirety and therefore disclaim any resulting liability for potentially related damages.

All forward-looking statements attributable to us are expressly qualified in their entirety by this cautionary statement.

SOUTHWESTERN ENERGY COMPANY AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(1) BASIS OF PRESENTATION

Southwestern Energy Company (including its subsidiaries, collectively, “we”, “Southwestern” or the “Company”) is an independent energy company engaged in natural gas and oil exploration, development and production. The Company engages in natural gas and oil exploration and production, natural gas gathering and natural gas marketing through its subsidiaries. Southwestern’s exploration, development and production (“E&P”) activities are focused within the United States. The Company is actively engaged in exploration and production activities in Arkansas, where we are targeting the unconventional gas reservoir known as the Fayetteville Shale, in Pennsylvania, where we are targeting the unconventional gas reservoir known as the Marcellus Shale, and to a lesser extent in Texas and in Arkansas and Oklahoma in the Arkoma Basin. The Company also actively seeks to find and develop new oil and natural gas plays with significant exploration and exploitation potential. Southwestern’s natural gas gathering and marketing (“Midstream Services”) activities primarily support the Company’s E&P activities in Arkansas, Pennsylvania and Texas.

The accompanying unaudited condensed consolidated financial statements were prepared using accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information and in accordance with the rules and regulations of the Securities and Exchange Commission. Certain information relating to the Company’s organization and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been appropriately condensed or omitted in this Quarterly Report on Form 10-Q. The Company believes the disclosures made are adequate to make the information presented not misleading.

The unaudited condensed consolidated financial statements contained in this report include all normal and recurring material adjustments that, in the opinion of management, are necessary for a fair statement of the financial position, results of operations and cash flows for the interim periods presented herein. It is recommended that these unaudited condensed consolidated financial statements be read in conjunction with the consolidated financial statements and the notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012 (“2012 Annual Report on Form 10-K”).

The Company’s significant accounting policies, which have been reviewed and approved by the Audit Committee of the Company’s Board of Directors, are summarized in Note 1 in the Notes to the Consolidated Financial Statements included in the Company’s 2012 Annual Report on Form 10-K.

Certain reclassifications have been made to the prior year financial statements to conform to the 2013 presentation. The effects of the reclassifications were not material to the Company's unaudited condensed consolidated financial statements.

(2) ACQUISITIONS AND DIVESTITURES

In April 2013, the Company entered into a definitive purchase agreement to acquire natural gas properties located in Pennsylvania prospective for the Marcellus Shale for approximately \$93.0 million, subject to closing conditions. The Company utilized its revolving credit facility to finance the acquisition. The Company closed on the acquisition during the second quarter of 2013 and accounted for it as an asset acquisition.

In May 2012, the Company sold certain oil and natural gas leases, wells and gathering equipment in East Texas for approximately \$166.0 million. The assets included in the sale represented all of the Company's interests and related assets in the Overton Field in Smith County. The net production from the sold assets was approximately 24.0 MMcfe per day as of the closing date and the associated net proved reserves were approximately 143.0 Bcfe at December 31, 2011.

(3) PREPAID EXPENSES

The components of prepaid expenses included in other current assets as of September 30, 2013 and December 31, 2012 consisted of the following:

	September 30, 2013	December 31, 2012
	(in thousands)	
Prepaid drilling costs	\$ 15,622	\$ 30,101
Prepaid insurance	9,536	9,507
Total	\$ 25,158	\$ 39,608

(4) INVENTORY

Inventory recorded in current assets includes \$3.7 million at September 30, 2013 and \$5.6 million at December 31, 2012 for natural gas in underground storage owned by the Company's E&P segment, and \$39.5 million at September 30, 2013 and \$22.5 million at December 31, 2012 for tubular and other equipment used in the E&P segment.

Other long-term assets include \$15.8 million at September 30, 2013 and \$13.8 million at December 31, 2012, respectively, for inventory held by the Midstream Services segment consisting primarily of pipe that will be used to construct gathering systems for the Fayetteville Shale play.

(5) NATURAL GAS AND OIL PROPERTIES

The Company utilizes the full cost method of accounting for costs related to the exploration, development and acquisition of natural gas and oil reserves. Under this method, all such costs (productive and nonproductive), including salaries, benefits and other internal costs directly attributable to these activities are capitalized on a country by country basis and amortized over the estimated lives of the properties using the units-of-production method. These capitalized costs, less accumulated amortization and related deferred income taxes, are subject to a ceiling test that limits such pooled costs to the aggregate of the present value of future net revenues attributable to proved natural gas and oil reserves, net of taxes, discounted at 10 percent plus the lower of cost or market value of unproved properties.

Any costs in excess of the ceiling are written off as a non-cash expense. The expense may not be reversed in future periods, even though higher natural gas and oil prices may subsequently increase the ceiling. Full cost companies must use the average quoted price from the first day of each month from the previous 12 months, including the impact of derivatives qualifying as cash flow hedges, to calculate the ceiling value of their reserves.

Using the average quoted price from the first day of each month from the previous 12 months for Henry Hub natural gas of \$3.60 per MMBtu and \$91.56 per barrel for West Texas Intermediate oil, adjusted for market differentials, the Company's net book value of its United States natural gas and oil properties did not exceed the ceiling amount and did not result in a ceiling test impairment at September 30, 2013. Cash flow hedges of natural gas production in place increased the ceiling value by \$79.2 million, net of tax, at September 30, 2013. Decreases in average quoted prices from September 30, 2013 levels as well as changes in production rates, levels of reserves, capitalized costs, the evaluation of costs excluded from amortization, future development costs, service costs and taxes could result in future ceiling test impairments.

Using the average quoted price from the first day of each month from the previous 12 months for Henry Hub natural gas of \$2.83 per MMBtu and \$91.48 per barrel for West Texas Intermediate oil, adjusted for market differentials, the Company's net book value of its United States natural gas and oil properties exceeded the ceiling by approximately \$185.7 million (net of tax) at September 30, 2012 and resulted in a non-cash ceiling test impairment. Cash flow hedges of natural gas production in place increased the ceiling by \$330.6 million at September 30, 2012. In the second quarter of 2012, the Company's net book value of its United States natural gas and oil properties exceeded the ceiling by approximately \$496.4 million (net of tax) at June 30, 2012 and resulted in a non-cash ceiling test impairment.

All of the Company's costs directly associated with the acquisition and evaluation of properties in Canada relating to its exploration program at September 30, 2013 were unproved and did not exceed the ceiling amount. If the exploration program in Canada is unsuccessful on all or a portion of these properties, a ceiling test impairment may result in the future.

(6) EARNINGS PER SHARE

The following table presents the computation of earnings per share for the three- and nine-month periods ended September 30, 2013 and 2012:

	For the three months ended September 30,		For the nine months ended September 30,	
	2013	2012	2013	2012
Net income (loss) (in thousands)	\$ 185,867	\$ (54,053)	\$ 559,013	\$ (351,481)
Number of common shares:				
Weighted average outstanding	350,517,337	348,649,630	350,334,634	348,272,192
Issued upon assumed exercise of outstanding stock options	373,152	–	442,678	–
Effect of issuance of nonvested restricted common stock	332,341	–	237,662	–
Weighted average and potential dilutive outstanding ⁽¹⁾	351,222,830	348,649,630	351,014,974	348,272,192
Earnings (loss) per share:				
Basic	\$ 0.53	\$ (0.16)	\$ 1.60	\$ (1.01)
Diluted	\$ 0.53	\$ (0.16)	\$ 1.59	\$ (1.01)

(1) Options for 1,550,838 shares and 15,703 shares of restricted stock were excluded from the calculation for the three months ended September 30, 2013 because they would have had an antidilutive effect. Due to the net loss for the three months ended September 30, 2012, options for 1,664,232 shares and 560,848 shares of restricted stock were antidilutive and excluded from the calculation. Options for 1,848,566 shares and 169,261 shares of restricted stock were excluded from the calculation for the nine months ended September 30, 2013 because they would have had an

antidilutive effect. Due to the net loss for the nine months ended September 30, 2012, options for 1,685,398 shares and 580,227 shares of restricted stock were antidilutive and excluded from the calculation.

(7) DERIVATIVES AND RISK MANAGEMENT

The Company is exposed to volatility in market prices and basis differentials for natural gas and crude oil which impacts the predictability of its cash flows related to the sale of natural gas and oil, and is exposed to volatility in interest rates. These risks are managed by the Company's use of certain derivative financial instruments. At September 30, 2013 and December 31, 2012, the Company's derivative financial instruments consisted of fixed price swaps, basis swaps, fixed price call options, and interest rate swaps. A description of the Company's derivative financial instruments is provided below:

Fixed price swaps	The Company receives a fixed price for the contract and pays a floating market price to the counterparty.
Floating price swaps	The Company receives a floating market price from the counterparty and pays a fixed price.
Costless-collars	Arrangements that contain a fixed floor price (put) and a fixed ceiling price (call). If the market price exceeds the call strike price or falls below the put strike price, the Company receives the fixed price and pays the market price. If the market price is between the call and the put strike price, no payments are due from either party.
Basis swaps	Arrangements that guarantee a price differential for natural gas from a specified delivery point. The Company receives a payment from the counterparty if the price differential is greater than the stated terms of the contract and pays the counterparty if the price differential is less than the stated terms of the contract.
Fixed price call options	The Company sells fixed price call options in exchange for a premium. At the time of settlement, if the market price exceeds the fixed price of the call option, the Company pays the counterparty such excess on sold fixed price call options. If the market price settles below the fixed price of the call option, no payment is due from either party.
Interest rate swaps	Interest-rate swaps are used to fix or float interest rates on existing or anticipated indebtedness. The purpose of these instruments is to manage the Company's existing or anticipated exposure to unfavorable interest-rate changes.

GAAP requires that all derivatives be recognized in the balance sheet as either an asset or liability and be measured at fair value. Under GAAP, certain criteria must be satisfied in order for derivative financial instruments to be classified and accounted for as either a cash flow or a fair value hedge. Accounting for qualifying hedges requires a derivative's gains and losses to be recorded either in earnings as a component of the sale of natural gas and oil or as a component

of other comprehensive income. Gains and losses on derivatives that are not elected for hedge accounting treatment or that do not meet hedge accounting requirements are recorded in earnings as a component of gain (loss) on derivatives. Within the gain (loss) on derivatives component of the statement of operations are mark to market gain (loss) on derivatives and mark to market gain (loss) on derivatives, settled. The Company calculates mark to market gain (loss) on derivatives, settled, as the summation of gains and losses on positions that have settled within the period reported.

The Company utilizes counterparties for its derivative instruments that it believes are credit-worthy at the time the transactions are entered into and the Company closely monitors the credit ratings of these counterparties. Additionally, the Company performs both quantitative and qualitative assessments of these counterparties based on their credit ratings and credit default swap rates where applicable. However, the events in the financial markets in recent years demonstrate there can be no assurance that a counterparty will be able to meet its obligations to the Company.

The balance sheet classification of the assets related to derivative financial instruments are summarized below at September 30, 2013 and December 31, 2012:

	Derivative Assets September 30, 2013 Balance Sheet Classification	Fair Value	December 31, 2012 Balance Sheet Classification	Fair Value
	(in thousands)			
Derivatives designated as hedging instruments:				
Fixed price swaps	Hedging asset	\$ 115,039	Hedging asset	\$ 279,443
Fixed price swaps	Other long-term assets	5,951	Other long-term assets	8,550
Total derivatives designated as hedging instruments		\$ 120,990		\$ 287,993
Derivatives not designated as hedging instruments:				
Basis swaps	Hedging asset	\$ 5,104	Hedging asset	\$ 3,250
Fixed price swaps	Hedging asset	77,504	Hedging asset	–
Basis swaps	Other long-term assets	679	Other long-term assets	901
Fixed price swaps	Other long-term assets	19,103	Other long-term assets	–
Interest rate swaps	Other long-term assets	5,797	Other long-term assets	–
Total derivatives not designated as hedging instruments		\$ 108,187		\$ 4,151
Total derivative assets		\$ 229,177		\$ 292,144

	Derivative Liabilities September 30, 2013 Balance Sheet Classification	Fair Value	December 31, 2012 Balance Sheet Classification	Fair Value
	(in thousands)			
Derivatives not designated as hedging instruments:				
Basis swaps	Other current liabilities	\$ 164	Other current liabilities	\$ 138
Fixed price call options	Other long-term liabilities	30,980	Other long-term liabilities	4,128
Interest rate swaps	Other current liabilities	912	Other current liabilities	–
Interest rate swaps	Other long-term liabilities	3,582	Other long-term liabilities	–

Total derivatives not designated as hedging

instruments	\$ 35,638	\$ 4,266
Total derivative liabilities	\$ 35,638	\$ 4,266

As of September 30, 2013, the Company had derivatives designated as cash flow hedges and derivatives not designated as hedges on the following volumes of natural gas production (in Bcf):

Fixed price swaps not designated for

Year	Fixed price swaps	hedge accounting	Total
2013	84.4	-	84.4
2014	51.1	181.6	232.7

Cash Flow Hedges

The reporting of gains and losses on cash flow derivative hedging instruments depends on whether the gains or losses are effective at offsetting changes in the cash flows of the hedged item. The effective portion of the gains and losses on the derivative hedging instruments are recorded in other comprehensive income until recognized in earnings during the period that the hedged transaction takes place. The ineffective portion of the gains and losses from the derivative hedging instrument is recognized in earnings immediately.

As of September 30, 2013, the Company recorded a net gain in accumulated other comprehensive income related to its hedging activities of \$72.1 million. This amount is net of a deferred income tax liability recorded as of September 30, 2013 of \$48.1 million. The amount recorded in accumulated other comprehensive income will be relieved over time and recognized in the statement of operations as the physical transactions being hedged occur. Assuming the market prices of natural gas futures as of September 30, 2013 remain unchanged, the Company would expect to transfer an aggregate after-tax net gain of \$68.6 million from accumulated other comprehensive income to earnings during the next 12 months. Gains or losses from derivative instruments designated as cash flow hedges are reflected as adjustments to gas sales in the unaudited condensed consolidated statements of operations. Volatility in earnings and other comprehensive income may occur in the future as a result of the Company's derivative activities.

The following tables summarize the before tax effect of all cash flow hedges on the unaudited condensed consolidated financial statements for the three- and nine-month periods ended September 30, 2013 and 2012:

Derivative Instrument	Gain (Loss) Recognized in Other Comprehensive Income (Effective Portion)			
	For the three months ended		For the nine months ended	
	September 30, 2013	2012	September 30, 2013	2012

Fair Value Hedges and Other Derivative Contracts

For fair value hedges, the gain or loss on the derivative instrument as well as the offsetting gain or loss on the hedged item are recognized in earnings immediately.

Although the Company's basis swaps meet the objective of managing commodity price exposure, these trades are typically not entered into concurrent with the Company's derivative instruments that qualify as cash flow hedges and therefore do not generally qualify for hedge accounting. Basis swap derivative instruments that do not qualify as cash flow hedges are recorded on the balance sheet at their fair values under hedging assets, other long-term assets and other current liabilities, as applicable, and all gains and losses related to these contracts are recognized immediately in the unaudited condensed consolidated statements of operations as a component of gain (loss) on derivatives.

As of September 30, 2013, the Company had basis swaps on natural gas production that did not qualify for hedge accounting treatment of 6.5 Bcf, 16.7 Bcf, and 0.9 Bcf in 2013, 2014, and 2015, respectively.

As of September 30, 2013, the Company had fixed price call options on 199.8 Bcf of 2015 natural gas production that did not qualify for hedge accounting treatment and fixed price swaps of 181.6 Bcf of 2014 natural gas production not designated for hedge accounting.

The Company is a party to an interest rate swap with counterparty banks. The interest rate swap was entered into in order to mitigate the Company's exposure to volatility in interest rates related to its building lease. The interest rate swap has a notional amount of \$170.0 million and expires on June 20, 2020. The Company did not designate the interest rate swap for hedge accounting. Changes in the fair value of the interest rate swap are included in gain (loss) on derivatives in the unaudited condensed consolidated statements of operations. The Company had no interest rate swaps in 2012.

The following table summarizes the before tax effect of fair value hedges, fixed price call options that did not qualify for hedge accounting, fixed price swaps not designated for hedge accounting, basis swaps, and interest rate swaps not designated for hedge accounting on the unaudited condensed consolidated statements of operations for the three- and nine-month periods ended September 30, 2013 and 2012:

Mark to Market Gain (Loss)

Derivative Instrument	Income Statement Classification of Mark to Market Gain (Loss) on Derivatives	on Derivatives Recognized in Earnings			
		For the three months ended		For the nine months ended	
		September 30, 2013	September 30, 2012	September 30, 2013	September 30, 2012
		(in thousands)

	Benefit for income taxes	(534)
	Net loss	\$ (800)
Total reclassifications for the period	Net income	\$ 128,832

(1) Included in the computation of net periodic pension cost (see footnote 13 for additional details.)

(9) FAIR VALUE MEASUREMENTS

The carrying amounts and estimated fair values of the Company's financial instruments as of September 30, 2013 and December 31, 2012 were as follows:

	September 30, 2013		December 31, 2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(in thousands)			
Cash and cash equivalents	\$ 18,950	\$ 18,950	\$ 53,583	\$ 53,583
Restricted cash	\$ –	\$ –	\$ 8,542	\$ 8,542
Unsecured revolving credit facility	\$ 243,400	\$ 243,400	\$ –	\$ –
Senior notes	\$ 1,668,965	\$ 1,807,234	\$ 1,669,473	\$ 1,917,005
Derivative instruments	\$ 193,539	\$ 193,539	\$ 287,878	\$ 287,878

The carrying values of cash and cash equivalents, restricted cash, accounts receivable, accounts payable, other current assets and current liabilities on the unaudited condensed consolidated balance sheets approximate fair value because of their short-term nature. For debt and derivative instruments, the following methods and assumptions were used to estimate fair value:

Debt: The fair values of the Company's senior notes were based on the market for the Company's publicly-traded debt as determined based on yield of the Company's 7.5% Senior Notes due 2018, which was 2.8% at September 30, 2013 and 2.6% at December 31, 2012, and its 4.10% Senior Notes due 2022, which was 4.0% at September 30, 2013. The carrying value of the borrowings under the Company's unsecured revolving credit facility at September 30, 2013, approximate fair value because the interest rate is variable and reflective of market rates. The Company considers the fair value of its debt to be a Level 2 measurement on the fair value hierarchy.

Derivative Instruments: The fair value of all derivative instruments is the amount at which the instrument could be exchanged currently between willing parties. The amounts are based on quoted market prices, best estimates obtained from counterparties and an option pricing model, when necessary, for price option contracts.

GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. As presented in the tables below, this hierarchy consists of three broad levels:

Level 1 valuations - Consist of unadjusted quoted prices in active markets for identical assets and liabilities and have the highest priority.

Level 2 valuations - Consist of quoted market information for the calculation of fair market value.

Level 3 valuations - Consist of internal estimates and have the lowest priority.

Pursuant to GAAP, the Company has classified its derivatives into these levels depending upon the data utilized to determine their fair values. The Company's Level 2 fair value measurements include fixed-price swaps and are estimated using internal discounted cash flow calculations using the NYMEX futures index. The Company utilizes discounted cash flow models for valuing its interest rate derivatives. The net derivative values attributable to the Company's interest rate derivative contracts as of September 30, 2013 are based on (i) the contracted notional amounts, (ii) active market-quoted London Interbank Offered Rate ("LIBOR") yield curves and (iii) the applicable credit-adjusted risk-free rate yield curve. The Company's interest rate derivative asset and liability measurements represent Level 2 inputs in the hierarchy. The Company's Level 3 fair value measurements include fixed price call options and basis swaps. The Company's fixed price call options are valued using the Black-Scholes model, an industry standard option valuation model, and takes into account inputs such as contract terms, including maturity, and market parameters, including assumptions of the NYMEX futures index, interest rates, volatility and credit worthiness. The Company's basis swaps are estimated using internal discounted cash flow calculations based upon forward commodity price curves.

The accounting group, reporting to the Vice President and Controller, is responsible for determining the Company's Level 3 fair value measurements. Inputs to the Black-Scholes model, including the volatility input, which is the

significant unobservable input for Level 3 fair value measurements, are obtained from a third-party pricing source, with independent verification of most significant inputs on a monthly basis. An increase (decrease) in volatility would result in an increase (decrease) in fair value measurement, respectively.

Assets and liabilities measured at fair value on a recurring basis are summarized below (in thousands):

	September 30, 2013			
	Fair Value Measurements Using:			
	Quoted			
	Prices Significant			
	in			
	Active	Other	Significant	Assets
	Markets	Observable	Unobservable	(Liabilities)
	(Level	Inputs	Inputs	at Fair
	1)	(Level 2)	(Level 3)	Value
Derivative assets	\$ –	\$ 223,394	\$ 5,783	\$ 229,177
Derivative liabilities	–	(4,494)	(31,144)	(35,638)
Total	\$ –	\$ 218,900	\$ (25,361)	\$ 193,539

	December 31, 2012			
	Fair Value Measurements Using:			
	Quoted			
	Prices Significant			
	in			
	Active	Other	Significant	Assets
	Markets	Observable	Unobservable	(Liabilities)
	(Level	Inputs	Inputs	at Fair
	1)	(Level 2)	(Level 3)	Value
Derivative assets	\$ –	\$ 287,993	\$ 4,151	\$ 292,144
Derivative liabilities	–	–	(4,266)	(4,266)
Total	\$ –	\$ 287,993	\$ (115)	\$ 287,878

The table below presents reconciliations for the change in net fair value of derivative assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three- and nine-month periods ended September 30, 2013 and September 30, 2012. The fair values of Level 3 derivative instruments are estimated using proprietary valuation models that utilize both market observable and unobservable parameters. Level 3 instruments presented in the table consist of net derivatives valued using pricing models incorporating assumptions that, in the Company's judgment, reflect the assumptions a reasonable marketplace participant would have used at September 30, 2013 and September 30, 2012.

	For the three months ended September 30, 2013 2012		For the nine months ended September 30, 2013 2012

Total debt	\$ 1,912,365	\$ 1,669,473

Issuance of Senior Notes and Subsidiary Guarantees

The indentures governing the Company's senior notes contain covenants that, among other things, restrict the ability of the Company and/or its subsidiaries' ability to incur liens, to engage in sale and leaseback transactions and to merge, consolidate, or sell assets. All of the Company's senior notes are currently guaranteed by its subsidiaries, SEECO, Inc. ("SEECO"), Southwestern Energy Production Company ("SEPCO") and Southwestern Energy Services Company ("SES"). If no default or event of default has occurred and is continuing, these guarantees will be released (i) automatically upon any sale, exchange, or transfer of all of the Company's equity interests in the guarantor; (ii) automatically upon the liquidation and dissolution of a guarantor; (iii) following delivery of notice to the trustee of the release of the guarantor of its obligations under the Company's credit facility; and (iv) upon legal or covenant defeasance or other satisfaction of the obligations under the notes.

In December 2012, the Company completed its offer to exchange up to \$1.0 billion aggregate principal amount of its 4.10% Senior Notes due 2022 (the “Exchange Notes”, which were registered under the Securities Act of 1933, as amended (the “Act”), for any and all of its outstanding 4.10% Senior Notes due 2022, which were issued in a private placement in March 2012 (the “Private Notes”). The Exchange Notes have substantially identical terms to the Private Notes, except that the offering of the Exchange Notes was registered under the Act, and the Exchange Notes are not subject to any transfer restrictions. The Company exchanged \$999,500,000 of Private Notes for Exchange Notes, and has no further obligations under the related registration rights agreement.

Please refer to Note 17, “Condensed Consolidating Financial Information” in this Form 10-Q for additional information.

Credit Facility

In February 2011, the Company amended and restated its unsecured revolving credit facility, increasing the borrowing capacity to \$1.5 billion and extending the maturity date to February 2016 (“Credit Facility”). The amount available under the Credit Facility may be increased to \$2.0 billion at any time upon the Company’s agreement with its existing or additional lenders. The interest rate on the Credit Facility is calculated based upon our debt rating and is currently 200 basis points over the current London Interbank Offered Rate (LIBOR) and was 200 basis points over LIBOR at September 30, 2013. The Credit Facility is guaranteed by the Company’s subsidiary, SEECO and requires additional subsidiary guarantors if certain guaranty coverage levels are not satisfied. The facility contains covenants which impose certain restrictions on the Company. Under the credit agreement, the Company may not issue total debt in

excess of 60% of its total capital and must maintain a ratio of earnings before interest, taxes, depreciation and amortization (EBITDA) to interest expense of 3.5 or above. The terms of the Credit Facility also include covenants that restrict the ability of the Company and its material subsidiaries to merge, consolidate or sell all or substantially all of their assets, restrict the ability of the Company and its subsidiaries to incur liens and restrict the ability of the Company's subsidiaries to incur indebtedness. As of September 30, 2013, the Company was in compliance with the covenants of its debt agreements. While the Company believes all of the lenders under the Credit Facility have the ability to provide funds, it cannot predict whether each will be able to meet its obligation under the facility.

(11) COMMITMENTS AND CONTINGENCIES

Commitments

In the first quarter of 2010, the Company was awarded exclusive licenses by the Province of New Brunswick in Canada to conduct an exploration program covering approximately 2.5 million acres in the province. The licenses require the Company to make certain capital investments in New Brunswick of approximately \$47.0 million in the aggregate over a three year period. In order to obtain the licenses, the Company provided promissory notes payable on demand to the Minister of Finance of the Province of New Brunswick with an aggregate principal amount of \$44.5 million Canadian dollars. The promissory notes secure the Company's capital expenditure obligations under the licenses and are returnable to the Company to the extent the Company performs such obligations. If the Company fails to fully perform, the Minister of Finance may retain a portion of the applicable promissory notes in an amount equal to any deficiency. The Company commenced its Canada exploration program in 2010 and, as of September 30, 2013 has invested \$35.4 million in New Brunswick towards the Company's commitment. In December 2012, the Company received two one-year extensions to our exploration license agreements which expire on March 16, 2014 and March 16, 2015, respectively. No liability has been recognized in connection with the promissory notes due to the Company's investments in New Brunswick as of September 30, 2013 and its future investment plans.

In response to the Company's well performance, SES and SEPCO entered into new and amended natural gas transportation and gathering arrangements with third party pipelines, during the second quarter of 2013, in support of the Company's production in the Marcellus Shale Play. As of September 30, 2013, the Company's obligations for demand and similar charges under the firm transportation agreements and gathering agreements totaled approximately \$3.4 billion and the Company has guarantee obligations of up to \$100.0 million of that amount.

Environmental Risk

The Company is subject to laws and regulations relating to the protection of the environment. Environmental and cleanup related costs of a non-capital nature are accrued when it is both probable that a liability has been incurred and when the amount can be reasonably estimated. Management believes any future remediation or other compliance related costs will not have a material effect on the financial position or reported results of operations of the Company.

Litigation

Tovah Energy

In February 2009, SEPCO was added as a defendant in a Third Amended Petition in the matter of Tovah Energy, LLC and Toby Berry-Helfand v. David Michael Grimes, et, al. In the Sixth Amended Petition, filed in July 2010, in the 273rd District Court in Shelby County, Texas (collectively, the “Sixth Petition”), plaintiff alleged that, in 2005, they provided SEPCO with proprietary data regarding two prospects in the James Lime formation pursuant to a confidentiality agreement and that SEPCO refused to return the proprietary data to the plaintiff, subsequently acquired leases based upon such proprietary data and profited therefrom. Among other things, the plaintiff’s allegations in the Sixth Petition included various statutory and common law claims, including, but not limited to claims of misappropriation of trade secrets, violation of the Texas Theft Liability Act, breach of fiduciary duty and confidential relationships, various fraud based claims and breach of contract, including a claim of breach of a purported right of first refusal on all interests acquired by SEPCO between February 2005 and February 2006. In the Sixth Petition, plaintiff sought actual damages of over \$55.0 million as well as other remedies, including special damages and punitive damages of four times the amount of actual damages established at trial.

Immediately before the commencement of the trial in November 2010, plaintiff was permitted, over SEPCO’s objections, to file a Seventh Amended Petition claiming actual damages of \$46.0 million and also seeking the equitable remedy of disgorgement of all profits for the misappropriation of trade secrets and the breach of fiduciary duty claims. In December 2010, the jury found in favor of the plaintiff with respect to all of the statutory and common law claims

and awarded \$11.4 million in compensatory damages. The jury did not, however, award the plaintiff any special, punitive or other damages. In addition, the jury separately determined that SEPCO's profits for purposes of disgorgement were \$381.5 million. This profit determination does not constitute a judgment or an award. The plaintiff's entitlement to disgorgement of profits as an equitable remedy will be determined by the judge and it is within the judge's discretion to award none, some or all the amount of profit to the plaintiff. In December 2010, the plaintiff filed a motion to enter the judgment based on the jury's verdict. In February 2011, SEPCO filed a motion for a judgment notwithstanding the verdict and a motion to disregard certain findings. In March 2011, the plaintiff filed an amended motion for judgment and intervenor filed its motion for judgment seeking not only the monetary damages and the profits determined by the jury but also seeking, as a new remedy, a constructive trust for profits from 143 wells as well as future drilling and sales of properties in the prospect areas. At the suggestion of the judge, all parties voluntarily agreed to participate in non-binding mediation efforts. The mediation occurred in April 2011 and was unsuccessful. In June 2011, SEPCO received by mail a letter dated June 2011 from the judge, in which he made certain rulings with respect to the post-verdict motions and responses filed by the parties. In his rulings, the judge denied SEPCO's motion for judgment, judgment notwithstanding the verdict and to disregard certain findings. Plaintiff's and intervenor's claim for a constructive trust was denied but the judge ruled that plaintiff and intervenor shall recover from SEPCO \$11.4 million and a reasonable attorney's fee of 40% of the total damages awarded and are entitled to recover on their claim for disgorgement. The judge instructed that SEPCO calculate the profit on the designated wells for each respective period. SEPCO performed the calculation and provided it to the judge in June 2011. In July 2011, plaintiff and intervenor filed a letter with the court raising objections to the accounting provided by SEPCO, to which SEPCO filed a response in July 2011. In July 2011, the judge sent a letter to the parties in which he ruled that after reviewing the parties' respective position letters, he was awarding \$23.9 million in disgorgement damages in favor of the plaintiff and intervenor. In the July 2011 letter, the judge instructed the plaintiff and intervenor to prepare a judgment for his approval prior to July 2011 consistent with his findings in his June 2011 letter and the disgorgement award. In August 2011, a judgment was entered pursuant to which plaintiff and intervenor are entitled to recover approximately \$11.4 million in actual damages and approximately \$23.9 million in disgorgement as well as prejudgment interest and attorneys' fees which currently are estimated to be up to \$8.9 million and all costs of court of the plaintiff and intervenor. In September 2011, SEPCO filed a motion for a new trial and in November 2011 filed a notice of appeal. In November 2011, the court approved SEPCO's supersedeas bond in the amount of \$14.1 million, which stays execution on the judgment pending appeal. The bond covers the \$11.4 million judgment for actual damages, plus \$1.3 million in pre-judgment interest, \$1.3 million in post-judgment interest (estimating two years for the duration of appeal), and court costs.

In June 2012, SEPCO filed its appellate brief and, in June 2012, plaintiff and intervenor filed a cross-appellate brief seeking limited remand to reassess the disgorgement determination. The parties filed their responses to the appellate and cross appellate briefs in November 2012. Oral argument was held before the Tyler Court of Appeals on March 8, 2013. On July 10, 2013, the Tyler Court of Appeals ordered that (1) the judgment awarding plaintiff and intervenor \$23.9 million as disgorgement of illicit gains be reversed and judgment rendered that they take nothing, (2) the award of \$11.4 million for actual damages, insofar as it is based on the jury's findings of breach of fiduciary duty, fraud, breach of contract, and theft of trade secret is reversed and judgment rendered that plaintiff and intervenor take nothing under those theories of recovery, (3) the award of \$11.4 million to plaintiff and intervenor as damages for misappropriation of trade secret is affirmed, (4) the case be remanded to the trial court for a determination and award of attorney's fees for SEPCO as the prevailing party under the Texas Theft Liability Act, and (5) in all other respects, the judgment is affirmed. On July 25, 2013, SEPCO filed its motion for rehearing with the Tyler Court of Appeals, seeking reversal of every part of plaintiff and intervenor's recovery, and plaintiff and intervenor filed a court-ordered response. Plaintiff and intervenor filed their own motion for rehearing, and to date SEPCO has not been ordered to

respond.

Based on the Company's understanding and judgment of the facts and merits of this case, including appellate defenses, and after considering the advice of counsel, the Company has determined that, although reasonably possible after exhaustion of all appeals, an adverse final outcome to this lawsuit is not probable. As such, the Company has not accrued any amounts with respect to this lawsuit. If the plaintiff and intervenor were to ultimately prevail in the appellate process, the Company currently estimates, based on the judgments to date, that SEPCO's potential liability would be up to \$45.5 million, including interest and attorney's fees. The Company's assessment may change in the future due to occurrence of certain events, such as denied appeals, and such re-assessment could lead to the determination that the potential liability is probable and could be material to the Company's results of operations, financial position or cash flows.

20

Bureau of Land Management

In March 2010, the Company's subsidiary, SEECO, was served with a subpoena from a federal grand jury in Little Rock, Arkansas. Based on the documents requested under the subpoena and subsequent discussions described below, the Company believes the grand jury is investigating matters involving approximately 27 horizontal wells operated by SEECO in Arkansas, including whether appropriate leases or permits were obtained therefore and whether royalties and other production attributable to federal lands have been properly accounted for and paid. The Company believes it has fully complied with all requests related to the federal subpoena and delivered its affidavit to that effect. The Company and representatives of the Bureau of Land Management and the U.S. Attorney have had discussions since the production of the documents pursuant to the subpoena. In January 2011, the Company voluntarily produced additional materials informally requested by the government arising from these discussions. In September 2013, the U.S. Attorney's Office requested additional information regarding this matter. Although, to the Company's knowledge, no proceeding in this matter has been initiated against SEECO, the Company cannot predict whether or when one might be initiated. The Company intends to fully comply with any further requests and to cooperate with any related investigation. No assurance can be made as to the time or resources that will need to be devoted to this inquiry or the impact of the final outcome of the discussions or any related proceeding.

Other

We are subject to various litigation, claims and proceedings that have arisen in the ordinary course of business. Management believes, individually or in aggregate, such litigation, claims and proceedings will not have a material adverse impact on our financial position, results of operations or cash flows but these matters are subject to inherent uncertainties and management's view may change in the future. If an unfavorable final outcome were to occur, there exists the possibility of a material impact on our financial position, results of operations or cash flows for the period in which the effect becomes reasonably estimable. We accrue for such items when a liability is both probable and the amount can be reasonably estimated.

(12) SUPPLEMENTAL DISCLOSURES OF CASH FLOW INFORMATION

Supplemental disclosures of cash flow information:

Edgar Filing: SOUTHWESTERN ENERGY CO - Form 10-Q

	For the three months ended September 30, 2013 2012		For the nine months ended September 30, 2013 2012	
	(in thousands)			
Cash paid for interest	\$ 44,745	\$ 45,667	\$ 94,963	\$ 75,487
Cash paid for income taxes	\$ 1,330	\$ 400	\$ 18,636	\$ 468
Noncash property changes	\$ (11,745)	\$ (55,729)	\$ 34,437	\$ (34,940)

21

(13) PENSION PLAN AND OTHER POSTRETIREMENT BENEFITS

The Company has defined pension and postretirement benefit plans which cover substantially all of the Company's employees. Net periodic pension and other postretirement benefit costs include the following components for the three-and nine-month periods ended September 30, 2013 and 2012:

	Pension Benefits			
	For the three months ended		For the nine months ended	
	September 30, 2013	2012	September 30, 2013	2012
	(in thousands)			
Service cost	\$ 3,447	\$ 2,736	\$ 10,342	\$ 8,207
Interest cost	1,026	1,013	3,078	3,038
Expected return on plan assets	(1,534)	(1,356)	(4,602)	(4,069)
Amortization of prior service cost	25	71	77	214
Amortization of net loss	386	305	1,156	915
Net periodic benefit cost	\$ 3,350	\$ 2,769	\$ 10,051	\$ 8,305
	Postretirement Benefits			
	For the three months ended		For the nine months ended	
	September 30, 2013	2012	September 30, 2013	2012
	(in thousands)			
Service cost	\$ 574	\$ 458	\$ 1,722	\$ 1,374
Interest cost	111	100	331	299
Amortization of transition obligation	–	16	–	48
Amortization of prior service cost	4	4	11	11
Amortization of net loss	30	23	90	69
Net periodic benefit cost	\$ 719	\$ 601	\$ 2,154	\$ 1,801

As of September 30, 2013, the Company has contributed \$9.0 million to the pension plan and \$0.1 million to the postretirement benefit plan, and expects to contribute an additional \$3.0 million to the pension plan in 2013.

The Company maintains a non-qualified deferred compensation supplemental retirement savings plan (“Non-Qualified Plan”) for certain key employees who may elect to defer and contribute a portion of their compensation, as permitted by the plan. Shares of the Company’s common stock purchased under the terms of the Non-Qualified Plan are presented as treasury stock and totaled 14,625 shares at September 30, 2013 compared to 64,715 shares at December 31, 2012.

(14) STOCK-BASED COMPENSATION

The Company recognized the following amounts in employee stock-based compensation costs for the three- and nine-months ended September 30, 2013 and 2012:

	For the three months ended September 30, 2013		For the nine months ended September 30, 2012	
	2013	2012	2013	2012
	(in thousands)			
Stock-based compensation cost – expensed	\$ 2,921	\$ 2,677	\$ 8,883	\$ 8,226
Stock-based compensation cost – capitalized	\$ 2,809	\$ 2,482	\$ 8,543	\$ 7,788

As of September 30, 2013, there was \$38.2 million of total unrecognized compensation cost related to the Company's unvested stock option and restricted stock grants. This cost is expected to be recognized over a weighted-average period of 2.3 years.

The following table summarizes stock option activity for the nine months ended September 30, 2013 and provides information for options outstanding as of September 30, 2013:

	Number of Options	Weighted Average Exercise Price
Outstanding at December 31, 2012	3,649,520	\$ 29.84
Granted	26,010	38.76
Exercised	(705,991)	9.60
Forfeited or expired	(55,756)	37.47

Outstanding at September 30, 2013	2,913,783	34.68
Exercisable at September 30, 2013	1,699,151	\$ 34.06

The following table summarizes restricted stock activity for the nine months ended September 30, 2013 and provides information for unvested shares as of September 30, 2013:

	Number of Shares	Weighted Average Grant Date Fair Value
Unvested shares at December 31, 2012	1,117,515	\$ 35.64
Granted	32,346	37.53
Vested	(30,884)	36.19
Forfeited	(58,560)	35.77
Unvested shares at September 30, 2013	1,060,417	\$ 35.67

(15) SEGMENT INFORMATION

The Company's reportable business segments have been identified based on the differences in products or services provided. Revenues for the E&P segment are derived from the production and sale of natural gas and crude oil. The Midstream Services segment generates revenue through the marketing of both Company and third-party produced natural gas volumes and through gathering fees associated with the transportation of natural gas to market.

Summarized financial information for the Company's reportable segments is shown in the following table. The accounting policies of the segments are the same as those described in Note 1 of the Notes to Consolidated Financial Statements included in Item 8 of the 2012 Annual Report on Form 10-K. Management evaluates the performance of its segments based on operating income, defined as operating revenues less operating costs. Income before income taxes, for the purpose of reconciling the operating income amount shown below to consolidated income before income taxes, is the sum of operating income, interest expense and interest and other income (loss). The "Other" column includes items not related to the Company's reportable segments including real estate and corporate items.

	Exploration and Production (in thousands)	Midstream Services	Other	Total
Three months ended September 30, 2013:				
Revenues from external customers	\$ 621,833	\$ 246,501	\$ 32	\$ 868,366
Intersegment revenues
