INSWEB CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(unaudited)

1. Business of InsWeb

InsWeb operates an insurance lead generation business that provides consumer leads to insurance companies, insurance agents and other providers of automobile, property, health, term life, and small business insurance. On October 1, 2010, InsWeb acquired Potrero Media Corporation (“Potrero Media”), which operated a complementary lead generation business focused on the health and term life insurance markets.

InsWeb’s principal source of revenues is transaction fees from participating insurance providers, either directly from an insurance company or from a local insurance agent. While quotes and other information obtained through InsWeb’s online insurance marketplace are provided to consumers free of charge, InsWeb earns revenues from participating insurance providers based on the delivery of qualified leads. These fees are earned, generally, from the delivery of a lead to a participating insurance provider or local agent. In certain instances, consumers are provided the opportunity to link directly to a third-party insurance provider’s website. In these situations, the consumer will complete the third-party company’s online application, and InsWeb will be paid a fee for that consumer link or “click-through.”

InsWeb is subject to all of the risks inherent in the electronic commerce industry and special risks related to the online insurance industry. These risks include, but are not limited to, uncertain economic conditions which could result in lower growth rates, the changing nature of the electronic commerce industry, variations in the availability and cost of acquiring consumer traffic, and unpredictability of future revenues from insurance carriers, agents and other insurance providers. These risks and uncertainties, among others, could cause InsWeb’s actual results to differ materially from historical results or those currently anticipated. In light of the evolving nature of InsWeb’s business to better capitalize on its position as a leading insurance portal, including the integration of Potrero Media, InsWeb believes that period-to-period comparisons of its operating results are not necessarily meaningful and should not be relied upon as an indication of future performance. Moreover, there is no assurance that InsWeb will be able to achieve and sustain profitability.

2. Basis of Presentation

The consolidated financial statements include the accounts of InsWeb Corporation and its wholly-owned subsidiaries, Potrero Media, InsWeb Insurance Services, Inc. and Goldrush Insurance Services, Inc. All significant inter-company accounts and transactions have been eliminated in the consolidated financial statements.

The accompanying unaudited interim financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 8-03 of Regulation S-X. Accordingly, they do not contain all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, the accompanying unaudited interim condensed consolidated financial statements reflect all adjustments, which include only normal recurring adjustments, necessary to present fairly InsWeb’s financial position as of September 30, 2011 and the results of operations for the three and nine months ended September 30, 2011 and 2010 and of cash flows for the nine months ended September 30, 2011 and 2010. The financial data and other information disclosed in these notes to the condensed consolidated financial statements related to these periods are unaudited. The results for the nine months ended September 30, 2011 are not necessarily indicative of the results to be expected for any future period.

These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in InsWeb's Annual Report on Form 10-K and other information as filed with the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to such rules and regulations. The December 31, 2010 condensed consolidated balance sheet was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States. The Company believes the disclosures in its notes to the condensed consolidated financial statements are adequate to make the information presented not misleading.

On April 28, 2011, the operations of InsWeb Corporation and Potrero Media Corporation were combined into a single entity under the InsWeb name. The combined operations now constitute a single operating segment based on the guidance of Accounting Standards Codification ("ASC") 280 "Segment Reporting." Further information regarding segments can be found in Footnote 13 to the Consolidated Financial Statements. All references to "InsWeb" in describing our business for periods after October 1, 2010 will include Potrero Media, except as specifically noted otherwise.

INSWEB CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(unaudited)

In September 2011, the Financial Accounting Standards Board ("FASB") issued the Accounting Standards Update ("ASU") to permit an entity the option to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the first step of the two-step goodwill impairment test. Accordingly, based on the option created by the amended guidance, the calculation of a reporting unit's fair value is not required unless, as a result of the qualitative assessment, it is more likely than not that fair value of the reporting unit is less than its carrying amount. The amended guidance, which should be applied prospectively, becomes effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011, with early adoption permitted. We are currently evaluating the impact this update will have on our condensed consolidated financial statements.

In May 2011, as part of ongoing efforts with the International Accounting Standards Board to achieve convergence, the FASB issued the ASU on fair value measurements and disclosures to (i) clarify the application of existing fair value measurement and disclosure requirements and (ii) change a particular principle or requirement for measuring fair value or disclosing information about fair value measurements. The amendments in this ASU are effective for public entities for interim and annual periods beginning after December 15, 2011 and should be applied prospectively, with early application not permitted. We are currently evaluating the impact this update will have on our condensed consolidated financial statements.

In June 2011, the financial statement presentation of comprehensive income was amended by an ASU issued by the FASB to (i) eliminate the option to present the components of other comprehensive income ("OCI") in the statement of changes in stockholder's equity, (ii) require presentation of net income and OCI and their respective components either in a single continuous statement or in two separate but consecutive statements and (iii) require presentation of reclassification adjustments on the face of the statement. The amendments in this ASU do not change (i) the items that must be reported in OCI or when an item of OCI must be reclassified to net income or (ii) the option for an entity to present components of OCI either net of related tax effects or before related tax effects. Amendments to comprehensive income should be applied retrospectively and become effective for public entities for interim and annual periods beginning after December 15, 2011 with early adoption permitted. We are currently evaluating the impact this update will have on our condensed consolidated financial statements.

InsWeb has evaluated subsequent events through the time of filing these financial statements. Based upon the evaluation, there was no material impact on the accompanying consolidated financial statements.

3. Share-Based Payments

InsWeb maintains a stock option plan and an employee stock purchase plan. The following table sets forth the total share-based compensation expense relating to these plans included in InsWeb's operating expenses in its condensed consolidated statements of income for the three and nine months ended September 30, 2011 and 2010 (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,

7

INSWEB CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(unaudited)

4. Concentration of Risk — Significant Customers

For the three and nine months ended September 30, 2011, one customer (Geico) accounted for 13% and 13% of total revenues, respectively. For the three months ended September 30, 2010, three customers (Surehits, American Family, and Geico) accounted for 12%, 11%, and 11%, respectively. For the nine months ended September 30, 2010, American Family accounted for 11% of total revenues. At September 30, 2011, three customers (21st Century, State Farm and American Family Mutual) accounted for 12%, 10% and 10% of accounts receivable, respectively. At December 31, 2010, two customers (SureHits and Geico) accounted for 17% and 12% of accounts receivable, respectively.

5. Fair Value Measurements

The following table presents the assets and liabilities measured at fair value on a recurring basis as of September 30, 2011 (in thousands):

	September 30, 2011	Level 1	Level 2	Level 3
Assets:				
Cash equivalents \$	554	\$ 554	\$ —	—
Short-term investments	980	980	—	—
Total assets at fair value \$	1,534	\$ 1,534	\$ —	—

The following table presents the financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2010 (in thousands):

	December 31, 2010	Level 1	Level 2	Level 3
Assets:				
Cash equivalents \$	3,850	\$ 3,850	\$ —	—
Short-term investments	1,137	1,137	—	—
Restricted short-term investments	580	580	—	—
Total assets at fair value \$	5,567	\$ 5,567	\$ —	—
Liabilities:				
Contingent consideration \$	3,243	—	\$ —	3,243

Total liabilities at fair value \$	3,243	—	—\$	3,243
------------------------------------	-------	---	-----	-------

Cash equivalents, short-term investments and restricted short-term investments include certificates of deposit, money market funds and commercial paper from corporations whose credit ratings are P-1 by Moody's or A-1 by Standard & Poor's. The carrying value of these cash equivalents, short-term investments and restricted short-term investments approximates fair value. For these securities, InsWeb uses quoted prices in active markets for identical assets to determine their fair value and are considered to be Level 1 instruments.

The fair value of the contingent consideration associated with the Potrero Media acquisition was accrued for and classified as accrued contingent consideration in the accompanying consolidated balance sheet. See Part I, Item 1, "Financial Statements — Note 6 — Acquisition." The fair value was determined based on unobservable inputs, namely management's estimate of expected performance based on current information, and therefore are considered to be Level 3 liabilities. The following table provides a reconciliation of the beginning and ending balances for the liability measured at fair value using significant unobservable inputs (Level 3).

	Contingent Consideration
Balance as of January 1, 2011	\$ 3,243
Payments	(2,123)
Interest on contingent consideration	34
Gain on extinguishment of contingent consideration (see Note 6)	(1,154)
Balance as of September 30, 2011	\$ -

INSWEB CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(unaudited)

Management determined the fair value of contingent consideration based on a number of factors, including a third-party valuation, utilizing using either the cost or income approach in conjunction with discussions with management and certain forecasts prepared by InsWeb. The income approach was utilized for the valuation of customer relationships and non-compete agreements. The cost approach was utilized for the valuation of websites and technologies. When the income approach was used, the rate utilized to discount net cash flows to their present values was approximately 30%. The discount rates were determined using a weighted-average cost of capital which incorporated the implied cost of equity and debt of InsWeb based on the forecasted cash flows after consideration of InsWeb's rate of return on debt, capital, equity, the weighted average return on invested capital, and the internal rate of return specific to this transaction.

6. Acquisition

On October 1, 2010 (the "Closing Date"), InsWeb completed its acquisition of 100% of the capital stock of Potrero Media pursuant to the Stock Purchase Agreement and related amendments ("Purchase Agreement") signed on August 31, 2010. Potrero Media was acquired for a fair market value of \$11.2 million paid in a combination of cash, stock and contingent earnout payments. InsWeb accounts for acquisitions in accordance with ASC 805 "Business Combinations." Accordingly, the net assets acquired were recorded at their estimated fair values and Potrero Media's operating results were included in the Company's condensed consolidated financial statements from the date of acquisition.

On May 2, 2011, InsWeb and the former shareholders of Potrero Media executed the Third Amendment to the Purchase Agreement. As a result of the Third Amendment, InsWeb paid Potrero Media's former shareholders \$2.1 million on May 2, 2011 in exchange for their waiver of all rights to future consideration under the Stock Purchase Agreement. As a result, InsWeb eliminated the contingent consideration liability of \$3.3 million from its balance sheet during the three month period ended June 30, 2011. As a result of the Third Amendment, the Company recognized other income of approximately \$1.2 million, included in Other Income, net in the Condensed Consolidated Statements of Income. This represented the difference between the payment of \$2.1 million agreed to in Third Amendment and the \$3.3 million contingent consideration liability outstanding as of May 2, 2011, the execution date of the Third Amendment.

7. Related Party Receivables

As of September 30, 2011 related party receivables relate to cash and accrued interest to be received at the maturity date on a promissory note with a principal amount totaling \$100,000 from one current non-officer employee of InsWeb. As of December 31, 2010, related party receivables relate to cash and accrued interest to be received at the maturity date on promissory notes with principal amounts totaling \$300,000 from two former non-officer employees and one current non-officer employee of InsWeb. These notes are unsecured loans with a per annum rate of 2.42%. The two former non-officer employees paid their promissory notes and interest in full in July 2011. The maturity date for all principal and interest on the current non-officer employee's promissory note was extended to December 31, 2011.

8. Prepaid Expenses and Other Current Assets

Prepaid expenses and other current assets consist of the following (in thousands):

	September 30, 2011	December 31, 2010
Prepaid rent and current portion of lease deposits	\$ 15	\$ 185
Prepaid insurance	203	133
Prepaid software licenses	20	47
Other receivables	250	77
Other	29	117
	\$ 517	\$ 559

9. Restricted Short-Term Investments

As of September 30, 2011 and December 31, 2010, restricted short-term investments consisted of \$0 and \$580,000 respectively in short-term investments used as collateral to obtain a commercial credit line. The commercial credit agreement required the collateral value of the securities account to be at least \$550,000, based on investments held by InsWeb. In May 2011, InsWeb cancelled its commercial credit agreement with the issuing bank and therefore, the collateral was released from restriction. The unrestricted short-term investments were reclassified to short-term investments.

INSWEB CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(unaudited)

10. Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities consist of the following (in thousands):

	September 30, 2011	December 31, 2010
Accrued employee compensation	\$ 526	\$ 357
Deferred rent	131	39
Other	31	32
	\$688	\$428

11. Comprehensive Income

Total comprehensive income was as follows (in thousands):

	Three months ended September 30,		Nine months ended September 30,	
	2011	2010	2011	2010
Net income (loss)	\$ 501	\$ 357	\$ 1,778	\$ 1,149
Other comprehensive income (loss) - change in unrealized gain or loss on investments	-	5	-	2
Comprehensive income (loss)	\$ 501	\$ 362	\$ 1,778	\$ 1,151

12. Net Income Per Share

Basic net income per share is computed using the weighted-average number of shares of common stock outstanding. Diluted income per share is a measure of the potential dilution that would occur if stock options had been exercised.

The following table reconciles the numerator and denominator used to calculate basic and diluted net income per share of common stock:

(In thousands, except per share amounts)	Three months ended September 30,		Nine months ended September 30,	
	2011	2010	2011	2010

Numerator for basic and diluted net income per share:

Net income available to common stockholders	\$ 501	\$ 357	\$ 1,778	\$ 1,149
---	--------	--------	----------	----------

Denominator for net income per share:

Edgar Filing: INSWEB CORP - Form 10-Q

Basic—weighted average shares of common stock outstanding	5,777	4,856	5,663	4,839

INSWEB CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

(unaudited)

13. Segments

Prior to the acquisition of Potrero Media, the Company operated one segment. From the October 1, 2010 through April 28, 2011, InsWeb's operations were managed and reported in two operating segments, InsWeb and Potrero Media. Both segments operated an online insurance lead generation business for a variety of personal insurance products. Because the former shareholders of Potrero Media were entitled to contingent consideration based on the financial performance of the Potrero Media lead generation business, discrete financial and operating information was reported to InsWeb's Chief Operating Decision Maker ("CODM"). The CODM reviewed the financial and operating results of InsWeb and Potrero Media separately and made decisions about resources to be allocated to each based on their separate performance.

On April 28, 2011, the operations of InsWeb Corporation and Potrero Media Corporation were combined into a single entity under the InsWeb name, and Potrero Media became a non-operating subsidiary of InsWeb Corporation. The combined operations have created a single operating segment as described in the guidance of ASC 280 "Segment Reporting." In particular, the CODM no longer allocates resources between InsWeb and Potrero Media and discrete financial information is no longer available for Potrero Media. Because InsWeb operated as one segment for the three and nine months ended September 30, 2010 and the Company is operating and disclosing its current results as one segment for the comparable periods ended September 30, 2011, no restated segment results are disclosed herein as the current disclosures are consistent with those provided in the prior comparable periods reported herein.

14. Commitments and Contingencies

Leases

InsWeb has a non-cancelable lease through February 14, 2017 for approximately, 16,000 square feet of office space in the Sacramento area which houses its corporate headquarters. InsWeb has two, consecutive options to extend the term for five years each at the prevailing market rent.

InsWeb's San Francisco office location includes administrative, product development, sales and marketing functions in a 10,000 square foot facility, which InsWeb occupies under a non-cancelable lease expiring in October 2014. InsWeb has four consecutive options to extend the term for five years each. Mr. Richard A. Natsch, President and COO and Mrs. Heather K. Natsch, Senior Vice President, of InsWeb are co-owners of Mission Potrero Properties, LLC, which are the lessors of the property that InsWeb occupies.

Securities Class Action

A securities class action lawsuit was filed on December 5, 2001 in the United States District Court for the Southern District of New York, (the "Court") purportedly on behalf of all persons who purchased our common stock from July 22, 1999 through December 6, 2000. The complaint named as defendants InsWeb, certain current and former officers and directors, and three investment banking firms that served as underwriters for InsWeb's initial public offering in July 1999. The complaint, as subsequently amended, alleges violations of Sections 11 and 15 of the Securities Act of 1933 and Sections 10 and 20 of the Securities Exchange Act of 1934, on the grounds that the prospectuses incorporated in the registration statements for the offering failed to disclose, among other things, that (i) the

underwriters had solicited and received excessive and undisclosed commissions from certain investors in exchange for which the underwriters allocated to those investors material portions of the shares of our stock sold in the offerings and (ii) the underwriters had entered into agreements with customers whereby the underwriters agreed to allocated shares of the stock sold in the offering to those customers in exchange for which the customers agreed to purchase additional shares of InsWeb stock in the aftermarket at pre-determined prices. No specific damages are claimed. Similar allegations have been made in lawsuits relating to more than 300 other initial public offerings conducted in 1999 and 2000, all of which have been consolidated for pretrial purposes. In October 2002, all claims against the individual defendants were dismissed without prejudice. In February 2003, the Court dismissed the claims in the InsWeb action alleging violations of the Securities Exchange Act of 1934 but allowed the plaintiffs to proceed with the remaining claims. In June 2003, the plaintiffs in all of the cases presented a settlement proposal to all of the issuer defendants. Under the proposed settlement, the plaintiffs would dismiss and release all claims against participating defendants in exchange for a contingent payment guaranty by the insurance companies collectively responsible for insuring the issuers in all the related cases, and the assignment or surrender to the plaintiffs of certain claims the issuer defendants may have against the underwriters. InsWeb and most of the other issuer defendants have accepted the settlement proposal. While the District Court was considering final approval of the settlement, the Second Circuit Court of Appeals vacated the class certification of plaintiffs' claims against the underwriters in six cases designated as focus or test cases. On December 14, 2006, the District Court ordered a stay of all proceedings in all of the lawsuits pending the outcome of plaintiffs' petition to the Second Circuit for rehearing en banc and resolution of the class certification issue. On April 6, 2007, the Second Circuit denied plaintiffs' petition for rehearing, but clarified that the plaintiffs may seek to certify a more limited class in the District Court. Because of the significant technical barriers presented by the Court's decision, the parties withdrew the proposed settlement and the plaintiffs filed an amended complaint. Representatives of all of the parties to the IPO litigation agreed to a revised settlement; as with the earlier settlement proposal, the revised settlement proposal does not require InsWeb to contribute any cash. The revised settlement was approved by the District Court on October 5, 2009, but a number of plaintiffs appealed the approval to the Second Circuit Court of Appeal. Subsequently, the District Court determined that none of the objectors had standing to appeal. One of the putative objectors has filed a notice of appeal of the determination as to him. There is no assurance that the new settlement will be upheld on appeal. If the settlement is not upheld, InsWeb intends to defend the lawsuit vigorously. The litigation and settlement process is inherently uncertain and management cannot predict the outcome, though, if unfavorable, it could have a material adverse effect on InsWeb's financial condition, results of operations and cash flows.

Section 16(b) Lawsuit

On October 12, 2007, Vanessa Simmonds, a purported stockholder of InsWeb, filed a complaint in the United States District Court for the Western District of Washington, against InsWeb and two investment banking firms that served as underwriters for the initial public offering of our common stock in July 1999. The complaint alleges that: (i) the defendants, other underwriters of the offering, and unspecified officers, directors and principal stockholders of InsWeb constituted a “group” that owned in excess of 10% of InsWeb’s outstanding common stock between July 23, 1999 and July 20, 2000; (ii) the defendants were therefore subject to the “short swing” prohibitions of Section 16(b) of the Securities Exchange Act of 1934; and (iii) the defendants engaged in purchases and sales, or sales and purchases, of InsWeb’s common stock within periods of less than six months in violation of the provisions of Section 16(b). The complaint seeks disgorgement of all profits allegedly received by the defendants, with interest and attorneys’ fees, for transactions in violation of Section 16(b). InsWeb, as the statutory beneficiary of any potential Section 16(b) recovery, is named as a nominal defendant in the complaint. A number of similar lawsuits against underwriters of other public offerings have recently been filed by the same plaintiff and law firm. On February 11, 2008, the court approved a stipulated order that InsWeb need not answer or otherwise respond to the complaint. On February 28, 2008, the plaintiff filed an amended complaint, and InsWeb was again excused from filing an answer. On March 12, 2009 the court issued an order dismissing the lawsuit with prejudice, but plaintiffs appealed this order to the Ninth Circuit Court of Appeal. On December 2, 2010, the Ninth Circuit determined that the plaintiff’s demand letters sent to 30 defendant issuers were inadequate and affirmed the district court’s dismissal of plaintiff’s claim as to those defendants. The Ninth Court remanded another 24 cases, including InsWeb’s case, with instructions that the District Court permit the underwriters and issuers to file motions challenging the adequacy of the demand letters in those cases. The Ninth Circuit made clear to the District Court that the Ninth Circuit expects the District Court to dismiss claims as to issuers, such as InsWeb, that received demand letters similar to the letters that were found to be inadequate. But the Ninth Circuit also reversed the District Court’s decision that the statute of limitations had run on claims of certain issuers, including InsWeb, which may leave open the possibility that plaintiff could send new demand letters. On June 27, 2011, the United States Supreme Court granted the underwriters’ and plaintiff’s request for review. If the lawsuit is reinstated on appeal, InsWeb intends to defend the lawsuit vigorously. The litigation and settlement process is inherently uncertain and management cannot predict the outcome, though, if unfavorable, it could have a material adverse effect on InsWeb’s financial condition, results of operations and cash flows.

15. Subsequent Event

On October 10, 2011, we entered into an Asset Purchase Agreement with Bankrate, Inc (“Bankrate”). The Asset Purchase Agreement or Asset Sale Transaction provides for the sale of substantially all of the assets and certain liabilities relating to our insurance lead generation business and we anticipate recording a gain from the Asset Sale Transaction. If the Asset Sale Transaction is completed, we will no longer conduct the lead generation business. Instead, we will focus on the new Patent Licensing Business. We intend to generate revenues and related cash flows from the grant of intellectual property rights for the use of, or pertaining to, our patented technologies. We currently own five issued patents and two patent applications. We may also consider the sale of one or more of our patents. Under the terms of the Asset Purchase Agreement, Bankrate has agreed to pay \$65 million in cash for the assets, subject to certain adjustments, and to assume certain liabilities of InsWeb, as described in the Asset Purchase Agreement. Following the closing, we will retain a portfolio of e-commerce and online insurance distribution patents. We refer to this as the Asset Sale Transaction.

The Asset Sale Transaction is subject to various closing conditions, including the receipt of regulatory approvals and the approval of our stockholders. The transaction is not subject to a financing condition. Our board of directors has unanimously recommended that our stockholders approve the transaction. Hussein Enan, our Chairman and Chief Executive Officer, and various funds managed by Osmium Capital Partners, which, together with Mr. Enan, collectively own approximately 40% of our outstanding shares on the date hereof, have entered into Voting and Support Agreements with Bankrate which obligate them to vote in favor of the transaction and against other acquisition proposals. Mr. Enan, who holds approximately 24% of our outstanding shares on the date hereof, has agreed that he will not, among other things, sell, transfer, assign, tender in any tender or exchange offer, or otherwise dispose of any of his shares or, with limited exceptions, exercise any stock options for our shares. The transaction is expected to close by the end of 2011.

The Asset Purchase Agreement contains customary representations and warranties of the parties. The statements set forth in those representations and warranties are made solely for purposes of the Asset Purchase Agreement and may be subject to important qualifications and limitations agreed to by the parties in connection with the negotiated terms of the Asset Purchase Agreement. Moreover, some of those representations and warranties may have only been true at a certain date, may be subject to a contractual standard of materiality or may have been used for purposes of allocating risk between us and Bankrate rather than establishing matters of fact. Our stockholders are not third party beneficiaries under the Asset Purchase Agreement and should not rely on the representations, warranties and covenants or any descriptions thereof as characterizations of the actual state of facts or conditions of our company or of Bankrate.

The Asset Purchase Agreement also includes customary covenants of our company and Bankrate. We have generally agreed to operate our business in the ordinary course until the closing of the transaction. Subject to certain exceptions, we have also agreed not to solicit or initiate discussion with third parties regarding other proposals to acquire our company or substantially all of the assets and certain liabilities related to our lead generation business, and to certain restrictions on our ability to respond to or accept any such proposals. In connection with the closing of the transactions contemplated by the Asset Purchase Agreement, we have also agreed to license rights under our patent portfolio to Bankrate on a perpetual, royalty-free, non-exclusive basis.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q, and in particular Management's Discussion and Analysis of Financial Condition and Results of Operations, contains "forward-looking statements" with respect to InsWeb's future financial performance. The words or phrases "expects," "anticipates," "intends," "plans," "believes," "seeks," "estimates," and similar expressions are generally intended to identify forward-looking statements. Such forward-looking statements are subject to various known and unknown risks and uncertainties, and InsWeb cautions you that any forward-looking information provided by, or on behalf of, InsWeb is not a guarantee of future performance. Actual results could differ materially from those anticipated in such forward-looking statements due to a number of factors, some of which are beyond InsWeb's control, including, but not limited to, uncertain economic conditions which could result in lower growth rates, fluctuations in revenues, anticipated and unanticipated losses, the unpredictability of consumer shopping and/or buying behavior, especially on the internet, potential increases in advertising and marketing costs on the internet, the rate of participation by insurance companies and agents, reliance on key customers, who are themselves subject to volatility in their operating cycles, reliance on third party lead aggregators who provide leads to their networks of insurance providers on InsWeb's behalf, competition, risks associated with system development and operation risks, management of potential growth and risks of new business areas, business combinations, litigation in which InsWeb is a party, and strategic alliances. These risks and uncertainties, as well as other risks and uncertainties, which are described in greater detail in InsWeb's Annual Report on Form 10-K for the year ended December 31, 2010 and other documents filed with the Securities and Exchange Commission, could cause InsWeb's actual results to differ materially from historical results or those currently anticipated. All forward-looking statements are based on information available to InsWeb on the date hereof, and InsWeb assumes no obligation to update such statements.

Overview

InsWeb (the "Company," "InsWeb," "we," "us," or "our") operates an insurance lead generation business that provides consumer leads to insurance companies, insurance agents and other providers of automobile, property, health, term life and small business insurance. InsWeb has combined extensive knowledge of the insurance industry, technological expertise and close relationships with insurance companies, agents and other providers to develop an integrated online marketplace.

As noted in Note 15, "Subsequent Events," on October 10, 2011, we entered into an Asset Purchase Agreement with Bankrate, Inc ("Bankrate"). The Asset Purchase Agreement or Asset Sale Transaction provides for the sale of substantially all of the assets and certain liabilities relating to our insurance lead generation business. Under the terms of the Asset Purchase Agreement, Bankrate has agreed to pay \$65 million in cash for the assets, subject to certain adjustments, and to assume certain liabilities of InsWeb, as described in the Asset Purchase Agreement. Following the closing, we will retain a portfolio of e-commerce and online insurance distribution patents. We refer to this as the Asset Sale Transaction.

The Asset Sale Transaction is subject to various closing conditions, including the approval of our shareholders. Accordingly, the discussion and analysis of our operating results for the periods covered in this Quarterly Report on Form 10-Q and our statements regarding future trends or expectations relate solely to our business as it is currently conducted.

InsWeb's principal source of revenues is transaction fees from insurance providers, which include insurance companies, national, statewide or nationwide insurance brokers, and local independent or exclusive agents (such as State Farm agents). Quotes and other information obtained through InsWeb's online insurance marketplace are provided to consumers free of charge. InsWeb earns a majority of its revenues from participating insurance providers, based on the delivery of qualified leads from consumers who have completed an insurance form. Lead revenues

represented approximately 88% and 85% of total revenues for the nine months ended September 30, 2011 and 2010 respectively. In certain instances, consumers are provided the opportunity to link directly to a third-party insurance provider's website ("Cost per Click" or "CPC" program). In these situations, the consumer will complete the third-party company's online application, and InsWeb will be paid a fee for that consumer link or "click-through." Click-through revenues accounted for approximately 11% and 14% of total revenues for the nine months ended September 30, 2011 and 2010 respectively.

We have focused our efforts on automobile insurance, which accounted for approximately 78% and 83% of our transaction revenues in 2010 and 2009 respectively. With the addition of Potrero Media, however, health insurance revenues have increased significantly. For the nine month period ending September 30, 2011, automobile insurance accounted for 68% and health insurance accounted for 19% of our transaction revenues. For the comparable nine month period in 2010, automobile insurance accounted for approximately 83% and health insurance accounted for less than 1% of transaction revenues. We anticipate that automobile insurance will continue to account for a substantial portion of our revenues for the remainder of 2011.

Results of Operations

The following financial highlights and key metrics are provided as a resource for our investors

	Three months Ended		Nine months Ended	
	September 30, 2011	September 30, 2010	September 30, 2011	September 30, 2010
Revenues (in thousands):				
Auto	\$8,391	\$8,891	\$26,370	\$ 24,140
Health	2,577	18	7,316	64
Property	901	970	2,584	2,922
Term life	775	463	2,341	1,432
Agent directory	65	93	213	301
All other	17	45	129	187
Total transaction fees	\$12,726	\$10,480	\$38,953	\$ 29,046
Direct marketing costs (in thousands):	\$8,490	\$6,881	\$26,118	\$19,425
Direct marketing costs as a percent of revenues:	67	% 65	% 67	% 67
Cash, cash equivalents, short-term investments and restricted short-term investments (in thousands):	\$8,875	\$10,770	\$8,875	\$10,770
Account receivable (in thousands):	\$4,527	\$3,381	\$4,527	\$3,381
Day sales outstanding (DSO):	37	29	37	29
Headcount:	70	61	70	61

Transaction Fees.

InsWeb earns transaction fees from participating insurance providers based on the delivery of qualified consumer leads or consumer click-throughs. InsWeb's primary methods of acquiring consumer traffic are:

Direct to consumers: consumers who started a shopping session on a website of InsWeb or its subsidiaries, including consumers acquired through paid and organic search, or through email;

From competitors: consumers who were acquired by InsWeb from its competitors - Bankrate and AllWebLeads Inc., in the form of qualified leads;

Form hosting: consumers who InsWeb acquired directly from non-competitor 3rd parties in the form of qualified leads.

Automobile insurance transaction fees (consisting of lead fees and click-through fees) decreased to \$8.4 million for the three months ended September 30, 2011, compared to \$8.9 million for the comparable periods in 2010 and

increased to \$26.4 million for the nine months ended September 30, 2011, compared to \$24.1 million for the comparable periods in 2010. The decrease in automobile insurance revenues for the three months ended September 30, 2011 compared to the comparable period in 2010 resulted from a \$1.6 million or 67% decrease in the revenue from direct to consumer traffic sources and a \$0.4 million or 7% decrease in revenue from form hosting traffic sources, offset against a \$1.5 million or 155% increase in the revenue from consumers acquired from competitor traffic sources. The increase in automobile insurance revenues for the nine months ended September 30, 2011 resulted from a \$4.0 million or 110% increase in the revenue from consumers acquired from competitor traffic sources and a \$1.7 million or 13% increase in revenue from form hosting traffic sources, offset against a \$3.4 million or 50% decrease in the revenue from direct to consumer traffic sources. InsWeb expects the number of form hosting relationships to remain at or near current levels for the remainder of 2011.

Health insurance transaction fees (consisting of lead fees and click-through fees) increased to \$2.6 million and \$7.3 million for the three and nine months ended September 30, 2011, from \$18,000 and \$64,000 for the comparable periods in 2010, the entire increase was attributed to the acquisition of Potrero Media on October 1, 2010. With the acquisition, InsWeb expects health insurance transaction fees to remain at or near the current percentage of total revenues for the remainder of 2011.

Property insurance transaction fees (consisting primarily of lead fees) decreased to \$0.9 million and \$2.6 million for the three and nine months ended September 30, 2011, compared to \$1.0 million and \$2.9 million for the comparable periods in 2010. The decrease in transaction fees for the three and nine months ended September 30, 2011 from the comparable periods in 2010 was primarily attributable to a decrease in revenue from direct to consumer traffic sources.

Term life insurance transaction fees (consisting primarily of lead fees) increased to \$0.8 million and \$2.3 million for the three and nine months ended September 30, 2011 from \$0.5 million and \$1.4 million for the comparable periods in 2010. The increase in transaction fees was primarily attributable to the acquisition of Potrero Media on October 1, 2010 and a net increase in the number of consumers acquired from form hosting traffic sources. An increase of 0.8 million and 2.9 million consumers were acquired from direct to consumer traffic sources and a 21,000 or 181% and 46,000 or 223% increase in the number of consumers were acquired from form hosting traffic sources for the three and nine months ended September 30, 2011. The increase in direct to consumer traffic was primarily attributed to Potrero Media. InsWeb expects the number of form hosting relationships to remain at the current levels for the remainder of 2011.

We expect auto, health, property and term life transaction fees to remain at or near current levels for the remainder of 2011.

Agent directory revenues (consisting of subscription revenue and advertising revenues) were \$0.1 million for both the three months ended September 30, 2011 and the comparable period in 2010. Agent directory revenues decreased to \$0.2 million for the nine months ended September 30, 2011 from \$0.3 million for the comparable period in 2010. Agent directory revenues are expected to remain at current levels for the remainder of 2011.

Operating Expenses

(in thousands, except percentages)	Three months ended September 30,		Percentage change from prior period	
	2011	2010		
Operating expenses:				
Direct marketing	\$ 8,490	\$ 6,881	23	%
Sales and marketing	1,657	1,206	37	%
Technology	612	615	-	%
General and administrative	1,488	1,459	2	%
(in thousands, except percentages)	Nine months ended September 30,		Percentage change from prior period	
	2011	2010		
Operating expenses:				
Direct marketing	\$ 26,118	\$ 19,425	34	%
Sales and marketing	5,723	3,869	48	%

Edgar Filing: INSWEB CORP - Form 10-Q

Technology	2,526	1,685	50	%
General and administrative	4,075	3,045	34	%

Direct Marketing. Direct marketing expenses consist of advertising, promotions and fees incurred to drive consumer traffic directly to the InsWeb online marketplace, and fees paid to third parties pursuant to form hosting marketing partnerships.

Direct marketing expenses for the three and nine months ending September 30, 2011 increased to \$8.5 million and \$26.1 million from \$6.9 million and \$19.4 million for the comparable periods in 2010. The 23% and 34% increase in spending for the three and nine months ended September 30, 2011 from the comparable periods in 2010 is primarily due to continued increase of consumers being acquired through form hosting marketing partnerships. The increase in direct marketing expenses for the three and nine months ended September 30, 2011 were also attributed to the acquisition of Potrero Media on October 1, 2010. Direct marketing expenses as a percent of total revenues were 67% for the three and nine months ended September 30, 2011 and 2010.

We expect direct marketing expenses relative to revenues, to remain at or near current levels for the remainder of 2011 as we do not expect significant changes in our marketing sources. However we are continuing our endeavors to increase organic traffic.

Sales and Marketing. Sales and marketing expenses consist primarily of payroll and related expenses, including employee benefits, facility costs, telecommunications and systems costs, for our sales and marketing personnel. Sales and marketing expenses increased to \$1.7 million and \$5.7 million for the three and nine months ended September 30, 2011, from \$1.2 million and \$3.9 million for the comparable periods in 2010. The increase was primarily due to sales and marketing expenses attributed to the acquisition of Potrero Media on October 1, 2010, severance costs associated with the reorganization in May 2011 reduction in force and corporate overhead allocation. Sales and marketing expenses are expected to remain at or near current levels for the remainder of 2011.

Technology. Technology expenses consist primarily of payroll and related expenses, including employee benefits, facility and systems costs, for product and site development personnel involved with our technology initiatives. Technology expenses were \$0.6 million for both the three months ended September 30, 2011 and the comparable period in 2010. Technology expenses increased to \$2.5 million for the nine months ended September 30, 2011, from \$1.7 million for the comparable period in 2010. The increase was primarily due to technology related expenses attributable to the acquisition of Potrero Media on October 1, 2010, severance costs associated with the reorganization in May 2011, corporate overhead allocation and software licenses. Technology expenses are expected to remain at or near current levels for the remainder of 2011.

General and Administrative. General and administrative expenses consist primarily of payroll and related expenses, including employee benefits, facility costs, telecommunications and systems costs, for our general management, administrative and accounting personnel, as well as other general corporate expenses. General and administrative expenses were \$1.5 million for both the three months ended September 30, 2011 and the comparable period in 2010. General and administrative expenses increased to \$4.1 million for the nine months ended September 30, 2011 from \$3.0 million for the comparable period in 2010. The increase was primarily due to the general and administrative expenses attributable to the acquisition related expenses of Potrero Media, share-based compensation expense, and an increase in salaries and benefits. The increase in salaries and benefits include the increases for senior management approved by the Compensation Committee on December 15, 2010. General and administrative expenses are expected to increase significantly for the remainder of 2011 with an increase in transaction related costs associated to the Asset Purchase Agreement with Bankrate.

Interest and Other Income, Net. Net interest income (expense) was \$1,000 and (\$23,000) for the three and nine months ended September 30, 2011 as compared to \$8,000 and \$20,000 in the comparable periods in 2010. Due to the acquisition of Potrero Media on October 1, 2010, interest expense is recognized on imputed interest for the contingent consideration related to the transaction. On May 2, 2011, InsWeb and the former shareholders of Potrero Media executed the Third Amendment to the Purchase Agreement. As a result of the Third Amendment, InsWeb paid Potrero Media's former shareholders \$2.1 million on May 2, 2011 in exchange for their waiver of all rights to future consideration under the Stock Purchase Agreement. As a result, InsWeb eliminated the contingent consideration liability of \$3.3 million from its balance sheet during the three month period ended June 30, 2011 and therefore, imputed interest expense will no longer be recognized. As a result of the Third Amendment, the Company recognized other income of approximately \$1.2 million, included in Other Income, net in the Condensed Consolidated Statements of Income. This represented the difference between the payment of \$2.1 million agreed to in Third Amendment and the \$3.3 million contingent consideration liability outstanding as of May 2, 2011, the execution date of the Third Amendment. InsWeb's investment portfolio consists entirely of cash, cash equivalents and short-term investments. InsWeb expects that returns received from its investment portfolio in the remainder of 2011 will be negligible given current economic conditions in the United States.

Income Taxes. A provision of \$6,000 for income taxes was recognized for the three and nine months ended September 30, 2011, compared to \$10,000 and \$17,000 for the comparable periods in 2010.

Critical Accounting Policies

InsWeb's discussion and analysis of its financial condition and results of operations are based on InsWeb's consolidated financial statements which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires InsWeb to make estimates and judgments that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. InsWeb bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. InsWeb believes the following critical accounting policies affect its more significant judgments and estimates used in the preparation of its consolidated financial statements.

Revenue Recognition. InsWeb’s principal source of revenues is transaction fees from participating insurance providers, either directly from an insurance company or from a local insurance agent. While quotes and other information obtained through InsWeb’s online insurance marketplace are provided to consumers free of charge, InsWeb earns revenues from participating insurance providers based on the delivery of qualified leads. In certain instances, consumers are provided the opportunity to link directly to a third-party insurance provider’s website (“Sponsored Web Link” program). In these situations, the consumer will complete the third-party company’s online application, and InsWeb will be paid a fee for that consumer link or “click-through.” InsWeb recognizes revenue when (i) persuasive evidence of an arrangement between InsWeb and the customer exists, (ii) delivery of the product to the customer has occurred or service has been provided to the customer, (iii) the price to the customer is fixed or determinable and (iv) collectability of the sales price is reasonably assured.

Business Combinations. In 2010, InsWeb adopted ASC 805, Business Combinations, which revised the accounting guidance that is required to apply for acquisitions in comparison to prior fiscal years. The underlying principles are similar to the previous guidance and require that InsWeb recognize separately from goodwill the assets acquired and the liabilities assumed at their acquisition date fair values. The goodwill recognized of \$2.7 million is attributable to the excess purchase consideration over assets acquired and liabilities assumed. While InsWeb uses their best estimates and assumptions as a part of the purchase price allocation process to accurately value assets acquired and liabilities assumed at the acquisition date, InsWeb’s estimates are inherently uncertain and subject to refinement. As a result, during the measurement period, which may be up to one year from the acquisition date, InsWeb will record adjustments to the assets acquired and liabilities assumed, with the corresponding offset to goodwill. Upon the conclusion of the measurement period or final determination of the values of assets acquired or liabilities assumed, whichever comes first, any subsequent adjustments are recorded to InsWeb’s consolidated statements of income. Direct transaction costs associated with a business combination are expensed as incurred (prior to fiscal 2010, direct transaction costs were included as part of the purchase price).

Contingencies. As discussed in Part I, Item 1, “Financial Statements — Note 14 — Commitments and Contingencies.” Notes to Consolidated Financial Statements of this report, InsWeb is a defendant in: i) a class action lawsuit that alleges InsWeb violated certain federal securities laws at the time of its initial public offering; ii) a securities lawsuit alleging certain officers and directors and significant shareholders violated the short swing trading prohibition of Section 16(b) of the Securities Exchange Act. InsWeb cannot accurately predict the ultimate outcome of these matters at this time and therefore, cannot estimate the range of probable loss, if any, due to the inherent uncertainties of litigation. InsWeb believes it has meritorious defenses; however InsWeb cannot assure that it will prevail in any of these actions. An unfavorable outcome could have a material adverse effect on InsWeb’s financial condition, results of operations and cash flows.

Share-Based Compensation. InsWeb accounts for share-based compensation in accordance with ASC 718 “Compensation – Stock Compensation.” Under the provisions of ASC 718, share-based compensation cost is generally estimated at the grant date based on the award’s fair value as calculated by the Black-Scholes-Merton (BSM) option-pricing model. The BSM option-pricing model requires various highly judgmental assumptions including expected option life, volatility, and forfeiture rates. If any of the assumptions used in the BSM option-pricing model change significantly, share-based compensation expense may differ materially in the future from that recorded in the current period. Generally, compensation cost is recognized over the requisite service period. However, to the extent performance conditions affect the vesting of an award, compensation cost will be recognized only if the performance condition is satisfied. Compensation cost will not be recognized, and any previously recognized compensation cost will be reversed, if the performance condition is not satisfied.

Income Taxes. Under the asset and liability method prescribed under ASC 740, “Income Taxes”, InsWeb recognizes deferred tax assets and liabilities for the future tax consequences attributable to differences between financial statement carrying amounts of assets and liabilities and their respective tax bases. Deferred tax assets and liabilities

are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be realized or settled.

For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. At September 30, 2011 and September 30, 2010, InsWeb had unrecognized tax benefits of approximately \$0.3 million and \$0.3 million, respectively (none of which, if recognized, would favorably affect InsWeb's effective tax rate). InsWeb does not believe there will be any material changes in its unrecognized tax positions over the next twelve months.

For tax return purposes, InsWeb had net operating loss carry forwards at September 30, 2011 of approximately \$187.3 million and \$77.4 million for federal income tax and state income tax purposes, respectively. Federal and state net operating loss carry forwards begin expiring in 2011 and 2012, respectively.

The carrying value of our deferred tax assets, which was approximately \$65.2 million at September 30, 2011, is dependent upon our ability to generate sufficient future taxable income. We have established a full valuation allowance against our net deferred tax assets to reflect the uncertainty of realizing the deferred tax benefits, given historical losses. A valuation allowance is required when it is more likely than not that all or a portion of a deferred tax asset will not be realized. This assessment requires a review and consideration of all available positive and negative evidence, including our past and future performance, the market environment in which we operate, the utilization of tax attributes in the past, and the length of carryforward periods and evaluation of potential tax planning strategies. We expect to continue to maintain a full valuation allowance until an appropriate level of profitability is sustained or we are able to develop tax strategies that would enable us to conclude that it is more likely than not that a portion of our deferred tax assets would be realizable.

Liquidity and Capital Resources

Summarized cash flow information is as follows (in thousands):

	Nine months ended September 30,	
	2011	2010
Cash provided by operating activities	\$ 900	\$ 2,161
Cash used in investing activities	(1,274)	(216)
Cash provided by financing activities	1,536	186

At September 30, 2011, InsWeb's principal source of liquidity was \$7.9 million in cash and cash equivalents. Since inception, we have financed our operations primarily through the sale of preferred and common stock; and more recently, operations have been funded through operating cash flows.

For the nine months ended September 30, 2011, net cash provided by operating activities was \$0.9 million, primarily consisting of our net income adjusted for non-cash share-based compensation, depreciation and amortization of property, equipment and intangible assets and gain on extinguishment of contingent consideration of \$2.7 million, offset by changes in operating assets and liabilities of \$1.8 million. For the nine months ended September 30, 2010, net cash provided by operating activities was \$2.2 million, consisting of our net income adjusted for non-cash share-based compensation and depreciation and amortization of property, equipment and intangible assets of \$1.9 million and net changes in operating assets and liabilities of \$0.3 million.

For the nine months ended September 30, 2011 net cash used by investing activities was \$1.3 million representing a payment of \$2.1 million to Potrero Media's prior owners in exchange for their waiver of all rights to contingent consideration related to InsWeb's acquisition and \$74,000 purchase of property and equipment, offset by \$0.6 million decrease in restricted cash, \$0.2 million decrease in short term investments and \$0.2 million decrease in related party receivable. For the comparable nine months ended September 30, 2010, net cash used in investing activities was \$0.2 million consisting of purchases of restricted and unrestricted short term investments of \$1.7 million offset by an increase in cash equivalents of \$1.5 million due to the reduction of collateral required to maintain a commercial credit line.

For the nine months ended September 30, 2011 and 2010, net cash provided by financing activities was \$1.5 million and \$0.2 million respectively, and was primarily attributable to proceeds from employee stock plans for the

comparable periods, offset by a repurchase of shares for the nine months ended September 30, 2011.

InsWeb has a non-cancelable lease through February 14, 2017 for approximately 16,000 square feet of office space in the Sacramento area which houses its corporate headquarters. InsWeb has two, consecutive options to extend the term for five years each at the prevailing market rent.

InsWeb's San Francisco office location includes administrative, product development, sales and marketing functions in a 10,000 square foot facility, which InsWeb occupies under a non-cancelable lease expiring in October 2014. InsWeb has four consecutive options to extend the term for five years each. Mr. Richard A. Natsch, President and COO and Mrs. Heather K. Natsch, Senior Vice President, of InsWeb are co-owners of Mission Potrero Properties, LLC, which are the lessors of the property that InsWeb occupies.

Future minimum lease commitments as of September 30, 2011 are summarized as follows (in thousands):

Years ending December 31	Future minimum lease commitments
2011	38
2012	424
2013	472
2014	444
2015	341
Thereafter	394
	\$ 2,113

InsWeb currently anticipates that its cash and cash equivalents will be sufficient to meet its anticipated cash needs to fund operations and capital expenditures for at least the next 12 months.

Non-GAAP Financial Measure and Reconciliation

In evaluating InsWeb's business, the Company's management considers and uses Adjusted EBITDA as a supplemental measure of operating performance. Adjusted EBITDA refers to a financial measure that the Company defines as net income (loss) excluding interest, taxes, depreciation, amortization, share-based compensation, and other non-recurring gains and losses that are not related to the Company's continuing operations. This measure is an essential component of InsWeb's internal planning process because it facilitates period-to-period comparisons of the Company's operating performance by eliminating potential differences in net income (loss) caused by the existence and timing of non-cash charges and non-recurring gains and losses. Furthermore, Adjusted EBITDA reflects the key revenue and expense items for which InsWeb's operating managers are responsible.

InsWeb Corporation
NON-GAAP FINANCIAL MEASURE AND RECONCILIATION
(In thousands)
(unaudited)

	Three months ended		
	September 30, 2011	June 30, 2011	September 30, 2010
Net income	\$ 501	\$ 979	\$ 357
Less			
Interest income	1	5	8
Other income	-	1,203	-
Add			
Interest expense	-	8	-
Provision for income taxes	6	-	10
Share-based compensation expense	324	245	277
Depreciation and amortization of property, equipment and intangible assets from continuing operations	352	355	34
Severance expense	-	480	-
Potrero Media acquisition costs	-	45	592
Bankrate transaction costs	242	-	-
Adjusted EBITDA from continuing operations	\$ 1,424	\$ 904	\$ 1,262

Adjusted EBITDA is not a measurement of the Company's financial performance under U.S. GAAP and has limitations as an analytical tool. You should not consider it in isolation or as a substitute for the Company's U.S. GAAP net income (loss). The principal limitations of this measure are that: 1) it does not reflect the Company's actual expenses and may thus have the effect of inflating or reducing the Company's net income (loss) and net income (loss) per share; and 2) it may not be comparable to Adjusted EBITDA as reported by other companies. In addition, the September 30, 2010 information does not include Potrero Media.

ITEM 4. CONTROLS AND PROCEDURES

- (a) Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we evaluated the effectiveness of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this quarterly report.
- (b) There has been no change in our internal control over financial reporting during the three months ended September 30, 2011 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II: OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

See Part I, Item 1, "Financial Statements — Note 14 — Commitments and Contingencies."

ITEM 1A. RISK FACTORS.

In addition to the Risk Factors disclosed in our Annual Report on Form 10-K and Quarterly Report on Form 10-Q for the period ending June 30, 2011, you should carefully consider the following risk factors associated with the Asset Sale Transaction as they could materially affect our business, financial condition and future results.

Risks Related to the Asset Sale Transaction

The failure to complete the Asset Sale Transaction may result in a decrease in the market value of our common stock and limit our ability to grow and implement our lead generation business strategies.

Bankrate's obligation to close the Asset Sale Transaction is subject to a number of contingencies, including approval by our stockholders, and other closing conditions set forth in the asset purchase agreement. We cannot control some of these conditions and we cannot assure you that they will be satisfied or that Bankrate will waive any that are not satisfied. If the Asset Sale Transaction is not completed, we may be subject to a number of risks, including the following:

there may not be another party interested in and able to purchase our lead generation business;

if an alternate purchaser and transaction is identified, such alternate transaction may not result in an equivalent price to what is proposed in the Asset Sale Transaction;

the trading price of our common stock may decline to the extent that the current market price reflects a market assumption that the Asset Sale Transaction will be completed;

our relationships with our customers, suppliers and employees may be damaged and our business may be harmed; and

we may be required to pay Bankrate a termination fee of \$2,500,000.

The occurrence of any of these events individually or in combination could have a material adverse effect on our business, financial condition and results of operation and the market value of our common stock may decline.

Additionally, we have incurred substantial transaction costs and diversion of management resources in connection with the Asset Sale Transaction, and we will continue to do so until the closing.

While the Asset Sale Transaction is pending, it creates uncertainty about our future which could have a material and adverse effect on our business, financial condition and results of operations.

While the Asset Sale Transaction is pending, it creates uncertainty about our future. As a result of this uncertainty, our current or potential business partners may decide to delay, defer or cancel entering into new business arrangements with us pending completion or termination of the Asset Sale Transaction. In addition, while the Asset Sale Transaction is pending, we are subject to a number of risks, including:

the diversion of management and employee attention from our day-to-day business;

the potential disruption to business partners and other service providers;

the loss of employees who may depart due to their concern about losing their jobs following the Asset Sale Transaction; and

we may be unable to respond effectively to competitive pressures, industry developments and future opportunities.

The occurrence of any of these events individually or in combination could have a material adverse effect on our business, financial condition and results of operation.

The asset purchase agreement limits our ability to pursue alternatives to the Asset Sale Transaction.

The asset purchase agreement contains provisions that make it more difficult for us to sell the lead generation business to a party other than Bankrate. These provisions include a non-solicitation provision (including certain matching rights), a provision requiring that we submit the Asset Sale Transaction to our stockholders for approval unless the asset purchase agreement has been terminated in accordance with its terms, and provisions obligating us to pay Bankrate a termination fee of \$2,500,000 under certain circumstances. These provisions could discourage a third party that might have an interest in acquiring all of or a significant part of the lead generation business from considering or proposing such an acquisition, even if that party were prepared to pay consideration with a higher value than the consideration to be paid by Bankrate.

Risks Related to Our New Patent Licensing Business

We expect our business to be significantly smaller following the Asset Sale Transaction, and our common stock may be delisted from the NASDAQ Capital Market if we fail to satisfy the continued listing standards of that market.

If we are unable to satisfy the continued listing standards of the NASDAQ Capital Market, our common stock may be delisted from that market. In order to continue to be listed on the NASDAQ Capital Market, we must meet all of the following requirements as set forth in NASDAQ Listing Rule 5550(a):

at least two registered and active market makers, one of which may be a market maker entering a stabilizing bid;

minimum bid price of at least \$1 per share;

at least 300 public holders;

at least 500,000 publicly held shares; and

market value of publicly held shares of at least \$1 million.

We must also meet at least one of the three standards in NASDAQ Listing Rule 5550(b) as follows:

stockholders' equity of at least \$2.5 million;

market value of listed securities of at least \$35 million; or

net income from continuing operations of \$500,000 in the most recently completed fiscal year or in two of the three most recently completed fiscal years.

If we do not satisfy those standards and we are unsuccessful in taking corrective action to comply with the listing requirements, we may be delisted from the NASDAQ Capital Market. If our common stock were to be delisted from the NASDAQ Capital Market, trading of our common stock most likely would be conducted in the over-the-counter market on an electronic bulletin board established for unlisted securities such as the Pink Sheets or the OTC Bulletin Board. Such trading could substantially reduce the market liquidity of our common stock. As a result, an investor would find it more difficult to dispose of, or obtain accurate quotations for the price of, our common stock.

We are not currently engaged in the Patent Licensing Business to any extent, and our revenues following the Asset Sale Transaction will be unpredictable.

We are not currently engaged in the Patent Licensing Business to any extent, and the lead generation business being sold to Bankrate represented 100% of our total revenues in 2009, 2010, and year to date 2011. Following the Asset Sale Transaction, we will generate revenues solely from the Patent Licensing Business, and we expect no revenues from the Patent Licensing Business during the remainder of 2011 and for at least a portion of 2012. We will continue to incur salary and other expenses of operating our business as a public company. Our results of operation and financial condition will be materially adversely effected if we fail to effectively reduce our overhead costs to reflect the new Patent Licensing Business or if the Patent Licensing Business does not perform to our expectations.

The patent licensing business is unpredictable, and if our patents are declared invalid, our business may be harmed.

The success of our patent licensing business model will depend on our ability to generate royalty fees from licensing our technology. However, it is possible that one or more of our patents might be declared invalid if challenged by an entity against whom we seek to enforce our patent rights. Even if the patents are upheld as valid, we may have difficulty identifying entities that will voluntarily enter into a license for our patented technology. In this case, we may be required to litigate to recover damages for infringement, and we will incur significant legal and expert fees and costs, and the litigation may take several years to conclude.

New legislation, regulations or rules related to obtaining patents or enforcing patents could significantly increase our operating costs and limit our revenue growth.

If new legislation, regulations or rules are implemented either by Congress, the U.S. Patent and Trademark Office, or USPTO, or the courts that impact the patent application process, the patent enforcement process or the rights of patent holders, these changes could negatively affect our expenses and revenue growth. For example, new rules regarding the burden of proof in patent enforcement actions could significantly increase the cost of litigation for infringement, and new standards or limitations on liability for patent infringement could negatively impact our revenue derived from such actions.

Trial judges and juries often find it difficult to understand complex patent enforcement litigation, and as a result, we may need to appeal adverse decisions by lower courts in order to successfully enforce our patents.

It is difficult to predict the outcome of patent enforcement litigation at the trial level. It is often difficult for juries and trial judges to understand complex, patented technologies, and as a result, there is a higher rate of successful appeals in patent enforcement litigation than more standard business litigation. Such appeals are expensive and time consuming, resulting in increased costs and delayed revenue. Although we may diligently pursue enforcement litigation, we cannot predict with significant reliability the decisions made by juries and trial courts.

Federal courts are becoming more crowded, and as a result, patent enforcement litigation is taking longer.

If we are required to litigate to enforce our patented technologies, our patent enforcement actions will be almost exclusively prosecuted in federal court. Federal trial courts that hear patent enforcement actions also hear criminal cases, which will take priority over our actions. As a result, it is difficult to predict the length of time it will take to complete an enforcement action. Moreover, we believe there is a trend in increasing numbers of civil lawsuits and criminal proceedings before federal judges, and as a result, we believe that the risk of delays in our patent enforcement actions may have an adverse effect on our business in the future unless this trend changes.

As patent enforcement litigation becomes more prevalent, it may become more difficult for us to voluntarily license our patents.

We believe that the more prevalent patent enforcement actions become, the more difficult it will be for us to voluntarily license our patents. As a result, we may need to increase the number of our patent enforcement actions to cause infringing companies to license the patent or pay damages for lost royalties. This may increase the risks associated with an investment in our company.

ITEM 6. EXHIBITS

Exhibit Number	Description of Document
2.1	Asset Purchase Agreement between InsWeb Corporation and Bankrate, Inc. dated as of October 10, 2011. Incorporated by reference from Exhibit 2.1 of Registrant's Current Report on Form 8-K filed on October 12, 2011.
31.1	Certification of Chief Executive Officer, and Interim Chief Financial Officer pursuant to Exchange Act Rule 13a-14(a).
32	Certification of Chief Executive Officer and Chief Financial Officer, pursuant to 18 U.S.C. Section 1350.

SIGNATURE

In accordance with the requirements of the Securities Exchange Act of 1934, the registrant has caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
