## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

## NOTE 1 THE COMPANY AND BASIS OF PREPARATION.

T. Rowe Price Group derives its consolidated revenues and net income primarily from investment advisory services that its subsidiaries provide to individual and institutional investors in the sponsored T. Rowe Price mutual funds and other investment portfolios. We also provide our investment advisory clients with related administrative services, including mutual fund transfer agent, accounting and shareholder services; participant recordkeeping and transfer agent services for defined contribution retirement plans; discount brokerage; and trust services. While investors that we serve are primarily domiciled in the United States of America, investment advisory clients outside the United States account for more than 10% of our assets under management at June 30, 2008.

Investment advisory revenues depend largely on the total value and composition of assets under our management. Accordingly, fluctuations in financial markets and in the composition of assets under management impact our revenues and results of operations.

These unaudited condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States and reflect all adjustments that are, in the opinion of management, necessary to a fair statement of our results for the interim periods presented. All such adjustments are of a normal recurring nature. The unaudited interim financial information contained in these condensed consolidated financial statements should be read in conjunction with the consolidated financial statements contained in our 2007 Annual Report.

## NOTE 2 INFORMATION ABOUT RECEIVABLES, REVENUES, AND SERVICES.

Accounts receivable from our sponsored mutual funds for advisory fees and advisory-related administrative services aggregate \$144.6 million at December 31, 2007, and \$137.5 million at June 30, 2008.

Revenues (in millions) from advisory services provided under agreements with our sponsored mutual funds and other investment clients include:

Fees for advisory-related administrative services provided to our sponsored mutual funds during the first half of the year were \$134.1 million in 2007 and \$144.5 million in 2008. Fees for these services during the second quarter were \$68.1 million in 2007 and \$72.5 million in 2008.

**NOTE 3 FAIR VALUE MEASUREMENTS.**

The following disclosures are made in conjunction with the initial application of Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements*, in 2008.

We value our investments in sponsored mutual funds at the quoted closing net asset values, or NAVs, per share of each mutual fund last reported as of the balance sheet date.

Our investments in marketable debt securities, including mortgage- and other asset-backed securities held by our savings bank subsidiary, are reported at fair value. These debt securities are generally traded in the over-the-counter (OTC) market. Securities with original maturities of one year or more are valued by us based on prices furnished by dealers who make markets in such securities or by an independent pricing service, which considers the yield or price of bonds of comparable quality, coupon, maturity, and type, as well as prices quoted by dealers who make markets in such securities. Securities with original maturities of less than one year generally are valued at amortized cost which approximates fair value; however, if amortized cost is deemed not to reflect fair value, such securities are valued by us based on prices furnished by dealers who make markets in such securities or by an independent pricing service.

We determine the fair value of our investments using three broad levels of inputs:

Level 1 quoted prices in active markets for identical securities.

Level 2 observable inputs other than Level 1 quoted prices including, but not limited to, quoted prices for similar securities, interest rates, prepayment speeds, and credit risk. These inputs are based on market data obtained from independent sources.

Level 3 unobservable inputs reflecting our own assumptions based on the best information available. We do not have any investments valued using Level 3 inputs.

These levels are not necessarily an indication of the risk or liquidity associated with the investments. The following table summarizes our investments (in millions) at June 30, 2008, that are recognized in our balance sheet using fair value measurements determined based on the differing levels of inputs.

	Level 1	Level 2
Cash equivalents	\$ 602.3	
Investments in sponsored mutual funds	730.5	
Debt securities held by savings bank subsidiary		\$ 124.7
Other investments in marketable equity securities	.1	
	\$ 1,332.9	\$ 124.7

We have not applied the provisions of SFAS No. 157 related to disclosures surrounding nonfinancial assets, such as goodwill, and nonfinancial liabilities. In February 2008, the FASB deferred the required implementation of these disclosures until 2009.

**NOTE 4 COMMON STOCK.**Authorized shares.

At our annual meeting on April 10, 2008, our stockholders approved a charter amendment increasing our authorized common shares (\$.20 par value) from 500,000,000 to 750,000,000. Our board of directors had duly approved and advised the amendment at their meeting on February 14, 2008.

Unsettled liability for common shares repurchased.

Accounts payable and accrued expenses includes \$8.6 million at December 31, 2007, and \$8.5 million at June 30, 2008, representing the unsettled liability for common stock repurchases made on the last three business days before quarter end.

Subsequent share repurchases.

During the first eleven days of July 2008, we repurchased 1,056,000 common shares for \$55.4 million.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

T. Rowe Price Group, Inc.:

We have reviewed the condensed consolidated balance sheet of T. Rowe Price Group, Inc. and subsidiaries as of June 30, 2008, the related condensed consolidated statements of income for the three- and six-month periods ended June 30, 2007 and 2008, the related condensed consolidated statements of cash flows for the six-month periods ended June 30, 2007 and 2008, and the related condensed consolidated statement of stockholders' equity for the six-month period ended June 30, 2008. These condensed consolidated financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole.

Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of T. Rowe Price Group, Inc. and subsidiaries as of December 31, 2007, and the related consolidated statements of income, cash flows, and stockholders' equity for the year then ended (not presented herein); and in our report dated February 6, 2008, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2007, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.****GENERAL.**

Our revenues and net income are derived primarily from investment advisory services provided to individual and institutional investors in our sponsored mutual funds and other managed investment portfolios. Investment advisory clients outside the United States account for more than 10% of our assets under management at June 30, 2008.

We manage a broad range of U.S. and international stock, bond, and money market mutual funds and other investment portfolios which meet the varied needs and objectives of individual and institutional investors. Investment advisory revenues depend largely on the total value and composition of assets under our management. Accordingly, fluctuations in financial markets and in the composition of assets under management impact our revenues and results of operations.

The aftermath of the subprime mortgage market implosion in 2007 and the continuing credit crisis have significantly affected financial markets this year. At the beginning of 2008, equities declined dramatically around the world. In the United States, economic growth remained low in the first quarter, and the downside risks in the outlook increased. The Federal Reserve responded with a substantial further easing of U.S. monetary policy that reduced the federal funds rate by 225 basis points to 2% by the end of April. The U.S. Congress and President also sought to cushion the downturn through a fiscal stimulus package that began arriving in American households in the second quarter. The collapse of a large investment bank and securities trading firm was narrowly averted late in the first quarter, and the Federal Reserve initiated a series of actions, some of them unprecedented, to increase liquidity not only among the large commercial banks but also non-bank securities dealers. Despite these aggressive actions, investor sentiment has deteriorated as the continuing weakness in housing; rising food, energy and other commodity prices; the restraining effect of writedowns on bank capital and credit availability; the decline of the U.S. dollar versus foreign currencies; and sluggish job growth have raised concerns about the U.S. economy and, in turn, economies around the world. With costs increasing, inflationary concerns in the U.S. have more recently risen, effectively constraining the Federal Reserve's ability to ease monetary policy further, despite the increased risk of weaker economic growth. With this backdrop, early July saw further financial market declines as many major indexes fell 20% below their most recent highs in October 2007. By mid-July, lower oil prices and improving investor sentiment had produced some rebound in equity valuations.

With financial markets under considerable stress, U.S. stock indexes produced mixed results in the second quarter of 2008. The broad S&P 500 Index of large-cap companies in leading industries of the U.S. economy registered a negative 2.73% return in the second quarter while the NASDAQ Composite Index, which is heavily weighted with technology companies, was up only .61% (excluding dividends). For the first six months of 2008, these indexes were down 11.91% and 13.55%, respectively.

Stocks outside the United States also retreated in the second quarter, even though the weak U.S. dollar reduced the magnitude of losses in dollar terms. The MSCI EAFE Index, which measures the performance of mostly large-cap stocks in Europe, Australasia and the Far East, produced a negative 1.93% return while the MSCI Emerging Markets Index had a negative .80% return. For the first six months of 2008, these indexes were down 10.58% and 11.64%, respectively.

Treasury yields rose across the maturity spectrum, although the increases were larger among short-term issues. The yield on 10-year U.S. Treasuries was 3.99% at June 30, 2008, up 54 basis points from March 31, 2008, but down 5 basis points from the end of 2007. Long-term Treasury bonds suffered the largest declines, as investors grew more concerned about inflation. Municipals were flat, as issues surrounding the companies insuring some municipal bonds erased earlier gains. Higher-risk corporate bonds, which had been severely punished in the liquidity crunch earlier in 2008, showed gains. Emerging market debt performed better than high-quality bonds issued in developed countries. In this unsettled financial environment, investors have entrusted net inflows of \$17.8 billion to our management thus far in 2008, including \$8.1 billion in the second quarter. Total assets under our management ended June 2008 at \$387.7 billion, up 2.4% from March 31, 2008 and down 3.1% from the beginning of the year. The change (in billions) thus far in 2008 occurred as follows.

Quarter	Quarter	First half
---------	---------	------------

Edgar Filing: PRICE T ROWE GROUP INC - Form 10-Q

	ended 3/31/2008	ended 6/30/2008	ended 6/30/2008

Change during the period	(21.4)	9.1	(12.3)
Assets under management at end of period	\$ 378.6	\$ 387.7	\$ 387.7

Assets under management at June 30, 2008, include \$305.6 billion in equity and blended asset investment portfolios and \$82.1 billion in fixed income investment portfolios. The investment portfolios that we manage consist of \$233.3 billion in the T. Rowe Price mutual funds distributed in the United States and \$154.4 billion in other investment portfolios, including separately managed accounts, sub-advised funds, and other sponsored investment portfolios including common trust funds and mutual funds offered to investors outside the U.S. and through variable annuity life insurance plans.

We incur significant expenditures to attract new investment advisory clients and additional investments from our existing clients. These efforts involve costs that generally precede any future revenues that we may recognize from increases to our assets under management.

## RESULTS OF OPERATIONS.

Second quarter 2008 versus second quarter 2007.

Investment advisory revenues were up almost 7%, or \$31.2 million, to \$495.3 million in the second quarter of 2008 as average assets under our management increased \$29.1 billion to \$400.0 billion. The average annualized fee rate earned on our assets under management was 49.8 basis points during the second quarter of 2008, virtually unchanged from the 50.2 basis points earned in 2007. Since our assets under management of \$387.7 billion at June 30 are less than the second quarter 2008 average of \$400.0 billion, down or flat financial markets in the next quarter will most likely result in lower investment advisory fees in the third quarter as compared to the second quarter of 2008.

Net revenues increased 6.4%, or \$35.4 million, to \$586.5 million. Operating expenses were \$327.9 million in the second quarter of 2008, up 9.3% or \$27.9 million from the 2007 quarter. Overall, net operating income for the second quarter of 2008 increased \$7.5 million, or 3.0%, to \$258.6 million. Higher operating expenses in 2008 and decreases in market valuations during the first quarter of this year, which lowered our assets under management and advisory revenues, resulted in our operating margin declining to 44.1% in the second quarter of 2008 from 45.6% in the second quarter of 2007. Net income was flat for the second quarter of 2008 versus the comparable 2007 quarter. Diluted earnings per share, however, increased to \$.60, up \$.02 or 3.4% as our weighted average shares outstanding have decreased due to our ongoing common share repurchases over the last twelve months.

Investment advisory revenues earned from the T. Rowe Price mutual funds distributed in the United States increased 4.0%, or \$13.6 million, to \$349.5 million. Average mutual fund assets were \$242.6 billion in the second quarter of 2008, an increase of 4.6% from the average for the comparable 2007 quarter. Mutual fund assets at June 30, 2008 were \$233.3 billion, up \$2.8 billion or 1.2% from the end of March 2008, but down 5.2% from the beginning of the year.

Net inflows to the mutual funds were \$2.4 billion during the second quarter of 2008. Our international and global stock funds had net inflows of \$1.2 billion, the U.S. stock funds added \$.7 billion, and the bond and money funds added \$.5 billion. The Emerging Markets Stock Fund attracted \$.6 billion of net inflows during the second quarter of 2008. During the 2008 quarter, net fund inflows of \$1.1 billion originated in our target-date Retirement Funds, which in turn invest in other T. Rowe Price funds. The Retirement Funds had net inflows of \$1.1 billion during the second quarter after the transfer of \$1.2 billion to other managed investment portfolios. Income and changes in market valuations in the mutual funds increased our fund assets under management by \$.4 billion during the 2008 quarter.

Investment advisory revenues earned on the other investment portfolios that we manage increased \$17.6 million, or 13.7%, to \$145.8 million. Average assets in these portfolios were \$157.4 billion during the second quarter of 2008, up \$18.5 billion or 13.3% from the second quarter of 2007. Net inflows for the 2008 quarter were \$5.7 billion from U.S. and international institutional investors and third-party financial intermediaries, including the \$1.2 billion transferred from the target-date Retirement Funds. Income earned in these portfolios and changes in market valuations increased assets under management by \$.6 billion during the 2008 quarter.

Administrative fees increased \$4.2 million to \$90.9 million. The change in these revenues includes \$.7 million from 12b-1 distribution fees recognized on greater assets under management in the Advisor and R classes of our sponsored mutual fund shares. The balance of the increase is primarily attributable to our mutual fund servicing activities for the mutual funds and their investors. Changes in administrative fees are generally offset by similar changes in related operating expenses that are incurred to distribute the Advisor and R class fund shares through third party financial intermediaries and to provide services to the funds and their investors.

Our largest expense, compensation and related costs, increased \$21.0 million, or 10.7% versus the 2007 quarter. This increase includes \$10.0 million in salaries resulting from an 8.9% increase in our average staff count and an increase of our associates' base salaries at the beginning of the year. At June 30, 2008, we employed 5,308 associates, up 4.5% from the end of 2007, primarily to handle increased volume-related activities and other growth. The increased compensation costs also include a \$3.1 million increase in our interim accrual for annual bonuses, which are based on our operating results and considers our relative and risk-adjusted investment performance, our growth in assets under management and net investor inflows, and the quality of our investor services. Lastly, the second quarter 2008 costs also include \$7.9 million for higher employee benefits and employment expenses, including an increase of \$1.5 million in non-cash stock-based compensation.

Advertising and promotion expenditures were down \$1.7 million compared to the second quarter of 2007 and \$16.3 million from the first quarter of 2008. Investor sentiment in this uncertain market environment has caused us to reduce our planned spending in this area. We now expect spending on advertising and promotion in the third and fourth quarters of 2008 will be comparable to the second and first quarters of 2008, respectively. We vary our level of spending based on market conditions and investor demand as well as our efforts to expand our investor base in the United States and abroad.

Occupancy and facility costs together with depreciation expense increased \$3.8 million. We are expanding and renovating our facilities to accommodate additional associates to meet greater business demands.

Other operating expenses were up \$4.8 million, or 10.8%, including \$.7 million of higher distribution expenses recognized on greater assets under management sourced from financial intermediaries that distribute our Advisor and R classes of mutual fund shares. These distribution costs are offset by the equal increase in our administrative revenues recognized from the 12b-1 fees discussed above. Additionally, consulting and professional fees, information services, and other costs have risen to meet increased business demands.

Our non-operating investment income, which includes interest income as well as the recognition of investment gains and losses, decreased \$3.9 million. A \$6.6 million decrease in interest income due to smaller cash positions and lower interest rates was partially offset by net gains from other investments.

The second quarter 2008 provision for income taxes as a percentage of pretax income is 39.1% in order that the provision for the first six months of 2008 be recognized at a rate a 38.6%. The second quarter and six-month provisions include \$2.5 million for prior years estimated interest and taxes. Without these charges, our provision would have been at 38.2% in the second quarter of 2008. We have also revised our estimate of the effective tax rate for the full-year 2008 from 38.2% to 38.5% to reflect these charges.

First half 2008 versus first half 2007.

Investment advisory revenues were up 8.6%, or \$76.3 million, to \$965.4 million in the first half of 2008 as average assets under our management increased \$32.2 billion to \$389.5 billion. The average annualized fee rate earned on our assets under management was 49.8 basis points during the first half of 2008, virtually unchanged from the 50.2 basis points earned in 2007.

Net revenues increased 8.1%, or \$86.1 million, to nearly \$1.15 billion. Operating expenses were \$656.9 million in the first six months of 2008, up 11.4% or \$67.4 million from the 2007 period. Overall, net operating income for the first half of 2008 increased \$18.7 million, or 4.0%, to \$488.7 million. Higher operating expenses in 2008 and decreases in market valuations during the first quarter of this year, which reduced our assets under management and advisory revenues, resulted in our operating margin declining to 42.7% in the first half of 2008 from 44.4% in the comparable 2007 period. Net income increased \$8.6 million, or 2.8%, to \$313.7 million and diluted earnings per share increased to \$1.15, up \$.06, or 5.5%, including the effect of lower weighted average shares outstanding due to our common share repurchases during the last twelve months.

Investment advisory revenues earned from the T. Rowe Price mutual funds distributed in the United States increased 6.5%, or \$41.4 million, to \$683.1 million. Average mutual fund assets were \$236.9 billion in the first six months of 2008, up 6.3% from the comparable 2008 period.

Net inflows to the mutual funds were \$6.1 billion during the first half of 2008. Our international and global stock funds had net inflows of \$2.9 billion, our bond and money funds added \$2.5 billion, and the U.S. stock funds added \$.7 billion. The Emerging Markets, Equity Index 500, Africa & Middle East, and Growth stock funds each had net inflows of more than \$500 million and, in the aggregate, net inflows of \$3.0 billion during the first six months of 2008. Lower market valuations, net of the funds income, decreased our fund assets under management by \$18.8 billion. During the 2008 period, net fund inflows of \$3.9 billion originated in our target-date Retirement Funds. Investment advisory revenues earned on the other investment portfolios that we manage increased \$34.9 million, or 14.1%, to \$282.3 million. Average assets in these portfolios were \$152.6 billion during the first half of 2008, up \$18.2 billion or 13.5% from the first half of 2007. Net inflows of \$11.7 billion from U.S. and international institutional investors and third-party financial intermediaries virtually offset the \$11.3 billion negative impact of lower market valuations on asset levels in these portfolios during the 2008 period.

Administrative fees increased \$9.9 million to \$179.7 million. The change in these revenues includes \$1.4 million from 12b-1 distribution fees recognized on greater assets under management in the Advisor and R classes of our sponsored mutual fund shares. The balance of the increase is primarily attributable to our mutual fund servicing activities for the mutual funds and their investors.

Our largest expense, compensation and related costs, increased \$44.2 million, or 11.6% versus the first half of 2007. This increase includes \$20.1 million in salaries resulting from a 9.3% increase in our average staff count and an increase of our associates base salaries at the beginning of the year. The increased compensation costs also include a \$9.8 million increase in our interim accrual for annual bonuses. Lastly, the first half 2008 costs also include \$14.3 million for higher employee benefits and employment expenses, including an increase of \$3.1 million in non-cash stock-based compensation.

Other operating expenses were up \$11.4 million, or 13.8%, including \$1.4 million of higher distribution expenses recognized on greater assets under management sourced from financial intermediaries that distribute our Advisor and R classes of mutual fund shares.

**CAPITAL RESOURCES AND LIQUIDITY.**

Operating activities during the first half of 2008 provided cash flows of \$453.2 million, up \$31.4 million from the 2007 period, including increased net income of \$8.6 million and non-cash depreciation, amortization and stock-based compensation expense of \$6.0 million. Increased timing differences in the cash settlements of our assets and liabilities

added \$16.8 million. Our interim operating cash outflows do not include bonus compensation that is accrued throughout the year before being substantially paid out in December of each year.

Net cash used in investing activities totaled \$43.2 million, down \$98.8 million from the 2007 period. In the first half of 2007, we invested \$73.2 million more in our sponsored mutual funds than in the comparable 2008 period.

Net cash used in financing activities was \$513.9 million in the first half of 2008, up \$356.3 million from the 2007 period. We increased our expenditures for common stock repurchases by \$270.5 million as our stepped-up repurchase efforts have continued from the first quarter of 2007 into 2008. Our cash outflows for dividends paid increased \$98.1 million. During the first quarter of 2008, we changed our policy regarding the timing of dividend payments such that our quarterly dividends are now declared and paid in the same quarter. As such, our first half 2008 cash flows includes both the payout of the fourth quarter 2007 and two 2008 quarterly dividends. Additionally, we increased the quarterly dividend payment from \$.17 per share made in each of the four 2007 quarters to \$.24 per share beginning with the payment made in January 2008.

Our cash and cash equivalents, investments in sponsored mutual funds, and other investments in U.S. Treasury notes total nearly \$1.5 billion at June 30, 2008. Given the availability of these balances, we have not had any available external source of liquidity since the second quarter of 2006 when we voluntarily terminated our \$300 million bank-syndicated credit facility.

We have lowered our anticipated property and equipment expenditures for the year 2008 to about \$150 million, including the build-out of our expanded operating facilities. We expect to fund these capital expenditures from our cash balances.

#### FORWARD-LOOKING INFORMATION.

From time to time, information or statements provided by or on behalf of T. Rowe Price, including those within this report, may contain certain forward-looking information, including information or anticipated information relating to changes in our revenues and net income, changes in the amount and composition of our assets under management, our expense levels, our estimated effective income tax rate, and our expectations regarding financial markets and other conditions. Readers are cautioned that any forward-looking information provided by or on behalf of T. Rowe Price is not a guarantee of future performance. Actual results may differ materially from those in forward-looking information because of various factors including, but not limited to, those discussed below and in Item 1A, Risk Factors, of our Form 10-K Annual Report for 2007. Further, forward-looking statements speak only as of the date on which they are made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which it is made or to reflect the occurrence of unanticipated events.

Our future revenues and results of operations will fluctuate primarily due to changes in the total value and composition of assets under our management. Such changes result from many factors including, among other things: cash inflows and outflows in the T. Rowe Price mutual funds and other managed investment portfolios; fluctuations in the financial markets around the world that result in appreciation or depreciation of the assets under our management; our introduction of new mutual funds and investment portfolios; and changes in retirement savings trends relative to participant-directed investments and defined contribution plans. The ability to attract and retain investors' assets under our management is dependent on investor sentiment and confidence; the relative investment performance of the Price mutual funds and other managed investment portfolios as compared to competing offerings and market indexes; the ability to maintain our investment management and administrative fees at appropriate levels; competitive conditions in the mutual fund, asset management, and broader financial services sectors; and our level of success in implementing our strategy to expand our business. Our revenues are substantially dependent on fees earned under contracts with the Price funds and could be adversely affected if the independent directors of one or more of the Price funds terminated or significantly altered the terms of the investment management or related administrative services agreements.

Our future results are also dependent upon the level of our expenses, which are subject to fluctuation for the following or other reasons: changes in the level of our advertising expenses in response to market conditions, including our efforts to expand our investment advisory business to investors outside the United States and to further penetrate our distribution channels within the United States; variations in the level of total compensation expense due to, among other things, bonuses, stock option grants, stock awards, changes in our employee count and mix, and competitive factors; any goodwill impairment that may arise; fluctuation in foreign currency exchange rates applicable to the costs of our international operations; expenses and capital costs, such as technology assets, depreciation, amortization, and research and development, incurred to maintain and enhance our administrative and operating services infrastructure; unanticipated costs that may be incurred to protect investor accounts and the goodwill of our clients; and disruptions of services, including those provided by third parties, such as facilities, communications, power, and the mutual fund transfer agent and accounting systems.

Our business is also subject to substantial governmental regulation, and changes in legal, regulatory, accounting, tax, and compliance requirements may have a substantial effect on our operations and results, including but not limited to effects on costs that we incur and effects on investor interest in mutual funds and investing in general, or in particular classes of mutual funds or other investments.

#### **Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

There has been no material change in the information provided in Item 7A of the Form 10-K Annual Report for 2007.

#### **Item 4. Controls and Procedures.**

Our management, including our principal executive and principal financial officers, has evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2008. Based on that evaluation, our principal executive and principal financial officers have concluded that our disclosure controls and procedures as of June 30, 2008, are effective at the reasonable assurance level to ensure that the information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, including this Form 10-Q quarterly report, is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms, and to ensure that information required to be disclosed by us in the reports that we file

or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Our management, including our principal executive and principal financial officers, has evaluated any change in our internal control over financial reporting that occurred during the second quarter of 2008, and has concluded that there was no change during the second quarter of 2008 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

**PART II OTHER INFORMATION****Item 1. Legal Proceedings.**

As discussed in our Form 10-Q report for the first quarter of 2008, the purported class action (T.K. Parthasarathy, et al., including Woodbury, v. T. Rowe Price International Funds, Inc., et al.) was resolved and dismissed with prejudice, without a material adverse effect on our financial position or results of operations.
