Notes to Condensed Consolidated Financial Statements

Note 1 – Nature of Operations and Basis of Presentation

Nature of Operations

MamaMancini's Holdings, Inc. (the "Company"), (formerly known as Mascot Properties, Inc.) was organized on July 22, 2009 as a Nevada corporation.

Current Business of the Company

The Company is a manufacturer and distributor of a line of beef meatballs with sauce, turkey meatballs with sauce, Italian sausage with sauce and other similar Italian meats with sauces. The Company's customers are located throughout the United States, with a large concentration in the Northeastern and Southeastern United States regions.

Mergers

On January 24, 2013, the Company, Mascot Properties Acquisition Corp, a Delaware corporation and wholly-owned subsidiary of the Company ("Merger Sub"), MamaMancini's, Inc., a privately-held Delaware Corporation headquartered in New Jersey ("MamaMancini's") and an individual (the "Majority Shareholder"), entered into an Acquisition Agreement and Plan of Merger (the "Agreement") pursuant to which the Merger Sub was merged with and into MamaMancini's, with MamaMancini's surviving as a wholly-owned subsidiary of the Company (the "Merger"). The Company acquired, through a reverse triangular merger, all of the outstanding capital stock of MamaMancini's in exchange for issuing MamaMancini's shares to the "MamaMancini's Shareholders", pro-rata, a total of 20,054,000 shares of the Company's common stock. Immediately after the Merger was consummated, and further to the Agreement, the majority shareholders and certain affiliates of the Company cancelled a total of 103,408,000 shares of the Company's common stock held by them (the "Cancellation"). In consideration of the Cancellation of such common stock, the Company paid the Majority Shareholder in aggregate of \$295,000 and 800,000 shares of common stock and released the other affiliates from certain liabilities. In addition, the Company has agreed to spinout to the Majority Shareholder

all assets related to the Company's real estate management business within 30 days after the closing. As a result of the Merger and the Cancellation, the MamaMancini's Shareholders became the majority shareholders of the Company.

The condensed consolidated financial statements presented for all periods through and including April 30, 2014 are those of MamaMancini's. As a result of this Merger, the equity sections of MamaMancini's for all prior periods presented reflect the recapitalization described above and are consistent with the April 30, 2014 balance sheet presented for the Company.

Since the transaction is considered a reverse acquisition and recapitalization, the presentation of pro-forma financial information was not required.

Basis of Presentation

The condensed consolidated financial statements and related notes have been prepared in accordance with accounting principles generally accepted in the United States of America ("US GAAP") and include the accounts of the Company and its wholly-owned subsidiaries. All material intercompany balances and transactions have been eliminated in consolidation.

Notes to Condensed Consolidated Financial Statements

April 30, 2014

The unaudited financial information furnished herein reflects all adjustments, consisting solely of normal recurring items, which in the opinion of management are necessary to fairly state the financial position of the Company and the results of its operations for the periods presented. This report should be read in conjunction with the Company's consolidated financial statements and notes thereto included in the Company's Form 10-K for the year ended December 31, 2013 filed on March 20, 2014 and the audited financial statements as of January 31, 2014 and for the one month period then ended filed with this Form 10-Q. The Company assumes that the users of the interim financial information herein have read or have access to the audited financial statements for the preceding fiscal year and that the adequacy of additional disclosure needed for a fair presentation may be determined in that context. Accordingly, footnote disclosure, which would substantially duplicate the disclosure contained in the Company's Form 10-K for the year ended December 31, 2013 have been omitted. The results of operations for the interim periods presented are not necessarily indicative of results for the entire year ending January 31, 2015.

Note 2 – Summary of Significant Accounting Policies

Change of Year End

Effective January 13, 2014, MamaMancini's Holdings, Inc. (the "Company") changed its fiscal year-end date to January 31. The Company's 2014 fiscal year commenced on February 1, 2014 and concludes on January 31, 2015. The Company changed its year end to be in conformity with a significant number of its retail customers that have a fiscal year end on or near January 31. This allows the Company to more accurately account for accrued discounts and promotions to these retailers.

Use of Estimates

The preparation of condensed consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the condensed consolidated financial statements and accompanying notes. Such estimates and assumptions impact, among others, the following: allowance for bad debt, inventory obsolescence, the fair value of share-based payments.

Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the condensed consolidated financial statements, which management considered in formulating its estimate could change in the near term due to one or more future confirming events. Accordingly, the actual results could differ significantly from our estimates.

Risks and Uncertainties

The Company operates in an industry that is subject to intense competition and change in consumer demand. The Company's operations are subject to significant risk and uncertainties including financial and operational risks including the potential risk of business failure.

The Company has experienced, and in the future expects to continue to experience, variability in sales and earnings. The factors expected to contribute to this variability include, among others, (i) the cyclical nature of the grocery industry, (ii) general economic conditions in the various local markets in which the Company competes, including the general downturn in the economy, and (iii) the volatility of prices pertaining to food and beverages in connection with the Company's distribution of the product. These factors, among others, make it difficult to project the Company's operating results on a consistent basis.

MamaMancini's Holdings, Inc.

Notes to Condensed Consolidated Financial Statements

April 30, 2014

Cash

The Company considers all highly liquid instruments purchased with a maturity of three months or less to be cash equivalents. The Company held no cash equivalents at April 30, 2014 and January 31, 2014.

The Company minimizes its credit risk associated with cash by periodically evaluating the credit quality of its primary financial institution. The balance at times may exceed federally insured limits.

Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable are stated at the amount management expects to collect from outstanding balances. The Company generally does not require collateral to support customer receivables. The Company provides an allowance for doubtful accounts based upon a review of the outstanding accounts receivable, historical collection information and existing economic conditions. The Company determines if receivables are past due based on days outstanding, and amounts are written off when determined to be uncollectible by management. The maximum accounting loss from the credit risk associated with accounts receivable is the amount of the receivable recorded, which is the face amount of the receivable net of the allowance for doubtful accounts. As of April 30, 2014 and January 31, 2014, the Company had reserves of \$2,000.

Inventories

Inventories are stated at average cost using the first-in, first-out (FIFO) valuation method. Inventory was comprised of the following at April 30, 2014 and January 31, 2014:

	April 30,	January
	2014	31, 2014

Finished goods \$404,116 \$159,829

Property and Equipment

Property and equipment are recorded at cost. Depreciation expense is computed using straight-line methods over the estimated useful lives.

Asset lives for financial statement reporting of depreciation are:

Machinery and equipment 2-7 years
Leasehold improvements 3-10 years

Fair Value of Financial Instruments

For purpose of this disclosure, the fair value of a financial instrument is the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation. The carrying amount of the Company's short term financial instruments approximates fair value due to the relatively short period to maturity for these instruments.

Stock Issuance Costs

Stock issuance costs are capitalized as incurred. Upon the completion of the offering, the stock issuance costs are reclassified to equity. Offering costs recorded to equity for the three months ended April 30, 2014 and March 31, 2013 and the one month ended January 31, 2014 were \$222,327, \$0 and \$102,166, respectively.

MamaMancini's Holdings, Inc.

Notes to Condensed Consolidated Financial Statements

April 30, 2014

Research and Development

Research and development is expensed as incurred. Research and development expenses for three months ended April 30, 2014 and March 31, 2013 and the one month ended January 31, 2014 were \$18,901, \$3,143, and \$8,477, respectively.

Shipping and Handling Costs

The Company classifies freight billed to customers as sales revenue and the related freight costs as cost of sales.

Revenue Recognition

The Company records revenue for products when all of the following have occurred: (1) persuasive evidence of an arrangement exists, (2) the product is delivered, (3) the sales price to the customer is fixed or determinable, and (4) collectability of the related customer receivable is reasonably assured. There is no stated right of return for products.

The Company meets these criteria upon shipment.

Expenses such as slotting fees and sales discounts are accounted for as a direct reduction of revenues as follows:

Three	Three	One
Months	Months	Month
Ended	Ended	Ended
April 30,	March 31,	January

Edgar Filing: MamaMancini's Holdings, Inc. - Form 10-Q

	2014	2013	31, 2014
Gross Sales	\$2,655,011	\$1,931,473	\$796,177
Less: Slotting, Discounts, Allowances	71,862	159,309	20,925
Net Sales	\$2,583,149	\$1,772,164	\$775,252

Cost of Sales

Cost of sales represents costs directly related to the production and manufacturing of the Company's products. Costs include product development, freight, packaging, and print production costs.

Advertising

Costs incurred for producing and communicating advertising for the Company are charged to operations as incurred. Producing and communicating advertising expenses for the three months ended April 30, 2014 and March 31, 2013 and the one month ended January 31, 2014 were \$761,999, \$417,000 and \$232,481, respectively.

MamaMancini's Holdings, Inc.

Notes to Condensed Consolidated Financial Statements

April 30, 2014

Stock-based Compensation

The Company accounts for stock-based compensation in accordance with ASC Topic 718, "Accounting for Stock-Based Compensation" ("ASC 718") which establishes financial accounting and reporting standards for stock-based employee compensation. It defines a fair value based method of accounting for an employee stock option or similar equity instrument. The Company accounts for compensation cost for stock option plans in accordance with ASC 718. The Company accounts for share-based payments to non-employees in accordance with ASC 505-50 "Accounting for Equity Instruments Issued to Non-Employees for Acquiring, or in Conjunction with Selling Goods or Services".

The Company recognizes all forms of share-based payments, including stock option grants, warrants and restricted stock grants, at their fair value on the grant date, which are based on the estimated number of awards that are ultimately expected to vest.

Share-based payments, excluding restricted stock, are valued using a Black-Scholes option pricing model. Grants of share-based payment awards issued to non-employees for services rendered have been recorded at the fair value of the share-based payment, which is the more readily determinable value. The grants are amortized on a straight-line basis over the requisite service periods, which is generally the vesting period. If an award is granted, but vesting does not occur, any previously recognized compensation cost is reversed in the period related to the termination of service. Stock-based compensation expenses are included in cost of goods sold or selling, general and administrative expenses, depending on the nature of the services provided, in the Condensed Consolidated Statement of Operations. For the three months ended April 30, 2014 and March 31, 2013 and the one month ended January 31, 2014 share-based compensation amounted to \$99,099, \$0 and \$45,681, respectively. Of the \$99,099 recorded for the three months ended April 30, 2014, \$94,927 was a direct cost of a stock offering and has been recorded as a reduction in additional paid in capital.

For the three months ended April 30, 2014, when computing fair value of share-based payments, the Company has considered the following variables:

The risk-free interest rate assumption is based on the U.S. Treasury yield for a period consistent with the expected term of the option in effect at the time of the grant. The risk free rate used had a range of 0.68%-1.71%.

The Company has not paid any dividends on common stock since its inception and does not anticipate paying dividends on its common stock in the foreseeable future. Therefore the expected dividend rate was \$0.

The expected option term is computed using the “simplified” method as permitted under the provisions of Staff Accounting Bulletin (“SAB”) 110. The Company uses the simplified method to calculate expected term of share options and similar instruments as the Company does not have sufficient historical exercise data to provide a reasonable basis upon which to estimate expected term.

The warrant term is the life of the warrant.

The expected volatility was benchmarked against similar companies in a similar industry. The expected volatility used had a range of 144%-193%.

The forfeiture rate is based on the historical forfeiture rate for the Company’s unvested stock options, which was 0%.

MamaMancini's Holdings, Inc.

Notes to Condensed Consolidated Financial Statements

April 30, 2014

Earnings Per Share

Basic earnings (loss) per share is computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding during each period. Diluted earnings (loss) per share is computed by dividing net income (loss), adjusted for changes in income or loss that resulted from the assumed conversion of convertible shares, by the weighted average number of shares of common stock, common stock equivalents and potentially dilutive securities outstanding during the period.

The Company had the following potential common stock equivalents at April 30, 2014:

Common stock subscribed	653,335
Common stock warrants, exercise price range of \$1.00-\$1.50	987,401
Common stock options, exercise price of \$1.00	444,288
Total common stock equivalents	2,085,024

The Company had the following potential common stock equivalents at March 31, 2013:

Common stock subscribed	--
Common stock warrants, exercise price range of \$1.00	505,400
Common stock options, exercise price of \$1.00	223,404
Total common stock equivalents	728,804

Since the Company reflected a net loss during the three months ended April 30, 2014 and March 31, 2013, the effect of considering any common stock equivalents, would have been anti-dilutive. A separate computation of diluted earnings (loss) per share is not presented.

Income Taxes

Income taxes are provided in accordance with ASC No. 740, "Accounting for Income Taxes". A deferred tax asset or liability is recorded for all temporary differences between financial and tax reporting and net operating loss carryforwards. Deferred tax expense (benefit) results from the net change during the period of deferred tax assets and liabilities.

Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

Recent Accounting Pronouncements

The U.S. Financial Accounting Standards Board issued Accounting Standards Update 2014-09, *Revenue from Contracts with Customers*, in May 2014. The amendments in this Update supersede the revenue recognition requirements in Topic 605, *Revenue Recognition*, including most industry-specific revenue recognition guidance throughout the Industry Topics of the Codification. In addition, the amendments supersede the cost guidance in Subtopic 605-35, *Revenue Recognition—Construction-Type and Production-Type Contracts*, and create new Subtopic 340-40, *Other Assets and Deferred Costs—Contracts with Customers*. In summary, the core principle of Topic 606 is that an entity recognizes revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This Accounting Standards Update is the final version of Proposed Accounting Standards Update 2011-230—*Revenue Recognition* (Topic 605) and Proposed Accounting Standards Update 2011-250—*Revenue Recognition* (Topic 605): Codification Amendments, both of which have been deleted. Accounting Standards Update 2014-09. The amendments in this Update are effectively for the Company for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. The Company is currently evaluating the effects of ASU 2014-09 on the condensed consolidated financial statements.

Forward Looking Statements

This quarterly report on Form 10-Q and other reports (collectively, the "Filings") filed by MamaMancini's Holdings, Inc. ("MamaMancini's" or the "Company") from time to time with the U.S. Securities and Exchange Commission (the "SEC") contain or may contain forward-looking statements and information that are based upon beliefs of, and information currently available to, the Company's management as well as estimates and assumptions made by Company's management. Readers are cautioned not to place undue reliance on these forward-looking statements, which are only predictions and speak only as of the date hereof. When used in the Filings, the words "anticipate," "believe," "estimate," "expect," "future," "intend," "plan," or the negative of these terms and similar expressions as they relate to the Company or the Company's management identify forward-looking statements. Such statements reflect the current view of the Company with respect to future events and are subject to risks, uncertainties, assumptions, and other factors, including the risks contained in the "Risk Factors" section of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2013, filed with the SEC on March 20, 2014, relating to the Company's industry, the Company's operations and results of operations, and any businesses that the Company may acquire. Should one or more of these risks or uncertainties materialize, or should the underlying assumptions prove incorrect, actual results may differ significantly from those anticipated, believed, estimated, expected, intended, or planned.

Although the Company believes that the expectations reflected in the forward-looking statements are reasonable, the Company cannot guarantee future results, levels of activity, performance, or achievements. Except as required by applicable law, including the securities laws of the United States, the Company does not intend to update any of the forward-looking statements to conform these statements to actual results.

Our financial statements are prepared in accordance with accounting principles generally accepted in the United States ("GAAP"). These accounting principles require us to make certain estimates, judgments and assumptions. We believe that the estimates, judgments and assumptions upon which we rely are reasonable based upon information available to us at the time that these estimates, judgments and assumptions are made. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities as of the date of the financial statements as well as the reported amounts of revenues and expenses during the periods presented. Our financial statements would be affected to the extent there are material differences between these estimates and actual results. In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management's judgment in its application. There are also areas in which management's judgment in selecting any available alternative would not produce a materially different result. The following discussion should be read in conjunction with our consolidated financial statements and notes thereto appearing elsewhere in this report.

Plan of Operation

The Company plans to aggressively increase its distribution of products into new retail outlets in 2014. The Company has undertaken a national radio campaign on Sirius XM channels for a substantial portion of this year and also has commercials running on political talk radio. Social media activity has increased with Facebook, Twitter, Pinterest, YouTube, newsletter mailings, blogs, and helpful consumer content and special projects including a recipe bank of videos and MamaMancini's contest and giveaways. Aggressive consumer merchandising activity, including virtual couponing, on-pack couponing, mail-in rebates, product demonstrations, and co-op retail advertising has commenced to increase sales to existing customers and new customers.

We believe that the ongoing introduction of the Company's new line of all natural brand Slow Cooked Italian Sauce and various meatball and entrée products show great promise for additional product placements and sales in 2014 and thereafter. These products include Five Cheese Stuffed Meatballs, Chicken Parmigiana Style Stuffed Meatballs, Chicken Florentine Stuffed Meatballs, Gluten Free Beef and Turkey Meatballs, Antibiotic Free Beef and Turkey Meatballs, Bolognese Sauce, Mac n' Mamas, and Orecchiette Pasta with Broccoli and Pork Meatballs. This line is available in bulk food service pack, retail packages in fresh and frozen varieties, and club store pack in fresh varieties. Additionally, the Company plans to continue expansion into various new retailers with placement of its existing all natural product line of Beef, Turkey, Pork and Chicken Meatballs and Sauce, as well as Marinara and Italian sauce with beef flavors.

Key sales personnel and a sales network of paid broker representatives are in place. Management is working diligently to solicit all major supermarket retailers, club stores and mass market accounts. Additionally, the Company has begun an effort to develop presentations to major entities in the sandwich, burger, and Italian sub quick-serve industry through a fee based consultant. The Company is also soliciting business in Canada and the Caribbean.

The Company owns 13% of the common equity of Meatball Obsession and is its exclusive supplier of meatball products. Meatball Obsession offers a fast service menu of take-out meatball offerings. The business plan of Meatball Obsession is to rapidly open more units at Universities in the fall of 2014 based upon its success this year. However, there is no guarantee that Meatball Obsession will perform up to its expectations or be able to open any more units in the future.

The Company increased its manufacturing source of supply in 2014 to meet an anticipated increased demand. Additions of high speed equipment and new production order flow has begun to occur. As sales increase, the Company expects that its packaging costs will decrease as it purchases longer runs of material and supplies but not guarantee that such packaging costs will decrease with the purchase of such materials or at all. The Company also expects that the labor costs component of the cost of goods sold will decrease in the later part of the year with higher speed equipment and order flow but cannot guarantee any such decrease in the labor costs.

The Company expects to have an operating loss in 2014 due to the investment in developing new and expanded business. These investments include slot fees to gain initial distribution, special marketing demo events to induce trial, major promotional campaigns for initial trial customers, and the cost of additional personnel or fee based marketing and sales support while this new business is developing.

The Company believes that the MamaMancini's brand has potential for great market brand equity once established. We believe that MamaMancini's products have the ability to grow into several areas of consumption by consumers such as frozen Italian specialties, frozen meat, fresh meat, prepared foods, hot bars, cold bars in delis, and sandwich sections of supermarkets and other retailers. In addition, we believe that MamaMancini's products can be sold into food service channels, mass market, export or as a component of other products.

Results of Operations for the three months ended April 30, 2014 and March 31, 2013

The following table sets forth the summary income statement for the three months ended April 30, 2014 and March 31, 2013:

Edgar Filing: MamaMancini's Holdings, Inc. - Form 10-Q

	Three Months Ended	
	April 30,	March 31,
	2014	2013
Sales - Net of slotting fees and discounts(1)	\$2,583,149	\$1,772,164
Gross Profit	\$802,924	\$490,062
Operating Expenses	\$(1,487,179)	\$(1,099,200)
Other Income (Expense)	\$(16,634)	\$(2,250)
Net Loss	\$(700,889)	\$(611,388)

Slotting fees are required in new placements with some, but not a majority of supermarket chains that the Company does business with. They are negotiated with each chain depending upon the expected return to the Company. We believe that we have successfully negotiated such slotting fees to a relatively low expense. We have taken into account future fees currently being negotiated in preliminary negotiations for new placements. We do not believe our size or financial limitations are an impediment to being able to pay such slotting fees. Slotting fee costs are an expense in growing the business as are other marketing and sales costs and the Company has accounted for these fees in assessing its estimated working capital for the next twelve months.

For the three months ended April 30, 2014 and March 31, 2013, the Company reported a net loss of \$(700,889) and \$(611,388), respectively. The change in net loss between the three months ended April 30, 2014 and March 31, 2013 was primarily attributable to following significant events:

The Company commenced operations during 2010 and has experienced significant growth in sales for the comparable periods. The Company has sold into approximately 26,000 retail and grocery locations at April 30, 2014 as compared to approximately 16,000 at March 31, 2013. The Company has reinvested proceeds to further develop brand awareness.

Advertising and promotional expense increased by \$295,000.

Stock-based compensation expense increased by \$4,000.

Trade show and travel expenses increased by \$6,400.

Commission expenses increased by \$27,800.

Royalty expenses increased by \$7,500.

Postage and freight increased by \$42,400.

Insurance expense increased \$8,400.

Depreciation expense increased \$11,500.

Marketing research and social media costs increased by \$40,200.

Product development costs increased by \$15,800.

Professional fees decreased by \$23,200.

Payroll and related expenses decreased by \$34,000.

Sales: Sales, net of slotting fees and discounts increased by approximately 46% to \$2,583,149 during the three months ended April 30, 2014, from \$1,772,164 during the corresponding period ended March 31, 2013. The increase in sales

is primarily related to the Company executing on their expansion strategy. The Company has sold into approximately 26,000 retail and grocery locations at April 30, 2014 as compared to approximately 16,000 at March 31, 2013. The Company commenced operations during 2010.

Gross Profit: The gross profit margin increased by approximately 3% from 28% for the three months ended March 31, 2013 to 31% for the three months ended April 30, 2014. This increase is primarily attributable to an improved product mix as well as decreased slotting fees and discounts.

Operating Expenses: Operating expenses increased by 35% during the three months ended April 30, 2014, as compared to the three months ended March 31, 2013. The \$387,979 increase in operating expenses is primarily attributable to the following approximate increases in operating expenses:

Advertising and promotional expenses of \$295,000 related to a new radio advertising campaign and special promotions;

Stock-based compensation of \$4,000 as a result of stock options expensed during the period;

Trade show and travel expenses of \$6,400 related to the increased cost of more members of the Company traveling and attending more trade shows as sales increased;

Commission expenses of \$27,800 related to increased sales;

Royalties of \$7,500 related to increased sales;

Postage and freight of \$42,400 due to higher sales slightly offset by some customers picking up their product in lieu of having it shipped to them;

Insurance expenses of \$8,400 related to increases in insurance coverage and premiums;

Depreciation expense of \$11,500 due to new fixed asset purchases during the period;

Amortization expense of \$4,100 related to the closing costs incurred on the Company's line of credit;

Marketing research and social media costs increased by \$40,200 due to the Company electing to spend more on market research and social media; and

Product development costs increased by \$15,800 due to the Company expanding its line of products.

These expense increases were offset by decreases in the following expenses:

Professional fees of \$23,200 due to a decrease in legal expenses and professional fees which were offset by an increase in fees to an investment banker and financial consultants related to equity raises;

Payroll and related expense of \$34,300 as compensation to a reduction in executive sales personnel; and

Public relations expenses of \$18,000 because the Company no longer needed the exposure to enhance sales; and

Other Income (Expense): Other expenses increased by \$14,384 to \$(16,634) for the three months ended April 30, 2014 as compared to \$(2,250) during the three months ended March 31, 2013. For the three months ended April 30, 2014, other expenses consisted of \$16,634 in interest expense incurred on the Company's line of credit resulting from the

FGI agreement signed in January 2014. For the three months ended March 31, 2013, other expenses consisted of \$2,250 in interest expense incurred on the Company's line of credit. The Company's line of credit originally signed in October 2010 was repaid and cancelled on September 9, 2013.

Liquidity and Capital Resources

The following table summarizes total current assets, liabilities and working capital at April 30, 2014 compared to January 31, 2014:

	Period Ended		
	April 30, 2014	January 31, 2014	Increase/(Decrease)
Current Assets	\$4,303,017	\$ 4,244,648	\$ 58,369
Current Liabilities	\$787,610	\$ 818,001	\$ (30,391)
Working Capital	\$3,515,407	\$ 3,426,647	\$ 88,760

As of April 30, 2014, we had working capital of \$3,515,407 as compared to working capital of \$3,426,647 as of January 31, 2014, an increase of \$88,760. The increase in working capital is primarily attributable to an increase in accounts receivable, inventory, prepaid expenses, deposit with related party manufacturer partially, a decrease in accounts payable and accrued expenses and a decrease in the outstanding line of credit balance offset by a decrease in cash and a decrease in receivable from related party. During the three months ended April 30, 2014, the Company raised net proceeds of the \$757,674 from the sale of 653,335 shares of common stock. During the one month ended January 31, 2014 the Company raised net proceeds of the \$347,834 from the sale of 300,000 shares of common stock. All are a result of the Company executing on its expansion strategy.

Net cash used in operating activities for the three months ended April 30, 2014 and March 31, 2013 was \$1,209,630 and \$1,014,981, respectively. The net loss for the three months ended April 30, 2014 and March 31, 2013 was \$700,889 and \$611,388, respectively.

Net cash used in all investing activities for the three months ended April 30, 2014 was \$81,467 as compared to \$325,000 for the three months ended March 31, 2013. During the three months ended April 30, 2014, the Company paid approximately \$81,500 to acquire new machinery and equipment. During the three months ended March 31, 2013, the Company paid \$295,000 for the acquisition of a company and paid \$30,000 for a loan to a related party.

Net cash provided by all financing activities for three months ended April 30, 2014 was \$829,145 as compared to \$0 for the three months ended March 31, 2013. During the three months ended April 30, 2014 the Company raised net proceeds of the \$852,601 from the sale of common stock which was offset by \$4,485 paid for debt issuance costs and net cash of \$18,971 paid for transactions pursuant to the line of credit agreement. During the three months ended March 31, 2013, the Company did not have any financing activities.

The Company believes that our existing available cash along with estimated net proceeds from the issuance of securities during January 2014 and the first quarter of 2014 in addition to the line of credit entered into in January 2014 will enable the Company to meet the working capital requirements for at least 12 months. (See Note 6 to the condensed consolidated financial statements related to the line of credit). The estimated working capital requirement for the next 12 months is \$2,200,000 with an estimated burn rate of \$183,000 per month. The Company continues to explore potential expansion opportunities in the industry in order to boost sales while leveraging distribution systems to consolidate lower costs.

As reflected in the accompanying condensed consolidated financial statements, the Company has a net loss and net cash used in operations of \$700,889 and \$1,209,630, respectively, for the three months ended April 30, 2014.

The ability of the Company to continue its operations is dependent on Management's plans, which include the raising of capital through debt and/or equity markets with some additional funding from other traditional financing sources, including term notes, until such time that funds provided by operations are sufficient to fund working capital requirements. The Company may need to incur additional liabilities with certain related parties to sustain the Company's existence.

The Company may require additional funding to finance the growth of its current and expected future operations as well as to achieve its strategic objectives. There can be no assurance that financing will be available in amounts or terms acceptable to the Company, if at all. In that event, the Company would be required to change its growth strategy and seek funding on that basis, though there is no guarantee it will be able to do so.

In the event that we are unable to generate adequate revenues to cover expenses and cannot obtain additional financing in the near future, we may seek protection under bankruptcy laws. During the month ended January 31, 2014 and the three months ended April 30, 2014, Management raised capital through equity financings. The Company intends to

utilize the capital in order to further advertise and market the Company's brand and to assist in penetrating additional distribution channels.

Recent Accounting Pronouncements

Our condensed consolidated financial statements and related public financial information are based on the application of accounting principles generally accepted in the United States ("GAAP"). GAAP requires the use of estimates; assumptions, judgments and subjective interpretations of accounting principles that have an impact on the assets, liabilities, revenues and expense amounts reported. These estimates can also affect supplemental information contained in our external disclosures including information regarding contingencies, risk and financial condition. We believe our use of estimates and underlying accounting assumptions adhere to GAAP and are consistently and conservatively applied. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ materially from these estimates under different assumptions or conditions. We continue to monitor significant estimates made during the preparation of our financial statements.

Critical Accounting Policies

Our condensed consolidated financial statements and related public financial information are based on the application of accounting principles generally accepted in the United States (“GAAP”). GAAP requires the use of estimates; assumptions, judgments and subjective interpretations of accounting principles that have an impact on the assets, liabilities, revenues and expense amounts reported. These estimates can also affect supplemental information contained in our external disclosures including information regarding contingencies, risk and financial condition. We believe our use of estimates and underlying accounting assumptions adhere to GAAP and are consistently and conservatively applied. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ materially from these estimates under different assumptions or conditions. We continue to monitor significant estimates made during the preparation of our financial statements.

Our significant accounting policies are summarized in Note 2 of our condensed consolidated financial statements. While all these significant accounting policies impact our financial condition and results of operations, we view certain of these policies as critical. Policies determined to be critical are those policies that have the most significant impact on our financial statements and require management to use a greater degree of judgment and estimates. Actual results may differ from those estimates. Our management believes that given current facts and circumstances, it is unlikely that applying any other reasonable judgments or estimate methodologies would cause effect on our consolidated results of operations, financial position or liquidity for the periods presented in this report.

We believe the following critical accounting policies and procedures, among others, affect our more significant judgments and estimates used in the preparation of our consolidated financial statements:

Use of Estimates - The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the condensed consolidated financial statements and accompanying notes. Such estimates and assumptions impact, among others, the following: allowance for bad debt, inventory obsolescence, the fair value of share-based payments.

Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the financial statements, which management considered in formulating its estimate could change in the near term due to one or more future confirming events. Accordingly, the actual results could differ significantly from our estimates.

Stock-Based Compensation - The Company accounts for stock-based compensation in accordance with ASC Topic 718, “Accounting for Stock-Based Compensation” established financial accounting and reporting standards for

stock-based employee compensation. It defines a fair value based method of accounting for an employee stock option or similar equity instrument. The Company accounts for compensation cost for stock option plans in accordance with ASC 718. The Company accounts for share based payments to non-employees in accordance with ASC 505-50 "Accounting for Equity Instruments Issued to Non-Employees for Acquiring, or in Conjunction with Selling, Goods or Services".

The Company recognizes all forms of share-based payments, including stock option grants, warrants and restricted stock grants, at their fair value on the grant date, which are based on the estimated number of awards that are ultimately expected to vest.

Share-based payments, excluding restricted stock, are valued using a Black-Scholes option pricing model. Share-based payment awards issued to non-employees for services rendered are recorded at either the fair value of the services rendered or the fair value of the share-based payment, whichever is more readily determinable. The grants are amortized on a straight-line basis over the requisite service periods, which is generally the vesting period. If an award is granted, but vesting does not occur, any previously recognized compensation cost is reversed in the period related to the termination of service. Stock-based compensation expenses are included in cost of goods sold or selling, general and administrative expenses, depending on the nature of the services provided, in the condensed consolidated Statement of Operations.

When computing fair value of share-based payments, the Company has considered the following variables:

The risk-free interest rate assumption is based on the U.S. Treasury yield for a period consistent with the expected term of the option in effect at the time of the grant.

The Company has not paid any dividends on common stock since its inception and does not anticipate paying dividends on its common stock in the foreseeable future.

The expected option term is computed using the “simplified” method as permitted under the provisions of Staff Accounting Bulletin (“SAB”) 110.

The warrant term is the life of the warrant.

The expected volatility was benchmarked against similar companies in a similar industry.

The forfeiture rate is based on the historical forfeiture rate for the Company’s unvested stock options, which was 0%.

Revenue Recognition - The Company follows the guidance of the Securities and Exchange Commission’s Staff Accounting Bulletin No. 104 for revenue recognition and records revenue when all of the following have occurred: (1) persuasive evidence of an arrangement exists, (2) the product is delivered, (3) the sales price to the customer is fixed or determinable, and (4) collectability of the related customer receivable is reasonably assured. There is no stated right of return for products. Sales are recognized upon shipment of products to customers.

Advertising - Costs incurred for producing and communicating advertising for the Company are charged to operations as incurred.

We do not have any off-balance sheet arrangements, financings, or other relationships with unconsolidated entities or other persons, also known as “special purpose entities” (SPEs).
