PART I

Item 1. Business.

Commercial Bankshares, Inc.

Commercial Bankshares, Inc., (the "Company"), a Florida corporation organized in 1988, is a bank holding company registered under the Bank Holding Company Act of 1956 ("BHCA"), as amended, whose wholly owned subsidiary and principal asset is the Commercial Bank of Florida, (the "Bank"). The Company, through its ownership of the Bank, is engaged in a commercial banking business, and its primary source of earnings is derived from income generated by its ownership and operation of the Bank. Unless the context otherwise requires, references herein to the Company include the Company and its wholly owned subsidiary, the Bank, on a consolidated basis.

The Company is a legal entity separate and distinct from the Bank, and there are various legal limitations on the ability of the Bank to finance or otherwise supply funds to the Company. In particular, under federal banking law, the Bank may not declare a dividend that exceeds undivided profits. In addition, the approval of the Federal Reserve Bank of Atlanta ("Atlanta FRB") and the Florida Department of Banking and Finance is required if the total amount of all dividends declared in any calendar year exceeds the Bank's net profits, as defined, for that year combined with its retained net profits for the preceding two years. The Atlanta FRB also has the authority to limit further the payment of dividends by the Bank under certain circumstances. In addition, federal banking laws prohibit or restrict the Bank from extending credit to the Company under certain circumstances.

In 1993, the Company filed a Registration Statement on Form SB-2 with the Securities and Exchange Commission covering an initial public offering and issued the maximum of 977,500 shares of common stock thereunder. Net proceeds of approximately \$10 million from this offering were invested in short-term securities pending utilization for future acquisition of other financial institutions or branches, working capital, general corporate purposes, and investment in the wholly owned banking subsidiary.

Commercial Bank of Florida

The Bank is a Florida chartered banking corporation originally chartered in February, 1979. It operated as Sunset Commercial Bank until its acquisition by the Company in 1988, at which time its name was changed to Commercial Bank of Florida. The Bank engages in commercial banking and related businesses from its fourteen banking facilities: its main office and nine other offices located in Miami-Dade County, Florida, and four offices in Broward County, Florida.

The Bank is operated as a network of community bank branches. The Bank primarily focuses on providing personalized banking services

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

to small businesses and individuals within the market areas where its banking offices are located. Management believes that this local market strategy, accompanied by the strategic placement of Bank personnel within market areas where they have served customers for many years, enables the Bank to attract and retain low cost core deposits, which provide substantially all of the Bank's funding requirements.

Deposit products include certificates of deposit, individual retirement accounts ("IRAs") and other time deposits, checking and other demand deposit accounts, NOW accounts, savings accounts, and money market accounts. The transaction accounts and time certificates are tailored to the principal market areas at rates competitive to those in the area. All deposit accounts are insured by the Federal Deposit Insurance Corporation ("FDIC") up to the maximum limits permitted by law. The Bank solicits these accounts from small businesses, professional firms, and households located throughout its primary market area.

The Bank also offers ATM cards with access to local, state, and national networks, safe deposit boxes, wire transfers, direct deposit of payroll and social security payments, and automatic drafts for various accounts. The Bank presently does not provide fiduciary or appraisal services.

The Bank conducts commercial and consumer banking business, which primarily consists of attracting deposits from the areas served by its banking offices and using those deposits, together with funds derived from other sources, to originate a variety of commercial, consumer, and real estate loans (including commercial loans collateralized by real estate).

The Company considers the general business of retail banking to be its only operating segment.

As is the case with banking institutions generally, the Bank's operations are materially and significantly influenced by general economic conditions and by related monetary and fiscal policies of financial institution regulatory agencies, including the Federal Reserve Board ("FRB"), the FDIC, and the State of Florida. Deposit flows and the cost of funds are influenced by interest rates on competing investments and general market rates of interest. Lending activities are affected by the demand for financing of real estate and other types of loans, which in turn is affected by the interest rates at which such financing may be offered and other factors affecting local demand and availability of funds. The Bank faces strong competition in the attraction of deposits (its primary source of lendable funds) and in the origination of real estate loans.

Employees

At December 31, 2001, the Company and the Bank together employed 191 employees, of whom four are part-time. None of these employees is covered by a collective bargaining agreement. The Company believes that its employee relations are good.

Market Information

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

The Bank's fourteen banking offices are located in Miami-Dade and Broward counties, which comprise the Bank's primary market area. Management believes that the Bank's principal markets are: (i) the established and expanding commercial market within the primary market area, and (ii) the moderate and the affluent residential market within the primary market area. Management also believes that the most profitable banking relationships are characterized by high deposit balances with a low frequency of transactions. Moreover, management believes that a community bank with local management is well positioned to establish these relationships with the smaller commercial customers and households. Management believes that the Bank is well positioned to take advantage of its market segment.

Competition

Competition in the banking and financial services industry is intense. In its primary market areas, the Bank competes with other commercial banks, savings institutions, credit unions, finance companies, mutual funds, insurance companies, and brokerage and investment banking firms operating locally and elsewhere. Most of these competitors have substantially greater resources and lending limits than the Bank and may offer certain services, such as trust services, that the Bank does not provide at this time. In addition many of the Company's non-bank competitors are not subject to the same extensive federal regulations that govern the Bank and the Company. The profitability of the Company depends upon the Bank's ability to compete in its market areas.

SUPERVISION AND REGULATION

Bank holding companies and banks are extensively regulated under both federal and state law. These laws and regulations are intended to protect depositors, not stockholders. To the extent that the following information describes statutory and regulatory provisions, it is qualified in its entirety by reference to the particular statutory and regulatory provisions. Any change in the applicable law or regulation may have a material effect on the business and prospects of the Company and the Bank.

Bank Holding Company Regulation

As a bank holding company registered under the BHCA, the Company is subject to the regulation and supervision of the FRB. The Company is required to file with the FRB annual reports and other information regarding its business operations and those of its subsidiaries. Under the BHCA, the Company's activities and those of its subsidiaries are limited to banking, managing or controlling banks, furnishing services to or performing services for its subsidiaries, or engaging in any other activity which the FRB determines to be so closely related to banking or managing or controlling banks as to be properly incident thereto.

The BHCA requires, among other things, the prior approval of the FRB in any case where a bank holding company proposes to (i) acquire

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

all or substantially all of the assets of any other bank, (ii) acquire direct or indirect ownership or control of more than 5% of the outstanding voting stock of any bank (unless it owns a majority of such bank's voting shares), or (iii) merge or consolidate with any other bank holding company. The FRB will not approve any acquisition, merger, or consolidation that would have a substantially anti-competitive effect, unless the anti-competitive impact of the proposed transaction is clearly outweighed by a greater public interest in meeting the convenience and needs of the community to be served. The FRB also considers capital adequacy and other financial and managerial resources and future prospects of the companies and the banks concerned, together with the convenience and needs of the community to be served, when reviewing acquisitions or mergers.

Additionally, the BHCA prohibits a bank holding company, with certain limited exceptions, from (i) acquiring or retaining direct or indirect ownership or control of more than 5% of the outstanding voting stock of any company which is not a bank or bank holding company, or (ii) engaging directly or indirectly in activities other than those of banking, managing, or controlling banks, or performing services for its subsidiaries, unless such non-banking business is determined by the FRB to be so closely related to banking or managing or controlling banks as to be properly incident thereto. In making such determinations, the FRB is required to weigh the expected benefits to the public, such as greater convenience, increased competition, or gains in efficiency, against the possible adverse effects, such as under-concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices.

There are a number of obligations and restrictions imposed on bank holding companies and their depository institution subsidiaries by law and regulatory policy that are designed to minimize potential loss to the depositors of such depository institutions and the FDIC insurance funds in the event the depository institution becomes in danger of default or in default. Under a policy of the FRB with respect to bank holding company operations, a bank holding company is required to serve as a source of financial strength to its subsidiary depository institutions and to commit resources to support such institutions in circumstances where it might not do so absent such policy. The FRB also has the authority under the BHCA to require a bank holding company to terminate any activity or to relinquish control of a nonbank subsidiary (other than a nonbank subsidiary of a bank) upon the FRB's determination that such activity or control constitutes a serious risk to the financial soundness and stability of any bank subsidiary of the bank holding company.

Capital Adequacy Guidelines for Bank Holding Companies

The Company is subject to certain FRB risk-based capital guidelines for bank holding companies. The risk-based capital guidelines are designed to make regulatory capital requirements more sensitive to differences in risk profile among banks and bank holding companies, to account for off-balance sheet exposure, and to minimize disincentives for holding liquid assets. Under these guidelines, assets and off-balance sheet items are assigned to broad risk categories, each with appropriate weights. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance sheet items.

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

The minimum ratio of total capital to risk-weighted assets (including certain off-balance sheet activities, such as standby letters of credit) is 8%. At least 4% of the total capital is required to be "Tier I Capital," which consists of common stockholders' equity, noncumulative perpetual preferred stock, and a limited amount of cumulative perpetual preferred stock, less certain goodwill items and the unrealized holding gain/loss on available for sale securities. The remainder ("Tier II Capital") may consist of (i) the allowance for loan losses of up to 1.25% of risk-weighted risk assets, (ii) 45% of unrealized holding gain on available for sale equity securities, (iii) excess of qualifying perpetual preferred stock, (iv) hybrid capital instruments, (v) perpetual debt, (vi) mandatory convertible securities, and (vii) subordinated debt and intermediate-term preferred stock up to 50% of Tier I capital. Total capital is the sum of Tier I and Tier II capital less reciprocal holdings of other banking organizations' capital instruments, investments in unconsolidated subsidiaries, and any other deductions as determined by the FRB (determined on a case by case basis or as a matter of policy after formal rule-making).

Bank holding company assets are given risk-weights of 0%, 20%, 50% and 100%. In addition, certain off-balance sheet items are given similar credit conversion factors to convert them to asset-equivalent amounts to which an appropriate risk-weight will apply. These computations result in the total risk-weighted assets.

The Company's management believes that the risk-weighting of assets under current FRB guidelines does not and will not have a material impact on the Company's operations or on the operations of the Bank. As of December 31, 2001 and 2000, the Company's total risk-based capital ratios were 13.54% and 14.30%, respectively. In addition to the risk-based capital guidelines, the FRB has adopted a minimum Tier I capital (leverage) ratio, under which a bank holding company must maintain a minimum level of Tier I capital to total consolidated assets of at least 3% in the case of a bank holding company that has the highest regulatory examination rating and is not contemplating significant growth or expansion. All other bank holding companies are expected to maintain a leverage ratio of at least 100 to 200 basis points above the stated minimum. Federal Reserve Board requirements also provide that bank holding companies experiencing internal growth or making acquisitions will be expected to maintain strong capital positions substantially above regulatory minimums without significant reliance on intangible assets. The Federal Reserve Board may continue to consider a "tangible Tier 1 leverage ratio" (deducting all intangibles) in evaluating proposals for expansion or new activities. As of December 31, 2001 and 2000, the Company's leverage ratios were 8.24% and 8.17%, respectively.

Interstate Banking and Branching Legislation

The Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 ("IBBEA") authorizes interstate acquisitions of banks and bank holding companies without geographic limitation. In addition, beginning June 1, 1997, the IBBEA authorizes a bank to merge with a bank in another state as long as neither of the states has opted out of interstate branching between the date of enactment of the IBBEA and May 31, 1997. The IBBEA further provides that states may enact laws permitting interstate bank merger transactions prior to June 1, 1997.

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

Florida law permits bank holding companies, regardless of what region they are located in, to acquire Florida banking organizations, provided that the home state of the acquiring company has enacted reciprocal legislation.

Under IBBEA, a bank may establish and operate a de novo branch in a state in which the bank does not maintain a branch if that state expressly permits de novo branching. Once a bank has established branches in a state through an interstate merger transaction, the bank may establish and acquire additional branches at any location in the state where any bank involved in the interstate merger transaction could have established or acquired branches under applicable federal or state law. A bank that has established a branch in a state through de novo branching may establish and acquire additional branches in such state in the same manner and to the same extent as a bank having a branch in such state as a result of an interstate merger. If a state opts out of interstate branching within the specified time period (Florida has not), no bank in any other state may establish a branch in the opting-out state, either through an acquisition or de novo.

Bank Regulation

The Bank is a state-chartered banking corporation and is subject to the supervision of and regular examination by the FRB and the Florida Department of Banking and Finance, as well as to the supervision of the FDIC.

The operations of the Bank are subject to state and federal statutes applicable to banks which are members of the Federal Reserve System and to the regulations of the FRB, the FDIC, and the State of Florida. Such statutes and regulations relate to required reserves against deposits, investments, loans, mergers and consolidations, issuance of securities, payment of dividends, establishment of branches, and other aspects of the Bank's operations. Various consumer laws and regulations also affect the operations of the Bank, including state usury laws, laws relating to fiduciaries, consumer credit and equal credit, and fair credit reporting. Under the provisions of the Federal Reserve Act, the Bank is subject to certain restrictions on any extensions of credit to the Company or, with certain exceptions, to other affiliates, on investments in the stock or other securities of national banks, and on the taking of such stock or securities as collateral. These regulations and restrictions may limit the Company's ability to obtain funds from the Bank for its cash needs, including funds for acquisitions and the payment of dividends, interest, and operating expenses.

The FDIC insures the deposits of the Bank to the current maximum allowed by law. As an institution whose deposits are insured by the Bank Insurance Fund ("BIF") and Savings Association Insurance Fund ("SAIF") of the FDIC, the Bank also is subject to insurance assessments imposed and set by the FDIC from time to time. The FDIC is further authorized to impose one or more special assessments in any amount deemed necessary to enable repayment of amounts borrowed by the FDIC from the Treasury Department. The actual assessments to be paid into the BIF and the SAIF are based on the institution's assessment risk classification, which is whether the institution is considered "well capitalized", "adequately capitalized", or "under-capitalized", as those terms have been defined in applicable federal regulations,

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

and whether the institution is considered by its supervising agency to be financially sound or to have supervisory concerns.

Gramm-Leach-Bliley Act

The Gramm-Leach-Bliley Act (the "Act") was signed into law in November 1999 to remove depression-era barriers that separate banking, securities and insurance functions. The Act allows full affiliation between banks and securities firms by permitting the creation of financial holding companies designed to engage in a range of financial activities, including securities underwriting and merchant banking. The Act also repeals the SAIF special reserve; modernizes the Federal Home Loan Bank System; provides for less frequent Community Reinvestment Act ("CRA") compliance examinations for community banks with \$250 million or less in assets, and gives customers the right to prevent banks from sharing information with third parties, such as telemarketers. The Act prohibits unitary savings and loan holding companies formed after May 4, 1999 from engaging in nonfinancial activities, and also prohibits purchase of unitary thrift holding companies by commercial firms. The Act contains requirements for the protection of consumer's financial privacy ("Regulation P"). The Bank has identified obligations, developed a privacy policy and provided disclosure of the policy to customers. The Bank is in full compliance with Regulation P.

Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA")

Among other things, the FDICIA provides the federal bank regulatory agencies with broad powers to take prompt corrective action to resolve problems of insured depository institutions. The extent of those powers depends upon whether the institution in question is "well capitalized", "adequately capitalized", "undercapitalized", "significantly undercapitalized", or "critically undercapitalized." A depository institution's capital tier will depend upon where its capital levels compare to various established capital measures and certain other factors, as established by regulation. As of December 31, 2001, the Bank met the definition of a "well capitalized" institution.

The FDICIA generally prohibits a depository institution from making any capital distribution (including payment of a dividend) or paying any management fee to its holding company if the depository institution would thereafter be "undercapitalized". "Undercapitalized" depository institutions are subject to growth limitations and are required to submit a capital restoration plan. If a depository institution fails to submit an acceptable plan, it is treated as if it is "significantly undercapitalized". "Significantly undercapitalized" depository institutions may be subject to a number of requirements and restrictions, including orders to sell sufficient voting stock to become "adequately capitalized", requirements to reduce total assets, and cessation of receipt of deposits from correspondent banks. "Critically undercapitalized" institutions are subject to the appointment of a receiver or conservator.

The FDICIA further requires an increase in the frequency of "full-scope, on-site" examinations and expands audit requirements. In addition, federal bank regulatory agencies are required to review and

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

prescribe uniform accounting standards that are at least as stringent as Generally Accepted Accounting Principles.

Pursuant to the FDICIA, the FRB and the other federal bank regulatory agencies adopted real estate lending guidelines pursuant to which each insured depository institution is required to adopt and maintain written real estate lending policies in conformity with the prescribed guidelines. Under these guidelines, each institution is expected to set loan-to-value ratios not exceeding the supervisory limits set forth in the guidelines. A loan-to-value ratio is generally defined as the total loan amount divided by the appraised value of the property at the time the loan is originated. The guidelines also require that the institution's real estate policy require proper loan documentation and that it establish prudent underwriting standards.

The FDICIA also contains the Truth in Savings Act. The purpose of the Truth in Savings Act is to require the clear and uniform disclosure of the rates of interest which are payable on deposit accounts by depository institutions and the fees that are assessable against deposit accounts, so that consumers can make a meaningful comparison between the competing claims of financial institutions with regard to deposit accounts and products.

The FDICIA also amended the prior law with respect to the acceptance of brokered deposits by insured depository institutions to permit only a "well capitalized" depository institution to accept brokered deposits without prior regulatory approval. Under implementing regulations, "well capitalized" banks may accept brokered deposits with a waiver from the FDIC (subject to certain restrictions on payments of rates), while "undercapitalized" banks may not accept brokered deposits. The regulations contemplate that the definitions of "well capitalized", "adequately capitalized", and "undercapitalized" will be the same as the definitions adopted by the agencies to implement the prompt corrective action provisions of the FDICIA (as described above).

The Bank became subject to the provisions of FDICIA relating to internal controls effective January 1, 2001. These provisions are required for banks over \$500 million in assets and require that the Bank document and test its internal control structure and report on it on an annual basis. The Bank complied with all applicable sections of the regulation and will report as required in the first quarter of 2002.

Payment of Dividends

The Bank is subject to legal limitations on the frequency and amount of dividends paid to the Company. The FRB or the FDIC may restrict the ability of a bank to pay dividends if such payments would constitute an unsafe or unsound banking practice. These regulations and restrictions may limit the Company's ability to obtain funds from the Bank for its cash needs, including funds for acquisitions and the payment of dividends, interest, and operating expenses.

In addition, Florida law places certain restrictions on the declaration of dividends from state-chartered banks to their holding companies. Pursuant to Section 658.37 of the Florida Banking Code, the Board of Directors of a state-chartered bank, after charging off bad

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

debts, depreciation, and other worthless assets, if any, and making provisions for reasonably anticipated future losses on loans and other assets, may quarterly, semi-annually, or annually declare a dividend of up to the aggregate of net profits of that period, combined with the bank's retained net profits for the preceding two years and, with the approval of the Florida Department of Banking and Finance, declare a dividend from retained net profits which accrued prior to the preceding two years. Before declaring such dividends, 20% of the net profits for the preceding period as is covered by the dividend must be transferred to the surplus fund of the bank until this fund becomes equal to the amount of the bank's common stock then issued and outstanding. A state-chartered bank may not declare any dividend if (i) its net income from the current year combined with the retained net income for the preceding two years is a loss, or (ii) the payment of such dividend would cause the capital account of the bank to fall below the minimum amount required by law, regulation, order, or any written agreement with the Florida Department of Banking and Finance or a federal regulatory agency.

Depositor Preference Statute

Legislation has been enacted providing that deposits and certain claims for administrative expenses and employee compensation against an insured depository institution would be afforded a priority over other general unsecured claims against such an institution, including federal funds and letters of credit, in the "liquidation or other resolution" of such an institution by any receiver.

Monetary Policy And Economic Control

The commercial banking business in which the Bank engages is affected not only by general economic conditions but also by the monetary policies of the FRB. Changes in the discount rate on member bank borrowing, availability of borrowing at the "discount window," open market operations, the imposition of changes in reserve requirements against member banks' deposits and assets of foreign branches, and the imposition of and changes in reserve requirements against certain borrowings by banks and their affiliates are some of the instruments of monetary policy available to the FRB. These monetary policies are used in varying combinations to influence overall growth and distributions of bank loans, investments, and deposits, and this use may affect interest rates charged on loans or paid on deposits. The monetary policies of the FRB have had a significant effect on the operating results of commercial banks and are expected to do so in the future. The monetary policies of these agencies are influenced by various factors, including inflation, unemployment, and short-term and long-term changes in the international trade balance and in the fiscal policies of the United States Government. Future monetary policies and the effect of such policies on the future business and earnings of the Company and the Bank cannot be predicted.

Item 2. Properties.

The Company occupies offices in a building located at 1550 S.W. 57th Avenue, Miami, Florida. This building also serves as the Bank's main office. Both the building and the 81,400 square foot parcel of commercial property on which it is situated are owned by the Bank. The Bank's and the Company's offices occupy the entire 24,228 square

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

foot building. Management believes that this location provides sufficient parking for its customers as well as visibility from S.W. 57th Avenue, a major thoroughfare.

The Bank owns ten of its fourteen full-service branches and leases the remaining four offices. Additional information relating to the Company's lease commitments is set forth in Note 4 on page 27 in the 2001 Annual Report and is incorporated herein by reference. The condition of all properties is considered good. In the opinion of management, owned properties are adequately covered by insurance.

Item 3. Legal Proceedings.

The Company and the Bank are periodically parties to or otherwise involved in legal proceedings arising in the normal course of business, such as claims to enforce liens, claims involving the making and servicing of real property loans, and other issues incident to the Bank's business. Management does not believe that there is any pending or threatened proceeding against the Company or the Bank which, if determined adversely, would have a material effect on the business, results of operations, or financial position of the Company or the Bank.

If any part of the premises shall be taken as aforesaid, and such partial taking shall render that portion not so taken unsuitable for the business of Tenant, as determined by Landlord, then this lease shall cease and terminate as aforesaid. If such partial taking is not extensive enough to render the premises unsuitable for business of Tenant, then this Lease shall continue in effect except that the minimum rent shall be reduced in the same proportion that the floor area of the premises taken bears to the original floor area demised and Landlord shall, upon receipt of the condemnation award, make all necessary repairs or alterations to the building in which the premises are located so as to constitute the portion of the building not taken a complete architectural unit, but such work shall not exceed the scope of the work to be done by Landlord originally constructing said building, nor shall Landlord in any event be required to spend for such work an amount in excess of the amount received by Landlord as damages for the part of the premises so taken. All damages awarded for such taking shall belong to Landlord whether such damages shall be awarded as compensation for diminution in value to the leasehold or to the fee of the premises, provided, however, that Landlord shall not be entitled to any portion of the award made to Tenant for cost of removal of stock and fixtures.

ARTICLE 15. If the premises shall be damaged by fire, the element or other insured casualty not due to Tenant's negligence but are not thereby rendered untenable in whole or in part, Landlord shall promptly, at its own expense, to the extent of available insurance proceeds, cause such damage to be repaired, subject to Tenant's insurance as required in Article 9, and the rent shall not be abated. If by reason of such occurrence, the premises shall be rendered untenable only in part, Landlord shall promptly, at its own expense, to the extent of available insurance proceeds cause the damage to be repaired, and the minimum rent shall be abated in proportion to the portion of the premises rendered untenable. If the premises shall be rendered wholly untenable by reason of such occurrence, Landlord shall promptly, at its own expense, to the extent of available insurance proceeds, cause such damage to be repaired and the minimum rent shall be abated in whole; provided however that Landlord in its sole judgment, for any reason, shall have the right to be exercised by notice in writing, to elect not to reconstruct the destroyed premises, and in such event this Lease and the tenancy hereby created shall cease as of the said occurrence, the minimum rent to be adjusted as of such date. Said notice shall be given within one hundred and twenty (120) days of said occurrence. Landlord's obligation to repair and rebuild, as described in this section, is only effective provided that damage and destruction is not due to Tenant's negligence, omissions, or wrongful malfeasance or misfeasance if Tenant, its agents, servants, employees, licensees, visitors, customers, patrons or invitees.

ARTICLE 16. If Tenant shall not pay rent or any other monies due hereunder at the time and in the manner stated or abandons the premises, or shall fail to keep and perform any other condition, stipulation or agreement herein contained on the part of Tenant to be kept and performed, or if Tenant shall suffer to be filed against Tenant an involuntary petition in bankruptcy or shall be adjudged voluntary or involuntary bankrupt, or make an assignment for the benefit of creditors, or should there be appointed a receiver to take charge of the premises either in the State Courts or in the Federal Courts, then, in any such events, Landlord may, at Landlord's option, declare this Lease in default, and in such event, Landlord shall in addition to all remedies by law available to Landlord based upon such default; including court costs and attorney's fees, appellate attorney's fees and court costs as well as Landlord's reasonable administrative costs, brokerage fees and other reasonable associated costs, have the right to terminate the Lease and elect to declare the entire minimum rent and any other charges, for the balance of the term due and payable forthwith. Any sums not paid when due shall bear interest at 18% per annum.

Section 1. If Tenant is in default under this Lease more than two (2) times within any twelve (12) month period, and/or for any number of continuing defaults, irrespective of whether or not such default is cured, then, without limiting Landlord's other rights and remedies provided for in this Lease or at law or equity, the Security

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

Deposit shall automatically be increased by an amount equal to one additional monthly rental equal to the total monthly rental currently being paid by Tenant, and Landlord may require future payments to be in the form of cash or a cashier's check.

ARTICLE 17. Section 1. It is agreed that if the Tenant abandons possession of the rental unit during the term of this Lease, or is lawfully evicted by the Landlord, then the Landlord may, at its sole option, re-take possession of the rental unit and make good faith effort to re-rent it for the Tenant's account. But such re-taking of possession shall not constitute a rescission of this Lease nor a surrender of the leasehold estate.

Section 2. In the event Tenant remains in possession of the premises after the expiration of this Lease and without the execution of a new lease, Tenant shall be deemed a Tenant from month to month, subject to all the condition of this Lease except that the monthly rental shall be twice the then current monthly rent.

Section 3. Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

6. COMPLETION OF TENANT'S WORK:

Upon completion of TENANT's work and prior to TENANT opening its office for business, TENANT shall (a) deliver to LANDLORD an affidavit by TENANT stating that TENANT's work has been substantially completed in accordance with Exhibit "C", which shall include a detailed breakdown of TENANT's final and total construction costs, together with receipted invoices showing payment thereof, and TENANT must deliver a final Release of Lien from TENANT's general contractor, together with an affidavit from the general contractor that all bills for labor and materials furnished to the DEMISED PREMISES have been paid, in lieu of a detailed breakdown of TENANT's total and final construction costs, together with receipted invoices, and which affidavit shall also state the names and addresses of all those in privity with such general contractor and it is understood that any deliberately false statement by TENANT therein shall constitute a breach of this Lease, and (b) deliver to LANDLORD the affidavit of the general contractor or general contractors performing TENANT's work, stating that TENANT's work has been substantially completed in accordance with Exhibit "C", that all subcontractors, subsubcontractors, laborers and materialmen supplying labor materials for TENANT's work has been substantially completed in accordance with Exhibit "C", that all subcontractors, subsubcontractors, laborers and materialmen supplying labor or materials for TENANT's works have been paid in full and that all liens therefore that have been or might be filed have been discharged of record or waived, and that no security interests relating thereto are outstanding, and (c) deliver to LANDLORD written certifications and approvals with respect to TENANT's work and its right to use and occupy the DEMISED PREMISES that may be required for any government authority, LANDLORD's mortgages, and any Board of Fire Underwriters or similar body, and (d) furnish to LANDLORD the insurance required by this Lease.

To Our Shareholders

It gives me great pleasure to present you with the Company's results For 2001. This year was especially unpredictable, yet the Company's strength and stability resulted in an outstanding year of performance. To highlight the achievements during 2001, your Company reported record earnings, continued to expand the loan portfolio, increased dividends, grew asset and deposit size steadily and improved the value of the franchise.

Net income rose to a record \$7.02 million, an 11% increase over 2000 earnings of \$6.31 million. Diluted earnings per share were \$1.89 for 2001, as compared to \$1.68 for 2000. Return on average assets closed the year at 1.28% and return on average equity was 14.61%. These results show that we are meeting and exceeding our goals and expectations for the Company's financial success.

Earnings for the fourth quarter of 2001 were \$1.82 million, a 10% increase over earnings for the same period in 2000 of \$1.65 million. Diluted earnings per share were \$0.49 for the fourth quarter of 2001, as compared to \$0.45 for the same period in 2000.

The loan portfolio continued to show growth, closing the year at \$346 million, a 21% increase over the 2000 net loan closing balance of \$286 million. We have increased the loan portfolio as a percentage of total deposits steadily to end the year with a 76% loan-to-deposit ratio. The allowance for loan losses closed the year at \$4.64 million, or 1.32% of total loans. Non-performing assets were 0.15% of total assets.

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

The Company's cash dividends declared during 2001 rose to a record \$.82 per share, an 11% increase over 2000 cash dividends declared of \$.74 per share. The Company's strong earnings and solid capital position support the increased dividends to our shareholders.

Internal deposit growth was solid, with total deposits and repurchase agreements reaching \$516 million at December 31, 2001. This is a 9% increase from the prior year closing balance of \$474 million. Total assets also increased 9% to close the year at \$569 million, as compared to \$523 million one year ago. We have grown steadily and will remain focused on continuing this positive trend.

All of the financial factors have improved the value of our franchise, but the intangible factor that drives the worth of this Company is our people and our service. The relationship that we have with our customers is a vital factor to our current success and to our growth in the future. We remain committed to the South Florida communities that we serve.

In closing, the Board of Directors and I would like to extend best wishes to each of you, our shareholders. It is your support that has allowed us to reach this level of growth, financial position and shareholder value. We look forward to guiding your Company to continued success as we face a new year and the challenges of today's marketplace. As always, I sincerely welcome your calls and letters.

EARNINGS ANALYSIS

Net Interest Income

Net interest income is the single most significant component of the Company's earnings. Net interest income is comprised of interest income and loan-related fees, less interest expense. Net interest income is affected by numerous factors, including the level, pricing, mix and maturity of earning assets and interest-bearing liabilities, as well as interest rate fluctuations. For purposes of this discussion, net interest income has been adjusted to a fully tax-equivalent basis, which restates tax-exempt income to an amount that would yield the same after-tax income had the income been subject to income taxes.

Net interest income for 2001 was \$22.0 million, an increase of 8% over 2000 net interest income of \$20.3 million. In 2000, net interest income grew 6% from \$19.2 million in 1999. The increase in net interest income in 2001 is attributable to an increase in average earning assets of \$59 million. The net interest margin was 4.28% in 2001, as compared to 4.48% in 2000 and 4.61% in 1999. The decrease of 20 basis points in 2001 is attributable to the interest rate environment and market competition during 2001. The rapid drop in the prime rate and treasury rates during the year resulted in loan repricings and lower interest income. Repricing of deposits was initially slower due to a competitive market environment in 2001.

The following table presents the Company's average balances, interest earned or paid and average interest rates earned or paid for each of the years ended December 31, 2001, 2000 and 1999.

Non-interest Income

Non-interest income for 2001 was \$3.50 million, compared to \$2.83 million in 2000 and \$3.62 million in 1999. These figures include non-recurring gains (losses) on sales of securities of \$240,000, (\$108,000) and \$763,000 for 2001, 2000 and 1999, respectively, and gains on sales of fixed assets of \$1,000, \$8,000 and \$220,000 for 2001, 2000 and 1999, respectively. The fluctuation in recurring non-interest income includes an increase in service charges on deposit accounts of \$276,000.

Non-interest Expense

Non-interest expense for 2001 was \$13.7 million compared to \$12.8 million in 2000 and \$13.4 million in 1999. The 7% increase during 2001 is attributable to increased staff, data processing, occupancy and professional expense. Staff expense increased \$781,000, or 10%, due to an increase in full-time equivalent employees from 182 in 2000 to 187 in 2001, regular salary increases and higher medical insurance premiums. Data processing expense increased \$121,000, or 13%, due to an increase in the number of accounts processed and due to a full year of higher rates based on a new contract signed in April, 2000. Occupancy expense increased \$65,000, or 5%, due to rent increases at three branches and higher real estate taxes. Professional fee expense increased \$57,000, or 25%, due to legal issues relating to non-accrual loans. These increases were partially offset by a decrease in furniture and equipment expense of \$107,000, or 13%, and a decrease in advertising expense of \$105,000, or 84%. Furniture and equipment decreased due to certain assets reaching full depreciation during the year. Advertising expense decreased due to the completion of a radio campaign in 2000.

The following table summarizes the various categories of non-interest expense for the years ended December 31, 2001, 2000 and 1999.

Taxes

For the years ended December 31, 2001, 2000 and 1999, the Company recorded an income tax expense of approximately \$2.83 million, \$2.72 million and \$2.09 million, respectively. Accordingly, the Company's effective tax rates were 30%, 30% and 28% for 2001, 2000 and 1999, respectively. The determination of effective rates reflects items which are not reported for income tax purposes, primarily tax-exempt interest income and the amortization of goodwill.

FINANCIAL CONDITION ANALYSIS

Investment Securities

The Company's investment securities portfolio of \$136 million at December 31, 2001, consisted of securities available for sale of \$111 million, which are carried at fair value, and securities held to maturity of \$25 million, which are carried at amortized cost. This compares to investment securities of \$180 million at December 31, 2000, which consisted of securities available for sale of \$143 million, and securities held to maturity of \$37 million. The decrease of \$45 million in the investment portfolio is due to the increase in loans in excess of deposit growth and due to management's decision to hold higher federal funds balances in the short term. The ratio of available for sale investments to total investments increased to 82% in 2001 from 79% in 2000, as the Company chose to classify new securities as available for sale in order to increase its ability to manage the portfolio to meet Asset/Liability and interest rate sensitivity goals.

The portfolio of securities available for sale at December 31, 2001 had a net unrealized gain of \$2.7 million, net of taxes, as compared to a net unrealized gain of \$1.7 million, net of taxes, at December 31, 2000.

The following table presents the Company's investment portfolio as of December 31, 2001, 2000 and 1999.

Allowance for Loan Losses

The balance in the allowance for loan losses at December 31, 2001, was

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

\$4.64 million, or 1.32% of total loans. This is an increase of \$830,000 from the December 31, 2000 allowance balance of \$3.81 million, or 1.31% of total loans. The increase in the allowance is the result of charges to the provision for loan losses during 2001 of \$875,000, less net charge-offs of \$39,000. The charge to the provision for 2000 was \$435,000 and net recoveries were \$92,000. The allowance was increased in order to maintain a level deemed sufficient to absorb losses in the loan portfolio. The Company reviews the allowance on a monthly basis and determines its adequacy from analysis of estimates of the risks associated with specific loans and the loan portfolio, present economic conditions and peer comparisons.

Non-performing assets were \$834,000 at December 31, 2001, compared to \$0 at December 31, 2000. Total non-performing assets to total assets were .15% and 0% at December 31, 2001 and 2000, respectively. With regard to classified loans, management is not aware of any trends or uncertainties which are expected to have a material impact on future operating results, liquidity, capital resources, or of any information which would cause serious doubt as to the ability of such borrowers to repay. Although management uses the best information available to make determinations with respect to the allowance, future adjustments may be necessary if economic conditions differ substantially from the assumptions used or adverse developments arise with respect to the Company's non-performing loans. There were no properties held in other real estate owned at December 31, 2001 or 2000.

The following table presents an analysis of the Company's allowance for loan losses for the last five years.

The following table presents the breakdown of the allowance for loan losses by loan category for the periods indicated. Management believes that the allowance can be allocated by category only on an approximate basis. During 2001, in conjunction with the implementation of the Federal Financial Institutions Examination Council's "Policy Statement on Allowance for Loan and Lease Losses Methodologies and Documentation for Banks and Savings Institutions", and the Securities and Exchange Commission's SAB No. 102, "Selected Loan Loss Allowance Methodology and

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

Documentation Issues", the Company reviewed and revised its policies and procedures regarding the methodology used to calculate its allowance for loan losses. The revised documentation resulted in a change in the allocation of the allowance to the various loan categories, thus reducing the unallocated allowance in comparison to previous years. The allocation of an allowance to each category is not necessarily indicative of future losses and does not restrict the use of the allowance to absorb losses in any other category. The allowance represents a reserve for probable losses existing in the loan portfolio.

Deposits

The Company's deposit base is its primary funding source. Management believes that substantially all of the Company's depositors are residents in its primary market area. The Company does not have a concentration of deposits from any one source, the loss of which would have a material adverse effect on the business of the Company.

Average total deposits increased \$43 million, or 11%, to \$445 million in 2001, while average borrowed funds (repurchase agreements) increased by \$6.8 million, or 15%, to \$52 million. The largest increase by category of average deposits was certificates of deposit, which grew \$29 million, or 15%. Average demand deposits grew \$5.0 million, or 6%. Deposit growth was internally generated during 2001 at the Company's

fourteen branches in Miami-Dade and Broward counties.

For the year ended December 31, 2001, the return on average equity was 14.61%, compared to 15.43% for the year ended December 31, 2000.

Continued growth and profitability of the Company are dependent upon maintenance of adequate levels of capital. The capital adequacy of the Company is determined based on the level of capital as well as asset quality, liquidity and earnings history. At December 31, 2001, the Company and the Bank were rated "well capitalized" by their regulatory agency. It is management's goal to maintain its "well capitalized" category for regulatory capital.

Regulatory capital guidelines divide capital into two tiers. Tier 1 capital consists of shareholders' equity less goodwill plus the unrealized gain/loss on available-for-sale securities. Tier 2 capital consists of Tier 1 capital plus the allowance for loan losses and 45% of unrealized gain on available-for-sale equity securities. In addition to Tier 1 and Tier 2 capital ratio requirements, regulatory capital guidelines set forth certain leverage capital requirements. This ratio is computed by dividing Tier 1 capital by unadjusted total assets. The Company's leverage ratio at December 31, 2001, was 8.24%, compared to 8.17% at year-end 2000, and compared to the regulatory guideline of 5% for "well capitalized" institutions.

The following table presents the regulatory capital levels and ratios of the Company at December 31, 2001, 2000 and 1999.

Liquidity

The objective of liquidity management is to maintain cash flow requirements to meet immediate and ongoing future needs for loan demand, deposit withdrawals, maturing liabilities, and expenses. In evaluating actual and anticipated needs, management seeks to obtain funds at the most economical cost. Management believes that the level of liquidity is sufficient to meet future funding requirements.

For banks, liquidity represents the ability to meet both loan commitments and withdrawals of deposited funds. Funds to meet these needs can be obtained by converting liquid assets to cash or by attracting new deposits or other sources of funding. Many factors affect a bank's ability to meet liquidity needs. The Bank's principal sources of funds are deposits, repurchase agreements, payments on loans, paydowns, maturities and sales of investments and capital contributions by the Company. As additional sources of funds, the Bank has credit availability with the Federal Home Loan Bank amounting to \$85 million, and Federal Funds purchased lines available at correspondent banks amounting to \$12 million.

The Bank's primary use of funds is to originate loans and purchase investment securities. In 2001, 2000 and 1999, the net change in loans was an increase of \$61.5 million, \$42.1 million and \$45.4 million, respectively, and the Bank purchased \$45.1 million, \$28.7 million and \$51.6 million of investment securities. Funding for the above came primarily from increases in deposits of \$39.6 million, \$34.5 million and \$38.0 million in 2001, 2000 and 1999, respectively, and increases in securities sold under agreements to repurchase of \$2.3 million in 2001, \$10.4 million in 2000 and \$6.8 million in 1999, and in proceeds from maturities and sales of investment securities of \$91.7 million, \$22.0 million and \$52.7 million in 2001, 2000 and 1999, respectively.

Asset/Liability Management and Interest Rate Risk

Changes in interest rates can substantially impact the Company's long-term profitability and current income. An important part of management's efforts to maintain long-term profitability is the management of interest rate risk. The goal is to maximize net interest income within acceptable levels of interest rate risk and liquidity. Interest rate exposure is managed by monitoring the relationship between interest-earning assets and interest-bearing liabilities, focusing on the size, maturity or repricing date, rate of return and degree of risk. The Bank's Asset/Liability Management Committee oversees the interest rate risk management and reviews the Bank's asset/liability structure on a quarterly basis.

The Bank uses interest rate sensitivity, or GAP analysis to monitor the amount and timing of balances exposed to changes in interest rates. The GAP analysis is not relied upon solely to determine future reactions to interest rate changes because it is presented at one point in time and could change significantly from day-to-day. Other methods such as simulation analysis are utilized in evaluating the Bank's interest rate risk position. The table presented below shows the Bank's GAP analysis at December 31, 2001:

Management assumptions reflect the Bank's estimate of the anticipated repricing sensitivity of non-maturity deposit products. Interest-bearing checking and savings have been allocated to the "over 1 year" category, and money market, 25% to the "91-181 days" category, 25% to the "182-365 days" category, and 50% to the "over 1 year" category.

The Bank uses simulation analysis to quantify the effects of various immediate parallel shifts in interest rates on net interest income over the next 12 month period. Such a "rate shock" analysis requires key assumptions which are inherently uncertain, such as deposit sensitivity, cash flows from investments and loans, reinvestment options, management's capital plans, market conditions and the timing, magnitude and frequency of interest rate changes. As a result, the simulation is only a best-estimate and cannot accurately predict the impact of future interest rate changes on net income. As of December 31, 2001, the Bank's simulation analysis projects an increase to net interest income of 5.11%, assuming an immediate parallel shift downward in interest rates by 200 basis points. If rates rise by 200 basis points, the simulation

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

analysis projects net interest income would decrease by 3.07%. These projected levels are within the Company's policy limits.

Critical Accounting Policies

The Company's financial condition and results of operations are sensitive to accounting measurements and estimates of matters that are inherently uncertain. When applying accounting policies in areas that are subjective in nature, management must use its best judgment to arrive at the carrying value of certain assets. The most critical accounting policy applied by the Company is that related to the valuation of the loan portfolio.

A variety of estimates impact carrying value of the loan portfolio, including the calculation of the allowance for loan losses, valuation of underlying collateral, the timing of loan charge-offs and the amount and amortization of loan fees and deferred origination costs.

The allowance for loan losses is management's most difficult and subjective judgment. The allowance is established and maintained at a level that management believes is adequate to cover losses resulting from the inability of borrowers to make required payment on loans. Estimates for loan losses are arrived at by analyzing risks associated with specific loans and the loan portfolio, current trends in delinquencies and charge-offs, the views of the Bank's regulators, changes in the size and composition of the loan portfolio and peer comparisons. The analysis also requires consideration of the economic climate and direction, change in the interest rate environment, which may impact a borrower's ability to pay, legislation impacting the banking industry and economic conditions specific to South Florida. Because the calculation of the allowance for loan losses relies on management's estimates and judgments relating to inherently uncertain events, results may differ from management's estimates.

The allowance for loan losses is also discussed on page 10 of the Annual Report and in Note 3 to the consolidated financial statements. The Company's significant accounting policies are discussed in Note 1 to the consolidated financial statements.

Fourth Quarter Results

Net income for the fourth quarter, 2001 was \$1.82 million, a 10% increase over fourth quarter 2000 net income of \$1.65 million. Diluted Earnings Per Share increased to \$.49 per common share in the fourth quarter 2001 as compared to \$0.45 per common share in the fourth quarter of 2000. Fourth quarter 2001 earnings represent a 1.28% annualized return on assets and a 14.36% annualized return on average equity. Tax-equivalent net interest income for the fourth quarter of 2001 was \$5.81 million, a 13% increase over fourth quarter 2000 net interest income of \$5.14 million. The fourth quarter 2001 tax-equivalent net interest yield was 4.37%, a 10 basis point increase from the fourth quarter 2000 yield of 4.27%.

The provision for loan losses was \$450,000 for the fourth quarter of 2001, as compared to \$195,000 for the same period in 2000. The fourth quarter charge to the provision increased the allowance for loan losses to \$4.64 million, or 1.32% of total loans, a level the Company has deemed to be sufficient to absorb losses in the portfolio. The Company reviews the allowance on a monthly basis and determines its adequacy from analysis of estimates of the risks associated with specific loans and the loan portfolio, present economic conditions and peer comparisons.

COMMERCIAL BANKSHARES, INC., AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

Commercial Bankshares, Inc. (the Company), a bank holding company, was incorporated on April 26, 1988, to acquire its wholly owned banking subsidiary, Commercial Bank of Florida (the Bank). The Bank is a Florida chartered banking corporation, which engages in commercial banking and related businesses from its fourteen facilities located in Miami-Dade County and Broward County, Florida.

The accounting policies and reporting practices of the Company and its subsidiary conform to predominant practices in the banking industry and are based on accounting principles generally accepted in the United States of America. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Such estimates include, among others, the allowance for loan losses and investment securities. Actual results could differ from those estimates. The following is a description of the significant accounting policies.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its subsidiary after elimination of all intercompany accounts and transactions.

Cash and Cash Equivalents

Cash equivalents include amounts due from banks and federal funds sold.

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

The Bank is required to maintain average reserve balances with the Federal Reserve Bank. The amounts of those reserve balances at December 31, 2001 and 2000, were approximately \$7.2 million and \$6.2 million, respectively.

Investment Securities

The Company classifies its investment securities as follows:

Held to maturity: Investment securities that management has the intent and the Company has the ability at the time of purchase to hold until maturity are classified as held to maturity. Securities in this category are carried at amortized cost adjusted for accretion of discounts and amortization of premiums using the constant yield method over the estimated life of the securities. If a security has a decline in fair value below its amortized cost that is other than temporary, then the security will be written down to its new cost basis by recording a loss in the consolidated statement of income.

Available for sale: Investment securities to be held for indefinite periods of time and not intended to be held to maturity are classified as available for sale. Assets included in this category are those that management intends to use as part of its asset/liability management strategy and that may be sold in response to changes in interest rates, and other factors related to interest rate and resultant prepayment risk changes. Securities available for sale are recorded at fair value. Unrealized holding gains and losses on securities available for sale, net of tax, are included as accumulated other comprehensive income in the consolidated balance sheets until these gains or losses are realized. The cost of investment securities sold is determined by the specific identification method. If a security has a decline in fair value that is other than temporary, then the security will be written down to its fair value by recording a loss in the consolidated statement of income.

Loans

Loans are reported at their principal outstanding balance net of the allowance for loan losses and deferred loan fees. Interest income is recognized when income is earned, using the effective interest method. Loan origination fees and certain direct loan origination costs are deferred and the net amounts are amortized as adjustments to interest income.

Allowance for Loan Losses

The adequacy of the allowance for loan losses is periodically evaluated by the Company in order to maintain the allowance at a level that is sufficient to absorb probable loan losses. Management's evaluation of the adequacy of the allowance is based on a review of the risks inherent in the loan portfolio, including adverse circumstances that may affect the ability of the borrower to repay interest and/or principal, the estimated value of collateral, and an analysis of the levels and trends of delinquencies, charge-offs, and the risk ratings of the various loan categories. Such factors as the level and trend of interest rates and the condition of the national and local economies are also considered.

The allowance for loan losses is established through charges to earnings in the form of a provision for loan losses. Increases and decreases in the allowance resulting from changes in the measurement of the impaired loans are included in the provision for loan losses. Loans continue to be classified as impaired unless they are brought fully current and the

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

collection of scheduled interest and principal is considered probable. When a loan or portion of a loan is determined to be uncollectible, the portion deemed uncollectible is charged against the allowance, and subsequent recoveries, if any, are credited to the allowance.

Income Recognition on Impaired and Nonaccrual Loans

Loans, including impaired loans, are generally classified as nonaccrual if they are past due as to maturity or payment of principal or interest for a period of more than 90 days, unless such loans are well collateralized and in the process of collection. If a loan or portion of a loan is classified as doubtful or is partially charged off, the loan is classified as nonaccrual. Generally, interest receivable on loans placed on nonaccrual status is reversed against interest income. Loans that are on a current payment status or past due less than 90 days may also be classified as nonaccrual if repayment in full of principal and/or interest is in doubt. Loans may be returned to accrual status when all principal and interest amounts contractually due are reasonably assured of repayment within an acceptable period of time, and there is a sustained period of repayment performance by the borrower, in accordance with the contractual terms of interest and principal.

While a loan is classified as nonaccrual and the future collectibility of the recorded loan balance is doubtful, collections of interest and principal are generally applied as a reduction to principal outstanding. When the future collectibility of the recorded loan balance is expected, interest income may be recognized on a cash basis. In the case where a nonaccrual loan had been partially charged off, recognition of interest on a cash basis is limited to that which would have been recognized on the recorded loan balance at the contractual interest rate. Cash interest receipts in excess of that amount are recorded as recoveries to the allowance for loan losses until prior charge-offs have been fully recovered.

Premises and Equipment

Premises and equipment are stated at cost less accumulated depreciation and amortization. Depreciation is computed principally on the straight-line method over the estimated useful life of each type of asset. Leasehold improvements are amortized over the remaining term of the applicable leases or their useful lives, whichever is shorter. Maintenance and repairs are charged to expense as incurred; improvements and betterments are capitalized. Upon retirement or disposition, the related costs and accumulated depreciation are removed from the accounts, and any resulting gains or losses are credited or charged to income.

Other Real Estate Owned

Other real estate owned is comprised of real estate and other assets acquired through foreclosure, acceptance of a deed in lieu of foreclosure, or otherwise acquired from the debtor in lieu of repayment of the debt. Other real estate owned is carried at the lower of the recorded investment in the loan or the fair value less estimated costs to sell. Upon transfer of a loan to foreclosed status, an appraisal is obtained and any excess of the loan balance over the fair value less estimated costs to sell is charged against the allowance for loan losses. Revenues, expenses, and subsequent adjustments to fair value less estimated costs to sell are classified as expenses for other real estate owned. At December 31, 2001 and 2000, there was no other real

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

estate owned.

Income Taxes

Deferred tax assets and liabilities are determined based on the difference between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance when it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Securities Sold Under Agreeemnts to Repurchase

Securities sold under agreements to repurchase, which are classified as secured borrowings, generally mature within one day from the transaction date. Securities sold under agreements to repurchase are reflected at the amount of cash received in connection with the transaction. The Bank may be required to provide additional collateral based on the fair value of the underlying securities.

Interest Rate Risk

The Company's profitability is dependent to a large extent on its net interest income, which is the difference between income on interest-earning assets and expense on interest-bearing liabilities. The Company, like most financial institutions, is affected by changes in general interest rate levels and by other economic factors beyond its control. Interest rate risk arises from mismatches between the dollar amount of repricing or maturing assets and liabilities, and is measured in terms of the ratio of the interest rate sensitivity gap to total assets. More assets repricing or maturing than liabilities over a given time frame is considered asset-sensitive, or a positive gap, and more liabilities repricing or maturing than assets over a given time frame is considered liability-sensitive, or a negative gap. An asset-sensitive position will generally enhance earnings in a rising interest rate environment and will negatively impact earnings in a falling interest rate environment, while a liability-sensitive position will generally enhance earnings in a falling interest rate environment and negatively impact earnings in a rising interest rate environment. Fluctuations in interest rates are not predictable or controllable. The Company has attempted to structure its asset and liability management strategies to mitigate the impact on net interest income of changes in market interest rates.

Per Share Data

Earning per share is computed on the weighted average number of common shares outstanding during the year. Earnings per share, assuming dilution, assumes the maximum dilutive effect of the average number of shares from stock options.

New Accounting Pronouncements

In June of 2001, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 142, "Goodwill and Other Intangible Assets." This statement addresses how intangible assets that are acquired individually or with a group of other assets (but not those acquired in a business combination) should be accounted for in financial statements upon their acquisition. This statement also addresses how goodwill and other intangible assets should be accounted for after they have been initially recognized in the financial statements. Except for goodwill and intangible assets acquired after June 30, 2001, which are immediately subject to its provision, SFAS No. 142 is effective starting with fiscal years beginning after December 15, 2001.

The provisions of SFAS No. 142 no longer allow the amortization of goodwill, and certain intangible assets that have indefinite useful lives, and requires that impairment of goodwill on those assets be tested annually. In addition, SFAS No. 142 requires the following additional disclosures for goodwill and other intangible assets:

- Changes in the carrying amount of goodwill from period-to-period;
- The carrying amount of goodwill by major intangible assets class, and
- The estimated intangible amortization for the next five years

The Company adopted SFAS No. 142 effective January 1, 2002. The Company did not incur impairment losses for goodwill resulting from a transitional impairment test. The Company expects that the elimination of goodwill amortization will positively impact pre-tax net income by approximately \$160,000 in fiscal year 2002.

In October of 2001, the FASB issued SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." SFAS No. 144 is effective for fiscal years beginning after December 15, 2001 and was written to provide a single model for the disposal of long-lived assets. SFAS No. 144 supersedes SFAS No. 121, "Accounting for Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed of" and the accounting and reporting provision of Accounting Principles Board Opinion No. 30, "Reporting the Results of Operations-Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions." The Company adopted the provision of SFAS No. 144 effective January 1, 2002. The implementation of this statement has not had a material effect on the Company's financial position, results of operations or cash flows.

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

Gross gains of approximately \$240,000, \$7,500 and \$792,000, respectively, and gross losses of \$0, \$115,000 and \$29,000, respectively, during 2001, 2000 and 1999, were realized on the sale of investment securities. In conjunction with the January 1, 2001 adoption of Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities", the Company transferred securities from the held-to-maturity portfolio to the available-for-sale portfolio. These securities had a book value of \$5.3 million and a fair market value of \$5.5 million.

During 1999, the Company sold securities with a book value of \$518,000 from the held to maturity portfolio. The sales did not call into question the Company's intent to hold other securities to maturity because one of the following criteria was met with each sale: (1) the Company had collected in excess of 85% of the principal outstanding, or (3) the security was within 90 days of maturity. The net gain on sale (4) of these securities was \$22,000.

At December 31, 2001 and 2000, investment securities with an amortized cost of approximately \$72 million and \$79 million, respectively, were pledged as collateral for securities sold under agreements to repurchase, time deposits of governmental entities, treasury tax and loan deposits and other borrowed funds.

11. Commitments and Contingencies

The Bank is involved in litigation arising from the ordinary course of business. In the opinion of management, the outcome of this litigation will not have a significant effect on financial position or results of operations.

The Company and the Bank have entered into employment agreements with four officers. The terms of the agreements range from one to three years. Compensation and benefits under these agreements are determined by the Board of Directors. Compensation and benefits are provided in certain defined circumstances, including change in control of the Company.

12. Stock Transactions

On November 18, 1999, the Company's Board of Directors authorized a one-for-twenty (five per cent) stock dividend, to be effective on January 4, 2000. Earnings per share amounts have been restated to retroactively reflect this transaction.

In March 1994, the Board of Directors adopted two stock option plans; the 1994 Outside Director Stock Option Plan and the 1994 Performance Stock Option Plan, which were approved by the shareholders in April 1994. Under the terms of the plans, the option price is not less than the fair market value of the common stock on the date of the grant. On April 15, 1999, the shareholders approved amendments to both plans which increased the number of shares reserved for the grant of options by 150,000 for each plan. The maximum number of shares that may be issued under the Outside Director Stock Option Plan and Performance Stock Option Plan are 279,051 and 522,152, respectively. Options granted under the Outside Director Stock Option Plan are immediately exercisable and are for a term of ten years. At December 31, 2001 and 2000, there were 68,348 and 98,348 shares available, respectively, for future option grants under the Outside Director Stock Option Plan. Options granted under the Performance Stock Option Plan are not exercisable for a period of one year from the date of grant and are for a term of ten years. Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation," became effective for the year ended December

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

31, 1996. This pronouncement encourages, but does not require, companies to recognize compensation expense for grants of stock, stock options and other equity instruments to employees based on the new fair value accounting rules. The Company has determined not to recognize such compensation expense.

The compensation expense, net of income tax effect, if recognized, would have resulted in a decrease in the pro forma amounts indicated below, for the years ended December 31, 2001, 2000 and 1999:

	2001 ----	2000 ----	1999 ----

- as reported	1.89	1.68	1.37

- pro forma	1.84	1.64	1.30

The weighted average fair value of options granted during 2001, 2000 and 1999, were \$4.16, \$4.29 and \$6.98, respectively. The weighted average fair value of each option grant was estimated as of the date of grant using the Modified Black-Scholes option-pricing model with the following weighted average assumptions for 2001, 2000 and 1999, respectively: dividend yield of 3.42%, 4.24% and 2.86%; expected volatility of 23.3%, 24.5% and 25.0%; risk-free interest rate of 3.30%, 6.35% and 7.00%; and expected life of 9.5 years for each of the three years.

14. Regulatory Matters

Capital Requirements

The Bank is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory -- and possibly additional discretionary -- actions by regulators that, if undertaken, could have a direct material effect on the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk-weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios (set forth in the table below) of Total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier I capital (as defined) to average assets (as defined). Management believes, as of December 31, 2001, that the Bank meets all capital adequacy requirements to which it is subject.

As of December 31, 2001, the most recent notification from the Federal Deposit Insurance Corporation categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum Total risk-based, Tier I risk-based, and Tier I leverage ratios as set forth in the table. There are no conditions or events since that notification that management believes have changed the institution's category.

The Bank's actual capital amounts (dollars in thousands) and ratios

are also presented in the table. No amount was deducted from capital for interest-rate risk.

have paid dividends to the Company aggregating \$18.1 million without prior regulatory approval. Future dividends will be dependent on the level of earnings of the Bank.

Cash dividends declared by the Company totaled \$3.0 million and \$2.7 million in 2001 and 2000, respectively. Dividends declared but not paid amounted to \$758,000 and \$720,000 in 2001 and 2000, respectively.

15. Financial Instruments With Off-Balance-Sheet Risk and With Concentrations of Credit Risk

Off-Balance-Sheet Risk

The Bank is a party to financial instruments with off-balance-sheet risk which are created in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby and commercial letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of amounts recognized in the consolidated balance sheets. The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Commitments to extend credit generally have fixed expiration dates or other termination clauses and may require payment of a fee. Total commitments to extend credit at December 31, 2001 and 2000 were \$30 million and \$30 million, respectively. The Bank evaluates each customer's credit-worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation.

Standby and commercial letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support private borrowing or performance arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank had approximately \$8.4 million and \$387,000 in 2001 and \$4.6 million and \$298,000 in 2000 of irrevocable standby and commercial letters of credit, respectively, of which \$1.3 million and \$1.2 million of standby letters of credit were collateralized by cash in 2001 and 2000, respectively.

Concentrations of Credit Risk

The Bank primarily grants loans for which South Florida real estate is the collateral. The borrowers' ability to honor their contracts is substantially dependent upon the general economic conditions of the region. As of December 31, 2001, the Bank's ten largest loan relationships had an aggregate balance of \$50 million, representing 14% of net loans. As of December 31, 2000 the Bank's ten largest loan relationships had an aggregate balance of \$48 million, representing 17% of net loans.

16. Disclosure About Fair Value of Financial Instruments

The following methods and assumptions were used to estimate the fair value of each significant class of financial instrument for which it is practicable to estimate that value.

Cash and Due from Banks and Federal Funds Sold

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

Investment Securities

The fair value of investment securities equals quoted market price, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities. Note 2 to the Consolidated Financial Statements provides information on estimated fair values at December 31, 2001 and 2000.

Loans

A significant portion of loans is comprised of prime-based loans and treasury bill-based loans. The fair value of these types of loans is the carrying amount of the loan. At December 31, 2001, variable rate loans amounted to approximately \$272 million or 78% of total loans. Fixed rate loans maturing within the next year totaled \$22 million or an additional 6% of total loans. At December 31, 2000, variable rate loans amounted to approximately \$212 million or 73% of total loans. Fixed rate loans maturing within the next year totaled \$12 million or an additional 4% of total loans. The fair value of these types of loans is the carrying amount of the loan. Market value of fixed rate loans with maturities in excess of one year, representing approximately 16% of the loan portfolio as of December 31, 2001 and 23% as of December 31, 2000, approximates carrying value based on terms and maturity of those loans and current borrowing rates.

Deposit Liabilities and Short-term Borrowed Funds

The fair value of demand, savings, interest-bearing checking and money market deposits and of borrowings under repurchase agreements is the amount payable on demand (carrying amount). The fair value of fixed maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities. At December 31, 2001, the fair value of time deposits approximates carrying value, which includes time deposits of \$204 million due within twelve months, or 91% of total time deposits. At December 31, 2000, time deposits of \$192 million due within twelve months represented 90% of total time deposits.

Commitments to Extend Credit and Standby Letters of Credit

The fair value of commitments is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counter parties. The fair value of letters of credit is based on fees currently charged for similar agreements. At December 31, 2001, a significant portion of the letter of credit portfolio is scheduled to expire within twelve months. The fair value of these commitments approximates the committed amounts.

Annual Meeting of Shareholders

PROXY STATEMENT

General

The Board of Directors of Commercial Bankshares, Inc. (the "Company") is soliciting proxies to be used at the Annual Meeting of Shareholders to be held on Thursday, April 18, 2002, and all adjournments thereof. This proxy statement and the accompanying proxy card are first being sent to shareholders on or about March 14, 2002.

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

The shares represented by all properly executed proxies received by the Company will be voted as specified by the shareholders. If no specifications are given (including broker non-votes), the shares represented by the proxy will be voted for the election of the listed nominees as directors. A Shareholder who has given a proxy may revoke it at any time before it is voted at the meeting by filing with the Secretary of the Company a written notice of revocation, by submitting a proxy bearing a later date, or by attending the meeting and voting in person.

Record Date and Outstanding Shares

On March 8, 2002, there were 3,615,508 shares of the Company's Common Stock, \$.08 par value, outstanding. Each share of Common Stock of record on the books of the Company at the close of business on March 8, 2002, entitles its owner to one vote, either in person or by proxy, upon each matter to come before the meeting.

Voting and Solicitation

A majority of the shares entitled to vote, represented in person or by proxy, shall constitute a quorum. Votes cast in person or by proxy will be tabulated by the inspectors of election appointed by the Board of Directors. The current Florida Business Corporation Act (the "Act") provides that directors are elected by a plurality of the votes cast if a quorum is present at the meeting, and all other matters are approved if the votes cast in favor of the action exceed the votes cast against the action (unless the matter is one for which the Act or the Articles of Incorporation require a greater vote). Therefore, under the Act, abstentions have no legal effect unless the matter is one for which the Act or the Articles of Incorporation require a greater vote.

The expense of soliciting proxies will be borne by the Company. Proxies will be solicited principally by mail, but directors, officers and regular employees of the Company or its subsidiaries may solicit proxies personally or by telephone. The Company will reimburse custodians, nominees, or other persons for their out-of-pocket expenses in sending proxy material to beneficial owners.

Regardless of the number of shares you own, it is important that they be represented at the Annual Meeting. You are respectfully requested to sign, date and return the accompanying proxy card at your earliest convenience.

PROPOSAL I ELECTION OF DIRECTORS

Unless you specify otherwise on the accompanying proxy, it will be voted for the election of the listed nominees to serve as directors until the next Annual Meeting of Shareholders or until their successors are elected and qualified. If a quorum is present at the Meeting, the plurality of the votes cast by the shares entitled to vote in the election of Directors at the Meeting is required to elect each nominee.

The Board of Directors and Committees

The Board of Directors of the Company consists of the same persons as the Board of Directors of the Bank. The Company conducts its operations through the Bank, which is its wholly owned subsidiary. Both the Company and the Bank held twelve meetings of the Board of Directors during 2001. Each director attended at least 75% of the board meetings that were held

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

while he was serving as a director during the year, as well as attending at least 75% of the committee meetings of those committees of which the respective director was a member. During 2001, the Company's Board of Directors had standing Audit and Compensation Committees, and the Bank's Board of Directors had standing Audit, Executive, Loan and Compliance Committees.

(a) Audit Committee. The Bank's Audit Committee consists of Messrs. Namoff, Simon and Yelen. These persons were all independent, non-employee directors of the Bank and the Company and constitute three of the six non-employee directors of the Board. The Audit Committee held four meetings during 2001. The Audit Committee has functional supervision over the internal audit staff, reviews the system of internal controls and the adequacy of the internal audit system, and receives reports on activities of the internal auditing department. It recommends the independent certified public accountants to the Bank's and the Company's Boards of Directors and reviews the scope of the audits and the actual audits performed by both the independent certified public accountants and the internal auditors. It is responsible for ensuring that the audit findings are adequately addressed.

(b) Compensation Committee. The Company's Compensation Committee consists of Messrs. Anderson, Simon and Yelen. These persons are all independent, non-employee directors of the Company and constitute three of the six non-employee directors of the Board. The Compensation Committee held two meetings during 2001. The Compensation Committee was delegated the duties of establishing and administering an executive compensation program. Its activities include reviewing and approving the design of the program, setting performance goals, assessing executive performance, and making grants of salary, bonuses and incentive compensation. The Compensation Committee also administers the Amended 1994 Performance Stock Option Plan.

(c) Nominating Committee. The Company has no formal nominating committee but rather the entire Board of Directors acts as the nominating committee.

Executive Officers of the Company

The executive officers of the Company are elected to their offices for one-year terms at the meeting of the Board of Directors in April of each year. The terms of any executive officers elected after such date expire at the same time as the terms of the executive officers elected at such date.

Joseph W. Armaly, age 65, is Chairman of the Board of Directors and Chief Executive Officer of the Company and the Bank. Mr. Armaly served as President of Merchants from 1965 through 1988 and also served as Chairman of Merchants' Board of Directors from 1980 through 1988. Mr. Armaly was also President and Chairman of the Board of Florida Commercial from 1980 through 1988. Mr. Armaly has been Chairman of the Board of the Company and the Bank since its formation in 1988.

Jack J. Partagas, age 64, is a Director and the President, Chief Operating Officer, and Secretary of the Company and the Bank. Prior to joining the Company and the Bank in 1988, Mr. Partagas was Vice President of Florida Commercial between 1971 and 1988. Mr. Partagas has been a Director of the Company and the Bank since 1988,

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

Executive Vice President of the Company and the Bank from 1988 through 1992, and President of the Company and the Bank since 1992.

Barbara E. Reed, age 38, was elected Senior Vice President and Chief Financial Officer of the Company and the Bank in June of 1995. Ms. Reed previously served the Bank as Vice President and Controller and as Auditor. Ms. Reed is a Certified Public Accountant and prior to 1991, was employed by Coopers & Lybrand LLP.

Certain Relationships and Related Transactions

The Bank has had and expects to have in the future various loan and other banking transactions in the ordinary course of business with directors, executive officers, and principal shareholders of the Bank and the Company (or associates of such persons). In the opinion of management, all such transactions: (i) have been and will be made in the ordinary course of business; (ii) have been and will be made on substantially the same terms, including interest rates and collateral on loans, as those generally prevailing at the time for comparable transactions with unrelated persons; and (iii) do not involve more than the normal risk of collectibility or present other unfavorable features. The total amount of extensions of credit to directors, executive officers, those stockholders named in the table in "Security Ownership of Certain Beneficial Owners and Management" (set forth below), and any of their associates was \$8.0 million as of February 28, 2002, which represented approximately 13% of total shareholders equity.

The firm of Bischoff and Associates, P.A. acts as corporate counsel to the Company and the Bank. Richard J. Bischoff, a director of the Company and the Bank, is the sole shareholder in that firm. The fees paid in 2001 and 2000 were not material to the Company but might be considered material to that law firm organized in September, 1999.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Securities Exchange Act of 1934 requires the Company's officers (as defined in Rule 16a-1(f)), directors, and persons owning more than ten percent of a registered class of the Company's equity securities to file reports of ownership and changes of ownership with the Securities and Exchange Commission ("SEC"). Such persons are required by SEC regulations to furnish the Company with all Section 16(a) forms they file. Based solely upon a review of the copies of forms furnished to the Company, the Company believes that during the 2001 fiscal year, all filing requirements applicable to its officers and directors and 10% shareholders were met.

Security Ownership of Certain Beneficial Owners and Management

The following table sets forth certain information as of March 1, 2002, regarding the beneficial ownership of the Company's outstanding Common Stock by the one person known to the Company to be the beneficial owner of more than 5% of the Company's Common Stock.

Employment Agreements

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

As of March 18, 1994, the Company and the Bank entered into employment agreements with Messrs. Armaly and Partagas and Ms. Reed. These agreements are intended to assure the Company and the Bank of the continued services of key officers.

With respect to Messrs. Armaly and Partagas, the agreements provide that each officer shall be employed by the Company and the Bank in his current position for a period of three (3) years. On March 31, 1995 the term was extended automatically for one additional year and on each subsequent March 31 the term is automatically extended for one additional year such that after each March 31 extension the term of the agreement is a full three years. Compensation and benefits are to be determined by the Board of Directors of the Company, provided that the officer's participation in employee benefit plans and arrangements shall provide benefits at least equal to those provided to all other employees of the Company. In the event that the officer's employment is terminated (except for death, disability, or cause) or if the officer terminates his employment because of a reduction in position, responsibility, salary, or for any other good reason, as defined in the agreement, and including a change in control of the Company, the officer is entitled to severance benefits equal to three year's salary and cash incentive compensation plus the option to continue to receive fringe benefits for an additional three years or an additional sixty (60%) percent of annual salary and cash incentive compensation in lieu of fringe benefits. In the event the officer terminates his employment other than for good reason, as defined in the agreement, the officer is entitled to severance benefits equal to one year's salary and cash incentive compensation, plus an additional twenty (20%) percent in lieu of fringe benefits. Such severance benefits will be based upon the executive's then current salary and the aggregate cash incentive compensation last paid to or earned by the officer in the immediately preceding twelve months prior to termination. In the event that any of such payments constitute "parachute payments" under Section 280G of the Internal Revenue Code and therefore are subject to the excise tax on "excess parachute payments" under Section 4999 of the Internal Revenue Code, the agreements provide that the Company will pay an additional cash amount, as determined by a formula set forth in the agreements, sufficient to pay both the excise tax and any additional amounts which become due as the result of the payment of the excise tax, to put the officer in the same position as though no excise tax had been imposed.

With respect to Ms. Reed, the agreement provides that she shall be employed by the Company and the Bank in her current position for a period of one year. On December 14, 1997 the term was extended automatically for one additional year and on each subsequent December 14 the term is automatically extended for one additional year. Compensation and benefits are to be determined by the Board of Directors of the Company, provided that the officer's participation in employee benefit plans and arrangements shall provide benefits at least equal to those provided to all other employees of the Company. In the event that the officer's employment is terminated (except for death, disability, or cause) or if the officer terminates her employment because of a reduction in position, responsibility, salary, or for any other good reason, as defined in the agreement, Ms. Reed is entitled to severance benefits equal to her base salary and cash incentive compensation through and including the scheduled termination date of this agreement, as extended. If the agreement is terminated by Ms. Reed pursuant to a change in control of the Company, Ms. Reed is entitled to severance benefits equal to twelve times her then current monthly salary. In the event that Ms. Reed terminates her employment other than for good reason, as defined in the agreement, the officer is entitled to severance benefits

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

equal to her base salary and cash incentive compensation through and including the date of termination. Such severance benefits will be based upon Ms. Reed's then current salary and the aggregate cash incentive compensation last paid to or earned by the officer in the immediately preceding twelve months prior to termination.

Director Compensation

Directors of the Company who are salaried employees of the Bank do not receive any additional compensation for serving as a director or committee member. During the year 2001, non-employee directors of the Bank received a retainer of \$1,500 per calendar quarter.

In addition, each non-employee director in office in June, 2001 received 3,000 stock options for serving on the Board, and each non-employee director who was a member of the Bank's Loan or Executive Committees in June, 2001 received 2,000 additional stock options.

Board Compensation Committee Report on Executive Compensation

1. Performance and Policies.

The Compensation Committee of the Board of Directors of the Company oversees and administers the Company's executive compensation programs. All members of the Compensation Committee are outside directors who are not eligible to participate in any of the compensation programs that the Committee oversees. The Compensation Committee recommends and the Board of Directors determines, based on such recommendations, compensation for the Chairman. Compensation levels for the other executive officers of the Company are determined by the Compensation Committee, based on the recommendations of the Chairman.

The Company's executive compensation program is designed to attract, retain, motivate and appropriately reward individuals who are responsible for the Company's short- and long-term profitability, growth and return to shareholders. It is also designed to align the interests of high level employees with those of the Shareholders. Compensation for Company executive officers consists of base compensation, annual cash incentive awards and long-term incentive awards in the form of stock options. Executive officers also participate in a savings incentive plan and a medical plan available to employees generally.

The determination of base compensation increases, annual cash incentive awards and long-term incentive awards is based upon the performance of the Company and the contribution of each individual to that performance. Individual contribution is assessed based upon factors such as level of responsibility, job complexity and the importance of the position in the structure of the Company and the Bank. Individual contribution is also judged more subjectively based upon the Compensation Committee's overall evaluation of the officer's professionalism and professional growth, judgment, business acumen and ability and effort. The Compensation Committee also compares, on a random and subjective basis, the salaries of the executive officers with the salaries of executive officers of other bank holding companies of comparable size. Finally the Compensation Committee considers whether compensation increases are fair and equitable based upon individual performance and a comparison with peers. Although the components of compensation (base compensation, annual cash incentive awards, and long-term incentive awards) are reviewed separately, compensation decisions are made based on a review of total compensation.

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

(a) Base Compensation. Pay levels for each executive are set annually at the beginning of the fiscal year and are based primarily on the performance of the Company during the prior fiscal year. The Compensation Committee considers factors such as earnings per share, pre-tax earnings, net profits and return on equity. Secondly, the Compensation Committee considers individual performance in light of each executive's job responsibilities. In determining the base salaries for 2001, the Compensation Committee took into account the Company's performance during 2000. Specifically, net income increased 16% during 2000; return on average assets and equity were 1.28% and 15.43%, respectively, as compared to 1.20% and 12.35%, respectively, in 1999; credit performance remained strong; diluted earnings per share increased from \$1.37 in 1999, to \$1.68 in 2000 and loan growth was 17% in 2000.

(b) Annual Cash Incentive Awards. Annual cash incentive awards to the Company's executive officers are granted at the discretion of the Compensation Committee and are determined at the end of the fiscal year. The determination of the amount of such awards is made by the Compensation Committee based upon the performance of the Company and on a subjective basis as indicated above. For purposes of determining the level of the annual cash incentive awards to be paid to senior executives for 2001, it was the Compensation Committee's view that the Company's 2001 results represented a strong performance. The Compensation Committee noted the following factors in support of its findings: net income increased 11% during 2001; return on average assets and equity were 1.28% and 14.61% in 2001, respectively, as compared to 1.28% and 15.48% in 2000; credit performance remained excellent; diluted earnings per common share increased from \$1.37 in 1999 and \$1.68 in 2000, to \$1.89 in 2001; the senior executive officers were successful in implementing the growth strategy of the Bank, as average loans increased by 21% from 2000 to 2001; average total deposits increased 9% from 2000 to 2001; and cash dividends declared during 2001 increased 11% over 2000.

(c) Stock Option Awards. The Compensation Committee also uses stock options to reward management and to link them to the long-term results and stockholder interests of the Company. Option grants are usually determined in the spring of each fiscal year. The levels of option grants are determined at the discretion of the Compensation Committee on a subjective basis. Previous grants of stock options are reviewed but are not considered the most important factor in determining the size of any executive's stock option award in a particular year. In determining the levels of option grants for 2001, the Compensation Committee considered the performance of the Company for fiscal 2000, the performance of the Company for the beginning of 2001, and efforts and initiatives by the executive officers to implement and support the strategic objectives of the Bank.

2. CEO Compensation.

Joseph Armaly is eligible to participate in the same executive compensation program available to the other executive officers within the Company. His 2001 base salary was set at \$310,000, as compared to \$290,000 in 2000. Mr. Armaly's base salary was based primarily on the Company's performance during 2000; specifically, net income increased 16% during 2000; return on average assets and equity were 1.28% and 15.43% respectively, as compared to 1.20% and 12.35%, respectively, in 1999; credit performance remained strong; diluted earnings per share increased from \$1.37 in 1999 to \$1.68 in 2000, and loan growth was 17% in 2000.

Edgar Filing: COMMERCIAL BANKSHARES INC - Form 10-K

The stock option grants made to Mr. Armaly in 2001 were based on the analysis discussed above for fiscal year 2000, together with performance of the Company for the first half of 2001. In June 2001, Mr. Armaly was awarded ten-year options covering 4,750 shares. The terms and conditions of this grant were consistent with the grants to all other executive officers.

In December, 2001, Mr. Armaly received an annual cash incentive award of \$80,000. This annual cash incentive award was based upon the Company's performance during the 2001 fiscal year and the individual performance of the executive. In determining this award, the Compensation Committee considered the increase in the Company's earnings during 2001. Specifically, the Compensation Committee considered the following factors: net income increased 11% during 2001; return on average assets and equity for 2001 were 1.28% and 14.61%, respectively, as compared to 1.28% and 15.48% in 2000, respectively; diluted earnings per common share increased from \$1.37 in 1999 and \$1.68 in 2000 to \$1.89 in 2001; the Bank was successful in implementing its growth strategy, as average loans increased by 21% from 2000 to 2001; average total deposits increased 9% from 2000 to 2001; and cash dividends declared during 2001 increased 11% over 2000.
