

Item 5.02 Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers

On June 22, 2018, the Compensation Committee of the Board of Directors of Align Technology, Inc. (the “Company”) granted a special one-time award of market-performance based restricted stock units (referred to herein as market stock units or “MSUs”) to Joseph M. Hogan, the Company’s president and chief executive officer. The MSUs were granted with the intent of retaining and incentivizing Mr. Hogan through the three-year performance period as well as further aligning CEO compensation with stockholder returns. In order for Mr. Hogan to fully vest and earn the maximum number of MSUs under the award, Align’s market capitalization would increase approximately 80%, or \$18 billion (as measured from the 30-trading day average stock price as of May 31, 2018) and the Company’s total stockholder return relative to the S&P 500 would be greater than the 80th percentile.

The MSU award was granted under the Company’s 2005 Incentive Plan, as amended (the “Plan”) pursuant to a Market Stock Unit Agreement (the “MSU Agreement”), a copy of which is filed as Exhibit 10.1 hereto.

The MSU award covers a target number of 43,100 MSUs (“Target MSUs”). Depending on the performance of the Company over a three-year period beginning on June 1, 2018 (the “Performance Period”), Mr. Hogan may earn up to a maximum of 300% of the Target MSUs. The actual number of MSUs that will be eligible to vest (the “Eligible Market Stock Units”) will be determined based on level of achievement against the following two performance metrics, as specified in, and subject to the terms and conditions of, the MSU Agreement:

The first is a comparison of the Company’s total stockholder return (“TSR”) during the Performance Period relative to (1) the total stockholder return of the companies in the S&P 500 Index (the “Index”) at the beginning of the Performance Period and who remain in the Index through the end of the Performance Period (the “Relative TSR”); and

(2) The second is the Company’s stock price at the end of the Performance Period.

Interpolation is used for final payout calculation.

If the Company’s TSR during the Performance Period is negative, the maximum number of Eligible Market Stock Units will not be more than 100% of the Target MSUs.

The Eligible Market Stock Units will vest on the date the Plan’s administrator calculates and determines the number of Eligible Market Stock Units, subject to Mr. Hogan’s continued service with the Company through that date.

For purposes of calculating the TSRs of the Company and any company in the Index, the TSR will be based on the average adjusted closing price of the company's common stock for the last 30 market trading days prior to commencement of the Performance Period (and the average adjusted closing price of the company's common stock for the 30 market trading days ending on the last day of the Performance Period (the "Ending Price"). The Ending Price is also used for purposes of calculating the level of achievement against the second performance metric described above.

Treatment upon a Change in Control

If a Change in Control that occurs before the end of the Performance Period, for purposes of determining the number of Eligible Market Stock Units:

the Performance Period would end upon the closing of the Change in Control for purposes of calculating the level of achievement of the Relative TSR and the Company's stock price at the end of the truncated Performance Period; and

the "End Price" for the Company will equal the per share amount paid to holders of the Company's common stock in connection with the Change in Control.

Following the Change in Control, Mr. Hogan would be scheduled to vest in 100% of such Eligible Market Stock Units on June 1, 2021, subject to his continued service with the Company through that date, except that if Mr. Hogan's employment with the Company is terminated in connection with the Change in Control, the vesting of the Eligible Market Stock Units would be subject to any vesting acceleration provisions in any agreement between Mr. Hogan and the Company that may then be in effect.

The foregoing description of the terms of the MSU Agreement does not purport to be complete and is qualified in its entirety by the provisions of the MSU Agreement filed as Exhibit 10.1 hereto and incorporated by reference herein.

Item 9.01 Financial Statements and Exhibits.
