CAUTIONARY STATEMENT

This Annual Report on Form 10-K contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements, other than statements of historical fact, regarding our strategy, future operations, financial position, estimated revenue, projected costs, projected savings, prospects, plans, opportunities and objectives constitute forward-looking statements. The words may, will, expect, plan, anticipate, believe, estimate, continue and similar types of expressions identify forward-looking statements, although not all such statements contain these identifying words. These forward-looking statements are based upon information that is currently available to us and/or management's current expectations, speak only as of the date hereof, and are subject to risks and uncertainties. We expressly disclaim any obligation, except as required by law, or undertaking to update or revise any forward-looking statements contained or incorporated by reference herein to reflect any change or expectations with regard thereto or to reflect any change in events, conditions, or circumstances on which any such forward-looking statement is based, in whole or in part. Our actual results may differ materially from the results discussed in or implied by such forward-looking statements. We are subject to a number of risks, some of which may be similar to those of other companies of similar size in our industry, including rapid technological changes, competition, customer concentration, failure to successfully integrate acquisitions, adverse government regulations, failure to manage international activities, income we may not realize from our Microsoft relationship and loss of key individuals. Risks that may affect our operating results include, but are not limited to, those discussed in Part I Item 1A, titled Risk Factors. Readers should carefully review the risk factors described in this document and in other documents that we file from time to time with the Securities and Exchange Commission.

PART I

ITEM 1. BUSINESS.

Overview

We provide end-to-end global cloud-commerce and marketing solutions to a wide variety of companies in software, consumer electronics, computer games, video games and other markets. We offer our clients a broad range of services that enable them to quickly and cost effectively establish an online sales channel capability and to subsequently manage and grow online sales on a global basis while mitigating risks. Our services include design, development and hosting of online stores and shopping carts, store merchandising and optimization, order management, denied parties screening, export controls and management, tax compliance and management, fraud management, digital product delivery via download, physical product fulfillment, subscription management, online marketing including e-mail marketing, management of affiliate programs, paid search programs, payment processing services, website optimization, web analytics and reporting, and CD production and delivery.

Our products and services allow our clients to focus on promoting and marketing their products and brands while leveraging our investments in technology and infrastructure to facilitate the purchase of products through their online websites. When shoppers visit one of our clients' branded websites they are transferred to an online commerce store and/or shopping cart operated by us on our commerce platforms. Once on our system, shoppers can browse for products and make purchases online. We typically are the seller of record for transactions through our client branded stores. After a purchase is made, we either deliver the product digitally via download over the Internet or transmit instructions to a third party for physical fulfillment of the order. We also typically process the buyer's payment as the merchant of record, including collection and remittance of applicable taxes and compliance with various regulatory matters. We have invested substantial resources to develop our cloud-commerce and marketing platforms, including business-to-business software, and we provide access and use of our platforms to our clients as a service as opposed to selling the software to be operated on their own in-house computer hardware. Our cloud-commerce store solutions range from simple remote control models to more comprehensive online store models.

Table of Contents

In addition to the services we provide that facilitate the completion of an online transaction, we also offer services designed to increase traffic to our clients' websites and the associated online stores and to improve the sales productivity of those stores. Our services include paid search advertising, search engine optimization, affiliate marketing, store optimization, multi-variant testing, web analytic services and e-mail optimization. All of our services are designed to help our clients acquire customers more effectively, sell to those customers more often and more efficiently, and increase the lifetime value of each customer.

Additionally, through our Digital River World Payments subsidiary, we offer a full range of payment processing services to clients. These services include multiple payment methods, fraud management, tax management, cloud-based billing and other payment optimization services.

On September 1, 2010, we announced an amendment of our agreement with Microsoft Corporation (Microsoft) to extend the term of the Microsoft Operations Digital Distribution Agreement through October 31, 2013. On August 30, 2010, we entered into the Microsoft Store USA statement of work with Microsoft whereby we will build, host and manage Microsoft® Store, an e-commerce store that supports the sale and fulfillment of Microsoft and third party software as well as consumer electronics products to customers in the United States. On March 2, 2011, Digital River began providing e-commerce hosting and payment processing services in connection with Microsoft Store. In addition to Microsoft Store, Digital River maintains its role as a reseller of Microsoft products via Digital River's existing online stores. Currently, we are providing commerce services, ranging from transaction and payment processing, to e-marketing, digital downloads and fraud prevention in support of some of the popular Microsoft software titles, including Microsoft® Office. The global arrangement incorporates digital fulfillment across multiple geographies, including North America, Asia, Europe, Latin America and Australia.

As announced on October 12, 2009, Symantec Corporation informed us that it elected not to renew its commerce agreement with us. As a consequence, their e-commerce agreement terminated on June 30, 2010. We recorded \$25.2 million in overall revenues from the Symantec contract in 2010.

We view our operations and manage our business as one reportable segment, providing outsourced commerce solutions globally to a variety of companies, primarily in the software and consumer electronics product markets.

We were incorporated in Delaware in February 1994. Our headquarters are located at 10380 Bren Road West, Minnetonka, Minnesota and our telephone number is 952-253-1234.

General information about us can be found at www.digitalriver.com under the Company/Investor Relations link or follow the Company on Twitter at twitter.com/digitalriverinc. Our annual report on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, as well as any amendments or exhibits to those reports, are available free of charge through our website as soon as reasonably practicable after we file such reports with the Securities and Exchange Commission.

Industry Background

Growth of the Internet and E-Commerce. E-Commerce sales continue to grow. The U.S. Commerce Department reported that e-commerce sales in 2011 rose 16.1% compared to 2010. We believe there are a number of factors that are contributing to the continued growth of e-commerce: (i) adoption of the Internet continues to increase globally; (ii) broadband technology is increasingly being used to deliver Internet service enabling the delivery of richer content as well as larger files to consumers; (iii) Internet users are becoming increasingly comfortable with the process of buying products online; (iv) the functionality of online stores continues to improve, offering a broader assortment of payment options with more promotion alternatives; (v) businesses are placing more emphasis on their online channel, reaching a larger audience at comparatively lower costs than other methods; and (vi) concerns about conflicts between online and traditional sales channels continue to subside. Additionally, we believe that current economic conditions have led to increased retail store closings which should drive more shoppers online as they shift to other channels, filling the void created by retail downsizings and bankruptcies.

Table of Contents

Growing Interest in Direct Sales of Products to Consumers. Increasingly, companies are selling their products directly to buyers via online sales channels. This is due to increased competition for shelf space in the traditional retail channels as well as recognition that direct sales channels can co-exist with traditional sales channels. There is also a growing recognition of the value inherent in developing behavioral or personalized marketing campaigns relevant to a consumer's interests.

Opportunities for Outsourced Cloud-Commerce Services. We believe the market for outsourced commerce will continue to grow as there are advantages to outsourced commerce that will continue to make it an attractive alternative to building and maintaining this capability in-house. These advantages include: (i) eliminating the substantial up-front and ongoing costs of computer hardware, network infrastructure, specialized application software and training and support costs; (ii) reducing the time it takes to get online stores live and productive; (iii) shifting the ongoing technology, financial, personal information security protections, regulatory and compliance risks to a proven service provider; (iv) leveraging the direct marketing expertise of an e-commerce service provider to accelerate growth of an online business; and (v) allowing businesses to focus on their specific core competencies.

Once an online store is established, it is immediately accessible to Internet users around the world. Web pages must be presented and customer service inquiries handled in multiple languages, and a variety of currencies and payment options must be accepted. The appropriate taxes must be collected and paid, payment fraud risk mitigated, fulfillment provided, and assurances made that products are not shipped to banned locations. These and other requirements of a global cloud commerce system make it an expensive and potentially risky undertaking for any business. These factors also make a comprehensive outsourced offering, such as that provided by Digital River, an attractive alternative.

Shift from Physical to Electronic Delivery of Digital Products. Consumers have grown increasingly comfortable with the electronic delivery of digital products, such as software, e-books, computer games, video games, music and video. This shift from physical to electronic delivery is being driven by benefits to both buyers and sellers of these products. For buyers, downloaded products are immediately available for use and a wider variety of products are available than can be found in most retail stores. For sellers, electronic delivery eliminates inventory-stocking requirements, shipping, handling, storage and inventory-carrying costs as well as the risk of product obsolescence.

The Digital River Solution

Our solution combines a robust cloud-commerce technology platform and a suite of services to help businesses worldwide grow their online revenues and avoid the costs and risks of running an integrated global commerce operation in-house. We offer a comprehensive e-commerce solution that operates seamlessly as part of a client's website. We provide services that facilitate commerce transactions and drive traffic to our clients' online stores. Our services include design, development and hosting of online stores, merchandising, order management, fraud prevention screening, popular online payment methods, export controls and management, denied parties screening, tax compliance and management, digital product delivery via download, physical product fulfillment, CD production, multi-lingual customer service, subscription management, online marketing services including email marketing, paid search program management, website optimization, web analytics and reporting. We also provide our clients with increased product visibility and sales opportunities through our large network of online channel partners, including retailers and affiliates. We generate a significant proportion of our revenue on a revenue-share basis, meaning that we are paid a percentage of the selling price of each product sold at a client's online store that is being managed by Digital River. We believe this revenue share model aligns our interests with those of our clients.

Benefits to Clients

Reduced Total Cost of Ownership and Risk

Utilizing the Digital River solution, businesses can dramatically reduce or eliminate upfront and ongoing hardware, software, maintenance and support costs associated with developing, customizing, deploying,

Table of Contents

maintaining and upgrading an in-house global cloud-commerce solution. They can have a global e-commerce presence without assuming the costs and risks of internal development and leverage the investments we make in our cloud-commerce platform. In addition, we help mitigate the risks of global e-commerce, including risks associated with payment fraud, data security, tax compliance, and regulatory compliance. Our ongoing investments in the latest technologies and e-commerce functionality help ensure our clients maintain pace with industry advances.

Revenue Growth

We can assist our clients in growing their online businesses by (i) facilitating the acquisition of new customers, improving the retention of existing customers, and increasing the lifetime value of each customer; (ii) extending their businesses into international markets; and (iii) expanding the visibility and sales of their products through new online sales channels. We have developed substantial expertise in online marketing and merchandising which we apply to help our clients increase traffic to their online stores, and improve order close ratios, average order sizes and repeat purchases, all of which result in higher revenues for our clients and Digital River.

We provide the technology and services required to establish, grow and support international sales, both for U.S.-based clients seeking to reach customers overseas, and non-U.S.-based clients looking to access the U.S. and other markets. Our technology platform enables transactions to be completed in numerous currencies using a variety of payment methods. In addition, we provide localized online content and payment methods, and offer customer service in a variety of languages, extending our clients reach beyond their home markets.

Through our large online affiliate network marketplace, which we call oneNetworkDirect, we provide our clients access to a new sales channel which can help grow their online businesses. Clients can offer any part of their product catalogs to our network of online channel partners, including online retailers and affiliates. This increases the exposure these products receive and can result in higher sales volumes. Our channel partners benefit because we eliminate the need for each of them to manage hundreds of relationships with product developers, while increasing the depth and breadth of products they can sell, all without requiring the management of physical product inventory.

Deployment Speed

Businesses can reduce the time required to develop a global-commerce presence by utilizing our outsourced business model. Typically, a new client can have an online store live in a matter of weeks compared with months or longer if they decide to build, test deploy and integrate the commerce capability in-house. Once they are operational on our platform, most clients can utilize our remote control toolset to make real-time changes to their online store, allowing them to take advantage of opportunities without technical assistance from Digital River.

Focus on Core Competency

By utilizing our outsourced cloud-commerce platform, clients can focus on developing, marketing and selling their products rather than devoting time and resources to building and maintaining a cloud-commerce infrastructure. This allows client management time to focus on what they know best while ensuring they have access to the latest technologies, tools and expertise for running a successful global-commerce operation.

Benefits to Buyers

Our solution emphasizes convenience as it enables products to be purchased online at anytime from anywhere in the world via a connection to the Internet. In the case of software, video games and other digital products, buyers can immediately download their purchase and, depending on file size, begin using it in a matter of minutes. Search technology allows shoppers to browse our entire catalog to find the products they are looking

Table of Contents

for quickly and easily. Our extended download service, which guarantees replacement of products accidentally destroyed through computer error or malfunction, and our 24/7 customer service provided on behalf of our clients, offer shoppers additional assurance that their buying experience will be a positive one. Our CD2Go service gives buyers the ability to obtain, for a fee, a copy of the product they have purchased and downloaded on a CD.

Strategy

Our objective is to be the cloud-commerce expert that drives client revenue for software and digital products developers, high-tech product and computer manufacturers, and video game publishers. Our strategy for achieving this objective includes the following key components:

Attract New Clients and Expand Relationships with Existing Clients. We have focused our efforts on securing new clients and expanding our relationships with existing clients primarily in the software, consumer electronics, computer game and video game markets. Our clients include software publishers, other digital content providers, high-tech product manufacturers and online channel partners.

We believe we can attract new clients and gain additional business with existing clients by expanding the range of services we offer. This includes services to enhance the commerce transaction as well as additional online marketing and payment services. We believe that by expanding the size and breadth of the catalog of products we offer, we will attract additional online retailers and affiliates seeking to offer their customers a wide range of quality products. We currently provide e-commerce services for thousands of software and digital products publishers, consumer electronic product manufacturers, game publishers and affiliates.

Expand International Sales. We believe there is a substantial opportunity to grow our business by enabling our clients to expand their sales through international online stores. Internet adoption and broadband deployment continue to increase rapidly, especially in the European and Asia Pacific regions. We have seen significant growth in sales for clients that have created international online stores. We intend to continue to enhance our technology platform, payment options and localized service offerings to increase sales in international markets.

Provide Clients with Strategic Marketing Services. We proactively develop and deliver new strategic marketing services that are designed to help our clients improve customer acquisition and retention and maximize the lifetime value of customers. These services currently include paid search advertising, search engine optimization, affiliate marketing, store optimization, web analytics, and e-mail marketing and optimization. In general, we manage these programs for our clients and have achieved significant increases in client revenue, return-on-investment or both, compared to what clients experienced when running these programs and supporting technologies in-house or through other service providers. We intend to continue to develop and/or acquire new value-added strategic marketing services and technologies to create additional sources of revenue for our clients and for Digital River.

Maintain Technology Leadership. We believe our technology platform and infrastructure afford us a competitive advantage in the market for outsourced commerce solutions. We intend to continue to invest in and enhance our platform to improve scalability, efficiency, reliability, security and performance. By leveraging our infrastructure, we can improve our ability to provide low-cost, high-value services while continuing to deploy the latest technologies. Additionally, we plan to continue investing in our infrastructure to enable our clients to further penetrate international markets, enhance their relationships with their customers, better manage the return-on-investment across all their online marketing activities, successfully adopt new selling models such as subscriptions, Software as a Service (SaaS), trial programs and volume licensing programs.

Continue to Seek Strategic Acquisitions. Historically, we have been an active acquirer of businesses, and we expect to continue actively pursuing acquisitions that further our business strategy. Some of the

Table of Contents

strategic factors we consider when evaluating an acquisition opportunity include: expanding our base of clients, improving the breadth and depth of our product offering, improving the catalog of content, extending our strategic marketing and other services offerings, expanding our geographic reach and diversifying our revenue stream into complementary or adjacent market segments.

Services

We provide a broad range of services to our clients, including design, development and hosting of online stores, merchandising, order management, fraud prevention screening, popular localized online payment methods, export controls and management, denied parties screening, tax compliance and management, digital product delivery via download, physical product fulfillment, CD production, multi-lingual customer service, subscription management, online marketing services including email marketing, paid search program management, website optimization, web analytics and reporting. Most of these offerings can be managed through client-facing, remote control self-service tools that are easily used by business users without specialized training. Since clients utilize our centralized system and processes, we can consistently offer best practices across our entire client base.

Store Design, Development and Hosting. We offer our clients website design services utilizing our experience and expertise to create efficient and effective online stores. Our global-commerce solutions can be deployed quickly and implemented in a variety of ways from fully-functioning shopping carts through completely merchandised online stores. The online stores we operate for our clients often match their branding and website design to provide a seamless experience for shoppers. When a shopper navigates from a client's website (operated by them) to their store (operated by us), the transition is seamless and the customer is unaware they are then being served by our technology platform. We manage the order process through payment processing, fraud screening and fulfillment (either digital or physical) and notify the buyer via e-mail once the transaction is completed. Transaction information is captured and stored in our database systems, an increasingly valuable source of information used to create highly targeted merchandising programs, e-mail marketing campaigns, product offers and test marketing programs.

For many of our clients, the solution we provide is critical to their businesses and therefore we operate global data centers that perform and scale for continuous e-commerce operation in a high-demand environment. We operate multiple data centers globally, which feature fully redundant high-speed connections to the Internet, server capacity to handle unpredictable spikes in traffic and transactions, 24/7 security and monitoring, back-up electric generators and dedicated power supplies.

Store Merchandising. Our technology platforms support a wide range of merchandising activities. This enables our clients to effectively execute promotions, up-sell, and cross-sell activities and to feature specific products and services during any phase of the shopping process. From the home page of our clients' online stores through the checkout and thank you pages, our solution allows clients to deliver targeted offers designed to increase order close ratios and average order sizes.

Order Management and Fraud Screening. We manage all phases of a shopper's order on our clients' online stores. We process payment transactions for orders placed through our technology platform and support a wide variety of payment types, including credit cards, wire transfers, purchase orders, money orders, direct debit cards and many other payment methods popular both in the United States and around the world. As part of the payment process, we ensure that the correct taxes are displayed, collected, remitted and reported.

The fraud screening component of our platform uses both rules-based and heuristic scoring methods which use observations of known fraudulent activities to make a determination regarding the validity of the order, buyer and payment information. As the order is entered, hundreds of data reviews can be processed in real time. We also provide denied-parties screening and export controls, which are designed to ensure that persons and/or organizations appearing on government denied-parties lists are blocked from making purchases through our system. Once a transaction is approved and the digital product has been delivered via download or the physical product(s) has been shipped, we submit the transaction for payment.

Table of Contents

Digital and Physical Fulfillment Services. We provide both digital and physical fulfillment services to our clients. We offer our clients a broad array of electronic delivery capabilities that enable delivery of digital products directly to customers' computers via the Internet. Delivery is completed when a copy of the purchased digital product is made from a master generally stored on our technology platform and then securely downloaded to the purchaser. Optionally, buyers can, for an additional fee, request that a CD be created and shipped as a backup for their order.

In addition to electronic fulfillment via download, we offer physical distribution services to our clients as well. We have contracted with third-party fulfillment agents that maintain inventories of physical products for shipment to buyers. These products are held by the fulfillment agent on consignment from our clients. We provide notification of product shipment to the buyer as well as shipment tracking, order status and inventory information. We also provide a service called Physical on Demand (POD), which utilizes robotic systems to create a client-branded product CD and packaging materials after a POD order has been placed. This eliminates the requirement for inventory to be stored in a warehouse as physical product is created only when needed. We provide extended download services for digital products for an additional fee, which enables buyers to download the products they have purchased more than once in the event of a computer failure or other unexpected problem. We believe physical fulfillment services are important to providing a complete e-commerce solution to our clients, particularly for non-digital products markets where digital fulfillment is not possible.

In connection with the sales of consumer electronic goods, we offer management services relating to regulatory matters such as the Waste Electronics and Electrical Equipment laws.

Customer Service. At our clients' option and for an additional fee, we provide telephone and e-mail customer support for products sold through our platforms. We provide assistance to buyers regarding ordering and delivery questions on a 24/7 basis in multiple languages. We continue to invest in technology and infrastructure to provide fast and efficient responses to customer inquiries as well as provide online self-help options.

Advanced Reporting and Analytics. We capture and store detailed information about visitor traffic for sales in the online stores we manage for our clients. This information is stored in our database systems where it is available for analysis and reporting. We provide clients access to a large collection of standard and customizable reports via our web analytics technology. This enables our clients to track and analyze sales, products, transactions, customer behavior and the results of marketing campaigns so they can optimize their marketing efforts to increase traffic, order close ratios and average order values. We also believe this information is valuable in establishing a metric for the lifetime value of the customer.

Strategic Marketing Services. We offer a range of strategic marketing services designed to increase customer acquisition, improve customer retention and enhance the lifetime value of each customer. Through a combination of web analytics, analytics-based statistical testing, optimization and proven direct marketing practices, our team of strategic marketing experts develops, delivers and manages programs such as paid search advertising, search engine optimization, affiliate marketing, store optimization and e-mail optimization on behalf of our clients. We generally charge an incremental percentage of the selling price of merchandise for sales driven by our strategic marketing services activities. We believe our ability to capture and analyze integrated traffic and e-commerce sales data enhances the value of our strategic marketing services as we can precisely determine the effectiveness of specific marketing activities, website changes, and other actions taken by our clients.

Payment Services. We offer full service payment provider solutions for online merchants around the world. We connect businesses to the local payment methods that their customers prefer and support businesses to expand into new markets through enabling the acceptance and processing of a diverse range of payment methods and options. We offer a broad range of back office payment reconciliation services that result in a highly cost efficient and secure program for e-payments. We sell and market these services through a direct sales channel located in offices in the United States and Europe. Our technology platform provides for high transaction throughput in a highly secure and data sensitive environment. These services are provided either via a direct interface between the clients' commerce system and our payment services platform or via a Payment Card Industry (PCI) compliant wrapped secure web based payment page that is served to the clients' commerce system on a transaction by transaction basis.

Table of Contents

Clients

We serve distinct groups of clients: (1) software, consumer electronics, and computer and video game product manufacturers; and (2) online channel partners including retailers and affiliates. We believe that the breadth of our catalog of products is a competitive advantage in selling e-commerce services to online channel partners as they can access a huge volume of products to sell without negotiating contract terms with every product provider. At the same time, we believe the breadth of our channel partner group is attractive to product manufacturers since it provides access to distribution through a single source.

Sales and Marketing

We sell products and services primarily to consumers through the Internet. We sell and market our services for clients through a direct sales force located in offices in the United States, Europe and Asia Pacific. These offices include staff dedicated to pre-sales, sales and sales support activities. Our client sales organization sells to executives within software, consumer electronics, computer and game manufacturers and online channel partners who are looking to create or expand their online businesses. During the sales process, our sales staff delivers demonstrations, presentations, collateral material, return-on-investment analyses, proposals and contracts.

We also design, implement and manage marketing and merchandising programs to help our clients drive traffic to their online stores and increase order close ratios, average order values and repeat purchases at those stores. Our strategic e-marketing team delivers a range of marketing and merchandising programs such as paid search advertising, search engine optimization, affiliate marketing, site and store optimization, e-mail marketing and optimization and site merchandising, which includes promotions, cross-sells and up-sells. This team integrates their marketing domain expertise with our suite of technology, including reporting, analytics, optimization and e-mail to drive increased sales for our clients.

We market our products and services directly to clients and prospective clients. We focus our efforts on generating awareness of our brand and capabilities, establishing our position as a global leader in global cloud-commerce outsourcing, generating leads in our target markets, and providing sales tools for our direct sales force. We conduct a variety of highly integrated marketing programs to achieve these objectives in an efficient and effective manner. We currently market our products and services to clients and prospects via direct marketing, print and electronic advertising, trade shows and events, public relations, media events and speaking engagements.

Technology

We deliver our global cloud-commerce solutions on several platforms, each of which has been architected to solve our clients multi-faceted commerce needs. The following is a brief description of the technology standards utilized by the family of Digital River cloud-commerce platforms:

Architecture. Our platforms are highly scalable and designed to handle tens of thousands of individual online stores and millions of products available for sale within those stores. These platforms consist of Digital River developed proprietary software applications running on multiple pods of Sun Microsystems and Dell servers, HP servers, and IBM servers that serve dynamic web pages using Oracle Enterprise, Microsoft Structured Query Language (SQL) server, .net Microsoft Internet Information Server (IIS), Apache web servers, Oracle application servers and Apache Tomcat application servers. Our platforms are designed to support growth by adding servers, CPUs, memory and bandwidth without substantial changes to the software applications. We believe this level of scalability is a competitive advantage. The application software is written in modular layers, enabling us to quickly respond to industry changes, payment processing changes, changes to international requirements for taxes and export screening, banking procedures, encryption technologies, and new and emerging web technologies.

The platforms include search capabilities that allow shoppers to search for items across millions of products and thousands of categories based on specific product characteristics or specifications while maintaining page response times acceptable to the user. We use database indexing combined with a dynamic

Table of Contents

cache system to provide flexibility and speed. The platforms have been designed to index, retrieve and manage all transaction data that flows through the system, including detailed commerce transactions and consumer interaction data. This enables us to create proprietary market profiles of each shopper and groups of shoppers that can then be used to create merchandising campaigns that are relevant to the end consumer and more successful. We also use our platforms internally for fraud detection and prevention, management of physical shipping, return authorizations, backorder processing, transaction auditing and reporting.

Commerce System Maintenance. Our platforms have a centralized maintenance management system that we use to build and manage our clients' e-commerce systems. Changes that affect all of our clients' online stores or groups of stores can be made centrally, dramatically reducing maintenance time and complexity. Most of our clients' sites include a central store and many have additional web pages where highly targeted traffic is routed. Clients also may choose to link specific locations on their commerce stores to detailed product or category information within their stores to more effectively address a shopper's specific areas of interest.

Security. We have security systems in place to control access to our internal systems and commerce data. Log-ins and passwords are required for all systems with additional levels of log-in, password and Internet Protocol security in place to control access on an individual basis. Access is only granted to commerce areas for which an individual is responsible. Multiple levels of firewalls prevent unauthorized access from the outside or access to confidential data from the inside. Our security system does not allow direct access to any client or customer data. We license certain encryption and authentication technology from third parties to provide secure transmission of confidential information such as credit card data. The security system is designed not to interfere with the consumer's experience on our clients' e-commerce sites.

Data Center Operations. Continuous data center operations are crucial to our success. We currently maintain major data center operations in the following locations: California and Minnesota, USA; and Germany, Ireland and Sweden. All major data center locations are currently processing transactions and serving downloads.

All data centers currently utilize multiple levels of redundant systems, including load balancers managing traffic volumes across web and application server farms, database servers, and enterprise disk storage arrays. For the majority of these systems, we have automatic failover procedures in place such that when a fault is detected, a process automatically takes that portion of the system offline and processing continues on the remaining redundant portions of the system, or in an alternate data center. In the event of an electrical power failure, we have redundant power generators and uninterruptible power supplies that protect our facilities. Fire suppression systems are present in each data center.

Our network software constantly monitors our clients' e-commerce sites and internal system functions, and notifies systems engineers if any unexpected conditions arise. We lease multiple lines from diverse Internet service providers and maintain a policy of adding additional capacity. Digital River continually monitors and measures the systems on which its offered services are deployed to validate that the load on these systems is consistent with other indicators of usage. In general, there are few deviations from the forecasted usage levels. Digital River targets at least 50% reserve capacity for all major components and subsystems, and if the 50% threshold is consistently exceeded over a specific time frame, additional capacity is added to the affected component or subsystem. We also utilize content distribution networks operated by our vendors to serve appropriate types of traffic; currently, the majority of our image traffic and a substantial portion of our download traffic is served via the Akamai networks.

Product Research and Development

Our primary product research and development strategy is to maintain our technology and feature set for our commerce platforms and related technologies. To this end, we continually have numerous development projects in process, including ongoing enhancement of our commerce platforms, improvements in our remote control capabilities, enhanced international support, advanced product distribution capabilities, sophisticated reporting functionality and new marketing technologies.

Table of Contents

We believe that the functionality and capabilities of our commerce platforms are a competitive advantage and that we must continue to invest in them to maintain our competitive position. The Internet and global-commerce, in particular, are subject to rapid technological change, changes in user and client requirements and expectations, new technologies and evolving industry standards. To remain successful, we must continually adapt to these and other changes. We rely on internally developed, acquired and licensed technologies to maintain the technological sufficiency of our e-commerce platforms.

Competition

The market for online commerce solutions is highly competitive. We compete with solutions that our customers develop internally or contract with third parties to develop on their behalf. We also compete with other outsourced commerce providers. The competition we encounter includes:

In-house development of commerce capabilities using tools or applications from companies, such as Art Technology Group, Inc. (a subsidiary of Oracle Corporation) and IBM Corporation;

Commerce capabilities custom-developed by companies, such as IBM Global Services and Accenture, Inc.;

Other providers of outsourced commerce solutions, such as GSI Commerce, Inc. (a subsidiary of eBay, Inc.), asknet, Inc. and Arvato (a subsidiary of Bertelsmann AG);

Companies that provide technologies, services or products that support a portion of the commerce process, such as payment processing, including CyberSource Corporation (a subsidiary of Visa, Inc.) and PayPal Corp. (a subsidiary of eBay, Inc.);

Companies that offer various online marketing services, technologies and products, including ValueClick, Inc. and aQuantive, Inc. (a subsidiary of Microsoft, Inc.);

High-traffic, branded websites that generate a substantial portion of their revenue from online commerce and may offer or provide to others the means to offer their products for sale, such as Amazon.com, Inc. and Buy.com, Inc.; and

Web hosting, web services and infrastructure companies that offer portions of our solution and are seeking to expand the range of their offering, such as Network Solutions, LLC, Akamai Technologies, Inc., Yahoo!, Inc., eBay, Inc. and Hostopia.com, Inc.

We believe that the principal competitive factors in our market are the breadth of consumer products and services offered, the number of clients and online channel partnerships, brand recognition, system reliability and scalability, price, customer service, ease of use, speed to market, convenience, and quality of delivery. Some of the companies described above are clients or potential clients, but they may also choose to compete with us by adopting a similar business model.

Intellectual Property

We believe the protection of our trademarks, copyrights, trade secrets and other intellectual property is critical to our success. We rely on patent, copyright and trademark enforcement, contractual restrictions, service mark and trade secret laws to protect our proprietary rights. We have entered into confidentiality and invention assignment agreements with our employees and contractors, and nondisclosure agreements with certain parties with whom we conduct business in order to limit access to and disclosure of our proprietary information. We also seek to protect our proprietary position by filing U.S. and foreign patent applications related to our proprietary technology, inventions and improvements that are important to our business. We currently have twenty-seven U.S. patents issued with three to sixteen years remaining prior to expiration. We

Edgar Filing: DIGITAL RIVER INC /DE - Form 10-K

also have over fifty-seven U.S. and foreign patent applications pending. We pursue the registration of our trademarks and service marks in the U.S. and internationally. We have a number of registered trademarks in the U.S., European Union and other countries.

Table of Contents

Government Regulation

We are subject to a number of foreign and domestic laws and regulations that affect companies conducting business on the Internet. In addition, laws and regulations relating to user privacy, information security and intellectual property rights are being debated and considered for adoption by many countries throughout the world. We face risks from some of the proposed legislation that could be passed in the future.

A range of laws and new interpretations of existing laws could have an impact on our business. For example, the Digital Millennium Copyright Act has provisions that limit, but do not necessarily eliminate, our liability for listing, linking or hosting third-party content that includes materials that infringe copyrights. The Child Online Protection Act and the Children’s Online Privacy Protection Act restrict the distribution of materials considered harmful to children and impose additional restrictions on the ability of online services to collect information from children under 13. In the area of data protection, many states have passed laws requiring notification to users when there is a security breach for personal data, such as California’s Information Practices Act. The costs of compliance with these laws may increase in the future as a result of changes in interpretation. Furthermore, any failure on our part to comply with these laws may subject us to significant liabilities.

We are also subject to federal, state and foreign laws regarding privacy and protection of user data. We post on our web site our privacy policies and practices concerning the use and disclosure of user data. Any failure by us to comply with our posted privacy policies or privacy-related laws and regulations could result in proceedings against us by governmental authorities or others, which could potentially harm our business. In addition, the interpretation of data protection laws, and their application to the Internet, in Europe and other foreign jurisdictions is unclear and in a state of flux. There is a risk that these laws may be interpreted and applied in conflicting ways from country to country and in a manner that is not consistent with our current data protection practices. Complying with these varying international requirements could cause us to incur additional costs. Further, any failure by us to protect our users’ privacy and data could result in a loss of user confidence in our services.

Employees

As of February 1, 2012, we employed 1,419 associates. We also employ independent contractors and other temporary employees. None of our employees are represented by a labor union, and we consider our employee relations to be good. Competition for qualified personnel in our industry is intense. We believe that our future success will continue to depend, in part, on our continued ability to attract, hire and retain qualified personnel.

Executive Officers

The following table sets forth information regarding our executive officers at February 1, 2012:

Name	Age	Position
Joel A. Ronning	55	Chief Executive Officer
Thomas M. Donnelly	47	President
Stefan B. Schulz	45	Chief Financial Officer
Kevin L. Crudden	56	VP/General Counsel

Mr. Ronning founded Digital River in February 1994 and has been our Chief Executive Officer and a director since that time. From February 1994 to July 1998, Mr. Ronning served as President of Digital River.

Mr. Donnelly joined Digital River in February 2005 as Vice President of Finance and Treasurer, was named Chief Financial Officer and Secretary in July 2005. In March 2011, Mr. Donnelly was appointed to the position of President of Digital River and continued as the company’s Chief Financial Officer until August 2011. From March 1997 to May 2004, he held various positions, including President, Chief Operating Officer and Chief Financial Officer with Net Perceptions, Inc., a developer of software systems used to improve the effectiveness of various customer interaction systems.

Table of Contents

Mr. Schulz joined Digital River in August 2011 as Chief Financial Officer. From October 2005 to July 2011, he held various positions, including Chief Financial Officer and Principal Financial Officer, Senior Vice President of Finance and Principal Accounting Officer, and Senior Vice President and Global Controller with Lawson Software, Inc. Mr. Schulz previously worked for BMC Software from 1993 until joining Lawson Software in 2005, serving as Vice President of Global Revenue Operations from May 2004 until October 2005 and Corporate Controller from 2001 until 2004.

Mr. Crudden joined Digital River in January 2006 as Vice President, General Counsel and Corporate Secretary. From 1987 until joining Digital River, Mr. Crudden was with the law firm of Robins, Kaplan, Miller & Ciresi L.L.P., Minneapolis, Minnesota, and served as a partner practicing in the areas of corporate finance, mergers and acquisitions, and corporate governance.

ITEM 1A. RISK FACTORS

The risks described below are not the only ones facing our company. Additional risks not presently known to us or that we currently deem immaterial also may impair our business operations. Our business, financial condition or results of operations could be materially adversely affected by any of these risks and the value of our common stock could decline due to any of these risks, and you could lose all or part of the money you paid to buy our common stock. The following discussion of our risk factors should be read in conjunction with the consolidated financial statements and related notes thereto, and management's discussion and analysis, contained in this report. These risks are current as of the date of this Form 10-K, and will be updated in subsequent Form 10-Qs to the extent required by law. Our business is also subject to general risks and uncertainties that affect many other companies. In addition, the current global economic climate amplifies many of these risks.

This annual report also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the risks faced by us described below and elsewhere in this report.

Risks Related to Our Business

We may experience significant fluctuations in our revenues, operating results, growth rate and stock price.

Our quarterly and annual revenues, operating results, and growth rate have fluctuated significantly in the past and are likely to do so in the future due to a variety of factors, some of which are outside our control. As a result, we believe that quarter-to-quarter and year-to-year comparisons of our revenue and operating results are not necessarily meaningful, and that these comparisons may not be accurate indicators of future performance. If our annual or quarterly operating results fail to meet the guidance we provide to securities analysts and investors or otherwise fail to meet their expectations, the trading price of our common stock may be impacted.

Factors that may affect our revenues, operating results, continued growth, and our stock price include the risks described elsewhere herein, as well as the following:

Client Development and Retention. We generate revenue by providing services to a wide variety of companies, primarily in the software and high-tech products markets. Therefore, it is important to our ongoing success that we maintain our key client relationships and, at the same time, both develop new client relationships and increase the number and type of products offered through our services. If we cannot develop and maintain satisfactory relationships with software and digital products publishers, manufacturers of consumer electronics and other goods, online retailers and online channel partners on acceptable commercial terms, or if clients elect to end their relationships with us and we are unable to generate sufficient additional revenue to compensate for the loss of those relationships, we will likely experience a decline in revenue and operating profit. New product verticals or market segments, and further penetration of existing product verticals and market segments, may require us to work with companies which have a limited operating history or greater risks than more established companies. This

Table of Contents

may result in the offering of products which are subject to higher chargeback rates or legal exposure and may generally expose us to greater legal and/or business risk. We may not be able to fully anticipate or mitigate all such risks. In the event claims are brought against us in connection with products offered by clients, especially clients with a limited operating history, weak sales, or who are or may become insolvent or bankrupt, we may not be successful in seeking indemnification for such claims from such clients and may be ultimately responsible for such claims.

We also depend on our clients to create and support products that consumers will purchase. We generally purchase products for resale from consignment or from distributors at the time of the resale to the consumer, and do not maintain an inventory of products available for sale. If we are unable to obtain sufficient quantities of products for any reason, or if the quality of service provided by these publishers and manufacturers falls below a satisfactory level, we could also experience a decline in revenue, operating profit and consumer satisfaction, and our reputation could be harmed.

Our contracts with our clients are generally one to two years in duration, with an automatic renewal provision for additional one-year periods, unless we are provided with a written notice before the end of the contract. Some of our contracts are for longer periods, but may provide for early termination upon certain notice. For example, we recently amended our contract with Microsoft to extend the term through October 2013, but the amendment did not modify the previously negotiated termination provisions. We have no material long-term or exclusive contracts or arrangements with any clients that guarantee the availability of products. Clients that currently supply products to us may not continue to do so, and we may be unable to establish new relationships with clients to supplement or replace existing relationships. Clients may elect to cease offering certain products through online commerce, or cease allowing us to resell certain of their products. A client who believes we have failed to deliver the contractually-required services and benefits could terminate their agreements and bring claims against us for substantial damages, these claims could exceed the level of any insurance coverage that may be available to us, and if successful could adversely affect our operating results and financial condition. If an existing significant customer elects to end their relationship with us or if our sales of a significant customer's products materially decreases, our revenue would decline and it may have a material adverse effect on our business, financial condition, results of operations, growth rate and stock price.

In addition, a limited number of our other software and physical goods clients contribute a large portion of our annual revenue. If any one of these key contracts is not renewed or otherwise terminates, or if revenues from these clients decline for any other reason (such as competitive developments), our revenue would decline and our ability to sustain profitability would be impaired. For example, please see the risk factor below regarding the termination of Microsoft's e-commerce agreement with us.

Dependence on Key Personnel and Employee Turnover. Our future success significantly depends on our ability to continue to identify, attract, hire, train, retain and motivate highly skilled personnel, including the continued services and performance of our senior management. Competition for these personnel is intense, particularly in the Internet industry. Our performance also depends on our ability to retain and motivate our key technical employees who are skilled in maintaining our proprietary technology platforms. The loss of the services of any of our executive officers or key employees could harm our business if we are unable to effectively replace that officer or employee, or if that person should decide to join a competitor or otherwise directly or indirectly compete with us. Employee turnover may increase in light of the risks, uncertainties, expenses, delays and difficulties associated with operating a business in a relatively rapidly changing industry and environment. Further, we may need to incur additional operating expenses and divert other management time in order to search for a replacement for members of senior management or personnel with specialized skills.

Organizational Changes. In order to remain competitive and to control our costs, we have implemented in the past, and may be required to implement in the future, organizational changes within our company, such as the consolidation of e-commerce platforms or offices, utilization of subcontractors or outsourcing relationships, reorganization of business units, and reductions in force. We may incur significant costs in

Table of Contents

order to implement organizational changes to achieve efficiencies in our cost structure in the long term. Failure to effectively manage our subcontractors and outsourcing relationships may harm our business. These organizational changes may impact our ability to execute our business plans and could affect our operating results.

Operating Expenses. Our operating expenses are based on our expectations of future revenue. These expenses are relatively fixed in the short-term. If our revenue for a quarter falls below our expectations and we are unable to quickly reduce spending in response, our operating results for that quarter would be harmed.

Infrastructure. The introduction by us of new websites, web stores or services, new features and functionality, and the continued upgrading, development and maintenance of our systems and infrastructure to meet emerging market needs, leverage technical innovations, and remain competitive in our service and product offerings, may require a substantial investment of our resources and result in significant capital expenditures and operating costs and expose us to additional risk and legal liability despite efforts to control such risks and liabilities.

Fluctuations in Demand. Our quarterly and annual operating results are subject to fluctuations in demand for the products or services offered by us or our clients, such as personal computer software and consumer electronics. In particular, sales of personal computer software represented a significant portion of our revenues in recent years, and continue to be very important to our business. The introduction of products and services competitive to those offered by our current clients may materially adversely affect our revenues. In addition, revenue generated by our software and digital commerce services is likely to fluctuate on a seasonal basis that is typical for the markets for our clients' products, including the software publishing, consumer electronics, and computer and video games markets. Softening or weakening of traditionally high-volume periods, such as the holiday season, can materially adversely affect our revenues and operating results.

Changes in the E-commerce Industry. The nature of our business and the e-commerce industry in which we operate has undergone, and continues to undergo, rapid development and change. For example, new protocols or technologies and new rules and regulations applicable to our business and the e-commerce industry can be introduced which could affect the ways in which e-commerce operates and products are sold online. It may be difficult for us to predict or adjust our business in light of such developments. Thus, our chances of financial and operational success should be evaluated in light of the risks, uncertainties, expenses, delays and difficulties associated with operating a business in a relatively rapidly changing industry and environment. If we are unable to address these issues, we may not be financially or operationally successful.

Other Factors. Additional industry risks that may affect our revenues, operating results, continued growth and our stock price include:

Competitive developments, including the introduction of new products and services and the announcement of new client and strategic relationships by our competitors;

Changes that affect our clients or the viability of their product lines, and client decisions to delay new product launches, invest in e-commerce initiatives, utilize the services of a competitor, or internalize their currently outsourced e-commerce operations;

The cost of compliance with U.S. and foreign laws, rules and regulations relating to our business, including the potential effect of new laws, rules and regulations, or interpretations of existing laws, rules and regulations, that affect our business operations or otherwise restrict or affect online commerce and/or the Internet as a whole, as well as our compliance with the rules and policies of entities whose services are critical for our continued operations, such as banks and credit card associations;

Edgar Filing: DIGITAL RIVER INC /DE - Form 10-K

Our announcement of significant acquisitions, strategic partnerships, joint ventures or capital commitments or results of operations or other developments related to those acquisitions, and our ability to successfully integrate and manage acquired businesses;

Table of Contents

Required changes in generally accepted accounting principles and disclosures;

Sales or other transactions involving our common stock or our convertible notes;

General macroeconomic conditions, including severe downturns or recessions in the United States and elsewhere, global unrest, terrorist activities and particularly those economic conditions affecting the e-commerce and retailer industries; and

Conditions or trends in the Internet and online commerce industries in the United States and around the world, including slower-than-anticipated growth of the online market as a vehicle for the purchase of software products, changes in consumer confidence in the safety and security of online commerce, and changes in the usage of the Internet and e-commerce.

The following risks may also have a material adverse impact on our business, financial condition, results of operations and stock price:

Our stock price is volatile.

The stock market as a whole and the trading prices of companies in the electronic commerce industry in particular, has been notably volatile. The operating results of companies in the electronic commerce industry have experienced significant quarter-to-quarter fluctuations. This broad market and industry volatility could significantly reduce the price of our common stock at any time, without regard to our own operating performance.

The market price for our common stock has varied between a high of \$39.85 and a low of \$13.53 in the year ended December 31, 2011. This volatility may affect the price at which you could sell your common stock. Our stock price is likely to continue to be volatile and subject to significant price and volume fluctuations in response to market and other factors; variations in our quarterly operating results from our expectations or those of securities analysts or investors; downward revisions in securities analysts' estimates; and announcement by us or our competitors of significant acquisitions, strategic partnerships, joint ventures or capital commitments.

In addition, the price of our common stock may be impacted by the short sales and actions of other parties who may disseminate misleading information about us in an effort to profit from fluctuations in the price of our common stock. Further, the price of our common stock may be impacted by the announcement of the financial results or other decisions by our larger clients whose products represent a significant portion of our sales. For example, the price of our common stock experienced a significant decline on October 12, 2009 in connection with the announcement by us that Symantec had informed us that it has elected not to renew its e-commerce agreement with us.

A material decline in the price of our common stock may result in the assertion of certain claims against us, and/or the commencement of inquiries and/or investigations against us. A prolonged decline in the price of our common stock could result in a reduction in the liquidity of our common stock and a reduction in our ability to raise capital, and the inability for you to obtain a favorable selling price for your shares. Any reduction in our ability to raise equity capital in the future may force us to reallocate funds from other planned uses and could have a significant negative effect on our business plans and operations.

The termination of our e-commerce agreement with Microsoft may materially adversely affect our business, financial condition or results of operations and stock price.

Sales of products for one client, Microsoft, accounted for approximately 27.7% of our revenue in 2011. In addition, a limited number of other software and physical goods clients contribute a large portion of our annual revenue. If any one of these key contracts is not renewed or otherwise terminates, or if revenues from these clients decline for any other reason (such as competitive developments), our revenue would decline and our ability to sustain profitability would be impaired. If our contract with Microsoft is not renewed, renegotiated or otherwise terminated, or if revenues from Microsoft decline for any other reason, our revenue and our ability to sustain profitability could be materially adversely impaired.

Table of Contents

Loss of our credit card acceptance privileges, or changes to payment networks, fees, rules or practices, would seriously hamper our ability to process the sale of merchandise and materially adversely affect our business.

The payment by consumers for the purchase of goods and services through our e-commerce systems is typically made by credit card or similar payment method. As a result, we must rely on banks and payment processors to process transactions, and must pay a fee for this service. From time to time, credit card associations may increase the per-transaction fees that they charge. In addition, reductions in the volume of transactions processed by us may result in increased per-transaction processing fees. Any such increased fees will increase our operating costs and reduce our profit margins. We also are required by our processors to comply with credit card association operating rules, and we have agreed to reimburse our processors for any fines they are assessed by credit card associations as a result of processing payments for us. The credit card associations and their member banks set and interpret the credit card rules. Visa, MasterCard, American Express, Discover and other card associations whose cards we accept could adopt new operating rules or re-interpret existing rules that we, or our processors, might find difficult to follow. Although we have been able to successfully switch to new payment processors in the past, such migrations require significant attention from our personnel, and may not achieve the anticipated cost savings or other desired results. Any disputes or problems associated with our payment processors could impair our ability to give customers the option of using credit or debit cards to fund their payments. If we were unable to accept credit or debit cards or other widely accepted forms of payment, our business would be seriously damaged. We also could be subject to fines or increased fees from Visa and MasterCard if we fail to detect that our clients are engaging in activities that are illegal or activities that are considered high risk, primarily the sale of certain types of digital content, or if the percentage of our sales transactions subject to chargeback increases as an absolute percentage of our overall transaction volume. We may be required to expend significant capital and other resources to monitor these activities.

Security breaches could hinder our ability to securely transmit confidential information and could materially affect our reputation, business operations, operating results and financial condition.

Our business depends in large part on the secure transmission of confidential information over public networks, including customers' credit card and other payment account information, and the secure storage of confidential information. We rely on encryption and authentication technology licensed from third parties to provide the security and authentication necessary for secure transmission of confidential information, such as customer credit and debit card numbers. While we take significant steps to protect the security of confidential information in our possession, we cannot guarantee our security measures will prevent security breaches, or that future advances in computer and software capabilities and encryption technology, new cryptography tools and discoveries, and other events will enable us to prevent the breach or compromise of our security even if implemented by us. Further, the technology utilized in credit and debit cards, and the systems used for the transmission of payment card transactions, are controlled by the payment card industry, and vulnerabilities in these systems and technology can place payment card data at risk.

Any breach or compromise of our security could have a material adverse effect on our reputation, business, operating results and financial condition, dissuade existing and new clients from using our services, dissuade customers from transacting business through our systems, and expose us to significant costs, fines, losses, litigation, governmental investigations and liabilities. A party who circumvents our security measures could misappropriate proprietary information or interrupt our operations. We may be required to expend significant capital and other resources to protect against security breaches or address problems caused by such breaches. Security breaches could expose us to lawsuits from affected persons and companies, and to governmental inquiries. Concerns over the security of the Internet and other online transactions and the privacy of users could deter people from using the Internet to conduct transactions that involve transmitting personally identifiable and other confidential information, inhibiting the growth of our business.

Table of Contents

We are exposed to foreign currency exchange risk.

Sales outside the United States accounted for approximately 46.2% of our total sales in 2011. A significant portion of our cash and marketable securities are held in non-U.S domiciled countries, primarily Ireland and Germany. The results of operations of, and certain of our intercompany balances associated with, our internationally focused websites are exposed to foreign exchange rate fluctuations. Upon translation, net sales and other operating results from our international operations may differ materially from expectations, and we may record significant gains or losses on the re-measurement of intercompany balances. If the U.S. dollar weakens against foreign currencies, the translation of these foreign-currency-denominated transactions will result in increased net revenues and operating expenses. Similarly, our net revenues and operating expenses will decrease if the U.S. dollar strengthens against foreign currencies. As we have expanded our international operations, our exposure to exchange rate fluctuations has become more pronounced. We may enter into short-term currency forward contracts to offset the foreign exchange gains and losses generated by the re-measurement of certain assets and liabilities recorded in non-functional currencies. The use of such hedging activities may not offset more than a portion of the adverse financial impact resulting from unfavorable movements in foreign exchange rates. See Item 7A of Part II, for information demonstrating the effect on our consolidated statements of operations from changes in exchange rates versus the U.S. dollar.

Failure to enhance and expand our technology, systems and business offerings to accommodate increased traffic and to remain competitive could reduce demand for our services and impair the growth of our business.

We periodically enhance and expand our technology and transaction-processing systems, network infrastructure and other technologies to accommodate increases and spikes in the volume of traffic on our technology platforms due to factors including launches of new products and new commerce websites on our technology platforms, and seasonal fluctuations in consumer demand. To remain competitive, we must continue to enhance and improve the responsiveness, functionality and features of our e-commerce platforms and the underlying network infrastructure, and develop and introduce new business offerings and programs. Any inability to enhance and expand our existing technology, transaction-processing systems or network infrastructure to manage such increased traffic and traffic spikes may cause unanticipated systems disruptions, slower response times and degradation in client services, including impaired quality and speed of order fulfillment. Failure to manage increased traffic and traffic spikes or an inability to maintain our competitiveness could harm our reputation and significantly reduce demand for our services, which would impair the growth of our business. If we incur significant costs without adequate results, or are unable to adapt rapidly to technological changes, we may fail to achieve our business plan. We may be unable to improve and increase the capacity of our network infrastructure sufficiently or to anticipate and react to expected increases in the use of the platform to handle increased volume, or to obtain needed related services from third party suppliers. Our network and our suppliers' networks may be unable to maintain an acceptable data transmission capability, especially if demands on our platform increase. We may fail to use new technologies effectively or fail to adapt our proprietary technology and systems to client requirements or emerging industry standards.

If we are unable to enter into, achieve desired results from, or maintain our marketing and promotional agreements with third party marketing or technology providers to generate sales traffic and sales for our clients, our ability to generate revenue and our business could be adversely affected.

We have entered into multiple marketing and promotional agreements and operate certain affiliate networks and programs which are designed to increase both traffic to the e-commerce stores we operate and the number of customers purchasing products through such stores, including agreements with search engine providers, display advertising networks, comparison shopping engines, affiliate networks, operators of websites and marketing technology providers. Our ability to attract new clients and retain existing clients is based in part on our ability to generate increased traffic or better conversion rates resulting in increased online sales of their products through these agreements and programs. If we are unable to enter into such agreements on favorable terms, are unable to achieve the desired results under these agreements and programs, are unable to maintain these relationships, or

Table of Contents

fail to generate sufficient traffic or generate sufficient revenue from purchases pursuant to these agreements and programs, our ability to generate sales and our ability to attract and retain our clients may be impacted, negatively affecting our business and operating results.

New obligations to collect or pay transaction taxes could substantially increase the cost to us of doing business.

Many of the laws and regulations regarding the application of sales tax, use tax, value added tax (VAT) or other similar transaction taxes predate the growth of the Internet and online commerce. The application of transaction taxes to interstate and international sales over the Internet is complex and evolving. We currently collect taxes on certain product and service offerings in tax jurisdictions where we have taxable presence. A successful assertion by one or more tax jurisdictions that we should collect or were obligated to collect transaction taxes on the products we sell could harm our results of operations. The imposition by state and local governments of various taxes upon Internet commerce and related e-commerce activities could create administrative burdens for us, put us at a competitive disadvantage if they do not impose similar obligations on all of our online competitors, and decrease our future sales.

Changes in our tax rates could affect our future results.

Our future effective tax rates could be favorably or unfavorably affected by changes in the mix of earnings in countries with differing statutory tax rates, changes in the valuation of our deferred tax assets and liabilities, or by changes in tax laws or their interpretation. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. There can be no assurance that the outcomes from these continuous examinations will not have an adverse effect on our results of operations and financial condition.

Failure to properly manage and sustain our expansion efforts could strain our management and other resources.

Through acquisitions and organic growth, we are rapidly and significantly expanding our operations, both domestically and internationally. We will continue to expand further to pursue growth of our service offerings and customer base. This expansion increases the complexity of our business and places a significant strain on our management, operations, technical performance, financial resources, and internal financial control and reporting functions, and there can be no assurance that we will be able to manage it effectively. Our personnel, systems, procedures and controls may not be adequate to effectively manage our future operations, especially as we employ personnel in multiple domestic and international locations. We may not be able to hire, train, retain and manage the personnel required to address our growth. Failure to effectively manage our growth opportunities could damage our reputation, limit our future growth, negatively affect our operating results and harm our business.

Our international expansion efforts may not be successful in generating additional revenue.

We sell products and services to consumers outside the United States and we intend to continue expanding our international presence. In 2011, our sales to international consumers represented approximately 46.2% of our total sales. Continued expansion into international markets, particularly the European and Asia-Pacific regions, requires significant resources that we may fail to recover through generating additional revenue. Conducting business internationally is subject to risks that may have a material adverse effect on our ability to increase or maintain foreign sales, including:

Changes in regulatory requirements and tariffs;

Difficulties in staffing and managing foreign subsidiary operations, and the increased costs of international operations;

Table of Contents

Uncertainty of application of, and the burden and cost of complying with, local, commercial, tax, privacy and other laws and regulations;

Reduced protection of intellectual property rights;

Difficulties in physical distribution and logistics for international sales;

Higher incidences of credit card fraud and difficulties in accounts receivable collection;

Difficulties in transferring funds from certain countries;

Difficulties in enforcing contracts against international clients, especially in emerging markets;

Lower rates of Internet usage in certain countries, especially in emerging markets;

Different employer/employee relationships, the existence of workers' councils, and the possibility of unionization of our workforce outside the United States, particularly in Europe;

Political, social and economic instability and constraints on international trade; and

Import and export license requirements and restrictions of the United States and every other country in which we operate. We may be unable to successfully and cost-effectively market, sell and distribute our services in foreign markets. Doing so may be more difficult or take longer than anticipated especially due to international challenges, such as language barriers, currency exchange issues and the fact that the Internet infrastructure in some foreign countries may be less advanced than the U.S. Internet infrastructure. As international e-commerce grows, our competition will continue to intensify. If we are unable to successfully expand our international operations, or manage this expansion, our operating results and financial condition could be harmed.

Implementing our acquisition and strategic partnership strategy could result in dilution and operating difficulties leading to a decline in revenue and operating profit.

A key element of our business strategy involves expansion through the acquisitions of businesses, assets, products or technologies that allow us to complement our existing product offerings, expand our market coverage, increase our engineering workforce or enhance our technological capabilities. In the last five years we acquired or invested in 11 companies. We continually evaluate and explore strategic opportunities as they arise, including business combination transactions, strategic partnerships, and the purchase or sale of assets, including tangible and intangible assets such as intellectual property. We have acquired, and intend to continue engaging in strategic acquisitions of businesses, technologies, services and products.

Acquisitions, strategic investments and strategic partnership agreements may require significant capital infusions, typically entail many risks, and could result in unforeseen difficulties, disruptions, distractions, and expenditures in assimilating and integrating with the operations, personnel, technologies, products and information systems of acquired companies or businesses. We have in the past and may in the future experience delays in the timing and successful completion of such activities. These challenges are magnified as the size of the acquisition increases. Furthermore, these challenges would be even greater if we acquired a business or entered into a business combination transaction with a company that was larger and more difficult to integrate than the companies we have historically acquired. Moreover, the anticipated benefits of any acquisition or strategic investment may not be realized. If a significant number of clients of the acquired businesses cease doing business with us, we would experience lost revenue and operating profit, and any synergies from the acquisition may be lost. In addition, key personnel of

Edgar Filing: DIGITAL RIVER INC /DE - Form 10-K

an acquired company may decide not to work for us. The acquisition of another company or its products and technologies may also require us to enter into a geographic or business market in which we have little or no prior experience. Future acquisitions could result in potentially dilutive issuances of equity securities, the incurrence of debt, contingent liabilities, amortization of intangible assets or impairment of goodwill. Acquisitions could also result in a dilutive impact to our earnings.

Table of Contents

Our clients' sales cycles and the implementation process for our commerce solution are time-consuming, which may cause us to incur substantial expenses and expend management time without generating corresponding consumer revenue, which would impair our cash flow.

We market our services directly to software publishers, online retailers, consumer electronics companies and other prospective customers. These relationships are typically complex and take time to finalize. Due to operating procedures in many organizations, a significant amount of time may pass between selection of our products and services by key decision-makers, the signing of a contract, and the launch of a revenue-generating commerce store. The period between the initial client sales call and the signing of a contract with significant sales potential is difficult to predict and typically ranges from six to twelve months, and completion of the implementation process typically ranges from one to four months. If at the end of a sales effort a prospective client does not purchase our products or services, we may have incurred substantial expenses and expended management time that cannot be recovered and that will not generate corresponding revenue. As a result, our cash flow and our ability to fund expenditures incurred during the sales cycle and implementation process may be impaired. We can incur substantial front-end costs to launch client sites and it may require a substantial time before those costs are recouped by us, if at all.

We may become liable for fraudulent, improper or illegal uses of our platforms and services.

In recent years revenues from our remote control platforms have grown as a percentage of our overall business, and we plan to continue to emphasize our self service e-commerce solutions. These platforms typically have an automated structure that allows customers to sign up for and use our e-commerce services without significant participation from Digital River personnel. Despite our efforts to contractually prohibit the sale of inappropriate and illegal goods and services and our efforts to detect the same, the remote control nature of these platforms increases the risk that transactions involving the sale of unlawful goods or services or the violation of the proprietary rights of others may occur before we become aware of them. Furthermore, unscrupulous individuals may offer for sale, or attempt to purchase, illegal products via such platforms under innocuous names, further frustrating our attempts to prevent inappropriate use of our services. Failure to detect inappropriate or illegal uses of our platforms by third parties could expose us to a number of risks, including fines, increased fees or termination of services by payment processors or credit card associations, risks of lawsuits, and civil and criminal penalties.

Compliance with and changes to applicable laws, rules, regulations, and certification requirements, may substantially increase our costs of doing business, limit our activities, or otherwise adversely affect our ability to offer our services.

We are subject to the same international, federal, state and local laws as other companies conducting business over the Internet. Because our services are accessible worldwide, and we facilitate sales of products to customers worldwide, international jurisdictions may claim that we are required to comply with their laws, rules and regulations. Laws regulating Internet companies outside of the United States may be less favorable than those in the United States, giving greater rights to consumers, content owners and users. Compliance with international, federal, state and local laws may be costly or may require us to change our business practices or restrict our service offerings relative to those provided in the United States. As our services are available over the Internet in multiple states and foreign countries, these jurisdictions may claim that we are required to qualify to do business as a foreign corporation in each state or foreign country. Failure to qualify as a foreign corporation in a required jurisdiction could subject us to taxes and penalties and could result in our inability to enforce contracts in these jurisdictions. Laws, rules and regulations applicable to our business include areas such as:

User privacy with respect to adults and minors;

Our ability to collect and/or share necessary information that allows us to conduct business on the Internet;

Export compliance;

Table of Contents

Pricing, taxation, and regulatory fees;

Fraud;

Advertising;

Intellectual property rights;

Information security;

Quality of products and services; and

Recycling of consumer products.

Our acceptance of credit cards and similar payment methods requires us to maintain certain certifications, most notably Payment Card Industry (PCI) Level 1 compliance. Maintaining this certification requires an annual audit by a qualified third party auditor and a review and assessment of our security controls and a significant commitment of internal resources. Our loss of such certification may result in our inability to process credit card transactions and have a material adverse affect on our ability to do business.

Violation of any laws, rules or regulations applicable to our business could result in fines or other actions by regulatory agencies, increased costs of doing business, reduced profits, or restrictions on our ability to conduct business such as our ability to export products or bans on our ability to offer certain services. In addition, any significant changes, developments, or new interpretations of laws, rules, and regulations applicable to our business will increase our costs of compliance and may further restrict our overseas client base, may require significant management and other resources to respond appropriately, and may harm our operating results.

Failure to protect our intellectual property may jeopardize our competitive position and require us to incur significant expenses to enforce our rights.

We rely on a combination of patent, copyright, trademark, service mark and trade secret laws, and contractual restrictions with our employees and other parties with which we do business, to protect our proprietary rights and to limit access to and disclosure of our proprietary information. We also seek to protect our proprietary position by filing U.S. patent applications related to our proprietary technology, inventions and improvements that are important to the development of our business, and the registration of our trademarks and service marks in the U.S. and internationally.

The steps we have taken to protect our proprietary rights may be inadequate and third parties may infringe or misappropriate our trade secrets, trademarks and similar proprietary rights. Our contractual arrangements and the other steps taken by us to protect our intellectual property may not prevent misappropriation of our technology or deter independent third-party development of similar technologies. We may not be able to successfully obtain patents or trademarks for our technologies or brands. Effective protection of our intellectual property rights may not be available in every country in which our services are made available online, or cost-effective for us to obtain on a worldwide basis. Any significant failure on our part to protect our intellectual property could make it easier for our competitors to offer similar services and thereby adversely affect our market opportunities. In addition, litigation may be necessary in the future to enforce our intellectual property rights, to protect our trade secrets or to determine the validity and scope of the proprietary rights of others. Litigation could result in substantial costs and diversion of management and technical resources.

Claims against us related to infringement of other parties' intellectual property rights, by our products and services or the products we resell or deliver, could require us to expend significant resources, enter into unfavorable licenses, pay damages, prevent us from using certain technology, or require us to change our business plans.

Edgar Filing: DIGITAL RIVER INC /DE - Form 10-K

From time to time we are notified of potential patent disputes, and expect that we will increasingly be subject to the assertion of patent infringement claims against us and/or our customers as our services expand in scope and complexity. We have been, and from time-to-time may be, named as a defendant in lawsuits claiming

Table of Contents

that we have, in some way, violated the intellectual property rights of others. For example, we are currently a party to patent litigation in the United States District Court for the Eastern District of Texas brought against us and various other defendants by DDR Holdings, LLC, seeking injunctive and monetary relief. More information on the DDR Holdings litigation and other pending intellectual property claims against us can be found in the Legal Proceedings section of this Form 10-K.

Litigation over patents and other intellectual property rights is not uncommon with respect to e-commerce technologies, and often involves patent holding companies or other adverse patent owners who have no relevant product revenues and against whom our own patents may therefore provide little or no deterrence.

Claims may be made against us for negligence, copyright or trademark infringement, products liability or other theories based on the nature and content of software products or tangible goods that we deliver electronically and physically. Because we did not create these products, we are generally not in a position to know the quality or nature of the content of these products.

Any assertions or prosecutions of intellectual property claims could require us to expend significant financial, managerial and personnel resources. Although we carry general liability insurance and typically require that our customers indemnify us against consumer claims, our insurance and indemnification measures may not cover potential claims of this type, may not adequately cover all costs incurred in defense of potential claims, or may not reimburse us for all liability that may be imposed. We may elect to self-insure against certain claims. The defense of any claims, with or without merit, could be time-consuming, result in costly litigation and diversion of technical and management personnel, cause product enhancement delays or require that we develop non-infringing technology or enter into royalty or licensing agreements. Royalty or licensing agreements, if required, may be unavailable on terms acceptable to us or at all. In the event of a successful claim of infringement against us and our failure or inability to develop non-infringing technology or license the infringed or similar technology on a timely basis, we may be unable to continue to pursue our current business plan. We expect that we will increasingly be subject to patent infringement claims as our services expand in scope and complexity, and our results of operations and financial condition could be materially adversely affected.

We are subject to regulations relating to consumer privacy.

We collect and maintain customer data from our customers, which subjects us to increasing international, federal and state regulations related to online privacy and the use of personal user information. Congress has enacted anti-spam legislation with which we must comply when providing email campaigns for our clients. Legislation and regulations are pending in various domestic and international governmental bodies that address online privacy protections. Several governments have proposed, and some have enacted, legislation that would limit the use and transfer of personal user information or require online service providers to establish privacy policies. In addition, the U.S. Federal Trade Commission (FTC) has urged Congress to adopt legislation regarding the collection and use of personal identifying information obtained from individuals when accessing websites, including both adults and minors.

Even in the absence of laws requiring companies to establish these procedures, the FTC has settled several proceedings resulting in consent decrees in which Internet companies have been required to establish programs regarding the manner in which personal information is collected from users and provided to third parties. We could become a party to a similar enforcement proceeding. These regulatory and enforcement efforts could limit our collection of and/or ability to share with our clients demographic and personal information from customers, which could adversely affect our ability to comprehensively serve our clients.

The European Union has adopted a privacy directive that regulates the collection and use of information that identifies an individual person, and in January 2012 released proposed revisions to its privacy framework. These regulations may inhibit or prohibit the collection and sharing of personal information in ways that could harm our clients or us. Failure to comply with member state implementations of these directives may result in fines, private lawsuits and enforcement actions. These enforcement actions can include interruption or shutdown of operations relating to the collection and sharing of information pertaining to citizens of the European Union. Other countries

Table of Contents

including the United States have introduced or may seek to expand their existing data privacy laws, rules and regulations, which could require us to expend significant resources to implement procedures and processes to ensure our compliance.

System failures, outages or errors could reduce the attractiveness of our service offerings.

We provide commerce, marketing and delivery services to our clients and consumers through our proprietary technology transaction processing and client management systems. These systems also maintain an electronic inventory of products and gather consumer marketing information. The satisfactory performance, reliability and availability of the technology and the underlying network infrastructure are critical to our operations, level of client service, reputation and ability to attract and retain clients. We have experienced periodic interruptions and have identified errors, affecting all or a portion of our systems, which we believe will continue to occur from time-to-time. While we attempt to correct every system error we identify, not all errors may be identified or corrected. Any systems damage, errors, or interruption that impairs our ability to accept and fill client orders could result in an immediate loss of revenue to us, and could cause some clients to purchase services offered by our competitors. In addition, frequent systems failures could harm our reputation.

Although we maintain system redundancies in multiple physical locations, our systems and operations are vulnerable to damage or interruption from:

Fire, flood, natural disasters, and other events beyond our control;

Operator negligence, improper operation by, or supervision of, employees, physical and electronic break-ins, misappropriation, computer viruses and similar events; and

Power loss, computer systems failures, denial-of-service attacks and Internet and telecommunications failure.
We may not carry sufficient business interruption insurance to fully compensate us for losses that may occur.

The listing of our network addresses on anti-spam lists could harm our ability to service our clients and deliver goods over the Internet.

Certain privacy and anti-email proponents have engaged in a practice of gathering, and publicly listing, network addresses that they believe have been involved in sending unwanted, unsolicited emails commonly known as spam. In response to user complaints about spam, Internet service providers have, from time to time, blocked such network addresses from sending emails to their users. If our network addresses mistakenly end up on these spam lists, our ability to provide services for our clients and consummate the sales of digital and physical goods over the Internet could be harmed.

If our internal control over financial reporting or disclosure controls and procedures are not effective, there may be errors in our financial statements that could require a restatement or our filings may not be timely and investors may lose confidence in our reported financial information, which could lead to a decline in our stock price.

Section 404 of the Sarbanes-Oxley Act of 2002 requires us to evaluate the effectiveness of our internal control over financial reporting as of the end of each year, and to include a management report assessing the effectiveness of our internal control over financial reporting in each Annual Report on Form 10-K. Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our internal control over financial reporting will prevent all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Controls can be circumvented by the individual

Table of Contents

acts of some persons, by collusion of two or more people, or by management override of the controls. Over time, controls may become inadequate because changes in conditions or deterioration in the degree of compliance with policies or procedures may occur. Implementation of new technology related to the control system, such as our current ongoing implementation of an SAP Enterprise Resource Planning, or ERP, system, may result in misstatements due to errors that are not detected and corrected during testing. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and may not be detected.

As a result, we cannot assure you that significant deficiencies or material weaknesses in our internal control over financial reporting will not be identified in the future. Any failure to maintain or implement required new or improved controls, or any difficulties we encounter in their implementation, could result in significant deficiencies or material weaknesses, cause us to fail to timely meet our periodic reporting obligations, or result in material misstatements in our financial statements. Any such failure could also adversely affect the results of periodic management evaluations and annual auditor reports regarding disclosure controls and the effectiveness of our internal control over financial reporting required under Section 404 of the Sarbanes-Oxley Act of 2002 and the rules proclaimed after that. The existence of a material weakness could result in errors in our financial statements that could result in a restatement of financial statements, cause us to fail to timely meet our reporting obligations and cause investors to lose confidence in our reported financial information, leading to a decline in our stock price.

Developments in accounting standards may cause us to increase our recorded expenses, which in turn would jeopardize our ability to demonstrate sustained profitability.

In January 2002, we adopted new Financial Accounting Standards Board (FASB) guidance that establishes that goodwill and intangible assets with indefinite lives are not amortized, but are to be tested on an annual basis (or more frequently if there are indications that an impairment may be necessary) for impairment and, if impaired, are recorded as an impairment charge in income from operations. As of December 31, 2011, we had goodwill with an indefinite life of \$281.9 million from our acquisitions. If our goodwill is determined for any reason to be impaired, the subsequent accounting of the impaired portion as an expense would lower our earnings and jeopardize our ability to demonstrate sustained profitability. In January 2008, we adopted new FASB guidance that requires the reporting of assets at fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of assets can shift significantly and can cause a permanent or temporary impairment.

Anti-takeover provisions in our charter documents and under Delaware law could make an acquisition of us, which may be beneficial to our stockholders, more difficult and may prevent attempts by our stockholders to replace or remove our current management.

We are incorporated in Delaware. Certain anti-takeover provisions under Delaware law and in our certificate of incorporation and amended and restated bylaws, as currently in effect, may make a change of control of our company more difficult, even if a change in control would be beneficial to our stockholders. Our anti-takeover provisions include provisions such as a prohibition on stockholder actions by written consent, a classified board of directors and the authority of our board of directors to issue preferred stock without stockholder approval. In addition, we are governed by the provisions of Section 203 of the Delaware General Corporation Law, which generally prohibits stockholders owning 15% or more of our outstanding voting stock from merging or combining with us in certain circumstances. These provisions may delay or prevent an acquisition of us, even if the acquisition may be considered beneficial by some of our stockholders. In addition, they may frustrate or prevent any attempts by our stockholders to replace or remove our current management by making it more difficult for stockholders to replace members of our board of directors, which is responsible for appointing the members of our management.

Table of Contents

Risks Related to Our Industry

Because the e-commerce industry is highly competitive and has low barriers to entry, we may be unable to compete effectively.

The market for e-commerce solutions is extremely competitive and we may find ourselves unable to compete effectively. Because there are relatively low barriers to entry in the e-commerce market, we expect continued intense competition as current competitors expand their product offerings and new competitors enter the market. In addition, our clients and partners may become competitors in the future. Increased competition is likely to result in price reductions, reduced margins, longer sales cycles and a decrease or loss of our market share, any of which could negatively impact our revenue and earnings. We face competition from the following sources:

In-house development of e-commerce capabilities using tools or applications from companies, such as Oracle Corporation (which recently acquired Art Technology Group, Inc.) and IBM Corporation or through internally developed solutions (e.g. as announced in October 2009, Symantec had elected not to renew its e-commerce agreement with us and migrated its online store traffic to an internally developed e-commerce system, which resulted in the termination of our e-commerce agreement with Symantec on June 30, 2010);

E-Commerce capabilities custom-developed by companies, such as IBM Global Services and Accenture, Inc.;

New e-commerce models through which consumers can purchase software products for their computers and computing devices, such as app stores;

Other providers of outsourced e-commerce solutions, such as GSI Commerce, Inc., asknet Inc. and Arvato, a division of Bertelsmann AG;

Companies that provide technologies, services or products that support a portion of the e-commerce process, such as payment processing, including CyberSource Corporation and PayPal Corp.;

Companies that offer various online marketing services, technologies and products, including ValueClick, Inc. and aQuantive, Inc.;

High-traffic, branded websites that generate a substantial portion of their revenue from e-commerce and may offer or provide to others the means to offer their products for sale, such as Amazon.com, Inc. and Buy.com, Inc.; and

Web hosting, web services and infrastructure companies that offer portions of our solution and are seeking to expand the range of their offering, such as Network Solutions, LLC, Akamai Technologies, Inc., Yahoo!, Inc., eBay, Inc. and Hostopia.com, Inc.

The online channel partners and the other companies described above may compete directly with us by adopting a business model similar to ours. Many of our competitors have, and new potential competitors may have, more experience developing Internet-based software and e-commerce solutions, larger technical staffs, larger customer bases, more established distribution channels and customer relationships, greater brand recognition and greater financial, marketing and other resources than we have. Some of our clients may also compete with us. In addition, competitors or our clients may be able to develop services that are superior to our services, achieve greater customer acceptance or have significantly improved functionality as compared to our existing and future products and services, which could result in the loss of existing clients and/or our inability to pursue and sign new clients. Our competitors may be able to respond more quickly to technological developments and changes in customers' needs. Our inability to compete successfully against current and future competitors could cause our revenue and earnings to decline.

Table of Contents

The global recession, and political and economic conditions, may adversely affect our revenue and results of operations and stock price.

The U.S. and other global economies continue to experience slow recovery from the recent recession that affected the economy as a whole, resulting in continued issues with the pace of economic growth, loss of consumer confidence and uncertainty about economic stability, and increased unemployment. U.S. and foreign credit and financial markets continue to experience instability, resulting in increased volatility in the stock market and reduced availability of credit. Our revenue and growth is dependent on the continued growth in demand for our clients products and the continued growth of Internet commerce, and depends significantly on geopolitical economic and business conditions. The continuing effects of this recession and the instability in the credit and financial markets may continue to negatively impact our business and our clients, demand for our clients products, and consumer spending, such as causing delays in new product introductions, changes in client s outsourcing behavior, increasing our difficulty in collecting client receivables, and increasing the risk of client bankruptcies and/or interruption or cessation of business, which may have a negative impact on our business, operating results and financial condition. Continuing geopolitical instability in certain countries and regions may affect consumer spending behavior in those countries and regions. Instability in the credit and equity markets increases the risk that the actual amounts realized in the future on our financial instruments and investments may significantly differ from the fair values currently assigned to them. If macroeconomic and market conditions affecting us or our clients remain uncertain, weaken further, or otherwise fail to improve, they may have a material adverse effect on our business, operating results, financial condition and stock price.

Risks Related to the Securities Markets

We may need to raise additional capital to achieve our business objectives, which could result in dilution to existing investors or increase our debt obligations.

We require substantial working capital to fund our business. In February 2009, we filed a shelf registration that would allow us to sell an undetermined amount of equity or debt securities in accordance with the rules applying to well-known seasoned issuers. In addition, we filed an acquisition shelf registration statement for up to approximately 1.5 million shares. On November 1, 2010, we sold and issued \$345.0 million in aggregate principal amount of senior convertible notes (2010 Notes), in a private, unregistered offering. If additional funds are raised through the issuance of equity securities, the percentage ownership of our stockholders will be reduced and these equity securities may have rights, preferences or privileges senior to those of our common stock. Our capital requirements depend on several factors, including the rate of market acceptance of our products, the ability to expand our client base, the growth of sales and marketing and opportunities for acquisitions of other businesses. We have experienced significant operating losses and negative cash flow from operations during our operating history and may do so in the future. Additional financing may not be available when needed, on terms favorable to us or at all. If adequate funds are not available or are not available on acceptable terms, we may be unable to develop or enhance our services, take advantage of future opportunities or respond to competitive pressures, which would harm our operating results and adversely affect our ability to sustain profitability.

The investment of our substantial cash balance and our investments in marketable debt securities are subject to risks which may cause losses and affect the liquidity of these investments.

As of December 31, 2011, we held \$71.5 million of auction rate securities (ARS) at par value which we have recorded at \$65.3 million fair value. The ARS are student loans over-collateralized and guaranteed by the U.S. government and most are AAA/Aaa rated. Almost all of these securities continue to fail at auction due to continued illiquid market conditions.

Due to the illiquid market conditions, we have recorded a temporary fair value reduction of our ARS in the amount of \$6.2 million (8.6% of par value) in our balance sheets ended December 31, 2011, under Accumulated other comprehensive income (loss) .

Table of Contents

The investment principal associated with failed auctions will not be accessible until successful auctions occur, a buyer is found outside of the auction process, the issuers establish a different form of financing to replace these securities, or final payments come due according to the contractual maturities of the debt issues. If none of these events occur or if the credit markets deteriorate, we may in the future be required to take a larger fair value discount and may be required to take a permanent impairment resulting in a reduction of earnings and liquidity. We intend to hold our auction rate securities until we can recover the full principal amount and have the ability to do so based on our other sources of liquidity. Based on our expected operating cash flows, and our other sources of cash, we do not anticipate the potential lack of liquidity on these investments will affect our ability to execute our current business plan.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The following table summarizes the various facilities that we lease for our business operations:

Description of Use	Primary Locations	Square Footage(1)	Lease Expirations
Corporate Office Facilities	Minnesota	143,723	2021
Other U.S. Office Facilities	California, Illinois,		
	Nebraska, North Dakota, Oregon, Pennsylvania,	101,948	From 2012 to 2016
Non-U.S. Office Facilities	Texas, Utah, Washington Austria, Brazil, China,		
	Germany, Ireland, Japan, Korea,	80,458	From 2012 to 2024
	Luxembourg, Sweden,		
Off Site U.S. Data Centers	Taiwan, United Kingdom California, Minnesota	35,299	From 2012 to 2013
Off Site non U.S. Data Centers	Germany, Ireland, Sweden	1,250	2012

(1) Includes sub-leased space.

ITEM 3. LEGAL PROCEEDINGS

We have provided information about legal proceedings in which we are involved in Item 8, Part II, Note 8 to the Consolidated Financial Statements.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Price Range of Common Stock**

Our common stock is traded on the Nasdaq Global Select Market under the symbol DRIV. The following table sets forth, for the periods indicated, the high and low sale price per share of our common stock on that market. These over-the-counter market quotations reflect inter-dealer prices, without retail mark-up, markdown or commission, and may not necessarily represent actual transactions.

	High	Low
2011		
First Quarter	\$ 39.85	\$ 29.77
Second Quarter	\$ 38.83	\$ 29.59
Third Quarter	\$ 34.16	\$ 17.56
Fourth Quarter	\$ 23.06	\$ 13.53
2010		
First Quarter	\$ 31.84	\$ 23.59
Second Quarter	\$ 32.36	\$ 23.79
Third Quarter	\$ 34.31	\$ 23.22
Fourth Quarter	\$ 39.10	\$ 33.50

Holdings

As of February 1, 2012, there were approximately 281 holders of record of our common stock. On February 1, 2012, the last sale price reported on The Nasdaq Global Select Market for our common stock was 16.37.

Dividend Policy

We have never declared or paid any cash dividends on our capital stock. We intend to retain any future earnings to support operations and to finance the growth and development of our business and do not anticipate paying cash dividends for the foreseeable future.

Issuer Purchases of Equity Securities

Set forth below is information regarding the Company's stock repurchases during the three months ended December 31, 2011.

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plan	Approximate dollar value of shares that may yet be purchased under the plan (in millions)
October 1, 2011 – October 31, 2011	0	\$ 0	0	\$ 50.0
November 1, 2011 – November 30, 2011	586,321	\$ 17.06	586,321	\$ 40.0
December 1, 2011 – December 31, 2011	1,344,805	\$ 14.69	1,344,805	\$ 20.2
Total	1,931,126		1,931,126	

Securities Authorized for Issuance under Equity Compensation Plans

Edgar Filing: DIGITAL RIVER INC /DE - Form 10-K

The information required in the table of Securities Authorized for Issuance under Equity Compensation Plans will be incorporated by reference to our Proxy Statement in connection with our 2012 Annual Meeting to be filed in accordance with Regulation 14A under the Securities Exchange Act of 1934, as amended.

Table of Contents

Securities Performance Measurement Comparison¹

The SEC requires a comparison on an indexed basis of cumulative total stockholder return for the Company, a relevant broad equity market index and a published industry line-of-business index. The following graph shows a total stockholder return of an investment of \$100 in cash on December 31, 2006 for (i) the Company's Common Stock; (ii) the CRSP Total Return Index for the Nasdaq Stock Market (U.S. companies) (the Nasdaq Composite Index); and (iii) the RDG Technology Composite Index. The RDG Technology Composite Index is composed of approximately 500 technology companies in the semiconductor, electronics, medical and related technology industries. Historic stock price performance is not necessarily indicative of future stock price performance. All values assume reinvestment of the full amount of all dividends.

This Section is not soliciting material, is not deemed filed with the SEC and is not to be incorporated by reference in any filing of the Company under the Securities Act or the Exchange Act whether made before or after the date hereof and irrespective of any general incorporation language in any such filing.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA**

The information set forth below is not necessarily indicative of results of future operations, and should be read in conjunction with Item 7 of Part II, Management's Discussion and Analysis of Financial Condition and Results of Operations and the consolidated financial statements and related notes thereto included in Item 8 of Part II, Financial Statements and Supplementary Data of this Form 10-K to fully understand factors that may affect the comparability of the information presented below.

The financial information that has been previously filed or otherwise reported for these periods is superseded by the information in this Annual Report on Form 10-K, and the financial statements and related financial information contained in previously-filed reports should no longer be relied upon.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The discussion in this Annual Report contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those discussed below. Additional factors that could cause or contribute to such differences include, but are not limited to, those identified below, and those discussed in the section entitled Risk Factors, included in Item 1A of Part I. When used in this document, the words believes, expects, anticipates, intends, plans, and similar expressions, are intended to identify certain of these forward-looking statements. However, these words are not the exclusive means of identifying such statements. In addition, any statements that refer to expectations, projections or other characterizations of future events or circumstances are forward-looking statements. The cautionary statements made in this document should be read as being applicable to all related forward-looking statements wherever they appear in this document. We have no obligation to update the matters set forth herein, whether as a result of new information, future events or otherwise.

Overview

We provide end-to-end global cloud-commerce and marketing solutions to a wide variety of companies in software, consumer electronics, computer games, video games and other markets. We offer our clients a broad range of services that enable them to quickly and cost effectively establish an online sales channel capability and to subsequently manage and grow online sales on a global basis while mitigating risks. Our services include design, development and hosting of online stores and shopping carts, store merchandising and optimization, order management, denied parties screening, export controls and management, tax compliance and management, fraud management, digital product delivery via download, physical product fulfillment, subscription management, online marketing including e-mail marketing, management of affiliate programs, paid search programs, payment processing services, website optimization, web analytics and reporting, and CD production and delivery.

Our products and services allow our clients to focus on promoting and marketing their products and brands while leveraging our investments in technology and infrastructure to facilitate the purchase of products through their online websites. When shoppers visit one of our clients' branded websites they are transferred to an e-commerce store and/or shopping cart operated by us on our e-commerce platforms. Once on our system, shoppers can browse for products and make purchases online. We typically are the seller of record for transactions through our client branded stores. After a purchase is made, we either deliver the product digitally via download over the Internet or transmit instructions to a third party for physical fulfillment of the order. We also typically process the buyer's payment as the merchant of record, including collection and remittance of applicable taxes and compliance with various regulatory matters. We have invested substantial resources to develop our e-commerce and marketing platforms, including business-to-business software, and we provide access and use of our platforms to our clients as a service as opposed to selling the software to be operated on their own in-house computer hardware. Our global-commerce store solutions range from simple remote control models to more comprehensive online store models.

In addition to the services we provide that facilitate the completion of an online transaction, we also offer services designed to increase traffic to our clients' websites and the associated online stores and to improve the sales productivity of those stores. Our services include paid search advertising, search engine optimization, affiliate marketing, store optimization, multi-variant testing, web analytic services and e-mail optimization. All of our services are designed to help our clients acquire customers more effectively, sell to those customers more often and more efficiently, and increase the lifetime value of each customer.

On September 1, 2010, we announced an amendment of our agreement with Microsoft Corporation (Microsoft) to extend the term of the Microsoft Operations Digital Distribution Agreement through October 31, 2013. On August 30, 2010, we entered into the Microsoft Store USA statement of work with Microsoft whereby we will build, host and manage Microsoft® Store, an online store that supports the sale and

Table of Contents

fulfillment of Microsoft and third party software as well as consumer electronics products to customers in the United States. On March 2, 2011, Digital River began providing cloud-commerce hosting and payment processing services in connection with Microsoft Store. In addition to Microsoft Store, Digital River maintains its role as a reseller of Microsoft products via Digital River's existing online stores. Currently, we are providing global-commerce services, ranging from transaction and payment processing, to e-marketing, digital downloads and fraud prevention in support of some of the popular Microsoft software titles, including Microsoft® Office. The global arrangement incorporates digital fulfillment across multiple geographies, including North America, Asia, Europe, Latin America and Australia.

We view our operations and manage our business as one reportable segment, providing outsourced global-commerce solutions globally to a variety of companies, primarily in the software and consumer electronics product markets.

We were incorporated in Delaware in February 1994. Our headquarters are located at 10380 Bren Road West, Minnetonka, Minnesota and our telephone number is 952-253-1234.

General information about us can be found at www.digitalriver.com under the Company/Investor Relations link or follow the Company on Twitter at twitter.com/digitalriverinc. Our annual report on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, as well as any amendments or exhibits to those reports, are available free of charge through our website as soon as reasonably practicable after we file such reports with the Securities and Exchange Commission.

Results of Operations

The following table sets forth certain items from our consolidated statements of operations as a percentage of total revenue for the years indicated.

	2011	2010	2009
Revenue	100.0%	100.0%	100.0%
Costs and expenses (exclusive of depreciation and amortization expense shown separately below):			
Direct cost of services	3.9	4.9	4.4
Network and infrastructure	12.4	12.9	11.4
Sales and marketing	40.9	41.3	39.0
Product research and development	16.8	16.8	13.5
General and administrative	10.8	11.9	9.3
Depreciation and amortization	5.6	6.4	4.8
Amortization of acquisition-related intangibles	4.5	2.2	1.9
Total costs and expenses	94.9	96.4	84.3
Income (loss) from operations	5.1	3.6	15.7
Interest income	1.5	0.8	0.8
Interest expense	(2.2)	(0.5)	(1.3)
Other income (expense), net	(0.5)	(0.3)	0.1
Income (loss) before income taxes	3.9	3.6	15.3
Income tax expense (benefit)	(0.4)	(0.7)	3.0
Net income (loss)	4.3%	4.3%	12.3%

Revenue. Our revenue was \$398.1 million in 2011 compared to \$363.2 million and \$403.8 million in 2010 and 2009, respectively.

Table of Contents

Our commerce revenues are driven primarily by global commerce and payment services provided to a wide variety of companies in the software, consumer electronics, computer games and other markets. Commerce revenues include revenues generated from Microsoft and Symantec. Revenue from Symantec relates to the first half of 2010 only, since their e-commerce agreement terminated on June 30, 2010. All other non-commerce revenues are driven primarily by our e-mail and affiliate marketing businesses.

For the year ended December 31, 2011, the \$34.9 million increase in revenue was driven primarily by an increase in commerce revenue of \$26.8 million and foreign exchange favorability of \$5.3 million compared to the prior year. For the year ended December 31, 2010, the \$40.5 million decrease in revenue was driven primarily by the decline in Symantec revenue of \$89.6 million. Excluding Symantec, revenue increased by 17.0% for 2010, and was driven primarily by an increase in commerce revenue of \$47.5 million and foreign exchange unfavorability of \$0.2 million compared to the prior year.

International sales are approximately 46.2%, 46.4% and 41.1% of revenue in 2011, 2010 and 2009, respectively.

Microsoft Corporation accounted for approximately 27.7%, 24.7% and 11.8% of our revenue in 2011, 2010 and 2009, respectively.

Symantec Corporation accounted for approximately 6.9% and 28.4% of our total revenue in 2010 and 2009, respectively. We had minimal Symantec related revenue in 2011.

Direct Cost of Services. Direct cost of services expense primarily includes costs related to product fulfillment, back-up CD production, delivery solutions and certain client-specific costs. Direct cost of service expenses were \$15.5 million, \$17.8 million and \$17.6 million in 2011, 2010 and 2009, respectively. The decrease in 2011 compared with 2010 was primarily driven by lower CD supply costs and workforce related costs. The increase in 2010 compared with 2009 was primarily driven by revenue growth partially offset by lower CD supply costs.

As a percentage of revenue, direct cost of services was 3.9%, 4.9% and 4.4% in 2011, 2010 and 2009, respectively.

Network and Infrastructure. Our network and infrastructure expenses primarily include costs to operate and maintain our technology platforms, customer service, data communication and data center operations. Network and infrastructure expenses were \$49.4 million in 2011, compared to \$46.9 million and \$46.0 million in 2010 and 2009, respectively. The increase in 2011 from 2010 was mainly due to increased investment in workforce related costs to drive future efficiencies in our technologies and increased hardware expense, partially offset by reductions in data communication costs and outside services. The increase in 2010 from 2009 was due to an increase in data communication expenses related to an acquisition in the second half of 2010.

As a percentage of revenue, network and infrastructure expenses were 12.4%, 12.9% and 11.4% in 2011, 2010 and 2009, respectively.

Sales and Marketing. Our sales and marketing expenses include credit card transaction and other payment processing fees, personnel and related costs, advertising, promotional and product marketing expenses, credit card chargebacks and bad debt expense. Sales and marketing expenses were \$162.6 million, \$150.0 million and \$157.5 million in 2011, 2010 and 2009, respectively. The increase in sales and marketing in 2011 compared to 2010 was primarily driven by higher workforce costs to support our global sales initiatives and increased payment processing costs, related to higher revenue. These increases were partially offset by lower chargeback and bad debt expenses. The decrease in sales and marketing in 2010 compared to 2009 was attributable to lower payment processing costs and paid search fees.

As a percentage of revenue, sales and marketing expenses were 40.9%, 41.3% and 39.0% in 2011, 2010 and 2009, respectively.

Product Research and Development. Our product research and development expenses include costs associated with design, development and enhancement of our technology platforms and related systems and

Table of Contents

sustaining engineering of these platforms and related systems. Research and development costs are expensed as incurred, except certain internal-use software development costs eligible for capitalization and costs directly associated with preparing a client website launch. These costs are eligible to be deferred and amortized over the life of the site's associated revenue streams. Product research and development expenses were \$66.9 million in 2011, compared to \$60.8 million and \$54.5 million in 2010 and 2009, respectively. The increases were primarily due to higher workforce costs, which drive enhanced technologies and strengthen our leadership position in the markets we serve. These investments advance our global system scalability, e-marketing capabilities, data management and client reporting.

As a percentage of revenue, product research and development expenses were 16.8%, 16.8% and 13.5% in 2011, 2010 and 2009, respectively.

General and Administrative. Our general and administrative expenses primarily include executive, finance, human resources and other administrative workforce and related expenses, fees for professional services, bank fees, insurance costs and non-income related taxes. General and administrative expenses were \$43.1 million in 2011 compared to \$43.4 million and \$37.7 million in 2010 and 2009, respectively. The decrease in 2011 compared to 2010 was mainly due to a decrease in regulatory fees partially offset by an increase in workforce related costs. The increase in 2010 compared to 2009 was primarily due to increased workforce related costs.

As a percentage of revenue, general and administrative expenses were 10.8%, 11.9% and 9.3% in 2011, 2010 and 2009, respectively.

Depreciation and Amortization. Our depreciation and amortization expenses include the depreciation of computer equipment, office furniture, the amortization of purchased and internally developed software and leasehold improvements. Computer equipment, software and furniture are depreciated under the straight-line method using three to seven year lives and leasehold improvements are amortized over the shorter of the asset life or the remaining length of the lease. Depreciation and amortization expense was \$22.2 million in 2011 compared to \$23.4 million and \$19.4 million in 2010 and 2009, respectively. The decreased expenses in 2011 compared to 2010 were driven primarily by the timing and mix of capital spend year-over-year. The increased expenses in 2010 compared to 2009 resulted primarily due to the higher levels of computer equipment and capitalized software as a result of technology development and enhancements, including full-year amortization of our new enterprise resource planning system.

As a percentage of revenue, depreciation and amortization was 5.6%, 6.4% and 4.8% in 2011, 2010 and 2009, respectively.

Amortization of Acquisition-Related Intangibles. In 2011, our amortization of acquisition-related intangibles consists of the amortization of intangible assets recorded from our nine acquisitions in the past seven years. Amortization of acquisition related intangibles was \$18.0 million in 2011 compared to \$7.8 million and \$7.6 million in 2010 and 2009, respectively. The increase in 2011 compared to 2010 was primarily driven by a \$9.4 million impairment recorded related to the reduction in the book carrying values of certain customer relationship, trade name, technology, and non-compete agreements established in the purchase accounting of our Journey Education Marketing, Inc., fatfoogoo, AG and THINK Subscription, Inc. acquisitions. The increase in 2010 compared to 2009 reflects our acquisitions of Journey Education Marketing, Inc. and fatfoogoo, AG; offset by the full amortization of several intangible assets from past acquisitions. We review goodwill for impairment on an annual basis or more frequently if events occur or circumstances change that would more likely than not reduce the fair value of the reporting unit below its carrying amount. Our assessment has indicated that there is no impairment of goodwill for the years ended December 31, 2011, 2010 and 2009. We have purchased, and expect to continue purchasing, assets or businesses, which may include the purchase of intangible assets.

As a percentage of revenue, amortization of acquisition-related intangibles was 4.5%, 2.2% and 1.9% in 2011, 2010 and 2009, respectively.

Income from Operations. Our income from operations in 2011 was \$20.5 million, compared to \$13.0 million and \$63.5 million in 2010 and 2009, respectively. Income from operations increased during 2011 from 2010 due to higher overall revenues in the software, consumer electronics, computer games and other markets.

Table of Contents

Higher revenues were partially offset by a \$9.4 million impairment of acquisition-related intangibles. Income from operations decreased during 2010 from 2009 due to lower overall revenues related to the loss of Symantec, partially offset by revenue growth across other software, online game and consumer electronic clients in the second half of 2010.

As a percentage of revenue, income from operations was 5.1%, 3.6% and 15.7% in 2011, 2010 and 2009, respectively.

Interest Income. Our interest income represents the total of interest income on our cash, cash equivalents, short-term investments and certain long-term investments. Interest income was \$6.1 million, \$3.0 million and \$3.2 million in 2011, 2010 and 2009, respectively. The increase in interest income in 2011 compared to 2010 was primarily due to the increased cash available for investment from our 2010 debt offering. The decrease in interest income in 2010 compared to 2009 was due to lower market yields on our portfolio.

Interest Expense. Our interest expense includes the total of cash and non-cash interest expense attributable to our outstanding convertible debt. Interest expense was \$9.0 million in 2011, which included \$2.0 million of debt financing cost amortization. Interest expense was \$1.7 million in 2010, which included \$0.3 million of debt financing cost amortization, and \$5.3 million in 2009. The increase in 2011 compared to 2010 was due to the issuance of \$345.0 million of convertible notes in the fourth quarter of 2010, which bear an annual interest rate of 2.0%. In 2009 we wrote-off \$5.2 million of debt amortization costs associated with the January 2009 cash settlement of our 2004 Senior Convertible Notes.

Other Income (Expense), Net. Our other income (expense), net includes foreign currency transaction gains and losses, asset disposal gains and losses, other-than-temporary impairment of investments and dividend income. Other income (expense) was expense of \$1.9 million in 2011, compared to expense of \$1.1 million and income of \$0.4 million in 2010 and 2009, respectively. The decrease in other income in 2011 compared to 2010 was attributable to foreign currency re-measurement losses, partially offset by increased dividend income. The decrease in other income in 2010 compared to 2009 was attributable to the \$2.2 million other-than-temporary impairment of an equity investment offset by dividend income and foreign currency re-measurement gains.

Income Tax Expense. In 2011, our tax benefit was \$1.6 million, consisting of approximately \$1.3 million of current tax benefit and \$0.3 million of deferred tax benefit. In 2010, our tax benefit was \$2.5 million, consisting of approximately \$4.6 million of current tax expense offset by approximately \$7.1 million of deferred tax benefit. In 2009, our tax expense was \$12.0 million, consisting of approximately \$17.2 million of current tax expense offset by \$5.2 million of deferred tax benefit. Our effective tax rate was a negative 10.0% in 2011, compared to negative 18.6% in 2010 and 19.5% in 2009. Differences in our effective tax rate from the U.S. statutory rate are primarily due to our mix of earnings from international operations and the differences in statutory rates in these countries from the U.S. rate.

As of December 31, 2011, we had a U.S. tax loss carryback/carryforward of approximately \$32.2 million, of which \$17.6 million can offset prior U.S. taxable income and \$14.6 million can be carried forward to offset future U.S. taxable income. The tax losses consist of U.S. net operating losses of \$18.8 million and acquired U.S. net operating losses of \$13.4 million. The U.S. tax loss carryforwards expire in the years 2015 through 2031. As of December 31, 2011, we also had foreign tax loss carryforwards of approximately \$9.0 million, consisting primarily of acquired foreign net operating losses. The foreign loss carryforwards do not expire under current law.

There is uncertainty of future realization of some of the deferred tax assets resulting from tax loss carryforwards due to anticipated limitations. Therefore, a valuation allowance was recorded against the tax effect of such tax loss carryforwards, including a portion of state net operating losses and all foreign net operating losses. At December 31, 2011, the Company had a valuation allowance on approximately \$3.6 million of deferred tax assets related to operating losses and \$0.2 million of deferred tax assets related to other tax attributes as we believe it is more likely than not that these deferred tax assets will not be realized. Any future release of this valuation allowance will reduce expense.

Table of Contents**Liquidity and Capital Resources**

Cash Flows (in thousands)	Years ended December 31,		
	2011	2010	2009
Cash provided by (used in):			
Operating activities	\$ 94,768	\$ 57,800	\$ 137,056
Investing activities	(74,584)	(180,694)	(62,161)
Financing activities	(81,277)	307,007	(174,148)
Effect of exchange rate changes on cash and cash equivalents	(6,800)	(11,731)	1,622
Net increase (decrease) in cash and cash equivalents	\$ (67,893)	\$ 172,382	\$ (97,631)

Operating Activities

As of December 31, 2011, we had \$497.2 million of cash and cash equivalents. Our primary source of internal liquidity is our operating activities. Net cash provided by operating activities in 2011, 2010 and 2009 was \$94.8 million, \$57.8 million and \$137.1 million, respectively. Net cash provided by operating activities in 2011 was primarily the result of net income adjusted for non-cash expenses offset by balance sheet changes such as an increase in accounts payable and decreases in accounts receivable and other accrued liabilities. Net cash provided by operating activities in 2010 was primarily the result of net income adjusted for non-cash expenses offset by balance sheet changes such as a decrease in accounts payable. Net cash provided by operating activities in 2009 was primarily the result of net income adjusted for non-cash expenses offset by balance sheet changes such as a decrease in prepaid and other assets, and an increase in accounts payable.

Investing Activities

Net cash used in investing activities was \$74.6 million in 2011 and was the result of net purchases of investments of \$41.2 million, cash paid for cost method investments of \$9.5 million and purchases of capital equipment of \$23.9 million. Net cash used in investing activities was \$180.7 million in 2010 and was the result of net purchases of investments of \$145.4 million, cash paid for acquisitions of \$14.6 million, purchases of capital equipment of \$18.6 million and funding of \$2.2 million in restricted cash. Net cash used in investing activities was \$62.2 million in 2009 and was the result of net sales of investments of \$1.5 million, cash paid for cost-method investments of \$26.8 million, cash paid for earn-outs related to prior year acquisitions of \$4.9 million, and purchases of capital equipment of \$31.9 million.

Financing Activities

Net cash used in financing activities in 2011 was \$81.3 million, net cash provided by financing activities in 2010 was \$307.0 million, and net cash used in financing activities in 2009 was \$174.1 million. In 2011, cash used in financing activities was primarily due to our \$79.8 million repurchase of common stock. In 2010 our cash provided by financing increased primarily due to \$345.0 million of convertible notes issued, offset by debt issuance costs of \$9.5 million and \$35.0 million repurchase of common stock. In 2009, the net cash used in financing activities was primarily due to the settlement of \$186.7 million convertible notes in cash.

Effect of Exchange Rate Changes

In 2011, changes in foreign currency rates resulted in a \$6.8 million decrease in our cash and cash equivalents. Exchange rate changes decreased our cash and cash equivalents by \$11.7 million during 2010 and increased cash and cash equivalents by \$1.6 million in 2009. The changes are due to foreign currency volatility on our international entity balance sheet exposures, primarily the Euro.

Table of Contents

Auction Rate Securities

As of December 31, 2011, we held \$71.5 million of auction rate securities (ARS) at par value which we have recorded at \$65.3 million fair value. As of December 31, 2010, we held \$90.6 million of ARS at par value which was recorded at \$83.7 million fair value. The ARS are student loans over-collateralized and guaranteed by the U.S. government and most are AAA/Aaa rated. Almost all of these securities continue to fail at auction due to continued illiquid market conditions.

Due to the illiquid market conditions, we recorded a temporary fair value reduction of our ARS in the amount of \$6.2 million (8.6% of par value) in our balance sheets ended December 31, 2011, under Accumulated other comprehensive income (loss), compared to a \$6.9 million temporary fair value reduction in 2010 (7.6% of par value). The determination of fair value required management to make estimates and assumptions about the ARS. The discounted cash flow model we used to value these securities included the following assumptions:

determination of the penalty coupon rate and the frequency of the reset period associated with each ARS

an average redemption period of seven years

a contribution of the ARS paying its contractually stated interest rate

determination of the risk adjusted discount rate based on LIBOR rates for these maturities plus market information on student loan credit spreads

The aggregate ARS portfolio had an annualized yield of 1.5% as of December 31, 2011, compared to a yield of 1.7% as of December 31, 2010. We continue to receive 100% of the contractually required interest payments. The portfolio had a weighted average maturity of 27.5 years and 29.3 years as of December 31, 2011 and December 31, 2010, respectively. We continue to believe that we will be able to liquidate at par over time. We do not intend to sell the investments prior to recovery of their amortized cost basis nor do we believe it is more likely than not we may be required to sell the investments prior to recovery of their amortized cost basis. Accordingly, we treated the fair value decline as temporary. We anticipate we will have sufficient cash flow from operations to execute our business strategy and fund our operational needs. We believe that capital markets are also available if we need to finance other investing alternatives.

We classify our ARS as Level 3 long-term investments until we receive a call or partial call on the securities. Upon receipt of a call or partial call, we classify the securities subject to the call or partial call, as Level 1 short term investments. As of December 31, 2011 and December 31, 2010, our entire ARS portfolio was classified as Level 3 long-term investments. In 2011 and 2010, we've liquidated \$19.1 million and \$8.5 million, respectively, of ARS due to full or partial calls at par.

Commitments and Guarantees

At certain times, we enter into agreements where a letter of credits is required to ensure payment of future obligations by counterparties, such as our credit card processors and international taxing jurisdictions. Upon withdrawal, we are obligated to fund the executor bank on demand. We have not set aside specific funds to cover this potential obligation as we can generally recover these costs from our clients. If drawn upon, we expect to fund this commitment with cash and cash equivalents. There was \$3.3 million and \$0.3 million in undrawn letters of credit at December 31, 2011, and 2010 respectively.

In addition to the contractual obligations included in the table below, we will have significant cash obligations associated with the purchase of hardware and capitalized software to support our business. Cash outflows associated with the purchase of equipment and capitalized software were \$23.9 million, \$18.6 million and \$31.9 million in 2011, 2010 and 2009 respectively. We are also parties to legally binding contracts regarding goods and services under which the actual commitment is contingent on certain factors that are unknown or uncertain at this time. Therefore, these items are not included in the table. Uncertain income tax position liabilities of \$10.7 million are not included in the table because we cannot make a reasonably reliable estimate of

Table of Contents

the period of cash settlement with the respective tax authorities. In addition, purchase orders made in the ordinary course of business are excluded from the table and any amounts which we are liable for under the purchase orders are included in current liabilities on our Consolidated Balance Sheets.

The following table summarizes our principal contractual commitments as of December 31, 2011:

Contractual Obligations	Total Amount Committed	Payment due by period (in thousands)			2016 and Thereafter
		2012	2013	2014-2015	
Operating Lease Obligations	\$ 40,530	\$ 5,823	\$ 5,890	\$ 7,738	\$ 21,079
Senior Convertible Notes, including interest	486,281	7,010	7,010	14,020	458,241
Total	\$ 526,811	\$ 12,833	\$ 12,900	\$ 21,758	\$ 479,320

See Item 8 of Part II, Note 8 to the Consolidated Financial Statements for additional discussion of our commitments. See Item 8 of Part II, Note 9 to the Consolidated Financial Statements for additional discussion of our principal debt commitments.

2012 Outlook

We believe the outlook for our business remains positive for 2012. Global online sales continue to strengthen across most categories and buyers appear to be increasingly comfortable shopping online. In our core markets, software, consumer electronics and games, trends continue to favor the migration toward online shopping. Additionally, we see opportunities to grow our share of business in adjacent and complementary markets such as business-to-business software and educational services. We expect to expand our core service offerings in payment processing. We anticipate investing in our strategic growth initiatives while leveraging our base of business. We believe the initiatives outlined in our strategic plan will enable us to: 1) continue to be a leader in the software delivery market, 2) strengthen our product and service offering by investing in our core business, 3) continue to expand into vertical markets such as consumer electronics, and computer and video games and 4) supplement our growth through strategic acquisitions.

Application of Critical Accounting Policies*Critical Accounting Estimates and Policies*

We prepare our consolidated financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP). As such, we are required to make certain estimates, judgments and assumptions that we believe are reasonable based upon the information available. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the periods presented. The significant accounting policies that we believe are the most critical in fully understanding and evaluating our reported financial results are addressed below. We also have other key accounting policies, which involve the use of estimates, judgments, and assumptions that are significant to understanding our results. For additional information, see Item 8 of Part II, Note 1 to the Consolidated Financial Statements.

Intangible Assets. We amortize certain definite lived intangibles over their useful lives. Useful lives are based on our estimates of the period of time over which the assets will generate revenue or benefit our business. We review assets with definite lives for impairment whenever events or changes in circumstances indicate that the value we are carrying on our financial statements for an asset may not be recoverable. Our evaluation considers non-financial data such as changes in the operating environment and business strategy, competitive information, market trends and operating performance. If there are indications that an impairment may have occurred, we compare an undiscounted cash flow analysis to the carrying value of the assets. If the carrying amount of the asset exceeds the undiscounted cash flows, we measure the amount of the impairment by comparing the carrying amount of the asset to its fair value. Due to changes in our business strategy in 2011, we

Table of Contents

determined that an indicator of impairment existed for certain intangible assets and a \$9.4 million impairment was recorded to reduce the book carrying values of certain customer relationship, trade name, technology, and non-compete agreements. These intangible assets were established in the purchase accounting of our Journey Education Marketing, Inc., fatfoogoo, AG and THINK Subscription, Inc. acquisitions. The fair value was computed using an income approach that utilizes significant unobservable inputs, or Level 3 inputs in the fair value hierarchy. The adjustment was recorded in Amortization of acquisition-impairment intangibles on the Consolidated Statements of Operations for the year ended December 31, 2011. There have been no material impairments of other intangible assets for the years 2010 and 2009.

Goodwill. We complete our goodwill impairment analysis on an annual basis in the fourth quarter or more frequently if events or circumstances occur that would more likely than not reduce the fair value of the reporting unit below its carrying amount. As we only have one business segment, goodwill is evaluated based on a single reporting unit. In the fourth quarter of 2011, the Company evaluated goodwill for impairment by comparing our carrying value to our market capitalization, which is determined to approximate fair value. Based on the outcome of this test, management determined that no impairment of goodwill had occurred. Due to the deterioration in our stock price in the fourth quarter of 2011, we elected to perform additional testing for goodwill impairment at December 31, 2011. As a result of this additional analysis, management determined that the fair value of the Company, based upon a discounted cash flow valuation approach, was in excess of book value and no impairment was required. Key assumptions included in the impairment test included our revenue growth rate, discount rate assumptions, and estimates of our future cash flows. Changes in these estimates could change our conclusion regarding an impairment of goodwill in a future period. There have been no material impairments of goodwill for the years 2011, 2010 and 2009.

Revenue Recognition. We recognize revenue from services rendered once all the following criteria for revenue recognition have been met: (1) persuasive evidence of an agreement exists; (2) the services have been rendered; (3) the fee is fixed and determinable; and (4) collection of the amounts due is reasonably assured.

We also determine whether it is appropriate to record the gross amount of product sales and related costs or the net amount earned as net revenue. We typically are the seller and merchant of record on most of the transactions we process and have contractual relationships with our clients, which obligate us to pay to the client a specified percentage of each sale. We derive our revenue primarily from transaction fees based on a percentage of the products sale price and fees from services rendered associated with the e-commerce and other services provided to our clients and end customers. Our revenue is recorded net as generally our clients are subject to inventory risks and control customers' product choices. We sell both physical and digital products. Revenue is recognized upon fulfillment and based upon when products are shipped and title and significant risk of ownership passes to the customer.

The Company also provides customers with various proprietary software backup services. We recognize revenue for these backup services based upon historical usage within the contract period of the digital backup services when this information is available. Digital backup services are recognized straight-line over the life of the backup service when historical usage information is unavailable. Shipping revenues are recorded net of any associated costs.

We also, to a lesser extent, provide fee-based client services, which include website design, custom development and integration, analytical marketing, affiliate marketing and email marketing services. If we receive payments for fee-based services in advance of delivery, these amounts, if significant, are deferred and recognized over the service period.

Provisions for doubtful accounts and transaction losses and authorized credits are made at the time of revenue recognition based upon our historical experience. The provision for doubtful accounts and transaction losses are recorded as charges to operating expense, while the provision for authorized credits is recognized as a reduction of net revenues.

Table of Contents

Taxes assessed by a governmental authority that are directly imposed on a revenue-producing transaction between a seller and a customer may be presented on either a gross basis (included in revenues and costs) or on a net basis (excluded from revenues). The Company presents these taxes on a net basis in its financial statements.

Allowance for Doubtful Accounts. We must make estimates and assumptions that can affect the amount of assets and liabilities and the amounts of revenues and expenses we report in any financial reporting period. We use estimates in determining our allowance for doubtful accounts which are based on our historical experience and current trends. We must estimate the collectability of our billed accounts receivable. We analyze accounts receivable and consider our historical bad debt experience, customer credit-worthiness, current economic trends and changes in our customer payment terms when evaluating the adequacy of the allowance for doubtful accounts. We must make significant judgments and estimates in connection with the allowance in any accounting period. There may be material differences in our operating results for any period if we change our estimates or if the estimates are not accurate.

Credit Card Chargeback Reserve. We use estimates based on historical experience and current trends to determine accrued chargeback expenses. Significant management judgments are used and estimates made in connection with these expenses in any accounting period. Determining appropriate reserves for chargeback transactions is an inherently uncertain process. The reserves are maintained at a level we deem appropriate to provide for losses incurred on revenue earned in 2011. There may be material differences in our operating results for any period if we change our estimates or if the estimates are not accurate.

Stock-Based Compensation Expense. We account for share-based payments made to our employees and directors including stock options, restricted stock grants and employee stock purchases made through our Employee Stock Purchase Plan based on estimated fair values.

Stock-based compensation expense recognized during the period is based on the value of the portion of share-based awards that are ultimately expected to vest during the period. The fair value of each stock option grant is estimated on the date of grant using the Black-Scholes option pricing model. The fair value of restricted stock is determined based on the number of shares granted and the closing price of our common stock on the date of grant. Compensation expense for all share-based payment awards is recognized over the requisite service period.

As stock-based compensation expense recognized in our Consolidated Statements of Operations is based on awards ultimately expected to vest, it has been reduced for estimated forfeitures. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Benefits of tax deductions in excess of recognized stock-based compensation expense are reported as a financing cash flow.

Income Taxes and Deferred Taxes. Deferred income taxes reflect the tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. We record deferred tax assets for favorable tax attributes, including tax loss carryforwards. We currently have U.S. tax loss carryforwards, including acquired operating tax loss carryforwards, and a lesser amount of acquired foreign operating tax loss carryforwards. A portion of the benefit of the acquired tax loss carryforwards has been reserved by a valuation allowance pursuant to U.S. GAAP. These valuation allowances of the deferred tax asset will be reversed if and when it is more likely than not that the deferred tax asset will be realized. We evaluate the need for a valuation allowance of the deferred tax asset on a quarterly basis. Any future release of valuation allowance will reduce income tax expense.

Recent Accounting Pronouncements

Information regarding recently issued accounting standards is included in Item 8 of Part II, Note 1 to the Consolidated Financial Statements.

Off Balance Sheet Arrangements

None.

Table of Contents**ITEM 7A. QUALITATIVE AND QUANTITATIVE DISCLOSURE ABOUT MARKET RISK****Interest Rate Risk**

Our portfolio of cash equivalents, short-term and long-term investments is maintained in a variety of securities, including government agency obligations and money market funds. Investments are classified as available-for-sale securities and carried at their market value with cumulative unrealized gains or losses recorded as a component of Accumulated other comprehensive income (loss) within stockholders' equity. A sharp rise in interest rates could have an adverse impact on the market value of certain securities in our portfolio. We do not currently hedge our interest rate exposure and do not enter into financial instruments for trading or speculative purposes.

A hypothetical and immediate one percent (1%) increase in interest rates would decrease the fair value in our investment portfolio held at December 31, 2011 and 2010, by \$2.7 million and by \$2.6 million, respectively. A hypothetical and immediate one percent (1%) decrease in interest rates would increase the fair value in our investment portfolio held at December 31, 2011 and 2010, by \$2.7 million and by \$2.6 million, respectively. The approximate gains or losses in earnings are estimates, and actual results could vary due to the assumptions used.

At December 31, 2011 and 2010, we had long-term debt of \$353.8 million and \$353.8 million, respectively, associated with our Senior Convertible Notes, which are fixed rate instruments. The market value of our long-term debt will fluctuate with movements of interest rates, increasing in periods of declining rates of interest and declining in periods of increasing rates of interest.

Foreign Currency Risk

Growth in our international operations will incrementally increase our exposure to foreign currency fluctuations as well as other risks typical of international operations, including, but not limited to, differing economic conditions, changes in political climate, differing tax structures and other regulations and restrictions.

Foreign exchange rate fluctuations may adversely impact our consolidated results of operations as exchange rate fluctuations on transactions denominated in currencies other than our functional currencies result in gains and losses that are reflected in our Consolidated Statements of Operations. To the extent the U.S. dollar weakens against foreign currencies, the translation of these foreign currency-denominated transactions will result in increased net revenues and operating expenses. Conversely, our net revenues and operating expenses will decrease when the U.S. dollar strengthens against foreign currencies.

The effect on our consolidated statements of operations from changes in exchange rates versus the U.S. Dollar is as follows (in thousands):

	Year Ended December 31, 2011			Year Ended December 31, 2010			Year Ended December 31, 2009		
	At Prior Year Rates(1)	Exchange Rate Effect(2)	As Reported	At Prior Year Rates(1)	Exchange Rate Effect(2)	As Reported	At Prior Year Rates(1)	Exchange Rate Effect(2)	As Reported
Revenue	\$ 392,878	\$ 5,262	\$ 398,140	\$ 363,446	\$ (220)	\$ 363,226	\$ 411,922	\$ (8,156)	\$ 403,766
Costs and expenses	373,286	4,404	377,690	351,746	(1,513)	350,233	346,514	(6,249)	340,265
Income (loss) from operations	\$ 19,592	\$ 858	\$ 20,450	\$ 11,700	\$ 1,293	\$ 12,993	\$ 65,408	\$ (1,907)	\$ 63,501

(1) Represents the outcome that would have resulted had exchange rates in the current period been the same as those in effect in the comparable prior-year period for operating results.

(2) Represents the increase (decrease) in reported amounts resulting from changes in exchange rates from those in effect in the comparable prior-year period for operating results.

Transaction Exposure

Edgar Filing: DIGITAL RIVER INC /DE - Form 10-K

The Company enters into short-term foreign currency forward contracts to offset the foreign exchange gains and losses generated by the re-measurement of certain assets and liabilities recorded in non-functional currencies.

Table of Contents

Changes in the fair value of these derivatives, as well as re-measurement gains and losses, are recognized in current earnings in Other income (expense), net. Foreign currency transaction gains and losses were a loss of \$1.5 million in 2011, a gain of \$0.4 million in 2010 and a gain of \$0.4 million in 2009.

Translation Exposure

Foreign exchange rate fluctuations may adversely impact our consolidated financial position as the assets and liabilities of our foreign operations are translated into U.S. dollars in preparing our Consolidated Balance Sheets. These gains or losses are recognized as an adjustment to stockholders' equity which is reflected in our Consolidated Balance Sheets under Accumulated other comprehensive income (loss).

The potential loss in fair value resulting from a hypothetical 10% adverse currency movement is \$12.1 million and \$11.7 million for 2011 and 2010, respectively.

Other Market Risks

Investments in Auction Rate Securities

At December 31, 2011, we held approximately \$71.5 million of ARS at par. In light of current conditions in the ARS market as described in Part II Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, in this Form 10-K, we may incur temporary unrealized losses, or other-than-temporary realized losses, in the future if market conditions persist and we are unable to recover the investment principal in our ARS.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Digital River, Inc.

We have audited the accompanying consolidated balance sheets of Digital River, Inc. and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2011. Our audits also included the financial statement schedule listed in Item 15(a). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Digital River, Inc. and subsidiaries at December 31, 2011 and 2010, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Digital River, Inc.'s internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 27, 2012 expressed an unqualified opinion thereon.

DIGITAL RIVER, INC.

Notes to Consolidated Financial Statements

December 31, 2011 and 2010

1. NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

We provide end-to-end global cloud-commerce and marketing solutions to a wide variety of companies in software, consumer electronics, computer games, video games and other markets. We were incorporated in 1994 and began building and operating online stores for our clients in 1996. We generate revenue primarily based on the sales of products made in those stores, and in addition, offer services designed to increase traffic to our clients' online stores and to improve the sales effectiveness of those stores.

Principles of Consolidation and Classification

The consolidated financial statements include the accounts of Digital River, Inc. and our wholly owned subsidiaries. All material intercompany balances and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in accordance with United States generally accepted accounting principles (U.S. GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Reclassifications

Certain accounts in the prior year's audited consolidated financial statements have been reclassified for comparative purposes to conform to the current year's presentation. These reclassifications had no effect on our reported net income (loss).

Foreign Currency Translation

Substantially all of our foreign subsidiaries use the local currency of their respective countries as their functional currency. Assets and liabilities are translated at exchange rates prevailing at the balance sheet dates. Revenues, costs and expenses are translated at the average exchange rates for the reported period. Gains and losses resulting from translation are recorded as a component of Accumulated other comprehensive income (loss) within stockholders' equity. Gains and losses resulting from foreign currency transactions are recognized as Other income (expense), net.

We are exposed to market risk from changes in foreign currency exchange rates. Our primary risk is the effect of foreign currency exchange rate fluctuations on the U.S. dollar value of foreign currency denominated operating sales and expenses. These exposures are mitigated by the use of foreign exchange forward contracts with maturities of approximately one week. Our derivatives are not designated as hedges and are adjusted to fair value through income each period. The principal exposures mitigated were euro, pound sterling and Australian dollar currencies. For the years ended December 31, 2011 and 2010, the gain/loss on derivative settlements was immaterial. The notional amounts held and the underlying gain/loss were determined to be immaterial when compared to our overall cash and cash equivalents and the net income (loss) reported for the respective periods.

Our foreign currency contracts contain credit risk to the extent that our bank counterparties may be unable to meet the terms of the agreements. We minimize such risk by limiting our counterparties to major financial institutions of high credit quality.

Cash and Cash Equivalents

We consider all short-term, highly liquid investments, primarily high grade commercial paper and money market accounts, that are readily convertible into known amounts of cash and that have original or remaining maturities of three months or less at the date of purchase to be cash equivalents. As of December 31, 2011 and

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)**

2010, cash balances of \$0.2 million and \$0.1 million, respectively, were held by banks or credit card processors to secure potential future credit card fees, fines and chargebacks or for other payments.

Short-Term Investments

Our short-term investments consist of debt securities that are classified as available-for-sale and are carried on our balance sheets at their market value with cumulative unrealized gains or losses recorded net of tax as a component of Accumulated other comprehensive income (loss) within stockholders' equity. We classify all of our available-for-sale securities, except for our auction rate securities, as current assets, as these securities represent investments available for current corporate purposes. Upon the sale of a security classified as available for sale, the amount reclassified out of Accumulated other comprehensive income (loss) into earnings is based on the specific identification method.

Restricted Cash

Restricted cash consists of cash and cash equivalents that are held in escrow accounts and restricted by agreements with third parties for a particular purpose. Restricted cash and cash equivalents are included in current assets under Prepaid Expenses and Other on our Consolidated Balance Sheets, and are recorded at fair value. As of December 31, 2011, we had \$1.5 million of restricted cash, and \$2.1 million of restricted cash as of December 31, 2010.

Property and Equipment

Computer equipment, software and furniture are depreciated under the straight-line method using estimated useful lives of three to seven years and leasehold improvements are amortized over the shorter of the asset life or remaining length of the lease. Useful lives are based on our estimates of the period of time over which the assets will generate revenue or benefit our business. We review assets with definite lives for impairment whenever events or changes in circumstances indicate that the value we are carrying on our financial statements for an asset may not be recoverable. Our evaluation considers non-financial data such as changes in the operating environment and business strategy, competitive information, market trends and operating performance. Property and equipment at December 31 consisted of the following (in thousands):

	2011	2010
Computer hardware and software	\$ 138,860	\$ 124,300
Furniture, fixtures and leasehold improvements	12,316	15,975
Total property and equipment	\$ 151,176	\$ 140,275
Accumulated depreciation and amortization	(99,639)	(90,676)
Net property and equipment	\$ 51,537	\$ 49,599

Depreciation and amortization expense was \$22.2 million, \$23.4 million and \$19.4 million in 2011, 2010 and 2009, respectively.

Repairs and maintenance costs are charged directly to expense as incurred. Major renewals or replacements that substantially extend the useful life of an asset are capitalized and depreciated.

Software Development

Costs to develop software for internal use are required to be capitalized and amortized over the estimated useful life of the software. We capitalized \$4.4 million and \$4.6 million related to software development during

Table of Contents

DIGITAL RIVER, INC.

Notes to Consolidated Financial Statements (Continued)

2011 and 2010, respectively. This capitalization is primarily related to the development of our new enterprise resource planning (ERP) system, and new data management and reporting infrastructure. We expect these investments to drive long-term operational efficiencies across the organization and provide further competitive differentiation.

Intangible Assets

We amortize certain definite lived intangibles over their useful lives. Useful lives are based on our estimates of the period of time over which the assets will generate revenue or benefit our business. We review assets with definite lives for impairment whenever events or changes in circumstances indicate that the value we are carrying on our financial statements for an asset may not be recoverable. Our evaluation considers non-financial data such as changes in the operating environment and business strategy, competitive information, market trends and operating performance. If there are indications that an impairment may have occurred, we compare an undiscounted cash flow analysis to the carrying value of the assets. If the carrying amount of the asset exceeds the undiscounted cash flows, we measure the amount of the impairment by comparing the carrying amount of the asset to its fair value. See Note 5 Goodwill and Intangible Assets, for further details.

Goodwill

We complete our goodwill impairment analysis on an annual basis in the fourth quarter or more frequently if events or circumstances occur that would more likely than not reduce the fair value of the reporting unit below its carrying amount. As we only have one business segment, goodwill is evaluated based on a single reporting unit. In the fourth quarter of 2011, the Company evaluated goodwill for impairment by comparing our carrying value to our market capitalization, which is determined to approximate fair value. Based on the outcome of this test, management determined that no impairment of goodwill had occurred. Due to the deterioration in our stock price in the fourth quarter of 2011, we elected to perform additional testing for goodwill impairment at December 31, 2011. As a result of this additional analysis, management determined that the fair value of the Company, based upon a discounted cash flow valuation approach, was in excess of book value and no impairment was required. Key assumptions included in the impairment test included our revenue growth rate, discount rate assumptions, and estimates of our future cash flows. Changes in these estimates could change our conclusion regarding an impairment of goodwill in a future period. There have been no material impairments of goodwill for the years 2011, 2010 and 2009.

Long-Term Investments

Our long-term investments consist of market basis equity investments, cost method equity investments and auction rate securities. The auction rate securities are classified as available-for-sale and are carried on our balance sheet at their market value with cumulative unrealized gains or losses recorded net of tax as a component of Accumulated other comprehensive income (loss) within stockholders' equity. Upon the sale of a security classified as available for sale, the amount reclassified out of Accumulated other comprehensive income (loss) into earnings is based on the specific identification method.

We also have equity investments that are accounted for under the cost method included in long-term investments. We review the key characteristic of our other investments and their classification in accordance with U.S. GAAP on an annual basis, or when indications of potential impairment exist. If a decline in the fair value of a security is deemed by management to be other-than-temporary, we write down the cost basis of the investment to fair value, and the amount of the write-down is included in net earnings.

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)****Other Assets**

The following table summarizes our other assets as of December 31 (in thousands):

	2011	2010
Debt financing costs, net	\$ 5,773	\$ 9,405
Other	3,200	4,415
Total other assets	\$ 8,973	\$ 13,820

Other Accrued Liabilities

The following table summarizes our other accrued liabilities as of December 31 (in thousands):

	2011	2010
Accrued expenses	\$ 24,792	\$ 39,271
Sales, value-added and transaction taxes	14,091	15,523
Current deferred and other income taxes	3,694	3,289
Total other accrued liabilities	\$ 42,577	\$ 58,083

Comprehensive Income (Loss)

Comprehensive income (loss) includes revenues, expenses, and gains and losses that are excluded from net earnings under GAAP. Items of comprehensive income (loss) are unrealized gains and losses on investments and foreign currency translation adjustments which are added to net income (loss) to compute comprehensive income (loss). Comprehensive income (loss) is net of income tax benefit or expense excluding cumulative translation adjustments as these funds are indefinitely invested.

The components of comprehensive income (loss) are (in thousands):

	Foreign currency translation adjustment	Unrealized Gain/Loss on Investment	Accumulated Other Comprehensive Income (Loss)
Balance, December 31, 2008	\$ 15,154	\$ (10,224)	\$ 4,930
Before tax amount	6,624	9,988	16,612
Tax Effect	0	(3,715)	(3,715)
Net-of-tax amount	6,624	6,273	12,897
Balance, December 31, 2009	\$ 21,778	\$ (3,951)	\$ 17,827
Before tax amount	(16,704)	(880)	(17,584)
Tax Effect	0	329	329

Edgar Filing: DIGITAL RIVER INC /DE - Form 10-K

Net-of-tax amount	(16,704)	(551)	(17,255)
Balance, December 31, 2010	\$ 5,074	\$ (4,502)	\$ 572
Before tax amount	(9,004)	746	(8,258)
Tax Effect	0	(278)	(278)
Net-of-tax amount	(9,004)	468	(8,536)
Balance, December 31, 2011	\$ (3,930)	\$ (4,034)	\$ (7,964)

Table of Contents

DIGITAL RIVER, INC.

Notes to Consolidated Financial Statements (Continued)

Revenue Recognition

We recognize revenue from services rendered once all the following criteria for revenue recognition have been met: (1) persuasive evidence of an agreement exists; (2) the services have been rendered; (3) the fee is fixed and determinable; and (4) collection of the amounts due is reasonably assured.

We also determine whether it is appropriate to record the gross amount of product sales and related costs or the net amount earned as net revenue. We typically are the seller and merchant of record on most of the transactions we process and have contractual relationships with our clients, which obligate us to pay to the client a specified percentage of each sale. We derive our revenue primarily from transaction fees based on a percentage of the products sale price and fees from services rendered associated with the e-commerce and other services provided to our clients and end customers. Our revenue is recorded net as generally our clients are subject to inventory risks and control customers' product choices. We sell both physical and digital products. Revenue is recognized upon fulfillment and based upon when products are shipped and title and significant risk of ownership passes to the customer.

The Company also provides customers with various proprietary software backup services. We recognize revenue for these backup services based upon historical usage within the contract period of the digital backup services when this information is available. Digital backup services are recognized straight-line over the life of the backup service when historical usage information is unavailable. Shipping revenues are recorded net of any associated costs.

We also, to a lesser extent, provide fee-based client services, which include website design, custom development and integration, analytical marketing, affiliate marketing and email marketing services. If we receive payments for fee-based services in advance of delivery, these amounts, if significant, are deferred and recognized over the service period.

Provisions for doubtful accounts and transaction losses and authorized credits are made at the time of revenue recognition based upon our historical experience. The provision for doubtful accounts and transaction losses are recorded as charges to operating expense, while the provision for authorized credits is recognized as a reduction of net revenues.

Taxes assessed by a governmental authority that are directly imposed on a revenue-producing transaction between a seller and a customer may be presented on either a gross basis (included in revenues and costs) or on a net basis (excluded from revenues). The Company presents these taxes on a net basis in its financial statements.

Deferred Revenue

Deferred revenue is recorded when service payment is received in advance of performing our service obligation. Revenue is recognized over either the estimated usage period when usage information is available, or ratably over the service period when usage information is not available.

Allowance for Doubtful Accounts

We must make estimates and assumptions that can affect the amount of assets and liabilities and the amounts of revenues and expenses we report in any financial reporting period. We use estimates in determining our allowance for doubtful accounts which are based on our historical experience and current trends. We must estimate the collectability of our billed accounts receivable. We analyze accounts receivable and consider our historical bad debt experience, customer credit-worthiness, current economic trends and changes in our customer payment terms when evaluating the adequacy of the allowance for doubtful accounts. We must make significant judgments and estimates in connection with the allowance in any accounting period. There may be material differences in our operating results for any period if we change our estimates or if the estimates are not accurate.

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)*****Credit Card Chargeback Reserve***

We use estimates based on historical experience and current trends to determine accrued chargeback expenses. Significant management judgments are used and estimates made in connection with these expenses in any accounting period. The following table illustrates our provision for chargeback losses as a percentage of revenue for 2011, 2010 and 2009 (in thousands, except percentages):

	2011	2010	2009
Revenue	\$ 398,140	\$ 363,226	\$ 403,766
Provision for Credit Card Chargebacks	487	1,936	1,287
Provision for Credit Card Chargebacks as a % of Revenue	0.1%	0.5%	0.3%

Determining appropriate reserves for chargeback transactions is an inherently uncertain process. The reserves are maintained at a level we deem appropriate to provide for losses incurred on revenue earned in 2011. There may be material differences in our operating results for any period if we change our estimates or if the estimates are not accurate. An aggregate 0.15% deviation in our estimates would have resulted in an increase or decrease in operating income of approximately \$0.4 million in 2011, resulting in an approximate \$0.01 change in diluted net income per share.

Stock-Based Compensation Expense

We account for share-based payments made to our employees and directors including stock options, restricted stock grants and employee stock purchases made through our Employee Stock Purchase Plan based on estimated fair values.

Stock-based compensation expense recognized during the period is based on the value of the portion of share-based awards that are ultimately expected to vest during the period. The fair value of each stock option grant is estimated on the date of grant using the Black-Scholes option pricing model. The fair value of restricted stock is determined based on the number of shares granted and the closing price of our common stock on the date of grant. Compensation expense for all share-based payment awards is recognized over the requisite service period.

As stock-based compensation expense recognized in our Consolidated Statements of Operations is based on awards ultimately expected to vest, it has been reduced for estimated forfeitures. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Benefits of tax deductions in excess of recognized stock-based compensation expense are reported as a financing cash flow.

Advertising Costs

The costs of advertising are charged to sales and marketing expense as incurred. We incurred advertising expense of \$0.4 million, \$1.0 million and \$1.0 million in 2011, 2010 and 2009, respectively.

Income Taxes

Deferred income taxes reflect the tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. We record deferred tax assets for favorable tax attributes, including tax loss carryforwards. We currently have U.S. tax loss carryforwards, including acquired operating tax loss carryforwards, and a lesser amount of acquired foreign

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)**

operating tax loss carryforwards. A portion of the benefit of the acquired tax loss carryforwards has been reserved by a valuation allowance pursuant to U.S. GAAP. These valuation allowances of the deferred tax asset will be reversed if and when it is more likely than not that the deferred tax asset will be realized. We evaluate the need for a valuation allowance of the deferred tax asset on a quarterly basis.

Recent Accounting Pronouncements

Accounting Standards Update (ASU) 2009-13 Multiple-Deliverable Revenue Arrangements: In October 2009, the Financial Accounting Standards Board (FASB) issued ASU 2009-13. This update provides amendments to Accounting Standards Codification (ASC) Topic 605 Revenue Recognition that enables vendors to account for products or services (deliverables) separately rather than as a combined unit. The amendments eliminate the residual method of allocation and require that arrangement consideration be allocated at the inception of the arrangement to all deliverables using the relative selling price method. The amendments also require that a vendor determine its best estimate of selling price in a manner that is consistent with that used to determine the price to sell the deliverable on a standalone basis. Additionally, disclosures related to multiple-deliverable revenue arrangements have also been expanded. The provisions were effective for fiscal years beginning on or after June 15, 2010. We have adopted the new guidance in ASU 2009-13 as of January 1, 2011, and it did not have a material impact on our Consolidated Financial Statements.

ASU 2010-28 Goodwill Impairment Testing: In December 2010, the FASB issued ASU 2010-28. This update provides amendments to ASC Topic 350 Intangibles-Goodwill and Other that require additional qualitative analysis within step 1 of the goodwill impairment test if a reporting unit's carrying value is zero or negative. If it is more likely than not that a goodwill impairment exists, step 2 of the goodwill impairment test is required. We have adopted the new guidance in ASU 2010-28 as of the period ended March 31, 2011, and it did not have a material impact on our Consolidated Financial Statements.

ASU 2010-29 Disclosure of Supplementary Pro Forma Information for Business Combinations: In December 2010, the FASB issued ASU 2010-29. This amendment to ASC Topic 805 Business Combinations requires public entities to disclose pro forma revenue and earnings of a combined entity for the current reporting period for all material business combinations as though the acquisition date that occurred during the year had been as of the beginning of the annual reporting period. If comparative financial statements are presented, this same disclosure requirement is applicable. Additionally, supplemental pro forma disclosures were amended to require a description of the nature and amount of material pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. We have adopted the new disclosure requirements as of the period ended March 31, 2011, and it did not have a material impact on our Consolidated Financial Statements.

ASU 2011-04 Fair Value Measurements: In May 2011, the FASB issued ASU 2011-04. This update provides amendments to ASC Topic 820 Fair Value Measurements and Disclosures by creating a uniform framework for applying fair value measurements principles and clarified existing guidance in U.S. GAAP. The amendments called for additional disclosures regarding quantitative information about the significant unobservable inputs used for all Level 3 measurements, information about the sensitivity of a fair value measurement categorized within Level 3 of the fair value hierarchy to changes in unobservable inputs and any interrelationships between those unobservable inputs and a description of the valuation process. Additionally, disclosures are required when current use of a non-financial assets measured at fair value differs from its highest and best use, any transfers from Level 1 and Level 2 and the hierarchy classification for items whose fair value is not recorded on the balance sheet but disclosed in the footnotes. ASU No. 2011-04 is effective for interim and annual periods beginning after December 15, 2011, and is to be completed on a prospective basis. Adoption of ASU 2011-04 is not anticipated to have a material impact on our Consolidated Financial Statements.

Table of Contents

DIGITAL RIVER, INC.

Notes to Consolidated Financial Statements (Continued)

ASU 2011-05 Comprehensive Income: In June 2011, the FASB issued ASU 2011-05. This amendment requires nonowner changes in stockholders' equity, reclassifications and all other items affecting comprehensive income be presented in either a single continuous statement or in two separate but consecutive statements for all periods presented. The amendments do not change the items that must be reported in comprehensive income or when an item of other comprehensive income must be reclassified to net income (loss). ASU No. 2011-05 is effective for interim and annual periods beginning after December 15, 2011, and is to be completed on a retrospective basis. Adoption of ASU 2011-05 is not anticipated to have a material impact on our Consolidated Financial Statements.

ASU 2011-08 Goodwill Impairment Testing: In September 2011, the FASB issued ASU 2011-08. Under this amendment, qualitative factors are first assessed to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that goodwill is impaired. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step goodwill impairment test is unnecessary. However, if an entity concludes otherwise, then it is required to perform the first step of the two-step impairment test by calculating the fair value of the reporting unit and comparing it against the carrying amount. ASU No. 2011-08 is effective for interim and annual periods beginning after December 15, 2011. Adoption of ASU 2011-08 is not anticipated to have a material impact on our Consolidated Financial Statements.

ASU 2011-12 Presentation Deferral of Accumulated Other Comprehensive Income Reclassifications: In December 2011, the FASB issued ASU 2011-12 which defers the presentation of reclassifications adjustments out of accumulated other comprehensive income as required by ASU 2011-05. Deferral period is indefinite until FASB can fully review the implications of the proposed disclosure under ASU 2011-05. Adoption of the deferral period under ASU 2011-12 is not anticipated to have a material impact on our Consolidated Financial Statements.

We have determined that all other recently issued accounting standards will not have a material impact on our Consolidated Financial Statements, or do not apply to our operations.

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)****2. NET INCOME PER SHARE**

The following table summarizes the computation of basic and diluted net income per share (in thousands, except per share data):

	For the Years Ended December 31,		
	2011	2010	2009
Net income (loss) per share basic			
Net income (loss) basic	\$ 17,167	\$ 15,735	\$ 49,771
Weighted average shares outstanding basic	36,778	37,518	36,975
Net income (loss) per share basic	\$ 0.47	\$ 0.42	\$ 1.35
Net income (loss) per share diluted			
Net income (loss) basic	\$ 17,167	\$ 15,735	\$ 49,771
Exclude: Interest expense and amortized financing cost of senior convertible notes, net of tax benefit	78	79	84
Net income (loss) diluted	\$ 17,245	\$ 15,814	\$ 49,855
Weighted average shares outstanding basic	36,778	37,518	36,975
Dilutive impact of non-vested stock and options outstanding	532	621	529
Dilutive impact of 2004 senior convertible notes	200	200	200
Weighted average shares outstanding diluted	37,510	38,339	37,704
Net income (loss) per share diluted	\$ 0.46	\$ 0.41	\$ 1.32

Options to purchase 1,289,765, 1,304,744 and 1,298,087 shares for 2011, 2010 and 2009, respectively, were not included in the computation of diluted net income per share, because their effect on diluted net income (loss) per share would have been anti-dilutive.

The unissued shares underlying our 2010 senior convertible notes, 7,022,027 and 1,173,544 weighted average shares for 2011 and 2010, respectively, were excluded for the purposes of calculating GAAP diluted net income (loss) per share, because their effect on diluted net income per share would have been anti-dilutive.

The impact of the convertible note repurchase was anti-dilutive for the year ending December 31, 2009, and has been excluded from the computation of diluted net income per share as a result.

3. FAIR VALUE MEASUREMENTS

Financial assets and liabilities that are re-measured and reported at fair value at each reporting period are classified and disclosed in one of the following three categories:

Level 1 Observable inputs such as quoted prices in active markets;

Level 2 Other observable inputs available at the measurement date, other than quoted prices included in

Level 1, either directly or indirectly, including:

Quoted prices for similar assets or liabilities in active markets;

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)**

Quoted prices for identical or similar assets in less active markets than Level 1 investments;

Inputs other than quoted prices that are observable for assets or liabilities; and

Inputs that are derived principally from or corroborated by other observable market data.

Level 3 Unobservable inputs that cannot be corroborated by observable market data and reflect the use of significant management judgment. These values are generally determined using pricing models for which the assumptions utilize management's estimate of market participant assumptions.

Assets and Liabilities that are Measured at Fair Value on a Recurring Basis

The fair value hierarchy requires the use of observable market data when available. In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. Our assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability. The Company's policy is to recognize transfers between levels at the end of the quarter.

The following table sets forth by level within the fair value hierarchy, our financial assets that were accounted for at fair value on a recurring basis at December 31, 2011 and 2010, (in thousands), according to the valuation techniques we used to determine their fair values. There have been no transfers of assets between the fair value hierarchies presented below:

	Total	Fair Value Measurements		
		Level 1	Level 2	Level 3
Balance as of December 31, 2011				
Cash and cash equivalents	\$ 497,193	\$ 497,193	\$ 0	\$ 0

Balance as of December 31, 2011	\$ 0	\$ 65,338	\$ 65,338

The following methods and assumptions were used to estimate the fair value of each class of financial instrument. There have been no changes in the valuation techniques used by the Company to fair value our financial instruments:

Cash and Cash equivalents. Consist of cash on hand in bank deposits, highly liquid investments, primarily high grade commercial paper and money market accounts. The fair value was measured using quoted market prices and is classified as Level 1. The carrying amount approximates fair value.

Restricted Cash. Consist of cash and cash equivalents that are held in escrow accounts and restricted by agreements with third parties for a particular purpose. The carrying amount approximates fair value and is classified as Level 1.

Certificates of Deposit. Consist of time deposit accounts with original maturities of less than one year and various yields. The carrying amount approximates fair value and is classified as Level 1.

Table of Contents

DIGITAL RIVER, INC.

Notes to Consolidated Financial Statements (Continued)

U.S government sponsored entities. Consist of Fannie Mae, Freddie Mac and Federal Home Loan Bank investment grade bonds that are traded in less active markets than Level 1 investments. The fair value of these bonds is classified as Level 2. The contractual maturity of these investments is within three years.

Corporate Bonds. Consist of investment grade corporate bonds that trade with sufficient frequency and volume to enable us to obtain pricing information on an ongoing basis. The fair value of these bonds was measured using quoted market prices and is classified as Level 1. The contractual maturity of these investments is within three years.

Asset Backed Securities. Consist of securities backed by automobile loan receivables that are traded in less active markets than our Level 1 investments. The fair value is classified as Level 2. The contractual maturity of these investments is within one year.

Market Basis Equity Investments. Consist of available for sale equity securities that trade with sufficient frequency and volume to enable us to obtain pricing information on an ongoing basis. The fair value of these investments was measured using quoted market prices and is classified as Level 1. We acquired our market basis equity investments during 2010. In 2011 and 2010, we recorded other-than-temporary charges of \$2.2 million and \$2.2 million, respectively, as we determined that our cost basis was not recoverable.

Auction Rate Securities. As of December 31, 2011, we held \$71.5 million of auction rate securities (ARS) at par value which we have recorded at \$65.3 million fair value. As of December 31, 2010, we held \$90.6 million of ARS at par which was recorded at \$83.7 million fair value. The ARS are student loans over-collateralized and guaranteed by the U.S. government and most are AAA/Aaa rated. Almost all of these securities continue to fail at auction due to continued illiquid market conditions.

Due to the illiquid market conditions, we have recorded a temporary fair value reduction of our ARS in the amount of \$6.2 million (8.6% of par value) in our balance sheets ended December 31, 2011, under Accumulated other comprehensive income (loss), compared to \$6.9 million temporary fair value reduction in 2010 (7.6% of par value). The determination of fair value required management to make estimates and assumptions about the ARS. The discounted cash flow model we used to value these securities included the following assumptions:

determination of the penalty coupon rate, frequency of reset period associated with each ARS

an average redemption period of seven years

a contribution of the ARS paying its contractually stated interest rate

determination of the risk adjusted discount rate based on LIBOR rates for these maturities plus market information on student loan credit spreads

The aggregate ARS portfolio had an annualized yield of 1.5% and 1.7% as of December 31, 2011 and 2010, respectively. We continue to receive 100% of the contractually required interest payments. The portfolio had a weighted average maturity of 27.5 and 29.3 years as of December 31, 2011 and 2010, respectively. We continue to believe that we will be able to liquidate at par over time. We do not intend to sell the investments prior to recovery of their amortized cost basis nor do we believe it is more likely than not we may be required to sell the investments prior to recovery of their amortized cost basis. Accordingly, we treated the fair value decline as temporary. We anticipate we will have sufficient cash flow from operations to execute our business strategy and fund our operational needs. We believe that capital markets are also available if we need to finance other investing alternatives.

Table of Contents

DIGITAL RIVER, INC.

Notes to Consolidated Financial Statements (Continued)

We classify our ARS as Level 3 long-term investments until we receive a call or partial call on the securities. Upon receipt of a call or partial call, we classify the securities subject to the call or partial call, as Level 1 short term investments. As of December 31, 2011, and 2010, our entire ARS portfolio was classified as Level 3 long-term investments. In 2011 and 2010, we ve liquidated \$19.1 million and \$8.5 million, respectively, of ARS due to full or partial calls at par.

Assets and Liabilities that are Measured at Fair Value on a Nonrecurring Basis

Certain assets and liabilities are measured at fair value on a nonrecurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments only in certain circumstances like evidence of impairment. In 2011 and 2010, other than the intangible impairment discussed in Note 5 Goodwill and Intangible Assets, we had no significant fair value adjustments of assets or liabilities on a nonrecurring basis subsequent to their initial recognition.

The aggregate carrying value and fair value of the Company s cost method equity investments at December 31, 2011 and 2010, was \$32.1 million and \$23.2 million, respectively, and is included under Long-term investments in the Consolidated Balance Sheets. The increase in carrying value was due to a \$10.0 million investment during the third quarter of 2011. We have evaluated the investments for impairment and we believe that the entity valuations completed at acquisition and the investee s subsequent performance against those projections indicates that the acquisition price continues to represent fair value.

As of December 31, 2011 and 2010, the fair value of our \$345.0 million 2.0% fixed rate 2010 senior convertible notes was valued at \$285.1 million and \$338.3 million, respectively, based on the quoted fair market value of the debt.

As of December 31, 2011 and 2010, the fair value of our \$8.8 million 1.25% fixed rate 2004 senior convertible notes was valued at \$8.6 million and \$9.0 million, respectively, based on the quoted fair market value of the debt.

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)****4. INVESTMENTS**

As of December 31, 2011 and 2010, our available-for-sale securities consisted of the following (in thousands):

	Cost	Gross Unrealized Losses			Fair Value	Maturities/Reset Dates		
		Gross Unrealized Gains	Less than 12 Months	Greater than 12 Months		Less than 12 Months	Greater than 12 Months	
Balance as of December 31, 2011								
U.S. government sponsored entities	\$ 26,000	\$ 4	\$ (5)	\$ 0	\$ 25,999	\$ 20,004	\$ 5,995	
Corporate bonds	176,797	374	(610)	0	176,561	63,452	113,109	
Asset backed securities	20,795	2	(8)	0	20,789	20,789	0	
Market basis equity investments	1,566	0	0	0	1,566	0	1,566	
Auction Rate Securities	71,525	0	0	(6,187)	65,338	0	65,338	
Total available-for-sale securities	\$ 296,683	\$ 380	\$ (623)	\$ (6,187)	\$ 290,253	\$ 104,245	\$ 186,008	
Balance as of December 31, 2010								
Certificates of deposit	\$ 93	\$ 0	\$ 0	\$ 0	\$ 93	\$ 93	\$ 0	
U.S. government sponsored entities	35,021	2	(58)	0	34,965	34,965	0	
Corporate bonds	122,132	97	(285)	0	121,944	8,330	113,614	
Asset backed securities	6,033	0	(6)	0	6,027	6,027	0	
Market basis equity investments	3,818	0	0	0	3,818	0	3,818	
Auction Rate Securities	90,600	0	0	(6,922)	83,678	0	83,678	
Total available-for-sale securities	\$ 257,697	\$ 99	\$ (349)	\$ (6,922)	\$ 250,525	\$ 49,415	\$ 201,110	

We consider the fair value decline of our investments in U.S. government sponsored entities, corporate bonds and asset backed securities to be temporary, as we do not intend to sell the investments and it is not likely that we will be required to sell the investments before recovery of their amortized cost basis. See Note 3 Fair Value Measurements, regarding the fair value decline in auction rate securities.

Realized gains or losses on investments are recorded in our Consolidated Statements of Operations within Other income (expense), net. In 2011, 2010 and 2009, our proceeds on sales of investment equaled par value. Upon the sale of a security classified as available for sale, the amount reclassified out of Accumulated other comprehensive income (loss) into earnings is based on the specific identification method. We reclassified \$2.2 million, \$0.4 million and \$0.9 million from Accumulated other comprehensive income (loss) to net assets in relation to securities settled at par within 2011, 2010 and 2009, respectively. Realized gains and losses on sales of investments were a gain of \$0.6 million in 2011. Realized losses on sales of investments were immaterial in 2010 and 2009.

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)****5. GOODWILL AND INTANGIBLE ASSETS***Goodwill*

The changes in the net carrying amount of goodwill for the years ended December 31, 2011 and 2010 are as follows (in thousands):

	Total
Balance as of December 31, 2009	\$ 279,538
Goodwill from acquisitions and earn-outs	13,239
Adjustments from foreign currency translation	(8,837)
Balance as of December 31, 2010	\$ 283,940
Goodwill from acquisitions and earn-outs	0
Adjustments from foreign currency translation	(2,082)
Balance as of December 31, 2011	\$ 281,858

Intangible Assets

We amortize certain definite lived intangibles over their useful lives. Useful lives are based on our estimates of the period of time over which the assets will generate revenue or benefit our business. We review assets with definite lives for impairment whenever events or changes in circumstances indicate that the value we are carrying on our financial statements for an asset may not be recoverable. Our evaluation considers non-financial data such as changes in the operating environment and business strategy, competitive information, market trends and operating performance. If there are indications that an impairment may have occurred, we compare an undiscounted cash flow analysis to the carrying value of the assets. If the carrying amount of the asset exceeds the undiscounted cash flows, we measure the amount of the impairment by comparing the carrying amount of the asset to its fair value. Due to changes in our business strategy in 2011, we determined that an indicator of impairment existed for certain intangible assets and a \$9.4 million impairment was recorded to reduce the book carrying values of certain customer relationship, trade name, technology, and non-compete agreements. These intangible assets were established in the purchase accounting of our Journey Education Marketing, Inc., fatfoogoo, AG and THINK Subscription, Inc. acquisitions. The fair value was computed using an income approach that utilizes significant unobservable inputs, or Level 3 inputs in the fair value hierarchy. The adjustment was recorded in Amortization of acquisition-impairment intangibles on the Consolidated Statements of Operations for the year ended December 31, 2011. There have been no material impairments of other intangible assets for the years 2010 and 2009.

Information regarding our other intangible assets is as follows (in thousands):

	Carrying Amount Gross	As of December 31, 2011 Accumulated Amortization	Carrying Amount Net
Customer relationships	\$ 65,292	\$ 52,133	\$ 13,159
Non-compete agreements	5,136	5,136	0
Technology/tradename	33,438	28,273	5,165
Total	\$ 103,866	\$ 85,542	\$ 18,324

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)**

	Carrying Amount Gross	As of December 31, 2010 Accumulated Amortization	Carrying Amount Net
Customer relationships	\$ 71,700	\$ 47,225	\$ 24,475
Non-compete agreements	7,381	5,315	2,066
Technology/tradename	38,936	27,566	11,370
Total	\$ 118,017	\$ 80,106	\$ 37,911

Amortization expense was \$18.0 million, \$7.8 million and \$7.6 million, for the years ended 2011, 2010 and 2009, respectively.

Estimated amortization expense for the remaining life of the intangible assets, based on intangible assets as of December 31, 2011, is as follows (in thousands):

Year	
2012	\$ 6,804
2013	3,210
2014	3,178
2015	2,636
2016	1,669
Thereafter	827
Total	\$ 18,324

6. STOCK-BASED COMPENSATION***Option and Restricted Stock Awards******2007 Plan***

Our stockholders approved the Digital River, Inc. 2007 Equity Incentive Plan (the 2007 Plan) at the Company's annual stockholder meeting held on May 31, 2007. The number of shares issuable under the 2007 Plan equals 7,450,000 shares of our common stock. In addition, shares not issued under the 1998 Plan shall become available for issuance under the 2007 Plan to the extent a stock option or other stock award under the 1998 Plan expires or terminates before shares of common stock are issued under the award. Under our 2007 Equity Incentive Plan we have the flexibility to grant incentive and non-statutory stock options, restricted stock awards, restricted stock unit awards and performance shares to our directors, employees, and consultants. There were 3,532,663 shares still reserved under the plan as of December 31, 2011.

1998 Plan

The 1998 Equity Incentive Plan expired in June 2008 except as to options still outstanding under the plan.

General Stock Award Information

Edgar Filing: DIGITAL RIVER INC /DE - Form 10-K

Awards that expire or are canceled without delivery of shares generally become available for issuance under the Plan. We issue new shares to satisfy exercises and vestings of awards granted under the stock award plan. Awards typically vest over 4 years.

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)**

Options granted to employees typically expire no later than ten years after the date of grant. Incentive stock option grants must have an exercise price of at least 100% of the fair market value of a share of common stock on the grant date. Incentive stock options granted to employees who, immediately before such grant, owned stock directly or indirectly representing more than 10% of the voting power of our stock, will have an exercise price of 110% of the fair market value of a share of common stock on the grant date and will expire no later than five years from the date of grant.

A summary of the changes in outstanding options is as follows:

	Options Outstanding	Weighted Average Price Per Share
Balance, December 31, 2008	2,945,850	\$ 30.08
Granted	95,000	26.43
Exercised	(436,631)	23.02
Canceled/expired	(106,994)	36.23
Balance, December 31, 2009	2,497,225	\$ 30.91
Granted	0	0.00
Exercised	(328,717)	15.23
Canceled/expired	(231,545)	31.25
Balance, December 31, 2010	1,936,963	\$ 33.53
Granted	0	0.00
Exercised	(19,359)	18.80
Canceled/expired	(95,712)	40.71
Balance, December 31, 2011	1,821,892	\$ 33.31

The following table summarizes significant ranges of outstanding and exercisable options under our 1998 Plan and 2007 Plan as of December 31, 2011:

Exercise Price	Options Outstanding				Options Exercisable		
	Number Outstanding	Weighted Average Life Remaining	Weighted Average Price	Aggregate Intrinsic Value	Number Exercisable	Weighted Average Price	Aggregate Intrinsic Value
\$ 4.65 - \$7.55	17,821	0.5 years	\$ 5.81	\$ 164,209	17,821	\$ 5.81	\$ 164,209
9.55 - 13.92	237,099	0.6 years	12.11	688,836	237,099	12.11	688,836
16.72 - 22.98	191,402	2.2 years	22.72	0	188,402	22.78	0
23.01 - 30.69	279,851	3.6 years	28.93	0	272,851	29.04	0
31.84 - 38.41	652,069	5.6 years	33.06	0	616,411	33.09	0
40.10 - 57.36	443,650	5.1 years	53.46	0	442,150	53.50	0
\$ 4.65 - \$57.36	1,821,892	4.1 years	\$ 33.31	\$ 853,045	1,774,734	\$ 33.38	\$ 853,045

Edgar Filing: DIGITAL RIVER INC /DE - Form 10-K

The aggregate intrinsic value in the preceding table represents the total pretax intrinsic value, based on options with an exercise price less than the Company's closing stock price of \$15.02 as of December 31, 2011, which would have been received by the option holders had those option holders exercised their options as of that date. The total intrinsic value of options exercised during the years ended December 31, 2011, 2010 and 2009 were \$0.3 million, \$6.2 million and \$5.6 million, respectively, determined as of the date of exercise. The weighted average life remaining on exercisable options is 4.0 years.

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)**

Restricted stock awards are subject to forfeiture if employment terminates prior to the release of the restrictions. Performance based awards (performance shares) are subject to forfeiture if employment terminates prior to the release of the restrictions or if established performance goals are not met. During the vesting period, ownership of the shares cannot be transferred. Restricted stock and performance shares are considered issued and outstanding at the grant date and have the same dividend and voting rights as other common stock, such dividend rights are forfeitable during the vesting period. A summary of the changes in restricted stock and performance shares under our 1998 Plan and 2007 Plan as of December 31, 2011, is as follows:

	Restricted Stock and Performance Shares	Weighted Average Fair Value
Non-Vested Balance, December 31, 2008	353,362	\$ 35.45
Granted	1,286,100	26.23
Vested	(126,243)	37.32
Forfeited	(142,396)	26.90
Non-Vested Balance, December 31, 2009	1,370,823	\$ 27.52
Granted	1,260,050	27.81
Vested	(377,201)	29.35
Forfeited	(298,164)	26.56
Non-Vested Balance, December 31, 2010	1,955,508	\$ 27.50
Granted	1,014,150	32.51
Vested	(573,443)	28.23
Forfeited	(249,203)	28.95
Non-Vested Balance, December 31, 2011	2,147,012	\$ 29.50

Employee Stock Purchase Plan

We also sponsor an employee stock purchase plan under which 2,200,000 shares have been reserved for purchase by employees. The purchase price of the shares under the plan is the lesser of 85% of the fair market value on the first or last day of the offering period. Offering periods are currently every six months ending on June 30 and December 31. Employees may designate up to ten percent of their compensation for the purchase of shares under the plan. Total shares purchased by employees under the plan were 140,910, 115,710 and 113,675 in the years ended December 31, 2011, 2010 and 2009, respectively. There were 998,482 shares still reserved under the plan as of December 31, 2011.

Inducement Equity Incentive Plan

Effective on December 14, 2005, we adopted an Inducement Equity Incentive Plan (the Inducement Plan) initially for Commerce 5, Inc. executives who joined Digital River as a result of the acquisition, or other personnel who join us after the date of the Inducement Plan adoption. A total of 87,500 restricted shares of Digital River stock may be issued under the Inducement Plan, subject to vesting. In accordance with the NASDAQ rules, no stockholder approval was required for the Inducement Plan. There were 34,858 shares still reserved under the plan as of December 31, 2011.

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)****Expense Information**

The following table summarizes stock-based compensation expense, net of tax, related to employee stock options, awards and employee stock purchases recognized (in thousands):

	Year Ended December 31,		
	2011	2010	2009
Costs and expenses			
Direct cost of services	\$ 269	\$ 621	\$ 658
Network and infrastructure	1,310	997	751
Sales and marketing	8,115	6,997	6,742
Product research and development	3,099	3,145	2,439
General and administrative	9,321	9,013	7,680
Stock-based compensation included in costs and expenses	22,114	20,773	18,270
Tax benefit	(7,942)	(7,396)	(6,420)
Stock-based compensation expense, net of tax	\$ 14,172	\$ 13,377	\$ 11,850

Valuation Information

During the year ended December 31, 2009, we estimated the fair value of each stock option on the date of grant using the Black-Scholes option pricing model with the following weighted average assumptions. No stock options were granted in 2011 or 2010.

	2009
Risk-free interest rate	1.3%
Expected life (years)	3.14
Volatility factor	46%
Expected dividends	
Weighted average fair value of options granted	\$ 8.68

The risk-free interest rate assumption is based on observed interest rates appropriate for the term of our stock options. The expected life of stock options represents the weighted-average period the stock options are expected to remain outstanding and is based on historical exercise patterns. We used historical closing stock price volatility for a period equal to the expected term of the options granted. The dividend yield assumption is based on our history and expectation of future dividend payouts.

As stock-based compensation expense recognized in the Consolidated Statements of Operations is based on awards ultimately expected to vest, it has been reduced for estimated forfeitures. U.S. GAAP requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures were estimated based on historical experience.

At December 31, 2011, there was approximately \$0.3 million of total unrecognized stock-based compensation expense, adjusted for estimated forfeitures, related to unvested stock option awards that we expect to recognize over a weighted-average period of 0.4 years. At December 31, 2011, there was approximately \$37.7 million of total unrecognized stock-based compensation expense, adjusted for estimated forfeitures, related to unvested restricted stock and performance share awards that we expect to recognize over a weighted-average period of 2.5 years.

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)**

During the years ended December 31, 2011, 2010 and 2009, we estimated the fair value of stock-based compensation expense associated with our employee stock purchase plans on the date of grant using the Black-Scholes option pricing valuation model with the following weighted average assumptions:

	2011	2010	2009
Risk-free interest rate	0.1%	0.2%	0.3%
Expected life (years)	0.5	0.5	0.5
Volatility factor	36%	52%	63%
Expected dividends			
Weighted average fair value of employee stock purchase plan shares	\$ 8.38	\$ 7.62	\$ 8.90

7. INCOME TAXES

The components of pretax income are as follows (in thousands):

	Year ended December 31,		
	2011	2010	2009
United States	\$ (11,507)	\$ 9,553	\$ 27,418
International	27,118	3,720	34,378
Income (loss) before income taxes	\$ 15,611	\$ 13,273	\$ 61,796

The provision (benefit) for income taxes is composed of the following (in thousands):

	Year ended December 31,		
	2011	2010	2009
Current tax expense (benefit):			
United States federal	\$ (5,114)	\$ 1,675	\$ 12,886
State and local	(346)	435	726
International	4,126	2,548	3,647
Total current provision for income taxes	(1,334)	4,658	17,259
Deferred tax expense (benefit):			
United States federal	(278)	(5,171)	(4,021)
State and local	(17)	(325)	(230)
International	73	(1,624)	(983)
Total deferred provision (benefit) for income taxes	(222)	(7,120)	(5,234)
Income tax expense (benefit)	\$ (1,556)	\$ (2,462)	\$ 12,025

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)**

The following is a reconciliation of the difference between the actual provision for income taxes and the provision computed by applying the federal statutory rate of 35% to income before income taxes (in thousands):

	Year ended December 31,		
	2011	2010	2009
Tax expense at statutory rate	\$ 5,464	\$ 4,646	\$ 21,629
State taxes, net of federal benefit	(262)	72	496
International rate differential	(7,901)	(1,364)	(9,662)
Tax credits	(661)	(8,612)	(484)
Nondeductible expense and other	1,115	842	(8)
Valuation allowance release	(84)	(974)	(305)
Adjustment for unrecognized tax benefits	773	2,928	359
Income tax expense (benefit)	\$ (1,556)	\$ (2,462)	\$ 12,025

Deferred income taxes reflect the tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of deferred income taxes are as follows (in thousands):

	2011	2010
Deferred tax assets:		
Net operating loss and credit carryforwards	\$ 11,101	\$ 6,641
Nondeductible reserves and accruals	28,331	28,456
Depreciation and amortization	7,522	3,716
Valuation allowance	(3,812)	(816)
Total deferred tax assets	43,142	37,997
Deferred tax liabilities:		
Depreciation	(6,201)	(2,054)
Other intangibles	(9,633)	(11,657)
Total deferred tax liabilities	(15,834)	(13,711)
Net deferred tax assets	\$ 27,308	\$ 24,286

As of December 31, 2011, we had a U.S. tax loss carryback/carryforward of approximately \$32.2 million, of which \$17.6 million can offset prior U.S. taxable income and \$14.6 million can be carried forward to offset future U.S. taxable income. The tax losses consist of U.S. net operating losses of \$18.8 million and acquired U.S. net operating losses of \$13.4 million. The U.S. tax loss carryforwards expire in the years 2015 through 2031. As of December 31, 2011, we also had foreign tax loss carryforwards of approximately \$9.0 million, consisting primarily of acquired foreign net operating losses. The foreign loss carryforwards do not expire under current law.

There is uncertainty of future realization of some of the deferred tax assets resulting from tax loss carryforwards due to anticipated limitations. Therefore, a valuation allowance was recorded against the tax effect of such tax loss carryforwards, including a portion of state net operating losses and all foreign net operating losses. At December 31, 2011, the Company had a valuation allowance on approximately \$3.6 million of

Edgar Filing: DIGITAL RIVER INC /DE - Form 10-K

deferred tax assets related to operating losses and \$0.2 million of deferred tax assets related to other tax attributes as we believe it is more likely than not that these deferred tax assets will not be realized. Any future release of this valuation allowance will reduce expense.

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)**

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows (in thousands):

Balance as of December 31, 2008	\$ 6,395
Increases for tax positions taken during current year	1,791
Increases for tax positions taken during prior years	10
Decreases for tax positions taken during prior years	(983)
Decreases as a result of settlements with taxing authorities	(639)
Balance as of December 31, 2009	\$ 6,574
Increases for tax positions taken during current year	4,195
Decreases for tax positions taken during prior years	(265)
Decreases for expiration of statute of limitations	(93)
Decreases as a result of settlements with taxing authorities	(385)
Balance as of December 31, 2010	\$ 10,026
Increases for tax positions taken during current year	252
Increases for tax positions taken during prior years	2,843
Decreases for tax positions taken during prior years	(842)
Decreases for expiration of statute of limitations	(1,385)
Decreases as a result of settlements with taxing authorities	(225)
Balance as of December 31, 2011	\$ 10,669

All of these unrecognized tax benefits would affect our effective tax rate if recognized. We recognize interest and penalties related to uncertain tax positions in income tax expense. We had approximately \$0.5 million and \$0.4 million of accrued interest and penalties related to uncertain tax positions at December 31, 2011 and 2010, respectively. Interest on unrecognized tax benefits was \$0.1 million, (\$0.5) million, and \$0.1 million in years 2011, 2010, and 2009.

The Company and its subsidiaries file income tax returns in U.S. federal and various state jurisdictions, and foreign jurisdictions. The tax years 2006-2010 remain open to examination by the major taxing jurisdictions to which we are subject. During the year, the IRS completed an examination of the Company's 2009 U.S. tax return. Due to the potential resolution of examinations currently being performed by taxing authorities, and the expiration of various statutes of limitation, it is reasonably possible that our gross unrecognized tax benefits balance may change within the next twelve months by a range of zero to \$1.5 million. Beyond this estimate, it is not practical to determine the timing of any cash flows related to these uncertain tax positions.

No provision has been made for federal income taxes on approximately \$142.9 million of our foreign subsidiaries undistributed earnings as of December 31, 2011, since we plan to indefinitely reinvest all such earnings. If these earnings were distributed to the U.S. in the form of dividends or otherwise, we would be subject to U.S. income taxes on such earnings. The amount of U.S. income taxes would be subject to adjustment for foreign tax credits and for the impact of the step-up in the basis of assets resulting from elections made at the time of acquisitions. If these earnings were to be distributed, the income tax liability would be approximately \$36.6 million. During 2010, we repatriated approximately \$26 million of earnings from our German subsidiary, resulting in a U.S. tax benefit driven by the generation of excess foreign tax credits. This was a one-time distribution as we indefinitely reinvest all remaining foreign earnings.

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)****8. COMMITMENTS AND CONTINGENCIES***Leases*

We currently have 40 facility leases in addition to leasing certain computer equipment under non-cancelable operating leases. Total rent expense, including common area maintenance charges, recognized under all leases was \$8.5 million, \$7.3 million and \$7.4 million for the years ended December 31, 2011, 2010 and 2009, respectively. We did not incur contingent or sublease rental expense in 2011, 2010 or 2009. The minimum annual rent payments under long-term leases at December 31, 2011, were as follows (in thousands):

Year ending December 31,	Lease Obligations
2012	\$ 5,823
2013	5,890
2014	4,060
2015	3,678
2016	3,602
Thereafter	17,477
Total future minimum obligations	\$ 40,530

In 2010, we entered into an operating lease agreement for our headquarter office space in Minnetonka, MN. The operating lease contains a ten year term and commenced in the second quarter of 2011. We have a right to renew the term for a single five year period subsequent to the original term. Significant provisions of the lease include a rent holiday for the first eighteen months of occupancy, subsequent rent escalations and leasehold improvement allowances. The rent holiday and escalations will be amortized over the life of the agreement. Leasehold improvement allowances will be classified as a reduction to rent and will be recorded as a function of property and equipment, net, with amortization recorded over the life of the lease. There are no other unusual provisions or conditions, such as contingent rent payments or rent concessions.

Litigation

DDR Holdings, LLC (DDR Holdings) has brought a claim against us and several other defendants regarding U.S. Patents No. 6,629,135 (the 135 patent) and 6,993,572 (the 572 patent), which are owned by DDR Holdings. These patents claim e-commerce outsourcing systems and methods relating to the provision of outsourced e-commerce support pages having a common look and feel with a host s website. The case was filed in the U.S. District Court for the Eastern District of Texas on January 31, 2006. The complaint seeks injunctive relief, declaratory relief, damages and attorneys fees. We have denied infringement of any valid claim of the patents-in-suit, and have asserted counter-claims which seek a judicial declaration that the patents are invalid and not infringed. After a delay due to DDR Holdings request for re-examination of the 135 and 572 patents, in October 2010 the Court granted DDR Holdings unopposed motion to lift the stay in the litigation. Digital River and DDR are currently engaged in the discovery phase of the litigation. We intend to vigorously defend ourselves in the DDR Holdings matter, however, no assurances can be given at this time as to the ultimate outcome of this case, or the range of potential loss should the outcome be unfavorable.

In December 2010, a lawsuit was filed against a number of software companies, including us, by Uniloc USA, Inc. and Uniloc Singapore Private Limited in the United States District Court for the Eastern District of Texas. The complaint seeks monetary damages in unspecified amounts and permanent injunction based upon

Table of Contents

DIGITAL RIVER, INC.

Notes to Consolidated Financial Statements (Continued)

claims for alleged patent infringement. We are at an early stage of this matter. While we intend to vigorously defend this matter, we cannot predict the timing or ultimate outcome, nor estimate a range of loss, if any, for this matter.

We are subject to legal proceedings, claims and litigation arising in the ordinary course of business. While the final outcome of these matters is currently not determinable, we believe there is no ordinary course litigation pending against us that is likely to have, individually or in the aggregate, a material effect on our consolidated financial position, results of operation, stockholders' equity or cash flows. Because of the uncertainty inherent in litigation, it is possible that unfavorable resolutions of these lawsuits, proceedings and claims could exceed the amount we have currently reserved for these matters.

From time to time, we are involved in other disputes or regulatory inquiries that arise in the ordinary course of business. Any claims or regulatory actions against us, whether meritorious or not, could be time consuming, result in costly litigation, damage awards, injunctive relief or increased costs of doing business through adverse judgment or settlement, require us to change our business practices in expensive ways, require significant amounts of management time, result in the diversion of significant operational resources or otherwise harm our business. These matters are subject to inherent uncertainties and management's view of these matters may change in the future.

Third parties have from time-to-time claimed, and others may claim in the future, that we have infringed their intellectual property rights. We have been notified of several potential patent disputes, and expect that we will increasingly be subject to patent infringement claims as our services expand in scope and complexity. We have in the past been forced to litigate such claims. We may also become more vulnerable to third-party claims as laws, such as the Digital Millennium Copyright Act, the Lanham Act and the Communications Decency Act are interpreted by the courts and as we expand geographically into jurisdictions where the underlying laws with respect to the potential liability of online intermediaries like ourselves are either unclear or less favorable. These claims, whether meritorious or not, could be time consuming and costly to resolve, cause service upgrade delays, require expensive changes in our methods of doing business, or could require us to pay damages or enter into costly royalty or licensing agreements.

Indemnification Provisions

In the ordinary course of business we have included limited indemnification provisions in certain of our agreements with parties with whom we have commercial relations. Under these contracts, we generally indemnify, hold harmless and agree to reimburse the indemnified party for losses suffered or incurred by the indemnified party in connection with claims by any third party with respect to our domain names, trademarks, logos and other branding elements to the extent that such marks are applicable to our performance under the subject agreement. In certain agreements, including both agreements under which we have developed technology for certain commercial parties and agreements with our clients, we have provided an indemnity for other types of third-party claims. To date, no significant costs have been incurred, either individually or collectively, in connection with our indemnification provisions.

In addition, we are required by our credit card processors to comply with credit card association operating rules, and we have agreed to indemnify our processors for any fines they are assessed by credit card associations as a result of processing payments for us. The credit card associations and their member banks set and interpret the credit card rules. Visa, MasterCard, American Express or Discover could adopt new operating rules or re-interpret existing rules that we or our credit card processors might find difficult to follow. We also could be subject to fines or increased fees from MasterCard and Visa.

Table of Contents

DIGITAL RIVER, INC.

Notes to Consolidated Financial Statements (Continued)

Commitments and Guarantees

At certain times, we enter into agreements where a letter of credit is required to ensure payment of future obligations by counterparties, such as our credit card processors and international taxing jurisdictions. Upon withdrawal, we are obligated to fund the executor bank on demand. We have not set aside specific funds to cover this potential obligation as we can generally recover these costs from our clients. If drawn upon, we expect to fund this commitment with cash and cash equivalents. There was \$3.3 million and \$0.3 million in undrawn letters of credit at December 31, 2011, and 2010, respectively.

9. DEBT

2010 Senior Convertible Notes

On November 1, 2010, we sold and issued \$345.0 million in aggregate principal amount of senior convertible notes (2010 Notes), in a private, unregistered offering. The 2010 Notes are unsecured obligations and rank equally with all of our existing and future senior unsecured debt. The 2010 Notes were sold at 100% of their principal amount. The 2010 Notes bear interest at the rate of 2.00% per annum from the date of issuance, payable semi-annually on May 1 and November 1, commencing on May 1, 2011. The 2010 Notes will mature, unless earlier repurchased, redeemed or converted in accordance with their terms, on November 1, 2030.

Holders have the right to convert some or all of the 2010 Notes at any time prior to the maturity date into shares of our common stock at the initial conversion rate of 20.3537 shares per \$1,000 in principal amount of the 2010 Notes, which is equal to an initial conversion price of approximately \$49.13 per share. At the initial conversion rate, assuming the conversion of all \$345.0 million in aggregate principal amount, the 2010 Notes may be converted into approximately 7,022,027 shares of our common stock. We will adjust the conversion price if certain events occur, as specified in the related indenture, such as the issuance of our common stock as a dividend or distribution or the occurrence of a stock subdivision or combination. If we undergo certain types of fundamental changes, as defined in the indenture, on or before November 1, 2015, we will be required to pay a fundamental change make-whole premium on 2010 Notes converted in connection with such make-whole fundamental change by increasing the conversion rate. The amount of the fundamental change make-whole premium, if any, will be based on our common stock price and the effective date of the make-whole fundamental change.

At any time on or after November 1, 2015, and prior to the maturity date, we may redeem for cash some or all of the 2010 Notes at a redemption price equal to 100% of the principal amount of the 2010 Notes to be redeemed, plus accrued and unpaid interest to, but excluding, the redemption date.

Holders have the right to require us to repurchase some or all of their 2010 Notes for cash on each of November 1, 2015, November 1, 2020 and November 1, 2025, at a repurchase price equal to 100% of the principal amount of the 2010 Notes to be repurchased, plus accrued and unpaid interest to, but excluding, the relevant repurchase date. If we undergo certain types of fundamental changes prior to the maturity date, holders of the 2010 Notes will have the right, at their option, to require us to repurchase some or all of their 2010 Notes at a repurchase price equal to 100% of the principal amount of the 2010 Notes being repurchased, plus accrued and unpaid interest to, but excluding, the repurchase date.

Proceeds from the 2010 Note were used to fund a \$35.0 million common stock repurchase buy-back program completed in 2010 and the remainder of the net proceeds from the sale will be used for general corporate and strategic purposes.

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)****2004 Senior Convertible Notes**

In 2004, we sold and issued \$195.0 million in aggregate principal amount of 1.25% senior convertible notes due January 1, 2024 (2004 Notes), in a private, unregistered offering. The 2004 Notes were sold at 100% of their principal amount. On January 5, 2009, we announced that holders of 95.5% of the 2004 Notes exercised the option to require us to repurchase those Notes on January 2, 2009, at a purchase price of 100.25% of the principal amount of each tendered 2004 Note. Notes with an aggregate principal amount of approximately \$8.8 million remain outstanding. Holders of the remaining outstanding 2004 Notes have the right to require us to repurchase their 2004 Notes prior to maturity on January 1, 2014 and 2019.

We are required to pay interest on the 2004 Notes on January 1 and July 1 of each year so long as the 2004 Notes are outstanding. The 2004 Notes bear interest at a rate of 1.25% and, if specified conditions are met, are convertible into our common stock at a conversion price of \$44.063 per share. The 2004 Notes may be surrendered for conversion under certain circumstances, including the satisfaction of a market price condition, such that the price of our common stock reaches a specified threshold; the satisfaction of a trading price condition, such that the trading price of the 2004 Notes falls below a specified level; the redemption of the 2004 Notes by us, the occurrence of specified corporate transactions, as defined in the related indenture; and the occurrence of a fundamental change, as defined in the related indenture. The initial conversion price is equivalent to a conversion rate of approximately 22.6948 shares per \$1,000 of principal amount of the 2004 Notes. We will adjust the conversion price if certain events occur, as specified in the related indenture, such as the issuance of our common stock as a dividend or distribution or the occurrence of a stock subdivision or combination.

We incurred interest expense of \$9.0 million, \$1.7 million and \$5.3 million in 2011, 2010 and 2009, respectively, related to our senior convertible notes.

10. STOCKHOLDERS EQUITY**Share Repurchase Program**

Set forth below is information regarding the Company's stock repurchases during 2011 and 2010. No stock repurchases were made in 2009.

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plan	Approximate dollar value of shares that may yet be purchased under the plan (in millions)
2010	943,881	\$ 37.08	943,881	\$ 0.0
2011	4,265,168	\$ 18.70	4,265,168	\$ 20.2
Total	5,209,049		5,209,049	

11. EMPLOYEE BENEFIT PLAN**401K Plan**

We have a defined contribution 401(k) retirement plan for eligible employees. Employees may contribute up to 15% of their pretax compensation to the plan, with us providing a discretionary match of up to 50% of the total employee contribution. Amounts charged to expense related to our matching contributions were \$1.1 million, \$2.7 million and \$2.3 million in 2011, 2010 and 2009, respectively.

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)****12. SEGMENT INFORMATION**

We view our operations and manage our business as one reportable segment, providing outsourced commerce solutions globally to a variety of companies, primarily in the software and high-tech products markets. Factors used to identify our single operating segment include the financial information available for evaluation by the chief operating decision maker in making decisions about how to allocate resources and assess performance. We market our products and services through our offices in the United States and our wholly-owned branches and subsidiaries operating in Austria, Brazil, China, Germany, Korea, Ireland, Japan, Luxembourg, Mexico, Singapore, Sweden, Taiwan and the United Kingdom.

Sales to international customers accounted for 46.2%, 46.4% and 41.1% of revenue for 2011, 2010 and 2009, respectively. Sales are attributed to a geographic region based on the ordering location of the customer. Summarized revenue information by region is outlined below (dollars in thousands). If revenue earned in any individual country exceeds 10% of the revenue reported for the period, the country is separately listed. The remaining balance is segregated to Europe and other. Currently, no non-U.S country exceeds the 10% threshold.

	2011	2010	2009
United States	\$ 214,199	\$ 194,689	\$ 237,726
Europe	121,433	110,784	109,329
Other	62,508	57,753	56,711
Total	\$ 398,140	\$ 363,226	\$ 403,766

Microsoft Corporation accounted for approximately 27.7%, 24.7% and 11.8% of our revenue in 2011, 2010 and 2009, respectively.

Symantec Corporation accounted for approximately 6.9% and 28.4% of our total revenue in 2010 and 2009, respectively. We had minimal Symantec related revenue in 2011.

The following table presents selected asset information by geographic area based on the physical location of the assets (in thousands). If assets in any individual country exceed 10% of the assets reported for the period, the country is separately listed. The remaining balance is segregated to Europe and other. Currently, no non-U.S country exceeds the 10% threshold.

	2011		2010	
	United States	Europe and Other	United States	Europe and Other
Total property and equipment	\$ 131,701	\$ 19,475	\$ 121,743	\$ 18,532
Accumulated depreciation	(84,241)	(15,398)	(76,995)	(13,681)
Net property and equipment	\$ 47,460	\$ 4,077	\$ 44,748	\$ 4,851

Table of Contents**DIGITAL RIVER, INC.****Notes to Consolidated Financial Statements (Continued)****13. QUARTERLY FINANCIAL DATA (UNAUDITED)**

The following tables contain selected unaudited statement of operations information for each quarter of 2011 and 2010. The following information reflects all normal recurring adjustments necessary for a fair presentation of the information for the periods presented. The operating results for any quarter are not necessarily indicative of results for any future period.

Unaudited quarterly results of operations are as follows (in thousands, except per share data):

	Quarter Ended			
	March 31	June 30	September 30	December 31
2011				
Revenue	\$ 98,185	\$ 92,520	\$ 95,411	\$ 112,024
Direct cost of services(1)	4,163	3,856	3,663	3,809
Network and infrastructure(1)	12,612	12,477	12,017	12,327
Income (loss) from operations	9,801	(42)	4,797	5,894
Net income (loss)	7,019	291	5,518	4,339
Net income (loss) per share basic	\$ 0.19	\$ 0.01	\$ 0.15	\$ 0.12
Net income (loss) per share diluted	\$ 0.18	\$ 0.01	\$ 0.15	\$ 0.12

	Quarter Ended			
	March 31	June 30	September 30	December 31
2010				
Revenue	\$ 98,726	\$ 81,832	\$ 84,987	\$ 97,681
Direct cost of services(1)	4,637	4,356	4,548	4,248
Network and infrastructure(1)	11,432	12,118	11,146	12,213
Income (loss) from operations	8,127	(5,495)	2,478	7,883
Net income (loss)	6,967	(2,480)	5,861	5,387
Net income (loss) per share basic	\$ 0.19	\$ (0.07)	\$ 0.16	\$ 0.14
Net income (loss) per share diluted	\$ 0.18	\$ (0.07)	\$ 0.15	\$ 0.14

(1) Gross profit is calculated as revenue less direct cost of services and network and infrastructure expenses and excludes depreciation and amortization expense

None.

ITEM 9A. CONTROLS AND PROCEDURES***Evaluation of Disclosure Controls and Procedures***

We are committed to maintaining disclosure controls and procedures designed to ensure that information required to be disclosed in our periodic reports filed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of December 31, 2011. The term "disclosure controls and procedures" means controls and other procedures that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that such information is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate, to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives, and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on their evaluation of our disclosure controls and procedures as of December 31, 2011, our Chief Executive Officer and our Chief Financial Officer concluded that as of that date, our disclosure controls were effective at the reasonable assurance level.

Management's Annual Report on Internal Control over Financial Reporting

Our management, including the Chief Executive Officer and Chief Financial Officer, is responsible for establishing and maintaining an adequate system of internal control over financial reporting. This system of internal accounting controls is designed to provide reasonable assurance that assets are safeguarded, transactions are properly recorded and executed in accordance with management's authorization and financial statements are prepared in accordance with generally accepted accounting principles. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within our company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Management conducted an evaluation, under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the system of internal control over financial reporting based on the framework in Internal Control - Integrated Framework issued by the

Table of Contents

Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation, management concluded that our internal control over financial reporting was effective as of December 31, 2011, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Ernst & Young LLP, an independent registered public accounting firm, has audited the effectiveness of our internal control over financial reporting as of December 31, 2011, as stated in their report in which they expressed an unqualified opinion, which is included herein.

Changes in Internal Control over Financial Reporting

We have been converting to a new enterprise resource planning (ERP) system. Implementation of the ERP system has occurred in phases. During the year ended December 31, 2011, no new phases of the new ERP system were implemented. There were no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act) during the year ended December 31, 2011, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Digital River, Inc.

We have audited Digital River, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Digital River, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on Digital River, Inc.'s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Digital River, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Digital River, Inc. and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2011, of Digital River, Inc. and subsidiaries and our report dated February 27, 2012, expressed an unqualified opinion thereon.
