NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

(Unaudited)

1. BASIS OF PRESENTATION

Basis of Presentation

The accompanying unaudited consolidated condensed financial statements of Protective Life Corporation and subsidiaries (the Company) have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the disclosures required by GAAP for complete financial statements. In the opinion of management, the accompanying financial statements reflect all adjustments (consisting only of normal recurring items) necessary for a fair statement of the results for the interim periods presented. Operating results for the three and six month periods ended June 30, 2013, are not necessarily indicative of the results that may be expected for the year ending December 31, 2013. The year-end consolidated condensed financial data was derived from audited financial statements but does not include all disclosures required by GAAP. For further information, refer to the consolidated financial statements and notes thereto included in the Company s Annual Report on Form 10-K for the year ended December 31, 2012.

The operating results of companies in the insurance industry have historically been subject to significant fluctuations due to changing competition, economic conditions, interest rates, investment performance, insurance ratings, claims, persistency, and other factors.

Reclassifications and Accounting Changes

Certain reclassifications have been made in the previously reported financial statements and accompanying notes to make the prior year amounts comparable to those of the current year. Such reclassifications had no effect on previously reported net income or shareowners equity.

Entities Included

The consolidated condensed financial statements include the accounts of Protective Life Corporation and subsidiaries and its affiliate companies in which the Company holds a majority voting or economic interest. Intercompany balances and transactions have been eliminated.

During the first quarter of 2013, the Company sold its ownership interest in an immaterial limited partnership which previously resulted in the recognition of a non-controlling interest in income and equity of the Company.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Significant Accounting Policies

For a full description of significant accounting policies, see Note 2 to consolidated financial statements included in the Company s Annual Report on Form 10-K for the year ended December 31, 2012. There were no significant changes to the Company s accounting policies during the six months ended June 30, 2013 other than those discussed below.

Investment Products

The Company establishes liabilities for fixed indexed annuity (FIA) products. These products are deferred fixed annuities with a guaranteed minimum interest rate plus a contingent return based on equity market performance. The FIA product is considered a hybrid financial instrument under the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC or Codification) Topic 815 *Derivatives and Hedging* which allows the Company to make the election to value the liabilities of these FIA products at fair value. This election

Table of Contents

was made for the FIA products issued prior to 2010 as the policies were issued. These products are no longer being marketed. The changes in the fair value of the liability for these FIA products are recorded in *Benefit and settlement expenses* with the liability being recorded in *Annuity account balances*. For more information regarding the determination of fair value of annuity account balances please refer to Note 13, *Fair Value of Financial Instruments*. *Premiums and policy fees* for these FIA products consist of fees that have been assessed against the policy account balances for surrenders. Such fees are recognized when assessed and earned.

During 2013, the Company began marketing a new FIA product. These products are also deferred fixed annuities with a guaranteed minimum interest rate plus a contingent return based on equity market performance and are considered hybrid financial instruments under the FASB s ASC Topic 815 *Derivatives and Hedging*. The Company did not elect to value these FIA products at fair value, as a result the Company accounts for the provision that provides for a contingent return based on equity market performance as an embedded derivative. The embedded derivative is bifurcated from the host contract and recorded at fair value in *Other liabilities*. Changes in the embedded derivative are recorded in *Realized investment gains (losses) Derivative financial instruments*. For more information regarding the determination of fair value of the FIA embedded derivative refer to Note 13, *Fair Value of Financial Instruments*. The host contract is accounted for as a debt instrument in accordance with ASC Topic 944 *Financial Services Insurance* and is recorded in *Annuity account balances* with any discount to the minimum account value being accreted using the effective yield method. *Benefits and settlement expenses* include accreted interest and benefit claims incurred during the period.

Accounting Pronouncements Recently Adopted

ASU No. 2011-11 Balance Sheet Disclosures about Offsetting Assets and Liabilities. This Update contains new disclosure requirements regarding the nature of an entity s rights of offset and related arrangements associated with its financial and derivative instruments. The new disclosures are designed to make financial statements that are prepared under GAAP more comparable to those prepared under IFRSs. Generally, it is more difficult to qualify for offsetting under IFRSs than it is under GAAP. As a result, entities with significant financial instrument and derivative portfolios that report under IFRSs typically present positions on their balance sheets that are significantly larger than those of entities with similarly sized portfolios whose financial statements are prepared in accordance with GAAP. To facilitate comparison between financial statements prepared under GAAP and IFRSs, the new disclosures will give financial statement users information about both gross and net exposures. In January 2013, the FASB issued ASU No. 2013-01, which clarifies that application of ASU No. 2011-11 is limited to certain derivatives, repurchase and reverse repurchase agreements, and securities borrowing and lending transactions. Both Updates were effective January 1, 2013. Neither Update had an impact on the Company s results of operations or financial position.

ASU No. 2012-02 Intangibles Goodwill and Other Testing Indefinite-Lived Intangible Assets for Impairment. This Update is intended to reduce the complexity and cost of performing an impairment test for indefinite-lived intangible assets by allowing an entity the option to make a qualitative evaluation about the likelihood of impairment prior to the quantitative calculation required by current guidance. Under the amendments to Topic 350, an entity has the option to first assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test. If an entity determines it is not more likely than not that impairment exists, quantitative impairment testing is not required. However, if an entity concludes otherwise, the impairment test outlined in current guidance is required to be completed. The Update does not change the current requirement that indefinite-lived intangible assets be reviewed for impairment at least annually. This Update was effective January 1, 2013. This Update did not have an impact on the Company s results of operations or financial position.

ASU No. 2013-02 Comprehensive Income Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. The amendments in this Update supersede the presentation requirements for reclassifications out of accumulated other comprehensive income in ASU No. 2011-05, Comprehensive Income Presentation of Comprehensive Income, and ASU No. 2011-12, Comprehensive Income Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in

Accounting Standards Update No. 2011-05, for all entities. The amendments do not change the current requirements for reporting net income or other comprehensive income in financial statements. The Update requires an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under GAAP to be reclassified in its

Table of Contents

entirety to net income. For other amounts that are not required under GAAP to be reclassified in their entirety in the same reporting period, an entity is required to cross-reference other disclosures required under GAAP that provide additional detail about those amounts. The Company has added the Accumulated Other Comprehensive Income footnote to disclose the required information beginning in the first quarter of 2013. This Update was effective January 1, 2013. This Update did not have an impact on the Company s results of operations or financial position.

Accounting Pronouncements Not Yet Adopted

ASU No. 2013-10 Derivatives and Hedging Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedge Accounting Purposes. This Update provides for the inclusion of the Fed Funds Effective Swap Rate (OIS) as a U.S. benchmark interest rate for hedge accounting purposes, in addition to U.S. Treasury rates and LIBOR. The amendments in the Update also remove the restriction on using different benchmark rates for similar hedges. The amendments are effective prospectively for transactions entered into on or after July 17, 2013. The Company is currently evaluating the impact of the Update on its policies and processes.

ASU No. 2013-11 Income Taxes Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists. The objective of this Update is to eliminate diversity in practice related to the presentation of certain unrecognized tax benefits. The Update provides that unrecognized tax benefits should be presented as a reduction of a deferred tax asset for a net operating loss or other tax credit carryforward when settlement in this manner is available under the tax law. The amendments are effective for annual periods beginning after December 15, 2013 and interim periods therein. The Update does not require new recurring disclosures, and is not expected to have an impact on the Company s results of operations or financial position.

3. INVESTMENT OPERATIONS

Net realized gains (losses) for all other investments are summarized as follows:

	For ' Three Mon June	ths En	ded		For ' Six Montl June	ded

Equity securities	2,366		148		2,367		148	
Impairments on fixed maturity securities	(2,910)		(13,608)		(6,497)		(32,372)	
Impairments on equity securities	(1,090)				(2,087)			
Modco trading portfolio	(126,694)		56,063		(142,022)		74,162	
Other investments	(4,802)		(6,612)		(5,929)		(9,031)	
Total realized gains (losses) - investments	\$ (113,978)	\$	51,985	\$	(122,707)	\$	68,947	

For the three and six months ended June 30, 2013, gross realized gains on investments available-for-sale (fixed maturities, equity securities, and short-term investments) were \$23.9 million and \$36.8 million and gross realized losses were \$6.2 million and \$11.1 million, including \$3.8 million and \$8.2 million of impairment losses, respectively.

For the three and six months ended June 30, 2012, gross realized gains on investments available-for-sale (fixed maturities, equity securities, and short-term investments) were \$16.2 million and \$39.4 million and gross realized losses were \$13.6 million and \$35.4 million, including \$13.5 million and \$32.2 million of impairment losses, respectively.

For the three and six months ended June 30, 2013, the Company sold securities in an unrealized gain position with a fair value (proceeds) of \$409.9 million and \$798.5 million, respectively. The gain realized on the sale of these securities was \$23.9 million and \$36.8 million, respectively. For the three and six months ended June 30, 2012, the Company sold securities in an unrealized gain position with a fair value (proceeds) of \$411.8 million and \$900.1 million, respectively. The gain realized on the sale of these securities was \$16.2 million and \$39.4 million, respectively.

Table of Contents

For the three and six months ended June 30, 2013, the Company sold securities in an unrealized loss position with a fair value (proceeds) of \$53.2 million and \$57.2 million, respectively. The losses realized on the sale of these securities were \$2.4 million and \$3.0 million, respectively.

For the three and six months ended June 30, 2012, the Company sold securities in an unrealized loss position with a fair value (proceeds) of \$0.3 million and \$17.5 million, respectively. The losses realized on the sale of these securities were \$0.1 million and \$3.2 million, respectively.

Certain European countries have experienced varying degrees of financial stress. Risks from the continued debt crisis in Europe could continue to disrupt the financial markets which could have a detrimental impact on global economic conditions and on sovereign and non-sovereign obligations. There remains considerable uncertainty as to future developments in the European debt crisis and the impact on financial markets.

The amortized cost and fair value of the Company s investments classified as available-for-sale as of June 30, 2013 and December 31, 2012, are as follows:

	\$	24,531,216	\$	26,070,433	\$	335,000	\$	333,771		

During the three and six months ended June 30, 2013, the Company recorded pre-tax other-than-temporary impairments of investments of \$1.8 million and \$3.1 million, of which \$0.7 million and \$1.0 million related to debt securities and \$1.1 million and \$2.1 million related to equity securities, respectively. Credit impairments recorded in earnings during the three and six months ended June 30, 2013 were \$4.0 million and \$8.6 million, respectively. During the three and six months ended June 30, 2013, \$2.2 million and \$5.5 million of non-credit losses previously recorded in other comprehensive income were recorded in earnings as credit losses, respectively. For the three and six months ended June 30, 2013, there were no other-than-temporary impairments related to debt securities or equity securities that the Company intended to sell or expected to be required to sell.

During the three and six months ended June 30, 2012, the Company recorded pre-tax other-than-temporary impairments of investments of \$13.7 million and \$48.1 million, respectively. Of the \$13.7 million of impairments for the three months ended June 30, 2012, \$13.6 million was

recorded in earnings and \$0.1 million was recorded in other comprehensive income (loss). Of the \$48.1 million of impairments for the six months ended June 30, 2012, \$32.4 million was recorded in earnings and \$15.7 million was recorded in other comprehensive income (loss). There was an immaterial amount of impairments related to equity securities. During the three and six months ended June 30, 2012, there were no other-than-temporary impairments related to debt securities or equity securities that the Company intended to sell or expected to be required to sell.

RMBS have a gross unrealized loss greater than twelve months of \$6.5 million as of June 30, 2013. Factors such as the credit enhancement within the deal structure, the average life of the securities, and the performance of the underlying collateral support the recoverability of these investments.

The other asset-backed securities have a gross unrealized loss greater than twelve months of \$31.9 million as of June 30, 2013. This category predominately includes student-loan backed auction rate securities, the underlying collateral, of which is at least 97% guaranteed by the Federal Family Education Loan Program (FFELP). These unrealized losses have occurred within the Company s auction rate securities (ARS) portfolio since the market collapse during 2008. At this time, the Company has no reason to believe that the U.S. Department of Education would not

honor the FFELP guarantee, if it were necessary.

The corporate bonds category has gross unrealized losses less than and greater than twelve months of \$272.0 million and \$21.4 million, respectively, as of June 30, 2013. These declines were primarily related to changes in interest rates during the period. The aggregate decline in market value of these securities was deemed temporary due to positive factors supporting the recoverability of the respective investments. Positive factors considered include credit ratings, the financial health of the issuer, the continued access of the issuer to capital markets, and other pertinent information.

The equities category has a gross unrealized loss greater than twelve months of \$7.0 million as of June 30, 2013. The aggregate decline in market value of these securities was deemed temporary due to factors supporting the recoverability of the respective investments. Positive factors include credit ratings, the financial health of the issuer, the continued access of the issuer to the capital markets, and other pertinent information.

Table of Contents

The Company does not consider these unrealized loss positions to be other-than-temporary, based on the factors discussed and because the Company has the ability and intent to hold these investments until the fair values recover, and does not intend to sell or expect to be required to sell the securities before recovering the Company s amortized cost of debt securities.

The following table includes the gross unrealized losses and fair value of the Company s investments that are not deemed to be other-than-temporarily impaired, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position as of December 31, 2012:

Equities	35,059		(5,150)	21,954		(4,883)		57,013		(10,033)
	\$ 1,578,240	\$	(68,099)	\$ 794,622	\$	(72,681)	\$	2,372,862	\$	(140,780)

RMBS had a gross unrealized loss greater than twelve months of \$9.8 million as of December 31, 2012. The non-agency RMBS market experienced improvements during the year, but these losses represented securities where credit concerns were more pronounced. Factors such as the credit enhancement within the deal structure, the average life of the securities, and the performance of the underlying collateral support the recoverability of these investments.

The other asset-backed securities had a gross unrealized loss greater than twelve months of \$33.2 million as of December 31, 2012. This category predominately includes student-loan backed auction rate securities, the underlying collateral, of which is at least 97% guaranteed by the FFELP. These unrealized losses have occurred within the Company s ARS portfolio since the market collapse during 2008. At this time, the Company has no reason to believe that the U.S. Department of Education would not honor the FFELP guarantee, if it were necessary.

The corporate bonds category had gross unrealized losses greater than twelve months of \$24.8 million as of December 31, 2012. The aggregate decline in market value of these securities was deemed temporary due to positive factors supporting the recoverability of the respective investments. Positive factors considered include credit ratings, the financial health of the issuer, the continued access of the issuer to capital markets, and other pertinent information.

The equities category had a gross unrealized loss greater than twelve months of \$4.9 million as of December 31, 2012. The aggregate decline in market value of these securities was deemed temporary due to factors supporting the recoverability of the respective investments. Positive factors include credit ratings, the financial health of the issuer, the continued access of the issuer to the capital markets, and other pertinent information.

The Company does not consider these unrealized loss positions to be other-than-temporary, based on the factors discussed and because the Company has the ability and intent to hold these investments until the fair values recover, and does not intend to sell or expect to be required to sell the securities before recovering the Company s amortized cost of debt securities.

As of June 30, 2013, the Company had securities in its available-for-sale portfolio which were rated below investment grade of \$1.4 billion and had an amortized cost of \$1.4 billion. In addition, included in the Company s trading portfolio, the Company held \$356.5 million of securities which were rated below investment grade. Approximately \$423.6 million of the below investment grade securities were not publicly traded.

Table of Contents

The change in unrealized gains (losses), net of income tax, on fixed maturity and equity securities, classified as available-for-sale is summarized as follows:

Variable Interest Entities

The Company holds certain investments in entities in which its ownership interests could possibly be considered variable interests under Topic 810 of the FASB ASC (excluding debt and equity securities held as trading, available for sale, or held to maturity). The Company reviews the characteristics of each of these applicable entities and compares those characteristics to applicable criteria to determine whether the entity is a Variable Interest Entity (VIE). If the entity is determined to be a VIE, the Company then performs a detailed review to determine whether the interest would be considered a variable interest under the guidance. The Company then performs a qualitative review of all variable interests with the entity and determines whether the Company is the primary beneficiary. ASC 810 provides that an entity is the primary beneficiary of a VIE if the entity has 1) the power to direct the activities of the VIE that most significantly impact the VIE s economic performance, and 2) the obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to receive benefits from the entity that could potentially be significant to the VIE.

Based on this analysis, the Company had an interest in one wholly owned subsidiary, Red Mountain, LLC (Red Mountain), that was continued to be classified as a VIE as of June 30, 2013. The activity most significant to Red Mountain is the issuance of a note in connection with a financing transaction involving Golden Gate V Vermont Captive Insurance Company (Golden Gate V) and the Company in which Golden Gate V issued non-recourse funding obligations to Red Mountain and Red Mountain issued the note to Golden Gate V. Credit enhancement on the Red Mountain Note is provided by an unrelated third party. For details of this transaction, see Note 6, *Debt and Other Obligations*. The Company had the power, via its 100% ownership through an affiliate, to direct the activities of the VIE, but did not have the obligation to absorb losses related to the primary risks or sources of variability to the VIE. The variability of loss would be borne primarily by the third party in its function as provider of credit enhancement on the Red Mountain Note. Accordingly, it was determined that the Company is not the primary beneficiary of the VIE. The Company s risk of loss related to the VIE is limited to its investment of \$10,000. Additionally, the holding company (PLC) has guaranteed the VIE s payment obligation for the credit enhancement fee to the unrelated third party provider.

4. MORTGAGE LOANS

Mortgage Loans

The Company invests a portion of its investment portfolio in commercial mortgage loans. As of June 30, 2013, the Company s mortgage loan holdings were approximately \$4.8 billion. The Company has specialized in making loans on either credit-oriented commercial properties or credit-anchored strip shopping centers and apartments. The Company s underwriting procedures relative to its commercial loan portfolio are

based, in the Company s view, on a conservative and disciplined approach. The Company concentrates on a small number of commercial real estate asset types associated with the necessities of life (retail, multi-family, professional office buildings, and warehouses). The Company believes these asset types tend to weather economic downturns better than other commercial asset classes in which it has chosen not to participate. The Company believes this disciplined approach has helped to maintain a relatively low delinquency and foreclosure rate throughout its history.

The Company s commercial mortgage loans are stated at unpaid principal balance, adjusted for any unamortized premium or discount, and net of valuation allowances. Interest income is accrued on the principal amount

Table of Contents

of the loan based on the loan s contractual interest rate. Amortization of premiums and discounts is recorded using the effective yield method. Interest income, amortization of premiums and discounts and prepayment fees are reported in net investment income.

Many of the mortgage loans have call options or interest rate reset options between 3 and 10 years. However, if interest rates were to significantly increase, we may be unable to exercise the call options or increase the interest rates on our existing mortgage loans commensurate with the significantly increased market rates. Assuming the loans are called at their next call dates, approximately \$106.1 million would become due for the remainder of 2013, \$1.3 billion in 2014 through 2018, \$581.3 million in 2019 through 2023, and \$173.7 million thereafter.

The Company offers a type of commercial mortgage loan under which the Company will permit a loan-to-value ratio of up to 85% in exchange for a participating interest in the cash flows from the underlying real estate. As of June 30, 2013 and December 31, 2012, approximately \$705.7 million and \$817.3 million, respectively, of the Company s mortgage loans have this participation feature. Cash flows received as a result of this participation feature are recorded as interest income. During the three and six month period ended June 30, 2013, the Company recognized \$5.8 million and \$9.2 million of participating mortgage loan income, respectively.

As of June 30, 2013, approximately \$17.6 million, or 0.05%, of invested assets consisted of nonperforming, restructured or mortgage loans that were foreclosed and were converted to real estate properties. The Company does not expect these investments to adversely affect its liquidity or ability to maintain proper matching of assets and liabilities. The Company s mortgage loan portfolio consists of two categories of loans: (1) those not subject to a pooling and servicing agreement and (2) those subject to a contractual pooling and servicing agreement.

As of June 30, 2013, \$15.4 million of mortgage loans not subject to a pooling and servicing agreement were nonperforming. The Company did not foreclose any nonperforming loans during the six months ended June 30, 2013.

As of June 30, 2013, \$2.2 million of loans subject to a pooling and servicing agreement were nonperforming. None of these nonperforming loans have been restructured during the six months ended June 30, 2013. The Company did not foreclose on any nonperforming loans during the six months ended June 30, 2013.

As of June 30, 2013 and December 31, 2012, the Company had an allowance for mortgage loan credit losses of \$7.0 million and \$2.9 million, respectively. Due to the Company s loss experience and nature of the loan portfolio, the Company believes that a collectively evaluated allowance would be inappropriate. The Company believes an allowance calculated through an analysis of specific loans that are believed to have a higher risk of credit impairment provides a more accurate presentation of expected losses in the portfolio and is consistent with the applicable guidance for loan impairments in ASC Subtopic 310. Since the Company uses the specific identification method for calculating the allowance, it is necessary to review the economic situation of each borrower to determine those that have higher risk of credit impairment. The Company has a team of professionals that monitors borrower conditions such as payment practices, borrower credit, operating performance, and property conditions, as well as ensuring the timely payment of property taxes and insurance. Through this monitoring process, the Company assesses the risk of each loan. When issues are identified, the severity of the issues are assessed and reviewed for possible credit impairment. If a loss is probable, an expected loss calculation is performed and an allowance is established for that loan based on the expected loss. The expected loss is calculated as the excess carrying value of a loan over either the present value of expected future cash flows discounted at the loan s original effective interest rate, or the current estimated fair value of the loan s underlying collateral. A loan may be subsequently charged off at such point that the Company no longer expects to receive cash payments, the present value of future expected payments of the renegotiated loan is less than the current principal balance, or at such time that the Company is party to foreclosure or bankruptcy proceedings associated with the borrower and does not expect to recover the princip

Table of Contents

A charge off is recorded by eliminating the allowance against the mortgage loan and recording the renegotiated loan or the collateral property related to the loan as investment real estate on the balance sheet, which is carried at the lower of the appraised fair value of the property or the unpaid principal balance of the loan, less estimated selling costs associated with the property:

		As of								
	Ju	une 30, 2013	De	December 31, 2012						
	(Dollars In Thousands)									
Beginning balance	\$	2,875	\$	6,475						
Charge offs		(2,292)		(9,840)						
Recoveries		(374)		(628)						
Provision		6,826		6,868						
Ending balance	\$	7,035	\$	2,875						

It is the Company s policy to cease to carry accrued interest on loans that are over 90 days delinquent. For loans less than 90 days delinquent, interest is accrued unless it is determined that the accrued interest is not collectible. If a loan becomes over 90 days delinquent, it is the Company s general policy to initiate foreclosure proceedings unless a workout arrangement to bring the loan current is in place. For loans subject to a pooling and servicing agreement, there are certain additional restrictions and/or requirements related to workout proceedings, and as such, these loans may have different attributes and/or circumstances affecting the status of delinquency or categorization of those in nonperforming status. An analysis of the delinquent loans is shown in the following chart as of June 30, 2013.

					(Greater		
		-59 Days linguent		60-89 Days Delinquent		n 90 Days elinquent	D	Total elinquent
	(Dollars In Thousands)							ennquent
Commercial mortgage loans	\$	28,707	\$	2,982	\$	14,642	\$	46,331
Number of delinquent commercial mortgage loans		7		2		5		14

The Company s commercial mortgage loan portfolio consists of mortgage loans that are collateralized by real estate. Due to the collateralized nature of the loans, any assessment of impairment and ultimate loss given a default on the loans is based upon a consideration of the estimated fair value of the real estate. The Company limits accrued interest income on impaired loans to ninety days of interest. Once accrued interest on the impaired loan is received, interest income is recognized on a cash basis. For information regarding impaired loans, please refer to the following chart as of June 30, 2013 and December 31, 2012:

	 ecorded vestment	Unpaid Principal t Balance		Related Allowance (Dollars In		Average Recorded Investment Thousands)		Interest Income Recognized		In	sh Basis terest acome

GOODWILL

5.

During the six months ended June 30, 2013, the Company decreased its goodwill balance by approximately \$1.5 million. The decrease was due to adjustments in the Acquisitions segment related to tax benefits realized during 2013 on the portion of tax goodwill in excess of GAAP basis goodwill. As of June 30, 2013, the Company had an aggregate goodwill balance of \$107.0 million.

Table of Contents

Accounting for goodwill requires an estimate of the future profitability of the associated lines of business to assess the recoverability of the capitalized acquisition goodwill. The Company evaluates the carrying value of goodwill at the segment (or reporting unit) level at least annually and between annual evaluations if events occur or circumstances change that would more likely than not reduce the fair value of the reporting unit below its carrying amount. Such circumstances could include, but are not limited to: 1) a significant adverse change in legal factors or in business climate, 2) unanticipated competition, or 3) an adverse action or assessment by a regulator. When evaluating whether goodwill is impaired, the Company first determines through qualitative analysis whether relevant events and circumstances indicate that it is more likely than not that segment goodwill balances are impaired as of the testing date. If it is determined that it is more likely than not that impairment exists, the Company compares its estimate of the fair value of the reporting unit to which the goodwill is assigned to the reporting unit s carrying amount, including goodwill. The Company utilizes a fair value measurement (which includes a discounted cash flows analysis) to assess the carrying value of the reporting units in consideration of the recoverability of the goodwill balance assigned to each reporting unit as of the measurement date. The Company s material goodwill balances are attributable to certain of its operating segments (which are each considered to be reporting units). The cash flows used to determine the fair value of the Company s reporting units are dependent on a number of significant assumptions. The Company s estimates, which consider a market participant view of fair value, are subject to change given the inherent uncertainty in predicting future results and cash flows, which are impacted by such things as policyholder behavior, competitor pricing, capital limitations, new product introductions, and specific industry and market conditions. Additionally, the discount rate used is based on the Company s judgment of the appropriate rate for each reporting unit based on the relative risk associated with the projected cash flows. As of December 31, 2012, the Company performed its annual evaluation of goodwill and determined that no adjustment to impair goodwill was necessary. During the six months ended June 30, 2013, no events occurred which indicate an impairment should be recorded or which would invalidate the previous results of the Company s impairment assessment.

While adverse market conditions for certain businesses may have a significant impact on the fair value of the Company s reporting units, in the Company s view, the key assumptions used in its estimates of fair value of its reporting units continue to be adequate.

DEBT AND OTHER OBLIGATIONS

Debt and Subordinated Debt Securities

6.

Debt and subordinated debt securities are summarized as follows:

	As of						
	June 30, 2013		December 31, 2012				
	(Dollars In Thousands)						
Debt (year of issue):							
Revolving Line of Credit	\$ 360,000	\$	50,000

	\$ 540,593	\$ 540,593

The Company has access to a Credit Facility that provides the ability to borrow on an unsecured basis up to an aggregate principal amount of \$750 million. The Company has the right in certain circumstances to request that the

Table of Contents

commitment under the Credit Facility be increased up to a maximum principal amount of \$1.0 billion. Balances outstanding under the Credit Facility accrue interest at a rate equal to, at the option of the Borrowers, (i) LIBOR plus a spread based on the ratings of the Company s senior unsecured long-term debt (Senior Debt), or (ii) the sum of (A) a rate equal to the highest of (x) the Administrative Agent s prime rate, (y) 0.50% above the Federal Funds rate, or (z) the one-month LIBOR plus 1.00% and (B) a spread based on the ratings of the Company s Senior Debt. The Credit Facility also provides for a facility fee at a rate that varies with the ratings of the Company s Senior Debt and that is calculated on the aggregate amount of commitments under the Credit Facility, whether used or unused. The maturity date on the Credit Facility is July 17, 2017. The Company is not aware of any non-compliance with the financial debt covenants of the Credit Facility as of June 30, 2013. There was an outstanding balance of \$360.0 million at an interest rate of LIBOR plus 1.20% under the Credit Facility as of June 30, 2013.

During the three month period ending June 30, 2013, the Company s 4.30% Senior notes issued in 2003 matured. The maturity resulted in the payment of \$250 million of principal to the holders of the senior notes on June 3, 2013. The Company borrowed an additional \$250 million from its Credit Facility to finance the final principal payment.

Non-Recourse Funding Obligations

Golden Gate II Captive Insurance Company

Golden Gate II Captive Insurance Company (Golden Gate II), a special purpose financial captive insurance company wholly owned by Protective Life Insurance Company (PLICO), had \$575 million of outstanding non-recourse funding obligations as of June 30, 2013. These outstanding non-recourse funding obligations were issued to special purpose trusts, which in turn issued securities to third parties. Certain of our affiliates own a portion of these securities. As of June 30, 2013, securities related to \$269.9 million of the outstanding balance of the non-recourse funding obligations were held by external parties and securities related to \$305.1 million of the non-recourse funding obligations were held by our affiliates.

Golden Gate V Vermont Captive Insurance Company

On October 10, 2012, Golden Gate V and Red Mountain, indirect wholly owned subsidiaries of the Company, entered into a 20-year transaction to finance up to \$945 million of AXXX reserves related to a block of universal life insurance policies with secondary guarantees issued by our direct wholly owned subsidiary PLICO and indirect wholly owned subsidiary, West Coast Life Insurance Company (WCL). Golden Gate V issued non-recourse funding obligations to Red Mountain, and Red Mountain issued a note with an initial principal amount of \$275 million, increasing to a maximum of \$945 million in 2027, to Golden Gate V for deposit to a reinsurance trust supporting Golden Gate V s obligations under a reinsurance agreement with WCL, pursuant to which WCL cedes liabilities relating to the policies of WCL and retrocedes liabilities relating to the policies of PLICO. Through the structure, Hannover Life Reassurance Company of America (Hannover Re), the ultimate risk taker in the transaction, provides credit enhancement to the Red Mountain note for the 20-year term in exchange for a fee. The transaction is non-recourse to Golden Gate V, Red Mountain, WCL, PLICO and the Company, meaning that none of these companies are liable for the reinburst of any archite required to he mede. As of June 20, 2013, the principal belong of the Red Mountain are

reimbursement of any credit enhancement payments required to be made. As of June 30, 2013, the principal balance of the Red Mountain note was \$335 million. In connection with the transaction, we have entered into certain support agreements under which we guarantee or otherwise support certain obligations of Golden Gate V or Red Mountain.

In connection with the transaction outlined above, Golden Gate V had a \$335 million outstanding non-recourse funding obligation as of June 30, 2013. This non-recourse funding obligation matures in 2037, has scheduled increases in principal to a maximum of \$945 million, and accrues interest at a fixed annual rate of 6.25%.

Non-recourse funding obligations outstanding as of June 30, 2013, on a consolidated basis, are shown in the following table:

Issuer	Balance (Dollars In Thousands)	Maturity Year	Year-to-Date Weighted-Avg Interest Rate
Golden Gate II Captive Insurance Company	\$ 269,900	2052	1.00%
Golden Gate V Vermont Captive Insurance Company	335,000	2037	6.25%
Total	\$ 604,900		

During the six months ended June 30, 2013, the Company repurchased \$16.1 million of its outstanding non-recourse funding obligations, at a discount. These repurchases resulted in a \$3.4 million pre-tax gain for the Company. During the six months ended June 30, 2012, the Company repurchased \$110.8 million of its outstanding non-recourse funding obligations, at a discount. These repurchases resulted in a \$35.5 million pre-tax gain for the Company. These gains are recorded in other income in the consolidated statements of income.

Repurchase Program Borrowings

While the Company anticipates that the cash flows of its operating subsidiaries will be sufficient to meet its investment commitments and operating cash needs in a normal credit market environment, the Company recognizes that investment commitments scheduled to be funded may, from time to time, exceed the funds then available. Therefore, the Company has established repurchase agreement programs for certain of its insurance subsidiaries to provide liquidity when needed. The Company expects that the rate received on its investments will equal or exceed its borrowing rate. Under this program, the Company may, from time to time, sell an investment security at a specific price and agree to repurchase that security at another specified price at a later date. These borrowings are for a term less than ninety days. The market value of securities to be repurchased is monitored and collateral levels are adjusted where appropriate to protect the counterparty against credit exposure. Cash received is invested in fixed maturity securities, and the agreements provided for net settlement in the event of default or on termination of the agreements. As of June 30, 2013, the fair value of securities pledged under the repurchase program was \$356.1 million and the repurchase obligation of \$340.0 million was included in the Company s consolidated condensed balance sheets (at an average borrowing rate of 8 basis points). During the six months ended June 30, 2013, the maximum balance outstanding at any one point in time related to these programs was \$645.1 million. The average daily balance was \$423.9 million (at an average borrowing rate of 12 basis points) during the six months ended June 30, 2012, the Company had a \$150.0 million outstanding balance related to such borrowings. During 2012, the maximum balance outstanding at any one point in time related to these programs was \$645.1 million. The average daily balance was \$426.3 million (at an average borrowing rate of 14 basis points) during the year ended December 31, 2012.

7. COMMITMENTS AND CONTINGENCIES

The Company has entered into indemnity agreements with each of its current directors that provide, among other things and subject to certain limitations, a contractual right to indemnification to the fullest extent permissible under the law. The Company has agreements with certain of its officers providing up to \$10 million in indemnification. These obligations are in addition to the customary obligation to indemnify officers and directors contained in the Company s governance documents.

Under insurance guaranty fund laws, in most states insurance companies doing business therein can be assessed up to prescribed limits for policyholder losses incurred by insolvent companies. In addition, from time to time, companies may be asked to contribute amounts beyond prescribed limits. Most insurance guaranty fund laws provide that an assessment may be excused or deferred if it would threaten an insurer s own financial strength. The Company does not believe its insurance guaranty fund assessments will be materially different from amounts already provided for in the financial statements.

A number of civil jury verdicts have been returned against insurers, broker dealers and other providers of financial services involving sales, refund or claims practices, alleged agent misconduct, failure to properly supervise representatives, relationships with agents or persons with whom the insurer does business, and other matters. Often

Table of Contents

these lawsuits have resulted in the award of substantial judgments that are disproportionate to the actual damages, including material amounts of punitive and non-economic compensatory damages. In some states, juries, judges, and arbitrators have substantial discretion in awarding punitive non-economic compensatory damages which creates the potential for unpredictable material adverse judgments or awards in any given lawsuit or arbitration. Arbitration awards are subject to very limited appellate review. In addition, in some class action and other lawsuits, companies have made material settlement payments. Publicly held companies in general and the financial services and insurance industries in particular are also sometimes the target of law enforcement and regulatory investigations relating to the numerous laws and regulations that govern such companies. Some companies have been the subject of law enforcement or regulatory actions or other actions resulting from such investigations. The Company, in the ordinary course of business, is involved in such matters.

The Company establishes liabilities for litigation and regulatory actions when it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. For matters where a loss is believed to be reasonably possible, but not probable, no liability is established. For such matters, the Company may provide an estimate of the possible loss or range of loss or a statement that such an estimate cannot be made. The Company reviews relevant information with respect to litigation and regulatory matters on a quarterly and annual basis and updates its established liabilities, disclosures and estimates of reasonably possible losses or range of loss based on such reviews.

Although the Company cannot predict the outcome of any litigation or regulatory action, the Company does not believe that any such outcome will have an impact, either individually or in the aggregate, on its financial condition or results of operations that differs materially from the Company s established liabilities. Given the inherent difficulty in predicting the outcome of such matters, however, it is possible that an adverse outcome in certain such matters could be material to the Company s financial condition or results of operations for any particular reporting period.

In the IRS audit that concluded during the prior year, the IRS proposed favorable and unfavorable adjustments to the Company s 2003 through 2007 reported taxable incomes. The Company protested certain unfavorable adjustments and is seeking resolution at the IRS Appeals Division. If the IRS prevails on every issue that it identified in this audit, and the Company does not litigate these issues, then the Company will make an income tax payment of approximately \$26.6 million. However, this payment, if it were to occur, would not materially impact the Company or its effective tax rate.

The Company has received notice from two third party auditors that certain of the Company s insurance subsidiaries, as well as certain other insurance companies for which the Company has co-insured blocks of life insurance and annuity policies, will be audited for compliance with the unclaimed property laws of a number of states. The audits are being conducted on behalf of the treasury departments in such states. The focus of the audits is on whether there have been unreported deaths, maturities, or policies that have exceeded limiting age with respect to which death benefits or other payments under life insurance or annuity policies should be treated as unclaimed property that should be escheated to the state. The Company has recorded a reserve with respect to life insurance policies issued by the Company s subsidiaries and certain co-insured blocks of life insurance policies issued by other companies in connection with these pending audits. The Company does not consider the amount of this reserve to be material to the Company s financial condition or results of operations. With respect to a separate block of life insurance policies that is co-insured by a subsidiary of the Company, the Company is presently unable to estimate the reasonably possible loss or range of loss due to a number of factors, including uncertainty as to the legal theory or theories that may give rise to liability, uncertainty as to whether the Company or other companies are responsible for the liabilities, if any, arising in connection with such policies, the distinct characteristics of this co-insured block of policies which differentiate it from the blocks of life insurance policies for which the Company has recorded a reserve, and the early stages of the audits being conducted. The Company will continue to monitor the matter for any developments that would make the loss contingency associated with this block of co-insured policies probable or reasonably estimable.

Certain of the Company s subsidiaries have received notice that they are subject to a targeted multi-state examination with respect to their claims paying practices and their use of the U.S. Social Security Administration s Death Master File or similar databases (a Death Database) to identify

unreported deaths in their life insurance policies, annuity contracts and retained asset accounts. There is no clear basis in previously existing law for requiring a life insurer to search for unreported deaths in order to determine whether a benefit is owed, and substantial legal authority exists to support the position that the prevailing industry practice was lawful. A number of life insurers,

Table of Contents

however, have entered into settlement or consent agreements with state insurance regulators under which the life insurers agreed to implement procedures for periodically comparing their life insurance and annuity contracts and retained asset accounts against a Death Database, treating confirmed deaths as giving rise to a death benefit under their policies, locating beneficiaries and paying them the benefits and interest, and escheating the benefits and interest as well as penalties to the state if the beneficiary could not be found. It has been publicly reported that the life insurers have paid substantial administrative and/or examination fees to the insurance regulators in connection with the settlement or consent agreements. The Company believes it is reasonably possible that insurance regulators could demand from the Company administrative and/or examination fees relating to the targeted multi-state examination. Based on publicly reported payments by other life insurers, the Company estimates the range of such fees to be from \$0 to \$3.5 million.

8. STOCK-BASED COMPENSATION

During the six months ended June 30, 2013, 298,500 performance shares with an estimated fair value of \$9.3 million were awarded. The criteria for payment of the 2013 performance awards is based primarily on the Company s average operating return on average equity (ROE) over a three-year period. If the Company s ROE is below 10.0%, no award is earned. If the Company s ROE is at or above 11.5%, the award maximum is earned. Awards are paid in shares of the Company s common stock.

Restricted stock units are awarded to participants and include certain restrictions relating to vesting periods. The Company issued 141,000 restricted stock units for the six months ended June 30, 2013. These awards had a total fair value at grant date of \$4.4 million. Approximately half of these restricted stock units vest in 2016, and the remainder vest in 2017. These awards have been recorded as equity-classified awards for the period ended June 30, 2013.

Stock appreciation right (SARs) have historically been granted to certain officers of the Company to provide long-term incentive compensation based solely on the performance of the Company's common stock. The SARs are exercisable either five years after the date of grant or in three or four equal annual installments beginning one year after the date of grant (earlier upon the death, disability, or retirement of the officer, or in certain circumstances, of a change in control of the Company) and expire after ten years or upon termination of employment. The SARs activity as well as weighted-average base price is as follows:

	Weighted-Average Base Price per share	No. of SARs
Balance at December 31, 2012	\$ 22.15	1,641,167
SARs granted		
SARs exercised / forfeited	25.68	(132,849)
Balance at June 30, 2013	\$ 21.84	1,508,318

The Company will pay an amount in stock equal to the difference between the specified base price of the Company s common stock and the market value at the exercise date for each SAR. There were no SARs issued for the six months ended June 30, 2013.

9. EMPLOYEE BENEFIT PLANS

Components of the net periodic benefit cost of the Company s defined benefit pension plan and unfunded excess benefit plan are as follows:

	For The Three Months Ended June 30,			nded	For The Six Months Ended June 30,			
		2013		2012		2013		2012
				(Dollars In 7	Fhousa	nds)		
Service cost benefits earned during the								
period	\$	2,708	\$	2,561	\$	5,416	\$	5,122
Interest cost on projected benefit obligation		2,553		2,604		5,106		5,208
Expected return on plan assets		(2,759)		(2,673)		(5,518)		(5,346)
Amortization of prior service cost/(credit)		(95)		(95)		(190)		(190)
Amortization of actuarial losses		2,729		2,175		5,458		4,350
Total benefit cost	\$	5,136	\$	4,572	\$	10,272	\$	9,144

During the six months ended June 30, 2013, the Company contributed \$2.3 million to its defined benefit pension plan for the 2013 plan year. During July of 2013, the Company contributed \$2.3 million to the defined benefit pension plan for the 2013 plan year. The Company will continue to make contributions in future periods as necessary to at least satisfy minimum funding requirements. The Company may also make additional contributions in future periods to maintain an adjusted funding target attainment percentage (AFTAP) of at least 80%.

In July of 2012, the Moving Ahead for Progress in the 21st Century Act (MAP-21), which includes pension funding stabilization provisions, was signed into law. These provisions establish an interest rate corridor which is designed to stabilize the segment rates used to determine funding requirements from the effects of interest rate volatility. The funding stabilization provisions of MAP-21 will reduce the Company's minimum required defined benefit plan contributions for the 2012 and 2013 plan year. The Company is evaluating the impact this change will have on funding requirements in future years. Since the funding stabilization provisions of MAP-21 do not apply for Pension Benefit Guaranty Corporation (PBGC) reporting purposes, the Company may also make additional contributions in future periods to maintain an 80% funded status for PBGC reporting purposes.

In addition to pension benefits, the Company provides life insurance benefits to eligible retirees and limited healthcare benefits to eligible retirees who are not yet eligible for Medicare. For a closed group of retirees over age 65, the Company provides a prescription drug benefit. The cost of these plans for the six months ended June 30, 2013, was immaterial to the Company s financial statements.

10. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The following table summarizes the changes in the accumulated balances for each component of accumulated other comprehensive income (loss) (AOCI) as of June 30, 2013.

Changes in Accumulated Other Comprehensive Income (Loss) by Component

11. EARNINGS PER SHARE

Basic earnings per share is computed by dividing net income available to PLC s common shareowners by the weighted-average number of common shares outstanding during the period, including shares issuable under various deferred compensation plans. Diluted earnings per share is computed by dividing net income available to PLC s common shareowners by the weighted-average number of common shares and dilutive potential common shares outstanding during the period, assuming the shares were not anti-dilutive, including shares issuable under various stock-based compensation plans and stock purchase contracts.

A reconciliation of the numerators and denominators of the basic and diluted earnings per share is presented below:

	For The Three Months Ended June 30,				For The Six Months Ended June 30,			
		2013		2012	_	2013		2012
			(Dollars	s In Thousands, E	xcept P	er Share Amounts	5)

shareowners - diluted	\$	1.27	\$	0.91	\$	2.24	\$	2.10
shareo where anated	Ψ	1.27	Ψ	0.91	Ψ	2.21	Ψ	2.10

⁽¹⁾Excludes 629,800 and 661,645 SARs as of June 30, 2013 and 2012, respectively that are antidilutive. In the event the average market price exceeds the issue price of the SARs, such rights would be dilutive to the Company s earnings per share and will be included in the Company s calculation of the diluted average shares outstanding, for applicable periods.

12. INCOME TAXES

There have been no material changes to the balance of unrecognized tax benefits, where such benefits impacted earnings, for the six months ended June 30, 2013.

In the IRS audit that concluded during the prior year, the IRS proposed favorable and unfavorable adjustments to the Company s 2003 through 2007 reported taxable incomes. The Company protested certain unfavorable adjustments and is seeking resolution at the IRS Appeals Division. If the IRS prevails at Appeals, and the Company does not litigate these issues, then an acceleration of tax payments will occur. However, if these payments were to occur, they would not materially impact the Company or its effective tax rate.

2	7
7	1

Table of Contents

The Company believes that it is possible that in the next 12 months approximately \$17 million of these unrecognized tax benefits will be reduced due to the expected closure of the aforementioned Appeals process. In general, this closure would represent the Company s possible successful negotiation of certain issues, coupled with its payment of the assessed taxes on the remaining issues.

The Company used its estimate of its annual 2013 and 2012 income in computing its effective income tax rates for the three and six months ended June 30, 2013 and 2012. The effective tax rates for the three and six months ended June 30, 2013 were 34.3% and 33.9%, respectively, and 29.3% and 32.2% for the three and six months ended June 30, 2012, respectively.

In general, the Company is no longer subject to U.S. federal, state, and local income tax examinations by taxing authorities for tax years that began before 2003.

Based on the Company s current assessment of future taxable income, including available tax planning opportunities, the Company anticipates that it is more likely than not that it will generate sufficient taxable income to realize all of its material deferred tax assets. The Company did not record a valuation allowance against its material deferred tax assets as of June 30, 2013.

13. FAIR VALUE OF FINANCIAL INSTRUMENTS

The Company determined the fair value of its financial instruments based on the fair value hierarchy established in FASB guidance referenced in the Fair Value Measurements and Disclosures Topic which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The Company has adopted the provisions from the FASB guidance that is referenced in the Fair Value Measurements and Disclosures Topic for non-financial assets and liabilities (such as property and equipment, goodwill, and other intangible assets) that are required to be measured at fair value on a periodic basis. The effect on the Company s periodic fair value measurements for non-financial assets and liabilities was not material.

The Company has categorized its financial instruments, based on the priority of the inputs to the valuation technique, into a three level hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument.

Financial assets and liabilities recorded at fair value on the consolidated balance sheets are categorized as follows:

Level 1: Unadjusted quoted prices for identical assets or liabilities in an active market.

• Level 2: Quoted prices in markets that are not active or significant inputs that are observable either directly or indirectly. Level 2 inputs include the following:

a)	Quoted prices for similar assets or liabilities in active markets
b)	Quoted prices for identical or similar assets or liabilities in non-active markets
c)	Inputs other than quoted market prices that are observable
d)	Inputs that are derived principally from or corroborated by observable market data through correlation or other means.

• Level 3: Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. They reflect management s own assumptions about the assumptions a market participant would use in pricing the asset or liability.

The following table presents the Company s hierarchy for its assets and liabilities measured at fair value on a recurring basis as of June 30, 2013:

		Level 1		Level 2 (Dollars In	Thousa	Level 3		Total

Determination of fair values

The valuation methodologies used to determine the fair values of assets and liabilities reflect market participant assumptions and are based on the application of the fair value hierarchy that prioritizes observable market inputs over unobservable inputs. The Company determines the fair values of certain financial assets and financial liabilities based on quoted market prices, where available. The Company also determines certain fair values based on future cash flows discounted at the appropriate current market rate. Fair values reflect adjustments for counterparty credit quality, the Company s credit standing, liquidity, and where appropriate, risk margins on unobservable parameters. The following is a discussion of the methodologies used to determine fair values for the financial instruments as listed in the above table.

The fair value of fixed maturity, short-term, and equity securities is determined by management after considering one of three primary sources of information: third party pricing services, non-binding independent broker quotations, or pricing matrices. Security pricing is applied using a waterfall approach whereby publicly available

Table of Contents

prices are first sought from third party pricing services, the remaining unpriced securities are submitted to independent brokers for non-binding prices, or lastly, securities are priced using a pricing matrix. Typical inputs used by these three pricing methods include, but are not limited to: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, and reference data including market research publications. Third party pricing services price over 90% of the Company s available-for-sale and trading fixed maturity securities. Based on the typical trading volumes and the lack of quoted market prices for available-for-sale and trading fixed maturities, third party pricing services derive the majority of security prices from observable market inputs such as recent reported trades for identical or similar securities making adjustments through the reporting date based upon available market observable information outlined above. If there are no recent reported trades, the third party pricing services and brokers may use matrix or model processes to develop a security price where future cash flow expectations are developed based upon collateral performance and discounted at an estimated market rate. Certain securities are priced via independent non-binding broker quotations, which are considered to have no significant unobservable inputs. When using non-binding independent broker quotations, the Company obtains one quote per security, typically from the broker from which we purchased the security. A pricing matrix is used to price securities for which the Company is unable to obtain or effectively rely on either a price from a third party pricing service or an independent broker quotation.

The pricing matrix used by the Company begins with current spread levels to determine the market price for the security. The credit spreads, assigned by brokers, incorporate the issuer s credit rating, liquidity discounts, weighted-average of contracted cash flows, risk premium, if warranted, due to the issuer s industry, and the security s time to maturity. The Company uses credit ratings provided by nationally recognized rating agencies.

For securities that are priced via non-binding independent broker quotations, the Company assesses whether prices received from independent brokers represent a reasonable estimate of fair value through an analysis using internal and external cash flow models developed based on spreads and, when available, market indices. The Company uses a market-based cash flow analysis to validate the reasonableness of prices received from independent brokers. These analytics, which are updated daily, incorporate various metrics (yield curves, credit spreads, prepayment rates, etc.) to determine the valuation of such holdings. As a result of this analysis, if the Company determines there is a more appropriate fair value based upon the analytics, the price received from the independent broker is adjusted accordingly. The Company did not adjust any quotes or prices received from brokers during the six months ended June 30, 2013.

The Company has analyzed the third party pricing services valuation methodologies and related inputs and has also evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs that is in accordance with the Fair Value Measurements and Disclosures Topic of the ASC. Based on this evaluation and investment class analysis, each price was classified into Level 1, 2, or 3. Most prices provided by third party pricing services are classified into Level 2 because the significant inputs used in pricing the securities are market observable and the observable inputs are corroborated by the Company. Since the matrix pricing of certain debt securities includes significant non-observable inputs, they are classified as Level 3.

Asset-Backed Securities

This category mainly consists of residential mortgage-backed securities, commercial mortgage-backed securities, and other asset-backed securities (collectively referred to as asset-backed securities or ABS). As of June 30, 2013, the Company held \$3.4 billion of ABS classified as Level 2. These securities are priced from information provided by a third party pricing service and independent broker quotes. The third party pricing services and brokers mainly value securities using both a market and income approach to valuation. As part of this valuation process they consider the following characteristics of the item being measured to be relevant inputs: 1) weighted-average coupon rate, 2) weighted-average years to maturity, 3) types of underlying assets, 4) weighted-average coupon rate of the underlying assets, 5) weighted-average years to maturity of the underlying assets, 6) seniority level of the tranches owned, and 7) credit ratings of the securities.

After reviewing these characteristics of the ABS, the third party pricing service and brokers use certain inputs to determine the value of the security. For ABS classified as Level 2, the valuation would consist of predominantly market observable inputs such as, but not limited to: 1) monthly principal and interest payments on the underlying

Table of Contents

assets, 2) average life of the security, 3) prepayment speeds, 4) credit spreads, 5) treasury and swap yield curves, and 6) discount margin.

As of June 30, 2013, the Company held \$760.9 million of Level 3 ABS, which included \$170.4 million of other asset-backed securities classified as trading. These securities are predominantly ARS whose underlying collateral is at least 97% guaranteed by the FFELP. As a result of the ARS market collapse during 2008, the Company prices its ARS using an income approach valuation model. As part of the valuation process the Company reviews the following characteristics of the ARS in determining the relevant inputs: 1) weighted-average coupon rate, 2) weighted-average years to maturity, 3) types of underlying assets, 4) weighted-average coupon rate of the underlying assets, 5) weighted-average years to maturity of the underlying assets, 6) seniority level of the tranches owned, 7) credit ratings of the securities, 8) liquidity premium, and 9) paydown rate.

Corporate bonds, U.S. Government-related securities, States, municipals, and political subdivisions, and Other government related securities

As of June 30, 2013, the Company classified approximately \$23.3 billion of corporate bonds, U.S. government-related securities, states, municipals, and political subdivisions, and other government-related securities as Level 2. The fair value of the Level 2 bonds and securities is predominantly priced by broker quotes and a third party pricing service. The Company has reviewed the valuation techniques of the brokers and third party pricing service and has determined that such techniques used Level 2 market observable inputs. The following characteristics of the bonds and securities are considered to be the primary relevant inputs to the valuation: 1) weighted-average coupon rate, 2) weighted-average years to maturity, 3) seniority, and 4) credit ratings.

The brokers and third party pricing service utilize valuation models that consist of a hybrid income and market approach to valuation. The pricing models utilize the following inputs: 1) principal and interest payments, 2) treasury yield curve, 3) credit spreads from new issue and secondary trading markets, 4) dealer quotes with adjustments for issues with early redemption features, 5) liquidity premiums present on private placements, and 6) discount margins from dealers in the new issue market.

As of June 30, 2013, the Company classified approximately \$227.8 million of bonds and securities as Level 3 valuations. Level 3 bonds and securities primarily represent investments in illiquid bonds for which no price is readily available. To determine a price, the Company uses a discounted cash flow model with both observable and unobservable inputs. These inputs are entered into an industry standard pricing model to determine the final price of the security. These inputs include: 1) principal and interest payments, 2) coupon rate, 3) sector and issuer level spread over treasury, 4) underlying collateral, 5) credit ratings, 6) maturity, 7) embedded options, 8) recent new issuance, 9) comparative bond analysis, and 10) an illiquidity premium.

Equities

As of June 30, 2013, the Company held approximately \$104.4 million of equity securities classified as Level 2 and Level 3. Of this total, \$64.6 million represents Federal Home Loan Bank (FHLB) stock. The Company believes that the cost of the FHLB stock approximates fair value. The remainder of these equity securities is primarily made up of holdings we have obtained through bankruptcy proceedings or debt restructurings.

Other long-term investments and Other liabilities

Other long-term investments and other liabilities consist entirely of free-standing and embedded derivative financial instruments. Refer to Note 14, *Derivative Financial Instruments* for additional information related to derivatives. Derivative financial instruments are valued using exchange prices, independent broker quotations, or pricing valuation models, which utilize market data inputs. Excluding embedded derivatives, as of June 30, 2013, 95.8% of derivatives based upon notional values were priced using exchange prices or independent broker quotations. The remaining derivatives were priced by pricing valuation models, which predominantly utilize observable market data inputs. Inputs used to value derivatives include, but are not limited to, interest swap rates, credit spreads, interest rate and equity market volatility indices, equity index levels, and treasury rates. The Company performs monthly analysis on derivative valuations that includes both quantitative and qualitative analyses.

2	2
2	4

Table of Contents

Derivative instruments classified as Level 1 generally include futures and puts, which are traded on active exchange markets.

Derivative instruments classified as Level 2 primarily include interest rate and inflation swaps, puts, and swaptions. These derivative valuations are determined using independent broker quotations, which are corroborated with observable market inputs.

Derivative instruments classified as Level 3 were embedded derivatives and include at least one significant non-observable input. A derivative instrument containing Level 1 and Level 2 inputs will be classified as a Level 3 financial instrument in its entirety if it has at least one significant Level 3 input.

The Company utilizes derivative instruments to manage the risk associated with certain assets and liabilities. However, the derivative instruments may not be classified within the same fair value hierarchy level as the associated assets and liabilities. Therefore, the changes in fair value on derivatives reported in Level 3 may not reflect the offsetting impact of the changes in fair value of the associated assets and liabilities.

The embedded derivatives are carried at fair value in other long-term investments and other liabilities on the Company s consolidated balance sheet. The changes in fair value are recorded in earnings as Realized investment gains (losses) Derivative financial instruments. Refer to Note 14, *Derivative Financial Instruments* for more information related to each embedded derivatives gains and losses.

The fair value of the guaranteed minimum withdrawal benefits (GMWB) embedded derivative is derived through the income method of valuation using a valuation model that projects future cash flows using multiple risk neutral stochastic equity scenarios and policyholder behavior assumptions. The risk neutral scenarios are generated using the current swap curve and projected equity volatilities and correlations. The projected equity volatilities are based on a blend of historical volatility and near-term equity market implied volatilities. The equity correlations are based on historical price observations. For policyholder behavior assumptions, expected lapse and utilization assumptions are used and updated for actual experience, as necessary. The Company assumes age-based mortality that is consistent with 57% of the National Association of Insurance Commissioners 1994 Variable Annuity MGDB Mortality Table. The present value of the cash flows is determined using the discount rate curve, which is based upon LIBOR plus a credit spread (to represent the Company s non-performance risk). As a result of using significant unobservable inputs, the GMWB embedded derivative is categorized as Level 3. These assumptions are reviewed on a quarterly basis.

The fair value of the FIA embedded derivative is derived through the income method of valuation using a valuation model that projects future cash flows using current index values and volatility, the hedge budget used to price the product, and policyholder assumptions (both elective and non-elective). For policyholder behavior assumptions, expected lapse and withdrawal assumptions are used and updated for actual experience, as necessary. The Company assumes age-based mortality from the 1994 Variable Annuity MGDB mortality table modified for company experience. The present value of the cash flows is determined using the discount rate curve, which is based upon LIBOR up to one year and constant maturity treasury rates plus a credit spread (to represent the Company s non-performance risk) thereafter. Policyholder assumptions are reviewed on an annual basis. As a result of using significant unobservable inputs, the FIA embedded derivative is categorized as Level 3.

The Company has assumed and ceded certain blocks of policies under modified coinsurance agreements in which the investment results of the underlying portfolios inure directly to the reinsurers. As a result, these agreements contain embedded derivatives that are reported at fair value.

Changes in their fair value are reported in earnings. The investments supporting these agreements are designated as trading securities ; therefore changes in their fair value are also reported in earnings. The fair value of the embedded derivative is the difference between the policy liabilities (net of policy loans) of \$2.6 billion and the fair value of the trading securities of \$2.9 billion. As a result, changes in the fair value of the embedded derivatives are largely offset by the changes in fair value of the related investments and each are reported in earnings. The fair value of the embedded derivative is considered a Level 3 valuation due to the unobservable nature of the policy liabilities.

³³

Table of Contents

Annuity account balances

The Company records certain of its FIA reserves at fair value. The fair value is considered a Level 3 valuation. The FIA valuation model calculates the present value of future benefit cash flows less the projected future profits to quantify the net liability that is held as a reserve. This calculation is done using multiple risk neutral stochastic equity scenarios. The cash flows are discounted using LIBOR plus a credit spread. Best estimate assumptions are used for partial withdrawals, lapses, expenses and asset earned rate with a risk margin applied to each. These assumptions are reviewed at least annually as a part of the formal unlocking process. If an event were to occur within a quarter that would make the assumptions unreasonable, the assumptions would be reviewed within the quarter.

The discount rate for the fixed indexed annuities is based on an upward sloping rate curve which is updated each quarter. The discount rates for June 30, 2013, ranged from a one month rate of 0.39%, a 5 year rate of 2.65%, and a 30 year rate of 4.91%. A credit spread component is also included in the calculation to accommodate non-performance risk.

Separate Accounts

Separate account assets are invested in open-ended mutual funds and are included in Level 1.

Valuation of Level 3 Financial Instruments

The following table presents the valuation method for material financial instruments included in Level 3, as well as the unobservable inputs used in the valuation of those financial instruments:

	(D	Fair Value As of June 30, 2013 Dollars In Thousands)	Valuation Technique	Unobservable Input	Range (Weighted Average)
Assets:					
Other asset-backed securities	\$	576,396	Discounted cash flow	Liquidity premium Paydown rate	0.43% - 1.46% (0.68%) 8.24% - 14.48% (12.41%)

			Lapse	2.5% - 40.0%, depending on duration/surrender charge period
			Nonperformance risk	0.20% - 1.46%

(1) The fair value for the GMWB embedded derivative is presented as a net asset for the purposes of this chart. Excludes modified coinsurance arrangements.

(2)Represents liabilities related to fixed indexed annuities.

The chart above excludes Level 3 financial instruments that are valued using broker quotes and those which book value approximates fair value.

Table of Contents

The Company has considered all reasonably available quantitative inputs as of June 30, 2013, but the valuation techniques and inputs used by some brokers in pricing certain financial instruments are not shared with the Company. This resulted in \$169.4 million of financial instruments being classified as Level 3 as of June 30, 2013. Of the \$169.4 million, \$168.8 million are other asset backed securities and \$0.6 million are equity securities.

In certain cases the Company has determined that book value materially approximates fair value. As of June 30, 2013, the Company held \$92.3 million of financial instruments where book value approximates fair value. Of the \$92.3 million, \$68.8 million represents equity securities, which are predominantly FHLB stock, and \$23.5 million of other fixed maturity securities.

The following table presents the valuation method for material financial instruments included in Level 3, as well as the unobservable inputs used in the valuation of those financial instruments:

	Fair ValueAs ofValuationDecember 31, 2012Technique(Dollars In Thousands)			Unobservable Input	Range (Weighted Average)
Assets:					
Other asset-backed securities	\$	596,143	Discounted cash flow	Liquidity premium Paydown rate	0.72% - 1.68% (1.29%) 8.51% - 18.10% (11.40%)
Other government-related securities		20,011	Discounted cash flow	Spread over treasury	(0.30)%
Corporate bonds Liabilities:		168,007	Discounted cash flow	Spread over treasury	0.92% - 7.75% (3.34%)

				Nonperformance risk	surrender charge period 0.09% - 1.34%

⁽¹⁾The fair value for the GMWB embedded derivative is presented as a net liability for the purposes of this chart. Excludes modified coinsurance arrangements.

(2)Represents liabilities related to fixed indexed annuities.

Table of Contents

The chart above excludes Level 3 financial instruments that are valued using broker quotes and those which book value approximates fair value.

The valuation techniques and inputs used by some brokers in pricing certain financial instruments are not shared with the Company which resulted in \$71.1 million of financial instruments being classified as Level 3 as of December 31, 2012. Of the \$71.1 million, \$70.5 million are other asset backed securities and \$0.6 million are equity securities.

In certain cases the Company has determined that book value materially approximates fair value. As of December 31, 2012, the Company held \$73.2 million of financial instruments where book value approximates fair value. Of the \$73.2 million, \$68.9 million represents equity securities, which are predominantly FHLB stock, and \$4.3 million of other fixed maturity securities.

The asset-backed securities classified as Level 3 are predominantly ARS. A change in the paydown rate (the projected annual rate of principal reduction) of the ARS can significantly impact the fair value of these securities. A decrease in the paydown rate would increase the projected weighted average life of the ARS and increase the sensitivity of the ARS fair value to changes in interest rates. An increase in the liquidity premium would result in a decrease in the fair value of the securities, while a decrease in the liquidity premium would increase the fair value of these securities.

The fair value of corporate bonds classified as Level 3 is sensitive to changes in the interest rate spread over the corresponding U.S. Treasury rate. This spread represents a risk premium that is impacted by company specific and market factors. An increase in the spread can be caused by a perceived increase in credit risk of a specific issuer and/or an increase in the overall market risk premium associated with similar securities. The fair values of corporate bonds are sensitive to changes in spread. When holding the treasury rate constant, the fair value of corporate bonds increases when spreads increases.

The GMWB liability is sensitive to changes in the discount rate which includes the Company s nonperformance risk, volatility, lapse, and mortality assumptions. The volatility assumption is an observable input as it is based on market inputs. The Company s nonperformance risk, lapse, and mortality are unobservable. An increase in the three unobservable assumptions would result in a decrease in the liability and conversely, if there is a decrease in the assumptions the liability would increase. The liability is also dependent on the assumed policyholder utilization of the GMWB where an increase in assumed utilization would result in an increase in the liability and conversely, if there is a decrease in the assumption, the liability would decrease.

The fair value of the FIA account balance liability is predominantly impacted by observable inputs such as discount rates and equity returns. However, the fair value of the FIA account balance liability is sensitive to the asset earned rate and required return on assets. The value of the liability increases with an increase in required return on assets and decreases with an increase in the asset earned rate and conversely, the value of the liability decreases with a decrease in required return on assets and an increase in the asset earned rate.

The fair value of the FIA embedded derivative is predominantly impacted by observable inputs such as discount rates and equity returns. However, the fair value of the FIA embedded derivative is sensitive to non-performance risk. The value of the liability increases with decreases in the discount rate and non-performance risk and decreases with increases in the discount rate and non-performance risk. The value of the liability increases with increases with increases with a decrease in equity returns.

The following table presents a reconciliation of the beginning and ending balances for fair value measurements for the three months ended June 30, 2013, for which the Company has used significant unobservable inputs (Level 3):

(2)Represents liabilities related to fixed indexed annuities.

For the six months ended June 30, 2013, \$70.8 million of securities were transferred into Level 3. This amount was transferred from Level 2. These transfers resulted from securities that were priced by independent pricing services or brokers in previous periods, using no significant unobservable inputs, but were priced internally using significant unobservable inputs where market observable inputs were no longer available as of June 30, 2013. All transfers are recognized as of the end of the period.

For the six months ended June 30, 2013, there were no transfers out of Level 3.

For the six months ended June 30, 2013, there were no transfers from Level 2 to Level 1.

For the six months ended June 30, 2013, there were no transfers out of Level 1.

The following table presents a reconciliation of the beginning and ending balances for fair value measurements for the six months ended June 30, 2012, for which the Company has used significant unobservable inputs (Level 3):

(1)Represents certain freestanding and embedded derivatives.

(2)Represents liabilities related to fixed indexed annuities.

For the six months ended June 30, 2012, \$54.7 million of securities were transferred into Level 3. This amount was transferred from Level 2. These transfers resulted from securities that were priced by independent pricing services or brokers in previous periods, using no significant unobservable inputs, but were priced internally using significant unobservable inputs where market observable inputs were no longer available as of June 30, 2012. All transfers are recognized as of the end of the period.

For the six months ended June 30, 2012, there were no transfers out of Level 3.

For the six months ended June 30, 2012, there were no transfers from Level 2 to Level 1.

For the six months ended June 30, 2012, there were no transfers out of Level 1.

Total realized and unrealized gains (losses) on Level 3 assets and liabilities are primarily reported in either realized investment gains (losses) within the consolidated statements of income (loss) or other comprehensive income (loss) within shareowners equity based on the appropriate accounting treatment for the item.

Purchases, sales, issuances, and settlements, net, represent the activity that occurred during the period that results in a change of the asset or liability but does not represent changes in fair value for the instruments held at the

Table of Contents

beginning of the period. Such activity primarily relates to purchases and sales of fixed maturity securities and issuances and settlements of fixed indexed annuities.

The Company reviews the fair value hierarchy classifications each reporting period. Changes in the observability of the valuation attributes may result in a reclassification of certain financial assets or liabilities. Such reclassifications are reported as transfers in and out of Level 3 at the beginning fair value for the reporting period in which the changes occur.

The amount of total gains (losses) for assets and liabilities still held as of the reporting date primarily represents changes in fair value of trading securities and certain derivatives that exist as of the reporting date and the change in fair value of fixed indexed annuities.

Estimated Fair Value of Financial Instruments

The carrying amounts and estimated fair values of the Company s financial instruments as of the periods shown below are as follows:

				As	s of					
		June 3	0, 2013	3		Decembe	December 31, 2012			
	Fair Value Level	Carrying Amounts	1	Fair Values (Dollars In	Thous	Carrying Amounts ands)	I	Fair Values		
Assets:

Non-recourse funding obligations(2)	3	604,900		499,956		586,000		481,056		

Except as noted below, fair values were estimated using quoted market prices.

(1) Security purchased from unconsolidated subsidiary, Red Mountain LLC.

(2) Of this carrying amount, \$335.0 million, fair value of \$297.9 million, as of June 30, 2013, and \$300 million, fair value of \$297.6 million, as of December 31, 2012, relates to non-recourse funding obligations issued by Golden Gate V.

Fair Value Measurements

Mortgage loans on real estate

The Company estimates the fair value of mortgage loans using an internally developed model. This model includes inputs derived by the Company based on assumed discount rates relative to the Company s current mortgage loan lending rate and an expected cash flow analysis based on a review of the mortgage loan terms. The model also contains the Company s determined representative risk adjustment assumptions related to credit and liquidity risks.

Policy loans

The Company believes the fair value of policy loans approximates book value. Policy loans are funds provided to policy holders in return for a claim on the policy. The funds provided are limited to the cash surrender value of the underlying policy. The nature of policy loans is to have a negligible default risk as the loans are fully collateralized by the value of the policy. Policy loans do not have a stated maturity and the balances and accrued interest are repaid either by the policyholder or with proceeds from the policy. Due to the collateralized nature of policy loans and unpredictable timing of repayments, the Company believes the fair value of policy loans approximates carrying value.

Table of Contents

Fixed maturities, held-to-maturity

The Company estimates the fair value of its fixed maturity, held-to-maturity securities using internal discounted cash flow models. The discount rates used in the model were based on a current market yield for similar financial instruments.

Stable value product and Annuity account balances

The Company estimates the fair value of stable value product account balances and annuity account balances using models based on discounted expected cash flows. The discount rates used in the models were based on a current market rate for similar financial instruments.

Debt

Bank borrowings

The Company believes the carrying value of its bank borrowings approximates fair value as the borrowings pay a floating interest rate plus a spread based on the rating of the Company s senior debt which the Company believes approximates a market interest rate.

Non-recourse funding obligations

The Company estimates the fair value of its non-recourse funding obligations using internal discounted cash flow models. The discount rates used in the model were based on a current market yield for similar financial instruments.

14. DERIVATIVE FINANCIAL INSTRUMENTS

Types of Derivative Instruments and Derivative Strategies

The Company utilizes a risk management strategy that incorporates the use of derivative financial instruments to reduce exposure to certain risks, including but not limited to, interest rate risk, inflation risk, currency exchange risk, volatility risk, and equity market risk. These strategies are developed through the Company s analysis of data from financial simulation models and other internal and industry sources, and are then incorporated into the Company s risk management program.

Derivative instruments expose the Company to credit and market risk and could result in material changes from period to period. The Company attempts to minimize its credit risk by entering into transactions with highly rated counterparties. The Company manages the market risk by establishing and monitoring limits as to the types and degrees of risk that may be undertaken. The Company monitors its use of derivatives in connection with its overall asset/liability management programs and risk management strategies. In addition, all derivative programs are monitored by our risk management department.

Derivatives Related to Interest Rate Risk Management

Derivative instruments that are used as part of the Company s interest rate risk management strategy include interest rate swaps, interest rate futures, interest rate caps, and interest rate swaptions. The Company s inflation risk management strategy involves the use of swaps that requires the Company to pay a fixed rate and receive a floating rate that is based on changes in the Consumer Price Index (CPI).

Table of Contents

Derivatives Related to Risk Mitigation of Variable Annuity Contracts

The Company may use the following types of derivative contracts to mitigate its exposure to certain guaranteed benefits related to variable annuity contracts:

- Foreign Currency Futures
- Variance Swaps
- Interest Rate Futures
- Equity Options
- Equity Futures
- Credit Derivatives
- Interest Rate Swaps
- Interest Rate Swaptions
- Volatility Futures

Accounting for Derivative Instruments

The Company records its derivative financial instruments in the consolidated condensed balance sheet in other long-term investments and other liabilities in accordance with GAAP, which requires that all derivative instruments be recognized in the balance sheet at fair value. The change in the fair value of derivative financial instruments is reported either in the statement of income or in other comprehensive income (loss), depending upon whether it qualified for and also has been properly identified as being part of a hedging relationship, and also on the type of hedging relationship that exists.

For a derivative financial instrument to be accounted for as an accounting hedge, it must be identified and documented as such on the date of designation. For cash flow hedges, the effective portion of their realized gain or loss is reported as a component of other comprehensive income and reclassified into earnings in the same period during which the hedged item impacts earnings. Any remaining gain or loss, the ineffective portion, is recognized in current earnings. For fair value hedge derivatives, their gain or loss as well as the offsetting loss or gain attributable to the hedged risk of the hedged item is recognized in current earnings. Effectiveness of the Company s hedge relationships is assessed on a quarterly basis.

The Company reports changes in fair values of derivatives that are not part of a qualifying hedge relationship through earnings in the period of change. Changes in the fair value of derivatives that are recognized in current earnings are reported in Realized investment gains (losses) - Derivative financial instruments .

Derivative Instruments Designated and Qualifying as Hedging Instruments

Cash-Flow Hedges

• In connection with the issuance of inflation-adjusted funding agreements, the Company has entered into swaps to convert the floating CPI-linked interest rate on these agreements to a fixed rate. The Company pays a fixed rate on the swap and receives a floating rate primarily determined by the period s change in the CPI. The amounts that are received on the swaps are equal to the amounts that are paid on the agreements.

Derivative Instruments Not Designated and Not Qualifying as Hedging Instruments

The Company uses various other derivative instruments for risk management purposes that do not qualify for hedge accounting treatment. Changes in the fair value of these derivatives are recognized in earnings during the period of change.

Derivatives related to variable annuity contracts

• The Company uses equity, interest rate, currency, and volatility futures to mitigate the risk related to certain guaranteed minimum benefits, including GMWB, within its variable annuity products. In

Table of Contents

general, the cost of such benefits varies with the level of equity and interest rate markets, foreign currency levels, and overall volatility. No volatility future positions were held during the three and six months ended June 30, 2013.

• The Company uses equity options and variance swaps to mitigate the risk related to certain guaranteed minimum benefits, including GMWB, within its variable annuity products. In general, the cost of such benefits varies with the level of equity markets and overall volatility.

• The Company uses interest rate swaps and interest rate swaptions to mitigate the risk related to certain guaranteed minimum benefits, including GMWB, within its variable annuity products.

• The Company markets certain variable annuity products with a GMWB rider. The GMWB component is considered an embedded derivative, not considered to be clearly and closely related to the host contract.

Other Derivatives

The Company uses certain interest rate swaps to mitigate the price volatility of fixed maturities.

• The Company purchased interest rate caps during 2011 to mitigate its risk with respect to the Company s LIBOR exposure and the potential impact of European financial market distress.

The Company uses various swaps and other types of derivatives to manage risk related to other exposures.

• The Company recognized insignificant losses for the three and six months ended June 30, 2013 related to the embedded derivative associated with the FIA product. The Company did not hold these products during the three and six months ended June 30, 2012.

• The Company is involved in various modified coinsurance and funds withheld arrangements which contain embedded derivatives. Changes in their fair value are recorded in current period earnings. The investment portfolios that support the related modified coinsurance reserves and funds withheld arrangements had fair value changes which substantially offset the gains or losses on these embedded derivatives.

The following table sets forth realized investments gains and losses for the periods shown:

Based on the expected cash flows of the underlying hedged items, the Company expects to reclassify \$2.3 million out of accumulated other comprehensive income (loss) into earnings during the next twelve months.

From time to time, the Company is required to post and obligated to return collateral related to derivative transactions. As of June 30, 2013, the Company had posted cash and securities (at fair value) as collateral of approximately \$60.3 million and \$52.3 million, respectively. As of June 30, 2013, the Company received \$1.0 million of cash as collateral. The Company does not net the collateral posted or received with the fair value of the derivative financial instruments for reporting purposes.

15. OFFSETTING OF ASSETS AND LIABILITIES

Certain of the Company s derivative instruments are subject to enforceable master netting arrangements that provide for the net settlement of all derivative contracts between the Company and a counterparty in the event of default or upon the occurrence of certain termination events. Collateral support agreements associated with each master netting arrangement provide that the Company will receive or pledge financial collateral in the event either minimum thresholds, or in certain cases ratings levels, have been reached. Additionally, certain of the Company s repurchase agreements provide for net settlement on termination of the agreement. Refer to Note 6, *Debt and Other Obligations* for details of the Company s repurchase agreement programs.

The tables below present the derivative instruments by assets and liabilities for the Company as of June 30, 2013:

16. OPERATING SEGMENTS

The Company has several operating segments each having a strategic focus. An operating segment is distinguished by products, channels of distribution, and/or other strategic distinctions. The Company periodically evaluates its operating segments, as prescribed in the ASC Segment Reporting Topic, and makes adjustments to its segment reporting as needed. A brief description of each segment follows.

• The Life Marketing segment markets UL, variable universal life, bank-owned life insurance (BOLI), and level premium term insurance (traditional) products on a national basis primarily through networks of independent insurance agents and brokers, stockbrokers, and independent marketing organizations.

• The Acquisitions segment focuses on acquiring, converting, and servicing policies from other companies. The segment s primary focus is on life insurance policies and annuity products that were sold to individuals. The level of the segment s acquisition activity is predicated upon many factors, including available capital, operating capacity, potential return on capital, and market dynamics. Policies acquired through the Acquisitions segment are typically closed blocks of business (no new policies are being marketed). Therefore earnings and account values are expected to decline as the result of lapses, deaths, and other terminations of coverage unless new acquisitions are made.

• The Annuities segment markets fixed and variable annuity products. These products are primarily sold through broker-dealers, financial institutions, and independent agents and brokers.

• The Stable Value Products segment sells fixed and floating rate funding agreements directly to the trustees of municipal bond proceeds, money market funds, bank trust departments, and other institutional investors. The segment also issues funding agreements to the FHLB, and markets guaranteed investment contracts (GICs) to 401(k) and other qualified retirement savings plans. Additionally, the Company has contracts outstanding pursuant to a funding agreement-backed notes program registered with the United States Securities and Exchange Commission (the SEC) which offered notes to both institutional and retail investors.

• The Asset Protection segment markets extended service contracts and credit life and disability insurance to protect consumers investments in automobiles, watercraft, and recreational vehicles. In addition, the segment markets a guaranteed asset protection (GAP) product. GAP coverage covers the difference between the loan pay-off amount and an asset s actual cash value in the case of a total loss.

Table of Contents

• The Corporate and Other segment primarily consists of net investment income not assigned to the segments above (including the impact of carrying liquidity), expenses not attributable to the segments above (including interest on certain corporate debt). This segment includes earnings from several non-strategic or runoff lines of business, various investment-related transactions, the operations of several small subsidiaries, and the repurchase of non-recourse funding obligations.

The Company uses the same accounting policies and procedures to measure segment operating income (loss) and assets as it uses to measure consolidated net income available to PLC s common shareowners and assets. Segment operating income (loss) is income before income tax, excluding realized gains and losses on investments and derivatives net of the related amortization of deferred acquisition costs (DAC) and value of business acquired (VOBA). Operating earnings exclude changes in the GMWB embedded derivatives (excluding the portion attributed to economic cost), realized and unrealized gains (losses) on derivatives used to hedge the VA product, actual GMWB incurred claims and the related amortization of DAC attributed to each of these items.

Segment operating income (loss) represents the basis on which the performance of the Company s business is internally assessed by management. Premiums and policy fees, other income, benefits and settlement expenses, and amortization of DAC/VOBA are attributed directly to each operating segment. Net investment income is allocated based on directly related assets required for transacting the business of that segment. Realized investment gains (losses) and other operating expenses are allocated to the segments in a manner that most appropriately reflects the operations of that segment. Investments and other assets are allocated based on statutory policy liabilities net of associated statutory policy assets, while DAC/VOBA and goodwill are shown in the segments to which they are attributable.

There were no significant intersegment transactions during the three or six months ended June 30, 2013 and 2012.

The following tables summarize financial information for the Company s segments:

	For Three Mon June	ths End		For The Six Months Ended June 30,

17. SUBSEQUENT EVENTS

The Company has evaluated the effects of events subsequent to June 30, 2013, and through the date we filed our consolidated condensed financial statements with the United States Securities and Exchange Commission. All accounting and disclosure requirements related to subsequent events are included in our consolidated condensed financial statements.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

The following Management s Discussion and Analysis of Financial Condition and Results of Operations (MD&A) should be read in conjunction with our consolidated condensed financial statements included under Part I, Item 1, *Financial Statements (Unaudited)*, of this Quarterly Report on Form 10-Q and our audited consolidated financial statements for the year ended December 31, 2012, included in our Annual Report on Form 10-K.

For a more complete understanding of our business and current period results, please read the following MD&A in conjunction with our latest Annual Report on Form 10-K and other filings with the United States Securities and Exchange Commission (the SEC).

Certain reclassifications have been made in the previously reported financial statements and accompanying notes to make the prior period amounts comparable to those of the current period. Such reclassifications had no effect on previously reported net income or shareowners equity.

FORWARD-LOOKING STATEMENTS CAUTIONARY LANGUAGE

This report reviews our financial condition and results of operations including our liquidity and capital resources. Historical information is presented and discussed, and where appropriate, factors that may affect future financial performance are also identified and discussed. Certain statements made in this report include forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include any statement that may predict, forecast, indicate, or imply future results, performance, or achievements instead of historical facts and may contain words like believe, expect, estimate, project, budget, forecast, anticipate, plan, will, other words, phrases, or expressions with similar meaning. Forward-looking statements involve risks and uncertainties, which may cause actual results to differ materially from the results contained in the forward-looking statements, and we cannot give assurances that such statements will prove to be correct. Given these risks and uncertainties, investors should not place undue reliance on forward-looking statements as a prediction of actual results. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future developments or otherwise. For more information about the risks, uncertainties, and other factors that could affect our future results, please refer to Part I, Item II, Risks and Uncertainties and Part II, Item 1A, Risk Factors and Cautionary Factors that may Affect Future Results, of this report, as well as Part I, Item 1A, Risk Factors and Cautionary Factors that may Affect Future Results, of our Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

OVERVIEW

Our business

We are a holding company headquartered in Birmingham, Alabama, with subsidiaries that provide financial services through the production, distribution, and administration of insurance and investment products. Founded in 1907, Protective Life Insurance Company (PLICO) is our largest operating subsidiary. Unless the context otherwise requires, the Company, we, us, or our refers to the consolidated group of Protective Life Corporation and our subsidiaries.

We have several operating segments, each having a strategic focus. An operating segment is distinguished by products, channels of distribution, and/or other strategic distinctions. We periodically evaluate our operating segments as prescribed in the Accounting Standards Codification (ASC) Segment Reporting Topic, and make adjustments to our segment reporting as needed.

Our operating segments are Life Marketing, Acquisitions, Annuities, Stable Value Products, Asset Protection, and Corporate and Other.

• *Life Marketing* - We market universal life (UL), variable universal life, bank-owned life insurance (BOLI), and level premium term insurance (traditional) products on a national basis primarily through networks of independent insurance agents and brokers, stockbrokers, and independent marketing organizations.

Table of Contents

• *Acquisitions* - We focus on acquiring, converting, and servicing policies from other companies. The segment s primary focus is on life insurance policies and annuity products that were sold to individuals. The level of the segment s acquisition activity is predicated upon many factors, including available capital, operating capacity, potential return on capital, and market dynamics. Policies acquired through the Acquisition segment are typically closed blocks of business (no new policies are being marketed). Therefore earnings and account values are expected to decline as the result of lapses, deaths, and other terminations of coverage unless new acquisitions are made.

• *Annuities* - We market fixed and variable annuity products. These products are primarily sold through broker-dealers, financial institutions, and independent agents and brokers.

• *Stable Value Products* - We sell fixed and floating rate funding agreements directly to the trustees of municipal bond proceeds, money market funds, bank trust departments, and other institutional investors. The segment also issues funding agreements to the Federal Home Loan Bank (FHLB), and markets guaranteed investment contracts (GICs) to 401(k) and other qualified retirement savings plans. Additionally, we have contracts outstanding pursuant to a funding agreement-backed notes program registered with the United States Securities and Exchange Commission (the SEC) which offered notes to both institutional and retail investors.

• Asset Protection - We market extended service contracts and credit life and disability insurance to protect consumers investments in automobiles, watercraft, and recreational vehicles. In addition, the segment markets a guaranteed asset protection (GAP) product. GAP coverage covers the difference between the loan pay-off amount and an asset s actual cash value in the case of a total loss.

• *Corporate and Other* - This segment primarily consists of net investment income not assigned to the segments above (including the impact of carrying liquidity) and expenses not attributable to the segments above (including interest on certain corporate debt). This segment includes earnings from several non-strategic or runoff lines of business, various investment-related transactions, the operations of several small subsidiaries, and the repurchase of non-recourse funding obligations.

EXECUTIVE SUMMARY

Net income available to PLC s common shareowners for the first six months of 2013 was \$181.5 million, or \$2.24 per average diluted share. After-tax operating income for the first six months of 2013 was \$149.2 million, or \$1.84 per average diluted share.

We reported strong financial results in the first six months of 2013. During these first six months, we have experienced strong investment income, strong earnings in the variable annuity line, favorable mortality in the Life Marketing segment, continued robust spreads in the Stable Value Products segment, and better than expected results in the Asset Protection segment. We were also pleased to report that in the second quarter, sales in each of our three major retail business lines (Life Marketing, Annuities and Asset Protection) exceeded last year s comparable sales.

In addition, we are continuing to press ahead on the previously announced MONY acquisition and are making good progress toward meeting our targeted closing date later this year.

Significant financial information related to each of our segments is included in Results of Operations .

RISKS AND UNCERTAINTIES

The factors which could affect our future results include, but are not limited to, general economic conditions and the following risks and uncertainties:

General

• exposure to the risks of natural and man-made catastrophes, pandemics, malicious acts, terrorist acts and climate change, could adversely affect our operations and results;

• a disruption affecting the electronic systems of the Company or those on whom the Company relies could adversely affect our business, financial condition and results of operations;

• confidential information maintained in our systems could be compromised or misappropriated, damaging our business and reputation and adversely affecting its financial condition and results of operations;

• our results and financial condition may be negatively affected should actual experience differ from management s assumptions and estimates;

• we may not realize our anticipated financial results from our acquisitions strategy;

• we may not be able to achieve the expected results from our recently announced acquisition;

Table of Contents

• we are dependent on the performance of others;

• our risk management policies, practices, and procedures could leave us exposed to unidentified or unanticipated risks, which could negatively affect our business or result in losses;

• our strategies for mitigating risks arising from our day-to-day operations may prove ineffective resulting in a material adverse effect on our results of operations and financial condition;

Financial environment

• interest rate fluctuations or significant and sustained periods of low interest rates could negatively affect our interest earnings and spread income, or otherwise impact our business;

• our investments are subject to market and credit risks, which could be heightened during periods of extreme volatility or disruption in financial and credit markets;

- equity market volatility could negatively impact our business;
- our use of derivative financial instruments within our risk management strategy may not be effective or sufficient;
- credit market volatility or disruption could adversely impact our financial condition or results from operations;
- our ability to grow depends in large part upon the continued availability of capital;
- we could be adversely affected by a ratings downgrade or other negative action by a ratings organization;
- we could be forced to sell investments at a loss to cover policyholder withdrawals;
- disruption of the capital and credit markets could negatively affect our ability to meet our liquidity and financing needs;
- difficult general economic conditions could materially adversely affect our business and results of operations;

• we may be required to establish a valuation allowance against our deferred tax assets, which could materially adversely affect our results of operations, financial condition, and capital position;

- we could be adversely affected by an inability to access our credit facility;
- we could be adversely affected by an inability to access FHLB lending;

• our financial condition or results of operations could be adversely impacted if our assumptions regarding the fair value and future performance of our investments differ from actual experience;

• the amount of statutory capital that we have and the amount of statutory capital that we must hold to maintain our financial strength and credit ratings and meet other requirements can vary significantly from time to time and is sensitive to a number of factors outside of our

control;

• we operate as a holding company and depend on the ability of our subsidiaries to transfer funds to us to meet our obligations and pay dividends;

Industry

• we are highly regulated, are subject to numerous legal restrictions and regulations, and are subject to audits, examinations and actions by regulators and law enforcement agencies;

• changes to tax law or interpretations of existing tax law could adversely affect our ability to compete with non-insurance products or reduce the demand for certain insurance products;

• financial services companies are frequently the targets of legal proceedings, including class action litigation, which could result in substantial judgments;

• publicly held companies in general and the financial services industry in particular are sometimes the target of law enforcement investigations and the focus of increased regulatory scrutiny;

• new accounting rules, changes to existing accounting rules, or the grant of permitted accounting practices to competitors could negatively impact us;

• use of reinsurance introduces variability in our statements of income;

• our reinsurers could fail to meet assumed obligations, increase rates, or be subject to adverse developments that could affect us;

• our policy claims fluctuate from period to period resulting in earnings volatility;

Table of Contents

Competition

• we operate in a mature, highly competitive industry, which could limit our ability to gain or maintain our position in the industry and negatively affect profitability;

- our ability to maintain competitive unit costs is dependent upon the level of new sales and persistency of existing business; and
- we may not be able to protect our intellectual property and may be subject to infringement claims.

For more information about the risks, uncertainties, and other factors that could affect our future results, please see Part II, Item 1A of this report and our Annual Report on Form 10-K.

CRITICAL ACCOUNTING POLICIES

Our accounting policies require the use of judgments relating to a variety of assumptions and estimates, including, but not limited to expectations of current and future mortality, morbidity, persistency, expenses, and interest rates, as well as expectations around the valuations of securities. Because of the inherent uncertainty when using the assumptions and estimates, the effect of certain accounting policies under different conditions or assumptions could be materially different from those reported in the consolidated condensed financial statements. For a complete listing of our critical accounting policies, refer to our Annual Report on Form 10-K for the year ended December 31, 2012.

RESULTS OF OPERATIONS

We use the same accounting policies and procedures to measure segment operating income (loss) and assets as we use to measure consolidated net income available to PLC s common shareowners and assets. Segment operating income (loss) is income before income tax, excluding realized gains and losses on investments and derivatives net of the related amortization of deferred acquisition costs (DAC) and value of business acquired (VOBA). Operating earnings exclude changes in the guaranteed minimum withdrawal benefits (GMWB) embedded derivatives (excluding the portion attributed to economic cost), realized and unrealized gains (losses) on derivatives used to hedge the variable annuity (VA) product, actual GMWB incurred claims and the related amortization of DAC attributed to each of these items.

Segment operating income (loss) represents the basis on which the performance of our business is internally assessed by management. Premiums and policy fees, other income, benefits and settlement expenses, and amortization of DAC/VOBA are attributed directly to each operating segment. Net investment income is allocated based on directly related assets required for transacting the business of that segment. Realized investment gains (losses) and other operating expenses are allocated to the segments in a manner that most appropriately reflects the operations of that segment. Investments and other assets are allocated based on statutory policy liabilities net of associated statutory policy assets, while DAC/VOBA and goodwill are shown in the segments to which they are attributable.

However, segment operating income (loss) should not be viewed as a substitute for accounting principles generally accepted in the United States of America (GAAP) net income available to PLC s common shareowners. In addition, our segment operating income (loss) measures may not be comparable to similarly titled measures reported by other companies.

We periodically review and update as appropriate our key assumptions on products using the ASC Financial Services-Insurance Topic, including future mortality, expenses, lapses, premium persistency, investment yields, interest spreads, and equity market returns. Changes to these assumptions result in adjustments which increase or decrease DAC amortization and/or benefits and expenses. The periodic review and updating of assumptions is referred to as unlocking . When referring to DAC amortization or unlocking on products covered under the ASC Financial Services-Insurance Topic, the reference is to changes in all balance sheet components amortized over estimated gross profits.

The following table presents a summary of results and reconciles segment operating income (loss) to consolidated net income available to PLC s common shareowners:

	For ' Three Mon June	ths En	ded					
	2013 (Dollars In 7	Гронсо	2012	Change	2013 (Dollars In '	Thous	2012	Change

(1) Includes credit related other-than-temporary impairments of \$4.0 million and \$8.6 million for the three and six months ended June 30, 2013, respectively, as compared to \$13.6 million and \$32.4 million for the three and six months ended June 30, 2012, respectively.

(2) Includes realized investment gains (losses) before related amortization.

(3) Includes realized gains (losses) on derivatives before settlements on interest rate swaps and the VA GMWB economic cost.

For The Three Months Ended June 30, 2013 as compared to The Three Months Ended June 30, 2012

Net income available to PLC s common shareowners for the three months ended June 30, 2013, included an \$18.3 million, or 18.4%, increase in segment operating income. The increase consisted of a \$7.8 million increase in the Annuities segment, a \$6.5 million increase in the Stable Value Products segment, a \$0.9 million increase in the Asset Protection segment, and a \$22.9 million improvement in the Corporate and Other

segment. These increases were partially offset by a \$5.7 million decrease in the Life Marketing segment and a \$14.2 million decrease in the Acquisitions segment.

We experienced net realized gains of \$29.9 million for the three months ended June 30, 2013, as compared to net realized gains of \$3.7 million for the three months ended June 30, 2013, were primarily related to \$21.5 million of gains related to investment securities sale activity, \$18.3 million of gains related to the net activity of the modified coinsurance portfolio, and a \$1.9 million gain on interest rate caps and swaps. Partially offsetting these gains were \$4.0 million of other-than-temporary impairment credit-related losses, net losses of \$2.5 million on derivatives related to variable annuity contracts, and \$5.3 million of losses related to other investment and derivative activity.

• Life Marketing segment operating income was \$24.7 million for the three months ended June 30, 2013, representing a decrease of \$5.7 million, or 18.7%, from the three months ended June 30, 2012. The decrease was primarily due to less favorable traditional life mortality, a \$4.2 million reinsurance accrual established in the second quarter of 2013,

Table of Contents

and an increase in non-deferred expenses resulting from higher sales. This decrease was partially offset by higher investment income due to an increase in reserves.

• Acquisitions segment operating income was \$29.4 million for the three months ended June 30, 2013, a decrease of \$14.2 million, or 32.5%, as compared to the three months ended June 30, 2012. This variance is primarily attributable to an \$8.5 million unfavorable variance related to mortality, interest and other benefits, which includes \$5.0 million related to unreported deaths discovered on a block of terminated life policies during the quarter. The remainder of the variance was caused primarily by lower spread income and the expected runoff of business.

• Annuities segment operating income was \$36.4 million for the three months ended June 30, 2013, as compared to \$28.6 million for the three months ended June 30, 2012, an increase of \$7.8 million, or 27.4%. This variance included a favorable change of \$15.5 million related to higher net policy fees and other income in the variable annuity (VA) line. This was offset by an unfavorable single premium immediate annuity (SPIA) mortality variance of \$7.2 million and an unfavorable \$3.3 million guaranty fund allocation.

• Stable Value Products segment operating income was \$22.5 million and increased \$6.5 million, or 40.8%, for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012. The increase in operating earnings resulted from an increase in participating mortgage income and higher operating spreads offset by a decline in average account values. Participating mortgage income for the three months ended June 30, 2013 was \$5.5 million compared to \$2.4 million for the three months ended June 30, 2013. The adjusted operating spread, which excludes participating income, increased by 69 basis points for the three months ended June 30, 2013 over the prior year, due primarily to a decline in credited interest.

• Asset Protection segment operating income was \$7.4 million, representing an increase of \$0.9 million, or 14.0%, for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012. Earnings from the guaranteed asset protection (GAP) product line increased \$0.8 million primarily from higher volume and lower expenses. Credit insurance earnings increased \$0.2 million. Service contract earnings decreased \$0.1 million.

• Corporate and Other segment operating loss was \$2.5 million for the three months ended June 30, 2013, as compared to an operating loss of \$25.4 million for the three months ended June 30, 2012. The increase resulted from an improvement in net investment income primarily due to a \$4.0 million favorable variance related to mortgage loan prepayment fee income and \$3.8 million related to income on called securities. In addition, the increase was driven by a decline in other operating expenses primarily due to a \$7.2 million deferred issue cost write-off recorded during the second quarter of 2012 and a favorable \$3.9 million guaranty fund allocation to business segments in the second quarter of 2013. The segment also experienced a \$2.1 million favorable variance related to gains generated on the repurchase of non-recourse funding obligations as compared to the second quarter of 2012.

For The Six Months Ended June 30, 2013 as compared to The Six Months Ended June 30, 2012

Net income available to PLC s common shareowners for the six months ended June 30, 2013, included a \$25.4 million, or 10.1%, decrease in segment operating income. The decrease consisted of a \$12.3 million decrease in the Life Marketing segment, an \$18.9 million decrease in the Acquisitions segment, and a \$23.3 million decrease in the Corporate and Other segment. These decreases were partially offset by a \$15.4 million

increase in the Annuities segment, an \$11.7 million increase in the Stable Value Products segment, and a \$2.0 million increase in the Asset Protection segment.

We experienced net realized gains of \$28.6 million for the six months ended June 30, 2013, as compared to net realized losses of \$9.2 million for the six months ended June 30, 2013, were primarily related to \$33.8 million of gains related to investment securities sale activity, \$19.8 million of gains related to the net activity of the modified coinsurance portfolio, and a \$2.9 million gain on interest rate caps and swaps. Partially offsetting these gains were \$8.6 million for other-than-temporary impairment credit-related losses, net losses of \$13.2 million on derivatives related to variable annuity contracts, and \$6.1 million of losses related to other investment and derivative.

Table of Contents

• Life Marketing segment operating income was \$48.4 million for the six months ended June 30, 2013, representing a decrease of \$12.3 million, or 20.3%, from the six months ended June 30, 2012. The decrease was primarily due to less favorable traditional life mortality, a \$4.2 million reinsurance accrual established in the second quarter of 2013, and an increase in non-deferred expenses resulting from higher sales. This decrease was partially offset by higher investment income due to an increase in reserves and lower universal life claims.

• Acquisitions segment operating income was \$63.8 million for the six months ended June 30, 2013, a decrease of \$18.9 million, or 22.9%, as compared to the six months ended June 30, 2012. This variance is primarily attributable to a \$6.5 million unfavorable variance related to mortality, interest and other benefits, which includes \$5.0 million related to unreported deaths discovered on a block of terminated life policies during the quarter. The remainder of the variance was caused primarily by lower spread income and the expected runoff of business.

• Annuities segment operating income was \$79.8 million for the six months ended June 30, 2013, as compared to \$64.3 million for the six months ended June 30, 2012, an increase of \$15.4 million, or 24.0%. This variance included a favorable change of \$10.1 million in operating revenue which was attributable to higher policy fees and other income in the VA line. Favorable changes in benefits and settlement expenses were partially offset by unfavorable changes in non-deferred expenses and DAC amortization.

• Stable Value Products segment operating income was \$40.3 million and increased \$11.7 million, or 40.9%, for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012. The increase in operating earnings resulted from an increase in participating mortgage income and higher operating spreads offset by a decline in average account values. Participating mortgage income for the six months ended June 30, 2013 was \$7.2 million compared to \$2.5 million for the six months ended June 30, 2013. The adjusted operating spread, which excludes participating income, increased by 72 basis points for the six months ended June 30, 2013 over the prior year, due primarily to a decline in credited interest.

• Asset Protection segment operating income was \$13.5 million, representing an increase of \$2.0 million, or 17.6%, for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012. The increase in income was primarily due to a \$2.0 million legal settlement accrual in the first quarter of 2012. Credit insurance earnings increased \$2.2 million primarily due to the previously mentioned \$2.0 million in litigation costs incurred in the first quarter of 2012. Earnings from the GAP product line increased \$0.1 million primarily resulting from lower expenses somewhat offset by higher losses. Service contract earnings decreased \$0.3 million primarily due to lower investment income.

• Corporate and Other segment operating loss was \$20.8 million for the six months ended June 30, 2013, as compared to operating income of \$2.5 million for the six months ended June 30, 2012. The decrease was the result of a \$32.1 million unfavorable variance related to gains on the repurchase of non-recourse funding obligations. For the six months ended June 30, 2013, \$3.4 million of pre-tax gains were generated from the repurchase on non-recourse funding obligations as compared to \$35.5 million of pre-tax gains for the six months ended June 30, 2012. Partially offsetting this decrease was a \$7.2 million deferred issue cost write-off recorded during the second quarter of 2012 and an increase in net investment income for the six months ended June 30, 2013 as compared to the six months ended June 30, 2012.

For The Three Months Ended June 30, 2013 as compared to The Three Months Ended June 30, 2012

Segment operating income

Operating income was \$24.7 million for the three months ended June 30, 2013, representing a decrease of \$5.7 million, or 18.7%, from the three months ended June 30, 2012. The decrease was primarily due to less favorable traditional life mortality, a \$4.2 million reinsurance accrual established in the second quarter of 2013, and an increase in non-deferred expenses resulting from higher sales. This decrease was partially offset by higher investment income due to an increase in reserves.

Operating revenues

Total revenues for the three months ended June 30, 2013, increased \$7.9 million, or 2.3%, as compared to the three months ended June 30, 2012. This increase was driven by higher investment income due to increases in net in force reserves.

Net premiums and policy fees

Net premiums and policy fees decreased by \$0.7 million, or 0.4%, for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012, due to a decrease in premiums and policy fees associated with decreases in traditional life premiums, largely offset by increased sales in universal life business.

Net investment income

Net investment income in the segment increased \$8.8 million, or 7.2%, for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012. Of the increase in net investment income, \$5.6 million was the result of a net increase in universal life reserves. Additionally, traditional life investment income increased \$2.9 million due to higher reserves.

Other income

Other income decreased \$0.2 million, or 0.5%, for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012, primarily due to unfavorable fluctuations in variable universal life marketing allowances partially offset by higher revenue in the segment s non-insurance operations.

Benefits and settlement expenses

Benefits and settlement expenses increased by \$4.6 million, or 1.8%, for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012, due to growth in retained universal life insurance in-force, an increase in reserves resulting from new sales, higher credited interest on universal life products resulting from increases in account values, and less favorable mortality in the traditional life block.

Amortization of DAC

DAC amortization increased \$7.6 million, or 39.1%, for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012, primarily due to the impact of fluctuations in reinsurance premiums, which were offset in the associated reserves within the benefits and settlement expenses.

Other operating expenses

Other operating expenses increased \$1.4 million for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012. This increase reflects higher new business acquisition costs associated with higher sales, higher marketing company expenses of \$0.4 million, higher general administrative expenses, and a \$1.4 million increase in interest expense associated with reserve financing costs.

Table of Contents

Sales

Sales for the segment increased \$18.8 million for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012. Traditional life sales increased slightly \$0.1 million, or 33.2%. Universal life sales increased \$20.0 million due to more competitive product positioning. BOLI sales decreased by \$1.4 million due to less favorable product positioning.

For The Six Months Ended June 30, 2013 as compared to The Six Months Ended June 30, 2012

Segment operating income

Operating income was \$48.4 million for the six months ended June 30, 2013, representing a decrease of \$12.3 million, or 20.3%, from the six months ended June 30, 2012. The decrease was primarily due to less favorable traditional life mortality, a \$4.2 million reinsurance accrual established in the second quarter of 2013, and an increase in non-deferred expenses resulting from higher sales. This decrease was partially offset by higher investment income due to an increase in reserves and lower universal life claims.

Operating revenues

Total revenues for the six months ended June 30, 2013, increased \$32.0 million, or 4.7%, as compared to the six months ended June 30, 2012. This increase was driven by higher premiums and policy fees due to increased sales along with higher investment income due to increases in net in force reserves.

Net premiums and policy fees

Net premiums and policy fees increased by \$15.0 million, or 3.9%, for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012, due to an increase in premiums and policy fees associated with increased sales in universal life business, partially offset by decreases in traditional life premiums.

Net investment income

Net investment income in the segment increased \$17.0 million, or 7.1%, for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012. Of the increase in net investment income, \$10.8 million was the result of a net increase in universal life reserves. Additionally, traditional life investment income increased \$5.8 million due to higher reserves.

Other income

Other income increased slightly for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012, primarily due to higher revenue in the segment s non-insurance operations, largely offset by unfavorable fluctuations in the variable universal life marketing allowances.

Benefits and settlement expenses

Benefits and settlement expenses increased by \$30.8 million, or 6.1%, for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012, due to growth in retained universal life insurance in-force, an increase in reserves resulting from new sales, higher credited interest on universal life products resulting from increases in account values, and less favorable mortality in the traditional life block.

Amortization of DAC

DAC amortization decreased \$1.0 million, or 2.3%, for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012, primarily due to differing impacts of unlocking. In 2013, universal life and BOLI unlocking decreased amortization \$2.3 million, as compared to an increase of \$2.9 million in 2012.

Table of Contents

Other operating expenses

Other operating expenses increased \$14.6 million for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012. This increase reflects higher new business acquisition costs associated with higher sales, higher marketing company expenses of \$1.4 million, higher general administrative expenses, and a \$2.8 million increase in interest expense associated with reserve financing costs.

Sales

Sales for the segment increased \$43.5 million for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012. Traditional life sales slightly increased by \$0.1 million, or 18.0%. Universal life sales increased \$46.1 million due to more competitive product positioning. BOLI sales decreased by \$2.7 million due to less favorable product positioning.

Reinsurance

Currently, the Life Marketing segment reinsures significant amounts of its life insurance in-force. Pursuant to the underlying reinsurance contracts, reinsurers pay allowances to the segment as a percentage of both first year and renewal premiums. Reinsurance allowances represent the amount the reinsurer is willing to pay for reimbursement of acquisition costs incurred by the direct writer of the business. A portion of reinsurance allowances received is deferred as part of DAC and a portion is recognized immediately as a reduction of other operating expenses. As the non-deferred portion of allowances reduces operating expenses in the period received, these amounts represent a net increase to operating income during that period.

Reinsurance allowances do not affect the methodology used to amortize DAC or the period over which such DAC is amortized. However, they do affect the amounts recognized as DAC amortization. DAC on universal life-type, limited-payment long duration, and investment contracts business is amortized based on the estimated gross profits of the policies in-force. Reinsurance allowances are considered in the determination of estimated gross profits, and therefore, impact DAC amortization on these lines of business. Deferred reinsurance allowances on level term business are recorded as ceded DAC, which is amortized over estimated ceded premiums of the policies in-force. Thus, deferred reinsurance allowances may impact DAC amortization. A more detailed discussion of the components of reinsurance can be found in the Reinsurance section of Note 2, *Summary of Significant Accounting Policies* of our Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

Impact of reinsurance

Reinsurance impacted the Life Marketing segment line items as shown in the following table:

(ceded other operating expenses) (1)	\$ (37,174)	\$	(32,904)	\$	(66,365)	\$	(65,563)		

(1) Other operating expenses ceded per the income statement are equal to reinsurance allowances recognized after capitalization.

(2) Assumes no investment income on reinsurance. Foregone investment income would substantially reduce the favorable impact of reinsurance. The Company estimates that the impact of foregone investment income would reduce the net impact of reinsurance by 90% to 160%.

The table above does not reflect the impact of reinsurance on our net investment income. By ceding business to the assuming companies, we forgo investment income on the reserves ceded. Conversely, the assuming companies will receive investment income on the reserves assumed, which will increase the assuming companies profitability on the business we cede. The net investment income impact to us and the assuming companies has not been quantified. The impact of including foregone investment income would be to substantially reduce the favorable net impact of reinsurance reflected above. We estimate that the impact of foregone investment income would be to reduce the net impact of reinsurance presented in the table above by 90% to 160%. The Life Marketing segment s reinsurance programs do not materially impact the other income line of our income statement.

As shown above, reinsurance had a favorable impact on the Life Marketing segment s operating income for the periods presented above. The impact of reinsurance is largely due to our quota share coinsurance program in place prior to mid-2005. Under that program, generally 90% of the segment s traditional new business was ceded to reinsurers. Since mid-2005, a much smaller percentage of overall term business has been ceded due to a change in reinsurance strategy on traditional business. As a result of that change, the relative impact of reinsurance on the Life Marketing segment s overall results is expected to decrease over time. While the significance of reinsurance is expected to decline over time, the overall impact of reinsurance for a given period may fluctuate due to variations in mortality, unlocking of balances, and variations from term business during the post-level premium period.

For The Three Months Ended June 30, 2013 as compared to The Three Months Ended June 30, 2012

The higher ceded premiums for 2013 as compared to 2012 were caused primarily by higher ceded traditional life premiums of \$29.8 million and higher universal life premiums and policy fees of \$16.1 million. Ceded traditional premiums for the three months ended June 30, 2013, increased from the three months ended June 30, 2012, as a number of policies reached their post level premium period. This was offset by increases in ceded premium reserves included in the benefits and settlement expenses line.

Ceded benefits and settlement expenses were higher for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012, due to higher increases in ceded reserves and higher ceded claims. Traditional ceded benefits increased \$36.1 million for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012, due to an increase in ceded death benefits and an increase in ceded reserves largely due to policies reaching the end of their post level period. Universal life ceded benefits increased \$28.8 million for the three months ended June 30, 2012, due to higher ceded claims. Ceded universal life claims were \$29.2 million higher for the three months ended June 30, 2013, as compared to the three months ended June 30, 2013, as compared to the three months ended June 30, 2012, due to higher ceded claims. Ceded universal life claims were \$29.2 million higher for the three months ended June 30, 2013, as compared to the three months ended June 30, 2013.

Ceded amortization of deferred policy acquisitions costs increased for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012, primarily due to the differences in unlocking between the two periods.

Ceded other operating expenses reflect the impact of reinsurance allowances on net income. Allowances decreased in the traditional line reflecting runoff of business and increased in the universal life line reflecting the allowance pattern on older business and changes in the mix of business.

For The Six Months Ended June 30, 2013 as compared to The Six Months Ended June 30, 2012

The higher ceded premiums for 2013 as compared to 2012 were caused primarily by higher ceded traditional life premiums of \$36.3 million and higher universal life premiums and policy fees of \$24.8 million. Ceded traditional premium for the six months ended June 30, 2013, increased from the six months ended June 30, 2012, as a number of policies reached their post level premium period. This was offset by increases in ceded premium reserves included in the benefits and settlement expenses line.

Ceded benefits and settlement expenses were higher for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012, due to higher increases in ceded reserves and higher ceded claims. Traditional ceded benefits increased \$31.9 million for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012, due to an increase in ceded reserves largely due to policies reaching the end of their post level period partially offset by a decrease in ceded death benefits. Universal life ceded benefits increased \$34.8 million for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012, due to an increase in ceded reserves primarily due to new business and higher ceded claims. Ceded universal life claims were \$24.3 million higher for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012.

Ceded amortization of deferred policy acquisitions costs decreased for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012, primarily due to the differences in unlocking between the two periods.

Ceded other operating expenses reflect the impact of reinsurance allowances on net income. Allowances decreased in the traditional line reflecting runoff of business and increased in the universal life line reflecting the allowance pattern on older business and changes in the mix of business.

(1)Amounts are not adjusted for reinsurance ceded.

(2)Includes general account balances held within variable annuity products and is net of coinsurance ceded.

(3)Earned rates exclude portfolios supporting modified coinsurance and crediting rates exclude 100% cessions.

For The Three Months Ended June 30, 2013 as compared to The Three Months Ended June 30, 2012

Segment operating income

Operating income was \$29.4 million for the three months ended June 30, 2013, a decrease of \$14.2 million, or 32.5%, as compared to the three months ended June 30, 2012. This variance is primarily attributable to an \$8.5 million unfavorable variance related to mortality, interest and other benefits, which includes \$5.0 million related to unreported deaths discovered on a block of terminated life policies during the quarter. The remainder of the variance was caused primarily by lower spread income and the expected runoff of business.

Net premiums and policy fees decreased \$7.5 million, or 6.6%, for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012, primarily due to the expected runoff of business. Net investment income decreased \$4.0 million, or 2.9%, for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012, due to the expected runoff of business and lower yields.

Total benefits and expenses

Total benefits and expenses increased \$2.2 million, or 1.0%, for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012. The increase was due to increases in operating expenses, higher mortality, interest and other benefits after considering expected runoff of the blocks.

For The Six Months Ended June 30, 2013 as compared to The Six Months Ended June 30, 2012

Segment operating income

Operating income was \$63.8 million for the six months ended June 30, 2013, a decrease of \$18.9 million, or 22.9%, as compared to the six months ended June 30, 2012. This variance is primarily attributable to a \$6.5 million unfavorable variance related to mortality, interest and other benefits, which includes \$5.0 million related to unreported deaths discovered on a block of terminated life policies during the quarter. The remainder of the variance was caused primarily by lower spread income and the expected runoff of business.

Table of Contents

Operating revenues

Net premiums and policy fees decreased \$27.2 million, or 11.1%, for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012, primarily due to the impact of a reinsurance recapture on 2012 results and the expected runoff of business. Net investment income decreased \$7.5 million, or 2.7%, for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012, due to the expected runoff of business and lower yields.

Total benefits and expenses

Total benefits and expenses decreased \$16.6 million, or 3.8%, for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012. The decrease was due to the impact of a reinsurance recapture on 2012 results and the expected runoff of the in-force business, partially offset by higher mortality, interest and other benefits after considering expected runoff of the blocks.

Reinsurance

The Acquisitions segment currently reinsures portions of both its life and annuity in-force. The cost of reinsurance to the segment is reflected in the chart shown below. A more detailed discussion of the components of reinsurance can be found in the Reinsurance section of Note 2, *Summary of Significant Accounting Policies* of our Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

Impact of reinsurance

Reinsurance impacted the Acquisitions segment line items as shown in the following table:

Acquisitions Segment

Line Item Impact of Reinsurance

		For ' Three Mon June 2013	ths En	ded 2012		For The Six Months Ended June 30, 2013 2012				
	2015 2012 (Dollars In Th						2012

Total benefits and expenses		(103,007)		(108,322)		(202,488)		(183,931)		
NET IMPACT OF REINSURANCE (1)	\$	353	\$	5,678	\$	3,229	\$	986		

(1) Assumes no investment income on reinsurance. Foregone investment income would substantially reduce the favorable impact of reinsurance.

The segment s reinsurance programs do not materially impact the other income line of the income statement. In addition, net investment income generally has no direct impact on reinsurance cost. However, by ceding business to the assuming companies, we forgo investment income on the reserves ceded to the assuming companies. Conversely, the assuming companies will receive investment income on the reserves assumed which will increase the assuming companies profitability on business assumed from the Company. For business ceded under modified coinsurance arrangements, the amount of investment income attributable to the assuming company is included as part of the overall change in policy reserves and, as such, is reflected in benefit and settlement expenses. The net investment income impact to us and the assuming companies has not been quantified as it is not fully reflected in our consolidated financial statements.

The net impact of reinsurance is less favorable by \$5.3 million for the three months ended June 30, 2013, as compared to the three months ended June 30, 2012, primarily due to lower amortization of DAC/VOBA.

The net impact of reinsurance is more favorable by \$2.2 million for the six months ended June 30, 2013, as compared to the six months ended June 30, 2012, primarily due to higher ceded death claims. In the six months ended June 30, 2012, ceded revenues were reduced by \$17.2

million and ceded benefits and expenses were reduced by \$15.6 million due to a reinsurance recapture.
