

SWISS HELVETIA FUND, INC.

Form N-30B-2

May 21, 2018

THE SWISS HELVETIA FUND, INC.

---

April 25, 2018

For the three-month period ended March 31, 2018, the performance of The Swiss Helvetia Fund, Inc. (the Fund), as measured by the change in value in the Fund's net asset value (NAV), decreased -3.90% in US dollars (USD). For the same period, the Fund's share price performance decreased -4.00% in USD, as the discount at which the Fund traded its shares marginally widened. This compares with a decrease of -3.59% in the Swiss Performance Index (the Index or SPI) in USD.

### *Economic environment during the period under review*

#### *Global economic review*

The global macroeconomic environment began 2018 on a positive footing. The International Monetary Fund (IMF) revised its world growth forecast for 2018 and 2019 upwards from 3.7% to 3.9% for both years. In addition, US tax reform provided a temporarily lift to US growth and generated favorable spill-over effects for US trading partners. Towards the end of the reporting period, however, concerns arose that US import tariffs would trigger retaliation, thereby impeding global trade and world economic growth. Inflation expectations gradually picked up, and wage pressure intensified as the US economy remained close to full employment. As a consequence, more interest rate hikes are now expected for the US. Meanwhile, in Europe, the IMF lifted its forecast for Euro-area economies, which

could lead to an earlier than expected end to quantitative easing and low interest rates. As we move into the second quarter of 2018, while the economic environment remains strong, expectations may have gotten a bit ahead of themselves; the economic surprise indices in the US and in Europe both peaked in late 2017.

### *Market environment during the period under review*

Similar to the global macroeconomic environment, equity markets performed well at the beginning of the year. In the US, the S&P 500 Index returned 5.7% in USD. This return was driven by the strong performance of the Technology sector, as illustrated by the 8.7% gain in the Nasdaq Index. At the start of February, however, stocks quickly reversed their path and eventually ended the quarter in negative territory: in the first three months of the year, the S&P 500, MSCI Europe and the SPI lost -0.76%, -1.74% and -3.59%, respectively. While the correction arose suddenly, there were several indications of the impending shift. For example, inflation expectations and long-term interest rates had begun to rise at the end of 2017, and both the Fed and the ECB signalled plans to reverse monetary policy and quantitative easing. In addition, as noted above, economic surprise indices on both sides of the Atlantic peaked in December, and the threat of trade wars had re-emerged as a front-page topic in Q1 2018. Indeed, a few days before the correction, the volatility

---

THE SWISS HELVETIA FUND, INC.

---

index VIX, which had marked a new historical low in late 2017, started to increase.

In light of this background, it was a surprise that the SPI fared worse than the S&P 500 and the MSCI Europe indices, as the large weight of defensive stocks and sectors typically make the SPI more resilient when there is a stock market correction. However, *Roche* and *Nestlé*, two index heavyweights, suffered from the start of the year for stock-specific reasons. Shares of *Roche* fell after Merck released very positive data on Keytruda, its lead candidate drug for immune-oncology, as it now seems more likely that Merck will win the race to market. Furthermore, at

year-end, concerns re-emerged that Roche's best-selling drugs might get stiffer competition from so-called bio-similars. *Nestlé* also disappointed with a very weak sales growth in the final quarter of 2017 and with a lacklustre outlook for 2018. Driven by those two heavyweights, the SPI fell more than the Swiss Small & Mid Cap Index, which declined by -1.14%. This represents another surprise, particularly because small and mid caps stocks, which are seen as more volatile and riskier than large cap stocks, not only outperformed during the January rise, but also fell less over the February and March periods.

---

THE SWISS HELVETIA FUND, INC.

---

*Source: Schroders, Bloomberg, as of March 31, 2018. Performance measured as total return in USD. Sectors mentioned should not be viewed as a recommendation to buy/sell. Portfolio composition is subject to change over time. Investors cannot invest directly in the Index.*

### *Performance*

In comparing the Fund's NAV return of -3.90% to the Index's return of -3.59% in USD, there was a positive relative performance impact from some of the Fund's larger overweight positions, such as *Swatch, Implenla, Logitech, Valiant,*

*Sonova, Tecan* and *Lindt & Sprüngli*. Being underweight in *ABB, Nestlé, Lonza* and *Roche* also had a positive impact on relative performance. Conversely, negative contributions to relative performance came from overweight positions such as *Aryzta, VZ Holding, Belimo* and *Forbo*.  
With

---

THE SWISS HELVETIA FUND, INC.

---

*Zurich, Swiss Re, Partners Group, Vifor and ams*, the Fund also had negative contributions to relative performance from stocks either not held or held at an underweight by the Fund. Taken together, the portfolio holdings on aggregate delivered a marginally positive contribution to relative performance (including a modestly positive return from cash and the private equity holdings), but this positive contribution was slightly more than offset by costs and other factors.

*Portfolio changes*

In total, there were 10 purchases and 11 sales of listed equities on a net basis during the first quarter of 2018. As of March 31, 2018, there are 42 listed companies held by the Fund and six direct private equity investments, including one participation in a private equity limited partnership.

The Fund established new positions in *ABB*, *Geberit*, *Givaudan*, *Swatch (Bearer)* and *Zurich*. In addition, the Fund participated in the initial public offering of *Sensirion*.

We bought an initial position in *ABB*, as we believed the valuation of the company, following its recent share price correction, no longer warranted a zero weight. However, we remain underweight in *ABB*.

*Geberit* and *Givaudan* are two quality companies with leading market share and

---

THE SWISS HELVETIA FUND, INC.

---

best-in-class margins where we believe recent share price declines offered attractive entry points.

*Sensirion* is a leading developer and producer of environmental and gas flow sensors whose products offer superior accuracy and miniaturization features. We believe that the company is well positioned to take advantage of mega trends such as digitization and industry 4.0, and should be able to grow substantially in the coming years.

*Swatch* manufactures some of the world's most reputed luxury watches. We were already overweight in the stock through its registered shares, but added to that overweight through bearer shares, as liquidity appeared more attractive. The company currently benefits from continuing positive news flow, as evidence of recovery in key end markets keeps mounting.

*Zurich* is a well-established Swiss insurance player. Under CEO Mario Greco, we believe the company is on track to deliver on its strategy and will generate above average earnings. Therefore, we switched our position in *Helvetia*, another Swiss insurer, into *Zurich*, as we see more cost discipline in the latter.

In the case of *Zur Rose*, we saw competitive pressure rising with potential new entrants and the regulatory environment worsening.

We bought a position in *Aryzta* in 2017 following an announcement that the company's executive management would be stepping down. At that time, it was also announced that the company would review its holding in Piccard and start focusing on cash flows, which were initiatives we welcomed. Nevertheless, the company issued a profit warning in January 2018, and the share price fell some 43% (in USD) over the quarter. We continue to believe that the company is diligently working through its problems after ousting former management. As a result, we increased our position after the recent share price correction since we believe the investment case is still valid.

In line with our investment philosophy as active managers, we used the heightened volatility and market downturn in February to both increase positions in stocks that we felt corrected too strongly and reduce positions in stocks where the investment case had worsened.

### *Outlook and Investment View*

After strong returns paired with historically low volatility in 2017, volatility picked up in the first quarter of 2018 and equity markets have corrected. We started the year with a positive outlook for economic growth but also highlighted that sentiment indicators were very bullish, which called for caution. While we believe economic prospects are still sound, as evidenced by our upgraded global growth estimates for 2018 and 2019, sentiment

---

THE SWISS HELVETIA FUND, INC.

---

has become more cautious. This has been driven by several developments, such as the imposition of tariffs, greater geopolitical tension and political blockage in important European countries. For example, in Germany, the continuation of the grand coalition will most likely result in political stand-still. In the UK, there are still too many open questions regarding Brexit. In Italy, we expect an unstable government, and necessary reforms are unlikely to happen. And in France, our view is that there is a good chance that Macron, now entering his second year, will be challenged by labor disputes in the public transport sector.

Factoring out external risks, our view is that the global economy has now reached the *expansion phase* and is no longer in the *recovery phase*. While for some countries, such as the US, this occurred earlier, in Europe this transition happened more recently in 2017. If estimates hold true, our upgrade of global growth from 3.2% to 3.5% would make 2018 the strongest year since 2011. During an *expansion phase* firms typically start to experience shortages in spare capacity, leading to inflation of input prices and wages, which in turn drives demand higher. As a result of rising inflation, central banks often tighten monetary policy. Bond yields commonly tend to rise as investors demand additional compensation not only for rising inflation, but also the higher potential returns on equities, driven by stronger economic

growth. Corporate earnings should also develop positively in an environment of economic growth. One could even argue that earnings have the potential to exceed current expectations as operating margins are supported by generally high cost discipline.

In Switzerland, the outlook for economic growth has further improved. The Swiss State Secretariat for Economic Affairs increased its growth outlook for 2018 from 2.3% to 2.4%. Swiss companies generally benefit from a sound economic environment and ongoing productivity gains. In 2018, a weaker Swiss franc compared with its trade weighted currency basket should provide additional support for earnings.

In summary, we believe that the fundamental background for equity markets remains positive with global growth driven by all regions, earnings growth and cost discipline. However, risks (inflation, higher bond yields, external events) have become more visible. As a consequence, we expect higher volatility to persist in the quarters to come. In our opinion, such an environment offers good investment opportunities for active managers, and we intend to stick to our investment philosophy by increasing the Fund's holdings in quality stocks with attractive valuations while taking profits in stocks that are either too expensive or where quality has deteriorated.

THE SWISS HELVETIA FUND, INC.

---

Notes to Schedule of Investments (Unaudited)

**Note 1 Organization and Significant Accounting Policies**

**A. Organization**

The Swiss Helvetia Fund, Inc. (the Fund) is registered under the Investment Company Act of 1940, as amended (the Act), as a non-diversified, closed-end management investment company. The Fund is organized as a corporation under the laws of the State of Delaware.

The investment objective of the Fund is to seek long-term growth of capital through investment in equity and equity-linked securities of Swiss companies. The Fund may also acquire and hold equity and equity-linked securities of non-Swiss companies in limited instances.

**B. Securities Valuation**

The Fund values its investments at fair value in accordance with accounting principles generally accepted in the United States (GAAP).

When valuing listed equity securities, the Fund uses the last sale price on the securities exchange or national securities market on which such securities primarily are traded (the Primary Market) prior to the calculation of the Fund's net asset value (NAV). When valuing equity securities that are not listed (except privately-held companies and private equity limited partnerships) or that are listed but have not traded on a day on which the Fund calculates its NAV, the Fund uses the mean between the bid and asked prices for that day. If there are no asked quotations for such a security, the value of such security will be the most recent bid quotation on the Primary Market on that day. On any day when a security's Primary Market is closed because of a local holiday or other scheduled closure, but the New York Stock Exchange is open, the Fund may use the prior day's closing prices to value such security regardless of the length of the scheduled closing.

When valuing fixed-income securities, if any, the Fund uses the last bid price prior to the calculation of the Fund's NAV. If there is no current bid price for a fixed-income security, the value of such security will be the mean between the last quoted bid and asked prices on that day. Overnight and certain other short-term fixed-income securities with maturities of less than 60 days will be valued by the amortized cost method, unless it is determined that the amortized cost method would not represent the fair value of such security.

It is the responsibility of the Fund's Board of Directors (the Board) to establish procedures to provide for the valuation of the Fund's portfolio holdings. When valuing securities for which market quotations are not readily available, or for which the market quotations that are available are considered unreliable, the Fund determines a fair value in good faith in accordance with these procedures (a Fair Value). The Fund may use these procedures to establish the Fair Value of securities when, for example, a significant event occurs between the time the market closes and the time the Fund values its investments. After consideration of various factors, the Fund may value the securities at their last reported price or at some other value.

## Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

Swiss exchange-listed options, if any, including Eurex-listed options, are valued at their most recent sale price (latest bid for long options and the latest ask for short options) on the Primary Market, or if there are no such sales, at the average of the most recent bid and asked quotations on such Primary Market, or if such quotations are not available, at the last bid quotation (in the case of purchased options) or the last asked quotation (in the case of written options). If, however, there

## THE SWISS HELVETIA FUND, INC.

## Notes to Schedule of Investments (Unaudited) (continued)

are no such quotations, such options will be valued using the implied volatilities observed for similar options or from aggregated data as an input to a model. Options traded in the over-the-counter market, if any, are valued at the price communicated by the counterparty to the option, which typically is the price at which the counterparty would close out the transaction. Option contracts, if any, that are neither exchange-listed nor traded in the over-the-counter market, and where no broker can provide a quote or approved pricing vendor a price, may be valued using the implied volatilities observed for similar instruments or from aggregated market data received from services (e.g., Bloomberg) as an input to a widely-accepted model.

The Fund is permitted to invest in investments that do not have readily available market quotations. For such investments, the Act requires the Board to determine their Fair Value. The aggregate value of these investments amounted to \$7,033,633, or 2.05% of the Fund's net assets at March 31, 2018, and are listed in Note 2 to the Schedule of Investments.

Various inputs are used to determine the value of the Fund's investments. These inputs are summarized in the three broad levels listed below:

Level 1 unadjusted quoted prices in active markets for identical assets and liabilities

Level 2 other significant observable inputs (including quoted prices of similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund's investments as of March 31, 2018:

	Level 1 Quoted Prices	Level 2 Other Significant Observable Inputs	Level 3 Significant Unobservable Inputs	Investments Valued at NAV**	Total
<b>Investments in Securities*</b>					
Common Stock	\$ 330,459,904	\$	\$ 5,028,240	\$	\$ 335,488,144
Preferred Stock			288,142		288,142
Limited Partnership				1,717,251	1,717,251
<b>Total Investments in Securities</b>	<b>\$ 330,459,904</b>	<b>\$</b>	<b>\$ 5,316,382</b>	<b>\$ 1,717,251</b>	<b>\$ 337,493,537</b>

\* Please see the Schedule of Investments for industry classifications.

\*\*

## Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

*As of March 31, 2018 certain of the Fund's investments were valued using net asset value ( NAV ) per share (or its equivalent) as a practical expedient for fair value and have been excluded from the fair value hierarchy in accordance with ASU 2015-07. The fair value amount presented in this table is intended to permit reconciliation of the amounts presented in the fair value hierarchy to the amounts presented in the statement of assets and liabilities.*

---

THE SWISS HELVETIA FUND, INC.

---

Notes to Schedule of Investments (Unaudited) (continued)

The Fund values its investment in a private equity limited partnership in accordance with Accounting Standards Codification 820-10-35, Investments in Certain Entities that Calculate Net Asset Value Per Share (Or its Equivalent) (ASC 820-10-35). ASC 820-10-35 permits a reporting entity to measure the fair value of an investment that does not have a readily determinable fair value, based on the NAV of the investment as a practical expedient, without further adjustment, unless it is probable that the investment will be sold at a value significantly different than the NAV. If the NAV of the investment is not as of the Fund's measurement date, then the NAV should be adjusted to reflect any significant events that may change the valuation. Inputs and valuation techniques for these adjustments may include fair valuations of the partnership and its portfolio holdings provided by the partnership's general partner or manager, other available information about the partnership's portfolio holdings, values obtained on redemption from other limited partners, discussions with the partnership's general partner or manager and/or other limited partners and comparisons of previously-obtained estimates to the partnership's audited financial statements. In using the unadjusted NAV as a practical expedient, certain attributes of the investment that may impact its fair value are not considered. Attributes of those investments include the investment strategies of the privately-held companies and may also include, but are not limited to, restrictions on the investor's ability to redeem its investments at the measurement date and any unfunded commitments.

Level 3 securities, which are listed in Note 2 to the Schedule of Investments, consist of the Fund's investments in privately-held companies.

Inputs and valuation techniques used by the Fund to value its Level 3 investments in privately-held companies may include the following: acquisition cost; fundamental analytical data; discounted cash flow analysis; nature and duration of restrictions on disposition of the investment; public trading of similar securities of similar issuers; economic outlook and condition of the industry in which the issuer participates; financial condition of the issuer; and the issuer's prospects, including any recent or potential management or capital structure changes. Although these valuation inputs may be observable in the marketplace as is characteristic of Level 2 investments, the privately-held companies, categorized as Level 3 investments, generally are highly illiquid in terms of resale.

## THE SWISS HELVETIA FUND, INC.

## Notes to Schedule of Investments (Unaudited) (continued)

When valuing Level 3 investments, management also may consider potential events that could have a material impact on the operations of a privately-held company. Not all of these factors may be considered or available, and other relevant factors may be considered on an investment-by-investment basis. The table below summarizes the techniques and unobservable inputs for the valuation of Level 3 investments.

Quantitative Information about certain Level 3 Fair Value Measurements

	Fair Value at March 31, 2018	Valuation Technique	Unobservable inputs	Range <sup>1</sup>
<b>Biotechnology</b>				
NovImmune SA Common Shares	\$3,723,910	Discounted cash flow	Discount rate	15%
			Probability of success rate	95%
Ixodes AG Preferred Shares	50,088	Discounted cash flow	Discount rate	19%
			Probability of success rate on research and development	10%
<b>Industrial Goods &amp; Services</b>				
SelfFrag AG Preferred Shares	193,525	Market approach	Recent round of financing	N/A
<b>Medical Equipment</b>				
EyeSense AG Preferred Shares	44,529	Market approach	Recent round of financing	N/A
Spineart SA Common Shares	1,304,330	Market approach	Recent round of financing	N/A
<b>Total</b>	<b>\$5,316,382</b>			

<sup>1</sup> Significant changes in any of these ranges would result in a significantly higher or lower fair value measurement. Generally, a change in the probability of success rate on research and development is accompanied by a directionally similar change in fair value. Conversely, a change in the discount rate is accompanied by a directionally opposite change in fair value.

The Fund's policy is to disclose transfers between Levels based on their market prices as of the beginning of the period.

The following is a reconciliation of Level 3 assets for which significant unobservable inputs were used to determine fair value.

	Common Stock	Preferred Stock	Total
Balance as of December 31, 2017	\$ 4,941,039	\$ 328,792	\$ 5,269,831
Change in Unrealized Appreciation/Depreciation <sup>(a)</sup>	87,201	(40,650)	46,551
Net Realized Gain (Loss)			
Gross Purchases			
Gross Sales			
Transfer out of Level 3			
<b>Balance as of March 31, 2018</b>	<b>\$ 5,028,240</b>	<b>\$ 288,142</b>	<b>\$ 5,316,382</b>

Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

*(a) The noted amounts of change in unrealized appreciation/depreciation relate to the fair value of Level 3 assets held on March 31, 2018.*

---

 THE SWISS HELVETIA FUND, INC.
 

---

## Notes to Schedule of Investments (Unaudited) (concluded)

**C. Foreign Currency Translation**

The Fund maintains its accounting records in U.S. dollars. The Fund's assets are invested primarily in Swiss equities. In addition, the Fund can make its temporary investments in Swiss franc-denominated bank deposits, short-term debt securities and money market instruments. Substantially all income received by the Fund is in Swiss francs. The Fund's NAV, however, is reported, and distributions from the Fund are made, in U.S. dollars, resulting in gain or loss from currency conversions in the ordinary course of business. Historically, the Fund has not entered into transactions designed to reduce currency risk and does not intend to do so in the future. The cost basis of foreign denominated assets and liabilities is determined on the date that they are first recorded within the Fund and translated to U.S. dollars. These assets and liabilities are subsequently valued each day at prevailing exchange rates. The difference between the original cost and current value denominated in U.S. dollars is recorded as unrealized foreign currency gain/loss. In valuing securities transactions, the receipt of income and the payment of expenses, the Fund uses the prevailing exchange rate on the transaction date.

**D. Concentration of Market Risk**

The Fund primarily invests in securities of Swiss issuers. Such investments may carry certain risks not ordinarily associated with investments in securities of U.S. issuers. These risks include future political and economic developments, unfavorable movements in the Swiss franc relative to the U.S. dollar, and the possible imposition of exchange controls and changes in governmental law and restrictions. In addition, concentrations of investments in securities of issuers located in a specific region expose the Fund to the economic and government policies of that region and may increase risk compared to a fund whose investments are more diversified.

**Note 2 Capital Commitments**

As of March 31, 2018, the Fund maintains an illiquid investment in one private equity limited partnership. This investment appears in the Fund's Schedule of Investments. The Fund's capital commitment for this partnership is shown in the table below:

Investments	Original Capital Commitment*	Unfunded Commitment*
<b>Private Equity Limited Partnership International (a)</b>		
Aravis Biotech II, Limited Partnership	\$ 3,393,901	\$ 84,508

\* The original capital commitment represents 3,250,000 Swiss francs. The unfunded commitment represents 80,925 Swiss francs. The Swiss franc/U.S. dollar exchange rate as of March 31, 2018 was used for conversion and equaled 0.9576 as of such date.

(a) This category consists of one private equity limited partnership that invests primarily in venture capital companies in the biotechnology and medical technology sectors. There is no redemption right for the interest in this limited partnership. Instead, the nature of investments in this category is that distributions are received through the realization of the underlying assets of the limited partnership.

**Note 3 Subsequent Events**

Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

The Fund has evaluated the need for disclosures and/or adjustments resulting from subsequent events through the date financial statements were available to be issued. Based on this evaluation, no adjustments were required to the financial statements as of March 31, 2018.

---

THE SWISS HELVETIA FUND, INC.

---

## Automatic Dividend Reinvestment Plan (Unaudited)

### Terms and Conditions

Pursuant to this Automatic Dividend Reinvestment Plan (the **Plan**) of The Swiss Helvetia Fund, Inc. (the **Fund**), unless a holder (each, a **Shareholder**) of the Fund's shares of common stock (the **Common Shares**) otherwise elects, all income dividends, capital gain distributions and returns of capital, if any (collectively referred to herein as **dividends**), on such Shareholder's Common Shares will be automatically reinvested by American Stock Transfer & Trust Company, as agent for Shareholders in administering the Plan (the **Plan Administrator**), in additional Common Shares of the Fund. Shareholders who elect not to participate in the Plan will receive all dividends payable in cash directly to the Shareholder of record (or, if the Common Shares are held in street or other nominee name, then to such nominee) by American Stock Transfer & Trust Company LLC, as the Dividend Disbursing Agent. Shareholders may elect not to participate in the Plan and to receive all dividends in cash by contacting the Plan Administrator. Enrollment, purchase or sales of shares and other transactions or services offered by the Plan can be directed to the Plan Administrator through the following:

### Telephone

Telephone the Plan Administrator: 1-888-556-0425.

### In Writing

You may also write to the Plan Administrator at the following address: American Stock Transfer & Trust Company, PO Box 922, Wall Street Station, New York, NY 10269-0560. Be sure to include your name, address, daytime phone number, social security or tax I.D. number and a reference to The Swiss Helvetia Fund, Inc. on all correspondence.

Participation in the Plan is completely voluntary and may be terminated at any time without penalty by providing notice in writing to the Plan Administrator at least 3 business days prior to any dividend payment date for that dividend to be payable in cash. A request for termination that is received less than 3 business days prior to any dividend payment date will be processed by the Plan Administrator, but you will have that dividend reinvested in additional Common Shares. However, all subsequent dividends will be payable in cash unless and until you resume participation in the Plan. To resume participation in the Plan, your request to enroll in the Plan must be received by the record date for that dividend distribution. If received after the record date, your participation in the Plan will begin with the next dividend declaration.

Whenever the Fund declares a dividend, payable either in Common Shares or in cash, participants in the Plan will receive a number of Common Shares determined in accordance with the following provisions and non-participants in the Plan will receive cash. The Common Shares will be acquired by the Plan Administrator for the participants' accounts, depending upon the circumstances described below, either (i) through the receipt of additional unissued but authorized Common Shares from the Fund ( **newly issued Common Shares** ) or (ii) by purchase of outstanding Common Shares on the open market ( **open-market purchases** ) on the New York Stock Exchange, the primary national securities exchange on which the Common Shares are traded, or elsewhere.

If, on the payment date for any dividend, the net asset value ( **NAV** ) per Common Share is equal to or less than the market price per Common Share (plus estimated brokerage

---

THE SWISS HELVETIA FUND, INC.

---

Automatic Dividend Reinvestment Plan (Unaudited) (continued)

trading fees) (such condition being referred to herein as "market premium"), the Plan Administrator will invest the dividend amount in newly issued Common Shares on behalf of the participants. The number of newly issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the dividend by the NAV per Common Share on the date the Common Shares are issued, provided that, if the NAV per Common Share is less than or equal to 95% of the then current market price per Common Share on the date of issuance, the dollar amount of the dividend will be divided by 95% of the market price on the date of issuance for purposes of determining the number of shares issuable under the Plan.

If, on the payment date for any dividend, the NAV per Common Share is greater than the market price of the Common Shares (plus estimated brokerage trading fees) (such condition being referred to herein as "market discount"), the Plan Administrator will invest the dividend amount in Common Shares acquired on behalf of the participants in open-market purchases.

In the event of a market discount on the payment date for any dividend, the Plan Administrator will have until the last business day before the next date on which the Common Shares trade on an "ex-dividend" basis or in no event more than 30 days after the record date for such dividend, whichever is sooner (the "last purchase date"), to invest the dividend amount in Common Shares acquired in open-market purchases. If, before the Plan Administrator has completed its open-market purchases, the market price of a Common Share exceeds the NAV per Common Share, the average per Common Share purchase price paid by the Plan Administrator may

exceed the NAV of the Common Shares, resulting in the acquisition of fewer Common Shares than if the dividend had been paid in newly issued Common Shares on the dividend payment date. Because of the foregoing difficulty with respect to open-market purchases, if the Plan Administrator is unable to invest the full dividend amount in open-market purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Administrator may cease making open-market purchases and may invest the uninvested portion of the dividend amount in newly issued Common Shares at the NAV per Common Share at the close of business on the last purchase date provided that, if the NAV is less than or equal to 95% of the then current market price per Common Share, the dollar amount of the dividend will be divided by 95% of the market price on the date of issuance for purposes of determining the number of Common Shares issuable under the Plan.

The Plan Administrator maintains all registered Shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by Shareholders for tax records. Common Shares in the account of each Plan participant generally will be held by the Plan Administrator in non-certificated form in the name of the Plan participant, although the Plan Administrator will issue certificates for whole Common Shares upon your request. Certificates for fractional Common Shares will not be issued.

In the case of Shareholders such as banks, brokers or nominees that hold Common Shares for others who are the beneficial owners, the Plan Administrator will administer the Plan on the basis of the number of

---

THE SWISS HELVETIA FUND, INC.

---

### Automatic Dividend Reinvestment Plan (Unaudited) (concluded)

Common Shares certified from time to time by the record Shareholder and held for the account of beneficial owners who participate in the Plan.

There will be no brokerage charges with respect to Common Shares issued directly by the Fund as a result of dividends payable either in Common Shares or in cash. However, each participant will pay a pro rata share of brokerage trading fees incurred with respect to the Plan Administrator's open-market purchases of Common Shares in connection with the reinvestment of dividends under the Plan.

Participants in the Plan may sell any or all of their Common Shares in their Plan accounts by contacting the Plan Administrator. The Plan Administrator currently charges \$15.00 for the transaction, plus \$0.10 per Common Share for this service. Participants also may withdraw their Common Shares from their Plan accounts and sell those Common Shares through their broker.

Neither the Fund nor the Plan Administrator will provide any advice, make any recommendations, or offer any opinion with respect to whether or not you should purchase or sell your Common Shares or otherwise participate in the Plan. You must make independent investment decisions based on your own judgment and research. The Common Shares held in Plan accounts are not subject to protection under the Securities Investor Protection Act of 1970.

Neither the Fund nor the Plan Administrator will be liable for any good faith act or for any good faith omission to act, including, without limitation, any claim or liability arising out of failure to terminate a participant's

account upon the participant's death, the prices at which Common Shares are purchased or sold for a participant's account, the times when purchases or sales of Common Shares are made, or fluctuations in the market value of Common Shares. However, nothing contained in this provision affects a Shareholder's right to bring a cause of action based on alleged violations of the federal securities laws.

### Voting

Each Shareholder proxy will include those Common Shares purchased or received pursuant to the Plan. The Plan Administrator will forward all proxy solicitation materials to participants and vote proxies for Common Shares held pursuant to the Plan in accordance with the instructions of the participants.

### Taxation

The automatic reinvestment of dividends will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such dividends.

### Amendments to Plan

## Edgar Filing: SWISS HELVETIA FUND, INC. - Form N-30B-2

The Fund reserves the right to suspend, amend or terminate the Plan at any time. All Shareholders of record, both participants and non-participants in the Plan, will be notified of any suspension, termination or significant amendment of the Plan. If the Plan is terminated, Common Shares held in the participants' accounts will be distributed to the participants. Any change in the source of purchase of Common Shares under the Plan from open market purchases or direct issuance by the Plan Administrator does not constitute an amendment to the Plan.
