

ACACIA RESEARCH CORP
Form 10-Q
May 10, 2017

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

FOR THE QUARTERLY PERIOD ENDED MARCH 31, 2017

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

FOR THE TRANSITION PERIOD FROM _____ TO _____

Commission File Number: 0-26068

(Exact name of registrant as specified in its charter)

DELAWARE 95-4405754
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)
520 Newport Center Drive, 12th Floor, Newport Beach, California 92660
(Address of principal executive offices, Zip Code)

(949) 480-8300
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act:

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

As of May 5, 2017, 50,587,722 shares of the registrant's common stock, \$0.001 par value, were issued and outstanding.

ACACIA RESEARCH CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. DESCRIPTION OF BUSINESS AND BASIS OF PRESENTATION

Description of Business. As used herein, “Acacia” and the “Company” refer to Acacia Research Corporation and/or its wholly and majority-owned and controlled operating subsidiaries, and/or where applicable, its management. All patent investment, prosecution, licensing and enforcement activities are conducted solely by certain of Acacia’s wholly and majority-owned and controlled operating subsidiaries.

Acacia’s operating subsidiaries invest in, license and enforce patented technologies. Acacia’s operating subsidiaries partner with inventors and patent owners, applying their legal and technology expertise to patent assets to unlock the financial value in their patented inventions. In addition, our operating subsidiaries may from time to time evaluate, leveraging our intellectual property expertise, other business opportunities. In some cases, these opportunities will compliment, and / or supplement our primary licensing and enforcement business.

Acacia’s operating subsidiaries generate revenues and related cash flows from the granting of intellectual property rights for the use of patented technologies that its operating subsidiaries control or own. Acacia’s operating subsidiaries assist patent owners with the prosecution and development of their patent portfolios, the protection of their patented inventions from unauthorized use, the generation of licensing revenue from users of their patented technologies and, where necessary, with the enforcement against unauthorized users of their patented technologies through the filing of patent infringement litigation.

Acacia’s operating subsidiaries are principals in the licensing and enforcement effort, obtaining control of the rights in the patent portfolio, or control of the patent portfolio outright. Acacia’s operating subsidiaries own or control the rights to multiple patent portfolios, which include U.S. patents and certain foreign counterparts, covering technologies used in a wide variety of industries.

Neither Acacia nor its operating subsidiaries invent new technologies or products; rather, Acacia depends upon the identification and investment in new patents, inventions and companies that own intellectual property through its relationships with inventors, universities, research institutions, technology companies and others. If Acacia's operating subsidiaries are unable to maintain those relationships and to continue to identify and grow new relationships, then they may not be able to identify new technology-based opportunities for sustainable revenue and / or revenue growth.

During the first quarter of 2017 Acacia obtained control of one new patent portfolio. In fiscal 2016 Acacia obtained control of two new patent portfolios, compared to three, six and 25 new patent portfolios in fiscal years 2015, 2014 and 2013, respectively.

Basis of Presentation. The accompanying consolidated financial statements include the accounts of Acacia and its wholly and majority-owned and controlled subsidiaries. Material intercompany transactions and balances have been eliminated in consolidation. Noncontrolling interests in Acacia’s majority-owned and controlled operating subsidiaries (“noncontrolling interests”) are separately presented as a component of stockholders’ equity in the consolidated statements of financial position for the applicable periods presented. Consolidated net income (loss) is adjusted to include the net (income) loss attributed to noncontrolling interests in the consolidated statements of operations. Refer to the accompanying consolidated financial statements for total noncontrolling interests, net (income) loss attributable to noncontrolling interests and contributions from and distributions to noncontrolling interests, for the applicable periods presented.

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“US GAAP”) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, certain information and footnotes required by accounting principles generally accepted in the United States of America in annual financial statements have been omitted or condensed in accordance with quarterly reporting requirements of the Securities and Exchange Commission (“SEC”). These interim consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto for the year ended December 31, 2016, as reported by Acacia in its Annual Report on Form 10-K filed with the SEC. The year end consolidated balance sheet data was derived from audited financial statements but does not include all disclosures required by accounting principles generally accepted in the United States of America.

The condensed consolidated interim financial statements of Acacia include all adjustments of a normal recurring nature which, in the opinion of management, are necessary for a fair statement of Acacia’s consolidated financial position as of March 31, 2017, and results of its operations and its cash flows for the interim periods presented. The consolidated results of operations for the three months ended March 31, 2017 are not necessarily indicative of the results to be expected for the entire fiscal year.

ACACIA RESEARCH CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Revenue Recognition. Revenue is recognized when (i) persuasive evidence of an arrangement exists, (ii) all obligations have been substantially performed pursuant to the terms of the arrangement, (iii) amounts are fixed or determinable, and (iv) the collectibility of amounts is reasonably assured.

In general, revenue arrangements provide for the payment of contractually determined fees in consideration for the grant of certain intellectual property rights for patented technologies owned or controlled by Acacia's operating subsidiaries. These rights typically include some combination of the following: (i) the grant of a non-exclusive, retroactive and future license to manufacture and/or sell products covered by patented technologies owned or controlled by Acacia's operating subsidiaries, (ii) a covenant-not-to-sue, (iii) the release of the licensee from certain claims, and (iv) the dismissal of any pending litigation. The intellectual property rights granted may be perpetual in nature, extending until the expiration of the related patents, or can be granted for a defined, relatively short period of time, with the licensee possessing the right to renew the agreement at the end of each contractual term for an additional minimum upfront payment. Pursuant to the terms of these agreements, Acacia's operating subsidiaries have no further obligation with respect to the grant of the non-exclusive retroactive and future licenses, covenants-not-to-sue, releases, and other deliverables, including no express or implied obligation on Acacia's operating subsidiaries' part to maintain or upgrade the technology, or provide future support or services. Generally, the agreements provide for the grant of the licenses, covenants-not-to-sue, releases, and other significant deliverables upon execution of the agreement, or upon receipt of the minimum upfront payment for term agreement renewals. As such, the earnings process is complete and revenue is recognized upon the execution of the agreement, when collectibility is reasonably assured, or upon receipt of the minimum upfront fee for term agreement renewals, and when all other revenue recognition criteria have been met.

For the periods presented herein, the majority of the revenue agreements executed by the Company provided for the payment of one-time, paid-up license fees in consideration for the grant of certain intellectual property rights for patented technology rights owned by Acacia's operating subsidiaries. These rights were primarily granted on a perpetual basis, extending until the expiration of the underlying patents.

Cost of Revenues. Cost of revenues include the costs and expenses incurred in connection with Acacia's patent licensing and enforcement activities, including inventor royalties paid to original patent owners, contingent legal fees paid to external patent counsel, other patent-related legal expenses paid to external patent counsel, licensing and enforcement related research, consulting and other expenses paid to third-parties and the amortization of patent-related investment costs. These costs are included under the caption "Cost of revenues" in the accompanying consolidated statements of operations.

Inventor Royalties and Contingent Legal Expenses. Inventor royalties are expensed in the consolidated statements of operations in the period that the related revenues are recognized. In certain instances, pursuant to the terms of the underlying inventor agreements, upfront advances paid to patent owners by Acacia's operating subsidiaries are recoverable from future net revenues. Patent costs that are recoverable from future net revenues are amortized over the estimated economic useful life of the related patents, or as the prepaid royalties are earned by the inventor, as appropriate, and the related expense is included in amortization expense in the consolidated statements of operations. Any unamortized upfront advances recovered from net revenues are expensed in the period recovered, and included in amortization expense in the consolidated statements of operations.

Contingent legal fees are expensed in the consolidated statements of operations in the period that the related revenues are recognized. In instances where there are no recoveries from potential infringers, no contingent legal fees are paid;

however, Acacia's operating subsidiaries may be liable for certain out of pocket legal costs incurred pursuant to the underlying legal services agreement.

Use of Estimates. The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Acacia believes that, of the significant accounting policies described herein, the accounting policies associated with revenue recognition, stock-based compensation expense, impairment of marketable securities and patent-related intangible assets, the determination of the economic useful life of amortizable intangible assets, income taxes and valuation allowances against net deferred tax assets, the valuation of the loan and equity instruments discussed at Note 5 and the application of the acquisition method of accounting for business combinations, require its most difficult, subjective or complex judgments.

ACACIA RESEARCH CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Concentrations. Two licensees individually accounted for 73% and 12% of revenues recognized during the three months ended March 31, 2017, and four licensees accounted for 22%, 19%, 16% and 11% of revenues recognized during the three months ended March 31, 2016. For the three months ended March 31, 2017 and 2016, 92% and 25%, respectively, of revenues were attributable to licensees domiciled in foreign jurisdictions, based on the jurisdiction of the entity obligated to satisfy payment obligations pursuant to the applicable revenue arrangement. The Company does not have any material foreign operations.

Two licensees individually represented approximately 84% and 10% of accounts receivable at March 31, 2017. Four licensees individually represented approximately 39%, 22%, 16% and 15% of accounts receivable at December 31, 2016.

Stock-Based Compensation. The compensation cost for all stock-based awards is measured at the grant date, based on the fair value of the award, and is recognized as an expense on a straight-line basis over the employee's requisite service period (generally the vesting period of the equity award) which is generally two to four years. The fair value of restricted stock and restricted stock unit awards is determined by the product of the number of shares or units granted and the grant date market price of the underlying common stock. The fair value of each option award is estimated on the date of grant using a Black-Scholes option-pricing model. Stock-based compensation expense for awards with service and / or performance conditions that affect vesting is recorded only for those awards expected to vest using an estimated forfeiture rate.

Restricted stock awards and stock option awards with performance-based vesting conditions generally vest based upon the Company achieving specified cash flow performance targets over a one and two-year period from the date of grant.

Performance-based stock option awards with market-based vesting conditions vest based upon the Company achieving specified stock price targets over a four-year period. The effect of a market condition is reflected in the estimate of the grant-date fair value of the options utilizing a Monte Carlo valuation technique. Compensation cost is recognized for an option with a market-based vesting condition provided that the requisite service is rendered, regardless of when, if ever, the market condition is satisfied. The service period for options with a market-based vesting condition is inferred from the application of the Monte Carlo valuation technique. The derived service period represents the duration of the median of the distribution of share price paths on which the market condition is satisfied. The duration is the period of time from the service inception date to the expected date of satisfaction, as determined from the valuation technique. Assumptions utilized in connection with the Monte Carlo valuation technique included: estimated risk-free interest rate; expected volatility; and expected dividend yield. The risk-free interest rate was determined based on the yields available on U.S. Treasury zero-coupon issues. The expected stock price volatility was determined using historical volatility. The expected dividend yield was based on expectations regarding dividend payments.

Fair Value Measurements. U.S. GAAP defines fair value as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date, and also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available. The three-level hierarchy of valuation techniques established to measure fair value is defined as follows:

Level 1 - Observable Inputs: Quoted prices in active markets for identical investments;

Level 2 - Pricing Models with Significant Observable Inputs: Other significant observable inputs, including quoted prices for similar investments, interest rates, credit risk, etc.; and

Level 3 - Unobservable Inputs: Significant unobservable inputs, including the entity's own assumptions in determining the fair value of investments.

Whenever possible, the Company is required to use observable market inputs (Level 1 - quoted market prices) when measuring fair value. Acacia has not elected the fair value option for recording non-financial assets and liabilities, and therefore no fair value measurements are performed on a recurring basis.

Patents. Patents include the cost of patents or patent rights (hereinafter, collectively "patents") acquired from third-parties or obtained in connection with business combinations. Patent costs are amortized utilizing the straight-line method over their remaining economic useful lives, ranging from one to seven years.

Impairment of Long-lived Assets. Acacia reviews long-lived assets and intangible assets for potential impairment annually (quarterly for patents) and when events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. In the event the expected undiscounted future cash flows resulting from the use of the asset is less than the

ACACIA RESEARCH CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

carrying amount of the asset, an impairment loss is recorded equal to the excess of the asset's carrying value over its fair value. If an asset is determined to be impaired, the loss is measured based on quoted market prices in active markets, if available. If quoted market prices are not available or not indicative of current fair value, the estimate of fair value is based on various valuation techniques, including a discounted value of estimated future cash flows.

Fair value is generally estimated using the "Income Approach," focusing on the estimated future net income-producing capability of the patent portfolios over the estimated remaining economic useful life. Estimates of future after-tax cash flows are converted to present value through "discounting," including an estimated rate of return that accounts for both the time value of money and investment risk factors. Estimated cash inflows are typically based on estimates of reasonable royalty rates for the applicable technology, applied to estimated market data. Estimated cash outflows are based on existing contractual obligations, such as contingent legal fee and inventor royalty obligations, applied to estimated license fee revenues, in addition to other estimates of out-of-pocket expenses associated with a specific patent portfolio's licensing and enforcement program. The analysis also contemplates consideration of current information about the patent portfolio including, status and stage of litigation, periodic results of the litigation process, strength of the patent portfolio, technology coverage and other pertinent information that could impact future net cash flows.

Income Taxes. Income taxes are accounted for using an asset and liability approach that requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been recognized in Acacia's consolidated financial statements or consolidated income tax returns. A valuation allowance is established to reduce deferred tax assets if all, or some portion, of such assets will more than likely not be realized, or if it is determined that there is uncertainty regarding future realization of such assets.

The provision for income taxes for interim periods is determined using an estimate of Acacia's annual effective tax rate, adjusted for discrete items, if any, that are taken into account in the relevant period. Each quarter, Acacia updates the estimate of the annual effective tax rate, and if the estimated tax rate changes, a cumulative adjustment is recorded.

The Company's effective tax rates for the three months ended March 31, 2017 and 2016 were 11% and 2%, respectively. The effective rates for the periods presented primarily reflect the impact of foreign withholding taxes related to certain revenue agreements executed with third party licensees domiciled in foreign jurisdictions.

3. INCOME (LOSS) PER SHARE

The Company computes net income (loss) attributable to common stockholders using the two-class method required for capital structures that include participating securities. Under the two-class method, securities that participate in non-forfeitable dividends, such as the Company's outstanding unvested restricted stock, are considered "participating securities."

In applying the two-class method, (i) basic net income (loss) per share is computed by dividing net income (loss) (less any dividends paid on participating securities) by the weighted average number of shares of common stock and participating securities outstanding for the period and (ii) diluted earnings per share may include the additional effect of other securities, if dilutive, in which case the dilutive effect of such securities is calculated by applying the two-class method and the treasury stock method to the assumed exercise or vesting of potentially dilutive common shares. The method yielding the more dilutive result is ultimately reported for the applicable period. Potentially dilutive common stock equivalents primarily consist of employee stock options, and restricted stock units for

calculations utilizing the two-class method, and also include unvested restricted stock, when utilizing the treasury method.

The following table presents the weighted-average number of common shares outstanding used in the calculation of basic and diluted loss per share:

8

ACACIA RESEARCH CORPORATION

Effect of potentially dilutive securities:		
Common stock options and restricted stock units	—	—
Weighted-average shares used in computing net loss per share attributable to common stockholders – diluted	50,333,056	49,925,550
Basic and diluted net loss per common share	\$(0.24)	\$ (0.20)
Anti-dilutive equity-based incentive awards excluded from the computation of diluted loss per share	4,420,717	2,350,445
Minimum price of awards excluded from the computation of diluted loss per share	\$—	\$ —
Maximum price of awards excluded from the computation of diluted loss per share	\$6.75	\$ 3.90

4. PATENTS

Acacia's only identifiable intangible assets at March 31, 2017 and December 31, 2016 are patents and patent rights. Patent-related accumulated amortization totaled \$363,558,000 and \$358,043,000 as of March 31, 2017 and December 31, 2016, respectively.

Acacia's patents have remaining estimated economic useful lives ranging from one to seven years. The weighted-average remaining estimated economic useful life of Acacia's patents is approximately five years. The following table presents the scheduled annual aggregate amortization expense as of March 31, 2017 (in thousands): For the years ending December 31,

Remainder of 2017	\$16,819
2018	21,256
2019	19,150
2020	6,707
2021	5,421
Thereafter	11,451
	\$80,804

5. LOAN RECEIVABLE AND INVESTMENT IN WARRANTS AND SHARES

On August 15, 2016, Acacia entered into an Investment Agreement with Veritone, Inc. ("Veritone"), which provides for Acacia to invest up to \$50 million in Veritone, consisting of both debt and equity components. Pursuant to the Investment Agreement, on August 15, 2016, Acacia entered into a secured convertible promissory note with Veritone (the "Veritone Loans"), which permits Veritone to borrow up to \$20 million through two \$10 million advances, each

bearing interest at the rate of 6.0% per annum (included in Other Income (Expense) in the consolidated statement of operations). On August 15, 2016, Acacia funded the initial \$10 million loan (the “First Loan”), which initially had a one-year term. On November 25, 2016, Acacia funded the second \$10 million loan (the “Second Loan”), which has a one-year term. In addition, upon the funding of the Second Loan, the maturity date of the First Loan was automatically extended to the maturity date of the Second Loan. As a result, both the First Loan and the Second Loan are due and payable on November 25, 2017. Veritone’s obligations under the

ACACIA RESEARCH CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Veritone Loans are secured by substantially all of Veritone's assets pursuant to a security agreement that Acacia entered into with Veritone dated August 15, 2016.

In addition, commencing on the earlier of Veritone's consummation of a private round of financing of at least \$10 million (a "Next Equity Financing") and the maturity date of the Veritone Loans, Acacia has the right, under certain circumstances, to convert all or a portion of the principal and accrued interest of the Veritone Loans into shares of Veritone's Series B Preferred Stock or, if Veritone consummates a Next Equity Financing, into shares of Veritone capital stock issued in such financing, at various contractual conversion rates, with the exact conversion rate to depend upon (i) whether Veritone consummates a Next Equity Financing, (ii) the price per share in such Next Equity Financing and (iii) whether or not Acacia elects to convert all of the outstanding principal and accrued interest under the Veritone Loans. If Veritone consummates a qualified public offering of its common stock, with gross proceeds to Veritone of at least \$15.0 million ("IPO"), any outstanding principal and accrued interest under the Veritone Loans will automatically convert into shares of Veritone's common stock at the lower of the applicable conversion rate and the initial public offering price of Veritone's common shares ("IPO Price").

In conjunction with the First Loan, Veritone issued Acacia a four-year \$700,000 warrant to purchase shares of Veritone's common stock at various exercise prices, with the actual exercise price to be determined by the type and/or valuation of Veritone's future equity financings, if any. Pursuant to an amendment to the warrant agreement effective March 15, 2017, the actual number of shares to be purchased upon exercise of the warrant is determined by dividing the warrant value by the lower of the applicable contractual exercise price and the IPO Price, if applicable. Upon funding of the Second Loan, Veritone issued to Acacia two additional four-year \$700,000 warrants to purchase shares of Veritone's common stock with similar amended terms.

In addition, pursuant to the Investment Agreement, Veritone issued Acacia a five-year Primary Warrant to purchase up to \$50 million, less all converted amounts or amounts repaid under the Veritone Loans, worth of shares of Veritone's common stock at various exercise prices, with the actual exercise price per share to be determined by the amount of principal and accrued interest under the Veritone Loans converted into shares of Veritone common stock. Pursuant to an amendment to the Primary Warrant effective March 15, 2017, the Primary Warrant will be exercised automatically upon Veritone's consummation of an IPO, with an exercise price equal to the lower of the applicable contractual exercise price and the IPO Price. In the absence of an automatic exercise, Acacia may exercise the Primary Warrant at any time during its five-year term after August 15, 2017. Immediately following Acacia's exercise of the Primary Warrant in full, Veritone has the obligation to issue to Acacia an additional 10% Warrant that provides for the issuance of additional shares of Veritone common stock, with 50% of the shares underlying the 10% Warrant vesting as of the issuance date of the 10% Warrant, and the remaining 50% of shares vesting on the anniversary of the issuance date of the 10% Warrant.

Veritone Bridge Loan. On March 14, 2017, Acacia entered into an additional secured convertible promissory note with Veritone (the "Veritone Bridge Loan"), which permits Veritone to borrow up to an additional \$4.0 million, bearing interest at the rate of 8.0% per annum. On March 17, 2017, Acacia funded the initial \$1.0 million advance (the "First Bridge Loan"). Veritone's obligations under the Veritone Bridge are secured by substantially all of Veritone's assets. Additional advances of \$1.0 million are required upon notice by Veritone on April 15, 2017, May 15, 2017 and June 15, 2017 ("Installment Dates"), provided that no advances to Veritone are required on an Installment Date occurring after April 30, 2017 if (i) Veritone has not completed its initial public offering on or prior to April 30, 2017, or (ii) if certain executives are no longer employees of Veritone as of the applicable Installment Date. All advances and accrued interest under the Veritone Bridge Loan mature and are due and payable in full on November 25, 2017.

The outstanding principal balance and any accrued but unpaid interest under the Veritone Bridge Loan will automatically convert, immediately prior to Veritone's consummation of an IPO, into that number of shares of Veritone common stock determined by dividing the Veritone Bridge Loan amounts outstanding by the lower of \$8.1653 or the IPO Price, subject to a conversion limit of 981,958 shares of Veritone common stock.

In conjunction with the Veritone Bridge Loan, Veritone will issue to Acacia up to 100,000 shares of Veritone common stock (“Upfront Shares”), and upon each additional advance, if any, will issue (i) up to 150,000 shares of Veritone common stock (the “Bridge Installment Shares”) and (ii) 10-year warrants to purchase up to 200,000 shares of Veritone common stock (the “Bridge Warrant Shares”) with other terms and conditions similar to the warrants described above. The Upfront Shares, Bridge Installment Shares and Bridge Warrant Shares are issued on a pro-rata basis as each advance is funded. As of March 31, 2017, 25,000 Upfront Shares, 37,500 Bridge Installment Shares and 50,000 Bridge Warrant Shares will be issued in connection with the First Bridge Loan advance. The Upfront Shares, Bridge Installment Shares and Bridge Warrant Shares amounts will be adjusted for the .6 to one reverse stock split executed by Veritone subsequent to March 14, 2017.

ACACIA RESEARCH CORPORATION
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Acacia may elect to make an additional advance to Veritone equal to all principal amounts that have not been advanced upon Veritone's initial public offering, upon which Veritone shall issue the remaining Upfront Shares, Bridge Installment Shares and Bridge Warrant Shares that Acacia would have received in the event such advance was done in connection with an Installment Date on a pro-rata basis.

Acacia's Investment Agreement and the Veritone Bridge Loan, as described above, represent variable interests in Veritone for which Acacia is not the primary beneficiary, primarily due to a lack of a controlling interest in Veritone. As of March 31, 2017, the Veritone Loans and Veritone Bridge Loan ("The Loans") are not considered in-substance common stock and the common stock purchase warrants are unexercised, and therefore, the equity method of accounting is not applied. The right to receive the Upfront Shares and the Installment shares ("Veritone Shares") as of March 31, 2017, in connection with the Veritone Bridge Loan are considered in-substance common stock, however, application of the equity method is not material as of March 31, 2017, and therefore, the in-substance common shares are accounted for as described below.

The Loans do not meet the criteria for classification as a debt security. As such, the loans and the related common stock purchase warrants and Veritone Shares, as described above, are accounted for as separate units of account based on the relative estimated fair values of the separate units as of the effective date of the respective transactions, with the face amount of the loans allocated to (1) The Loans, which are accounted for as long-term loan receivables and (2) the common stock purchase warrants and Veritone Shares. The estimated relative fair value allocation was determined using a Monte Carlo simulation model. Key inputs to the model included the estimated value of Veritone's equity on the effective date of the transactions, related volatility of equity assumptions, discounts for lack of marketability, assumptions related to liquidity scenarios, and assumptions related to recovery scenarios on The Loans. A summary of assumptions used in connection with estimating the relative fair values were as follows:

Valuation Technique	Significant Unobservable Inputs	Range of Inputs
Monte Carlo simulation model	Volatility	40% - 50%
	Marketability discount	7%
	Funding scenario probabilities	25% - 75%
	Recovery	100%

The Veritone Loans and warrants are reflected in the accompanying consolidated financial statements as follows (in thousands):

	As of and For the Three Months Ended March 31, 2017	As of and For the Year Ended December 31, 2016
Face value of loans receivable	\$21,000	\$ 20,000
Unamortized loan discount	(1,251)	(1,384)
Carrying value of loans receivable	19,749	18,616
Investment in warrants and Veritone Shares	2,196	1,960
Total	\$21,945	\$ 20,576
Interest receivable	\$585	\$ 286
Accretion of loan discount	369	576

Interest income 668 862

The loan discount, representing the difference between the face amount of The Loans and the relative fair value allocated to The Loans, is accreted over the expected life of The Loans, using the effective interest method, with the related interest amounts reflected in Other Income in the consolidated statement of operations. Acacia will re-evaluate its variable interest in Veritone and related accounting conclusions and disclosure requirements each reporting period. For the three months ended March 31, 2017, the effective yield for the First Loan and Second Loan was 20% and 9%, respectively, and the effective yield for the Veritone Bridge Loan was 48%.

ACACIA RESEARCH CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Management performs a review of The Loans on a quarterly basis to assess the need for allowances for uncollectibility, based on current trends and other factors affecting collectibility, and to determine if any impairment has occurred. A loan receivable is considered impaired when it is probable that amounts related to the loan receivable will not be collected according to the contractual terms of the agreement. No allowances for uncollectibility have been recorded for the periods presented herein. An allowance for uncollectibility would be reflected as a charge to earnings in the consolidated statement of operations.

Acacia reflects its investment in the common stock purchase warrants and Veritone Shares at relative fair value, which now represents cost, on a nonrecurring basis when they are deemed to be other-than-temporarily impaired. The fair values of these investments are determined based on valuation techniques using the best information available, and may include quoted market prices, market comparables, and discounted cash flow projections. An impairment charge is recorded when the cost of the investment exceeds its fair value and this condition is determined to be other-than-temporary. No impairment charges have been recorded for the periods presented herein.

6. COMMITMENTS AND CONTINGENCIES

Bank Guarantee

In March 2015, an operating subsidiary of Acacia entered into a standby letter of credit and guarantee arrangement (“Guarantee”) with a bank for purposes of enforcing a court ruling in a German patent court granting an injunction against the defendants in the related patent infringement case. An injunction is an equitable remedy in the form of a court order that compels the defendant(s) to cease marketing, offering for sale or importing applicable infringing products into applicable jurisdiction(s). Under German law, in order to enforce the injunction granted by the court, a Guarantee is required to be furnished by the operating subsidiary, the plaintiff in the case, for potential payment to the defendants of any applicable claims which may be incurred by the defendants as a result of the enforcement of the injunction, only in the event that the aforementioned court ruling is subsequently successfully appealed by the defendants or otherwise amended. The Guarantee is required to be issued unlimited with respect to time, until appropriately extinguished in accordance with German law. The Guarantee will be extinguished when a relevant extinguishment order by the court having jurisdiction takes effect, typically occurring when the related infringement case has been settled or a final non-appealable decision has been issued by the court.

The Guarantee is secured by a cash deposit at the contracting bank, which is classified as restricted cash in the accompanying balance sheets, totaling \$11,515,000 and \$11,512,000 as of March 31, 2017 and December 31, 2016, respectively. Changes in the balance are primarily a result of additional court rulings granting injunctions with respect to additional defendants, and foreign currency exchange rate fluctuations and the related impact on the underlying collateral, which is denominated in U.S. dollars. The Guarantee expires on April 10, 2018, however, it is automatically extended without amendment for a period of one (1) year from the present or any future expiration date, unless at least 30 days prior to any expiration date, the Guarantee is extinguished in accordance with German law. The Guarantee facility fee is 1.15% per year, and the related expense is included in the consolidated statement of operations.

Patent Enforcement

Certain of Acacia’s operating subsidiaries are often required to engage in litigation to enforce their patents and patent rights. In connection with any of Acacia’s operating subsidiaries’ patent enforcement actions, it is possible that a defendant may request and/or a court may rule that an operating subsidiary has violated statutory authority, regulatory authority, federal rules, local court rules, or governing standards relating to the substantive or procedural aspects of such enforcement actions. In such event, a court may issue monetary sanctions against Acacia or its operating subsidiaries or award attorney’s fees and/or expenses to a defendant(s), which could be material.

For the three months ended March 31, 2016, other operating expenses were \$1,742,000. Other operating expenses includes expense accruals for court ordered attorney's fees and settlement and contingency accruals for other matters.

Other

Acacia is subject to claims, counterclaims and legal actions that arise in the ordinary course of business. Management believes that the ultimate liability with respect to these claims and legal actions, if any, will not have a material effect on Acacia's consolidated financial position, results of operations or cash flows.

ACACIA RESEARCH CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

7. STOCKHOLDERS' EQUITY

Profits Interest Plan. On February 16, 2017, AIP Operation LLC, a Delaware limited liability company ("AIP"), and an indirect subsidiary of Acacia, adopted a Profits Interest Plan (the "Plan") that provides for the grant of equity interests in AIP to certain members of management and the Board of Directors of Acacia as compensation for services rendered for or on behalf of AIP. Each profits interest unit granted pursuant to the Plan is intended to qualify as a "profits interest" for U.S. federal income tax purposes and will only have value to the extent the equity value of AIP increases beyond the value at issuance. The equity interests are represented by units (the "Units") reserved for the issuance of awards under the Plan. The Units entitle the holders to share in or be allocated certain AIP profits and losses and to receive or share in AIP distributions pursuant to the AIP Limited Liability Company Operating Agreement entered into as of February 16, 2017 (the "LLC Agreement"). In connection with the adoption of the Plan, a form of Profits Interest Agreement was approved pursuant to which Units may be granted from time to time. Units vest upon AIP's achievement of certain performance milestones (one-third upon 150% appreciation, and two-thirds upon 300% appreciation in value of Acacia's aggregate investment in Veritone), subject to the continued service of the recipient, and are subject to the terms and conditions of the Plan, the Profits Interest Agreement and the LLC Agreement. Acacia owns 60% of the equity in AIP and at all times will control AIP. Acacia from time to time may contribute to AIP certain assets or securities related to portfolio companies in which Acacia holds an interest. Units may be awarded as one-time, discretionary grants to recipients. As of March 31, 2017, AIP holds the right to receive the Veritone 10% Warrant described at Note 5.

Profits Interest totaling 400 units, or 40% of the membership interests in AIP, were granted during the three months ended March 31, 2017, with an aggregate grant date fair value of \$550,000. The fair value of the Profits Interest units totaled \$550,000 as of March 31, 2017. Total unrecognized expense for Profit Unit Interests totaled \$537,000 at March 31, 2017.

The Profits Interest Units are accounted for in accordance with Accounting Standards Codification ("ASC") 718-10, "Compensation - Stock Compensation." The Profits Interest Units vest as described above, and therefore, the vesting conditions do not meet the definition of service, market or performance conditions, as defined in ASC 718. As such, the Profits Interest Units are classified as liability awards. Liability classified awards are measured at fair value on the grant date and re-measured each reporting period at fair value until the award is settled. Compensation expense is recognized on a straight-line basis over the employee's requisite service period (generally the vesting period of the equity award) which is five years. Compensation expense is adjusted each reporting period for changes in fair value prorated for the portion of the requisite service period rendered.

8. RECENT ACCOUNTING PRONOUNCEMENTS

Recent Accounting Pronouncements - Recently Adopted.

In March 2016, the FASB issued a new standard that changes the accounting for certain aspects of share-based payments to employees. The new guidance requires all income tax effects of awards to be recognized in the income statement when the awards vest or are settled. It also allows an employer to repurchase more of an employee's shares than it can today for tax withholding purposes without triggering liability accounting and to make a policy election for forfeitures as they occur. The guidance is effective for public business entities for fiscal years beginning after December 15, 2016, and interim periods within those years. Early adoption is permitted. The adoption of this standard

did not have a material impact on the Company's consolidated financial statements and related disclosures.

Recent Accounting Pronouncements - Not Yet Adopted.

In May 2014, the FASB issued a new accounting standards update addressing revenue from contracts with customers, which clarifies existing accounting literature relating to how and when a company recognizes revenue. Under the standard, a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods and services. The amendments for this standard update are effective for interim and annual reporting periods beginning after December 15, 2016, and are to be applied retrospectively or the cumulative effect as of the date of adoption, with early application not permitted. The Company is currently evaluating the impact and method of adoption the pronouncement will have on its consolidated financial statements and related disclosures.

ACACIA RESEARCH CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

In February 2016, the FASB issued an accounting standard update which requires lessees to recognize most leases on the balance sheet. This is expected to increase both reported assets and liabilities. The new lease standard does not substantially

change lessor accounting. For public companies, the standard will be effective for the first interim reporting period within annual periods beginning after December 15, 2018, although early adoption is permitted. Lessees and lessors will be required to apply the new standard at the beginning of the earliest period presented in the financial statements in which they first apply the new guidance, using a modified retrospective transition method. The requirements of this standard include a significant increase in required disclosures. Management is currently assessing the impact that adopting this new accounting guidance will have on its financial statements and footnote disclosures.

In June 2016, the FASB issued guidance on the measurement and recognition of credit losses on most financial assets. For trade receivables, loans, and held-to-maturity debt securities, the current probable loss recognition methodology is being replaced by an expected credit loss model. For available-for-sale debt securities, the recognition model on credit losses is generally unchanged, except the losses will be presented as an adjustable allowance. The guidance will be applied retrospectively with the cumulative effect recognized as of the date of adoption. The guidance will become effective at the beginning of our first quarter of fiscal 2021 but can be adopted as early as the beginning of our first quarter of fiscal 2020. Management is currently assessing the impact that adopting this new accounting guidance will have on its financial statements and footnote disclosures.

In August 2016, the FASB amended guidance was issued to clarify how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The amendments are aimed at reducing the existing diversity in practice. The guidance should be applied using a retrospective transition method to each period presented and will be effective for annual periods beginning after December 15, 2017 and interim periods within those annual periods. Early adoption is permitted, including adoption in an interim period. Management is currently assessing the impact that adopting this new accounting guidance will have on its financial statements and footnote disclosures.

In January 2017, the FASB issued amended guidance to clarify the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions or disposals of assets or businesses. The amendments are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early application is permitted. The amendments should be applied prospectively on or after the effective date. No disclosures are required at transition. Management is currently assessing the impact that adopting this new accounting guidance will have on its financial statements and footnote disclosures.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Cautionary Statement Regarding Forward Looking Statements

You should read the following discussion and analysis in conjunction with the consolidated financial statements and related notes thereto contained in Part I, Item 1 of this Quarterly Report on Form 10-Q. The information contained in this Quarterly Report on Form 10-Q is not a complete description of our business or the risks associated with an investment in our common stock. We urge you to carefully review and consider the various disclosures made by us in this report and in our other reports filed with the Securities and Exchange Commission, or the SEC, including our Annual Report on Form 10-K for the year ended December 31, 2016, filed with the SEC on March 10, 2017.

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and which concern matters that involve risks and uncertainties that could cause actual results to differ materially from those projected in the forward-looking statements. Reference is made in particular to the description of our plans and objectives for future operations, assumptions underlying such plans and objectives, and other forward-looking statements set forth under "Management's Discussion and Analysis of Financial Condition and Results of Operations" and other sections of this Quarterly Report on Form 10-Q. Such statements may be identified by the use of forward-looking terminology such as "may," "will," "should," "could," "expect," "plan," "believe," "estimate," "anticipate," "intend," "predict," "potential," "continue" or similar terms, variations of such terms or the negative of such terms, although not all forward-looking statements contain these terms. Such statements are based on management's current expectations and are subject to a number of factors and uncertainties, which could cause actual results to differ materially from those described in the forward-looking statements. Such statements address future events and conditions concerning intellectual property ("IP") acquisition and development, licensing and enforcement activities, other related business activities, capital expenditures, earnings, litigation, regulatory matters, markets for our services, liquidity and capital resources and accounting matters. Actual results in each case could differ materially from those anticipated in such statements by reason of factors such as our ability to invest in new technologies and patents, future global economic conditions, changes in demand for our services, legislative, regulatory and competitive developments in markets in which we and our subsidiaries operate, results of litigation and other circumstances affecting anticipated revenues and costs. We expressly disclaim any intent, obligation or undertaking to update or revise any forward-looking statements contained herein to conform such statements to actual results or to reflect any change in our expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based. Readers are urged to carefully review and consider the various disclosures made by us, which attempt to advise interested parties of the risks, uncertainties, and other factors that affect our business, including without limitation the disclosures made under the captions "Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Financial Statements" in this Quarterly Report on Form 10-Q and the audited consolidated financial statements and notes thereto and disclosures made under the captions "Management's Discussion and Analysis of Financial Condition and Results of Operations," "Risk Factors" and "Financial Statements and Supplementary Data" included in our Annual Report on Form 10-K for the year ended December 31, 2016.

General

As used in this Quarterly Report on Form 10-Q, "we," "us" "our" and "Company" refer to Acacia Research Corporation, a Delaware corporation, and/or its wholly and majority-owned and controlled operating subsidiaries, and/or where applicable, its management. All intellectual property acquisition, development, licensing and enforcement activities are conducted solely by certain of Acacia Research Corporation's wholly and majority-owned and controlled operating subsidiaries.

Our operating subsidiaries invest in, license and enforce patented technologies. Our operating subsidiaries partner with inventors and patent owners, applying our legal and technology expertise to patent assets to unlock the financial value in their patented inventions. Our operating subsidiaries generate revenues and related cash flows from the granting of patent rights for the use of patented technologies that our operating subsidiaries control or own. Our operating subsidiaries assist patent owners with the prosecution and development of their patent portfolios, the protection of their patented inventions from unauthorized use, the generation of licensing revenue from users of their patented technologies and, where necessary, with the enforcement against unauthorized users of their patented technologies through the filing of patent infringement litigation. We are principals in the licensing and enforcement effort, obtaining control of the rights in the patent portfolio, or control of the patent portfolio outright.

We are a leader in licensing patented technologies and have established a proven track record of licensing success with over 1,540 license agreements executed to date, across 192 patent portfolio licensing and enforcement programs. Currently, on

15

a consolidated basis, our operating subsidiaries own or control the rights to multiple patent portfolios, which include U.S. patents and certain foreign counterparts, covering technologies used in a variety of industries. To date, we have generated gross licensing revenue of approximately \$1.4 billion, and have returned more than \$727 million to our patent partners.

Executive Summary

Overview

For the three months ended March 31, 2017, we reported revenues of \$8.9 million from six new revenue agreements covering eight different licensing programs. Cash, restricted cash and investments totaled \$156.8 million as of March 31, 2017, as compared to \$158.5 million as of December 31, 2016. Our operating activities during the periods presented have been principally focused on the continued operation of our patent licensing and enforcement business, including the continued pursuit of our ongoing patent licensing and enforcement programs. In addition, we and our operating subsidiaries may from time to time evaluate, leveraging our intellectual property expertise, other business opportunities. In some cases, these opportunities will compliment, and / or supplement our primary licensing and enforcement business, as further described below.

In March 2017, Saint Lawrence Communications LLC received a jury verdict in its case against Motorola, Inc. in the United States District Court for the Eastern District of Texas. The jury returned a verdict that five U.S. patents were valid and infringed. The jury found the infringement was willful and returned a damages award of nearly \$9.2 million for past infringement. We are awaiting issue of the final judgment by the court in this matter. In addition, our German subsidiary, Saint Lawrence Communications GmbH, was granted injunctions by the German court in enforcement proceedings against both Motorola, Inc. and ZTE, who are now appealing those orders.

As previously reported, in September 2016, our subsidiary Cellular Communications Equipment LLC, or CCE, received a jury verdict of infringement and damages in excess of \$22.0 million against Apple. Post-trial motions filed by both parties, including CCE's motion to enhance the damages award due to the finding of willful infringement, are currently pending and awaiting rulings by the court. In CCE's corresponding litigation in Germany, we were notified in April 2017 that CCE prevailed in the opposition proceeding filed by Apple. The related German infringement trial against Apple is scheduled to occur late this year.

One of the challenges in our industry continues to be quality patent intake due to the current patent environment. We acquired one portfolio in the first quarter of 2017 from our partnership with Renesas Electronics of Japan, as described below. In spite of the current challenges in the patent licensing business, we continue to see growth oriented patent-related opportunities in the IP space in general. Patents will continue to be a very important and fundamental part of the U.S. and world-wide economies.

Our intent, as we continue to evaluate the current patent landscape, is to leverage our legacy IP expertise, knowledge and know-how to further enhance shareholder value. Going forward, we intend to utilize our experience and valuable internal IP data to expand our business into other areas of IP, beyond solely patent licensing and enforcement. Patent licensing will continue to be an important part of our business but is a subset of the entire patent ecosystem and opportunities that exist. For example, we are finding an increasing number of high-growth technology companies that require our patent expertise, relationships and knowledge. Similar to the partnerships we created with companies who needed our expertise and experience to license their IP, we intend to partner with high-growth tech companies that need our help with their patent portfolios and related business strategy. An example of this is the partnership and investment Acacia made in Veritone Inc. in 2016, as described below.

With respect to our licensing and enforcement business, neither we nor our operating subsidiaries invent new technologies or products; rather, we depend upon the identification and investment in patents and inventions and companies that own intellectual property through our relationships with inventors, universities, research institutions, technology companies and others. If our operating subsidiaries are unable to maintain those relationships and to continue to identify and grow new relationships, then we may not be able to identify new technology-based opportunities for sustainable revenue and /or revenue growth.

Our current or future relationships may not provide the volume or quality of technologies necessary to sustain our licensing and enforcement business. In some cases, universities and other technology sources compete against us as they seek to develop and commercialize technologies. Universities may receive financing for basic research in exchange for the exclusive right to commercialize resulting inventions. These and other strategies employed by potential partners may reduce the number of technology sources and potential clients to whom we can market our solutions. If we are unable to maintain current

relationships and sources of technology or to secure new relationships and sources of technology, such inability may have a material adverse effect on our revenues, operating results, financial condition and ability to maintain our licensing and enforcement business.

For example, in the first quarter of 2017 we obtained control of one patent portfolio, and for the year ended December 31, 2016, we obtained control of only two new patent portfolios. Further, in fiscal year 2015, we obtained control of three new patent portfolios, compared to six new patent portfolios, and 25 new patent portfolios in fiscal years 2014 and 2013, respectively. This decrease in our patent portfolio intake reflects in part our strategic decision in 2013 to shift the focus of our operating business to serving a smaller number of customers, each having higher quality patent portfolios. As a result, our gross number of patent portfolio acquisitions has decreased significantly. This decrease in our patent portfolio intake also reflects in part industry trends impacting our ability to acquire patent portfolios. For example, legislative and legal changes have increased the complexity of patent enforcement actions and may significantly affect the market availability of suitable patent portfolios for acquisition. These industry trends have continued, and as a result, our recent and future patent portfolio intake has been and may continue to be negatively impacted, resulting in further decreases in future revenue generating opportunities, and continued negative adverse impacts on the sustainability of our licensing and enforcement business. We continue to experience significant adverse challenges with respect to our patent intake efforts, and if these adverse challenges continue, our revenues will decline and we will be unable to profitably sustain our licensing and enforcement business going forward.

As a result of the foregoing, our operating subsidiaries may from time to time evaluate other business opportunities which compliment, or supplement, our primary licensing and enforcement business and leverage our intellectual property expertise. For example, in August 2016, we announced the formation of a strategic partnership with Veritone, Inc. (“Veritone”), a leading cloud-based Artificial Intelligence (“AI”) technology company that is pioneering next generation search and analytics through their proprietary Cognitive Media Platform™. Under the partnership, we expect to leverage our intellectual property expertise to assist Veritone with building its patent portfolio and executing upon its overall intellectual property strategy. In order to enhance Veritone’s leadership position in the field of machine learning and AI, we provided \$21 million in funding to Veritone, convertible upon the occurrence of certain events into Veritone equity. Additionally, upon the occurrence of certain events and the achievement of certain milestones by Veritone, we may incur an additional investment of approximately \$33 million in Veritone, for a total investment of up to \$54 million. Our Board of Directors unanimously approved the investments, and believes that this partnership with Veritone will be synergistic with our business strategies.

Operating activities during the periods presented included the following:

	Three Months Ended March 31, 2017 2016	
Revenues (in thousands)	\$8,854	\$24,721
New agreements executed	6	12
Licensing and enforcement programs generating revenues	8	15

Trailing twelve-month revenues during the periods presented were as follows (in thousands, except percentage change values):

As of Date:	Trailing Twelve -Month Revenues	% Change
-------------	--	-------------

March 31, 2017	\$ 136,832	(10)%
December 31, 2016	\$ 152,699	(9)%
September 30, 2016	\$ 168,227	44 %
June 30, 2016	\$ 116,563	1 %
March 31, 2016	\$ 115,548	— %

Our revenues historically have fluctuated quarterly, and can vary significantly, based on a number of factors including the following:

- the dollar amount of agreements executed each period, which can be driven by the nature and characteristics of the technology or technologies being licensed and the magnitude of infringement associated with a specific licensee;
- the specific terms and conditions of agreements executed each period including the nature and characteristics of rights granted, and the periods of infringement or term of use contemplated by the respective payments;
- fluctuations in the total number of agreements executed each period;
- the number of, timing, results and uncertainties associated with patent licensing negotiations, mediations, patent infringement actions, trial dates and other enforcement proceedings relating to our patent licensing and enforcement programs;
- the relative maturity of licensing programs during the applicable periods;
- other external factors, including the periodic status or results of ongoing negotiations, the status or results of ongoing litigations and appeals, actual or perceived shifts in the regulatory environment, impact of unrelated patent related judicial proceedings and other macroeconomic factors; and
- historically, based on the merits and strength of our operating subsidiary's patent infringement claims and other factors, many prospective licensees have elected to settle significant patent infringement cases and pay reasonable license fees for the use of our patented technology, as those patent infringement cases approached a court determined trial date.

Our management does not attempt to manage for smooth sequential periodic growth in revenues period to period, and therefore, periodic results can be uneven. In some cases, licensing revenues not generated in a current period are not necessarily foregone, but depending on whether negotiations, litigation or both continue into subsequent periods, and depending on a number of other factors, such potential revenues may be pushed into subsequent fiscal periods.

Revenues for the three months ended March 31, 2017 included fees from the following technology licensing and enforcement programs:

- Bone Wedge technology
- DisplayPort and MIPI DSI technology
- Electronic Access Control technology
- Innovative Display technology
- Online Auction Guarantee
- Optical Networking technology
- Speech codes used in wireless and wireline systems technology
- Super Resolutions Microscopy technology

Revenues for the three months ended March 31, 2016 included fees from the following technology licensing and enforcement programs:

- 4G Wireless technology
- Audio Communications Fraud Detection technology
- Bone Wedge technology
- Broadband Communications technology
- Cardiology and Vascular Device technology
- DisplayPort and MIPI DSI technology
- Gas Modulation Control Systems technology
- Lighting Ballast technology
- Online Auction Guarantee technology
- Reflective and Radiant Barrier Insulation technology
- Speech codes used in wireless and wireline systems technology
- Telematics technology
- Unicondylar Knee Replacement technology
- Variable Data Printing technology⁽¹⁾
- Wireless Infrastructure and User Equipment technology

⁽¹⁾ Initial revenues recognized during the three months ended March 31, 2016

Summary of Results of Operations - Overview
 For the Three Months Ended March 31, 2017 and 2016
 (In thousands, except percentage change values)

Net loss attributable to Acacia Research Corporation	(11,830)	(9,965)	19 %

*Percentage change in excess of 400%

Overview - Three months ended March 31, 2017 compared with the three months ended March 31, 2016

Revenues decreased \$15.9 million, or 64%, to \$8.9 million for the three months ended March 31, 2017, as compared to \$24.7 million in the comparable prior year quarter, due primarily to a decrease in the number of agreements executed and a decrease in revenue per agreement. Refer to “Investments in Patent Portfolios” below for additional information regarding the impact of portfolio acquisition trends on periodic revenues.

Loss before taxes was \$10.9 million for the three months ended March 31, 2017, as compared to a loss before income taxes of \$9.7 million for the three months ended March 31, 2016. The change was due primarily to a \$15.9 million decrease in revenue, partially offset by a net decrease in operating expenses, including the following:

Cost of Revenues and Other Operating Expenses:

Inventor royalties and contingent legal fees, on a combined basis, decreased \$4.4 million, or 77%, compared to the 64% decrease in related revenues for the same periods, primarily due to lower average contingent legal fee rates, resulting from higher average levels of cost recovery related preferred returns, for the portfolios generating revenues in the first quarter of 2017, as compared to the portfolios generating revenues in the first quarter of 2016.

Litigation and licensing expenses-patents decreased \$1.3 million, or 17%, to \$6.4 million, due primarily to a net decrease in litigation support and third-party technical consulting expenses associated with ongoing licensing and enforcement programs.

Amortization expense decreased \$5.2 million, or 49%, to \$5.5 million, due to a decrease in scheduled amortization resulting from various patent portfolio impairment charges previously recorded in the second quarter of 2016.

General and administrative expenses decreased \$1.1 million, or 13%, to \$6.9 million, due primarily to a net decrease in personnel costs in connection with head count reduction activities in 2016.

Other operating expense was \$1.7 million for the three months ended March 31, 2016. Other operating expenses includes expense accruals for court ordered attorney's fees and settlement and contingency accruals for other matters.

Investments in Patent Portfolios

During the three months ended March 31, 2017, we acquired control of one patent portfolio, from our patent partner Renesas Electronics of Japan, comprised of 23 U.S. and 12 foreign patents covering technologies such as DRAM and Flash memory, semiconductor fabrication process/packaging and power management.

Neither we nor our operating subsidiaries invent new technologies or products; rather, we depend upon the identification and investment in patents, inventions and companies that own intellectual property through our relationships with inventors, universities, research institutions, technology companies and others. If our operating subsidiaries are unable to maintain those relationships and to continue to identify and grow new relationships, then we may not be able to identify new technology-based opportunities for sustainable revenue and / or revenue growth.

Our current or future relationships may not provide the volume or quality of technologies necessary to sustain our licensing and enforcement business. In some cases, universities and other technology sources compete against us as they seek to develop and commercialize technologies. Universities may receive financing for basic research in exchange for the exclusive right to commercialize resulting inventions. These and other strategies employed by potential partners may reduce the number of technology sources and potential clients to whom we can market our solutions. If we are unable to maintain current relationships and sources of technology or to secure new relationships and sources of technology, such inability may have a material adverse effect on our revenues, operating results, financial condition and ability to maintain our licensing and enforcement business.

For example, during the first quarter of 2017, fiscal year 2016 and 2015, we obtained control of only one, two and three, respectively, new patent portfolios, compared to 6 new patent portfolios, and 25 new patent portfolios in fiscal years 2014 and 2013, respectively. This decrease in our patent portfolio intake reflects in part our strategic decision in 2013 to shift the focus of our operating business to serving a smaller number of customers, each having higher quality patent portfolios. As a result, our gross number of patent portfolio acquisitions has decreased significantly. This decrease in our patent portfolio intake also reflects in part industry trends impacting our ability to acquire patent portfolios. For example, legislative and legal changes have increased the complexity of patent enforcement actions and may significantly affect the market availability of suitable patent portfolios for acquisition. These industry trends have continued, and as a result, our recent and future patent portfolio intake has been and may continue to be negatively impacted, resulting in further decreases in future revenue generating opportunities, and continued negative adverse impacts on the sustainability of our licensing and enforcement business. We continue to experience significant adverse challenges with respect to our patent intake efforts, and if these adverse challenges continue, our revenues will decline and we will be unable to profitably sustain our licensing and enforcement business going forward.

Patent Licensing and Enforcement

Patent Litigation Trial Dates and Related Trials. As of the date of this report, our operating subsidiaries have in excess of 5 pending patent infringement cases with a scheduled trial date in the next six months. Patent infringement trials are components of our overall patent licensing process and are one of many factors that contribute to possible future revenue generating opportunities for us. Scheduled trial dates, as promulgated by the respective court, merely provide an indication of when, in future periods, the trials may occur according to the court's scheduling calendar at a specific point in time. A court may change previously scheduled trial dates. In fact, courts often reschedule trial dates for various reasons that are unrelated to the underlying patent assets and typically for reasons that are beyond our control. While scheduled trial dates provide an indication of the timing of possible future revenue generating opportunities for us, the trials themselves and the immediately preceding periods represent the possible future revenue generating opportunities. These future opportunities can result in varying outcomes. In fact, it is difficult to predict the outcome of patent enforcement litigation at the trial level and outcomes can be unfavorable. It can be difficult to understand complex patented technologies, and as a result, this may lead to a higher rate of unfavorable litigation outcomes. Moreover, in the event of a favorable outcome, there is a higher rate of successful appeals in patent enforcement litigation than more standard business litigation. Such appeals are expensive and time consuming, resulting in increased costs and a potential for delayed or foregone revenue opportunities in the event of modification or reversal of favorable outcomes. Although we diligently pursue enforcement litigation, we cannot predict with reliability the decisions made by juries and trial courts. Please refer to Item 1A. "Risk Factors" for additional information regarding trials, patent litigation and related risks.

Litigation and Licensing Expense. We expect patent-related legal expenses to continue to fluctuate from period to period based on the factors summarized herein, in connection with future trial dates, international enforcement, strategic patent portfolio prosecution and our current and future patent portfolio investment, prosecution, licensing and enforcement activities. The pursuit of enforcement actions in connection with our licensing and enforcement programs can involve certain risks and uncertainties, including the following:

Increases in patent-related legal expenses associated with patent infringement litigation, including, but not limited to, increases in costs billed by outside legal counsel for discovery, depositions, economic analyses, damages assessments, expert witnesses and other consultants, re-exam and inter partes review costs, case-related audio/

video presentations and other litigation support and administrative costs could increase our operating costs and decrease our profit generating opportunities;

Our patented technologies and enforcement actions are complex and, as a result, we may be required to appeal adverse decisions by trial courts in order to successfully enforce our patents. Moreover, such appeals may not be successful;

New legislation, regulations or rules related to enforcement actions, including any fee or cost shifting provisions, could significantly increase our operating costs and decrease our profit generating opportunities. Increased focus on the growing number of patent-related lawsuits may result in legislative changes which increase our costs and related risks of asserting patent enforcement actions. For instance, the United States House of Representatives passed a bill that would require non-practicing entities that bring patent infringement lawsuits to pay legal costs of the defendants, if the lawsuits are unsuccessful and certain standards are not met;

Courts may rule that our subsidiaries have violated certain statutory, regulatory, federal, local or governing rules or standards by pursuing such enforcement actions, which may expose us and our operating subsidiaries to material liabilities, which could harm our operating results and our financial position; and

The complexity of negotiations and potential magnitude of exposure for potential infringers associated with higher quality patent portfolios may lead to increased intervals of time between the filing of litigation and potential revenue events (i.e. markman dates, trial dates), which may lead to increased legal expenses, consistent with the higher revenue potential of such portfolios.

Critical Accounting Estimates

Our unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. Preparation of these consolidated statements requires management to make judgments and estimates. Some accounting policies have a significant impact on amounts reported in these consolidated financial statements. A summary of significant accounting policies and a description of accounting policies that are considered critical may be found in the audited consolidated financial statements and notes thereto and under the caption “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies” included in our Annual Report on Form 10-K for the year ended December 31, 2016. Refer to Note 2 to the consolidated financial statements included in this report.

Consolidated Results of Operations

Comparison of the Results of Operations for the Three Months Ended March 31, 2017 and 2016

Revenues and Pretax Net Loss

	Three Months		Change	
	Ended	March 31,		
	2017	2016	\$	%
Revenues (in thousands, except percentage change values)	\$8,854	\$24,721	\$(15,867)	(64)%
New agreements executed	6	12		
Average revenue per agreement (in thousands)	\$1,476	\$2,060		

A reconciliation of the change in revenues (based on average revenue per agreement) for the periods presented, using the prior year period as the base period, is as follows (in thousands):

Three
Months
Ended
March 31,
2017 vs.
2016

Decrease in number of agreements executed	\$(12,360)
Decrease in average revenue per agreement executed	(3,507)
Total change in revenues	\$(15,867)

Two licensees individually accounted for 73% and 12% of revenues recognized during the three months ended March 31, 2017, and four licensees accounted for 22%, 19%, 16% and 11% of revenues recognized during the three months ended March 31, 2016.

For the periods presented herein, the majority of the revenue agreements executed provided for the payment of one-time, paid-up license fees in consideration for the grant of certain intellectual property rights for patented technology rights owned by our operating subsidiaries. These rights were primarily granted on a perpetual basis, extending until the expiration of the underlying patents. Refer to “Investments in Patent Portfolios” above for information regarding the impact of portfolio acquisition trends on periodic revenues. We continue to experience significant adverse challenges with respect to our patent intake efforts, and if these adverse challenges continue, our revenues will decline and we will be unable to profitably sustain our licensing and enforcement business going forward.

	Three Months Ended March 31, 2017		2016		Change	
			\$		%	
	(in thousands, except percentage change values)					
Loss before provision for income taxes	\$ (10,880)	\$ (9,705)	\$ (1,175)		12%	

A reconciliation of the change in pretax loss for the periods presented is as follows:

	Three Months Ended March 31, 2017 vs. 2016			
			\$	%
	(in thousands, except percentage values)			
Decrease in revenues	\$ (15,867)	1,350		%
Decrease in inventor royalties and contingent legal fees	4,389	(374)		%
Decrease in general and administrative expenses	1,078	(92)		%
Decrease in litigation and licensing expenses	1,337	(114)		%
Decrease in patent amortization expenses	5,245	(446)		%
Other	2,643	(224)		%
Total change in loss before provision for income taxes	\$ (1,175)	100		%

Cost of Revenues

	Three Months Ended March 31, 2017		2016		Change	
			\$		%	
	(in thousands, except percentage change values)					
Inventor royalties	\$ 666	\$ 1,573	\$ (907)		(58)%	
Contingent legal fees	\$ 627	\$ 4,109	\$ (3,482)		(85)%	

Inventor Royalties and Contingent Legal Fees Expense. Inventor royalties and contingent legal fee expenses fluctuate period to period based on the amount of revenues recognized each period, the terms and conditions of agreements executed each period and the mix of specific patent portfolios with varying economic terms and obligations generating revenues each period. A summary of the main drivers of the change in inventor royalties expense and contingent legal fees expense for the comparable periods presented, using the prior year period as the base period, is as follows (in thousands, except percentage values):

22

			Three Months Ended March 31, 2017 vs. 2016	%
Inventor Royalties:				
Decrease in total revenues			\$(4,165)	459 %
Decrease in inventor royalty rates			(1,554)	171 %
Decrease in revenues without inventor royalty obligations primarily due to upfront advance related preferred returns			4,812	(530)%
Total change in inventor royalties expense			\$(907)	100 %
Contingent Legal Fees:				
Decrease in total revenues			\$(2,823)	81 %
Decrease in contingent legal fee rates			(880)	25 %
Decrease in revenues without contingent legal fee obligations			221	(6)%
Total change in contingent legal fees expense			\$(3,482)	100 %

Three Months
Ended
March 31,
2017 2016 \$ %
(in thousands, except percentage
change values)

Litigation and licensing expenses - patents	\$6,386	\$7,723	\$(1,337)	(17)%
Amortization of patents	\$5,515	\$10,760	\$(5,245)	(49)%

Litigation and Licensing Expenses - Patents. Litigation and licensing expenses-patents include patent-related litigation, enforcement and prosecution costs incurred by external patent attorneys engaged on an hourly basis and the out-of-pocket expenses incurred by law firms engaged on a contingent fee basis. Litigation and licensing expenses-patents also includes licensing and enforcement related third-party patent research, development, prosecution, re-exam and inter partes reviews, consulting, and other costs incurred in connection with the licensing and enforcement of patent portfolios.

Litigation and licensing expenses-patents decreased for the three months presented due to a net decrease in litigation support costs associated with upcoming trials and a decrease in patent prosecution and litigation expenses associated with ongoing licensing and enforcement programs. We expect patent-related legal expenses to continue to fluctuate period to period as we incur costs related to upcoming scheduled and/or anticipated trial dates, international enforcement activities and strategic patent portfolio prosecution activities over the next several fiscal quarters, as we continue to focus on our investments in these areas.

Amortization of Patents. The change in amortization expense for the comparable periods presented was due to a decrease in scheduled amortization on existing patent portfolios resulting from various patent portfolio impairment charges previously recorded in the second quarter of 2016.

Operating Expenses (in thousands, except percentage change values)
Change

Three Months
 Ended
 March 31,
 2017 2016 \$ %

General and administrative expenses	\$4,788	\$6,259	\$(1,471)	(24)%
Non-cash stock compensation expense	2,128	1,735	393	23 %
Total general and administrative expenses	\$6,916	\$7,994	\$(1,078)	(13)%

General and Administrative Expenses. General and administrative expenses include employee compensation and related personnel costs, including variable performance based compensation and non-cash stock compensation expenses, office and facilities costs, legal and accounting professional fees, public relations, stock administration, state taxes based on gross

receipts and other corporate costs. A summary of the main drivers of the change in general and administrative expenses for the periods presented, is as follows (in thousands, except percentage values):

	Three Months Ended March 31, 2017 vs. % 2016	
Personnel cost reductions due to headcount reductions	\$(711)	66 %
Variable performance-based compensation costs	(364)	34 %
Corporate, general and administrative costs	(440)	41 %
Non-cash stock compensation expense	393	(36)%
Non-recurring employee severance costs	44	(5)%
Total change in general and administrative expenses	\$(1,078)	100 %

Other

For the three months ended March 31, 2017 and 2016, other operating expenses were \$0 and \$1,742,000, respectively. Other operating expenses includes expense accruals for court ordered attorney's fees and settlement and contingency accruals for other matters.

Income Taxes

	Three Months Ended March 31, 2017		2016	
Provision for income taxes (in thousands)	\$(1,241)		\$(192)	
Effective tax rate	11	%	2	%

The increase in tax expense for the periods presented primarily reflects the impact of foreign withholding taxes related to certain revenue agreements executed with third party licensees domiciled in foreign jurisdictions.

Liquidity and Capital Resources

General

Our primary sources of liquidity are cash and cash equivalents on hand generated from our operating activities. Our management believes that our cash and cash equivalent balances and anticipated cash flows from operations will be sufficient to meet our cash requirements through at least May 2018 and for the foreseeable future. We may, however, encounter unforeseen difficulties that may deplete our capital resources more rapidly than anticipated, including those set forth under the caption "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2016. Any efforts to seek additional funding could be made through issuances of equity or debt, or other external financing. However, additional funding may not be available on favorable terms, or at all. The capital and credit markets have experienced extreme volatility and disruption in recent years, and the volatility and impact of the disruption has continued into 2017. At times during this period, the volatility and disruption has reached unprecedented levels. In several cases, the markets have exerted downward pressure on stock prices and credit

capacity for certain issuers, and the commercial paper markets may not be a reliable source of short-term financing for us. If we fail to obtain additional financing when needed, we may not be able to execute our business plans and our business, conducted by our operating subsidiaries, may suffer.

Certain of our operating subsidiaries are often required to engage in litigation to enforce their patents and patent rights. In connection with any of our operating subsidiaries' patent enforcement actions, it is possible that a defendant may request and/or a court may rule that an operating subsidiary has violated statutory authority, regulatory authority, federal rules, local court rules, or governing standards relating to the substantive or procedural aspects of such enforcement actions. In such event, a court may issue monetary sanctions against us or our operating subsidiaries or award attorney's fees and/or expenses to a defendant(s), which could be material.

Cash, Cash Equivalents and Investments

Our consolidated cash and cash equivalents and investments on hand, excluding restricted cash balances, totaled \$145.2 million at March 31, 2017, compared to \$147.0 million at December 31, 2016. The net change in cash and cash equivalents for the periods presented was comprised of the following (in thousands):

Three Months
Ended
March 31,
2017 2016

Net cash provided by (used in):

Operating activities	\$(979)	\$11,110
Investing activities	(72,470)	(1,004)
Financing activities	230	—

Cash Flows from Operating Activities. Cash receipts from licensees for the three months ended March 31, 2017 decreased 16% to \$27.8 million, as compared to \$33.0 million in the comparable 2016 period, due to the net impact of the timing of cash receipts from licensees. Cash outflows from operations for the three months ended March 31, 2017 increased 31% to \$28.8 million, as compared to \$21.9 million in the comparable 2016 period, primarily due to the net impact of the timing of related payments of inventor royalties and contingent legal fees and the timing of payments to other third-parties in the ordinary course, for the same periods. Refer to “Working Capital” below for additional information.

Restricted Cash. In March 2015, an operating subsidiary of ours entered into a Guarantee with a bank in connection with enforcing a ruling in a German patent court granting an injunction against the defendants in the related patent infringement case. The Guarantee is secured by a cash deposit (classified as restricted cash in the accompanying balances sheets) at the contracting bank, totaling \$11.5 million and \$11.5 million, at March 31, 2017 and December 31, 2016, respectively. See below for additional information.

Cash Flows from Investing Activities. Cash flows from investing activities and related changes were comprised of the following for the periods presented (in thousands):

Strategic Partnership. In August 2016, we formed a strategic partnership with Veritone pursuant to which we expect to leverage our expertise in intellectual property licensing and enforcement to assist Veritone with building its patent portfolio and execute upon its overall intellectual property strategy. As a part of this strategic partnership, we entered into an Investment Agreement with Veritone, Inc. (“Veritone”), which provides for us to invest up to \$50 million in Veritone, consisting of both debt and equity components. Pursuant to the Investment Agreement, on August 15, 2016, we entered into a secured convertible promissory note with Veritone (the “Veritone Loans”), which permits Veritone to borrow up to \$20 million through two \$10 million advances, each bearing interest at the rate of 6.0% per annum (included in Other Income (Expense) in the consolidated statement of operations). On August 15, 2016, we funded the initial \$10 million loan (the “First Loan”), which initially had a one-year term. On November 25, 2016, we funded the

second \$10 million loan (the “Second Loan”), which has a one-year term. In addition, upon the funding of the Second Loan, the maturity date of the First Loan was automatically extend to the maturity date of the Second Loan. As a result, both the First Loan and the Second Loan are due and payable on November 25, 2017. Veritone’s obligations under the Veritone Loans are secured by substantially all of Veritone’s assets pursuant to a security agreement that we entered into with Veritone dated August 15, 2016.

In addition, commencing on the earlier of Veritone’s consummation of a private round of financing of at least \$10 million (a “Next Equity Financing”) and the maturity date of the Veritone Loans, we have the right, under certain circumstances, to convert all or a portion of the principal and accrued interest of the Veritone Loans into shares of Veritone’s Series B Preferred Stock or, if Veritone consummates a Next Equity Financing, into shares of Veritone capital stock issued in

such financing, at various contractual conversion rates, with the exact conversion rate to depend upon (i) whether Veritone consummates a Next Equity Financing, (ii) the price per share in such Next Equity Financing and (iii) whether or not we elect to convert all of the outstanding principal and accrued interest under the Veritone Loans. If Veritone consummates a qualified public offering of its common stock, with gross proceeds to Veritone of at least \$15.0 million (“IPO”), any outstanding principal and accrued interest under the Veritone Loans will automatically convert into shares of Veritone’s common stock at the lower of the applicable conversion rate and the initial public offering price of Veritone’s common shares (“IPO Price”).

In conjunction with the First Loan, Veritone issued to us a four-year \$700,000 warrant to purchase shares of Veritone’s common stock at various exercise prices, with the actual exercise price to be determined by the type and/or valuation of Veritone’s future equity financings, if any. Pursuant to an amendment to the warrant agreement effective March 15, 2017, the actual number of shares to be purchased upon exercise of the warrant is determined by dividing the warrant value by the lower of the applicable contractual exercise price and the IPO Price, if applicable. Upon funding of the Second Loan, Veritone issued to us two additional four-year \$700,000 warrants to purchase shares of Veritone’s common stock with similar amended terms.

In addition, pursuant to the Investment Agreement, Veritone issued to us a five-year Primary Warrant to purchase up to \$50 million, less all converted amounts or amounts repaid under the Veritone Loans, worth of shares of Veritone’s common stock at various exercise prices, with the actual exercise price per share to be determined by the amount of principal and accrued interest under the Veritone Loans converted into shares of Veritone common stock. Pursuant to an amendment to the Primary Warrant effective March 15, 2017, the Primary Warrant will be exercised automatically upon Veritone’s consummation of an IPO, with an exercise price equal to the lower of the applicable contractual exercise price and the IPO Price. In the absence of an automatic exercise, we may exercise the Primary Warrant at any time during its five-year term after August 15, 2017. Immediately following our exercise of the Primary Warrant in full, Veritone has the obligation to issue to us an additional 10% Warrant that provides for the issuance of additional shares of Veritone common stock, with 50% of the shares underlying the 10% Warrant vesting as of the issuance date of the 10% Warrant, and the remaining 50% of shares vesting on the anniversary of the issuance date of the 10% Warrant.

Veritone Bridge Loan. On March 14, 2017, we entered into an additional secured convertible promissory note with Veritone (the “Veritone Bridge Loan”), which permits Veritone to borrow up to an additional \$4 million, bearing interest at the rate of 8.0% per annum. On March 17, 2017, we funded the initial \$1 million advance (the “First Bridge Loan”). Veritone’s obligations under the Veritone Bridge are secured by substantially all of Veritone’s assets.

Additional advances of \$1 million may be drawn upon notice by Veritone on April 15, 2017, May 15, 2017 and June 15, 2017 (“Installment Dates”), provided that no advances to Veritone are required on an Installment Date occurring after April 30, 2017 if (i) Veritone has not completed its initial public offering on or prior to April 30, 2017, or (ii) if certain executives are no longer employees of Veritone as of the applicable Installment Date. All advances and accrued interest under the Veritone Bridge Loan mature and are due and payable in full on November 25, 2017.

The outstanding principal balance and any accrued but unpaid interest under the Veritone Bridge Loan will automatically convert, immediately prior to Veritone’s consummation of an IPO, into that number of shares of Veritone common stock determined by dividing the Veritone Bridge Loan amounts outstanding by the lower of \$8.1653 or the IPO Price, subject to a conversion limit of 981,958 shares of Veritone common stock.

In conjunction with the Veritone Bridge Loan, Veritone will issue to us up to 100,000 shares of Veritone common stock (“Upfront Shares”), and upon each additional advance, if any, will issue (i) up to 150,000 shares of Veritone common stock (the “Bridge Installment Shares”) and (ii) 10-year warrants to purchase up to 200,000 shares of Veritone common stock (the “Bridge Warrant Shares”) with other terms and conditions similar to the warrants described above.

The Upfront Shares, Bridge Installment Shares and Bridge Warrant Shares are issued on a pro-rata basis as each advance is funded. As of March 31, 2017, 25,000 Upfront Shares, 37,500 Bridge Installment Shares and 50,000 Bridge Warrant Shares will be issued in connection with the First Bridge Loan advance. The Upfront Shares, Bridge Installment Shares and Bridge Warrant Shares amounts will be adjusted for the .6 to one reverse stock split executed by Veritone subsequent to March 14, 2017.

We may elect to make an additional advance to Veritone equal to all principal amounts that have not been advanced upon Veritone's initial public offering, upon which Veritone shall issue the remaining Upfront Shares, Bridge Installment Shares and Bridge Warrant Shares that we would have received in the event such advance was done in connection with an Installment Date on a pro-rata basis.

Veritone recently filed a registration statement on form S-1 relating to a proposed initial public offering. Refer to Note 5 to the consolidated financial statements included herein for additional information.

Cash Flows from Financing Activities. Cash flows from financing activities and related changes included the following for the periods presented (in thousands):

	Three Months Ended March 31, 2017		2016	
Repurchased restricted common stock	\$(25)	\$	—	
Proceeds from exercises of stock options	255	—		
Net cash used in financing activities	\$230	\$	—	

Working Capital

Working capital (including restricted cash) at March 31, 2017 decreased to \$154.9 million, compared to \$160.3 million at December 31, 2016. Consolidated accounts receivable from licensees decreased to \$7.8 million at March 31, 2017, compared to \$26.8 million at December 31, 2016. Consolidated royalties and contingent legal fees payable decreased to \$3.1 million at March 31, 2017, compared to \$13.9 million at December 31, 2016.

The majority of accounts receivable from licensees at March 31, 2017 were collected or are scheduled to be collected in the second quarter of 2017, in accordance with the terms of the related underlying agreements. The majority of royalties and contingent legal fees payable are scheduled to be paid in the second or third quarter of 2017, subsequent to receipt by us of the related fee payments from licensees, in accordance with the underlying contractual arrangements.

Standby Letter of Credit and Guarantee Arrangement

In March 2015, an operating subsidiary of ours entered into a standby letter of credit and guarantee arrangement (“Guarantee”) with a bank for purposes of enforcing a court ruling in a German patent court granting an injunction against the defendants in the related patent infringement case. An injunction is an equitable remedy in the form of a court order that compels the defendant(s) to cease marketing, offering for sale or importing applicable infringing products into applicable jurisdiction(s). Under German law, in order to enforce the injunction granted by the court, a Guarantee is required to be furnished by our operating subsidiary, the plaintiff in the case, for potential payment to the defendants of any applicable claims which may be incurred by the defendants as a result of the enforcement of the injunction, only in the event that the aforementioned court ruling is subsequently successfully appealed by the defendants or otherwise amended. The Guarantee is required to be issued unlimited with respect to time, until appropriately extinguished in accordance with German law. The Guarantee will be extinguished when a relevant extinguishment order by the court having jurisdiction takes effect, typically occurring when the related infringement case has been settled or a final non-appealable decision has been issued by the court.

The Guarantee is secured by a cash deposit at the contracting bank totaling \$11.5 million and \$11.5 million, as of March 31, 2017 and December 31, 2016, respectively. Changes are a result of foreign currency exchange rate fluctuations and the related impact on the underlying collateral, which is denominated in U.S. dollars. The Guarantee expires on April 10, 2018, however, it is automatically extended without amendment for a period of one (1) year from the present or any future expiration date, unless at least 30 days prior to any expiration date, the Guarantee is extinguished in accordance with German law. The Guarantee facility fee is 1.15% per year, and the related expense is included in the statement of operations.

Off-Balance Sheet Arrangements

Except as set forth below, we have not entered into off-balance sheet financing arrangements. We have no long-term debt. The following table lists our known contractual obligations and future cash commitments as of March 31, 2017 (in thousands):

Contractual Obligations	Payments Due by Period (In thousands)			
	Total	Less than 1 year	1-3 years	3-5 years
Operating leases, net of guaranteed sublease income	\$3,555	\$848	\$2,692	\$ 15
Investment Agreement - Primary Warrant, contingent obligation ⁽¹⁾	30,000	30,000	—	—
Veritone Bridge Loan ⁽¹⁾	3,000	3,000	—	—
Total contractual obligations	\$36,555	\$33,848	\$2,692	\$ 15

(1) - Refer to description of Strategic Partnership - Veritone, above

Uncertain Tax Positions. At March 31, 2017, we had total unrecognized tax benefits of approximately \$1.7 million, including a recorded noncurrent liability of \$85,000 related to unrecognized tax benefits primarily associated with state taxes. No interest and penalties have been recorded for the unrecognized tax benefits as of March 31, 2017. If recognized, approximately \$1.4 million would impact our effective tax rate. We do not expect that the liability for unrecognized tax benefits will change significantly within the next 12 months. There was no activity related to the gross unrecognized tax benefits for the current period presented.

Recent Accounting Pronouncements

Refer to Note 8 to the consolidated financial statements included in this report.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The primary objective of our investment activities is to preserve principal while concurrently maximizing the income we receive from our investments without significantly increasing risk. Some of the securities that we invest in may be subject to interest rate risk and/or market risk. This means that a change in prevailing interest rates, with respect to interest rate risk, or a change in the value of the United States equity markets, with respect to market risk, may cause the principal amount or market value of the investments to fluctuate. For example, if we hold a security that was issued with a fixed interest rate at the then-prevailing rate and the prevailing interest rate later rises, the current value of the principal amount of our investment may decline. To minimize these risks in the future, we intend to maintain our portfolio of cash equivalents and short-term investments in a variety of securities, including commercial paper, money market funds, high-grade corporate bonds, government and non-government debt securities and certificates of deposit.

During the periods presented, our short-term investments were comprised of AAA-rated money market funds that invest in first-tier only securities, which primarily include domestic commercial paper, securities issued or guaranteed by the U.S. government or its agencies, U.S. bank obligations, and fully collateralized repurchase agreements (included in cash and cash equivalents in the accompanying consolidated balance sheets) and direct investments in

highly liquid, AAA-rated, U.S. government securities.

In general, money market funds are not subject to market risk because the interest paid on such funds fluctuates with the prevailing interest rate. Accordingly, a 100 basis point increase in interest rates or a 10% decline in the value of the United States equity markets would not be expected to have a material impact on the value of such money market funds. Investments in U.S. government fixed income securities are subject to interest rate risk and will decline in value if interest rates increase. However, due to the relatively short duration of our investment portfolio, an immediate 10% change in interest rates would have no material impact on our financial condition, results of operations or cash flows. Declines in interest rates over time will, however, reduce our interest income.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures. Our management, with the participation and under the supervision of our principal executive officer and principal financial officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended, or the Exchange Act) as of the end of the period covered by this quarterly report. Based on that evaluation, our principal executive officer and our principal financial officer have concluded that our disclosure controls and procedures were effective as of the end of the period covered by this quarterly report to ensure that the information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure, and that such information is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control Over Financial Reporting. As disclosed in our Quarterly Report on Form 10-Q for the quarterly period ended September 30, 2016, and our Annual Report on Form 10-K for the fiscal year ended December 31, 2016, we identified, as of September 30, 2016, a material weakness in our internal control over financial reporting relating to the accounting for certain newly granted stock options with market vesting conditions granted during the third quarter of 2016. We properly reflected the non-cash stock compensation expense in our consolidated financial statements included in our Form 10-Q for the quarter ended September 30, 2016 filed with the SEC and we were not required to restate or change our consolidated financial statements for any prior annual or interim period.

Subsequently, beginning in the fourth quarter of 2016, we executed our remediation plan for addressing the material weakness identified, as disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016, by, among other things, implementing specific revised review procedures for material new, infrequent, unusual or complex transactions, including the specific assessment of whether the accounting for such transactions should be conducted internally or outsourced to technical subject matter specialists, and enhanced documentation and review procedures involving both our chief financial officer and corporate controller with respect to the review and assessment of such transactions. Our enhanced review procedures and documentation standards were in place and operating during the fourth quarter of 2016 and the first quarter of 2017. As a result, we believe that we remediated the material weakness described above as of March 31, 2017.

There were no changes in our internal control over financial reporting that occurred during our last fiscal quarter (the quarter ended March 31, 2017) that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting, other than completion of the actions taken to remediate the material weakness described above.

Inherent Limitations on Effectiveness of Controls.

Our management, including our principal executive officer and principal financial officer, does not expect that our disclosure controls or our internal control over financial reporting will prevent or detect all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, have been detected. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Projections of any evaluation of the effectiveness of controls to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

PART II--OTHER INFORMATION

Item 1A. RISK FACTORS

Except as set forth below, there have been no material changes in our assessment of risk factors affecting our business since those presented in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2016 as filed with the SEC on March 10, 2017.

Our strategic investment in Veritone, Inc. (“Veritone”) is subject to risks, and any other strategic investments that we may make from time to time may be subject to risks.

As described herein, in August 2016, we formed a strategic partnership with Veritone pursuant to which we expect to leverage our expertise in intellectual property licensing and enforcement to assist Veritone with building its patent portfolio and execute upon its overall intellectual property strategy. As a part of this strategic partnership, we entered into an Investment Agreement with Veritone, which provides for us to invest up to \$50 million in Veritone, consisting of both debt and equity components. Our investment in Veritone is subject to a number of risks and uncertainties. Veritone currently is not profitable and has limited financial resources and we may lose some or all of our investment. In addition, applicable securities law restrictions and other factors may result in an inability to liquidate any equity components of our investment in Veritone. In addition, we may from time to time make strategic investments in other entities. Any such strategic investments will also be subject to risks and uncertainties that may cause us to lose some or all of any such investments.
