**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549**

FORM 10-K

(Mark One)

**ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934**

For the Fiscal Year Ended September 28, 2014

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

**For the Transition Period from _____ to _____
Commission File Number 0-19655**

TETRA TECH, INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

95-4148514

(I.R.S. Employer
Identification No.)

3475 East Foothill Boulevard, Pasadena, California 91107

(Address of principal executive offices) (Zip Code)

(626) 351-4664

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Common Stock, \$.01 par value

(Title of class)

The NASDAQ Stock Market LLC

(Name of exchange)

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Edgar Filing: TETRA TECH INC - Form 10-K

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. Large accelerated filer Accelerated filer Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the registrant's common stock held by non-affiliates on March 28, 2014, was \$1.9 billion (based upon the closing price of a share of registrant's common stock as reported by the Nasdaq National Market on that date).

On November 10, 2014, 62,605,098 shares of the registrant's common stock were outstanding.

DOCUMENT INCORPORATED BY REFERENCE

Portions of registrant's Proxy Statement for its 2014 Annual Meeting of Stockholders are incorporated by reference in Part III of this report where indicated.

This Annual Report on Form 10-K ("Report"), including the "Management's Discussion and Analysis of Financial Condition and Results of Operations," contains forward-looking statements regarding future events and our future results that are subject to the safe harbors created under the Securities Act of 1933 (the "Securities Act") and the Securities Exchange Act of 1934 (the "Exchange Act"). All statements other than statements of historical facts are statements that could be deemed forward-looking statements. These statements are based on current expectations, estimates, forecasts and projections about the industries in which we operate and the beliefs and assumptions of our management. Words such as "expects," "anticipates," "targets," "goals," "projects," "intends," "plans," "believes," "estimates," "seeks," "continues," "may," variations of such words, and similar expressions are intended to identify such forward-looking statements. In addition, statements that refer to projections of our future financial performance, our anticipated growth and trends in our businesses, and other characterizations of future events or circumstances are forward-looking statements. Readers are cautioned that these forward-looking statements are only predictions and are subject to risks, uncertainties and assumptions that are difficult to predict, including those identified below under "Risk Factors," and elsewhere herein. Therefore, actual results may differ materially and adversely from those expressed in any forward-looking statements. We undertake no obligation to revise or update publicly any forward-looking statements for any reason.

PART I

Item 1. Business

General

Tetra Tech, Inc. is a leading provider of consulting, engineering, program management, and construction management services that focuses on addressing fundamental needs for water, environment, infrastructure, resource management, and energy. We typically begin at the earliest stage of a project, leading with science, identifying technical solutions to problems and developing execution plans tailored to our clients' needs and resources. Our solutions may span the entire life cycle of consulting and engineering projects and include applied science, research and development, information technology, engineering, design, construction management, and operations and maintenance.

We are a global provider of consulting and engineering services, renowned for our leadership in water-related services for public and private clients. Engineering News-Record ("ENR"), the leading trade journal for our industry, ranks firms by size of revenue. ENR has ranked us the number one water services firm for the past eleven years, most recently in its April 2014 "Top 500 Design Firms" issue. In 2014, Tetra Tech was also ranked number one in water treatment/desalination, water treatment and supply, environmental management, environmental science, consulting studies, solid waste, power operation and maintenance, and wind power. ENR ranks Tetra Tech among the largest 10 firms in numerous other service lines, including engineering/design, chemical and soil remediation, site assessment and compliance, hazardous waste, industrial processes, and manufacturing.

Our focus on science and consulting and our ability to apply our skills to developing solutions for water management across a wide array of public and private sector needs has diversified our client base, expanded our geographic reach, and increased our ability to service both existing and emerging markets. We currently have approximately 14,000 staff worldwide, and most are located in North America.

Table of Contents

Mission

Our mission is to be the premier worldwide consulting and engineering firm, focusing on water, environment, infrastructure, resource management, and energy. The following core principles form the underpinning of how we work together to serve our clients:

Service. We put our clients first. We listen closely to better understand our clients' needs and deliver smart, cost-effective solutions that meet their needs.

Value. We solve our clients' problems as if they were our own. We develop and implement real-world solutions that are innovative, efficient and practical.

Excellence. We bring superior technical capability, disciplined project management, and excellence in safety and quality to all of our services.

Opportunity. Our people are our number one asset. Opportunity means new technical challenges that provide advancement within our company, encouraging a diverse workforce, and ensuring a safe workplace.

Industry Overview

We are part of the global consulting and engineering industry that serves public and private clients by addressing fundamental needs for water, environment, infrastructure, resource management, and energy. Our industry provides clients with the technical studies, planning, engineering, design, and construction management services that respond to their needs. The industry's clients vary in size and scope from small local public agencies and private companies to national governments and large multi-national corporations. These clients seek service firms with high-caliber technical expertise, practical experience, multi-disciplinary capabilities and the global reach needed to analyze their problems in order to develop and implement the most appropriate, cost-effective solutions.

Many government and commercial organizations face complex challenges due to increased demand and competition for water and natural resources, newly understood threats to human health and the environment, aging infrastructure, demand for new infrastructure in emerging economies, and diversification and development of sustainable energy resources. As a global company with a local presence in many areas around the world, we provide the breadth of technical knowledge and capabilities to solve our clients' diverse and challenging problems.

Our water services support government agencies responsible for managing water supply, wastewater treatment, stormwater management, and flood protection. Our water services also support private sector clients that require water supply and treatment for industrial processes. We help our clients develop water supplies and manage water resources, while addressing a wide range of local and national government requirements and policies. We provide essential support for water and site management needs for resource extraction in the oil and gas and mining industries. Our water and environmental markets also include both government and commercial clients that are working to restore contaminated areas and protect and manage future uses. Our infrastructure market includes a broad range of engineering services for water management and conveyance, transportation, public and commercial buildings, and related community needs. Our infrastructure services include mechanical, civil, and electrical engineering solutions designed to provide resilient and long-term solutions sensitive to changing climate and development needs, and emerging economies. Our resource management services provide support for the safe, sustainable extraction of necessary mineral resources and oil and gas, including a wide range of services to meet water, environment, energy, and infrastructure-related needs, sometimes in remote regions of the world. Our energy market consists of both government and commercial clients that seek to

Table of Contents

develop energy resources, identify energy efficiency enhancements, and support the development of energy transmission and distribution corridors.

Increasingly, the consulting and engineering industry is being asked to provide integrated solutions in a global marketplace. Large firms such as ours can offer fully integrated services, from front-end data collection, analysis, and design, through implementation. Large firms that offer integrated solutions differentiate themselves from smaller firms that generally offer niche services by providing fully integrated sustainable solutions that provide lasting value to our clients. As a large company with a history of leading with science, we are ideally suited to providing interdisciplinary solutions across our water and related service lines.

Public policy, demand for resources, infrastructure development challenges, and natural forces constantly shape changes in our industry. Public concern over environmental issues, especially water quality, has been a driving force behind numerous regulations and changes in public policies and practices. Public and private clients are increasingly focused on water management, resilient infrastructure, and sustainable energy planning. Fluctuations in weather patterns and extreme events, such as prolonged droughts, and more frequent flooding, are driving concerns over the reliability of water supplies, the need to protect coastal areas, and upgrade flood management in metropolitan areas. Energy policies, resource limitations and concern about climate change have encouraged the implementation of energy conservation measures, retrofits to existing structures, upgrades to energy transmission infrastructure, and the development of renewable energy resources. Governments are using international development as a foreign policy tool to help developing nations to overcome numerous challenges, including challenges related to access to potable water, agricultural programs, and human health.

The Tetra Tech Strategy

To continue our successful growth and maintain a competitive position, we have implemented the following strategy that is integral to our future success:

Start with Science. We typically start with science at the onset of a project, building on our staff's strong technical and interdisciplinary expertise in natural and physical science and engineering. This strength allows us to effectively evaluate and recommend potential solutions to our clients' problems. Our scientists and engineers collect and interpret vast and diverse data sources to develop sustainable engineering solutions for our clients.

Capitalize on our Extensive Technical and Multi-Disciplinary Experience. Since our inception, we have provided innovative consulting and engineering services, focusing on cost-effective solutions to all aspects of water resource management. Interdisciplinary solutions are derived through teams of experts across our disciplines and build on an experience base of thousands of completed projects. Our services are provided by a wide range of professionals, including archaeologists, architects, biologists, chemical engineers, chemists, civil engineers, computer scientists, economists, electrical engineers, environmental engineers, environmental scientists, geologists, hydrogeologists, mechanical engineers, oceanographers, project managers, and toxicologists.

Global Coverage and Local Delivery. We believe that proximity to our clients is instrumental to integrating global experience and resources with an understanding of local conditions and needs. We have significantly broadened our geographic presence in recent years through strategic acquisitions and internal growth. Our base of operations in North America and network of international offices provide a platform from which we can respond to the global need for essential water, environment, and energy services. Over the past year, we worked in over 100 countries, helping government and private sector clients address complex water, environment, energy, and related infrastructure needs.

Table of Contents

Leverage Existing Client Base. We believe that we can effectively expand our service offerings to existing clients, providing them with access to additional technical resources, and provide both high-end planning and comprehensive solutions across multiple disciplines. For our global clients, we are leveraging our localized project experience and relationships to provide increasingly broader support for their worldwide operations.

Identify and Expand into New Business Areas. We use our consulting services and specialized technical services as entry points to expand into adjacent business areas. After our consulting practice is established in a new business area, we can expand our operations by offering additional technical services. For example, based on our work in watershed management consulting, we identify adjacent opportunities and expand into water infrastructure and engineering services.

Focus on Large, Complex and Interdisciplinary Projects. We continue to focus on expanding our public and private sector services by bidding on complex projects that are at the leading edge of policy and technology development. We develop integrated, sustainable solutions by combining our interdisciplinary capabilities in water, environment, infrastructure, resource management, and energy.

Focus on Cash Generation. We take a disciplined approach to monitoring, managing, and improving our return on investment in each of our business areas through our efforts to negotiate appropriate contract terms, manage our contract performance to minimize schedule delays and cost overruns, and promptly bill and collect accounts receivable.

Actively Attract, Recruit and Retain Strategic Hires. We focus on attracting and retaining top-quality individuals who provide innovative thinking, technical skills, teamwork, and dedication to maintaining long-term client relationships. Our combination of high-end science and consulting with practical applications provides challenging and rewarding opportunities for our employees, thereby enhancing our ability to recruit and retain top quality talent. Our full-service capabilities, internal networking programs, entrepreneurial environment, focus on technical excellence, and global project portfolio help to attract and retain highly qualified individuals.

Develop and Maintain Strategic Partnerships with Small Business Companies and Communities. In working with suppliers, we are committed to being an excellent partner and mentor, consistent with our desire to lead with science and develop approaches to best serve our global clients. When combined with our considerable capabilities and expertise, value-added partnerships with external companies and suppliers can enhance the services we provide to our clients.

Invest in Strategic Acquisitions. We believe that strategic acquisitions will allow us to continue our growth in selected business areas, broaden our service offerings, and extend our geographic presence. We intend to continue to acquire companies that will help establish our position in certain emerging business areas or further strengthen our position in our more established businesses. Our effective integration of acquired companies can continue to enhance our ability to compete technically and geographically.

Table of Contents**Reportable Segments**

In fiscal 2014, we managed our business under three reportable segments. The following table presents the percentage of our revenue by reportable segment:

| Reportable Segment | Fiscal Year | | |
|---|-------------|--------|--------|
| | 2014 | 2013 | 2012 |
| Engineering and Consulting Services | 38.8% | 39.6% | 42.6% |
| Technical Support Services | 36.7 | 35.7 | 37.7 |
| Remediation and Construction Management | 28.3 | 27.8 | 22.9 |
| Inter-segment elimination | (3.8) | (3.1) | (3.2) |
| | 100.0% | 100.0% | 100.0% |

The Engineering and Consulting Service ("ECS") segment and Technical Support Services ("TSS") segment provide consulting and engineering services across our markets. The Remediation and Construction Management ("RCM") segment supports primarily construction and remediation-related services, often in support of the other segments.

In the fourth quarter of fiscal 2014, we conducted a strategic review of our business. As a result, we initiated the realignment of our business to focus on our core front-end consulting and engineering business, which is highly differentiated in the marketplace. These services are primarily performed in the ECS and TSS segments. The RCM activities that closely align with our core business, including environmental remediation, oil and gas, solid waste, and utilities-related work, have been integrated into our front-end business. We plan to exit all other activities in the RCM segment in fiscal 2015.

Beginning in fiscal 2015, we reorganized our core operations to better align them with our markets, resulting in two renamed reportable segments. We will report our federal water, environment, and infrastructure activities in the Water, Environment and Infrastructure ("WEI") reportable segment. Our Resource Management and Energy ("RME") reportable segment will include our oil and gas, energy, global mining, waste management, remediation, utilities, and international development services. These changes are expected to produce significantly higher margins and more predictable results, while better enabling us to address our customers seamlessly. We will report the results of the wind-down of our non-core construction activities in the RCM segment.

Further descriptions of our WEI and RME segments are included below under "2015 Reportable Segments". For more information on risks related to our business, segments and geographic regions, including risks related to foreign operations, see Item 1A, "Risk Factors" of this report.

Engineering and Consulting Services

ECS provides front-end science, consulting engineering and project management services in the areas of water management, water infrastructure, solid waste management, mining, geotechnical sciences, arctic engineering, industrial processes and oil sands, transportation, and information technology.

Public concern with the quality of rivers, lakes, streams, and coastal and marine waters, and the ensuing legislative and regulatory response, is driving demand for our services. More recently, two important factors have raised the visibility of the need for surface water management: competition for water resources and climate variations, such as those that cause increasingly severe droughts and floods. Over more than four decades, we have developed a specialized set of technical skills that position us to compete effectively for surface water and watershed management projects.

Table of Contents

Our public sector practice include providing water, environment and infrastructure services to U.S. federal government clients such as the U.S. Environmental Protection Agency ("EPA"), the U.S. Department of Defense ("DoD"), the U.S. Department of Energy ("DOE"), and a broad range of government clients across the United States and Canada. We provide surface water master planning and modeling services to municipal government agencies in the United States and Canada, particularly in the areas of watershed management, climate adaptation analysis, flood control, and the optimal management of waste water, stormwater, and combined sewer overflow ("CSO") systems.

Our consulting and engineering design services are applied to numerous aspects of water quality and quantity management, including major water and wastewater treatment plants, combined sewer storage and separation, water reuse programs, regional stormwater management and green infrastructure design, and drainage and flood control. Our experience includes planning, permitting, design, and construction management services for water treatment facilities, desalination facilities and water distribution systems, including pipelines and pump stations. We also support master planning, permitting, design, and construction of water-related redevelopment projects, and parks and river corridor restoration projects. We provide a broad base of commercial clients, with water supply, water treatment, and water reuse services including those in the aerospace, chemical, energy, mining, oil and gas, pharmaceutical, retail, and utility industries.

We offer plant engineering services for commercial and industrial clients, including mining and metals, oil and gas, and the chemical and petrochemical industries. We have supported the industrial water management needs of clients in the production of base, rare, ferrous, and agricultural minerals. We help renovate, upgrade, and modernize industrial water supply, and address their water treatment and water reuse needs. We also provide plant engineering, project execution, program management, and full engineering, procurement and construction management ("EPCM") services for industrial water treatment projects throughout North America.

We provide engineering, architecture, construction management, and technical services for transportation projects that provide resilient and safe mobility. Our transportation projects include roadway monitoring and asset management services, innovative stormwater management, and supporting our clients in collecting condition data, optimizing upgrades, and long-term planning for expansion. Our transportation related services include multi-model design services for commuter railway stations, airport expansions, bridges and major highways, and ports and harbors. We provide design solutions to repair, replace, and upgrade older transportation infrastructure, including specialized logistical and modeling support for traffic routing during upgrades.

We provide our infrastructure services in extreme and remote areas by providing specialized services that are adapted to local resources, by minimizing environmental disturbance, and considering potential climate change impacts in our designs. For example, we provide consulting and construction services to owners of transportation, mining, energy, and community infrastructure in the Arctic and areas of permafrost around the globe. In this extreme environment where temperatures can drop below -50 °C (-58 °F), we provide adaptive engineering and scientific services that reach beyond traditional approaches. We are one of the few firms that are capable of providing full life-cycle services for northern development. We offer these arctic engineering services during all project phases: exploration and project planning; feasibility studies, design, and permitting; EPCM and construction; and operation, decommissioning, and reclamation.

We provide planning, architectural, and engineering services for U.S. federal, state and local government and commercial facilities and related infrastructure needs including military housing, educational, institutional, corporate headquarters, healthcare, and research facilities. We specialize in designing resilient, sustainable facilities and infrastructure that address environmental impacts, water use, waste disposal needs, and power usage. We apply innovative techniques to site preparation, master

Table of Contents

planning, stormwater and water management, site remediation, wetlands mitigation, and a broad range of low impact design techniques for site development.

We provide technology systems integration to support data management, data processing, communications and outreach, and systems development. Our projects range from large-scale environmental monitoring, modeling, and data management to systems engineering and design for major infrastructure rehabilitation programs. We provide systems analysis and information management to optimize the U.S. National Airspace System and related aviation systems. We also support research and technical services for national-scale water resource and environmental data management, including archiving and statistical analysis.

We offer plant engineering services for clients in heavy industry, including mining and metals, and oil sands, as well as for those in the chemical and petrochemical industries. We have supported the industrial processes needs of clients with expertise in the production of base, rare, ferrous, and agricultural minerals. We help renovate, upgrade, and modernize industrial facilities, including concentrators, smelters and refineries. We also provide plant engineering, project execution, program management, and full EPCM services for industrial process projects throughout North America.

We provide a wide range of consulting and engineering services for solid waste management, including landfill design and management, throughout the United States and Canada. We provide design, construction management, and maintenance services to manage solid and hazardous waste, for environmental, wastewater, energy, oil and gas containment, mining, utilities, aquaculture, and other industrial clients.

We offer a full range of services for mining projects worldwide, including resource assessment, mine development, operations support, and closure/remediation. Our full-service mining services team includes geologists, metallurgists, mine engineers, environmental scientists, and water specialists. We address tough challenges in engineering design, procurement, and construction to support all areas of mine operations, including underground and open pit operations, surface infrastructure, mills and process plants, power generation and transmission projects, water treatment, tailings management, and regulatory compliance.

Technical Support Services

TSS provides management consulting and engineering services and strategic direction in the areas of environmental assessments/hazardous waste management, climate change, international development, energy, oil and gas, technical government consulting, and building and facilities.

We support oil and gas clients in the upstream, midstream and downstream market sectors. Our services include environmental support, siting studies, strategic planning and analyses, design of well pads and surface impoundments for drilling sites, water management for exploration activities, design of midstream pipelines and associated pumping stations and storage facilities, construction monitoring, biological and cultural assessments, site investigations, and hazardous waste site remediation. We provide services to oil and gas clients primarily in the United States, including the shale basins, and midstream services, especially pipeline planning and design.

We provide a full range of services to electric power utilities and independent power producers worldwide, ranging from macro-level planning, management, and advisory services to project-specific environmental, engineering, and construction management services. For utilities and governmental agencies regulating power, we provide policy and regulatory development, utility management and privatization, power asset evaluation and management, and transaction support services. For energy developers and owners of renewable and conventional power generation facilities, as well as transmission

Table of Contents

and distribution assets, we provide environmental, engineering, procurement, and operations and maintenance services for all project phases. Our projects range from hydropower, to onshore and offshore wind facilities and solar farms, to liquefied natural gas facilities.

We provide comprehensive services for environmental planning, cleanup, and reuse of sites contaminated with hazardous materials, toxic chemicals, and oil and petroleum products. Our services cover all phases of the remedial planning process, starting with emergency response and initial site assessment through removal actions, remedial design, and implementation management. Sites range from small properties undergoing voluntary cleanup, to brownfields redevelopment projects, to DoD installations, to some of the largest and most complex Superfund sites in the United States. We support both commercial and government clients in planning and implementing remedial activities at numerous sites around the world. We also provide a broad range of environmental analysis and planning services to ensure that our clients are implementing their operations in a sustainable manner. Our services include air quality management, regulatory compliance, information management and geographic information systems, radiation protection and health physics, risk management, pollution prevention and control, radioactive and hazardous waste management, National Environmental Policy Act ("NEPA") services, and environmental response training.

In international development, we provide services to many donor agencies, primarily to the U.S. Agency for International Development ("USAID"), to develop safe and reliable water supplies and sanitation services, support the eradication of poverty, improve livelihoods, promote democracy, and increase economic growth. We plan, design, implement, research, and monitor projects in the broad areas of climate change, agriculture and rural development, governance and institutional development, natural resources and the environment, infrastructure, economic growth, energy, rule of law and justice systems, land tenure and property rights, and training and consulting for public-private partnerships. We build capacity and strengthen institutions in areas such as global health, energy sector reform, utility management, food security, and local governance. We currently provide international development services in numerous countries around the world, working for the U.S. Department of State ("DoS"), USAID, and the Millennium Challenge Corporation ("MCC").

Remediation and Construction Management

RCM provides full-service support, including construction and construction management, to all of our client sectors, including U.S. federal and state and local government agencies, and commercial clients worldwide, in the areas of environmental remediation, infrastructure development, solid waste management, energy, and oil and gas.

Table of Contents

We provide environmental remediation and reconstruction services to evaluate and restore lands to beneficial use. Under the U.S. federal government's Base Realignment and Closure ("BRAC") Act, we help remediate and restore facilities at military locations in the United States and around the world. We also manage large, complex sediment remediation programs that help restore rivers and coastal waters to beneficial use. Environmental remediation also includes activities to identify, evaluate, and destroy unexploded ordnance ("UXO"), both domestically and internationally. We support utilities in implementing infrastructure needs, including broadband and other wired utilities in the United States.

Project Examples

The following table presents brief examples of projects in our three segments during fiscal 2014:

| Segment | Representative Projects |
|----------------|---|
| ECS | <p>Assisting the EPA Office of Wastewater Management in conducting the Clean Watersheds Needs Survey to assess financial needs for constructing wastewater treatment plants and other water-related infrastructure.</p> <p>Providing watershed planning and modeling services for City of Los Angeles, California to address water quality and optimize stormwater management program needs.</p> <p>Providing engineering design and environmental management services to the U.S. Army Corps of Engineers ("USACE") for the Port of Miami channel deepening environmental mitigation program.</p> <p>Providing a CSO control strategy that improves real time control (RTC) rules, to reduce overflows, maximize use of retention in the system, and improve operational efficiency, in the City of Edmonton, Alberta, Canada.</p> <p>Providing engineering design services to the City of San Antonio, Texas for the planning and design of a 30 million gallons per day reverse osmosis brackish groundwater water supply treatment system, which will be the largest of its kind in the United States when completed.</p> |

Table of Contents

Segment

Representative Projects

Supporting the government of Afghanistan to empower women and increase gender diversity in all aspects of government activities and functions.

Providing specialty marine impact studies, permitting services, biological and cultural resources surveys, design, and construction support for NextEra Energy.

Providing engineering, detailed design and construction monitoring for multiple oil and gas midstream pipeline companies such as Enbridge Inc., Kinder Morgan Energy Partners, L.P., and Plains All American Pipeline, L.P.

Supporting environmental activities at U.S. Air Force ("USAF"), U.S. Army and U.S. Navy ("USN") installations worldwide to assist the DoD in its environmental mission in the areas of environmental conservation and planning, environmental quality, environmental restoration, design and construction.

RCM

Providing design-build services for energy-efficient facilities and environmental restoration services at various DoD BRAC sites, such as the Hunters Point Naval Shipyard and former Naval Air Station Alameda, both located on San Francisco Bay, California.

Providing turn-key design, construction, dredging, and treatment services for the Lower Fox River remediation and clean-up project.

Providing construction and remediation services to mining clients in support of mine closure activities.

Clients

We provide services to a diverse base of international, U.S. commercial, U.S. federal, and U.S. state and local government clients. The following table presents the percentage of our revenue by client sector:

| Client Sector | Fiscal Year | | |
|--|-------------|--------|--------|
| | 2014 | 2013 | 2012 |
| International ⁽¹⁾ | 25.9% | 26.7% | 24.5% |
| U.S. commercial | 28.9 | 26.5 | 26.5 |
| U.S. federal government ⁽²⁾ | 30.9 | 31.8 | 37.2 |
| U.S. state and local government | 14.3 | 15.0 | 11.8 |
| | 100.0% | 100.0% | 100.0% |

(1) Includes revenue generated from foreign operations, primarily in Canada, and revenue generated from non-U.S. clients.

(2) Includes revenue generated under U.S. federal government contracts performed outside the United States.

Edgar Filing: TETRA TECH INC - Form 10-K

U.S. federal government agencies are significant clients. The DoD accounted for 11.7%, 12.1% and 14.4% of our revenue in fiscal 2014, 2013 and 2012, respectively. We typically support multiple programs within a single U.S. federal government agency, both domestically and internationally. We also assist U.S. state and local government clients in a variety of jurisdictions across the United States. In

Edgar Filing: TETRA TECH INC - Form 10-K

Table of Contents

Canada, we work for several provinces and a variety of local jurisdictions. Our commercial clients include companies in the chemical, energy, mining, pharmaceutical, retail, aerospace, automotive, petroleum, and communications industries. No single client, except for U.S. federal government clients, accounted for more than 10% of our revenue in fiscal 2014.

The following table presents a list of representative clients in fiscal 2014 in our reportable segments.

2015 Reportable Segments

As described above, we realigned our operations beginning in fiscal 2015. The operations of the WEI and RME business groups were aligned to support the development and implementation of services by market sector across our global operations. The alignment includes the placement of our oil and gas, mining, and energy services in the RME group. The types of work to be performed in the WEI and RME segments are described below.

Water, Environment and Infrastructure

WEI provides consulting and engineering services worldwide for a broad range of water and infrastructure-related needs in both developed and emerging economies. WEI supports both public and private clients including federal, state/provincial, and local governments, and global and local commercial and industrial clients. The primary markets for WEI's services include water management, environmental restoration, government consulting, and a broad range of civil infrastructure requirements for facilities, transportation, and regional and local development. WEI's services span from early data collection and monitoring, to data analysis and information technology, to science and engineering applied research, to engineering design, to construction management and operations and maintenance.

In a resource-constrained world, our experts assist clients in identifying, reducing, and strategically managing their environmental footprint to provide cost savings, mitigate regulatory impacts, institute operational efficiencies, manage assets, develop new business opportunities and promote corporate responsibility. Our services support our clients' efforts to become sustainable by "greening" infrastructure, implementing energy efficiency and resource conservation, using alternative fuels, capturing and sequestering carbon, providing emergency preparedness and response support, and improving water and land resource management. We also provide climate change and strategic management consulting, project implementation, and greenhouse gas inventory assessment, certification, reduction, and management services.

Table of Contents

Our services include the following, which are described in greater detail under "Engineering and Consulting Services" above:

Providing water, environment, and infrastructure services to a broad range of government clients across the United States and Canada. These services include surface water master planning and modeling, particularly in the areas of watershed management, climate adaptation analysis, flood control, and the optimal management of wastewater, stormwater, and CSO systems.

Providing consulting and engineering design services that are applied to numerous aspects of water quality and quantity management, including major water and wastewater treatment plants, combined sewer storage and separation, water reuse programs, regional stormwater management and green infrastructure design, and drainage and flood control; supporting master planning, permitting, design, and construction of water-related redevelopment projects, and parks and river corridor restoration projects; and providing water supply, water treatment, and water reuse services.

Offering plant engineering services for commercial and industrial clients, including mining and metals, oil and gas, and the chemical and petrochemical industries; supporting the industrial water management needs of clients in the production of base, rare, ferrous, and agricultural minerals; helping to renovate, upgrade, and modernize industrial water supplies, and address water treatment and water reuse needs; and providing plant engineering, project execution, and program management services for industrial water treatment projects throughout North America.

Providing engineering, architecture, construction management, and technical services for transportation projects, including roadway monitoring and asset management services, collecting condition data, optimizing upgrades, and long-term planning for expansion; providing multi-model design services for commuter railway stations, airport expansions, bridges and major highways, and ports and harbors; and designing solutions to repair, replace, and upgrade older transportation infrastructure.

Providing infrastructure services in extreme and remote areas by using specialized techniques that are adapted to local resources, while minimizing environmental impacts, and considering potential climate change impacts. These include providing consulting and construction services to owners of transportation, mining, energy, and community infrastructure in the Arctic and areas of permafrost around the globe.

Providing planning, architectural, and engineering services for U.S. federal, state and local government, and commercial facilities and related infrastructure needs including military housing, and educational, institutional, corporate headquarters, healthcare, and research facilities; providing civil, electrical, mechanical, structural, plumbing, and fire protection engineering and design services for buildings and surrounding developments around the world; and providing engineering and construction management projects for a wide range of clients with specialized needs such as security systems, training and audiovisual facilities, clean rooms, laboratories, medical facilities, and emergency preparedness facilities.

Providing technology systems integration to support data management, data processing, communications and outreach, and systems development; providing systems analysis and information management to optimize the U.S. National Airspace System and related aviation systems; and supporting research and technical services for national-scale water resource and environmental data management, including archiving and statistical analysis.

Table of Contents

In addition, WEI provides the following:

A broad spectrum of professional and technical services, including advisory and assistance services, to supplement and support the internal staff of our U.S. federal government clients. These services include facility planning and operational support, infrastructure development and management, human resource management, program and logistics management, engineering, test and evaluation, information technology, and administrative support.

Comprehensive services for environmental planning, cleanup, and reuse of sites contaminated with hazardous materials, toxic chemicals, and oil and petroleum products, which cover all phases of the remedial planning process, starting with emergency response and initial site assessment through removal actions, remedial design and implementation management; and supporting both commercial and government clients in planning and implementing remedial activities at numerous sites around the world, and providing a broad range of environmental analysis and planning services.

Resource Management and Energy

RME provides consulting and engineering services worldwide for a broad range of resource management and energy needs. RME supports both private and public clients, including global industrial and commercial clients, U.S. federal agencies in large scale remediation, and major international development agencies. The primary markets for RME's services include oil and gas, energy, mining, remediation, utilities, waste management, and international development. RME's services span from early data collection and monitoring, to data analysis and information technology, to science and engineering applied research, to engineering design, to construction management and operations and maintenance. RME supports EPCM for full service implementation of commercial projects, especially for oil and gas, industrial, and mining customers.

Our services include the following, which are described in greater detail under "Technical Support Services" above:

Supporting oil and gas clients across North America in the upstream, midstream, and downstream market sectors. Our services include environmental support, siting studies, strategic planning and analyses, design of well pads and surface impoundments for drilling sites, water management for exploration activities, design of midstream pipelines and associated pumping stations and storage facilities, construction monitoring, design and construction management for downstream sustaining capital projects, biological and cultural assessments, site investigations and hazardous waste site remediation.

Providing a full range of services to electric power utilities and independent power producers worldwide, ranging from macro-level planning, management, and advisory services to project-specific environmental, engineering, and construction management services. For utilities and governmental agencies regulating power, services include policy and regulatory development, utility management and privatization, power asset evaluation and management, and transaction support services. For energy developers and owners of renewable and conventional power generation facilities, as well as transmission and distribution assets, services include environmental, engineering, procurement, and operations and maintenance services for all project phases.

Table of Contents

Providing international development services to many donor agencies to develop safe and reliable water supplies and sanitation services, support the eradication of poverty, improve livelihoods, promote democracy, and increase economic growth; planning, designing, implementing, researching, and monitoring projects in the areas of climate change, agriculture and rural development, governance and institutional development, natural resources and the environment, infrastructure, economic growth, energy, rule of law and justice systems, land tenure and property rights, and training and consulting for public-private partnerships; building capacity and strengthening institutions in areas such as global health, energy sector reform, utility management, food security, and local governance.

In addition, RME provides the following:

Plant engineering services for clients in heavy industry, including mining and metals, and oil sands, as well as for those in the chemical and petrochemical industries; supporting the industrial process needs of clients with expertise in the production of base, rare, ferrous, and agricultural minerals; helping to renovate, upgrade, and modernize industrial facilities, including concentrators, smelters, and refineries; and providing plant engineering, project execution, program management, and full EPCM services for industrial process projects throughout North America.

A wide range of consulting and engineering services for solid waste management, including landfill design and management, throughout the United States and Canada; providing design, construction management, and maintenance services to manage solid and hazardous waste, for environmental, wastewater, energy, oil and gas containment, mining, utilities, aquaculture, and other industrial clients; designing and installing geosynthetic liners for large lining and capping projects, as well as innovative renewable energy projects such as solar energy-generating landfill caps; and providing full-service solutions for gas-to-energy facilities to efficiently use landfill methane gas.

A full range of services for mining projects worldwide including resource assessment, mine development, operations support, and closure/remediation; addressing challenges in engineering design, procurement, and construction to support all areas of mine operations, including underground and open pit operations, surface infrastructure, mills and process plants, power generation and transmission projects, water treatment, tailings management, and regulatory compliance.

Environmental remediation and reconstruction services to evaluate and restore lands to beneficial use, including the identification, evaluation, and destruction of UXO, both domestically and internationally. Under the BRAC Act, helping to remediate and restore facilities at military locations in the United States and around the world; managing large, complex sediment remediation programs that help restore rivers and coastal waters to beneficial use.

Supporting utilities in the United States in implementing infrastructure needs, including broadband and other wired utilities.

Remediation and Construction Management

We plan to exit all remaining work performed in this segment primarily in fiscal 2015, and thereafter report financial results primarily through our WEI and RME segments.

Table of Contents**Contracts**

Our services are performed under three principal types of contracts with our clients: fixed-price, time-and-materials, and cost-plus. The following table presents the percentage of our revenue by contract type:

| Contract Type | Fiscal Year | | |
|--------------------|-------------|--------|--------|
| | 2014 | 2013 | 2012 |
| Fixed-price | 45.3% | 42.9% | 40.2% |
| Time-and-materials | 36.3 | 39.2 | 40.8 |
| Cost-plus | 18.4 | 17.9 | 19.0 |
| | 100.0% | 100.0% | 100.0% |

Our clients select the type of contract we enter into for a particular engagement. Under a fixed-price contract, the client agrees to pay a specified price for our performance of the entire contract or a specified portion of the contract. Some fixed-price contracts can include date-certain and/or performance obligations. Fixed-price contracts carry certain inherent risks, including risks of losses from underestimating costs, delays in project completion, problems with new technologies, price increases for materials, and economic and other changes that may occur over the contract period. Consequently, the profitability of fixed-price contracts may vary substantially. Under our time-and-materials contracts, we are paid for labor at negotiated hourly billing rates and also paid for other expenses. Profitability on these contracts is driven by billable headcount and cost control. Many of our time-and-materials contracts are subject to maximum contract values and, accordingly, revenue related to these contracts is recognized as if these contracts were fixed-price contracts. Under our cost-plus contracts, some of which are subject to contract ceiling amount, we are reimbursed for allowable costs and fees, which may be fixed or performance-based. If our costs exceed the contract ceiling or are not allowable, we may not be able to obtain full reimbursement. Further, the amount of the fee received for a cost-plus award fee contract partially depends upon the client's discretionary periodic assessment of our performance on that contract.

Some contracts with the U.S. federal government are subject to annual funding approval. U.S. federal government agencies may impose spending restrictions that limit the continued funding of our existing contracts and may limit our ability to obtain additional contracts. These limitations, if significant, could have a material adverse effect on us. All contracts with the U.S. federal government may be terminated by the government at any time, with or without cause.

U.S. federal government agencies have formal policies against continuing or awarding contracts that would create actual or potential conflicts of interest with other activities of a contractor. These policies may prevent us from bidding for or performing government contracts resulting from or related to certain work we have performed. In addition, services performed for a commercial or government sector client may create conflicts of interest that preclude or limit our ability to obtain work for a private organization. We attempt to identify actual or potential conflicts of interest and to minimize the possibility that such conflicts could affect our work under current contracts or our ability to compete for future contracts. We have, on occasion, declined to bid on a project because of an existing or potential conflict of interest.

Some of our operating units have contracts with the U.S. federal government that are subject to audit by the government, primarily by the Defense Contract Audit Agency ("DCAA"). The DCAA generally seeks to (i) identify and evaluate all activities that contribute to, or have an impact on, proposed or incurred costs of government contracts; (ii) evaluate a contractor's policies, procedures, controls, and performance; and (iii) prevent or avoid wasteful, careless, and inefficient production or service. To accomplish this, the DCAA examines our internal control systems, management policies, and financial capability; evaluates the accuracy, reliability, and reasonableness of our cost representations and records;

Table of Contents

and assesses our compliance with Cost Accounting Standards ("CAS") and defective-pricing clauses found within the Federal Acquisition Regulation ("FAR"). The DCAA also performs an annual review of our overhead rates and assists in the establishment of our final rates. This review focuses on the allowability of cost items and the applicability of CAS. The DCAA also audits cost-based contracts, including the close-out of those contracts.

The DCAA reviews all types of U.S. federal government proposals, including those of award, administration, modification, and re-pricing. The DCAA considers our cost accounting system, estimating methods and procedures, and specific proposal requirements. Operational audits are also performed by the DCAA. A review of our operations at every major organizational level is conducted during the proposal review period. During the course of its audit, the U.S. federal government may disallow costs if it determines that we accounted for such costs in a manner inconsistent with CAS. Under a government contract, only those costs that are reasonable, allocable, and allowable are recoverable. A disallowance of costs by the U.S. federal government could have a material adverse effect on our financial results.

In accordance with our corporate policies, we maintain controls to minimize any occurrence of fraud or other unlawful activities that could result in severe legal remedies, including the payment of damages and/or penalties, criminal and civil sanctions, and debarment. In addition, we maintain preventative audit programs and mitigation measures to ensure that appropriate control systems are in place.

We provide our services under contracts, purchase orders, or retainer letters. Our policy requires that all contracts must be in writing. We bill our clients in accordance with the contract terms and periodically based on costs incurred, on either an hourly-fee basis or on a percentage-of-completion basis, as the project progresses. Most of our agreements permit our clients to terminate the agreements without cause upon payment of fees and expenses through the date of the termination. Generally, our contracts do not require that we provide performance bonds. If required, a performance bond, issued by a surety company, guarantees a contractor's performance under the contract. If the contractor defaults under the contract, the surety will, at its discretion, complete the job or pay the client the amount of the bond. If the contractor does not have a performance bond and defaults in the performance of a contract, the contractor is responsible for all damages resulting from the breach of contract. These damages include the cost of completion, together with possible consequential damages such as lost profits.

Marketing and Business Development

Our corporate management team establishes the scope and range of services we provide and our overall business strategy. Our on-going strategic planning defines and guides our investment in marketing and business development toward priority programs and growth markets. Our centralized business development support group develops corporate marketing materials, conducts market research, and manages promotional and professional activities, including appearances at trade shows, direct mailings, advertising, and public relations.

Business development activities are implemented by our technical and professional management staff throughout the company. We believe that these personnel have the best understanding of a client's needs and the effect of local or client-specific issues, laws and regulations, and procurement procedures. Our professional staff members hold frequent meetings with existing and potential clients; give presentations to civic and professional organizations; and present seminars on current technical topics. Essential to the effective development of business is each staff member's access to all of our service offerings through our internal technical and geographic networks. Our strong internal networking programs help our professional staff members to pursue new opportunities for both existing and new clients. These networks also facilitate our ability to provide services throughout the project life cycle from the early studies through to construction management and operations. Our information technology systems

Table of Contents

provide the support for a variety of data needs including skills search tools, business development tracking, and collaboration.

For our major focus areas, consistent with our strategic plan, we have established company-wide growth initiatives that reinforce internal coordination, track the development of new programs, identify and coordinate collective resources for major bids, and help us build interdisciplinary teams for major pursuits. Our growth initiatives provide a forum for cross-sector collaboration and the development of interdisciplinary solutions. We continuously identify new markets that are consistent with our strategic plan and service offerings, and we leverage our full-service capabilities and internal coordination structure to develop and implement strategies to research, anticipate, and position for future procurements and emerging programs.

Sustainability Program

Our Sustainability Program allows us to encourage, coordinate and report on actions to minimize our collective impacts on the environment. Our Sustainability Program has three primary pillars: Projects – the solutions we provide for our clients; Procurement – our procurement and subcontracting approaches; and Processes – the internal policies and processes that promote sustainable practices, reduce costs, and minimize environmental impacts. We have established a clear set of metrics to evaluate our progress toward our sustainability goals. We continuously implement sustainability-related policies and practices, and we assess the results of our efforts in order to improve upon them in the future.

Our Sustainability Program is led by our Chief Sustainability Officer, who has been appointed by executive management and is supported by other key corporate and operations representatives via our Sustainability Council. Our executive management team reviews and approves the Sustainability Program and evaluates our progress in achieving the goals and objectives outlined in our plan. We publish an annual sustainability report that documents our progress.

Acquisitions and Divestitures

Acquisitions. We continuously evaluate the marketplace for strategic acquisition opportunities. Due to our reputation, size, financial resources, geographic presence, and range of services, we have numerous opportunities to acquire privately and publicly held companies or selected portions of such companies. During our evaluation, we examine the effect an acquisition may have on our long-range business strategy and results of operations. Generally, we proceed with an acquisition if we believe that it would have a positive effect on future operations and could strategically expand our service offerings. Successful integration and implementation are essential to achieving favorable results. Accordingly, no assurance can be given that any acquisition will provide accretive results.

Our strategy is to position ourselves to address existing and emerging markets. We view acquisitions as a key component of our growth strategy, and we intend to use cash, debt, or securities, as we deem appropriate, to fund acquisitions. We may acquire other businesses that we believe are synergistic and will ultimately increase our revenue and net income, strengthen our ability to achieve our strategic goals, provide critical mass with existing clients, and further expand our lines of service. We typically pay a purchase price that results in the recognition of goodwill, generally representing the intangible value of a successful business with an assembled workforce specialized in our areas of interest. Acquisitions are inherently risky, and no assurance can be given that our previous or future acquisitions will be successful or will not have a material adverse effect on our financial position, results of operations, or cash flow. All acquisitions require the approval of our Board of Directors, and those in excess of a certain size require the approval of our lenders.

Table of Contents

For detailed information regarding acquisitions, see Note 5, "Mergers and Acquisitions" of the "Notes to Consolidated Financial Statements" included in Item 8.

Divestitures. To complement our acquisition strategy and our focus on internal growth, we regularly review and evaluate our existing operations to determine whether our business model should change through the divestiture of certain businesses. Accordingly, from time to time, we may divest certain non-core businesses and reallocate our resources to businesses that better align with our long-term strategic direction. We did not have any divestitures in fiscal 2014 and 2013.

Competition

The market for our services is generally competitive. We often compete with many other firms ranging from small regional firms to large international firms.

We perform a broad spectrum of consulting, engineering and technical services across our reportable segments. Our client base includes U.S. federal government agencies such as the DoD, USAID, DOE, EPA and FAA; U.S. state and local government agencies; provincial and local government agencies in Canada; the U.S. commercial sector, which consists primarily of large industrial companies and utilities; and our international commercial clients, which are predominantly located in Canada and include primarily mining and oil and gas companies. Our competition varies and is a function of the business areas in which, and the client sectors for which, we perform our services. The number of competitors for any procurement can vary widely, depending upon technical qualifications, the relative value of the project, geographic location, the financial terms and risks associated with the work, and any restrictions placed upon competition by the client. Historically, clients have chosen among competing firms by weighing the quality, innovation and timeliness of the firm's service versus its cost to determine which firm offers the best value. When less work becomes available in a given market, price becomes an increasingly important factor.

We believe that our principal competitors include the following firms, in alphabetical order: AECOM Technology Corporation; AMEC PLC; Arcadis NV; Black & Veatch Corporation; Brown & Caldwell; CDM Smith Inc.; CH2M HILL Companies, Ltd.; Chemonics International, Inc.; Foster Wheeler AG; GHD; ICF International, Inc.; Jacobs Engineering Group Inc.; Leidos, Inc., Michael Baker International, LLC; MWH Global, Inc.; SNC-Lavalin Group Inc.; Stantec Inc.; TRC Companies, Inc.; Weston Solutions, Inc.; Willbros Group, Inc.; and WSP Global Inc.

Backlog

We include in our backlog only those contracts for which funding has been provided and work authorization has been received. We estimate that approximately 70% of our backlog at the end of fiscal 2014 will be recognized as revenue in fiscal 2015, as work is being performed. However, we cannot guarantee that the revenue projected in our backlog will be realized or, if realized, will result in profits. In addition, project cancellations or scope adjustments may occur with respect to contracts reflected in our backlog. For example, certain of our contracts with the U.S. federal government and other clients are terminable at the discretion of the client, with or without cause. These types of backlog reductions could adversely affect our revenue and margins. Accordingly, our backlog as of any particular date is an uncertain indicator of our future earnings.

At fiscal 2014 year-end, our backlog was \$2.0 billion, an increase of \$97.6 million, or 5.1%, compared to fiscal 2013 year-end. Approximately \$800 million and \$1.1 billion of our backlog at the end of fiscal 2014 related to our new WEI and RME segments, respectively. The remaining backlog relates to the wind-down of non-core construction projects in our RCM segment. The overall increase in our backlog was

Table of Contents

primarily driven by the growth in our oil and gas business due to our continued expansion in North America.

Regulations

We engage in various service activities that are subject to government oversight, including environmental laws and regulations, general government procurement laws and regulations, and other regulations and requirements imposed by specific government agencies with which we conduct business.

Environmental. A significant portion of our business involves planning, design, program management, and construction management of pollution control facilities, as well as assessment and management of remediation activities at hazardous waste or U.S. Superfund sites and military bases. In addition, we contract with U.S. federal government entities to destroy hazardous materials, including weapons stockpiles. These activities require us to manage, handle, remove, treat, transport, and dispose of toxic or hazardous substances.

Some environmental laws, such as the Superfund law and similar state and local statutes, can impose liability for the entire cost of clean-up for contaminated facilities or sites upon present and former owners and operators, as well as generators, transporters, and persons arranging for the treatment or disposal of such substances. In addition, while we strive to handle hazardous and toxic substances with care and in accordance with safe methods, the possibility of accidents, leaks, spills, and events of force majeure always exist. Humans exposed to these materials, including workers or subcontractors engaged in the transportation and disposal of hazardous materials and persons in affected areas, may be injured or become ill, resulting in lawsuits that expose us to liability that may result in substantial damage awards. Liabilities for contamination or human exposure to hazardous or toxic materials, or a failure to comply with applicable regulations, could result in substantial costs, including clean-up costs, fines, civil or criminal sanctions, third party claims for property damage or personal injury, or the cessation of remediation activities.

Certain of our business operations are covered by U.S. Public Law 85-804, which provides for government indemnification against claims and damages arising out of unusually hazardous activities performed at the request of the government. Due to changes in public policies and law, however, government indemnification may not be available in the case of any future claims or liabilities relating to other hazardous activities that we perform.

Government Procurement. The services we provide to the U.S. federal government are subject to FAR and other rules and regulations applicable to government contracts. These rules and regulations:

require certification and disclosure of all cost and pricing data in connection with the contract negotiations under certain contract types;

impose accounting rules that define allowable and unallowable costs and otherwise govern our right to reimbursement under certain cost-based government contracts; and

restrict the use and dissemination of information classified for national security purposes and the exportation of certain products and technical data.

In addition, services provided to the DoD are monitored by the Defense Contract Management Agency and audited by the DCAA. Our government clients can also terminate any of their contracts, and many of our government contracts are subject to renewal or extension annually. Further, the services we provide to state and local government clients are subject to various government rules and regulations.

Table of Contents

Seasonality

We experience seasonal trends in our business. Our revenue and operating income are typically lower in the first half of our fiscal year, primarily due to the Thanksgiving, Christmas and New Year's holidays. Many of our clients' employees, as well as our own employees, take vacations during these holiday periods. Further, seasonal inclement weather conditions occasionally cause some of our offices to close temporarily or may hamper our project field work. These occurrences result in fewer billable hours worked on projects and, correspondingly, less revenue recognized. Our revenue is typically higher in the second half of the fiscal year due to favorable weather conditions during spring and summer months that may result in higher billable hours. In addition, our revenue is typically higher in the fourth fiscal quarter due to the U.S. federal government's fiscal year-end spending.

Potential Liability and Insurance

Our business activities could expose us to potential liability under various environmental laws and under workplace health and safety regulations. In addition, we occasionally assume liability by contract under indemnification agreements. We cannot predict the magnitude of such potential liabilities.

We maintain a comprehensive general liability insurance policy with an umbrella policy that covers losses beyond the general liability limits. We also maintain professional errors and omissions liability and contractor's pollution liability insurance policies. We believe that both policies provide adequate coverage for our business. When we perform higher-risk work, such as fixed-price remediation, we obtain the necessary types of insurance coverage for such activities, as is typically required by our clients.

We obtain insurance coverage through a broker that is experienced in the professional liability field. The broker and our risk manager regularly review the adequacy of our insurance coverage. Because there are various exclusions and retentions under our policies, or an insurance carrier may become insolvent, there can be no assurance that all potential liabilities will be covered by our insurance policies or paid by our carrier.

We evaluate the risk associated with insurance claims. If we determine that a loss is probable and reasonably estimable, we establish an appropriate reserve. A reserve is not established if we determine that a claim has no merit or is not probable or reasonably estimable. Our historic levels of insurance coverage and reserves have been adequate. However, partially or completely uninsured claims, if successful and of significant magnitude, could have a material adverse effect on our business.

Employees

At fiscal 2014 year-end, we had approximately 14,000 staff. A large percentage of our employees have technical and professional backgrounds and undergraduate and/or advanced degrees, including the employees of recently acquired companies. Our professional staff includes archaeologists, architects, biologists, chemical engineers, chemists, civil engineers, computer scientists, economists, electrical engineers, environmental engineers, environmental scientists, geologists, hydrogeologists, mechanical engineers, oceanographers, project managers, and toxicologists. Approximately 400 employees are represented by labor unions pursuant to collective bargaining agreements. We often employ union workers on a project-specific basis. We consider the current relationships with our employees, including those represented by unions, to be favorable. We are not aware of any employment circumstances that are likely to disrupt work at any of our facilities. See Part I, Item 1A, "Risk Factors" for a discussion of the risks related to the loss of key personnel or our inability to attract and retain qualified personnel.

Table of Contents**Executive Officers of the Registrant**

The following table shows the name, age and position of each of our executive officers at November 18, 2014:

| Name | Age | Position |
|-------------------|------------|---|
| Dan L. Batrack | 56 | Chairman, Chief Executive Officer and President Mr. Batrack joined our predecessor in 1980 and was named Chairman in January 2008. He has served as our Chief Executive Officer and a director since November 2005, and as our President since October 2008. Mr. Batrack has served in numerous capacities over the last 30 years, including project scientist, project manager, operations manager, Senior Vice President and President of an operating unit. He has managed complex programs for many small and Fortune 500 clients, both in the United States and internationally. Mr. Batrack holds a B.A. degree in Business Administration from the University of Washington. |
| Steven M. Burdick | 50 | Executive Vice President, Chief Financial Officer and Treasurer Mr. Burdick has served as our Executive Vice President, Chief Financial Officer and Treasurer since April 2011. He served as our Senior Vice President and Corporate Controller from January 2004 to March 2011. Mr. Burdick joined us in April 2003 as Vice President, Management Audit. Previously, Mr. Burdick served as the Executive Vice President and Chief Financial Officer for Aura Systems, Inc. From 2000 through 2002 he was the Chief Financial Officer for TRW Ventures. Prior to this, Mr. Burdick held the position of Senior Manager with Ernst & Young LLP in Los Angeles. Mr. Burdick holds a B.S. degree in Business Administration from Santa Clara University and is a Certified Public Accountant. |

Table of Contents

| Name | Age | Position |
|--------------------|------------|---|
| James R. Pagenkopf | 63 | Executive Vice President and President of Water, Environment and Infrastructure Mr. Pagenkopf has served as the President of WEI (formerly ECS) since September 2009. He has over 38 years of experience with us in both technical and management roles, including project and program manager, office manager, group manager, Vice President, and operating unit president. Mr. Pagenkopf's academic and professional background is in the development and application of hydrodynamic and water quality models, which he has applied in more than 200 projects throughout the United States and internationally. He has served as program manager on several large technical support contracts for U.S. federal agencies, including the EPA and USACE. His work with the EPA's Office of Water has included the management of several contiguous multi-year contracts for the National Watershed Protection and Municipal Wastewater Programs. He has also conducted planning and engineering studies for several USACE Districts on coastal protection and restoration. Mr. Pagenkopf holds a B.S. in Civil Engineering from Valparaiso University and an M.S. in Civil Engineering from the Massachusetts Institute of Technology. |
| Ronald J. Chu | 57 | Executive Vice President and President of Resource Management and Energy Mr. Chu has served as the President of RME (formerly TSS) since June 2007. He has more than 16 years of experience with us, and has served in various technical and management capacities, including project and program manager, office manager, regional manager and Chief Operating Officer for TSS. Mr. Chu was named a Vice President in 2001, and has served as president of several subsidiary companies during his tenure with us. He began his career as a civil/sanitary engineer in 1981 and entered the environmental consulting field in 1984. His career has included management of major assessment, engineering and remediation programs for major oil and gas companies, Fortune 100 manufacturers, energy suppliers, and government agencies. Mr. Chu is a registered professional engineer in several states and has authored numerous technical articles. He holds a B.S. in Civil Engineering from Northeastern University and an M.S. in Environmental Engineering from the University of Southern California. |

Edgar Filing: TETRA TECH INC - Form 10-K

Table of Contents

| Name | Age | Position |
|---------------------|------------|--|
| Frank C. Gross, Jr. | 58 | Executive Vice President and President of Remediation and Construction Management Mr. Gross joined us as the President of Remediation and Construction Management in July 2011. He previously served as President of the Industrial/Process Business Unit of URS Corporation's Washington Division since February 2008. At his former employer, Mr. Gross led an \$850 million per year business group focused on construction management. He joined URS in 1978 and gained progressive responsibility in a variety of technical and leadership roles. He has more than 30 years of experience with large, multi-disciplinary engineering and construction projects in power, oil and gas, industrial/manufacturing, automotive, and other heavy industries. Mr. Gross earned a B.S. in Civil and Environmental Engineering from Clarkson University. |
| William R. Brownlie | 61 | Senior Vice President, Chief Engineer and Corporate Risk Management Officer Dr. Brownlie was named Senior Vice President and Chief Engineer in September 2009, and Corporate Risk Management Officer in November 2013. From December 2005 to September 2009, he served as President of ECS. Dr. Brownlie joined our predecessor in 1981 and was named a Senior Vice President in December 1993. Dr. Brownlie has managed various operating units and programs focusing on water resources and environmental services, including work with USACE, the USAF, Bureau of Reclamation and DOE. He is a registered professional engineer and has a strong technical background in water resources. Dr. Brownlie holds B.S. and M.S. degrees in Civil Engineering from the State University of New York at Buffalo and a Ph.D. in Civil Engineering from the California Institute of Technology. |
| Richard A. Lemmon | 55 | Senior Vice President, Corporate Administration Mr. Lemmon joined our predecessor in 1981 in a technical capacity and became a member of its corporate staff in a management position in 1985. In 1988, at the time of our predecessor's divestiture from Honeywell, Inc., Mr. Lemmon structured and managed many of our corporate functions. He is currently responsible for insurance, risk management, human resources, safety and facilities. |

| Name | Age | Position |
|----------------------|------------|---|
| Janis B. Salin | 61 | <p>Senior Vice President, General Counsel and Secretary</p> <p>Ms. Salin joined us in February 2002. For the prior 18 years, Ms. Salin was a Principal with the law firm of Riordan & McKinzie in Los Angeles (which merged into Bingham McCutchen LLP in 2003), and served as Managing Principal of that firm from 1990 to 1992. She served as our outside counsel from the time of our formation in 1988. Ms. Salin holds B.A. and J.D. degrees from the University of California at Los Angeles.</p> |
| Craig L. Christensen | 61 | <p>Senior Vice President, Chief Information Officer</p> <p>Mr. Christensen joined us in 1998 through the acquisition of our Tetra Tech NUS, Inc. ("NUS") subsidiary. Mr. Christensen is responsible for our information services and technologies, including the implementation of our enterprise resource planning system. Previously, Mr. Christensen held positions at NUS, Brown and Root Services, and Landmark Graphics subsidiaries of Halliburton Company where his responsibilities included contracts administration, finance, and system development. Prior to his service at Halliburton, Mr. Christensen held positions at Burroughs Corporation and Apple Computer. Mr. Christensen holds B.A. and M.B.A. degrees from Brigham Young University.</p> |
| Michael A. Bieber | 46 | <p>Senior Vice President, Corporate Development</p> <p>Mr. Bieber joined us in 1996, and he is currently responsible for driving strategic growth through the leadership of our mergers and acquisitions program. Mr. Bieber has overseen our investor relations function since 2000. From 1996 to 2000, he was a proposal manager in our corporate marketing group. From 1994 to 1996, Mr. Bieber served as a strategic business development consultant to large defense, infrastructure, and environmental firms at CRC, Inc. and its successor. Prior to that, Mr. Bieber worked for IT Corporation (now Chicago Bridge & Iron Company N.V.), where he served as project manager and engineer on government nuclear and petrochemical projects. Mr. Bieber holds a B.S. degree in Civil Engineering from the Tennessee Technological University.</p> |

|---------------------|-----|---|
| Leslie L. Shoemaker | 57 | <p>Senior Vice President, Chief Strategy Officer and Infrastructure Group President Dr. Shoemaker joined us in 1991, and has served as Senior Vice President of Strategic Initiatives since 2008. In November 2014, she was named Senior Vice President, Chief Strategy Officer and Infrastructure Group President. She supports the CEO in the definition of our vision and direction, and advancing our strategic growth initiatives. Dr. Shoemaker leads the Infrastructure Group across our global operations, developing and implementing new strategies for expanding our services in core water and infrastructure programs, and integrating our data/analysis/design capabilities to provide the most efficient sustainable infrastructure solutions for our clients around the world. Dr. Shoemaker has for the past decade coordinated our internal networks that link our scientists and engineers across our operations. She has more than 25 years of industry experience and has previously served in various technical and management capacities, particularly in the field of integrated water management and modeling. Dr. Shoemaker holds a B.A. degree in Mathematics from Hamilton College, a Master of Engineering from Cornell University and a Ph.D. in Agricultural Engineering from the University of Maryland.</p> |
| Kevin P. McDonald | 55 | <p>Senior Vice President, Corporate Human Resources Mr. McDonald joined us in 2004 through the acquisition of Foster Wheeler Environmental Corporation. He is responsible for all areas of human resources ("HR"), including executive compensation, employee benefits, succession planning, human resources information systems, and employment law compliance. Prior to leading our corporate HR organization, Mr. McDonald was the HR Director for one of our subsidiaries. He has more than 30 years' experience in the engineering and construction services industry. Mr. McDonald earned a B.S. degree in Management from the University of Scranton and an M.B.A from Fairleigh Dickinson University.</p> |

| Brian N. Carter | 47 | Senior Vice President, Corporate Controller and Chief Accounting Officer Mr. Carter joined Tetra Tech as Vice President, Corporate Controller and Chief Accounting Officer in June 2011 and was appointed Senior Vice President in October 2012. He previously served as Vice President of Finance and Administration for Webdush, Inc., a privately held financial services holding company, from September 2009 to June 2011. Mr. Carter was Vice President, Financial Planning and Analysis, for AECOM Technology Corporation during 2008 and 2009. He was Executive Vice President, Financial Planning & Analysis and Management Accounting for IndyMac Bancorp, Inc. from 2002 to 2008, and he previously held finance and auditing positions with Huntington Bancshares, Inc., Nationwide Financial Services, Inc., and Ernst & Young LLP. Mr. Carter holds a B.S. in Business Administration from Miami University and is a Certified Public Accountant. |

Available Information

All of our periodic report filings with the Securities and Exchange Commission ("SEC") pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), are made available, free of charge, through our website located at www.tetratech.com, including our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and any amendments to these reports. These reports are available on our website as soon as reasonably practicable after we electronically file with or furnish the reports to the SEC. You may also request an electronic or paper copy of these filings at no cost by writing or telephoning us at the following: Tetra Tech, Inc., Attention: Investor Relations, 3475 East Foothill Boulevard, Pasadena, California 91107, (626) 351-4664.

Item 1A. Risk Factors

We operate in a changing environment that involves numerous known and unknown risks and uncertainties that could materially adversely affect our operations. Set forth below and elsewhere in this report and in other documents we file with the SEC are descriptions of the risks and uncertainties that could cause our actual results to differ materially from the results contemplated by the forward-looking statements contained in this report. Additional risks we do not yet know of or that we currently think are immaterial may also affect our business operations. If any of the events or circumstances described in the following risks actually occurs, our business, financial condition or results of operations could be materially adversely affected.

Our operating results may be adversely impacted by worldwide political and economic uncertainties and specific conditions in the markets we address.

General worldwide economic conditions have experienced a downturn due to the reduction of available credit, slower economic activity, concerns about inflation and deflation, increased energy and commodity costs, decreased consumer confidence and capital spending, adverse business conditions, and, in the United States, the negative impact on economic growth resulting from the combination of federal income tax increases and government spending restrictions. These conditions make it extremely difficult for our clients and our vendors to accurately forecast and plan future business activities and could cause businesses to slow spending on services, and they have also made it very difficult for us to predict the short-term and long-term impacts on our business. We cannot predict the timing, strength, or duration of any economic slowdown or subsequent economic recovery worldwide or in our industry. If the economy or

Table of Contents

markets in which we operate deteriorate from the level experienced in fiscal 2014, our business, financial condition, and results of operations may be materially and adversely affected.

Our annual revenue, expenses, and operating results may fluctuate significantly, which may adversely affect our stock price.

Our annual revenue, expenses, and operating results may fluctuate significantly because of numerous factors, some of which may contribute to more pronounced fluctuations in an uncertain global economic environment. These factors include:

general economic or political conditions;

unanticipated changes in contract performance that may affect profitability, particularly with contracts that are fixed-price or have funding limits;

contract negotiations on change orders, requests for equitable adjustment, and collections of related billed and unbilled accounts receivable;

seasonality of the spending cycle of our public sector clients, notably the U.S. federal government, the spending patterns of our commercial sector clients, and weather conditions;

budget constraints experienced by our U.S. federal, and state and local government clients;

integration of acquired companies;

changes in contingent consideration related to acquisition earn-outs;

divestiture or discontinuance of operating units;

employee hiring, utilization, and turnover rates;

loss of key employees;

the number and significance of client contracts commenced and completed during a quarter;

creditworthiness and solvency of clients;

the ability of our clients to terminate contracts without penalties;

delays incurred in connection with a contract;

the size, scope, and payment terms of contracts;

the timing of expenses incurred for corporate initiatives;

reductions in the prices of services offered by our competitors;

threatened or pending litigation;

legislative and regulatory enforcement policy changes that may affect demand for our services;

the impairment of goodwill or identifiable intangible assets;

Table of Contents

the fluctuation of a foreign currency exchange rate;

stock-based compensation expense;

actual events, circumstances, outcomes, and amounts differing from judgments, assumptions, and estimates used in determining the value of certain assets (including the amounts of related valuation allowances), liabilities, and other items reflected in our consolidated financial statements;

success in executing our strategy and operating plans;

changes in tax laws or regulations or accounting rules;

results of income tax examinations;

the timing of announcements in the public markets regarding new services or potential problems with the performance of services by us or our competitors, or any other material announcements;

speculation in the media and analyst community, changes in recommendations or earnings estimates by financial analysts, changes in investors' or analysts' valuation measures for our stock, and market trends unrelated to our stock; and

continued volatility in the financial and commodity markets.

As a consequence, operating results for a particular future period are difficult to predict and, therefore, prior results are not necessarily indicative of results to be expected in future periods. Any of the foregoing factors, or any other factors discussed elsewhere herein, could have a material adverse effect on our business, results of operations, and financial condition that could adversely affect our stock price.

Demand for our services is cyclical and vulnerable to economic downturns. If economic growth slows, government fiscal conditions worsen, or client spending declines further, then our revenue, profits, and financial condition may deteriorate.

Demand for our services is cyclical, and vulnerable to economic downturns and reductions in government and private industry spending. Such downturns or reductions may result in clients delaying, curtailing, or canceling proposed and existing projects. Our business traditionally lags the overall recovery in the economy; therefore, our business may not recover immediately when the economy improves. If economic growth slows, government fiscal conditions worsen, or client spending declines further, then our revenue, profits, and overall financial condition may deteriorate. Our government clients may face budget deficits that prohibit them from funding new or existing projects. In addition, our existing and potential clients may either postpone entering into new contracts or request price concessions. Difficult financing and economic conditions may cause some of our clients to demand better pricing terms or delay payments for services we perform, thereby increasing the average number of days our receivables are outstanding, and the potential of increased credit losses of uncollectible invoices. Further, these conditions may result in the inability of some of our clients to pay us for services that we have already performed. If we are not able to reduce our costs quickly enough to respond to the revenue decline from these clients, our operating results may be adversely affected. Accordingly, these factors affect our ability to forecast our future revenue and earnings from business areas that may be adversely impacted by market conditions.

Table of Contents

We derive revenue from companies in the mining industry, which is a historically cyclical industry with levels of activity that are significantly affected by the levels and volatility of prices for commodities. If economic growth slows or global demand for commodities declines further, then our revenue, profits, and financial condition may deteriorate.

The businesses of our global mining clients are, to varying degrees, cyclical and have experienced declines over the last two years due to lower global growth expectations and the associated decline in market prices. For example, depending on the market prices of uranium, precious metals, aluminum, copper, iron ore, and potash, our mining company clients may cancel or curtail their mining projects, which could result in a corresponding decline in the demand for our services among these clients. Accordingly, the cyclical nature of the mining market could have a material adverse effect on our business, operating results, or financial condition.

Demand for our oil and gas services fluctuates and a decline in demand could adversely affect our revenue, profits, and financial condition.

Demand for our oil and gas services fluctuates, and we depend on our customers' willingness to make future expenditures to explore for, develop, produce, and transport oil and natural gas in the United States and Canada. Our customers' willingness to undertake these activities depends largely upon prevailing industry conditions that are influenced by numerous factors over which we have no control, including:

prices, and expectations about future prices, of oil and natural gas;

domestic and foreign supply of and demand for oil and natural gas;

the cost of exploring for, developing, producing, and delivering oil and natural gas;

transportation capacity, including but not limited to train transportation capacity and its future regulation;

available pipeline, storage, and other transportation capacity;

availability of qualified personnel and lead times associated with acquiring equipment and products;

federal, state, provincial, and local regulation of oilfield activities;

environmental concerns regarding the methods our customers use to produce hydrocarbons;

the availability of water resources and the cost of disposal and recycling services; and

seasonal limitations on access to work locations.

Table of Contents

Anticipated future prices for natural gas and crude oil are a primary factor affecting spending by our customers. Lower prices or volatility in prices for oil and natural gas typically decrease spending, which can cause rapid and material declines in demand for our services and in the prices we are able to charge for our services. In addition, should the proposed Keystone XL pipeline project application be denied or further delayed by the U.S. federal government, then there may be a slowing of spending in the development of the Canadian oil sands. Worldwide political, economic, military, and terrorist events, as well as natural disasters and other factors beyond our control, contribute to oil and natural gas price levels and volatility and are likely to continue to do so in the future.

We derive a substantial amount of our revenue from U.S. federal, state and local government agencies, and any disruption in government funding or in our relationship with those agencies could adversely affect our business.

In fiscal 2014, we generated 45.2% of our revenue from contracts with U.S. federal, and state and local government agencies. A significant amount of this revenue is derived under multi-year contracts, many of which are appropriated on an annual basis. As a result, at the beginning of a project, the related contract may be only partially funded, and additional funding is normally committed only as appropriations are made in each subsequent year. These appropriations, and the timing of payment of appropriated amounts, may be influenced by numerous factors as noted below. Our backlog includes only the projects that have funding appropriated.

The demand for our U.S. government-related services is generally driven by the level of government program funding. Accordingly, the success and further development of our business depends, in large part, upon the continued funding of these U.S. government programs, and upon our ability to obtain contracts and perform well under these programs. There are several factors that could materially affect our U.S. government contracting business. These and other factors could cause U.S. government agencies to delay or cancel programs, to reduce their orders under existing contracts, to exercise their rights to terminate contracts or not to exercise contract options for renewals or extensions. Such factors, which include the following, could have a material adverse effect on our revenue or the timing of contract payments from U.S. government agencies:

the failure of the U.S. government to complete its budget and appropriations process before its fiscal year-end, which would result in the funding of government operations by means of a continuing resolution that authorizes agencies to continue to operate but does not authorize new spending initiatives. As a result, U.S. government agencies may delay the procurement of services;

changes in and delays or cancellations of government programs, requirements, or appropriations;

budget constraints or policy changes resulting in delay or curtailment of expenditures related to the services we provide;

re-competes of government contracts;

the timing and amount of tax revenue received by federal, and state and local governments, and the overall level of government expenditures;

curtailment in the use of government contracting firms;

delays associated with insufficient numbers of government staff to oversee contracts;

Table of Contents

the increasing preference by government agencies for contracting with small and disadvantaged businesses;

competing political priorities and changes in the political climate with regard to the funding or operation of the services we provide;

the adoption of new laws or regulations affecting our contracting relationships with the federal, state or local governments;

unsatisfactory performance on government contracts by us or one of our subcontractors, negative government audits, or other events that may impair our relationship with federal, state or local governments;

a dispute with or improper activity by any of our subcontractors; and

general economic or political conditions.

On December 26, 2013, President Obama signed into law the 2013 Budget Act, which raises the sequestration caps mandated by the Budget Control Act of 2011 for fiscal years 2014 and 2015, and extends the caps into 2022 and 2023. The 2013 Budget Act therefore eliminates some of the spending cuts required by the sequestration that were scheduled to occur in January 2014 and in 2015.

As a U.S. government contractor, we must comply with various procurement laws and regulations and are subject to regular government audits; a violation of any of these laws and regulations or the failure to pass a government audit could result in sanctions, contract termination, forfeiture of profit, harm to our reputation or loss of our status as an eligible government contractor and could reduce our profits and revenue.

We must comply with and are affected by U.S. federal, state, local, and foreign laws and regulations relating to the formation, administration and performance of government contracts. For example, we must comply with FAR, the Truth in Negotiations Act, CAS, the American Recovery and Reinvestment Act of 2009, the Services Contract Act, and DoD security regulations, as well as many other rules and regulations. In addition, we must also comply with other government regulations related to employment practices, environmental protection, health and safety, tax, accounting, and anti-fraud measures, as well as many others regulations in order to maintain our government contractor status. These laws and regulations affect how we do business with our clients and, in some instances, impose additional costs on our business operations. Although we take precautions to prevent and deter fraud, misconduct, and non-compliance, we face the risk that our employees or outside partners may engage in misconduct, fraud, or other improper activities. U.S. government agencies, such as the DCAA, routinely audit and investigate government contractors. These government agencies review and audit a government contractor's performance under its contracts and cost structure, and evaluate compliance with applicable laws, regulations, and standards. In addition, during the course of its audits, the DCAA may question our incurred project costs. If the DCAA believes we have accounted for such costs in a manner inconsistent with the requirements for FAR or CAS, the DCAA auditor may recommend to our U.S. government corporate administrative contracting officer that such costs be disallowed. Historically, we have not experienced significant disallowed costs as a result of government audits. However, we can provide no assurance that the DCAA or other government audits will not result in material disallowances for incurred costs in the future. In addition, U.S. government contracts are subject to various other requirements relating to the formation, administration, performance, and accounting for these contracts. We may also be subject to *qui tam* litigation brought by private individuals on behalf of the U.S. government under the Federal Civil False Claims Act, which could include claims for treble damages. U.S. government contract violations could result in the imposition of civil and criminal penalties or sanctions, contract termination,

Table of Contents

forfeiture of profit, and/or suspension of payment, any of which could make us lose our status as an eligible government contractor. We could also suffer serious harm to our reputation. Any interruption or termination of our U.S. government contractor status could reduce our profits and revenue significantly.

Our inability to win or renew U.S. government contracts during regulated procurement processes could harm our operations and significantly reduce or eliminate our profits.

U.S. government contracts are awarded through a regulated procurement process. The U.S. federal government has increasingly relied upon multi-year contracts with pre-established terms and conditions, such as indefinite delivery/indefinite quantity ("IDIQ") contracts, which generally require those contractors who have previously been awarded the IDIQ to engage in an additional competitive bidding process before a task order is issued. As a result, new work awards tend to be smaller and of shorter duration, since the orders represent individual tasks rather than large, programmatic assignments. In addition, we believe that there has been an increase in the award of federal contracts based on a low-price, technically acceptable criteria emphasizing price over qualitative factors, such as past performance. As a result, pricing pressure may reduce our profit margins on future federal contracts. The increased competition and pricing pressure, in turn, may require us to make sustained efforts to reduce costs in order to realize revenue, and profits under government contracts. If we are not successful in reducing the amount of costs we incur, our profitability on government contracts will be negatively impacted. In addition, the U.S. federal government has scaled back outsourcing of services in favor of "insourcing" jobs to its employees, which could reduce our revenue. Moreover, even if we are qualified to work on a government contract, we may not be awarded the contract because of existing government policies designed to protect small businesses and under-represented minority contractors. Our inability to win or renew government contracts during regulated procurement processes could harm our operations and significantly reduce or eliminate our profits.

Each year, client funding for some of our U.S. government contracts may rely on government appropriations or public-supported financing. If adequate public funding is delayed or is not available, then our profits and revenue could decline.

Each year, client funding for some of our U.S. government contracts may directly or indirectly rely on government appropriations or public-supported financing. Legislatures may appropriate funds for a given project on a year-by-year basis, even though the project may take more than one year to perform. In addition, public-supported financing such as U.S. state and local municipal bonds may be only partially raised to support existing projects. Similarly, the impact of the economic downturn on U.S. state and local governments may make it more difficult for them to fund projects. In addition to the state of the economy and competing political priorities, public funds and the timing of payment of these funds may be influenced by, among other things, curtailments in the use of government contracting firms, increases in raw material costs, delays associated with insufficient numbers of government staff to oversee contracts, budget constraints, the timing and amount of tax receipts, and the overall level of government expenditures. If adequate public funding is not available or is delayed, then our profits and revenue could decline.

Our U.S. federal government contracts may give government agencies the right to modify, delay, curtail, renegotiate, or terminate existing contracts at their convenience at any time prior to their completion, which may result in a decline in our profits and revenue.

U.S. federal government projects in which we participate as a contractor or subcontractor may extend for several years. Generally, government contracts include the right to modify, delay, curtail, renegotiate, or terminate contracts and subcontracts at the government's convenience any time prior to their completion. Any decision by a U.S. federal government client to modify, delay, curtail, renegotiate, or terminate our contracts at their convenience may result in a decline in our profits and revenue.

Table of Contents

Our revenue from commercial clients is significant, and the credit risks associated with certain of these clients could adversely affect our operating results.

In fiscal 2014, we generated 49.7% of our revenue from U.S. and foreign commercial clients. Due to continuing weakness in general economic conditions, our commercial business may be at risk as we rely upon the financial stability and creditworthiness of our clients. To the extent the credit quality of these clients deteriorates or these clients seek bankruptcy protection, our ability to collect our receivables, and ultimately our operating results, may be adversely affected.

Our international operations expose us to legal, political, and economic risks that could harm our business and financial results.

Our international operations expose us to legal, political, and economic risks in different countries, as well as currency exchange rate fluctuations that could harm our business and financial results.

In fiscal 2014, we generated 25.9% of our revenue from our international operations, primarily in Canada, and from international clients for work that is performed by our domestic operations. International business is subject to a variety of risks, including:

imposition of governmental controls and changes in laws, regulations, or policies;

lack of developed legal systems to enforce contractual rights;

greater risk of uncollectible accounts and longer collection cycles;

currency exchange rate fluctuations, devaluations, and other conversion restrictions;

uncertain and changing tax rules, regulations, and rates;

the potential for civil unrest, acts of terrorism, force majeure, war or other armed conflict, and greater physical security risks, which may cause us to leave a country quickly;

logistical and communication challenges;

changes in regulatory practices, including tariffs and taxes;

changes in labor conditions;

general economic, political, and financial conditions in foreign markets; and

exposure to civil or criminal liability under the U.S. Foreign Corrupt Practices Act ("FCPA"), the U.K. Bribery Act, the Canadian Corruption of Foreign Public Officials Act, the Brazilian Clean Companies Act, the anti-boycott rules, trade and export control regulations, as well as other international regulations.

For example, an ongoing government investigation into political corruption in Quebec contributed to the slow-down in procurements and business activity in that province, which has adversely affected our business. The Province of Quebec has adopted legislation that requires businesses and individuals seeking contracts with governmental bodies (including cities, towns, municipalities, and the provincial government) be certified by a Quebec regulatory authority as deserving the trust of the public for contracts over a specified size. Our failure to obtain

certification could adversely affect our business.

Table of Contents

International risks and violations of international regulations may significantly reduce our revenue and profits, and subject us to criminal or civil enforcement actions, including fines, suspensions, or disqualification from future U.S. federal procurement contracting. Although we have policies and procedures to monitor legal and regulatory compliance, our employees, subcontractors, and agents could take actions that violate these requirements. As a result, our international risk exposure may be more or less than the percentage of revenue attributed to our international operations.

We could be adversely affected by violations of the FCPA and similar worldwide anti-bribery laws.

The FCPA and similar anti-bribery laws generally prohibit companies and their intermediaries from making improper payments to foreign government officials for the purpose of obtaining or retaining business. The U.K. Bribery Act of 2010 prohibits both domestic and international bribery, as well as bribery across both private and public sectors. In addition, an organization that "fails to prevent bribery" by anyone associated with the organization can be charged under the U.K. Bribery Act unless the organization can establish the defense of having implemented "adequate procedures" to prevent bribery. Improper payments are also prohibited under the Canadian Corruption of Foreign Public Officials Act and the Brazilian Clean Companies Act. Practices in the local business community of many countries outside the United States have a level of government corruption that is greater than that found in the developed world. Our policies mandate compliance with these anti-bribery laws, and we have established policies and procedures designed to monitor compliance with these anti-bribery law requirements; however, we cannot ensure that our policies and procedures will protect us from potential reckless or criminal acts committed by individual employees or agents. If we are found to be liable for anti-bribery law violations, we could suffer from criminal or civil penalties or other sanctions that could have a material adverse effect on our business.

We could be adversely impacted if we fail to comply with domestic and international export laws.

To the extent we export technical services, data and products outside of the United States, we are subject to U.S. and international laws and regulations governing international trade and exports, including but not limited to the International Traffic in Arms Regulations ("ITAR"), the Export Administration Regulations, and trade sanctions against embargoed countries. A failure to comply with these laws and regulations could result in civil or criminal sanctions, including the imposition of fines, the denial of export privileges, and suspension or debarment from participation in U.S. government contracts, which could have a material adverse effect on our business.

If we fail to complete a project in a timely manner, miss a required performance standard, or otherwise fail to adequately perform on a project, then we may incur a loss on that project, which may reduce or eliminate our overall profitability.

Our engagements often involve large-scale, complex projects. The quality of our performance on such projects depends in large part upon our ability to manage the relationship with our clients and our ability to effectively manage the project and deploy appropriate resources, including third-party contractors and our own personnel, in a timely manner. We may commit to a client that we will complete a project by a scheduled date. We may also commit that a project, when completed, will achieve specified performance standards. If the project is not completed by the scheduled date or fails to meet required performance standards, we may either incur significant additional costs or be held responsible for the costs incurred by the client to rectify damages due to late completion or failure to achieve the required performance standards. The uncertainty of the timing of a project can present difficulties in planning the amount of personnel needed for the project. If the project is delayed or canceled, we may bear the cost of an underutilized workforce that was dedicated to fulfilling the project. In addition, performance of projects can be affected by a number of factors beyond our control, including unavoidable delays from government inaction, public opposition, inability to obtain financing, weather conditions, unavailability of vendor

Table of Contents

materials, changes in the project scope of services requested by our clients, industrial accidents, environmental hazards, and labor disruptions. To the extent these events occur, the total costs of the project could exceed our estimates, and we could experience reduced profits or, in some cases, incur a loss on a project, which may reduce or eliminate our overall profitability. Further, any defects or errors, or failures to meet our clients' expectations, could result in claims for damages against us. Failure to meet performance standards or complete performance on a timely basis could also adversely affect our reputation.

The loss of key personnel or our inability to attract and retain qualified personnel could impair our ability to provide services to our clients and otherwise conduct our business effectively.

As primarily a professional and technical services company, we are labor-intensive and, therefore, our ability to attract, retain, and expand our senior management and our professional and technical staff is an important factor in determining our future success. The market for qualified scientists and engineers is competitive and, from time to time, it may be difficult to attract and retain qualified individuals with the required expertise within the timeframe demanded by our clients. For example, some of our U.S. government contracts may require us to employ only individuals who have particular government security clearance levels. In addition, we rely heavily upon the expertise and leadership of our senior management. If we are unable to retain executives and other key personnel, the roles and responsibilities of those employees will need to be filled, which may require that we devote time and resources to identify, hire, and integrate new employees. With limited exceptions, we do not have employment agreements with any of our key personnel. The loss of the services of any of these key personnel could adversely affect our business. Although we have obtained non-compete agreements from certain principals and stockholders of companies we have acquired, we generally do not have non-compete or employment agreements with key employees who were once equity holders of these companies. Further, many of our non-compete agreements have expired. We do not maintain key-man life insurance policies on any of our executive officers or senior managers. Our failure to attract and retain key individuals could impair our ability to provide services to our clients and conduct our business effectively.

Our actual business and financial results could differ from the estimates and assumptions that we use to prepare our financial statements, which may significantly reduce or eliminate our profits.

To prepare financial statements in conformity with generally accepted accounting principles in the United States of America ("GAAP"), management is required to make estimates and assumptions as of the date of the financial statements. These estimates and assumptions affect the reported values of assets, liabilities, revenue and expenses, as well as disclosures of contingent assets and liabilities. For example, we typically recognize revenue over the life of a contract based on the proportion of costs incurred to date compared to the total costs estimated to be incurred for the entire project. Areas requiring significant estimates by our management include:

the application of the percentage-of-completion method of accounting and revenue recognition on contracts, change orders, and contract claims, including related unbilled accounts receivable;

unbilled accounts receivable, including amounts related to requests for equitable adjustment to contracts that provide for price redetermination, primarily with the U.S. federal government. These amounts are recorded only when they can be reliably estimated and realization is probable;

provisions for uncollectible receivables, client claims, and recoveries of costs from subcontractors, vendors, and others;

Table of Contents

provisions for income taxes, research and experimentation ("R&E") tax credits, valuation allowances, and unrecognized tax benefits;

value of goodwill and recoverability of other intangible assets;

valuations of assets acquired and liabilities assumed in connection with business combinations;

valuation of contingent earn-out liabilities recorded in connection with business combinations;

valuation of employee benefit plans;

valuation of stock-based compensation expense; and

accruals for estimated liabilities, including litigation and insurance reserves.

Our actual business and financial results could differ from those estimates, which may significantly reduce or eliminate our profits.

Our profitability could suffer if we are not able to maintain adequate utilization of our workforce.

The cost of providing our services, including the extent to which we utilize our workforce, affects our profitability. The rate at which we utilize our workforce is affected by a number of factors, including:

our ability to transition employees from completed projects to new assignments and to hire and assimilate new employees;

our ability to forecast demand for our services and thereby maintain an appropriate headcount in each of our geographies and workforces;

our ability to manage attrition;

our need to devote time and resources to training, business development, professional development, and other non-chargeable activities; and

our ability to match the skill sets of our employees to the needs of the marketplace.

If we over-utilize our workforce, our employees may become disengaged, which could impact employee attrition. If we under-utilize our workforce, our profit margin and profitability could suffer.

Our use of the percentage-of-completion method of revenue recognition could result in a reduction or reversal of previously recorded revenue and profits.

We account for most of our contracts on the percentage-of-completion method of revenue recognition. Generally, our use of this method results in recognition of revenue and profit ratably over the life of the contract, based on the proportion of costs incurred to date to total costs expected to be incurred for the entire project. The effects of revisions to revenue and estimated costs, including the achievement of award fees and the impact of change orders and claims, are recorded when the amounts are known and can be reasonably estimated. Such revisions

could occur in any period and their effects could be material. Although we have historically made reasonably reliable estimates of the progress towards completion of long-term contracts, the uncertainties inherent in the estimating process make it possible for actual costs to vary materially from estimates, including reductions or reversals of previously recorded revenue and profit.

Table of Contents

If we are unable to accurately estimate and control our contract costs, then we may incur losses on our contracts, which could decrease our operating margins and reduce our profits. In particular, our fixed-price contracts could increase the unpredictability of our earnings.

It is important for us to accurately estimate and control our contract costs so that we can maintain positive operating margins and profitability. We generally enter into three principal types of contracts with our clients: fixed-price, time-and-materials and cost-plus.

The U.S. federal government and some clients have increased the use of fixed-priced contracts. Under fixed-price contracts, we receive a fixed price irrespective of the actual costs we incur and, consequently, we are exposed to a number of risks. We realize a profit on fixed-price contracts only if we can control our costs and prevent cost over runs on our contracts. Fixed-price contracts require cost and scheduling estimates that are based on a number of assumptions, including those about future economic conditions, costs, and availability of labor, equipment and materials, and other exigencies. We could experience cost over-runs if these estimates are originally inaccurate as a result of errors or ambiguities in the contract specifications, or become inaccurate as a result of a change in circumstances following the submission of the estimate due to, among other things, unanticipated technical problems, difficulties in obtaining permits or approvals, changes in local laws or labor conditions, weather delays, changes in the costs of raw materials, or the inability of our vendors or subcontractors to perform. If cost overruns occur, we could experience reduced profits or, in some cases, a loss for that project. If a project is significant, or if there are one or more common issues that impact multiple projects, costs overruns could increase the unpredictability of our earnings, as well as have a material adverse impact on our business and earnings.

Under our time-and-materials contracts, we are paid for labor at negotiated hourly billing rates and also paid for other expenses. Profitability on these contracts is driven by billable headcount and cost control. Many of our time-and-materials contracts are subject to maximum contract values and, accordingly, revenue relating to these contracts is recognized as if these contracts were fixed-price contracts. Under our cost-plus contracts, some of which are subject to contract ceiling amounts, we are reimbursed for allowable costs and fees, which may be fixed or performance-based. If our costs exceed the contract ceiling or are not allowable under the provisions of the contract or any applicable regulations, we may not be able to obtain reimbursement for all of the costs we incur.

Profitability on our contracts is driven by billable headcount and our ability to manage our subcontractors, vendors, and material suppliers. If we are unable to accurately estimate and manage our costs, we may incur losses on our contracts, which could decrease our operating margins and significantly reduce or eliminate our profits. Certain of our contracts require us to satisfy specific design, engineering, procurement, or construction milestones in order to receive payment for the work completed or equipment or supplies procured prior to achievement of the applicable milestone. As a result, under these types of arrangements, we may incur significant costs or perform significant amounts of services prior to receipt of payment. If a client determines not to proceed with the completion of the project or if the client defaults on its payment obligations, we may face difficulties in collecting payment of amounts due to us for the costs previously incurred or for the amounts previously expended to purchase equipment or supplies.

Accounting for a contract requires judgments relative to assessing the contract's estimated risks, revenue, costs, and other technical issues. Due to the size and nature of many of our contracts, the estimation of overall risk, revenue, and cost at completion is complicated and subject to many variables. Changes in underlying assumptions, circumstances, or estimates may also adversely affect future period financial performance. If we are unable to accurately estimate the overall revenue or costs on a contract, then we may experience a lower profit or incur a loss on the contract.

Table of Contents

Our failure to adequately recover on claims brought by us against clients for additional contract costs could have a negative impact on our liquidity and profitability.

We have brought claims against clients for additional costs exceeding the contract price or for amounts not included in the original contract price. These types of claims occur due to matters such as client-caused delays or changes from the initial project scope, both of which may result in additional cost. Often, these claims can be the subject of lengthy arbitration or litigation proceedings, and it is difficult to accurately predict when these claims will be fully resolved. When these types of events occur and unresolved claims are pending, we have used working capital in projects to cover cost overruns pending the resolution of the relevant claims. A failure to promptly recover on these types of claims could have a negative impact on our liquidity and profitability.

Our failure to win new contracts and renew existing contracts with private and public sector clients could adversely affect our profitability.

Our business depends on our ability to win new contracts and renew existing contracts with private and public sector clients. Contract proposals and negotiations are complex and frequently involve a lengthy bidding and selection process, which is affected by a number of factors. These factors include market conditions, financing arrangements, and required governmental approvals. For example, a client may require us to provide a bond or letter of credit to protect the client should we fail to perform under the terms of the contract. If negative market conditions arise, or if we fail to secure adequate financial arrangements or the required government approval, we may not be able to pursue particular projects, which could adversely affect our profitability.

We have made and expect to continue to make acquisitions that could disrupt our operations and adversely impact our business and operating results. Our failure to conduct due diligence effectively, or our inability to successfully integrate acquisitions, could impede us from realizing all of the benefits of the acquisitions, which could weaken our results of operations.

A key part of our growth strategy is to acquire other companies that complement our lines of business or that broaden our technical capabilities and geographic presence. We expect to continue to acquire companies as an element of our growth strategy; however, our ability to make acquisitions is restricted under our amended credit agreement. Acquisitions involve certain known and unknown risks that could cause our actual growth or operating results to differ from our expectations or the expectations of securities analysts. For example:

we may not be able to identify suitable acquisition candidates or to acquire additional companies on acceptable terms;

we are pursuing international acquisitions, which inherently pose more risk than domestic acquisitions;

we compete with others to acquire companies, which may result in decreased availability of, or increased price for, suitable acquisition candidates;

we may not be able to obtain the necessary financing, on favorable terms or at all, to finance any of our potential acquisitions;

we may ultimately fail to consummate an acquisition even if we announce that we plan to acquire a company; and

Table of Contents

acquired companies may not perform as we expect, and we may fail to realize anticipated revenue and profits.

In addition, our acquisition strategy may divert management's attention away from our existing businesses, resulting in the loss of key clients or key employees, and expose us to unanticipated problems or legal liabilities, including responsibility as a successor-in-interest for undisclosed or contingent liabilities of acquired businesses or assets.

If we fail to conduct due diligence on our potential targets effectively, we may, for example, not identify problems at target companies, or fail to recognize incompatibilities or other obstacles to successful integration. Our inability to successfully integrate future acquisitions could impede us from realizing all of the benefits of those acquisitions and could severely weaken our business operations. The integration process may disrupt our business and, if implemented ineffectively, may preclude realization of the full benefits expected by us and could harm our results of operations. In addition, the overall integration of the combining companies may result in unanticipated problems, expenses, liabilities, and competitive responses, and may cause our stock price to decline. The difficulties of integrating an acquisition include, among others:

issues in integrating information, communications, and other systems;

incompatibility of logistics, marketing, and administration methods;

maintaining employee morale and retaining key employees;

integrating the business cultures of both companies;

preserving important strategic client relationships;

consolidating corporate and administrative infrastructures, and eliminating duplicative operations; and

coordinating and integrating geographically separate organizations.

In addition, even if the operations of an acquisition are integrated successfully, we may not realize the full benefits of the acquisition, including the synergies, cost savings or growth opportunities that we expect. These benefits may not be achieved within the anticipated time frame, or at all.

Further, acquisitions may cause us to:

issue common stock that would dilute our current stockholders' ownership percentage;

use a substantial portion of our cash resources;

increase our interest expense, leverage, and debt service requirements (if we incur additional debt to pay for an acquisition);

assume liabilities, including environmental liabilities, for which we do not have indemnification from the former owners. Further, indemnification obligations may be subject to dispute or concerns regarding the creditworthiness of the former owners;

Edgar Filing: TETRA TECH INC - Form 10-K

record goodwill and non-amortizable intangible assets that are subject to impairment testing and potential impairment charges;

Table of Contents

experience volatility in earnings due to changes in contingent consideration related to acquisition earn-out liability estimates;

incur amortization expenses related to certain intangible assets;

lose existing or potential contracts as a result of conflict of interest issues;

incur large and immediate write-offs; or

become subject to litigation.

Finally, acquired companies that derive a significant portion of their revenue from the U.S. federal government and do not follow the same cost accounting policies and billing practices that we follow may be subject to larger cost disallowances for greater periods than we typically encounter. If we fail to determine the existence of unallowable costs and do not establish appropriate reserves in advance of an acquisition, we may be exposed to material unanticipated liabilities, which could have a material adverse effect on our business.

If our goodwill or other intangible assets become impaired, then our profits may be significantly reduced.

Because we have historically acquired a significant number of companies, goodwill and other intangible assets represent a substantial portion of our assets. At September 28, 2014, our goodwill was \$714.2 million and other intangible assets were \$63.1 million. We are required to perform a goodwill impairment test for potential impairment at least on an annual basis. We also assess the recoverability of the unamortized balance of our intangible assets when indications of impairment are present based on expected future profitability and undiscounted expected cash flows and their contribution to our overall operations. The goodwill impairment test requires us to determine the fair value of our reporting units, which are the components one level below our reportable segments. In determining fair value, we make significant judgments and estimates, including assumptions about our strategic plans with regard to our operations. We also analyze current economic indicators and market valuations to help determine fair value. To the extent economic conditions that would impact the future operations of our reporting units change, our goodwill may be deemed to be impaired, and we would be required to record a non-cash charge that could result in a material adverse effect on our financial position or results of operations.

In the third quarter of fiscal 2013, we performed an interim goodwill impairment test and recorded a \$56.6 million, or \$48.1 million, net of tax, goodwill impairment charge.

If we are not able to successfully manage our growth strategy, our business and results of operations may be adversely affected.

Our expected future growth presents numerous managerial, administrative, operational, and other challenges. Our ability to manage the growth of our operations will require us to continue to improve our management information systems and our other internal systems and controls. In addition, our growth will increase our need to attract, develop, motivate, and retain both our management and professional employees. The inability to effectively manage our growth or the inability of our employees to achieve anticipated performance could have a material adverse effect on our business.

Our backlog is subject to cancellation, unexpected adjustments and economic conditions, and is an uncertain indicator of future operating results.

Our backlog at September 28, 2014, was \$2.0 billion, an increase of \$97.6 million, or 5.1%, compared to the end of fiscal 2013. We include in backlog only those contracts for which funding has been

Table of Contents

provided and work authorizations have been received. We cannot guarantee that the revenue projected in our backlog will be realized or, if realized, will result in profits. In addition, project cancellations or scope adjustments may occur, from time to time, with respect to contracts reflected in our backlog. For example, certain of our contracts with the U.S. federal government and other clients are terminable at the discretion of the client, with or without cause. These types of backlog reductions could adversely affect our revenue and margins. As a result of these factors, our backlog as of any particular date is an uncertain indicator of our future earnings.

If our business partners fail to perform their contractual obligations on a project, we could be exposed to legal liability, loss of reputation and profit reduction or loss on the project.

We routinely enter into subcontracts and, occasionally, joint ventures, teaming arrangements, and other contractual arrangements so that we can jointly bid and perform on a particular project. Success under these arrangements depends in large part on whether our business partners fulfill their contractual obligations satisfactorily. In addition, when we operate through a joint venture in which we are a minority holder, we have limited control over many project decisions, including decisions related to the joint venture's internal controls, which may not be subject to the same internal control procedures that we employ. If these unaffiliated third parties do not fulfill their contract obligations, the partnerships or joint ventures may be unable to adequately perform and deliver their contracted services. Under these circumstances, we may be obligated to pay financial penalties, provide additional services to ensure the adequate performance and delivery of the contracted services, and may be jointly and severally liable for the other's actions or contract performance. These additional obligations could result in reduced profits and revenues or, in some cases, significant losses for us with respect to the joint venture, which could also affect our reputation in the industries we serve.

If our contractors and subcontractors fail to satisfy their obligations to us or other parties, or if we are unable to maintain these relationships, our revenue, profitability, and growth prospects could be adversely affected.

We depend on contractors and subcontractors in conducting our business. There is a risk that we may have disputes with our subcontractors arising from, among other things, the quality and timeliness of work performed by the subcontractor, client concerns about the subcontractor, or our failure to extend existing task orders or issue new task orders under a subcontract. In addition, if a subcontractor fails to deliver on a timely basis the agreed-upon supplies, fails to perform the agreed-upon services, or goes out of business, then we may be required to purchase the services or supplies from another source at a higher price, and our ability to fulfill our obligations as a prime contractor may be jeopardized. This may reduce the profit to be realized or result in a loss on a project for which the services or supplies are needed.

We also rely on relationships with other contractors when we act as their subcontractor or joint venture partner. The absence of qualified subcontractors with which we have a satisfactory relationship could adversely affect the quality of our service and our ability to perform under some of our contracts. Our future revenue and growth prospects could be adversely affected if other contractors eliminate or reduce their subcontracts or teaming arrangement relationships with us, or if a government agency terminates or reduces these other contractors' programs, does not award them new contracts, or refuses to pay under a contract.

We may be required to pay liquidated damages if we fail to meet milestone requirements in our contracts.

We may be required to pay liquidated damages if we fail to meet milestone requirements in our contracts. Failure to meet any of the milestone requirements could result in additional costs, and the amount of such additional costs could exceed the projected profits on the project. These additional costs

Table of Contents

include liquidated damages paid under contractual penalty provisions, which can be substantial and can accrue on a regular basis.

Changes in resource management, environmental, or infrastructure industry laws, regulations, and programs could directly or indirectly reduce the demand for our services, which could in turn negatively impact our revenue.

Some of our services are directly or indirectly impacted by changes in U.S. federal, state, local or foreign laws and regulations pertaining to the resource management, environmental, and infrastructure industries. Accordingly, a relaxation or repeal of these laws and regulations, or changes in governmental policies regarding the funding, implementation or enforcement of these programs, could result in a decline in demand for our services, which could in turn negatively impact our revenue.

Changes in capital markets could adversely affect our access to capital and negatively impact our business.

Our results could be adversely affected by an inability to access the revolving credit facility under our amended credit agreement. Unfavorable financial or economic conditions could impact certain lenders' willingness or ability to fund our revolving credit facility. In addition, increases in interest rates or credit spreads, volatility in financial markets or the interest rate environment, significant political or economic events, defaults of significant issuers, and other market and economic factors, may negatively impact the general level of debt issuance, the debt issuance plans of certain categories of borrowers, the types of credit-sensitive products being offered, and/or a sustained period of market decline or weakness could have a material adverse effect on us.

Restrictive covenants in our credit agreement may restrict our ability to pursue certain business strategies.

Our amended credit agreement limits or restricts our ability to, among other things:

incur additional indebtedness;

create liens securing debt or other encumbrances on our assets;

make loans or advances;

pay dividends or make distributions to our stockholders;

purchase or redeem our stock;

repay indebtedness that is junior to indebtedness under our credit agreement;

acquire the assets of, or merge or consolidate with, other companies; and

sell, lease, or otherwise dispose of assets.

Our amended credit agreement also requires that we maintain certain financial ratios, which we may not be able to achieve. The covenants may impair our ability to finance future operations or capital needs or to engage in other favorable business activities.

Our industry is highly competitive and we may be unable to compete effectively.

Our industry is highly fragmented and intensely competitive. Our competitors are numerous, ranging from small private firms to multi-billion-dollar public companies. In addition, the technical and

Table of Contents

professional aspects of our services generally do not require large upfront capital expenditures and provide limited barriers against new competitors. Some of our competitors have achieved greater market penetration in some of the markets in which we compete, and some have substantially more financial resources and/or financial flexibility than we do. As a result of the number of competitors in the industry, our clients may select one of our competitors on a project due to competitive pricing or a specific skill set. This competitive environment could force us to make price concessions or otherwise reduce prices for our services. If we are unable to maintain our competitiveness, our market share, revenue, and profits will decline.

Legal proceedings, investigations, and disputes could result in substantial monetary penalties and damages, especially if such penalties and damages exceed or are excluded from existing insurance coverage.

We engage in consulting, engineering, program management, construction management, construction, and technical services that can result in substantial injury or damages that may expose us to legal proceedings, investigations, and disputes. For example, in the ordinary course of our business, we may be involved in legal disputes regarding personal injury claims, employee or labor disputes, professional liability claims, and general commercial disputes involving project cost overruns and liquidated damages, as well as other claims. In addition, in the ordinary course of our business, we frequently make professional judgments and recommendations about environmental and engineering conditions of project sites for our clients, and we may be deemed to be responsible for these judgments and recommendations if they are later determined to be inaccurate. Any unfavorable legal ruling against us could result in substantial monetary damages or even criminal violations. We maintain insurance coverage as part of our overall legal and risk management strategy to minimize our potential liabilities; however, insurance coverage contains exclusions and other limitations that may not cover our potential liabilities. Generally, our insurance program covers workers' compensation and employer's liability, general liability, automobile liability, professional errors and omissions liability, property, and contractor's pollution liability (in addition to other policies for specific projects). Our insurance program includes deductibles or self-insured retentions for each covered claim that may increase over time. In addition, our insurance policies contain exclusions that insurance providers may use to deny or restrict coverage. Excess liability and professional liability insurance policies provide for coverage on a "claims-made" basis, covering only claims actually made and reported during the policy period currently in effect. If we sustain liabilities that exceed or that are excluded from our insurance coverage, or for which we are not insured, it could have a material adverse impact on our results of operations and financial condition (see Note 18, "Commitments and Contingencies" of the "Notes to Consolidated Financial Statements" in Item 8 for more information).

Unavailability or cancellation of third-party insurance coverage would increase our overall risk exposure as well as disrupt the management of our business operations.

We maintain insurance coverage from third-party insurers as part of our overall risk management strategy and because some of our contracts require us to maintain specific insurance coverage limits. If any of our third-party insurers fail, suddenly cancel our coverage, or otherwise are unable to provide us with adequate insurance coverage, then our overall risk exposure and our operational expenses would increase and the management of our business operations would be disrupted. In addition, there can be no assurance that any of our existing insurance coverage will be renewable upon the expiration of the coverage period or that future coverage will be affordable at the required limits.

Our inability to obtain adequate bonding could have a material adverse effect on our future revenue and business prospects.

Certain clients require bid bonds, and performance and payment bonds. These bonds indemnify the client should we fail to perform our obligations under a contract. If a bond is required for a particular project and we are unable to obtain an appropriate bond, we cannot pursue that project. In some instances,

Table of Contents

we are required to co-venture with a small or disadvantaged business to pursue certain U.S. federal or state government contracts. In connection with these ventures, we are sometimes required to utilize our bonding capacity to cover all of the payment and performance obligations under the contract with the client. We have a bonding facility but, as is typically the case, the issuance of bonds under that facility is at the surety's sole discretion. Moreover, due to events that can negatively affect the insurance and bonding markets, bonding may be more difficult to obtain or may only be available at significant additional cost. There can be no assurance that bonds will continue to be available to us on reasonable terms. Our inability to obtain adequate bonding and, as a result, to bid on new work could have a material adverse effect on our future revenue and business prospects.

Employee, agent, or partner misconduct, or our failure to comply with anti-bribery and other laws or regulations, could harm our reputation, reduce our revenue and profits, and subject us to criminal and civil enforcement actions.

Misconduct, fraud, non-compliance with applicable laws and regulations, or other improper activities by one of our employees, agents, or partners could have a significant negative impact on our business and reputation. Such misconduct could include the failure to comply with government procurement regulations, regulations regarding the protection of classified information, regulations prohibiting bribery and other foreign corrupt practices, regulations regarding the pricing of labor and other costs in government contracts, regulations on lobbying or similar activities, regulations pertaining to the internal controls over financial reporting, environmental laws, and any other applicable laws or regulations. For example, as previously noted, the FCPA and similar anti-bribery laws in other jurisdictions generally prohibit companies and their intermediaries from making improper payments to non-U.S. officials for the purpose of obtaining or retaining business. Our policies mandate compliance with these regulations and laws, and we take precautions to prevent and detect misconduct. However, since our internal controls are subject to inherent limitations, including human error, it is possible that these controls could be intentionally circumvented or become inadequate because of changed conditions. As a result, we cannot assure that our controls will protect us from reckless or criminal acts committed by our employees or agents. Our failure to comply with applicable laws or regulations, or acts of misconduct could subject us to fines and penalties, loss of security clearances, and suspension or debarment from contracting, any or all of which could harm our reputation, reduce our revenue and profits, and subject us to criminal and civil enforcement actions.

Our business activities may require our employees to travel to and work in countries where there are high security risks, which may result in employee death or injury, repatriation costs or other unforeseen costs.

Certain of our contracts may require our employees travel to and work in high-risk countries that are undergoing political, social, and economic upheavals resulting from war, civil unrest, criminal activity, acts of terrorism, or public health crises. For example, we currently have employees working in high security risk countries such as Afghanistan. As a result, we risk loss of or injury to our employees and may be subject to costs related to employee death or injury, repatriation, or other unforeseen circumstances. We may choose or be forced to leave a country with little or no warning due to physical security risks.

Our failure to implement and comply with our safety program could adversely affect our operating results or financial condition.

Our safety program is a fundamental element of our overall approach to risk management, and the implementation of the safety program is a significant issue in our dealings with our clients. We maintain an enterprise-wide group of health and safety professionals to help ensure that the services we provide are delivered safely and in accordance with standard work processes. Unsafe job sites and office environments have the potential to increase employee turnover, increase the cost of a project to our clients, expose us to types and levels of risk that are fundamentally unacceptable, and raise our operating

Table of Contents

costs. The implementation of our safety processes and procedures are monitored by various agencies, including the U.S. Mine Safety and Health Administration, and rating bureaus, and may be evaluated by certain clients in cases in which safety requirements have been established in our contracts. Our failure to meet these requirements or our failure to properly implement and comply with our safety program could result in reduced profitability or the loss of projects or clients, and could have a material adverse effect on our business, operating results, or financial condition.

We may be precluded from providing certain services due to conflict of interest issues.

Many of our clients are concerned about potential or actual conflicts of interest in retaining management consultants. U.S. federal government agencies have formal policies against continuing or awarding contracts that would create actual or potential conflicts of interest with other activities of a contractor. These policies, among other things, may prevent us from bidding for or performing government contracts resulting from or relating to certain work we have performed. In addition, services performed for a commercial or government client may create a conflict of interest that precludes or limits our ability to obtain work from other public or private organizations. We have, on occasion, declined to bid on projects due to conflict of interest issues.

If our reports and opinions are not in compliance with professional standards and other regulations, we could be subject to monetary damages and penalties.

We issue reports and opinions to clients based on our professional engineering expertise, as well as our other professional credentials. Our reports and opinions may need to comply with professional standards, licensing requirements, securities regulations, and other laws and rules governing the performance of professional services in the jurisdiction in which the services are performed. In addition, we could be liable to third parties who use or rely upon our reports or opinions even if we are not contractually bound to those third parties. For example, if we deliver an inaccurate report or one that is not in compliance with the relevant standards, and that report is made available to a third party, we could be subject to third-party liability, resulting in monetary damages and penalties.

We may be subject to liabilities under environmental laws and regulations.

Our services are subject to numerous U.S. and international environmental protection laws and regulations that are complex and stringent. For example, we must comply with a number of U.S. federal government laws that strictly regulate the handling, removal, treatment, transportation, and disposal of toxic and hazardous substances. Under the Comprehensive Environmental Response Compensation and Liability Act of 1980, as amended ("CERCLA"), and comparable state laws, we may be required to investigate and remediate regulated hazardous materials. CERCLA and comparable state laws typically impose strict, joint and several liabilities without regard to whether a company knew of or caused the release of hazardous substances. The liability for the entire cost of clean-up could be imposed upon any responsible party. Other principal U.S. federal environmental, health, and safety laws affecting us include, but are not limited to, the Resource Conservation and Recovery Act, NEPA, the Clean Air Act, the Occupational Safety and Health Act, the Federal Mine Safety and Health Act of 1977 (the "Mine Act"), the Toxic Substances Control Act, and the Superfund Amendments and Reauthorization Act. Our business operations may also be subject to similar state and international laws relating to environmental protection. Further, past business practices at companies that we have acquired may also expose us to future unknown environmental liabilities. Liabilities related to environmental contamination or human exposure to hazardous substances, or a failure to comply with applicable regulations, could result in substantial costs to us, including clean-up costs, fines civil or criminal sanctions, and third-party claims for property damage or personal injury or cessation of remediation activities. Our continuing work in the areas governed by these laws and regulations exposes us to the risk of substantial liability.

Table of Contents

Force majeure events, including natural disasters and terrorist actions, could negatively impact the economies in which we operate or disrupt our operations, which may affect our financial condition, results of operations, or cash flows.

Force majeure or extraordinary events beyond the control of the contracting parties, such as natural and man-made disasters, as well as terrorist actions, could negatively impact the economies in which we operate by causing the closure of offices, interrupting projects, and forcing the relocation of employees. We typically remain obligated to perform our services after a terrorist action or natural disaster unless the contract contains a force majeure clause that relieves us of our contractual obligations in such an extraordinary event. If we are not able to react quickly to force majeure, our operations may be affected significantly, which would have a negative impact on our financial condition, results of operations, or cash flows.

We have only a limited ability to protect our intellectual property rights, and our failure to protect our intellectual property rights could adversely affect our competitive position.

Our success depends, in part, upon our ability to protect our proprietary information and other intellectual property. We rely principally on trade secrets to protect much of our intellectual property where we do not believe that patent or copyright protection is appropriate or obtainable. However, trade secrets are difficult to protect. Although our employees are subject to confidentiality obligations, this protection may be inadequate to deter or prevent misappropriation of our confidential information. In addition, we may be unable to detect unauthorized use of our intellectual property or otherwise take appropriate steps to enforce our rights. Failure to obtain or maintain trade secret protection could adversely affect our competitive business position. In addition, if we are unable to prevent third parties from infringing or misappropriating our trademarks or other proprietary information, our competitive position could be adversely affected.

Systems and information technology interruption could adversely impact our ability to operate.

We rely heavily on computer, information, and communications technology and systems to operate. From time to time, we experience system interruptions and delays. If we are unable to effectively deploy software and hardware, upgrade our systems and network infrastructure, and take steps to improve and protect our systems, systems operations could be interrupted or delayed.

Our computer and communications systems and operations could be damaged or interrupted by natural disasters, telecommunications failures, acts of war or terrorism, and similar events or disruptions. In addition, we face the threat of unauthorized system access, computer hackers, computer viruses, malicious code, organized cyber-attacks, and other security breaches and system disruptions. We devote significant resources to the security of our computer systems, but they may still be vulnerable to threats. Anyone who circumvents security measures could misappropriate proprietary information or cause interruptions or malfunctions in system operations. As a result, we may be required to expend significant resources to protect against the threat of system disruptions and security breaches, or to alleviate problems caused by disruptions and breaches.

Any of these or other events could cause system interruption, delays, and loss of critical data that could delay or prevent operations, and could have a material adverse effect on our business, financial condition, results of operations, and cash flows, and could negatively impact our clients.

Table of Contents

Delaware law and our charter documents may impede or discourage a merger, takeover, or other business combination even if the business combination would have been in the best interests of our stockholders.

We are a Delaware corporation and the anti-takeover provisions of Delaware law impose various impediments to the ability of a third party to acquire control of us, even if a change in control would be beneficial to our stockholders. In addition, our Board of Directors has the power, without stockholder approval, to designate the terms of one or more series of preferred stock and issue shares of preferred stock, which could be used defensively if a takeover is threatened. Our incorporation under Delaware law, the ability of our Board of Directors to create and issue a new series of preferred stock, and provisions in our certificate of incorporation and bylaws, such as those relating to advance notice of certain stockholder proposals and nominations, could impede a merger, takeover, or other business combination involving us, or discourage a potential acquirer from making a tender offer for our common stock, even if the business combination would have been in the best interests of our current stockholders.

Our stock price could become more volatile and stockholders' investments could lose value.

In addition to the macroeconomic factors that have affected the prices of many securities generally, all of the factors discussed in this section could affect our stock price. Our common stock has previously experienced substantial price volatility. In addition, the stock market has experienced extreme price and volume fluctuations that have affected the market price of many companies, and that have often been unrelated to the operating performance of these companies. The overall market and the price of our common stock may fluctuate greatly. The trading price of our common stock may be significantly affected by various factors, including:

quarter-to-quarter variations in our financial results, including revenue, profits, days sales outstanding, backlog, and other measures of financial performance or financial condition;

our announcements or our competitors' announcements of significant events, including acquisitions;

our announcements concerning the payment of dividends or the repurchase of our shares;

resolution of threatened or pending litigation;

changes in investors' and analysts' perceptions of our business or any of our competitors' businesses;

investors' and analysts' assessments of reports prepared or conclusions reached by third parties;

changes in environmental legislation;

investors' perceptions of our performance of services in countries in which the U.S. military is engaged;

broader market fluctuations; and

general economic or political conditions.

Volatility in the financial markets could cause a decline in our stock price, which could trigger an impairment of the goodwill of individual reporting units that could be material to our consolidated financial statements. A significant drop in the price of our stock could also expose us to the risk of securities class action lawsuits, which could result in substantial costs and divert management's attention

Table of Contents

and resources, which could adversely affect our business. Additionally, volatility or a lack of positive performance in our stock price may adversely affect our ability to retain key employees, many of whom are awarded equity securities, the value of which is dependent on the performance of our stock price.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

At fiscal 2014 year-end, we owned three facilities located in the United States and leased approximately 330 operating facilities in domestic and foreign locations. Our significant lease agreements expire at various dates through 2024. We also have some month-to-month leases. We believe that our current facilities are adequate for the operation of our business, and that suitable additional space in various local markets is available to accommodate any needs that may arise.

The following table summarizes our ten most significant leased properties by location based on annual rental expenses:

| Location | Description | Reportable Segment |
|----------------------|------------------------|---------------------------|
| Pasadena, CA | Corporate Headquarters | Corporate |
| Arlington, VA | Office Building | ECS |
| Calgary, AB, Canada | Office Building | ECS |
| Edmonton, AB, Canada | Office Building | ECS |
| Fairfax, VA | Office Building | ECS |
| Montreal, QC, Canada | Office Building | ECS |
| Morris Plains, NJ | Office Building | TSS / RCM |
| New York, NY | Office Building | TSS |
| Pittsburgh, PA | Office Building | TSS |
| Richmond, BC, Canada | Office Building | ECS |

Item 3. Legal Proceedings

For a description of our material pending legal and regulatory proceedings and settlements, see Note 18, "Commitments and Contingencies" of the "Notes to Consolidated Financial Statements" included in Item 8.

Item 4. Mine Safety Disclosures

Section 1503 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") requires domestic mine operators to disclose violations and orders issued under the Mine Act by the U.S. Mine Safety and Health Administration. We do not act as the owner of any mines, but we may act as a mining operator as defined under the Mine Act where we may be an independent contractor performing services or construction at such mine. Information concerning mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Act and Item 104 Regulations S-K is included in Exhibit 95.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities***Market Information*

Our common stock is traded on the NASDAQ Global Select Market under the symbol TTEK. There were 1,608 stockholders of record at November 10, 2014. The high and low sales prices per share for the common stock for the last two fiscal years, as reported by the NASDAQ Global Select Market, are set forth in the following tables.

| | Prices | |
|--------------------|----------|----------|
| | High | Low |
| Fiscal 2014 | | |
| First quarter | \$ 30.00 | \$ 23.85 |
| Second quarter | 30.92 | 27.37 |
| Third quarter | 29.99 | 25.23 |
| Fourth quarter | 28.27 | 22.96 |

| | | |
|--------------------|----------|----------|
| Fiscal 2013 | | |
| First quarter | \$ 27.10 | \$ 23.79 |
| Second quarter | 31.49 | 26.00 |
| Third quarter | 30.55 | 22.56 |
| Fourth quarter | 26.03 | 22.21 |

Dividends

During fiscal 2014, we declared and paid dividends for the third and fourth quarters totaling \$0.14 per share (\$0.07 each quarter) of our common stock. We did not pay any dividends prior to fiscal 2014. We currently intend to continue paying dividends on a quarterly basis, although the declaration of any future dividends will be determined by our Board of Directors and will depend on available cash, estimated cash needs, earnings, and capital requirements, as well as limitations in our long-term debt agreements. On November 10, 2014, the Board of Directors declared a quarterly cash dividend of \$0.07 per share payable on December 15, 2014 to stockholders of record as of the close of business on November 26, 2014.

Stock-Based Compensation

For information regarding our stock-based compensation, see Note 11, "Stockholders' Equity and Stock Compensation Plans" of the "Notes to Consolidated Financial Statements" included in Item 8.

Table of Contents**Performance Graph**

The following graph shows a comparison of our cumulative total returns with those of the NASDAQ Market Index and our self-constructed Peer Group Index (as defined below). The graph assumes that the value of an investment in our common stock and in each such index was \$100 on September 28, 2009, and that all dividends have been reinvested. During fiscal 2014, we declared and paid dividends for the third and fourth quarters totaling \$0.14 per share (\$0.07 each quarter) of our common stock. We did not pay any dividends prior to fiscal 2014. Our self-constructed Peer Group Index includes the following companies: AECOM Technology Corporation; Foster Wheeler AG; Jacobs Engineering Group; URS Corporation; and Willbros Group, Inc. We removed Michael Baker Corporation from the Peer Group Index to reflect the acquisition of this company during our fiscal 2014. The comparison in the graph below is based on historical data and is not intended to forecast the possible future performance of our common stock.

COMPARISON OF CUMULATIVE TOTAL RETURN

| | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 |
|----------------------------|-------------|-------------|-------------|-------------|-------------|-------------|
| Tetra Tech, Inc. | 100.00 | 82.36 | 72.83 | 102.06 | 100.97 | 98.48 |
| NASDAQ Market Index | 100.00 | 114.41 | 117.69 | 153.63 | 189.10 | 228.38 |
| Peer Group Index | 100.00 | 85.55 | 65.36 | 81.78 | 114.92 | 116.56 |

The performance graph above and related text are being furnished solely to accompany this annual report on Form 10-K pursuant to Item 201(e) of Regulation S-K, and are not being filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, and are not to be incorporated

Table of Contents

by reference into any of our filings with the SEC, whether made before or after the date hereof, regardless of any general incorporation language in such filing.

Stock Repurchase Program

In June 2013, our Board of Directors authorized our Stock Repurchase Program under which we could repurchase up to \$100 million of our common stock (the "Repurchase Program"). In February 2014, the Board amended the Repurchase Program to authorize the repurchase of up to \$30 million of the Repurchase Program in open market purchases through September 2014, revised the pricing parameters and extended the program through fiscal 2014. Stock repurchases could be made on the open market or in privately negotiated transactions with third parties. From the inception of the Repurchase Program through September 28, 2014, we repurchased through open market purchases a total 3.9 million shares at an average price of \$25.59 per share, for a total cost of \$100 million. On November 10, 2014, the Board authorized a new stock repurchase program under which we could repurchase up to \$200 million of our common stock over the next two years.

A summary of the repurchase activity for the twelve months ended September 28, 2014 is as follows:

| Period | Total Number of Shares Purchased ⁽¹⁾ | Average Price Paid per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs | Maximum Dollar Value that May Yet be Purchased Under the Plans or Programs |
|---------------------------------------|---|------------------------------|--|--|
| September 30, 2013 – October 27, 2013 | | \$ | | \$ 80,000,000 |
| October 28, 2013 – November 24, 2013 | | | | 80,000,000 |
| November 25, 2013 – December 29, 2013 | | | | 80,000,000 |
| December 30, 2013 – January 26, 2014 | | | | 80,000,000 |
| January 27, 2014 – February 23, 2014 | 70,700 | 28.57 | 70,700 | 77,980,119 |
| February 24, 2014 – March 30, 2014 | 155,300 | 29.57 | 155,300 | 73,388,335 |
| March 31, 2014 – April 27, 2014 | 120,600 | 28.95 | 120,600 | 69,897,187 |
| April 28, 2014 – May 25, 2014 | 427,190 | 26.25 | 427,190 | 58,684,703 |
| May 26, 2014 – June 29, 2014 | 199,661 | 26.66 | 199,661 | 53,361,801 |
| June 30, 2014 – July 27, 2014 | 127,400 | 27.38 | 127,400 | 49,873,323 |
| July 28, 2014 – August 24, 2014 | 826,800 | 25.39 | 826,800 | 28,880,806 |
| August 25, 2014 – September 28, 2014 | 1,124,425 | 25.69 | 1,124,425 | |

(1) We purchased approximately 855,000 additional shares in fiscal 2014 that were previously issued pursuant to awards under our stock-based compensation plans. These plans allow our employees to surrender shares of our common stock as payment toward the exercise price and tax withholding obligations associated with the exercise of stock options or the vesting of restricted stock.

Table of Contents**Item 6. Selected Financial Data**

The following selected financial data was derived from our consolidated financial statements. The selected financial data presented below should be read in conjunction with the information contained in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," and our consolidated financial statements and the notes thereto contained in Item 8, "Financial Statements and Supplementary Data," of this report.

| | Fiscal Year Ended | | | | |
|---|-----------------------|-----------------------|-----------------------|--------------------|--------------------|

| Tetra Tech stockholders' equity | 1,012,079 | 997,763 | 1,018,970 | 854,725 | 748,133 |

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following analysis of our financial condition and results of operations should be read in conjunction with Part I of this report, as well as our consolidated financial statements and accompanying notes in Item 8. The following analysis contains forward-looking statements about our future results of operations and expectations. Our actual results and the timing of events could differ materially from those described herein. See Part I, Item 1A, "Risk Factors" for a discussion of the risks, assumptions, and uncertainties affecting these statements.

OVERVIEW OF RESULTS AND BUSINESS TRENDS

General. In fiscal 2014, our revenue declined 5.0% compared to fiscal 2013. This decline was partially due to foreign exchange rate fluctuations as the U.S. dollar strengthened during fiscal year 2014 against most of the foreign currencies in which we conduct our international business. Excluding the impact of foreign exchange, our revenue decreased 3.4% compared to last year. This revenue decline reflects continued weakness in our U.S. federal government, mining, and Eastern Canada businesses. In addition, our construction activities declined compared to last year due to our decision to exit from select fixed-price construction markets, the wind-down of large state and local transportation projects, and the abnormally severe weather conditions in several areas of the U.S. and Canada that hindered our field activities.

Despite the revenue decline, our operating income increased to \$153.8 million in fiscal 2014 compared to \$20.2 million in fiscal 2013. This year-over-year comparison reflects restructuring, goodwill impairment, and project-related charges in the third quarter of fiscal 2013. To a lesser extent, we also incurred restructuring and project-related charges in the fourth quarter of this year that lowered our fiscal

Table of Contents

2014 operating income. These charges are discussed further under "Results of Operations". In fiscal 2014, we also recorded net gains from updated valuations of our contingent consideration liabilities of \$58.7 million compared to \$9.6 million in fiscal 2013.

Current economic conditions continue to be volatile. Concerns over general economic conditions appear to be restraining some business owners from making the significant investment commitments needed to fund future growth. Strong economic expansion generally benefits our business, and a tepid recovery could adversely impact the demand for our services. It is not possible to predict with certainty whether or when a stronger recovery may occur, or what impact this would have on our business, results of operations, cash flows, or financial condition.

International. Our international business decreased 7.8% in fiscal 2014 compared to last year. Foreign exchange rate fluctuations had a significant adverse impact on our international revenue in fiscal 2014. Excluding the impact of foreign exchange, our international business was down 1.8% compared to last year. We experienced growth in our international oil and gas business in Western Canada, primarily related to our acquisition of Parkland Pipeline Contractors Ltd., Parkland Pipeline Equipment Ltd., Park L Projects Ltd. and Parkland Projects Ltd. (collectively, "Parkland"). This increase was offset by lower results in our Eastern Canada and mining operations, which were strong in the first half of last year and then significantly weakened beginning in the third quarter of fiscal 2013. We anticipate higher international revenue levels in fiscal 2015 as our oil and gas business continues to grow, and our Eastern Canada and mining operations stabilize.

U.S. Commercial. Our U.S. commercial business increased 3.7% in fiscal 2014 compared to fiscal 2013. An increase in solid waste management operations, primarily due to our acquisition of American Environmental Group, Ltd. ("AEG"), contributed to this growth. In addition, we experienced continued growth from services provided for oil and gas clients, which generate higher than average profit margins. The demand for oil and gas services depends largely upon prevailing industry conditions, including prices, and expectations for future prices, of oil and natural gas. Conversely, we experienced a slowdown in commercial wind-related construction project opportunities. We are optimistic regarding increased spending by our energy-focused clients, particularly in oil and gas, as well as by our larger industrial clients. Our U.S. commercial clients typically react rapidly to economic change. Accordingly, if the U.S. economy experiences a slowdown or pickup in fiscal 2015, we would expect our U.S. commercial outlook to change correspondingly.

U.S. Federal Government. Our U.S. federal government business declined 7.6% compared to last year. Overall, this decline resulted from the broad-based slowdown in funding for discretionary U.S. federal government programs. The slowdown was due to the mandatory federal budget reductions, or sequestrations, that were in place in 2013, and the two-week federal government shutdown in October 2013. In addition, during the second quarter of fiscal 2014, many U.S. federal offices in which our employees perform services were closed due to severe weather conditions. Further, we are continuing to implement our strategy to exit select fixed-price construction markets. During periods of economic volatility, our U.S. federal government clients have historically been the most stable and predictable. However, increased Congressional debate on government spending and competing political agendas in the U.S. government, have created uncertainty in the spending behaviors of our clients. In December 2013, the Murray-Ryan Bipartisan Budget Act of 2013 ("2013 Budget Act") was signed into law, raising government discretionary spending limits for fiscal years 2014 and 2015. The direct impact in fiscal 2015 of the 2013 Budget Act on the programs we support is unclear at this point, and we remain cautious regarding the ability to grow our U.S. federal government revenue compared to fiscal 2014.

U.S. State and Local Government. Our U.S. state and local government business decreased 9.6% in fiscal 2014 compared to fiscal 2013. This decline followed a period of rapid growth in our state and local business, which increased 22.7% in fiscal 2013. The unusual growth in this sector last year resulted from

Table of Contents

increased client spending on essential priority programs following a period of economic recession. In addition, we recorded significant revenue from several large transportation projects in fiscal 2013, which are currently winding down. Many state and local government agencies are experiencing improved financial conditions compared to recent years. Simultaneously, states are facing major long-term infrastructure needs, including the need for maintenance, repair, and upgrading of existing critical infrastructure and the need to build new facilities. The funding risks associated with our U.S. state and local government programs are partially mitigated by legal requirements that drive some of these programs, such as regulatory-mandated consent decrees. As a result, some programs, such as those focused on municipal water and solid waste, will progress despite budget pressures as demonstrated by the growth throughout fiscal 2013. We expect our U.S. state and local government business to decrease further in fiscal 2015 as a result of our completion of large transportation projects.

RESULTS OF OPERATIONS**Fiscal 2014 Compared to Fiscal 2013***Consolidated Results of Operations*

| | Fiscal Year Ended | | | |
|--|-------------------------------|-------------------------------|----------------------|----------|
| | September 28, 2014 | September 29, 2013 | Change \$ | % |
| | (\$ in thousands) | | | |
| Revenue | \$ 2,483,814 | \$ 2,613,755 | \$ (129,941) | (5.0)% |

| Net income (loss) attributable to Tetra Tech | \$ 108,266 | \$ (2,141) | \$ 110,407 | 5,156.8 |

(1) We believe that the presentation of "Revenue, net of subcontractor costs", which is a non-GAAP financial measure, enhances investors' ability to analyze our business trends and performance because it substantially measures the work performed by our employees. In the course of providing services, we routinely subcontract various services and, under certain USAID programs, issue grants. Generally, these subcontractor costs and grants are passed through to our clients and, in accordance with GAAP and industry practice, are included in our revenue when it is our contractual responsibility to procure or manage these activities. Because subcontractor services can vary significantly from project to project and period to period, changes in revenue may not necessarily be indicative of our business trends. Accordingly, we segregate subcontractor costs from revenue to promote a better understanding of our business by evaluating revenue exclusive of costs associated with external service providers.

Table of Contents

In fiscal 2014, revenue and revenue, net of subcontractor costs, decreased \$129.9 million and \$164.9 million, respectively, compared to last year. These results include declines due to foreign exchange rate fluctuations as the U.S. dollar strengthened in fiscal 2014 against most of the foreign currencies in which we conduct our international business. These exchange rate variations reduced revenue and revenue, net of subcontractor costs, by \$41.7 million and \$36.9 million, respectively, in fiscal 2014 compared to fiscal 2013. In addition, our year-over-year comparisons reflect project-related charges last year in our TSS and RCM segments that are described under "Fiscal 2013 Project-Related Charges".

These lower year-over-year results include decreases in revenue and revenue, net of subcontractor costs, of \$63.3 million and \$67.6 million, respectively, from U.S. federal government programs in fiscal 2014 compared to last year. The decline in U.S. federal activity reflects a broad-based slowdown caused by budgetary constraints that primarily impacted discretionary programs. The reduction was exacerbated by U.S. federal office closures due to inclement weather in the second quarter of fiscal 2014, and the two-week U.S. federal government shut-down in October 2013.

Our fiscal 2014 results also reflect declines in our international revenue, which was adversely impacted by the reduction in mining work and projects in Eastern Canada. Both businesses had strong results in the first half of fiscal 2013, which then abruptly declined in the third quarter of fiscal 2013. On a combined basis for these operations, revenue and revenue, net of subcontractor costs, excluding the impact of foreign exchange rate fluctuations, decreased \$60.1 million and \$62.0 million, respectively, in fiscal 2014 compared to last year.

Our U.S. state and local government revenue and revenue, net of subcontractor costs, were also lower than last year by \$37.7 million and \$40.6 million, respectively. The decrease reflects the abnormally strong growth in this business in fiscal 2013, partially due to several large transportation projects that are currently winding down.

In our U.S. commercial business, we experienced a \$25.3 million increase in revenue from last year, which primarily reflects continued organic growth in our commercial oil and gas business. Further, the Parkland and AEG acquisitions completed in the second quarter of fiscal 2013, which focus on oil and gas and solid waste, respectively, contributed additional revenue, adjusted for foreign exchange rate fluctuations, of \$42.2 million in fiscal 2014 compared to fiscal 2013.

Despite the overall revenue decline, our operating income increased to \$153.8 million in fiscal 2014 compared to \$20.2 million last year. This \$133.6 million increase includes non-operating gains and charges related to acquisition accounting in both fiscal 2014 and fiscal 2013. In the third quarter of fiscal 2013, our operating income was adversely impacted by weakness in certain areas of our business, which resulted in a non-cash goodwill impairment charge of \$56.6 million. This charge is explained in detail under "Fiscal 2013 Goodwill Impairment Charge". In addition, our fiscal 2014 and fiscal 2013 operating income included net gains from updated valuations of our contingent consideration liabilities. In fiscal 2014, we recorded net decreases in our contingent earn-out liabilities and reported related net gains in operating income of \$58.7 million, compared to net gains of \$9.6 million in fiscal 2013. The fiscal 2014 net gains primarily resulted from updated valuations of the contingent consideration liabilities for Parkland and AEG. We recognized a net unfavorable operating income adjustment for Parkland related to a single project during fiscal 2014. Adverse weather conditions during fiscal 2014 hindered AEG's ability to complete construction field work. As a result, we lowered our income projections over the remaining earn-out periods and recorded corresponding reductions of the earn-out liabilities for Parkland and AEG. We also determined that these lower income projections were the result of temporary events, and would not negatively impact Parkland and AEG's longer-term performance or result in goodwill impairment. However, if our income projections were to decline further, this could result in the impairment of a portion of the combined related goodwill balance of approximately \$134 million. Our operating income also reflects the lower amortization of intangibles of \$5.1 million in fiscal 2014 compared to fiscal 2013.

Table of Contents

Excluding these acquisition accounting-related items, our operating income increased \$22.8 million in fiscal 2014 compared to last year.

During the fourth quarter of fiscal 2014, we completed a strategic review of our RCM segment and decided to retain our core environmental remediation, oil and gas, solid waste, and utilities-related activities. We also decided to exit all non-core construction activities that require lump-sum fixed-price bidding. In connection with the decision to wind-down certain RCM activities, we recorded a combined charge of \$4.0 million related to severance and the abandonment of certain leased facilities in our RCM segment in the fourth quarter of fiscal 2014. Of this amount, approximately \$1.2 million related to severance and was paid in cash in the fourth quarter of fiscal 2014. The remaining \$2.8 million related to leases, and is expected to be paid in cash net of estimated sublease income over six years as these leases expire. In the third quarter of fiscal 2013, we incurred similar types of restructuring charges to right-size our ECS segment totaling \$10.3 million. These charges are described in detail under "Fiscal 2013 Restructuring Charges".

We recorded project-related charges, primarily in our RCM segment, which reduced our operating income in both fiscal 2014 and fiscal 2013. We regularly review each of our active projects, including those in the market areas we are exiting or winding-down. The review includes an update of the expected costs to complete each project and the collectability of any related outstanding claims. Based on these reviews, we recorded project-related charges of \$30.6 million in fiscal 2014, all in the RCM segment, which are described under "Fiscal 2014 Project-Related Charges". We also recorded project-related charges and adjustments to estimated costs at completion during the third quarter of fiscal 2013 that reduced operating income by \$35.5 million, as described under "Fiscal 2013 Project-Related Charges".

In fiscal 2014, we recorded income tax expense of \$35.7 million, representing an effective tax rate of 24.7%. This tax rate is significantly lower than the expected statutory tax rate primarily due to the impact of gains from changes to contingent consideration liabilities, most of which are not taxable. In fiscal 2013, we recorded \$14.0 million of income tax expense with an effective tax rate of 112.0%. The fiscal 2013 rate resulted from the goodwill impairment charge that was substantially not deductible for tax purposes.

Fiscal 2014 Project-Related Charges

In fiscal 2014, primarily in the fourth quarter, we recorded project-related charges principally from adjustments to estimated costs at completion that increased project costs. These charges included amounts primarily related to two lines of business in the RCM segment with U.S. federal and state and local government clients that we decided to exit or wind-down in the fourth quarter of fiscal 2014.

One of the businesses we decided to exit or wind-down related to fixed-price contracts for project management, construction management, and construction services, primarily for U.S. federal government clients. In the course of performing the required work, we encountered delays related to defective designs, permit issues and differing site conditions, among other factors, that slowed our progress. Due to these delays, we determined that the costs to complete the projects would exceed the contract values. As a result, we recorded related pre-tax project charges of \$20.5 million on these projects in fiscal 2014. These projects are expected to be substantially completed in fiscal 2015 with total estimated costs to complete of approximately \$50 million as of September 28, 2014. If our costs increase above this estimate, we could record further losses.

The other business we decided to exit or wind-down related to fixed-price contracts for transportation projects with state government agencies. During the execution of these contracts, numerous issues and events disrupted our plans and progress, including weather delays, differing site conditions, drainage design changes, lane closure delays, and revised soil testing requirements. These issues caused us to incur costs in excess of the contract values and increase our estimates of the expected costs to complete.

Table of Contents

As a result, we recorded pre-tax charges to operating income of \$9.1 million in the fourth quarter of fiscal 2014. These projects are expected to be completed primarily in fiscal 2015, with total estimated costs to complete of approximately \$70 million as of September 28, 2014. If our costs increase above this estimate, we could record further losses.

*Segment Results of Operations**Engineering and Consulting Services*

| | Fiscal Year Ended | | | | |
|-------------------------------------|-----------------------|-----------------------|-------------|--|--------|
| | September 28, 2014 | September 29, 2013 | Change | | |
| | | | \$ | | % |
| | (\$ in thousands) | | | | |
| Revenue | \$ 963,024 | \$ 1,035,983 | \$ (72,959) | | (7.0)% |
| Subcontractor costs | (136,989) | (130,547) | (6,442) | | (4.9) |
| Revenue, net of subcontractor costs | \$ 826,035 | \$ 905,436 | \$ (79,401) | | (8.8) |
| Operating income | \$ 76,015 | \$ 44,598 | \$ 31,417 | | 70.4 |

Revenue and revenue, net of subcontractor costs, declined \$73.0 and \$79.4 million, respectively, in fiscal 2014 compared to last year. In fiscal 2014, the U.S. dollar strengthened against many foreign currencies compared to fiscal 2013. These fluctuations, particularly related to the Canadian dollar, reduced revenue by \$32.0 million and revenue, net of subcontractor costs, by \$29.6 million in fiscal 2014 compared to fiscal 2013. The remainder of the decline resulted primarily from reductions in our Canadian operations that focus on municipal government projects and in our mining operations. Excluding the impact of foreign exchange rate fluctuations, the aggregate revenue and revenue, net of subcontractor costs, from these activities decreased by \$60.1 million and \$62.0 million, respectively, for fiscal 2014 compared to last year.

Despite the decrease in revenue, operating income increased \$31.4 million in fiscal 2014 compared to last year. In the third quarter of fiscal 2013, our operating income was adversely impacted by the weakness in our Canadian operations, which resulted in significant severance and office-related closure costs totaling \$10.3 million to right-size the related operations. Prior to these right-sizing actions, operating income in our Eastern Canada and mining operations was significantly below historical levels due to a lower level of revenue, and the corresponding under-utilization of our labor and equipment resources. As a result of the right-sizing actions, utilization improved, and the combined operating income, excluding the related charges, for these businesses increased \$21.1 million in fiscal 2014 compared to last year.

Table of Contents*Technical Support Services***Fiscal Year Ended**

| | September 28, | | September 29, | | Change | |
|-------------------------------------|----------------------|-------------|--------------------------|-------------|---------------|----------|
| | 2014 | 2013 | 2013 | 2013 | \$ | % |
| | | | (\$ in thousands) | | | |
| Revenue | \$ 912,749 | \$ 932,375 | \$ (19,626) | | | (2.1)% |
| Subcontractor costs | (271,741) | (272,443) | 702 | | | 0.3 |
| Revenue, net of subcontractor costs | \$ 641,008 | \$ 659,932 | \$ (18,924) | | | (2.9) |
| Operating income | \$ 91,859 | \$ 71,842 | \$ 20,017 | | | 27.9 |

In fiscal 2014, revenue and revenue, net of subcontractor costs, declined \$19.6 million and \$18.9 million, respectively, compared to last year. These results were primarily driven by reduced activity from U.S. federal government programs across several agencies. Revenue and revenue, net of subcontractor costs, from these programs decreased by \$73.6 million and \$55.9 million, respectively, in fiscal 2014 compared to last year. However, revenue growth in our U.S. commercial business, particularly for oil and gas clients, partially offset the decline in U.S. federal work. Revenue and revenue, net of subcontractor costs, from commercial activities increased by \$52.7 million and \$39.0 million, respectively, in fiscal 2014 compared to last year.

Despite the lower revenue, operating income increased \$20.0 million in fiscal 2014 compared to last year. Fiscal 2013 results include a project charge on a commercial development project that reduced operating income by \$12.3 million. Excluding the impact of this charge, operating income increased \$7.7 million, or 10.7%, in fiscal 2014 compared to fiscal 2013. This increase reflects the significantly higher profit margin in our commercial business, particularly work for oil and gas clients, together with a reduction in discretionary overhead costs.

*Remediation and Construction Management***Fiscal Year Ended**

| | September 28, | | September 29, | | Change | |
|-------------------------------------|----------------------|-------------|--------------------------|-------------|---------------|----------|
| | 2014 | 2013 | 2013 | 2013 | \$ | % |
| | | | (\$ in thousands) | | | |
| Revenue | \$ 703,253 | \$ 725,689 | \$ (22,436) | | | (3.1)% |
| Subcontractor costs | (310,368) | (266,225) | (44,143) | | | (16.6) |
| Revenue, net of subcontractor costs | \$ 392,885 | \$ 459,464 | \$ (66,579) | | | (14.5) |
| Operating loss | \$ (34,310) | \$ (6,706) | \$ (27,604) | | | (411.6) |

Revenue decreased \$22.4 million in fiscal 2014 compared to last year. Due to a higher level of subcontractor activity, we experienced a significantly greater decline in revenue, net of subcontractor costs, of \$66.6 million. In the third quarter of fiscal 2013, we recorded \$17.3 million of negative revenue adjustments for project-related charges on three programs with U.S. federal, and state and local government clients. Excluding the impact of these charges, revenue and revenue, net of subcontractor

Edgar Filing: TETRA TECH INC - Form 10-K

Table of Contents

costs, decreased \$39.7 million and \$83.9 million in fiscal 2014 compared to fiscal 2013. The revenue decline primarily reflects reduced revenues from U.S. state and local government work due to the wind-down of large transportation projects, and our decision in the fourth quarter of fiscal 2014 to exit these and other activities that require fixed-price bidding. To a lesser extent, the revenue declines reflect reduced commercial activity in the U.S. and Canada, driven by adverse weather conditions that delayed our field work, and by a decrease in wind projects.

Operating income declined \$27.6 million in fiscal 2014 compared to last year, and we reported a segment loss of \$34.3 million compared to a loss of \$6.7 million in fiscal 2013. The losses in both years were primarily attributable to cost-overruns on fixed-price construction projects. We incurred operating losses on these activities totaling \$49.8 million and \$23.5 million in fiscal 2014 and fiscal 2013, respectively. In both years, these losses more than offset the operating income from our core activities, including remediation, solid waste, and utilities. As a result, in the fourth quarter of fiscal 2014 we performed a strategic review of the RCM segment and decided to exit from or wind-down our non-core construction activities that require fixed-price bidding. The remaining projects are expected to be substantially completed in fiscal 2015.

(1) We believe that the presentation of "Revenue, net of subcontractor costs", which is a non-GAAP financial measure, enhances investors' ability to analyze our business trends and performance because it substantially measures the work performed by our employees. In the course of providing services, we routinely subcontract various services and, under certain USAID programs, issue grants. Generally, these subcontractor costs and grants are passed through to our clients and, in accordance with GAAP and industry practice, are included in our revenue when it is our contractual responsibility to procure or manage these activities. The grants are included as part of our subcontractor costs. Because subcontractor services can vary significantly from project to project and

Table of Contents

period to period, changes in revenue may not necessarily be indicative of our business trends. Accordingly, we segregate subcontractor costs from revenue to promote a better understanding of our business by evaluating revenue exclusive of costs associated with external service providers.

(2)

NM = not meaningful

Our revenue and operating income were adversely impacted by weakness in certain areas of our business that resulted in reduced revenue, significant costs to right-size the related operations, and a non-cash goodwill impairment charge in the third quarter of fiscal 2013. In addition, we recorded project-related charges that reduced revenue and increased project costs. As a result of these factors, revenue decreased \$97.3 million, or 3.6%, and operating income decreased \$146.1 million, or 87.8%, compared to fiscal 2012. However, revenue, net of subcontractor costs, was flat because the revenue decline was offset by an increase in self-performed work compared to fiscal 2012.

Our fiscal 2013 results reflect the decline in our international business due to the impact of Eastern Canada, as well as the reduction in our commercial work due to the slow-down in global mining activities. Revenue and revenue, net of subcontractor costs, on a combined basis for these operations decreased \$104.0 million and \$83.0 million, respectively, compared to fiscal 2012. Further, our revenue and revenue, net of subcontractor costs, declined \$178.6 million and \$99.2 million, respectively, in our U.S. federal government business due to a broad-based slowdown as a result of budgetary constraints, including the impact of sequestration, primarily impacting discretionary programs.

The project charges that reduced revenue primarily related to adverse developments on certain projects in the third quarter in fiscal 2013, and our subsequent evaluations and conclusions concerning the collectability of the related unbilled accounts receivable. These charges included amounts related to claims, including requests for equitable adjustment, on three programs with U.S. federal and state and local government clients. In addition, we recorded a project-related charge on a commercial development contract due to a change in client ownership and the related modification of plans for completion of the project. These events adversely affected the collectability of certain related receivables and the profitability expectations for the project. Collectively, the project charges on these four programs reduced our fiscal 2013 revenue and revenue, net of subcontractor costs, by \$29.6 million. These project charges are explained in further detail under "*Fiscal 2013 Project-Related Charges*".

The overall revenue decline was partially offset by increased activity on certain U.S. state and local government projects that were considered essential programs. Our fiscal 2013 revenue and revenue, net of subcontractor costs, from these activities increased \$72.5 million and \$50.3 million, respectively, compared to fiscal 2012. Acquisitions completed in fiscal 2012 and 2013 contributed additional revenue in the aggregate amount of \$194.1 million in fiscal 2013.

Operating income decreased \$146.1 million, or 87.8%, in fiscal 2013 compared to fiscal 2012. The decrease largely resulted from a non-cash goodwill impairment charge of \$56.6 million in the third quarter of fiscal 2013, which is explained in further detail under "*Fiscal 2013 Goodwill Impairment Charge*". Excluding this charge, our operating income was \$76.8 million for fiscal 2013 compared to \$166.4 million in the prior year. The remaining decline in operating income, excluding goodwill impairment, from fiscal 2012 was primarily due to project-related charges as well as the slowdown in our Eastern Canada and global mining operations. The project-related charges on the four programs described above collectively reduced our fiscal 2013 operating income by \$40.1 million. In addition, the weaker results in our Eastern Canada and global mining operations and the resulting charges to right-size these businesses, as described above, reduced operating income by \$48.4 million in fiscal 2013 compared to the previous year. These right-sizing costs are explained in further detail under "*Fiscal 2013 Restructuring Charges*".

Table of Contents

The decline in operating income also reflected the higher amortization of intangibles of \$2.7 million in fiscal 2013 compared to the previous year, due to fiscal 2013 acquisitions. Additionally, the gains related to changes in the estimated fair value of our contingent earn-out liabilities decreased to \$9.6 million in fiscal 2013 from \$19.2 million in fiscal 2012.

In fiscal 2013, we recorded \$14.0 million of income tax expense compared to \$56.1 million in fiscal 2012. The decrease was primarily due to lower operating income and, to a lesser extent, increased estimates of R&E tax credits for fiscal 2013. Our fiscal 2013 effective tax rate was 112.0% compared to 34.9% for the prior year. The rate increase resulted from a goodwill impairment charge that was substantially not deductible for tax purposes.

Fiscal 2013 Restructuring, Goodwill Impairment and Project-Related Charges

Fiscal 2013 Restructuring Charges

In Eastern Canada, poor economic conditions, including budget deficits, reduced customer spending and on-going government investigations into political corruption in Quebec, slowed procurements and business activity in that region beginning in the third quarter of fiscal 2013. As a result, we experienced weaker than expected financial performance in our Eastern Canada operations, and we took actions to right-size the business that resulted in significant severance and office closure charges in the third quarter of fiscal 2013.

Our work for mining customers also slowed more than expected in the third quarter of fiscal 2013 as those customers responded to lower global growth expectations. This was driven in large part by China's report in April 2013 of anticipated slower economic growth. As a result, our mining customers experienced a significant reduction in the global demand for commodities that caused a drop in mineral prices. Due to the subsequent slowdown in mining activities, we right-sized our global mining business by reducing staff and closing offices in the third quarter of fiscal 2013.

In connection with the actions taken to right-size our Eastern Canada and global mining operations, we recorded a combined charge of \$10.3 million related to severance and the abandonment of certain leased facilities in our ECS segment. Of this amount, approximately \$4.0 million, related to severance, was paid in cash in fiscal 2013, and \$2.2 million, related to leases, was paid in cash in fiscal 2014. The remaining \$4.1 million is expected to be paid in cash net of estimated sublease income over the following six years as the related leases expire. If these operations decline further, we may take further right-sizing actions and incur additional costs. No material right-sizing charges were incurred in the ECS segment in fiscal 2014. The approximate annual cost savings in fiscal 2014 in the ECS segment from lower compensation and rent expense was approximately \$14.9 million.

Fiscal 2013 Goodwill Impairment Charge

During the third quarter of fiscal 2013, certain of our reporting units experienced declines in actual performance and lowered their financial projections for the remainder of fiscal 2013. In Eastern Canada, poor economic conditions, including budget deficits, reduced customer spending, and on-going government investigations into political corruption in Quebec, slowed procurements and business activity in that region. In addition, our work for mining customers continued to slow at a faster pace than previously anticipated due to reduced demand and significant declines in prices for certain commodities. To a lesser extent, we also experienced reduced performance from reporting units with a concentration of work for certain agencies of the U.S. federal government as a result of customer budgetary constraints. As a result of these factors, during the third quarter of fiscal 2013, we performed an interim goodwill impairment test for three reporting units in our ECS segment.

Table of Contents

The reporting units tested for goodwill impairment included our Tetra Tech Canada ("TTC") reporting unit, with operations primarily in Eastern Canada, particularly Quebec. A significant portion of TTC's business relates to work performed for city and provincial government clients in Quebec. This work, which had already slowed due to budgetary constraints, was curtailed almost completely during the third quarter of fiscal 2013 due to the political corruption investigations in Quebec. As a result, TTC's revenue declined 26% in the third quarter of fiscal 2013 compared to the prior year period, and TTC reported a quarterly loss. This negative trend was compared to the expected revenue growth of approximately 8% in the annual goodwill impairment test performed as of July 1, 2012. In response to these results, we made significant staff and office reductions in TTC during the third quarter of fiscal 2013 to align our costs with the expected lower level of revenue. Although these actions returned TTC to profitability in the fourth quarter of fiscal 2013, revenue and profits were at a lower level than previously expected. Due to the significance of the staff reductions and the expected prolonged government investigations, we concluded that TTC would likely experience a long-term deficit in performance compared to previous periods and expectations.

We also performed an interim goodwill impairment test for our Global Mining Practice ("GMP") reporting unit, with operations primarily in the U.S., Canada, Australia and South America. Our work for mining customers slowed more than expected in the third quarter of fiscal 2013, as these customers responded to lower global growth expectations driven in large part by China's report in April 2013 of slower economic growth. As a result, our mining customers experienced a significant reduction in the global demand for commodities that caused a drop in mineral prices. Their response included a significant curtailment of capital spending for new mining projects. As a result, GMP experienced a 27% decline in revenue in the third quarter of fiscal 2013 compared to the same period of fiscal 2012 and reported a quarterly loss. This negative trend was compared to the expected revenue growth of approximately 15% in the previous goodwill impairment test, performed as of July 1, 2012. In response to these results, we made significant staff and office reductions in GMP during the third quarter of fiscal 2013 to align our costs with the expected lower level of revenue. Although these actions returned GMP to profitability in the fourth quarter of fiscal 2013, revenue and profits did not return to historical levels. Due to the significance of the staff reductions and the expected prolonged lower level of mining activity, we concluded that GMP would likely not return to historical levels of performance for the foreseeable future.

Lastly, we performed an interim goodwill impairment test for Advanced Management Technology, Inc. ("AMT"), a U.S. federal government contractor primarily doing business with the Federal Aviation Administration. In fiscal 2013, we experienced a decline in revenue from U.S. federal government programs as uncertainty regarding the U.S. federal budget delayed project funding and budget cuts were implemented. As a result, our overall U.S. federal government revenue declined 23% in the third quarter of fiscal 2013 compared to the same period last year. Correspondingly, AMT's revenue declined approximately 12%. Although AMT remained profitable despite this decline in revenue, the related operating income declined 46% as competition increased for the shrinking level of federal work. This negative trend was compared to the stable expectations for revenue and profit in the previous goodwill impairment test performed as of July 1, 2012. We expect the level of federal spending for the work AMT performs to remain stable at the reduced levels experienced in fiscal 2013 for the foreseeable future.

We performed the first step of the impairment test for each of these reporting units during the third quarter of fiscal 2013, and in each case determined that the carrying value of the reporting unit exceeded its fair value, indicating potential goodwill impairment. The significant change to the assumptions used in the interim test in the third quarter of fiscal 2013 compared to the previous annual impairment test as of July 1, 2012 was the projected revenue, operating income and cash flows for each reporting unit tested.

We performed the second step of the goodwill impairment test to measure the amount of the impairment loss, if any, of the applicable reporting units. The second step of the test requires the allocation

Table of Contents

of the reporting unit's fair value to its assets and liabilities, including any unrecognized intangible assets, in a hypothetical analysis that calculates the implied fair value of goodwill as if the reporting unit was being acquired in a business combination. If the implied fair value of goodwill is less than the carrying value, the difference is recorded as an impairment loss. Based on the results of the step two analyses, we recorded an aggregate goodwill impairment charge of \$56.6 million, or \$48.1 million, net of tax, in the third quarter of fiscal 2013 for the TTC, GMP and AMT reporting units. The calculations of the reporting unit fair values for the second step of the goodwill impairment test are highly dependent on estimated future annual revenue growth rates. The revenue growth rate assumptions for the interim impairment test for TTC, GMP and AMT ranged from 0% to 5%. If it becomes apparent that these reporting units are unable to achieve the assumed growth rates, or they continue to decline, we would likely have further goodwill impairment charges in the future.

The carrying amounts of these reporting units, including goodwill were as follows:

| | June 30, 2013 | | |
|----------------------------------|-----------------------|------------|------------|
| | TTC | GMP | AMT |
| | (in thousands) | | |
| Carrying value before impairment | \$ 245,634 | \$ 116,184 | \$ 56,474 |
| Goodwill impairment | (27,900) | (11,900) | (16,800) |
| Carrying value after impairment | \$ 217,734 | \$ 104,284 | \$ 39,674 |

The goodwill amounts after the impairment charges for the TTC, GMP and AMT reporting units were \$109.5 million, \$71.9 million and \$32.6 million, respectively.

Fiscal 2013 Project-Related Charges

In the third quarter of fiscal 2013, we recorded project-related charges and adjustments to estimated costs at completion that reduced revenue and increased project costs. These project charges primarily related to adverse developments on certain projects during the third quarter of fiscal 2013, and our subsequent evaluations and conclusions concerning the collectability of the related unbilled accounts receivable. These charges included amounts related to claims, including requests for equitable adjustment ("REA"), on three programs in the RCM segment with U.S. federal and state and local government clients. In addition, we recorded a project-related charge on a commercial development contract in the TSS segment due to a change in client ownership and the related modification of plans for completion of the project. These events adversely affected the collectability of certain related receivables and the profitability expectations for the project. Collectively, the project charges on these four programs reduced revenue and revenue, net of subcontractor costs, by \$29.6 million and reduced operating income by \$35.5 million in the third quarter of fiscal 2013.

The first of the four programs related to U.S. federal government fixed-price contracts in our RCM segment, awarded in fiscal 2010, for the construction of structures to reduce the risks associated with hurricanes and other storms in Southeastern Louisiana. During construction, we incurred costs in excess of the contract values to meet client requests, and submitted a related REA to the client. We concluded that there was a technical and legal basis for recovery of a portion of these costs and recorded revenue and associated accounts receivable deemed probable of collection related to the REA through the second quarter of fiscal 2013. The total amount of the excess costs and the REA significantly exceeded the revenue recognized, resulting in a loss for the program.

During the third quarter of fiscal 2013, we received a decision from the client affirmatively rejecting a portion of the costs submitted in the REA. Accordingly, during that quarter, we re-evaluated

Table of Contents

the collectability of the related accounts receivable and the estimated costs to complete the projects and recorded charges to pre-tax income of \$6.8 million, including reductions to revenue of \$5.7 million. As of September 29, 2013, the project was complete and no further costs are expected to be incurred. However, if it is determined that any or all of the remaining accounts receivable are uncollectible, we could recognize further losses in future periods. Conversely, we are pursuing all available legal methods to collect the entire amount of the submitted REA and, if successful, we could recognize gains on recovery in future periods. No gains or losses on this project were recorded during fiscal 2014.

The second program related to U.S. federal government fixed-price contracts in our RCM segment, awarded in fiscal 2012, to provide design and construction services for Afghan National Army camps in Afghanistan. Upon contract execution, we engaged a subcontractor under fixed-price arrangements to provide staffing, procure materials and engage local Afghan subcontractors. During the third quarter of fiscal 2013, as a result of non-performance, we terminated the subcontractor and began to self-perform the contracts. As a result of this change, we revised our estimates of the total costs to complete, including costs to self-perform the remainder of the contracts, and recorded charges to pre-tax income of \$9.9 million including reductions to revenue of \$7.9 million. Additionally, as a result of differing site conditions, changes to contract specifications by the client and other factors, we recorded revenue and associated accounts receivable through project completion in the first quarter of fiscal 2014 as we believe we have a technical and legal basis for recovery and such amount is probable of collection. We submitted REAs to the client during the first and second quarters of fiscal 2014. As of the end of the first quarter of fiscal 2014, the projects were complete and no further costs are expected to be incurred. However, if it is determined that any or all of the remaining accounts receivable are uncollectible, we could recognize further losses in future periods. Conversely, we are pursuing all available legal methods to collect the entire amount of the submitted REA and, if successful, we could recognize gains on recovery in future periods. No material gains or losses on this project were recorded during fiscal 2014.

The third program related to fixed-price transportation projects in our RCM segment with a state government agency awarded in fiscal 2011 and 2012. During the execution of these contracts, numerous issues and events disrupted our plans and progress, including weather delays, differing site conditions, drainage design changes, lane closure delays, and revised soil testing requirements. These issues caused us to incur costs in excess of the contract value. As a result, we submitted change orders including REAs to the client. In the third quarter of fiscal 2013, we determined that a portion of the costs in excess of the contract value was not recoverable. This assessment included an evaluation of the recoverability of change orders and REAs, and changes in estimated costs to complete. The result was a pre-tax charge to operating income of \$6.5 million and a related reduction of revenue of \$3.7 million. As of June 29, 2014, the related projects were substantially complete and no further material costs are expected to be incurred that could increase the loss. However, if it is determined that any or all of the remaining accounts receivable are uncollectible, we could recognize further losses in future periods. Conversely, we are pursuing all available legal methods to collect the entire amount of the submitted REA and, if successful, we could recognize gains on recovery in future periods. During fiscal 2014, we recognized a \$3.4 million gain based on our updated evaluation of the collectability of these claims.

The fourth program related to a fixed-price design and construction environmental assurance agreement, and a separate fixed-price operation and maintenance ("O&M") environmental assurance agreement in our TSS segment, with a commercial property developer that we entered into in fiscal 2008. At the time of contract execution, it was expected that the design and construction contract would be completed during the fourth quarter of fiscal 2011 and the O&M contract would cover related activities through December 31, 2027. Although the contract terms only allowed for final billing of the multiple project milestones upon their individual completion, we recognized revenue and the related receivable as the costs were incurred on a percentage-of-completion basis, as we believed that completion of all milestones was probable. As a result of changes in scope and delays in project execution as directed by the

Table of Contents

client, we have issued numerous change orders related to the design and construction contract, and this contract has not yet been completed.

In April 2013, our client was acquired by a larger commercial property developer. Subsequently, the new client implemented a plan to substantially modify the original scope and projected timeline associated with the contract. We determined that these proposed changes would result in increased risk and cost to and, potentially, the termination of the original contract. Accordingly, subsequent to significant discussions with the new client during the third quarter of fiscal 2013, we reviewed the recoverability of estimated costs to be incurred in anticipation of the potential project termination. We also reviewed the outstanding accounts receivable related to individual task orders under which we did not reach the required contract milestones and, therefore, would not be collectible. As a result of this process, we recorded a pre-tax charge to operating income of \$12.4 million that reduced revenue by the same amount during the third quarter of fiscal 2013. This charge principally consisted of reserves established for the outstanding accounts receivable that were no longer considered probable of collection, a reversal of previously recognized profit based upon the change in estimate associated with the potential early project termination, and the write-off of previously recorded accounts receivable associated with partially completed milestones. No other gains or losses on this project were recorded during fiscal 2014.

In total for all four programs, we had \$39.8 million of accounts receivable outstanding, including those related to REAs and change orders, and the related projects were substantially complete as of September 28, 2014. If we are unable to collect these accounts receivable or if our costs increase above these estimates, we could record further losses on these programs. Conversely, we intend to pursue all available legal methods to collect the entire amount of the REAs and change orders, and other amounts we believe are due us. The total amount, which is approximately \$91.3 million, significantly exceeds the revenue recognized on the related contracts. If we are successful, we could recognize gains on recovery in future periods.

Segment Results of Operations**Engineering and Consulting Services**

| | Fiscal Year Ended | | | | |
|-------------------------------------|-------------------------------|-------------------------------|---------------|--|----------|
| | September 29, 2013 | September 30, 2012 | Change | | % |
| | | | \$ | | |
| | | | | | |
| Revenue | \$ 1,035,983 | \$ 1,155,256 | \$ (119,273) | | (10.3)% |
| Subcontractor costs | (130,547) | (164,364) | 33,817 | | 20.6 |
| Revenue, net of subcontractor costs | \$ 905,436 | \$ 990,892 | \$ (85,456) | | (8.6) |
| Operating income | \$ 44,598 | \$ 96,220 | \$ (51,622) | | (53.6) |

In fiscal 2013, revenue and revenue, net of subcontractor costs, decreased \$119.3 million and \$85.5 million, respectively, compared to fiscal 2012. These results reflected the decline in our Canadian operations that are focused on municipal government and mining activities, as well as in our U.S. operations that are focused on federal government and mining-related business. The aggregate revenue and revenue, net of subcontractor costs, from these operations were \$104.0 million and \$83.0 million lower, respectively, in fiscal 2013 than in the prior year. Our operating income decreased \$51.6 million in fiscal 2013 compared to fiscal 2012. The decrease was primarily attributable to the causes described above, together with lower staff utilization and \$10.3 million of severance and office-related closure costs incurred

Table of Contents

in the third quarter of fiscal 2013. Including these right-sizing costs, the combined reduction in operating income from our Eastern Canada and mining operations was \$48.4 million for fiscal 2013.

Technical Support Services

| | Fiscal Year Ended | | | | |
|-------------------------------------|-------------------------------|-------------------------------|---------------|--|--------|
| | September 29, 2013 | September 30, 2012 | Change | | |
| | | | \$ | | % |
| | (\$ in thousands) | | | | |
| Revenue | \$ 932,375 | \$ 1,020,779 | \$ (88,404) | | (8.7)% |
| Subcontractor costs | (272,443) | (332,164) | 59,721 | | 18.0 |
| Revenue, net of subcontractor costs | \$ 659,932 | \$ 688,615 | \$ (28,683) | | (4.2) |
| Operating income | \$ 71,842 | \$ 71,767 | \$ 75 | | 0.1 |

Revenue and revenue, net of subcontractor costs, declined \$88.4 million and \$28.7 million, respectively, in fiscal 2013 compared to fiscal 2012. These declines were driven by reduced activity on U.S. federal government programs across several agencies. Revenue and revenue, net of subcontractor costs, from these programs decreased by \$127.8 million and \$50.6 million, respectively, compared to the prior year. The declines also were attributable to a \$12.3 million negative revenue adjustment related to a project charge on a U.S. commercial development project in the third quarter of fiscal 2013. This charge resulted from a change in client ownership and the related modification in completion plans for the project. These revenue declines were partially mitigated by the growth in our work for oil and gas clients. We generated \$42.3 million of revenue in fiscal 2013 compared to \$10.6 million in fiscal 2012, from a company we acquired in the third quarter of fiscal 2012 that provides services for oil and gas clients. The overall decreases in revenue and revenue, net of subcontractor costs, were also partially mitigated by increased activity on our state and local government programs. Despite the aforementioned revenue declines, our operating income in fiscal 2013 was flat compared to the prior year, due to relatively higher profit margins on oil and gas projects.

Remediation and Construction Management

| | Fiscal Year Ended | | | | |
|-------------------------------------|-------------------------------|-------------------------------|---------------|--|---------|
| | September 29, 2013 | September 30, 2012 | Change | | |
| | | | \$ | | % |
| | (\$ in thousands) | | | | |
| Revenue | \$ 725,689 | \$ 621,957 | \$ 103,732 | | 16.7% |
| Subcontractor costs | (266,225) | (279,394) | 13,169 | | 4.7 |
| Revenue, net of subcontractor costs | \$ 459,464 | \$ 342,563 | \$ 116,901 | | 34.1 |
| Operating income | \$ (6,706) | \$ 22,374 | \$ (29,080) | | (130.0) |

Revenue and revenue, net of subcontractor costs, increased \$103.7 million and \$116.9 million, respectively, in fiscal 2013 compared to fiscal 2012. These increases were attributable to additional work in our U.S. commercial and international oil and gas businesses that resulted from the acquisitions we completed in the second quarter of fiscal 2013. On a combined basis, these acquisitions contributed

Table of Contents

\$170.3 million of revenue in fiscal 2013. In addition, our revenue and revenue, net of subcontractor costs, in our state and local government business continued to grow in fiscal 2013. The overall increases were partially offset by the aforementioned project-related charges that reduced our fiscal 2013 revenue and revenue, net of subcontractor costs, by \$17.3 million. These project charges related to adverse changes in the estimated collectability of unbilled accounts receivable and estimated costs at completion. These included claims and requests for equitable adjustment on three programs with U.S. federal and state and local government clients. We reported \$6.7 million of operating loss in the RCM segment for fiscal 2013. The project-related charges described above contributed \$27.7 million to the fiscal 2013 operating loss. The remaining decrease in operating income compared to the prior year was attributable to lower utilization of labor and equipment resources related to decreased revenue.

Non-GAAP Financial Measure

We are providing a non-GAAP financial measure that we believe is appropriate for evaluating the operating performance of our business. The non-GAAP measure should not be considered in isolation from, and is not intended to represent an alternative measure of, operating results or cash flows from operating activities, as determined in accordance with U.S. GAAP.

Revenue, net of subcontractor costs, is defined as revenue less subcontractor costs. Revenue, net of subcontractor costs, as we calculate it, may not be comparable to similarly titled measures employed by other companies.

The following is a reconciliation of revenue, net of subcontractor costs, for fiscal 2012 through 2014:

| | September 28, 2014 | Fiscal Year Ended September 29, 2013 | September 30, 2012 |
|--------------------------------------|-------------------------------|---|-------------------------------|
| | (\$ in thousands) | | |
| Revenue | \$ 2,483,814 | \$ 2,613,755 | \$ 2,711,075 |
| Subcontractor costs | (623,896) | (588,923) | (689,005) |
| Revenue, net of subcontractors costs | \$ 1,859,918 | \$ 2,024,832 | \$ 2,022,070 |

FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

Capital Requirements. Our primary sources of liquidity are cash flows from operations and borrowings under our credit facilities. Our primary uses of cash are to fund working capital, capital expenditures, repurchases of stock under our Repurchase Program, cash dividends and repayment of debt, as well as to fund acquisitions and earn-out obligations from prior acquisitions. We believe that our existing cash and cash equivalents, operating cash flows and borrowing capacity under our Amended and Restated Credit Agreement (the "Amended Credit Agreement") will be sufficient to meet our capital requirements for at least the next 12 months. On April 28, 2014, the Board of Directors declared a quarterly cash dividend of \$0.07 per share payable on June 4, 2014 to stockholders of record as of the close of business on May 16, 2014. On July 28, 2014, the Board of Directors declared a quarterly cash dividend of \$0.07 per share payable on September 5, 2014 to stockholders of record as of the close of business on August 15, 2014.

Subsequent Events. On November 10, 2014, the Board of Directors declared a quarterly cash dividend of \$0.07 per share payable on December 15, 2014 to stockholders of record as of the close of business on November 26, 2014. On November 10, 2014, the Board of Directors also authorized a new

Table of Contents

stock repurchase program under which we may repurchase up to \$200 million of our common stock over the next two years.

We use a variety of tax planning and financing strategies to manage our worldwide cash and deploy funds to locations where they are needed. We also indefinitely reinvest our foreign earnings, and our current plans do not demonstrate a need to repatriate these earnings. Should we require additional capital in the United States, we may elect to repatriate indefinitely reinvested foreign funds or raise capital in the United States through debt. If we were to repatriate indefinitely reinvested foreign funds, we would be required to accrue and pay additional U.S. taxes less applicable foreign tax credits.

As of September 28, 2014, cash and cash equivalents were \$122.4 million, a decrease of \$6.9 million compared to the prior year end. The decrease was primarily due to repurchases of common stock, dividends and payments for business acquisitions substantially funded by net cash provided by operating activities and net proceeds from the issuance of common stock.

Operating Activities. Net cash provided by operating activities was \$127.4 million, a decrease of \$10.4 million compared to last year. The decrease was due primarily to a slowdown on the collection of accounts receivable caused by project milestone billing terms, and pending claims on contracts that provide for price redetermination, primarily with U.S. federal government agencies. Total accounts receivable at September 28, 2014 and September 29, 2013 included approximately \$79 million and \$41 million, respectively, related to claims, including requests for equitable adjustment, on contracts that provide for price redetermination. The overall decrease was also attributable to changes in other liabilities as well as prepaid expenses and other assets. These declines were largely mitigated by increased operating income as a result of operating losses in the third quarter of fiscal 2013, and favorable changes in accounts payable, accrued compensation and billings in excess of costs on uncompleted contracts. Further, a net decrease of \$7.7 million in income tax payments compared to the prior-year also partially offset the decline.

Investing Activities. Net cash used in investing activities was \$41.2 million, a decrease of \$155.4 million compared to fiscal 2013. The decrease in cash used resulted from a \$141.1 million decrease on net payments for business acquisitions, offset by \$3.9 million of cash received on a note relating to the sale of an operation, an \$8.1 million decrease in capital expenditures and a \$2.5 million increase on proceeds from the sale of property and equipment.

Financing Activities. Net cash used in financing activities was \$87.6 million, compared to net cash provided by financing activities of \$85.6 million last year. The decline was primarily due to a \$129.4 million decrease in net borrowings on long-term debt, and \$80.0 million of common stock repurchases, partially offset by a reduction of \$15.0 million in earn-out payments compared to fiscal 2013.

Debt Financing. On May 7, 2013, we entered into the Amended Credit Agreement and refinanced the indebtedness under our prior credit agreement. The Amended Credit Agreement is a \$665 million senior secured, five-year facility that provides for a \$205 million term loan facility (the "Term Loan Facility") and a \$460 million revolving credit facility (the "Revolving Credit Facility"). The Amended Credit Agreement allows us to, among other things, finance certain permitted open market repurchases of our common stock, permitted acquisitions, and cash dividends and distributions. The Revolving Credit Facility includes a \$200 million sublimit for the issuance of standby letters of credit, a \$20 million sublimit for swingline loans, and a \$150 million sublimit for multicurrency borrowings and letters of credit.

The Term Loan Facility was drawn on May 7, 2013 and is subject to quarterly amortization of principal, with no principal payment due in year 1, \$10.3 million payable in both years 2 and 3, and \$15.4 million payable in both years 4 and 5, respectively. The Term Loan may be prepaid at any time without penalty. We may borrow on the Revolving Credit Facility, at our option, at either (a) a Eurocurrency rate plus a margin that ranges from 1.15% to 2.00% per annum, or (b) a base rate for loans

Table of Contents

in U.S. dollars (the highest of the U.S. federal funds rate plus 0.50% per annum, the bank's prime rate or the Eurocurrency rate plus 1.00%) plus a margin that ranges from 0.15% to 1.00% per annum. In each case, the applicable margin is based on our Consolidated Leverage Ratio, calculated quarterly. The Term Loan Facility is subject to the same interest rate provisions. The interest rate of the Term Loan Facility at the date of inception was 1.57%. The Amended Credit Agreement expires on May 7, 2018, or earlier at our discretion upon payment in full of loans and other obligations.

As of September 28, 2014, we had \$202.4 million in outstanding borrowings under the Amended Credit Agreement, consisting entirely of the Term Loan Facility at a weighted-average interest rate of 1.82% per annum and \$1.2 million in standby letters of credit. Our average effective weighted-average interest rate on borrowings outstanding at September 28, 2014 under the Amended Credit Agreement, including the effects of interest rate swap agreements described in Note 14, "Derivative Financial Instruments" of the "Notes to Consolidated Financial Statements", was 2.97%. At September 28, 2014, we had \$460 million of available credit under the Revolving Credit Facility, of which \$155.3 million could be borrowed without a violation of our debt covenants. In addition, we entered into agreements with three banks to issue up to \$53 million in standby letters of credit. The aggregate amount of standby letters of credit outstanding under these additional facilities and other bank guarantees was \$31.7 million, of which \$6.5 million was issued in currencies other than the U.S. dollar.

The Amended Credit Agreement contains certain affirmative and restrictive covenants, and customary events of default. The financial covenants provide for a maximum Consolidated Leverage Ratio of 2.50 to 1.00 (total funded debt/EBITDA, as defined in the Amended Credit Agreement) and a minimum Consolidated Fixed Charge Coverage Ratio of 1.25 to 1.00 (EBITDA, as defined in the Amended Credit Agreement minus capital expenditures/cash interest plus taxes plus principal payments of indebtedness including capital leases, notes and post-acquisition payments).

On June 23, 2014, the Amended Credit Agreement was amended to revise the definition of "Permitted Share Repurchases" so that we may, during each fiscal year (beginning with the fiscal year that began on September 29, 2014) make Permitted Share Repurchases in an amount equal to the greater of \$75.0 million or 7.5% of Consolidated Net Worth at the end of the immediately preceding fiscal year (without any carry forward of unused portions of each basket to subsequent fiscal years).

At September 28, 2014, we were in compliance with these covenants with a consolidated leverage ratio of 1.53x and a consolidated fixed charge coverage ratio of 2.22x. Our obligations under the Amended Credit Agreement are guaranteed by certain of our subsidiaries and are secured by first priority liens on (i) the equity interests of certain of our subsidiaries, including those subsidiaries that are guarantors or borrowers under the Amended Credit Agreement, and (ii) our accounts receivable, general intangibles and intercompany loans, and those of our subsidiaries that are guarantors or borrowers.

Inflation. We believe our operations have not been, and, in the foreseeable future, are not expected to be, materially adversely affected by inflation or changing prices due to the average duration of our projects and our ability to negotiate prices as contracts end and new contracts begin.

Table of Contents

Dividends. Our Board of Directors has authorized following dividends:

| | Dividend Per Share | Record Date | Total Maximum Payment | Payment Date | |
|-------------------|---------------------------|--|------------------------------|---------------------|--|
| | | (in thousands, except per share data) | | | |
| April 28, 2014 | \$ 0.07 | May 16, 2014 | \$ 4,506 | June 4, 2014 | |
| July 28, 2014 | \$ 0.07 | August 15, 2014 | \$ 4,451 | September 5, 2014 | |
| November 10, 2014 | \$ 0.07 | November 26, 2014 | N/A | December 15, 2014 | |

Contractual Obligations. The following sets forth our contractual obligations at September 28, 2014:

| | Total | Year 1 | Years 2 - 3 | Years 4 - 5 | Beyond |
|--|-----------------------|------------------|--------------------|--------------------|------------------|
| | (in thousands) | | | | |
| Debt: | | | | | |
| Credit facility | \$ 202,438 | \$ 10,250 | \$ 30,750 | \$ 161,438 | \$ |
| Other debt | 4 | 4 | | | |
| Interest ⁽¹⁾ | 17,505 | 5,269 | 9,673 | 2,563 | |
| Capital leases | 1,471 | 781 | 622 | 68 | |
| Operating leases ⁽²⁾ | 211,115 | 65,412 | 84,183 | 39,143 | 22,377 |
| Contingent earn-outs ⁽³⁾ | 7,030 | 3,567 | 3,463 | | |
| Deferred compensation liability | 19,927 | | | | 19,927 |
| Unrecognized tax benefits ⁽⁴⁾ | 18,221 | | 4,210 | | 14,011 |
| Total | \$ 477,711 | \$ 85,283 | \$ 132,901 | \$ 203,212 | \$ 56,315 |

(1) Interest primarily related to the credit facility is based on a weighted-average interest rate at September 28, 2014, on borrowings that are presently outstanding.

(2) Predominantly represents real estate leases.

(3) Represents the estimated fair value recorded for contingent earn-out obligations for acquisitions consummated after fiscal 2009. The remaining maximum contingent earn-out obligations for these acquisitions are \$66.0 million.

(4) Represents liabilities for unrecognized tax benefits related to uncertain tax positions, excluding amounts related primarily to outstanding refund claims. We are unable to reasonably predict the timing of tax settlements, as tax audits can involve complex issues and the resolution of those issues may span multiple years, particularly if subject to negotiation or litigation. For more information, see Note 8, "Income Taxes" of the "Notes to Consolidated Financial Statements" included in Item 8.

Income Taxes

We review the realizability of deferred tax assets on a quarterly basis by assessing the need for a valuation allowance. As of September 28, 2014, we performed our assessment of net deferred tax assets. Significant management judgment is required in determining the provision for income taxes and, in particular, any valuation allowance recorded against our deferred tax assets. Applying the applicable

Edgar Filing: TETRA TECH INC - Form 10-K

accounting guidance requires an assessment of all available evidence, positive and negative, regarding the realizability of the net deferred tax assets. Based upon recent results, we concluded that a cumulative loss in recent years exists in certain foreign jurisdictions. We have historically relied on the following factors in our assessment of the realizability of our net deferred tax assets:

taxable income in prior carryback years as permitted under the tax law;

future reversals of existing taxable temporary differences;

Table of Contents

consideration of available tax planning strategies and actions that could be implemented, if necessary; and

estimates of future taxable income from our operations.

We considered these factors in our estimate of the reversal pattern of deferred tax assets, using assumptions that we believe are reasonable and consistent with operating results. However, as a result of projected cumulative pre-tax losses in certain foreign jurisdictions for the 36 months ended September 28, 2014, we concluded that our estimates of future taxable income and certain tax planning strategies did not constitute sufficient positive evidence to assert that it is more likely than not that certain deferred tax assets would be realizable before expiration. Although we project earnings in the business beyond 2014, we did not rely on these projections when assessing the realizability of our deferred tax assets. Based on our assessment, we have concluded that it is more likely than not that the assets will be realized except for the assets related to loss carry-forwards in foreign jurisdictions for which a valuation allowance of \$7.6 million had been provided in previous years.

In fiscal 2014, we received notification from the Internal Revenue Service ("IRS") that our appeals settlement in connection with three issues, the R&E credit, the domestic production activities deduction, and meals and entertainment expenses, was approved for fiscal years 2005 through 2007. The settlement of these issues, including interest, resulted in a cash refund of \$6.3 million, which was received in fiscal 2014. The settlement did not have a material impact on our financial statements as the amount received was consistent with the amount previously recognized in the financial statements.

In the fourth quarter of fiscal 2014, we settled with the IRS on two of three outstanding issues related to the fiscal year 2008 through 2009 audit. The settlement did not have a material impact on the financial statements. The R&E credit issue remained unresolved and has been submitted to IRS appeals for resolution. In addition, the IRS notified us of its intent to audit our fiscal 2010 through 2013 returns beginning in fiscal 2015.

During the second quarter of fiscal 2013, the American Taxpayer Relief Act of 2012 was signed into law. This law retroactively extended the federal R&E credits for amounts incurred from January 1, 2012 through December 31, 2013. Our effective tax rate for fiscal 2014 includes a tax benefit from R&E credits attributable to the first three months of fiscal 2014. Should the R&E credits provision be retroactively extended during fiscal 2015 additional benefits will be reflected in our effective tax rate during the quarter reporting period of enactment.

Off-Balance Sheet Arrangements

In the ordinary course of business, we may use off-balance sheet arrangements if we believe that such an arrangement would be an efficient way to lower our cost of capital or help us manage the overall risks of our business operations. We do not believe that such arrangements have had a material adverse effect on our financial position or our results of operations.

The following is a summary of our off-balance sheet arrangements:

Letters of credit and bank guarantees are used primarily to support project performance and insurance programs. We are required to reimburse the issuers of letters of credit and bank guarantees for any payments they make under the outstanding letters of credit or bank guarantees. Our Amended Credit Agreement and additional letter of credit facilities cover the issuance of our standby letters of credit and bank guarantees and are critical for our normal operations. If we default on the Amended Credit Agreement or additional credit facilities, our inability to issue or renew standby letters of credit and bank guarantees would impair our ability

Table of Contents

to maintain normal operations. At September 28, 2014, we had \$1.2 million in standby letters of credit outstanding under our Amended Credit Agreement and \$31.7 million in standby letters of credit outstanding under our additional letter of credit facilities.

From time to time, we provide guarantees and indemnifications related to our services. If our services under a guaranteed or indemnified project are later determined to have resulted in a material defect or other material deficiency, then we may be responsible for monetary damages or other legal remedies. When sufficient information about claims on guaranteed or indemnified projects is available and monetary damages or other costs or losses are determined to be probable, we recognize such guaranteed losses.

In the ordinary course of business, we enter into various agreements as part of certain unconsolidated subsidiaries, joint ventures, and other jointly executed contracts where we are jointly and severally liable. We enter into these agreements primarily to support the project execution commitments of these entities. The potential payment amount of an outstanding performance guarantee is typically the remaining cost of work to be performed by or on behalf of third parties under engineering and construction contracts. However, we are not able to estimate other amounts that may be required to be paid in excess of estimated costs to complete contracts and, accordingly, the total potential payment amount under our outstanding performance guarantees cannot be estimated. For cost-plus contracts, amounts that may become payable pursuant to guarantee provisions are normally recoverable from the client for work performed under the contract. For lump sum or fixed-price contracts, this amount is the cost to complete the contracted work less amounts remaining to be billed to the client under the contract. Remaining billable amounts could be greater or less than the cost to complete. In those cases where costs exceed the remaining amounts payable under the contract, we may have recourse to third parties, such as owners, co-venturers, subcontractors or vendors, for claims.

In the ordinary course of business, our clients may request that we obtain surety bonds in connection with contract performance obligations that are not required to be recorded in our consolidated balance sheets. We are obligated to reimburse the issuer of our surety bonds for any payments made thereunder. Each of our commitments under performance bonds generally ends concurrently with the expiration of our related contractual obligation.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of our financial statements in conformity with U.S. GAAP requires us to make estimates and assumptions in the application of certain accounting policies that affect amounts reported in our consolidated financial statements and accompanying footnotes included in Item 8 of this report. In order to understand better the changes that may occur to our financial condition, results of operations and cash flows, readers should be aware of the critical accounting policies we apply and estimates we use in preparing our consolidated financial statements. Although such estimates and assumptions are based on management's best knowledge of current events and actions we may undertake in the future, actual results could differ materially from those estimates.

Our significant accounting policies are described in the "Notes to Consolidated Financial Statements" included in Item 8. Highlighted below are the accounting policies that management considers most critical to investors' understanding of our financial results and condition, and that require complex judgments by management.

Table of Contents

Revenue Recognition and Contract Costs

We recognize revenue for most of our contracts using the percentage-of-completion method, primarily based on contract costs incurred to date compared to total estimated contract costs. We generally utilize the cost-to-cost approach to estimate the progress towards completion in order to determine the amount of revenue and profit to recognize. This method of revenue recognition requires us to prepare estimates of costs to complete contracts in progress. In making such estimates, judgments are required to evaluate contingencies such as potential variances in schedule; the cost of materials and labor productivity; and the impact of change orders, liability claims, contract disputes and achievement of contractual performance standards. Changes in total estimated contract cost and losses, if any, could materially impact our results of operations or financial position. Certain of our contracts are service-related contracts, such as providing operations and maintenance services or a variety of technical assistance services. Our service contracts are accounted for using the proportional performance method under which revenue is recognized in proportion to the number of service activities performed, in proportion to the direct costs of performing the service activities, or evenly across the period of performance depending upon the nature of the services provided.

We recognize revenue for work performed under three major types of contracts: fixed-price, time-and-materials and cost-plus.

Fixed-Price. We enter into two major types of fixed-price contracts: firm fixed-price ("FFP") and fixed-price per unit ("FPPU"). Under FFP contracts, our clients pay us an agreed fixed-amount negotiated in advance for a specified scope of work. We generally recognize revenue on FFP contracts using the percentage-of-completion method. If the nature or circumstances of the contract prevent us from preparing a reliable estimate at completion, we will delay profit recognition until adequate information about the contract's progress becomes available. Under our FPPU contracts, clients pay us a set fee for each service or production transaction that we complete. Accordingly, we recognize revenue under FPPU contracts as we complete the related service or production transactions, generally using the proportional performance method.

Time-and-Materials. Under time-and-materials contracts, we negotiate hourly billing rates and charge our clients based on the actual time that we spend on a project. In addition, clients reimburse us for our actual out-of-pocket costs of materials and other direct incidental expenditures that we incur in connection with our performance under the contract. The majority of our time-and-material contracts are subject to maximum contract values and, accordingly, revenue under these contracts is generally recognized under the percentage-of-completion method. However, time and materials contracts that are service-related contracts are accounted for utilizing the proportional performance method. Revenue on contracts that are not subject to maximum contract values is recognized based on the actual number of hours we spend on the projects plus any actual out-of-pocket costs of materials and other direct incidental expenditures that we incur on the projects. Our time-and-materials contracts also generally include annual billing rate adjustment provisions.

Cost-Plus. Under cost-plus contracts, we are reimbursed for allowable or otherwise defined costs incurred plus a negotiated fee. The contracts may also include incentives for various performance criteria, including quality, timeliness, ingenuity, safety and cost-effectiveness. In addition, our costs are generally subject to review by our clients and regulatory audit agencies, and such reviews could result in costs being disputed as non-reimbursable under the terms of the contract. Revenue for cost-plus contracts is recognized at the time services are performed based upon the amounts we expect to realize primarily using the percentage-of-completion method. Revenue is not recognized for non-recoverable costs. Performance incentives are included in our estimates of revenue when their realization is reasonably assured.

Table of Contents

If estimated total costs on any contract indicate a loss, we recognize the entire estimated loss in the period the loss becomes known. The cumulative effect of revisions to revenue, estimated costs to complete contracts, including penalties, incentive awards, change orders, claims, anticipated losses and others are recorded in the period in which the revisions are identified and the loss can be reasonably estimated. Such revisions could occur in any reporting period and the effects may be material depending on the size of the project or the adjustment.

Once contract performance is underway, we may experience changes in conditions, client requirements, specifications, designs, materials and expectations regarding the period of performance. Such changes are "change orders" and may be initiated by us or by our clients. In many cases, agreement with the client as to the terms of change orders is reached prior to work commencing; however, sometimes circumstances require that work progress without obtaining client agreement. Revenue related to change orders is recognized as costs are incurred. Change orders that are unapproved as to both price and scope are evaluated as claims.

Claims are amounts in excess of agreed contract prices that we seek to collect from our clients or other third parties for delays, errors in specifications and designs, contract terminations, change orders in dispute or unapproved as to both scope and price or other causes of unanticipated additional costs. Revenue on claims is recognized only to the extent that contract costs related to the claims have been incurred and when it is probable that the claim will result in a bona fide addition to contract value that can be reliably estimated. No profit is recognized on a claim until final settlement occurs. This can lead to a situation in which costs are recognized in one period and revenue is recognized in a subsequent period when a client agreement is obtained or a claim resolution occurs.

Insurance Matters, Litigation and Contingencies

In the normal course of business, we are subject to certain contractual guarantees and litigation. Generally, such guarantees relate to project schedules and performance. Most of the litigation involves us as a defendant in contractual disagreements, workers' compensation, personal injury and other similar lawsuits. We maintain insurance coverage for various aspects of our business and operations. However, we have elected to retain a portion of losses that may occur through the use of various deductibles, limits and retentions under our insurance programs. This practice may subject us to some future liability for which we are only partially insured or are completely uninsured.

We record in our consolidated balance sheets amounts representing our estimated liability for self-insurance claims. We utilize actuarial analyses to assist in determining the level of accrued liabilities to establish for our employee medical and workers' compensation self-insurance claims that are known and have been asserted against us, as well as for self-insurance claims that are believed to have been incurred based on actuarial analyses but have not yet been reported to our claims administrators at the balance sheet date. We include any adjustments to such insurance reserves in our consolidated results of operations.

Except as described in Note 18, "Commitments and Contingencies" of the "Notes to Consolidated Financial Statements" included in Item 8, we do not have any litigation or other contingencies that have had, or are currently anticipated to have, a material impact on our results of operations or financial position. As additional information about current or future litigation or other contingencies becomes available, management will assess whether such information warrants the recording of additional expenses relating to those contingencies. Such additional expenses could potentially have a material impact on our results of operations and financial position.

Table of Contents

Stock-Based Compensation

Our stock-based compensation plans include stock options, restricted stock, restricted stock units ("RSUs") and an employee stock purchase plan for our eligible employees and outside directors. Stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense over the requisite service period. Determining the fair value of stock-based awards at the grant date requires management to make assumptions and apply judgment to determine the fair value of our awards. These assumptions and judgments include future employee turnover rates, along with estimating the future volatility of our stock price, future stock option exercise behaviors and, for performance-based awards, the achievement of company performance goals. Our stock-based compensation expense was \$10.4 million, \$8.8 million and \$10.8 million for fiscal 2014, 2013 and 2012, respectively.

Goodwill and Intangibles

The cost of an acquired company is assigned to the tangible and intangible assets purchased and the liabilities assumed on the basis of their fair values at the date of acquisition. The determination of fair values of assets and liabilities acquired requires us to make estimates and use valuation techniques when a market value is not readily available. Any excess of purchase price over the fair value of net tangible and intangible assets acquired is allocated to goodwill. Goodwill typically represents the value paid for the assembled workforce and enhancement of our service offerings.

Identifiable intangible assets include backlog, non-compete agreements, client relations, trade names, patents and other assets. The costs of these intangible assets are amortized over their contractual or economic lives, which range from one to ten years. We assess the recoverability of the unamortized balance of our intangible assets when indicators of impairment are present based on expected future profitability and undiscounted expected cash flows and their contribution to our overall operations. Should the review indicate that the carrying value is not fully recoverable, the excess of the carrying value over the fair value of the intangible assets would be recognized as an impairment loss.

We perform our annual goodwill impairment review at the beginning of our fiscal fourth quarter. Our annual review at June 30, 2014 (i.e., the first day of our fiscal fourth quarter), indicated that we had no impairment of goodwill, and all of our reporting units had estimated fair values that were in excess of their carrying values, including goodwill. However, we identified four reporting units that had estimated fair values that exceeded their carrying values by less than 20% including two of the reporting units with impairment charges in fiscal 2013, Tetra Tech Canada ("TTC") and Global Mining Practice ("GMP"). Due to declines in actual and projected financial performance in fiscal 2014, our Tetra Tech Construction ("CON") reporting unit, which primarily performs civil construction projects, and Parkland also met this criteria. As of September 28, 2014, the goodwill amounts for CON and Parkland were \$47.8 million and \$95.6 million, respectively. Although we believe that our estimates of fair value for these reporting units are reasonable, if financial performance for these reporting units falls significantly below our expectations or market prices for similar business decline, the goodwill for these reporting units could become impaired. In addition, we regularly evaluate whether events and circumstances have occurred that may indicate a potential change in recoverability of goodwill. We perform interim goodwill impairment reviews between our annual reviews if certain events and circumstances have occurred, including a deterioration in general economic conditions, an increased competitive environment, a change in management, key personnel, strategy or customers, negative or declining cash flows, or a decline in actual or planned revenue or earnings compared with actual and projected results of relevant prior periods (see Note 6, "Goodwill and Intangible Assets" of the "Notes to Consolidated Financial Statements" in Item 8 for further discussion).

We believe the methodology that we use to review impairment of goodwill, which includes a significant amount of judgment and estimates, provides us with a reasonable basis to determine whether

Table of Contents

impairment has occurred. However, many of the factors employed in determining whether our goodwill is impaired are outside of our control and it is reasonably likely that assumptions and estimates will change in future periods. These changes could result in future impairments.

The goodwill impairment review involves the determination of the fair value of our reporting units, which for us are the components one level below our reportable segments. This process requires us to make significant judgments and estimates, including assumptions about our strategic plans with regard to our operations as well as the interpretation of current economic indicators and market valuations. Furthermore, the development of the present value of future cash flow projections includes assumptions and estimates derived from a review of our expected revenue growth rates, profit margins, business plans, cost of capital and tax rates. We also make certain assumptions about future market conditions, market prices, interest rates and changes in business strategies. Changes in assumptions or estimates could materially affect the determination of the fair value of a reporting unit. This could eliminate the excess of fair value over carrying value of a reporting unit entirely and, in some cases, result in impairment. Such changes in assumptions could be caused by a loss of one or more significant contracts, reductions in government or commercial client spending, or a decline in the demand for our services due to changing economic conditions. In the event that we determine that our goodwill is impaired, we would be required to record a non-cash charge that could result in a material adverse effect on our results of operations or financial position.

We use two methods to determine the fair value of our reporting units: (i) the Income Approach and (ii) the Market Approach. While each of these approaches is initially considered in the valuation of the business enterprises, the nature and characteristics of the reporting units indicate which approach is most applicable. The Income Approach utilizes the discounted cash flow method, which focuses on the expected cash flow of the reporting unit. In applying this approach, the cash flow available for distribution is calculated for a finite period of years. Cash flow available for distribution is defined, for purposes of this analysis, as the amount of cash that could be distributed as a dividend without impairing the future profitability or operations of the reporting unit. The cash flow available for distribution and the terminal value (the value of the reporting unit at the end of the estimation period) are then discounted to present value to derive an indication of the value of the business enterprise. The Market Approach is comprised of the guideline company method and the similar transactions method. The guideline company method focuses on comparing the reporting unit to select reasonably similar (or "guideline") publicly traded companies. Under this method, valuation multiples are (i) derived from the operating data of selected guideline companies; (ii) evaluated and adjusted based on the strengths and weaknesses of the reporting units relative to the selected guideline companies; and (iii) applied to the operating data of the reporting unit to arrive at an indication of value. In the similar transactions method, consideration is given to prices paid in recent transactions that have occurred in the reporting unit's industry or in related industries. For our annual impairment analysis at June 30, 2014, we weighted the Income Approach and the Market Approach at 70% and 30%, respectively. The Income Approach was given a higher weight because it has the most direct correlation to the specific economics of the reporting unit, as compared to the Market Approach, which is based on multiples of broad-based (i.e., less comparable) companies.

Contingent Consideration. Certain of our acquisition agreements include contingent earn-out arrangements, which are generally based on the achievement of future operating income thresholds. The contingent earn-out arrangements are based upon our valuations of the acquired companies and reduce the risk of overpaying for acquisitions if the projected financial results are not achieved.

The fair values of these earn-out arrangements are included as part of the purchase price of the acquired companies on their respective acquisition dates. For each transaction, we estimate the fair value of contingent earn-out payments as part of the initial purchase price and record the estimated fair value of contingent consideration as a liability in "Estimated contingent earn-out liabilities" and "Long-term estimated contingent earn-out liabilities" on the consolidated balance sheets. We consider several factors

Table of Contents

when determining that contingent earn-out liabilities are part of the purchase price, including the following: (1) the valuation of our acquisitions is not supported solely by the initial consideration paid, and the contingent earn-out formula is a critical and material component of the valuation approach to determining the purchase price; and (2) the former shareholders of acquired companies that remain as key employees receive compensation other than contingent earn-out payments at a reasonable level compared with the compensation of our other key employees. The contingent earn-out payments are not affected by employment termination.

We measure our contingent earn-out liabilities at fair value on a recurring basis using significant unobservable inputs classified within Level 3 of the fair value hierarchy (See Note 2, "Basis of Presentation and Preparation – Fair Value of Financial Instruments" of the "Notes to Consolidated Financial Statements" included in Item 8). We use a probability weighted discounted income approach as a valuation technique to convert future estimated cash flows to a single present value amount. The significant unobservable inputs used in the fair value measurements are operating income projections over the earn-out period (generally two or three years), and the probability outcome percentages we assign to each scenario. Significant increases or decreases to either of these inputs in isolation would result in a significantly higher or lower liability with a higher liability capped by the contractual maximum of the contingent earn-out obligation. Ultimately, the liability will be equivalent to the amount paid, and the difference between the fair value estimate and amount paid will be recorded in earnings. The amount paid that is less than or equal to the liability on the acquisition date is reflected as cash used in financing activities in our consolidated statements of cash flows. Any amount paid in excess of the liability on the acquisition date is reflected as cash used in operating activities.

We review and re-assess the estimated fair value of contingent consideration on a quarterly basis, and the updated fair value could differ materially from the initial estimates. Changes in the estimated fair value of our contingent earn-out liabilities related to the time component of the present value calculation are reported in interest expense. Adjustments to the estimated fair value related to changes in all other unobservable inputs are reported in operating income.

Income Taxes

We file a consolidated U.S. federal income tax return and a combined California franchise tax return. In addition, we file other returns that are required in the states, foreign jurisdictions and other jurisdictions in which we do business. We account for certain income and expense items differently for financial reporting and income tax purposes. Deferred tax assets and liabilities are computed for the differences between the financial statement and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to reverse. In determining the need for a valuation allowance on deferred tax assets, management reviews both positive and negative evidence, including current and historical results of operations, future income projections and potential tax planning strategies. Based on our assessment, we have concluded that a portion of the deferred tax assets at September 28, 2014, primarily net operating losses, will not be realized, and we have reserved accordingly.

According to the authoritative guidance on accounting for uncertainty in income taxes, we may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. For more information related to our unrecognized tax benefits, see Note 8, "Income Taxes" of the "Notes to Consolidated Financial Statements" included in Item 8.

Table of Contents

RECENT ACCOUNTING PRONOUNCEMENTS

For a discussion of recent accounting standards and the effect they could have on the consolidated financial statements, see Note 2, "Basis of Presentation and Preparation" of the "Notes to Consolidated Financial Statements" included in Item 8.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

We do not enter into derivative financial instruments for trading or speculation purposes. In the normal course of business, we have exposure to both interest rate risk and foreign currency transaction and translation risk, primarily related to the Canadian dollar ("CAD").

We are exposed to interest rate risk under our Amended Credit Agreement. We can borrow, at our option, under both the Term Loan Facility and Revolving Credit Facility. We may borrow on the Revolving Credit Facility, at our option, at either (a) a Eurocurrency rate plus a margin that ranges from 1.15% to 2.00% per annum, or (b) a base rate for loans in U.S. dollars (the highest of the U.S. federal funds rate plus 0.50% per annum, the bank's prime rate or the Eurocurrency rate plus 1.00%) plus a margin that ranges from 0.15% to 1.00% per annum. Borrowings at the base rate have no designated term and may be repaid without penalty any time prior to the Facility's maturity date. Borrowings at a Eurodollar rate have a term no less than 30 days and no greater than 90 days. Typically, at the end of such term, such borrowings may be rolled over at our discretion into either a borrowing at the base rate or a borrowing at a Eurodollar rate with similar terms, not to exceed the maturity date of the Facility. The Facility matures on May 7, 2018. At September 28, 2014 we had borrowings outstanding under the Amended Credit Agreement of \$202.4 million at a weighted-average interest rate of 1.82%, of which the entire amount was outstanding under the Term Loan Facility.

In fiscal 2013, we entered into three interest rate swap agreements with three banks to fix the variable interest rate on \$153.8 million of our Term Loan Facility. In fiscal 2014, we entered into two interest rate swap agreements with two banks to fix the variable interest rate on \$51.2 million of our Term Loan Facility. The objective of these interest rate swaps was to eliminate the variability of our cash flows on the amount of interest expense we pay under our Amended Credit Facility. Our average effective weighted-average interest rate on borrowings outstanding under the Amended Credit Agreement, including the effects of interest rate swap agreements, at September 28, 2014 was 2.97%. For more information, see Note 14, "Derivative Financial Instruments" of the "Notes to Consolidated Financial Statements" in Item 8.

Most of our transactions are in U.S. dollars; however, some of our subsidiaries conduct business in foreign currencies, primarily the CAD. Therefore, we are subject to currency exposure and volatility because of currency fluctuations. We attempt to minimize our exposure to these fluctuations by matching revenue and expenses in the same currency for our contracts. For fiscal 2014, we recognized foreign currency gains of \$0.1 million compared to losses of \$0.8 million for the prior year. Foreign currency gains and losses were recognized as part of "Selling, general and administrative expenses" in our consolidated statements of operations.

We have foreign currency exchange rate exposure in our results of operations and equity primarily as a result of the currency translation related to our Canadian subsidiaries where the local currency is the functional currency. To the extent the U.S. dollar strengthens against the CAD, the translation of these foreign currency denominated transactions will result in reduced revenue, operating expenses, assets and liabilities. Similarly, our revenue, operating expenses, assets and liabilities will increase if the U.S. dollar weakens against the CAD. For fiscal 2014 and 2013, 25.9% and 26.7% of our consolidated revenue, respectively, was generated by our international business, and such revenue was primarily denominated in CAD. For fiscal 2014, the effect of foreign exchange rate translation on the consolidated balance sheets

Table of Contents

was a reduction in equity of \$44.6 million compared to a reduction in equity of \$29.2 million in fiscal 2013. These amounts were recognized as an adjustment to equity through other comprehensive income.

In fiscal 2009, we entered into an intercompany promissory note with a wholly-owned Canadian subsidiary in connection with the acquisition of Wardrop Engineering, Inc. The intercompany note receivable is denominated in CAD and has a fixed rate of interest payable in CAD. In the second quarter of fiscal 2010, we entered into a forward contract for CAD \$4.2 million (equivalent to U.S. \$3.9 million at the date of inception) that matured on January 28, 2013. In the third quarter of fiscal 2011, we entered into a forward contract for CAD \$4.2 million (equivalent to U.S. \$4.2 million at the date of inception) with a maturity date of January 27, 2014. Our objective was to eliminate variability of our cash flows on the amount of interest income we receive on the promissory note from changes in foreign currency exchange rates. In the second quarter of fiscal 2013, we settled one of the foreign currency forward contracts for U.S. \$3.9 million and terminated the remaining forward contract.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders of Tetra Tech, Inc.:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, comprehensive income (loss), equity and cash flows present fairly, in all material respects, the financial position of Tetra Tech, Inc. and its subsidiaries at September 28, 2014 and September 29, 2013, and the results of their operations and their cash flows for each of the three years in the period ended September 28, 2014, in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 28, 2014 based on criteria established in *Internal Control - Integrated Framework* (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and the financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting, appearing under Item 9A of this Form 10-K. Our responsibility is to express opinions on these financial statements, on the financial statement schedule and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Table of Contents

TETRA TECH, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Description of Business

We are a leading provider of consulting, engineering, technical services, program management, and construction management services that focus on addressing fundamental needs for water, environment, infrastructure, resource management and energy. We typically begin at the earliest stage of a project, leading with science, identifying technical solutions to problems and developing execution plans tailored to our clients' needs and resources. Our solutions may span the entire life cycle of consulting and engineering projects and include applied science, research and development, information technology, engineering, design, construction management, and operations and maintenance.

2. Basis of Presentation and Preparation

Principles of Consolidation and Presentation. The consolidated financial statements include our accounts and those of joint ventures of which we are the primary beneficiary. All significant intercompany balances and transactions have been eliminated in consolidation.

Fiscal Year. We report results of operations based on 52 or 53-week periods ending on the Sunday nearest September 30. Fiscal years 2014, 2013 and 2012 each contained 52 weeks.

Use of Estimates. The preparation of financial statements in conformity with U.S. GAAP requires us to make estimates and assumptions. These estimates and assumptions affect the amounts reported in our consolidated financial statements and accompanying notes. Although such estimates and assumptions are based on management's best knowledge of current events and actions we may take in the future, actual results could differ materially from those estimates.

Revenue Recognition and Contract Costs. We recognize revenue for most of our contracts using the percentage-of-completion method, primarily based on contract costs incurred to date compared to total estimated contract costs. We generally utilize the cost-to-cost approach to estimate the progress towards completion in order to determine the amount of revenue and profit to recognize. Revenue and cost estimates for each significant contract are reviewed and reassessed quarterly. Changes in those estimates could result in recognition of cumulative catch-up adjustments to the contract's inception-to-date revenue, costs and profit in the period in which such changes are made. Changes in revenue and cost estimates could also result in a projected loss that would be recorded immediately in earnings. For fiscal years 2014, 2013 and 2012, we recognized net favorable (unfavorable) operating income adjustments of (\$35.9) million, (\$40.1) million and \$0.5 million, respectively, due to changes in estimates. As of September 28, 2014 and September 29, 2013, we recorded a liability for anticipated losses of \$18.6 million and \$13.3 million, respectively. The estimated cost to complete the related contracts as of September 28, 2014 was \$103 million.

Certain of our contracts are service-related contracts, such as providing operations and maintenance services or a variety of technical assistance services. Our service contracts are accounted for using the proportional performance method under which revenue is recognized in proportion to the number of service activities performed, in proportion to the direct costs of performing the service activities, or evenly across the period of performance depending upon the nature of the services provided.

We recognize revenue for work performed under three major types of contracts: fixed-price, time-and-materials and cost-plus.

Table of Contents**TETRA TECH, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****2. Basis of Presentation and Preparation (Continued)**

Fixed-Price. We enter into two major types of fixed-price contracts: firm fixed-price ("FFP") and fixed-price per unit ("FPPU"). Under FFP contracts, our clients pay us an agreed fixed-amount negotiated in advance for a specified scope of work. We generally recognize revenue on FFP contracts using the percentage-of-completion method. If the nature or circumstances of the contract prevent us from preparing a reliable estimate at completion, we will delay profit recognition until adequate information about the contract's progress becomes available. Under our FPPU contracts, clients pay us a set fee for each service or production transaction that we complete. Accordingly, we recognize revenue under FPPU contracts as we complete the related service or production transactions, generally using the proportional performance method.

Time-and-Materials. Under time-and-materials contracts, we negotiate hourly billing rates and charge our clients based on the actual time that we spend on a project. In addition, clients reimburse us for our actual out-of-pocket costs for materials and other direct incidental expenditures that we incur in connection with our performance under the contract. The majority of our time-and-material contracts are subject to maximum contract values and, accordingly, revenue under these contracts is generally recognized under the percentage-of-completion method. However, time and materials contracts that are service-related contracts are accounted for utilizing the proportional performance method. Revenue on contracts that are not subject to maximum contract values is recognized based on the actual number of hours we spend on the projects plus any actual out-of-pocket costs of materials and other direct incidental expenditures that we incur on the projects. Our time-and-materials contracts also generally include annual billing rate adjustment provisions.

Cost-Plus. Under cost-plus contracts, we are reimbursed for allowable or otherwise defined costs incurred plus a negotiated fee. The contracts may also include incentives for various performance criteria, including quality, timeliness, ingenuity, safety and cost-effectiveness. In addition, our costs are generally subject to review by our clients and regulatory audit agencies, and such reviews could result in costs being disputed as non-reimbursable under the terms of the contract. Revenue for cost-plus contracts is recognized at the time services are performed based upon the amounts we expect to realize primarily using the percentage-of-completion method. Revenue is not recognized for non-recoverable costs. Performance incentives are included in our estimates of revenue when their realization is reasonably assured.

If estimated total costs on any contract indicate a loss, we recognize the entire estimated loss in the period the loss becomes known. The cumulative effect of revisions to revenue, estimated costs to complete contracts, including penalties, incentive awards, change orders, claims, liquidated damages, anticipated losses, and other revisions are recorded in the period in which the revisions are identified and the loss can be reasonably estimated. Such revisions could occur in any reporting period and the effects may be material depending on the size of the project or the adjustment.

Once contract performance is underway, we may experience changes in conditions, client requirements, specifications, designs, materials and expectations regarding the period of performance. Such changes are "change orders" and may be initiated by us or by our clients. In many cases, agreement with the client as to the terms of change orders is reached prior to work commencing; however, sometimes circumstances require that work progress without obtaining client agreement. Revenue related to change orders is recognized as costs are incurred. Change orders that are unapproved as to both price and scope are evaluated as claims.

Table of Contents

TETRA TECH, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. Basis of Presentation and Preparation (Continued)

Claims are amounts in excess of agreed contract prices that we seek to collect from our clients or other third parties for delays, errors in specifications and designs, contract terminations, change orders in dispute or unapproved as to both scope and price, or other causes of unanticipated additional costs. Revenue on claims is recognized only to the extent that contract costs related to the claims have been incurred and when it is probable that the claim will result in a bona fide addition to contract value that can be reliably estimated. No profit is recognized on a claim until final settlement occurs. This can lead to a situation in which costs are recognized in one period and revenue is recognized in a subsequent period when a client agreement is obtained or a claims resolution occurs.

Cash and Cash Equivalents. Cash and cash equivalents include all highly liquid investments with maturities of 90 days or less at the date of purchase. Restricted cash of \$4.5 million was included in "Prepaid expenses and other current assets" on both consolidated balance sheets at fiscal 2014 and 2013 year-ends. For cash held by our consolidated joint ventures, see Note 17, "Joint Ventures."

Insurance Matters, Litigation and Contingencies. In the normal course of business, we are subject to certain contractual guarantees and litigation. In addition, we maintain insurance coverage for various aspects of our business and operations. We record in our consolidated balance sheets amounts representing our estimated liability for these legal and insurance obligations. We include any adjustments to these liabilities in our consolidated results of operations.

Accounts Receivable Net. Net accounts receivable is primarily comprised of billed and unbilled accounts receivable, contract retentions and allowances for doubtful accounts. Billed accounts receivable represent amounts billed to clients that have not been collected. Unbilled accounts receivable represent revenue recognized but not yet billed pursuant to contract terms or billed after the period end date. Most of our unbilled receivables at September 28, 2014 are expected to be billed and collected within 12 months. Unbilled accounts receivable also include amounts related to requests for equitable adjustment to contracts that provide for price redetermination primarily with the U.S. federal government. These amounts are recorded only when they can be reliably estimated and realization is probable. Contract retentions represent amounts withheld by clients until certain conditions are met or the project is completed, which may be several months or years. Allowances for doubtful accounts represent the amounts that may become uncollectible or unrealizable in the future. We determine an estimated allowance for uncollectible accounts based on management's consideration of trends in the actual and forecasted credit quality of our clients, including delinquency and payment history; type of client, such as a government agency or a commercial sector client; and general economic and particular industry conditions that may affect a client's ability to pay. Billings in excess of costs on uncompleted contracts represent the amounts of cash collected from clients and billings to clients on contracts in advance of work performed and revenue recognized. The majority of these amounts will be earned within 12 months.

Property and Equipment. Property and equipment are recorded at cost and are depreciated over their estimated useful lives using the straight-line method. When property and equipment are retired or otherwise disposed of, the cost and accumulated depreciation are removed from our consolidated balance sheets and any resulting gain or loss is reflected in our consolidated statements of operations. Expenditures for maintenance and repairs are expensed as incurred. Generally, estimated useful lives range from three to ten years for equipment, furniture and fixtures. Buildings are depreciated over periods not exceeding 40 years. Leasehold improvements are amortized on a straight-line basis over the shorter of their estimated useful lives or the length of the lease.

Table of Contents

TETRA TECH, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. Basis of Presentation and Preparation (Continued)

Long-Lived Assets. Our policy regarding long-lived assets is to evaluate the recoverability of our assets when the facts and circumstances suggest that the assets may be impaired. This assessment is performed based on the estimated undiscounted cash flows compared to the carrying value of the assets. If the future cash flows (undiscounted and without interest charges) are less than the carrying value, a write-down would be recorded to reduce the related asset to its estimated fair value.

We recognize a liability for contract termination costs associated with an exit activity for costs that will continue to be incurred under a lease for its remaining term without economic benefit to us, initially measured at its fair value at the cease-use date. The fair value is determined based on the remaining lease rentals, adjusted for the effects of any prepaid or deferred items recognized under the lease, and reduced by estimated sublease rentals.

Business Combinations. The cost of an acquired company is assigned to the tangible and intangible assets purchased and the liabilities assumed on the basis of their fair values at the date of acquisition. The determination of fair values of assets and liabilities acquired requires us to make estimates and use valuation techniques when a market value is not readily available. Any excess of purchase price over the fair value of net tangible and intangible assets acquired is allocated to goodwill. Goodwill typically represents the value paid for the assembled workforce and enhancement of our service offerings. Transaction costs associated with business combinations are expensed as they are incurred.

Goodwill and Intangible Assets. Goodwill represents the excess of the aggregate purchase price over the fair value of the net assets acquired in a business acquisition. Following an acquisition, we perform an analysis to value the acquired company's tangible and identifiable intangible assets and liabilities. With respect to identifiable intangible assets, we consider backlog, non-compete agreements, client relations, trade names, patents and other assets. We amortize our intangible assets based on the period over which the contractual or economic benefits of the intangible assets are expected to be realized. We assess the recoverability of the unamortized balance of our intangible assets when indicators of impairment are present based on expected future profitability and undiscounted expected cash flows and their contribution to our overall operations. Should the review indicate that the carrying value is not fully recoverable, the excess of the carrying value over the fair value of the intangible assets would be recognized as an impairment loss.

We test our goodwill for impairment on an annual basis, and more frequently when an event occurs or circumstances indicate that the carrying value of the asset may not be recoverable. We believe the methodology that we use to review impairment of goodwill, which includes a significant amount of judgment and estimates, provides us with a reasonable basis to determine whether impairment has occurred. However, many of the factors employed in determining whether our goodwill is impaired are outside of our control and it is reasonably likely that assumptions and estimates will change in future periods. These changes could result in future impairments.

We perform our annual goodwill impairment review at the beginning of our fiscal fourth quarter. Our last annual review at June 30, 2014 (i.e., the first day of our fiscal fourth quarter), indicated that we had no impairment of goodwill, and all of our reporting units had estimated fair values that were in excess of their carrying values, including goodwill. In addition, we regularly evaluate whether events and circumstances have occurred that may indicate a potential change in recoverability of goodwill. We perform interim goodwill impairment reviews between our annual reviews if certain events and

2. Basis of Presentation and Preparation (Continued)

circumstances have occurred, including a deterioration in general economic conditions, an increased competitive environment, a change in management, key personnel, strategy or customers, negative or declining cash flows, or a decline in actual or planned revenue or earnings compared with actual and projected results of relevant prior periods (See Note 6, "Goodwill and Intangible Assets" for further discussion). We assess goodwill for impairment at the reporting unit level, which is defined as an operating segment or one level below an operating segment, referred to as a component. Our operating segments are the same as our reportable segments and our reporting units for goodwill impairment testing are the components one level below our reportable segments. These components constitute a business for which discrete financial information is available and where segment management regularly reviews the operating results of that component. We aggregate components within an operating segment that have similar economic characteristics.

The impairment test for goodwill is a two-step process involving the comparison of the estimated fair value of each reporting unit to the reporting unit's carrying value, including goodwill. We estimate the fair value of reporting units based on a comparison and weighting of the income approach, specifically the discounted cash flow method and the market approach, which estimates the fair value our reporting units based upon comparable market prices and recent transactions and also validates the reasonableness of the multiples from the income approach. If the fair value of a reporting unit exceeds its carrying amount, the goodwill of the reporting unit is not considered impaired; therefore, the second step of the impairment test is unnecessary. If the carrying amount of a reporting unit exceeds its fair value, we perform the second step of the goodwill impairment test to measure the amount of impairment loss to be recorded. If our goodwill is impaired, we are required to record a non-cash charge that could have a material adverse effect on our consolidated financial statements.

Contingent Consideration. Most of our acquisition agreements include contingent earn-out arrangements, which are generally based on the achievement of future operating income thresholds. The contingent earn-out arrangements are based upon our valuations of the acquired companies and reduce the risk of overpaying for acquisitions if the projected financial results are not achieved. These contingent earn-out payments are reflected as cash flows used in investing activities on the consolidated statements of cash flows in the period paid.

The fair values of these earn-out arrangements are included as part of the purchase price of the acquired companies on their respective acquisition dates. For each transaction, we estimate the fair value of contingent earn-out payments as part of the initial purchase price and record the estimated fair value of contingent consideration as a liability in "Estimated contingent earn-out liabilities" and "Long-term estimated contingent earn-out liabilities" on the consolidated balance sheets. We consider several factors when determining that contingent earn-out liabilities are part of the purchase price, including the following: (1) the valuation of our acquisitions is not supported solely by the initial consideration paid, and the contingent earn-out formula is a critical and material component of the valuation approach to determining the purchase price; and (2) the former owners of acquired companies that remain as key employees receive compensation other than contingent earn-out payments at a reasonable level compared with the compensation of our other key employees. The contingent earn-out payments are not affected by employment termination.

We measure our contingent earn-out liabilities at fair value on a recurring basis using significant unobservable inputs classified within Level 3 of the fair value hierarchy. We use a probability weighted

Table of Contents

TETRA TECH, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. Basis of Presentation and Preparation (Continued)

discounted income approach as a valuation technique to convert future estimated cash flows to a single present value amount. The significant unobservable inputs used in the fair value measurements are operating income projections over the earn-out period (generally two or three years), and the probability outcome percentages we assign to each scenario. Significant increases or decreases to either of these inputs in isolation would result in a significantly higher or lower liability with a higher liability capped by the contractual maximum of the contingent earn-out obligation. Ultimately, the liability will be equivalent to the amount paid, and the difference between the fair value estimate and amount paid will be recorded in earnings. The amount paid that is less than or equal to the liability on the acquisition date is reflected as cash used in financing activities in our consolidated statements of cash flows. Any amount paid in excess of the liability on the acquisition date is reflected as cash used in operating activities.

We review and re-assess the estimated fair value of contingent consideration on a quarterly basis, and the updated fair value could differ materially from the initial estimates. Changes in the estimated fair value of our contingent earn-out liabilities related to the time component of the present value calculation are reported in interest expense. Adjustments to the estimated fair value related to changes in all other unobservable inputs are reported in operating income.

Assets Held for Sale. Assets that meet the held for sale classification criteria are valued at the lower of their carrying amount or estimated fair value less cost to sell. If the carrying amount of the asset exceeds its estimated fair value less cost to sell, an impairment loss is recognized. Depreciation, depletion and amortization expense is not recorded on assets once they are classified as held for sale.

Fair Value of Financial Instruments. We determine the fair values of our financial instruments, including short-term investments, debt instruments and derivative instruments based on inputs or assumptions that market participants would use in pricing an asset or a liability. We categorize our instruments using a valuation hierarchy for disclosure of the inputs used to measure fair value. This hierarchy prioritizes the inputs into three broad levels as follows: Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities; Level 2 inputs are quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument; and Level 3 inputs are unobservable inputs based on our own assumptions used to measure assets and liabilities at fair value. The classification of a financial asset or liability within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

The carrying amounts of cash and cash equivalents, accounts receivable and accounts payable approximate fair values based on their short-term nature. The carrying amounts of our revolving credit facility approximates fair value because the interest rates are based upon variable reference rates (see Note 9, "Long-Term Debt" and Note 14, "Derivative Financial Instruments" for additional disclosure). Certain other assets and liabilities, such as contingent earn-out liabilities, assets held for sale and amounts related to cash-flow hedges, are required to be carried in our consolidated financial statements at fair value.

Our fair value measurement methods may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Although we believe our valuation methods are appropriate and consistent with those used by other market participants, the use of different

Table of Contents

TETRA TECH, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. Basis of Presentation and Preparation (Continued)

methodologies or assumptions to determine fair value could result in a different fair value measurement at the reporting date.

Derivative Financial Instruments. We account for our derivative instruments as either assets or liabilities and carry them at fair value. For derivative instruments that hedge the exposure to variability in expected future cash flows that are designated as cash flow hedges, the effective portion of the gain or loss on the derivative instrument is reported as a component of accumulated other comprehensive income in stockholders' equity and reclassified into income in the same period or periods during which the hedged transaction affects earnings. The ineffective portion of the gain or loss on the derivative instrument, if any, is recognized in current income. To receive hedge accounting treatment, cash flow hedges must be highly effective in offsetting changes to expected future cash flows on hedged transactions.

The net gain or loss on the effective portion of a derivative instrument that is designated as an economic hedge of the foreign currency translation exposure generated by the re-measurement of certain assets and liabilities denominated in a non-functional currency in a foreign operation is reported in the same manner as a foreign currency translation adjustment. Accordingly, any gains or losses related to these derivative instruments are recognized in current income. Derivatives that do not qualify as hedges are adjusted to fair value through current income.

Deferred Compensation. We maintain a non-qualified defined contribution supplemental retirement plan for certain key employees that is accounted for in accordance with applicable authoritative guidance on accounting for deferred compensation arrangements where amounts earned are held in a rabbi trust and invested. Employee deferrals and our match are deposited into a rabbi trust, and the funds are generally invested in individual variable life insurance contracts that we own and are specifically designed to informally fund savings plans of this nature. Our consolidated balance sheets reflect our investment in variable life insurance contracts in "Other long-term assets." Our obligation to participating employees is reflected in "Other long-term liabilities." All income and expenses related to the rabbi trust are reflected in our consolidated statements of operations.

Income Taxes. We file a consolidated U.S. federal income tax return and a combined California franchise tax return. In addition, we file other returns that are required in the states, foreign jurisdictions and other jurisdictions in which we do business. We account for certain income and expense items differently for financial reporting and income tax purposes. Deferred tax assets and liabilities are computed for the difference between the financial statement and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to reverse. In determining the need for a valuation allowance, management reviews both positive and negative evidence, including current and historical results of operations, future income projections and potential tax planning strategies. Based on our assessment, we have concluded that a portion of the deferred tax assets at September 28, 2014 will not be realized.

According to the authoritative guidance on accounting for uncertainty in income taxes, we may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate

Table of Contents

TETRA TECH, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. Basis of Presentation and Preparation (Continued)

settlement. This guidance also addresses de-recognition, classification, interest and penalties on income taxes, accounting in interim periods and disclosure requirements for uncertain tax positions.

Concentration of Credit Risk. Financial instruments that subject us to credit risk consist primarily of cash and cash equivalents and net accounts receivable. In the event that we have surplus cash, we place our temporary cash investments with lower risk financial institutions and, by policy, limit the amount of investment exposure to any one financial institution. Approximately 21% of accounts receivable were due from various agencies of the U.S. federal government at fiscal 2014 year-end. The remaining accounts receivable are generally diversified due to the large number of organizations comprising our client base and their geographic dispersion. We perform ongoing credit evaluations of our clients and maintain an allowance for potential credit losses. Approximately 45%, 29% and 26% of our fiscal 2014 revenue was generated from our U.S government, U.S. commercial and international clients, respectively (see Note 19, "Reportable Segments" for more information).

Foreign Currency Translation. We determine the functional currency of our foreign operating units based upon the primary currency in which they operate. These operating units maintain their accounting records in their local currency, primarily CAD. Where the functional currency is not the U.S. dollar, translation of assets and liabilities to U.S. dollars is based on exchange rates at the balance sheet date. Translation of revenue and expenses to U.S. dollars is based on the average rate during the period. Translation gains or losses are reported as a component of other comprehensive income (loss). Gains or losses from foreign currency transactions are included in results of operations, with the exception of intercompany foreign transactions that are considered long-term investments, which are recorded in "Accumulated other comprehensive income" on the consolidated balance sheets.

Recently Adopted and Issued Accounting Guidance. In December 2011, the Financial Accounting Standards Board ("FASB") issued new guidance to enhance disclosures about financial instruments and derivative instruments that are either offset on the statement of financial position or subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset on the statement of financial position. We are required to provide both net and gross information for these assets and liabilities in order to facilitate comparability between financial statements prepared on the basis of U.S. GAAP and financial statements prepared on the basis of International Financial Reporting Standards. This guidance became effective for us in the first quarter of fiscal 2014 on a retrospective basis. The adoption of this guidance had no impact on our consolidated financial statements.

In February 2013, the FASB issued an update to the reporting of reclassifications out of accumulated other comprehensive income. We are required to disclose additional information about changes in and significant items reclassified out of accumulated other comprehensive income. The guidance became effective for us in the first quarter of fiscal 2014. The adoption of this guidance did not have an impact on our consolidated financial statements.

In July 2013, the FASB issued an update on an inclusion of the Fed Funds Effective Swap as a benchmark interest rate (Overnight Interest Swap Rate) for hedge accounting purposes. This guidance permits the Fed Funds Effective Swap Rate to be used as a U.S. benchmark interest rate for hedge accounting purposes under U.S. GAAP. This guidance became effective prospectively for qualifying new or redesigned hedging relationships entered into on or after July 17, 2013. The adoption of this guidance did not have a material impact on our consolidated financial statements.

Table of Contents

TETRA TECH, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. Basis of Presentation and Preparation (Continued)

In July 2013, the FASB issued an update on the financial statement presentation of unrecognized tax benefits. We are required to present a liability related to an unrecognized tax benefit as a reduction of a deferred tax asset for a net operating loss carryforward, a similar tax loss or a tax credit carryforward if such settlement is required or expected in the event the uncertain tax position is disallowed. This guidance will be effective for us in the first quarter of fiscal 2015. We do not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

In April 2014, the FASB issued guidance that changes the threshold for reporting discontinued operations and adds new disclosures. The new guidance defines a discontinued operation as a disposal of a component or group of components that is disposed of or is classified as held for sale and represents a strategic shift that has (or will have) a major effect on our operations and financial results. For disposals of individually significant components that do not qualify as discontinued operations, we must disclose pre-tax earnings of the disposed component. This guidance is effective for us prospectively in the first quarter of fiscal 2016. Early adoption is permitted, but only for disposals (or classifications as held for sale) that have not been reported in financial statements previously issued or available for issuance. We do not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

In May 2014, the FASB issued an accounting standard which will supersede existing revenue recognition guidance under current U.S. GAAP. The new standard is a comprehensive new revenue recognition model that requires a company to recognize revenue to depict the transfer of goods or services to a customer at an amount that reflects the consideration it expects to receive in exchange for those goods or services. The accounting standard is effective for us in the first quarter of fiscal year 2018. Companies may use either a full retrospective or a modified retrospective approach to adopt this standard and management is currently evaluating which transition approach to use. We are currently in the process of assessing what impact this new standard may have on our consolidated financial statements.

In August 2014, the FASB issued an amendment to the accounting guidance related to the evaluation of an entity to continue as a going concern. The amendment establishes management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern in connection with preparing financial statements for each annual and interim reporting period. The update also gives guidance to determine whether to disclose information about relevant conditions and events when there is substantial doubt about an entity's ability to continue as a going concern. This guidance is effective for us in the first quarter of fiscal 2017. We do not expect the adoption of this guidance to have an impact on our consolidated financial statements.

3. Stock Repurchase and Dividends

In June 2013, our Board of Directors authorized a stock repurchase program (the "Stock Repurchase Program") under which we could repurchase up to \$100 million of our common stock. Stock repurchases could be made on the open market or in privately negotiated transactions with third parties. From the inception of the Stock Repurchase Program through September 28, 2014, we repurchased through open market purchases a total of 3.9 million shares at an average price of \$25.59 per share, for a total cost of \$100 million.

Table of Contents

TETRA TECH, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

3. Stock Repurchase and Dividends (Continued)

On April 28, 2014, the Board of Directors declared a quarterly cash dividend of \$0.07 per share payable on June 4, 2014 to stockholders of record as of the close of business on May 16, 2014. On July 28, 2014, the Board of Directors declared a quarterly cash dividend of \$0.07 per share payable on September 5, 2014 to stockholders of record as of the close of business on August 15, 2014. We paid \$9.0 million of cash dividends, or \$0.14 per share, for the fiscal year ended September 28, 2014.

Subsequent Events. On November 10, 2014, the Board of Directors declared a quarterly cash dividend of \$0.07 per share payable on December 15, 2014 to stockholders of record as of the close of business on November 26, 2014. On November 10, 2014, the Board of Directors also authorized a new stock repurchase program under which we may repurchase up to \$200 million of our common stock over the next two years.

4. Accounts Receivable Net

Net accounts receivable and billings in excess of costs on uncompleted contracts consisted of the following at September 28, 2014 and September 29, 2013:

| | Fiscal Year Ended | |
|--|-------------------------------|-------------------------------|
| | September 28, 2014 | September 29, 2013 |
| | (in thousands) | |
| Billed | \$ 351,693 | \$ 375,149 |
| Unbilled | 363,050 | 306,969 |
| Contract retentions | 26,929 | 23,353 |
| | | |
| Total accounts receivable gross | 741,672 | 705,471 |
| Allowance for doubtful accounts | (39,780) | (44,624) |
| | | |
| Total accounts receivable net | \$ 701,892 | \$ 660,847 |
| | | |
| Billings in excess of costs on uncompleted contracts | \$ 103,343 | \$ 79,507 |

Billed accounts receivable represent amounts billed to clients that have not been collected. Unbilled accounts receivable represent revenue recognized but not yet billed pursuant to contract terms or billed after the period end date. Most of our unbilled receivables at September 28, 2014 are expected to be billed and collected within 12 months. Contract retentions represent amounts withheld by clients until certain conditions are met or the project is completed, which may be several months or years. The allowance for doubtful accounts represents amounts that may become uncollectible or unrealizable in the future. We determine an estimated allowance for uncollectible accounts based on management's consideration of trends in the actual and forecasted credit quality of our clients, including delinquency and payment history; type of client, such as a government agency or a commercial sector client; and general economic and particular industry conditions that may affect a client's ability to pay. Billings in excess of costs on uncompleted contracts represent the amount of cash collected from clients and billings to clients on contracts in advance of revenue recognized. The majority of billings in excess of costs on uncompleted contracts, excluding those related to claims, will be earned within 12 months.

Table of Contents

TETRA TECH, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

4. Accounts Receivable Net (Continued)

Once contract performance is underway, we may experience changes in conditions, client requirements, specifications, designs, materials and expectations regarding the period of performance. Such changes result in "change orders" and may be initiated by us or by our clients. In many cases, agreement with the client as to the terms of change orders is reached prior to work commencing; however, sometimes circumstances require that work progresses without obtaining a definitive client agreement. Unapproved change orders constitute claims in excess of agreed contract prices that we seek to collect from our clients (or other third parties) for delays, errors in specifications and designs, contract terminations, or other causes of unanticipated additional costs. Revenue on claims is recognized when contract costs related to claims have been incurred and when their addition to contract value can be reliably estimated. This can lead to a situation in which costs are recognized in one period and revenue is recognized in a subsequent period such as when client agreement is obtained or a claims resolution occurs.

Total accounts receivable at September 28, 2014 and September 29, 2013 included approximately \$79 million and \$41 million, respectively, related to claims, including requests for equitable adjustment, on contracts that provide for price redetermination. The increase from the end of fiscal 2013 includes the impact of changes in scope on an oil and gas project in Western Canada in fiscal 2014 that is currently in negotiation with the client. The remainder of the increase in claims primarily related to revenue recognized as progress continued on projects with claims that were in process at the end of fiscal 2013. We regularly evaluate all claim amounts and record appropriate adjustments to operating earnings when it is probable that the claim will result in a different contract value than the amount previously estimated. As a result of this assessment, we recognized revenue and an increase to operating income of \$3.4 million in fiscal 2014. We recognized losses of approximately \$30.2 million related to the evaluation of the collectability of claims in fiscal 2013, primarily related to contractual disputes with government clients.

Billed accounts receivable related to U.S. federal government contracts were \$57.4 million and \$50.5 million at September 28, 2014 and September 29, 2013, respectively. U.S. federal government unbilled receivables were \$73.2 million and \$79.3 million at September 28, 2014 and September 29, 2013, respectively. Other than the U.S. federal government, no single client accounted for more than 10% of our accounts receivable at September 28, 2014 and September 29, 2013.

5. Mergers and Acquisitions

In fiscal 2012, we made acquisitions that enhanced our service offerings and expanded our geographic presence in our ECS and TSS segments. The aggregate purchase price for these acquisitions was \$63.2 million as of the respective acquisition dates. Of this amount, \$42.2 million was paid to the sellers, \$2.0 million was accrued in accordance to the purchase agreements, and \$19.0 million was the estimated fair value of contingent earn-out obligations with an aggregate maximum of \$20.0 million upon the achievement of specified financial objectives.

In the second quarter of fiscal 2013, we acquired American Environmental Group, Ltd. ("AEG"), headquartered in Richfield, Ohio. AEG provides environmental, design, construction and maintenance services primarily to solid and hazardous waste, environmental, energy and utility clients. Also in the second quarter of fiscal 2013, we acquired Parkland Pipeline Contractors Ltd., Parkland Pipeline Equipment Ltd., Park L Projects Ltd. and Parkland Projects Ltd. (collectively, "Parkland"), headquartered in Alberta, Canada. Parkland serves the oil and gas industry in Western Canada, and specializes in the technical support, engineering support and construction of pipelines and oilfield facilities. AEG and

Table of Contents

TETRA TECH, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

5. Mergers and Acquisitions (Continued)

Parkland are both included in our Remediation and Construction Management ("RCM") segment. We also made other acquisitions that enhanced our service offerings and expanded our geographic presence in our Engineering and Consulting Services ("ECS") and Technical Support Services ("TSS") segments during fiscal 2013. The aggregate fair value of the purchase prices for fiscal 2013 acquisitions was \$248.9 million. Of this amount, \$171.6 million was paid to the sellers, \$2.0 million was recorded as liabilities in accordance with the purchase agreements, and \$75.3 million was the estimated fair value of contingent earn-out obligations as of the respective acquisition dates, with an aggregate maximum of \$86.7 million upon the achievement of specified financial objectives. In fiscal 2014, we made immaterial acquisitions that enhanced our service offerings and expanded our geographic presence in our ECS and TSS segments.

Goodwill additions resulting from the above business combinations are primarily attributable to the existing workforce of the acquired companies and the synergies expected to arise after the acquisitions. Specifically, the goodwill additions related to the fiscal 2013 acquisitions primarily represent the value of workforces with distinct expertise in the solid and hazardous waste, and oil and gas markets. In addition, these acquired capabilities, when combined with our existing global consulting and engineering business, result in opportunities that allow us to provide services under contracts that could not have been pursued individually by either us or the acquired companies. The results of these acquisitions were included in the consolidated financial statements from their respective closing dates. The purchase price allocations related to acquisitions completed during fiscal 2014 are preliminary, and subject to adjustment, based on the valuation and final determination of net assets acquired. We do not believe that any such adjustment will have a material effect on our consolidated results of operations. None of the acquisitions were considered material, individually or in the aggregate, to our consolidated financial statements. As a result, no pro forma information has been provided for the respective periods.

Most of our acquisition agreements include contingent earn-out agreements, which are generally based on the achievement of future operating income thresholds. The contingent earn-out arrangements are based on our valuations of the acquired companies, and reduce the risk of overpaying for acquisitions if the projected financial results are not achieved. The fair values of any earn-out arrangements are included as part of the purchase price of the acquired companies on their respective acquisition dates. For each transaction, we estimate the fair value of contingent earn-out payments as part of the initial purchase price and record the estimated fair value of contingent consideration as a liability in "Estimated contingent earn-out liabilities" and "Long-term estimated contingent earn-out liabilities" on the consolidated balance sheets. We consider several factors when determining that contingent earn-out liabilities are part of the purchase price, including the following: (1) the valuation of our acquisitions is not supported solely by the initial consideration paid, and the contingent earn-out formula is a critical and material component of the valuation approach to determining the purchase price; and (2) the former owners of acquired companies that remain as key employees receive compensation other than contingent earn-out payments at a reasonable level compared with the compensation of our other key employees. The contingent earn-out payments are not affected by employment termination.

We measure our contingent earn-out liabilities at fair value on a recurring basis using significant unobservable inputs classified within Level 3 of the fair value hierarchy. We use a probability-weighted discounted income approach as a valuation technique to convert future estimated cash flows to a single present value amount. The significant unobservable inputs used in the fair value measurements are operating income projections over the earn-out period (generally two or three years), and the probability

Table of Contents

TETRA TECH, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

5. Mergers and Acquisitions (Continued)

outcome percentages we assign to each scenario. Significant increases or decreases to either of these inputs in isolation would result in a significantly higher or lower liability with a higher liability capped by the contractual maximum of the contingent earn-out obligation. Ultimately, the liability will be equivalent to the amount paid, and the difference between the fair value estimate and amount paid will be recorded in earnings. The amount paid that is less than or equal to the contingent earn-out liability on the acquisition date is reflected as cash used in financing activities in our consolidated statements of cash flows. Any amount paid in excess of the contingent earn-out liability on the acquisition date is reflected as cash used in operating activities.

We review and re-assess the estimated fair value of contingent consideration on a quarterly basis, and the updated fair value could differ materially from the initial estimates. Changes in the estimated fair value of our contingent earn-out liabilities related to the time component of the present value calculation are reported in interest expense. Adjustments to the estimated fair value related to changes in all other unobservable inputs are reported in operating income. During fiscal years 2014, 2013 and 2012, we recorded net decreases in our contingent earn-out liabilities and reported related net gains in operating income of \$58.7 million, \$9.6 million and \$19.2 million, respectively. The fiscal 2014 gains primarily resulted from updated valuations of the contingent consideration liability for Parkland and AEG. We recognized a net unfavorable operating income adjustment for Parkland related to a single project during fiscal 2014. Adverse weather conditions during fiscal 2014 hindered AEG's ability to complete construction field work. As a result, we lowered our income projections over the remaining earn-out periods and recorded corresponding reductions of the earn-out liabilities for Parkland and AEG. We also determined that these lower income projections were the result of temporary events, and would not negatively impact Parkland and AEG's longer-term performance or result in goodwill impairment. However, if our income projections were to decline further, this could result in the impairment of a portion of the combined related goodwill balance of approximately \$134 million.

At September 28, 2014, there was a total maximum of \$66.0 million of outstanding contingent consideration related to acquisitions. Of this amount, \$7.0 million was estimated as the fair value and

5. Mergers and Acquisitions (Continued)

accrued on our consolidated balance sheet. The following table summarizes the changes in the carrying value of estimated contingent earn-out liabilities:

| | September 28, 2014 | Fiscal Year Ended September 29, 2013 (in thousands) | September 30, 2012 |
|---|-----------------------|--|-----------------------|
| Beginning balance (at fair value) | \$ 81,789 | \$ 51,539 | \$ 75,159 |
| Estimated earn-out liabilities for acquisitions during the fiscal year | 6,242 | 75,253 | 18,981 |
| Earn-out liabilities for acquisitions completed prior to fiscal 2010. | | 250 | 9,974 |
| Increases due to re-measurement of fair value reported in interest expense | 1,846 | 2,433 | 1,374 |
| Net decreases due to re-measurement of fair value reported as gains in operating income | (58,694) | (9,560) | (19,246) |
| Foreign exchange impact | (3,507) | (2,480) | 3,027 |
| Earn-out payments: | | | |
| Reported as cash used in operating activities | (1,984) | (695) | (601) |
| Reported as cash used in investing activities | | (1,279) | (11,773) |
| Reported as cash used in financing activities | (18,662) | (33,672) | (18,055) |
| Settlement of receivables due from sellers | | | (7,301) |
| Ending balance (at fair value) | \$ 7,030 | \$ 81,789 | \$ 51,539 |

6. Goodwill and Intangible Assets

The following table summarizes the changes in the carrying value of goodwill:

| | ECS | TSS | RCM | Total |
|-------------------------------|----------------|------------|------------|------------|
| | (in thousands) | | | |
| Balance at September 30, 2012 | \$ 412,308 | \$ 173,867 | \$ 49,783 | \$ 635,958 |
| Goodwill additions | 14,364 | 3,594 | 145,064 | 163,022 |
| Foreign exchange impact | (16,464) | 118 | (3,242) | (19,588) |
| Goodwill impairment | (56,600) | | | (56,600) |
| Balance at September 29, 2013 | 353,608 | 177,579 | 191,605 | 722,792 |
| Goodwill additions | 11,642 | 8,982 | | 20,624 |
| Foreign exchange impact | (21,619) | (208) | (7,874) | (29,701) |
| Goodwill adjustments | | 161 | 314 | 475 |
| Balance at September 28, 2014 | \$ 343,631 | \$ 186,514 | \$ 184,045 | \$ 714,190 |

Goodwill additions are primarily attributable to acquisitions described in Note 5, "Mergers and Acquisitions" for the respective fiscal years. Substantially all of the goodwill additions are not deductible for income tax purposes. Foreign exchange impact relates to our foreign subsidiaries with functional

6. Goodwill and Intangible Assets (Continued)

currencies that are different than our reporting currency. The gross amounts of goodwill, excluding accumulated impairment, for ECS were \$411.1 million and \$401.1 million for fiscal 2013 and 2014 year-ends, respectively.

We regularly evaluate whether events and circumstances have occurred that may indicate a potential change in recoverability of goodwill. During the third quarter of fiscal 2013, certain of our reporting units experienced declines in their actual and projected financial performance. In Eastern Canada, poor economic conditions, including budget deficits, reduced customer spending, and an on-going government investigation into political corruption in Quebec slowed procurements and business activity in that region. In addition, our work for mining customers continued to slow at a faster pace than previously anticipated due to reduced demand and significant declines in prices for certain metals. To a lesser extent, we also experienced reduced performance from reporting units with a concentration of work for certain agencies of the U.S. federal government as a result of customer budgetary constraints. As a result of these factors, during the third quarter of fiscal 2013, we performed an interim goodwill impairment test for three reporting units in our ECS segment, as follows:

Tetra Tech Canada ("TTC"), with operations primarily in Eastern Canada, particularly Quebec;

Global Mining Practice ("GMP"), with operations primarily in the U.S., Canada, Australia and South America; and

Advanced Management Technology, Inc. ("AMT"), a U.S. federal government contractor primarily doing business with the FAA.

We performed the first step of the impairment test for each of these reporting units during the third quarter of fiscal 2013, and in each case determined that the carrying value of the reporting unit exceeded its fair value indicating potential goodwill impairment. The significant change to the assumptions used in the interim test in the third quarter of fiscal 2013 compared to the last annual impairment test as of July 1, 2012 was the projected revenue, operating income and cash flows for each reporting unit tested.

We performed the second step of the goodwill impairment test to measure the amount of the impairment loss, if any, of the applicable reporting units. The second step of the test requires the allocation of the reporting unit's fair value to its assets and liabilities, including any unrecognized intangible assets, in a hypothetical analysis that calculates the implied fair value of goodwill as if the reporting unit was being acquired in a business combination. If the implied fair value of goodwill is less than the carrying value, the difference is recorded as an impairment loss. Based on the results of the step two analyses, we recorded a \$56.6 million, or \$48.1 million, net of tax, goodwill impairment charge in the third quarter of fiscal 2013 related to the TTC, GMP and AMT reporting units. As of September 28, 2014, the goodwill amounts after the impairment charges for the TTC, GMP and AMT reporting units were \$103.3 million, \$68.5 million and \$32.6 million, respectively.

We perform our annual goodwill impairment review at the beginning of our fiscal fourth quarter. Our last annual review at June 30, 2014 (i.e., the first day of our fiscal fourth quarter), indicated that we had no impairment of goodwill, and all of our reporting units had estimated fair values that were in excess of their carrying values, including goodwill. However, we identified four reporting units that had estimated fair values that exceeded their carrying values by less than 20% including two of the reporting units with

6. Goodwill and Intangible Assets (Continued)

impairment charges in fiscal 2013, TTC and GMP. Due to declines in actual and projected financial performance in fiscal 2014, our Tetra Tech Construction ("CON") reporting unit, which primarily performs civil construction projects, and Parkland also met this criteria. As of September 28, 2014, the goodwill amounts for CON and Parkland were \$47.8 million and \$95.6 million, respectively. Although we believe that our estimates of fair value for these reporting units are reasonable, if financial performance for these reporting units fall significantly below our expectations or market prices for similar business decline, the goodwill for these reporting units could become impaired.

The gross amount and accumulated amortization of our acquired identifiable intangible assets with finite useful lives included in "Intangible assets net" on the consolidated balance sheets, were as follows:

| | Weighted-Average Remaining Life (in years) | Fiscal Year Ended | | | |
|----------------------------|--|--------------------|--|--------------------|--------------------------|
| | | September 28, 2014 | | September 29, 2013 | |
| | | Gross Amount | Accumulated Amortization (\$ in thousands) | Gross Amount | Accumulated Amortization |
| Non-compete agreements | 2.2 | \$ 1,086 | \$ (524) | \$ 6,160 | \$ (5,247) |
| Client relations | 3.8 | 122,198 | (61,117) | 128,839 | (49,189) |
| Backlog | 0.2 | 1,283 | (1,072) | 68,968 | (64,675) |
| Technology and trade names | 2.2 | 2,917 | (1,676) | 4,204 | (2,131) |
| Total | | \$ 127,484 | \$ (64,389) | \$ 208,171 | \$ (121,242) |

The gross amount and accumulated amortization for acquired identifiable assets decreased due to the full amortization of assets in fiscal 2014. Amortization expense for these intangible assets for fiscal 2014, 2013 and 2012 was \$27.3 million, \$32.4 million and \$29.6 million, respectively. Estimated amortization expense for the succeeding five years and beyond is as follows:

| | Amount (in thousands) |
|--------------|-----------------------|
| 2015 | \$ 20,587 |
| 2016 | 16,803 |
| 2017 | 14,560 |
| 2018 | 6,222 |
| 2019 | 2,916 |
| Beyond | 2,007 |
| Total | \$ 63,095 |

7. Property and Equipment

The property and equipment consisted of the following:

| | Fiscal Year Ended | |
|-----------------------------------|--------------------------|----------------------|
| | September 28, | September 29, |
| | 2014 | 2013 |
| | (in thousands) | |
| Land and buildings | \$ 4,029 | \$ 5,565 |
| Equipment, furniture and fixtures | 204,298 | 210,172 |
| Leasehold improvements | 24,478 | 26,429 |
| | | |
| Total property and equipment | 232,805 | 242,166 |
| Accumulated depreciation | (158,941) | (154,140) |
| | | |
| Property and equipment, net | \$ 73,864 | \$ 88,026 |

The depreciation expense related to property and equipment, including assets under capital leases, was \$26.5 million, \$29.5 million and \$26.7 million for fiscal 2014, 2013 and 2012, respectively.

In fiscal 2012, one of our properties met the held for sale classification criteria at fiscal 2012 year-end. This property consists of land and a building at a net book value of \$5.8 million. We estimated the fair value of this property using market values for similar properties, and this is considered a Level 3 measurement as defined in FASB's guidance on "Fair Value Measurements and Disclosures." After adjustment to fair value, the \$2.4 million carrying value of this property was reclassified to "Prepaid expenses and other current assets" in the consolidated balance sheet at September 30, 2012. Additionally, we recorded the related non-cash impairment charge of \$3.4 million in our corporate "Selling, general and administrative expenses" in the consolidated statement of operations for fiscal 2012.

In connection with exit activities related to vacating leased facilities, we recorded a loss of \$2.7 million in the fourth quarter of fiscal 2014. The loss consisted of an accrued liability of \$2.5 million for estimated contract termination costs associated with the long-term non-cancelable leases of those facilities, reduced by \$0.3 million of write-offs of prorated portions of existing deferred items previously recognized in connection with the leases, and \$0.5 million in net write-offs of fixed assets, primarily leasehold improvements, furniture and fixtures, that were no longer in use after vacating the facilities. The loss is recorded in other costs of revenue on the consolidated statements of operations (see Note 10, "Leases" for further information).

8. Income Taxes

The income before income taxes, by geographic area, was as follows:

| | September 28, 2014 | Fiscal Year Ended September 29, 2013 | September 30, 2012 |
|------------------------------------|-----------------------|--|-----------------------|
| | (in thousands) | | |
| Income (loss) before income taxes: | | | |
| United States | \$ 118,900 | \$ 60,547 | \$ 141,035 |
| Foreign | 25,443 | (48,015) | 19,761 |
| Total income before income taxes | \$ 144,343 | \$ 12,532 | \$ 160,796 |

Income tax expense consisted of the following:

| | September 28, 2014 | Fiscal Year Ended September 29, 2013 | September 30, 2012 |
|---|-----------------------|--|-----------------------|
| | (in thousands) | | |
| Current: | | | |
| Federal | \$ 26,503 | \$ 11,155 | \$ 46,058 |
| State | 7,551 | 2,705 | 6,949 |
| Foreign | 1,759 | 11,646 | 8,569 |
| Total current income tax expense | 35,813 | 25,506 | 61,576 |
| Deferred: | | | |
| Federal | 5,957 | (2,965) | (200) |
| State | 434 | (637) | (622) |
| Foreign | (6,536) | (7,866) | (4,690) |
| Total deferred income tax expense (benefit) | (145) | (11,468) | (5,512) |
| Total income tax expense | \$ 35,668 | \$ 14,038 | \$ 56,064 |
